

**STATE OF IDAHO  
BOARD OF EDUCATION**

**8-YEAR PLAN FOR DELIVERY OF ACADEMIC PRO  
JUNE 17-18, 2004 BOARD MEETING  
MOSCOW**

**PREPARED BY  
THE OFFICE OF THE STATE BOARD OF EDUCATION**

## **Introduction**

The Idaho State Board of Education is charged with general oversight of Idaho's postsecondary educational institutions. As the Board of Regents of the University of Idaho and the governing body of Idaho State University, Boise State University, and Lewis-Clark State College, the Board is responsible for developing and implementing a higher education delivery mechanism that is both effective and efficient.

The effectiveness of the system relates to the provision of courses and programs that respond to the identified needs of Idaho education stakeholders such as students and businesses. System efficiency relates to delivery of education minimizes costs by avoiding unnecessary duplication of programs and courses.

Idaho Code §33-113 charges the Board to define the limits of all public instruction to assure that educational needs are met and in a manner that prevents duplication of services.

In response to these directives, the Board has adopted, through policy, a comprehensive planning process for the coordination and delivery of postsecondary education. The state plan consists of three regional plans: north, southwest, and southeast. These plans are structured to address an eight-year period of time with updates every two years. Academic programs identified in the plans are divided into two types: regional and statewide/unique. Definitions and examples of each type of program are outlined in subsequent sections of the plan.

This planning document presents the following relevant planning information:

- (1) Board of Education authority and scope of responsibility
- (2) Board of Education vision and mission
- (3) Strategic Performance measures
- (4) Existing academic programs
- (5) Proposed or planned academic program additions or changes, and
- (6) Developing collaborations between state institutions.

This document provide a picture of the current delivery of academic offerings at the state's postsecondary institutions, as well as plans to add to those academic offering. As such, it may provide guidance to the Board of Education in the creation of funding and capital budget proposals.

## I. Board of Education Authority and Scope

The authority of the State Board of Education is to oversee higher education academic delivery as well established in law.

- **Article IX, Section 2** of the Idaho Constitution provides that the general supervision of the state educational institutions and public school system of the state of Idaho, shall be vested in a state board of education, the membership, powers and duties of which shall be prescribed by law. The state superintendent of public instruction shall be ex officio member of said board.
- **Idaho Code 33-101** states that the State Board of Education is charged to provide “the general governance of all state education institutions.
- **Idaho Code 33-113** states that the state board, in the interests of efficiency, shall define the limits of all instruction in the educational institutions supported in whole or in part by the state, and, as far as practicable, prevent wasteful duplication of effort in said institutions.
- **Idaho Code 33-116** states that all public schools are under the supervision of the State Board of Education..
- **The Idaho Supreme Court** in *Evans v. Andrus* [124 Idaho 6, 10, 855 P.2d 467, 471 (1993)] stated: “Idaho Const. art. [sic] 9, § 2 clearly vests in the *Board of Education* governance over all state educational institutions and the public school system of Idaho.”
- **The Attorney Generals office**, on multiple occasions, has supported the authority of the State Board over all public educational institutions in Idaho: February 10, 1998 concluded that “the constitution vests in the board of education the authority to determine policy and generally supervise the public schools consistent with state law,” and “vests in the superintendent of public instruction the power and duty to execute the laws of the state and the policies of the board of education with respect to public schools and noted that “[g]eneral authority is the broadest authority because it is not limited or special authority.”

### **Idaho State Board of Education Governing Policies and Procedures**

At its August 14-15, 2003 meeting, the Board approved *Board Policy Section III.Z. Delivery of Postsecondary Education – Planning and Coordination of Academic Programs and Courses*. The stated purpose of this policy is “to ensure that Idaho postsecondary institutions meet the educational and workforce needs of the state through academic planning, alignment of programs and courses, collaboration and coordination. It is the intent of the State Board of Education (the "Board") to optimize the delivery of academic programs while allowing institutions to grow and develop consistent with an appropriate alignment of strengths and sharing of resources. This policy anticipates the use of academic plans to advise and inform the Board in its work to plan and coordinate educational programs in a manner that enhances access to quality programs and courses, while concurrently increasing efficiency, avoiding duplication and maximizing the cost-effective use of educational resources. As part of this process, the Board intends to more clearly identify, reinforce and strengthen the respective statewide missions of the institutions

governed by the Board. The provisions set forth herein are intended to serve as fundamental principles underlying the delivery of postsecondary education pursuant to collaborative and cooperative agreements, or memorandums of understanding, between and among the institutions.”

Passage and implementation of this policy requires the creation of this strategic planning process. Implementation of a strategic planning process is usually initiated with a discussion of organizational vision and mission statements.

## **II. Vision and Mission**

The state Board of Education has approved statements of both vision and mission for Idaho education. These statements are as follows:

### **Vision of the State Board of Education**

The application and impact of this policy may best be viewed within the context of the Board’s stated vision and mission statements. The State Board of Education envisions an accessible, seamless public education system that provides an intelligent and well-informed citizenry capable of active participation in the processes of a democratic government, contributes to the economy and general quality of life in Idaho, opens access to cultural and intellectual resources, and enables all individuals to develop their skills, knowledge, and ability to become contributing members of society.

### **Education Mission of the State Board of Education**

The Idaho education system, consisting of the unique agencies and institutions governed by the Board, delivers public primary/secondary/postsecondary education, training, rehabilitation and information/research services in the state and, on a limited basis, to other states or countries. These agencies and institutions collaborate to provide a diverse population with educational programs and services that are high quality, accessible, relevant and efficient. To that end, the Board has adopted the following goals and objectives for the education system:

- Direct efforts to continuously improve the quality of Idaho’s education, training, rehabilitation and information/research services to gain program competitiveness, high levels of achievement, and a well-informed citizenry.
- Provide individuals of all ages and abilities access to education, training, rehabilitation and information/research services to develop their skills, knowledge and social awareness in order to be globally competitive workers, responsible citizens, and lifelong learners.
- Ensure education, training, rehabilitation and information/research services are relevant to the needs of Idaho’s citizens, workforce, business, industry, and local, state, and federal government.

- Ensure maximum benefit from education resources through efficient operation and management of the education system and investments in student learning centered software.

**Assigned Statewide Missions and Roles for Idaho’s Institutions**

A primary differentiating factor in academic program delivery, outlined in Board Policy Section III.Z., is the assessment of unique statewide missions.

A statewide mission denotes that the institution is assigned by the Board to offer and deliver a program in order to meet a particular educational and workforce need in all regions of the state. As stated in Board Policy III Z – “A statewide mission describes an institution's responsibility for instructional programs that are unique with regard to academic focus. A unique program or course is defined as an academic or vocational program or course, which is offered by and available at only one of the institutions under the governance of the Board. Statewide missions are assigned to institutions by the Board through the role and mission statements.”

In response to the passage of Policy III-Z, the Council on Academic Affairs and Programs (CAAP) held discussions to identify statewide missions that would be assigned to each institution. The result of those discussions was the creation of the following list of programs that are proposed to be assigned to each institution.

**BSU**

Statewide Mission Programs: Primarily responsible for Public Policy and Urban Regional Planning

Program Name	Degrees
Public Policy	M.S., Ph.D.
Public Administration	Ph.D.
Urban Studies	M.S., Ph.D.
Urban Regional Planning	M.S., Ph.D.
Social Work (Southeast Region—shared emphasis with ISU)	M.S.W.
Social Work	Ph.D.

**ISU**

Statewide Mission Programs: Primarily Responsible for Health Professions

Program Name	Degrees
Audiology	M.S., Ph.D.
Physical Therapy	M.S., Ph.D.
Occupational Therapy	M.S., M.O.T.
Pharmaceutical Science	M.S., Ph.D.
Pharmacy Practice	Pharm.D.
Nursing (Southwest shared emphasis with BSU)	M.S.
Nursing	Ph.D.
Physician Assistant	M.P.A.S.
Speech Pathology	M.S.

Deaf Education	M.S.
Educational Interpreting	B.S.
Master of Health Education	M.H.E.
Master of Public Health	M.P.H.
Geomatics (Surveying)	M.S.
Health Physics	B.S., M.S.
Dental Hygiene	B.S., M.S. (currently delivered in Boise)

## UI

Statewide Mission Programs: Primarily Responsible for Agriculture, Architecture, Law and Natural Resources

Program Name	Degrees
Law	J.D.
Architecture	M.S., B.Arch
Landscape Architecture	M.S., B.S.
Interior Design	M.S.
Agriculture <ul style="list-style-type: none"> <li>• Animal Science</li> <li>• Plant Science</li> <li>• Agricultural Economics</li> <li>• Food Science</li> <li>• Veterinary Science</li> </ul>	B.S., M.S. M.S., Ph.D. B.S., M.S. B.S., M.S., Ph.D. M.S., DVM
Natural Resources <ul style="list-style-type: none"> <li>• Forestry &amp; Forest Products</li> <li>• Wildlife</li> <li>• Fisheries (Resources)</li> <li>• Conservation Science</li> <li>• Range Science</li> </ul>	B.S., M.S. (Distance Ed) B.M. B.S., M.S. B.S., M.S. B.S., M.S.

Note: The list of programs included in Section V - Proposed Programs by Region, Year and Institution, is based on and consistent with this proposed list of unique missions.

### III. Postsecondary Performance Measures

In support of its mission for higher education, the Board has adopted key postsecondary performance measures. These measures provide a foundation for program development and delivery. They also establish a set of primary expectations set by the Board of Education for the creation of accountability in Higher Education.

#### 1. Student Applications, Admissions, and Enrollment

Report the headcount of first-year students completing application, being admitted and enrolling at the institution. Use numbers and definitions from the state PSR6.1 Report.

2. **Remediation Activity**  
Report remedial/developmental headcount and credit hours for first-year students. Report institutional total remedial/developmental activity. Use numbers from the state PSR6.2 report.
3. **Student Retention**  
Report the number from the cohort of new first-year students (using the definitions from measure #1) who enroll for the second year (or reach program completion in a professional-technical program of one year or less). Use only first-time, full-time students. Include both the number and percentage of students retained to the second year (enrolled at 10th day of fall semester, or completed by 10th day of fall semester).
4. **Graduation Rates**  
Use the cohort definitions and levels from the IPEDS-GRS Survey. Report the total graduation rate in 100% and 150% of catalog program length for the most recent complete cohort year.
5. **Off-Campus Credit Hour Delivery**  
Report undergraduate, graduate, and vocational-technical credits earned at locations remote to the main campus, by delivery method (traditional, telecommunications, and correspondence). Use totals from the state PSR1.7 report, summed by delivery method and level (graduate, undergraduate). Add corresponding data from vocational-technical programs.
6. **Exam Pass Rates**  
Report the pass rates for programs that have licensing or certification exams. Indicate national or state norms when available.
7. **Employer Satisfaction**  
Provide a brief (one or two pages) summary of employer satisfaction surveys for recent graduates and of the results of the Professional/Technical Completers/Leavers reports. Include both narrative summaries and tabulated data by program where available.
8. **Student Transfer**  
Use institutional transfer numbers from the state student-tracking system. Report institution by institution the number of students transferring to and from your campus. Show the number of transfers for all Idaho institutions and from the out-of-state institutions with the three largest numbers of students transferring to and from campus.
9. **Outreach and Public Service**  
Provide a brief (one or two pages) summary of institutional outreach and public service programs and as executive assessment of outcomes.

**10. Externally Funded Research**

Report the annual dollar amount expended on externally funded research and other external grants and contracts. Provide subtotals for each category.

**11. Degrees and Certificates Awarded**

Use data from IPEDS Completion Survey. Report subtotals for each certificate or degree level and the institutional total.

**12. Collaboration with Other Organizations**

Provide a brief (one or two pages) summary of collaborative efforts with other organizations (public/private) in support of the agency/institution mission.

(Note: These performance measures may be found in the Board of Education document “Strategic Plan – 2000 to 2005.”)

**IV. Existing Programs**

The State Board of Education has established in policy a process for proposing and maintaining higher education academic programs. (Board Policy Section III.G. Instructional Program Approval and Discontinuance). Through this process, an inventory of varied academic programs has been created. This program consists of programs of two primary types: regional and unique/statewide.

**Unique/Statewide Mission**

A unique/statewide mission denotes that the institution is assigned by the Board to offer and deliver a program in order to meet a particular educational and workforce need in all regions of the state. A statewide mission describes an institution's responsibility for instructional programs that are unique with regard to academic focus. A unique/statewide program or course is defined as an academic or vocational program or course, which is offered by and available at only one of the institutions under the governance of the Board. Unique/statewide missions are assigned to institutions by the Board through the role and mission statements.

**Regional Mission**

A regional mission describes an institution's responsibility for instructional programs pertaining to identified educational and workforce needs of primary service regions (identified in Section III, Subsection L. of the Idaho State Board of Education Governing Policies and Procedures). Because similar educational and workforce needs may exist in multiple service regions, programs that are part of an institution's regional mission may be duplicated by other institutions within other service regions.

The following list displays programs that have been approved by the State Board of Education and are currently offered at Idaho’s postsecondary institution. The list is divided by region (North, Southwest, and Southeast). Programs are listed alphabetically by institution. The lists include department and college offering each program and the degrees (AA, BA, BS, MA, MS, EdD, PhD, etc.)

Note: A basic assumption in the inclusion of this section in the plan is that existing programs are in place because they are responding to an existing educational need. For this reason needs assessments for existing programs were not required.

# Program List by Institution

For LCSC: Items in BOLD and/or indented under a BOLD heading are Professional Technical

Institution	Region	Location	City/Community	Program	Degree(s) Offered	College
BSU	3	BSU-Nampa Campus	Caldwell, Nampa	Idaho Professional Truck Driving Training	PTC	Canyon County Center

## **V. Proposed Programs by Region, Year and Institution**

A primary objective of this process is the creation of a listing of academic programs that the postsecondary institutions plan to present for approval over the ensuing eight years.

In order to create the plan, three regional planning meetings were held, led by the home institution each region. Additionally, two statewide planning meetings were held, one for education and one for engineering.

At each meeting, programs were presented and reviewed for each year. Discussions regarding potential conflicts, partnerships, and collaborations between institutions were conducted.

The following list outlines the programs that institutions have identified they will be pursuing for the following eight years. As these are developed, institutions must follow procedures outlined in the Board's Policy Section III.G. Instructional Program Approval and Discontinuance to acquire Board approval prior to implementation.

If the program is to be delivered outside the institution's immediate region, a Memorandum of Understanding (MOU) must be developed and agreed upon in cooperation with the Board's Chief Academic Officer prior to implementation. The MOU template to be utilized will be designed by Board staff.

Note: Needs assessments to support the approval of each of these programs will be required, as part of the approval process included in Board Policy Section III.G.

## Southwest Region

### Eight-Year Plan for Educational Program Development Potential New or Expanded Programs by Year Academic Years 2004-05 through 2011-12

Academic Year	College	Degree Level	Program	Location		
<b>2003-04</b>
