

Sponsored Activity

Federal agencies continue to provide the majority of sponsored funding. As the funding from federal agencies declines, the University is also focused on private foundations and private industry to diversify the portfolio and provide additional sponsored funding.

The Idaho Leads Project, a private grant from the Albertson’s Foundation, contributed to the increase in sponsored revenue for the College of Education for FY13. The second phase of the project extends out until 07-31-14.

The spike in funding in FY13 for Other & Non-Academic is related to a federal grant for the Park-n-Ride Bus storage.
