b. Domain 2: Collaborative Leadership - An educational leader promotes the success of all students by ensuring management of the organization, operations and resources for a safe, efficient and effective learning environment. In collaboration with others, uses appropriate data to establish rigorous, concrete goals in the context of student achievement and instructional programs. The educational leader uses research and/or best practices in improving the education program. (3-20-14)

i. Shared Leadership - Principal fosters shared leadership that takes advantage of individual expertise, strengths, and talents, and cultivates professional growth. (3-20-14)

ii. Priority Management - Principal organizes time and delegates responsibilities to balance administrative/managerial, educational, and community leadership priorities.
iii. Transparency - Principal seeks input from stakeholders and takes all perspectives into consideration when making decisions.

iv. Leadership Renewal - Principal strives to continuously improve leadership skills through, professional development, self-reflection, and utilization of input from others.

v. Accountability - Principal establishes high standards for professional, legal, ethical, and fiscal accountability for self and others.

c. Domain 3: Instructional Leadership - An educational leader promotes the success of all students by facilitating the development, articulation, implementation, and stewardship of a vision of learning that is shared and supported by the school community. The educational leader provides leadership for major initiatives and change efforts and uses research and/or best practices in improving the education program.

i. Innovation - Principal seeks and implements innovative and effective solutions that comply with general and special education law.

ii. Instructional Vision - Principal insures that instruction is guided by a shared, research-based instructional vision that articulates what students do to effectively learn.

iii. High Expectations - Principal sets high expectation for all students academically, behaviorally, and in all aspects of student well-being.

iv. Continuous Improvement of Instruction - Principal continuously receives training in assessing teacher performance based upon the Charlotte Danielson Framework for Teaching Second Edition. Aligns resources, policies, and procedures toward continuous improvement of instructional practice guided by the instructional vision.

v. Evaluation - Principal uses teacher/principal evaluation and other formative feedback mechanisms to continuously improve teacher/principal effectiveness.

vi. Recruitment and Retention - Principal recruits and maintains a high quality staff.

02. Professional Practice. For evaluations conducted on or after July 1, 2014, all principals must receive an evaluation in which sixty-seven percent (67%) of the evaluation results are based on Professional Practice. All measures included within the Professional Practice portion of the evaluation must be aligned to the Domains and Components listed in Subsection 121.01.a. through 121.01.c. of this rule. District evaluation models must also include at least one (1) of the following As as a measure to inform the Professional Practice portion of all principal evaluations, district evaluation models shall also include at least one (1) of the following:
a. Parent/guardian input;            (3-20-14)
b. Teacher input;             (3-20-14)
c. Student input; and/or             (3-20-14)
d. Portfolios.              (3-20-14)

03. Student Achievement. For evaluations conducted on or after July 1, 2013, all All
teacher and pupil personnel certificate holders certificated instructional employees, principals and
superintendents must receive an evaluation in which at least thirty-three percent (33%) of the
evaluation results are based on multiple objective measures of growth in student achievement as
determined by the board of trustees and based upon research. For evaluations conducted on or after
July 1, 2014, growth Growth in student achievement as measured by Idaho’s statewide assessment
for Federal accountability purposes must be included. This portion of the evaluation may be
calculated using current and/or past year’s data and may use one (1) or multiple years of data. Growth in student achievement may be considered as an optional measure for all other school
based and district based staff, as determined by the local board of trustees.      (3-20-14)

04. Evaluation Policy - Content. For evaluations conducted on or after July 1, 2014, local Local school district policies must will include, at a minimum, the following information:

a. Purpose -- statements that identify the purpose or purposes for which the evaluation is
being conducted; e.g., individual instructional leadership improvement, personnel decisions.            (3-20-14)

b. Evaluation criteria -- statements of the general criteria upon which principals are be evaluated.         (3-20-14)

c. Evaluator -- identification of the individuals responsible for appraising or evaluating principal performance. The individuals assigned this responsibility shall have received training in evaluation.             (3-20-14)

d. Sources of data -- description of the sources of data used in conducting principal evaluations. -- Parent/guardian input, teacher input, student input and/or portfolios must be considered as sources of data to support professional practice. Proficiency in conducting observations and evaluating effective teacher performance shall be included as one (1) source of data.        (3-20-14)

e. Procedure -- description of the procedure used in the conduct of principal evaluations.        (3-20-14)

f. Communication of results -- the method by which principals are informed of the results
of evaluation.                              (3-20-14)
g. Personnel actions -- the action, available to the school district as a result of the evaluation, and the procedures for implementing these actions; e.g., job status change. (3-20-14)

h. Appeal -- the procedure available to the individual for appeal or rebuttal when disagreement exists regarding the results of an evaluation. (3-20-14)

i. Remediation -- the procedure available to provide remediation in those instances where remediation is determined to be an appropriate course of action. (3-20-14)

j. Monitoring and evaluation. -- A description of the method used to monitor and evaluate the district’s principal evaluation system. (3-20-14)

k. Professional development and training -- a plan for ongoing training for evaluators and principals on the professional learning based upon the district’s evaluation standards, tool and process. (3-20-14)

l. Funding -- a plan for funding ongoing training and professional development for evaluators of principals. (3-20-14)

m. Collecting and using data -- a plan for collecting and using data gathered from the evaluation tool that should will be used to inform professional development for principals. (3-20-14)

n. Individualizing principal evaluation rating system -- a description of the method used to combine Professional Practice (67% of the evaluation) and Student Achievement (33% of the evaluation) to plan for how evaluations will be used to identify level of performance proficiency and record growth over time. No later than July 1, 2014, districts District must shall have established an individualized principal evaluation rating system with a minimum of three (3) rankings ratings used to differentiate performance of principals including:

   i. Unsatisfactory being equal to “1”; (3-20-14)

   ii. Basic being equal to “2”; and (3-20-14)

   iii. Proficient being equal to “3”. (3-20-14)

o. A plan for including stakeholders including, but not limited to, teachers, board members, administrators, and parents in the development and ongoing review of their principal evaluation plan. (3-20-14)

05. Evaluation Policy - Frequency of Evaluation. The evaluation policy must should include a provision for evaluating all principals on a fair and consistent basis. All principals must shall be evaluated at least once annually no later than May 1 of each year. (3-20-14)
06. **Evaluation Policy - Personnel Records.** Permanent records of each principal evaluation must be maintained in the employee’s personnel file. All evaluation records must be kept confidential within the parameters identified in federal and state regulations regarding the right to privacy (Section 33-518, Idaho Code). Local school districts must report the rankings of individual certificated personnel evaluations to the State Department of Education annually for State and Federal reporting purposes. The State Department of Education must ensure that the privacy of all certificated personnel principals is protected by not releasing statistical data of evaluation rankings in local school districts with fewer than five (5) principals and by only reporting that information in the aggregate by local school district. (3-20-14)

07. **Evaluation System Approval.** Each school district board of trustees must develop and adopt policies for principal performance evaluation in which criteria and procedures for the evaluation are research-based and aligned with state standards. By July 1, 2014, an evaluation plan which incorporates all of the above elements must be submitted to the State Department of Education for approval. Once approved, subsequent changes made in the evaluation system must be resubmitted for approval to the State Department of Education. (3-20-14)
SUBJECT
Proposed rule – IDAPA 08.02.03. Rules Governing Thoroughness, Incorporation by Reference/Amended Content Standards – Humanities and Science

REFERENCE
April 2009 Board approved updated Idaho Content Standards for Humanities and Science.

APPLICABLE STATUTE, RULE, OR POLICY
Section 33-1612, Idaho
Idaho Administrative Code, IDAPA.08.02.03 - Rules Governing Thoroughness

BACKGROUND/DISCUSSION
Idaho standards are reviewed every six years by discipline. The Humanities Standards were last reviewed in 2008 and revisions were adopted by the Board in April 2009. Groups of stakeholders from across the state including classroom teachers, university professors, arts and humanities community members, and administrators from Idaho school districts were brought together to conduct the reviews. The group broke into seven committees representing the following disciplines: dance, media arts, music, theatre, visual arts, interdisciplinary humanities, and world languages.

The fine arts committee expanded to include media arts during the review. Previous versions of the Content Standards for Humanities did not include media arts. These standards will be adopted and incorporated by reference into the Administrative Rule. All other disciplines have had standards in place since 2001. Each of the Humanities review committees produced standards in two formats: chart and outline, to best serve classroom educators. Each committee group also produced a white paper that outlines the place of each discipline in the overall curriculum and states major changes from the 2009 version of the Idaho Content Standards in the Humanities disciplines. A total of 48 people on the Executive Committee met in Boise twice for two days to create the new documents and make final recommendations for the Board’s consideration.

In addition to the review of the Humanities content standards, a group of Idaho Science Educators were brought together in March and May of 2015 to review the current K-12 Idaho Content Standards for Science. Like the Idaho Content Standards for Humanities, the standards for science were last updated and adopted by the Board in April of 2009.

The Science Committee’s reviews and revisions allow Idaho schools to select best-suited science standards as per local control. A cross-walk evaluation was conducted by the Idaho Science Standards Committee to determine the links between the current Idaho Standards and the National Research Council’s Framework for K-12 Science Education. The committee determined the old standards lacked depth, rigor, inquiry, problem solving, and hands-on laboratory
experiences. Revisions to the standards are required to correspond to a changing set of requirements for science literacy.

**IMPACT**

The revised Humanities Content standards will allow teachers to utilize best practice in the arts, interdisciplinary humanities, and world language and incorporate not only skills but also essential understandings, essential questions, glossaries, and multiple formats for classroom use. The addition of media arts as a discipline in the fine arts will provide specific skill sets for schools to incorporate new technologies in the arts and reach a larger population of students with interests in media. The new world language standards will allow school districts to follow accepted norms in the areas of proficiencies of various levels of language practice, as these standards are not measured by a specific year, but through proficiencies students can themselves measure. The newly rewritten interdisciplinary standards provide a clearer pathway for educators to devise courses based on their own skills in the arts and humanities.

The revised Science Content standards will increase the rigor and depth of sciences courses for Idaho students and better prepare Idaho’s students for the workforce and postsecondary education.

**ATTACHMENTS**

Attachment 2 – Humanities Content Standards in chart format Page 11
Attachment 3 – Humanities Content Standards in outline format Page 89
Attachment 6 – Humanities Executive Committee Members Page 275
Attachment 4 – Glossaries for five fine arts disciplines Page 279
Attachment 5 – White papers for all disciplines Page 313
Attachment 7 – Science Content Standards Page 327

**STAFF COMMENTS AND RECOMMENDATIONS**

The Board’s Indian Education Committee provided recommendations to the Department of Education on additional amendments they would like considered as part of the review for the Humanities Content Standards. The review committee did not receive these recommendations until after they had completed the review and recommendations process and they were not considered as part of the amendments the Board is considering at this time.

Through a collaborative, state-led process new K–12 science standards have been developed that are rich in content and practice and arranged in a coherent manner across disciplines and grades to provide all students an internationally-benchmarked science education. These standards are referred to as the Next Generation Science Standards (NGSS) nationally and are also based on the Framework for K–12 Science Education developed by the National Research Council. In addition to an increase in rigor these standards were developed to prepare students for success in the workplace as well as postsecondary education.
Additional information about the NGSS may be found at http://www.nextgenscience.org. The National Research Council developed the Framework in partnership with the American Association for the Advancement of Science, and the National Science Teachers Association and are considered best practice in science education.

Proposed rules have a 21 day comment period prior to returning to the Board for consideration as a pending rule. Based on received comments and Board direction, changes may be made to proposed rules as well as the documents being incorporated by reference into the rule prior to entering the pending stage. All Pending rules will be brought back to the Board for approval prior to submittal to the Department of Administration for publication in the Idaho Administrative Rules Bulletin as a pending rule. Pending rules become effective at the end of the legislative session in which they are submitted. When documents are incorporated by reference into Administrative Rule they have the same force and effect as the regulations outlined directly within the Administrative Rule and may only be amended with Board approval through the rule making process.

BOARD ACTION
I move to approve the amended Idaho Content Standards for Humanities as submitted in Attachment 2 and 3.

Moved by __________ Seconded by __________ Carried: Yes ____ No ____

AND
I move to approve the amended Idaho Content Standards for Science as submitted in Attachment 7.

Moved by __________ Seconded by __________ Carried: Yes ____ No ____

AND
I move to approve the Proposed rule amendments to IDAPA 08.02.03, Rules Governing Thoroughness as submitted in Attachment 1.

Moved by __________ Seconded by __________ Carried: Yes ____ No ____
08.02.03 - RULES GOVERNING THOROUGHNESS

000. LEGAL AUTHORITY.
All rules in this Thoroughness chapter (IDAPA 08.02.03) are promulgated pursuant to the authority of the State Board of Education under Article IX, Section 2 of the Idaho Constitution and under sections 33-116, 33-118, and 33-1612, Idaho Code. Specific statutory references for particular rules are also noted as additional authority where appropriate. 
(4-5-00)

001. TITLE AND SCOPE.

01. Title. These rules shall be known as IDAPA 08.02.03 “Rules Governing Thoroughness.” (4-5-00)

02. Scope. These rules shall govern the thorough education of all public school students in Idaho. 
(4-5-00)

002. WRITTEN INTERPRETATIONS.
Any written interpretations are on file at the office of the State Board of Education at 650 West State Street, Boise, Idaho 83702. 
(3-15-02)

003. ADMINISTRATIVE APPEALS.
Unless otherwise provided for in the Rules of the State Board of Education or in the State Board of Education Governing Policies and Procedures, all administrative appeals allowed by law shall be conducted pursuant to the Idaho Administrative Procedure Act and IDAPA 04.11.01, “Idaho Rules of Administrative Procedure of the Attorney General.” 
(4-5-00)

004. INCORPORATION BY REFERENCE.
The following documents are incorporated into this rule: 
(3-30-07)

01. The Idaho Content Standards. The Idaho Content Standards as adopted by the State Board of Education. Individual subject content standards are adopted in various years in relation to the curricular materials adoption schedule. Copies of the document can be found on the State Board of Education website at www.boardofed.idaho.gov. 
(3-29-10)

a. Driver Education, as revised and adopted on August 21, 2008. 
(3-29-10)
b. Health, as revised and adopted on April 17, 2009. 
(3-29-10)
c. Humanities Categories: 
(3-29-10)
i. Visual Arts, as revised and adopted on April 17, 2009, August 13, 2015; 
(3-29-10)
ii. Dance, as revised and adopted on April 17, 2009; 
(3-29-10)
iii. Drama Theatre, as revised and adopted on April 17, 2009, August 13, 2015; 
(3-29-10)
iv. Interdisciplinary Humanities, as revised and adopted on April 17, 2009, August 13, 2015; 
(3-29-10)
v. Music, as revised and adopted on April 17, 2009; (3-29-10)
vi. World languages, as revised and adopted on April 17, 2009. (3-29-10)

vii. Media Arts, as adopted on August 13, 2015 (_____

d. English Language Arts, as revised and adopted on August 11, 2010. (4-7-11)
e. Limited English Proficiency, as revised and adopted on August 21, 2008. (3-29-10)
f. Mathematics, as revised and adopted on August 11, 2010. (4-7-11)
g. Physical Education, as revised and adopted on April 17, 2009. (3-29-10)
h. Science, as revised and adopted on April 17, 2009. (3-29-10) (______)
i. Social Studies, as revised and adopted on August 13, 2015. (4-7-11)
j. Information and Communication Technology, as revised and adopted on April 22, 2010. (4-7-11)

008. DEFINITIONS H - S.

01. Interdisciplinary or Integrated Assessment. Assessment based on tasks that measures a student’s ability to apply concepts, principles, and processes from two (2) or more subject disciplines to a project, issue, or problem. (4-5-00)

02. International Baccalaureate (IB) - Administered by the International Baccalaureate Organization, the IB program provides a comprehensive liberal arts course of study for students in their junior and senior years of high school. IB students take end-of-course exams that may qualify for college credit. Successful completion of the full course of study leads to an IB diploma. (4-11-06)

03. Interdisciplinary Study. An approach to learning in two or more disciplines that enables students to identify and apply authentic connections and integrate essential concepts that transcend individual disciplines.

04. Laboratory. A laboratory science course is defined as one in which at least one (1) class period each week is devoted to providing students with the opportunity to manipulate equipment, materials, specimens or develop skills in observation and analysis and discover, demonstrate, illustrate or test scientific principles or concepts. (4-11-06)

05. Learning Plan. The plan that outlines a student’s program of study, which should include a rigorous academic core and a related sequence of electives in academic, professional-technical education (PTE), or humanities aligned with the student’s post graduation goals. (4-11-06)

06. Narrative. Text in any form (print, oral, or visual) that recounts events or tells a story. (4-5-00)

07. Norm-Referenced Assessment. Comparing a student’s performance or test result to performance of other similar groups of students; (e.g., he typed better than eighty percent (80%) of his classmates.) (4-5-00)

08. On-Demand Assessment. Assessment that takes place at a predetermined time and place. Quizzes, state tests, SATs, and most final exams are examples of on-demand assessment. (4-5-00)

09. Performance Assessment. Direct observation of student performance or student work and professional judgment of the quality of that performance. Good quality performance assessment has pre-established
0910. **Performance-Based Assessment.** The measurement of educational achievement by tasks that are similar or identical to those that are required in the instructional environment, as in performance assessment tasks, exhibitions, or projects, or in work that is assembled over time into portfolio collections. (4-5-00)

1011. **Performance Criteria.** A description of the characteristics that will be judged for a task. Performance criteria may be holistic, analytic trait, general or specific. Performance criteria are expressed as a rubric or scoring guide. Anchor points or benchmark performances may be used to identify each level of competency in the rubric or scoring guide. (4-5-00)

1112. **Phonics.** Generally used to refer to the system of sound-letter relationships used in reading and writing. Phonics begins with the understanding that each letter (or grapheme) of the English alphabet stands for one (1) or more sounds (or phonemes). (4-5-00)

1213. **Portfolio.** A collection of materials that documents and demonstrates a student’s academic and work-based learning. Although there is no standard format for a portfolio, it typically includes many forms of information that exhibit the student’s knowledge, skills, and interests. By building a portfolio, students can recognize their own growth and learn to take increased responsibility for their education. Teachers, mentors, and employers can use portfolios for assessment purposes and to record educational outcomes. (4-5-00)

1314. **Professional Development.** A comprehensive, sustained, timely, and intensive process to improve effectiveness of teachers and administrators in raising student achievement, which:

a. Aligns with rigorous state academic achievement standards, local educational agency goals, school improvement goals, effective technology integration, and Common Core standards. (4-4-13)

b. Utilizes data driven instruction using a thorough review and continual evaluation of data on teacher and student performance to define clear goals and distinct outcomes. (4-4-13)

c. Provides opportunities that are individualized enough to meet distinct and diverse levels of need for teachers and administrators. (4-4-13)

d. Is facilitated by well-prepared school administrators, coaches, mentors, master teachers, lead teachers, or third-party providers under contract with the State Department of Education, school district, or charter school, and supported by external research, expertise, or resources. (4-4-13)

e. Fosters a collective responsibility by educators within the school for improved student performance and develops a professional learning community. (4-4-13)

1415. **Project based learning.** A hands-on approach to learning that encourages students to create/interpret/communicate an original work or project and assesses quality and success of learning through performance/presentation/production of that work or project.

103. **INSTRUCTION GRADES 1-12.**

01. **Instruction.** Instruction is inclusive of subject matter, content and course offerings. Patterns of instructional organization are a local school district option. Schools will assure students meet locally developed standards with the state standards as a minimum.* (*This includes special instruction that allows limited English proficient students to participate successfully in all aspects of the school’s curriculum and keep up with other students in the regular education program. It also includes special learning opportunities for accelerated, learning disabled students and students with other disabilities.) (4-5-00)

02. **Instructional Courses.** At appropriate grade levels, instruction will include but not be limited to the following: (4-11-06)
a. Language Arts and Communication will include instruction in reading, writing, English, literature, technological applications, spelling, speech and listening, and, in elementary schools, cursive writing. (3-20-14)

b. Mathematics will include instruction in addition, subtraction, multiplication, division, percentages, mathematical reasoning and probability. (4-1-97)

c. Science will include instruction in applied sciences, earth and space sciences, physical sciences, and life sciences. (4-1-97)

d. Social Studies will include instruction in history, government, geography, economics, current world affairs, citizenship, and sociology. (4-1-97)

104. OTHER REQUIRED INSTRUCTION.
Other required instruction for all students and other required offerings of the school are: (4-1-97)

01. Elementary Schools. (4-11-06)

a. The following section outlines other information required for all elementary students, as well as other required offerings of the school:

   Fine Arts (art and music)
   Health (wellness)
   Physical Education (fitness) (4-11-06)

b. Additional instructional options as determined by the local school district. For example:

   Languages other than English
   Career Awareness (4-1-97)

02. Middle Schools/Junior High Schools. (4-11-06)

a. No later than the end of Grade eight (8) each students shall develop parent-approved student learning plans for their high school and post-high school options. The learning plan shall be developed by students with the assistance of parents or guardians, and with advice and recommendation from school personnel. It shall be reviewed annually and may be revised at any time. The purpose of a parent-approved student learning plan is to outline a course of study and learning activities for students to become contributing members of society. A student learning plan describes, at a minimum, the list of courses and learning activities in which the student will engage while working toward meeting the school district’s or LEA’s graduation standards. The school district or LEA will have met its obligation for parental involvement if it makes a good faith effort to notify the parent or guardian of the responsibility for the development and approval of the learning plan. A learning plan will not be required if the parent or guardian requests, in writing, that no learning plan be developed. (4-11-06)

b. A student must have taken pre-algebra before the student will be permitted to enter grade nine (9). (3-12-14)

c. Other required instruction for all middle school students:

   Health (wellness)
   Physical Education (fitness) (4-11-06)

d. Other required offerings of the school:

   Family and Consumer Science
   Fine & Performing Arts
   Professional Technical Education
   Advisory Period (middle school only, encouraged in junior high school) (4-11-06)
03. High Schools.  

   a. High schools must offer a wide variety of courses to satisfy state and local graduation requirements. High schools are required to provide instructional offerings in Physical Education (fitness) and Professional Technical Education.  

   b. High schools will annually review and update with the student the parent-approved student learning plans outlined in Subsection 104.02.a.  

105. HIGH SCHOOL GRADUATION REQUIREMENTS.  

A student must meet all of the requirements identified in this section before the student will be eligible to graduate from an Idaho high school. The local school district or LEA may establish graduation requirements beyond the state minimum.  

01. Credit Requirements. The State minimum graduation requirement for all Idaho public high schools is forty-six (46) credits and must include twenty-nine (29) credits in core subjects as identified in Paragraphs 105.01.c. through 105.01.i.  

   a. Credits. (Effective for all students who enter the ninth grade in the fall of 2010 or later.) One (1) credit shall equal sixty (60) hours of total instruction. School districts or LEA’s may request a waiver from this provision by submitting a letter to the State Department of Education for approval, signed by the superintendent and chair of the board of trustees of the district or LEA. The waiver request shall provide information and documentation that substantiates the school district or LEA’s reason for not requiring sixty (60) hours of total instruction per credit.  

   b. Mastery. A student may also achieve credits by demonstrating mastery of a subject’s content standards as defined and approved by the local school district or LEA.  

   c. Secondary Language Arts and Communication. Nine (9) credits are required. Eight (8) credits of instruction in Language Arts. Each year of Language Arts shall consist of language study, composition, and literature and be aligned to the Idaho Content Standards for the appropriate grade level. One (1) credit of instruction in communications consisting of oral communication and technological applications that includes a course in speech, a course in debate, or a sequence of instructional activities that meet the Idaho Speech Content Standards requirements.  

   d. Mathematics. Six (6) credits are required. Secondary mathematics includes Applied Mathematics, Business Mathematics, Algebra, Geometry, Trigonometry, Fundamentals of Calculus, Probability and Statistics, Discrete Mathematics, and courses in mathematical problem solving and reasoning. AP Computer Science, Dual Credit Computer Science, and Dual Credit Engineering courses may also be counted as a mathematics credit if the student has completed Algebra II standards. Students who choose to take AP Computer Science, Dual Credit Computer Science, and Dual Credit Engineering may not concurrently count such courses as both a math and science credit.  

      i. Students must complete secondary mathematics in the following areas:  

         (1) Two (2) credits of Algebra I or courses that meet the Idaho Algebra I Content Standards as approved by the State Department of Education;  

         (2) Two (2) credits of Geometry or courses that meet the Idaho Geometry Content Standards as approved by the State Department of Education; and  

         (3) Two (2) credits of mathematics of the student’s choice.
ii. Two (2) credits of the required six (6) credits of mathematics must be taken in the last year of high school in which the student intends to graduate. For the purposes of this subsection, the last year of high school shall include the summer preceding the fall start of classes. Students who return to school during the summer or the following fall of the next year for less than a full schedule of courses due to failing to pass a course other than math are not required to retake a math course as long as they have earned six (6) credits of high school level mathematics. 
(3-12-14)

iii. Students who have completed six (6) credits of math prior to the fall of their last year of high school, including at least two (2) semesters of an Advanced Placement or dual credit calculus or higher level course, are exempt from taking math during their last year of high school. High School math credits completed in middle school shall count for the purposes of this section. 
(3-12-14)

e. Science. Six (6) credits are required, four (4) of which will be laboratory based. Secondary sciences include instruction in applied sciences, earth and space sciences, physical sciences, and life sciences. Up to two (2) credits in AP Computer Science, Dual Credit Computer Science, and Dual Credit Engineering may be used as science credits. Students who choose to take AP Computer Science, Dual Credit Computer Science, and Dual Credit Engineering may not concurrently count such courses as both a math and science credit. 
(3-12-14)

i. Secondary sciences include instruction in the following areas: biology, physical science or chemistry, and earth, space, environment, or approved applied science. Four (4) credits of these courses must be laboratory based. 
(3-29-10)

f. Social Studies. Five (5) credits are required, including government (two (2) credits), United States history (two (2) credits), and economics (one (1) credit). Courses such as geography, sociology, psychology, and world history may be offered as electives, but are not to be counted as a social studies requirement. 
(3-29-10)

g. Arts and Humanities. Two (2) credits are required. Arts and Humanities courses include instruction in visual arts, music, theatre, dance, media arts, or world language aligned to the Idaho content standards for those subjects. Other courses such as literature, history, philosophy, architecture, or comparative world religions A course in Interdisciplinary Humanities may satisfy the humanities standards if the course is aligned to the Idaho Interdisciplinary Humanities Content Standards. 
(3-29-10)

h. Health/Wellness. One (1) credit is required. Course must be aligned to the Idaho Health Content Standards. Effective for all public school students who enter grade nine (9) in Fall 2015 or later, each student shall receive a minimum of one (1) class period on psychomotor cardiopulmonary resuscitation (CPR) training as outlined in the American Heart Association (AHA) Guidelines for CPR to include the proper utilization of an automatic external defibrillator (AED) as part of the Health/Wellness course. 
(3-12-14)

i. Students participating in one (1) season in any sport recognized by the Idaho High School Activities Association or club sport recognized by the local school district, or eighteen (18) weeks of a sport recognized by the local school district may choose to substitute participation up to one (1) credit of physical education. Students must show mastery of the content standards for Physical Education in a format provided by the school district. 
(4-1-15)
**Creating**

Enduring Understanding: Choreographers use a variety of sources as inspiration and transform concepts and ideas into movement for artistic expression.

**Essential Question(s):** Where do choreographers get ideas for dances?

**Anchor Standard 1:** Generate and conceptualize artistic ideas and work.

Anchor Standard 2: Organize and develop artistic ideas and work.

Enduring Understanding: The elements of dance, dance structures, and choreographic devices serve as both a foundation and a departure point for choreographers.

Plan

Essential Question(s): What influences choice-making in creating choreography?

Enduring Understanding: The elements of dance, dance structures, and choreographic devices serve as both a foundation and a departure point for choreographers.

Anchor Standard 2: Organize and develop artistic ideas and work.

b. Express an idea or feeling, or image, through improvised movement moving alone or with a partner.

d. Choose movements that express a main idea or emotion, or follow a musical phrase. Explain reasons for movement choices.

</table>

b. Improvise dance that has a beginning, middle, and end.

d. Improvise a series of movements that have a beginning, middle, and end, and describe movement choices.

b. Improvise a dance phrase with a beginning, a middle that has a main idea, and a clear end.

d. Improvise a dance phrase with a beginning, a middle that has a main idea, and a clear end.

b. Identify and experiment with choreographic devices to create simple movement patterns and dance structures (for example, AB, ABA, theme and development).

d. Identify and experiment with choreographic devices to create simple movement patterns and dance structures (for example, AB, ABA, theme and development).

b. Manually or modify choreographic devices to expand movement possibilities and create a variety of movement patterns and structures. Discuss movement choices.

d. Manually or modify a variety of choreographic devices to expand movement possibilities and develop a main idea. Explain reasons for movement choices.

b. Explore choreographic devices and dance structures to develop a dance study that supports an artistic intent. Articulate reasons for movement and structural choices.

d. Explore choreographic devices and dance structures to develop a dance study with a clear artistic intent. Articulate reasons for movement and structural choices.

b. Use a variety of choreographic devices and dance structures to choreograph an original dance study or dance with a clear artistic intent. Articulate the group process for making movement and structural choices.

d. Use a variety of choreographic devices and dance structures to support an artistic intent. Explain how the dance structures clarify the artistic intent.

b. Collaborate to select and apply a variety of choreographic devices and dance structures to choreograph an original dance study or dance with a clear artistic intent. Articulate the group process for making movement and structural choices.

d. Collaborate to design a dance using choreographic devices and dance structures to support an artistic intent. Explain how the dance structures clarify the artistic intent.

b. Collaborate to design a dance using choreographic devices and dance structures to support an artistic intent. Explain how the dance structures clarify the artistic intent.

d. Collaborate to design a dance using choreographic devices and dance structures to support an artistic intent. Explain how the dance structures clarify the artistic intent.

b. Review and critique personal artistic works and those of others.

d. Develop a dance study or dance that communicates a personal or cultural meaning. Discuss how the dance communicates nonverbally.

b. Develop a dance study by selecting a specific movement vocabulary to communicate a main idea. Discuss the reasons and effectiveness of the movement choices.

d. Develop a dance study by selecting a specific movement vocabulary to communicate a main idea. Discuss how the dance communicates nonverbally.

b. Determine artistic criteria to choreograph a dance study that communicates personal or cultural meaning. Based on the criteria, evaluate why some movements are more or less effective than others.

d. Determine artistic criteria to choreograph a dance study that communicates personal or cultural meaning. Based on the criteria, evaluate why some movements are more or less effective than others.

b. Define and apply artistic criteria to choreograph a dance that communicates personal or cultural meaning. Discuss how the criteria clarify or intensify the meaning of the dance.

d. Define and apply artistic criteria to choreograph a dance that communicates personal or cultural meaning. Discuss how the criteria clarify or intensify the meaning of the dance.

b. Use a variety of choreographic devices and dance structures to design a dance study for an original dance study or dance. Discuss how the use of movement elements, choreographic devices and dance structures serve to communicate the artistic statement.

d. Use a variety of choreographic devices and dance structures to design a dance study for an original dance study or dance. Discuss how the use of movement elements, choreographic devices and dance structures serve to communicate the artistic statement.

b. Work individually and collaboratively to design and implement a variety of choreographic devices and dance structures to choreographing original dances. Justify choreographic choices and explain how they are used to intensify artistic intent.

d. Work individually and collaboratively to design and implement a variety of choreographic devices and dance structures to choreographing original dances. Justify choreographic choices and explain how they are used to intensify artistic intent.

b. Collaborate to design a dance using choreographic devices and dance structures to support an artistic intent. Explain how the dance structures clarify the artistic intent.

d. Collaborate to design a dance using choreographic devices and dance structures to support an artistic intent. Explain how the dance structures clarify the artistic intent.

b. Implement a variety of choreographic devices and dance structures to create a variety of movement possibilities and structural choices.

d. Implement a variety of choreographic devices and dance structures to create a variety of movement possibilities and structural choices.

b. Collaborate to design a dance using choreographic devices and dance structures to support an artistic intent. Explain how the dance structures clarify the artistic intent.

d. Collaborate to design a dance using choreographic devices and dance structures to support an artistic intent. Explain how the dance structures clarify the artistic intent.

b. Work individually and collaboratively to design and implement a variety of choreographic devices and dance structures to choreographing original dances. Justify choreographic choices and explain how they are used to intensify artistic intent.

d. Work individually and collaboratively to design and implement a variety of choreographic devices and dance structures to choreographing original dances. Justify choreographic choices and explain how they are used to intensify artistic intent.

b. Demonstrate fluency and personal voice in designing and choreographing original dances. Justify choreographic choices and explain how they are used to intensify artistic intent.

d. Demonstrate fluency and personal voice in designing and choreographing original dances. Justify choreographic choices and explain how they are used to intensify artistic intent.

b. Discuss how the structure of the dance is designed and collaboratively implemented to create a variety of movement possibilities and structural choices.

d. Discuss how the structure of the dance is designed and collaboratively implemented to create a variety of movement possibilities and structural choices.

b. Collaborate to design a dance using choreographic devices and dance structures to support an artistic intent. Explain how the dance structures clarify the artistic intent.

d. Collaborate to design a dance using choreographic devices and dance structures to support an artistic intent. Explain how the dance structures clarify the artistic intent.

b. Develop an artistic statement that reflects a personal aesthetic for an original dance study or dance. Discuss how the criteria clarify or intensify the meaning of the dance.

d. Develop an artistic statement that reflects a personal aesthetic for an original dance study or dance. Discuss how the criteria clarify or intensify the meaning of the dance.

b. Develop an artistic statement that reflects a personal aesthetic for an original dance study or dance. Discuss how the criteria clarify or intensify the meaning of the dance.

d. Develop an artistic statement that reflects a personal aesthetic for an original dance study or dance. Discuss how the criteria clarify or intensify the meaning of the dance.

b. Articulate how the criteria, use of movement elements, choreographic devices and dance structures serve to communicate the artistic statement.

d. Articulate how the criteria, use of movement elements, choreographic devices and dance structures serve to communicate the artistic statement.

b. Discuss how the structure of the dance is designed and collaboratively implemented to create a variety of movement possibilities and structural choices.

d. Discuss how the structure of the dance is designed and collaboratively implemented to create a variety of movement possibilities and structural choices.

b. Explain the goal or purpose of the dance study.

d. Explain the goal or purpose of the dance study.

b. Discuss how the dance communicates nonverbally.

d. Discuss how the dance communicates nonverbally.

b. Discuss how the dance study communicates a personal or cultural meaning. Based on the criteria, evaluate why some movements are more or less effective than others.

d. Discuss how the dance study communicates a personal or cultural meaning. Based on the criteria, evaluate why some movements are more or less effective than others.

b. Discuss how the dance study communicates a personal or cultural meaning. Based on the criteria, evaluate why some movements are more or less effective than others.

d. Discuss how the dance study communicates a personal or cultural meaning. Based on the criteria, evaluate why some movements are more or less effective than others.

b. Discuss how the dance study communicates a personal or cultural meaning. Based on the criteria, evaluate why some movements are more or less effective than others.

d. Discuss how the dance study communicates a personal or cultural meaning. Based on the criteria, evaluate why some movements are more or less effective than others.

b. Discuss how the dance study communicates a personal or cultural meaning. Based on the criteria, evaluate why some movements are more or less effective than others.

d. Discuss how the dance study communicates a personal or cultural meaning. Based on the criteria, evaluate why some movements are more or less effective than others.

b. Discuss how the dance study communicates a personal or cultural meaning. Based on the criteria, evaluate why some movements are more or less effective than others.

d. Discuss how the dance study communicates a personal or cultural meaning. Based on the criteria, evaluate why some movements are more or less effective than others.
Essential Question(s): How do choreographers use self-reflection, feedback from others, and documentation to improve the quality of their work?

Enduring Understanding: Choreographers analyze, evaluate, refine, and document their work to communicate meaning.

Anchor Standard 3: Refine and complete artistic work.

Performing

- a. Demonstrate same-sided and cross-body locomotor and non-locomotor movements, body patterning, movements, and body shapes.
- b. Move safely in general space and start and stop on cue during activities, group formations, and creative explorations while maintaining personal space.
- c. Identify and apply different characteristics to movements (for example, slow, smooth, or wavy).
- d. Demonstrate movement characteristics along with movement vocabulary (for example, use adverbs and adjectives that apply to movement such as a bouncy leap, a floppy fall, a jolly jump, and joyful spin).
- e. Select and apply appropriate characteristics to movements (for example, selecting specific adverbs and adjectives and apply them to movements).
- f. Change use of energy and dynamics by modifying movements and applying specific characteristics to heighten the effect of their intent.
- g. Develop and refine artistic techniques and work for presentation.
- h. Use the internal body force created by varying tensions within one’s musculature for movement initiation and dynamic expression. Distinguish between bound and freeflowing movements.
- i. Direct energy and dynamics in such a way that movement is textured. Incorporate energy and dynamics to technique and dance performance. Use energy and dynamics to enhance and project movements.
- j. Connect energy and dynamics by applying them in and through all parts of the body. Develop total body awareness so that movement phrases demonstrate variances of energy and dynamics.
- k. Initiate movement phrases by applying energy and dynamics. Vary energy and dynamics over the length of a phrase and transition smoothly out of the phrase and into the next phrase, paying close attention to its movement initiation and energy.
- l. Modulate dynamics to clearly express intent while performing dance phrases and choreography. Perform movement sequences expressively using a broad dynamic range and employ dynamic skills for establishing relationships with other dancers and projecting to the audience.

- a. Demonstrate a range of locomotor and non-locomotor movements, body patterning, body shapes, and directionality.
- b. Move safely in general space through a range of activities and group formations while maintaining personal space.
- c. Move safely in a variety of spatial relationships and formations with other dancers, sharing and maintaining personal space.
- d. Adjust body-use to coordinate with a partner or other dancers to safely change levels, directions, and pathway designs.
- e. Execute techniques that extend movement boundaries, build strength, and develop endurance. Explain the relationship between execution of technique, safe body-use, and healthful nutrition.
- f. Demonstrate safe body-use practices during technical exercises and movement combinations. Discuss how these practices, along with healthy eating habits, promote strength, flexibility, endurance and injury prevention.
- g. Apply body-use strategies to accommodate physical maturation development to technical dance skills (for example, alignment, coordination, balance, core support, kinesthetic awareness, clarity of movement, weight shifts, flexibility/range of motion).
- h. Apply body-use strategies to accommodate physical maturation development to technical dance skills (for example, alignment, coordination, balance, core support, kinesthetic awareness, clarity of movement, weight shifts, flexibility/range of motion).
- i. Apply technical dance skills (for example, functional alignment, coordination, balance, core support, clarity of movement, weight shifts, flexibility/range of motion) to replicate, recall, and execute technical dance phrases.
- j. Apply technical dance skills (for example, functional alignment, coordination, balance, core support, clarity of movement, weight shifts, flexibility/range of motion) to replicate, recall, and execute technical dance phrases.
- k. Apply technical dance skills (for example, functional alignment, coordination, balance, core support, clarity of movement, weight shifts, flexibility/range of motion) to replicate, recall, and execute technical dance phrases.
- l. Apply technical dance skills (for example, functional alignment, coordination, balance, core support, clarity of movement, weight shifts, flexibility/range of motion) to replicate, recall, and execute technical dance phrases.

- a. Apply body-mind principles to technical dance skills in complex choreography when performing solo, partnering, or dancing in ensemble works in a variety of dance genres and styles. Self-evaluate performances and discuss and analyze performance ability with others.
- b. Research healthful and safe practices for dancers and modify personal practice based on findings. Discuss how research informs practice.

- a. Demonstrate a range of locomotor and non-locomotor movements, body patterning, and dance sequences that require moving through space using a variety of pathways.
- b. Demonstrate body shapes, movement patterns, and movement sequences that allow dancers to safely change levels, directions, and pathway designs.
- c. Identify and apply different characteristics to movements (for example, slow, smooth, or wavy).
- d. Change use of energy and dynamics by modifying movements and applying specific characteristics to heighten the effect of their intent.
- e. Develop and refine artistic techniques and work for presentation.
- f. Use the internal body force created by varying tensions within one’s musculature for movement initiation and dynamic expression. Distinguish between bound and freeflowing movements.
- g. Direct energy and dynamics in such a way that movement is textured. Incorporate energy and dynamics to technique and dance performance. Use energy and dynamics to enhance and project movements.
- h. Connect energy and dynamics by applying them in and through all parts of the body. Develop total body awareness so that movement phrases demonstrate variances of energy and dynamics.
- i. Initiate movement phrases by applying energy and dynamics. Vary energy and dynamics over the length of a phrase and transition smoothly out of the phrase and into the next phrase, paying close attention to its movement initiation and energy.
- j. Modulate dynamics to clearly express intent while performing dance phrases and choreography. Perform movement sequences expressively using a broad dynamic range and employ dynamic skills for establishing relationships with other dancers and projecting to the audience.

- a. Demonstrate same-sided and cross-body locomotor and non-locomotor movements, body patterning, movements, and body shapes.
- b. Move safely in general space and start and stop on cue during activities, group formations, and creative explorations while maintaining personal space.
- c. Identify and apply different characteristics to movements (for example, slow, smooth, or wavy).
- d. Demonstrate movement characteristics along with movement vocabulary (for example, use adverbs and adjectives that apply to movement such as a bouncy leap, a floppy fall, a jolly jump, and joyful spin).
- e. Select and apply appropriate characteristics to movements (for example, selecting specific adverbs and adjectives and apply them to movements).
- f. Change use of energy and dynamics by modifying movements and applying specific characteristics to heighten the effect of their intent.
- g. Develop and refine artistic techniques and work for presentation.
- h. Use the internal body force created by varying tensions within one’s musculature for movement initiation and dynamic expression. Distinguish between bound and freeflowing movements.
- i. Direct energy and dynamics in such a way that movement is textured. Incorporate energy and dynamics to technique and dance performance. Use energy and dynamics to enhance and project movements.
- j. Connect energy and dynamics by applying them in and through all parts of the body. Develop total body awareness so that movement phrases demonstrate variances of energy and dynamics.
- k. Initiate movement phrases by applying energy and dynamics. Vary energy and dynamics over the length of a phrase and transition smoothly out of the phrase and into the next phrase, paying close attention to its movement initiation and energy.
- l. Modulate dynamics to clearly express intent while performing dance phrases and choreography. Perform movement sequences expressively using a broad dynamic range and employ dynamic skills for establishing relationships with other dancers and projecting to the audience.
| c. Move body parts in relation to other body parts and repeat and recall movements upon request. |
| c. Modify movements and spatial arrangements upon request. |
| c. Repeat movements, with an awareness of self and others in space. Self-adjust and modify movements or placement upon request. |
| c. Recall movement sequences with a partner or in group dance activities. Apply constructive feedback from teacher and self-check to improve dance skills. |
| c. Coordinate phrases and timing with other dancers by cueing off each other and responding to stimuli (for example, music, text, or lighting). Reflect on feedback from others to inform personal dance performance goals. |
| c. Collaborate with peers to practice and refine dances by identifying what works and what does not work in executing complex patterns, sequences, and formations. Solve movement problems by testing options and finding good results. Document self-improvements over time. |
| c. Collaborate with peers to discover strategies for achieving performance accuracy, clarity, and expressiveness. Articulate personal performance goals and practice to reach goals. Document personal improvement over time (for example, journaling, portfolio, or timeline). |
| c. Collaborate with peers to establish and implement a rehearsal plan to meet performance goals. Use a variety of strategies to analyze and evaluate performances of self and others (for example, use video recordings of practice to analyze the difference between the way movements look and how they feel to match performance with visual affect). Articulate performance goals and justify reasons for selecting particular practice strategies. |
| c. Collaborate as an ensemble to refine dances by identifying what works and does not work in executing complex patterns, sequences, and formations. Solve movement problems by testing options and finding good results. Document self-improvements over time. |
| c. Plan and execute collaborative and independent practice and rehearsal processes with attention to technical and artistic expression. Use a range of rehearsal strategies to achieve performance excellence. |
| c. Collaborate with peers to practice and refine dances. Develop group performance expectations through observation and analyses (for example, view live or recorded professional dancers and collaboratively develop group performance expectations based on information gained from observations). |
| c. Collaborate with peers to discover strategies for achieving performance accuracy, clarity, and expressiveness. Articulate personal performance goals and practice to reach goals. Document personal improvement over time (for example, journaling, portfolio, or timeline). |
| c. Collaborate with peers to establish and implement a rehearsal plan to meet performance goals. Use a variety of strategies to analyze and evaluate performances of self and others (for example, use video recordings of practice to analyze the difference between the way movements look and how they feel to match performance with visual affect). **Anchor Standard 6: Convey meaning through the presentation of artistic work.**

**Enduring Understanding:** Dance performance is an interaction between performer, production elements, and audience that heightens and amplifies artistic expression.

**Essential Question(s):** How does a dancer heighten artistry in a public performance?

<tr>
<td>Analyze</td>
<td>a. Find a movement that repeats in a dance.</td>
<td>b. Demonstrate or describe observed or performed dance movements</td>
<td>b. Demonstrate and describe observed or performed dance movements in a specific genre or culture</td>
<td>b. Demonstrate and describe observed or performed dance movements in different genres or cultures.</td>
<td>b. Demonstrate and explain how one dance genre is different from another, or how one cultural movement practice is different from another.</td>
<td>b. Demonstrate and explain how dance styles differ within a genre or within a cultural movement practice.</td>
<td>b. Describe, using basic dance terminology, the qualities and characteristics of style used in a dance from one's own cultural movement practice. Compare them to the qualities and characteristics of style found in a different dance genre, style, or cultural movement practice, also using basic dance terminology.</td>
</tr>
</tbody>
</table>

**Dance**

**Anchor Standard 7: Perceive and analyze artistic work**

**Enduring Understanding:** Dance is perceived and analyzed to comprehend its meaning.

**Essential Question(s):** How is a dance understood?

**Responding**

- Find a movement that repeats in a dance to make a pattern.
- Find movements in a dance that develop a pattern.
- Find patterns of movement in dance works that create a style or theme.
- Find meaning or artistic intent from the patterns of movement in a dance work.
- Describe or demonstrate recurring patterns of movement and their relationships in dance.
- Compare, contrast, and discuss patterns of movement and their relationships in dance in context of artistic intent.
- Describe, demonstrate, and discuss patterns of movement and their relationships in dance.
- Compare, contrast, and discuss patterns of movement and their relationships in dance.
- Describe, demonstrate and discuss patterns of movement and their relationships in dance in context of artistic intent.
- Describe recurring patterns of movement and their relationships in dance in context of artistic intent.
- Analyze recurring patterns of movement and their relationships in dance in context of artistic intent.
- Analyze dance works and provide examples of recurring patterns of movement and their relationships that create well-structured and meaningful choreography.

**Kindergarten 1st 2nd 3rd 4th 5th 6th 7th 8th HS Proficient HS Accomplished HS Advanced**
### Enduring Understanding

- **Essential Question(s):** What criteria are used to evaluate dance?
- **Enduring Understanding:** Criteria for evaluating dance vary across genres, styles, and cultures.
- **Anchor Standard 9:** Apply criteria to evaluate artistic work.

- **Essential Question(s):** How is dance interpreted?
- **Enduring Understanding:** Dance is interpreted by considering intent, meaning, and artistic expression as communicated through the use of the body, elements of dance, dance technique, dance structure, and context.
- **Anchor Standard 8:** Interpret intent and meaning in artistic work.

### HS Proficient

- **Essential Question(s):** How is dance interpreted?
- **Enduring Understanding:** Dance is interpreted by considering intent, meaning, and artistic expression as communicated through the use of the body, elements of dance, dance technique, dance structure, and context.
- **Anchor Standard 8:** Interpret intent and meaning in artistic work.

- **Essential Question(s):** What criteria are used to evaluate dance?
- **Enduring Understanding:** Criteria for evaluating dance vary across genres, styles, and cultures.
- **Anchor Standard 9:** Apply criteria to evaluate artistic work.

### HS Accomplished

- **Essential Question(s):** How is dance interpreted?
- **Enduring Understanding:** Dance is interpreted by considering intent, meaning, and artistic expression as communicated through the use of the body, elements of dance, dance technique, dance structure, and context.
- **Anchor Standard 8:** Interpret intent and meaning in artistic work.

- **Essential Question(s):** What criteria are used to evaluate dance?
- **Enduring Understanding:** Criteria for evaluating dance vary across genres, styles, and cultures.
- **Anchor Standard 9:** Apply criteria to evaluate artistic work.

### HS Advanced

- **Essential Question(s):** How is dance interpreted?
- **Enduring Understanding:** Dance is interpreted by considering intent, meaning, and artistic expression as communicated through the use of the body, elements of dance, dance technique, dance structure, and context.
- **Anchor Standard 8:** Interpret intent and meaning in artistic work.

- **Essential Question(s):** What criteria are used to evaluate dance?
- **Enduring Understanding:** Criteria for evaluating dance vary across genres, styles, and cultures.
- **Anchor Standard 9:** Apply criteria to evaluate artistic work.
Dance

Anchor Standard 10: Synthesize and relate knowledge and personal experiences to make art.

Enduring Understanding: As dance is experienced, all personal experiences, knowledge, and contexts are integrated and synthesized to interpret meaning.

Essential Question(s): How does dance deepen our understanding of ourselves, other knowledge, and events around us?

<table>

**Synthesize**

- a. Recognize and name an emotion that is experienced when watching, improvising, or performing dance and relate it to a personal experience.
- b. Observe a work of visual art. Describe and then express through movement something of interest about the artwork, and ask questions for discussion concerning the artwork.
- c. Observe illustrations from a story. Discuss observations and identify ideas for dance movement and demonstrate the big ideas of the story.
- d. Observe a dance work using an inquiry-based set of questions (for example, See, Think, Wonder). Create movement using ideas from responses and explain how certain movements express a specific idea.
- e. Ask and research a question about a key aspect of a dance that communicates a perspective about an issue or event. Explore the key aspect through movement. Share movements and describe how the movements help to remember or discover new qualities in these key aspects. Communicate the new learning in oral, written, or movement form.
- f. Develop and research a question relating to a topic of study in school using multiple sources of information about our social issue of great interest. Use the information to create a dance idea. Explain how the dance study process is similar to, or different from, other learning situations.
- g. Choose a topic, concept, or content from another discipline of study and research how other art forms have expressed the topic. Create a dance study that expresses the idea. Explain how the dance study process is similar to, or different from, other learning situations.
- h. Conduct research using a variety of resources to find information about a social issue of great interest. Use the information to create a dance study that expresses the idea. Explain how the dance study process is similar to, or different from, other learning situations.
- i. Research the historical development of a dance genre or style. Use knowledge gained from the research to create a dance study that evokes the essence of the style or genre. Share the study with peers as part of a lecture demonstration. Tell the story of the historical context and its changes in one's own context and its relationships to personal perspectives.
- j. Investigate two contrasting topics using a variety of research methods. Identify and organize ideas to create representational movement phrases. Create a dance study exploring the contrasting ideas. Discuss how the research informed the choreographic process and deepens understanding of the topics.
- k. Collaboratively identify a dance related question or problem. Conduct research through sources of information about the question. Gather new perspectives and ideas to support the dance that answers the question posed. Create and perform a dance that answers the question. Discuss how the dance communicates new perspectives or realizations. Compare orally or in writing the process used in choreography to that of other creative, academic, or scientific procedures.
- l. Use established research methods and techniques to investigate a topic. Collaborate with others to identify questions and solve movement problems that pertain to the topic. Create and perform a dance that answers a question. Discuss how the dance communicates new perspectives or realizations. Compare orally or in writing the insights relating to knowledge gained through the research process, the synergy of collaboration, and the transfer of learning from this project to other learning situations.

**Connecting**

- a. Find an expression or portrayal in a dance that relates to a familiar experience. Identify the movements that communicate this experience.
- b. Describe, create, and/or perform a dance that expresses personal meaning and explain how certain movements express this personal meaning.
- c. Relate the main idea or content in a dance to other experiences. Explain how the main idea of a dance is similar to or different from one's own experiences, relationships, ideas or perspectives.
- d. Compare two dances with contrasting themes. Discuss feelings and ideas evoked by each. Describe how the themes and movements relate to points of view and experiences.
- e. Observe the movement characteristics or qualities observed in a specific dance genre. Describe differences and similarities about what was observed to one's attitudes and movement preferences.
- f. Compare and contrast the movement characteristics or qualities found in a variety of dance genres. Discuss how the movement characteristics or qualities differ from one's own movement characteristics or qualities and how different perspectives are communicated.
- g. Relate connections found between different dances and discuss the relevance of the connections to the development of one's personal perspectives.
- h. Analyze a dance to determine the ideas expressed by the choreographer. Explain how the perspectives expressed by the choreographer may impact one's own interpretation. Provide evidence to support one's analysis.
- i. Synthesize information learned and share new ideas about its context and its impact on one's perspective. Review original choreography developed over time with respect to its content and context and its relationship to personal perspectives. Reflect on and analyze the variables that contributed to changes in one's personal growth.

**Reflect**

- a. Create and perform a group dance that answers a topic. Discuss orally or in writing the process used in choreography to that of other creative, academic, or scientific procedures.
- b. Use established research methods and techniques to investigate a topic. Collaborate with others to identify questions and solve movement problems that pertain to the topic. Create and perform a dance that answers the question. Discuss how the dance communicates new perspectives or realizations. Compare orally or in writing the insights relating to knowledge gained through the research process, the synergy of collaboration, and the transfer of learning from this project to other learning situations.
- c. Analyze a dance that is related to content learned in other subjects and research its context. Synthesize information learned and share new ideas about its context and its impact on one's perspective. Review original choreography developed over time with respect to its content and context and its relationship to personal perspectives. Reflect on and analyze the variables that contributed to changes in one's personal growth.
- d. Identify a dance that reflects a possible career choice.
- e. Investigate various dance related careers through a variety of research methods and techniques. Select those careers of most interest. Develop and implement a Capstone Project that reflects a possible career choice.
Anchor Standard 11: Relate artistic ideas and works with societal, cultural, and historical context to deepen understanding

Enduring Understanding: Dance literacy includes deep knowledge and perspectives about societal, cultural, historical, and community contexts.

Essential Question(s): How does knowing about societal, cultural, historical and community experiences expand dance literacy?

## Definition

The Interdisciplinary Humanities course is a pathway for learners to discover and understand the human experience through a balanced and integrated combination of the arts and/or humanities with inclusion of **two or more** of the following content areas: architecture, philosophy, literature, world religions, visual and media arts, music, dance, theater, history and world languages.

## Purpose

In order to prepare students both to appreciate and apply the role of the arts and humanities in critical thinking and creative problem solving, an interdisciplinary humanities course will explore the human experience through the analysis and interpretation of themes, issues, and/or movements. The Interdisciplinary Humanities course will encourage students to become lifelong explorers who discover their connectedness to the records of lived experiences outside of their own individual social and cultural context. Through the creation/interpretation/communication of an original work and through the performance/presentation/production of that work, students are able to gain new perspectives.

## Design

The Interdisciplinary Humanities course should provide a well-rounded, thematic hands-on experience. The course is intended to integrate content from **two or more** arts and humanities disciplines. This course must be built upon the following five anchor standards: connect and compare, respond, create, present, and reflect. The standards for the Interdisciplinary Humanities course do not provide discipline content; the content should be derived from the selected disciplines.
### Anchor Standard 1

**Anchor Standard 1**: Connect and compare ideas, diverse cultures, and events through two or more disciplines.

**Enduring Understanding**: Sources of inspiration are transformed into works that express the human experience.

**Essential Question(s):**
- What inspires people or cultures to create?
- What connections and comparisons between ideas, cultures, and events can be made?
- What is the relationship of a work to its time/culture?

### Goal CC1

Understand the interdisciplinary relationships of ideas, cultures, and events.

- **Objective CC1.1**: Develop a working vocabulary for the disciplines of study.
- **Objective CC1.2**: Identify and articulate how a work expresses the human experience.

### Goal CC2

Identify the relationship between two or more works/disciplines and how the historical contexts of ideas, cultures, and events are represented.

- **Objective CC2.1**: Identify, in context, events and people influential in the development of historical events, movements, themes, and cultures.
- **Objective CC2.2**: Explain how an artifact or work symbolizes and reflects a particular culture, event, theme, movement, or time period.

### Goal CC3

Understand how the human experience is represented through the arts and humanities.

- **Objective CC3.1**: Identify the ways in which the structure of an art or discipline mirrors or portrays the values of society.
- **Objective CC3.2**: Evaluate original works and how they represent a historical event, theme, movement, and/or culture.
## ANCHOR STANDARD 2

**Respond**

**Anchor Standard 2:** Respond to universal themes, issues, and/or movements that express the human experience.

**Enduring Understanding:** Human experience repeats itself.

**Essential Questions(s):**
- How do themes, issues, and/or movements shape the human experience?
- How do we learn from the human experience?

**Goal RES1**

- Conduct analyses in the arts and humanities disciplines.
  - **Objective RES1.1** Summarize how the human experience is expressed through the arts and humanities.
  - **Objective RES1.2** Interpret content knowledge from multiple perspectives and/or sources.
  - **Objective RES1.3** Discover how key themes, issues, and/or movements are conveyed through the arts and humanities.

## ANCHOR STANDARD 3

**Create**

**Anchor Standard 3:** Create original works or unique interpretations that demonstrate knowledge of themes, issues, and/or movements that express the human experience.

**Enduring Understanding:** Through the creative process, people make meaning by investigating and developing awareness of perceptions, knowledge, and experiences.

**Essential Question(s):**
- How does creating enrich people’s lives?
- How do people contribute to awareness and understanding of their lives and the lives of their communities through the creative process?
- What role does persistence play in the creative process?

**Goal CR1**

- Communicate in the arts and humanities disciplines through creative expression
  - **Objective CR1.1** Express, through means other than expository writing, an understanding and appreciation of the arts and humanities.
  - **Objective CR1.2** Engage in collaborative learning to foster the creative process.
  - **Objective CR1.3** Create an original product that interprets and/or investigates themes, issues, and/or movements.
  - **Objective CR1.4** Revise, refine and develop an original work.
### ANCHOR STANDARD 4

**Present**

**Anchor Standard 4:** Convey meaning through the presentation/performance/production of an original work or unique interpretation of a work.

**Enduring Understanding:** Connections between multiple disciplines are visible through the presentation/performance of original works.

**Essential Question(s):**
- How does sharing original work deepen interdisciplinary understanding of ourselves and the human experience?
- How do we select the best method of performance/presentation/production to convey meaning?

**Goal PR1**

- Perform/present/produce an original work or interpretation of a work for an audience.
  - **Objective PR1.1** Combine knowledge and understanding from two or more disciplines to present/perform their original or interpreted works for an audience.
  - **Objective PR1.2** Convey meaning through their presentation/performance.

**Goal PR2**

- Justify choices made in creating or interpreting a work.
  - **Objective PR2.1** Apply knowledge and understanding from two or more disciplines to justify choices in the creation/interpretation of works.
  - **Objective PR2.2** Engage in constructive critique with peers.

### ANCHOR STANDARD 5

**Reflect**

**Anchor Standard 5:** Reflect on the process of creating/interpreting/presenting a work.

**Enduring Understanding:** Reflection on the creative process deepens understanding of the content and the creator.

**Essential Question(s):**
- How is the quality of a performance/presentation/production determined?
- When does the creator know that a work is finished?
- How do the arts and humanities enhance and empower our lives?

**Goal REF1**

- Evaluate one’s own work and the works of others as reflections of the themes, issues, and/or movements addressed in the course.
  - **Objective REF1.1** Utilize and apply a set of aesthetic criteria in evaluating the quality of one’s own work and works of others.
  - **Objective REF1.2** Respond to critique and criteria to revise or justify one’s own work.

**Goal REF2**

- Reflect upon the potential of the arts and humanities to enhance and expand one’s worldview.
### Media Arts

<table>
<thead>
<tr>
<th>Anchor Standard 1: Generate and conceptualize artistic ideas and work.</th>
<th>Enduring Understanding: Media arts ideas, works, and processes are shaped by the imagination, creative processes, and by experiences, both within and outside of the arts.</th>
<th>Essential Question(s): How do media artists generate ideas? How can ideas for media arts productions be formed and developed to be effective and original?</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Kindergarten (MA:Cr1.1)</strong></td>
<td><strong>1</strong>&lt;sup&gt;st&lt;/sup&gt; (MA:Cr1.1.2)</td>

### Anchor Standard 9: Apply criteria to evaluate artistic work.

**Enduring Understanding:** Skillful evaluation and critique are critical components of experiencing, appreciating, and producing media artworks.

**Essential Question(s):** How and why do media artists value and judge media artworks? When and how should we evaluate and critique media artworks to improve them?
**Media Arts**

### Anchor Standard 10: Synthesize and relate knowledge and personal experiences to make art.

**Enduring Understanding:** Media artworks synthesize meaning and form cultural experience.

**Essential Question(s):** How do we relate knowledge and experiences to understanding and making media artworks? How do we learn about and create meaning through producing media artworks?

**Enduring Understanding:** Media artworks synthesize meaning and form cultural experience.

**Anchor Standard 11: Relate artistic ideas and works with societal, cultural, and historical context to deepen understanding.**

**Enduring Understanding:** Media artworks and ideas are better understood and produced by relating them to their purposes, values, and various contexts.

**Essential Question(s):** How does media arts relate to its various contexts, purposes, and values? How does investigating these relationships inform and deepen the media artist’s understanding and work?

#### Relate

**MA:Cn11.1.1**

- a. Discuss how media artworks and ideas relate to everyday and cultural life, such as popular media, and connections with family and friends.
- b. Identify how media artworks and ideas relate to everyday and cultural life and can influence values and online behavior.
- c. Explain verbally and/or in media environments.

**MA:Cn11.1.2**

- a. With guidance, interact safely and appropriately with media arts tools and environments.
- b. Examine and interact appropriately with media arts tools and environments, considering safety, rules, and fairness.

**MA:Cn11.1.3**

- a. With guidance, describe media artworks and ideas in everyday life, such as popular media, and connections with family and friends.
- b. Discuss and describe media environments.

**MA:Cn11.1.4**

- a. Discuss how media artworks and ideas relate to everyday and cultural life, such as popular media, and connections with family and friends.
- b. Examine and interact appropriately with media arts tools and environments.
- c. Analyze and interact appropriately with media arts tools and environments, considering safety, rules, and fairness.

**MA:Cn11.1.5**

- a. Discuss how media artworks and ideas relate to everyday and cultural life, such as popular media, and connections with family and friends.
- b. Examine and interact appropriately with media arts tools and environments, considering safety, rules, and fairness.
- c. Analyze and interact appropriately with media arts tools and environments, considering safety, rules, and fairness.

**MA:Cn11.1.6**

- a. Discuss how media artworks and ideas relate to everyday and cultural life, such as popular media, and connections with family and friends.
- b. Examine and interact appropriately with media arts tools and environments, considering safety, rules, and fairness.
- c. Analyze and interact appropriately with media arts tools and environments, considering safety, rules, and fairness.

**MA:Cn11.1.7**

- a. Discuss how media artworks and ideas relate to everyday and cultural life, such as popular media, and connections with family and friends.
- b. Examine and interact appropriately with media arts tools and environments, considering safety, rules, and fairness.
- c. Analyze and interact appropriately with media arts tools and environments, considering safety, rules, and fairness.

**MA:Cn11.1.8**

- a. Discuss how media artworks and ideas relate to everyday and cultural life, such as popular media, and connections with family and friends.
- b. Examine and interact appropriately with media arts tools and environments, considering safety, rules, and fairness.
- c. Analyze and interact appropriately with media arts tools and environments, considering safety, rules, and fairness.

**MA:Cn11.1.I**

- a. Demonstrate and explain how media artworks and ideas relate to various contexts, purposes, and values, such as democracy, environment, and connecting people and places.
- b. Critically evaluate and ethically interact with legal, technological, systemic, and vocational contexts of media arts ideas and works to various contexts, purposes, and values, such as markets, systems, propaganda, and truth.

**MA:Cn11.1.II**

- a. Demonstrate and explain how media artworks and ideas relate to various contexts, purposes, and values, such as democracy, environment, and connecting people and places.
- b. Critically evaluate and ethically interact with legal, technological, systemic, and vocational contexts of media arts ideas and works to various contexts, purposes, and values, such as markets, systems, propaganda, and truth.

**MA:Cn11.1.III**

- a. Demonstrate how media artworks and ideas relate to personal/cultural identity.
- b. Critically evaluate and ethically interact with legal, technological, systemic, and vocational contexts of media arts ideas and works to various contexts, purposes, and values, such as markets, systems, propaganda, and truth.
### Music - Composition and/or Theory Strand

#### Anchor Standard 1: Generate and conceptualize artistic ideas and work.

**Enduring Understanding:** The creative ideas, concepts, and feelings that influence musicians' work emerge from a variety of sources.

**Essential Question(s):** How do musicians generate creative ideas?

<table>

**Present**
## Music - Music Technology Strand

### Enduring Understanding: Performers' interest in and knowledge of musical works, understanding of their own technical skill, and the context for a performance

#### Performance: Present
- **HS Proficient:** Using digital tools, demonstrate attention to technical accuracy and expressive qualities in a varied repertoire of music.
- **HS Accomplished:** Using digital tools and resources, demonstrate technical accuracy and expressive qualities in prepared and improvised performances of a varied repertoire of music representing diverse cultures, styles, and genres.
- **HS Advanced:** Integrating digital and analog tools and resources, demonstrate an understanding and attention to technical accuracy and expressive qualities of the music in prepared and improvised performances of a varied repertoire of music representing diverse cultures, styles, genres, and historical periods.

#### Performance: Perform
- **HS Proficient:** Apply appropriate criteria as well as feedback from multiple sources and develop and implement varied strategies to improve and refine the technical and expressive aspects of prepared and improvised performances in varied programs of music.
- **HS Accomplished:** Develop and implement rehearsal strategies to improve and refine the technical and expressive aspects of prepared and improvised performances in a varied repertoire of music.
- **HS Advanced:** Identify and implement rehearsal strategies to improve the technical and expressive qualities in prepared and improvised performances of a varied repertoire of music.

#### Performance: Select
- **HS Proficient:** Develop and explain the criteria used for selecting a varied repertoire of music based on interest, music reading skills, and an understanding of the performer’s technical and technological skill.
- **HS Accomplished:** Develop and apply criteria to select a varied repertoire to study and perform based on interest; an understanding of theoretical and structural characteristics of the music; and the performer’s technical skill using digital tools and resources.
- **HS Advanced:** Develop and apply criteria to select varied programs to study and perform based on interest, an understanding of the theoretical and structural characteristics, as well as expressive challenges in the music, and the performer’s technical skill using digital tools, resources, and systems.

#### Performance: Rehearse, Evaluate, & Refine
- **HS Proficient:** Demonstrate how context, expressive challenges, and use of digital tools in a varied repertoire of music influence prepared or improvised performances.
- **HS Accomplished:** Demonstrate how understanding the style, genre, context, and use of digital tools and resources in a varied repertoire of music influences prepared or improvised performances and performers’ ability to connect with audiences.
- **HS Advanced:** Demonstrate how understanding the style, genre, context, and integration of digital technologies in a varied repertoire of music informs and influences prepared and improvised performances and their ability to connect with audiences.

## Essential Question(s): How do musicians improve the quality of their performance?

- Performers' interest in and knowledge of musical works, understanding of their own technical skill, and the context for a performance

## Performer's interest in and knowledge of musical works, understanding of their own technical skill, and the context for a performance

- Essential Question(s): How do musicians interpret musical works?

## Performers make interpretive decisions based on their understanding of context and expressive intent.

- Essential Question(s): How do performers interpret musical works?

## Performers' interest in and knowledge of musical works, understanding of their own technical skill, and the context for a performance

- Essential Question(s): How does understanding the structure and context of musical works inform performance?

<tr>
<td><strong>COMM 1:</strong> Interact with others in the target language and gain meaning from interactions in the target language.</td>
</tr>
<tr>
<td>Novice</td>
</tr>
<tr>
<td>Expresses self in conversations that are based upon very familiar topics. Can access a variety of words, phrases, simple sentences, and questions that have been highly practiced and memorized.</td>
</tr>
<tr>
<td>Respond to basic questions about themselves and others using a series of highly practiced or memorized phrases.</td>
</tr>
<tr>
<td>Communicate about self, others and everyday life using a series of highly practiced or memorized phrases.</td>
</tr>
</tbody>
</table>

| **Interpretive**                      |
| **COMM 2:** Discover meaning from what is heard, read or viewed on a variety of topics in the target language. |
| Novice | Intermediate | Advanced |
| List key characters and main events from developmentally appropriate narratives based on familiar themes. | Identify the principal characters and discuss the main idea and themes with a piece of literature. | Discuss main ideas and key details of live/recorded discussions, lectures, and presentations from the target culture. |
| Identify people and objects within their environment based on oral and written descriptions. | Locate key ideas/items in authentic materials and relate them to people and objects in their own lives. | Analyze main plot, subplot, characters, their descriptions, roles and significance in authentic literary texts. |
| Report out the content of brief written messages and short personal notes on familiar topics such as family, school events, and celebrations. | Restate information and react to messages within short articles or video clips from the target culture. | Summarize principal elements of non-fiction articles on topics of current and historical importance to members of the target culture. |
| Interpret the meaning of gestures, intonation, and other visual or auditory clues. | Use knowledge acquired in other settings and from other subject areas to comprehend spoken and written messages in the target language. | Compare and contrast cultural nuances of meaning in written and spoken language as expressed by native speakers from the target culture in both formal and informal setting. |

| **Presentational**                      |
| **COMM 3:** Utilize appropriate media to present an idea to an audience |
| Novice | Intermediate | Advanced |
| Present information about themselves or others using simple sentences or memorized phrases. | Express their opinions and state facts about themselves using a series of sentences. | Deliver an organized presentation about a variety of topics that is appropriate for their audience. |

<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>TH:Cr2-K.</strong></td>
<td>a. With prompting and support, interact with peers and contribute to dramatic play or a guided drama experience (e.g., process drama, story drama, creative drama).</td>
</tr>
<tr>
<td><strong>TH:Cr2-1.</strong></td>
<td>b. With prompting and support, express original ideas in dramatic play or a guided drama experience (e.g., creative drama, process drama, story drama).</td>
</tr>
</tbody>
</table>

| **TH:Cr2-2.** | a. Contribute to the development of a sequential plot in a guided drama experience (e.g., process drama, story drama, creative drama). |
| **TH:Cr2-3.** | b. Contribute ideas and make decisions as a group to advance a story in a guided drama experience (e.g., process drama, story drama, creative drama). |

| **TH:Cr2-4.** | a. Participate in methods of investigation to devise original ideas for a drama/theatre work. |
| **TH:Cr2-5.** | b. Compare ideas with peers and make selections that will enhance and deepen group drama/theatre work. |

| **TH:Cr2-6.** | a. Devise original ideas for a drama/theatre work that reflect collective inquiry about characters and their given circumstances. |
| **TH:Cr2-7.** | b. Make and discuss group decisions and identify responsibilities required to present a drama/theatre work informally to an audience. |

| **TH:Cr2-8.** | a. Use critical analysis to improve, refine, and evolve original ideas and artistic choices in a devised or scripted drama/theatre work. |
| **TH:Cr2-I.** | b. Demonstrate mutual respect for self and others and their roles in preparing or devising drama/theatre work. |

| **TH:Cr2-II.** | a. Articulate and apply critical analysis, background knowledge, research, and historical and cultural context to the development of original ideas for a drama/theatre work. |
| **TH:Cr2-III.** | b. Share leadership and responsibilities to develop collaborative goals when preparing or devising drama/theatre work. |

| **HS Proficient** | a. Explore the function of history and culture in the development of a dramatic concept through a critical analysis of original ideas in a drama/theatre work. |
| **HS Accomplished** | b. Investigate the collaborative nature of the actor, director, playwright, and designers and explore their interdependent roles in a drama/theatre work. |
| **HS Advanced** | a. Refine a dramatic concept to demonstrate a critical understanding of historical and cultural influences of original ideas applied to a drama/theatre work. |

| **Develop** | a. Collaborate as a creative team to discover artistic solutions and make interpretive choices in a devised or scripted drama/theatre work. |

**Note:** The table above outlines the development of skills in creating and developing artistic ideas and work, with specific objectives for each grade level from Kindergarten to high school. The table includes descriptions of how students are expected to contribute and develop their skills over time, focusing on the integration of critical analysis, historical and cultural context, and collaborative decision-making in their dramatic pursuits.
Rehearse

Creating

Enduring Understanding: Theatre artists refine their work and practice their craft through rehearsal.

Essential Question(s): How do theatre artists transform and edit their initial ideas?

### Anchor Standard 9: Apply criteria to evaluate artistic work.

**Enduring Understanding:** Theatre artists apply criteria to investigate, explore, and assess drama and theatre work.

**Essential Question(s):** How are the theatre artist's processes and the audience's perspectives impacted by analysis and synthesis?

| K | TH:Re9.1.K. | 1 | TH:Re9.1.1. | 2 | TH:Re9.1.2. | 3 | TH:Re9.1.3. | 4 | TH:Re9.1.4. | 5 | TH:Re9.1.5. | 6 | TH:Re9.1.6. | 7 | TH:Re9.1.7. | 8 | TH:Re9.1.8. | HS Proficient | TH:Re9.1.8. | HS Accomplished | HS Advanced |
| **Responding** | **Evaluate** | | | | | | | | | | | | | | | | | | |
| a. With prompting and support, actively engage with others in dramatic play or a guided drama experience (e.g., process drama, story drama, creative drama). | a. Propose a plan to evaluate drama/theatre work. | a. Develop and implement a plan to evaluate drama/theatre work. | a. Use supporting evidence and criteria to evaluate drama/theatre work. | a. Explain preferences, using supporting evidence and criteria to evaluate drama/theatre work. | a. Respond to a drama/theatre work using supporting evidence, personal aesthetics, and artistic criteria. | a. Examine a drama/theatre work using supporting evidence and criteria, while considering art forms, history, culture, and other disciplines. | a. Analyze and assess a drama/theatre work by connecting it to art forms, history, culture, and other disciplines using supporting evidence and criteria. | a. Research and synthesize cultural and historical information related to a drama/theatre work to support or evaluate artistic choices. | | | | | | | | | | | | | |
| b. Identify props and costumes that might be used in a guided drama experience (e.g., process drama, story drama, creative drama). | b. Use a prop or costume in a guided drama experience (e.g., process drama, story drama, creative drama) to describe characters, settings, or events. | b. Investigate how technical elements may support a theme or idea in a drama/theatre work. | b. Assess how technical elements represent the theme of a drama/theatre work. | b. Consider the aesthetics of the production elements used in a drama/theatre work to assess aesthetic choices. | b. Apply the production elements used in a drama/theatre work to assess aesthetic choices. | a. Analyze and synthesize cultural and historical information related to a drama/theatre work to support or evaluate artistic choices. | a. Research and synthesize cultural and historical information related to a drama/theatre work to support or evaluate artistic choices. | | | | | | | | | | | | | |
| c. Compare and contrast the experiences of characters in a guided drama experience (e.g., process drama, story drama, creative drama). | c. Evaluate and analyze problems and situations in a drama/theatre work from an audience perspective. | c. Observe how a character's choices impact an audience's perspective in a drama/theatre work. | c. Recognize how a character's circumstances impact an audience's perspective in a drama/theatre work. | c. Identify a specific audience or purpose for a drama/theatre work. | c. Assess the impact of a drama/theatre work on a specific audience. | c. Formulate a deeper understanding and appreciation of a drama/theatre work by considering its specific purpose or intended audience. | c. Compare and debate the connection between a drama/theatre work and contemporary issues that may impact audiences. | | | | | | | | | | | | | |
## Enduring Understanding:
- Theatre artists understand and can communicate their creative process as they analyze the way the world may be understood.
- Theatre artists allow awareness of interrelationships between self and others to influence and inform their work.

## Anchor Standards

Respond to community and social issues and incorporate other content areas in a guided drama experience (e.g., process drama, story drama, creative drama). | a. Identify universal themes or common social issues and express them through a guided drama experience. | a. Incorporate music, dance, art, and/or media to strengthen the meaning and impact of a drama/theatre work with a particular cultural, global, or historic context. | a. Use different forms of drama/theatre work to examine contemporary social, cultural, or global issues. | a. Use drama/theatre work to examine social, cultural, or global issues. | a. Integrate conventions and knowledge from different art forms and other disciplines to develop a crosscultural drama/theatre work. | a. Develop a drama/theatre work that identifies and questions cultural, global, and historic belief systems. |
| b. With prompting and support, tell a short story in a dramatic play or a guided drama experience (e.g., process drama, story drama, creative drama). |
| b. Collaborate on the creation of a short scene based on a fictional literary source in a guided drama experience (e.g., process drama, story drama, creative drama). |
| b. Collaborate on the creation of a short scene based on a non-fiction literary source in a guided drama experience (e.g., process drama, story drama, creative drama). |
| b. Examine how artists have historically presented the same stories using different art forms, genres, or drama/theatre conventions. |
| b. Compare the drama/theatre conventions of a given time period with those of the present. |
| b. Identify historical sources that explain drama/theatre terminology and conventions. |
| b. Investigate the time period and place of a drama/theatre work to better understand performance and design choices. |
| b. Examine artifacts from a time period and location to better understand performance and design choices in a drama/theatre work. |
| b. Examine how personal beliefs and biases can affect the interpretation of research data applied in drama/theatre work. |
| b. Present and support an opinion about the social, cultural, and historical understandings of a drama/theatre work, based on critical research. |

## VISUAL ARTS

### Anchor Standard 1: Generate and conceptualize artistic ideas and work.

**Enduring Understanding: Creativity and innovative thinking are essential life skills that can be developed.**

**Essential Question(s):** What conditions, attitudes, and behaviors support creativity and innovative thinking? What factors prevent or encourage people to take creative risks? How does collaboration expand the creative process?

### Kindergarten

- **VA:Cr1.2.Ka**: Engage collaboratively in creative art-making in response to an artistic problem.
  - Use observation and investigation preparation for making a work of art.
  - Make art or design with various materials and tools to explore personal interests, questions, and curiosity.
  - Apply knowledge of available resources, tools, and technologies to investigate personal ideas through the art-making process.
  - Collaboratively set goals and create artwork that is meaningful and has purpose to the makers.
  - Identify and demonstrate diverse methods of artistic investigation to choose an approach for beginning a work of art.
  - Formulate an artistic investigation of personally relevant content for creating art.
  - Develop criteria to guide making a work of art or design to meet an identified goal.
  - Collaboratively shape an artistic investigation of an aspect of present day life using a contemporary practice of art and design.
  - Choose from a range of materials and methods of traditional and contemporary artistic practices, following or breaking established conventions, to plan the making of multiple works of art and design based on a theme, idea, or concept.
Enduring Understanding: Artists and designers experiment with forms, structures, materials, concepts, media, and art-making approaches.

Essential Question(s): How do artists work? How do artists and designers determine whether a particular direction in their work is effective? How do artists and designers learn from trial and error?

### Anchor Standard 2: Organize and develop artistic ideas and work.

| Enduring Understanding: Artists and designers balance experimentation and safety, freedom and responsibility while developing and creating artworks. Essential Question(s): How do artists and designers care for and maintain materials, tools, and equipment? Why is it important for safety and health to understand and follow correct procedures in handling materials, tools, and equipment? What responsibilities come with the freedom to create? |

<td>Reflect on whether personal artwork conveys the intended meaning and revise accordingly.</td>
<td>Reflect on and explain important information about personal artwork in an artist statement or another format.</td>
<td>Apply relevant criteria to examine, reflect on, and plan revisions for a work of art or design in progress.</td>
<td>Apply relevant criteria from traditional and contemporary cultural contexts to examine, reflect on, and plan revisions for works of art and design in progress.</td>
<td>Engage in constructive critique with peers, then reflect on, reengage, revise, and refine works of art or design considering relevant traditional and contemporary criteria as well as personal artistic vision.</td>
<td>Reflect on, reengage, revise, and refine works of art or design considering relevant traditional and contemporary criteria as well as personal artistic vision.</td>
<td></td>
</tr>
</tbody>
</table>

---

**Explanation:**

- **Reflect:** This stage involves explaining the process of making art while creating. It encourages students to articulate their thought processes and choices made in the creation of art. Using art vocabulary to describe these choices enhances their understanding and communication of their artistic decisions.

- **Refine:** During this stage, students discuss and reflect with peers about the choices made in creating the artwork. Elaborating on visual information by adding details helps to enhance the emerging meaning in the artwork. Revising artwork in progress based on insights gained from peer discussions ensures that the final product reflects the intended meaning.

- **Continue:** Students create artist statements that use art vocabulary to describe personal choices in artmaking. Reflecting on whether personal artwork conveys the intended meaning and revising accordingly is crucial for growth. Reflecting on and explaining important information about personal artwork helps students to refine their work. Applying relevant criteria to examine, reflect on, and plan revisions for a work of art or design in progress further refines their skills. Considering relevant traditional and contemporary criteria as well as personal artistic vision helps students to develop a comprehensive understanding of artistic refinement.
### VISUAL ARTS

**Presenting**

**Essential Question(s):** How are artworks cared for and by whom? What criteria, methods, and processes are used to select works for preservation or presentation? Why do people value objects, artworks, and artifacts, and select them for presentation?

**Anchor Standard 4:** Select, analyze, and interpret artistic work for presentation.

**Enduring Understanding:** Artists and other presenters consider various techniques, methods, venues, and criteria when analyzing, selecting, and curating objects, artifacts, and artworks for preservation and presentation.

</table>

**Select**

- Select art objects for personal portfolio and display, explaining why they were chosen.
- Explain why some objects, artifacts, and artwork are valued over others.
- Categorize artwork based on a theme or concept for an exhibit.
- Investigate and discuss possibilities and limitations of spaces, including electronic, for exhibiting artwork.
- Analyze how past, present, and emerging technologies have impacted the preservation and presentation of artwork.
- Define the roles and responsibilities of a curator, explaining the skills and knowledge needed in preserving, maintaining, and presenting objects, artifacts, and artwork.
- Analyze similarities and differences associated with preserving and presenting two-dimensional, three-dimensional, and digital artwork.
- Compare and contrast how technologies have changed the way artwork is preserved, presented, and experienced.
- Develop and apply criteria for evaluating a collection of artwork for presentation.
- Analyze, select, and curate artworks and/or artworks for preservation and presentation.
- Analyze, select, and critique artwork for a collection or portfolio presentation.
- Critique, justify, and predict choices in the process of analyzing, selecting, curating, and presenting artwork for a specific exhibit or event.

**Analyze**

- Explain the purpose of a portfolio or collection.
- Ask and answer questions such as where, when, why, and how artwork should be prepared for presentation or preservation.
- Distinguish between different materials or artistic techniques for preparing artwork for presentation.
- Identify exhibit space and prepare works of art including artists’ statements, for presentation.
- Identify and explain various considerations for preparing and protecting art in various locations, indoor or outdoor settings, in temporary or permanent forms, and in physical or digital formats.
- Develop a logical argument for safe and effective use of materials and techniques for preparing and presenting artwork.
- Individually or collaboratively, develop a visual plan for displaying works of art, analyzing exhibit space, the needs of the viewer, and the layout of the exhibit.
- Based on criteria, analyze and evaluate methods for preparing and presenting art.
- Collaboratively prepare and present selected themebased artwork for display, and formulate exhibition narratives for the viewer.
- Analyze and evaluate the reasons and ways an exhibition is presented.
- Evaluate, select, and apply methods or processes appropriate to display artwork in a specific place.
- Investigate, compare, and contrast methods for preserving and protecting art.

**Share**

- Explain what an art museum is and distinguish how an art museum is different from other buildings.
- Identify the roles and responsibilities of people who work in and visit museums and other art venues.
- Analyze how art exhibited inside and outside of schools such as in museums, galleries, virtual spaces, and other venues contributes to communities.
- Identify and explain how and where different cultures record and illustrate stories and history of life through art.
- Compare and contrast purposes of art museums, art galleries, and other venues, as well as the types of personal experiences they provide.
- Cite evidence about how an exhibition in a museum or other venue presents ideas and provides information about a specific concept or topic.
- Assess, explain, and provide evidence of how museums or other venues reflect history and values of a community.
- Compare and contrast viewing and experiencing exhibitions in different venues.
- Analyze why and how an exhibition or collection may influence ideas, beliefs, and experiences.
- Analyze and describe the impact that an exhibition or collection has on personal awareness of social, cultural, or political beliefs and understandings.
- Make, explain, and justify connections between artists or artwork and social, cultural, and/or political experiences.
- Curate a collection of objects, artifacts, or artwork to impact the viewer’s understanding of social, cultural, and/or political experiences.
VISUAL ARTS

Anchor Standard 7: Perceive and analyze artistic work
Enduring Understanding: Individual aesthetic and empathetic awareness developed through engagement with art can lead to understanding and appreciation of self, others, the natural world, and constructed environments.
Essential Question(s): How do life experiences influence the way you relate to art? How does learning about art impact how we perceive the world? What can we learn from our responses to art?

**Perceive**
- Identify uses of art within one's personal environment.
- Select and describe works of art that illustrate daily life experiences of one's self and others.
- Perceive and describe aesthetic characteristics of one's natural world and constructed environments.
- Speculate about processes an artist uses to create a work of art.
- Compare responses to a work of art before and after working in similar media.
- Compare one's own interpretation of a work of art with the interpretation of others.
- Identify and interpret works of art or design that reveal how people live around the world and what they value.
- Explain how the method of display, the location, and the experience of an artwork influence how it is perceived and valued.
- Explain how a person's aesthetic choices are influenced by culture and environment and impact the visual image that one conveys to others.
- Hypothesize ways in which art influences perception and understanding of human experiences.
- Identify and analyze cultural associations suggested by visual imagery.
- Analyze multiple ways that images influence specific audiences.
- Compare and contrast contexts and media in which viewers encounter images that influence ideas, emotions, and actions.
- Analyze how one’s understanding of the world is affected by experiencing visual imagery.
- Evaluate the effectiveness of an image or images to influence ideas, feelings, and behaviors of specific audiences.
- Determine the commonalities within a group of artists or visual images attributed to a particular type of art, timeframe, or culture.

**Endure Understanding:** Visual imagery influences understanding of and responses to the world.
Essential Question(s): What is an image? Where and how do we encounter images in our world? How do images influence our views of the world?

</tbody>
</table>

**Analyze**
- Interpret art by identifying subject matter and describing relevant details.
- Interpret art by categorizing subject matter and identifying the characteristics of form.
- Interpret art by identifying the mood suggested by a work of art and describing relevant subject matter and characteristics of form.
- Interpret art by analyzing use of media to create subject matter, characteristics of form, and mood.
- Interpret art by analyzing use of media to create subject matter, characteristics of form, and mood.
- Interpret art by analyzing characteristics of form and structure, contextual information, relevant subject matter, visual elements, and use of media to identify ideas and mood conveyed.
- Interpret art by analyzing artmaking approaches, the characteristics of form and structure, contextual information, relevant subject matter, and use of media to identify ideas and mood conveyed.
- Interpret art by analyzing how the interaction of subject matter, characteristics of form and structure, use of media, artmaking approaches, and relevant contextual information contributes to understanding messages or ideas and mood conveyed.
- Interpret an artwork or collection of works, supported by relevant and sufficient evidence found in the work and its various contexts.
- Identify types of contextual information useful in the process of constructing interpretations of an artwork or collection of works.
- Analyze differing interpretations of an artwork or collection of works in order to select and defend a plausible critical analysis.

Anchor Standard 9: Apply criteria to evaluate artistic work.
Enduring Understanding: People evaluate art based on various criteria.
Essential Question(s): How does one determine criteria to evaluate a work of art? How and why might criteria vary? How is a personal preference different from an evaluation?

**Interpret**
- Explain reasons for selecting a preferred artwork.
- Classify artwork based on different reasons for preferences.
- Use learned art vocabulary to express preferences about artwork.
- Evaluate an artwork based on given criteria.
- Apply one set of criteria to evaluate more than one work of art.
- Recognize differences in criteria used to evaluate works of art depending on styles, genres, and media as well as historical and cultural contexts.
- Develop and apply relevant criteria to evaluate a work of art.
- Compare and explain the difference between an evaluation of an artwork based on personal criteria and an evaluation of an artwork based on a set of established criteria.
- Create a convincing and logical argument to support an evaluation of art.
- Establish relevant criteria in order to evaluate a work of art or collection of works.
- Determine the relevance of criteria used by others to evaluate a work of art or collection of works based on differing sets of criteria.
- Construct evaluations of a work of art or collection of works based on differing sets of criteria.
**COMMUNICATION**

Communicate effectively in multiple languages and utilize the target language to function in a variety of social/work related situations.

**Enduring Understanding:** Communication and collaboration in more than one language is vital for success in an interconnected world.

**Essential Question(s)?**
- What is the purpose of language?
- What do humans do with language and to what end?
- How does an increasingly interconnected world impact language learning?

<table>
<thead>
<tr>
<th>Interpersonal communication</th>
<th>Objective: COMM 1.1</th>
</tr>
</thead>
<tbody>
<tr>
<td>COMM 1: Interact with others in the target language and gain meaning from interactions in the target language.</td>
<td>Interact and negotiate meaning (spoken, signed, written conversation) to share information, reactions, feelings, and opinions</td>

**Cultures**

Interact with cultural competence and understanding in an interconnected world.

**Enduring Understanding:** The study of culture is deeply intertwined with the study of other languages. Developing an understanding and awareness of other cultures’ perspectives is critical in the development of global competence.

**Essential Question(s):**
- How do a variety of cultures impact our daily lives?
- Why is cultural sensitivity an important part of gaining global competence?
- What is their perspective?
- How does their perspective influence what people do/create?

<table>
<thead>
<tr>
<th>Relating cultural practices to perspective</th>
<th>Objective: CLTR 1.1</th>

</tbody>
</table>
## CONNECTIONS

Acquire information and diverse perspectives in order to use the target language to connect to other disciplines and to function in academic and career related situations.

### Enduring Understanding:
Interdisciplinary learning is a critical component in the educational experience of all students. Connecting multiple disciplines builds and reinforces the content knowledge of those disciplines and develops critical thinking/problem solving skills.

### Essential Question(s):
- What role does language learning play in the educational experience of students?
- How does connecting to other disciplines make students well-informed global citizens?
- How does extending student access to variety of information and diverse perspectives influence their ability to perform in academic and career related settings?

### Making connections

<table>
<thead>
<tr>
<th>Standard CONN 1: Build, reinforce, and expand knowledge of other disciplines while using the target language to develop critical thinking/creative problem solving skills.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Objective: CONN 1.1</strong></td>
</tr>
<tr>
<td>Compare and contrast information acquired from other content areas.</td>
</tr>
</tbody>
</table>

| **Objective: CONN 1.2** |
| Relate information studied in other subjects to the target language and culture. |

### Acquiring information and diverse perspectives

<table>
<thead>
<tr>
<th>Standard CONN 2: Access and evaluate information and diverse perspectives that are available through the target language and its cultures.</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Objective: CONN 2.1</strong></td>
</tr>
<tr>
<td>Access authentic materials prepared in the target language by or for native speakers.</td>
</tr>
</tbody>
</table>

| **Objective: CONN 2.2** |
| Analyze the content and cultural perspectives of authentic materials prepared in the target language by or for native speakers |

| **Objective: CONN 2.3** |
| Compare and contrast cultural similarities and differences in authentic materials. |
**Comparisons**

Develop insight and understanding of target culture and language in order to interact with cultural competence.

**Enduring Understanding:** Languages and cultures are multi-faceted, the diverse patterns and perspectives inherent to language systems/cultures express meaning in culturally appropriate ways.

**Essential Question(s):**
How does the target language differ from the learner’s first language?
How do the target culture’s perspectives compare to the learner’s perspective?

<table>
<thead>
<tr>
<th><strong>Language Comparisons</strong></th>
<th><strong>Objective:</strong> COMP 1.1</th>
<th><strong>Objective:</strong> COMP 1.2</th>
<th><strong>Objective:</strong> COMP 1.3</th>
</tr>
</thead>
<tbody>
<tr>
<td>Standard COMP 1: Investigate, explain, and reflect on the nature of language through comparisons of the language studied and their own.</td>
<td>Observe formal and informal forms of language.</td>
<td>Identify patterns and explain discrepancies the sounds and the writing system in the target language.</td>
<td>Compare and analyze idiomatic expressions in the target language.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th><strong>Cultural Comparisons</strong></th>
<th><strong>Objective:</strong> COMP 2.1</th>
<th><strong>Objective:</strong> COMP 2.2</th>
<th><strong>Objective:</strong> COMP 2.3</th>
</tr>
</thead>
<tbody>
<tr>
<td>Standard COMP 2: Investigate, explain, and reflect on the concept of culture through the comparisons of the cultures studied and their own.</td>
<td>Identify, describe and compare/contrast products and their use in the target culture with the learner’s culture.</td>
<td>Compare and contrast appropriate gestures and oral expressions in the target culture with the learner’s culture.</td>
<td>Compare and contrast authentic materials from the target culture with the learner’s culture.</td>
</tr>
</tbody>
</table>
## COMMUNITIES

Communicate and interact with cultural competence in multilingual communities at home and around the world.

**Enduring Understanding:** The increasing interconnectedness of the world’s economy requires that United States citizens continue to become proficient in other languages and adept at understanding and communicating appropriately in cultural contexts.

**Essential Question(s):**
- How are language proficiency and cultural competence developed?
- How do continued opportunities to learn and use language increase language proficiency over a period of time?
- What personal benefits are there to becoming a lifelong language learner?

### School and Global Communities

**Standard COMT 1:** Interact and collaborate in communities and the globalized world both within and beyond the classroom.

<table>
<thead>
<tr>
<th>Objective: COMT 1.1</th>
<th>Participate in multilingual communities at home and around the world.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Objective: COMT 1.2</td>
<td>Discuss personal preferences in activities and events both within and beyond the classroom.</td>
</tr>
<tr>
<td>Objective: COMT 1.3</td>
<td>Utilize knowledge of the target language to tutor English language learners that know the target language.</td>
</tr>
</tbody>
</table>

### Lifelong Learning

**Standard COMT 2:** Reflect on progress using languages for enjoyment, enrichment, and advancement.

<table>
<thead>
<tr>
<th>Objective: COMT 2.1</th>
<th>Interpret materials and/or use media from the language and culture for enjoyment.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Objective: COMT 2.2</td>
<td>Explore opportunities to use the target language for personal enrichment/professional advancement/communication skills.</td>
</tr>
</tbody>
</table>
Dance/Creating
#DA:Cr1.1
Process Component: Explore
Anchor Standard: Generate and conceptualize artistic ideas and work.
Enduring Understanding: Choreographers use a variety of sources as inspiration and transform concepts and ideas into movement for artistic expression.
Essential Question: Where do choreographers get ideas for dances?
Grade K
DA:Cr1.1.K
a. Respond in movement to a variety of stimuli (for example, music/sound, text, objects, images, symbols, observed dance).

b. Explore different ways to do basic locomotor and non-locomotor movements by changing at least one of the elements of dance.
Grade 1
DA:Cr1.1.1
a. Explore movement inspired by a variety of stimuli (for example, music/sound, text, objects, images, symbols, observed dance, experiences) and identify the source

b. Explore a variety of locomotor and non-locomotor movements by experimenting with and changing the elements of dance.
Grade 2
DA:Cr1.1.2
a. Explore movement inspired by a variety of stimuli (for example, music/sound, text, objects, images, symbols, observed dance, experiences) and suggest additional sources for movement ideas.

b. Combine a variety of movements while manipulating the elements of dance.
Grade 3
DA:Cr1.1.3
a. Experiment with a variety of self-identified stimuli (for example, music/sound, text, objects, images, notation, observed dance, experiences) for movement.

b. Explore a given movement problem. Select and demonstrate a solution.

Dance/Creating
#DA:Cr2.1
Process Component: Plan
Anchor Standard: Organize and develop artistic ideas and work.
Enduring Understanding: The elements of dance, dance structures, and choreographic devices serve as both a foundation and a departure point for choreographers.
Essential Question: What influences choice-making in creating choreography?
Grade K
DA:Cr2.1.K
a. Improvise dance that has a beginning, middle, and end.
b. Express an idea, feeling, or image, through improvised movement moving alone or with a partner

**Grade 1**

**DA:Cr2.1.1**

a. Improvise a series of movements that have a beginning, middle, and end, and describe movement choices.

b. Choose movements that express an idea or emotion, or follow a musical phrase.

**Grade 2**

**DA:Cr2.1.2**

a. Improvise a dance phrase with a beginning, a middle that has a main idea, and a clear end.

b. Choose movements that express a main idea or emotion, or follow a musical phrase. Explain reasons for movement choices.

**Grade 3**

**DA:Cr2.1.3**

a. Identify and experiment with choreographic devices to create simple movement patterns and dance structures (for example, AB, ABA, theme and development).

b. Develop a dance phrase that expresses and communicates an idea or feeling. Discuss the effect of the movement choices.

---

**Dance/Creating**

**#DA:Cr3.1**

**Process Component:** Revise

**Anchor Standard:** Refine and complete artistic work.

**Enduring Understanding:** Choreographers analyze, evaluate, refine, and document their work to communicate meaning.

**Essential Question:** How do choreographers use self-reflection, feedback from others, and documentation to improve the quality of their work?

**Grade K**

**DA:Cr3.1.K**

a. Apply suggestions for changing movement through guided improvisational experiences.

b. Depict a dance movement by drawing a picture or using a symbol.

**Grade 1**

**DA:Cr3.1.1**

a. Explore suggestions to change movement from guided improvisation and/or short remembered sequences.

b. Depict several different types of movements of a dance by drawing a picture or using a symbol (for example, jump, turn, slide, bend, reach).

**Grade 2**

**DA:Cr3.1.2**

a. Explore suggestions and make choices to change movement from guided improvisation and/or short remembered sequences.
b. Depict the levels of movements in a variety of dance movements by drawing a picture or using symbols (for example, high, middle, low).

**Grade 3**
**DA:Cr3.1.3**
a. Revise movement choices in response to feedback to improve a short dance study. Describe the differences the changes made in the movements.

b. Depict directions or spatial pathways in a dance phrase by drawing a picture map or using a symbol.

**Dance/Performing**
**#DA:Pr4.1**
**Process Component:** Express
**Anchor Standard:** Select, analyze, and interpret artistic work for presentation.
**Enduring Understanding:** Space, time, and energy are basic elements of dance.
**Essential Question:** How do dancers work with space, time and energy to communicate artistic expression?

**Grade K**
**DA:Pr4.1.K**
a. Make still and moving body shapes that show lines (for example, straight, bent, and curved), changes levels, and vary in size (large/small). Join with others to make a circle formation and work with others to change its dimensions.

b. Demonstrate tempo contrasts with movements that match to tempo of sound stimuli.

c. Identify and apply different characteristics to movements (for example, slow, smooth, or wavy).

**Grade 1**
**DA:Pr4.1.1**
a. Demonstrate locomotor and non-locomotor movements that change body shapes, levels, and facings. Move in straight, curved, and zig-zagged pathways. Find and return to place in space. Move with others to form straight lines and circles.

b. Relate quick, moderate and slow movements to duration in time. Recognize steady beat and move to varying tempi of steady beat.

c. Demonstrate movement characteristics along with movement vocabulary (for example, use adverbs and adjectives that apply to movement such as a bouncy leap, a floppy fall, a jolly jump, and joyful spin).

**Grade 2**
**DA:Pr4.1.2**
a. Demonstrate clear directionality and intent when performing locomotor and non-locomotor movements that change body shapes, facings, and pathways in space. Identify symmetrical and asymmetrical body shapes and examine relationships between body parts. Differentiate between circling and turning as two separate ways of continuous directional change.
b. Identify the length of time a move or phrase takes (for example, whether it is long or short). Identify and move on the downbeat in duple and triple meter. Correlate metric phrasing with movement phrasing.

c. Select and apply appropriate characteristics to movements (for example, selecting specific adverbs and adjectives and apply them to movements). Demonstrate kinesthetic awareness while dancing the movement characteristics.

**Grade 3**  
**DA:Pr4.1.3**

a. Judge spaces as distance traveled and use space three-dimensionally. Demonstrate shapes with positive and negative space. Perform movement sequences in and through space with intentionality and focus.

b. Fulfill specified duration of time with improvised locomotor and non-locomotor movements. Differentiate between “in time” and “out of time” to music. Perform movements that are the same or of a different time orientation to accompaniment. Use metric and kinesthetic phrasing.

c. Fulfill specified duration of time with improvised locomotor and non-locomotor movements. Differentiate between “in time” and “out of time” to music. Perform movements that are the same or of a different time orientation to accompaniment. Use metric and kinesthetic phrasing.

**Dance/Performing**

**#DA:Pr5.1**

**Process Component:** Embody

**Anchor Standard:** Develop and refine artistic technique and work for presentation.

**Enduring Understanding:** Dancers use the mind-body connection and develop the body as an instrument for artistry and artistic expression.

**Essential Question:** What must a dancer do to prepare the mind and body for artistic expression?

**Grade K**  
**DA:Pr5.1.K**

a. Demonstrate same-side and cross-body locomotor and non-locomotor movements, body patterning movements, and body shapes.

b. Move safely in general space and start and stop on cue during activities, group formations, and creative explorations while maintaining personal space.

c. Move body parts in relation to other body parts and repeat and recall movements upon request.

**Grade 1**  
**DA:Pr5.1.1**

a. Demonstrate a range of locomotor and non-locomotor movements, body patterning, body shapes, and directionality.

b. Move safely in general space through a range of activities and group formations while maintaining personal space.
c. Modify movements and spatial arrangements upon request
Grade 2
DA:Pr5.1.2
a. Demonstrate a range of locomotor and non-locomotor movements, body patterning, and dance sequences that require moving through space using a variety of pathways.

b. Move safely in a variety of spatial relationships and formations with other dancers, sharing and maintaining personal space.

c. Repeat movements, with an awareness of self and others in space. Self-adjust and modify movements or placement upon request.
Grade 3
DA:Pr5.1.3
a. Replicate body shapes, movement characteristics, and movement patterns in a dance sequence with awareness of body alignment and core support.

b. Adjust body-use to coordinate with a partner or other dancers to safely change levels, directions, and pathway designs.

c. Recall movement sequences with a partner or in group dance activities. Apply constructive feedback from teacher and self-check to improve dance skills.

Dance/Performing
#DA:Pr6.1
Process Component: Present
Anchor Standard: Convey meaning through the presentation of artistic work.
Enduring Understanding: Dance performance is an interaction between performer, production elements, and audience that heightens and amplifies artistic expression.
Essential Question: How does a dancer heighten artistry in a public performance?
Grade K
DA:Pr6.1.K
a. Dance for and with others in a designated space.

b. Select a prop to use as part of a dance.
Grade 1
DA:Pr6.1.1
a. Dance for others in a space where audience and performers occupy different areas.

b. Explore the use of simple props to enhance performance.
Grade 2
DA:Pr6.1.2
a. Dance for and with others in a space where audience and performers occupy different areas.

b. Use limited production elements (for example, hand props, simple scenery, or media projections).
Grade 3
DA:Pr6.1.3
a. Identify the main areas of a performance space using production terminology (for example, stage right, stage left, center stage, upstage, and downstage).

b. Explore simple production elements (costumes, props, music, scenery, lighting, or media) for a dance performed for an audience in a designated specific performance space.

Dance/Responding
#DA:Re7.1

Process Component: Analyze

Anchor Standard: Perceive and analyze artistic work.

Enduring Understanding: Dance is perceived and analyzed to comprehend its meaning.

Essential Question: How is a dance understood?

Grade K
DA:Re7.1.K
a. Find a movement that repeats in a dance.

b. Demonstrate or describe observed or performed dance movements

Grade 1
DA:Re7.1.1
a. Find a movement that repeats in a dance to make a pattern.

b. Demonstrate and describe observed or performed dance movements from a specific genre or culture

Grade 2
DA:Re7.1.2
a. Find movements in a dance that develop a pattern.

b. Demonstrate and describe movements in dances from different genres or cultures.

Grade 3
DA:Re7.1.3
a. Find a movement pattern that creates a movement phrase in a dance work.

b. Demonstrate and explain how one dance genre is different from another, or how one cultural movement practice is different from another.

Dance/Responding
#DA:Re8.1

Process Component: Interpret

Anchor Standard: Interpret intent and meaning in artistic work.

Enduring Understanding: Dance is interpreted by considering intent, meaning, and artistic expression as communicated through the use of the body, elements of dance, dance technique, dance structure, and context.

Essential Question: How is dance interpreted?

Grade K
DA:Re8.1.K
a. Observe movement and describe it using simple dance terminology.

Grade 1
DA:Re8.1.1
a. Select movements from a dance that suggest ideas and explain how the movement captures the idea using simple dance terminology.

Grade 2
DA:Re8.1.2
a. Use context cues from movement to identify meaning and intent in a dance using simple dance terminology.

Grade 3
DA:Re8.1.3
a. Select specific context cues from movement. Explain how they relate to the main idea of the dance using basic dance terminology.

Dance/Responding
#DA:Re9.1
Process Component: Critique
Anchor Standard: Apply criteria to evaluate artistic work.
Enduring Understanding: Criteria for evaluating dance vary across genres, styles, and cultures.
Essential Question: What criteria are used to evaluate dance?

Grade K
DA:Re9.1.K
a. Find a movement that was noticed in a dance. Demonstrate the movement that was noticed and explain why it attracted attention.

Grade 1
DA:Re9.1.1
a. Identify and demonstrate several movements in a dance that attracted attention. Describe the characteristics that make the movements interesting and talk about why they were chosen.

Grade 2
DA:Re9.1.2
a. Observe or demonstrate dances from a genre or culture. Discuss movements and other aspects of the dances that make the dances work well, and explain why they work. Use simple dance terminology.

Grade 3
DA:Re9.1.3
a. Select dance movements from specific genres, styles, or cultures. Identify characteristic movements from these dances and describe in basic dance terminology ways in which they are alike and different.

Dance/Connecting
#DA:Cn10.1
Process Component: Synthesize
Anchor Standard: Synthesize and relate knowledge and personal experiences to make art.
Enduring Understanding: As dance is experienced, all personal experiences, knowledge, and contexts are integrated and synthesized to interpret meaning.
Essential Question: How does dance deepen our understanding of ourselves, other knowledge, and events around us?

Grade K
DA:Cn10.1.K
a. Recognize and name an emotion that is experienced when watching, improvising, or performing dance and relate it to a personal experience.

b. Observe a work of visual art. Describe and then express through movement something of interest about the artwork, and ask questions for discussion concerning the artwork.

Grade 1
DA:Cn10.1.1
a. Find an experience expressed or portrayed in a dance that relates to a familiar experience. Identify the movements that communicate this experience.

b. Observe illustrations from a story. Discuss observations and identify ideas for dance movement and demonstrate the big ideas of the story.

Grade 2
DA:Cn10.1.2
a. Describe, create, and/or perform a dance that expresses personal meaning and explain how certain movements express this personal meaning.

b. Respond to a dance work using an inquiry-based set of questions (for example, See, Think, Wonder). Create movement using ideas from responses and explain how certain movements express a specific idea.

Grade 3
DA:Cn10.1.3
a. Compare the relationships expressed in a dance to relationships with others. Explain how they are the same or different.

b. Ask and research a question about a key aspect of a dance that communicates a perspective about an issue or event. Explore the key aspect through movement. Share movements and describe how the movements help to remember or discover new qualities in these key aspects. Communicate the new learning in oral, written, or movement form.

Dance/Connecting
#DA:Cn11.1
Process Component: Relate
Anchor Standard: Relate artistic ideas and works with societal, cultural and historical context to deepen understanding.
Enduring Understanding: Dance literacy includes deep knowledge and perspectives about societal, cultural, historical, and community contexts.
Essential Question: How does knowing about societal, cultural, historical and community experiences expand dance literacy?

Grade K
DA:Cn11.1.K
a. Describe or demonstrate the movements in a dance that was watched or performed.

Grade 1
DA:Cn11.1.1
a. Watch and/or perform a dance from a different culture and discuss or demonstrate the types of movement danced.

Grade 2
DA:Cn11.1.2
a. Observe a dance and relate the movement to the people or environment in which the dance was created and performed.

Grade 3

DA:Cn11.1.3
a. Find a relationship between movement in a dance from a culture, society, or community and the culture from which the dance is derived. Explain what the movements communicate about key aspects of the culture, society, or community.
Dance/Creat
#DA:Cr1.1
Process Component: Explore
Anchor Standard: Generate and conceptualize artistic ideas and work.
Enduring Understanding: Choreographers use a variety of sources as inspiration and transform concepts and ideas into movement for artistic expression.
Essential Question: Where do choreographers get ideas for dances?
Grade 4
DA:Cr1.1.4
a. Identify ideas for choreography generated from a variety of stimuli (for example, music/sound, text, objects, images, notation, observed dance, experiences).

b. Develop a movement problem and manipulate the elements of dance as tools to find a solution.
Grade 5
DA:Cr1.1.5
a. Build content for choreography using several stimuli (for example, music/sound, text, objects, images, notation, observed dance, experiences, literary forms, natural phenomena, current news, social events).

b. Construct and solve multiple movement problems to develop choreographic content.

Dance/Creat
#DA:Cr2.1
Process Component: Plan
Anchor Standard: Organize and develop artistic ideas and work.
Enduring Understanding: The elements of dance, dance structures, and choreographic devices serve as both a foundation and a departure point for choreographers.
Essential Question: What influences choice-making in creating choreography?
Grade 4
DA:Cr2.1.4
a. Manipulate or modify choreographic devices to expand movement possibilities and create a variety of movement patterns and structures. Discuss movement choices.

b. Develop a dance study that expresses and communicates a main idea. Discuss the reasons and effectiveness of the movement choices.
Grade 5
DA:Cr2.1.5
a. Manipulate or modify a variety of choreographic devices to expand choreographic possibilities and develop a main idea. Explain reasons for movement choices.

b. Develop a dance study by selecting a specific movement vocabulary to communicate a main idea. Discuss how the dance communicates non-verbally.
Process Component: Revise
Anchor Standard: Refine and complete artistic work.
Enduring Understanding: Choreographers analyze, evaluate, refine, and document their work to communicate meaning.
Essential Question: How do choreographers use self-reflection, feedback from others, and documentation to improve the quality of their work?

Grade 4
DA:Cr3.1.4
a. Revise movement based on peer feedback and self-reflection to improve communication of artistic intent in a short dance study. Explain choices made in the process.

b. Depict the relationships between two or more dancers in a dance phrase by drawing a picture or using symbols (for example, next to, above, below, behind, in front of).

Grade 5
DA:Cr3.1.5
a. Explore through movement the feedback from others to expand choreographic possibilities for a short dance study that communicates artistic intent. Explain the movement choices and refinements.

b. Record changes in a dance sequence through writing, symbols, or a form of media technology.

Dance/Performing
#DA:Pr4.1
Process Component: Express
Anchor Standard: Select, analyze, and interpret artistic work for presentation.
Enduring Understanding: Space, time, and energy are basic elements of dance.
Essential Question: How do dancers work with space, time and energy to communicate artistic expression?

Grade 4
DA:Pr4.1.4
a. Make static and dynamic shapes with positive and negative space. Perform elevated shapes (jump shapes) with soft landings and movement sequences alone and with others, establishing relationships with other dancers through focus of eyes.

b. Accompany other dancers using a variety of percussive instruments and sounds. Respond in movement to even and uneven rhythms. Recognize and respond to tempo changes as they occur in dance and music.

c. Analyze movements and phrases for use of energy and dynamic changes and use adverbs and adjectives to describe them. Based on the analysis, refine the phrases by incorporating a range of movement characteristics.

Grade 5
DA:Pr4.1.5
a. Integrate static and dynamic shapes and floor and air pathways into dance sequences. Establish relationships with other dancers through focus of eyes and other body parts. Convert inward focus to outward focus for projecting out to far space.
b. Dance to a variety of rhythms generated from internal and external sources. Perform movement phrases that show the ability to respond to changes in time.

c. Contrast bound and free-flowing movements. Motivate movement from both central initiation (torso) and peripheral initiation (distal) and analyze the relationship between initiation and energy.

Dance/Performing
#DA:Pr5.1
Process Component: Embody
Anchor Standard: Develop and refine artistic technique and work for presentation.
Enduring Understanding: Dancers use the mind-body connection and develop the body as an instrument for artistry and artistic expression.
Essential Question: What must a dancer do to prepare the mind and body for artistic expression?

Grade 4
DA:Pr5.1.4
a. Demonstrate fundamental dance skills (for example, alignment, coordination, balance, core support, kinesthetic awareness) and movement qualities when replicating and recalling patterns and sequences of locomotor and non-locomotor movements.

b. Execute techniques that extend movement range, build strength, and develop endurance. Explain the relationship between execution of technique, safe body-use, and healthful nutrition.

c. Coordinate phrases and timing with other dancers by cueing off each other and responding to stimuli cues (for example, music, text, or lighting). Reflect on feedback from others to inform personal dance performance goals.

Grade 5
DA:Pr5.1.5
a. Recall and execute a series of dance phrases using fundamental dance skills (for example, alignment, coordination, balance, core support, kinesthetic awareness, clarity of movement).

b. Demonstrate safe body-use practices during technical exercises and movement combinations. Discuss how these practices, along with healthful eating habits, promote strength, flexibility, endurance and injury prevention.

c. Collaborate with peer ensemble members to repeat sequences, synchronize actions, and refine spatial relationships to improve performance quality. Apply feedback from others to establish personal performance goals.

Dance/Performing
#DA:Pr6.1
Process Component: Present
Anchor Standard: Convey meaning through the presentation of artistic work.
**Enduring Understanding:** Dance performance is an interaction between performer, production elements, and audience that heightens and amplifies artistic expression.

**Essential Question:** How does a dancer heighten artistry in a public performance?

**Grade 4**

**DA:Pr6.1.4**

a. Consider how to establish a formal performance space from an informal setting (for example, gymnasium or grassy area).

b. Identify, explore, and experiment with a variety of production elements to heighten the artistic intent and audience experience.

**Grade 5**

**DA:Pr6.1.5**

a. Demonstrate the ability to adapt dance to alternative performance venues by modifying spacing and movements to the performance space.

b. Identify, explore, and select production elements that heighten and intensify the artistic intent of a dance and are adaptable for various performance spaces.

---

**Dance/Responding**

**#DA:Re7.1**

**Process Component:** Analyze

**Anchor Standard:** Perceive and analyze artistic work.

**Enduring Understanding:** Dance is perceived and analyzed to comprehend its meaning.

**Essential Question:** How is a dance understood?

**Grade 4**

**DA:Re7.1.4**

a. Find patterns of movement in dance works that create a style or theme.

b. Demonstrate and explain how dance styles differ within a genre or within a cultural movement practice.

**Grade 5**

**DA:Re7.1.5**

a. Find meaning or artistic intent from the patterns of movement in a dance work.

b. Describe, using basic dance terminology, the qualities and characteristics of style used in a dance from one’s own cultural movement practice. Compare them to the qualities and characteristics of style found in a different dance genre, style, or cultural movement practice, also using basic dance terminology.

---

**Dance/Responding**

**#DA:Re8.1**

**Process Component:** Interpret

**Anchor Standard:** Interpret intent and meaning in artistic work.

**Enduring Understanding:** Dance is interpreted by considering intent, meaning, and artistic expression as communicated through the use of the body, elements of dance, dance technique, dance structure, and context.
Essential Question: How is dance interpreted?

Grade 4
DA:Re8.1.4
a. Relate movements, ideas, and context to decipher meaning in a dance using basic dance terminology.

Grade 5
DA:Re8.1.5
a. Interpret meaning in a dance based on its movements. Explain how the movements communicate the main idea of the dance using basic dance terminology.

Dance/Responding
#DA:Re9.1
Process Component: Critique
Anchor Standard: Apply criteria to evaluate artistic work.
Enduring Understanding: Criteria for evaluating dance vary across genres, styles, and cultures.
Essential Question: What criteria are used to evaluate dance?

Grade 4
DA:Re9.1.4
a. Discuss and demonstrate the characteristics that make a dance artistic and apply those characteristics to dances observed or performed in a specific genre, style, or cultural movement practice. Use basic dance terminology.

Grade 5
DA:Re9.1.5
a. Define the characteristics of dance that make a dance artistic and meaningful. Relate them to the elements of dance in genres, styles, or cultural movement practices. Use basic dance terminology to describe characteristics that make a dance artistic and meaningful.

Dance/Connecting
#DA:Cn10.1
Process Component: Synthesize
Anchor Standard: Synthesize and relate knowledge and personal experiences to make art.
Enduring Understanding: As dance is experienced, all personal experiences, knowledge, and contexts are integrated and synthesized to interpret meaning.
Essential Question: How does dance deepen our understanding of ourselves, other knowledge, and events around us?

Grade 4
DA:Cn10.1.4
a. Relate the main idea or content in a dance to other experiences. Explain how the main idea of a dance is similar to or different from one’s own experiences, relationships, ideas or perspectives.

b. Develop and research a question relating to a topic of study in school using multiple sources of references. Select key aspects about the topic and choreograph movements that communicate the information. Discuss what was learned from creating the dance and describe how the topic might be communicated using another form of expression.

Grade 5
DA:Cn10.1.5
a. Compare two dances with contrasting themes. Discuss feelings and ideas evoked by each. Describe how the themes and movements relate to points of view and experiences.

b. Choose a topic, concept, or content from another discipline of study and research how other art forms have expressed the topic. Create a dance study that expresses the idea. Explain how the dance study expressed the idea and discuss how this learning process is similar to, or different from, other learning situations.

Dance/Connecting
#DA:Cn11.1
Process Component: Relate
Anchor Standard: Relate artistic ideas and works with societal, cultural and historical context to deepen understanding.
Enduring Understanding: Dance literacy includes deep knowledge and perspectives about societal, cultural, historical, and community contexts.
Essential Question: How does knowing about societal, cultural, historical and community experiences expand dance literacy?

Grade 4
DA:Cn11.1.4
a. Select and describe movements in a specific genre or style and explain how the movements relate to the culture, society, historical period, or community from which the dance originated.

Grade 5
DA:Cn11.1.5
a. Describe how the movement characteristics and qualities of a dance in a specific genre or style communicate the ideas and perspectives of the culture, historical period, or community from which the genre or style originated.
Dance/Creating
#DA:Cr1.1
Process Component: Explore
Anchor Standard: Generate and conceptualize artistic ideas and work.
Enduring Understanding: Choreographers use a variety of sources as inspiration and transform concepts and ideas into movement for artistic expression.
Essential Question: Where do choreographers get ideas for dances?
Grade 6
DA:Cr1.1.6
a. Relate similar or contrasting ideas to develop choreography using a variety of stimuli (for example, music, observed dance, literary forms, notation, natural phenomena, personal experience/recall, current news or social events).

b. Explore various movement vocabularies to transfer ideas into choreography.

Grade 7
DA:Cr1.1.7
a. Compare a variety of stimuli (for example, music, observed dance, literary forms, notation, natural phenomena, personal experience/recall, current news or social events) and make selections to expand movement vocabulary and artistic expression.

b. Explore various movement vocabularies to express an artistic intent in choreography. Explain and discuss the choices made using genre-specific dance terminology.

Grade 8
DA:Cr1.1.8
a. Implement movement from a variety of stimuli (for example, music, observed dance, literary forms, notation, natural phenomena, personal experience/recall, current news or social events) to develop dance content for an original dance study or dance.

b. Identify and select personal preferences to create an original dance study or dance. Use genre-specific dance terminology to articulate and justify choices made in movement development to communicate intent.

Dance/Creating
#DA:Cr2.1
Process Component: Plan
Anchor Standard: Organize and develop artistic ideas and work.
Enduring Understanding: The elements of dance, dance structures, and choreographic devices serve as both a foundation and a departure point for choreographers.
Essential Question: What influences choice-making in creating choreography?
Grade 6
DA:Cr2.1.6
a. Explore choreographic devices and dance structures to develop a dance study that supports an artistic intent. Explain the goal or purpose of the dance.

b. Determine artistic criteria to choreograph a dance study that communicates personal or
cultural meaning. Based on the criteria, evaluate why some movements are more or less effective than others.

Grade 7  
DA:Cr2.1.7  
a. Use a variety of choreographic devices and dance structures to develop a dance study with a clear artistic intent. Articulate reasons for movement and structural choices.

b. Determine artistic criteria to choreograph a dance study that communicates personal or cultural meaning. Articulate how the artistic criteria serve to communicate the meaning of the dance.

Grade 8  
DA:Cr2.1.8  
a. Collaborate to select and apply a variety of choreographic devices and dance structures to choreograph an original dance study or dance with a clear artistic intent. Articulate the group process for making movement and structural choices.

b. Define and apply artistic criteria to choreograph a dance that communicates personal or cultural meaning. Discuss how the criteria clarify or intensify the meaning of the dance.

Dance/Creating  
#DA:Cr3.1  
Process Component: Revise  
Anchor Standard: Refine and complete artistic work.  
Enduring Understanding: Choreographers analyze, evaluate, refine, and document their work to communicate meaning.  
Essential Question: How do choreographers use self-reflection, feedback from others, and documentation to improve the quality of their work?

Grade 6  
DA:Cr3.1.6  
a. Revise dance compositions using collaboratively developed artistic criteria. Explain reasons for revisions and how choices made relate to artistic intent.

b. Explore or invent a system to record a dance sequence through writing, symbols, or a form of media technology.

Grade 7  
DA:Cr3.1.7  
a. Evaluate possible revisions of dance compositions and, if necessary, consider revisions of artistic criteria based on self-reflection and feedback of others. Explain reasons for choices and how they clarify artistic intent.

b. Investigate a recognized system to document a dance sequence by using words, symbols, or media technologies.

Grade 8  
DA:Cr3.1.8  
a. Revise choreography collaboratively or independently based on artistic criteria, self-reflection, and the feedback of others. Articulate the reasons for choices and revisions and explain how
they clarify and enhance the artistic intent.

b. Experiment with aspects of a recognized system to document a section of a dance by using words, symbols, or media technologies.

**Dance/Performing**  
**#DA:Pr4.1**  
**Process Component:** Express  
**Anchor Standard:** Select, analyze, and interpret artistic work for presentation.  
**Enduring Understanding:** Space, time, and energy are basic elements of dance.  
**Essential Question:** How do dancers work with space, time and energy to communicate artistic expression?

**Grade 6**  
**DA:Pr4.1.6**  

a. Refine partner and ensemble skills in the ability to judge distance and spatial design. Establish diverse pathways, levels, and patterns in space. Maintain focus with partner or group in near and far space.

b. Use combinations of sudden and sustained timing as it relates to both the time and the dynamics of a phrase or dance work. Accurately use accented and unaccented beats in 3/4 and 4/4 meter.

c. Use the internal body force created by varying tensions within one’s musculature for movement initiation and dynamic expression. Distinguish between bound and free-flowing movements and appropriately apply them to technique exercises and dance phrases.

**Grade 7**  
**DA:Pr4.1.7**  

a. Expand movement vocabulary of floor and air pattern designs. Incorporate and modify body designs from different dance genres and styles for the purpose of expanding movement vocabulary to include differently designed shapes and movements for interest and contrast.

b. Vary durational approach in dance phrasing by using timing accents and variations within a phrase to add interest kinesthetically, rhythmically, and visually.

c. Compare and contrast movement characteristics from a variety of dance genres or styles. Discuss specific characteristics and use adverbs and adjectives to describe them. Determine what dancers must do to perform them clearly.

**Grade 8**  
**DA:Pr4.1.8**  

a. Sculpt the body in space and design body shapes in relation to other dancers, objects, and environment. Use focus of eyes during complex floor and air patterns or direct and indirect pathways.

b. Analyze and select metric, kinetic, and breath phrasing and apply appropriately to dance phrases. Perform dance phrases of different lengths that use various timings within the same section. Use different tempi in different body parts at the same time.
c. Direct energy and dynamics in such a way that movement is textured. Incorporate energy and dynamics to technique exercises and dance performance. Use energy and dynamics to enhance and project movements.

Dance/Performing
#DA:Pr5.1

Process Component: Embody

Anchor Standard: Develop and refine artistic technique and work for presentation.

Enduring Understanding: Dancers use the mind-body connection and develop the body as an instrument for artistry and artistic expression.

Essential Question: What must a dancer do to prepare the mind and body for artistic expression?

Grade 6
DA:Pr5.1.6

a. Embody technical dance skills (for example, alignment, coordination, balance, core support, kinesthetic awareness, clarity of movement) to accurately execute changes of direction, levels, facings, pathways, elevations and landings, extensions of limbs, and movement transitions.

b. Apply basic anatomical knowledge, proprioceptive feedback, spatial awareness, and nutrition to promote safe and healthful strategies when warming up and dancing.

c. Collaborate as an ensemble to refine dances by identifying what works and does not work in executing complex patterns, sequences, and formations. Solve movement problems to dances by testing options and finding good results. Document self-improvements over time.

Grade 7
DA:Pr5.1.7

a. Apply body-use strategies to accommodate physical maturational development to technical dance skills (for example, functional alignment, coordination, balance, core support, kinesthetic awareness, clarity of movement, weight shifts, flexibility/range of motion).

b. Utilize healthful practices and sound nutrition in dance activities and everyday life. Discuss benefits of practices and how choices enhance performance.

c. Collaborate with peers to practice and refine dances. Develop group performance expectations through observation and analyses (for example, view live or recorded professional dancers and collaboratively develop group performance expectations based on information gained from observations).

Grade 8
DA:Pr5.1.8

a. Embody technical dance skills (for example, functional alignment, coordination, balance, core support, clarity of movement, weight shifts, flexibility/range of motion) to replicate, recall, and execute spatial designs and musical or rhythmical dance phrases.

b. Evaluate personal healthful practices in dance activities and everyday life including nutrition and injury prevention. Discuss choices made, the effects experienced, and methods for
improvement.

c. Collaborate with peers to discover strategies for achieving performance accuracy, clarity, and expressiveness. Articulate personal performance goals and practice to reach goals. Document personal improvement over time (for example, journaling, portfolio, or timeline).

Dance/Performing  
#DA:Pr6.1  
Process Component: Present  
Anchor Standard: Convey meaning through the presentation of artistic work.  
Enduring Understanding: Dance performance is an interaction between performer, production elements, and audience that heightens and amplifies artistic expression.  
Essential Question: How does a dancer heighten artistry in a public performance?

Grade 6  
DA:Pr6.1.6  
 prized recognize needs and adapt movements to performance area. Use performance etiquette and performance practices during class, rehearsal and performance. Post-performance, accept notes from choreographer and make corrections as needed and apply to future performances.

b. Compare and contrast a variety of possible production elements that would intensify and heighten the artistic intent of the work. Select choices and explain reasons for the decisions made using production terminology.

Grade 7  
DA:Pr6.1.7  
 a. Recommend changes to and adapt movements to performance area. Use performance etiquette and performance practices during class, rehearsal and performance. Maintain journal documenting these efforts. Post-performance, accept notes from choreographer and apply corrections to future performances.

b. Explore possibilities of producing dance in a variety of venues or for different audiences and, using production terminology, explain how the production elements would be handled in different situations.

Grade 8  
DA:Pr6.1.8  
 a. Demonstrate leadership qualities (for example commitment, dependability, responsibility, and cooperation) when preparing for performances. Use performance etiquette and performance practices during class, rehearsal and performance. Document efforts and create a plan for ongoing improvements. Post-performance, accept notes from choreographer and apply corrections to future performances.

b. Collaborate to design and execute production elements that would intensify and heighten the artistic intent of a dance performed on a stage, in a different venue, or for different audiences. Explain reasons for choices using production terminology.

Dance/Responding
#DA:Re7.1
Process Component: Analyze
Anchor Standard: Perceive and analyze artistic work.
Enduring Understanding: Dance is perceived and analyzed to comprehend its meaning.
Essential Question: How is a dance understood?

Grade 6
DA:Re7.1.6
a. Describe or demonstrate recurring patterns of movement and their relationships in dance.

b. Explain how the elements of dance are used in a variety of dance genres, styles, or cultural movement practices. Use genre-specific dance terminology.

Grade 7
DA:Re7.1.7
a. Compare, contrast, and discuss patterns of movement and their relationships in dance.

b. Compare and contrast how the elements of dance are used in a variety of genres, styles, or cultural movement practices. Use genre-specific dance terminology.

Grade 8
DA:Re7.1.8
a. Describe, demonstrate and discuss patterns of movement and their relationships in dance in context of artistic intent.

b. Explain how the elements of dance are used in a variety of genres, styles, or cultural movement practices to communicate intent. Use genre-specific dance terminology.

Dance/Responding
#DA:Re8.1
Process Component: Interpret
Anchor Standard: Interpret intent and meaning in artistic work.
Enduring Understanding: Dance is interpreted by considering intent, meaning, and artistic expression as communicated through the use of the body, elements of dance, dance technique, dance structure, and context.
Essential Question: How is dance interpreted?

Grade 6
DA:Re8.1.6
a. Explain how the artistic expression of a dance is achieved through the elements of dance, use of body, dance technique, dance structure, and context. Explain how these communicate the intent of the dance using genre specific dance terminology.

Grade 7
DA:Re8.1.7
a. Compare the meaning of different dances. Explain how the artistic expression of each dance is achieved through the elements of dance, use of body, dance technique, and context.

Use genre specific dance terminology.

Grade 8
DA:Re8.1.8
a. Select a dance and explain how artistic expression is achieved through relationships among the elements of dance, use of body, dance technique and context. Cite evidence in the dance to support your interpretation using genre specific dance terminology.

Dance/Responding
#DA:Re9.1
Process Component: Critique
Anchor Standard: Apply criteria to evaluate artistic work.
Enduring Understanding: Criteria for evaluating dance vary across genres, styles, and cultures.
Essential Question: What criteria are used to evaluate dance?

Grade 6
DA:Re9.1.6
a. Discuss the characteristics and artistic intent of a dance from a genre, style, or cultural movement practice and develop artistic criteria to critique the dance using genre-specific dance terminology.

Grade 7
DA:Re9.1.7
a. Compare artistic intent, content and context from dances to examine the characteristics of genre, style, or cultural movement practice. Based on the comparison, refine artistic criteria using genre-specific dance terminology.

Grade 8
DA:Re9.1.8
a. Use artistic criteria to determine what makes an effective performance. Consider content, context, genre, style, or cultural movement practice to comprehend artistic expression. Use genre-specific dance terminology.

Dance/Connecting
#DA:Cn10.1
Process Component: Synthesize
Anchor Standard: Synthesize and relate knowledge and personal experiences to make art.
Enduring Understanding: As dance is experienced, all personal experiences, knowledge, and contexts are integrated and synthesized to interpret meaning.
Essential Question: How does dance deepen our understanding of ourselves, other knowledge, and events around us?

Grade 6
DA:Cn10.1.6
a. Observe the movement characteristics or qualities observed in a specific dance genre. Describe differences and similarities about what was observed to one’s attitudes and movement preferences.

b. Conduct research using a variety of resources to find information about a social issue of great interest. Use the information to create a dance study that expresses a specific point of view on the topic. Discuss whether the experience of creating and sharing the dance reinforces personal views or offers new knowledge and perspectives.

Grade 7
DA:Cn10.1.7
a. Compare and contrast the movement characteristics or qualities found in a variety of dance genres. Discuss how the movement characteristics or qualities differ from one’s own movement characteristics or qualities and how different perspectives are communicated.

b. Research the historical development of a dance genre or style. Use knowledge gained from the research to create a dance study that evokes the essence of the style or genre. Share the study with peers as part of a lecture demonstration that tells the story of the historical journey of the chosen genre or style. Document the process of research and application.

**Grade 8**
**DA:Cn10.1.8**

a. Relate connections found between different dances and discuss the relevance of the connections to the development of one’s personal perspectives.

b. Investigate two contrasting topics using a variety of research methods. Identify and organize ideas to create representative movement phrases. Create a dance study exploring the contrasting ideas. Discuss how the research informed the choreographic process and deepens understanding of the topics.

**Dance/Connecting**
**#DA:Cn11.1**

**Process Component:** Relate

**Anchor Standard:** Relate artistic ideas and works with societal, cultural and historical context to deepen understanding.

**Enduring Understanding:** Dance literacy includes deep knowledge and perspectives about societal, cultural, historical, and community contexts.

**Essential Question:** How does knowing about societal, cultural, historical and community experiences expand dance literacy?

**Grade 6**
**DA:Cn11.1.6**

a. Interpret and show how the movement and qualities of a dance communicate its cultural, historical, and/or community purpose or meaning.

**Grade 7**
**DA:Cn11.1.7**

a. Compare, contrast, and discuss dances performed by people in various localities or communities. Formulate possible reasons why similarities and differences developed in relation to the ideas and perspectives important to each social group.

**Grade 8**
**DA:Cn11.1.8**

a. Analyze and discuss, how dances from a variety of cultures, societies, historical periods, or communities reveal the ideas and perspectives of the people.
Dance/Creating #DA:Cr1.1
Process Component: Explore
Anchor Standard: Generate and conceptualize artistic ideas and work.
Enduring Understanding: Choreographers use a variety of sources as inspiration and transform concepts and ideas into movement for artistic expression.
Essential Question: Where do choreographers get ideas for dances?

Grade Hs proficient
DA:Cr1.1.HSI
a. Explore a variety of stimuli for sourcing movement to develop an improvisational or choreographed dance study. Analyze the process and the relationship between the stimuli and the movement.

b. Experiment with the elements of dance to explore personal movement preferences and strengths, and select movements that challenge skills and build on strengths in an original dance study or dance.

Grade Hs advanced
DA:Cr1.1.HSIII
a. Synthesize content generated from stimulus material. Experiment and take risks to discover a personal voice to communicate artistic intent.

b. Expand personal movement preferences and strengths to discover unexpected solutions that communicate the artistic intent of an original dance. Analyze the unexpected solutions and explain why they were effective in expanding artistic intent.

Dance/Creating #DA:Cr2.1
Process Component: Plan
Anchor Standard: Organize and develop artistic ideas and work.
Enduring Understanding: The elements of dance, dance structures, and choreographic devices serve as both a foundation and a departure point for choreographers.
Essential Question: What influences choice-making in creating choreography?

Grade Hs proficient
DA:Cr2.1.HSI
a. Collaborate to design a dance using choreographic devices and dance structures to support an artistic intent. Explain how the dance structures clarify the artistic intent.

b. Develop an artistic statement for an original dance study or dance. Discuss how the use of movement elements, choreographic devices and dance structures serve to communicate the artistic statement.

Grade Hs advanced
DA:Cr2.1.HSIII
a. Demonstrate fluency and personal voice in designing and choreographing original dances. Justify choreographic choices and explain how they are used to intensify artistic intent.

b. Construct an artistic statement that communicates a personal, cultural and artistic perspective.
Anchor Standard: Refine and complete artistic work.
Enduring Understanding: Choreographers analyze, evaluate, refine, and document their work to communicate meaning.
Essential Question: How do choreographers use self-reflection, feedback from others, and documentation to improve the quality of their work?
Grade Hs proficient
DA:Cr3.1.HSI
a. Clarify the artistic intent of a dance by manipulating choreographic devices and dance structures based on established artistic criteria and feedback from others. Analyze and evaluate impact of choices made in the revision process.

b. Compare recognized systems to document a section of a dance using writing, symbols, or media technologies.
Grade Hs advanced
DA:Cr3.1.HSIII
a. Clarify the artistic intent of a dance by manipulating and refining choreographic devices, dance structures, and artistic criteria using self-reflection and feedback from others. Document choices made in the revision process and justify how the refinements support artistic intent.

b. Document a dance using recognized systems of dance documentation (for example, writing, a form of notation symbols, or using media technologies).

Dance/Performing
#DA:Pr4.1
Process Component: Express
Anchor Standard: Select, analyze, and interpret artistic work for presentation.
Enduring Understanding: Space, time, and energy are basic elements of dance.
Essential Question: How do dancers work with space, time and energy to communicate artistic expression?
Grade Hs proficient
DA:Pr4.1.HSI
a. Develop partner and ensemble skills that enable contrasting level changes through lifts, balances, or other means while maintaining a sense of spatial design and relationship.
Use space intentionally during phrases and through transitions between phrases. Establish and break relationships with others as appropriate to the choreography.

b. Use syncopation and accent movements related to different tempi. Take rhythmic cues from different aspects of accompaniment. Integrate breath phrasing with metric and kinesthetic phrasing.

c. Connect energy and dynamics to movements by applying them in and through all parts of the body. Develop total body awareness so that movement phrases demonstrate variances of energy and dynamics.
Grade Hs advanced
DA:Pr4.1.HSIII
a. Modulate and use the broadest range of movement in space for artistic and expressive clarity. Use inward and outward focus to clarify movement and intent. Establish and break relationships with other dancers and audience as appropriate to the dance.

b. Modulate time factors for artistic interest and expressive acuity. Demonstrate time complexity in phrasing with and without musical accompaniment. Use multiple and complex rhythms (for example, contrapuntal and/or polyrhythmic) at the same time. Work with and against rhythm of accompaniment or sound environments.

c. Modulate dynamics to clearly express intent while performing dance phrases and choreography. Perform movement sequences expressively using a broad dynamic range and employ dynamic skills for establishing relationships with other dancers and projecting to the audience.

Dance/Performing
#DA:Pr5.1
Process Component: Embody
Anchor Standard: Develop and refine artistic technique and work for presentation.
Enduring Understanding: Dancers use the mind-body connection and develop the body as an instrument for artistry and artistic expression.
Essential Question: What must a dancer do to prepare the mind and body for artistic expression?

Grade Hs proficient
DA:Pr5.1.HSI
a. Embody technical dance skills (for example, functional alignment, coordination, balance, core support, clarity of movement, weight shifts, flexibility/range of motion) to retain and execute dance choreography.

b. Develop a plan for healthful practices in dance activities and everyday life including nutrition and injury prevention. Discuss implementation of the plan and how it supports personal performance goals.

c. Collaborate with peers to establish and implement a rehearsal plan to meet performance goals. Use a variety of strategies to analyze and evaluate performances of self and others (for example, use video recordings of practice to analyze the difference between the way movements look and how they feel to match performance with visual affect). Articulate performance goals and justify reasons for selecting particular practice strategies.

Grade Hs advanced
DA:Pr5.1.HSIII
a. Apply body-mind principles to technical dance skills in complex choreography when performing solo, partnering, or dancing in ensemble works in a variety of dance genres and styles. Self-evaluate performances and discuss and analyze performance ability with others.

b. Research healthful and safe practices for dancers and modify personal practice based on findings. Discuss how research informs practice.
c. Initiate, plan, and direct rehearsals with attention to technical details and fulfilling artistic expression. Use a range of rehearsal strategies to achieve performance excellence.

**Dance/Performing**

#DA:Pr6.1

**Process Component:** Present

**Anchor Standard:** Convey meaning through the presentation of artistic work.

**Enduring Understanding:** Dance performance is an interaction between performer, production elements, and audience that heightens and amplifies artistic expression.

**Essential Question:** How does a dancer heighten artistry in a public performance?

**Grade Hs proficient**

DA:Pr6.1.HSI

a. Demonstrate leadership qualities (for example commitment, dependability, responsibility, and cooperation) when preparing for performances. Demonstrate performance etiquette and performance practices during class, rehearsal and performance. Post-performance, accept notes from choreographer and apply corrections to future performances. Document the rehearsal and performance process and evaluate methods and strategies using dance terminology and production terminology.

b. Evaluate possible designs for the production elements of a performance and select and execute the ideas that would intensify and heighten the artistic intent of the dances.

**Grade Hs advanced**

DA:Pr6.1.HSIII

a. Demonstrate leadership qualities (for example commitment, dependability, responsibility, and cooperation) when preparing for performances. Model performance etiquette and performance practices during class, rehearsal and performance. Enhance performance using a broad repertoire of strategies for dynamic projection. Develop a professional portfolio (resume, head shot, etc.) that documents the rehearsal and performance process with fluency in professional dance terminology and production terminology.

b. Work collaboratively to produce dance concerts in a variety of venues and design and organize the production elements that would be necessary to fulfill the artistic intent of the dance works in each of the venues.

**Dance/Responding**

#DA:Re7.1

**Process Component:** Analyze

**Anchor Standard:** Perceive and analyze artistic work.

**Enduring Understanding:** Dance is perceived and analyzed to comprehend its meaning.

**Essential Question:** How is a dance understood?

**Grade Hs proficient**

DA:Re7.1.HSI

a. Analyze recurring patterns of movement and their relationships in dance in context of artistic intent.

b. Analyze the use of elements of dance in a variety of genres, styles, or cultural movement
practices within its cultural context to communicate intent. Use genre-specific dance terminology.

**Grade Hs advanced**

**DA:Re7.1.HSIII**

a. Analyze dance works from a variety of dance genres and styles and explain how recurring patterns of movement and their relationships create well-structured and meaningful choreography.

b. Explain how dance communicates aesthetic and cultural values in a variety of genres, styles, or cultural movement practices. Use genre-specific dance terminology.

**Dance/Responding**

**#DA:Re8.1**

**Process Component:** Interpret

**Anchor Standard:** Interpret intent and meaning in artistic work.

**Enduring Understanding:** Dance is interpreted by considering intent, meaning, and artistic expression as communicated through the use of the body, elements of dance, dance technique, dance structure, and context.

**Essential Question:** How is dance interpreted?

**Grade Hs proficient**

**DA:Re8.1.HSI**

a. Select and compare different dances and discuss their intent and artistic expression. Explain how the relationships among the elements of dance, use of body, dance technique, and context enhance meaning and support intent using genre specific dance terminology.

**Grade Hs advanced**

**DA:Re8.1.HSIII**

a. Analyze and interpret how the elements of dance, execution of dance movement principles, and context contribute to artistic expression across different genres, styles, or cultural movement practices. Use genre specific dance terminology.

**Dance/Connecting**

**#DA:Re9.1**

**Process Component:** Critique

**Anchor Standard:** Apply criteria to evaluate artistic work.

**Enduring Understanding:** Criteria for evaluating dance vary across genres, styles, and cultures.

**Essential Question:** What criteria are used to evaluate dance?

**Grade Hs proficient**

**DA:Re9.1.HSI**

a. Analyze the artistic expression of a dance. Discuss insights using evaluative criteria and dance terminology.

**Grade Hs advanced**

**DA:Re9.1.HSIII**

a. Define personal artistic preferences to critique dance. Consider societal and personal values, and a range of artistic expression. Discuss perspectives with peers and justify views.
#DA:Cn10.1

**Process Component:** Synthesize

**Anchor Standard:** Synthesize and relate knowledge and personal experiences to make art.

**Enduring Understanding:** As dance is experienced, all personal experiences, knowledge, and contexts are integrated and synthesized to interpret meaning.

**Essential Question:** How does dance deepen our understanding of ourselves, other knowledge, and events around us?

**Grade Hs proficient**

DA:Cn10.1.HSI

a. Analyze a dance to determine the ideas expressed by the choreographer. Explain how the perspectives expressed by the choreographer may impact one’s own interpretation. Provide evidence to support one’s analysis.

b. Collaboratively identify a dance related question or problem. Conduct research through interview, research database, text, media, or movement. Analyze and apply information gathered by creating a group dance that answers the question posed. Discuss how the dance communicates new perspectives or realizations. Compare orally and in writing the process used in choreography to that of other creative, academic, or scientific procedures.

**Grade Hs advanced**

DA:Cn10.1.HSIII

a. Review original choreography developed over time with respect to its content and context and its relationship to personal perspectives. Reflect on and analyze the variables that contributed to changes in one’s personal growth.

b. Investigate various dance related careers through a variety of research methods and techniques. Select those careers of most interest. Develop and implement a Capstone Project that reflects a possible career choice.

**Dance/Connecting**

#DA:Cn11.1

**Process Component:** Relate

**Anchor Standard:** Relate artistic ideas and works with societal, cultural and historical context to deepen understanding.

**Enduring Understanding:** Dance literacy includes deep knowledge and perspectives about societal, cultural, historical, and community contexts.

**Essential Question:** How does knowing about societal, cultural, historical and community experiences expand dance literacy?

**Grade Hs proficient**

DA:Cn11.1.HSI

a. Analyze and discuss dances from selected genres or styles and/or historical time periods, and formulate reasons for the similarities and differences between them in relation to the ideas and perspectives of the peoples from which the dances originate

**Grade Hs advanced**

DA:Cn11.1.HSIII

a. Analyze dances from several genres or styles, historical time periods, and/or world dance forms. Discuss how dance movement characteristics, techniques, and artistic criteria relate to
the ideas and perspectives of the peoples from which the dances originate, and how the analysis has expanded one’s dance literacy.
Interdisciplinary Humanities Course:

Definition:

The Interdisciplinary Humanities course is a pathway for learners to discover and understand the human experience through a balanced and integrated combination of the arts and/or humanities with inclusion of two or more of the following content areas: architecture, philosophy, literature, world religions, visual and media arts, music, dance, theater, history and world languages.

Purpose:

In order to prepare students both to appreciate and apply the role of the arts and humanities in critical thinking and creative problem solving, an interdisciplinary humanities course will explore the human experience through the analysis and interpretation of themes, issues, and/or movements. The Interdisciplinary Humanities course will encourage students to become lifelong explorers who discover their connectedness to the records of lived experiences outside of their own individual social and cultural context. Through the creation/interpretation/communication of an original work and through the performance/presentation/production of that work, students are able to gain new perspectives.

Design:

The Interdisciplinary Humanities course should provide a well-rounded, thematic hands-on experience. The course is intended to integrate content from two or more arts and humanities disciplines. This course must be built upon the following five anchor standards: connect and compare, respond, create, present, and reflect. The standards for the Interdisciplinary Humanities course do not provide discipline content; the content should be derived from the selected disciplines.

Pedagogy:

In the Interdisciplinary Humanities classroom, the teacher(s) will have extensive expertise in two or more disciplines and will enable students to identify and apply authentic connections. Instruction will integrate essential concepts that transcend individual disciplines. The integration must be balanced in content, practices, and assessments. Structured around themes, issues, and/or movements, instruction will maintain a balance of academic study, performance, and project-based learning. The instructor will foster a collaborative environment that encourages academic risk-taking and inquiry.
Interdisciplinary Humanities Anchor Standards

**Anchor Standard 1:** Connect and compare ideas, diverse cultures, and events through two or more disciplines.

**Enduring Understanding:** Sources of inspiration are transformed into works that express the human experience.

**Essential Question(s):**
- What inspires people or cultures to create?
- What connections and comparisons between ideas, cultures, and events can be made?
- What is the relationship of a work to its time/culture?

**Goals and Objectives:**
- **Goal CC1:** Understand the interdisciplinary relationships of ideas, cultures, and events.
  - Objective CC1.1: Develop a working vocabulary for the disciplines of study.
  - Objective CC1.2: Identify and articulate how a work expresses the human experience.
- **Goal CC2:** Identify the relationship between two or more works/disciplines and how the historical contexts of ideas, cultures, and events are represented.
  - Objective CC2.1: Identify, in context, events and people influential in the development of historical events, movements, themes, and cultures.
  - Objective CC2.2: Explain how an artifact or work symbolizes and reflects a particular culture, event, theme, movement, or time period.
- **Goal CC3:** Understand how the human experience is represented through the arts and humanities.
  - Objective CC3.1: Identify the ways in which the structure of an art or discipline mirrors or portrays the values of society.
  - Objective CC3.2: Evaluate original works and how they represent a historical event, theme, movement, and/or culture.
Anchor Standard 2: Respond to universal themes, issues, and/or movements that express the human experience.

Enduring Understanding: Human experience repeats itself.

Essential Questions(s):
✓ How do themes, issues, and/or movements shape the human experience?
✓ How do we learn from the human experience?

Goals and Objectives:
- Goal RES1: Conduct analyses in the arts and humanities disciplines.
  - Objective RES 1.1: Summarize how the human experience is expressed through the arts and humanities.
  - Objective RES 1.2: Interpret content knowledge from multiple perspectives and/or sources.
  - Objective RES 1.3: Discover how key themes, issues, and/or movements are conveyed through the arts and humanities.
Anchor Standard 3: Create original works or unique interpretations that demonstrate knowledge of themes, issues, and/or movements that express the human experience.

Enduring Understanding: Through the creative process, people make meaning by investigating and developing awareness of perceptions, knowledge, and experiences.

Essential Question(s):
✓ How does creating enrich people’s lives?
✓ How do people contribute to awareness and understanding of their lives and the lives of their communities through the creative process?
✓ What role does persistence play in the creative process?

Goals and Objectives:
• Goal CR1: Communicate in the arts and humanities disciplines through creative expression
  o Objective CR1.1: Express, through means other than expository writing, an understanding and appreciation of the arts and humanities.
  o Objective CR1.2: Engage in collaborative learning to foster the creative process.
  o Objective CR1.3: Create an original product that interprets and/or investigates themes, issues, and/or movements.
  o Objective CR1.4: Revise, refine and develop an original work.
Anchor Standard 4: Convey meaning through the presentation/performance/production of an original work or unique interpretation of a work.

Enduring Understanding: Connections between multiple disciplines are visible through the presentation/performance of original works.

Essential Question(s):
✓ How does sharing original work deepen interdisciplinary understanding of ourselves and the human experience?
✓ How do we select the best method of performance/presentation/production to convey meaning?

Goals and Objectives:
• Goal PR1: Perform/present/produce an original work or interpretation of a work for an audience.
  o Objective PR1.1: Combine knowledge and understanding from two or more disciplines to present/perform their original or interpreted works for an audience.
  o Objective PR 1.2: Convey meaning through their presentation/performance.

• Goal PR2: Justify choices made in creating or interpreting a work.
  o Objective PR2.1: Apply knowledge and understanding from two or more disciplines to justify choices in the creation/interpretation of works.
  o Objective PR 2.2: Engage in constructive critique with peers.
Anchor Standard 5: Reflect on the process of creating/interpreting/presenting a work.

Enduring Understanding: Reflection on the creative process deepens understanding of the content and the creator.

Essential Question(s):
✓ How is the quality of a performance/presentation/production determined?
✓ When does the creator know that a work is finished?
✓ How do the arts and humanities enhance and empower our lives?

Goals and Objectives:
• Goal REF1: Evaluate one’s own work and the works of others as reflections of the themes, issues, and/or movements addressed in the course.
  o Objective REF 1.1: Utilize and apply a set of aesthetic criteria in evaluating the quality of one’s own work and works of others.
  o Objective REF 1.2: Respond to critique and criteria to revise or justify one’s own work.

• Goal REF2: Reflect upon the potential of the arts and humanities to enhance and expand one’s worldview.
Media Arts/Creating
#MA:Cr1.1.1
Process Component: Conceive
Anchor Standard: Generate and conceptualize artistic ideas and work.
Enduring Understanding: Media arts ideas, works, and processes are shaped by the imagination, creative processes, and by experiences, both within and outside of the arts.
Essential Question: How do media artists generate ideas? How can ideas for media arts productions be formed and developed to be effective and original?

Grade K
MA:Cr1.1.1.K
1. Discover and share ideas for media artworks using play and experimentation.

Grade 1
MA:Cr1.1.1.1
1. Express and share ideas for media artworks through sketching and modeling.

Grade 2
MA:Cr1.1.1.2
1. Discover multiple ideas for media artworks through brainstorming and improvising.

Grade 3
MA:Cr1.1.1.3
1. Develop multiple ideas for media artworks using a variety of tools, methods and/or materials.

Media Arts/Creating
#MA:Cr2.1.1
Process Component: Develop
Anchor Standard: Organize and develop artistic ideas and work.
Enduring Understanding: Media artists plan, organize, and develop creative ideas, plans, and models into process structures that can effectively realize the artistic idea.
Essential Question: How do media artists organize and develop ideas and models into process structures to achieve the desired end product?

Grade K
MA:Cr2.1.1.K
1. With guidance, use ideas to form plans or models for media arts productions.

Grade 1
MA:Cr2.1.1.1
1. With guidance, use identified ideas to form plans and models for media arts productions.

Grade 2
MA:Cr2.1.1.2
1. Choose ideas to create plans and models for media arts productions.

Grade 3
MA:Cr2.1.1.3
1. Form, share, and test ideas, plans, and models to prepare for media arts productions.

Media Arts/Creating
#MA:Cr3.1
Process Component: Construct
Anchor Standard: Refine and complete artistic work.
**Enduring Understanding:** The forming, integration, and refinement of aesthetic components, principles, and processes creates purpose, meaning, and artistic quality in media artworks.

**Essential Question:** What is required to produce a media artwork that conveys purpose, meaning, and artistic quality? How do media artists improve/refine their work?

- **Grade K**
  - MA:Cr3.1.K
    - a. Form and capture media arts content for expression and meaning in media arts productions.
    - b. Make changes to the content, form, or presentation of media artworks and share results.

- **Grade 1**
  - MA:Cr3.1.1
    - a. Create, capture, and assemble media arts content for media arts productions, identifying basic principles, such as pattern and repetition.
    - b. Practice and identify the effects of making changes to the content, form, or presentation, in order to refine and finish media artworks.

- **Grade 2**
  - MA:Cr3.1.2
    - a. Construct and assemble content for unified media arts productions, identifying and applying basic principles, such as positioning and attention.
    - b. Test and describe expressive effects in altering, refining, and completing media artworks.

- **Grade 3**
  - MA:Cr3.1.3
    - a. Construct and order various content into unified, purposeful media arts productions, describing and applying a defined set of principles, such as movement and force.
    - b. Practice and analyze how the emphasis of elements alters effect and purpose in refining and completing media artworks.

**Media Arts/Producing**

**Process Component:** Integrate

**Anchor Standard:** Select, analyze, and interpret artistic work for presentation.

**Enduring Understanding:** Media artists integrate various forms and contents to develop complex, unified artworks.

**Essential Question:** How are complex media arts experiences constructed?

- **Grade K**
  - MA:Pr4.1.K
    - a. With guidance, combine arts forms and media content, such as dance and video, to form media artworks.

- **Grade 1**
  - MA:Pr4.1.1
    - a. Combine varied academic, arts, and media content in media artworks, such as an illustrated story,
MA:Pr4.1.2
a. Practice combining varied academic, arts, and media content into unified media artworks, such as a narrated science animation.

Grade 3
MA:Pr4.1.3
a. Practice combining varied academic, arts, and media forms and content into unified media artworks, such as animation, music, and dance.

Media Arts/Producing
#MA:Pr5.1
Process Component: Practice
Anchor Standard: Develop and refine artistic techniques and work for presentation.
Enduring Understanding: Media artists require a range of skills and abilities to creatively solve problems within and through media arts productions.
Essential Question: What skills are required for creating effective media artworks and how are they improved? How are creativity and innovation developed within and through media arts productions? How do media artists use various tools and techniques?

Grade K
MA:Pr5.1.K
a. Identify and demonstrate basic skills, such as handling tools, making choices, and cooperating in creating media artworks.
b. Identify and demonstrate creative skills, such as performing, within media arts productions.
c. Practice, discover, and share how media arts creation tools work.

Grade 1
MA:Pr5.1.1
a. Describe and demonstrate various artistic skills and roles, such as technical steps, planning, and collaborating in media arts productions.
b. Describe and demonstrate basic creative skills within media arts productions, such as varying techniques.
c. Experiment with and share different ways to use tools and techniques to construct media artworks.

Grade 2
MA:Pr5.1.2
a. Enact roles to demonstrate basic ability in various identified artistic, design, technical, and soft skills, such as tool use and collaboration in media arts productions.
b. Demonstrate use of experimentation skills, such as playful practice, and trial and error, within and through media arts productions.
c. Demonstrate and explore identified methods to use tools to capture and form media artworks.

Grade 3
MA:Pr5.1.3
a. Exhibit developing ability in a variety of artistic, design, technical, and organizational roles, such as making compositional decisions, manipulating tools, and group planning in media arts productions.

b. Exhibit basic creative skills to invent new content and solutions within and through media arts productions.

c. Exhibit standard use of tools and techniques while constructing media artworks.

Media Arts/Producing
#MA:Pr6.1
Process Component: Present
Anchor Standard: Convey meaning through the presentation of artistic work.
Enduring Understanding: Media artists purposefully present, share, and distribute media artworks for various contexts.
Essential Question: How does time, place, audience, and context affect presenting or performing choices for media artworks? How can presenting or sharing media artworks in a public format help a media artist learn and grow?

Grade K
MA:Pr6.1.K
a. With guidance, identify and share roles and the situation in presenting media artworks.

b. With guidance, identify and share reactions to the presentation of media artworks.

Grade 1
MA:Pr6.1.1
a. With guidance, discuss presentation conditions and perform a task in presenting media artworks.

b. With guidance, discuss the experience of the presentation of media artworks.

Grade 2
MA:Pr6.1.2
a. Identify and describe presentation conditions and perform task(s) in presenting media artworks.

b. Identify and describe the experience and share results of presenting media artworks.

Grade 3
MA:Pr6.1.3
a. Identify and describe the presentation conditions, and take on roles and processes in presenting or distributing media artworks.

b. Identify and describe the experience, and share results of and improvements for presenting media artworks.

Media Arts/Responding
#MA:Re7.1
Process Component: Perceive
Anchor Standard: Perceive and analyze artistic work.
Enduring Understanding: Identifying the qualities and characteristics of media artworks improves one's artistic appreciation and production.
Essential Question: How do we 'read' media artworks and discern their relational components? How do media artworks function to convey meaning and manage audience experience?

Grade K
MA:Re7.1.K
a. Recognize and share components and messages in media artworks.

b. Recognize and share how a variety of media artworks create different experiences.

Grade 1
MA:Re7.1.1
a. Identify components and messages in media artworks.

b. With guidance, identify how a variety of media artworks create different experiences.

Grade 2
MA:Re7.1.2
a. Identify and describe the components and messages in media artworks.

b. Identify and describe how a variety of media artworks create different experiences.

Grade 3
MA:Re7.1.3
a. Identify and describe how messages are created by components in media artworks.

b. Identify and describe how various forms, methods, and styles in media artworks manage audience experience.

Media Arts/Responding
#MA:Re8.1
Process Component: Interpret
Anchor Standard: Interpret intent and meaning in artistic work.
Enduring Understanding: Interpretation and appreciation require consideration of the intent, form, and context of the media and artwork.
Essential Question: How do people relate to and interpret media artworks?

Grade K
MA:Re8.1.K
a. With guidance, share observations regarding a variety of media artworks.

Grade 1
MA:Re8.1.1
a. With guidance, identify the meanings of a variety of media artworks.

Grade 2
MA:Re8.1.2
a. Determine the purposes and meanings of media artworks, considering their context.

Grade 3
MA:Re8.1.3
a. Determine the purposes and meanings of media artworks while describing their context.
Media Arts/Responding
#MA:Re9.1

Process Component: Evaluate
Anchor Standard: Apply criteria to evaluate artistic work.
Enduring Understanding: Skillful evaluation and critique are critical components of experiencing, appreciating, and producing media artworks.
Essential Question: How and why do media artists value and judge media artworks? When and how should we evaluate and critique media artworks to improve them?

Grade K
MA:Re9.1.K
a. Share appealing qualities and possible changes in media artworks.

Grade 1
MA:Re9.1.1
a. Identify the effective parts of and possible changes to media artworks considering viewers.

Grade 2
MA:Re9.1.2
a. Discuss the effectiveness of and improvements for media artworks, considering their context.

Grade 3
MA:Re9.1.3
a. Identify basic criteria for and evaluate media artworks, considering possible improvements and context.

Media Arts/Connecting
#MA:Cn10.1

Process Component: Synthesize
Anchor Standard: Synthesize and relate knowledge and personal experiences to make art.
Enduring Understanding: Media artworks synthesize meaning and form cultural experience.
Essential Question: How do we relate knowledge and experiences to understanding and making media artworks? How do we learn about and create meaning through producing media artworks?

Grade K
MA:Cn10.1.K
a. Use personal experiences and choices in making media artworks.

b. Share memorable experiences of media artworks.

Grade 1
MA:Cn10.1.1
a. Use personal experiences, interests, and models in creating media artworks.

b. Share meaningful experiences of media artworks.

Grade 2
MA:Cn10.1.2
a. Use personal experiences, interests, information, and models in creating media artworks.

b. Discuss experiences of media artworks, describing their meaning and purpose.

Grade 3
MA:Cn10.1.3
a. Use personal and external resources, such as interests, information, and models, to create media artworks.

b. Identify and show how media artworks form meanings, situations, and/or culture, such as popular media.

**Media Arts/Connecting**  
#MA:Cn11.1  
**Process Component:** Relate  
**Anchor Standard:** Relate artistic ideas and works with societal, cultural, and historical context to deepen understanding.  
**Enduring Understanding:** Media artworks and ideas are better understood and produced by relating them to their purposes, values, and various contexts.  
**Essential Question:** How does media arts relate to its various contexts, purposes, and values? How does investigating these relationships inform and deepen the media artist's understanding and work?

**Grade K**  
MA:Cn11.1.K  
- a. With guidance, share ideas in relating media artworks and everyday life, such as daily activities.

- b. With guidance, interact safely and appropriately with media arts tools and environments.

**Grade 1**  
MA:Cn11.1.1  
- a. Discuss and describe media artworks in everyday life, such as popular media, and connections with family and friends.

- b. Interact appropriately with media arts tools and environments, considering safety, rules, and fairness.

**Grade 2**  
MA:Cn11.1.2  
- a. Discuss how media artworks and ideas relate to everyday and cultural life, such as media messages and media environments.

- b. Interact appropriately with media arts tools and environments, considering safety, rules, and fairness.

**Grade 3**  
MA:Cn11.1.3  
- a. Identify how media artworks and ideas relate to everyday and cultural life and can influence values and online behavior.

- b. Examine and interact appropriately with media arts tools and environments, considering safety, rules, and fairness.
Media Arts/Crating
#MA:Cr1.1.1
Process Component: Conceive
Anchor Standard: Generate and conceptualize artistic ideas and work.
Enduring Understanding: Media arts ideas, works, and processes are shaped by the imagination, creative processes, and by experiences, both within and outside of the arts.
Essential Question: How do media artists generate ideas? How can ideas for media arts productions be formed and developed to be effective and original?

Grade 4
MA:Cr1.1.1.4
a. Conceive of original artistic goals for media artworks using a variety of creative methods, such as brainstorming and modeling.

Grade 5
MA:Cr1.1.1.5
a. Envision original ideas and innovations for media artworks using personal experiences and/or the work of others.

Media Arts/Crating
#MA:Cr2.1.1
Process Component: Develop
Anchor Standard: Organize and develop artistic ideas and work.
Enduring Understanding: Media artists plan, organize, and develop creative ideas, plans, and models into process structures that can effectively realize the artistic idea.
Essential Question: How do media artists organize and develop ideas and models into process structures to achieve the desired end product?

Grade 4
MA:Cr2.1.1.4
a. Discuss, test, and assemble ideas, plans, and models for media arts productions, considering the artistic goals and the presentation.

Grade 5
MA:Cr2.1.1.5
a. Develop, present, and test ideas, plans, models, and proposals for media arts productions, considering the artistic goals and audience.

Media Arts/Crating
#MA:Cr3.1
Process Component: Construct
Anchor Standard: Refine and complete artistic work.
Enduring Understanding: The forming, integration, and refinement of aesthetic components, principles, and processes creates purpose, meaning, and artistic quality in media artworks.
Essential Question: What is required to produce a media artwork that conveys purpose, meaning, and artistic quality? How do media artists improve/refine their work?

Grade 4
MA:Cr3.1.4
a. Structure and arrange various content and components to convey purpose and meaning in different media arts productions, applying sets of associated principles, such
as balance and contrast.

b. Demonstrate intentional effect in refining media artworks, emphasizing elements for a purpose.

**Grade 5**

**MA:Cr3.1.5**

a. Create content and combine components to convey expression, purpose, and meaning in a variety of media arts productions, utilizing sets of associated principles, such as emphasis and exaggeration.

b. Determine how elements and components can be altered for clear communication and intentional effects, and refine media artworks to improve clarity and purpose.

**Media Arts/Producing**

**#MA:Pr4.1**

**Process Component:** Integrate

**Anchor Standard:** Select, analyze, and interpret artistic work for presentation.

**Enduring Understanding:** Media artists integrate various forms and contents to develop complex, unified artworks.

**Essential Question:** How are complex media arts experiences constructed?

**Grade 4**

**MA:Pr4.1.4**

a. Demonstrate how a variety of academic, arts, and media forms and content may be mixed and coordinated into media artworks, such as narrative, dance, and media.

**Grade 5**

**MA:Pr4.1.5**

a. Create media artworks through the integration of multiple contents and forms, such as a media broadcast.

**Media Arts/Producing**

**#MA:Pr5.1**

**Process Component:** Practice

**Anchor Standard:** Develop and refine artistic techniques and work for presentation.

**Enduring Understanding:** Media artists require a range of skills and abilities to creatively solve problems within and through media arts productions.

**Essential Question:** What skills are required for creating effective media artworks and how are they improved? How are creativity and innovation developed within and through media arts productions? How do media artists use various tools and techniques?

**Grade 4**

**MA:Pr5.1.4**

a. Enact identified roles to practice foundational artistic, design, technical, and soft skills, such as formal technique, equipment usage, production, and collaboration in media arts productions.

b. Practice foundational innovative abilities, such as design thinking, in addressing problems within and through media arts productions.
c. Demonstrate use of tools and techniques in standard and novel ways while constructing media artworks.  
**Grade 5**  
**MA:Pr5.1.5**  

a. Enact various roles to practice fundamental ability in artistic, design, technical, and soft skills, such as formal technique, production, and collaboration in media arts productions.  

b. Practice fundamental creative and innovative abilities, such as expanding conventions, in addressing problems within and through media arts productions.  

c. Examine how tools and techniques could be used in standard and experimental ways in constructing media artworks.

---

**Media Arts/Producing**  
**#MA:Pr6.1**  
**Process Component:** Present  
**Anchor Standard:** Convey meaning through the presentation of artistic work.  
**Enduring Understanding:** Media artists purposefully present, share, and distribute media artworks for various contexts.  
**Essential Question:** How does time, place, audience, and context affect presenting or performing choices for media artworks? How can presenting or sharing media artworks in a public format help a media artist learn and grow?  

**Grade 4**  
**MA:Pr6.1.4**  

a. Explain the presentation conditions, and fulfill a role and processes in presenting or distributing media artworks.  

b. Explain results of and improvements for presenting media artworks.  

**Grade 5**  
**MA:Pr6.1.5**  

a. Compare qualities and purposes of presentation formats, and fulfill a role and associated processes in presentation and/or distribution of media artworks.  

b. Compare results of and improvements for presenting media artworks.

---

**Media Arts/Responding**  
**#MA:Re7.1**  
**Process Component:** Perceive  
**Anchor Standard:** Perceive and analyze artistic work.  
**Enduring Understanding:** Identifying the qualities and characteristics of media artworks improves one's artistic appreciation and production.  
**Essential Question:** How do we 'read' media artworks and discern their relational components? How do media artworks function to convey meaning and manage audience experience?  

**Grade 4**  
**MA:Re7.1.4**
a. Identify, describe, and explain how messages are created by components in media artworks.

b. Identify, describe, and explain how various forms, methods, and styles in media artworks manage audience experience.

**Grade 5**
**MA:Re7.1.5**
a. Identify, describe, and differentiate how message and meaning are created by components in media artworks.

b. Identify, describe, and differentiate how various forms, methods, and styles in media artworks manage audience experience.

---

**Media Arts/Responding**
**#MA:Re8.1**
**Process Component:** Interpret

**Anchor Standard:** Interpret intent and meaning in artistic work.

**Enduring Understanding:** Interpretation and appreciation require consideration of the intent, form, and context of the media and artwork.

**Essential Question:** How do people relate to and interpret media artworks?

**Grade 4**
**MA:Re8.1.4**
a. Determine and explain reactions and interpretations to a variety of media artworks, considering their purpose and context.

**Grade 5**
**MA:Re8.1.5**
a. Determine and compare personal and group interpretations of a variety of media artworks, considering their intention and context.

---

**Media Arts/Responding**
**#MA:Re9.1**
**Process Component:** Evaluate

**Anchor Standard:** Apply criteria to evaluate artistic work.

**Enduring Understanding:** Skillful evaluation and critique are critical components of experiencing, appreciating, and producing media artworks.

**Essential Question:** How and why do media artists value and judge media artworks? When and how should we evaluate and critique media artworks to improve them?

**Grade 4**
**MA:Re9.1.4**
a. Identify and apply basic criteria for evaluating and improving media artworks and production processes, considering context.

**Grade 5**
**MA:Re9.1.5**
a. Determine and apply criteria for evaluating media artworks and production processes, considering context, and practicing constructive feedback.

---

**Media Arts/Connecting**
#MA:Cn10.1

**Process Component:** Synthesize

**Anchor Standard:** Synthesize and relate knowledge and personal experiences to make art.

**Enduring Understanding:** Media artworks synthesize meaning and form cultural experience.

**Essential Question:** How do we relate knowledge and experiences to understanding and making media artworks? How do we learn about and create meaning through producing media artworks?

**Grade 4**

**MA:Cn10.1.4**

a. Examine and use personal and external resources, such as interests, research, and cultural understanding, to create media artworks.

b. Examine and show how media artworks form meanings, situations, and/or cultural experiences, such as online spaces.

**Grade 5**

**MA:Cn10.1.5**

a. Access and use internal and external resources to create media artworks, such as interests, knowledge, and experiences.

b. Examine and show how media artworks form meanings, situations, and cultural experiences, such as news and cultural events.

### Media Arts/Connecting

#MA:Cn11.1

**Process Component:** Relate

**Anchor Standard:** Relate artistic ideas and works with societal, cultural, and historical context to deepen understanding.

**Enduring Understanding:** Media artworks and ideas are better understood and produced by relating them to their purposes, values, and various contexts.

**Essential Question:** How does media arts relate to its various contexts, purposes, and values? How does investigating these relationships inform and deepen the media artist's understanding and work?

**Grade 4**

**MA:Cn11.1.4**

a. Explain verbally and/or in media artworks, how media artworks and ideas relate to everyday and cultural life, such as fantasy and reality, and technology use.

b. Examine and interact appropriately with media arts tools and environments, considering ethics, rules, and fairness.

**Grade 5**

**MA:Cn11.1.5**

a. Research and show how media artworks and ideas relate to personal, social and community life, such as exploring commercial and information purposes, history, and ethics.

b. Examine, discuss and interact appropriately with media arts tools and environments, considering ethics, rules, and media literacy.

**Process Component:** Conceive  
**Anchor Standard:** Generate and conceptualize artistic ideas and work.  
**Enduring Understanding:** Media arts ideas, works, and processes are shaped by the imagination, creative processes, and by experiences, both within and outside of the arts.  
**Essential Question:** How do media artists generate ideas? How can ideas for media arts productions be formed and developed to be effective and original?  

**Grade 6**  
MA:Cr1.1.1.6  
a. Formulate variations of goals and solutions for media artworks by practicing chosen creative processes, such as sketching, improvising and brainstorming.  

**Grade 7**  
MA:Cr1.1.1.7  
a. Produce a variety of ideas and solutions for media artworks through application of chosen inventive processes, such as concept modeling and prototyping.  

**Grade 8**  
MA:Cr1.1.1.8  
a. Generate ideas, goals, and solutions for original media artworks through application of focused creative processes, such as divergent thinking and experimenting.

Media Arts/Creating  
#MA:Cr2.1.1  
**Process Component:** Develop  
**Anchor Standard:** Organize and develop artistic ideas and work.  
**Enduring Understanding:** Media artists plan, organize, and develop creative ideas, plans, and models into process structures that can effectively realize the artistic idea.  
**Essential Question:** How do media artists organize and develop ideas and models into process structures to achieve the desired end product?  

**Grade 6**  
MA:Cr2.1.1.6  
a. Organize, propose, and evaluate artistic ideas, plans, prototypes, and production processes for media arts productions, considering purposeful intent.  

**Grade 7**  
MA:Cr2.1.1.7  
a. Design, propose, and evaluate artistic ideas, plans, prototypes, and production processes for media arts productions, considering expressive intent and resources.  

**Grade 8**  
MA:Cr2.1.1.8  
a. Structure and critique ideas, plans, prototypes, and production processes for media arts productions, considering intent, resources, and the presentation context.

Media Arts/Creating  
#MA:Cr3.1  
**Process Component:** Construct
Anchor Standard: Refine and complete artistic work.
Enduring Understanding: The forming, integration, and refinement of aesthetic components, principles, and processes creates purpose, meaning, and artistic quality in media artworks.
Essential Question: What is required to produce a media artwork that conveys purpose, meaning, and artistic quality? How do media artists improve/refine their work?

Grade 6
MA:Cr3.1.6
a. Experiment with multiple approaches to produce content and components for determined purpose and meaning in media arts productions, utilizing a range of associated principles, such as point of view and perspective.

b. Appraise how elements and components can be altered for intentional effects and audience, and refine media artworks to reflect purpose and audience.

Grade 7
MA:Cr3.1.7
a. Coordinate production processes to integrate content and components for determined purpose and meaning in media arts productions, demonstrating understanding of associated principles, such as narrative structures and composition.

b. Improve and refine media artworks by intentionally emphasizing particular expressive elements to reflect an understanding of purpose, audience, or place.

Grade 8
MA:Cr3.1.8
a. Implement production processes to integrate content and stylistic conventions for determined meaning in media arts productions, demonstrating understanding of associated principles, such as theme and unity.

b. Refine and modify media artworks, improving technical quality and intentionally accentuating selected expressive and stylistic elements, to reflect an understanding of purpose, audience, and place.

Media Arts/Producing
#MA:Pr4.1
Process Component: Integrate
Anchor Standard: Select, analyze, and interpret artistic work for presentation.
Enduring Understanding: Media artists integrate various forms and contents to develop complex, unified artworks.
Essential Question: How are complex media arts experiences constructed?

Grade 6
MA:Pr4.1.6
a. Validate how integrating multiple contents and forms can support a central idea in a media artwork, such as media, narratives, and performance.

Grade 7
MA:Pr4.1.7
a. Integrate multiple contents and forms into unified media arts productions that convey consistent perspectives and narratives, such as an interactive video game.
Grade 8
MA:Pr4.1.8
a. Integrate multiple contents and forms into unified media arts productions that convey specific themes or ideas, such as interdisciplinary projects, or multimedia theatre.

Media Arts/Producing
#MA:Pr5.1
Process Component: Practice
Anchor Standard: Develop and refine artistic techniques and work for presentation.
Enduring Understanding: Media artists require a range of skills and abilities to creatively solve problems within and through media arts productions.
Essential Question: What skills are required for creating effective media artworks and how are they improved? How are creativity and innovation developed within and through media arts productions? How do media artists use various tools and techniques?

Grade 6
MA:Pr5.1.6
a. Develop a variety of artistic, design, technical, and soft skills through performing various assigned roles in producing media artworks, such as invention, formal technique, production, self-initiative, and problem-solving.

b. Develop a variety of creative and adaptive innovation abilities, such as testing constraints, in developing solutions within and through media arts productions.

c. Demonstrate adaptability using tools and techniques in standard and experimental ways in constructing media artworks.

Grade 7
MA:Pr5.1.7
a. Exhibit an increasing set of artistic, design, technical, and soft skills through performing various roles in producing media artworks, such as creative problem-solving and organizing.

b. Exhibit an increasing set of creative and adaptive innovation abilities, such as exploratory processes, in developing solutions within and through media arts productions.

c. Demonstrate adaptability using tools and techniques in standard and experimental ways to achieve an assigned purpose in constructing media artworks.

Grade 8
MA:Pr5.1.8
a. Demonstrate a defined range of artistic, design, technical, and soft skills, through performing specified roles in producing media artworks, such as strategizing and collaborative communication.

b. Demonstrate a defined range of creative and adaptive innovation abilities, such as divergent solutions and bending conventions, in developing new solutions for identified problems within and through media arts productions.
c. Demonstrate adaptability using tools, techniques and content in standard and experimental ways to communicate intent in the production of media artworks.

Media Arts/Producing
#MA:Pr6.1

Process Component: Present

Anchor Standard: Convey meaning through the presentation of artistic work.

Enduring Understanding: Media artists purposefully present, share, and distribute media artworks for various contexts.

Essential Question: How does time, place, audience, and context affect presenting or performing choices for media artworks? How can presenting or sharing media artworks in a public format help a media artist learn and grow?

Grade 6
MA:Pr6.1.6
a. Analyze various presentation formats and fulfill various tasks and defined processes in the presentation and/or distribution of media artworks.

b. Analyze results of and improvements for presenting media artworks.

Grade 7
MA:Pr6.1.7
a. Evaluate various presentation formats in order to fulfill various tasks and defined processes in the presentation and/or distribution of media artworks.

b. Evaluate the results of and improvements for presenting media artworks, considering impacts on personal growth.

Grade 8
MA:Pr6.1.8
a. Design the presentation and distribution of media artworks through multiple formats and/or contexts.

b. Evaluate the results of and implement improvements for presenting media artworks, considering impacts on personal growth and external effects.

Media Arts/Responding
#MA:Re7.1

Process Component: Perceive

Anchor Standard: Perceive and analyze artistic work.

Enduring Understanding: Identifying the qualities and characteristics of media artworks improves one's artistic appreciation and production.

Essential Question: How do we 'read' media artworks and discern their relational components? How do media artworks function to convey meaning and manage audience experience?

Grade 6
MA:Re7.1.6
a. Identify, describe, and analyze how message and meaning are created by components in media artworks.
b. Identify, describe, and analyze how various forms, methods, and styles in media artworks manage audience experience.

Grade 7
MA:Re7.1.7

a. Describe, compare, and analyze the qualities of and relationships between the components in media artworks.

b. Describe, compare, and analyze how various forms, methods, and styles in media artworks interact with personal preferences in influencing audience experience.

Grade 8
MA:Re7.1.8

a. Compare, contrast, and analyze the qualities of and relationships between the components and style in media artworks.

b. Compare, contrast, and analyze how various forms, methods, and styles in media artworks manage audience experience and create intention.

Media Arts/Responding
#MA:Re8.1

Process Component: Interpret

Anchor Standard: Interpret intent and meaning in artistic work.

Enduring Understanding: Interpretation and appreciation require consideration of the intent, form, and context of the media and artwork.

Essential Question: How do people relate to and interpret media artworks?

Grade 6
MA:Re8.1.6

a. Analyze the intent of a variety of media artworks, using given criteria.

Grade 7
MA:Re8.1.7

a. Analyze the intent and meaning of a variety of media artworks, using self-developed criteria.

Grade 8
MA:Re8.1.8

a. Analyze the intent and meanings of a variety of media artworks, focusing on intentions, forms, and various contexts.

Media Arts/Responding
#MA:Re9.1

Process Component: Evaluate

Anchor Standard: Apply criteria to evaluate artistic work.

Enduring Understanding: Skillful evaluation and critique are critical components of experiencing, appreciating, and producing media artworks.

Essential Question: How and why do media artists value and judge media artworks? When and how should we evaluate and critique media artworks to improve them?

Grade 6
MA:Re9.1.6
a. Determine and apply specific criteria to evaluate various media artworks and production processes, considering context and practicing constructive feedback.

Grade 7
MA:Re9.1.7

a. Develop and apply criteria to evaluate various media artworks and production processes, considering context, and practicing constructive feedback.

Grade 8
MA:Re9.1.8

a. Evaluate media artworks and production processes with developed criteria, considering context and artistic goals.

Media Arts/Connecting
#MA:Cn10.1
Process Component: Synthesize
Anchor Standard: Synthesize and relate knowledge and personal experiences to make art.
Enduring Understanding: Media artworks synthesize meaning and form cultural experience.
Essential Question: How do we relate knowledge and experiences to understanding and making media artworks? How do we learn about and create meaning through producing media artworks?

Grade 6
MA:Cn10.1.6
a. Access, evaluate, and use internal and external resources to create media artworks, such as knowledge, experiences, interests, and research.

b. Explain and show how media artworks form new meanings, situations, and cultural experiences, such as historical events.

Grade 7
MA:Cn10.1.7
a. Access, evaluate and use internal and external resources to inform the creation of media artworks, such as experiences, interests, research, and exemplary works.

b. Explain and show how media artworks form new meanings and knowledge, situations, and cultural experiences, such as learning, and new information.

Grade 8
MA:Cn10.1.8
a. Access, evaluate, and use internal and external resources to inform the creation of media artworks, such as cultural and societal knowledge, research, and exemplary works.

b. Explain and demonstrate how media artworks expand meaning and knowledge, and create cultural experiences, such as local and global events.

Media Arts/Connecting
#MA:Cn11.1
Process Component: Relate
Anchor Standard: Relate artistic ideas and works with societal, cultural, and historical context to deepen understanding.
Enduring Understanding: Media artworks and ideas are better understood and produced by relating them to their purposes, values, and various contexts.

Essential Question: How does media arts relate to its various contexts, purposes, and values? How does investigating these relationships inform and deepen the media artist's understanding and work?

Grade 6
MA:Cn11.1.6
a. Research and show how media artworks and ideas relate to personal life, and social, community, and cultural situations, such as personal identity, history, and entertainment.

b. Analyze and interact appropriately with media arts tools and environments, considering fair use and copyright, ethics, and media literacy.

Grade 7
MA:Cn11.1.7
a. Research and demonstrate how media artworks and ideas relate to various situations, purposes and values, such as community, vocations, and social media.

b. Analyze and responsibly interact with media arts tools and environments, considering copyright, ethics, media literacy, and social media.

Grade 8
MA:Cn11.1.8
a. Demonstrate and explain how media artworks and ideas relate to various contexts, purposes, and values, such as democracy, environment, and connecting people and places.

b. Analyze and responsibly interact with media arts tools, environments, legal, and technological contexts, considering ethics, media literacy, social media, and virtual worlds.
Media Arts/Cr
#MA:Cr1.1.1

Process Component: Conceive

Anchor Standard: Generate and conceptualize artistic ideas and work.
Enduring Understanding: Media arts ideas, works, and processes are shaped by the imagination, creative processes, and by experiences, both within and outside of the arts.

Essential Question: How do media artists generate ideas? How can ideas for media arts productions be formed and developed to be effective and original?

Grade Hs proficient
MA:Cr1.1.1.HSI
a. identified generative methods to formulate multiple ideas, develop artistic goals, and problem solve in media arts creation processes.

Grade Hs accomplished
MA:Cr1.1.1.HSII
a. Strategically utilize generative methods to formulate multiple ideas, refine artistic goals, and increase the originality of approaches in media arts creation processes.

Grade Hs advanced
MA:Cr1.1.1.HSIII
a. Integrate aesthetic principles with a variety of generative methods to fluently form original ideas, solutions, and innovations in media arts creation processes.

Media Arts/Cr
#MA:Cr2.1.1

Process Component: Develop

Anchor Standard: Organize and develop artistic ideas and work.
Enduring Understanding: Media artists plan, organize, and develop creative ideas, plans, and models into process structures that can effectively realize the artistic idea.

Essential Question: How do media artists organize and develop ideas and models into process structures to achieve the desired end product?

Grade Hs proficient
MA:Cr2.1.1.HSI
a. aesthetic criteria in developing, proposing, and refining artistic ideas, plans, prototypes, and production processes for media arts productions, considering original inspirations, goals, and presentation context.

Grade Hs accomplished
MA:Cr2.1.1.HSII
a. Apply a personal aesthetic in designing, testing, and refining original artistic ideas, prototypes, and production strategies for media arts productions, considering artistic intentions, constraints of resources, and presentation context.

Grade Hs advanced
MA:Cr2.1.1.HSIII
a. Integrate a sophisticated personal aesthetic and knowledge of systems processes in forming, testing, and proposing original artistic ideas, prototypes, and production frameworks, considering complex constraints of goals, time, resources, and personal limitations.
Process Component: Construct
Anchor Standard: Refine and complete artistic work.
Enduring Understanding: The forming, integration, and refinement of aesthetic components, principles, and processes creates purpose, meaning, and artistic quality in media artworks.
Essential Question: What is required to produce a media artwork that conveys purpose, meaning, and artistic quality? How do media artists improve/refine their work?

Grade Hs proficient
MA:Cr3.1.HSI
a. Consolidate production processes to demonstrate deliberate choices in organizing and integrating content and stylistic conventions in media arts productions, demonstrating understanding of associated principles, such as emphasis and tone.

b. Refine and modify media artworks, honing aesthetic quality and intentionally accentuating stylistic elements, to reflect an understanding of personal goals and preferences.

Grade Hs accomplished
MA:Cr3.1.HSII
a. Consolidate production processes to demonstrate deliberate choices in organizing and integrating content and stylistic conventions in media arts production, demonstrating understanding of associated principles, such as continuity and juxtaposition.

b. Refine and elaborate aesthetic elements and technical components to intentionally form impactful expressions in media artworks for specific purposes, intentions, audiences and contexts.

Grade Hs advanced
MA:Cr3.1.HSIII
a. Synthesize content, processes, and components to express compelling purpose, story, emotion, or ideas in complex media arts productions, demonstrating mastery of associated principles, such as hybridization.

b. Intentionally and consistently refine and elaborate elements and components to form impactful expressions in media artworks, directed at specific purposes, audiences, and contexts.

Media Arts/Producing
#MA:Pr4.1
Process Component: Integrate
Anchor Standard: Select, analyze, and interpret artistic work for presentation.
Enduring Understanding: Media artists integrate various forms and contents to develop complex, unified artworks.
Essential Question: How are complex media arts experiences constructed?

Grade Hs proficient
MA:Pr4.1.HSI
a. Integrate various arts, media arts forms, and content into unified media arts productions, considering the reaction and interaction of the audience, such as experiential design.

Grade Hs accomplished
MA:Pr4.1.HSII
a. Integrate various arts, media arts forms, and academic content into unified media arts productions that retain thematic integrity and stylistic continuity, such as transmedia productions.

**Grade Hs advanced**

**MA:Pr4.1.HSIII**

a. Synthesize various arts, media arts forms and academic content into unified media arts productions that retain artistic fidelity across platforms, such as transdisciplinary productions.

**Media Arts/Producing**

#MA:Pr5.1

**Process Component:** Practice

**Anchor Standard:** Develop and refine artistic techniques and work for presentation.

**Enduring Understanding:** Media artists require a range of skills and abilities to creatively solve problems within and through media arts productions.

**Essential Question:** What skills are required for creating effective media artworks and how are they improved? How are creativity and innovation developed within and through media arts productions? How do media artists use various tools and techniques?

**Grade Hs proficient**

**MA:Pr5.1.HSI**

a. Demonstrate progression in artistic, design, technical, and soft skills, as a result of selecting and fulfilling specified roles in the production of a variety of media artworks.

b. Develop and refine a determined range of creative and adaptive innovation abilities, such as design thinking, and risk taking, in addressing identified challenges and constraints within and through media arts productions.

c. Demonstrate adaptation and innovation through the combination of tools, techniques and content, in standard and innovative ways, to communicate intent in the production of media artworks.

**Grade Hs accomplished**

**MA:Pr5.1.HSII**

a. Demonstrate effective command of artistic, design, technical and soft skills in managing and producing media artworks.

b. Demonstrate effective ability in creative and adaptive innovation abilities, such as resisting closure, and responsive use of failure, to address sophisticated challenges within and through media arts productions.

c. Demonstrate the skillful adaptation and combination of tools, styles, techniques, and interactivity to achieve specific expressive goals in the production of a variety of media artworks.

**Grade Hs advanced**

**MA:Pr5.1.HSIII**

a. Employ mastered artistic, design, technical, and soft skills in managing and producing media artworks.
b. Fluently employ mastered creative and innovative adaptability in formulating lines of inquiry and solutions, to address complex challenges within and through media arts productions.

c. Independently utilize and adapt tools, styles, and systems in standard, innovative, and experimental ways in the production of complex media artworks.

**Media Arts/Producing**

#MA:Pr6.1

**Process Component:** Present

**Anchor Standard:** Convey meaning through the presentation of artistic work.

**Enduring Understanding:** Media artists purposefully present, share, and distribute media artworks for various contexts.

**Essential Question:** How does time, place, audience, and context affect presenting or performing choices for media artworks? How can presenting or sharing media artworks in a public format help a media artist learn and grow?

**Grade Hs proficient**

MA:Pr6.1.HSI

a. Design the presentation and distribution of collections of media artworks, considering combinations of artworks, formats, and audiences.

b. Evaluate and implement improvements in presenting media artworks, considering personal and local impacts, such as the benefits for self and others.

**Grade Hs accomplished**

MA:Pr6.1.HSII

a. Curate and design the presentation and distribution of collections of media artworks through a variety of contexts, such as mass audiences, and physical and virtual channels

b. Evaluate and implement improvements in presenting media artworks, considering personal, local, and social impacts such as changes that occurred for people, or to a situation.

**Grade Hs advanced**

MA:Pr6.1.HSIII

a. Curate, design, and promote the presentation and distribution of media artworks for intentional impacts, through a variety of contexts, such as markets and venues.

b. Independently evaluate, compare, and integrate improvements in presenting media artworks, considering personal to global impacts, such as new understandings that were gained by artist and audience.

**Media Arts/Responding**

#MA:Re7.1

**Process Component:** Perceive

**Anchor Standard:** Perceive and analyze artistic work.

**Enduring Understanding:** Identifying the qualities and characteristics of media artworks improves one's artistic appreciation and production.

**Essential Question:** How do we 'read' media artworks and discern their relational components? How do media artworks function to convey meaning and manage audience experience?
Grade Hs proficient
MA:Re7.1.HSI
a. Analyze the qualities of and relationships between the components, style, and preferences communicated by media artworks and artists.

b. Analyze how a variety of media artworks manage audience experience and create intention through multimodal perception.

Grade Hs accomplished
MA:Re7.1.HSII
a. Analyze and synthesize the qualities and relationships of the components in a variety of media artworks, and feedback on how they impact audience.

b. Analyze how a broad range of media artworks manage audience experience, create intention and persuasion through multimodal perception.

Grade Hs advanced
MA:Re7.1.HSIII
a. Analyze and synthesize the qualities and relationships of the components and audience impact in a variety of media artworks.

b. Survey an exemplary range of media artworks, analyzing methods for managing audience experience, creating intention and persuasion through multimodal perception, and systemic communications.

Media Arts/Responding
#MA:Re8.1
Process Component: Interpret
Anchor Standard: Interpret intent and meaning in artistic work.
Enduring Understanding: Interpretation and appreciation require consideration of the intent, form, and context of the media and artwork.
Essential Question: How do people relate to and interpret media artworks?

Grade Hs proficient
MA:Re8.1.HSI
a. Analyze the intent, meanings, and reception of a variety of media artworks, focusing on personal and cultural contexts.

Grade Hs accomplished
MA:Re8.1.HSII
a. Analyze the intent, meanings, and influence of a variety of media artworks, based on personal, societal, historical, and cultural contexts.

Grade Hs advanced
MA:Re8.1.HSIII
a. Analyze the intent, meanings and impacts of diverse media artworks, considering complex factors of context and bias.

Media Arts/Responding
#MA:Re9.1
Process Component: Evaluate
Anchor Standard: Apply criteria to evaluate artistic work.
Enduring Understanding: Skillful evaluation and critique are critical components of experiencing, appreciating, and producing media artworks.
Essential Question: How and why do media artists value and judge media artworks? When and how should we evaluate and critique media artworks to improve them?

Grade Hs proficient
MA:Re9.1.HSI
a. Evaluate media art works and production processes at decisive stages, using identified criteria, and considering context and artistic goals.

Grade Hs accomplished
MA:Re9.1.HSII
a. Form and apply defensible evaluations in the constructive and systematic critique of media artworks and production processes.

Grade Hs advanced
MA:Re9.1.HSIII
a. Independently develop rigorous evaluations of, and strategically seek feedback for media artworks and production processes, considering complex goals and factors.

Media Arts/Connecting
#MA:Cn10.1
Process Component: Synthesize
Anchor Standard: Synthesize and relate knowledge and personal experiences to make art.
Enduring Understanding: Media artworks synthesize meaning and form cultural experience.
Essential Question: How do we relate knowledge and experiences to understanding and making media artworks? How do we learn about and create meaning through producing media artworks?

Grade Hs proficient
MA:Cn10.1.HSI
a. Access, evaluate, and integrate personal and external resources to inform the creation of original media artworks, such as experiences, interests, and cultural experiences.

b. Explain and demonstrate the use of media artworks to expand meaning and knowledge, and create cultural experiences, such as learning and sharing through online environments.

Grade Hs accomplished
MA:Cn10.1.HSII
a. Synthesize internal and external resources to enhance the creation of persuasive media artworks, such as cultural connections, introspection, research, and exemplary works.

b. Explain and demonstrate the use of media artworks to synthesize new meaning and knowledge, and reflect and form cultural experiences, such as new connections between themes and ideas, local and global networks, and personal influence.

Grade Hs advanced
MA:Cn10.1.HSIII
a. Independently and proactively access relevant and qualitative resources to inform the creation of cogent media artworks.
b. Demonstrate and expound on the use of media artworks to consummate new meaning, knowledge, and impactful cultural experiences.

**Media Arts/Connecting**

#MA:Cn11.1  
**Process Component:** Relate

**Anchor Standard:** Relate artistic ideas and works with societal, cultural, and historical context to deepen understanding.

**Enduring Understanding:** Media artworks and ideas are better understood and produced by relating them to their purposes, values, and various contexts.

**Essential Question:** How does media arts relate to its various contexts, purposes, and values? How does investigating these relationships inform and deepen the media artist's understanding and work?

**Grade Hs proficient**

MA:Cn11.1.HSI

a. Demonstrate and explain how media artworks and ideas relate to various contexts, purposes, and values, such as social trends, power, equality, and personal/cultural identity.

b. Critically evaluate and effectively interact with legal, technological, systemic, and vocational contexts of media arts, considering ethics, media literacy, social media, virtual worlds, and digital identity.

**Grade Hs accomplished**

MA:Cn11.1.HSII

a. Examine in depth and demonstrate the relationships of media arts ideas and works to various contexts, purposes, and values, such as markets, systems, propaganda, and truth.

b. Critically investigate and ethically interact with legal, technological, systemic, and vocational contexts of media arts, considering ethics, media literacy, digital identity, and artist/audience interactivity.

**Grade Hs advanced**

MA:Cn11.1.HSIII

a. Demonstrate the relationships of media arts ideas and works to personal and global contexts, purposes, and values, through relevant and impactful media artworks.

b. Critically investigate and strategically interact with legal, technological, systemic, and vocational contexts of media arts.
General Music/Creating
#MU:Cr1.1

**Process Component:** GMS-Imagine - Generate musical ideas for various purposes and contexts.

**Anchor Standard:** Generate and conceptualize artistic ideas and work.

**Enduring Understanding:** The creative ideas, concepts, and feelings that influence musicians’ work emerge from a variety of sources.

**Essential Question:** How do musicians generate creative ideas?

**Grade K**

**MU:Cr1.1.K**

a. With guidance, explore and experience music concepts (such as beat and melodic contour).

b. With guidance, generate musical ideas (such as movements or motives).

**Grade 1**

**MU:Cr1.1.1**

a. With limited guidance, create musical ideas (such as answering a musical question) for a specific purpose.

b. With limited guidance, generate musical ideas in multiple tonalities (such as major and minor) and meters (such as duple and triple).

**Grade 2**

**MU:Cr1.1.2**

a. Improvise rhythmic and melodic patterns and musical ideas for a specific purpose.

b. Generate musical patterns and ideas within the context of a given tonality (such as major and minor) and meter (such as duple and triple).

**Grade 3**

**MU:Cr1.1.3**

a. Improvise rhythmic and melodic ideas, and describe connection to specific purpose and context (such as personal and social).

b. Generate musical ideas (such as rhythms and melodies) within a given tonality and/or meter.

**Grade 4**

**MU:Cr1.1.4**

a. Improvise rhythmic, melodic, and harmonic ideas, and explain connection to specific purpose and context (such as social and cultural).

b. Generate musical ideas (such as rhythms, melodies, and simple accompaniment patterns) within related tonalities (such as major and minor) and meters.

**Grade 5**

**MU:Cr1.1.5**

a. Improvise rhythmic, melodic, and harmonic ideas, and explain connection to specific purpose and context (such as social, cultural, and historical).
b. Generate musical ideas (such as rhythms, melodies, and accompaniment patterns) within specific related tonalities, meters, and simple chord changes.

Grade 6
MU:Cr1.1.6
Generate simple rhythmic, melodic, and harmonic phrases within AB and ABA forms that convey expressive intent.

Novice
MU:Cr1.1.7
Generate rhythmic, melodic, and harmonic phrases and variations over harmonic accompaniments within AB, ABA, or theme and variation forms that convey expressive intent.

Proficient
MU:Cr1.1.8
Generate rhythmic, melodic and harmonic phrases and harmonic accompaniments within expanded forms (including introductions, transitions, and codas) that convey expressive intent.

General Music/Creating
#MU:Cr2.1
Process Component: GMS-Plan and Make - Select and develop musical ideas for defined purposes and contexts.
Anchor Standard: Organize and develop artistic ideas and work.
Enduring Understanding: Musicians' creative choices are influenced by their expertise, context, and expressive intent.
Essential Question: How do musicians make creative decisions?

Grade K
MU:Cr2.1.K
a. With guidance, demonstrate and choose favorite musical ideas.

b. With guidance, organize personal musical ideas using iconic notation and/or recording technology.

Grade 1
MU:Cr2.1.1
a. With limited guidance, demonstrate and discuss personal reasons for selecting musical ideas that represent expressive intent.

b. With limited guidance, use iconic or standard notation and/or recording technology to document and organize personal musical ideas.

Grade 2
MU:Cr2.1.2
a. Demonstrate and explain personal reasons for selecting patterns and ideas for music that represent expressive intent.
b. Use iconic or standard notation and/or recording technology to combine, sequence, and document personal musical ideas.

**Grade 3**

**MU:Cr2.1.3**

a. Demonstrate selected musical ideas for a simple improvisation or composition to express intent, and describe connection to a specific purpose and context.

b. Use standard and/or iconic notation and/or recording technology to document personal rhythmic and melodic musical ideas.

**Grade 4**

**MU:Cr2.1.4**

a. Demonstrate selected and organized musical ideas for an improvisation, arrangement, or composition to express intent, and explain connection to purpose and context.

b. Use standard and/or iconic notation and/or recording technology to document personal rhythmic, melodic, and simple harmonic musical ideas.

**Grade 5**

**MU:Cr2.1.5**

a. Demonstrate selected and developed musical ideas for improvisations, arrangements, or compositions to express intent, and explain connection to purpose and context.

b. Use standard and/or iconic notation and/or recording technology to document personal rhythmic, melodic, and two-chord harmonic musical ideas.

**Grade 6**

**MU:Cr2.1.6**

a. Select, organize, construct, and document personal musical ideas for arrangements and compositions within AB or ABA form that demonstrate an effective beginning, middle, and ending, and convey expressive intent.

b. Use standard and/or iconic notation and/or audio/video recording to document personal simple rhythmic phrases, melodic phrases, and two-chord harmonic musical ideas.

**Novice**

**MU:Cr2.1.7**

a. Select, organize, develop and document personal musical ideas for arrangements, songs, and compositions within AB, ABA, or theme and variation forms that demonstrate unity and variety and convey expressive intent.

b. Use standard and/or iconic notation and/or audio/video recording to document personal simple rhythmic phrases, melodic phrases, and harmonic sequences.

**Proficient**

**MU:Cr2.1.8**

a. Select, organize, and document musical ideas for arrangements, songs, and compositions within expanded forms that demonstrate tension and
release, unity and variety, balance, and convey expressive intent.

b. Use standard and/or iconic notation and/or audio/video recording to document personal rhythmic phrases, melodic phrases, and harmonic sequences.

**General Music/Creating**

#MU:Cr3.1

**Process Component:** GMS-Evaluate and Refine - Evaluate and refine selected musical ideas to create musical work that meets appropriate criteria.

**Anchor Standard:** Refine and complete artistic work.

**Enduring Understanding:** Musicians evaluate, and refine their work through openness to new ideas, persistence, and the application of appropriate criteria.

**Essential Question:** How do musicians improve the quality of their creative work?

**Grade K**

MU:Cr3.1.K

a. With guidance, apply personal, peer, and teacher feedback in refining personal musical ideas.

**Grade 1**

MU:Cr3.1.1

a. With limited guidance, discuss and apply personal, peer, and teacher feedback to refine personal musical ideas.

**Grade 2**

MU:Cr3.1.2

a. Interpret and apply personal, peer, and teacher feedback to revise personal music.

**Grade 3**

MU:Cr3.1.3

a. Evaluate, refine, and document revisions to personal musical ideas, applying teacher-provided and collaboratively-developed criteria and feedback.

**Grade 4**

MU:Cr3.1.4

a. Evaluate, refine, and document revisions to personal music, applying teacher-provided and collaboratively-developed criteria and feedback to show improvement over time.

**Grade 5**

MU:Cr3.1.5

a. Evaluate, refine, and document revisions to personal music, applying teacher-provided and collaboratively-developed criteria and feedback, and explain rationale for changes.

**Grade 6**

MU:Cr3.1.6

a. Evaluate their own work, applying teacher-provided criteria such as application of selected elements of music, and use of sound sources.

b. Describe the rationale for making revisions to the music based on evaluation criteria and feedback from their teacher.

**Novice**

MU:Cr3.1.7
a. Evaluate their own work, applying selected criteria such as appropriate application of elements of music including style, form, and use of sound sources.

b. Describe the rationale for making revisions to the music based on evaluation criteria and feedback from others (teacher and peers).

**Proficient**

**MU:Cr3.1.8**

a. Evaluate their own work by selecting and applying criteria including appropriate application of compositional techniques, style, form, and use of sound sources.

b. Describe the rationale for refining works by explaining the choices, based on evaluation criteria.

**General Music/Creating**

**#MU:Cr3.2**

**Process Component:** GMS-Present - Share creative musical work that conveys intent, demonstrates craftsmanship, and exhibits originality.

**Anchor Standard:** Refine and complete artistic work.

**Enduring Understanding:** Musicians’ presentation of creative work is the culmination of a process of creation and communication.

**Essential Question:** When is creative work ready to share?

**Grade K**

**MU:Cr3.2.K**

With guidance, demonstrate a final version of personal musical ideas to peers.

**Grade 1**

**MU:Cr3.2.1**

With limited guidance, convey expressive intent for a specific purpose by presenting a final version of personal musical ideas to peers or informal audience.

**Grade 2**

**MU:Cr3.2.2**

Convey expressive intent for a specific purpose by presenting a final version of personal musical ideas to peers or informal audience.

**Grade 3**

**MU:Cr3.2.3**

Present the final version of personal created music to others, and describe connection to expressive intent.

**Grade 4**

**MU:Cr3.2.4**

Present the final version of personal created music to others, and explain connection to expressive intent.

**Grade 5**

**MU:Cr3.2.5**

Present the final version of personal created music to others that demonstrates craftsmanship, and explain connection to expressive intent.

**Grade 6**
MU:Cr3.2.6
Present the final version of their documented personal composition or arrangement, using craftsmanship and originality to demonstrate an effective beginning, middle, and ending, and convey expressive intent.

Novice

MU:Cr3.2.7
Present the final version of their personal documented personal composition, song, or arrangement, using craftsmanship and originality to demonstrate unity and variety, and convey expressive intent.

Proficient

MU:Cr3.2.8
Present the final version of their documented composition, song, or arrangement, using craftsmanship and originality to demonstrate the application of compositional techniques for creating unity and variety, tension and release, and balance to convey expressive intent.

General Music/Performing
#MU:Pr4.1

Process Component: GMS-Select - Select varied musical works to present based on interest, knowledge, technical skill, and context.

Anchor Standard: Select, analyze and interpret artistic work for presentation.

Enduring Understanding: Performers’ interest in and knowledge of musical works, understanding of their own technical skill, and the context for a performance influence the selection of repertoire.

Essential Question: How do performers select repertoire?

Grade K
MU:Pr4.1.K
With guidance, demonstrate and state personal interest in varied musical selections.

Grade 1
MU:Pr4.1.1
With limited guidance, demonstrate and discuss personal interest in, knowledge about, and purpose of varied musical selections.

Grade 2
MU:Pr4.1.2
Demonstrate and explain personal interest in, knowledge about, and purpose of varied musical selections.

Grade 3
MU:Pr4.1.3
Demonstrate and explain how the selection of music to perform is influenced by personal interest, knowledge, purpose, and context.

Grade 4
MU:Pr4.1.4
Demonstrate and explain how the selection of music to perform is influenced by personal interest, knowledge, context, and technical skill.
Grade 5
MU:Pr4.1.5
Demonstrate and explain how the selection of music to perform is influenced by personal interest, knowledge, and context, as well as their personal and others’ technical skill.

Grade 6
MU:Pr4.1.6
Apply teacher-provided criteria for selecting music to perform for a specific purpose and/or context, and explain why each was chosen

Novice
MU:Pr4.1.7
Apply collaboratively-developed criteria for selecting music of contrasting styles for a program with a specific purpose and/or context and, after discussion, identify expressive qualities, technical challenges, and reasons for choices.

Proficient
MU:Pr4.1.8
Apply personally-developed criteria for selecting music of contrasting styles for a program with a specific purpose and/or context, and explain expressive qualities, technical challenges, and reasons for choices.

General Music/Performing
#MU:Pr4.2
Process Component: GMS-Analyze - Analyze the structure and context of varied musical works and their implications for performance

Anchor Standard: Select, analyze and interpret artistic work for presentation.

Enduring Understanding: Analyzing creators’ context and how they manipulate elements of music provides insight into their intent and informs performance.

Essential Question: How does understanding the structure and context of musical works inform performance?

Grade K
MU:Pr4.2.K
a. With guidance, explore and demonstrate awareness of music contrasts (such as high/low, loud/soft, same/different) in a variety of music selected for performance.

Grade 1
MU:Pr4.2.1
a. With limited guidance, demonstrate knowledge of music concepts (such as beat and melodic contour) in music from a variety of cultures selected for performance.

b. When analyzing selected music, read and perform rhythmic patterns using iconic or standard notation.

Grade 2
MU:Pr4.2.2
a. Demonstrate knowledge of music concepts (such as tonality and meter) in music from a variety of cultures selected for performance.
b. When analyzing selected music, read and perform rhythmic and melodic patterns using iconic or standard notation.

**Grade 3**

**MU:Pr4.2.3**

a. Demonstrate understanding of the structure in music selected for performance.

b. When analyzing selected music, read and perform rhythmic patterns and melodic phrases using iconic and standard notation.

c. Describe how context (such as personal and social) can inform a performance.

**Grade 4**

**MU:Pr4.2.4**

a. Demonstrate understanding of the structure and the elements of music (such as rhythm, pitch, and form) in music selected for performance.

b. When analyzing selected music, read and perform using iconic and/or standard notation.

c. Explain how context (such as social and cultural) informs a performance.

**Grade 5**

**MU:Pr4.2.5**

a. Demonstrate understanding of the structure and the elements of music (such as rhythm, pitch, form, and harmony) in music selected for performance.

b. When analyzing selected music, read and perform using standard notation.

c. Explain how context (such as social, cultural, and historical) inform performances.

**Grade 6**

**MU:Pr4.2.6**

a. Explain how understanding the structure and the elements of music are used in music selected for performance.

b. When analyzing selected music, read and identify by name or function standard symbols for rhythm, pitch, articulation, and dynamics.

c. Identify how cultural and historical context inform performances.

**Novice**

**MU:Pr4.2.7**

a. Explain and demonstrate the structure of contrasting pieces of music selected for performance and how elements of music are used.

b. When analyzing selected music, read and identify by name or function standard symbols for rhythm, pitch articulation, dynamics, tempo, and form.
c. Identify how cultural and historical context inform performances and result in different music interpretations.

**Proficient**

**MU:Pr4.2.8**

a. Compare the structure of contrasting pieces of music selected for performance, explaining how the elements of music are used in each.

b. When analyzing selected music, sight-read in treble or bass clef simple rhythmic, melodic, and/or harmonic notation.

c. Identify how cultural and historical context inform performances and result in different musical effects.

**General Music/Performing**

#MU:Pr4.3

**Process Component:** GMS-Interpret - Develop personal interpretations that consider creators’ intent.

**Anchor Standard:** Select, analyze and interpret artistic work for presentation.

**Enduring Understanding:** Performers make interpretive decisions based on their understanding of context and expressive intent.

**Essential Question:** How do performers interpret musical works?

**Grade K**

**MU:Pr4.3.K**

With guidance, demonstrate awareness of expressive qualities (such as voice quality, dynamics, and tempo) that support the creators’ expressive intent.

**Grade 1**

**MU:Pr4.3.1**

Demonstrate and describe music’s expressive qualities (such as dynamics and tempo).

**Grade 2**

**MU:Pr4.3.2**

Demonstrate understanding of expressive qualities (such as dynamics and tempo) and how creators use them to convey expressive intent.

**Grade 3**

**MU:Pr4.3.3**

Demonstrate and describe how intent is conveyed through expressive qualities (such as dynamics and tempo).

**Grade 4**

**MU:Pr4.3.4**

Demonstrate and explain how intent is conveyed through interpretive decisions and expressive qualities (such as dynamics, tempo, and timbre).

**Grade 5**

**MU:Pr4.3.5**

Demonstrate and explain how intent is conveyed through interpretive decisions and expressive qualities (such as dynamics, tempo, timbre, and articulation/style).
Grade 6
MU:Pr4.3.6
Perform a selected piece of music demonstrating how their interpretations of the elements of music and the expressive qualities (such as dynamics, tempo, timbre, articulation/style, and phrasing) convey intent.

Novice
MU:Pr4.3.7
Perform contrasting pieces of music demonstrating their interpretations of the elements of music and expressive qualities (such as dynamics, tempo, timbre, articulation/style, and phrasing) convey intent.

Proficient
MU:Pr4.3.8
Perform contrasting pieces of music, demonstrating as well as explaining how the music’s intent is conveyed by their interpretations of the elements of music and expressive qualities (such as dynamics, tempo, timbre, articulation/style, and phrasing).

General Music/Performing
#MU:Pr5.1
Process Component: GMS-Rehearse, Evaluate and Refine - Evaluate and refine personal and ensemble performances, individually or in collaboration with others.
Anchor Standard: Develop and refine artistic techniques and work for presentation.
Enduring Understanding: To express their musical ideas, musicians analyze, evaluate, and refine their performance over time through openness to new ideas, persistence, and the application of appropriate criteria.
Essential Question: How do musicians improve the quality of their performance?

Grade K
MU:Pr5.1.K
a. With guidance, apply personal, teacher, and peer feedback to refine performances.

b. With guidance, use suggested strategies in rehearsal to improve the expressive qualities of music.

Grade 1
MU:Pr5.1.1
a. With limited guidance, apply personal, teacher, and peer feedback to refine performances.

b. With limited guidance, use suggested strategies in rehearsal to address interpretive challenges of music.

Grade 2
MU:Pr5.1.2
a. Apply established criteria to judge the accuracy, expressiveness, and effectiveness of performances.
b. Rehearse, identify and apply strategies to address interpretive, performance, and technical challenges of music.

**Grade 3**

**MU:Pr5.1.3**
a. Apply teacher-provided and collaboratively-developed criteria and feedback to evaluate accuracy of ensemble performances.

**Grade 4**

**MU:Pr5.1.4**
a. Apply teacher-provided and collaboratively-developed criteria and feedback to evaluate accuracy and expressiveness of ensemble and personal performances.

**Grade 5**

**MU:Pr5.1.5**
a. Apply teacher-provided and established criteria and feedback to evaluate the accuracy and expressiveness of ensemble and personal performances.

b. Rehearse to refine technical accuracy and expressive qualities to address challenges, and show improvement over time.

**Grade 6**

**MU:Pr5.1.6**
a. Identify and apply teacher-provided criteria (such as correct interpretation of notation, technical accuracy, originality, and interest) to rehearse, refine, and determine when a piece is ready to perform.

**Novice**

**MU:Pr5.1.7**
a. Identify and apply collaboratively-developed criteria (such as demonstrating correct interpretation of notation, technical skill of performer, originality, emotional impact, and interest) to rehearse, refine, and determine when the music is ready to perform.

**Proficient**

**MU:Pr5.1.8**
a. Identify and apply personally-developed criteria (such as demonstrating correct interpretation of notation, technical skill of performer, originality, emotional impact, variety, and interest) to rehearse, refine, and determine when the music is ready to perform.

**General Music/Performing**

**#MU:Pr6.1**

**Process Component:** GMS-Present - Perform expressively, with appropriate interpretation and technical accuracy, and in a manner appropriate to the audience and context.
Anchor Standard: Convey meaning through the presentation of artistic work.
Enduring Understanding: Musicians judge performance based on criteria that vary across time, place, and cultures. The context and how a work is presented influence the audience response.
Essential Question: When is a performance judged ready to present? How do context and the manner in which musical work is presented influence audience response?

Grade K
MU:Pr6.1.K
a. With guidance, perform music with expression.

b. Perform appropriately for the audience.

Grade 1
MU:Pr6.1.1
a. With limited guidance, perform music for a specific purpose with expression.

b. Perform appropriately for the audience and purpose.

Grade 2
MU:Pr6.1.2
a. Perform music for a specific purpose with expression and technical accuracy.

b. Perform appropriately for the audience and purpose.

Grade 3
MU:Pr6.1.3
a. Perform music with expression and technical accuracy.

b. Demonstrate performance decorum and audience etiquette appropriate for the context and venue.

Grade 4
MU:Pr6.1.4
a. Perform music, alone or with others, with expression and technical accuracy, and appropriate interpretation.

b. Demonstrate performance decorum and audience etiquette appropriate for the context, venue, and genre.

Grade 5
MU:Pr6.1.5
a. Perform music, alone or with others, with expression, technical accuracy, and appropriate interpretation.

b. Demonstrate performance decorum and audience etiquette appropriate for the context, venue, genre, and style.

Grade 6
MU:Pr6.1.6
a. Perform the music with technical accuracy to convey the creator’s intent.
b. Demonstrate performance decorum (such as stage presence, attire, and behavior) and audience etiquette appropriate for venue and purpose.

Novice
MU:Pr6.1.7
a. Perform the music with technical accuracy and stylistic expression to convey the creator’s intent.

b. Demonstrate performance decorum (such as stage presence, attire, and behavior) and audience etiquette appropriate for venue, purpose, and context.

Proficient
MU:Pr6.1.8
a. Perform the music with technical accuracy, stylistic expression, and culturally authentic practices in music to convey the creator’s intent.

b. Demonstrate performance decorum (such as stage presence, attire, and behavior) and audience etiquette appropriate for venue, purpose, context, and style.

General Music/Responding
#MU:Re7.1
Process Component: GMS-Select - Choose music appropriate for a specific purpose or context.
Anchor Standard: Perceive and analyze artistic work.
Enduring Understanding: Individuals’ selection of musical works is influenced by their interests, experiences, understandings, and purposes.
Essential Question: How do individuals choose music to experience?

Grade K
MU:Re7.1.K
With guidance, list personal interests and experiences and demonstrate why they prefer some music selections over others.

Grade 1
MU:Re7.1.1
With limited guidance, identify and demonstrate how personal interests and experiences influence musical selection for specific purposes.

Grade 2
MU:Re7.1.2
Explain and demonstrate how personal interests and experiences influence musical selection for specific purposes.

Grade 3
MU:Re7.1.3
Demonstrate and describe how selected music connects to and is influenced by specific interests, experiences, or purposes.

Grade 4
MU:Re7.1.4
Demonstrate and explain how selected music connects to and is influenced by specific interests, experiences, purposes, or contexts.
Grade 5
MU:Re7.1.5
Demonstrate and explain, citing evidence, how selected music connects to and is influenced by specific interests, experiences, purposes, or contexts.

Grade 6
MU:Re7.1.6
Select or choose music to listen to and explain the connections to specific interests or experiences for a specific purpose.

Novice
MU:Re7.1.7
Select or choose contrasting music to listen to and compare the connections to specific interests or experiences for a specific purpose.

Proficient
MU:Re7.1.8
Select programs of music (such as a CD mix or live performances) and demonstrate the connections to an interest or experience for a specific purpose.

General Music/Responding
#MU:Re7.2
Process Component: GMS-Analyze - Analyze how the structure and context of varied musical works inform the response.

Anchor Standard: Perceive and analyze artistic work.

Enduring Understanding: Response to music is informed by analyzing context (social, cultural, and historical) and how creators and performers manipulate the elements of music.

Essential Question: How does understanding the structure and context of music inform a response?

Grade K
MU:Re7.2.K
With guidance, demonstrate how a specific music concept (such as beat or melodic direction) is used in music.

Grade 1
MU:Re7.2.1
With limited guidance, demonstrate and identify how specific music concepts (such as beat or pitch) are used in various styles of music for a purpose.

Grade 2
MU:Re7.2.2
Describe how specific music concepts are used to support a specific purpose in music.

Grade 3
MU:Re7.2.3
Demonstrate and describe how a response to music can be informed by the structure, the use of the elements of music, and context (such as personal and social).

Grade 4
MU:Re7.2.4
Demonstrate and explain how responses to music are informed by the structure, the use of the elements of music, and context (such as social and cultural).
Grade 5
MU:Re7.2.5
Demonstrate and explain, citing evidence, how responses to music are informed by
the structure, the use of the elements of music, and context (such as social, cultural, and
historical).

Grade 6
MU:Re7.2.6
a. Describe how the elements of music and expressive qualities relate to the structure of
the pieces

b. Identify the context of music from a variety of genres, cultures, and historical periods.
Novice
MU:Re7.2.7
a. Classify and explain how the elements of music and expressive qualities relate to
the structure of contrasting pieces.

b. Identify and compare the context of music from a variety of genres, cultures,
and historical periods.
Proficient
MU:Re7.2.8
a. Compare how the elements of music and expressive qualities relate to
the structure within programs of music.

b. Identify and compare the context of programs of music from a variety of genres,
cultures, and historical periods.

General Music/Responding
#MU:Re8.1
Process Component: GMS-Interpret - Support interpretations of musical works that reflect
creators’/performers’ expressive intent.

Anchor Standard: Interpret intent and meaning in artistic work.
Enduring Understanding: Through their use of elements and structures of music, creators and
performers provide clues to their expressive intent.
Essential Question: How do we discern the musical creators’ and performers’ expressive intent?

Grade K
MU:Re8.1.K
With guidance, demonstrate awareness of expressive qualities (such
as dynamics and tempo) that reflect creators’/performers’ expressive intent.

Grade 1
MU:Re8.1.1
With limited guidance, demonstrate and identify expressive qualities (such
as dynamics and tempo) that reflect creators’/performers’ expressive intent.

Grade 2
MU:Re8.1.2
Demonstrate knowledge of music concepts and how they support creators’/performers’ expressive intent.

**Grade 3**
**MU:Re8.1.3**
Demonstrate and describe how the expressive qualities (such as dynamics and tempo) are used in performers’ interpretations to reflect expressive intent.

**Grade 4**
**MU:Re8.1.4**
Demonstrate and explain how the expressive qualities (such as dynamics, tempo, and timbre) are used in performers’ and personal interpretations to reflect expressive intent.

**Grade 5**
**MU:Re8.1.5**
Demonstrate and explain how the expressive qualities (such as dynamics, tempo, timbre, and articulation) are used in performers’ and personal interpretations to reflect expressive intent.

**Grade 6**
**MU:Re8.1.6**
Describe a personal interpretation of how creators’ and performers’ application of the elements of music and expressive qualities, within genres and cultural and historical context, convey expressive intent.

**Novice**
**MU:Re8.1.7**
Describe a personal interpretation of contrasting works and explain how creators’ and performers’ application of the elements of music and expressive qualities, within genres, cultures, and historical periods, convey expressive intent.

**Proficient**
**MU:Re8.1.8**
Support personal interpretation of contrasting programs of music and explain how creators’ or performers’ apply the elements of music and expressive qualities, within genres, cultures, and historical periods to convey expressive intent.

**General Music/Responding**

**#MU:Re9.1**

**Process Component:** GMS-Evaluate - Support evaluations of musical works and performances based on analysis, interpretation, and established criteria.

**Anchor Standard:** Apply criteria to evaluate artistic work.

**Enduring Understanding:** The personal evaluation of musical work(s) and performance(s) is informed by analysis, interpretation, and established criteria.

**Essential Question:** How do we judge the quality of musical work(s) and performance(s)?

**Grade K**
**MU:Re9.1.K**
With guidance, apply personal and expressive preferences in the evaluation of music.

**Grade 1**
**MU:Re9.1.1**
With limited guidance, apply personal and expressive preferences in the evaluation of music for specific purposes.

Grade 2
MU:Re9.1.2
Apply personal and expressive preferences in the evaluation of music for specific purposes.

Grade 3
MU:Re9.1.3
Evaluate musical works and performances, applying established criteria, and describe appropriateness to the context.

Grade 4
MU:Re9.1.4
Evaluate musical works and performances, applying established criteria, and explain appropriateness to the context.

Grade 5
MU:Re9.1.5
Evaluate musical works and performances, applying established criteria, and explain appropriateness to the context, citing evidence from the elements of music.

Grade 6
MU:Re9.1.6
Apply teacher-provided criteria to evaluate musical works or performances.

Novice
MU:Re9.1.7
Select from teacher-provided criteria to evaluate musical works or performances.

Proficient
MU:Re9.1.8
Apply appropriate personally-developed criteria to evaluate musical works or performances.

General Music/Connecting
#MU:Cn10.0
Process Component: GMS-Connect #10- Synthesize and relate knowledge and personal experiences to make music.

Anchor Standard: Synthesize and relate knowledge and personal experiences to make art.

Enduring Understanding: Musicians connect their personal interests, experiences, ideas, and knowledge to creating, performing, and responding.

Essential Question: How do musicians make meaningful connections to creating, performing, and responding?

Grade K
MU:Cn10.0.K
Demonstrate how interests, knowledge, and skills relate to personal choices and intent when creating, performing, and responding to music.
Grade 1  
MU:Cn10.0.1  
Demonstrate how interests, knowledge, and skills relate to personal choices and intent when creating, performing, and responding to music.

Grade 2  
MU:Cn10.0.2  
Demonstrate how interests, knowledge, and skills relate to personal choices and intent when creating, performing, and responding to music.

Grade 3  
MU:Cn10.0.3  
Demonstrate how interests, knowledge, and skills relate to personal choices and intent when creating, performing, and responding to music.

Grade 4  
MU:Cn10.0.4  
 Demonstrate how interests, knowledge, and skills relate to personal choices and intent when creating, performing, and responding to music.

Grade 5  
MU:Cn10.0.5  
Demonstrate how interests, knowledge, and skills relate to personal choices and intent when creating, performing, and responding to music.

Grade 6  
MU:Cn10.0.6  
Demonstrate how interests, knowledge, and skills relate to personal choices and intent when creating, performing, and responding to music.

Novice  
MU:Cn10.0.7  
Demonstrate how interests, knowledge, and skills relate to personal choices and intent when creating, performing, and responding to music.

Proficient  
MU:Cn10.0.8  
Demonstrate how interests, knowledge, and skills relate to personal choices and intent when creating, performing, and responding to music.

General Music/Connecting  
#MU:Cn11.0  
Process Component: GMS-Connect #11- Relate musical ideas and works with varied context to deepen understanding.  
Anchor Standard: Relate artistic ideas and works with societal, cultural and historical context to deepen understanding.  
Enduring Understanding: Understanding connections to varied contexts and daily life enhances musicians’ creating, performing, and responding.  
Essential Question: How do the other arts, other disciplines, contexts, and daily life inform creating, performing, and responding to music?  
Grade K  
MU:Cn11.0.K
Demonstrate understanding of relationships between music and the other arts, other disciplines, varied contexts, and daily life.

Grade 1
MU:Cn11.0.1
Demonstrate understanding of relationships between music and the other arts, other disciplines, varied contexts, and daily life.

Grade 2
MU:Cn11.0.2
Demonstrate understanding of relationships between music and the other arts, other disciplines, varied contexts, and daily life.

Grade 3
MU:Cn11.0.3
Demonstrate understanding of relationships between music and the other arts, other disciplines, varied contexts, and daily life.

Grade 4
MU:Cn11.0.4
Demonstrate understanding of relationships between music and the other arts, other disciplines, varied contexts, and daily life.

Grade 5
MU:Cn11.0.5
Demonstrate understanding of relationships between music and the other arts, other disciplines, varied contexts, and daily life.

Grade 6
MU:Cn11.0.6
Demonstrate understanding of relationships between music and the other arts, other disciplines, varied contexts, and daily life.

Novice
MU:Cn11.0.7
Demonstrate understanding of relationships between music and the other arts, other disciplines, varied contexts, and daily life.

Proficient
MU:Cn11.0.8
Demonstrate understanding of relationships between music and the other arts, other disciplines, varied contexts, and daily life.

General Music Theory Composition/Responding
#MU:Re7.2.C

Process Component: GMS-Analyze - Analyze how the structure and context of varied musical works inform the response.

Anchor Standard: Perceive and analyze artistic work.

Enduring Understanding: Response to music is informed by analyzing context (social, cultural, and historical) and how creators and performers manipulate the elements of music.

Essential Question: How does understanding the structure and context of music inform a response?
MU:Re7.2.C.K
With guidance, demonstrate how a specific music concept (such as beat or melodic direction) is used in music.

Grade 1

MU:Re7.2.C.1
With limited guidance, demonstrate and identify how specific music concepts (such as beat or pitch) are used in various styles of music for a purpose.

Grade 2

MU:Re7.2.C.2
Describe how specific music concepts are used to support a specific purpose in music.

Grade 3

MU:Re7.2.C.3
Demonstrate and describe how a response to music can be informed by the structure, the use of the elements of music, and context (such as personal and social).

Grade 4

MU:Re7.2.C.4
Demonstrate and explain how responses to music are informed by the structure, the use of the elements of music, and context (such as social and cultural).

Grade 5

MU:Re7.2.C.5
Demonstrate and explain, citing evidence, how responses to music are informed by the structure, the use of the elements of music, and context (such as social, cultural, and historical).

Grade 6

MU:Re7.2.C.6

a. Describe how the elements of music and expressive qualities relate to the structure of the pieces

b. Identify the context of music from a variety of genres, cultures, and historical periods.

Novice

MU:Re7.2.C.7

a. Classify and explain how the elements of music and expressive qualities relate to the structure of contrasting pieces.

b. Identify and compare the context of music from a variety of genres, cultures, and historical periods.

Proficient

MU:Re7.2.C.8

a. Compare how the elements of music and expressive qualities relate to the structure within programs of music.

b. Identify and compare the context of programs of music from a variety of genres, cultures, and historical periods.
General Music Harmonizing Instruments/Performing (ie. Keyboard/Guitar)

#MU:Pr4.2.H

**Process Component:** GMS-Analyze - Analyze the structure and context of varied musical works and their implications for performance

**Anchor Standard:** Select, analyze and interpret artistic work for presentation.

**Enduring Understanding:** Analyzing creators’ context and how they manipulate elements of music provides insight into their intent and informs performance.

**Essential Question:** How does understanding the structure and context of musical works inform performance?

**Grade K**

**MU:Pr4.2.H.K**

a. With guidance, explore and demonstrate awareness of music contrasts (such as high/low, loud/soft, same/different) in a variety of music selected for performance.

**Grade 1**

**MU:Pr4.2.H.1**

a. With limited guidance, demonstrate knowledge of music concepts (such as beat and melodic contour) in music from a variety of cultures selected for performance.

b. When analyzing selected music, read and perform rhythmic patterns using iconic or standard notation.

**Grade 2**

**MU:Pr4.2.H.2**

a. Demonstrate knowledge of music concepts (such as tonality and meter) in music from a variety of cultures selected for performance.

b. When analyzing selected music, read and perform rhythmic and melodic patterns using iconic or standard notation.

**Grade 3**

**MU:Pr4.2.H.3**

a. Demonstrate understanding of the structure in music selected for performance.

b. When analyzing selected music, read and perform rhythmic patterns and melodic phrases using iconic and standard notation.

c. Describe how context (such as personal and social) can inform a performance.

**Grade 4**

**MU:Pr4.2.H.4**

a. Demonstrate understanding of the structure and the elements of music (such as rhythm, pitch, and form) in music selected for performance.

b. When analyzing selected music, read and perform using iconic and/or standard notation.

c. Explain how context (such as social and cultural) informs a performance.

**Grade 5**
**MU:Pr4.2.H.5**

a. Demonstrate understanding of the structure and the elements of music (such as rhythm, pitch, form, and harmony) in music selected for performance.

b. When analyzing selected music, read and perform using standard notation.

c. Explain how context (such as social, cultural, and historical) informs performances.

**Grade 6**

**MU:Pr4.2.H.6**

a. Explain how understanding the structure and the elements of music are used in music selected for performance.

b. When analyzing selected music, read and identify by name or function standard symbols for rhythm, pitch, articulation, and dynamics.

c. Identify how cultural and historical context inform performances.

**Grade 7**

**MU:Pr4.2.H.7**

a. Explain and demonstrate the structure of contrasting pieces of music selected for performance and how elements of music are used.

b. When analyzing selected music, read and identify by name or function standard symbols for rhythm, pitch articulation, dynamics, tempo, and form.

c. Identify how cultural and historical context inform performances and result in different music interpretations.

**Grade 8**

**MU:Pr4.2.H.8**

a. Compare the structure of contrasting pieces of music selected for performance, explaining how the elements of music are used in each.

b. When analyzing selected music, sight-read in treble or bass clef simple rhythmic, melodic, and/or harmonic notation.

c. Identify how cultural and historical context inform performances and result in different musical effects.

---

**General Music Theory Composition/Responding**

**#MU:Re7.2.C**

**Process Component:** GMS-Analyze - Analyze how the structure and context of varied musical works inform the response.

**Anchor Standard:** Perceive and analyze artistic work.

**Enduring Understanding:** Response to music is informed by analyzing context (social, cultural, and historical) and how creators and performers manipulate the elements of music.
Essential Question: How does understanding the structure and context of music inform a response?

Grade K
MU:Re7.2.C.K
With guidance, demonstrate how a specific music concept (such as beat or melodic direction) is used in music.

Grade 1
MU:Re7.2.C.1
With limited guidance, demonstrate and identify how specific music concepts (such as beat or pitch) are used in various styles of music for a purpose.

Grade 2
MU:Re7.2.C.2
Describe how specific music concepts are used to support a specific purpose in music.

Grade 3
MU:Re7.2.C.3
Demonstrate and describe how a response to music can be informed by the structure, the use of the elements of music, and context (such as personal and social).

Grade 4
MU:Re7.2.C.4
Demonstrate and explain how responses to music are informed by the structure, the use of the elements of music, and context (such as social and cultural).

Grade 5
MU:Re7.2.C.5
Demonstrate and explain, citing evidence, how responses to music are informed by the structure, the use of the elements of music, and context (such as social, cultural, and historical).

Grade 6
MU:Re7.2.C.6
a. Describe how the elements of music and expressive qualities relate to the structure of the pieces.

b. Identify the context of music from a variety of genres, cultures, and historical periods.

Novice
MU:Re7.2.C.7
a. Classify and explain how the elements of music and expressive qualities relate to the structure of contrasting pieces.

b. Identify and compare the context of music from a variety of genres, cultures, and historical periods.

Proficient
MU:Re7.2.C.8
a. Compare how the elements of music and expressive qualities relate to the structure within programs of music.
b. Identify and compare the context of programs of music from a variety of genres, cultures, and historical periods.
Music Harmonizing Instruments/Creating

#MU:Cr1.1

Process Component: MHI-Imagine - Generate musical ideas for various purposes and contexts.
Anchor Standard: Generate and conceptualize artistic ideas and work.
Enduring Understanding: The creative ideas, concepts, and feelings that influence musicians’ work emerge from a variety of sources.
Essential Question: How do musicians generate creative ideas?

Grade Novice

MU:Cr1.1. Novice
Generate melodic, rhythmic, and harmonic ideas for simple melodies (such as two-phrase) and chordal accompaniments for given melodies.

Grade Intermediate

MU:Cr1.1. Intermediate
Generate melodic, rhythmic, and harmonic ideas for melodies (created over specified chord progressions or AB/ABA forms) and two-to-three-chord accompaniments for given melodies.

Grade Proficient

MU:Cr1.1. I
Generate melodic, rhythmic, and harmonic ideas for improvisations, compositions (forms such as theme and variation or 12-bar blues), and three-or-more-chord accompaniments in a variety of patterns (such as arpeggio, country and gallop strumming, finger picking patterns).

Grade Advanced

MU:Cr1.1. III
Generate melodic, rhythmic, and harmonic ideas for a collection of compositions (representing a variety of forms and styles), improvisations in several different styles, and stylistically appropriate harmonizations for given melodies.

Music Harmonizing Instruments/Creating

#MU:Cr2.1.H

Process Component: MHI-Plan and Make - Select and develop musical ideas for defined purposes and contexts.
Anchor Standard: Organize and develop artistic ideas and work.
Enduring Understanding: Musicians’ creative choices are influenced by their expertise, context, and expressive intent.
Essential Question: How do musicians make creative decisions?

Grade Novice

MU:Cr2.1.H. Novice
a. Select, develop, and use standard notation or audio/video recording to document melodic, rhythmic, and harmonic ideas for drafts of simple melodies (such as two-phrase) and chordal accompaniments for given melodies.

Grade Intermediate

MU:Cr2.1.H. Intermediate
Select, develop, and use standard notation and audio/video recording to document melodic, rhythmic, and harmonic ideas for drafts of melodies (created over specified chord progressions or AB/ABA forms) and two-to-three-chord accompaniments for given melodies.

Grade Proficient
MU:Cr2.1.H. I
Select, develop, and use standard notation and audio/video recording to document melodic, rhythmic, and harmonic ideas for drafts of improvisations, compositions (forms such as theme and variation or 12-bar blues), and three-or-more-chord accompaniments in a variety of patterns (such as arpeggio, country and gallop strumming, finger picking patterns).

Grade Advanced
MU:Cr2.1.H. III
Select, develop, and use standard notation and audio/video recording to document melodic, rhythmic, and harmonic ideas for drafts of compositions (representing a variety of forms and styles), improvisations in several different styles, and stylistically appropriate harmonizations for given melodies.

Music Harmonizing Instruments/Creating
#MU:Cr3.1.H
Process Component: MHI-Evaluate and Refine - Evaluate and refine selected musical ideas to create musical work that meets appropriate criteria.
Anchor Standard: Refine and complete artistic work.
Enduring Understanding: Musicians evaluate and refine their work through openness to new ideas, persistence, and the application of appropriate criteria.
Essential Question: How do musicians improve the quality of their creative work?

Grade Novice
MU:Cr3.1.H. Novice
Apply teacher-provided criteria to critique, improve, and refine drafts of simple melodies (such as two-phrase) and chordal accompaniments for given melodies.

Grade Intermediate
MU:Cr3.1.H. Intermediate
Apply teacher-provided criteria to critique, improve, and refine drafts of melodies (created over specified chord progressions or AB/ABA forms) and two-to-three-chord accompaniments for given melodies.

Grade Proficient
MU:Cr3.1.H. I
Identify, describe, and apply teacher-provided criteria to assess and refine the technical and expressive aspects of evolving drafts leading to final versions.

Grade Advanced
MU:Cr3.1.H. III
Research, identify, explain, and apply personally-developed criteria to assess and refine the technical and expressive aspects of evolving drafts leading to final versions.

Music Harmonizing Instruments/Creating
#MU:Cr3.2.H
Process Component: MHI-Present - Perform expressively, with appropriate interpretation and technical accuracy, and in a manner appropriate to the audience and context.
Anchor Standard: Refine and complete artistic work.
Enduring Understanding: Musicians’ presentation of creative work is the culmination of a process of creation and communication.
Essential Question: When is creative work ready to share?

Grade Novice
MU:Cr3.2.H. Novice
a. Perform with expression and technical accuracy in individual performances of a varied repertoire of music that includes melodies, repertoire pieces, and chordal accompaniments, demonstrating understanding of the audience and the context.

**Grade: Intermediate**
**MU:Cr3.2.H. Intermediate**

a. Perform with expression and technical accuracy in individual performances of a varied repertoire of music that includes melodies, repertoire pieces, and chordal accompaniments, demonstrating sensitivity to the audience and an understanding of the context (social, cultural, or historical).

**Grade: Proficient**
**MU:Cr3.2.H. I**

a. Perform with expression and technical accuracy, in individual and small group performances, a varied repertoire of music that includes melodies, repertoire pieces, improvisations, and chordal accompaniments in a variety of patterns (such as arpeggio, country and gallop strumming, finger picking patterns), demonstrating sensitivity to the audience and an understanding of the context (social, cultural, or historical).

**Grade: Advanced**
**MU:Cr3.2.H. III**

a. Perform with expression and technical accuracy, in individual and small group performances, a varied repertoire for programs of music that includes melodies, repertoire pieces, stylistically appropriate accompaniments, and improvisations in a variety of contrasting styles, demonstrating sensitivity to the audience and an understanding of the context (social, cultural, and historical).

Music Harmonizing Instruments/Performing
#MU:Pr4.1.H

**Process Component:** MHI-Select- Select varied musical works to present based on interest, knowledge, technical skill, and context.

**Anchor Standard:** Select, analyze and interpret artistic work for presentation.

**Enduring Understanding:** Performers’ interest in and knowledge of musical work(s), understanding of their own technical skill, and the context for a performance influence the selection of repertoire.

**Essential Question:** How do performers select repertoire?

**Grade: Novice**
**MU:Pr4.1.H. Novice**

a. Describe and demonstrate how a varied repertoire of music that includes melodies, repertoire pieces, and chordal accompaniments is selected, based on personal interest, music reading skills, and technical skill, as well as the context of the performances.

**Grade: Intermediate**
**MU:Pr4.1.H. Intermediate**

a. Describe and demonstrate how a varied repertoire of music that includes melodies, repertoire pieces, and chordal accompaniments is selected, based on personal interest, music reading skills, and technical skill (citing technical challenges that need to be addressed), as well as the context of the performances.

**Grade: Proficient**
**MU:Pr4.1.H. I**
a. Explain the criteria used when selecting a varied repertoire of music for individual or small group performances that include melodies, repertoire pieces, improvisations, and chordal accompaniments in a variety of patterns (such as arpeggio, country and gallop strumming, finger picking patterns).

**Grade**  Advanced  
**MU:** Pr4.1.H. III

a. Develop and apply criteria for selecting a varied repertoire for a program of music for individual and small group performances that include melodies, repertoire pieces, stylistically appropriate accompaniments, and improvisations in a variety of contrasting styles.

**Music Harmonizing Instruments/Performing**  
#MU:Pr4.2.H

**Process Component:** GMS-Analyze - Analyze the structure and context of varied musical works and their implications for performance.  
**Anchor Standard:** Select, analyze and interpret artistic work for presentation.  
**Enduring Understanding:** Analyzing creators’ context and how they manipulate elements of music provides insight into their intent and informs performance.

**Essential Question:** How does understanding the structure and context of musical works inform performance?

**Grade**  Novice  
**MU:** Pr4.2.H.7

a. Explain and demonstrate the structure of contrasting pieces of music selected for performance and how elements of music are used.

b. When analyzing selected music, read and identify by name or function standard symbols for rhythm, pitch articulation, dynamics, tempo, and form.

c. Identify how cultural and historical context inform performances and result in different music interpretations.

**Grade**  Proficient  
**MU:** Pr4.2.H.8

a. Compare the structure of contrasting pieces of music selected for performance, explaining how the elements of music are used in each.

b. When analyzing selected music, sight-read in treble or bass clef simple rhythmic, melodic, and/or harmonic notation.

c. Identify how cultural and historical context inform performances and result in different musical effects.

**Music Harmonizing Instruments/Performing**  
#MU:Pr4.3.H

**Process Component:** MHI-Interpret - Develop personal interpretations that consider creators’ intent.  
**Anchor Standard:** Select, analyze and interpret work for presentation.  
**Enduring Understanding:** Performers make interpretive decisions based on their understanding of context and expressive intent.  
**Essential Question:** How do performers interpret musical works?

**Grade**  Novice
MU:Pr4.3.H. Novice
Identify prominent melodic and harmonic characteristics in a varied repertoire of music that includes melodies, repertoire pieces, and chordal accompaniments selected for performance, including at least some based on reading standard notation.

Grade Intermediate
MU:Pr4.3.H. Intermediate
Identify prominent melodic, harmonic, and structural characteristics and context (social, cultural, or historical) in a varied repertoire of music that includes melodies, repertoire pieces, and chordal accompaniments selected for performance, including at least some based on reading standard notation.

Grade Proficient
MU:Pr4.3.H. I
Identify and describe important theoretical and structural characteristics and context (social, cultural, or historical) in a varied repertoire of music that includes melodies, repertoire pieces, improvisations, and chordal accompaniments in a variety of patterns (such as arpeggio, country and gallop strumming, finger picking patterns).

Grade Advanced
MU:Pr4.3.H. III
Identify and describe important theoretical and structural characteristics and context (social, cultural, and historical) in a varied repertoire of music selected for performance programs that includes melodies, repertoire pieces, stylistically appropriate accompaniments, and improvisations in a variety of contrasting styles.

Music Harmonizing Instruments/Performing
#MU:Pr5.1.H

Process Component: MHI-Rehearse, Evaluate and Refine - Evaluate and refine personal and ensemble performances, individually or in collaboration with others.

Anchor Standard: Develop and refine artistic techniques and work for presentation.

Enduring Understanding: To express their musical ideas, musicians analyze, evaluate, and refine their performance over time through openness to new ideas, persistence, and the application of appropriate criteria.

Essential Question: How do musicians improve the quality of their performance?

Grade Novice
MU:Pr5.1.H. Novice
a. Apply teacher-provided criteria to critique individual performances of a varied repertoire of music that includes melodies, repertoire pieces, and chordal accompaniments selected for performance, and apply practice strategies to address performance challenges and refine the performances.

Grade Intermediate
MU:Pr5.1.H. Intermediate
a. Apply teacher-provided criteria to critique individual performances of a varied repertoire of music that includes melodies, repertoire pieces, and chordal accompaniments selected for performance, and identify practice strategies to address performance challenges and refine the performances.

Grade Proficient
MU:Pr5.1.H. I
a. Develop and apply criteria to critique individual and small group performances of a varied repertoire of music that includes melodies, repertoire pieces, improvisations, and chordal accompaniments in a variety of patterns (such as arpeggio, country and gallop strumming, finger picking patterns), and create rehearsal strategies to address performance challenges and refine the performances.

**Grade  Advanced**

**MU:Pr5.1.H. III**

a. Develop and apply criteria, including feedback from multiple sources, to critique varied programs of music repertoire (melodies, repertoire pieces, stylistically appropriate accompaniments, improvisations in a variety of contrasting styles) selected for individual and small group performance, and create rehearsal strategies to address performance challenges and refine the performances.

## Music Harmonizing Instruments/Performing

### #MU:Pr6.1.H

#### Process Component: MHI-Present
- Perform expressively, with appropriate interpretation and technical accuracy, and in a manner appropriate to the audience and context.

#### Anchor Standard: Convey meaning through the presentation of artistic work.

#### Enduring Understanding: Musicians judge performance based on criteria that vary across time, place, and cultures. The context and how a work is presented influence the audience response.

#### Essential Question: When is a performance judged ready to present? How do context and the manner in which musical work is presented influence audience response?

**Grade  Novice**

**MU:Pr6.1.H. Novice**

a. Perform with expression and technical accuracy in individual performances of a varied repertoire of music that includes melodies, repertoire pieces, and chordal accompaniments, demonstrating understanding of the audience and the context.

**Grade  Intermediate**

**MU:Pr6.1.H. Intermediate**

a. Perform with expression and technical accuracy in individual performances of a varied repertoire of music that includes melodies, repertoire pieces, and chordal accompaniments, demonstrating sensitivity to the audience and an understanding of the context (social, cultural, or historical).

**Grade  Proficient**

**MU:Pr6.1.H. I**

a. Perform with expression and technical accuracy, in individual and small group performances, a varied repertoire of music that includes melodies, repertoire pieces, improvisations, and chordal accompaniments in a variety of patterns (such as arpeggio, country and gallop strumming, finger picking patterns), demonstrating sensitivity to the audience and an understanding of the context (social, cultural, or historical).

**Grade  Advanced**

**MU:Pr6.1.H. III**

a. Perform with expression and technical accuracy, in individual and small group performances, a varied repertoire for programs of music that includes melodies, repertoire pieces, stylistically appropriate accompaniments, and improvisations in a variety of contrasting styles, demonstrating sensitivity to the audience and an understanding of the context (social, cultural, and historical).
Music Harmonizing Instruments/Responding
#MU:Re7.1.H

**Process Component:** MHI-Select - Choose music appropriate for a specific purpose or context.

**Anchor Standard:** Perceive and analyze artistic work.

**Enduring Understanding:** Individuals' selection of musical works is influenced by their interests, experiences, understandings, and purposes.

**Essential Question:** How do individuals choose music to experience?

- **Grade Novice**
  - **MU:Re7.1.H. Novice**
    - a. Demonstrate and describe reasons for selecting music, based on characteristics found in the music and connections to interest, purpose, or personal experience.

- **Grade Intermediate**
  - **MU:Re7.1.H. Intermediate**
    - a. Explain reasons for selecting music citing characteristics found in the music and connections to interest, purpose, and context.

- **Grade Proficient**
  - **MU:Re7.1.H. I**
    - a. Apply criteria to select music for specified purposes, supporting choices by citing characteristics found in the music and connections to interest, purpose, and context.

- **Grade Advanced**
  - **MU:Re7.1.H. III**
    - a. Select, describe, and compare a variety of individual and small group musical programs from varied cultures, genres, and historical periods.

Music Harmonizing Instruments/Responding
#MU:Re7.2.H

**Process Component:** MHI-Analyze - Analyze how the structure and context of varied musical works inform the response.

**Anchor Standard:** Perceive and analyze artistic work.

**Enduring Understanding:** Response to music is informed by analyzing context (social, cultural, and historical) and how creators and performers manipulate the elements of music.

**Essential Question:** How does understanding the structure and context of music inform a response?

- **Grade Novice**
  - **MU:Re7.2.H. Novice**
    - a. Demonstrate and explain, citing evidence, the use of repetition, similarities and contrasts in musical selections and how these and knowledge of the context (social or cultural) inform the response.

- **Grade Intermediate**
  - **MU:Re7.2.H. Intermediate**
    - a. Describe how the way that the elements of music are manipulated and knowledge of the context (social and cultural) inform the response.

- **Grade Proficient**
  - **MU:Re7.2.H. I**
    - a. Compare passages in musical selections and explain how the elements of music and context (social, cultural, or historical) inform the response.

- **Grade Advanced**
MU:Re7.2.H. III
a. Demonstrate and justify how the structural characteristics function within a variety of musical selections, and distinguish how context (social, cultural, and historical) and creative decisions inform the response.

Music Harmonizing Instruments/Responding
#MU:Re8.1.H
Process Component: MHI-Interpret - Support interpretations of musical works that reflect creators'/performers’ expressive intent.
Anchor Standard: Interpret intent and meaning in artistic work.
Enduring Understanding: Through their use of elements and structures of music, creators and performers provide clues to their expressive intent.
Essential Question: How do we discern the musical creators’ and performers’ expressive intent?

Grade Novice
MU:Re8.1.H. Novice
a. Identify interpretations of the expressive intent and meaning of musical selections, referring to the elements of music, context (personal or social), and (when appropriate) the setting of the text.

Grade Intermediate
MU:Re8.1.H. Intermediate
a. Identify and support interpretations of the expressive intent and meaning of musical selections, citing as evidence the treatment of the elements of music, context, and (when appropriate) the setting of the text.

Grade Proficient
MU:Re8.1.H. I
a. Explain and support interpretations of the expressive intent and meaning of musical selections, citing as evidence the treatment of the elements of music, context (personal, social, and cultural), and (when appropriate) the setting of the text, and outside sources.

Grade Advanced
MU:Re8.1.H. III
a. Establish and justify interpretations of the expressive intent and meaning of musical selections by comparing and synthesizing varied researched sources, including reference to examples from other art forms.

Music Harmonizing Instruments/Responding
#MU:Re9.1.H
Process Component: MHI-Evaluate - Support their personal evaluations of musical work(s) and performance(s) based on analysis, interpretation, and established criteria.
Anchor Standard: Apply criteria to evaluate artistic work.
Enduring Understanding: The personal evaluation of musical work(s) and performance(s) is informed by analysis, interpretation, and established criteria.
Essential Question: How do we judge the quality of musical work(s) and performance(s)?

Grade Novice
MU:Re9.1.H. Novice
a. Identify and describe how interest, experiences, and contexts (personal or social) effect the evaluation of music.

Grade Intermediate
MU:Re9.1.H. Intermediate
a. Explain the influence of experiences and contexts (personal, social, or cultural) on interest in and the evaluation of a varied repertoire of music.

**Grade Proficient**

MU:Re9.1.H. I

- Develop and apply teacher-provided and established criteria based on personal preference, analysis, and context (personal, social, and cultural) to evaluate individual and small group musical selections for listening.

**Grade Advanced**

MU:Re9.1.H. III

- Develop and justify evaluations of a variety of individual and small group musical selections for listening based on personally-developed and established criteria, personal decision making, and knowledge and understanding of context.

---

**Music Harmonizing Instruments/Connecting**

#MU:Cn10.0.H

**Process Component:** MHI-Connect #10- Synthesize and relate knowledge and personal experiences to make music.

**Anchor Standard:** Synthesize and relate knowledge and personal experiences to make art.

**Enduring Understanding:** Musicians connect their personal interests, experiences, ideas, and knowledge to creating, performing, and responding.

**Essential Question:** How do musicians make meaningful connections to creating, performing, and responding?

**Grade Novice**

MU:Cn10.0.H. Novice

- Demonstrate how interests, knowledge and skills relate to personal choices and intent when creating, performing, and responding to music.

**Grade Intermediate**

MU:Cn10.0.H. Intermediate

- Demonstrate how interests, knowledge and skills relate to personal choices and intent when creating, performing, and responding to music.

**Grade Proficient**

MU:Cn10.0.H. I

- Demonstrate how interests, knowledge and skills relate to personal choices and intent when creating, performing, and responding to music.

**Grade Advanced**

MU:Cn10.0.H. III

- Demonstrate how interests, knowledge and skills relate to personal choices and intent when creating, performing, and responding to music.

---

**Music Harmonizing Instruments/Connecting**

#MU:Cn11.0.H

**Process Component:** MHI-Connect #11- Relate musical ideas and works to varied contexts and daily life to deepen understanding.

**Anchor Standard:** Relate artistic ideas and works with societal, cultural and historical context to deepen understanding.

**Enduring Understanding:** Understanding connections to varied contexts and daily life enhances musicians’ creating, performing, and responding.
**Essential Question:** How do the other arts, other disciplines, contexts and daily life inform creating, performing, and responding to music?

- **Grade Novice**
  
  MU:CN11.0.H. Novice
  
  Demonstrate understanding of relationships between music and the other arts, other disciplines, varied contexts and daily life.

- **Grade Intermediate**
  
  MU:CN11.0.H. Intermediate
  
  Demonstrate understanding of relationships between music and the other arts, other disciplines, varied contexts and daily life.

- **Grade Proficient**
  
  MU:CN11.0.H. I
  
  Demonstrate understanding of relationships between music and the other arts, other disciplines, varied contexts and daily life.

- **Grade Advanced**
  
  MU:CN11.0.H. III
  
  Demonstrate understanding of relationships between music and the other arts, other disciplines, varied contexts and daily life.
Music Technology/Creating
#MU:Cr1.1.T

Process Component: MTS-Imagine - Generate musical ideas for various purposes and contexts.
Anchor Standard: Generate and conceptualize artistic ideas and works.
Enduring Understanding: The creative ideas, concepts, and feelings that influence musicians’ work emerge from a variety of sources.
Essential Question: How do musicians generate creative ideas?
   Grade Hs proficient
   MU:Cr1.1.T.HSI
   Generate melodic, rhythmic, and harmonic ideas for compositions or improvisations using digital tools.
   Grade Hs accomplished
   MU:Cr1.1.T.HSII
   Generate melodic, rhythmic, and harmonic ideas for compositions and improvisations using digital tools and resources.
   Grade Hs advanced
   MU:Cr1.1.T.HSIII
   Generate melodic, rhythmic, and harmonic ideas for compositions and improvisations that incorporate digital tools, resources, and systems.

Music Technology/Creating
#MU:Cr2.1.T

Process Component: MTS-Plan and Make - Select and develop musical ideas for defined purposes and contexts.
Anchor Standard: Organize and develop artistic ideas and work.
Enduring Understanding: Musicians’ creative choices are influenced by their expertise, context, and expressive intent.
Essential Question: How do musicians make creative decisions?
   Grade Hs proficient
   MU:Cr2.1.T.HSI
   Select melodic, rhythmic, and harmonic ideas to develop into a larger work using digital tools and resources.
   Grade Hs accomplished
   MU:Cr2.1.T.HSII
   Select melodic, rhythmic, and harmonic ideas to develop into a larger work that exhibits unity and variety using digital and analog tools.
   Grade Hs advanced
   MU:Cr2.1.T.HSIII
   Select, develop, and organize multiple melodic, rhythmic and harmonic ideas to develop into a larger work that exhibits unity, variety, complexity, and coherence using digital and analog tools, resources, and systems.

Music Technology/Creating
#MU:Cr3.1.T

Process Component: MTS-Evaluate and Refine - Evaluate and refine selected musical ideas to create musical work that meets appropriate criteria.
Anchor Standard: Refine and complete artistic work.
Enduring Understanding: Musicians evaluate and refine their work through openness to new ideas, persistence, and the application of appropriate criteria.

Essential Question: How do musicians improve the quality of their creative work?

Grade Hs proficient
MU:Cr3.1.T.HSI
Drawing on feedback from teachers and peers, develop and implement strategies to improve and refine the technical and expressive aspects of draft compositions and improvisations.

Grade Hs accomplished
MU:Cr3.1.T.HSII
Develop and implement varied strategies to improve and refine the technical and expressive aspects of draft compositions and improvisations.

Grade Hs advanced
MU:Cr3.1.T.HSIII
Develop and implement varied strategies and apply appropriate criteria to improve and refine the technical and expressive aspects of draft compositions and improvisations.

Music Technology/Creating
#MU:Cr3.2.T

Process Component: MTS-Present - Share creative musical work that conveys intent, demonstrates craftsmanship, and exhibits originality.

Anchor Standard: Refine and complete artistic work.

Enduring Understanding: Musicians’ presentation of creative work is the culmination of a process of creation and communication.

Essential Question: When is creative work ready to share?

Grade Hs proficient
MU:Cr3.2.T.HSI
Share compositions or improvisations that demonstrate a proficient level of musical and technological craftsmanship as well as the use of digital tools and resources in developing and organizing musical ideas.

Grade Hs accomplished
MU:Cr3.2.T.HSII
Share compositions and improvisations that demonstrate an accomplished level of musical and technological craftsmanship as well as the use of digital and analog tools and resources in developing and organizing musical ideas.

Grade Hs advanced
MU:Cr3.2.T.HSIII
Share a portfolio of musical creations representing varied styles and genres that demonstrates an advanced level of musical and technological craftsmanship as well as the use of digital and analog tools, resources and systems in developing and organizing musical ideas.

Music Technology/Performing
#MU:Pr4.1.T

Process Component: MTS-Select - Select varied musical works to present based on interest, knowledge, technical skill, and context.

Anchor Standard: Select, analyze and interpret artistic work for presentation.

Enduring Understanding: Performers’ interest in and knowledge of musical works, understanding of their own abilities, and the context for a performance influence the selection of repertoire.

Essential Question: How do performers select repertoire?
Grade Hs proficient
MU:Pr4.1.T.HSI
Develop and explain the criteria used for selecting a varied repertoire of music based on interest, music reading skills, and an understanding of the performer’s technical and technological skill.

Grade Hs accomplished
MU:Pr4.1.T.HSII
Develop and apply criteria to select a varied repertoire to study and perform based on interest; an understanding of the theoretical and structural characteristics of the music; and the performer’s technical skill using digital tools and resources.

Grade Hs advanced
MU:Pr4.1.T.HSIII
Develop and apply criteria to select varied programs to study and perform based on interest, an understanding of the theoretical and structural characteristics, as well as expressive challenges in the music, and the performer’s technical skill using digital tools, resources, and systems.

Music Technology/Performing
#MU:Pr4.2.T
Process Component: MTS-Analyze - Analyze the structure and context of varied musical works and their implications for performance.
Anchor Standard: Select, analyze and interpret artistic work for presentation.
Enduring Understanding: Analyzing creators’ context and how they manipulate elements of music provides insight into their intent and informs performance.
   Essential Question: How does understanding the structure and context of musical works inform performance?
Grade Hs proficient
MU:Pr4.2.T.HSI
Describe how context, structural aspects of the music, and digital media/tools inform prepared and improvised performances.
Grade Hs accomplished
MU:Pr4.2.T.HSII
Describe and demonstrate how context, theoretical and structural aspects of the music and digital media/tools inform and influence prepared and improvised performances.
Grade Hs advanced
MU:Pr4.2.T.HSIII
Examine, evaluate and critique how context, theoretical and structural aspects of the music and digital media/tools inform and influence prepared and improvised performances.

Music Technology/Performing
#MU:Pr4.3.T
Process Component: MTS-Interpret - Develop personal interpretations that consider creators’ intent.
Anchor Standard: Select, analyze and interpret artistic work for presentation.
Enduring Understanding: Performers make interpretive decisions based on their understanding of context and intent.
   Essential Question: How do performers interpret musical works?
Grade Hs proficient
MU:Pr4.3.T.HSI
Demonstrate how understanding the context, expressive challenges, and use of digital tools in a varied repertoire of music influence prepared or improvised performances.

**Grade Hs accomplished**
**MU:Pr4.3.T.HSII**
Demonstrate how understanding the style, genre, context, and use of digital tools and resources in a varied repertoire of music influences prepared or improvised performances and performers’ ability to connect with audiences.

**Grade Hs advanced**
**MU:Pr4.3.T.HSIII**
Demonstrate how understanding the style, genre, context, and integration of digital technologies in a varied repertoire of music informs and influences prepared and improvised performances and their ability to connect with audiences.

**Music Technology/Performing**

**#MU:Pr5.1.T**

**Process Component:** MTS-Evaluate and Refine - Evaluate and refine personal and ensemble performances, individually or in collaboration with others.

**Anchor Standard:** Develop and refine artistic techniques and work for presentation.

**Enduring Understanding:** Musicians’ creative choices are influenced by their context, expressive intent, and established criteria.

**Essential Question:** How do musicians make creative decisions?

**Grade Hs proficient**
**MU:Pr5.1.T.HSI**
Identify and implement rehearsal strategies to improve the technical and expressive aspects of prepared and improvised performances in a varied repertoire of music.

**Grade Hs accomplished**
**MU:Pr5.1.T.HSII**
Develop and implement rehearsal strategies to improve and refine the technical and expressive aspects of prepared and improvised performances in a varied repertoire of music.

**Grade Hs advanced**
**MU:Pr5.1.T.HSIII**
Apply appropriate criteria as well as feedback from multiple sources and develop and implement varied strategies to improve and refine the technical and expressive aspects of prepared and improvised performances in varied programs of music.

**Music Technology/Performing**

**#MU:Pr6.1.T**

**Process Component:** MTS-Present - Perform expressively, with appropriate interpretation and technical accuracy, and in a manner appropriate to the audience and context.

**Anchor Standard:** Convey meaning through the presentation of artistic work.

**Enduring Understanding:** Musicians judge performance based on criteria that vary across time, place, and cultures. The context and how a work is presented influence the audience response.

**Essential Question:** When is a performance judged ready to present? How do context and the manner in which musical work is presented influence audience response?

**Grade Hs proficient**
**MU:Pr6.1.T.HSI**
a. Using digital tools, demonstrate attention to technical accuracy and expressive qualities in prepared and improvised performances of a varied repertoire of music.
b. Demonstrate an understanding of the context of music through prepared and improvised performances.

Grade Hs accomplished
MU:Pr6.1.T.HSII
a. Using digital tools and resources, demonstrate technical accuracy and expressive qualities in prepared and improvised performances of a varied repertoire of music representing diverse cultures, styles, and genres.

b. Demonstrate an understanding of the expressive intent when connecting with an audience through prepared and improvised performances.

Grade Hs advanced
MU:Pr6.1.T.HSIII
a. Integrating digital and analog tools and resources, demonstrate an understanding and attention to technical accuracy and expressive qualities of the music in prepared and improvised performances of a varied repertoire of music representing diverse cultures, styles, genres, and historical periods.

b. Demonstrate an ability to connect with audience members before, and engaging with and responding to them during prepared and improvised performances.

Music Technology/Responding
#MU:Re7.2.T
Process Component: MTS – Analyze - Analyze how the structure and context of varied musical works inform the response.

Anchor Standard: Perceive and analyze artistic work.

Enduring Understanding: Response to music is informed by analyzing context (social, cultural, and historical) and how creators and performers manipulate the elements of music.

Essential Question: How does understanding the structure and context of music inform a response?

Grade Hs proficient
MU:Re7.2.T.HSI
Explain how knowledge of the structure (repetition, similarities, contrasts), technological aspects, and purpose of the music informs the response.

Grade Hs accomplished
MU:Re7.2.T.HSII
Explain how an analysis of the structure, context, and technological aspects of the music informs the response.

Grade Hs advanced
MU:Re7.2.T.HSIII
Demonstrate and justify how an analysis of the structural characteristics, context, and technological and creative decisions, informs interest in and response to the music.

Music Technology/Responding
#MU:Re7.1.T
Process Component: MTS – Select - Choose music appropriate for a specific purpose or context.

Anchor Standard: Perceive and analyze artistic work.

Enduring Understanding: Individuals’ selection of musical works is influenced by their interests, experiences, understandings, and purposes.

Essential Question: How do individuals choose music to experience?
Grade Hs proficient
MU:Re7.I.T.HSI
Cite reasons for choosing music based on the use of the elements of music, digital and electronic aspects, and connections to interest or purpose.

Grade Hs accomplished
MU:Re7.I.T.HSII
Select and critique contrasting musical works, defending opinions based on manipulations of the elements of music, digital and electronic aspects, and the purpose and context of the works.

Grade Hs advanced
MU:Re7.I.T.HSIII
Select, describe and compare a variety of musical selections based on characteristics and knowledge of the music, understanding of digital and electronic aspects, and the purpose and context of the works.

Music Technology/Responding
#MU:Re8.1.T

Process Component: MTS – Interpret - Support interpretations of musical works that reflect creators’/performers’ expressive intent.

Anchor Standard: Interpret intent and meaning in artistic work.

Enduring Understanding: Through their use of elements and structures of music, creators and performers provide clues to their expressive intent.

Essential Question: How do we discern musical creators’ and performers’ expressive intent?

Grade Hs proficient
MU:Re8.1.T.HSI
Explain and support an interpretation of the expressive intent of musical selections based on treatment of the elements of music, digital and electronic features, and purpose.

Grade Hs accomplished
MU:Re8.1.T.HSII
Connect the influence of the treatment of the elements of music, digital and electronic features, context, purpose, and other art forms to the expressive intent of musical works.

Grade Hs advanced
MU:Re8.1.T.HSIII
Examine, cite research and multiple sources to connect the influence of the treatment of the elements of music, digital and electronic features, context, purpose, and other art forms to the expressive intent of musical works.

Music Technology/Responding
#MU:Re9.1.T

Process Component: MTS – Evaluate - Support evaluations of musical works and performances based on analysis, interpretation, and established criteria.

Anchor Standard: Apply criteria to evaluate artistic work.

Enduring Understanding: The personal evaluation of musical works and performances is informed by analysis, interpretation, and established criteria.

Essential Question: How do we judge the quality of musical work(s) and performance(s)?

Grade Hs proficient
MU:Re9.1.T.HSI
Evaluate music using criteria based on analysis, interpretation, digital and electronic features, and personal interests.

Grade Hs accomplished
MU:Re9.1.T.HSII
Apply criteria to evaluate music based on analysis, interpretation, artistic intent, digital, electronic, and analog features, and musical qualities.
Grade Hs advanced
MU:Re9.1.T.HSIII
Develop and justify the evaluation of a variety of music based on established and personally-developed criteria, digital, electronic and analog features, and understanding of purpose and context.

Music Technology/Connecting
#MU:Cn10.0.T
Process Component: MTS – Connect #10 - Synthesize and relate knowledge and personal experiences to make music.
Anchor Standard: Synthesize and relate knowledge and personal experiences to make art.
Enduring Understanding: Musicians connect their personal interests, experiences, ideas, and knowledge to creating performing and responding.
   Essential Question: How do musicians make meaningful connections to creating, performing and responding?
Grade Hs proficient
MU:Cn10.0.T.HSI
Demonstrate how interests, knowledge and skills relate to personal choices and intent when creating, performing, and responding to music.
Grade Hs accomplished
MU:Cn10.0.T.HSII
Demonstrate how interests, knowledge and skills relate to personal choices and intent when creating, performing, and responding to music.
Grade Hs advanced
MU:Cn10.0.T.HSIII
Demonstrate how interests, knowledge and skills relate to personal choices and intent when creating, performing, and responding to music.

Music Technology/Connecting
#MU:Cn11.0.T
Process Component: MTS - Connect #11- Relate musical ideas and works to varied contexts and daily life to deepen understanding.
Anchor Standard: Relate artistic ideas and works with societal, cultural and historical context to deepen understanding.
Enduring Understanding: Understanding connections to varied contexts and daily life enhances musicians’ creating, performing, and responding.
Essential Question: How do the other arts, other disciplines, contexts and daily life inform creating, performing, and responding to music?
Grade Hs proficient
MU:Cn11.0.T.HSI
Demonstrate understanding of relationships between music and the other arts, other disciplines, varied contexts and daily life.
Grade Hs accomplished
MU:Cn11.0.T.HSII
Demonstrate understanding of relationships between music and the other arts, other disciplines, varied contexts and daily life.
Grade Hs advanced
MU:Cn11.0.T.HSIII
Demonstrate understanding of relationships between music and the other arts, other disciplines, varied contexts and daily life.
Music Theory Composition/Creating
#MU:Cr1.1.C

Process Component: MTC - Imagine - Generate musical ideas for various purposes and contexts.

Anchor Standard: Generate and conceptualize artistic ideas and work.

Enduring Understanding: The creative ideas, concepts, and feelings that influence musicians’ work emerge from a variety of sources.

Essential Question: How do musicians generate creative ideas?

Grade Hs proficient
MU:Cr1.1.C.HSI
Describe how sounds and short musical ideas can be used to represent personal experiences, moods, visual images, and/or storylines.

Grade Hs accomplished
MU:Cr1.1.C.HSII
Describe and demonstrate how sounds and musical ideas can be used to represent sonic events, memories, visual images, concepts, texts, or storylines.

Grade Hs advanced
MU:Cr1.1.C.HSIII
Describe and demonstrate multiple ways in which sounds and musical ideas can be used to represent extended sonic experiences or abstract ideas.

Music Theory Composition/Creating
#MU:Cr2.1.C

Process Component: MTC - Plan and Make - Select and develop musical ideas for defined purposes and contexts.

Anchor Standard: Organize and develop artistic ideas and work.

Enduring Understanding: Musicians’ creative choices are influenced by their expertise, context, and expressive intent.

Essential Question: How do musicians make creative decisions?

Grade Hs proficient
MU:Cr2.1.C.HSI
a. Assemble and organize sounds or short musical ideas to create initial expressions of selected experiences, moods, images, or storylines.

b. Identify and describe the development of sounds or short musical ideas in drafts of music within simple forms (such as one-part, cyclical, or binary).

Grade Hs accomplished
MU:Cr2.1.C.HSII
a. Assemble and organize multiple sounds or musical ideas to create initial expressive statements of selected sonic events, memories, images, concepts, texts, or storylines.

b. Describe and explain the development of sounds and musical ideas in drafts of music within a variety of simple or moderately complex forms (such as binary, rondo, or ternary).

Grade Hs advanced
MU:Cr2.1.C.HSIII
a. Assemble and organize multiple sounds or extended musical ideas to create initial expressive statements of selected extended sonic experiences or abstract ideas.
b. Analyze and demonstrate the development of sounds and extended musical ideas in drafts of
music within a variety of moderately complex or complex forms.

**Music Theory Composition/Creating**
#MU:Cr3.1.C

**Process Component:** MTC - Evaluate and Refine - Evaluate and refine selected musical ideas
to create musical work that meets appropriate criteria.

**Anchor Standard:** Refine and complete artistic work.

**Enduring Understanding:** Musicians evaluate and refine their work through openness to new ideas,
persistence, and the application of appropriate criteria.

**Essential Question:** How do musicians improve the quality of their creative work?

**Grade Hs proficient**
MU:Cr3.1.C.HSI
Identify, describe, and apply teacher-provided criteria to assess and refine the technical
and expressive aspects of evolving drafts leading to final versions.

**Grade Hs accomplished**
MU:Cr3.1.C.HSII
Identify, describe, and apply selected teacher-provided or personally-developed criteria to
assess and refine the technical and expressive aspects of evolving drafts leading to final
versions.

**Grade Hs advanced**
MU:Cr3.1.C.HSIII
Research, identify, explain, and apply personally-developed criteria to assess and refine the
technical and expressive aspects of evolving drafts leading to final versions.

**Music Theory Composition/Creating**
#MU:Cr3.2.C

**Process Component:** MTC - Present - Share creative musical work that conveys intent,
demonstrates craftsmanship, and exhibits originality.

**Anchor Standard:** Refine and complete artistic work.

**Enduring Understanding:** Musicians’ presentation of creative work is the culmination of a process of
creation and communication.

**Essential Question:** When is creative work ready to share?

**Grade Hs proficient**
MU:Cr3.2.C.HSI
Share music through the use of notation, performance, or technology, and demonstrate how
the elements of music have been employed to realize expressive intent.

**Grade Hs accomplished**
MU:Cr3.2.C.HSII
Share music through the use of notation, solo or group performance, or technology,
and demonstrate and describe how the elements of music and compositional techniques have
been employed to realize expressive intent.

**Grade Hs advanced**
MU:Cr3.2.C.HSIII
Share music through the use of notation, solo or group performance, or technology, and demonstrate and explain how the elements of music, compositional techniques and processes have been employed to realize expressive intent.

**Music Theory Composition/Performing**

#MU:Pr4.1.C

**Process Component:** MTC - Select - Select varied musical works to present based on interest, knowledge, technical skill, and context.

**Anchor Standard:** Select, analyze and interpret artistic work for presentation.

**Enduring Understanding:** Performers’ interest in and knowledge of musical work(s), understanding of their own technical skill, and the context for a performance influence the selection of repertoire.

**Essential Question:** How do performers select repertoire?

**Grade Hs proficient**

**MU:Pr4.1.C.HSI**

Identify and select specific excerpts, passages, or sections in musical works that express a personal experience, mood, visual image, or storyline in simple forms (such as one-part, cyclical, binary).

**Grade Hs accomplished**

**MU:Pr4.1.C.HSII**

Identify and select specific passages, sections, or movements in musical works that express personal experiences and interests, moods, visual images, concepts, texts, or storylines in simple forms (such as binary, ternary, rondo) or moderately complex forms.

**Grade Hs advanced**

**MU:Pr4.1.C.HSIII**

Identify and select specific sections, movements, or entire works that express personal experiences and interests, moods, visual images, concepts, texts, or storylines in moderately complex or complex forms.

---

**Music Theory Composition/Performing**

#MU:Pr4.2

**Process Component:** MTC - Analyze - Analyze the structure and context of varied musical works and their implications for performance.

**Anchor Standard:** Select, analyze and interpret artistic work for presentation.

**Enduring Understanding:** Analyzing creators’ context and how they manipulate elements of music provides insight into their intent and informs performance.

**Essential Question:** How does understanding the structure and context of musical works inform performance?

**Grade Hs proficient**

**MU:Pr4.2.HSI**

Analyze how the elements of music (including form) of selected works relate to style and mood, and explain the implications for rehearsal or performance.

**Grade Hs accomplished**

**MU:Pr4.2.HSII**

Analyze how the elements of music (including form) of selected works relate to the style, function, and context, and explain the implications for rehearsal and performance.

**Grade Hs advanced**
**MU:Pr4.2.HSIII**
Analyze how the elements of music (including form), and compositional techniques of selected works relate to the style, function, and context, and explain and support the analysis and its implications for rehearsal and performance.

**Music Theory Composition/Performing**
**#MU:Pr5.1.C**

**Process Component:** MTC - Rehearse, Evaluate and Refine - Evaluate and refine personal and ensemble performances, individually or in collaboration with others.

**Anchor Standard:** Develop and refine artistic techniques and work for presentation.

**Enduring Understanding:** To express their musical ideas, musicians analyze, evaluate, and refine their performance over time through openness to new ideas, persistence, and the application of appropriate criteria.

**Essential Question:** How do musicians improve the quality of their performance?

**Grade Hs proficient**
**MU:Pr5.1.C.HSI**

a. Create rehearsal plans for works, identifying repetition and variation within the form.

b. Using established criteria and feedback, identify the way(s) in which performances convey the elements of music, style, and mood.

c. Identify and implement strategies for improving the technical and expressive aspects of multiple works.

**Grade Hs accomplished**
**MU:Pr5.1.C.HSII**

a. Create rehearsal plans for works, identifying the form, repetition and variation within the form, and the style and historical or cultural context of the work.

b. Using established criteria and feedback, identify the ways in which performances convey the formal design, style, and historical/cultural context of the works.

c. Identify and implement strategies for improving the technical and expressive aspects of varied works.

**Grade Hs advanced**
**MU:Pr5.1.C.HSIII**

a. Create rehearsal plans for works, identifying the form, repetition and variation within the form, compositional techniques, and the style and historical or cultural context of the work.

b. Using established criteria and feedback, identify the ways in which performances use compositional techniques and convey the formal design, style, and historical/cultural context of the works.

c. Identify, compare, and implement strategies for improving the technical and expressive aspects of multiple contrasting works.
#MU:Pr6.1.C

**Process Component:** MTC - Present - Perform expressively, with appropriate interpretation and technical accuracy, and in a manner appropriate to the audience and context.

**Anchor Standard:** Convey meaning through the presentation of artistic work.

**Enduring Understanding:** Musicians judge performance based on criteria that vary across time, place, and cultures. The context and how a work is presented influence the audience response.

**Essential Question:** When is a performance judged ready to present? How do context and the manner in which musical work is presented influence audience response?

**Grade Hs proficient**

MU:Pr6.1.C.HSI

a. Share live or recorded performances of works (both personal and others’), and explain how the elements of music are used to convey intent.

b. Identify how compositions are appropriate for an audience or context, and how this will shape future compositions.

**Grade Hs accomplished**

MU:Pr6.1.C.HSII

a. Share live or recorded performances of works (both personal and others’), and explain how the elements of music and compositional techniques are used to convey intent.

b. Explain how compositions are appropriate for both audience and context, and how this will shape future compositions.

**Grade Hs advanced**

MU:Pr6.1.C.HSIII

a. Share live or recorded performances of works (both personal and others’), and explain and/or demonstrate understanding of how the expressive intent of the music is conveyed.

b. Explain how compositions are appropriate for a variety of audiences and contexts, and how this will shape future compositions.

---

**Music Theory Composition/Responding**

#MU:Re7.1.C

**Process Component:** MTC - Select - Choose music appropriate for a specific purpose or context.

**Anchor Standard:** Perceive and analyze artistic work.

**Enduring Understanding:** Individuals’ selection of musical works is influenced by their interests, experiences, understandings, and purposes.

**Essential Question:** How do individuals choose music to experience?

**Grade Hs proficient**

MU:Re7.1.C.HSI

Apply teacher-provided criteria to select music that expresses a personal experience, mood, visual image, or storyline in simple forms (such as one-part, cyclical, binary), and describe the choices as models for composition.

**Grade Hs accomplished**

MU:Re7.1.C.HSII
Apply teacher-provided or personally-developed criteria to select music that expresses personal experiences and interests, moods, visual images, concepts, texts, or storylines in simple or moderately complex forms, and describe and defend the choices as models for composition.

**Grade Hs advanced**
**MU:Re7.1.C.HSIII**
Apply researched or personally-developed criteria to select music that expresses personal experiences and interests, visual images, concepts, texts, or storylines in moderately complex or complex forms, and describe and justify the choice as models for composition.

**Music Theory Composition/Responding**
**#MU:Re8.1.C**

**Process Component:** MTC - Interpret - Support interpretations of musical works that reflect creators’/performers’ expressive intent.

**Anchor Standard:** Interpret intent and meaning in artistic work.

**Enduring Understanding:** Through their use of elements and structures of music, creators and performers provide clues to their expressive intent.

**Essential Question:** How do we discern musical creators’ and performers’ expressive intent?

- **Grade Hs proficient**
  **MU:Re8.1.C.HSI**
  Develop and explain interpretations of varied works, demonstrating an understanding of the composers’ intent by citing technical and expressive aspects as well as the style/genre of each work.

- **Grade Hs accomplished**
  **MU:Re8.1.C.HSII**
  Develop and support interpretations of varied works, demonstrating an understanding of the composers’ intent by citing the use of elements of music (including form), compositional techniques, and the style/genre and context of each work.

- **Grade Hs advanced**
  **MU:Re8.1.C.HSIII**
  Develop, justify and defend interpretations of varied works, demonstrating an understanding of the composers’ intent by citing the use of elements of music (including form), compositional techniques, and the style/genre and context of each work.

---

**Music Theory Composition/Responding**
**#MU:Re9.1.C**

**Process Component:** MTC - Evaluate - Support evaluations of musical works and performances based on analysis, interpretation, and established criteria.

**Anchor Standard:** Evaluate - Support evaluations of musical works and performances based on analysis, interpretation, and established criteria.

**Enduring Understanding:** The personal evaluation of musical works and performances is informed by analysis, interpretation, and established criteria.

**Essential Question:** How do we judge the quality of musical work(s) and performance(s)?

- **Grade Hs proficient**
  **MU:Re9.1.C.HSI**
  Describe the effectiveness of the technical and expressive aspects of selected music and performances, demonstrating understanding of fundamentals of music theory.
Describe the way(s) in which critiquing others’ work and receiving feedback from others can be applied in the personal creative process.

**Grade Hs accomplished**  
**MU:Re9.1.C.HSII**  
Explain the effectiveness of the technical and expressive aspects of selected music and performances, demonstrating understanding of music theory as well as compositional techniques and procedures.

Describe ways in which critiquing others’ work and receiving feedback from others have been specifically applied in the personal creative process.

**Grade Hs advanced**  
**MU:Re9.1.C.HSIII**  
Evaluate the effectiveness of the technical and expressive aspects of selected music and performances, demonstrating understanding of theoretical concepts and complex compositional techniques and procedures.

Describe and evaluate ways in which critiquing others’ work and receiving feedback from others have been specifically applied in the personal creative process.

**Music Theory Composition/Connecting**  
#MU:Cn10.0.C  
**Process Component:** MTC - Connect #10 - Synthesize and relate knowledge and personal experiences to make music.  
**Anchor Standard:** Synthesize and relate knowledge and personal experiences to make art.  
**Enduring Understanding:** Musicians connect their personal interests, experiences, ideas, and knowledge to creating, performing, and responding.  
**Essential Question:** How do musicians make meaningful connections to creating, performing, and responding?

**Grade Hs proficient**  
**MU:Cn10.0.C.HSI**  
Demonstrate how interests, knowledge, and skills relate to personal choices and intent when creating, performing, and responding to music.  
**Grade Hs accomplished**  
**MU:Cn10.0.C.HSII**  
Demonstrate how interests, knowledge, and skills relate to personal choices and intent when creating, performing, and responding to music.  
**Grade Hs advanced**  
**MU:Cn10.0.C.HSIII**  
Demonstrate how interests, knowledge and skills relate to personal choices and intent when creating, performing, and responding to music.

**Music Theory Composition/Connecting**  
#MU:Cn11.0.C  
**Process Component:** MTC - Connect #11 - Relate musical ideas and works to varied contexts and daily life to deepen understanding.
Anchor Standard: Relate artistic ideas and works with societal, cultural and historical context to deepen understanding.

Enduring Understanding: Understanding connections to varied contexts and daily life enhances musicians’ creating, performing, and responding.

Essential Question: How do the other arts, other disciplines, contexts and daily life inform creating, performing, and responding to music?

Grade Hs proficient
MU:Cn11.0.C.HSI
Demonstrate understanding of relationships between music and the other arts, other disciplines, varied contexts, and daily life.

Grade Hs accomplished
MU:Cn11.0.C.HSII
Demonstrate understanding of relationships between music and the other arts, other disciplines, varied contexts, and daily life.

Grade Hs advanced
MU:Cn11.0.C.HSIII
Demonstrate understanding of relationships between music and the other arts, other disciplines, varied contexts, and daily life.
Music Traditional And Emerging Ensembles/Creating
#MU:Cr1.1.E

Process Component: MTE - Imagine - Generate musical ideas for various purposes and contexts.

Anchor Standard: Generate and conceptualize artistic ideas and work.

Enduring Understanding: The creative ideas, concepts, and feelings that influence musicians’ work emerge from a variety of sources.

Essential Question: How do musicians generate creative ideas?

Grade Hs novice
MU:Cr1.1.E.Hs novice
Compose and improvise melodic and rhythmic ideas or motives that reflect characteristic(s) of music or text(s) studied in rehearsal.

Grade Hs intermediate
MU:Cr1.1.E.Hs intermediate
Compose and improvise ideas for melodies and rhythmic passages based on characteristic(s) of music or text(s) studied in rehearsal.

Grade Hs proficient
MU:Cr1.1.E.HSI
Compose and improvise ideas for melodies, rhythmic passages, and arrangements for specific purposes that reflect characteristic(s) of music from a variety of historical periods studied in rehearsal.

Grade Hs accomplished
MU:Cr1.1.E.HSII
Compose and improvise ideas for arrangements, sections, and short compositions for specific purposes that reflect characteristic(s) of music from a variety of cultures studied in rehearsal.

Grade Hs advanced
MU:Cr1.1.E.HSIII
Compose and improvise musical ideas for a variety of purposes and contexts.

Music Traditional And Emerging Ensembles/Creating
#MU:Cr2.1.E

Process Component: MTE - Plan and Make - Select and develop musical ideas for defined purposes and contexts.

Anchor Standard: Organize and develop artistic ideas and work.

Enduring Understanding: Musicians’ creative choices are influenced by their expertise, context, and expressive intent.

Essential Question: How do musicians make creative decisions?

Grade Hs novice
MU:Cr2.1.E.Hs novice
a. Select and develop draft melodic and rhythmic ideas or motives that demonstrate understanding of characteristic(s) of music or text(s) studied in rehearsal.

b. Preserve draft compositions and improvisations through standard notation and audio recording.

Grade Hs intermediate
MU:Cr2.1.E.Hs intermediate
a. Select and develop draft melodies and rhythmic passages that demonstrate understanding of characteristic(s) of music or text(s) studied in rehearsal.
b. Preserve draft compositions and improvisations through standard notation and audio recording.

**Grade Hs proficient**

**MU:Cr2.1.E.HSI**

a. Select and develop draft melodies, rhythmic passages, and arrangements for specific purposes that demonstrate understanding of characteristic(s) of music from a variety of historical periods studied in rehearsal.
b. Preserve draft compositions and improvisations through standard notation and audio recording.

**Grade Hs accomplished**

**MU:Cr2.1.E.HSII**

a. Select and develop arrangements, sections, and short compositions for specific purposes that demonstrate understanding of characteristic(s) of music from a variety of cultures studied in rehearsal.
b. Preserve draft compositions and improvisations through standard notation, audio, or video recording.

**Grade Hs advanced**

**MU:Cr2.1.E.HSIII**

a. Select and develop composed and improvised ideas into draft musical works organized for a variety of purposes and contexts.
b. Preserve draft musical works through standard notation, audio, or video recording.

**Music Traditional And Emerging Ensembles/Creating**

#MU:Cr3.1.E

**Process Component:** MTE – Evaluate and Refine - Evaluate and refine selected musical ideas to create musical work that meets appropriate criteria.

**Anchor Standard:** Refine and complete artistic work.

**Enduring Understanding:** Musicians evaluate and refine their work through openness to new ideas, persistence, and the application of appropriate criteria.

**Essential Question:** How do musicians improve the quality of their creative work?

**Grade Hs novice**

**MU:Cr3.1.E.Hs novice**

a. Evaluate and refine draft compositions and improvisations based on knowledge, skill, and teacher-provided criteria.

**Grade Hs intermediate**

**MU:Cr3.1.E.Hs intermediate**

a. Evaluate and refine draft compositions and improvisations based on knowledge, skill, and collaboratively-developed criteria.

**Grade Hs proficient**

**MU:Cr3.1.E.HSI**

a. Evaluate and refine draft melodies, rhythmic passages, arrangements, and improvisations based on established criteria, including the extent to which they address identified purposes.

**Grade Hs accomplished**
MU:Cr3.1.E.HSII
a. Evaluate and refine draft arrangements, sections, short compositions, and improvisations based on personally-developed criteria, including the extent to which they address identified purposes.

Grade Hs advanced
MU:Cr3.1.E.HSIII
a. Evaluate and refine varied draft musical works based on appropriate criteria, including the extent to which they address identified purposes and contexts.

Music Traditional and Emerging Ensembles/Creating
#MU:Cr3.2.E

Process Component: MTE – Present - Share creative musical work that conveys intent, demonstrates craftsmanship, and exhibits originality.

Anchor Standard: Refine and complete artistic work.

Enduring Understanding: Musicians’ presentation of creative work is the culmination of a process of creation and communication.

Essential Question: When is creative work ready to share?

Grade Hs novice
MU:Cr3.2.E.Hs novice
a. Share personally-developed melodic and rhythmic ideas or motives – individually or as an ensemble – that demonstrate understanding of characteristics of music or texts studied in rehearsal.

Grade Hs intermediate
MU:Cr3.2.E.Hs intermediate
a. Share personally-developed melodies and rhythmic passages – individually or as an ensemble – that demonstrate understanding of characteristics of music or texts studied in rehearsal.

Grade Hs proficient
MU:Cr3.2.E.HSI
a. Share personally-developed melodies, rhythmic passages, and arrangements – individually or as an ensemble – that address identified purposes.

Grade Hs accomplished
MU:Cr3.2.E.HSII
a. Share personally-developed arrangements, sections, and short compositions – individually or as an ensemble – that address identified purposes.

Grade Hs advanced
MU:Cr3.2.E.HSIII
a. Share varied, personally-developed musical works – individually or as an ensemble – that address identified purposes and contexts.

Music Traditional and Emerging Ensembles/Performing
#MU:Pr4.1.E

Process Component: MTE – Select - Select varied musical works to present based on interest, knowledge, technical skill, and context.

Anchor Standard: Select, analyze and interpret artistic work for presentation.
Enduring Understanding: Performers’ interest in and knowledge of musical works, understanding of their own technical skill, and the context for a performance influence the selection of repertoire.

Essential Question: How do performers select repertoire?

Grade Hs novice
MU:Pr4.1.E.Hs novice
a. Select varied repertoire to study based on interest, music reading skills (where appropriate), an understanding of the structure of the music, context, and the technical skill of the individual or ensemble.

Grade Hs intermediate
MU:Pr4.1.E.Hs intermediate
a. Select a varied repertoire to study based on music reading skills (where appropriate), an understanding of formal design in the music, context, and the technical skill of the individual and ensemble.

Grade Hs proficient
MU:Pr4.1.E.HSI
a. Explain the criteria used to select a varied repertoire to study based on an understanding of theoretical and structural characteristics of the music, the technical skill of the individual or ensemble, and the purpose or context of the performance.

Grade Hs accomplished
MU:Pr4.1.E.HSII
a. Develop and apply criteria to select a varied repertoire to study and perform based on an understanding of theoretical and structural characteristics and expressive challenges in the music, the technical skill of the individual or ensemble, and the purpose and context of the performance.

Grade Hs advanced
MU:Pr4.1.E.HSIII
a. Develop and apply criteria to select varied programs to study and perform based on an understanding of theoretical and structural characteristics and expressive challenges in the music, the technical skill of the individual or ensemble, and the purpose and context of the performance.

Music Traditional And Emerging Ensembles/Performing
#MU:Pr4.2.E

Process Component: MTE – Analyze - Analyze the structure and context of varied musical works and their implications for performance.

Anchor Standard: Select, analyze and interpret artistic work for presentation.

Enduring Understanding: Analyzing creators’ context and how they manipulate elements of music provides insight into their intent and informs performance.

Essential Question: How does understanding the structure and context of musical works inform performance?

Grade Hs novice
MU:Pr4.2.E.Hs novice
a. Demonstrate, using music reading skills where appropriate, how knowledge of formal aspects in musical works inform prepared or improvised performances.

Grade Hs intermediate
MU:Pr4.2.E.Hs intermediate
a. Demonstrate, using music reading skills where appropriate, how the setting and formal characteristics of musical works contribute to understanding the context of the music in prepared or improvised performances.

**Grade Hs proficient**

MU:Pr4.2.E.HSI

a. Demonstrate, using music reading skills where appropriate, how compositional devices employed and theoretical and structural aspects of musical works impact and inform prepared or improvised performances.

**Grade Hs accomplished**

MU:Pr4.2.E.HSII

a. Document and demonstrate, using music reading skills where appropriate, how compositional devices employed and theoretical and structural aspects of musical works may impact and inform prepared and improvised performances.

**Grade Hs advanced**

MU:Pr4.2.E.HSIII

a. Examine, evaluate, and critique, using music reading skills where appropriate, how the structure and context impact and inform prepared and improvised performances.

---

**Music Traditional And Emerging Ensembles/Performing**

#MU:Pr4.3.E

**Process Component:** MTE – Interpret - Develop personal interpretations that consider creators’ intent.

**Anchor Standard:** Select, analyze and interpret artistic work for presentation.

**Enduring Understanding:** Performers make interpretive decisions based on their understanding of context and expressive intent.

**Essential Question:** How do performers interpret musical works?

**Grade Hs novice**

MU:Pr4.3.E.Hs novice

a. Identify expressive qualities in a varied repertoire of music that can be demonstrated through prepared and improvised performances.

**Grade Hs intermediate**

MU:Pr4.3.E.Hs intermediate

a. Demonstrate understanding and application of expressive qualities in a varied repertoire of music through prepared and improvised performances.

**Grade Hs proficient**

MU:Pr4.3.E.HSI

a. Demonstrate an understanding of context in a varied repertoire of music through prepared and improvised performances.

**Grade Hs accomplished**

MU:Pr4.3.E.HSII

a. Demonstrate how understanding the style, genre, and context of a varied repertoire of music influences prepared and improvised performances as well as performers’ technical skill to connect with the audience.

**Grade Hs advanced**

MU:Pr4.3.E.HSIII
a. Demonstrate how understanding the style, genre, and context of a varied repertoire of music informs prepared and improvised performances as well as performers’ technical skill to connect with the audience.

Music Traditional And Emerging Ensembles/Performing
#MU:Pr5.1.E
Process Component: MTE – Evaluate and Refine - Evaluate and refine selected musical ideas to create musical work that meets appropriate criteria.
Anchor Standard: Develop and refine artistic techniques and work for presentation.
Enduring Understanding: To express their musical ideas, musicians analyze, evaluate, and refine their performance over time through openness to new ideas, persistence, and the application of appropriate criteria.
Essential Question: How do musicians improve the quality of their performance?
Grade Hs novice
MU:Pr5.1.E.Hs novice
a. Evaluate and refine draft compositions and improvisations based on knowledge, skill, and teacher-provided criteria.
Grade Hs intermediate
MU:Pr5.1.E.Hs intermediate
a. Evaluate and refine draft compositions and improvisations based on knowledge, skill, and collaboratively-developed criteria.
Grade Hs proficient
MU:Pr5.1.E.HSI
a. Evaluate and refine draft melodies, rhythmic passages, arrangements, and improvisations based on established criteria, including the extent to which they address identified purposes.
Grade Hs accomplished
MU:Pr5.1.E.HSII
a. Evaluate and refine draft arrangements, sections, short compositions, and improvisations based on personally-developed criteria, including the extent to which they address identified purposes.
Grade Hs advanced
MU:Pr5.1.E.HSIII
a. Evaluate and refine varied draft musical works based on appropriate criteria, including the extent to which they address identified purposes and contexts.

Music Traditional And Emerging Ensembles/Performing
#MU:Pr6.1.E
Process Component: MTE – Present - Perform expressively, with appropriate interpretation and technical accuracy, and in a manner appropriate to the audience and context.
Anchor Standard: Convey meaning through the presentation of artistic work.
Enduring Understanding: Musicians judge performance based on criteria that vary across time, place, and cultures. The context and how a work is presented influence the audience response.
Essential Question: When is a performance judged ready to present? How do context and the manner in which the musical work is presented influence audience response?
Grade Hs novice
MU:Pr6.1.E.Hs novice
a. Demonstrate attention to technical accuracy and expressive qualities in prepared and improvised performances of a varied repertoire of music.
b. Demonstrate an awareness of the context of the music through prepared and improvised performances.

**Grade Hs intermediate**

**MU:Pr6.1.E.Hs intermediate**
a. Demonstrate attention to technical accuracy and expressive qualities in prepared and improvised performances of a varied repertoire of music representing diverse cultures and styles.
b. Demonstrate an understanding of the context of the music through prepared and improvised performances.

**Grade Hs proficient**

**MU:Pr6.1.E.HSI**
a. Demonstrate attention to technical accuracy and expressive qualities in prepared and improvised performances of a varied repertoire of music representing diverse cultures, styles, and genres.
b. Demonstrate an understanding of expressive intent by connecting with an audience through prepared and improvised performances.

**Grade Hs accomplished**

**MU:Pr6.1.E.HSII**
a. Demonstrate mastery of the technical demands and an understanding of expressive qualities of the music in prepared and improvised performances of a varied repertoire representing diverse cultures, styles, genres, and historical periods.
b. Demonstrate an understanding of intent as a means for connecting with an audience through prepared and improvised performances.

**Grade Hs advanced**

**MU:Pr6.1.E.HSIII**
a. Demonstrate an understanding and mastery of the technical demands and expressive qualities of the music through prepared and improvised performances of a varied repertoire representing diverse cultures, styles, genres, and historical periods in multiple types of ensembles.
b. Demonstrate an ability to connect with audience members before and during the process of engaging with and responding to them through prepared and improvised performances.

### Music Traditional And Emerging Ensembles/Responding

**#MU:Re7.1.E**

**Process Component:** MTE – Select - Choose music appropriate for a specific purpose or context.

**Anchor Standard:** Perceive and analyze artistic work.

**Enduring Understanding:** Individuals’ selection of musical works is influenced by their interests, experiences, understandings, and purposes.

**Essential Question:** How do individuals choose music to experience?

**Grade Hs novice**

**MU:Re7.1.E.Hs novice**

Identify reasons for selecting music based on characteristics found in the music, connection to interest, and purpose or context.
Grade Hs intermediate
MU:Re7.1.E.Hs intermediate
Explain reasons for selecting music citing characteristics found in the music and connections to interest, purpose, and context.

Grade Hs proficient
MU:Re7.1.E.HSI
Apply criteria to select music for specified purposes, supporting choices by citing characteristics found in the music and connections to interest, purpose, and context.

Grade Hs accomplished
MU:Re7.1.E.HSII
Apply criteria to select music for a variety of purposes, justifying choices citing knowledge of the music and the specified purpose and context.

Grade Hs advanced
MU:Re7.1.E.HSIII
Use research and personally-developed criteria to justify choices made when selecting music, citing knowledge of the music, and individual and ensemble purpose and context.

Music Traditional And Emerging Ensembles/Responding
#MU:Re7.2.E
Process Component: MTE – Analyze - Analyze how the structure and context of varied musical works inform the response.

Anchor Standard: Perceive and analyze artistic work.

Enduring Understanding: Response to music is informed by analyzing context (social cultural, and historical) and how creators and performers manipulate the elements of music.

Essential Question: How does understanding the structure and context of the music influence a response?

Grade Hs novice
MU:Re7.2.E.Hs novice
Identify how knowledge of context and the use of repetition, similarities, and contrasts inform the response to music.

Grade Hs intermediate
MU:Re7.2.E.Hs intermediate
Describe how understanding context and the way the elements of music are manipulated inform the response to music.

Grade Hs proficient
MU:Re7.2.E.HSI
Explain how the analysis of passages and understanding the way the elements of music are manipulated inform the response to music.

Grade Hs accomplished
MU:Re7.2.E.HSII
Explain how the analysis of structures and contexts inform the response to music.

Grade Hs advanced
MU:Re7.2.E.HSIII
Demonstrate and justify how the analysis of structures, contexts, and performance decisions inform the response to music.
Music Traditional And Emerging Ensembles/Responding

#MU:Re8.1.E

**Process Component:** MTE – Interpret - Support an interpretation of musical works that reflect creators’/performers’ expressive intent.

**Anchor Standard:** Interpret intent and meaning in artistic work.

**Enduring Understanding:** Through their use of elements and structures of music, creators and performers provide clues to their expressive intent.

**Essential Question:** How do we discern the musical creators’ and performers’ expressive intent?

- **Grade Hs novice**
  - MU:Re8.1.E.Hs novice
    - Identify interpretations of the expressive intent and meaning of musical works, referring to the elements of music, contexts, and (when appropriate) the setting of the text.

- **Grade Hs intermediate**
  - MU:Re8.1.E.Hs intermediate
    - Identify and support interpretations of the expressive intent and meaning of musical works, citing as evidence the treatment of the elements of music, contexts, and (when appropriate) the setting of the text.

- **Grade Hs proficient**
  - MU:Re8.1.E.HSI
    - Explain and support interpretations of the expressive intent and meaning of musical works, citing as evidence the treatment of the elements of music, contexts, (when appropriate) the setting of the text, and personal research.

- **Grade Hs accomplished**
  - MU:Re8.1.E.HSII
    - Support interpretations of the expressive intent and meaning of musical works citing as evidence the treatment of the elements of music, contexts, (when appropriate) the setting of the text, and varied researched sources.

- **Grade Hs advanced**
  - MU:Re8.1.E.HSIII
    - Justify interpretations of the expressive intent and meaning of musical works by comparing and synthesizing varied researched sources, including reference to other art forms.

Music Traditional And Emerging Ensembles/Responding

#MU:Re9.1.E

**Process Component:** MTE – Evaluate - Support personal evaluation of musical works and performance(s) based on analysis, interpretation, and established criteria.

**Anchor Standard:** Apply criteria to evaluate artistic work.

**Enduring Understanding:** The personal evaluation of musical work(s) and performance(s) is informed by analysis, interpretation, and established criteria.

**Essential Question:** How do we judge the quality of musical work(s) and performance(s)?

- **Grade Hs novice**
  - MU:Re9.1.E.Hs novice
    - Identify and describe the effect of interest, experience, analysis, and context on the evaluation of music.

- **Grade Hs intermediate**
  - MU:Re9.1.E.Hs intermediate
Explain the influence of experiences, analysis, and context on interest in and evaluation of music.

**Grade Hs proficient**
**MU:Re9.1.E.HSI**
Evaluate works and performances based on personally- or collaboratively-developed criteria, including analysis of the structure and context.

**Grade Hs accomplished**
**MU:Re9.1.E.HSII**
Evaluate works and performances based on research as well as personally- and collaboratively-developed criteria, including analysis and interpretation of the structure and context.

**Grade Hs advanced**
**MU:Re9.1.E.HSIII**
Develop and justify evaluations of music, programs of music, and performances based on criteria, personal decision-making, research, and understanding of contexts.

**Music Traditional And Emerging Ensembles/Connecting**
**#MU:Cn10.0.E**
**Process Component:** MTC - Connect #10 - Synthesize and relate knowledge and personal experiences to make music.

**Anchor Standard:** Synthesize and relate knowledge and personal experiences to make art.

**Enduring Understanding:** Musicians connect their personal interests, experiences, ideas, and knowledge to creating, performing, and responding.

**Essential Question:** How do musicians make meaningful connections to creating, performing, and responding?

**Grade Hs proficient**
**MU:Cn10.0.E.HSI**
Demonstrate how interests, knowledge, and skills relate to personal choices and intent when creating, performing, and responding to music.

**Grade Hs accomplished**
**MU:Cn10.0.E.HSII**
Demonstrate how interests, knowledge, and skills relate to personal choices and intent when creating, performing, and responding to music.

**Grade Hs advanced**
**MU:Cn10.0.E.HSIII**
Demonstrate how interests, knowledge and skills relate to personal choices and intent when creating, performing, and responding to music.

**Music Traditional And Emerging Ensembles/Connecting**
**#MU:Cn11.0.E**
**Process Component:** MTE – Connect #11 - Relate musical ideas and works to varied contexts and daily life to deepen understanding.

**Anchor Standard:** Relate artistic ideas and works with societal, cultural and historical context to deepen understanding.

**Enduring Understanding:** Understanding connections to varied contexts and daily life enhances musicians’ creating, performing, and responding.
Essential Question: How do the other arts, other disciplines, contexts and daily life inform creating, performing, and responding to music?

Grade Hs novice
MU:Cn11.0.E.Hs novice
Demonstrate understanding of relationships between music and the other arts, other disciplines, varied contexts, and daily life.

Grade Hs intermediate
MU:Cn11.0.E.Hs intermediate
Demonstrate understanding of relationships between music and the other arts, other disciplines, varied contexts, and daily life.

Grade Hs proficient
MU:Cn11.0.E.HSI
Demonstrate understanding of relationships between music and the other arts, other disciplines, varied contexts, and daily life.

Grade Hs accomplished
MU:Cn11.0.E.HSII
Demonstrate understanding of relationships between music and the other arts, other disciplines, varied contexts, and daily life.

Grade Hs advanced
MU:Cn11.0.E.HSIII
Demonstrate understanding of relationships between music and the other arts, other disciplines, varied contexts, and daily life.
COMMUNICATION

Goal: Communicate effectively in multiple languages and utilize the target language to function in a variety of social/work related situations

Enduring Understanding: Communication and collaboration in more than one language is vital for success in an interconnected world.

Essential Question(s)?

- What is the purpose of language?
- What do humans do with language and to what end?
- How does an increasingly interconnected world impact language learning?

Standards and Objectives:

- **Interpersonal communication Standard COMM 1**: Interact with others in the target language and gain meaning from interactions in the target language.
  - **Objective COMM 1.1**: Interact and negotiate meaning (spoken, signed, written conversation) to share information, reactions, feelings, and opinions

- **Interpretive communication Standard COMM 2**: Discover meaning from what is heard, read or viewed on a variety of topics in the target language
  - **Objective COMM 2.1**: Understand, interpret, and analyze what is heard, read, or viewed on a variety of topics.

- **Presentational communication Standard COMM 3**: Utilize appropriate media to present an idea to an audience
  - **Objective COMM 3.1**: Present information, concepts, and ideas to inform, explain, persuade, and narrate on a variety of topics using appropriate media in the target language.
  - **Objective COMM 3.2**: Adapt presentation to various audiences of listeners, readers, or viewers.
CULTURES

Goal: Interact with cultural competence and understanding in an interconnected world.

Enduring Understanding: The study of culture is deeply intertwined with the study of other languages. Developing an understanding and awareness of other cultures’ perspectives is critical in the development of global competence.

Essential Question(s):

- How do a variety of cultures impact our daily lives?
- Why is cultural sensitivity an important part of gaining global competence?
- What is their perspective?
- How does their perspective influence what people do/create?

Standards and Objectives:

- Relating cultural practices to perspective Standard CLTR 1: Investigate, explain and reflect on the relationship between the practices and perspectives of the cultures studied in the target language.
  - Objective CLTR 1.1: Analyze the cultural practices/patterns of behavior accepted as the societal norm in the target culture.
  - Objective CLTR 1.2: Explain the relationship between cultural practices/behaviors and the perspectives that represent the target culture’s view of the world.
  - Objective CLTR 1.3: Function appropriately in diverse contexts within the target culture.
- Relating cultural products to perspective Standard CLTR 2: Investigate, explain and reflect on the relationship between the products and perspectives of the cultures studied in the target language.
  - Objective CLTR 2.1: Analyze the significance of a product (art, music, literature, etc...) in a target culture.
  - Objective CLTR 2.2: Describe the connections of products from the target culture with the practices and perspectives of the culture.
  - Objective CLTR 2.3: Justify the underlying beliefs or values of the target culture that resulted in the creation of the product.
**Goal:** Acquire information and diverse perspectives in order to use the target language to connect to other disciplines and to function in academic and career related situations.

**Enduring Understanding:** Interdisciplinary learning is a critical component in the educational experience of all students. Connecting multiple disciplines builds and reinforces the content. Enduring Understanding: Languages and cultures are multi-faceted, the diverse patterns and perspectives inherent to language systems/cultures express meaning in culturally appropriate ways.

**Essential Question(s):**

- What role does language learning play in the educational experience of students?
- How does connecting to other disciplines make students well-informed global citizens?
- How does extending student access to variety of information and diverse perspectives influence their ability to perform in academic and career related settings?

**Standards and Objectives:**

- **Making connections Standard CONN 1:** Build, reinforce, and expand knowledge of other disciplines while using the target language to develop critical thinking/creative problem solving skills.
  - **Objective CONN 1.1:** Compare and contrast information acquired from other content areas.
  - **Objective CONN 1.2:** Relate information studied in other subjects to the target language and culture.

- **Acquiring information and diverse perspectives Standard CONN 2:** Access and evaluate information and diverse perspectives that are available through the target language and its cultures.
  - **Objective CONN 2.1:** Access authentic materials prepared in the target language by or for native speakers.
  - **Objective CONN 2.2:** Analyze the content and cultural perspectives of authentic materials prepared in the target language by or for native speakers.
  - **Objective CONN 2.3:** Compare and contrast cultural similarities and differences in authentic materials.
Comparisons

Goal: Develop insight and understanding of target culture and language in order to interact with cultural competence.

Enduring Understanding: Languages and cultures are multi-faceted, the diverse patterns and perspectives inherent to language systems/cultures express meaning in culturally appropriate ways.

Essential Question(s):
- How does the target language differ from the learner’s first language?
- How do the target culture’s perspectives compare to the learner’s perspective?

Standards and Objectives:

- Cultural Comparisons Standard COMP 2: Investigate, explain, and reflect on the concept of culture through the comparisons of the cultures studied and their own.
  - Objective COMP 1.1: Observe formal and informal forms of language.
  - Objective COMP 1.2: Identify patterns and explain discrepancies the sounds and the writing system in the target language.
  - Objective COMP 1.3: Compare and analyze idiomatic expressions in the target language.
- Cultural Comparisons Standard COMP 2: Investigate, explain, and reflect on the concept of culture through the comparisons of the cultures studied and their own.
  - Objective COMP 2.1: Identify, describe and compare/contrast products and their use in the target culture with the learner’s culture.
  - Objective COMP 2.2: Compare and contrast appropriate gestures and oral expressions in the target culture with the learner’s culture.
  - Objective COMP 2.3: Compare and contrast authentic materials from the target culture with the learner’s culture.
COMMUNITIES

Goal: Communicate and interact with cultural competence in multilingual communities at home and around the world.

Enduring Understanding: The increasing interconnectedness of the world’s economy requires that United States citizens continue to become proficient in other languages and adept at understanding and communicating appropriately in cultural contexts.

Essential Question(s):

- How are language proficiency and cultural competence developed?
- How do continued opportunities to learn and use language increase language proficiency over a period of time?
- What personal benefits are there to becoming a lifelong language learner?

Standards and Objectives:

- School and Global Communities Standard COMT 1: Interact and collaborate in communities and the globalized world both within and beyond the classroom.
  o Objective COMT 1.1: Participate in multilingual communities at home and around the world.
  o Objective COMT 1.2: Discuss personal preferences in activities and events both within and beyond the classroom.
  o Objective COMT 1.3: Utilize knowledge of the target language to tutor English language learners that know the target language.
- Lifelong learning Standard COMT 2: Reflect on progress using languages for enjoyment, enrichment, and advancement.
  o Objective COMT 2.1: Interpret materials and/or use media from the language and culture for enjoyment.
  o Objective COMT 2.2: Explore opportunities to use the target language for personal enrichment/professional advancement/communication skills.
Theatre/Creating
#TH:Cr1.1

**Process Component:** Envision, Conceptualize

**Anchor Standard:** Generate and conceptualize artistic ideas and work.

**Enduring Understanding:** Theatre artists rely on intuition, curiosity, and critical inquiry.

**Essential Question:** What happens when theatre artists use their imaginations and/or learned theatre skills while engaging in creative exploration and inquiry?

**Grade K**

TH:Cr1.1.K

a. With prompting and support, invent and inhabit an imaginary elsewhere in dramatic play or a guided drama experience (e.g., process drama, story drama, creative drama).

b. With prompting and support, use non-representational materials to create props, puppets, and costume pieces for dramatic play or a guided drama experience (e.g., process drama, story drama, creative drama).

**Grade 1**

TH:Cr1.1.1

a. Propose potential choices characters could make in a guided drama experience (e.g., process drama, story drama, creative drama).

b. Collaborate with peers to conceptualize costumes and props in a guided drama experience (e.g., process drama, story drama, creative drama).

c. Identify ways in which gestures and movement may be used to create or retell a story in guided drama experiences (e.g., process drama, story drama, creative drama).

**Grade 2**

TH:Cr1.1.2

a. Propose potential new details to plot and story in a guided drama experience (e.g., process drama, story drama, creative drama).

b. Collaborate with peers to conceptualize scenery in a guided drama experience (e.g., process drama, story drama, creative drama).

c. Identify ways in which voice and sounds may be used to create or retell a story in guided drama experiences (e.g., process drama, story drama, creative drama).

**Grade 3**

TH:Cr1.1.3

a. Create roles, imagined worlds, and improvised stories in a drama/theatre work.

b. Imagine and articulate ideas for costumes, props and sets for the environment and characters in a drama/theatre work.

c. Collaborate to determine how characters might move and speak to support the story and given circumstances in drama/theatre work.
#TH:Cr2.1
**Process Component:** Develop
**Anchor Standard:** Organize and develop artistic ideas and work.
**Enduring Understanding:** Theatre artists work to discover different ways of communicating meaning
**Essential Question:** How, when, and why do theatre artists' choices change?

**Grade K**
**TH:Cr2.1.K**

a. With prompting and support, interact with peers and contribute to dramatic play or a guided drama experience (e.g., process drama, story drama, creative drama).

b. With prompting and support, express original ideas in dramatic play or a guided drama experience (e.g., creative drama, process drama, story drama).

**Grade 1**
**TH:Cr2.1.1**

a. Contribute to the development of a sequential plot in a guided drama experience (e.g., process drama, story drama, creative drama).

b. With prompting and support, participate in group decision making in a guided drama experience (e.g., process drama, story drama, creative drama).

**Grade 2**
**TH:Cr2.1.2**

a. Collaborate with peers to devise meaningful dialogue in a guided drama experience (e.g., process drama, story drama, creative drama).

b. Contribute ideas and make decisions as a group to advance a story in a guided drama experience (e.g., process drama, story drama, creative drama).

**Grade 3**
**TH:Cr2.1.3**

a. Participate in methods of investigation to devise original ideas for a drama/theatre work.

b. Compare ideas with peers and make selections that will enhance and deepen group drama/theatre work.

---

#TH:Cr3.1
**Process Component:** Rehearse
**Anchor Standard:** Refine new work through play, drama processes and theatre experiences using critical analysis and experimentation.
**Enduring Understanding:** Theatre artists refine their work and practice their craft through rehearsal.
**Essential Question:** How do theatre artists transform and edit their initial ideas?

**Grade K**
**TH:Cr3.1.K**

a. With prompting and support, ask and answer questions in dramatic play or a guided drama experience (e.g., process drama, story drama, creative drama).

---
a. Contribute to the adaptation of the plot in a guided drama experience (e.g., process drama, story drama, creative drama).

b. Identify similarities and differences in sounds and movements in a guided drama experience (e.g., process drama, story drama, creative drama).

c. Collaborate to imagine multiple representations of a single object in a guided drama experience (e.g., process drama, story drama, creative drama).

Grade 2
TH:Cr3.1.2
a. Contribute to the adaptation of dialogue in a guided drama experience (e.g., process drama, story drama, creative drama).

b. Use and adapt sounds and movements in a guided drama experience (e.g., process drama, story drama, creative drama).

c. Generate independently multiple representations of a single object in a guided drama experience (e.g., process drama, story drama, creative drama).

Grade 3
TH:Cr3.1.3
a. Collaborate with peers to revise, refine, and adapt ideas to fit the given parameters of a drama theatre work.

b. Participate and contribute to physical and vocal exploration in an improvised or scripted drama/theatre work.

c. Practice and refine design and technical choices to support a devised or scripted drama/theatre work.

Theatre/Performing
#TH:Pr4.1
Process Component: Select
Anchor Standard: Select, analyze, and interpret artistic work for presentation.
Enduring Understanding: Theatre artists make strong choices to effectively convey meaning.
Essential Question: Why are strong choices essential to interpreting a drama or theatre piece?

Grade K
TH:Pr4.1.K
a. With prompting and support, identify characters and setting in dramatic play or a guided drama experience (e.g., process drama, story drama, creative drama).

Grade 1
TH:Pr4.1.1
a. Describe a story’s character actions and dialogue in a guided drama experience (e.g., process drama, story drama, creative drama).

b. Use body, face, gestures, and voice to communicate character traits and emotions in a guided drama experience (e.g., process drama, story drama, creative drama).
Grade 2
TH:Pr4.1.2
a. Interpret story elements in a guided drama experience (e.g., process drama, story drama, creative drama).

b. Alter voice and body to expand and articulate nuances of a character in a guided drama experience (e.g., process drama, story drama, creative drama).

Grade 3
TH:Pr4.1.3
a. Apply the elements of dramatic structure to a story and create a drama/theatre work.

b. Investigate how movement and voice are incorporated into drama/theatre work.

Theatre/Performing
#TH:Pr5.1
Process Component: Prepare
Anchor Standard: Develop and refine artistic techniques and work for presentation.
Enduring Understanding: Theatre artists develop personal processes and skills for a performance or design.
Essential Question: What can I do to fully prepare a performance or technical design?

Theatre/Performing
#TH:Pr6.1
Process Component: Share, Present
Anchor Standard: Convey meaning through the presentation of artistic work.
Enduring Understanding: Theatre artists share and present stories, ideas, and envisioned worlds to explore the human experience.
Essential Question: What happens when theatre artists and audiences share a creative experience?

Grade K
TH:Pr6.1.K
a. With prompting and support, use voice and sound in dramatic play or a guided drama experience (e.g., process drama, story drama, creative drama).

Grade 1
TH:Pr6.1.1
a. With prompting and support, use movement and gestures to communicate emotions in a guided drama experience (e.g., process drama, story drama, creative drama).

Grade 2
TH:Pr6.1.2
a. Contribute to group guided drama experiences (e.g., process drama, story drama, creative drama) and informally share with peers.

Grade 3
TH:Pr6.1.3
a. Practice drama/theatre work and share reflections individually and in small groups.

Theatre/Responding
#TH:Re7.1
Process Component: Reflect
Anchor Standard: Perceive and analyze artistic work.

Enduring Understanding: Theatre artists reflect to understand the impact of drama processes and theatre experiences.

Essential Question: How do theatre artists comprehend the essence of drama processes and theatre experiences?

Grade K
TH:Re7.1.K
a. With prompting and support, express an emotional response to characters in dramatic play or a guided drama experience (e.g., process drama, story drama, creative drama).

Grade 1
TH:Re7.1.1
a. Recall choices made in a guided drama experience (e.g., process drama, story drama, creative drama).

Grade 2
TH:Re7.1.2
a. Recognize when artistic choices are made in a guided drama experience (e.g., process drama, story drama, creative drama).

Grade 3
TH:Re7.1.3
a. Understand why artistic choices are made in a drama/theatre work.

Theatre/Responding
#TH:Re8.1

Process Component: Interpret

Anchor Standard: Interpret intent and meaning in artistic work.

Enduring Understanding: Theatre artists' interpretations of drama/theatre work are influenced by personal experiences and aesthetics.

Essential Question: How can the same work of art communicate different messages to different people?

Grade K
TH:Re8.1.K
a. With prompting and support, identify preferences in dramatic play, a guided drama experience (e.g., process drama, story drama, creative drama), or age-appropriate theatre performance.

b. With prompting and support, name and describe settings in dramatic play or a guided drama experience (e.g., process drama, story drama, creative drama).

Grade 1
TH:Re8.1.1
a. Explain preferences and emotions in a guided drama experience (e.g., process drama, story drama, creative drama), or age-appropriate theatre performance.

b. Identify causes of character actions in a guided drama experience (e.g., process drama, story drama, creative drama).

c. Explain or use text and pictures to describe how personal emotions and choices compare to
the emotions and choices of characters in a guided drama experience (e.g., process drama, story drama, creative drama).

Grade 2
TH:Re8.1.2
a. Explain how personal preferences and emotions affect an observer’s response in a guided drama experience (e.g., process drama, story drama, creative drama), or age-appropriate theatre performance.

b. Identify causes and consequences of character actions in a guided drama experience (e.g., process drama, story drama, or creative drama).

c. Explain or use text and pictures to describe how others’ emotions and choices may compare to the emotions and choices of characters in a guided drama experience (e.g., process drama, story drama, creative drama).

Grade 3
TH:Re8.1.3
a. Consider multiple personal experiences when participating in or observing a drama/theatre work.

b. Consider multiple ways to develop a character using physical characteristics and prop or costume design choices that reflect cultural perspectives in drama/theatre work.

c. Examine how connections are made between oneself and a character’s emotions in drama/theatre work.

Theatre/Responding
#TH:Re9.1
Process Component: Evaluate
Anchor Standard: Apply criteria to evaluate artistic work.
Enduring Understanding: Theatre artists apply criteria to investigate, explore, and assess drama and theatre work.
Essential Question: How are the theatre artist’s processes and the audience's perspectives impacted by analysis and synthesis?

Grade K
TH:Re9.1.K
a. With prompting and support, actively engage with others in dramatic play or a guided drama experience (e.g., process drama, story drama, creative drama).

Grade 1
TH:Re9.1.1
a. Build on others’ ideas in a guided drama experience (e.g., process drama, story drama, creative drama).

b. Identify props and costumes that might be used in a guided drama experience (e.g., process drama, story drama, creative drama).
c. Compare and contrast the experiences of characters in a guided drama experience (e.g., process drama, story drama, creative drama).

Grade 2

TH:Re9.1.2
a. Collaborate on a scene in a guided drama experience (e.g., process drama, story drama, creative drama).

b. Use a prop or costume in a guided drama experience (e.g., process drama, story drama, creative drama) to describe characters, settings, or events.

c. Describe how characters respond to challenges in a guided drama experience (e.g., process drama, story drama, creative drama).

Grade 3

TH:Re9.1.3
a. Understand how and why groups evaluate drama/theatre work.

b. Consider and analyze technical elements from multiple drama/theatre works.

c. Evaluate and analyze problems and situations in a drama/theatre work from an audience perspective.

Theatre/Connecting

#TH:Cn10.1

Process Component: Empathize

Anchor Standard: Synthesize and relate knowledge and personal experiences to make art.

Enduring Understanding: Theatre artists allow awareness of interrelationships between self and others to influence and inform their work.

Essential Question: What happens when theatre artists foster understanding between self and others through critical awareness, social responsibility, and the exploration of empathy?

Grade K

TH:Cn10.1.K
a. With prompting and support, identify similarities between characters and oneself in dramatic play or a guided drama experience (e.g., process drama, story drama, creative drama).

Grade 1

TH:Cn10.1.1
a. Identify character emotions in a guided drama experience (e.g., process drama, story drama, creative drama) and relate it to personal experience.

Grade 2

TH:Cn10.1.2
a. Relate character experiences to personal experiences in a guided drama experience (e.g., process drama, story drama, creative drama).

Grade 3

TH:Cn10.1.3
a. Use personal experiences and knowledge to make connections to community and culture in a drama/theatre work.
Theatre/Connecting
#TH:Cn11.1
Process Component: Interrelate
Anchor Standard: Relate artistic ideas and works with societal, cultural, and historical context to deepen understanding.
Enduring Understanding: Theatre artists understand and can communicate their creative process as they analyze the way the world may be understood.
Essential Question: What happens when theatre artists allow an understanding of themselves and the world to inform perceptions about theatre and the purpose of their work?

Grade K
TH:Cn11.1.K
a. With prompting and support, identify skills and knowledge from other areas in dramatic play or a guided drama experience (e.g., process drama, story drama, creative drama).

Grade 1
TH:Cn11.1.1
a. Apply skills and knowledge from different art forms and content areas in a guided drama experience (e.g., process drama, story drama, creative drama).

Grade 2
TH:Cn11.1.2
a. Determine appropriate skills and knowledge from different art forms and content areas to apply in a guided drama experience (e.g., process drama, story drama, creative drama).

Grade 3
TH:Cn11.1.3
a. Identify connections to community, social issues and other content areas in drama/theatre work.

Theatre/Connecting
#TH:Cn11.2
Process Component: Research
Anchor Standard: Relate artistic ideas and works with societal, cultural, and historical context to deepen understanding.
Enduring Understanding: Theatre artists critically inquire into the ways others have thought about and created drama processes and productions to inform their own work.
Essential Question: In what ways can research into theatre histories, theories, literature, and performances alter the way a drama process or production is understood?

Grade K
TH:Cn11.2.K
a. With prompting and support, identify stories that are different from one another in dramatic play or a guided drama experience (e.g., process drama, story drama, creative drama).

b. With prompting and support, tell a short story in dramatic play or a guided drama experience (e.g., process drama, story drama, creative drama).

Grade 1
TH:Cn11.2.1
a. Identify similarities and differences in stories from one’s own community in a guided drama experience (e.g., process drama, story drama, creative drama).
b. Collaborate on the creation of a short scene based on a fictional literary source in a guided drama experience (e.g., process drama, story drama, creative drama).

Grade 2
TH:Cn11.2.2
a. Identify similarities and differences in stories from multiple cultures in a guided drama experience (e.g., process drama, story drama, creative drama).

b. Collaborate on the creation of a short scene based on a non-fiction literary source in a guided drama experience (e.g., process drama, story drama, creative drama).

Grade 3
TH:Cn11.2.3
a. Explore how stories are adapted from literature to drama/theatre work.

b. Examine how artists have historically presented the same stories using different art forms, genres, or drama/theatre conventions.
Theatre/Creating
#TH:Cr1.1

**Process Component:** Envision, Conceptualize

**Anchor Standard:** Generate and conceptualize artistic ideas and work.

**Enduring Understanding:** Theatre artists rely on intuition, curiosity, and critical inquiry.

**Essential Question:** What happens when theatre artists use their imaginations and/or learned theatre skills while engaging in creative exploration and inquiry?

**Grade 4**

**TH:Cr1.1.4**

a. Articulate the visual details of imagined worlds, and improvised stories that support the given circumstances in a drama/theatre work.

b. Visualize and design technical elements that support the story and given circumstances in a drama/theatre work.

c. Imagine how a character might move to support the story and given circumstances in a drama/theatre work.

**Grade 5**

**TH:Cr1.1.5**

a. Identify physical qualities that might reveal a character’s inner traits in the imagined world of a drama/theatre work.

b. Propose design ideas that support the story and given circumstances in a drama/theatre work.

c. Imagine how a character’s inner thoughts impact the story and given circumstances in a drama/theatre work.

---

Theatre/Creating
#TH:Cr2.1

**Process Component:** Develop

**Anchor Standard:** Organize and develop artistic ideas and work.

**Enduring Understanding:** Theatre artists work to discover different ways of communicating meaning

**Essential Question:** How, when, and why do theatre artists' choices change?

**Grade 4**

**TH:Cr2.1.4**

a. Collaborate to devise original ideas for a drama/theatre work by asking questions about characters and plots.

b. Make and discuss group decisions and identify responsibilities required to present a drama/theatre work to peers.

**Grade 5**

**TH:Cr2.1.5**

a. Devise original ideas for a drama/theatre work that reflect collective inquiry about characters and their given circumstances.
b. Participate in defined responsibilities required to present a drama/theatre work informally to an audience.

Theatre/Creating
#TH:Cr3.1

Process Component: Rehearse
Anchor Standard: Refine new work through play, drama processes and theatre experiences using critical analysis and experimentation.

Enduring Understanding: Theatre artists refine their work and practice their craft through rehearsal.

Essential Question: How do theatre artists transform and edit their initial ideas?

Grade 4
TH:Cr3.1.4
a. Revise and improve an improvised or scripted drama/theatre work through repetition and collaborative review.

b. Develop physical and vocal exercise techniques for an improvised or scripted drama/theatre work.

c. Collaborate on solutions to design and technical problems that arise in rehearsal for a drama/theatre work.

Grade 5
TH:Cr3.1.5
a. Revise and improve an improvised or scripted drama/theatre work through repetition and self-review.

b. Use physical and vocal exploration for character development in an improvised or scripted drama/theatre work.

c. Create innovative solutions to design and technical problems that arise in rehearsal for a drama/theatre work.

Theatre/Performing
#TH:Pr4.1

Process Component: Select
Anchor Standard: Select, analyze, and interpret artistic work for presentation.

Enduring Understanding: Theatre artists make strong choices to effectively convey meaning.

Essential Question: Why are strong choices essential to interpreting a drama or theatre piece?

Grade 4
TH:Pr4.1.4
a. Modify the dialogue and action to change the story in a drama/theatre work.

b. Make physical choices to develop a character in a drama/theatre work.

Grade 5
TH:Pr4.1.5
a. Describe the underlying thoughts and emotions that create dialogue and action in a drama/theatre work.
b. Use physical choices to create meaning in a drama/theatre work.

Theatre/Performing
#TH:Pr5.1
Process Component: Prepare
Anchor Standard: Develop and refine artistic techniques and work for presentation.
Enduring Understanding: Theatre artists develop personal processes and skills for a performance or design.
Essential Question: What can I do to fully prepare a performance or technical design?
Grade 4
TH:Pr5.1.4
a. Practice selected exercises that can be used in a group setting for drama/theatre work.
b. Propose the use of technical elements in a drama/theatre work.
Grade 5
TH:Pr5.1.5
a. Choose acting exercises that can be applied to a drama/theatre work.
b. Demonstrate the use of technical elements in a drama/theatre work.

Theatre/Performing
#TH:Pr6.1
Process Component: Share, Present
Anchor Standard: Convey meaning through the presentation of artistic work.
Enduring Understanding: Theatre artists share and present stories, ideas, and envisioned worlds to explore the human experience.
Essential Question: What happens when theatre artists and audiences share a creative experience?
Grade 4
TH:Pr6.1.4
a. Share small-group drama/theatre work, with peers as audience.
Grade 5
TH:Pr6.1.5
a. Present drama/theatre work informally to an audience.

Theatre/Responding
#TH:Re7.1
Process Component: Reflect
Anchor Standard: Perceive and analyze artistic work.
Enduring Understanding: Theatre artists reflect to understand the impact of drama processes and theatre experiences.
Essential Question: How do theatre artists comprehend the essence of drama processes and theatre experiences?
Grade 4
TH:Re7.1.4
a. Identify artistic choices made in a drama/theatre work through participation and observation.
Grade 5
TH:Re7.1.5
a. Explain personal reactions to artistic choices made in a drama/theatre work through participation and observation.

Theatre/Responding
#TH:Re8.1
Process Component: Interpret
Anchor Standard: Interpret intent and meaning in artistic work.
Enduring Understanding: Theatre artists' interpretations of drama/theatre work are influenced by personal experiences and aesthetics.
Essential Question: How can the same work of art communicate different messages to different people?

Grade 4
TH:Re8.1.4
a. Compare and contrast multiple personal experiences when participating in or observing a drama/theatre work.

b. Compare and contrast the qualities of characters in a drama/theatre work through physical characteristics and prop or costume design choices that reflect cultural perspectives.

c. Identify and discuss physiological changes connected to emotions in drama/theatre work.

Grade 5
TH:Re8.1.5
a. Justify responses based on personal experiences when participating in or observing a drama/theatre work.

b. Explain responses to characters based on cultural perspectives when participating in or observing drama/theatre work.

c. Investigate the effects of emotions on posture, gesture, breathing, and vocal intonation in a drama/theatre work.

Theatre/Responding
#TH:Re9.1
Process Component: Evaluate
Anchor Standard: Apply criteria to evaluate artistic work.
Enduring Understanding: Theatre artists apply criteria to investigate, explore, and assess drama and theatre work.
Essential Question: How are the theatre artist's processes and the audience's perspectives impacted by analysis and synthesis?

Grade 4
TH:Re9.1.4
a. Propose a plan to evaluate drama/theatre work.

b. Investigate how technical elements may support a theme or idea in a drama/theatre work.
c. Observe how a character’s choices impact an audience’s perspective in a drama/theatre work.

Grade 5
TH:Re9.1.5
a. Develop and implement a plan to evaluate drama/theatre work.

b. Assess how technical elements represent the theme of a drama/theatre work.

c. Recognize how a character’s circumstances impact an audience’s perspective in a drama/theatre work.

Theatre/Connecting
#TH:Cn10.1
Process Component: Empathize
Anchor Standard: Synthesize and relate knowledge and personal experiences to make art.
Enduring Understanding: Theatre artists allow awareness of interrelationships between self and others to influence and inform their work.
Essential Question: What happens when theatre artists foster understanding between self and others through critical awareness, social responsibility, and the exploration of empathy?

Grade 4
TH:Cn10.1.4
a. Identify the ways drama/theatre work reflects the perspectives of a community or culture.

Grade 5
TH:Cn10.1.5
a. Explain how drama/theatre connects oneself to a community or culture.

Theatre/Connecting
#TH:Cn11.1
Process Component: Interrelate
Anchor Standard: Relate artistic ideas and works with societal, cultural, and historical context to deepen understanding.
Enduring Understanding: Theatre artists understand and can communicate their creative process as they analyze the way the world may be understood.
Essential Question: What happens when theatre artists allow an understanding of themselves and the world to inform perceptions about theatre and the purpose of their work?

Grade 4
TH:Cn11.1.4
a. Respond to community and social issues and incorporate other content areas in drama/theatre work.

Grade 5
TH:Cn11.1.5
a. Investigate historical, global and social issues expressed in drama/theatre work.

Theatre/Connecting
#TH:Cn11.2
Process Component: Research
Anchor Standard: Relate artistic ideas and works with societal, cultural, and historical context to deepen understanding.

Enduring Understanding: Theatre artists critically inquire into the ways others have thought about and created drama processes and productions to inform their own work.

Essential Question: In what ways can research into theatre histories, theories, literature, and performances alter the way a drama process or production is understood?

Grade 4
TH:Cn11.2.4
a. Investigate cross-cultural approaches to storytelling in drama/theatre work.

b. Compare the drama/theatre conventions of a given time period with those of the present.

Grade 5
TH:Cn11.2.5
a. Analyze commonalities and differences between stories set in different cultures in preparation for a drama/theatre work.

b. Identify historical sources that explain drama/theatre terminology and conventions.
Theatre/Creating
#TH:Cr1.1

Process Component: Envision, Conceptualize
Anchor Standard: Generate and conceptualize artistic ideas and work.
Enduring Understanding: Theatre artists rely on intuition, curiosity, and critical inquiry.
Essential Question: What happens when theatre artists use their imaginations and/or learned theatre skills while engaging in creative exploration and inquiry?

Grade 6
TH:Cr1.1.6
a. Identify possible solutions to staging challenges in a drama/theatre work.

b. Identify solutions to design challenges in a drama/theatre work.

c. Explore a scripted or improvised character by imagining the given circumstances in a drama/theatre work.

Grade 7
TH:Cr1.1.7
a. Investigate multiple perspectives and solutions to staging challenges in a drama/theatre work.

b. Explain and present solutions to design challenges in a drama/theatre work.

c. Envision and describe a scripted or improvised character’s inner thoughts and objectives in a drama/theatre work.

Grade 8
TH:Cr1.1.8
a. Imagine and explore multiple perspectives and solutions to staging problems in a drama/theatre work.

b. Imagine and explore solutions to design challenges of a performance space in a drama/theatre work.

c. Develop a scripted or improvised character by articulating the character’s inner thoughts, objectives, and motivations in a drama/theatre work.

Theatre/Creating
#TH:Cr2.1

Process Component: Develop
Anchor Standard: Organize and develop artistic ideas and work.
Enduring Understanding: Theatre artists work to discover different ways of communicating meaning
Essential Question: How, when, and why do theatre artists' choices change?

Grade 6
TH:Cr2.1.6
a. Use critical analysis to improve, refine, and evolve original ideas and artistic choices in a devised or scripted drama/theatre work.

b. Contribute ideas and accept and incorporate the ideas of others in preparing or devising drama/theatre work.
Grade 7
TH:Cr2.1.7
a. Examine and justify original ideas and artistic choices in a drama/theatre work based on critical analysis, background knowledge, and historical and cultural context.

b. Demonstrate mutual respect for self and others and their roles in preparing or devising drama/theatre work.

Grade 8
TH:Cr2.1.8
a. Articulate and apply critical analysis, background knowledge, research, and historical and cultural context to the development of original ideas for a drama/theatre work.

b. Share leadership and responsibilities to develop collaborative goals when preparing or devising drama/theatre work.

Theatre/Creating
#TH:Cr3.1

Process Component: Rehearse

Anchor Standard: Refine new work through play, drama processes and theatre experiences using critical analysis and experimentation.

Enduring Understanding: Theatre artists refine their work and practice their craft through rehearsal.

Essential Question: How do theatre artists transform and edit their initial ideas?

Grade 6
TH:Cr3.1.6
a. Articulate and examine choices to refine a devised or scripted drama/theatre work.

b. Identify effective physical and vocal traits of characters in an improvised or scripted drama/theatre work.

c. Explore a planned technical design during the rehearsal process for a devised or scripted drama/theatre work.

Grade 7
TH:Cr3.1.7
a. Demonstrate focus and concentration in the rehearsal process to analyze and refine choices in a devised or scripted drama/theatre work.

b. Develop effective physical and vocal traits of characters in an improvised or scripted drama/theatre work.

c. Consider multiple planned technical design elements during the rehearsal process for a devised or scripted drama/theatre work.

Grade 8
TH:Cr3.1.8
a. Use repetition and analysis in order to revise devised or scripted drama/theatre work.

b. Refine effective physical, vocal, and physiological traits of characters in an improvised or scripted drama/ theatre work.
c. Implement and refine a planned technical design using simple technology during the rehearsal process for devised or scripted drama/theatre work.

Theatre/Performing
#TH:Pr4.1
Process Component: Select
Anchor Standard: Select, analyze, and interpret artistic work for presentation.
Enduring Understanding: Theatre artists make strong choices to effectively convey meaning.
Essential Question: Why are strong choices essential to interpreting a drama or theatre piece?

Grade 6
TH:Pr4.1.6
a. Identify the essential events in a story or script that make up the dramatic structure in a drama/theatre work.

b. Experiment with various physical choices to communicate character in a drama/theatre work.

Grade 7
TH:Pr4.1.7
a. Consider various staging choices to enhance the story in a drama/theatre work.

b. Use various character objectives in a drama/theatre work.

Grade 8
TH:Pr4.1.8
a. Explore different pacing to better communicate the story in a drama/theatre work.

b. Use various character objectives and tactics in a drama/theatre work to overcome an obstacle.

Theatre/Performing
#TH:Pr5.1
Process Component: Prepare
Anchor Standard: Develop and refine artistic techniques and work for presentation.
Enduring Understanding: Theatre artists develop personal processes and skills for a performance or design.
Essential Question: What can I do to fully prepare a performance or technical design?

Grade 6
TH:Pr5.1.6
a. Recognize how acting exercises and techniques can be applied to a drama/theatre work.

b. Articulate how technical elements are integrated into a drama/theatre work.

Grade 7
TH:Pr5.1.7
a. Participate in a variety of acting exercises and techniques that can be applied in a rehearsal or drama/theatre performance.

b. Choose a variety of technical elements that can be applied to a design in a drama/theatre work.

Grade 8
TH:Pr5.1.8
a. Use a variety of acting techniques to increase skills in a rehearsal or drama/theatre performance.

b. Use a variety of technical elements to create a design for a rehearsal or drama/theatre production.

Theatre/Performing
#TH:Pr6.1
Process Component: Share, Present
Anchor Standard: Convey meaning through the presentation of artistic work.
Enduring Understanding: Theatre artists share and present stories, ideas, and envisioned worlds to explore the human experience.
Essential Question: What happens when theatre artists and audiences share a creative experience?
Grade 6
TH:Pr6.1.6
a. Adapt a drama/theatre work and present it informally for an audience.

Grade 7
TH:Pr6.1.7
a. Participate in rehearsals for a drama/theatre work that will be shared with an audience.

Grade 8
TH:Pr6.1.8
a. Perform a rehearsed drama/theatre work for an audience.

Theatre/Responding
#TH:Re7.1
Process Component: Reflect
Anchor Standard: Perceive and analyze artistic work.
Enduring Understanding: Theatre artists reflect to understand the impact of drama processes and theatre experiences.
Essential Question: How do theatre artists comprehend the essence of drama processes and theatre experiences?
Grade 6
TH:Re7.1.6
a. Describe and record personal reactions to artistic choices in a drama/theatre work.

Grade 7
TH:Re7.1.7
a. Compare recorded personal and peer reactions to artistic choices in a drama/theatre work.

Grade 8
TH:Re7.1.8
a. Apply criteria to the evaluation of artistic choices in a drama/theatre work.

Theatre/Responding
#TH:Re8.1
Process Component: Interpret
Anchor Standard: Interpret intent and meaning in artistic work.
Enduring Understanding: Theatre artists' interpretations of drama/theatre work are influenced by personal experiences and aesthetics.
Essential Question: How can the same work of art communicate different messages to different people?
Grade 6
TH:Re8.1.6
a. Explain how artists make choices based on personal experience in a drama/theatre work.

b. Identify cultural perspectives that may influence the evaluation of a drama/theatre work.

c. Identify personal aesthetics, preferences, and beliefs through participation in or observation of drama/theatre work.

Grade 7
TH:Re8.1.7
a. Identify the artistic choices made based on personal experience in a drama/theatre work.

b. Describe how cultural perspectives can influence the evaluation of drama/theatre work.

c. Interpret how the use of personal aesthetics, preferences, and beliefs can be used to discuss drama/theatre work.

Grade 8
TH:Re8.1.8
a. Recognize and share artistic choices when participating in or observing a drama/theatre work.

b. Analyze how cultural perspectives influence the evaluation of a drama/theatre work.

c. Apply personal aesthetics, preferences, and beliefs to evaluate a drama/theatre work.

Theatre/Responding
#TH:Re9.1
Process Component: Evaluate
Anchor Standard: Apply criteria to evaluate artistic work.
Enduring Understanding: Theatre artists apply criteria to investigate, explore, and assess drama and theatre work.
Essential Question: How are the theatre artist's processes and the audience's perspectives impacted by analysis and synthesis?

Grade 6
TH:Re9.1.6
a. Use supporting evidence and criteria to evaluate

b. Apply the production elements used in a drama/theatre work to assess aesthetic choices.

c. Identify a specific audience or purpose for a drama/theatre work.

Grade 7
TH:Re9.1.7
a. Explain preferences, using supporting evidence and criteria to evaluate drama/theatre work.

b. Consider the aesthetics of the production elements in a drama/theatre work.

c. Identify how the intended purpose of a drama/theatre work appeals to a specific audience.

Grade 8
TH:Re9.1.8
a. Respond to a drama/theatre work using supporting evidence, personal aesthetics, and artistic criteria.

b. Apply the production elements used in a drama/theatre work to assess aesthetic choices.

c. Assess the impact of a drama/theatre work on a specific audience.

Theatre/Connecting
#TH:Cn10.1
Process Component: Empathize
Anchor Standard: Synthesize and relate knowledge and personal experiences to make art.
Enduring Understanding: Theatre artists allow awareness of interrelationships between self and others to influence and inform their work.
Essential Question: What happens when theatre artists foster understanding between self and others through critical awareness, social responsibility, and the exploration of empathy?

Grade 6
TH:Cn10.1.6
a. Explain how the actions and motivations of characters in a drama/theatre work impact perspectives of a community or culture.

Grade 7
TH:Cn10.1.7
a. Incorporate multiple perspectives and diverse community ideas in a drama/theatre work.

Grade 8
TH:Cn10.1.8
a. Examine a community issue through multiple perspectives in a drama/theatre work.

Theatre/Connecting
#TH:Cn11.1
Process Component: Interrelate
Anchor Standard: Relate artistic ideas and works with societal, cultural, and historical context to deepen understanding.
Enduring Understanding: Theatre artists understand and can communicate their creative process as they analyze the way the world may be understood.
Essential Question: What happens when theatre artists allow an understanding of themselves and the world to inform perceptions about theatre and the purpose of their work?

Grade 6
TH:Cn11.1.6
a. Identify universal themes or common social issues and express them through a drama/theatre work.

Grade 7
TH:Cn11.1.7
a. Incorporate music, dance, art, and/or media to strengthen the meaning and conflict in a drama/theatre work with a particular cultural, global, or historic context.

Grade 8
TH:Cn11.1.8
a. Use different forms of drama/theatre work to examine contemporary social, cultural, or global issues.
Theatre/Connecting
#TH:Cn11.2

**Process Component:** Research

**Anchor Standard:** Relate artistic ideas and works with societal, cultural, and historical context to deepen understanding.

**Enduring Understanding:** Theatre artists critically inquire into the ways others have thought about and created drama processes and productions to inform their own work.

**Essential Question:** In what ways can research into theatre histories, theories, literature, and performances alter the way a drama process or production is understood?

**Grade 6**

TH:Cn11.2.6

a. Research and analyze two different versions of the same drama/theatre story to determine differences and similarities in the visual and aural world of each story.

b. Investigate the time period and place of a drama/theatre work to better understand performance and design choices.

**Grade 7**

TH:Cn11.2.7

a. Research and discuss how a playwright might have intended a drama/theatre work to be produced.

b. Examine artifacts from a time period and geographic location to better understand performance and design choices in a drama/theatre work.

**Grade 8**

TH:Cn11.2.8

a. Research the story elements of a staged drama/theatre work and compare them to another production of the same work.

b. Identify and use artifacts from a time period and place to develop performance and design choices in a drama/theatre work.
Theatre/Creating
#TH:Cr1.1
Process Component: Envision, Conceptualize
Anchor Standard: Generate and conceptualize artistic ideas and work.
Enduring Understanding: Theatre artists rely on intuition, curiosity, and critical inquiry.
Essential Question: What happens when theatre artists use their imaginations and/or learned theatre skills while engaging in creative exploration and inquiry?

Grade Hs proficient
TH:Cr1.1.HSI
a. Apply basic research to construct ideas about the visual composition of a drama/theatre work.

b. Explore the impact of technology on design choices in a drama/theatre work.

c. Use script analysis to generate ideas about a character that is believable and authentic in a drama/theatre work.

Grade Hs accomplished
TH:Cr1.1.HSII
a. Investigate historical and cultural conventions and their impact on the visual composition of a drama/theatre work.

b. Understand and apply technology to design solutions for a drama/theatre work.

c. Use personal experiences and knowledge to develop a character that is believable and authentic in a drama/theatre work.

Grade Hs advanced
TH:Cr1.1.HSIII
a. Synthesize knowledge from a variety of dramatic forms, theatrical conventions, and technologies to create the visual composition of a drama/theatre work.

b. Create a complete design for a drama/theatre work that incorporates all elements of technology.

c. Integrate cultural and historical contexts with personal experiences to create a character that is believable and authentic, in a drama/theatre work.

Theatre/Creating
#TH:Cr2.1
Process Component: Develop
Anchor Standard: Organize and develop artistic ideas and work.
Enduring Understanding: Theatre artists work to discover different ways of communicating meaning
Essential Question: How, when, and why do theatre artists' choices change?

Grade Hs proficient
TH:Cr2.1.HSI
a. Explore the function of history and culture in the development of a dramatic concept through a critical analysis of original ideas in a drama/theatre work.
b. Investigate the collaborative nature of the actor, director, playwright, and designers and explore their interdependent roles in a drama/theatre work.

Grade Hs accomplished
TH:Cr2.1.HSII
a. Refine a dramatic concept to demonstrate a critical understanding of historical and cultural influences of original ideas applied to a drama/theatre work.

b. Cooperate as a creative team to make interpretive choices for a drama/theatre work.

Grade Hs advanced
TH:Cr2.1.HSIII
a. Develop and synthesize original ideas in a drama/theatre work utilizing critical analysis, historical and cultural context, research, and western or non-western theatre traditions.

b. Collaborate as a creative team to discover artistic solutions and make interpretive choices in a devised or scripted drama/theatre work.

Theatre/Creating
#TH:Cr3.1
Process Component: Rehearse
Anchor Standard: Refine new work through play, drama processes and theatre experiences using critical analysis and experimentation.
Enduring Understanding: Theatre artists refine their work and practice their craft through rehearsal.
Essential Question: How do theatre artists transform and edit their initial ideas?

Grade Hs proficient
TH:Cr3.1.HSI
a. Practice and revise a devised or scripted drama/theatre work using theatrical staging conventions.

b. Explore physical, vocal and physiological choices to develop a performance that is believable, authentic, and relevant to a drama/theatre work.

c. Refine technical design choices to support the story and emotional impact of a devised or scripted drama/theatre work.

Grade Hs accomplished
TH:Cr3.1.HSII
a. Use the rehearsal process to analyze the dramatic concept and technical design elements of a devised or scripted drama/theatre work.

b. Use research and script analysis to revise physical, vocal, and physiological choices impacting the believability and relevance of a drama/ theatre work.

c. Re-imagine and revise technical design choices during the course of a rehearsal process to enhance the story and emotional impact of a devised or scripted drama/theatre work.

Grade Hs advanced
TH:Cr3.1.HSIII
a. Refine, transform, and re-imagine a devised or scripted drama/theatre work using the rehearsal process to invent or re-imagine style, genre, form, and conventions.

b. Synthesize ideas from research, script analysis, and context to create a performance that is believable, authentic, and relevant in a drama/theatre work.

c. Apply a high level of technical proficiencies to the rehearsal process to support the story and emotional impact of a devised or scripted drama/theatre work.

Theatre/Performing
#TH:Pr4.1
Process Component: Select
Anchor Standard: Select, analyze, and interpret artistic work for presentation.
Enduring Understanding: Theatre artists make strong choices to effectively convey meaning.
Essential Question: Why are strong choices essential to interpreting a drama or theatre piece?
   Grade Hs proficient
   TH:Pr4.1.HSI
   a. Examine how character relationships assist in telling the story of a drama/theatre work.

b. Shape character choices using given circumstances in a drama/theatre work.
   Grade Hs accomplished
   TH:Pr4.1.HSII
   a. Discover how unique choices shape believable and sustainable drama/theatre work.

   b. Identify essential text information, research from various sources, and the director's concept that influence character choices in a drama/theatre work.
   Grade Hs advanced
   TH:Pr4.1.HSIII
   a. Apply reliable research of directors' styles to form unique choices for a directorial concept in a drama/theatre work.

   b. Apply a variety of researched acting techniques as an approach to character choices in a drama/theatre work.

Theatre/Performing
#TH:Pr5.1
Process Component: Prepare
Anchor Standard: Develop and refine artistic techniques and work for presentation.
Enduring Understanding: Theatre artists develop personal processes and skills for a performance or design.
Essential Question: What can I do to fully prepare a performance or technical design?
   Grade Hs proficient
   TH:Pr5.1.HSI
   a. Practice various acting techniques to expand skills in a rehearsal or drama/theatre performance.
b. Use researched technical elements to increase the impact of design for a drama/theatre production.

**Grade Hs accomplished**

**TH:Pr5.1.HSII**

a. Refine a range of acting skills to build a believable and sustainable drama/theatre performance.

b. Apply technical elements and research to create a design that communicates the concept of a drama/theatre production.

**Grade Hs advanced**

**TH:Pr5.1.HSIII**

a. Use and justify a collection of acting exercises from reliable resources to prepare a believable and sustainable performance.

b. Explain and justify the selection of technical elements used to build a design that communicates the concept of a drama/theatre production.

---

**Theatre/Performing**

#TH:Pr6.1

**Process Component:** Share, Present

**Anchor Standard:** Convey meaning through the presentation of artistic work.

**Enduring Understanding:** Theatre artists share and present stories, ideas, and envisioned worlds to explore the human experience.

**Essential Question:** What happens when theatre artists and audiences share a creative experience?

**Grade Hs proficient**

**TH:Pr6.1.HSI**

a. Perform a scripted drama/theatre work for a specific audience.

**Grade Hs accomplished**

**TH:Pr6.1.HSII**

a. Present a drama/theatre work using creative processes that shape the production for a specific audience.

**Grade Hs advanced**

**TH:Pr6.1.HSIII**

a. Present a drama/theatre production for a specific audience that employs research and analysis grounded in the creative perspectives of the playwright, director, designer, and dramaturg.

---

**Theatre/Responding**

#TH:Re7.1

**Process Component:** Reflect

**Anchor Standard:** Perceive and analyze artistic work.

**Enduring Understanding:** Theatre artists reflect to understand the impact of drama processes and theatre experiences.

**Essential Question:** How do theatre artists comprehend the essence of drama processes and theatre experiences?

**Grade Hs proficient**
TH:Re7.1.HSI
a. Respond to what is seen, felt, and heard in a drama/theatre work to develop criteria for artistic choices.

Grade Hs accomplished
TH:Re7.1.HSII
a. Demonstrate an understanding of multiple interpretations of artistic criteria and how each might be used to influence future artistic choices of a drama/theatre work.

Grade Hs advanced
TH:Re7.1.HSIII
a. Use historical and cultural context to structure and justify personal responses to a drama/theatre work.

Theatre/Responding
#TH:Re8.1
Process Component: Interpret
Anchor Standard: Interpret intent and meaning in artistic work.
Enduring Understanding: Theatre artists' interpretations of drama/theatre work are influenced by personal experiences and aesthetics.
Essential Question: How can the same work of art communicate different messages to different people?

Grade Hs proficient
TH:Re8.1.HSI
a. Analyze and compare artistic choices developed from personal experiences in multiple drama/theatre works.

b. Identify and compare cultural perspectives and contexts that may influence the evaluation of a drama/theatre work.

c. Justify personal aesthetics, preferences, and beliefs through participation in and observation of a drama/theatre work.

Grade Hs accomplished
TH:Re8.1.HSII
a. Develop detailed supporting evidence and criteria to reinforce artistic choices, when participating in or observing a drama/theatre work.

b. Apply concepts from a drama/theatre work for personal realization about cultural perspectives and understanding.

c. Debate and distinguish multiple aesthetics, preferences, and beliefs through participation in and observation of drama/theatre work.

Grade Hs advanced
TH:Re8.1.HSIII
a. Use detailed supporting evidence and appropriate criteria to revise personal work and interpret the work of others when participating in or observing a drama/theatre work.

b. Use new understandings of cultures and contexts to shape personal responses to drama/theatre work.
c. Support and explain aesthetics, preferences, and beliefs to create a context for critical research that informs artistic decisions in a drama/theatre work.

Theatre/Responding
#TH:Re9.1
Process Component: Evaluate
Anchor Standard: Apply criteria to evaluate artistic work.
Enduring Understanding: Theatre artists apply criteria to investigate, explore, and assess drama and theatre work.
Essential Question: How are the theatre artist's processes and the audience's perspectives impacted by analysis and synthesis?

   Grade Hs proficient
   TH:Re9.1.HSI
   a. Examine a drama/theatre work using supporting evidence and criteria, while considering art forms, history, culture, and other disciplines.

   b. Consider the aesthetics of the production elements in a drama/theatre work.

   c. Formulate a deeper understanding and appreciation of a drama/theatre work by considering its specific purpose or intended audience.
   Grade Hs accomplished
   TH:Re9.1.HSII
   a. Analyze and assess a drama/theatre work by connecting it to art forms, history, culture, and other disciplines using supporting evidence and criteria.

   b. Construct meaning in a drama/theatre work, considering personal aesthetics and knowledge of production elements while respecting others’ interpretations.

   c. Verify how a drama/theatre work communicates for a specific purpose and audience.
   Grade Hs advanced
   TH:Re9.1.HSIII
   a. Research and synthesize cultural and historical information related to a drama/theatre work to support or evaluate artistic choices.

   b. Analyze and evaluate varied aesthetic interpretations of production elements for the same drama/theatre work.

   c. Compare and debate the connection between a drama/theatre work and contemporary issues that may impact audiences.

Theatre/Connecting
#TH:Cn10.1
Process Component: Empathize
Anchor Standard: Synthesize and relate knowledge and personal experiences to make art.
Enduring Understanding: Theatre artists allow awareness of interrelationships between self and others to influence and inform their work.

Essential Question: What happens when theatre artists foster understanding between self and others through critical awareness, social responsibility, and the exploration of empathy?

Grade Hs proficient
TH:Cn10.1.HSI
a. Investigate how cultural perspectives, community ideas and personal beliefs impact a drama/theatre work.

Grade Hs accomplished
TH:Cn10.1.HSII
a. Choose and interpret a drama/theatre work to reflect or question personal beliefs.

Grade Hs advanced
TH:Cn10.1.HSIII
a. Collaborate on a drama/theatre work that examines a critical global issue using multiple personal, community, and cultural perspectives.

Theatre/Connecting
#TH:Cn11.1
Process Component: Interrelate
Anchor Standard: Relate artistic ideas and works with societal, cultural, and historical context to deepen understanding.
Enduring Understanding: Theatre artists understand and can communicate their creative process as they analyze the way the world may be understood.
Essential Question: What happens when theatre artists allow an understanding of themselves and the world to inform perceptions about theatre and the purpose of their work?

Grade Hs proficient
TH:Cn11.1.HSI
a. Explore how cultural, global, and historic belief systems affect creative choices in a drama/theatre work.

Grade Hs accomplished
TH:Cn11.1.HSII
a. Integrate conventions and knowledge from different art forms and other disciplines to develop a cross-cultural drama/theatre work.

Grade Hs advanced
TH:Cn11.1.HSIII
a. Develop a drama/theatre work that identifies and questions cultural, global, and historic belief systems.

Theatre/Connecting
#TH:Cn11.2
Process Component: Research
Anchor Standard: Relate artistic ideas and works with societal, cultural, and historical context to deepen understanding.
Enduring Understanding: Theatre artists critically inquire into the ways others have thought about and created drama processes and productions to inform their own work.
**Essential Question:** In what ways can research into theatre histories, theories, literature, and performances alter the way a drama process or production is understood?

**Grade Hs proficient**
TH:Cn11.2.HSI

a. Research how other theatre artists apply creative processes to tell stories in a devised or scripted drama/theatre work, using theatre research methods.

b. Use basic theatre research methods to better understand the social and cultural background of a drama/theatre work.

**Grade Hs accomplished**
TH:Cn11.2.HSII

a. Formulate creative choices for a devised or scripted drama/theatre work based on theatre research about the selected topic.

b. Explore how personal beliefs and biases can affect the interpretation of research data applied in drama/theatre work.

**Grade Hs advanced**
TH:Cn11.2.HSIII

a. Justify the creative choices made in a devised or scripted drama/theatre work, based on a critical interpretation of specific data from theatre research.

b. Present and support an opinion about the social, cultural, and historical understandings of a drama/theatre work, based on critical research.
Visual Arts/Created
#VA:Cr1.1

Process Component: Investigate, Plan, Make
Anchor Standard: Generate and conceptualize artistic ideas and work.
Enduring Understanding: Creativity and innovative thinking are essential life skills that can be developed.
Essential Question: What conditions, attitudes, and behaviors support creativity and innovative thinking? What factors prevent or encourage people to take creative risks? How does collaboration expand the creative process?

Grade K
VA:Cr1.1.K
Engage in exploration and imaginative play with materials.

Grade 1
VA:Cr1.1.1
Engage collaboratively in exploration and imaginative play with materials.

Grade 2
VA:Cr1.1.2
Brainstorm collaboratively multiple approaches to an art or design problem.

Grade 3
VA:Cr1.1.3
Elaborate on an imaginative idea.

Visual Arts/Created
#VA:Cr1.2

Process Component: Investigate, Plan, Make
Anchor Standard: Generate and conceptualize artistic ideas and work.
Enduring Understanding: Artists and designers shape artistic investigations, following or breaking with traditions in pursuit of creative artmaking goals.
Essential Question: How does knowing the contexts histories, & traditions of art forms help us create works of art & design? Why do artists follow or break from established traditions? How do artists determine what resources are needed to formulate artistic investigations?

Grade K
VA:Cr1.2.K
Engage collaboratively in creative art-making in response to an artistic problem.

Grade 1
VA:Cr1.2.1
Use observation and investigation in preparation for making a work of art.

Grade 2
VA:Cr1.2.2
Make art or design with various materials and tools to explore personal interests, questions, and curiosity.

Grade 3
VA:Cr1.2.3
Apply knowledge of available resources, tools, and technologies to investigate personal ideas through the art-making process.
Visual Arts/Creating
#VA:Cr2.1
Process Component: Investigate
Anchor Standard: Organize and develop artistic ideas and work.
Enduring Understanding: Artists and designers experiment with forms, structures, materials, concepts, media, and art-making approaches.
Essential Question: How do artists work? How do artists and designers determine whether a particular direction in their work is effective? How do artists and designers learn from trial and error?

Grade K
VA:Cr2.1.K
Through experimentation, build skills in various media and approaches to art-making.

Grade 1
VA:Cr2.1.1
Explore uses of materials and tools to create works of art or design.

Grade 2
VA:Cr2.1.2
Experiment with various materials and tools to explore personal interests in a work of art or design.

Grade 3
VA:Cr2.1.3
Create personally satisfying artwork using a variety of artistic processes and materials.

Visual Arts/Creating
#VA:Cr2.2
Process Component: Investigate
Anchor Standard: Organize and develop artistic ideas and work.
Enduring Understanding: Artists and designers balance experimentation and safety, freedom and responsibility while developing and creating artworks.
Essential Question: How do artists and designers care for & maintain materials, tools, & equipment? Why is it important for safety & health to understand & follow correct procedures in handling materials & tools? What responsibilities come with the freedom to create?

Grade K
VA:Cr2.2.K
Identify safe and non-toxic art materials, tools, and equipment.

Grade 1
VA:Cr2.2.1
Demonstrate safe and proper procedures for using materials, tools, and equipment while making art.

Grade 2
VA:Cr2.2.2
Demonstrate safe procedures for using and cleaning art tools, equipment, and studio spaces.

Grade 3
VA:Cr2.2.3
Demonstrate an understanding of the safe and proficient use of materials, tools, and equipment for a variety of artistic processes.
Visual Arts/Creating
#VA:Cr2.3

**Process Component:** Investigate

**Anchor Standard:** Organize and develop artistic ideas and work.

**Enduring Understanding:** People create and interact with objects, places, and design that define, shape, enhance, and empower their lives.

**Essential Question:** How do objects, places, and design shape lives and communities? How do artists and designers determine goals for designing or redesigning objects, places, or systems? How do artists and designers create works of art or design that effectively communicate?

- **Grade K**
  - VA:Cr2.3.K
  - Create art that represents natural and constructed environments.

- **Grade 1**
  - VA:Cr2.3.1
  - Identify and classify uses of everyday objects through drawings, diagrams, sculptures, or other visual means.

- **Grade 2**
  - VA:Cr2.3.2
  - Repurpose objects to make something new.

- **Grade 3**
  - VA:Cr2.3.3
  - Individually or collaboratively construct representations, diagrams, or maps of places that are part of everyday life.

**Visual Arts/Creating**
#VA:Cr3.1

**Process Component:** Reflect, Refine, Continue

**Anchor Standard:** Refine and complete artistic work.

**Enduring Understanding:** Artist and designers develop excellence through practice and constructive critique, reflecting on, revising, and refining work over time.

**Essential Question:** What role does persistence play in revising, refining, and developing work? How do artists grow and become accomplished in art forms? How does collaboratively reflecting on a work help us experience it more completely?

- **Grade K**
  - VA:Cr3.1.K
  - Explain the process of making art while creating.

- **Grade 1**
  - VA:Cr3.1.1
  - Use art vocabulary to describe choices while creating art.

- **Grade 2**
  - VA:Cr3.1.2
  - Discuss and reflect with peers about choices made in creating artwork.

- **Grade 3**
  - VA:Cr3.1.3
  - Elaborate visual information by adding details in an artwork to enhance emerging meaning.
Visual Arts/Presenting  
#VA:Pr.4.1  
**Process Component:** Relate  
**Anchor Standard:** Select, analyze and interpret artistic work for presentation.  
**Enduring Understanding:** Artists and other presenters consider various techniques, methods, venues, and criteria when analyzing, selecting, and curating objects, artifacts, and artworks for preservation and presentation.  
**Essential Question:** How are artworks cared for and by whom? What criteria, methods, and processes are used to select work for preservation or presentation? Why do people value objects, artifacts, and artworks, and select them for presentation?

**Grade K**  
**VA:Pr.4.1.K**  
Select art objects for personal portfolio and display, explaining why they were chosen.

**Grade 1**  
**VA:Pr.4.1.1**  
Explain why some objects, artifacts, and artwork are valued over others.

**Grade 2**  
**VA:Pr.4.1.2**  
Categorize artwork based on a theme or concept for an exhibit.

**Grade 3**  
**VA:Pr.4.1.3**  
Investigate and discuss possibilities and limitations of spaces, including electronic, for exhibiting artwork.

---

Visual Arts/Presenting  
#VA:Pr5.1  
**Process Component:** Select  
**Anchor Standard:** Develop and refine artistic techniques and work for presentation.  
**Enduring Understanding:** Artists, curators, and others consider a variety of factors and methods including evolving technologies when preparing and refining artwork for display and or when deciding if and how to preserve and protect it.  
**Essential Question:** What methods and processes are considered when preparing artwork for presentation or preservation? How does refining artwork affect its meaning to the viewer? What criteria are considered when selecting work for presentation, a portfolio, or a collection?

**Grade K**  
**VA:Pr5.1.K**  
Explain the purpose of a portfolio or collection.

**Grade 1**  
**VA:Pr5.1.1**  
Ask and answer questions such as where, when, why, and how artwork should be prepared for presentation or preservation.

**Grade 2**  
**VA:Pr5.1.2**  
Distinguish between different materials or artistic techniques for preparing artwork for presentation.

**Grade 3**
Identify exhibit space and prepare works of art including artists’ statements, for presentation.

**Visual Arts/Presenting**

#VA:Pr6.1

**Process Component:** Analyze

**Anchor Standard:** Convey meaning through the presentation of artistic work.

**Enduring Understanding:** Objects, artifacts, and artworks collected, preserved, or presented either by artists, museums, or other venues communicate meaning and a record of social, cultural, and political experiences resulting in the cultivating of appreciation and understanding.

**Essential Question:** What is an art museum? How does the presenting & sharing of objects, artifacts, & artworks influence & shape ideas, beliefs, & experiences? How do objects, artifacts, & artworks collected, preserved, or presented, cultivate appreciation & understanding?

**Grade K**

#VA:Pr6.1.K

Explain what an art museum is and distinguish how an art museum is different from other buildings.

**Grade 1**

#VA:Pr6.1.1

Identify the roles and responsibilities of people who work in and visit museums and other art venues.

**Grade 2**

#VA:Pr6.1.2

Analyze how art exhibited inside and outside of schools (such as in museums, galleries, virtual spaces, and other venues) contributes to communities.

**Grade 3**

#VA:Pr6.1.3

Identify and explain how and where different cultures record and illustrate stories and history of life through art.

**Visual Arts/Responding**

#VA:Re7.1

**Process Component:** Share

**Anchor Standard:** Perceive and analyze artistic work.

**Enduring Understanding:** Individual aesthetic and empathetic awareness developed through engagement with art can lead to understanding and appreciation of self, others, the natural world, and constructed environments.

**Essential Question:** How do life experiences influence the way you relate to art? How does learning about art impact how we perceive the world? What can we learn from our responses to art?

**Grade K**

#VA:Re7.1.K

Identify uses of art within one’s personal environment.

**Grade 1**

#VA:Re7.1.1

Select and describe works of art that illustrate daily life experiences of one’s self and others.

**Grade 2**
VA:Re7.1.2
Perceive and describe aesthetic characteristics of one’s natural world and constructed environments.

Grade 3

VA:Re7.1.3
Speculate about processes an artist uses to create a work of art.

Visual Arts/Responding

#VA:Re7.2
Process Component: Perceive
Anchor Standard: Perceive and analyze artistic work.
Enduring Understanding: Visual imagery influences understanding of and responses to the world.
Essential Question: What is an image? Where and how do we encounter images in our world? How do images influence our views of the world?

Grade K
VA:Re7.2.K
Describe what an image represents.

Grade 1
VA:Re7.2.1
Compare images that represent the same subject.

Grade 2
VA:Re7.2.2
Categorize images based on expressive properties.

Grade 3
VA:Re7.2.3
Determine messages communicated by an image.

Visual Arts/Responding

#VA:Re8.1
Process Component: Perceive
Anchor Standard: Interpret intent and meaning in artistic work.
Enduring Understanding: People gain insights into meanings of artworks by engaging in the process of art criticism.
Essential Question: What is the value of engaging in the process of art criticism? How can the viewer "read" a work of art as text? How does knowing and using visual art vocabularies help us understand and interpret works of art?

Grade K
VA:Re8.1.K
Interpret art by identifying subject matter and describing relevant details.

Grade 1
VA:Re8.1.1
Interpret art by categorizing subject matter and identifying the characteristics of form.

Grade 2
VA:Re8.1.2
Interpret art by identifying the mood suggested by a work of art and describing relevant subject matter and characteristics of form.
Grade 3  
VA:Re8.1.3  
Interpret art by analyzing use of media to create subject matter, characteristics of form, and mood.

Visual Arts/Responding  
#VA:Re9.1  
Process Component: Analyze  
Anchor Standard: Apply criteria to evaluate artistic work.  
Enduring Understanding: People evaluate art based on various criteria.  
Essential Question: How does one determine criteria to evaluate a work of art? How and why might criteria vary? How is a personal preference different from an evaluation?

Grade K  
VA:Re9.1.K  
Explain reasons for selecting a preferred artwork.

Grade 1  
VA:Re9.1.1  
Classify artwork based on different reasons for preferences.

Grade 2  
VA:Re9.1.2  
Use learned art vocabulary to express preferences about artwork.

Grade 3  
VA:Re9.1.3  
Evaluate an artwork based on given criteria.

Visual Arts/Connecting  
#VA:Cn10.1  
Process Component: Interpret  
Anchor Standard: Synthesize and relate knowledge and personal experiences to make art.  
Enduring Understanding: Through art-making, people make meaning by investigating and developing awareness of perceptions, knowledge, and experiences.  
Essential Question: How does engaging in creating art enrich people's lives? How does making art attune people to their surroundings? How do people contribute to awareness and understanding of their lives and the lives of their communities through art-making?

Grade K  
VA:Cn10.1.K  
Create art that tells a story about a life experience.

Grade 1  
VA:Cn10.1.1  
Identify times, places, and reasons by which students make art outside of school.

Grade 2  
VA:Cn10.1.2  
Create works of art about events in home, school, or community life.

Grade 3  
VA:Cn10.1.3  
Develop a work of art based on observations of surroundings.
Visual Arts/Connecting
#VA:Cn11.1

Process Component: Synthesize

Anchor Standard: Relate artistic ideas and works with societal, cultural, and historical context to deepen understanding.

Enduring Understanding: People develop ideas and understandings of society, culture, and history through their interactions with and analysis of art.

Essential Question: How does art help us understand the lives of people of different times, places, and cultures? How is art used to impact the views of a society? How does art preserve aspects of life?

Grade K
VA:Cn11.1.K
Identify a purpose of an artwork.

Grade 1
VA:Cn11.1.1
Understand that people from different places and times have made art for a variety of reasons.

Grade 2
VA:Cn11.1.2
Compare and contrast cultural uses of artwork from different times and places.

Grade 3
VA:Cn11.1.3
Recognize that responses to art change depending on knowledge of the time and place in which it was made.
Visual Arts/Creating
#VA:Cr1.1
Process Component: Investigate, Plan, Make
Anchor Standard: Generate and conceptualize artistic ideas and work.
Enduring Understanding: Creativity and innovative thinking are essential life skills that can be developed.
Essential Question: What conditions, attitudes, and behaviors support creativity and innovative thinking? What factors prevent or encourage people to take creative risks? How does collaboration expand the creative process?
  Grade 4
  VA:Cr1.1.4
  Brainstorm multiple approaches to a creative art or design problem.
  Grade 5
  VA:Cr1.1.5
  Combine ideas to generate an innovative idea for art-making.

Visual Arts/Creating
#VA:Cr1.2
Process Component: Investigate, Plan, Make
Anchor Standard: Generate and conceptualize artistic ideas and work.
Enduring Understanding: Artists and designers shape artistic investigations, following or breaking with traditions in pursuit of creative artmaking goals.
Essential Question: How does knowing the contexts histories, & traditions of art forms help us create works of art & design? Why do artists follow or break from established traditions? How do artists determine what resources are needed to formulate artistic investigations.
  Grade 4
  VA:Cr1.2.4
  Collaboratively set goals and create artwork that is meaningful and has purpose to the makers.
  Grade 5
  VA:Cr1.2.5
  Identify and demonstrate diverse methods of artistic investigation to choose an approach for beginning a work of art.

Visual Arts/Creating
#VA:Cr2.1
Process Component: Investigate
Anchor Standard: Organize and develop artistic ideas and work.
Enduring Understanding: Artists and designers experiment with forms, structures, materials, concepts, media, and art-making approaches.
Essential Question: How do artists work? How do artists and designers determine whether a particular direction in their work is effective? How do artists and designers learn from trial and error?
  Grade 4
  VA:Cr2.1.4
  Explore and invent art-making techniques and approaches.
  Grade 5
  VA:Cr2.1.5
Experiment and develop skills in multiple art-making techniques and approaches through practice.

Visual Arts/Creating
#VA:Cr2.2
Process Component: Investigate
Anchor Standard: Organize and develop artistic ideas and work.
Enduring Understanding: Artists and designers balance experimentation and safety, freedom and responsibility while developing and creating artworks.
Essential Question: How do artists and designers care for & maintain materials, tools, & equipment? Why is it important for safety & health to understand & follow correct procedures in handling materials & tools? What responsibilities come with the freedom to create?

Grade 4
VA:Cr2.2.4
When making works of art, utilize and care for materials, tools, and equipment in a manner that prevents danger to oneself and others.

Grade 5
VA:Cr2.2.5
Demonstrate quality craftsmanship through care for and use of materials, tools, and equipment.

Visual Arts/Creating
#VA:Cr2.3
Process Component: Investigate
Anchor Standard: Organize and develop artistic ideas and work.
Enduring Understanding: People create and interact with objects, places, and design that define, shape, enhance, and empower their lives.
Essential Question: How do objects, places, and design shape lives and communities? How do artists and designers determine goals for designing or redesigning objects, places, or systems? How do artists and designers create works of art or design that effectively communicate?

Grade 4
VA:Cr2.3.4
Document, describe, and represent regional constructed environments.

Grade 5
VA:Cr2.3.5
Identify, describe, and visually document places and/or objects of personal significance.

Visual Arts/Creating
#VA:Cr3.1
Process Component: Reflect, Refine, Continue
Anchor Standard: Refine and complete artistic work.
Enduring Understanding: Artist and designers develop excellence through practice and constructive critique, reflecting on, revising, and refining work over time.
Essential Question: What role does persistence play in revising, refining, and developing work? How do artists grow and become accomplished in art forms? How does collaboratively reflecting on a work help us experience it more completely?

Grade 4
VA:Cr3.1.4
Revise artwork in progress on the basis of insights gained through peer discussion.

Grade 5

VA:Cr3.1.5
Create artist statements using art vocabulary to describe personal choices in art-making.

Visual Arts/Presenting

#VA:Pr.4.1

Process Component: Relate

Anchor Standard: Select, analyze and interpret artistic work for presentation.

Enduring Understanding: Artists and other presenters consider various techniques, methods, venues, and criteria when analyzing, selecting, and curating objects, artifacts, and artworks for preservation and presentation.

Essential Question: How are artworks cared for and by whom? What criteria, methods, and processes are used to select work for preservation or presentation? Why do people value objects, artifacts, and artworks, and select them for presentation?

Grade 4

VA:Pr.4.1.4
Analyze how past, present, and emerging technologies have impacted the preservation and presentation of artwork.

Grade 5

VA:Pr.4.1.5
Define the roles and responsibilities of a curator, explaining the skills and knowledge needed in preserving, maintaining, and presenting objects, artifacts, and artwork.

Visual Arts/Presenting

#VA:Pr.5.1

Process Component: Select

Anchor Standard: Develop and refine artistic techniques and work for presentation.

Enduring Understanding: Artists, curators and others consider a variety of factors and methods including evolving technologies when preparing and refining artwork for display and or when deciding if and how to preserve and protect it.

Essential Question: What methods and processes are considered when preparing artwork for presentation or preservation? How does refining artwork affect its meaning to the viewer? What criteria are considered when selecting work for presentation, a portfolio, or a collection?

Grade 4

VA:Pr.5.1.4
Analyze the various considerations for presenting and protecting art in various locations, indoor or outdoor settings, in temporary or permanent forms, and in physical or digital formats.

Grade 5

VA:Pr.5.1.5
Develop a logical argument for safe and effective use of materials and techniques for preparing and presenting artwork.

Visual Arts/Presenting

#VA:Pr.6.1
Process Component: Analyze
Anchor Standard: Convey meaning through the presentation of artistic work.
Enduring Understanding: Objects, artifacts, and artworks collected, preserved, or presented either by artists, museums, or other venues communicate meaning and a record of social, cultural, and political experiences resulting in the cultivating of appreciation and understanding.
Essential Question: What is an art museum? How does the presenting & sharing of objects, artifacts, & artworks influence & shape ideas, beliefs, & experiences? How do objects, artifacts, & artworks collected, preserved, or presented, cultivate appreciation & understanding?

Grade 4
VA:Pr6.1.4
Compare and contrast purposes of art museums, art galleries, and other venues, as well as the types of personal experiences they provide.
Grade 5
VA:Pr6.1.5
Cite evidence about how an exhibition in a museum or other venue presents ideas and provides information about a specific concept or topic.

Visual Arts/Responding
#VA:Re7.1
Process Component: Share
Anchor Standard: Perceive and analyze artistic work.
Enduring Understanding: Individual aesthetic and empathetic awareness developed through engagement with art can lead to understanding and appreciation of self, others, the natural world, and constructed environments.
Essential Question: How do life experiences influence the way you relate to art? How does learning about art impact how we perceive the world? What can we learn from our responses to art?

Grade 4
VA:Re7.1.4
Compare responses to a work of art before and after working in similar media.
Grade 5
VA:Re7.1.5
Compare one's own interpretation of a work of art with the interpretation of others.

Visual Arts/Responding
#VA:Re7.2
Process Component: Perceive
Anchor Standard: Perceive and analyze artistic work.
Enduring Understanding: Visual imagery influences understanding of and responses to the world.
Essential Question: What is an image? Where and how do we encounter images in our world? How do images influence our views of the world?

Grade 4
VA:Re7.2.4
Analyze components in visual imagery that convey messages.
Grade 5
VA:Re7.2.5
Identify and analyze cultural associations suggested by visual imagery.
Visual Arts/Responding
#VA:Re8.1
Process Component: Perceive
Anchor Standard: Interpret intent and meaning in artistic work.
Enduring Understanding: People gain insights into meanings of artworks by engaging in the process of art criticism.
Essential Question: What is the value of engaging in the process of art criticism? How can the viewer "read" a work of art as text? How does knowing and using visual art vocabularies help us understand and interpret works of art?

Grade 4
VA:Re8.1.4
Interpret art by referring to contextual information and analyzing relevant subject matter, characteristics of form, and use of media.

Grade 5
VA:Re8.1.5
Interpret art by analyzing characteristics of form and structure, contextual information, subject matter, visual elements, and use of media to identify ideas and mood conveyed.

Visual Arts/Responding
#VA:Re9.1
Process Component: Analyze
Anchor Standard: Apply criteria to evaluate artistic work.
Enduring Understanding: People evaluate art based on various criteria.
Essential Question: How does one determine criteria to evaluate a work of art? How and why might criteria vary? How is a personal preference different from an evaluation?

Grade 4
VA:Re9.1.4
Apply one set of criteria to evaluate more than one work of art.

Grade 5
VA:Re9.1.5
Recognize differences in criteria used to evaluate works of art depending on styles, genres, and media as well as historical and cultural contexts.

Visual Arts/Connecting
#VA:Cn10.1
Process Component: Interpret
Anchor Standard: Synthesize and relate knowledge and personal experiences to make art.
Enduring Understanding: Through art-making, people make meaning by investigating and developing awareness of perceptions, knowledge, and experiences.
Essential Question: How does engaging in creating art enrich people's lives? How does making art attune people to their surroundings? How do people contribute to awareness and understanding of their lives and the lives of their communities through art-making?

Grade 4
VA:Cn10.1.4
Create works of art that reflect community cultural traditions.

Grade 5
VA:Cn10.1.5
Apply formal and conceptual vocabularies of art and design to view surroundings in new ways through art-making.

Visual Arts/Connecting
#VA:Cn11.1
Process Component: Synthesize
Anchor Standard: Relate artistic ideas and works with societal, cultural, and historical context to deepen understanding.
Enduring Understanding: People develop ideas and understandings of society, culture, and history through their interactions with and analysis of art.
Essential Question: How does art help us understand the lives of people of different times, places, and cultures? How is art used to impact the views of a society? How does art preserve aspects of life?

Grade 4
VA:Cn11.1.4
Through observation, infer information about time, place, and culture in which a work of art was created.

Grade 5
VA:Cn11.1.5
Identify how art is used to inform or change beliefs, values, or behaviors of an individual or society.
Visual Arts/Creative
#VA:Cr1.1

Process Component: Investigate, Plan, Make
Anchor Standard: Generate and conceptualize artistic ideas and work.
Enduring Understanding: Creativity and innovative thinking are essential life skills that can be developed.
Essential Question: What conditions, attitudes, and behaviors support creativity and innovative thinking? What factors prevent or encourage people to take creative risks? How does collaboration expand the creative process?

Grade 6
VA:Cr1.1.6
Combine concepts collaboratively to generate innovative ideas for creating art.

Grade 7
VA:Cr1.1.7
Apply methods to overcome creative blocks.

Grade 8
VA:Cr1.1.8
Document early stages of the creative process visually and/or verbally in traditional or new media.

Visual Arts/Creative
#VA:Cr1.2

Process Component: Investigate, Plan, Make
Anchor Standard: Generate and conceptualize artistic ideas and work.
Enduring Understanding: Artists and designers shape artistic investigations, following or breaking with traditions in pursuit of creative artmaking goals.
Essential Question: How does knowing the contexts histories, & traditions of art forms help us create works of art & design? Why do artists follow or break from established traditions? How do artists determine what resources are needed to formulate artistic investigations.

Grade 6
VA:Cr1.2.6
Formulate an artistic investigation of personally relevant content for creating art.

Grade 7
VA:Cr1.2.7
Develop criteria to guide making a work of art or design to meet an identified goal.

Grade 8
VA:Cr1.2.8
Collaboratively shape an artistic investigation of an aspect of present-day life using a contemporary practice of art and design.

Visual Arts/Creative
#VA:Cr2.1

Process Component: Investigate
Anchor Standard: Organize and develop artistic ideas and work.
Enduring Understanding: Artists and designers experiment with forms, structures, materials, concepts, media, and art-making approaches.
**Essential Question:** How do artists work? How do artists and designers determine whether a particular direction in their work is effective? How do artists and designers learn from trial and error?

**Grade 6**

**VA:Cr2.1.6**
Demonstrate openness in trying new ideas, materials, methods, and approaches in making works of art and design.

**Grade 7**

**VA:Cr2.1.7**
Demonstrate persistence in developing skills with various materials, methods, and approaches in creating works of art or design.

**Grade 8**

**VA:Cr2.1.8**
Demonstrate willingness to experiment, innovate, and take risks to pursue ideas, forms, and meanings that emerge in the process of art-making or designing.

**Visual Arts/Creating**

#VA:Cr2.2

**Process Component:** Investigate

**Anchor Standard:** Organize and develop artistic ideas and work.

**Enduring Understanding:** Artists and designers balance experimentation and safety, freedom and responsibility while developing and creating artworks.

**Essential Question:** How do artists and designers care for & maintain materials, tools, & equipment? Why is it important for safety & health to understand & follow correct procedures in handling materials & tools? What responsibilities come with the freedom to create?

**Grade 6**

**VA:Cr2.2.6**
Explain environmental implications of conservation, care, and clean-up of art materials, tools, and equipment.

**Grade 7**

**VA:Cr2.2.7**
Demonstrate awareness of ethical responsibility to oneself and others when posting and sharing images and other materials through the Internet, social media, and other communication formats.

**Grade 8**

**VA:Cr2.2.8**
Demonstrate awareness of practices, issues, and ethics of appropriation, fair use, copyright, open source, and creative commons as they apply to creating works of art and design.

**Visual Arts/Creating**

#VA:Cr2.3

**Process Component:** Investigate

**Anchor Standard:** Organize and develop artistic ideas and work.

**Enduring Understanding:** People create and interact with objects, places, and design that define, shape, enhance, and empower their lives.
**Essential Question:** How do objects, places, and design shape lives and communities? How do artists and designers determine goals for designing or redesigning objects, places, or systems? How do artists and designers create works of art or design that effectively communicate?

**Grade 6**  
VA:Cr2.3.6  
Design or redesign objects, places, or systems that meet the identified needs of diverse users.

**Grade 7**  
VA:Cr2.3.7  
Apply visual organizational strategies to design and produce a work of art, design, or media that clearly communicates information or ideas.

**Grade 8**  
VA:Cr2.3.8  
Select, organize, and design images and words to make visually clear and compelling presentations.

**Visual Arts/Creative**  
#VA:Cr3.1  
**Process Component:** Reflect, Refine, Continue  
**Anchor Standard:** Refine and complete artistic work.  
**Enduring Understanding:** Artist and designers develop excellence through practice and constructive critique, reflecting on, revising, and refining work over time.  
**Essential Question:** What role does persistence play in revising, refining, and developing work? How do artists grow and become accomplished in art forms? How does collaboratively reflecting on a work help us experience it more completely?

**Grade 6**  
VA:Cr3.1.6  
Reflect on whether personal artwork conveys the intended meaning and revise accordingly.

**Grade 7**  
VA:Cr3.1.7  
Reflect on and explain important information about personal artwork in an artist statement or another format.

**Grade 8**  
VA:Cr3.1.8  
Apply relevant criteria to examine, reflect on, and plan revisions for a work of art or design in progress.

**Visual Arts/Presenting**  
#VA:Pr.4.1  
**Process Component:** Relate  
**Anchor Standard:** Select, analyze and interpret artistic work for presentation.  
**Enduring Understanding:** Artists and other presenters consider various techniques, methods, venues, and criteria when analyzing, selecting, and curating objects/artifacts, and artworks for preservation and presentation.  
**Essential Question:** How are artworks cared for and by whom? What criteria, methods, and processes are used to select work for preservation or presentation? Why do people value objects, artifacts, and artworks, and select them for presentation?
Grade 6
VA:Pr.4.1.6
Analyze similarities and differences associated with preserving and presenting two-dimensional, three-dimensional, and digital artwork.

Grade 7
VA:Pr.4.1.7
Compare and contrast how technologies have changed the way artwork is preserved, presented, and experienced.

Grade 8
VA:Pr.4.1.8
Develop and apply criteria for evaluating a collection of artwork for presentation.

Visual Arts/Presenting
#VA:Pr5.1
Process Component: Select
Anchor Standard: Develop and refine artistic techniques and work for presentation.
Enduring Understanding: Artists, curators and others consider a variety of factors and methods including evolving technologies when preparing and refining artwork for display and or when deciding if and how to preserve and protect it.
Essential Question: What methods and processes are considered when preparing artwork for presentation or preservation? How does refining artwork affect its meaning to the viewer? What criteria are considered when selecting work for presentation, a portfolio, or a collection?

Grade 6
VA:Pr5.1.6
Individually or collaboratively, develop a visual plan for displaying works of art, analyzing exhibit space, the needs of the viewer, and the layout of the exhibit.

Grade 7
VA:Pr5.1.7
Based on criteria, analyze and evaluate methods for preparing and presenting art.

Grade 8
VA:Pr5.1.8
Collaboratively prepare and present selected theme-based artwork for display, and formulate exhibition narratives for the viewer.

Visual Arts/Presenting
#VA:Pr6.1
Process Component: Analyze
Anchor Standard: Convey meaning through the presentation of artistic work.
Enduring Understanding: Objects, artifacts, and artworks collected, preserved, or presented either by artists, museums, or other venues communicate meaning and a record of social, cultural, and political experiences resulting in the cultivating of appreciation and understanding.
Essential Question: What is an art museum? How does the presenting & sharing of objects, artifacts, & artworks influence & shape ideas, beliefs, & experiences? How do objects, artifacts, & artworks collected, preserved, or presented, cultivate appreciation & understanding?

Grade 6
VA:Pr6.1.6
Assess, explain, and provide evidence of how museums or other venues reflect history and values of a community.

Grade 7
VA:Pr6.1.7
Compare and contrast viewing and experiencing collections and exhibitions in different venues.

Grade 8
VA:Pr6.1.8
Analyze why and how an exhibition or collection may influence ideas, beliefs, and experiences.

Visual Arts/Responding
#VA:Re7.1
Process Component: Share
Anchor Standard: Perceive and analyze artistic work.
Enduring Understanding: Individual aesthetic and empathetic awareness developed through engagement with art can lead to understanding and appreciation of self, others, the natural world, and constructed environments.
Essential Question: How do life experiences influence the way you relate to art? How does learning about art impact how we perceive the world? What can we learn from our responses to art?

Grade 6
VA:Re7.1.6
Identify and interpret works of art or design that reveal how people live around the world and what they value.

Grade 7
VA:Re7.1.7
Explain how the method of display, the location, and the experience of an artwork influence how it is perceived and valued.

Grade 8
VA:Re7.1.8
Explain how a person’s aesthetic choices are influenced by culture and environment and impact the visual image that one conveys to others.

Visual Arts/Responding
#VA:Re7.2
Process Component: Perceive
Anchor Standard: Perceive and analyze artistic work.
Enduring Understanding: Visual imagery influences understanding of and responses to the world.
Essential Question: What is an image? Where and how do we encounter images in our world? How do images influence our views of the world?

Grade 6
VA:Re7.2.6
Analyze ways that visual components and cultural associations suggested by images influence ideas, emotions, and actions.

Grade 7
VA:Re7.2.7
Analyze multiple ways that images influence specific audiences.
VA:Re7.2.8
Compare and contrast contexts and media in which viewers encounter images that influence ideas, emotions, and actions.

Visual Arts/Responding
#VA:Re8.1

Process Component: Perceive
Anchor Standard: Interpret intent and meaning in artistic work.
Enduring Understanding: People gain insights into meanings of artworks by engaging in the process of art criticism.
Essential Question: What is the value of engaging in the process of art criticism? How can the viewer "read" a work of art as text? How does knowing and using visual art vocabularies help us understand and interpret works of art?

Grade 6
VA:Re8.1.6
Interpret art by distinguishing between relevant and non-relevant contextual information and analyzing subject matter, characteristics of form and structure, and use of media to identify ideas and mood conveyed.

Grade 7
VA:Re8.1.7
Interpret art by analyzing art-making approaches, the characteristics of form and structure, relevant contextual information, subject matter, and use of media to identify ideas and mood conveyed.

Grade 8
VA:Re8.1.8
Interpret art by analyzing how the interaction of subject matter, characteristics of form and structure, use of media, art-making approaches, and relevant contextual information contributes to understanding messages or ideas and mood conveyed.

Visual Arts/Responding
#VA:Re9.1

Process Component: Analyze
Anchor Standard: Apply criteria to evaluate artistic work.
Enduring Understanding: People evaluate art based on various criteria.
Essential Question: How does one determine criteria to evaluate a work of art? How and why might criteria vary? How is a personal preference different from an evaluation?

Grade 6
VA:Re9.1.6
Develop and apply relevant criteria to evaluate a work of art.

Grade 7
VA:Re9.1.7
Compare and explain the difference between an evaluation of an artwork based on personal criteria and an evaluation of an artwork based on a set of established criteria.

Grade 8
VA:Re9.1.8
Create a convincing and logical argument to support an evaluation of art.
Visual Arts/Connecting  
#VA:Cn10.1  
Process Component: Interpret  
Anchor Standard: Synthesize and relate knowledge and personal experiences to make art.  
Enduring Understanding: Through art-making, people make meaning by investigating and developing awareness of perceptions, knowledge, and experiences.  
Essential Question: How does engaging in creating art enrich people's lives? How does making art attune people to their surroundings? How do people contribute to awareness and understanding of their lives and the lives of their communities through art-making? 

Grade 6  
VA:Cn10.1.6  
Generate a collection of ideas reflecting current interests and concerns that could be investigated in art-making.  
Grade 7  
VA:Cn10.1.7  
Individually or collaboratively create visual documentation of places and times in which people gather to make and experience art or design in the community.  
Grade 8  
VA:Cn10.1.8  
Make art collaboratively to reflect on and reinforce positive aspects of group identity.  

Visual Arts/Connecting  
#VA:Cn11.1  
Process Component: Synthesize  
Anchor Standard: Relate artistic ideas and works with societal, cultural, and historical context to deepen understanding.  
Enduring Understanding: People develop ideas and understandings of society, culture, and history through their interactions with and analysis of art.  
Essential Question: How does art help us understand the lives of people of different times, places, and cultures? How is art used to impact the views of a society? How does art preserve aspects of life? 

Grade 6  
VA:Cn11.1.6  
Analyze how art reflects changing times, traditions, resources, and cultural uses.  
Grade 7  
VA:Cn11.1.7  
Analyze how response to art is influenced by understanding the time and place in which it was created, the available resources, and cultural uses.  
Grade 8  
VA:Cn11.1.8  
Distinguish different ways art is used to represent, establish, reinforce, and reflect group identity.
Visual Arts/Creating
#VA:Cr1.1
Process Component: Investigate, Plan, Make
Anchor Standard: Generate and conceptualize artistic ideas and work.
Enduring Understanding: Creativity and innovative thinking are essential life skills that can be developed.
Essential Question: What conditions, attitudes, and behaviors support creativity and innovative thinking? What factors prevent or encourage people to take creative risks? How does collaboration expand the creative process?

Grade Hs proficient
VA:Cr1.1.HSI
Use multiple approaches to begin creative endeavors.

Grade Hs accomplished
VA:Cr1.1.HSII
Individually or collaboratively formulate new creative problems based on student’s existing artwork.

Grade Hs advanced
VA:Cr1.1.HSIII
Visualize and hypothesize to generate plans for ideas and directions for creating art and design that can affect social change.

Visual Arts/Creating
#VA:Cr1.2
Process Component: Investigate, Plan, Make
Anchor Standard: Generate and conceptualize artistic ideas and work.
Enduring Understanding: Artists and designers shape artistic investigations, following or breaking with traditions in pursuit of creative artmaking goals.
Essential Question: How does knowing the contexts histories, & traditions of art forms help us create works of art & design? Why do artists follow or break from established traditions? How do artists determine what resources are needed to formulate artistic investigations.

Grade Hs proficient
VA:Cr1.2.HSI
Shape an artistic investigation of an aspect of present-day life using a contemporary practice of art or design.

Grade Hs accomplished
VA:Cr1.2.HSII
Choose from a range of materials and methods of traditional and contemporary artistic practices to plan works of art and design.

Grade Hs advanced
VA:Cr1.2.HSIII
Choose from a range of materials and methods of traditional and contemporary artistic practices, following or breaking established conventions, to plan the making of multiple works of art and design based on a theme, idea, or concept.

Visual Arts/Creating
#VA:Cr2.1
Process Component: Investigate
Anchor Standard: Organize and develop artistic ideas and work.
Enduring Understanding: Artists and designers experiment with forms, structures, materials, concepts, media, and art-making approaches.
Essential Question: How do artists work? How do artists and designers determine whether a particular direction in their work is effective? How do artists and designers learn from trial and error?

Grade Hs proficient
VA:Cr2.1.HSI
Engage in making a work of art or design without having a preconceived plan.

Grade Hs accomplished
VA:Cr2.1.HSII
Through experimentation, practice, and persistence, demonstrate acquisition of skills and knowledge in a chosen art form.

Grade Hs advanced
VA:Cr2.1.HSIII
Experiment, plan, and make multiple works of art and design that explore a personally meaningful theme, idea, or concept.

Visual Arts/Creating
#VA:Cr2.2
Process Component: Investigate
Anchor Standard: Organize and develop artistic ideas and work.
Enduring Understanding: Artists and designers balance experimentation and safety, freedom and responsibility while developing and creating artworks.
Essential Question: How do artists and designers care for & maintain materials, tools, & equipment? Why is it important for safety & health to understand & follow correct procedures in handling materials & tools? What responsibilities come with the freedom to create?

Grade Hs proficient
VA:Cr2.2.HSI
Explain how traditional and non-traditional materials may impact human health and the environment and demonstrate safe handling of materials, tools, and equipment.

Grade Hs accomplished
VA:Cr2.2.HSII
Demonstrate awareness of ethical implications of making and distributing creative work.

Grade Hs advanced
VA:Cr2.2.HSIII
Demonstrate understanding of the importance of balancing freedom and responsibility in the use of images, materials, tools, and equipment in the creation and circulation of creative work.

Visual Arts/Creating
#VA:Cr2.3
Process Component: Investigate
Anchor Standard: Organize and develop artistic ideas and work.
Enduring Understanding: People create and interact with objects, places, and design that define, shape, enhance, and empower their lives.
**Essential Question:** How do objects, places, and design shape lives and communities? How do artists and designers determine goals for designing or redesigning objects, places, or systems? How do artists and designers create works of art or design that effectively communicate?

**Grade Hs proficient**  
**VA:Cr2.3.HSI**  
Collaboratively develop a proposal for an installation, artwork, or space design that transforms the perception and experience of a particular place.

**Grade Hs accomplished**  
**VA:Cr2.3.HSII**  
Redesign an object, system, place, or design in response to contemporary issues.

**Grade Hs advanced**  
**VA:Cr2.3.HSIII**  
Demonstrate in works of art or design how visual and material culture defines, shapes, enhances, inhibits, and/or empowers people's lives.

---

**Visual Arts/Creating**  
#VA:Cr3.1  
**Process Component:** Reflect, Refine, Continue  
**Anchor Standard:** Refine and complete artistic work.  
**Enduring Understanding:** Artist and designers develop excellence through practice and constructive critique, reflecting on, revising, and refining work over time.  
**Essential Question:** What role does persistence play in revising, refining, and developing work? How do artists grow and become accomplished in art forms? How does collaboratively reflecting on a work help us experience it more completely?

**Grade Hs proficient**  
**VA:Cr3.1.HSI**  
Apply relevant criteria from traditional and contemporary cultural contexts to examine, reflect on, and plan revisions for works of art and design in progress.

**Grade Hs accomplished**  
**VA:Cr3.1.HSII**  
Engage in constructive critique with peers, then reflect on, re-engage, revise, and refine works of art and design in response to personal artistic vision.

**Grade Hs advanced**  
**VA:Cr3.1.HSIII**  
Reflect on, re-engage, revise, and refine works of art or design considering relevant traditional and contemporary criteria as well as personal artistic vision.

---

**Visual Arts/Presenting**  
#VA:Pr.4.1  
**Process Component:** Relate  
**Anchor Standard:** Select, analyze and interpret artistic work for presentation.  
**Enduring Understanding:** Artists and other presenters consider various techniques, methods, venues, and criteria when analyzing, selecting, and curating objects, artifacts, and artworks for preservation and presentation.
**Essential Question:** How are artworks cared for and by whom? What criteria, methods, and processes are used to select work for preservation or presentation? Why do people value objects, artifacts, and artworks, and select them for presentation?

**Grade Hs proficient**
**VA:Pr.4.1.HSI**
Analyze, select, and curate artifacts and/or artworks for presentation and preservation.

**Grade Hs accomplished**
**VA:Pr.4.1.HSII**
Analyze, select, and critique personal artwork for a collection or portfolio presentation.

**Grade Hs advanced**
**VA:Pr.4.1.HSIII**
Critique, justify, and present choices in the process of analyzing, selecting, curating, and presenting artwork for a specific exhibit or event.

---

**Visual Arts/Presenting**

**#VA:Pr5.1**

**Process Component:** Select

**Anchor Standard:** Develop and refine artistic techniques and work for presentation.

**Enduring Understanding:** Artists, curators and others consider a variety of factors and methods including evolving technologies when preparing and refining artwork for display and or when deciding if and how to preserve and protect it.

**Essential Question:** What methods and processes are considered when preparing artwork for presentation or preservation? How does refining artwork affect its meaning to the viewer? What criteria are considered when selecting work for presentation, a portfolio, or a collection?

**Grade Hs proficient**
**VA:Pr5.1.HSI**
Analyze and evaluate the reasons and ways an exhibition is presented.

**Grade Hs accomplished**
**VA:Pr5.1.HSII**
Evaluate, select, and apply methods or processes appropriate to display artwork in a specific place.

**Grade Hs advanced**
**VA:Pr5.1.HSIII**
Investigate, compare, and contrast methods for preserving and protecting art.

---

**Visual Arts/Presenting**

**#VA:Pr6.1**

**Process Component:** Analyze

**Anchor Standard:** Convey meaning through the presentation of artistic work.

**Enduring Understanding:** Objects, artifacts, and artworks collected, preserved, or presented either by artists, museums, or other venues communicate meaning and a record of social, cultural, and political experiences resulting in the cultivating of appreciation and understanding.

**Essential Question:** What is an art museum? How does the presenting & sharing of objects, artifacts, & artworks influence & shape ideas, beliefs, & experiences? How do objects, artifacts, & artworks collected, preserved, or presented, cultivate appreciation & understanding?

**Grade Hs proficient**
VA:Pr6.1.HSI
Analyze and describe the impact that an exhibition or collection has on personal awareness of social, cultural, or political beliefs and understandings.

Grade Hs accomplished
VA:Pr6.1.HSII
Make, explain, and justify connections between artists or artwork and social, cultural, and political history.

Grade Hs advanced
VA:Pr6.1.HSIII
Curate a collection of objects, artifacts, or artwork to impact the viewer’s understanding of social, cultural, and/or political experiences.

Visual Arts/Responding
#VA:Re7.1

Process Component: Share
Anchor Standard: Perceive and analyze artistic work.
Enduring Understanding: Individual aesthetic and empathetic awareness developed through engagement with art can lead to understanding and appreciation of self, others, the natural world, and constructed environments.
Essential Question: How do life experiences influence the way you relate to art? How does learning about art impact how we perceive the world? What can we learn from our responses to art?

Grade Hs proficient
VA:Re7.1.HSI
Hypothesize ways in which art influences perception and understanding of human experiences.

Grade Hs accomplished
VA:Re7.1.HSII
Recognize and describe personal aesthetic and empathetic responses to the natural world and constructed environments.

Grade Hs advanced
VA:Re7.1.HSIII
Analyze how responses to art develop over time based on knowledge of and experience with art and life.

Visual Arts/Responding
#VA:Re7.2

Process Component: Perceive
Anchor Standard: Perceive and analyze artistic work.
Enduring Understanding: Visual imagery influences understanding of and responses to the world.
Essential Question: What is an image? Where and how do we encounter images in our world? How do images influence our views of the world?

Grade Hs proficient
VA:Re7.2.HSI
Analyze how one’s understanding of the world is affected by experiencing visual imagery.

Grade Hs accomplished
VA:Re7.2.HSII
Evaluate the effectiveness of an image or images to influence ideas, feelings, and behaviors of specific audiences.

**Grade Hs advanced**

VA:Re7.2.HSII

Determine the commonalities within a group of artists or visual images attributed to a particular type of art, timeframe, or culture.

**Visual Arts/Responding**

#VA:Re8.1

**Process Component:** Perceive  
**Anchor Standard:** Interpret intent and meaning in artistic work.  
**Enduring Understanding:** People gain insights into meanings of artworks by engaging in the process of art criticism.  
**Essential Question:** What is the value of engaging in the process of art criticism? How can the viewer "read" a work of art as text? How does knowing and using visual art vocabularies help us understand and interpret works of art?

**Grade Hs proficient**

VA:Re8.1.HSI

Interpret an artwork or collection of works, supported by relevant and sufficient evidence found in the work and its various contexts.

**Grade Hs accomplished**

VA:Re8.1.HSII

Identify types of contextual information useful in the process of constructing interpretations of an artwork or collection of works.

**Grade Hs advanced**

VA:Re8.1.HSIII

Analyze differing interpretations of an artwork or collection of works in order to select and defend a plausible critical analysis.

**Visual Arts/Responding**

#VA:Re9.1

**Process Component:** Analyze  
**Anchor Standard:** Apply criteria to evaluate artistic work.  
**Enduring Understanding:** People evaluate art based on various criteria.  
**Essential Question:** How does one determine criteria to evaluate a work of art? How and why might criteria vary? How is a personal preference different from an evaluation?

**Grade Hs proficient**

VA:Re9.1.HSI

Establish relevant criteria in order to evaluate a work of art or collection of works.

**Grade Hs accomplished**

VA:Re9.1.HSII

Determine the relevance of criteria used by others to evaluate a work of art or collection of works.

**Grade Hs advanced**

VA:Re9.1.HSIII

Construct evaluations of a work of art or collection of works based on differing sets of criteria.
Visual Arts/Connecting
#VA:Cn10.1
Process Component: Interpret
Anchor Standard: Synthesize and relate knowledge and personal experiences to make art.
Enduring Understanding: Through art-making, people make meaning by investigating and developing awareness of perceptions, knowledge, and experiences.
Essential Question: How does engaging in creating art enrich people's lives? How does making art attune people to their surroundings? How do people contribute to awareness and understanding of their lives and the lives of their communities through art-making?

Grade Hs proficient
VA:Cn10.1.HSI
Document the process of developing ideas from early stages to fully elaborated ideas.

Grade Hs accomplished
VA:Cn10.1.HSII
Utilize inquiry methods of observation, research, and experimentation to explore unfamiliar subjects through art-making.

Grade Hs advanced
VA:Cn10.1.HSIII
Synthesize knowledge of social, cultural, historical, and personal life with art-making approaches to create meaningful works of art or design.

Visual Arts/Connecting
#VA:Cn11.1
Process Component: Synthesize
Anchor Standard: Relate artistic ideas and works with societal, cultural, and historical context to deepen understanding.
Enduring Understanding: People develop ideas and understandings of society, culture, and history through their interactions with and analysis of art.
Essential Question: How does art help us understand the lives of people of different times, places, and cultures? How is art used to impact the views of a society? How does art preserve aspects of life?

Grade Hs proficient
VA:Cn11.1.HSI
Describe how knowledge of culture, traditions, and history may influence personal responses to art.

Grade Hs accomplished
VA:Cn11.1.HSII
Compare uses of art in a variety of societal, cultural, and historical contexts and make connections to uses of art in contemporary and local contexts.

Grade Hs advanced
VA:Cn11.1.HSIII
Appraise the impact of an artist or a group of artists on the beliefs, values, and behaviors of a society.

</table>

**Second meeting only**
This glossary was developed by the members of SCASS/Arts Education Assessment Consortium. The terms below are words/phrases in general use in the field of assessment.

**Accommodations**: Approved/standardized administrative or scoring adjustments (e.g., large print or Braille test booklets, individual or small group administrations, reading the test to the student) made for special populations taking standardized assessments.

**Accountability testing**: Using student achievement tests to measure the effectiveness of an educational program. Usually summative in nature and in the form of state or other large-scale test designed to conform to psychometric standards, an accountability test purports to assign responsibility for the success or failure of an educational program or system by demanding that schools demonstrate the impact and effectiveness of educational programs in order to justify the money invested in education. Accountability testing is designed to provide achievement data that is used to evaluate and presumably improve the system.

**Achievement test**: A test designed to measure students’ “school taught” learning, as opposed to their initial aptitude or intelligence.

**Alternative assessment**: Assessments other than traditional multiple-choice tests; most often used to describe performance assessments or other assessments that provide more feedback about student learning than whether the answer is correct or incorrect (Also see Accommodations)

**Analytic scoring**: A method of scoring performance assessments that yields multiple scores for the same task/performance. Performance is separated into major components, traits, or dimensions and each is independently scored. (e.g., a particular sample of a student’s writing may be assessed as grammatically correct at the same time it is assessed as poorly organized.) Analytic scoring is especially effective as a diagnostic tool.

**Anchor (Also called exemplars or benchmarks)**: A sample of student work (product or performance) used to illustrate each level of a scoring rubric; critical for training scorers of performances since it serves as a standard against which other student work is compared.

**Aptitude test**: A test which uses past learning and ability to predict what a person can do in the future; aptitude tests depend heavily on out-of-school experiences rather than in-school learning (Also see intelligence test).

**Assessment**: The process of collecting and analyzing data for the purpose of evaluation. The assessment of student learning involves describing, collecting, recording, scoring, and interpreting information about performance. A complete assessment of student learning should include measures with a variety of types.
of formats as developmentally appropriate. Assessments and the tests they use are usually classified by how the data are used; either formative, benchmark or interim, and summative.

**Authentic assessments**: Assessments that emulate the performance that would be required of the student in real-life situations.

**Benchmarks**: Identifiable points on a continuum toward a goal or standard. The term may be used to describe content standards when interim targets (benchmarks) have been set by age, grade, or developmental level; the term is also used interchangeably with “anchor” papers or performances which illustrate points of progress on an assessment scale (i.e., student works which exemplify the different levels of a scoring rubric). SCASS/AEAC Glossary of Assessment Terms Page 3 National Coalition for Core Arts Standards (2014) National Core Arts Standards. Rights Administered by the State Education Agency Directors of Arts Education. Dover, DE, www.nationalcoreartsstandards.org all rights reserved.

**CIA**: Acronym for curriculum, instruction, and assessment

**Cohort**: A group of students whose progress is followed and measured at different points in time

**Competency test**: A test intended to verify that a student has met standards (usually minimal) of skills and knowledge and therefore should be promoted, graduated, or perhaps deemed competent.

**Context**: The surrounding circumstances or environment in which an assessment takes place (e.g., embedded in the instruction or under standardized conditions [e.g., part of a large scale assessment]).

**Cornerstone assessment tasks**: Curriculum-embedded assessment tasks that are intended to engage students in applying their knowledge and skills in an authentic context. These tasks are described by their originator Jay McTighe as: • Curriculum embedded (as opposed to externally imposed) • Recurring across the grades, becoming increasingly sophisticated over time • Establishing authentic contexts for performance • Calling for understanding and transfer via genuine performance • Used as rich learning activities or assessments • Integrating 21st century skills (e.g., critical thinking, technology use, teamwork) with subject area content • Evaluating performance with established rubrics • Engaging students in meaningful learning while encouraging the best teaching • Providing content for student portfolios so that students graduate with a resume of demonstrated accomplishments rather than simply a transcript of courses taken. SCASS/AEAC Glossary of Assessment Terms Page 4 National Coalition for Core Arts Standards (2014) National Core Arts Standards. Rights Administered by the State Education Agency Directors of Arts Education. Dover, DE, www.nationalcoreartsstandards.org all rights reserved.

**Criteria** (Sometimes used as synonym for traits or attributes): The rules or guidelines used for categorizing or judging; in arts assessment, the rules or guidelines used to judge the quality of a student’s performance (Also see rubric, scoring guide, and scoring criteria)

**Criterion-referenced assessment**: An assessment designed to measure performance against a set of clearly defined criteria. Such assessments are used to identify student strengths and weaknesses with regard to specified knowledge and skills (which are the goals or standards of the instruction). Synonyms
include: standard-based or - referenced, objective-referenced, content-referenced, domain-referenced, or universe-referenced

**Curricular alignment:** The degree to which a curriculum’s scope, sequence, and content match standards, instruction, assessment, or instructional resources. Cut score (also called performance standard) performance level or numerical score established by the assessment system to describe how well the student performed. The cut score can be manipulated to increase or decrease the number “passing” or “failing” a test (Also see standard-setting)

**Descriptors:** Explanations that define the levels of scoring scales (Also see criteria)

**Dimension:** Specific traits, characteristics, or aspects of performance which are fairly independent of each other and can be scored separately (e.g., rhythm and melody can be scored separately for the same musical performance)

**Disaggregate (As in dissagregated data):** Pulling information apart (e.g., looking at the performance of various sub-groups instead of only the performance of the large group)

**Educational outcome:** An educational goal, expectation, or result that occurs at the end of an educational program or event (usually a culminating activity, product, or other measurable performance). Enhanced/extended multiple-choice assessments Selected-response assessments with additional parts (for more points); this additional part often requires the students to justify their answers, show their work, or explain why they marked a particular option

**Essay test:** A paper-and-pencil test that requires students to construct their entire brief or extensive responses to the question(s); should be limited to measuring higher levels of learning

**Extended-response assessments:** An essay question or performance assessment, which requires an elaborated or graphic response that expresses ideas and their interrelationships in a literate and organized manner

**Evaluation:** A judgment about the worth or quality of something. In education, data from tests, tasks, or performances are used to make judgments about the success of the student or program

**Formative Assessment (Sometimes referred to as Assessment for Learning):** A process used by teachers and students during instruction that provides feedback to adjust ongoing teaching and learning to improve students’ achievement of intended instructional outcomes. Short interval and usually classroom-based assessments that have immediate information for teachers and students to inform the instructional process and determine what comes next in the learning process

**Generalizability:** The degree to which the performances measured by a set of assessment items/tasks are representative of the entire domain being assessed (E.g., is one performance assessment sufficient for drawing conclusions about a student’s ability to critique works of art?); may also be an issue in drawing a sample of students from a population (i.e. the degree to which a sample of students is representative of the population from which it is drawn).
Grade equivalent: A score, available from some standardized tests, which describes the performance of students according to how it resembles the performance of students in various grades. A GE of 5.5 means that the student is performing like a student in the fifth month of the fifth grade.

Grading: A rating system for evaluating student work; grades are usually letters or numbers and their meaning varies widely across teachers, subjects, and systems.

High-stakes testing: Any testing program for which the results have highly significant consequences for students, teachers, schools, and/or districts. These summative tests are frequently used as accountability devices to determine effectiveness or success.

Holistic method: A scoring method which assigns a single score based on an overall appraisal or impression of performance rather than analyzing the various dimensions separately. A holistic scoring rubric can be specifically linked to focused (written) or implied (general impression) criteria. Some forms of holistic assessment do not use written criteria at all but rely solely on anchor papers for training and scoring.

Intelligence tests: Tests designed to measure general cognitive functioning; group or individually administered tests used to determine mental age as compared to chronological age (MA/CA x 100 = IQ [intelligence quotient]); i.e., the “average” IQ of the population is 100. Some intelligence tests do not calculate mental age but compare an individual’s performance to the performance of a norm group at various developmental levels, generating verbal and performance scores with a mean or “average” score of 100.

Item Analysis: A statistical analysis of the items on a selected-response test to determine the relationship of the item to the test’s validity and reliability as a whole. The number and nature of the students selecting each option are analyzed.

Matrix sampling: A process used to estimate the performance of large groups through testing a representative sample of the students. Each student in the sample may be given only a small segment of the total assessment.

Mean: The arithmetic average of a group of scores; one of three measures of central tendency, a way to describe a group of scores with a single number.

Median: A measure of central tendency, which identifies the point on the scale that separates a group of scores so that there is an equal number of scores above and below it.

Metacognition: The ability to think about one’s own thinking; the knowledge that individuals have of their own thinking processes and strategies and their ability to monitor and regulate those processes.

Multiple-choice test: A test consisting of items (questions or incomplete statements) followed by a list of choices from which students have to select the correct or best response.
Multiple Measures: The use of a variety of assessments to evaluate performance in a subject area (e.g., using multiple-choice items, short answer questions, and performance tasks to assess student achievement in a subject); the use of multiple measures is advocated to obtain a fair and comprehensive measurement of performance.

Mode: A measure of central tendency which identifies the most frequent score in a group of scores (e.g., in the group of scores: 1, 2, 8, 9, 9, 10, the mode is 9).

Norm: The midpoint or “average” score for the group of students to which a norm-referenced test was initially administered (the norm group). By design, 50% of the students score below and 50% above this score SCASS/AEAC Glossary of Assessment Terms Page 8 National Coalition for Core Arts Standards (2014) National Core Arts Standards. Rights Administered by the State Education Agency Directors of Arts Education. Dover, DE, www.nationalcoreartsstandards.org all rights reserved.

Norm group: A group of students that is first administered a standardized norm-referenced test by its developers in order to establish scores for interpreting the performance of future testtakers.

Norm-referenced test: A standardized test which compares the performance of students to an original group that took the test (the norm group); results usually reported in terms of percentile scores (e.g., a score of 90 means that the student did better than 90% of the norm group).

Normal curve equivalent (NCE): A normalized standard score used to compare scores across tests with different scales and/or between students on the same test (since arithmetic manipulations should not use percentiles); it has a mean of 50, a standard deviation of 21.06 and is often required for reporting by federal funding agencies such as Title I.

Open-ended assessments: Constructed assessments (frequently tasks or problems) that require students to generate a solution to a problem for which there is no single correct answer (e.g., create a drawing that uses symbols of the Renaissance).

Percentile: A statistic provided by standardized norm-referenced tests which describes the performance of a student as compared to that of the norm group. The range is 1 to 99 with 50 denoting average performance. A student scoring at the 65th percentile performed better than, or as well as, 65% of the norm group.

Performance assessment: A task/event/performance designed to measure a student’s ability to directly demonstrate particular knowledge and skills. E.g., a student may be asked to demonstrate some physical or artistic achievement: play a musical instrument, create or critique a work of art, or improvise a dance or a scene. These kinds of assessments (e.g., tasks, projects, portfolios, etc.) are scored using rubrics: established criteria for acceptable performance.

Portfolio: A purposeful collection of student work across time which exhibits a student’s efforts, progress, or level of proficiency. Examples of types of portfolios include: showcase (best work), instructional, assessment (used to evaluate the student, and process or project (shows all phases in the development of a product or performance).
Primary trait scoring: A type of rubric scoring constructed to assess a specific trait, skill or format or the impact on a designated audience. (Also see analytic scoring.) Project a type of performance assessment which is complex, usually requiring more than one type of activity, process, or product for completion.

Quartile: A way of describing the position of a score on a norm referenced test, e.g., the score falls in one of four groups: 0-25th percentile, 26th-40th percentile, etc.

Quintile: A way of describing the position of a score on a norm referenced test, e.g., the score falls in one of five groups: 0-20th percentile, 21-40th percentile, etc.

Range: The most rudimentary method of describing how much a group of scores vary; range is determined by subtracting the lowest from the highest score in the group.

Rating scale: A scale used to evaluate student learning using a gradation of numbers or labels; a Likert rating scale is frequently used to measure attitudes or perceptions.

Reliability: A measure of the consistency of an assessment across time, judges and subparts of the assessment (assuming no real change in what is being measured)

Rating scale: A scale used to evaluate student learning using numbers or labels (e.g., a Likert scale)

Rubric (Sometime referred to as a scoring guide or scoring criteria): An established, ordered set of criteria for judging student performance/products; it includes performance descriptors of student work at various levels of achievement.

Sampling: A way to get information about a large group by examining a smaller representative number of the group (the sample)

Scale score: A score indicating an individual’s performance on a standardized test, which allows comparisons across sub-groups and time (E.g., one could use scale scores to compare test results among classes, schools, and districts; or across grades from year to year)

Scaffolded assessments: A set of context-dependent assessments, which are sequenced to measure ascending levels of learning; this set usually contains a variety of item formats (from multiple-choice to performance tasks) about a single stimulus (e.g., a specific set of materials: a particular situation, scenario, problem, or event). Since these kinds of assessments can measure a variety of kinds of learning, they provide the opportunity for diagnosis of instruction and identification of student strengths and weaknesses.

Scoring criteria: The rules or guidelines used to assign a score (a number or a label) indicating the quality of a performance; in the analytic scoring of a performance, different rules may be applied to different dimensions or traits of the performance.

Scoring guide: Directions for scoring and/or interpreting scores; the guide may include general instructions for raters, training notes, rating scales, rubric, and student work.
kind of test item for which students have to select the best or correct answer from a list of options (multiple-choice, etc.) or indicate the truth or falsity of a statement

Self-assessment: Collecting data about one’s own performance for the purpose of evaluating it. Self-evaluation may include the comparison of one’s own performance against established criteria, change in performance over time, and/or a description of current performance. Three types of educational standards are frequently used in education today

Standard deviation: A measure of the variability of a group of scores. When the standard deviation is high, students are performing very differently from each other; if it is low, students are performing similarly to one another

Standard error of measurement: A statistic used to indicate the consistency and reliability of a measurement instrument; a large standard error of measurement indicates that we have less confidence in the obtained score

Standards-based instruction: Instruction designed, taught, and assessed using Standards • Content standards specify what students should know and be able to do in a specific content area—the essential knowledge, skills, processes, and procedures students must learn and be able to demonstrate. They answer the question: “What should be learned in this subject?” Student standards have been developed for periods of time ranging from individual grade levels to lifelong learning • Performance standards specify the degree or quality of learning students are expected to demonstrate in the subject. They answer the question: “How good is good enough?” The national standards for the arts use the term “achievement standards” to avoid confusion between arts performance and performance assessment (Some states refer to established levels of proficiency instead of performance standards) • Opportunity-to-learn standards specify what schools must provide to enable students to meet content and performance standards. student standards (achievement targets)

Stanine: A standard 9-point scale used to report the results of norm-referenced tests in order to allow comparison of scores across students, schools, districts, tests, grades, etc. The mean is 5 and the standard deviation approximately 2. Stanines of 1-3 are considered below average; 4-6 average; and 7-9 above average

Standardized test: A test administered to a group of persons under the same specific conditions so student results can be fairly compared

Summative Assessment: The effort to summarize student learning at a particular point in time such as the end of a chapter, unit, grading period, semester, year, or end of course

Test: A sample of behavior or performance administered in order to provide a basis for inferences about a larger subject area or domain of study. E.g., a teacher may administer a 30-minute test to provide evidence of the student’s learning for the last two weeks or for a particular unit of instruction. The test may be norm- or criterion-referenced, traditional (e.g., multiple-choice, short answer, essay, etc.), or
performance-based. A teacher-made test is one prepared and administered by the teacher, usually for use in the classroom

**Validity:** A characteristic of a measure which refers to its ability to measure what it is intended to measure AND do so reliably (i.e., measures consistently across time, judges, and subparts). A valid measure is both accurate and consistent; e.g., a bathroom scale may record 100 pounds every time a person gets on it, but if he or she actually weighs 120, the scale is reliable but not valid. Types of validity include:  
- **Content validity**—The assessment has content validity if it measures the content or area it intends to measure  
- **Concurrent validity**—The assessment has concurrent validity if it is correlated with other measures of that particular content or area  
- **Predictive validity**—The assessment has predictive validity if it predicts later actual performance of the individual in that subject or area. Predictive validity is related to generalizability
DANCE GLOSSARY OF TERMS

**Aesthetic:** A set of principles concerned with the nature and appreciation of beauty

**Alignment:** The process of adjusting the skeletal and muscular system to gravity to support effective functionality

**Alternative performance venue:** A performance site other than a standard Western style theater (for example, classroom, site specific venue, or natural environment)

**Anatomical principles:** The way the human body’s skeletal, muscular and vascular systems work separately and in coordination

**Artistic criteria:** Aspects of craft and skill used to fulfill artistic intent

**Artistic expression:** The manifestations of artistic intent though dance, drama, music, poetry, fiction, painting, sculpture or other artistic media.

**Artistic statement:** An artist’s verbal or written introduction of their work from their own perspective to convey the deeper meaning or purpose

**Body patterning:** Neuromuscular patterns (for example, core-distal, head-tail, homologous [upper-lower], homo-lateral [same-side], cross-lateral [crossing the body midline])

**Body-mind principles:** Concepts explored and/or employed to support body-mind connections (for example, breath, awareness of the environment, grounding, movement initiation, use of imagery, intention, inner-outer, stability-mobility)

**Body-use:** The ways in which movement patterns and body parts are used in movement and dance practice; descriptive method of identifying patterns

**Bound movement:** An “effort element” from Laban Movement Analysis in which energy flow is constricted

**Capstone Project:** A culminating performance-based assessment that determines what 12th graders should know and be able to do in various educational disciplines; usually based on research and the development of a major product or project that is an extension of the research

**Choreographic devices:** Manipulation of dance movement, sequences or phrases (repetition, inversion, accumulation, cannon, retrograde, call and response)

**Codified movement:** Common motion or motions set in a particular style that often have specific names and expectations associated with it

**Context clues:** Information obtained from the dance that helps one understand or comprehend meaning and intent from a movement, group of movements, or a dance as a whole; requires seeing
**Contrapuntal:** An adjective that describes the noun counterpoint; music that has at least two melodic lines (voices) played simultaneously against each other; in dance, at least two movement patterns, sequences or phrases danced simultaneously using different body parts or performed by different dancers.

**Cultural movement practice:** Physical movements of a dance that are associated with a particular country, community, or people.

**Dance literacy:** The total experience of dance learning that includes the doing and knowing about dance: dance skills and techniques, dance making, knowledge and understanding of dance vocabulary, dance history, dance from different cultures, dance genres, repertory, performers and choreographers, dance companies, and dance notation and preservation.

**Dance movement principles:** Fundamentals related to the craft and skill with which dance movement is performed (for example, the use of dynamic alignment, breath support, core support, rotation, initiation and sequencing, and weight shift).

**Dance phrase:** A brief sequence of related movements that have a sense of continuity and artistic or rhythmic completion.

**Dance structures:** The organization of choreography and movement to fulfill the artistic intent of a dance or dance study (for example, AB, ABA or theme and variation); often referred to as choreographic form.

**Dance study:** A short dance that is comprised of several dance phrases based on an artistic idea.

**Dance techniques:** The tools and skills needed to produce a particular style of movement.

**Dance terminology:** Vocabulary used to describe dance and dance experiences. Simple dance terminology (for example, locomotor words walk, run, tip-toe, slither, roll, crawl, jump, march, and gallop; and non-locomotor words, bend, twist, turn, open and close). Vocabulary used to describe dance movement techniques, structures, works, and experiences that are widely shared in the field of dance; genre-specific dance terminology used to describe movement within specific dance forms ballet, contemporary, culturally-specific dance, funk, hip-hop, jazz, modern, tap, and others.

**Dance work:** A complete dance that has a beginning, middle (development), and end.

**Dynamics:** The qualities or characteristics of movement which lend expression and style; also called “efforts,” or “energy (for example, lyrical, sustained, quick, light, or strong).

**Elements of dance:** The key components of movement; movement of the body using space, time, and energy; often referred to as the elements of movement.

**Embody:** To physicalize a movement, concept, or idea throughout the body.

**Energy:** The dynamic quality, force attach, weight, and flow of movement.
Evaluative Criteria: The definition of values and characteristics with which dance can be assessed; factors to be considered to attain an aesthetically satisfying dance composition or performance

Explore: Investigate multiple movement possibilities to learn more about an idea

Free flowing movement: An “effort element” from Laban Movement Analysis in which energy is continuous

Functional alignment: The organization of the skeleton and musculature in a relationship to gravity that supports safe and efficient movement while dancing

General Space: Spatial orientation that is not focused towards one area of a studio or stage

Genre: A category of dance characterized by similarities in form, style, purpose, or subject matter (for example, ballet, hip hop, modern, ballroom, cultural practices)

Kinesthetic awareness: pertaining to sensations and understanding of bodily movement

Locomotor: Movement that travels from one location to another or in a pathway through space (for example, in PreK, walk, run, tip-toe, slither, roll, crawl, jump, march, gallop; in Kindergarten, the addition of prance, hop, skip, slide, leap)

Movement Characteristics: The qualities, elements, or dynamics that describe or define a movement

Movement phrase: A brief sequence of related movements that have a sense of continuity and artistic or rhythmic completion

Movement problem: A specific focus that requires one to find a solution and complete a task; gives direction and exploration in composition

Movement vocabulary: Codified or personal movement characteristics that define a movement style

Negative space: The area (space) around and between the dancer(s) or dance images(s) in a dance

Non-locomotor: Movement that remains in place; movement that does not travel from one location to another or in a pathway through space for example, in PreK, bend, twist, turn, open, close; in Kindergarten, swing, sway, spin, reach, pull)

Performance etiquette: Performance values and expected behaviors when rehearsing or performing (for instance, no talking while the dance is in progress, no chewing gum, neat and appropriate appearance, dancers do not call out to audience members who are friends)

Personal space: The area of space directly surrounding one’s body extending as far as a person can reach; also called the kinesphere

Polyrhythmic: In music, several rhythms layered on top of one another and played simultaneously; in dance, embodying several rhythms simultaneously in different body parts
Production elements: Aspects of performance that produce theatrical effects (for example, costumes, make up, sound, lighting, props)

Production terminology: Words commonly used to refer to the stage, performance setting, or theatrical aspects of dance presentation

Rhythm: The patterning or structuring of time through movement or sound

See.Think.Wonder: An inquiry-based Visual Thinking Strategy (VTS) used for critical analysis from Harvard Project Zero, in which children respond to simple questions (What do you see? What do you think? What do you wonder?) which enable a child to begin make meaning from an observed (dance) work of art

Sound Environment: Sound accompaniment for dancing other than music (for example, street noise, ocean surf, bird calls, spoken word)

Space: Components of dance involving direction, pathways, facings, levels, shapes, and design; the location where a dance takes place; the element of dance referring to the cubic area of a room, on a stage, or in other environments

Spatial design: Pre-determined use of directions, levels, pathways, formations, and body shapes

Stimuli: A thing or event that inspires action, feeling, or thought

Style: Dance that has specific movement characteristics, qualities, or principles that give it distinctive identity (for example, Graham technique is a style of Modern Dance; rhythm tap is a style of Percussive Dance; Macedonian folk dance is a style of International Folk dance; Congolese dance is a style of African Dance)

Technical dance skills: The degree of physical proficiency a dancer achieves within a dance style or technique (for example, coordination, form, strength, speed and range)

Tempi: Different paces or speeds of music, or underlying beats or pulses, used in a dance work or composition (singular: tempo)

Tempo: The pace or speed of a pulse or beat underlying music or movement (plural: tempi or tempos)

Theme: A dance idea that is stated choreographically
MEDIA ARTS GLOSSARY OF TERMS

**Balance:** Principle of the equitable and/or dynamic distribution of items in a media arts composition or structure for aesthetic meaning, as in a visual frame, or within game architecture.

**Components:** Discrete portions and aspects of media artworks, including: elements, principles, processes, parts, assemblies, etc., such as: light, sound, space, time, shot, clip, scene, sequence, movie, narrative, lighting, cinematography, interactivity, etc.

**Composition:** Principle of arrangement and balancing of components of a work for meaning and message.

**Constraints:** Limitations on what is possible, both real and perceived.

**Contrast:** Principle of using the difference between items, such as elements, qualities and components, to mutually complement them.

**Continuity:** The maintenance of uninterrupted flow, continuous action or self-consistent detail. across the various scenes or components of a media artwork, i.e. game components, branding, movie timeline, series, etc.

**Context:** The situation surrounding the creation or experience of media artworks that influences the work, artist or audience. This can include how, where, and when media experiences take place, as well as additional internal and external factors (personal, societal, cultural, historical, physical, virtual, economic, systemic, etc.)

**Convention:** An established, common, or predictable rule, method, or practice within media arts production, such as the notion of a ‘hero’ in storytelling.

**Copyright:** The exclusive right to make copies, license, and otherwise exploit a produced work.

**Digital identity:** How one is presented, perceived and recorded online, including personal and collective information and sites, e-communications, commercial tracking, etc.

**Divergent thinking:** Unique, original, uncommon, idiosyncratic ideas; thinking “outside of the box”

**Design thinking:** A cognitive methodology that promotes innovative problem solving through the prototyping and testing process commonly used in design.

**Emphasis:** Principle of giving greater compositional strength to a particular element or component in a media artwork.

**Ethics:** Moral guidelines and philosophical principles for determining appropriate behavior within media arts environments.

**Exaggeration:** Principle of pushing a media arts element or component into an extreme for provocation, attention, contrast, as seen in character, voice, mood, message, etc.
**Experiential Design:** Area of media arts wherein interactive, immersive spaces and activities are created for the user; associated with entertainment design

**Fairness:** Complying with appropriate, ethical and equitable rules and guidelines

**Fair use:** Permits limited use of copyrighted material without acquiring permission from the rights holders, including commentary, search engines, criticism, etc.

**Force:** Principle of energy or amplitude within an element, such as the speed and impact of a character’s motion

**Generative methods:** Various inventive techniques for creating new ideas and models, such as brainstorming, play, open exploration, experimentation, inverting assumptions, rulebending, etc.

**Hybridization:** Principle of combining two existing media forms to create new and original forms, such as merging theatre and multimedia

**Interactivity:** A diverse range of articulating capabilities between media arts components, such as user, audience, sensory elements, etc., that allow for inputs and outputs of responsive connectivity via sensors, triggers, interfaces, etc., and may be used to obtain data, commands, or information and may relay immediate feedback, or other communications; contains unique sets of aesthetic principles

**Juxtaposition:** Placing greatly contrasting items together for effect

**Legal:** The legislated parameters and protocols of media arts systems, including user agreements, publicity releases, copyright, etc.

**Manage audience experience:** The act of designing and forming user sensory episodes through multi-sensory captivation, such as using sequences of moving image and sound to maintain and carry the viewer’s attention, or constructing thematic spaces in virtual or experiential design

**Markets:** The various commercial and informational channels and forums for media artworks, such as T.V., radio, internet, fine arts, non-profit, communications, etc.

**Media arts contexts:** The diverse locations and circumstances of media arts, including its markets, networks, technologies and vocations

**Media environments:** Spaces, contexts and situations where media artworks are produced and experienced, such as in theaters, production studios and online

**Media literacy:** A series of communication competencies, including the ability to access, analyze, evaluate, and communicate information in a variety of forms, including print and nonprint messages – National Association for Media Literacy Education

**Media messages:** Various artistic, emotional, expressive, prosaic, commercial, utilitarian and informational communications of media artworks
Meaning: The formulation of significance and purposefulness in media artworks

Modeling /concept modeling: Creating a digital or physical representation or sketch of an idea, usually for testing; prototyping

Movement: Principle of motion of diverse items within media artworks

Multimodal perception: Coordinated and synchronized integration of multiple sensory systems (vision, touch, auditory, etc.) in media artworks

Multimedia theatre: The combination of live theatre elements and digital media (sound, projections, video, etc.) into a unified production for a live audience

Narrative structure: The framework for a story, usually consisting of an arc of beginning, conflict and resolution

Personal aesthetic: An individually formed, idiosyncratic style or manner of expressing oneself; an artist’s “voice”

Perspective: Principle pertaining to the method of three-dimensional rendering, point-of-view, and angle of composition

Point of view: The position from which something or someone is observed; the position of the narrator in relation to the story, as indicated by the narrator's outlook from which the events are depicted and by the attitude toward the characters

Positioning: The principle of placement or arrangement

Production processes: The diverse processes, procedures, or steps used to carry out the construction of a media artwork, such as prototyping, playtesting, and architecture construction in game design

Prototyping: Creating a testable version, sketch or model of a media artwork, such as a game, character, website, application, etc.

Resisting closure: Delaying completion of an idea, process or production, or persistently extending the process of refinement, towards greater creative solutions or technical perfection

Responsive use of failure: Incorporating errors towards persistent improvement of an idea, technique, process or product

Rules: The laws, or guidelines for appropriate behavior; protocols

Safety: Maintaining proper behavior for the welfare of self and others in handling equipment and interacting with media arts environments and groups

Soft skills: Diverse organizational and management skills, useful to employment, such as collaboration, planning, adaptability, communication, etc.
**Stylistic convention:** A common, familiar, or even “formulaic” presentation form, style, technique or construct, such as the use of tension building techniques in a suspense film

**Systemic Communications:** Socially or technologically organized and higher-order media arts communications such as networked multimedia, television formats and broadcasts, “viral” videos, social multimedia (e.g. “vine” videos), remixes, transmedia, etc.

**System(s):** The complex and diverse technological structures and contexts for media arts production, funding, distribution, viewing, and archiving

**Technological:** The mechanical aspects and contexts of media arts production, including hardware, software, networks, code, etc.

**Tone:** Principle of “color”, “texture” or “feel” of a media arts element or component, as for sound, lighting, mood, sequence, etc.

**Transdisciplinary production:** Accessing multiple disciplines during the conception and production processes of media creation, and using new connections or ideas that emerge to inform the work

**Transmedia production:** Communicating a narrative and/or theme over multiple media platforms, while adapting the style and structure of each story component to the unique qualities of the platforms

**Virtual channels:** Network based presentation platforms such as: Youtube, Vimeo, Deviantart, etc.

**Virtual worlds:** Online, digital, or synthetic environments (e.g. Minecraft, Second Life)

**Vocational:** The workforce aspects and contexts of media arts
MUSIC GLOSSARY OF TERMS

AB: Musical form consisting of two sections, A and B, which contrast with each other (binary form)

ABA: Musical form consisting of three sections, A, B, and A; two are the same, and the middle one is different (ternary form)

Ability: Natural aptitude in specific skills and processes; what the student is apt to do, without formal instruction

Academic vocabulary: words that traditionally are used in academic dialogue and text

Analog tools: Category of musical instruments and tools that are non-digital (i.e., do not transfer sound in or convert sound into binary code), such as acoustic instruments, microphones, monitors, and speakers

Analyze: Examine in detail the structure and context of music

Arrangement: Setting or adaptation of an existing musical composition

Arranger: Person who creates alternative settings or adaptations of existing music

Articulation: Characteristic way in which musical tones are connected, separated, or accented; types of articulation include legato (smooth, connected tones) and staccato (short, detached tones)

Artistic literacy: Knowledge and understanding required to participate authentically in the Arts

Atonality: Music in which no tonic or key center is apparent

Audiate: Hear and comprehend sounds in one’s head (inner hearing), even when no sound is present

Audience etiquette: Social behavior observed by those attending musical performances and which can vary depending upon the type of music performed

Beat: Underlying steady pulse present in most music

Benchmark: Pre-established definition of an achievement level, designed to help measure student progress toward a goal or standard, expressed either in writing or as an example of cored student work (aka, anchor set)

Binary form: (See AB)

Body percussion: Use of the human body as an instrument to create percussive/rhythmic sounds such as stomping, patsching (patting thighs), clapping, clicking, snapping

Bordun: Accompaniment created by sounding two tones, five notes apart, continuously throughout a composition; can be performed in varying ways, such as simultaneously or alternating
Chant: Most commonly, the rhythmic recitation of rhymes, or poems without a sung melody; a type of singing, with a simple, unaccompanied melody line and free rhythm

Chart: Jazz or popular music score, often abbreviated, with a melody (including key and time signature) and a set of chord changes

Chord progression: Series of chords sounding in succession; certain progressions are typical in particular styles/genres of music

Collaboratively: Working together on a common (musical) task or goal

Collaboratively-developed criteria: Qualities or traits for assessing achievement level that have been through a process of collective decision-making

Complex formal structure: Musical form in which rhythmic, melodic, harmonic, and/or other musical materials undergo significant expansion and development, and may be more distantly related across sections while remaining coherent in some way, such as sonata or other novel design with three or more sections

Composer: One who creates music compositions

Composition: Original piece of music that can be repeated, typically developed over time, and preserved either in notation or in a sound recording

Compositional devices: Tools used by a composer or arranger to create or organize a composition or arrangement, such as tonality, sequence, repetition, instrumentation, orchestration, harmonic/melodic structure, style, and form

Compositional techniques: Approaches a composer uses to manipulate and refine the elements to convey meaning and intent in a composition, such as tension-release, augmentation-diminution, soundsilence, motion-stasis, in addition to compositional devices

Concepts, music: Understandings or generalized ideas about music that are formed after learners make connections and determine relationships among ideas

Connection: Relationship among artistic ideas, personal meaning, and/or external context

Context: Environment that surrounds music, influences understanding, provides meaning, and connects to an event or occurrence

Context, cultural: Values, beliefs, and traditions of a group of people that influence musical meaning and inform culturally authentic musical practice

Context, historical: Conditions of the time and place in which music was created or performed that provide meaning and influence the musical experience
Context, personal: Unique experiences and relationships that surround a single person and are influenced by personal life, family, habits, interest, and preferences

Context, social environment: Surrounding something or someone’s creation or intended audience that reflects and influences how people use and interpret the musical experience

Craftsmanship: Degree of skill and ability exhibited by a creator or performer to manipulate the elements of music in a composition or performance

Create: Conceive and develop new artistic ideas, such as an improvisation, composition, or arrangement, into a work

Creative intent: Shaping of the elements of music to express and convey emotions, thoughts, and ideas

Creator: One who originates a music composition, arrangement, or improvisation

Criteria: Guidelines used to judge the quality of a student’s performance (See Rubric)

Cultural context: Values, beliefs, and traditions of a group of people that influence musical meaning and inform culturally authentic musical practice

Culturally authentic performance: Presentation that reflects practices and interpretation representative of the style and traditions of a culture

Culture: Values and beliefs of a particular group of people, from a specific place or time, expressed through characteristics such as tradition, social structure, religion, art, and food

Cyclical structure: Musical form characterized by the return or “cycling around” of significantly recognizable themes, motives, and/or patterns across movements

Demonstrate: Show musical understanding through observable behavior such as moving, chanting, singing, or playing instruments

Diatonic: Seven-tone scale consisting of five whole steps and two half steps

Digital environment: Simulated place made or created through the use of one or more computers, sensors, or equipment

Digital notation: A visual image of musical sound created by using computer software applications, intended either as a record of sound heard or imagined, or as a set of visual instructions for performers

Digital resources: Anything published in a format capable of being read by a computer, a web-enabled device, a digital tablet, or smartphone

Digital systems: Platforms that allow interaction and the conversion between and through the audio and digital domains
Digital tools: Category of musical instruments and tools that manipulate sound using binary code, such as electronic keyboards, digital audio interfaces, MIDI, and computer software

Dynamics: Level or range of loudness of a sound or sounds

Elements of music: Basic characteristics of sound (pitch, rhythm, harmony, dynamics, timbre, texture, form, and style/articulation) that are manipulated to create music

Enduring understanding: Overarching (aka, “big”) ideas that are central to the core of the music discipline and may be transferred to new situations

Ensemble: Group of individuals organized to perform artistic work: traditional, large groups such as bands, orchestras, and choirs; chamber, smaller groups, such as duets, trios, and quartets; emerging, such as guitar, iPad, mariachi, steel drum or pan, and Taiko drumming

Essential question: Question that is central to the core of a discipline – in this case, music – and promotes investigation to uncover corresponding enduring understanding(s)

Established criteria: Traits or dimensions for making quality judgments in music of a particular style, genre, cultural context, or historical period that have gained general acceptance and application over time

Expanded form: Basic form (such as AB, ABA, rondo or theme and variation) expanded by the addition of an introduction, transition, and/or coda

Explore: Discover, investigate, and create musical ideas through singing, chanting, playing instruments, or moving to music

Expression: Feeling conveyed through music

Expressive aspects: Characteristics that convey feeling in the presentation of musical ideas

Expressive intent: Emotions, thoughts, and ideas that a performer or composer seeks to convey by manipulating the elements of music

Expressive qualities: Qualities such as dynamics, tempo, articulation which -- when combined with other elements of music -- give a composition its musical identity

Form: Element of music describing the overall organization of a piece of music, such as AB, ABA, rondo, theme and variations, and strophic form

Formal design: Large-scale framework for a piece of music in which the constituent parts cohere into a meaningful whole; encompasses both structural and tonal aspects of the piece

Fret: Thin strip of material placed across the fingerboard of some stringed Instruments, such as guitar, banjo, and mandolin; the fingers press the strings against the frets to determine pitch
**Function:** Use for which music is created, performed, or experienced, such as dance, social, recreation, music therapy, video games, and advertising

**Fundamentals of music theory:** Basic elements of music, their subsets, and how they interact: rhythm and meter; pitch and clefs; intervals; scales, keys and key signatures; triads and seventh chords

**Fusion:** Type of music created by combining contrasting styles into a new style

**Genre:** Category of music characterized by a distinctive style, form, and/or content, such as jazz, march, and country

**Guidance:** Assistance provided temporarily to enable a student to perform a musical task that would be difficult to perform unaided, best implemented in a manner that helps develop that student’s capacity to eventually perform the task independently

**Harmonic sequences:** Series of two or more chords commonly used to support melody(ies)

**Harmonizing instruments:** Musical instruments, such as guitars, ukuleles, and keyboards, capable of producing harmonies as well as melodies, often used to provide chordal accompaniments for melodies and songs

**Harmonization:** Process of applying stylistically appropriate harmony, such as chords, countermelodies, and ostinato, to melodic material

**Harmony:** Chordal structure of a music composition in which the simultaneous sounding of pitches produces chords and their successive use produces chord progressions

**Heterophonic:** Musical texture in which slightly different versions of the same melody sound simultaneously

**Historical context:** Conditions of the time and place in which music was created or performed and that provide meaning and influence the musical experience

**Historical periods:** Period of years during which music that was created and/or performed shared common characteristics; historians of Western art music typically refer to the following: Medieval (ca. 500-ca. 1420), Renaissance (ca. 1420-ca. 1600), Baroque (ca. 1600-ca. 1750), Classic (ca. 1750-ca. 1820), Romantic (ca. 1820-ca. 1900), and Contemporary (ca. 1900)

**Homophonic:** Musical texture in which all parts move in the same rhythm but use different pitches, as in hymns; also, a melody supported by chords

**Iconic notation:** Representation of sound and its treatment using lines, drawings, pictures

**Imagine:** Generate musical ideas for various purposes and contexts

**Imagination:** Ability to generate in the mind ideas, concepts, sounds, and images that are not physically present and may not have been previously experienced (See Audiate)
Improvisation: Music created and performed spontaneously or “in-the-moment,” often within a framework determined by the musical style

Improviser: One who creates music spontaneously or “in-the-moment”

Independently: Working with virtually no assistance, initiating appropriate requests for consultation, performing in a self-directed ensemble offering ideas/solutions that make such consulting collaborative rather than teacher-directed

Intent: Meaning or feeling of the music planned and conveyed by a creator or performer

Interpret: Determine and demonstrate music’s expressive intent and meaning when responding and performing

Interpretation: Intent and meaning that a performer realizes in studying and performing a piece of music

Intervals: Distance between two tones, named by counting all pitch names involved; harmonic interval occurs when two pitches are sounded simultaneously, and melodic interval when two pitches are sounded successively

Intonation: Singing or playing the correct pitch in tune

Key signature: Set of sharps or flats at the beginning of the staff, following the clef sign, that indicates the primary pitch set or scale used in the music and provide clues to the resting tone and mode

Lead-sheet notation: System symbol used to identify chords in jazz, popular, and folk music; uppercase letters are written above the staff, specifying which chords should be used and when they should be played

Lyrics: Words of a song

Major scale: Scale in which the ascending pattern of whole and half steps is whole, whole, half, whole, whole, whole, half

Melodic contour: Shape of a melody created by the way its pitches repeat and move up and down in steps and skips

Melodic passage: Short section or series of notes within a larger work that constitutes a single coherent melodic idea

Melodic pattern: Grouping, generally brief, of tones or pitches

Melody: Linear succession of sounds (pitches) and silences moving through time; the horizontal structure of music

Meter: Grouping of beats and divisions of beats in music, often in sets of twos (duple meter) or threes (triple meter)
Minor scale: Scale in which one characteristic feature is a half-step between the second and third tones; the three forms of the minor scale are natural, harmonic, and melodic

Modal: Music based on a mode other than major or minor

Modes: Seven-tone scales that include five whole steps and two half steps; the seven possible modes — Ionian, Dorian, Phrygian, Lydian, Mixolydian, Aeolian, and Locrian — were used in the Medieval and Renaissance periods and served as the basis from which major (Ionian) and minor (Aeolian) scales emerged

Model cornerstone assessment: Suggested assessment process, embedded within a unit of study, that includes a series of focused tasks to measure student achievement within multiple process components

Moderately complex formal structure: Musical form with three or more sections (such as rounded binary, rondo, or other novel design), in which section closure is somewhat nuanced or ambiguous, and the rhythmic, melodic, harmonic, and/or other musical materials across sections may be more distantly related while remaining coherent in some way

Mood: Over-all feeling that a section or piece of music conveys

Monophonic: Musical texture consisting of a single, unaccompanied melodic line

Motif/motive: Brief rhythmic/melodic figure or pattern that recurs throughout a composition as a unifying element

Movement: Act of moving in nonlocomotor (such as clapping and finger snapping) and locomotor (such as walking and running) patterns to represent and interpret musical sounds

Music literacy: Knowledge and understanding required to participate authentically in the discipline of music by independently carrying out the artistic processes of creating, performing, and responding

Music theory: Study of how music is composed and performed; analysis of the elements of music and the framework for understanding musical works

Music vocabulary: Domain-specific words traditionally used in performing, studying, or describing music (See Academic vocabulary)

Musical criteria: Traits relevant to assessing music attributes of a work or performance

Musical idea: Idea expressed in music, which can range in length from the smallest meaningful level (motive or short pattern) through a phrase, a section, or an entire piece

Musical range: Span between the highest and lowest pitches of a melody, instrument, or voice

Musical work: Piece of music preserved as a notated copy or sound recording or passed through oral tradition
**Non-pitched instruments:** Instruments, such as woodblocks, whistles, electronic sounds, that do not have definite pitches or tones

**Notation:** Visual representation of musical sounds

**One-part formal structure:** Continuous form, with or without an interruption, in which a singular instance of formal closure is achieved only at or near the end of the piece; also known as throughcomposed

**Open-ended assessment:** Assessment that allows students to demonstrate the learning of a particular outcome in a variety of ways, such as demonstrating understanding of rhythmic notation by moving, singing, or chanting

**Pentatonic scale:** Five-tone scale often identified with the pattern of the black keys of a keyboard, although other five-tone arrangements are possible

**Perform:** Process of realizing artistic ideas and work through interpretation and presentation

**Performing, performance:** Experience of engaging in the act of presenting music in a classroom or private or public venue (See also Artistic Process of Performing)

**Performance decorum:** Aspects of contextually appropriate propriety and proper behavior, conduct, and appearance for a musical performance, such as stage presence, etiquette, and appropriate attire

**Performance practice:** Performance and presentation of a work that reflect established norms for the style and social, cultural, and historical contexts of that work

**Performance technique:** Personal technical skills developed and used by a performer

**Personal context:** Unique experiences and relationships that surround a single person and are influenced by personal life, family, habits, interest, and preferences

**Personally-developed criteria:** Qualities or traits for assessing achievement level developed by students individually

**Phrase:** Musical segment with a clear beginning and ending, comparable to a simple sentence or clause in written text

**Phrasing:** Performance of a musical phrase that uses expressive qualities such as dynamics, tempo, articulation, and timbre to convey a thought, mood, or feeling

**Piece:** General, non-technical term referring to a composition or musical work

**Pitch:** Identification of a tone or note with respect to highness or lowness (i.e., frequency)

**Plan:** Select and develop musical ideas for creating a musical work

**Polyphonic:** Musical texture in which two or more melodies sound simultaneously
Polytonal: Music in which two or more tonalities (keys) sound simultaneously

Present: Share artistic work (e.g., a composition) with others

Program: Presentation of a sequence of musical works that can be performed by individual musicians or groups in a concert, recital, or other setting

Purpose: Reason for which music is created, such as, ceremonial, recreational/social, commercial, or generalized artistic expression

Refine: Make changes in musical works or performances to more effectively realize intent through technical quality or expression

Repertoire: Body or set of musical works that can be performed

Respond: Understand and evaluate how the arts convey meaning

Rhythm: Duration or length of sounds and silences that occur in music; organization of sounds and silences in time

Rhythmic passage: Short section or series of notes within a larger work that constitutes a single coherent rhythmic idea

Rhythmic pattern: Grouping, generally brief, of long and short sounds and silences

Rondo: Musical form consisting of three or more contrasting sections in which one section recurs, such as ABACA

Rubric: Established, ordered set of criteria for judging student performance; includes descriptors of student work at various levels of achievement

Scale: Pattern of pitches arranged in ascending or descending order and identified by their specific arrangement of whole and half steps

Score: Written notation of an entire music composition

Section: One of a number of distinct segments that together comprise a composition; a section consists of several phrases

Select: Choose music for performing, rehearsing, or responding based on interest, knowledge, ability, and context

Sensitivity: Skill of a creator, performer, or listener in responding to and conveying the nuances of sound or expression

Set: Sequence of songs or pieces performed together by a singer, band, or disc jockey and constituting or forming part of a live show or recording
Setting: Specified or implied instrumentation, voicing, or orchestration of a musical work

Setting of the text: Musical treatment of text as presented in the music

Share: Present artistic work (e.g., a composition) to others

Sight-reading: First attempt to perform a notated musical work

Simple formal structure: Musical form with a small number of distinct or clearly delineated sections, (such as simple binary, ternary, or other novel design), using closely related rhythmic, melodic, and harmonic materials across the sections

Social context: Environment surrounding something or someone’s creation or intended audience that reflects and influences how people use and interpret the musical experience

Sonic events: Individual sounds (or sound masses) and silences whose succession forms patterns and contrasting units that are perceived as musical

Sonic experience: Perception and understanding of the sounds and silences of a musical work and their inter-relationship

Stage presence: Performer’s ability to convey music content to a live audience through traits such as personal knowledge of the repertoire, exhibited confidence, decorum, eye contact and facial expression

Staging: Environmental considerations, such as lighting, sound, seating arrangement, and visual enhancements, that contribute to the impact of a musical performance

Standard notation: System for visually representing musical sound that is in widespread use; such systems include traditional music staff notation, tablature notation (primarily for fretted stringed instruments), and lead-sheet notation

Storyline: Extra-musical narrative that inspires or explains the structure of a piece of music

Strophic form: Vocal music in which the music repeats with a new set of text each time

Structure: Totality of a musical work

Style: Label for a type of music possessing distinguishing characteristics and often performance practices associated with its historical period, cultural context, and/or genre

Stylistic expression: Interpretation of expressive qualities in a manner that is authentic and appropriate to the genre, historical period, and cultural context of origin

Tablature: System of graphic standard notation, commonly used for fretted stringed instruments, in which a diagram visually represents both the fret board and finger placement on the fret board

Teacher-provided criteria: Qualities or traits for assessing achievement level that are provided to students by the teacher
**Technical aspects:** Characteristics enabling the accurate representation/presentation of musical ideas

**Technical challenges:** Requirements of a particular piece of music that stretch or exceed a performer’s current level of proficiency in technical areas such as timbre, intonation, diction, range, or speed of execution

**Technical accuracy, technical skill:** Ability to perform with appropriate timbre, intonation, and diction as well as to play or sing the correct pitches and rhythms at a tempo appropriate to the musical work

**Tempo:** Rate or speed of the beat in a musical work or performance

**Tension/release:** Musical device (musical stress, instability, or intensity, followed by musical relaxation, stability, or resolution) used to create a flow of feeling

**Ternary form:** (See ABA)

**Texture:** Manner in which the harmonic (vertical) and melodic (horizontal) elements are combined to create layers of sound

**Theme and variations:** Musical form in which a melody is presented and then followed by two or more sections presenting variations of that melody

**Timbre:** Tone color or tone quality that distinguishes one sound source, instrument, or voice from another

**Tonal pattern:** Grouping, generally brief, of tones or pitches

**Tonality:** Tonic or key tone around which a piece of music is centered

**Transfer:** Use music knowledge and skills appropriately in a new context

**Unity:** Presence of structural coherence within a work, generally achieved through the repetition of various elements of music (See Variety)

**Variety:** Presence of structural contrast within a work for the purpose of creating and sustaining interest, generally achieved through utilizing variations in the treatment of the elements of music (See Unity)

**Venue:** Physical setting in which a musical event takes place

**Vocables:** Audible sounds and/or nonsense syllables used by vocalists to convey musical ideas or intent

**Vocalizations:** Vocal exercises that include no text and are sung to one or more vowels
Acting techniques: Specific skills, pedagogies, theories, or methods of investigation used by an actor to prepare for a theatre performance

Believability: Theatrical choices thought to be “true” based upon an understanding of any given fictional moment, interpretation of text, and/or human interaction

Character traits: Observable embodied actions that illustrate a character’s personality, values, beliefs, and history

Conflict: The problem, confrontation, or struggle in a scene or play; conflict may include a character against him or herself, a character in opposition to another character, a character against nature, a character against society, or a character against the supernatural

Creative drama: A process-centered, non-exhibitionial approach to drama intended to benefit the performers themselves; story drama and process drama are two types of creative drama

Creative processes: The application of production and technical elements (see the definitions) to a theatrical production

Devised drama: Creation of an original performance piece by an ensemble

Dialogue: A conversation between two or more characters

Dramatic play: Make-believe where children naturally assign and accept roles, then act them out

Focus: Commitment by a participant (an actor, technician, director) to remain in the scope of the project or to stay within the world of the play

Genre: Relating to a specific kind or type of drama and theatre such as a tragedy, drama, melodrama, comedy, or farce

Gesture: An expressive and planned movement of the body or limbs

Given circumstances: The underlying actions and events that have happened before the play, story, or devised piece begins

Guided drama experience: A leader guides participants during a process drama, story drama, or creative drama experience (see the definitions) through side-coaching, narration, and prompting; the action of the drama does not stop in order for the leader to support the students; facilitator may guide participants in or out of role
Improvise: The spontaneous, intuitive, and immediate response of movement and speech; a distinction can be made between spontaneous improvisation, which is immediate and unrehearsed, and prepared improvisation, which is shaped and rehearsed.

Imaginary elsewhere: An imagined location which can be historical, fictional, or realistic.

Imagined worlds: An imaginary world created collectively by participants in a drama experience.

Inner thoughts: The underlying and implied meaning or intentions in the character’s dialogue or actions (also known as subtext).

Motivation: Reasons why a character behaves or reacts in a particular way in a scene or play.

Non-representational materials: Objects which can be transformed into specific props through the imagination.

Objective: A goal or particular need or want that a character has within a scene or play.

Plot: A narrative as revealed through the action and/or dialogue; traditionally, a plot has the elements of exposition, inciting incident, conflict, rising action, climax, and resolution or falling action.

Process drama: A non-linear, episodic, process-centered, improvised form of drama in which teacher and students are in-role exploring and reflecting on an issue, story, theme, problem, or idea in a non-exhibitional format that is intended to benefit the performers themselves.

Production elements: Technical elements selected for use in a specific production, including sets, sound, costumes, lights, music, props, and make-up, as well as elements specific to the production such as puppets, masks, special effects, or other story telling devices/concepts.

Scripted drama: A piece of writing for the theatre that includes a description of the setting, a list of the characters, the dialogue, and the action of the characters.

Script analysis: The study of a script to understand the underlying structure and themes of the play’s story, and the motives and objectives of its characters.

Staging: Patterns of movement in a scene or play including, for example, stage crosses, entrances, and exits which help to convey meaning.

Story drama: Episodic, process-centered, improvised form of drama that uses existing literature as a starting point for drama exploration, the drama explores moments (before, after, or within) that may not exist in the story and is presented in a non-exhibitional format that is intended to benefit the performers themselves.

Story elements: Characters, setting, dialogue, and plot that create a story.
**Style:** The use of a specific set of characteristic or distinctive techniques such as realism, expressionism, epic theatre, documentary theatre, or classical drama; style may also refer to the unique artistic choices of a particular playwright, director, or actor

**Tactic:** The means by which a character seeks to achieve their objective, the selection of tactics are based on the obstacle presented; in acting and directing a tactic refers to a specific action verb

**Technical elements:** The elements of spectacle such as sets, sound, costume, lights, music, props, and makeup used to create a unified and meaningful design for a theatrical production

**Theatrical conventions:** Practices and/or devices that the audience and actors accept in the world of the play even when it is not realistic, such as a narrator, flashback, or an aside

**Theme:** The aspect of the human condition under investigation in the drama; it can be drawn from unifying topics or questions across content areas

**Visual composition:** The arrangement of actors and scenery on a stage for a theatrical production, sometimes known as mise en scène
Art: In everyday discussions and in the history of aesthetics, multiple (and sometimes contradictory) definitions of art have been proposed. In a classic article, “The Role of Theory in Aesthetics,” Morris Weitz (1956) recommended differentiating between classificatory (classifying) and honorific (honoring) definitions of art. In the Next Generation Core Visual Arts Standards, the word art is used in the classificatory sense to mean “an artifact or action that has been put forward by an artist or other person as something to be experienced, interpreted, and appreciated.” An important component of a quality visual arts education is for students to engage in discussions about honorific definitions of art—identifying the wide range of significant features in art-making approaches, analyzing why artists follow or break with traditions and discussing their own understandings of the characteristics of “good art.”

Artist statement: Information about context, explanations of process, descriptions of learning, related stories, reflections, or other details in a written or spoken format shared by the artist to extend and deepen understanding of his or her artwork; an artist statement can be didactic, descriptive, or reflective in nature.

Artistic investigations: In making art, forms of inquiry and exploration; through artistic investigation artists go beyond illustrating pre-existing ideas or following directions, and students generate fresh insights—new ways of seeing and knowing.

Art-making approaches: Diverse strategies and procedures by which artists initiate and pursue making a work.

Artwork: Artifact or action that has been put forward by an artist or other person as something to be experienced, interpreted, and appreciated.

Brainstorm: Technique for the initial production of ideas or ways of solving a problem by an individual or group in which ideas are spontaneously contributed without critical comment or judgment.

Characteristic(s): Attribute, feature, property, or essential quality. Characteristics of form (and structure) Terms drawn from traditional, modern, and contemporary sources that identify the range of attributes that can be used to describe works of art and design to aid students in experiencing and perceiving the qualities of artworks, enabling them to create their own work and to appreciate and interpret the work of others.

Collaboration: Joint effort of working together to formulate and solve creative problems.

Collaboratively: Joining with others in attentive participation in an activity of imagining, exploring, and/or making.

Concepts: Ideas, thoughts, schemata; art arising out of conceptual experimentation that emphasizes making meaning through ideas rather than through materiality or form.
**Constructed environment**: Human-made or modified spaces and places; art and design-related disciplines such as architecture, urban planning, interior design, game design, virtual environment, and landscape design shape the places in which people live, work, and play.

**Contemporary artistic practice**: Processes, techniques, media, procedures, behaviors, actions, and conceptual approaches by which an artist or designer makes work using methods that, though they may be based on traditional practices, reflect changing contextual, conceptual, aesthetic, material and technical possibilities; examples include artwork made with appropriated images or materials, social practice artworks that involve the audience, performance art, new media works, installations, and artistic interventions in public spaces.

**Context**: Interrelated conditions surrounding the creation and experiencing of an artwork, including the artist, viewer/audiences, time, culture, presentation, and location of the artwork’s creation and reception.

**Copyright**: Form of protection grounded in the U.S. Constitution and granted by law for original works of authorship fixed in a tangible medium of expression, covering both published and unpublished works.

**Creative commons**: Copyright license templates that provide a simple, standardized way to give the public permission to share and use creative work on conditions of the maker’s choice ([http://creativecommons.org](http://creativecommons.org)).

**Creativity**: Ability to conceive and develop rich, original ideas, discover unexpected connections, and invent or make new things.

**Criteria**: In art and design, principles that direct attention to significant aspects of a work and provide guidelines for evaluating its success.

**Contemporary criteria**: Principles by which a work of art or design is understood and evaluated in contemporary contexts which, for example, include judging not necessarily on originality, but rather on how the work is re-contextualized to create new meanings.

**Established criteria**: Identified principles that direct attention to significant aspects of various types of artwork in order to provide guidelines for evaluating the work; these may be commonly accepted principles that have been developed by artists, curators, historians, critics, educators and others or principles developed by an individual or group to pertain to a specific work of art or design.

**Personal criteria**: Principles for evaluating art and design based on individual preferences.

**Relevant criteria**: Principles that apply to making, revising, understanding, and evaluating a particular work of art or design that are generated by identifying the significant characteristics of a work.

**Critique**: Individual or collective reflective process by which artists or designers experience, analyze, and evaluate a work of art or design.
Cultural contexts: Ideas, beliefs, values, norms, customs, traits, practices, and characteristics shared by individuals within a group that form the circumstances surrounding the creation, presentation, preservation, and response to art.

Cultural traditions: Pattern of practices and beliefs within a societal group.

Curate: Collect, sort, and organize objects, artworks, and artifacts; preserve and maintain historical records and catalogue exhibits.

Curator: Person responsible for acquiring, caring for, and exhibiting objects, artworks, and artifacts.

Design: Application of creativity to planning the optimal solution to a given problem and communication of that plan to others.

Digital format: Anything in electronic form including photos, images, video, audio files, or artwork created or presented through electronic means; a gallery of artwork viewed electronically through any device.

Engagement: Attentive participation in an activity of imagining, exploring, and making.

Exhibition narrative: Written description of an exhibition intended to educate viewers about its purpose.

Expressive properties: Moods, feelings, or ideas evoked or suggested through the attributes, features, or qualities of an image or work of art.

Fair use: Limitation in copyright law which sets out factors to be considered in determining whether or not a particular use of one’s work is “fair,” such as the purpose and character of the use, the amount of the work used, and whether the use will affect the market for the work.

Formal and conceptual vocabularies: Terms, methods, concepts, or strategies used to experience, describe, analyze, plan, and make works of art and design drawn from traditional, modern, contemporary, and continually emerging sources in diverse cultures.

Genre: Category of art or design identified by similarities in form, subject matter, content, or technique.

Image: Visual representation of a person, animal, thing, idea, or concept.

Imaginative play: Experimentation by children in defining identities and points of view by developing skills in conceiving, planning, making art, and communicating.

Innovative thinking: Imagining or and conceiving something new and unexpected, including fresh ideas and ways of looking at things and new approaches to old problems as well as formulating new problems.

Material culture: Human-constructed or human-mediated objects, forms, or expressions, that extend to other senses and study beyond the traditional art historical focus on the exemplary to the study of common objects, ordinary spaces, and every day rituals.
**Materials:** Substances out of which art is made or composed, ranging from the traditional to “nonart” material and virtual, cybernetic, and simulated materials

**Medium/Media:** Mode(s) of artistic expression or communication; material or other resources used for creating art

**Open source:** Computer software for which the copyright holder freely provides the right to use, study, change, and distribute the software to anyone for any purpose (http://opensource.org/)

**Play:** Spontaneous engaged activity through which children learn to experience, experiment, discover, and create

**Portfolio:** Actual or virtual collection of artworks and documentation demonstrating art and design knowledge and skills organized to reflect an individual’s creative growth and artistic literacy

**Preservation:** Activity of protecting, saving, and caring for objects, artifacts, and artworks through a variety of means

**Preserve:** Protect, save, and care for (curate) objects, artifacts, and artworks

**Style:** Recognizable characteristics of art or design that are found consistently in historical periods, cultural traditions, schools of art, or works of an individual artist

**Technologies:** Tools, techniques, crafts, systems, and methods to shape, adapt, and preserve artworks, artifacts, objects, and natural and human-made environments

**Text:** That form which information can be gathered, expanding beyond the traditional notion of written language to encompass visual representations such as paintings, sculpture, diagrams, graphics, films, and maps

**Venue:** Place or setting for an art exhibition, either a physical space or a virtual environment

**Visual components:** Properties of an image that can be perceived

**Visual imagery:** Group of images; images in general Visual organization approaches and strategies Graphic design strategies such as hierarchy, consistency, grids, spacing, scale, weight, proximity, alignment, and typography choice used to create focus and clarity in a work

**Visual plan:** Drawing, picture, diagram, or model of the layout of an art exhibit where individual works of art and artifacts are presented along with interpretive materials within a given space or venue
Idaho Dance Standards White Paper

Introduction
We, the Dance Standards Revision Executive Committee, upon review of the new dance standards as presented by the State Educational Agency Directors for Arts Education (SEADAE), recommend the adoption of these standards for the State of Idaho. These standards provide the guidelines for assisting Idaho students to move sequentially from public education towards college and career readiness.

Dance Education
Dance education provides all students with opportunities to participate in, understand, create, reflect and value the art of dance. Students exposed and trained in dance develop dance literacy, and participate in multiple ways of communicating and collaborating. Dance enhances any and all students’ abilities to develop creativity, imagination, innovation, critical thinking and problem solving.

An education in dance fosters movement experiences where students are engaged in creating, performing, responding, and connecting. “The art of dance uses movement to communicate meaning about the human experience. It is far more than exercise or entertainment. It is a powerful medium to express one's values, thoughts, and aspirations about the lives we live and the world in which we live.” (National Dance Education Organization).

Dance Literacy Defined
‘Dance literacy is the ability to identify, understand, interpret, create, communicate and analyze, using movement, spoken language, written materials, and symbolic means in varying contexts. Dance literacy involves a continuum of learning by enabling individuals to achieve their goals, develop their art, knowledge and potential, as well as participate fully in their community and wider society’ (Curran 28).

In comparing the current Idaho Humanities Standards for Dance, the new standards more clearly reflect our values in dance as art in education.

The new Dance Standards are designed:

- To build upon essential questions and enduring understandings that connect all art forms through eleven anchor standards.
- To identify the learning that we want for all of our students and to drive improvement in the system that delivers learning.
- To guide the delivery of arts education in the classroom in new ways of thinking, learning and creating.
  To clarify through clear, concise, flexible standards for educators.
- To inform educators about implementation of arts programs for the traditional and emerging models and structures of education.
- To frame the artistic literacy, as outlined in philosophical foundations, lifelong goals and artistic processes.
- To focus a framework that delivers the educational nuance of standards in only four artistic processes (creating, performing, responding and connecting), bringing together what artists do and what we want our students to do.
Conclusion
The Idaho Dance Standards Revision Executive Committee, comprised of a group of experienced and qualified dance educators, recognize the extensive work that has gone into the creation of the new Arts Standards and value how they will support a quality arts education for Idaho’s youth.

Rachel Swenson, Idaho Fine Arts Academy Middle School Dance Specialist, Idaho Commission on the Arts Teaching Dance Artist
Idaho Interdisciplinary Humanities Standards White Paper

Definition:

The Interdisciplinary Humanities course is a pathway for learners to discover and understand the human experience through a balanced and integrated combination of the arts and/or humanities with inclusion of two or more of the following content areas: architecture, philosophy, literature, world religions, visual and media arts, music, dance, theater, history and world languages.

Purpose:

In order to prepare students both to appreciate and apply the role of the arts and humanities in critical thinking and creative problem solving, an interdisciplinary humanities course will explore the human experience through the analysis and interpretation of themes, issues, and/or movements. The Interdisciplinary Humanities course will encourage students to become lifelong explorers who discover their connectedness to the records of lived experiences outside of their own individual social and cultural context. Through the creation/interpretation/communication of an original work and through the performance/presentation/production of that work, students are able to gain new perspectives.

Design:

The Interdisciplinary Humanities course should provide a well-rounded, thematic hands-on experience. The course is intended to integrate content from two or more arts and humanities disciplines. This course must be built upon the following five anchor standards: connect and compare, respond, create, present, and reflect. The standards for the Interdisciplinary Humanities course do not provide discipline content; the content should be derived from the selected disciplines.

Pedagogy:

In the Interdisciplinary Humanities classroom, the teacher(s) will have extensive expertise in two or more disciplines and will enable students to identify and apply authentic connections. Instruction will integrate essential concepts that transcend individual disciplines. The integration must be balanced in content, practices, and assessments. Structured around themes, issues, and/or movements, instruction will maintain a balance of academic study, performance, and project-based learning. The instructor will foster a collaborative environment that encourages academic risk-taking and inquiry.

Idaho Media Arts White Paper

Media Arts Standards Recommendation
We, the Executive Committee on Media Arts Standards Revision, make recommendation that the Idaho State Department of Education adopt the State Educational Agency Directors for Arts Education new Media Arts Standards. As a new strand that has been adopted as a fifth arts discipline, Media Arts combines art and technology as an avenue that drives, critical, creative thinking. The flexibility and broad application of the new arts standards are particularly beneficial for Media Arts given the diversity and rapid evolution of the field. These standards are inclusive of at-risk and culturally diverse students. These standards will help ensure that students are not forced to work with outdated tools or strategies by allowing educators to incorporate new and emerging technologies into their programs on a continuing basis.

What are Media Arts?
Media Arts is a collection of expressive media that lie between two historical trajectories: computing and communications media. Included within that field of media arts are intentionally expressive work that are defined by what they are not. For instance, Media Arts are neither traditional media manipulated by hand (stone, ceramics, paint) nor are they productivity or visualization products not intended for expressivity (MRI scans, word processing, and other productivity tools). The technological products on the periphery of defined media arts can be included if the creator developed the product with intentional expressivity.

Media Arts consumes or augments many longstanding artistic and design oriented curricula. For instance, Graphic Design courses fit well within the Media Arts as do Photo- and Video-journalism courses. Students practicing Media Arts can and should synthesize tools and disciplinary approaches for creative problem solving. Due to the field’s broad nature, Media Arts are changing constantly, and it is important to not specify software packages or skills sets too narrowly.

Where do we see Media Arts currently?
Media Arts is currently woven into a variety of classes that are listed in the 9-12th grade Idaho Career Clusters. In the K-8 curriculum, Media Arts has been already integrated throughout inquiry and project-based learning; however, it might not have been identified as such. In the past, there have been no media arts standards, so current standards exist within Idaho’s Professional Technical Standards, Information and Communication Technology Standards, The International Society for Technology in Education (ISTE), Visual Arts, English Language Arts, Engineering, or other content areas. When the process and/or product of a class/course results in an intentional artistic expression using media arts, the instructor and students should refer to the new Media Arts to find objectives, goals, and resources for that course.

The Future of Media Arts
Media Arts is critical for college and career readiness in today’s technologically driven society. It is essential for students to become creative contributors in a collaborative, digital global workforce.
Although the current courses address some opportunities for students to learn and produce elements of media arts such as storytelling, coding, design thinking, and communication design, there is an identified need and desire to have a Media Arts adopted curriculum. Some suggestions for further implementation of this adopted curriculum could include the following topics.

- User Interface Design (website development, mobile applications, kiosks)
- Understanding and Creating with Programming Language (coding)
- Game Design
- Animation (3D, stop-motion, web)
- Video Production
- Conceptual Development (makerspace)
- Lighting Design
- Sound Design
- Communication Design

Idaho Music Standards White Paper

The Problem: Current Music Standards are Inadequate for 21st Century Music Classrooms

It is well-known that learning music concepts enhances learning in all subject areas, yet the current Idaho Standards for music, which were adopted in 2008, are primarily skill-based standards. The new Idaho Music Standards emphasize concepts, allowing districts to write skill-based curricula guided by the principles of the Enduring Understandings and Essential Questions under each major category. In addition, the current standards do not differentiate between the many different strands of music. The new proposed standards have 5 strands, with specialized standards for each strand.

New Music Standards Organization

In the past four years, SEADAE (State Education Agencies Directors of Arts Education) have organized a new framework for teaching and learning in the arts. The new standards revolve around four artistic processes: Creating, Performing/Producing/ Presenting, Responding, and Connecting. The strand of Performing has been enlarged to include Producing and Presenting, which are expanded aspects of performing. The new strand of Connecting brings the classroom study of music into a larger context of its place in the arts and in the community of overall learning. This overall organization provides music educators with a framework of “Enduring Understandings” and “Essential Questions.” Using the new standards, Idaho teachers and school districts may create effective curriculum and lessons, providing a complete and thorough music education.

Committee recommendations:

Music Strand:
- Add parenthetical explanation to the title – (e.g. General Music, Music Appreciation)
- Extend the standards through HS Advanced to allow for high school classes such as music history or music appreciation

Music-Traditional and Emerging Ensemble Strands:
- Add parenthetical explanation to the title – (i.e. Performing Ensembles)
- Copy music strand standard MU:Pr6.1.8.e to also be MU:Pr6.1.E.5c for the purpose of including performing etiquette in performing classes
- Remove HS from all proficiency levels for the purpose of differentiation of instruction at both MS and HS. Listing would read: Novice, Intermediate, Proficient, Accomplished, Advanced

Music-Harmonizing Instruments Strand
- Add parenthetical explanation to the title (e.g.: guitar, keyboard) Remove HS from proficiency levels

Music-Composition and Theory Strand
- Re-title to Music-Composition and/or Theory Strand
Request Adoption:

Because we believe the new standards better serve Idaho students and will allow Idaho teachers to build curriculum more appropriate to the classroom needs of our teachers and learners, the music committee requests adoption of the 2015 music standards. The standards will be presented both in chart format, to allow teachers to view standards across K-12 and outline format, which will allow teachers to copy and paste the standards into daily lesson plans.

Music Committee Members:

Chair: Barbara Oldenburg, West Ada School District: General Music Instructor

Dr. Greg Springer, Boise State University: Music Education Professor
Idaho Theatre Arts Standards White Paper

Background
As Theatre Arts Educators, we strive to provide an enriched curriculum that fosters vibrant imaginative skills, empowered personal expression, and an appreciation and support of cultural diversity. A theatre arts curriculum provides an environment where student learning and experience are fused together to create innovative and influential works. A solid foundation of theatre standards will provide Idaho students with a highly sought after set of interpersonal skills that transcend the classroom.

We, the Executive Committee on Humanities Theatre Standards Revision, make recommendation for the adoption of the new Theatre arts Standards recently developed by the State Education Agency Directors of Arts Education . As the Theatre Arts Association states, “Arts standards create a pathway to quality arts learning and teaching; prepare students for college and career; and affirm the arts as a core academic subject.”

The adoption of the new Theatre Arts Standards supports:
• Clarity through concise, flexible standards for educators
• The opportunity to deepen the understandings of each content area
• A framework for individual teacher creativity and flexibility
• The students’ learning in the four artistic processes of Creating, Performing, Responding, and Connecting
• Intentional focus on relating personal learning and experience to artistic expression and other disciplines
• Contemporary thought, practices, and technologies
• All arts disciplines, fostering a greater degree of cross collaboration
• Literacy that embraces artistic expression through reading, writing and analysis of contemporary and historical texts

Grade-by-grade performance standards from kindergarten to the three high school levels of achievement articulate student achievement in theatre and translate the standards into measurable goals.

We submit that with the adoption of these standards, Idaho educators will have a comprehensive document to advance their theatre arts objectives, thereby preparing their students to be critical thinkers and contributing citizens.

Theatre committee Members:

D. Sterling Blackwell, Centennial High School: Theatre Instructor
Brett Eshelman, Boise High School: Theatre Instructor
James Haycock, Twin Falls High School: Theatre Instructor

Idaho Visual Arts Standards White Paper

Introduction
We, the Visual Arts Standards Revision Executive Committee, upon review of the new Visual Arts Standards as presented by the State Education Agency Directors of Arts Education (SEADAE) enthusiastically recommend the adoption of these standards for the State of Idaho. We recognize the extensive research, time and collaboration that went into developing these standards. We found that these standards are inclusive of at-risk and culturally diverse students reflected in the student population in Idaho. These standards provide the guidelines for assisting Idaho students to move sequentially from public education towards college and career readiness.

The new Visual Arts Standards provide a broad, flexible and sequential framework that meets the needs of educators in developing curriculum at a local level. The standards will guide teachers in instructing students in problem solving, collaboration, artistic practice, visual literacy, reflection, and experimentation, all contributing to educated citizens in our increasingly creative global economy.

Visual Arts Standards
In comparing the current Idaho Humanities Standards for Visual Arts, the new standards more clearly reflect our values in Visual Arts education and assist in the creation of curriculum.

The new Visual Arts Standards are designed:
- To clarify through clear, concise, flexible standards for educators
- To promote critical thinking, creative thinking, and problem solving skills
- To build upon essential questions and enduring understandings that connect all art forms through eleven anchor standards
- To encourage individual investigation as well as collaborative practice
- To support 21st Century skills, practice, and technologies
- To provide objective learning and assessment opportunities with accountability for instruction and achievement
- To help students develop awareness and understand the lives of people of different times and cultures
- To relate artistic ideas and works with societal, cultural and historical context to deepen understanding

What are Visual Arts?
The visual arts include the traditional fine arts, such as painting, drawing, sculpture, ceramics and the design arts. Visual art is defined by self-expression through creative art making. Additionally, the visual arts provide students with diverse backgrounds and needs an opportunity for discovery, self-expression, and communication. The Idaho visual arts standards committee members understand the importance of having rigorous standards in order to create a strong curriculum. We know that the Idaho Visual Arts Standards will encompass this shared belief.

Sally Machlis, University of Idaho: Chair, Department of Art and Design
Ruth Piispanen, Idaho Commission on the Arts: Director of Arts Education
Idaho World Language Standards White Paper

Introduction

We, the World Language Executive Standards Revision Committee, upon review and discussion of the present World Language Standards as presented by The American Council of Teachers of Foreign Language highly recommend the adoption of the five main goal areas (Communication, Cultures, Connections, Comparisons and Communities) as a the basis for standards for the State of Idaho. We recognize the valid and extensive research, and the time and collaboration that went into developing the World Language Standards. These goals areas meet the needs of all Idaho students. We are proposing that Idaho utilize our own standards within each goal area to meet the needs of our students. The standards we are proposing are equally applicable to learners at all levels, native speakers and heritage speakers (including English Language Learners), American Sign Language, and Classical Languages (Latin and Greek). The proposed standards include language to reflect the current educational landscape in Idaho and will strongly serve the needs of all students in our state. These standards and performance indicators provide flexible and sequential guidelines that serve the needs of World Language Educators in all levels of language instruction in all districts.

Rationale for Change

Problem:

Current Idaho State World Language Standards (adopted in 2008) do not complement the 2012 ACTFL World-Readiness Standards for Learning Languages nor the Idaho Core and its mandate for literacy, 21st century skills, and College and Career readiness in all content areas.  

Pg. 4 Common Core State Standards Workbook: “The standards insist that instruction in reading, writing, speaking, listening, and language be a shared responsibility…” The 2008 Idaho State World Language Standards do not require the same depth that the ACTFL World-readiness standards recommend, though many Idaho educators are currently incorporating these more rigorous essential competencies into their classrooms.

Solution:

ACTFL and IATLC (Idaho Association of Teachers of Languages and Cultures – the state professional organization) have taken a lead in language research and education in the nation and state respectively. As a part of that process, ACTFL has established robust and rigorous World Readiness Standards for Learning Languages that align directly with the goals of the Idaho Core.

As such we propose that the State of Idaho support aligning the main goal areas in Idaho’s World Language Standards with those in the ACTFL World Readiness Standards for Learning Languages. This will provide local flexibility while still preparing Idaho’s students for colleges and careers. The goal areas are written globally and encompass instructional and proficiency levels ranging from ‘novice low’ to ‘distinguished’, regardless of age, grade level, or instructional program.

The new set of standards would provide a statewide common language (terminology), targeted outcomes to determine proficiency regardless of age or program, and a clear articulation of the power of language learning within an increasingly global economy.
These standards focus instruction on performance-based tasks and applicable outcomes, and therefore directly correlate to and support the movement in Idaho toward assessments that measure students’ communication skills.

The five goal areas are designed:

- To guide learners to interact and negotiate meaning in spoken, signed, or written conversations to share information, reactions, feelings, and opinions.
- To prepare learners to use the language to investigate, explain, and reflect upon the relationship between the practices and perspectives of the cultures studied.
- To encourage learners to build, reinforce, and expand their knowledge of the other disciplines while using the language to develop critical thinking and to solve problems creatively.
- To prepare learners to use the language to investigate, explain, and reflect on the nature of language through comparisons of the language studied and their own.
- To give learners the tools to use the language both within and beyond the classroom to interact and collaborate in their community and the globalized world.
- To clarify through clear, concise, flexible standards for educators.
- To guide the delivery of World Language education in the classroom in new ways of thinking learning and creating.
- To build upon essential questions and enduring understandings through anchor standards.

<td>• A situation that people want to change or create can be approached as a problem to be solved through engineering. Such problems may have many acceptable solutions. (PS1-K-2)</td>
<td></td>
</tr>
</tbody>
</table>

#### Performance Expectations (PE)

Students who demonstrate understanding can:

**PS1-K-1.** Plan and conduct an investigation to compare the effects of different strengths or different directions of pushes and pulls on the motion of an object.

- Clarification Statement: Examples of pushes or pulls could include a string attached to an object being pulled, a person pushing an object, a person stopping a rolling ball, and two objects colliding and pushing on each other.
- Assessment Boundary: Assessment is limited to different relative strengths or different directions, but not both at the same time. Assessment does not include non-contact pushes or pulls such as those produced by magnets.

**PS1-K-2.** Analyze data to determine if a design solution works as intended to change the speed or direction of an object with a push or a pull.

- Clarification Statement: Examples of problems requiring a solution could include having a marble or other object move a certain distance, follow a particular path, and knock down other objects. Examples of solutions could include tools such as a ramp to increase the speed of the object and a structure that would cause an object such as a marble or ball to turn.
- Assessment Boundary: Assessment does not include friction as a mechanism for change in speed.

#### Science and Engineering Practices (SEP)

**Planning and Carrying Out Investigations**
Planning and carrying out investigations to answer questions or test solutions to problems in K–2 builds on prior experiences and progresses to simple investigations, based on fair tests, which provide data to support explanations or design solutions.

- With guidance, plan and conduct an investigation in collaboration with peers. (PS1-K-1)

**Analyzing and Interpreting Data**
Analyzing data in K–2 builds on prior experiences and progresses to collecting, recording, and sharing observations.

- Analyze data from tests of an object or tool to determine if it works as intended. (PS1-K-2)

#### Crosscutting Concepts (CCC)

PS2-K Energy

Disciplinary Core Ideas (DCI)

- PS3.B: Conservation of Energy and Energy Transfer
  - Sunlight warms Earth’s surface. (PS2-K-1, PS2-K-2)

Performance Expectations (PE)

Students who demonstrate understanding can:

- **PS2-K-1.** Make observations to determine the effect of sunlight on Earth’s surface.
  - Clarification Statement: Examples of Earth’s surface could include sand, soil, rocks, and water.
  - Assessment Boundary: Assessment of temperature is limited to relative measures such as warmer/cooler.

- **PS2-K-2.** Use tools and materials to design and build a structure that will reduce the warming effect of sunlight on an area.
  - Clarification Statement: Examples of structures could include umbrellas, canopies, and tents that minimize the warming effect of the sun.

Science and Engineering Practices (SEP)

Planning and Carrying Out Investigations
Planning and carrying out investigations to answer questions or test solutions to problems in K–2 builds on prior experiences and progresses to simple investigations, based on fair tests, which provide data to support explanations or design solutions.

- Make observations (firsthand or from media) to collect data that can be used to make comparisons. (PS2-K-1)

Constructing Explanations and Designing Solutions
Constructing explanations and designing solutions in K–2 builds on prior experiences and progresses to the use of evidence and ideas in constructing evidence-based accounts of natural phenomena and designing solutions.

- Use tools and materials provided to design and build a device that solves a specific problem or a solution to a specific problem. (K-PS3-2)

Crosscutting Concepts (CCC)

- Cause and Effect
  - Events have causes that generate observable patterns. (PS2-K-1, PS2-K-2)

**LS: Life Sciences**

**LS1-K Molecules to Organisms: Structure and Processes**

### Disciplinary Core Ideas (DCI)

**LS1.C: Organization for Matter and Energy Flow in Organisms**
- All animals need food in order to live and grow. They obtain their food from plants or from other animals. Plants need water and light to live and grow. (LS1-K-1)
- Living and non-living things have distinct characteristics. (LS1-K-2)

### Performance Expectations (PE)

Students who demonstrate understanding can:

**LS1-K-1.** Use observations to describe patterns of what plants and animals (including humans) need to survive.
- Clarification Statement: Examples of patterns could include that animals need to take in food but plants do not; the different kinds of food needed by different types of animals; the requirement of plants to have light; and, that all living things need water.

**LS1-K-2.** Use classification supported by evidence to differentiate between living and non-living items.
- Clarification Statement: Use chart or Venn diagram to sort objects or pictures into living and not-living items.

### Science and Engineering Practices (SEP)

**Analyzing and Interpreting Data**
Analyzing data in K–2 builds on prior experiences and progresses to collecting, recording, and sharing observations.
- Use observations (firsthand or from media) to describe patterns in the natural world in order to answer scientific questions. (LS1-K-1)

### Crosscutting Concepts (CCC)

**Patterns**
Patterns in the natural and human designed world can be observed and used as evidence. (LS1-K-1)

## ESS: Earth and Space Sciences

### ESS1-K Earth’s Systems

#### Disciplinary Core Ideas (DCI)

**ESS2.D: Weather and Climate**
- Weather is the combination of sunlight, wind, snow or rain, and temperature in a particular region at a particular time. People measure these conditions to describe and record the weather and to notice patterns over time. (ESS1-K-1)
- The four seasons occur in a specific order due to their weather patterns. (ESS1-K-1)

**ESS2.E: Biogeology**
- Plants and animals can change their environment. (ESS1-K-2)

**ESS3.C: Human Impacts on Earth Systems**
- Things that people do to live comfortably can affect the world around them. But they can make choices that reduce their impacts on the land, water, air, and other living things. (ESS1-K-2)

#### Performance Expectations (PE)

**ESS1-K-1.** Use and share observations of local weather conditions to describe patterns over time, which includes the 4 seasons.
- **Clarification Statement:** Examples of qualitative observations could include descriptions of the weather (such as sunny, cloudy, rainy, and warm); examples of quantitative observations could include numbers of sunny, windy, and rainy days in a month. Examples of patterns could include that it is usually cooler in the morning than in the afternoon and the number of sunny days versus cloudy days in different months.
- **Assessment Boundary:** Assessment of quantitative observations limited to whole numbers and relative measures such as warmer/cooler.

**ESS1-K-2.** Construct an argument supported by evidence for how plants and animals (including humans) can change the environment to meet their needs.
- **Clarification Statement:** Examples of plants and animals changing their environment could include a squirrel digs in the ground to hide its food and tree roots can break concrete.

#### Science and Engineering Practices (SEP)

**Analyzing and Interpreting Data**
- Analyzing data in K–2 builds on prior experiences and progresses to collecting, recording, and sharing observations.
  - Use observations (firsthand or from media) to describe patterns in the natural world in order to answer scientific questions. (ESS1-K-1)

**Engaging in Argument from Evidence**
- Engaging in argument from evidence in K–2 builds on prior experiences and progresses to comparing ideas and representations about the natural and designed world(s).
  - Construct an argument with evidence to support a claim. (ESS1-K-2)

#### Crosscutting Concepts (CCC)

**Patterns**
- Patterns in the natural world can be observed, used to describe phenomena, and used as evidence. (ESS1-K-1)

**Systems and System Models**
- Systems in the natural and designed world have parts that work together. (ESS1-K-2)
Connections to Nature of Science

Science Knowledge is Based on Empirical Evidence
Scientists look for patterns and order when making observations about the world. (ESS1-K-1)

Idaho Common Core Connections

ELA/Literacy

R.K.1 With prompting and support, ask and answer questions about key details in a text. (ESS1-K-1)
W.K.1 Use a combination of drawing, dictating, and writing to compose opinion pieces in which they tell a reader the topic or the name of the book they are writing about and state an opinion or preference about the topic or book. (ESS1-K-2)
W.K.2 Use a combination of drawing, dictating, and writing to compose informative/explanatory texts in which they name what they are writing about and supply some information about the topic. (ESS1-K-2)
W.K.7 Participate in shared research and writing projects (e.g., explore a number of books by a favorite author and express opinions about them. (ESS1-K-1)(ESS1-K-2)

Mathematics

MP.2 Reason abstractly and quantitatively. (ESS1-K-1)
MP.4 Model with mathematics. (ESS1-K-1)
K.CC.A Know number names and the count sequence. (ESS1-K-1)
K.MD.A.1 Describe measurable attributes of objects, such as length or weight. Describe several measurable attributes of a single object. (ESS1-K-1)
K.MD.B.3 Classify objects into given categories; count the number of objects in each category and sort the categories by count. (ESS1-K-1)

ESS2-K Earth and Human Activity

Disciplinary Core Ideas (DCI)

ESS3.A: Natural Resources
- Living things need water, air, and resources from the land, and they live in places that have the things they need. Humans use natural resources for everything they do. (ESS2-K-1)

ESS3.B: Natural Hazards
- Some kinds of severe weather are more likely than others in a given region. Weather scientists forecast severe weather so that the communities can prepare for and respond to these events. (ESS2-K-2)

ESS3.C: Human Impacts on Earth Systems
- Things that people do to live comfortably can affect the world around them. But they can make choices that reduce their impacts on the land, water, air, and other living things. (ESS2-K-3)

ETS1.A: Defining and Delimiting an Engineering Problem
- Asking questions, making observations, and gathering information are helpful in thinking about problems. (ESS2-K-2)

ETS1.B: Developing Possible Solutions
- Designs can be conveyed through sketches, drawings, or physical models. These representations are useful in communicating ideas for a problem’s solutions to other people. (ESS2-K-3)

Performance Expectations (PE)

Students who demonstrate understanding can:

ESS2-K-1. Use a model to represent the relationship between the needs of different plants and animals (including humans) and the places they live.
- Clarification Statement: Examples of relationships could include that deer eat buds and leaves, therefore, they usually live in forested areas; and, grasses need sunlight so they often grow in meadows. Plants, animals, and their surroundings make up a system.

ESS2-K-2. Ask questions to obtain information about the purpose of weather forecasting to prepare for, and respond to, severe weather.
- Clarification Statement: Emphasis is on local forms of severe weather.
ESS2-K-3. Communicate solutions that will reduce the impact of humans on the land, water, air, and/or other living things in the local environment.

- Clarification Statement: Examples of human impact on the land could include cutting trees to produce paper and using resources to produce bottles. Examples of solutions could include reusing paper and recycling cans and bottles.

</thead>
<tbody>
<tr>
<td>- Animals have body parts that capture and convey different kinds of information needed for growth and survival. Animals respond to these inputs with behaviors that help them survive. Plants also respond to some external inputs. (LS1-1-1)</td>
</tr>
</tbody>
</table>

### Performance Expectations (PE)

**LS1-1-1. Use materials to design a solution to a human problem by mimicking how plants and/or animals use their external parts to help them survive, grow, and meet their needs.**
- Clarification Statement: Examples of human problems that can be solved by mimicking plant or animal solutions could include designing clothing or equipment to protect bicyclists by mimicking turtle shells, acorn shells, and animal scales;
stabilizing structures by mimicking animal tails and roots on plants; keeping out intruders by mimicking thorns on branches and animal quills; and, detecting intruders by mimicking eyes and ears.

**LS1-1-2.** Read texts and use media to determine patterns in behavior of parents and offspring that help offspring survive.
- Clarification Statement: Examples of patterns of behaviors could include the signals that offspring make (such as crying, cheeping, and other vocalizations) and the responses of the parents (such as feeding, comforting, and protecting the offspring).

**LS1-1-3.** Develop models to describe that organisms have unique and diverse life cycles but all have in common birth, growth, reproduction, and death.
- Clarification Statement: Changes organisms go through during their life form a pattern.
- Assessment Boundary: Assessment of plant life cycles is limited to those of flowering plants. Assessment does not include details of human reproduction.

### Science and Engineering Practices (SEP)

#### Constructing Explanations and Designing Solutions
Constructing explanations and designing solutions in K–2 builds on prior experiences and progresses to the use of evidence and ideas in constructing evidence-based accounts of natural phenomena and designing solutions.
- Use materials to design a device that solves a specific problem or a solution to a specific problem. (LS1-1-1)

#### Obtaining, Evaluating, and Communicating Information
Obtaining, evaluating, and communicating information in K–2 builds on prior experiences and uses observations and texts to communicate new information.
- Read grade-appropriate texts and use media to obtain scientific information to determine patterns in the natural world. (LS1-1-2)

#### Developing and Using Models
Modeling in K–2 builds on prior experiences and progresses to building and revising simple models and using models to represent events and design solutions.
- Develop models to describe phenomena. (LS1-1-3)

### Crosscutting Concepts (CCC)

**Patterns**
- Patterns in the natural and human designed world can be observed, used to describe phenomena, and used as evidence. (LS1-1-2)
- Patterns of change can be used to make predictions. (LS1-1-3)

**Structure and Function**
- The shape and stability of structures of natural and designed objects are related to their function(s). (LS1-1-1)

#### Connections to Engineering, Technology, and Applications of Science

**Influence of Science, Engineering and Technology on Society and the Natural World**
- Every human-made product is designed by applying some knowledge of the natural world and is built using materials derived from the natural world. (LS1-1-1)

### Scientific Knowledge is Based on Empirical Evidence

Scientists look for patterns and order when making observations about the world. (LS1-1-2)
Science findings are based on recognizing patterns. (LS1-1-3)

### Idaho Common Core Connections

**ELA/Literacy**
- **RI.1.1** Ask and answer questions about key details in a text. (LS1-1-2)
- **RI.1.2** Identify the main topic and retell key details of a text. (LS1-1-2)
- **RI.1.10** With prompting and support, read informational texts appropriately complex for grade. (LS1-1-2)
- **RI.3.7** Use information gained from illustrations (e.g., maps, photographs) and the words in a text to determine patterns in the natural world. (LS1-1-2)
- **W.1.7** Participate in shared research and writing projects (e.g., explore a number of “how-to” books on a given topic and use them to write a sequence of instructions). (LS1-1-1)
- **SL.3.5** Create engaging audio recordings of stories or poems that demonstrate fluid reading at an understandable pace; add visual displays when appropriate to emphasize or enhance certain facts or details. (LS1-1-3)

**Mathematics**
- **MP.4** Model with mathematics. (LS1-1-3)
- **3.NBT** Number and Operations in Base Ten (LS1-1-3)
- **1.NBT.B.3** Compare two two-digit numbers based on the meanings of the tens and one digits, recording the results of comparisons with the symbols >, =, and <. (LS1-1-2)
- **1.NBT.C.4** Add within 100, including adding a two-digit number and a one-digit number, and adding a two-digit number and a multiple of 10, using concrete models or drawings and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction; relate the strategy to a written method and explain the reasoning used. Understand that in adding two-digit numbers, one adds tens and tens, ones and ones; and sometimes it is necessary to compose a ten. (LS1-1-2)
- **1.NBT.C.5** Given a two-digit number, mentally find 10 more or 10 less than the number, without having to count; explain the reasoning used. (LS1-1-2)
- **1.NBT.C.6** Subtract multiples of 10 in the range 10–90 from multiples of 10 in the range 10–90 (positive or zero differences), using concrete models or drawings and strategies based on place value, properties of operations,
and/or the relationship between addition and subtraction; relate the strategy to a written method and explain the reasoning used. (LS1-1-2)

3.NF Number and Operations—Fractions (LS1-1-3)

---

**LS2-1 Heredity: Inheritance and Variation of Traits**

**Disciplinary Core Ideas (DCI)**

**LS3.A: Inheritance of Traits**
- Young animals are very much, but not exactly like, their parents. Plants also are very much, but not exactly, like their parents. (LS2-1-1)

**LS3.B: Variation of Traits**
- Individuals of the same kind of plant or animal are recognizable as similar but can also vary in many ways. (LS2-1-1)

**Performance Expectations (PE)**

Students who demonstrate understanding can:

**LS2-1-1. Make observations to construct an evidence-based account that young plants and animals are like, but not exactly like, their parents.**
- Clarification Statement: Examples of patterns could include features plants or animals share. Examples of observations could include leaves from the same kind of plant are the same shape but can differ in size; and, a particular breed of dog looks like its parents but is not exactly the same.
- Assessment Boundary: Assessment does not include inheritance or animals that undergo metamorphosis or hybrids.

**Science and Engineering Practices (SEP)**

**Constructing Explanations and Designing Solutions**
Constructing explanations and designing solutions in K–2 builds on prior experiences and progresses to the use of evidence and ideas in constructing evidence-based accounts of natural phenomena and designing solutions.
- Make observations (firsthand or from media) to construct an evidence-based account for natural phenomena. (LS2-1-1)

**Crosscutting Concepts (CCC)**

**Patterns**
Patterns in the natural and human designed world can be observed, used to describe phenomena, and used as evidence. (LS2-1-1)

**Idaho Common Core Connections**

**ELA/Literacy**
1.RI.1 Ask and answer questions about key details in a text. (LS2-1-1)
1.W.1.7 Participate in shared research and writing projects (e.g., explore a number of "how-to" books on a given topic and use them to write a sequence of instructions). (LS2-1-1)
1.W.1.8 With guidance and support from adults, recall information from experiences or gather information from provided sources to answer a question. (LS2-1-1)

**Mathematics**
MP.2 Reason abstractly and quantitatively. (LS2-1-1)
MP.5 Use appropriate tools strategically. (LS2-1-1)
1.MD.A.1 Order three objects by length; compare the lengths of two objects indirectly by using a third object. (LS2-1-1)

**ESS: Earth and Space Sciences**

**ESS1-1 Earth’s Place in the Universe**

**Disciplinary Core Ideas (DCI)**

**ESS1.A: The Universe and its Stars**
Patterns of the motion of the sun, moon, and stars in the sky can be observed, described, and predicted. (ESS1-1)

**ESS1.B: Earth and the Solar System**

- Seasonal patterns of sunrise and sunset can be observed, described, and predicted. (ESS1-1-2)
- Seasons are created by weather patterns for a particular region and time. Local patterns create 4 distinct seasons. (ESS1-1-2)

**Performance Expectations (PE)**

Students who demonstrate understanding can:

**ESS1-1-1. Use observations of the sun, moon, and stars to describe patterns that can be predicted.**
- Clarification Statement: Examples of patterns could include that the sun and moon appear to rise in one part of the sky, move across the sky, and set; and stars other than our sun are visible at night but not during the day.
- Assessment Boundary: Assessment of star patterns is limited to stars being seen at night and not during the day.

**ESS1-1-2. Make observations at different times of year to relate the amount of daylight to the time of year.**
- Clarification Statement: Emphasis is on relative comparisons of the amount of daylight in the winter to the amount in the spring or fall.
- Assessment Boundary: Assessment is limited to relative amounts of daylight, not quantifying the hours or time of daylight.

**Science and Engineering Practices (SEP)**

**Planning and Carrying Out Investigations**
Planning and carrying out investigations to answer questions or test solutions to problems in K–2 builds on prior experiences and progresses to simple investigations, based on fair tests, which provide data to support explanations or design solutions.
- Make observations (firsthand or from media) to collect data that can be used to make comparisons. (ESS1-1-2)

**Analyzing and Interpreting Data**
Analyzing data in K–2 builds on prior experiences and progresses to collecting, recording, and sharing observations.
- Use observations (firsthand or from media) to describe patterns in the natural world in order to answer scientific questions. (ESS1-1-1)

**Idaho Common Core Connections**

Elementary School (2nd Grade)

PS: Physical Sciences

PS1-2 Matter and Its Interactions

Disciplinary Core Ideas (DCI)

- Different kinds of matter exist and many of them can be solid, liquid, or gas depending on temperature. Matter can be described and classified by its observable properties. (PS1-2-1)
- Different properties are suited to different purposes. (PS1-2-2),(PS1-2-3)
- A great variety of objects can be built up from a small set of pieces. (PS1-2-3)

PS1.B: Chemical Reactions
- Heating or cooling a substance may cause changes that can be observed. Sometimes these changes are reversible, and sometimes they are not. (PS1-2-4)

Performance Expectations (PE)

Students who demonstrate understanding can:

- PS1-2-1. Plan and conduct an investigation to describe and classify different kinds of materials by their observable properties.
  - Clarification Statement: Observations could include color, texture, hardness, and flexibility. Patterns could include the similar properties that different materials share.

- PS1-2-2. Analyze data obtained from testing different materials to determine which materials have the properties that are best suited for an intended purpose.
  - Clarification Statement: Examples of properties could include, strength, flexibility, hardness, texture, and absorbency.
  - Assessment Boundary: Assessment of quantitative measurements is limited to length.

- PS1-2-3. Make observations to construct an evidence-based account of how an object made of a small set of pieces can be disassembled and made into a new object.
  - Clarification Statement: Examples of pieces could include blocks, building bricks, or other assorted small objects.

- PS1-2-4. Construct an argument with evidence that some changes caused by heating or cooling can be reversed and some cannot.
  - Clarification Statement: Examples of reversible changes could include materials such as water and butter at different temperatures. Examples of irreversible changes could include cooking an egg, freezing a plant leaf, and heating paper.

Science and Engineering Practices (SEP)  |  Crosscutting Concepts (CCC)
--- | ---
Planning and Carrying Out Investigations
- Planning and carrying out investigations to answer questions or test solutions to problems in K–2 builds on prior experiences and progresses to simple investigations, based on fair tests, which provide data to support explanations or design solutions.
- Plan and conduct an investigation collaboratively to produce data to serve as the basis for evidence to answer a question. (PS1-2-1)

Analyzing and Interpreting Data
- Analyzing data in K–2 builds on prior experiences and progresses to collecting, recording, and sharing observations.
- Analyze data from tests of an object or tool to determine if it works as expected.

Patterns
- Patterns in the natural and human designed world can be observed. (PS1-2-1)

Cause and Effect
- Events have causes that generate observable patterns. (PS1-2-4)
  - Simple tests can be designed to gather evidence to support or refute student ideas about causes. (PS1-2-2)

Energy and Matter
- Objects may break into smaller pieces and be put together into larger pieces, or change shapes. (PS1-2-3)
### Constructing Explanations and Designing Solutions

Constructing explanations and designing solutions in K–2 builds on prior experiences and progresses to the use of evidence and ideas in constructing evidence-based accounts of natural phenomena and designing solutions.

- Make observations (firsthand or from media) to construct an evidence-based account for natural phenomena. (PS1-2-3)

### Engaging in Argument from Evidence

Engaging in argument from evidence in K–2 builds on prior experiences and progresses to comparing ideas and representations about the natural and designed world(s).

- Construct an argument with evidence to support a claim. (PS1-2-4)

### Connections to Engineering, Technology, and Applications of Science

**Influence of Engineering, Technology, and Science, on Society and the Natural World**

Every human-made product is designed by applying some knowledge of the natural world and is built using materials derived from the natural world. (PS1-2-2)

### Science Models, Laws, Mechanisms, and Theories Explain Natural Phenomena

Science searches for cause and effect relationships to explain natural events. (PS1-2-4)

### Science Models, Laws, Mechanisms, and Theories Explain Natural Phenomena

Science searches for cause and effect relationships to explain natural events. (PS1-2-4)

### Idaho Common Core Connections

#### ELA/Literacy

- **RI.2.1** Ask and answer such questions as who, what, where, when, why, and how to demonstrate understanding of key details in a text. (PS1-2-4)
- **RI.2.3** Describe the connection between a series of historical events, scientific ideas or concepts, or steps in technical procedures in a text. (PS1-2-4)
- **RI.2.8** Describe how reasons support specific points the author makes in a text. (PS1-2-2),(PS1-2-4)
- **W.2.1** Write opinion pieces in which they introduce the topic or book they are writing about, state an opinion, supply reasons that support the opinion, use linking words (e.g., because, and, also) to connect opinion and reasons, and provide a concluding statement or section. (PS1-2-4)
- **W.2.7** Participate in shared research and writing projects (e.g., read a number of books on a single topic to produce a report; record science observations). (PS1-2-1),(PS1-2-2),(PS1-2-3)
- **W.2.8** Recall information from experiences or gather information from provided sources to answer a question. (PS1-2-1),(PS1-2-2),(PS1-2-3)

#### Mathematics

- **MP.2** Reason abstractly and quantitatively. (PS1-2-2)
- **MP.4** Model with mathematics. (PS1-2-1),(PS1-2-2)
- **MP.5** Use appropriate tools strategically. (PS1-2-2)
- **2.MD.D.10** Draw a picture graph and a bar graph (with single-unit scale) to represent a data set with up to four categories. Solve simple put-together, take-apart, and compare problems using information presented in a bar graph. (PS1-2-1),(PS1-2-2)

### LS: Life Sciences

**LS1-2 Ecosystems: Interactions, Energy, and Dynamics**

#### Disciplinary Core Ideas (DCI)

<table>
<thead>
<tr>
<th>LS2.A: Interdependent Relationships in Ecosystems</th>
</tr>
</thead>
<tbody>
<tr>
<td>- Plants depend on water and light to grow. (LS1-2-1)</td>

<table>
<thead>
<tr>
<th>ETS1.B: Developing Possible Solutions</th>
</tr>
</thead>
<tbody>
<tr>
<td>- Designs can be conveyed through sketches, drawings, or physical models. These representations are useful in communicating ideas for a problem’s solutions to other people.(LS1-2-2)</td>
</tr>
</tbody>
</table>

#### Performance Expectations (PE)
Students who demonstrate understanding can:

**LS1-2.1.** Plan and conduct an investigation to determine if plants need sunlight and water to grow.
- Assessment Boundary: Assessment is limited to testing one variable at a time.

**LS1-2.2.** Develop a simple model that mimics the function of an animal in dispersing seeds or pollinating plants.

**Science and Engineering Practices (SEP)**

**Developing and Using Models**
Modeling in K–2 builds on prior experiences and progresses to include using and developing models (i.e., diagram, drawing, physical replica, diorama, dramatization, or storyboard) that represent concrete events or design solutions.
- Develop a simple model based on evidence to represent a proposed object or tool. (LS1-2-2)

**Planning and Carrying Out Investigations**
Planning and carrying out investigations to answer questions or test solutions to problems in K–2 builds on prior experiences and progresses to simple investigations, based on fair tests, which provide data to support explanations or design solutions.
- Plan and conduct an investigation collaboratively to produce data to serve as the basis for evidence to answer a question. (LS1-2-1)

**Crosscutting Concepts (CCC)**

**Cause and Effect**
Events have causes that generate observable patterns. (LS1-2-1)

**Structure and Function**
The shape and stability of structures of natural and designed objects are related to their function(s). (LS1-2-2)

**Idaho Common Core Connections**

**ELA/Literacy**
- **W.2.7** Participate in shared research and writing projects (e.g., read a number of books on a single topic to produce a report; record science observations). (LS1-2-1)
- **W.2.8** Recall information from experiences or gather information from provided sources to answer a question. (LS1-2-1)

- **SL.2.5** Create audio recordings of stories or poems; add drawings or other visual displays to stories or recounts of experiences when appropriate to clarify ideas, thoughts, and feelings. (LS1-2-2)

**Mathematics**
- **MP.2** Reason abstractly and quantitatively. (LS1-2-1)
- **MP.4** Model with mathematics. (LS1-2-1),(LS1-2-2)
- **MP.5** Use appropriate tools strategically. (LS1-2-1)

- **2.MD.D.10** Draw a picture graph and a bar graph (with single-unit scale) to represent a data set with up to four categories. Solve simple put-together, take-apart, and compare problems using information presented in a bar graph. (LS1-2-2)

**LS2-2 Biological Adaptation: Unity and Diversity**

**Disciplinary Core Ideas (DCI)**

**LS4.D: Biodiversity and Humans**
- There are many different kinds of living things in any area, and they exist in different places on land and in water. (LS2-2-1)

**Performance Expectations (PE)**

Students who demonstrate understanding can:

**LS2-2.1.** Make observations of plants and animals to compare the diversity of life in different habitats.
- Clarification Statement: Emphasis is on the diversity of living things in each of a variety of different habitats.
- Assessment Boundary: Assessment does not include specific animal and plant names in specific habitats.
## Science and Engineering Practices (SEP)
### Planning and Carrying Out Investigations
Planning and carrying out investigations to answer questions or test solutions to problems in K–2 builds on prior experiences and progresses to the use of evidence and ideas in constructing evidence-based accounts of

- Make observations (firsthand or from media) to collect data that can be used to make comparisons. (LS2-2-1)

### Scientific Knowledge is Based on Empirical Evidence
Scientists look for patterns and order when making observations about the world. (LS2-2-1)

## Idaho Common Core Connections
### ELA/Literacy
- **W.2.7** Participate in shared research and writing projects (e.g., read a number of books on a single topic to produce a report; record science observations). (LS2-2-1)

ESS2-2 Earth’s Systems

**Disciplinary Core Ideas (DCI)**

- **ESS2.A: Earth Materials and Systems**
  - Wind and water can change the shape of the land. (ESS2-2-1)

- **ESS2.B: Plate Tectonics and Large-Scale System Interactions**
  - Maps show where things are located. One can map the shapes and kinds of land and water in any area. (ESS2-2-2)

- **ESS2.C: The Roles of Water in Earth's Surface Processes**
  - Water is found on the ocean, rivers, lakes, and ponds. Water exists as solid ice and in liquid form. (ESS2-2-3)

- **ETS1.C: Optimizing the Design Solution**
  - Because there is always more than one possible solution to a problem, it is useful to compare and test designs. (ESS2-2-1)

**Performance Expectations (PE)**

Students who demonstrate understanding can:

- **ESS2-2-1.** Compare multiple solutions designed to slow or prevent wind or water from changing the shape of the land.
  - Clarification Statement: Examples of solutions could include different designs of dikes and windbreaks to hold back wind and water, and different designs for using shrubs, grass, and trees to hold back the land.

- **ESS2-2-2.** Develop a model to represent the shapes and kinds of land and bodies of water in an area.
  - Assessment Boundary: Assessment does not include quantitative scaling in models.

- **ESS2-2-3.** Obtain information to identify where water is found on Earth and that it can be solid, liquid or gas.

**Science and Engineering Practices (SEP)**

- **Developing and Using Models**
  - Modeling in K–2 builds on prior experiences and progresses to include using and developing models (i.e., diagram, drawing, physical replica, diorama, dramatization, or

### Elementary School (3rd Grade)

#### PS: Physical Sciences

**PS1-3 Motion and Stability: Forces and Interactions**

<table>
<thead>
<tr>
<th>Disciplinary Core Ideas (DCI)</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>PS2.A: Forces and Motion</strong></td>
</tr>
<tr>
<td>• Each force acts on one particular object and has both strength and a direction. An object at rest typically has multiple forces acting on it, but they add to give zero net force on the object. Forces that do not sum to zero can cause changes in the object's speed or direction of motion. (Boundary: Qualitative and conceptual, but not quantitative additions of forces are used at this level.) (PS1-3-1)</td>
</tr>
<tr>
<td>• Force applied to an object can alter the position and motion of that object: revolve, rotate, float, sink, fall and at rest. (PS1-3-2)</td>
</tr>
<tr>
<td>• The patterns of an object’s motion in various situations can be observed and measured; when that past motion exhibits a regular pattern, future motion can be predicted from it. (Boundary: Technical terms, such as magnitude, velocity, momentum, and vector quantity, are not introduced at this level, but the concept that some quantities need both size and direction to be described is developed.) (PS1-3-2)</td>
</tr>
<tr>
<td><strong>PS2.B: Types of Interactions</strong></td>
</tr>
<tr>
<td>• Objects in contact exert forces on each other. (PS1-3-1)</td>
</tr>
<tr>
<td>• Electric and magnetic forces between a pair of objects do not require that the objects be in contact. The sizes of the forces in each situation depend on the properties of the objects and their distances apart and, for forces between two magnets, on their orientation relative to each other. (PS1-3-3, PS1-3-4)</td>
</tr>
</tbody>
</table>

**Performance Expectations (PE)**

Students who demonstrate understanding can:

**PS1-3-1.** Plan and conduct an investigation to provide evidence of the effects of balanced and unbalanced forces on the motion of an object.
- Clarification Statement: Examples could include an unbalanced force on one side of a ball can make it start moving; and, balanced forces pushing on a box from both sides will not produce any motion at all.
- Assessment Boundary: Assessment is limited to one variable at a time: number, size, or direction of forces. Assessment does not include quantitative force size, only qualitative and relative. Assessment is limited to gravity being addressed as a force that pulls objects down.

**PS1-3-2.** Make observations and/or measurements of an object’s motion to provide evidence that a pattern can be used to predict future motion.
- Clarification Statement: Examples of motion with a predictable pattern could include a child swinging in a swing, a ball rolling back and forth in a bowl, and two children on a see-saw.
- Assessment Boundary: Assessment does not include technical terms such as period and frequency.

**PS1-3-3.** Ask questions to determine cause and effect relationships of electric or magnetic interactions between two objects not in contact with each other.
- Clarification Statement: Examples of an electric force could include the force on hair from an electrically charged balloon and the electrical forces between a charged rod and pieces of paper; examples of a magnetic force could include the force between two permanent magnets, the force between an electromagnet and steel paperclips, and the force exerted by one magnet versus the force exerted by two magnets. Examples of cause and effect relationships could include how the distance between objects affects strength of the force and how the orientation of magnets affects the direction of the magnetic force.
- Assessment Boundary: Assessment is limited to forces produced by objects that can be manipulated by students, and electrical interactions are limited to static electricity.

**PS1-3-4.** Define a simple design problem that can be solved by applying scientific ideas about magnets.
- Clarification Statement: Examples of problems could include constructing a latch to keep a door shut and creating a device to keep two moving objects from touching each other.

### Science and Engineering Practices (SEP)

**Asking Questions and Defining Problems**

- Asking questions and defining problems in grades 3–5 builds on grades K–2 experiences and progresses to specifying qualitative relationships.
- Ask questions that can be investigated based on patterns such as cause and

### Crosscutting Concepts (CCC)

**Patterns**

- Patterns of change can be used to make predictions. (PS1-3-2)

**Cause and Effect**

- Cause and effect relationships are routinely identified. (PS1-3-1)
Planning and Carrying Out Investigations
Planning and carrying out investigations to answer questions or test solutions to problems in 3–5 builds on K–2 experiences and progresses to include investigations that control variables and provide evidence to support explanations or design solutions.

- Plan and conduct an investigation collaboratively to produce data to serve as the basis for evidence, using fair tests in which variables are controlled and the number of trials considered. (PS1-3-1)
- Make observations and/or measurements to produce data to serve as the basis for evidence for an explanation of a phenomenon or test a design solution. (PS1-3-2)

Cause and effect relationships are routinely identified, tested, and used to explain change. (PS1-3-3)

Connections to Engineering, Technology, and Applications of Science

Interdependence of Science, Engineering, and Technology
Scientific discoveries about the natural world can often lead to new and improved technologies, which are developed through the engineering design process. (PS1-3-4)

Idaho Common Core Connections

Science Knowledge is Based on Empirical Evidence
Science findings are based on recognizing patterns. (PS1-3-2)

- MP.2 Reason abstractly and quantitatively. (PS1-3-1)
- MP.5 Use appropriate tools strategically. (PS1-3-1)
- 3.MD.A.2 Measure and estimate liquid volumes and masses of objects using standard units of grams (g), kilograms (kg), and liters (l). Add, subtract, multiply, or divide to solve one-step word problems involving masses or volumes that are given in the same units, e.g., by using drawings (such as a beaker with a measurement scale) to represent the problem. (PS1-3-1)

LS: Life Sciences

LS1-3 Ecosystems: Interactions, Energy, and Dynamics

Disciplinary Core Ideas (DCI)

LS2.D: Social Interactions and Group Behavior
- Being part of a group helps animals obtain food, defend themselves, and cope with changes. Groups may serve different functions and vary dramatically in size. (LS1-3-1)

Performance Expectations (PE)

Students who demonstrate understanding can:
### LS1-3-1. Construct an argument that some animals form groups that help members survive

</tr>
</tbody>
</table>

### Performance Expectations (PE)

Students who demonstrate understanding can:

**LS2-3-1.** Analyze and interpret data to provide evidence that plants and animals have traits inherited from parents and that variation of these traits exists in a group of similar organisms.

| **Clarification Statement:** Patterns are the similarities and differences in traits shared between offspring and their parents, or among siblings. Emphasis is on organisms other than humans. |
| **Assessment Boundary:** Assessment does not include genetic mechanisms of inheritance and prediction of traits. Assessment is limited to non-human examples. |

**LS2-3-2.** Use evidence to support the explanation that traits can be influenced by the environment.

| **Clarification Statement:** Examples of the environment affecting a trait could include normally tall plants grown with insufficient water are stunted; and, a pet dog that is given too much food and little exercise may become overweight. |

quantitative approaches to collecting data and conducting multiple trials of qualitative observations. When possible and feasible, digital tools should be used.

- Analyze and interpret data to make sense of phenomena using logical reasoning. (LS2-3-1)

**Constructing Explanations and Designing Solutions**

Constructing explanations and designing solutions in 3–5 builds on K–2 experiences and progresses to the use of evidence in constructing explanations that specify variables that describe and predict phenomena and in designing multiple solutions to design problems.

- Use evidence (e.g., observations, patterns) to support an explanation. (LS2-3-2)

**Idaho Common Core Connections**

**ELA/Literacy**

RI.3.1 Ask and answer questions to demonstrate understanding of a text, referring explicitly to the text as the basis for the answers. (LS2-3-1),(LS2-3-2)

RI.3.2 Determine the main idea of a text; recount the key details and explain how they support the main idea. (LS2-3-1),(LS2-3-2)

RI.3.3 Describe the relationship between a series of historical events, scientific ideas or concepts, or steps in technical procedures in a text, using language that pertains to time, sequence, and cause/effect. (LS2-3-1),(LS2-3-2)

W.3.2 Write informative/explanatory texts to examine a topic and convey ideas and information clearly. (LS2-3-1),(LS2-3-2)

SL.3.4 Report on a topic or text, tell a story, or recount an experience with appropriate facts and relevant, descriptive details, speaking clearly at an understandable pace. (LS2-3-1),(LS2-3-2)

**Mathematics**

MP.2 Reason abstractly and quantitatively. (LS2-3-1),(LS2-3-2)

MP.4 Model with mathematics. (LS2-3-1),(LS2-3-2)

3.MD.B.4 Generate measurement data by measuring lengths using rulers marked with halves and fourths of an inch. Show the data by making a line plot, where the horizontal scale is marked off in appropriate units—whole numbers, halves, or quarters. (LS2-3-1),(LS2-3-2)

**ESS: Earth and Space Sciences**

**ESS1-3 Earth’s Systems**

**Disciplinary Core Ideas (DCI)**

**ESS2.D: Weather and Climate**

- Scientists record patterns of the weather across different times and areas so that they can make predictions about what kind of weather might happen next. (ESS1-3-1)
- Climate describes a range of an area’s typical weather conditions and the extent to which those conditions vary over years. (ESS1-3-2)

**Performance Expectations (PE)**

**ESS1-3-1.** Represent data in tables and graphical displays to describe typical weather conditions expected during a particular season.

- Clarification Statement: Examples of data could include average temperature, precipitation, and wind direction.
- Assessment Boundary: Assessment of graphical displays is limited to pictographs and bar graphs. Assessment does not include climate change.

**ESS1-3-2.** Obtain and combine information to describe climates in different regions of the world.

**Science and Engineering Practices (SEP)**

**Analyzing and Interpreting Data**

Analyzing data in 3–5 builds on K–2 experiences and progresses to introducing...
quantitative approaches to collecting data and conducting multiple trials of qualitative observations. When possible and feasible, digital tools should be used.

- Represent data in tables and various graphical displays (bar graphs and pictographs) to reveal patterns that indicate relationships. (ESS1-3-1)

### Obtaining, Evaluating, and Communicating Information

Obtaining, evaluating, and communicating information in 3–5 builds on K–2 experiences and progresses to evaluating the merit and accuracy of ideas and methods.

- Obtain and combine information from books and other reliable media to explain phenomena. (ESS1-3-2)

### Idaho Common Core Connections

#### ELA/Literacy

- **RI.3.1** Ask and answer questions to demonstrate understanding of a text, referring explicitly to the text as the basis for the answers. (ESS1-3-2)
- **RI.3.9** Compare and contrast the most important points and key details presented in two texts on the same topic. (ESS1-3-2)
- **W.3.8** Recall information from experiences or gather information from print and digital sources; take brief notes on sources and sort evidence into provided categories. (ESS1-3-2)

#### Mathematics

- **MP.2** Reason abstractly and quantitatively. (ESS1-3-1), (ESS1-3-2)
- **MP.4** Model with mathematics. (ESS1-3-1), (ESS1-3-2)
- **MP.5** Use appropriate tools strategically. (ESS1-3-1), (ESS1-3-2)
- **3.MD.A.2** Measure and estimate liquid volumes and masses of objects using standard units of grams (g), kilograms (kg), and liters (l). Add, subtract, multiply, or divide to solve one-step word problems involving masses or volumes that are given in the same units, e.g., by using drawings (such as a beaker with a measurement scale) to represent the problem. (ESS1-3-1)
- **3.MD.B.3** Draw a scaled picture graph and a scaled bar graph to represent a data set with several categories. Solve one- and two-step "how many more" and "how many less" problems using information presented in bar graphs. (ESS1-3-1)

### ESS2-3 Earth and Human Activity

#### Disciplinary Core Ideas (DCI)

**ESS3.B: Natural Hazards**

- A variety of natural hazards result from natural processes. Humans cannot eliminate natural hazards but can take steps to reduce their impacts. (ESS2-3-1)

#### Performance Expectations (PE)

Students who demonstrate understanding can:

- **ESS2-3-1.** Make a claim about the merit of a design solution that reduces the impacts of a weather-related hazard.
  - Clarification Statement: Examples of design solutions to weather-related hazards could include barriers to prevent flooding, wind resistant roofs, and lightning rods.

#### Science and Engineering Practices (SEP)

**Engaging in Argument from Evidence**

Engaging in argument from evidence in 3–5 builds on K–2 experiences and progresses to critiquing the scientific explanations or solutions proposed by peers by citing relevant evidence about the natural and designed world(s).

- Make a claim about the merit of a solution to a problem by citing relevant evidence about how it meets the criteria and constraints of the problem. (ESS2-3-1)

#### Crosscutting Concepts (CCC)

**Cause and Effect**

Cause and effect relationships are routinely identified, tested, and used to explain change. (ESS2-3-1)

**Connections to Engineering, Technology, and Applications of Science**

**Influence of Engineering, Technology, and Science on Society and the Natural World**

Engineers improve existing technologies or develop new ones to increase their benefits...
(e.g., better artificial limbs), decrease known risks (e.g., seatbelts in cars), and meet societal demands (e.g., cell phones). (ESS2-3-1)

### Connections to Nature of Science

**Science is a Human Endeavor**
Science affects everyday life. (ESS2-3-1)

Elementary School (4th Grade)

PS: Physical Sciences

PS1-4 Energy

**Disciplinary Core Ideas (DCI)**

**PS3.A: Definitions of Energy**
- The faster a given object is moving, the more energy it possesses. (PS1-4-1)
- Energy can be moved from place to place by moving objects or through sound, light, or electric currents. (PS1-4-2, PS1-4-3)

**PS3.B: Conservation of Energy and Energy Transfer**
- Energy is present whenever there are moving objects, sound, light, or heat. When objects collide, energy can be transferred from one object to another, thereby changing their motion. In such collisions, some energy is typically also transferred to the surrounding air; as a result, the air gets heated and sound is produced. (PS1-4-2, PS1-4-3)
- Light also transfers energy from place to place. (PS1-4-2)
- Energy can also be transferred from place to place by electric currents, which can then be used locally to produce motion, sound, heat, or light. The currents may have been produced to begin with by transforming the energy of motion into electrical energy. (PS1-4-2, PS1-4-4)

**PS3.C: Relationship Between Energy and Forces**
- When objects collide, the contact forces transfer energy so as to change the objects’ motions. (PS1-4-3)

**PS3.D: Energy in Chemical Processes and Everyday Life**
- The expression "produce energy" typically refers to the conversion of stored energy into a desired form for practical use. (PS1-4-4)

**ETS1.A: Defining Engineering Problems**
- Possible solutions to a problem are limited by available materials and resources (constraints). The success of a designed solution is determined by considering the desired features of a solution (criteria). Different proposals for solutions can be compared on the basis of how well each one meets the specified criteria for success or how well each takes the constraints into account.(PS1-4-4)

**Performance Expectations (PE)**

Students who demonstrate understanding can:

**PS1-4-1. Use evidence to construct an explanation relating the speed of an object to the energy of that object.**
- Assessment Boundary: Assessment does not include quantitative measures of changes in the speed of an object or on any precise or quantitative definition of energy.

**PS1-4-2. Make observations to provide evidence that energy can be transferred from place to place by sound, light, heat, and electric currents.**
- Assessment Boundary: Assessment does not include quantitative measurements of energy.

**PS1-4-3. Ask questions and predict outcomes about the changes in energy that occur when objects collide.**
- Clarification Statement: Emphasis is on the change in the energy due to the change in speed, not on the forces, as objects interact.
- Assessment Boundary: Assessment does not include quantitative measurements of energy.

**PS1-4-4. Apply scientific ideas to design, test, and refine a device that converts energy from one form to another.**
- Clarification Statement: Examples of devices could include electric circuits that convert electrical energy into motion energy of a vehicle, light, or sound; and, a passive solar heater that converts light into heat. Examples of constraints could include the materials, cost, or time to design the device.
- Assessment Boundary: Devices should be limited to those that convert motion energy to electric energy or use stored energy to cause motion or produce light or sound.
### Science and Engineering Practices (SEP)

#### Asking Questions and Defining Problems
Asking questions and defining problems in grades 3–5 builds on grades K–2 experiences and progresses to specifying qualitative relationships.
- Ask questions that can be investigated and predict reasonable outcomes based on patterns such as cause and effect relationships. (PS1-4-3)

#### Planning and Carrying Out Investigations
Planning and carrying out investigations to answer questions or test solutions to problems in 3–5 builds on K–2 experiences and progresses to include investigations that control variables and provide evidence to support explanations or design solutions.
- Make observations to produce data to serve as the basis for evidence for an explanation of a phenomenon or test a design solution. (PS1-4-2)

#### Constructing Explanations and Designing Solutions
Constructing explanations and designing solutions in 3–5 builds on K–2 experiences and progresses to the use of evidence in constructing explanations that specify variables that describe and predict phenomena and in designing multiple solutions to design problems.
- Use evidence (e.g., measurements, observations, patterns) to construct an explanation. (PS1-4-1)
- Apply scientific ideas to solve design problems. (PS1-4-4)

### Crosscutting Concepts (CCC)

#### Energy and Matter
Energy can be transferred in various ways and between objects. (PS1-4-1, PS1-4-2, PS1-4-3, PS1-4-4)

**Connections to Engineering, Technology, and Applications of Science**

#### Influence of Engineering, Technology, and Science on Society and the Natural World
Engineers improve existing technologies or develop new ones. (PS1-4-4)

**Connections to Nature of Science**

#### Science is a Human Endeavor
Most scientists and engineers work in teams. (PS1-4-4)
Science affects everyday life. (PS1-4-4)

### Idaho Common Core Connections

#### ELA/Literacy

- **RI.4.1** Refer to details and examples in a text when explaining what the text says explicitly and when drawing inferences from the text. (PS1-4-1)
- **RI.4.3** Explain events, procedures, ideas, or concepts in a historical, scientific, or technical text, including what happened and why, based on specific information in the text. (PS1-4-1)
- **RI.4.9** Integrate information from two texts on the same topic in order to write or speak about the subject knowledgeably. (PS1-4-1)
- **W.4.2** Write informative/explanatory texts to examine a topic and convey ideas and information clearly. (PS1-4-1)
- **W.4.7** Conduct short research projects that build knowledge through investigation of different aspects of a topic. (PS1-4-2), (PS1-4-3), (PS1-4-4)
- **W.4.8** Recall relevant information from experiences or gather relevant information from print and digital sources; take notes and categorize information, and provide a list of sources. (PS1-4-1), (PS1-4-2), (PS1-4-3), (PS1-4-4)
- **W.4.9** Draw evidence from literary or informational texts to support analysis, reflection, and research. (PS1-4-1)

#### Mathematics

- **4.OA.A.3** Solve multistep word problems posed with whole numbers and having whole-number answers using the four operations, including problems in which remainders must be interpreted. Represent these problems using equations with a letter standing for the unknown quantity. Assess the reasonableness of answers using mental computation and estimation strategies including rounding. (PS1-4-4)

### Disciplinary Core Ideas (DCI)

#### PS4.A: Wave Properties
- Waves, which are regular patterns of motion, can be made in water by disturbing the surface. When waves move across the surface of deep water, the water goes up and down in place; there is no net motion in the direction of the wave except when the water meets a beach. (PS2-4-1)
- Waves of the same type can differ in amplitude (height of the wave) and wavelength (spacing between wave peaks). (PS2-4-1)

#### PS4.B: Electromagnetic Radiation
- An object can be seen when light reflected from its surface enters the eyes. (PS2-4-2)

#### PS4.C: Information Technologies and Instrumentation
- Digitized information can be transmitted over long distances without significant degradation. High-tech devices, such as computers or cell phones, can receive and decode...
information—convert it from digitized form to voice—and vice versa. (PS2-4-3)

**ETS1.C: Optimizing The Design Solution**
- Different solutions need to be tested in order to determine which of them best solves the problem, given the criteria and the constraints. (PS2-4-3)

### Performance Expectations (PE)

**PS2-4-1. Develop a model of waves to describe patterns in terms of amplitude and wavelength and that waves can cause objects to move.**
- Clarification Statement: Examples of models could include diagrams, analogies, and physical models using wire to illustrate wavelength and amplitude of waves.
- Assessment Boundary: Assessment does not include interference effects, electromagnetic waves, non-periodic waves, or quantitative models of amplitude and wavelength.

**PS2-4-2. Develop a model to describe that light reflecting from objects and entering the eye allows objects to be seen.**
- Assessment Boundary: Assessment does not include knowledge of specific colors reflected and seen, the cellular mechanisms of vision, or how the retina works.

**PS2-4-3. Generate and compare multiple solutions that use patterns to transfer information.**
- Clarification Statement: Examples of solutions could include drums sending coded information through sound waves, using a grid of 1’s and 0’s representing black and white to send information about a picture, and using Morse code to send text.

### Science and Engineering Practices (SEP)

#### Developing and Using Models
Modeling in 3–5 builds on K–2 experiences and progresses to building and revising simple models and using models to represent events and design solutions.
- Develop a model using an analogy, example, or abstract representation to describe a scientific principle. (PS2-4-1)
- Develop a model to describe phenomena. (PS2-4-2)

#### Constructing Explanations and Designing Solutions
Constructing explanations and designing solutions in 3–5 builds on K–2 experiences and progresses to the use of evidence in constructing explanations that specify variables that describe and predict phenomena and in designing multiple solutions to design problems.
- Generate and compare multiple solutions to a problem based on how well they meet the criteria and constraints of the design solution. (PS2-4-3)

**Connections to Nature of Science**

**Scientific Knowledge is Based on Empirical Evidence**
Science findings are based on recognizing patterns. (PS2-4-1)

LS: Life Sciences
LS1-4 Molecules to Organisms: Structure and Processes

### Disciplinary Core Ideas (DCI)

#### LS1.A: Structure and Function
- Plants and animals have both internal and external structures that serve various functions in growth, survival, behavior, and reproduction. (LS1-4-1)
- Animals have various body systems with specific functions for sustaining life: skeletal, circulatory, respiratory, muscular, digestive, etc. (LS1-4-1).

#### LS1.D: Information Processing
- Different sense receptors are specialized for particular kinds of information, which may be then processed by the animal’s brain. Animals are able to use their perceptions and memories to guide their actions. (LS1-4-2)

### Performance Expectations (PE)

Students who demonstrate understanding can:

#### LS1-4-1. Construct an argument that plants and animals have internal and external structures that function to support survival, growth, behavior, and reproduction.
- Clarification Statement: Examples of structures could include thorns, stems, roots, colored petals, heart, stomach, lung, brain, and skin.
- Assessment Boundary: Assessment is limited to macroscopic structures within plant and animal systems.

#### LS1-4-2. Use a model to describe that animals receive different types of information through their senses, process the information in their brain, and respond to the information in different ways.
- Clarification Statement: Emphasis is on systems of information transfer.
- Assessment Boundary: Assessment does not include the mechanisms by which the brain stores and recalls information or the mechanisms of how sensory receptors function.

### Science and Engineering Practices (SEP)

#### Developing and Using Models
Modeling in 3–5 builds on K–2 experiences and progresses to building and revising simple models and using models to represent events and design solutions.
- Use a model to test interactions concerning the functioning of a natural system. (LS1-4-2)

#### Engaging in Argument from Evidence
Engaging in argument from evidence in 3–5 builds on K–2 experiences and progresses to critiquing the scientific explanations or solutions proposed by peers by citing relevant evidence about the natural and designed world(s).
- Construct an argument with evidence, data, and/or a model. (LS1-4-1)

### Crosscutting Concepts (CCC)

#### Systems and System Models
A system can be described in terms of its components and their interactions. (LS1-4-1, LS1-4-2)

### Idaho Common Core Connections

#### ELA/Literacy
- **W.4.1** Write opinion pieces on topics or texts, supporting a point of view with reasons and information. (LS1-4-1)
- **SL.4.5** Add audio recordings and visual displays to presentations when appropriate to enhance the development of main ideas or themes. (LS1-4-2)

#### Mathematics
- **4.G.A.3** Recognize a line of symmetry for a two-dimensional figure as a line across the figure such that the figure can be folded across the line into matching parts. Identify line-symmetric figures and draw lines of symmetry. (LS1-4-1)
## LS2-4 Ecosystems: Interactions, Energy, and Dynamics

### Disciplinary Core Ideas (DCI)

**LS2.A: Interdependent Relationships in Ecosystems**
- The food of almost any kind of animal can be traced back to plants. Organisms are related in food webs in which some animals eat plants for food and other animals eat the animals that eat plants. Some organisms, such as fungi and bacteria, break down dead organisms (both plants or plants parts and animals) and therefore operate as "decomposers." Decomposition eventually restores (recycles) some materials back to the soil. Organisms can survive only in environments in which their particular needs are met. A healthy ecosystem is one in which multiple species of different types are each able to meet their needs in a relatively stable web of life. Newly introduced species can damage the balance of an ecosystem. (LS2-4-1)

**LS2.B: Cycles of Matter and Energy Transfer in Ecosystems**
- Matter cycles between the air and soil and among plants, animals, and microbes as these organisms live and die. Organisms obtain gases, and water, from the environment, and release waste matter (gas, liquid, or solid) back into the environment. (LS2-4-1)

### Performance Expectations (PE)

Students who demonstrate understanding can:

#### LS2-4-1. Develop a model to describe the movement of matter among plants, animals, decomposers, and the environment.
- Clarification Statement: Emphasis is on the idea that matter that is not food (air, water, decomposed materials in soil) is changed by plants into matter that is food. Examples of systems could include organisms, ecosystems, and the Earth.
- Assessment Boundary: Assessment does not include molecular explanations.

### Science and Engineering Practices (SEP)

#### Developing and Using Models
Modeling in 3–5 builds on K–2 models and progresses to building and revising simple models and using models to represent events and design solutions.
- Develop a model to describe phenomena. (LS2-4-1)

### Crosscutting Concepts (CCC)

#### Systems and System Models
A system can be described in terms of its components and their interactions. (LS2-4-1)

### Connections to the Nature of Science

**Science Models, Laws, Mechanisms, and Theories Explain Natural Phenomena**
Science explanations describe the mechanisms for natural events. (LS2-4-1)

### Idaho Common Core Connections

**ELA/Literacy**
- **RL.5.7** Draw on information from multiple print or digital sources, demonstrating the ability to locate an answer to a question quickly or to solve a problem efficiently. (LS2-4-1)
- **SL.5.5** Include multimedia components (e.g., graphics, sound) and visual displays in presentations when appropriate to enhance the development of main ideas or themes. (LS2-4-1)

**Mathematics**
- **MP.2** Reason abstractly and quantitatively. (LS2-4-1)
- **MP.4** Model with mathematics. (LS2-4-1)
ESS: Earth and Space Sciences

ESS1-4 Earth’s Place in the Universe

Disciplinary Core Ideas (DCI)

ESS1.C: The History of Planet Earth
- Local, regional, and global patterns of rock formations reveal changes over time due to earth forces, such as earthquakes. The presence and location of certain fossil types indicate the order in which rock layers were formed. (ESS1-4-1)
- There are three classifications of rocks produced within the rock cycle: sedimentary, metamorphic, and igneous. (ESS1-4-1).

Performance Expectations (PE)

Students who demonstrate understanding can:

ESS1-4-1. Identify evidence from patterns in rock formations and fossils in rock layers for changes in a landscape over time.
- Clarification Statement: Examples of evidence from patterns could include rock layers with marine shell fossils above rock layers with plant fossils and no shells, indicating a change from land to water over time; and, a canyon with different rock layers in the walls and a river in the bottom, indicating that over time a river cut through the rock.
- Assessment Boundary: Assessment does not include specific knowledge of the mechanism of rock formation or memorization of specific rock formations and layers. Assessment is limited to relative time.

Science and Engineering Practices (SEP)

Constructing Explanations and Designing Solutions
- Constructing explanations and designing solutions in 3–5 builds on K–2 experiences and progresses to the use of evidence in constructing explanations that specify variables that describe and predict phenomena and in designing multiple solutions to design problems.
- Identify the evidence that supports particular points in an explanation. (ESS1-4-1)

Crosscutting Concepts (CCC)

Patterns
- Patterns can be used as evidence to support an explanation. (ESS1-4-1)

Connections to Nature of Science
- Scientific Knowledge Assumes an Order and Consistency in Natural Systems
- Science assumes consistent patterns in natural systems. (ESS1-4-1)

Idaho Common Core Connections

ELA/Literacy
- W.4.7 Conduct short research projects that build knowledge through investigation of different aspects of a topic. (ESS1-4-1)
- W.4.8 Recall relevant information from experiences or gather relevant information from print and digital sources; take notes and categorize information, and provide a list of sources. (ESS1-4-1)
- W.4.9 Draw evidence from literary or informational texts to support analysis, reflection, and research. (ESS1-4-1)

Mathematics
- MP.2 Reason abstractly and quantitatively. (ESS1-4-1)
- MP.4 Model with mathematics. (ESS1-4-1)
- 4.MD.A.1 Know relative sizes of measurement units within one system of units including km, m, cm; kg, g; lb, oz.; l, ml; hr, min, sec. Within a single system of measurement, express measurements in a larger unit in terms of a smaller unit. Record measurement equivalents in a two-column table. (ESS1-4-1)

ESS2-4 Earth’s Systems

Disciplinary Core Ideas (DCI)

ESS2.A: Earth Materials and Systems
- Rainfall helps to shape the land and affects the types of living things found in a region. Water, ice, wind, living organisms, and gravity break rocks, soils, and sediments into smaller particles and move them around. (ESS2-4-1)

ESS2.B: Plate Tectonics and Large-Scale System Interactions
- The locations of mountain ranges, deep ocean trenches, ocean floor structures, earthquakes, and volcanoes occur in patterns. Most earthquakes and volcanoes occur in bands that are often along the boundaries between continents and oceans. Major mountain chains form inside continents or near their edges. Maps can help locate the different land and water features areas of Earth. (ESS2-4-2)

**ESS2.E: Biogeology**
- Living things affect the physical characteristics of their regions. (ESS2-4-1)

### Performance Expectations (PE)

**ESS2-4-1.** Make observations and/or measurements to provide evidence of the effects of weathering or the rate of erosion by water, ice, wind, or vegetation.
- **Clarification Statement:** Examples of variables to test could include angle of slope in the downhill movement of water, amount of vegetation, speed of wind, relative rate of deposition, cycles of freezing and thawing of water, cycles of heating and cooling, and volume of water flow.
- **Assessment Boundary:** Assessment is limited to a single form of weathering or erosion.

**ESS2-4-2.** Analyze and interpret data from maps to describe patterns of Earth’s features.
- **Clarification Statement:** Maps can include topographic maps of Earth’s land and ocean floor, as well as maps of the locations of mountains, continental boundaries, volcanoes, and earthquakes.

### Science and Engineering Practices (SEP)

**Planning and Carrying Out Investigations**
Planning and carrying out investigations to answer questions or test solutions to problems in 3–5 builds on K–2 experiences and progresses to include investigations that control variables and provide evidence to support explanations or design solutions.
- Make observations and/or measurements to produce data to serve as the basis for evidence for an explanation of a phenomenon. (ESS2-4-1)

**Analyzing and Interpreting Data**
Analyzing data in 3–5 builds on K–2 experiences and progresses to introducing quantitative approaches to collecting data and conducting multiple trials of qualitative observations. When possible and feasible, digital tools should be used.
- Analyze and interpret data to make sense of phenomena using logical reasoning. (ESS2-4-2)

### Crosscutting Concepts (CCC)

**Patterns**
Patterns can be used as evidence to support an explanation. (ESS2-4-2)

**Cause and Effect**
Cause and effect relationships are routinely identified, tested, and used to explain change. (ESS2-4-1)

### Idaho Common Core Connections

**ELA/Literacy**
- **RL.4.7** Interpret information presented visually, orally, or quantitatively (e.g., in charts, graphs, diagrams, timelines, animations, or interactive elements on Web pages) and explain how the information contributes to an understanding of the text in which it appears. (ESS2-4-2)
- **W.4.7** Interpret information presented visually, orally, or quantitatively (e.g., in charts, graphs, diagrams, timelines, animations, or interactive elements on Web pages) and explain how the information contributes to an understanding of the text in which it appears. (ESS2-4-2)
- **W.4.8** Recall relevant information from experiences or gather relevant information from print and digital sources: take notes and categorize information, and provide a list of sources. (ESS2-4-1)

**Mathematics**
- **MP.2** Reason abstractly and quantitatively. (ESS2-4-1)
- **MP.4** Model with mathematics. (ESS2-4-1)
- **MP.5** Use appropriate tools strategically. (ESS2-4-1)
- **4.MD.A.1** Know relative sizes of measurement units within one system of units including km, m, cm; kg, g; lb, oz.; l, m, hr, min, sec. Within a single system of measurement, express measurements in a larger unit in terms of a smaller unit. Record measurement equivalents in a two-column table. (ESS2-4-1)
- **4.MD.A.2** Use the four operations to solve word problems involving distances, intervals of time, liquid volumes, masses of objects, and money, including problems involving simple fractions or decimals, and problems that require expressing measurements given in a larger unit in terms of a smaller unit. Represent measurement quantities using diagrams such as number line diagrams that feature a measurement scale. (ESS2-4-1),(ESS2-4-2)
### Disciplinary Core Ideas (DCI)

**ESS3.A: Natural Resources**
- Energy and fuels that humans use are derived from natural sources, and their use affects the environment in multiple ways. Some resources are renewable over time, and others are not. (ESS3-4-1)

**ESS3.B: Natural Hazards**
- A variety of hazards result from natural processes (e.g., earthquakes, tsunamis, volcanic eruptions). Humans cannot eliminate the hazards but can take steps to reduce their impacts. (ESS3-4-2)

**ETS1.B: Designing Solutions to Engineering Problems**
- Testing a solution involves investigating how well it performs under a range of likely conditions. (ESS3-4-2)

### Performance Expectations (PE)

Students who demonstrate understanding can:

**ESS3-4-1.** **Obtain and combine information to describe that energy and fuels are derived from natural resources and their uses affect the environment.**
- Clarification Statement: Examples of renewable energy resources could include wind energy, water behind dams, and sunlight; non-renewable energy resources are fossil fuels and fissile materials. Examples of environmental effects could include loss of habitat due to dams, loss of habitat due to surface mining, and air pollution from burning of fossil fuels.

**ESS3-4-2.** **Generate and compare multiple solutions to reduce the impacts of natural Earth processes on humans.**
- Clarification Statement: Examples of solutions could include designing an earthquake resistant building and improving monitoring of volcanic activity.
- Assessment Boundary: Assessment is limited to earthquakes, floods, tsunamis, and volcanic eruptions.

### Science and Engineering Practices (SEP)

**Constructing Explanations and Designing Solutions**
Constructing explanations and designing solutions in 3–5 builds on K–2 experiences and progresses to the use of evidence in constructing explanations that specify variables that describe and predict phenomena and in designing multiple solutions to design problems.
- Generate and compare multiple solutions to a problem based on how well they meet the criteria and constraints of the design solution. (ESS3-4-2)

**Obtaining, Evaluating, and Communicating Information**
Obtaining, evaluating, and communicating information in 3–5 builds on K–2 experiences and progresses to evaluate the merit and accuracy of ideas and methods.
- Obtain and combine information from books and other reliable media to explain phenomena. (ESS3-4-1)

### Crosscutting Concepts (CCC)

**Cause and Effect**
Cause and effect relationships are routinely identified and used to explain change. (ESS3-4-1)

Cause and effect relationships are routinely identified, tested, and used to explain change. (ESS3-4-2)

**Connections to Engineering, Technology, and Applications of Science**

**Interdependence of Science, Engineering, and Technology**
Knowledge of relevant scientific concepts and research findings is important in engineering. (ESS3-4-1)

**Influence of Engineering, Technology, and Science on Society and the Natural World**
Over time, people’s needs and wants change, as do their demands for new and improved technologies. (ESS3-4-1)

Engineers improve existing technologies or develop new ones to increase their benefits, to decrease known risks, and to meet societal demands. (ESS3-4-2)

Elementary School (5th Grade)

PS: Physical Sciences

PS1-5 Matter and Its Interactions

### Disciplinary Core Ideas (DCI)

**PS1.A: Structure and Properties of Matter**
- Matter of any type can be subdivided into particles that are too small to see, but even then the matter still exists and can be detected by other means. A model showing that gases are made from matter particles that are too small to see and are moving freely around in space can explain many observations, including the inflation and shape of a balloon and the effects of air on larger particles or objects. (PS1-5-1)
- The amount (weight) of matter is conserved when it changes form, even in transitions in which it seems to vanish. (PS1-5-2)
- Measurements of a variety of properties can be used to identify materials. (Boundary: At this grade level, mass and weight are not distinguished, and no attempt is made to define the unseen particles or explain the atomic-scale mechanism of evaporation and condensation.) (PS1-5-3)

**PS1.B: Chemical Reactions**
- When two or more different substances are mixed, a new substance with different properties may be formed. (PS1-5-4)
- No matter what reaction or change in properties occurs, the total weight of the substances does not change. (Boundary: Mass and weight are not distinguished at this grade level.) (PS1-5-2)

### Performance Expectations (PE)

Students who demonstrate understanding can:

**PS1-5-1.** Develop a model to describe that matter is made of particles too small to be seen.
- Clarification Statement: Examples of evidence supporting a model could include adding air to expand a basketball, compressing air in a syringe, dissolving sugar in water, and evaporating salt water.
- Assessment Boundary: Assessment does not include the atomic-scale mechanism of evaporation and condensation or defining the unseen particles.

**PS1-5-2.** Measure and graph quantities to provide evidence that regardless of the type of change that occurs when heating, cooling, or mixing substances, the total weight of matter is conserved.
- Clarification Statement: Examples of reactions or changes could include phase changes, dissolving, and mixing that form new substances.
- Assessment Boundary: Assessment does not include distinguishing mass and weight.

**PS1-5-3.** Make observations and measurements to identify materials based on their properties.
- Clarification Statement: Examples of materials to be identified could include baking soda and other powders, metals, minerals, and liquids. Examples of properties could include color, hardness, reflectivity, electrical conductivity, thermal conductivity, response to magnetic forces, and solubility; density is not intended as an identifiable property.
- Assessment Boundary: Assessment does not include density or distinguishing mass and weight.

**PS1-5-4.** Conduct an investigation to determine whether the mixing of two or more substances results in new substances.

### Science and Engineering Practices (SEP)

- **Developing and Using Models**
  - Modeling in 3–5 builds on K–2 experiences and progresses to building and revising simple models and using models to represent events and design solutions.
  - Use models to describe phenomena. (PS1-5-1)

### Crosscutting Concepts (CCC)

- **Cause and Effect**
  - Cause and effect relationships are routinely identified and used to explain change. (PS1-5-4)

- **Scale, Proportion, and Quantity**
Planning and Carrying Out Investigations

Planning and carrying out investigations to answer questions or test solutions to problems in 3–5 builds on K–2 experiences and progresses to include investigations that control variables and provide evidence to support explanations or design solutions.

- Conduct an investigation collaboratively to produce data to serve as the basis for evidence, using fair tests in which variables are controlled and the number of trials considered. (PS1-5-4)
- Make observations and measurements to produce data to serve as the basis for evidence for an explanation of a phenomenon. (PS1-5-3)

Using Mathematics and Computational Thinking

Mathematical and computational thinking in 3–5 builds on K–2 experiences and progresses to extending quantitative measurements to a variety of physical properties and using computation and mathematics to analyze data and compare alternative design solutions.

- Measure and graph quantities such as weight to address scientific and engineering questions and problems. (PS1-5-2)

Idaho Common Core Connections

ELA/Literacy

RI.5.7 Draw on information from multiple print or digital sources, demonstrating the ability to locate an answer to a question quickly or to gather relevant information from print and digital sources; summarize or paraphrase information in notes and finished work, and provide a list of sources. (PS1-5-2),(PS1-5-3),(PS1-5-4)

W.5.7 Conduct short research projects that use several sources to build knowledge through investigation of different aspects of a topic. (PS1-5-2),(PS1-5-3),(PS1-5-4)

W.5.8 Recall relevant information from experiences or other relevant information from print and digital sources; summarize or paraphrase information in notes and finished work, and provide a list of sources. (PS1-5-2),(PS1-5-3),(PS1-5-4)

W.5.9 Draw evidence from literary or informational texts to support analysis, reflection, and research. (PS1-5-2),(PS1-5-3),(PS1-5-4)

Mathematics

MP.2 Reason abstractly and quantitatively. (PS1-5-1),(PS1-5-2),(PS1-5-3)

MP.4 Model with mathematics. (PS1-5-2),(PS1-5-3),(PS1-5-4)

MP.5 Use appropriate tools strategically. (PS1-5-2),(PS1-5-3)

5.NBT.A.1 Explain patterns in the number of zeros of the product when multiplying a number by powers of 10, and explain patterns in the placement of the decimal point when a decimal is multiplied or divided by a power of 10. Use whole-number exponents to denote powers of 10. (PS1-5-1)

5.NF.B.7 Apply and extend previous understandings of division to divide unit fractions by whole numbers and whole numbers by unit fractions. (PS1-5-1)

5.MD.A.1 Convert among different-sized standard measurement units within a given measurement system (e.g., convert 5 cm to 0.05 m), and use these conversions in solving multi-step, real-world problems. (PS1-5-2)

5.MD.C.3 Recognize volume as an attribute of solid figures and understand concepts of volume measurement. (PS1-5-1)

5.MD.C.4 Measure volumes by counting unit cubes, using cubic cm, cubic in, cubic ft, and improvised units. (PS1-5-1)

PS2-5 Motion and Stability: Forces and Interactions

Disciplinary Core Ideas (DCI)

PS2.B: Types of Interactions

- The gravitational force of Earth acting on an object near Earth’s surface pulls that object toward the planet’s center. (PS2-5-1)

Performance Expectations (PE)

Students who demonstrate understanding can:

PS2-5.1 Support an argument that the gravitational force exerted by Earth on objects is directed down.

- Clarification Statement: "Down" is a local description of the direction that points toward the center of the spherical Earth.
- Assessment Boundary: Assessment does not include mathematical representation of gravitational force.
### Science and Engineering Practices (SEP)  
### Engaging in Argument from Evidence
Engaging in argument from evidence in 3–5 builds on K–2 experiences and progresses to critiquing the scientific explanations or solutions proposed by peers by citing relevant evidence about the natural and designed world(s).
- Support an argument with evidence, data, or a model. (PS2-5-1)

### Crosscutting Concepts (CCC)

#### Cause and Effect
Cause and effect relationships are routinely identified and used to explain change. (PS2-5-1)

### Idaho Common Core Connections

**ELA/Literacy**
- **RI.5.1** Quote accurately from a text when explaining what the text says explicitly and when drawing inferences from the text. (PS2-5-1)
- **RI.5.9** Integrate information from several texts on the same topic in order to write or speak about the subject knowledgeably. (PS2-5-1)
- **W.5.1** Write opinion pieces on topics or texts, supporting a point of view with reasons and information. (PS2-5-1)

**Mathematics**
There are no mathematical standards for this standard

### PS3-5 Energy

#### Disciplinary Core Ideas (DCI)

**PS3.D: Energy in Chemical Processes and Everyday Life**
- The energy released from food was once energy from the sun that was captured by plants in the chemical process that forms plant matter (from air and water). (PS3-5-1)

**LS1.C: Organization for Matter and Energy Flow in Organisms**
- Food provides animals with the materials they need for body repair and growth and the energy they need to maintain body warmth and for motion. (PS3-5-1)

#### Performance Expectations (PE)

Students who demonstrate understanding can:

**PS3-5-1.** Use models to describe that energy in animals’ food (used for body repair, growth, motion, and to maintain body warmth) was once energy from the sun.
- Clarification Statement: Examples of models could include diagrams, and flow charts.

### Science and Engineering Practices (SEP)  
### Developing and Using Models
Modeling in 3–5 builds on K–2 experiences and progresses to building and revising simple models and using models to represent events and design solutions.
- Use models to describe phenomena. (PS3-5-1)

### Crosscutting Concepts (CCC)

#### Energy and Matter
Energy can be transferred in various ways and between objects. (PS3-5-1)

### Performance Expectations (PE)

Students who demonstrate understanding can:

**LS2-5-1.** Analyze and interpret data from fossils to provide evidence of the organisms and the environments in which they lived long ago.
- Clarification Statement: Examples of data could include type, size, and distributions of fossil organisms. Examples of fossils and environments could include marine fossils found on dry land, tropical plant fossils found in Arctic areas, and fossils of extinct organisms.
- Assessment Boundary: Assessment does not include identification of specific fossils or present plants and animals. Assessment is limited to major fossil types and relative ages.

**LS2-5-2.** Use evidence to construct an explanation for how the variations in characteristics among individuals of the same species may provide advantages in surviving, finding mates, and reproducing.
- Clarification Statement: Examples of cause and effect relationships could be plants that have larger thorns than other plants may be less likely to be eaten by predators; and, animals that have better camouflage coloration than other animals may be more likely to survive and therefore more likely to leave offspring.

**LS2-5-3.** Construct an argument with evidence that in a particular habitat some organisms can survive well, some survive less well, and some cannot survive at all.
- Clarification Statement: Examples of evidence could include needs and characteristics of the organisms and habitats involved. The organisms and their habitat make up a system in which the parts depend on each other.

**LS2-5-4.** Make a claim about the merit of a solution to a problem caused when the environment changes and the types of plants and animals that live there may change.
- Clarification Statement: Examples of environmental changes could include changes in land characteristics, water distribution, temperature, food, and other organisms.
- Assessment Boundary: Assessment is limited to a single environmental change. Assessment does not include the greenhouse effect or climate change.

ESS1-A: The Universe and its Stars

- The sun is a star that appears larger and brighter than other stars because it is closer. Stars range greatly in their distance from Earth. (ESS1-5-1)

ESS1.B: Earth and the Solar System

- The orbits of Earth around the sun and of the moon around Earth, together with the rotation of Earth about an axis between its North and South poles, cause observable patterns. These include day and night, daily changes in the length and direction of shadows, and different positions of the sun, moon, and stars at different times of the day, month, and year. (ESS1-5-2)

Idaho Common Core Connections

ELA/Literacy

RI.3.1 Ask and answer questions to demonstrate understanding of a text, referring explicitly to the text as the basis for the answers. (LS2-5-1), (LS2-5-2), (LS2-5-3), (LS2-5-4)

RI.3.2 Determine the main idea of a text; recount the key details and explain how they support the main idea. (LS2-5-1), (LS2-5-2), (LS2-5-3), (LS2-5-4)

RI.3.3 Describe the relationship between a series of historical events, scientific ideas or concepts, or steps in technical procedures in a text, using language that pertains to time, sequence, and cause/effect. (LS2-5-1), (LS2-5-2), (LS2-5-3), (LS2-5-4)

W.3.1 Write opinion pieces on topics or texts, supporting a point of view with reasons. (LS2-5-1), (LS2-5-3), (LS2-5-4)

W.3.2 Write informative/explanatory texts to examine a topic and convey ideas and information clearly. (LS2-5-1), (LS2-5-2), (LS2-5-3), (LS2-5-4)

W.3.3 Write informative/explanatory texts to examine a topic and convey ideas and information clearly. (LS2-5-1), (LS2-5-2), (LS2-5-3), (LS2-5-4)

W.3.4 Recall information from experiences or gather information from print and digital sources; take brief notes on sources and sort evidence into provided categories. (LS2-5-1)

SL.3.4 Report on a topic or text, tell a story, or recount an experience with appropriate facts and relevant, descriptive details, speaking clearly at an understandable pace. (LS2-5-2), (LS2-5-3), (LS2-5-4)

Mathematics

MP.2 Reason abstractly and quantitatively. (LS2-5-1), (LS2-5-2), (LS2-5-3), (LS2-5-4)

MP.4 Model with mathematics. (LS2-5-1), (LS2-5-2), (LS2-5-3), (LS2-5-4)

MP.5 Use appropriate tools strategically. (LS2-5-1)

3.MD.B.3 Draw a scaled picture graph and a scaled bar graph to represent a data set with several categories. Solve one- and two-step "how many more" and "how many less" problems using information presented in scaled bar graphs. (LS2-5-1), (LS2-5-2)

3.MD.B.4 Generate measurement data by measuring lengths using rulers marked with halves and fourths of an inch. Show the data by making a line plot, where the horizontal scale is marked off in appropriate units—whole numbers, halves, or quarters. (LS2-5-1)

ESS: Earth and Space Sciences

ESS1-5 Earth’s Place in the Universe

Disciplinary Core Ideas (DCI)

ESS1.A: The Universe and its Stars

- The sun is a star that appears larger and brighter than other stars because it is closer. Stars range greatly in their distance from Earth. (ESS1-5-1)

ESS1.B: Earth and the Solar System

- The orbits of Earth around the sun and of the moon around Earth, together with the rotation of Earth about an axis between its North and South poles, cause observable patterns. These include day and night, daily changes in the length and direction of shadows, and different positions of the sun, moon, and stars at different times of the day, month, and year. (ESS1-5-2)
## Performance Expectations (PE)

Students who demonstrate understanding can:

**ESS1-5.1.** Support an argument that differences in the apparent brightness of the sun compared to other stars is due to their relative distances from the Earth.
- Assessment Boundary: Assessment is limited to relative distances, not sizes, of stars. Assessment does not include other factors that affect apparent brightness (such as stellar masses, age, or stage).

**ESS1-5.2.** Represent data in graphical displays to reveal patterns of daily changes in length and direction of shadows, day and night, and the seasonal appearance of some stars in the night sky.
- Clarification Statement: Examples of patterns could include the position and motion of Earth with respect to the sun and selected stars that are visible only in particular months.
- Assessment Boundary: Assessment does not include causes of seasons.

## ESS2-5 Earth’s Systems

**ESS2.A: Earth Materials and Systems**

- Earth’s major systems are the geosphere (solid and molten rock, soil, and sediments), the hydrosphere (water and ice), the atmosphere (air), and the biosphere (living things, including humans). These systems interact in multiple ways to affect Earth’s surface materials and processes. The ocean supports
a variety of ecosystems and organisms, shapes landforms, and influences climate. Winds and clouds in the atmosphere interact with the landforms to determine patterns of weather. (ESS2-5-1)

**ESS2.C: The Roles of Water in Earth’s Surface Processes**
- Nearly all of Earth’s available water is in the ocean. Most fresh water is in glaciers or underground; only a tiny fraction is in streams, lakes, wetlands, and the atmosphere. (ESS2-5-2)

### Performance Expectations (PE)

Students who demonstrate understanding can:

**ESS2-5-1. Develop a model using an example to describe ways the geosphere, biosphere, hydrosphere, and/or atmosphere interact.**
- Clarification Statement: Examples could include the influence of the ocean on ecosystems, landform shape, and climate; the influence of the atmosphere on landforms and ecosystems through weather and climate; and the influence of mountain ranges on winds and clouds in the atmosphere. The geosphere, hydrosphere, atmosphere, and biosphere are each a system.
- Assessment Boundary: Assessment is limited to the interactions of two systems at a time.

**ESS2-5-2. Describe and graph the amounts and percentages of water and fresh water in various reservoirs to provide evidence about the distribution of water on Earth.**
- Assessment Boundary: Assessment is limited to oceans, lakes, rivers, glaciers, ground water, and polar ice caps, and does not include the atmosphere.

### Science and Engineering Practices (SEP)

#### Developing and Using Models
Modeling in 3–5 builds on K–2 experiences and progresses to building and revising simple models and using models to represent events and design solutions.
- Develop a model using an example to describe a scientific principle. (ESS2-5-1)

#### Using Mathematics and Computational Thinking
Mathematical and computational thinking in 3–5 builds on K–2 experiences and progresses to extending quantitative measurements to a variety of physical properties and using computation and mathematics to analyze data and compare alternative design solutions.
- Describe and graph quantities such as area and volume to address scientific questions. (ESS2-5-2)

### Idaho Common Core Connections

**ELA/Literacy**
- **RI.5.7** Draw on information from multiple print or digital sources, demonstrating the ability to locate an answer to a question quickly or to solve a problem efficiently. (ESS2-5-1), (ESS2-5-2)
- **W.5.8** Recall relevant information from experiences or gather relevant information from print and digital sources; summarize or paraphrase information in notes and finished work, and provide a list of sources. (ESS2-5-2)
- **SL.5.5** Include multimedia components (e.g., graphics, sound) and visual displays in presentations when appropriate to enhance the development of main ideas or themes. (ESS2-5-1), (ESS2-5-2)

**Mathematics**
- **MP.2** Reason abstractly and quantitatively. (ESS2-5-1), (ESS2-5-2)
- **MP.4** Model with mathematics. (ESS2-5-1), (ESS2-5-2)
- **5.G.A.2** Represent real world and mathematical problems by graphing points in the first quadrant of the coordinate plane, and interpret coordinate values of points in the context of the situation. (ESS2-5-1)

### Crosscutting Concepts (CCC)

- **Scale, Proportion, and Quantity**
  - Standard units are used to measure and describe physical quantities such as weight and volume. (ESS2-5-2)

- **Systems and System Models**
  - A system can be described in terms of its components and their interactions. (ESS2-5-1)

### Disciplinary Core Ideas (DCI)

**ESS3.C: Human Impacts on Earth Systems**
Human activities in agriculture, industry, and everyday life have had major effects on the land, vegetation, streams, ocean, air, and even outer space. But individuals and communities are doing things to help protect Earth’s resources and environments. (ESS3-5-1)

Performance Expectations (PE)

Students who demonstrate understanding can:

**ESS3-5-1.** Support Obtain and combine information about ways individual communities use science ideas to protect the Earth’s resources and environment.

</thead>
<tbody>
<tr>
<td>Students who demonstrate understanding can:</td>
</tr>
</tbody>
</table>

**PS1-MS-1. Develop models to describe the atomic composition of simple molecules and extended structures.**
- Clarification Statement: Emphasis is on developing models of molecules that vary in complexity. Examples of simple molecules could include ammonia and methanol. Examples of extended structures could include sodium chloride or diamonds. Examples of molecular-level models could include drawings, 3D ball and stick structures, or computer representations showing different molecules with different types of atoms.
- Assessment Boundary: Assessment does not include valence electrons and bonding energy, discussing the ionic nature of subunits of complex structures, or a complete depiction of all individual atoms in a complex molecule or extended structure.

**PS1-MS-2. Analyze and interpret data on the properties of substances before and after the substances interact to determine if a chemical reaction has occurred.**
- Clarification Statement: Examples of reactions could include burning sugar or steel wool, fat reacting with sodium hydroxide, and mixing zinc with hydrogen chloride.
- Assessment Boundary: Assessment is limited to analysis of the following properties: density, melting point, boiling point, solubility, flammability, and odor.

**PS1-MS-3. Gather and make sense of information to describe that synthetic materials come from natural resources and impact society.**
- Clarification Statement: Emphasis is on natural resources that undergo a chemical process to form the synthetic material. Examples of new materials could include new medicine, foods, and alternative fuels.
- Assessment Boundary: Assessment is limited to qualitative information.

**PS1-MS-4. Develop a model that predicts and describes changes in particle motion, temperature, and state of a pure substance when thermal energy is added or removed.**
- Clarification Statement: Emphasis is on qualitative molecular-level models of solids, liquids, and gases to show that adding or removing thermal energy increases or decreases kinetic energy of the particles until a change of state occurs. Examples of models could include drawings and diagrams. Examples of particles could include molecules or inert atoms. Examples of pure substances could include water, carbon dioxide, and helium.

**PS1-MS-5. Develop and use a model to describe how the total number of atoms does not change in a chemical reaction and thus mass is conserved.**
- Clarification Statement: Emphasis is on law of conservation of matter and on physical models or drawings, including digital forms, that represent atoms.
- Assessment Boundary: Assessment does not include the use of atomic masses, balancing symbolic equations, or intermolecular forces.

**PS1-MS-6. Undertake a design project to construct, test, and modify a device that either releases or absorbs thermal energy by chemical processes.**
- Clarification Statement: Emphasis is on the design, controlling the transfer of energy to the environment, and modification of a device using factors such as type and concentration of a substance. Examples of designs could involve chemical reactions such as dissolving ammonium chloride or calcium chloride.
- Assessment Boundary: Assessment is limited to the criteria of amount, time, and temperature of substance in testing the device.
### Analyzing and Interpreting Data

Analyzing data in 6-8 builds on K-5 and progresses to extending quantitative analysis to investigations, distinguishing between correlation and causation, and basic statistical techniques of data and error analysis.

- Analyze and interpret data to determine similarities and differences in findings (PS1-MS-2)

### Constructing Explanations and Designing Solutions

Constructing explanations and designing solutions in 6-8 builds on K-5 experiences and progresses to include constructing explanations and designing solutions supported by multiple sources of evidence consistent with scientific knowledge, principles, and theories.

- Undertake a design project, engaging in the design cycle, to construct and/or implement a solution that meets specific design criteria and constraints (PS1-MS-6)

### Obtaining, Evaluating, and Communicating Information

Obtaining, evaluating, and communicating information in 6-8 builds on K-5 and progresses to evaluating the merit and validity of ideas and methods.

- Gather, read, and synthesize information from multiple appropriate sources and assess the credibility, accuracy, and possible bias of each publication and methods used, and describe how they are supported or not supported by evidence (PS1-MS-3)

### Connections to Nature of Science

**Scientific Knowledge is Based on Empirical Evidence**

Science knowledge is based upon logical and conceptual connections between evidence and conceptual understanding.

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

**PS1.B Chemical Reactions**

- Substances react chemically in characteristic ways. In a chemical process, the atoms that make up the original substances are regrouped into different molecules, and these new substances have different properties from those of the reactants. (PS1-MS-1, PS1-MS-3, PS1-MS-5)
- The total number of each type of atom is conserved, and thus the mass does not change. (PS1-MS-5)
- Some chemical reactions release energy, others store energy. (PS1-MS-6)

**PS3A: Definitions of Energy**

- The term “heat” as used in everyday language refers both to thermal energy (the motion of atoms or molecules within a substance) and the transfer of that thermal energy from one object to another. In science, heat is used only for this second meaning; it refers to the energy transferred due to the temperature difference between two objects. (PS1-MS-4)
- The temperature of a system is proportional to the average internal kinetic energy and potential energy per atom or molecule (whichever is the appropriate building block for the system’s material). The details of that relationship depend on the type of atom or molecule and the interactions among the atoms in the material. Temperature is not a direct measure of a system’s total thermal energy. The total thermal energy (sometimes called total internal energy) of a system depends jointly on the temperature, the total number of atoms in the system, and the state of the material. (PS1-MS-6)

**ETS1.B Developing Possible Solutions**

- A solution needs to be tested, and then modified on the basis

**Cause and Effect**

Cause and effect relationships may be used to predict phenomena in natural or designed systems. (PS1-MS-4)

**Scale, Proportion, and Quantity**

Time, space and energy phenomena can be observed at various scales using models to study systems that are too large or too small. (PS1-MS-1)

**Energy and Matter**

Matter is conserved because atoms are conserved in physical and chemical processes. (PS1-MS-5)

The transfer of energy can be tracked as energy flows through a designed or natural system. (PS1-MS-3)

**Connections to Engineering, Technology, and Application of Science**

**Interdependence of Science, Engineering, and Technology**

Engineering advances have led to important discoveries in virtually every field of science, and scientific discoveries have led to the development of entire industries and engineered systems. (PS1-MS-3)

**Influence of Science, Engineering, and Technology on Society and the Natural World**

The uses of technology and any limitations on their use are driven by individual and societal needs, desires, and values; and by differences in such factors as climate, natural resources, and economic conditions. Thus technology use varies from region to region and over time. (PS1-MS-3)
Students who demonstrate understanding can:

- Determine how the test results in order to improve it. (PS1-MS-6)
- The iterative process of testing the most promising solutions and modifying what is proposed on the basis of the test results leads to greater refinement and ultimately to an optimal solution. (PS1-MS-6)

Idaho Common Core Connections

**ELA/Literacy**

**RST.6-8.1**Cite specific textual evidence to support analysis of science and technical texts, attending to the precise details of explanations or descriptions (PS1-MS-2),(PS1-MS-3)

**RST.6-8.2**Follow precisely a multistep procedure when carrying out experiments, taking measurements, or performing technical tasks. (PS1-MS-6)

**RST.6-8.7**Integrate quantitative or technical information expressed in words in a text with a version of that information expressed visually (e.g., in a flowchart, diagram, model, graph, or table). (PS1-MS-1),(PS1-MS-2),(PS1-MS-4),(PS1-MS-5)

**WHST.6-8.7**Conduct short research projects to answer a question (including a self-generated question), drawing on several sources and generating additional related, focused questions that allow for multiple avenues of exploration. (PS1-MS-6)

**WHST.6-8.8**Gather relevant information from multiple print and digital sources, using search terms effectively; assess the credibility and accuracy of each source; and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation. (PS1-MS-3)

**Mathematics**

**MP.2**Reason abstractly and quantitatively. (PS1-MS-1),(PS1-MS-2),(PS1-MS-5)

**6.RP.A.3**Use ratio and rate reasoning to solve real-world and mathematical problems. (PS1-MS-1),(PS1-MS-2),(PS1-MS-5)

**6.NS.C.5**Understand that positive and negative numbers are used together to describe quantities having opposite directions or values (e.g., temperature above/below zero, elevation above/below sea level, credits/debits, positive/negative electric charge); use positive and negative numbers to represent quantities in real-world contexts, explaining the meaning of 0 in each situation. (PS1-MS-4)

**6.EE.A.3**Use numbers expressed in the form of a single digit times an integer power of 10 to estimate very large or very small quantities, and to express how many times as much one is than the other. (PS1-MS-1)

**6.SP.B.4**Display numerical data in plots on a number line, including dot plots, histograms, and box plots. (PS1-MS-2)

**6.SP.B.5**Summarize numerical data sets in relation to their context (PS1-MS-2)

### Performance Expectations (PE)

**PS2-MS-1. Apply Newton’s Third Law to design a solution to a problem involving the motion of two colliding objects.**

- **Clarification Statement:** Examples of practical problems could include the impact of collisions between two cars, between a car and stationary objects, and between a meteor and a space vehicle.
- **Assessment Boundary:** Assessment is limited to vertical or horizontal interactions in one dimension.

**PS2-MS-2. Plan an investigation to provide evidence that the change in an object’s motion depends on the sum of the forces on the object and the mass of the object.**

- **Clarification Statement:** Emphasis is on balanced (Newton’s First Law) and unbalanced forces in a system, qualitative comparisons of forces, mass and changes in motion (Newton’s Second Law), frame of reference, and specification of units.
- **Assessment Boundary:** Assessment is limited to forces and changes in motion in one-dimension in an inertial reference frame and to change in one variable at a time. Assessment does not include the use of trigonometry.

**PS2-MS-3. Ask questions about data to determine the factors that affect the strength of electric and magnetic forces.**

- **Clarification Statement:** Examples of devices that use electric and magnetic forces could include electromagnets, electric motors, or generators. Examples of data could include the effect of the number of turns of wire on the strength of an electromagnet, or the effect of increasing the number or strength of magnets on the speed of an electric motor.
- **Assessment Boundary:** Assessment about questions that require quantitative answers is limited to proportional reasoning and algebraic thinking.

**PS2-MS-4. Construct and present arguments using evidence to support the claim that gravitational interactions are attractive and depend on the masses of interacting objects.**

- **Clarification Statement:** Examples of evidence for arguments could include data generated from simulations or digital tools; and charts displaying mass, strength of interaction, distance from the Sun, and orbital periods of objects within the solar system.
- **Assessment Boundary:** Assessment does not include Newton’s Law of Gravitation or Kepler’s Laws.

**PS2-MS-5. Conduct an investigation and evaluate the experimental design to provide evidence that fields exist between objects exerting forces on each other even though the objects are not in contact.**
### Disciplinary Core Ideas (DCI)

#### PS2.A: Forces and Motion
- For any pair of interacting objects, the force exerted by the first object on the second object is equal in strength to the force that the second object exerts on the first, but in the opposite direction (Newton's third law). (PS2-MS-1)
- The motion of an object is determined by the sum of the forces acting on it; if the total force on the object is not zero, its motion will change. The greater the mass of the object, the greater the force needed to achieve the same change in motion. For any given object, a larger force causes a larger change in motion. (PS2-MS-2)
- All positions of objects and the directions of forces and motions must be described in an arbitrarily chosen reference frame and arbitrarily chosen units of size. In order to share information with other people, these choices must also be shared. (PS2-MS-2)

#### PS2.B: Types of Interactions
- Electric and magnetic (electromagnetic) forces can be attractive or repulsive, and their sizes depend on the magnitudes of the charges, currents, or magnetic strengths involved and on the distances between the interacting objects. (PS2-MS-3)
- Gravitational forces are always attractive. There is a gravitational force between any two masses, but it is very small except when one or both of the objects have large mass—e.g., Earth and the sun. (PS2-MS-4)
- Forces that act at a distance (electric, magnetic, and gravitational) can be explained by fields that extend through space and can be mapped by their effect on a test object (a charged object, or a ball, respectively). (PS2-MS-5)

### Crosscutting Concepts (CCC)

#### Cause and Effect
Cause and effect relationships may be used to predict phenomena in natural or designed systems. (PS2-MS-3, PS2-MS-5)

#### Systems and System Models
Models can be used to represent systems and their interactions—such as inputs, processes and outputs—and energy and matter flows within systems. (PS2-MS-1, PS2-MS-4)

#### Stability and Change
Explanations of stability and change in natural or designed systems can be constructed by examining the changes over time and forces at different scales. (PS2-MS-2)

#### Influence of Science, Engineering, and Technology on Society and the Natural World
The uses of technologies and any limitations on their use are driven by individual or societal needs, desires, and values; by the findings of scientific research; and by differences in such factors as climate, natural resources, and economic conditions. (PS2-MS-1)
Apply scientific ideas or principles to design an object, tool, process or system (PS2-MS-1)

Engaging in Argument from Evidence
Engaging in argument from evidence in 6–8 builds from K–5 experiences and progresses to constructing a convincing argument that supports or refutes claims for either explanations or solutions about the natural and designed world.

• Construct and present oral and written arguments supported by empirical evidence and scientific reasoning to support or refute an explanation or a model for a phenomenon or a solution to a problem. (PS2-MS-4)

Connections to Nature of Science
Scientific Knowledge is Based on Empirical Evidence
Science knowledge is based upon logical and conceptual connections between evidence and explanations (PS2-MS-2, PS2-MS-4)

Idaho Common Core Connections
ELA/Literacy
RST.6-8.1 Cite specific textual evidence to support analysis of science and technical texts, attending to the precise details of explanations or descriptions (PS2-MS-1),(PS2-MS-3)
RST.6-8.3 Follow precisely a multistep procedure when carrying out experiments, taking measurements, or performing technical tasks. (PS2-MS-1),(PS2-MS-2),(PS2-MS-5)
WHST.6-8.1 Write arguments focused on discipline-specific content. (PS2-MS-4)
WHST.6-8.7 Conduct short research projects to answer a question (including a self-generated question), drawing on several sources and generating additional related, focused questions that allow for multiple avenues of exploration. (PS2-MS-1),(PS2-MS-2),(PS2-MS-5)

Mathematics
MP.2 Reason abstractly and quantitatively. (PS2-MS-1),(PS2-MS-2),(PS2-MS-3)
6.NS.C.5 Understand that positive and negative numbers are used together to describe quantities having opposite directions or values; use positive and negative numbers to represent quantities in real-world contexts, explaining the meaning of 0 in each situation. (PS2-MS-1)
6.EE.A.2 Write, read, and evaluate expressions in which letters stand for numbers. (PS2-MS-1),(PS2-MS-2)
7.EE.B.3 Solve multi-step real-life and mathematical problems posed with positive and negative rational numbers in any form, using tools strategically. Apply properties of operations to calculate with numbers in any form; convert between forms as appropriate; and assess the reasonableness of answers using mental computation and estimation strategies. (PS2-MS-1),(PS2-MS-2)
7.EE.B.4 Use variables to represent quantities in a real-world or mathematical problem, and construct simple equations and inequalities to solve problems by reasoning about the quantities. (PS2-MS-1),(PS2-MS-2)

PS3-MS Energy

Performance Expectations (PE)

Students who demonstrate understanding can:

PS3-MS-1. Construct and interpret graphical displays of data to describe the relationships of kinetic energy to the mass of an object and to the speed of an object.
  • Clarification Statement: Emphasis is on descriptive relationships between kinetic energy and mass separately from kinetic energy and speed. Examples could include riding a bicycle at different speeds, rolling different sizes of rocks
PS3-MS-2. Develop a model to describe that when the arrangement of objects interacting at a distance changes, different amounts of potential energy are stored in the system.
- Clarification Statement: Emphasis is on relative amounts of potential energy, not on calculations of potential energy. Examples of objects within systems interacting at varying distances could include: the Earth and either a roller coaster cart at varying positions on a hill or objects at varying heights on shelves, changing the direction/orientation of a magnet, and a balloon with static electrical charge being brought closer to a classmate's hair. Examples of models could include representations, diagrams, pictures, and written descriptions of systems.
- Assessment Boundary: Assessment is limited to two objects and electric, magnetic, and gravitational interactions.

PS3-MS-3. Apply scientific principles to design, construct, and test a device that either minimizes or maximizes thermal energy transfer.
- Clarification Statement: Examples of devices could include an insulated box, a solar cooker, and a Styrofoam cup.
- Assessment Boundary: Assessment does not include calculating the total amount of thermal energy transferred.

PS3-MS-4. Plan an investigation to determine the relationships among the energy transferred, the type of matter, the mass, and the change in the average kinetic energy of the particles as measured by the temperature of the sample.
- Clarification Statement: Examples of experiments could include comparing final water temperatures after different masses of ice melted in the same volume of water with the same initial temperature, the temperature change of samples of different materials with the same mass as they cool or heat in the environment, or the same material with different masses when a specific amount of energy is added.
- Assessment Boundary: Assessment does not include calculating the total amount of thermal energy transferred.

PS3-MS-5. Construct, use, and present arguments to support the claim that when the kinetic energy of an object changes, energy is transferred to or from the object.
- Clarification Statement: Examples of empirical evidence used in arguments could include an inventory or other representation of the energy before and after the transfer in the form of temperature changes or motion of objects.
- Assessment Boundary: Assessment does not include calculations of energy.

Mathematics

**MP.2** Reason abstractly and quantitatively. (PS3-MS-1), (PS3-MS-4), (PS3-MS-5)

**6.RP.A.1** Understand the concept of ratio and use ratio language to describe a ratio relationship between two quantities. (PS3-MS-1), (PS3-MS-5)

**6.RP.A.2** Understand the concept of a unit rate a/b associated with a ratio a:b with b ≠ 0, and use rate language in the context of a ratio relationship. (PS3-MS-1)

**7.RP.A.2** Recognize and represent proportional relationships between quantities. (PS3-MS-1), (PS3-MS-5)

**8.EE.A.1** Know and apply the properties of integer exponents to generate equivalent numerical expressions.
### PS4-MS Waves

#### Performance Expectations (PE)

Students who demonstrate understanding can:

**PS4-MS-1. Use mathematical representations to describe a simple model for waves that includes how the amplitude of a wave is related to the energy in a wave.**
- Clarification Statement: Emphasis is on describing waves with both qualitative and quantitative thinking.
- Assessment Boundary: Assessment does not include electromagnetic waves and is limited to standard repeating waves.

**PS4-MS-2. Develop and use a model to describe that waves are reflected, absorbed, or transmitted through various materials.**
- Clarification Statement: Emphasis is on both light and mechanical waves. Examples of models could include drawings, simulations, and written descriptions.
- Assessment Boundary: Assessment is limited to qualitative applications pertaining to light and mechanical waves.

**PS4-MS-3. Integrate qualitative scientific and technical information to support the claim that digitized signals are a more reliable way to encode and transmit information than analog signals.**
- Clarification Statement: Emphasis is on a basic understanding that waves can be used for communication purposes. Examples could include using fiber optic cable to transmit light pulses, radio wave pulses in Wi-Fi devices, and conversion of stored binary patterns to make sound or text on a computer screen.
- Assessment Boundary: Assessment does not include binary counting. Assessment does not include the specific mechanism of any given device.

#### Science and Engineering Practices (SEP)

<table>
<thead>
<tr>
<th>Developing and Using Models</th>
<th>Disciplinary Core Ideas (DCI)</th>
<th>Crosscutting Concepts (CCC)</th>
</tr>
</thead>
</table>
| Modeling in 6–8 builds on K–5 and progresses to developing, using, and revising models to describe, test, and predict more abstract phenomena and design systems. | **PS4.A: Wave Properties**  
- A simple wave has a repeating pattern with a specific wavelength, frequency, and amplitude. (PS4-MS-1)  
- A sound wave needs a medium through which it is transmitted. (PS4-MS-2)  
**PS4.B: Electromagnetic Radiation**  
- When light shines on an object, it is reflected, absorbed, or transmitted through the object, depending on the object’s material and the frequency (color) of the light. (PS4-MS-2)  
- The path that light travels can be traced as straight lines, except at surfaces between different transparent materials (e.g., air and water, air and glass) where the light path bends. (PS4-MS-2) | **Patterns**  
Graphs and charts can be used to identify patterns in data. (PS4-MS-1)  
**Structure and Function**  
Structures can be designed to serve particular functions by taking into account properties of different materials, and how materials can be shaped and used. (PS4-MS-2)  
Structures can be designed to serve particular functions. (PS4-MS-3)  
*Connections to Engineering,*
- Use mathematical representations to describe and/or support scientific conclusions and design solutions. (PS4-MS-1)

**Obtaining, Evaluating, and Communicating Information**

Obtaining, evaluating, and communicating information in 6-8 builds on K-5 and progresses to evaluating the merit and validity of ideas and methods.

- Integrate qualitative scientific and technical information in written text with that contained in media and visual displays to clarify claims and findings. (PS4-MS-3)

**Connections to Nature of Science**

**Scientific Knowledge is Based on Empirical Evidence**

Science knowledge is based upon logical and conceptual connections between evidence and explanations. (PS4-MS-1)

**PS4.C: Information Technologies and Instrumentation**

- A wave model of light is useful for explaining brightness, color, and the frequency-dependent bending of light at a surface between media. (PS4-MS-2)
- However, because light can travel through space, it cannot be a matter wave, like sound or water waves. (PS4-MS-2)
- Digitized signals (sent as wave pulses) are a more reliable way to encode and transmit information. (PS4-MS-3)

**Technology, and Applications of Science**

**Influence of Science, Engineering, and Technology on Society and the Natural World**

Technologies extend the measurement, exploration, modeling, and computational capacity of scientific investigations. (PS4-MS-3)

**Connections to Nature of Science**

**Science is a Human Endeavor**

Advances in technology influence the progress of science and science has influenced advances in technology. (PS4-MS-3)

**Idaho Common Core Connections**

</table>

### LS1.B: Characteristics of Living Things
- Organisms reproduce, either sexually or asexually, and transfer their genetic information to their offspring. (LS1-MS-4)
- Living things share certain characteristics. (These include response to environment, reproduction, energy use, growth and development, life cycles, made of cells, etc.) (LS1-MS-4)

### LS1.C: Organization for Matter and Energy Flow in Organisms
- Plants, algae (including phytoplankton), and many microorganisms use the energy from light to make sugars (food) from carbon dioxide from the atmosphere and water through the process of photosynthesis, which also releases oxygen. These sugars can be used immediately or stored for growth or later use. (LS1-MS-5)
- Within individual organisms, food moves through a series of chemical reactions (cellular respiration) in which it is broken down and rearranged to form new molecules, to support growth, or to release energy. (LS1-MS-6)

### Connections to Nature of Science

#### Scientific Knowledge is Based on Empirical Design for either convincing or a solution.

- Planning and carrying out investigations in 6–8 builds on K-5 experiences and progresses to include investigations that use multiple variables and provide evidence to support explanations or solutions.
  - Conduct an investigation to produce data to serve as the basis for evidence that meet the goals of an investigation. (LS1-MS-1)

- Constructing explanations and design solutions in 6–8 builds on K-5 experiences and progresses to include constructing explanations and designing solutions supported by multiple sources of evidence consistent with scientific knowledge, principles, and theories.
  - Construct a scientific explanation based on valid and reliable evidence obtained from sources (including the students’ own experiments) and the assumption that theories and laws that describe the natural world operate today as they did in the past and will continue to do so in the future. (LS1-MS-5)

- Engaging in argument from evidence in 6–8 builds on K-5 experiences and progresses to constructing a convincing argument that supports or refutes claims for either explanations or solutions about the natural and designed world(s).
  - Use an oral and written argument supported by evidence to support or refute an explanation or a model for a phenomenon. (LS1-MS-3)
  - Use an oral and written argument supported by empirical evidence and scientific reasoning to support or refute an explanation or a model for a phenomenon or a solution to a problem. (LS1-MS-4)

#### Science is a Human Endeavor

Scientists and engineers are guided by habits of mind such as intellectual honesty, tolerance of ambiguity, skepticism, and openness to new ideas. (LS1-MS-3)
Evidence
Science knowledge is based upon logical connections between evidence and explanations. (LS1-MS-5)

LS1-MS Ecosystems: Interactions, Energy, and Dynamics

Students who demonstrate understanding can:

**LS2-MS-1. Analyze and interpret data to provide evidence for the effects of resource availability on organisms and populations of organisms in an ecosystem.**
- Clarification Statement: Emphasis is on cause and effect relationships between resources and growth of individual organisms and the numbers of organisms in ecosystems during periods of abundant and scarce resources.

**LS2-MS-2. Construct an explanation that predicts patterns of interactions among organisms across multiple ecosystems.**
- Clarification Statement: Emphasis is on predicting consistent patterns of interactions in different ecosystems in terms of the relationships among and between organisms and abiotic components of ecosystems. Examples of types of interactions could include competitive, predatory, and mutually beneficial.

**LS2-MS-3. Develop a model to describe the cycling of matter and flow of energy among living and nonliving parts of an ecosystem.**
- Clarification Statement: Emphasis is on describing the conservation of matter and flow of energy into and out of various ecosystems, and on defining the boundaries of the system.
- Assessment Boundary: Assessment does not include the use of chemical reactions to describe the processes.

**LS2-MS-4. Develop a model to describe the flow of energy through the trophic levels of an ecosystem.**
- Clarification Statement: Emphasis is on describing the transfer of mass and energy beginning with producers, moving to primary and secondary consumers, and ending with decomposers.
- Assessment Boundary: Assessment does not include the use of chemical reactions to describe the processes.

**LS2-MS-5. Construct an argument supported by empirical evidence that changes to physical or biological components of an ecosystem affect populations.**
- Clarification Statement: Emphasis is on recognizing patterns in data and making warranted inferences about changes in populations, and on evaluating empirical evidence supporting arguments about changes to ecosystems.

**LS2-MS-6. Evaluate competing design solutions for maintaining biodiversity and ecosystem services.**
- Clarification Statement: Examples of ecosystem services could include water purification, nutrient recycling, and prevention of soil erosion. Examples of design solution constraints could include scientific, economic, and social considerations.

ETS1.B: Developing Possible Solutions
• There are systematic processes for evaluating solutions with respect to how well they meet the criteria and constraints of a problem. (LS2-MS-6)

Idaho Common Core Connections

ELA/Literacy

RST.6-8.1 Cite specific textual evidence to support analysis of science and technical texts. (LS2-MS-1), (LS2-MS-2), (LS2-MS-4), (LS2-MS-5)
RST.6-8.7 Integrate quantitative or technical information expressed in words in a text with a version of that information expressed visually (e.g., in a flowchart, diagram, model, graph, or table). (LS2-MS-1), (LS2-MS-4)
RST.6-8.8 Distinguish among facts, reasoned judgment based on research findings, and speculation in a text. (LS2-MS-6)
RI.8.8 Trace and evaluate the argument and specific claims in a text, assessing whether the reasoning is sound and the evidence is relevant and sufficient to support the claims. (LS2-MS-1), (LS2-MS-6)
WHST.6-8.1 Write arguments to support claims with clear reasons and relevant evidence. (LS2-MS-5)
WHST.6-8.2 Write informative/explanatory texts to examine a topic and convey ideas, concepts, and information through the selection, organization, and analysis of relevant content. (LS2-MS-2)
WHST.6-8.4 Present claims and findings, emphasizing salient points in a focused, coherent manner with relevant evidence, sound valid reasoning, and well-chosen details; use appropriate eye contact, adequate volume, and clear pronunciation. (LS2-MS-2)
SL.8.5 Include multimedia components and visual displays in presentations to clarify claims and findings and emphasize salient points. (LS2-MS-3), (LS2-MS-4)

Mathematics

MP.4 Model with mathematics. (LS2-MS-6)
6.RP.A.3 Use ratio and rate reasoning to solve real-world and mathematical problems. (LS2-MS-6)
6.EE.C.9 Use variables to represent two quantities in a real-world problem that change in relationship to one another; write an equation to express one quantity, thought of as the dependent variable, in terms of the other quantity, thought of as the independent variable. Analyze the relationship between the dependent and independent variables using graphs and tables, and relate these to the equation. (LS2-MS-3), (LS2-MS-4)
6.SP.B.5 Summarize numerical data sets in relation to their context. (LS2-MS-2), (LS2-MS-4)

<table>
<thead>
<tr>
<th>LS3-MS Heredity: Inheritance and Variation of Traits</th>
</tr>
</thead>
</table>

Performance Expectations (PE)

Students who demonstrate understanding can:

**LS3-MS-1. Develop and use a model to describe why mutations may result in harmful, beneficial, or neutral effects to the structure and function of the organism.**

- Clarification Statement: Emphasis is on conceptual understanding that changes in genetic material may result in making different proteins.
- Assessment Boundary: Assessment does not include specific changes at the molecular level, mechanisms for protein synthesis, or specific types of mutations.

**LS3-MS-2. Develop and use a model to describe why asexual reproduction results in offspring with identical genetic information and sexual reproduction results in offspring with genetic variation.**

- Clarification Statement: Emphasis is on using models such as Punnett squares, diagrams, and simulations to describe the cause and effect relationship of gene transmission from parent(s) to offspring and resulting genetic variation.

**Idaho Common Core Connections**

**ELA/Literacy**

RST.6-8.1 Cite specific textual evidence to support analysis of science and technical texts. (LS3-MS-1),(LS3-MS-2)

RST.6-8.4 Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 6-8 texts and topics. (LS3-MS-1),(LS3-MS-2)

RST.6-8.7 Integrate quantitative or technical information expressed in a text with a version of that information expressed visually (e.g., in a flowchart, diagram, model, graph, or table). (LS3-MS-1),(LS3-MS-2)

SL.8.5 Include multimedia components and visual displays in presentations to clarify claims and findings and emphasize salient points. (LS3-MS-1),(LS3-MS-2)

**Mathematics**

MP.4 Model with mathematics. (LS3-MS-2)

6.SP.B.5 Summarize numerical data sets in relation to their context. (LS3-MS-2)
LS4-MS Biological Adaptation: Unity and Diversity

### Performance Expectations (PE)

Students who demonstrate understanding can:

**LS4-MS-1.** Analyze and interpret data for patterns in the fossil record that document the existence, diversity, extinction, and change of life forms throughout the history of life on Earth under the assumption that natural laws operate today as in the past.
- Clarification Statement: Emphasis is on finding patterns of changes in the level of complexity of anatomical structures in organisms and the chronological order of fossil appearance in the rock layers.
- Assessment Boundary: Assessment does not include the names of individual species or geological eras in the fossil record.

**LS4-MS-2.** Apply scientific ideas to construct an explanation for the anatomical similarities and differences among modern organisms and between modern and fossil organisms to infer relationships.
- Clarification Statement: Emphasis is on explanations of the relationships among organisms in terms of similarity or differences of the gross appearance of anatomical structures.

**LS4-MS-3.** Analyze displays of pictorial data to compare patterns of similarities in the anatomical structures across multiple species of similar classification levels to identify relationships.
- Clarification Statement: Emphasis is on inferring general patterns of relatedness among structures of different organisms by comparing the appearance of diagrams or pictures.
- Assessment Boundary: Assessment of comparisons is limited to gross appearance of anatomical structures within genus and species levels. No memorization of classification levels is required.

**LS4-MS-4.** Construct an explanation based on evidence that describes how genetic variations of traits in a population increase some individuals’ probability of surviving and reproducing in a specific environment.
- Clarification Statement: Emphasis is on using concepts of natural selection like overproduction of offspring, passage of time, variation in a population, selection of favorable traits, and heritability of traits.

**LS4-MS-5.** Gather and synthesize information about the technologies that have changed the way humans influence the inheritance of desired traits in organisms.
- Clarification Statement: Emphasis is on synthesizing information from reliable sources about the influence of humans on genetic outcomes in artificial selection (such as genetic modification, animal husbandry, gene therapy); and, on the impacts these technologies have on society as well as the technologies leading to these scientific discoveries.

**LS4-MS-6.** Use mathematical representations to support explanations of how natural selection may lead to increases and decreases of specific traits in populations over time.
- Clarification Statement: Emphasis is on using mathematical models, probability statements, and proportional reasoning to support explanations of trends in changes to populations over time. Examples could include Peppered moth population changes before and after the industrial revolution.
- Assessment Boundary: Assessment does not include Hardy Weinberg calculations.

Using Mathematics and Computational Thinking
Mathematics and computational thinking in 6-8 builds on K-5 experiences and progresses to identifying patterns in large data sets and using mathematical concepts to support explanations and arguments.
- Use mathematical representations to support scientific conclusions and design solutions. (LS4-MS-6)

Constructing Explanations and Designing Solutions
Constructing explanations and designing solutions in 6-8 builds on K-5 experiences and progresses to include constructing explanations and designing solutions supported by multiple sources of evidence consistent with scientific ideas, principles, and theories.
- Apply scientific ideas to construct an explanation for real-world phenomena, examples, or events. (LS4-MS-2)
- Construct an explanation that includes qualitative or quantitative relationships between variables that describe phenomena. (LS4-MS-4)

Obtaining, Evaluating, and Communicating Information
Obtaining, evaluating, and communicating information in 6-8 builds on K-5 experiences and progresses to evaluating the merit and validity of ideas and methods.
- Gather, read, and synthesize information from multiple appropriate sources and assess the credibility, accuracy, and possible bias of each publication and methods used, and describe how they are supported or not supported by evidence. (LS4-MS-5)

Connections to Nature of Science
Scientific Knowledge is Based on Empirical Evidence
Science knowledge is based upon logical and conceptual connections between evidence and explanations. (LS4-MS-1)

LS4.B: Natural Selection
- Natural selection leads to the predominance of certain traits in a population, and the suppression of others. (LS4-MS-4)
- In artificial selection, humans have the capacity to influence certain characteristics of organisms by selective breeding. One can choose desired parental traits determined by genes, which are then passed on to offspring. (LS4-MS-5)

LS4.C: Adaptation
- Adaptation by natural selection acting over generations is one important process by which species change over time in response to changes in environmental conditions. Traits that support successful survival and reproduction in the new environment become more common; those that do not become less common. Thus, the distribution of traits in a population changes. (LS4-MS-6)

Connections to Engineering, Technology, and Applications of Science
Interdependence of Science, Engineering, and Technology
Engineering advances have led to important discoveries in virtually every field of science, and scientific discoveries have led to the development of entire industries and engineered systems. (LS4-MS-5)

Connections to Nature of Science
Scientific Knowledge Assumes an Order and Consistency in Natural Systems
Science assumes that objects and events in natural systems occur in consistent patterns that are understandable through measurement and observation. (LS4-MS-1),(LS4-MS-2)

Science Addresses Questions About the Natural and Material World
Scientific knowledge can describe the consequences of actions but does not necessarily prescribe the decisions that society takes. (LS4-MS-5)

**ESS: Earth and Space Sciences**

**ESS1-MS Earth’s Place in the Universe**

### Performance Expectations (PE)

Students who demonstrate understanding can:

**ESS1-MS-1.** Develop and use a model of the Earth-sun-moon system to describe the cyclic patterns of lunar phases, eclipses of the sun and moon, and seasons.
- Clarification Statement: Examples of models can be physical, graphical, or conceptual.

**ESS1-MS-2.** Develop and use a model to describe the role of gravity in the motions within galaxies and the solar system.
- Clarification Statement: Emphasis for the model is on gravity as the force that holds together the solar system and Milky Way galaxy and controls orbital motions within them. Examples of models can be physical (such as the analogy of distance along a football field or computer visualizations of elliptical orbits) or conceptual (such as mathematical proportions relative to the size of familiar objects such as students’ school or state).
- Assessment Boundary: Assessment does not include Kepler’s Laws of orbital motion or the apparent retrograde motion of the planets as viewed from Earth.

**ESS1-MS-3.** Analyze and interpret data to determine scale properties of objects in the solar system.
- Clarification Statement: Emphasis is on the analysis of data from Earth-based instruments, space-based telescopes, and spacecraft to determine similarities and differences among solar system objects. Examples of scale properties include the sizes of an object’s layers (such as crust and atmosphere), surface features (such as volcanoes), and orbital radius. Examples of data include statistical information, drawings and photographs, and models.
- Assessment Boundary: Assessment does not include recalling facts about properties of the planets and other solar system bodies.

**ESS1-MS-4.** Construct a scientific explanation based on evidence from rock strata for how the geologic time scale is used to organize Earth’s 4.6-billion-year-old history.
- Clarification Statement: Emphasis is on how analyses of rock formations and the fossils they contain are used to establish relative ages of major events in Earth’s history. Examples of Earth’s major events could range from being very recent (such as the last Ice Age or the earliest fossils of homo sapiens) to very old (such as the formation of Earth or the earliest evidence of life). Examples can include the formation of mountain chains and ocean basins, the evolution or extinction of particular living organisms, or significant volcanic eruptions.
- Assessment Boundary: Assessment does not include recalling the names of specific periods or epochs and events within them.

### Science and Engineering Practices (SEP)

**Developing and Using Models**
Modeling in 6–8 builds on K–5 experiences and progresses to developing, using, and revising models to describe, test, and predict more abstract phenomena and design systems.
- Develop and use a model to describe phenomena. (ESS1-MS-1, ESS1-MS-2)

**Analyzing and Interpreting Data**
Analyzing data in 6–8 builds on K–5 experiences and progresses to extending quantitative analysis to investigations, distinguishing between correlation and causation, and basic statistical techniques of data and error analysis.
- Analyze and interpret data to determine similarities and differences in findings. (ESS1-MS-3)

### Disciplinary Core Ideas (DCI)

**ESS1.A: The Universe and Its Stars**
- Patterns of the apparent motion of the sun, the moon, and stars in the sky can be observed, described, predicted, and explained with models. (ESS1-MS-1)
- Earth and its solar system are part of the Milky Way galaxy, which is one of many galaxies in the universe. (ESS1-MS-2)

**ESS1.B: Earth and the Solar System**
- The solar system consists of the sun and a collection of objects, including planets, their moons, and asteroids that are held in orbit around the sun by its gravitational pull on them. (ESS1-MS-2, ESS1-MS-3)
- This model of the solar system can explain eclipses of the sun and the moon. Earth’s spin axis is fixed in direction over the short-term but tilted relative to its orbit around the sun. The seasons are a result of that tilt and are caused by the differential intensity of sunlight on different areas of Earth.

### Crosscutting Concepts (CCC)

**Patterns**
Patterns can be used to identify cause-and-effect relationships. (ESS1-MS-1)

**Scale, Proportion, and Quantity**
Time, space, and energy phenomena can be observed at various scales using models to study systems that are too large or too small. (ESS1-MS-3, ESS1-MS-4)

**Systems and System Models**
Models can be used to represent systems and their interactions. (ESS1-MS-2)

**Connections to Engineering, Technology, and Applications of Science**

**Interdependence of Science, Engineering, and Applications**
**Constructing Explanations and Designing Solutions**

Constructing explanations and designing solutions in 6–8 builds on K–5 experiences and progresses to include constructing explanations and designing solutions supported by multiple sources of evidence consistent with scientific ideas, principles, and theories.

- Construct a scientific explanation based on valid and reliable evidence obtained from sources (including the students’ own experiments) and the assumption that theories and laws that describe the natural world operate today as they did in the past and will continue to do so in the future. (ESS1-MS-4)

<table>

**ESS2-MS Earth’s Systems**

### Performance Expectations (PE)

**Students who demonstrate understanding can:**

**ESS2-MS.1. Develop a model to describe the cycling of Earth’s materials and the flow of energy that drives this process.**
- Clarification Statement: Emphasis is on the processes of melting, crystallization, weathering, deformation, and sedimentation, which act together to form minerals and rocks through the cycling of Earth’s materials.
- Assessment Boundary: Assessment does not include the identification and naming of minerals.

**ESS2-MS.2. Construct an explanation based on evidence for how geoscience processes have changed Earth’s surface at varying time and spatial scales.**
- Clarification Statement: Emphasis is on how processes change Earth’s surface at time and spatial scales that can be large (such as slow plate motions or the uplift of large mountain ranges) or small (such as rapid landslides or microscopic geochemical reactions), and how many geoscience processes (such as earthquakes, volcanoes, and meteor impacts) usually behave gradually but are punctuated by catastrophic events. Examples of geoscience processes include surface weathering and deposition by the movements of water, ice, and wind. Emphasis is on geoscience processes that shape local geographic features, where appropriate.

**ESS2-MS.3. Analyze and interpret data on the distribution of fossils and rocks, continental shapes, and seafloor structures to provide evidence of the past plate motions.**
- Clarification Statement: Examples of data include similarities of rock and fossil types on different continents, the shapes of the continents (including continental shelves), and the locations of ocean structures (such as ridges, fracture

| **Modeling in 6–8 builds on K–5 experiences and progresses to developing, using, and revising models to describe, test, and predict more abstract phenomena and design systems.** | **ESS1.C: The History of Planet Earth**  
- Tectonic processes continually generate new ocean sea floor at ridges and destroy old sea floor at trenches. (ESS2-MS-3) | **Patterns**  
Patterns in rates of change and other numerical relationships can provide information about natural systems. (ESS2-MS-3)  
**Cause and Effect**  
Cause and effect relationships may be used to predict phenomena in natural or designed systems. (ESS2-MS-5)  
**Scale Proportion and Quantity**  
Time, space, and energy phenomena can be observed at various scales using models to study systems that are too large or too small. (ESS2-MS-2)  
**Systems and System Models**  
Models can be used to represent systems and their interactions—such as inputs, processes and outputs—and energy, matter, and information flows within systems. (ESS2-MS6)  
**Energy and Matter**  
Within a natural or designed system, the transfer of energy drives the motion and/or cycling of matter. (ESS2-MS-4)  
**Stability and Change**  
Explanations of stability and change in natural or designed systems can be constructed by |  |

| **Planning and Carrying Out Investigations** | **ESS2.A: Earth’s Materials and Systems**  
- All Earth processes are the result of energy flowing and matter cycling within and among the planet’s systems. This energy is derived from the sun and Earth’s hot interior. The energy that flows and matter that cycles produce chemical and physical changes in Earth’s materials and living organisms. (ESS2-MS-1)  
- The planet’s systems interact over scales that range from microscopic to global in size, and they operate over fractions of a second to billions of years. These interactions have shaped Earth’s history and will determine its future. (ESS2-MS-2) |  |

| **Analyzing and Interpreting Data** | **ESS2.B: Plate Tectonics and Large-Scale System Interactions**  
- Maps of ancient land and water patterns, based on investigations of rocks and fossils, make clear how Earth’s plates have moved great distances, collided, and spread apart. (ESS2-MS-3) |  |

| **ESS2.C: The Roles of Water in Earth’s Surface Processes**  
- Water continually cycles among land, ocean, and atmosphere via transpiration, evaporation, condensation and crystallization, and precipitation, as well as downhill flows on land. (ESS2-MS-4) |  |  |
• Analyze and interpret data to provide evidence for phenomena. (ESS2-MS-3)

Constructions Explanations and Designing Solutions
Constructions explanations and designing solutions in 6–8 builds on K–5 experiences and progresses to include constructing explanations and designing solutions supported by multiple sources of evidence consistent with scientific ideas, principles, and theories.

• Construct a scientific explanation based on valid and reliable evidence obtained from sources (including the students’ own experiments) and the assumption that theories and laws that describe nature operate today as they did in the past and will continue to do so in the future. (ESS2-MS-2)

Connections to Nature of Science
Scientific Knowledge is Open to Revision in Light of New Evidence
Science findings are frequently revised and/or reinterpreted based on new evidence. (ESS2-MS-3)

• The complex patterns of the changes and the movement of water in the atmosphere, determined by winds, landforms, and ocean temperatures and currents, are major determinants of local weather patterns. (ESS2-MS-5)
• Global movements of water and its changes in form are propelled by sunlight and gravity. (ESS2-MS-4)
• Variations in density due to variations in temperature and salinity drive a global pattern of interconnected ocean currents. (ESS2-MS-6)
• Water’s movements—both on the land and underground—cause weathering and erosion, which change the land’s surface features and create underground formations. (ESS2-MS-2)

ESS2.D: Weather and Climate
• Weather and climate are influenced by interactions involving sunlight, the ocean, the atmosphere, ice, landforms, and living things. These interactions vary with latitude, altitude, and local and regional geography, all of which can affect oceanic and atmospheric flow patterns. (ESS2-MS-6)
• Because these patterns are so complex, weather can only be predicted using probability. (ESS2-MS-5)
• The ocean exerts a major influence on weather and climate by absorbing energy from the sun, releasing it over time, and globally redistributing it through ocean currents. (ESS2-MS-6)

Idaho Common Core Connections

ELA/Literacy
RST.6-8.1 Cite specific textual evidence to support analysis of science and technical texts, attending to the precise details of explanations or descriptions (ESS2-MS-2), (ESS2-MS-3), (ESS2-MS-5)
RST.6-8.7 Integrate quantitative or technical information expressed in words in a text with a version of that information expressed visually (e.g., in a flowchart, diagram, model, graph, or table). (ESS2-MS-3)
RST.6-8.9 Compare and contrast the information gained from experiments, simulations, video, or multimedia sources with that gained from reading a text on the same topic. (ESS2-MS-3), (ESS2-MS-5)
WHST.6-8.2 Write informative/explanatory texts to examine a topic and convey ideas, concepts, and information through the selection, organization, and analysis of relevant content. (ESS2-MS-2)
WHST.6-8.8 Gather relevant information from multiple print and digital sources; assess the credibility of each source; and quote or paraphrase the data and conclusions of others while avoiding plagiarism and providing basic bibliographic information for sources. (ESS2-MS-5)
SL.8.5 Include multimedia components and visual displays in presentations to clarify claims and findings and emphasize salient points. (ESS2-MS-1), (ESS2-MS-2), (ESS2-MS-6)

Mathematics
MP.2 Reason abstractly and quantitatively. (ESS2-MS-2), (ESS2-MS-3), (ESS2-MS-5)
6.NS.C.5 Understand that positive and negative numbers are used together to describe quantities having opposite directions or values (e.g., temperature above/below zero, elevation above/below sea level, credits/debits, positive/negative electric charge); use positive and negative numbers to represent quantities in real-world contexts, explaining the meaning of 0 in each situation. (ESS2-MS-5)
6.EE.B.6 Use variables to represent numbers and write expressions when solving a real-world or mathematical problem; understand that a variable can represent an unknown number, or, depending on the purpose at hand, any number in a specified set. (ESS2-MS-2), (ESS2-MS-3)
7.EE.B.4 Use variables to represent quantities in a real-world or mathematical problem, and construct simple equations and inequalities to solve problems by reasoning about the quantities. (ESS2-MS-2), (ESS2-MS-3)

ESS3-MS Earth and Human Activity

Performance Expectations (PE)
Students who demonstrate understanding can:

SDE

TAB 6 Page 390
### ESS3-MS-1. Construct a scientific explanation based on evidence for how the uneven distributions of Earth’s mineral, energy, and groundwater resources are the result of past and current geoscience processes.

- Clarification Statement: Emphasis is on how these resources are limited and typically non-renewable, and how their distributions are significantly changing as a result of removal by humans. Examples of uneven distributions of resources as a result of past processes include but are not limited to petroleum (locations of the burial of organic marine sediments and subsequent geologic traps), metal ores (locations of past volcanic and hydrothermal activity associated with subduction zones), and soil (locations of active weathering and/or deposition of rock).

### ESS3-MS-2. Analyze and interpret data on natural hazards to forecast future catastrophic events and inform the development of technologies to mitigate their effects.

- Clarification Statement: Emphasis is on how some natural hazards, such as volcanic eruptions and severe weather, are preceded by phenomena that allow for reliable predictions, but others, such as earthquakes, occur suddenly and with no notice, and thus are not yet predictable. Examples of natural hazards can be taken from interior processes (such as earthquakes and volcanic eruptions), surface processes (such as mass wasting and tsunamis), or severe weather events (such as hurricanes, tornadoes, and floods). Examples of data can include the locations, magnitudes, and frequencies of the natural hazards. Examples of technologies can be global (such as satellite systems to monitor hurricanes or forest fires) or local (such as building basements in tornado-prone regions or reservoirs to mitigate droughts).

### ESS3-MS-3. Apply scientific principles to design a method for monitoring and minimizing a human impact on the environment.

- Clarification Statement: Examples of the design process include examining human environmental impacts, assessing the kinds of solutions that are feasible, and designing and evaluating solutions that could reduce that impact. Examples of human impacts can include water usage (such as the withdrawal of water from streams and aquifers or the construction of dams and levees), land usage (such as urban development, agriculture, or the removal of wetlands), and pollution (such as of the air, water, or land).

### ESS3-MS-4. Construct an argument supported by evidence for how increases in human population and per-capita consumption of natural resources impact Earth’s systems.

- Clarification Statement: Examples of evidence include grade-appropriate databases on human populations and the rates of consumption of food and natural resources (such as freshwater, mineral, and energy). Examples of impacts can include changes to the appearance, composition, and structure of Earth’s systems as well as the rates at which they change. The consequences of increases in human populations and consumption of natural resources are described by science, but science does not make the decisions for the actions society takes.

### ESS3-MS-5. Ask questions to clarify evidence of the factors that have caused the rise in global temperatures over the past century.

- Clarification Statement: Examples of factors include human activities (such as fossil fuel combustion, cement production, and agricultural activity) and natural processes (such as changes in incoming solar radiation or volcanic activity). Examples of evidence can include tables, graphs, and maps of global and regional temperatures, atmospheric levels of gases such as carbon dioxide and methane, and the rates of human activities. Emphasis is on the major role that human activities play in causing the rise in global temperatures.

### Science and Engineering Practices (SEP)

**Asking Questions and Defining Problems**
- Asking questions and defining problems in grades 6–8 builds on grades K–5 experiences and progresses to specifying relationships between variables, and clarifying arguments and models.
- **Analyzing and Interpreting Data**
  - Analyzing data in 6–8 builds on K–5 and progresses to extending quantitative analysis to investigations, distinguishing between correlation and causation, and basic statistical techniques of data and error analysis.
- **Constructing Explanations and Designing**
  - Analyze and interpret data to determine similarities and differences in findings.

### Disciplinary Core Ideas (DCI)

**ESS3.A: Natural Resources**
- Humans depend on Earth’s land, ocean, atmosphere, and biosphere for many different resources. Minerals, fresh water, and biosphere resources are limited, and many are not renewable or replaceable over human lifetimes. These resources are distributed unevenly around the planet as a result of past geologic processes.

**ESS3.B: Natural Hazards**
- Mapping the history of natural hazards in a region, combined with an understanding of related geologic forces can help forecast the locations and likelihoods of future events.

**ESS3.C: Human Impacts on Earth Systems**
- Human activities have significantly altered the biosphere, sometimes damaging or destroying natural habitats and causing the extinction of other species. But changes to Earth’s environments can have different impacts (negative)
**Solutions**
Constructing explanations and designing solutions in 6–8 builds on K–5 experiences and progresses to include constructing explanations and designing solutions supported by multiple sources of evidence consistent with scientific ideas, principles, and theories.
- Construct a scientific explanation based on valid and reliable evidence obtained from sources (including the students’ own experiments) and the assumption that theories and laws that describe the natural world operate today as they did in the past and will continue to do so in the future. (ESS3-MS-1)
- Apply scientific principles to design an object, tool, process or system. (ESS3-MS-3)

**Engaging in Argument from Evidence**
Engaging in argument from evidence in 6–8 builds on K–5 experiences and progresses to constructing a convincing argument that supports or refutes claims for either explanations or solutions about the natural and designed world(s).
- Construct an oral and written argument supported by empirical evidence and scientific reasoning to support or refute an explanation or a model for a phenomenon or a solution to a problem. (ESS3-MS-4)

---

**ESS3.D: Global Climate Change**

- Human activities, such as the release of greenhouse gases from burning fossil fuels, are major factors in the current rise in Earth’s mean surface temperature (global warming). Reducing the level of climate change and reducing human vulnerability to whatever climate changes do occur depend on the understanding of climate science, engineering capabilities, and other kinds of knowledge, such as understanding of human behavior and on applying that knowledge wisely in decisions and activities. (ESS3-MS-5)

**Influence of Science, Engineering, and Technology on Society and the Natural World**
All human activity draws on natural resources and has both short and long-term consequences, positive as well as negative, for the health of people and the natural environment. (ESS3-MS-1, ESS3-MS-4)
The uses of technologies and any limitations on their use are driven by individual or societal needs, desires, and values; by the findings of scientific research; and by differences in such factors as climate, natural resources, and economic conditions. Thus technology use varies from region to region and over time. (ESS3-MS-2, ESS3-MS-3)

**Connections to Nature of Science**

**Science Addresses Questions About the Natural and Material World**
Scientific knowledge can describe the consequences of actions but does not necessarily prescribe the decisions that society takes. (ESS3-MS-4)

---

### Idaho Common Core Connections

**ELA/Literacy**
- **RST.6-8.1** Cite specific textual evidence to support analysis of science and technical texts, attending to the precise details of explanations or descriptions (ESS3-MS-1), (ESS3-MS-2), (ESS3-MS-4), (ESS3-MS-5)

- **MP.2** Reason abstractly and quantitatively. (ESS3-MS-2), (ESS3-MS-5)
- **6.RP.A.1** Understand the concept of a ratio and use ratio language to describe a ratio relationship between two quantities. (ESS3-MS-3), (ESS3-MS-4)
- **7.RP.A.2** Recognize and represent proportional relationships between quantities. (ESS3-MS-3), (ESS3-MS-4)
- **6.EE.B.6** Use variables to represent numbers and write expressions when solving a real-world or mathematical problem; understand that a variable can represent an unknown number, or, depending on the purpose at hand, any number in a specified set. (ESS3-MS-1), (ESS3-MS-2), (ESS3-MS-3), (ESS3-MS-4), (ESS3-MS-5)
- **7.EE.B.4** Use variables to represent quantities in a real-world or mathematical problem, and construct simple equations and inequalities to solve problems by reasoning about the quantities. (ESS3-MS-1), (ESS3-MS-2), (ESS3-MS-3), (ESS3-MS-4), (ESS3-MS-5)
High School (9-12)
LS: Life Sciences
LS1-HS Molecules to Organisms: Structure and Processes

Performance Expectations (PE)

Students who demonstrate understanding can:

**LS1-HS-1. Construct an explanation based on evidence for how the structure of DNA determines the structure of proteins which carry out the essential functions of life through systems of specialized cells.**
- Clarification Statement: Emphasis is on the structure of the double helix, the pairing and sequencing of the nitrogenous bases, transcription, translation, and protein synthesis.
- Assessment Boundary: Assessment does not include identification of specific cell or tissue types, whole body systems, specific protein structures and functions, or the biochemistry of protein synthesis.

**LS1-HS-2. Develop and use a model to illustrate the hierarchical organization of interacting systems that provide specific functions within multicellular organisms.**
- Clarification Statement: Emphasis is on functions at the organism system level such as nutrient uptake, water delivery, and organism movement in response to neural stimuli. An example of an interacting system could be an artery depending on the proper function of elastic tissue and smooth muscle to regulate and deliver the proper amount of blood within the circulatory system.
- Assessment Boundary: Assessment does not include interactions and functions at the molecular or chemical reaction level.

**LS1-HS-3. Plan and conduct an investigation to provide evidence that feedback mechanisms maintain homeostasis.**
- Clarification Statement: Examples of investigations could include heart rate response to exercise, stomate response to moisture and temperature, and root development in response to water levels.
- Assessment Boundary: Assessment does not include the cellular processes involved in the feedback mechanism.

**LS1-HS-4. Use a model to illustrate the role of cellular division (mitosis) and differentiation in producing and maintaining complex organisms.**
- Assessment Boundary: Assessment does not include specific gene control mechanisms or rote memorization of the steps of mitosis.

**LS1-HS-5. Use a model to illustrate how photosynthesis transforms light energy into stored chemical energy.**
- Clarification Statement: Emphasis is on illustrating inputs and outputs of matter and the transfer and transformation of energy in photosynthesis by plants and other photosynthesizing organisms. Examples of models could include diagrams, chemical equations, and conceptual models.
- Assessment Boundary: Assessment does not include specific biochemical steps.

**LS1-HS-6. Construct and revise an explanation based on evidence for how carbon, hydrogen, and oxygen from sugar molecules may combine with other elements to form amino acids and/or other large carbon-based molecules.**
- Clarification Statement: Emphasis is on using evidence from models and simulations to support explanations.
- Assessment Boundary: Assessment does not include the details of the specific chemical reactions or identification of macromolecules.

**LS1-HS-7. Use a model to illustrate that cellular respiration is a chemical process whereby the bonds of food molecules and oxygen molecules are broken and the bonds in new compounds are formed resulting in a net transfer of energy.**
- Clarification Statement: Emphasis is on the conceptual understanding of the inputs and outputs of the process of cellular respiration.
- Assessment Boundary: Assessment should not include identification of the steps or specific processes involved in cellular respiration.

**Science and Engineering Practices (SEP)**

**Disciplinary Core Ideas (DCI)**

**Crosscutting Concepts (CCC)**

**Developing and Using Models**
Modeling in 9–12 builds on K–8 experiences and progresses to using, synthesizing, and developing

**LS1.A: Structure and Function**
- Systems of specialized cells within organisms help them perform the essential functions of life. (LS1-HS-1)

**Systems and System Models**
Models (e.g., physical, mathematical, computer models) can be used to simulate systems and
models to predict and show relationships among variables between systems and their components in the natural and designed worlds.

- Develop and use a model based on evidence to illustrate the relationships between systems or between components of a system. (LS1-HS-2)
- Use a model based on evidence to illustrate the relationships between systems or between components of a system. (LS1-HS-4, LS1-HS-5, LS1-HS-7)

**Planning and Carrying Out Investigations**

Planning and carrying out in 9–12 builds on K–8 experiences and progresses to include investigations that provide evidence for and test conceptual, mathematical, physical, and empirical models.

- Plan and conduct an investigation individually and collaboratively to produce data to serve as the basis for evidence, and in the design: decide on types, how much, and accuracy of data needed to produce reliable measurements and consider limitations on the precision of the data (e.g., number of trials, cost, risk, time), and refine the design accordingly. (LS1-HS-3)

**Constructing Explanations and Designing Solutions**

Constructing explanations and designing solutions in 9–12 builds on K–8 experiences and progresses to explanations and designs that are supported by multiple and independent student-generated sources of evidence consistent with scientific ideas, principles, and theories.

- Construct an explanation based on valid and reliable evidence obtained from a variety of sources (including students’ own investigations, models, theories, simulations, peer review) and the assumption that theories and laws that describe the natural world operate today as they did in the past and will continue to do so in the future. (LS1-HS-1)
- Construct and revise an explanation based on valid and reliable evidence obtained from a variety of sources (including students’ own investigations, models, theories, simulations, peer review) and the assumption that theories and laws that describe the natural world operate today as they did in the past and will continue to do so in the future. (LS1-HS-1)
- Develop and use a model based on evidence to illustrate the relationships between systems or between components of a system. (LS1-HS-4, LS1-HS-5, LS1-HS-7)
- Develop and use a model based on evidence to illustrate the relationships between systems or between components of a system. (LS1-HS-4, LS1-HS-5, LS1-HS-7)

**LS1.C: Organization for Matter and Energy Flow in Organisms**

- All cells contain genetic information in the form of DNA molecules. Genes are regions in the DNA that contain the instructions that code for the formation of proteins, which carry out most of the work of cells. (LS1-HS-1)
- Multicellular organisms have a hierarchical structural organization, in which any one system is made up of numerous parts and is itself a component of the next level. (LS1-HS-2)
- Feedback mechanisms maintain a living system’s internal conditions within certain limits and mediate behaviors, allowing it to remain alive and functional even as external conditions change within some range. Feedback mechanisms can encourage (through positive feedback) or discourage (negative feedback) what is going on inside the living system. (LS1-HS-3)

**LS1.B: Growth and Development of Organisms**

- In multicellular organisms individual cells grow and then divide via a process called mitosis, thereby allowing the organism to grow. The organism begins as a single cell (fertilized egg) that divides successively to produce many cells, with each parent cell passing identical genetic material (two variants of each chromosome pair) to both daughter cells. Cellular division and differentiation produce and maintain a complex organism, composed of systems of tissues and organs that work together to meet the needs of the whole organism. (LS1-HS-3)

**Energy and Matter**

Changes of energy and matter in a system can be described in terms of energy and matter flows into, out of, and within that system. (LS1-5, LS1-HS-6)

Energy cannot be created or destroyed—it only moves between one place and another place, between objects and/or fields, or between systems. (LS1-HS-7)

**Structure and Function**

Investigating or designing new systems or structures requires a detailed examination of the properties of different materials, the structures of different components, and connections of components to reveal its function and/or solve a problem. (LS1-HS-1)

**Stability and Change**

Feedback (negative or positive) can stabilize or destabilize a system. (LS1-HS-3)
peer review) and the assumption that theories and laws that describe the natural world operate today as they did in the past and will continue to do so in the future. (LS1-HS-6)

**Connections to Nature of Science**

Scientific Investigations Use a Variety of Methods
Scientific inquiry is characterized by a common set of values that include: logical thinking, precision, open-mindedness, objectivity, skepticism, replicability of results, and honest and ethical reporting of findings. (LS1-HS-3)

Idaho Common Core Connections

**ELA/Literacy**

- RST.11-12.1 Cite specific textual evidence to support analysis of science and technical texts, attending to important distinctions the author makes and to any gaps or inconsistencies in the account. (LS1-HS-1), (LS1-HS-6)
- WHST.9-12.2 Write informative/explanatory texts, including the narration of historical events, scientific procedures/experiments, or technical processes. (LS1-HS-1), (LS1-HS-6)
- WHST.9-12.5 Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience. (LS1-HS-6)
- WHST.9-12.7 Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation. (LS1-HS-3)
- WHST.11-12.8 Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the strengths and limitations of each source in terms of the specific task, purpose, and audience; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and overreliance on any one source and following a standard format for citation. (LS1-HS-3)
- WHST.9-12.9 Draw evidence from informational texts to support analysis, reflection, and research. (LS1-HS-1), (LS1-HS-6)

**Mathematics**

- MP.4 Model with mathematics. (LS1-HS-4)
- HSF-IF.C.7 Graph functions expressed symbolically and show key features of the graph, by hand in simple cases and using technology for more complicated cases. (LS1-HS-4)
- HSF-BF.A.1 Write a function that describes a relationship between two quantities. (LS1-HS-4)

**LS2-HS Ecosystems: Interactions, Energy, and Dynamics**

**Performance Expectations (PE)**

Students who demonstrate understanding can:

**LS2-HS-1.** Use mathematical and/or computational representations to support explanations of factors that affect carrying capacity of ecosystems at different scales.

- **Clarification Statement:** Emphasis is on quantitative analysis and comparison of the relationships among interdependent factors including boundaries, resources, climate, and competition. Examples of mathematical comparisons could include graphs, charts, histograms, and population changes gathered from simulations or historical data sets.
- **Assessment Boundary:** Assessment does not include deriving mathematical equations to make comparisons.

**LS2-HS-2.** Use mathematical representations to support and revise explanations based on evidence about factors affecting biodiversity and populations in

| **Modeling in 9–12 builds on K–8 experiences and progresses to using, synthesizing, and developing models to predict and show how relationships among variables between systems and their components in the natural and designed worlds.** (LS2-HS-5) | **LS2A: Interdependent Relationships in Ecosystems**  
- Ecosystems have carrying capacities, which are limits to the numbers of organisms and populations they can support. These limits result from such factors as the availability of living and nonliving resources and from such challenges such as predation, competition, and disease. Organisms would have the capacity to produce populations of great size were it not for the fact that environments and resources are finite. This fundamental tension affects the abundance (number of individuals) of species in any given ecosystem. (LS2-HS-1, LS2-HS-2) | **Cause and Effect**  
Empirical evidence is required to differentiate between cause and correlation and make claims about specific causes and effects. (LS2-HS-8) |
| **Using Mathematics and Computational Thinking**  
Mathematical and computational thinking in 9-12 builds on K-8 experiences and progresses to using algebraic thinking and analysis, a range of linear and nonlinear functions including trigonometric functions, exponentials and logarithms, and computational tools for statistical analysis to analyze, represent, and | **LS2B: Cycles of Matter and Energy Transfer in Ecosystems**  
- Photosynthesis and cellular respiration (including anaerobic processes) provide most of the energy for life processes. (LS2-HS-3)  
- Plants or algae form the lowest level of the food web. At each link upward in a food web, only a small fraction of the | **Scale, Proportion, and Quantity**  
The significance of a phenomenon is dependent on the scale, proportion, and quantity at which it occurs. (LS2-HS-1)  
Using the concept of orders of magnitude allows one to understand how a model at one scale relates to a model at another scale. (LS2-HS-2) |
| **Evaluate the evidence for the role of group behavior on individual and species’ chances to survive and reproduce.** (LS2-HS-8) | **Systems and System Models**  
Models (e.g., physical, mathematical, computer models) can be used to simulate systems and interactions—including energy, matter, and information flows—within and between systems at different scales. (LS2-HS-5) | |
| **Construct and revise an explanation based on evidence for the cycling of matter and flow of energy in aerobic and anaerobic conditions.** (LS2-HS-3) | **LS2-HS-1**  
A fundamental tension exists between organisms that require oxygen (or aerobic respiration) and those that do not (or anaerobic respiration). Both processes are key to the cycling of matter in ecosystems and transfer energy from one level to another. (LS2-HS-2) | |
| **Develop a model to illustrate the role of photosynthesis and cellular respiration in the cycling of carbon among the biosphere, atmosphere, hydrosphere, and geosphere.** (LS2-HS-5) | **LS2-HS-2**  
Assessment is limited to provided data. | |
| **Use mathematical representations to support claims for the cycling of matter and flow of energy among organisms in an ecosystem.** (LS2-HS-4) | **LS2-HS-3**

Assessment is limited to provided data. | |
| **Clarification Statement: Examples of mathematical representations include finding the average, determining trends, and using graphical comparisons of multiple sets of data.** | | |
| **Assessment Boundary: Assessment is limited to provided data.** | | |
| **Clarification Statement: Emphasis is on conceptual understanding of the role of aerobic and anaerobic respiration in different environments.** | | |
| **Assessment Boundary: Assessment does not include the specific chemical processes of either aerobic or anaerobic respiration.** | | |
| **Clarification Statement: Examples of human activities can include urbanization, building dams, and dissemination of invasive species, utilization of non-renewable resources as opposed to renewable resource.** | | |
| **Clarification Statement: Examples of models could include simulations and mathematical models.** | | |
| **Clarification Statement: Examples of changes in ecosystem conditions could include modest biological or physical changes, such as a seasonal flood; and extreme changes, such as volcanic eruption or sea level rise.** | | |
| **Clarification Statement: Examples of models could include simulations and mathematical models.** | | |
| **Clarification Statement: Examples of mathematical representations to support claims for the cycling of matter and flow of energy among organisms in an ecosystem.** | | |
| **Clarification Statement: Examples of models could include simulations and mathematical models.** | | |
| **Clarification Statement: Examples of changes in ecosystem conditions could include modest biological or physical changes, such as a seasonal flood; and extreme changes, such as volcanic eruption or sea level rise.** | | |
model data. Simple computational simulations are created and used based on mathematical models of basic assumptions.

- Use mathematical and/or computational representations of phenomena or design solutions to support explanations. (LS2-HS-1)
- Use mathematical representations of phenomena or design solutions to support and revise explanations. (LS2-HS-2)
- Use mathematical representations of phenomena or design solutions to support claims. (LS2-HS-4)

### Constructing Explanations and Designing Solutions

Constructing explanations and designing solutions in 9–12 builds on K–8 experiences and progresses to explanations and designs that are supported by multiple and independent student-generated sources of evidence consistent with scientific ideas, principles, and theories.

- Construct and revise an explanation based on valid and reliable evidence obtained from a variety of sources (including students’ own investigations, models, theories, simulations, peer review) and the assumption that theories and laws that describe the natural world operate today as they did in the past and will continue to do so in the future. (LS2-HS-3)
- Design, evaluate, and refine a solution to a complex real-world problem, based on scientific knowledge, student-generated sources of evidence, prioritized criteria, and tradeoff considerations. (LS2-HS-7)

### Engaging in Argument from Evidence

Engaging in argument from evidence in 9–12 builds on K–8 experiences and progresses to using appropriate and sufficient evidence and scientific reasoning to defend and critique claims and explanations about the natural and designed world(s). Arguments may also come from current scientific or historical episodes in science.

- Evaluate the claims, evidence, and reasoning behind currently accepted explanations or solutions to determine the merits of matter consumed at the lower level is transferred upward, to produce growth and release energy in cellular respiration at the higher level. Given this inefficiency, there are generally fewer organisms at higher levels of a food web. Some matter reacts to release energy for life functions, some matter is stored in newly made structures, and much is discarded. The chemical elements that make up the molecules of organisms pass through food webs and into and out of the atmosphere and soil, and they are combined and recombined in different ways. At each link in an ecosystem, matter and energy are conserved. (LS2-HS-4)
  - Photosynthesis and cellular respiration are important components of the carbon cycle, in which carbon is exchanged among the biosphere, atmosphere, oceans, and geosphere through chemical, physical, geological, and biological processes. (LS2-HS-5)

### LS2.C: Ecosystem Dynamics, Functioning, and Resilience

- A complex set of interactions within an ecosystem can keep its numbers and types of organisms relatively constant over long periods of time under stable conditions. If a modest biological or physical disturbance to an ecosystem occurs, it may return to its more or less original status (i.e., the ecosystem is resilient), as opposed to becoming a very different ecosystem. Extreme fluctuations in conditions or the size of any population, however, can challenge the functioning of ecosystems in terms of resources and habitat availability. (LS2-HS-2, LS2-HS-6)
  - Moreover, anthropogenic changes (induced by human activity) in the environment—including habitat destruction, pollution, introduction of invasive species, overexploitation, and climate change—can disrupt an ecosystem and threaten the survival of some species. (LS2-HS-7)

### LS2.D: Social Interactions and Group Behavior

- Group behavior has evolved because membership can increase the chances of survival for individuals and their genetic relatives, gene pool. (LS2-HS-8)

### LS4.D: Biodiversity and Humans

- Biodiversity is increased by the formation of new species (speciation) and decreased by the loss of species (extinction). (LS2-HS-7)
  - Humans depend on the living world for the resources and other benefits provided by biodiversity. But human activity is also having adverse impacts on biodiversity through overpopulation, overexploitation, habitat destruction, pollution, introduction of invasive species, and climate change. Thus sustaining biodiversity so that ecosystem
LS3-HS Heredity: Inheritance and Variation of Traits

**Performance Expectations (PE)**

Students who demonstrate understanding can:

**LS3-HS-1. Ask questions to clarify relationships about the role of DNA and chromosomes in coding the instructions for characteristic traits passed from parents to offspring.**
- Assessment Boundary: Assessment does not include the phases of meiosis or the biochemical mechanism of specific steps in the process.

**LS3-HS-2. Make and defend a claim based on evidence that inheritable genetic variations may result from: (1) new genetic combinations through meiosis, (2)
### Discipline Core Ideas (DCI)

#### LS1.A: Structure and Function
- All cells contain genetic information in the form of DNA molecules. Genes are regions in the DNA that contain the instructions that code for the formation of proteins. (LS3-HS-1, LS1-HS-1.)

#### LS3.A: Inheritance of Traits
- Each chromosome consists of a single very long DNA molecule, and each gene on the chromosome is a particular segment of that DNA. The instructions for forming species’ characteristics are carried in DNA. All cells in an organism have the same genetic content, but the genes used (expressed) by the cell may be regulated in different ways. Not all DNA codes for a protein; some segments of DNA are involved in regulatory or structural functions, and some have no as-yet known function. (LS3-HS-1)

#### LS3.B: Variation of Traits
- In sexual reproduction, chromosomes can sometimes swap sections during the process of meiosis (cell division), thereby creating new genetic combinations and thus more genetic variation. Although DNA replication is tightly regulated and remarkably accurate, errors do occur and result in mutations, which are also a source of genetic variation. Environmental factors can also cause mutations in genes, and viable mutations are inherited. (LS3-HS-2)
- Environmental factors also affect expression of traits, and hence affect the probability of occurrences of traits in a population. Thus the variation and distribution of traits observed depends on both genetic and environmental factors. (LS3-HS-2, LS3-HS-3)

### Crosscutting Concepts (CCC)

#### Cause and Effect
Empirical evidence is required to differentiate between cause and correlation and make claims about specific causes and effects. (LS3-HS-1, LS3-HS-2)

#### Scale, Proportion, and Quantity
Algebraic thinking is used to examine scientific data and predict the effect of a change in one variable on another (e.g., linear growth vs. exponential growth). (LS3-HS-3)

### Science is a Human Endeavor
- Technological advances have influenced the progress of science and science has influenced advances in technology. (LS3-HS-3)
- Science and engineering are influenced by society and society is influenced by science and engineering. (LS3-HS-3)

### Idaho Common Core Connections

#### ELA/Literacy
- **RST.11-12.1** Cite specific textual evidence to support analysis of science and technical texts, attending to important distinctions the author makes and to any gaps or inconsistencies in the account. (LS3-HS-1), (LS3-HS-2), (LS3-HS-3), (LS3-HS-6), (LS3-HS-8)

#### Mathematics
- **MP.2** Reason abstractly and quantitatively. (LS3-HS-2), (LS3-HS-3)
LS4-HS Biological Adaptation: Unity and Diversity

### Performance Expectations (PE)

Students who demonstrate understanding can:

**LS4-HS-1.** Communicate scientific information that common ancestry and biological evolution are supported by multiple lines of empirical evidence.
- **Clarification Statement:** Emphasis is on a conceptual understanding of the role each line of evidence has relating to common ancestry and biological evolution. Examples of evidence could include similarities in DNA sequences, anatomical structures, and order of appearance of structures in embryological development.

**LS4-HS-2.** Construct an explanation based on evidence that the process of evolution primarily results from four factors: (1) the potential for a species to increase in number, (2) the heritable genetic variation of individuals in a species due to mutation and sexual reproduction, (3) competition for limited resources, and (4) the proliferation of those organisms that are better able to survive and reproduce in the environment.
- **Clarification Statement:** Emphasis is on using evidence to explain the influence each of the four factors has on number of organisms, behaviors, morphology, or physiology in terms of ability to compete for limited resources and subsequent survival of individuals and adaptation of species. Examples of evidence could include mathematical models such as simple distribution graphs and proportional reasoning.
- **Assessment Boundary:** Assessment does not include other mechanisms of evolution, such as genetic drift, gene flow through migration, and co-evolution.

**LS4-HS-3.** Apply concepts of statistics and probability to support explanations that organisms with an advantageous heritable trait tend to increase in proportion to organisms lacking this trait.
- **Clarification Statement:** Emphasis is on analyzing shifts in numerical distribution of traits and using these shifts as evidence to support explanations.
- **Assessment Boundary:** Assessment is limited to basic statistical and graphical analysis. Assessment does not include allele frequency calculations.

**LS4-HS-4.** Construct an explanation based on evidence for how natural selection leads to adaptation of populations.
- **Clarification Statement:** Emphasis is on using data to provide evidence for how specific biotic and abiotic differences in ecosystems (such as ranges of seasonal temperature, long-term climate change, acidity, light, geographic barriers, or evolution of other organisms) contribute to a change in gene frequency over time, leading to adaptation of populations.

**LS4-HS-5.** Evaluate the evidence supporting claims that changes in environmental conditions may result in: (1) increases in the number of individuals of some species, (2) the emergence of new species over time, and (3) the extinction of other species.
- **Clarification Statement:** Emphasis is on determining cause and effect relationships for how changes to the environment such as deforestation, overfishing, application of fertilizers and pesticides, drought, flood, and the rate of change of the environment affect distribution or disappearance of traits in species.

**LS4-HS-6.** Create or revise a simulation to test a solution to mitigate adverse impacts of human activity on biodiversity.
- **Clarification Statement:** Emphasis is on designing solutions for a proposed problem related to threatened or endangered species, or to genetic variation of organisms for multiple species.

### Science and Engineering Practices (SEP)

**Analyzing and Interpreting Data**
- Analyzing data in 9–12 builds on K–8 experiences and progresses to introducing more detailed statistical analysis, the comparison of data sets for consistency, and the use of models to generate and analyze data.
- Apply concepts of statistics and probability (including determining function fits to data).

### Disciplinary Core Ideas (DCI)

**LS4-A: Evidence of Common Ancestry and Diversity**
- Genetic information, like the fossil record, provides evidence of evolution. DNA sequences vary among species, but there are many overlaps; in fact, the ongoing branching that produces multiple lines of descent can be inferred by comparing the DNA sequences of different organisms. Such information is also derivable from the similarities and

### Crosscutting Concepts (CCC)

**Patterns**
- Different patterns may be observed at each of the scales at which a system is studied and can provide evidence for causality in explanations of phenomena. (LS4-HS-1, LS4-HS-3)

**Cause and Effect**
### Using Mathematics and Computational Thinking

Mathematical and computational thinking in 9–12 builds on K–8 experiences and progresses to using algebraic thinking and analysis, a range of linear and nonlinear functions including trigonometric functions, exponentials and logarithms, and computational tools for statistical analysis to analyze, represent, and model data. Simple computational simulations are created and used based on mathematical models of basic assumptions.

- Create or revise a simulation of a phenomenon, designed device, process, or system. (LS4-HS-6)

### Constructing Explanations and Designing Solutions

Constructing explanations and designing solutions in 9–12 builds on K–8 experiences and progresses to explanations and designs that are supported by multiple and independent student-generated sources of evidence consistent with scientific ideas, principles, and theories.

- Construct an explanation based on valid and reliable evidence obtained from a variety of sources (including students’ own investigations, models, theories, simulations, peer review) and the assumption that theories and laws that describe the natural world operate today as they did in the past and will continue to do so in the future. (LS4-HS-2, LS4-HS-4)

### Engaging in Argument from Evidence

Engaging in argument from evidence in 9–12 builds on K–8 experiences and progresses to using appropriate and sufficient evidence and scientific reasoning to defend and critique claims and explanations about the natural and designed world(s). Arguments may also come from current or historical episodes in science.

- Evaluate the evidence behind currently accepted explanations or solutions to determine the merits of arguments. (LS4-HS-3)

### LS4.B: Natural Selection

- Natural selection occurs only if there is both (1) variation in the genetic information between organisms in a population and (2) variation in the expression of that genetic information—that is, trait variation—that leads to differences in performance among individuals. (LS4-HS-2, LS4-HS-3)
- The traits that positively affect survival are more likely to be reproduced, and thus are more common in the population. (LS4-HS-3)

### LS4.C: Adaptation

- Evolution is a consequence of the interaction of four factors: (1) the potential for a species to increase in number, (2) the genetic variation of individuals in a species due to mutation and sexual reproduction, (3) competition for an environment’s limited supply of the resources that individuals need in order to survive and reproduce, and (4) the ensuing proliferation of those organisms that are better able to survive and reproduce in that environment. (LS4-HS-2)
- Natural selection leads to adaptation, that is, to a population dominated by organisms that are anatomically, behaviorally, and physiologically well suited to survive and reproduce in a specific environment. That is, the differential survival and reproduction of organisms in a population that have an advantageous heritable trait leads to an increase in the proportion of individuals in future generations that have the trait and to a decrease in the proportion of individuals that do not. (LS4-HS-3, LS4-HS-4)
- Adaptation also means that the distribution of traits in a population can change when conditions change. (LS4-HS-3)
- Changes in the physical environment, whether naturally occurring or human induced, have thus contributed to the expansion of some species, the emergence of new distinct species as populations diverge under different conditions, and the decline—and sometimes the extinction—of some species. (LS4-HS-5, LS4-HS-6)
- Species become extinct because they can no longer survive and reproduce in their altered environment. If members cannot adjust to change that is too fast or drastic, the opportunity for the species’ evolution is lost. (LS4-HS-5)

### LS4.D: Biodiversity and Humans

- Humans depend on the living world for the resources and other benefits provided by biodiversity. But human activity is also having adverse impacts on biodiversity through differences in amino acid sequences and from anatomical and embryological evidence. (LS4-HS-1)

### Connections to Nature of Science

**Scientific Knowledge Assumes an Order and Consistency in Natural Systems**

Scientific knowledge is based on the assumption that natural laws operate today as they did in the past and they will continue to do so in the future. (LS4-HS-1, LS4-HS-4)

PSC: Physical Sciences Chemistry

PSC1-HS Structure and Properties of Matter

Performance Expectations (PE)

Students who demonstrate understanding can:

**PSC1-HS-1. Develop models to describe the atomic composition of simple molecules and extended structures.**
- Clarification Statement: Emphasis is on reviewing how to develop models of molecules that vary in complexity. This should build on the similar middle school standard (PS1-MS-1). Examples of simple molecules could include ammonia and methanol. Examples of extended structures could include sodium chloride or diamonds. Examples of molecular-level models could include drawings, 3D ball and stick structures, or computer representations showing different molecules with different types of atoms.
- Assessment Limit: Students will be provided with the names of the elements, a list of common ions, a list of numerical prefixes and their meanings, and the charges of all cations and anions within the item as necessary. Confin element symbols to the representative and familiar transition metal elements.

**PSC1-HS-2. Use the periodic table as a model to predict the relative properties of elements based on the patterns of electrons in the outermost energy level of atoms.**
- Clarification Statement: Examples of properties that could be predicted from patterns could include reactivity of metals, types of bonds formed, numbers of bonds formed, and reactions with oxygen.
- Assessment Limit: Elements will be limited to main group elements. Properties assessed will be limited to reactivity, valence electrons, atomic radius, electronegativity, ionization energy (first), shielding effect, and the most common oxidation number.

**PSC1-HS-3. Plan and conduct an investigation to gather evidence to compare the structure of substances at the bulk scale to infer the strength of electrical forces between particles.**
- Clarification Statement: Emphasis is on understanding the strengths of forces between particles, not on naming specific intermolecular forces (such as dipole-dipole). Examples of particles could include ions, atoms, molecules, and networked materials (such as graphite). Examples of bulk properties of substances could include the melting point and boiling point, vapor pressure, and surface tension.
- Assessment Limit: Metallic, ionic, and covalent bonds may be included. Graphical representations of melting or boiling points of different substances may be used in the item (e.g., graph of boiling points vs. molar mass or simple bar graph). Structural formulas of compounds may be used to compare the melting/boiling points of compounds.

**PSC1-HS-4. Develop models to illustrate the changes in the composition of the nucleus of the atom and the energy released during the processes of fission, fusion, and other types of radioactive decay.**
- Clarification Statement: Emphasis is on simple qualitative models, such as pictures or diagrams, and on the scale of energy released in nuclear processes relative to other kinds of transformations.
- Assessment Limit: Assessment does not include quantitative calculation of energy released. Assessment is limited to alpha, beta, and gamma radioactive decays.

**PSC1-HS-5. Communicate scientific and technical information about why the molecular-level structure is important in the functioning of designed materials.**
- Clarification Statement: Emphasis is on the attractive and repulsive forces that determine the functioning of the material. Examples could include why electrically conductive materials are often made of metal, flexible but durable materials are made up of long chained molecules, and pharmaceuticals are designed to interact with specific receptors.
- Assessment Limit: Assessment is limited to provided molecular structures of specific designed materials. For questions involving polar vs. nonpolar bonds, item distractors containing ionic bonds may not be used. Electronegativity differences of < 0.5 should be used for nonpolar covalent bonds. Electronegativity differences of 0.5 – 1.7 should be used for polar covalent bonds.

### Disciplinary Core Ideas (DCI)

**PS1.A: Structure and Properties of Matter**
- Substances are made from different types of atoms, which combine with one another in various ways. Atoms form molecules that range in size from two to thousands of atoms. (PSC1-HS-1)
- Each atom has a substructure consisting of a nucleus, which is made of protons and neutrons, surrounded by electrons. (PSC1-HS-2)

### Crosscutting Concepts (CCC)

**Patterns**
Different patterns may be observed at each of the scales at which a system is studied and can provide evidence for causality in explanations of phenomena. (PSC1-HS-1, PSC1-HS-2, PSC1-HS-3)

**Energy and Matter**
In nuclear processes, atoms are not conserved, but the total number of protons plus neutrons is

### Idaho Common Core Connections

**ELA/Literacy**

- **RST.9-10.7** Translate quantitative or technical information expressed in words in a text into visual form (e.g., a table or chart) and translate information expressed visually or mathematically (e.g., in an equation) into words. (PSC1-HS-2)

- **RST.11-12.1** Cite specific textual evidence to support analysis of science and technical texts, attending to important distinctions the author makes and to any gaps or inconsistencies in the account. (PSC1-HS-3), (PSC1-HS-5)

- **WHST.9-12.2** Write informative/explanatory texts, including the narration of historical events, scientific procedures/experiments, or technical processes. (PSC1-HS-5)

- **WHST.9-12.7** Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation. (PSC1-HS-3)

- **WHST.11-12.8** Gather relevant information from multiple authoritative print and digital sources, using searches effectively; assess the strengths and limitations of each source in terms of the specific task, purpose.

**Mathematics**

- **MP.4** Model with mathematics. (PSC1-HS-4)

- **HSN-Q.1.1** Use units as a way to understand problems and to guide the solution of multi-step problems; choose and interpret units consistently in formulas; choose and interpret the scale and the origin in graphs and data displays. (PSC1-HS-3), (PSC1-HS-4), (PSC1-HS-5)

- **HSN-Q.2.2** Define appropriate quantities for the purpose of descriptive modeling. (PSC1-HS-4), (PSC1-HS-5)

- **HSN-Q.3.2** Choose a level of accuracy appropriate to limitations on measurement when reporting quantities. (PSC1-HS-3), (PSC1-HS-4), (PSC1-HS-5)
PSC2-HS Chemical Reactions

Performance Expectations (PE)

Students who demonstrate understanding can:

**PSC2-HS-1**  Construct and revise an explanation for the outcome of a simple chemical reaction based on the outermost electron states of atoms, trends in the periodic table, and knowledge of the patterns of chemical properties.

- **Clarification Statement:** Examples of chemical reactions could include the reaction of sodium and chlorine, of carbon and oxygen, or of carbon and hydrogen.
- **Assessment Limit:** Identify types of chemical reactions including: synthesis/formation/combination reactions, decomposition reactions, single replacement/displacement reactions, double replacement/displacement reactions, oxidation-reduction (redox) reactions (single replacement only), acid base reactions, and combustion reactions (for hydrocarbons). Predict the products of double replacement, single replacement, and combustion reactions only. For the second skill statement, do not use acid names or hydrocarbons when translating between words and formulas. Items will include a list of common ions, as needed.

**PSC2-HS-2.**  Develop a model to illustrate that the release or absorption of energy from a chemical reaction system depends upon the changes in total bond energy.

- **Clarification Statement:** Emphasis is on the idea that a chemical reaction is a system that affects the energy change. Examples of models could include molecular-level drawings and diagrams of reactions, graphs showing the relative energies of reactants and products, and representations showing energy is conserved.
- **Assessment Limit:** Assessment does not include calculating the total bond energy changes during a chemical reaction from the bond energies of reactants and products.

**PSC2-HS-3.**  Apply scientific principles and evidence to provide an explanation about the effects of changing the temperature or concentration of the reacting particles on the rate at which a reaction occurs.

- **Clarification Statement:** Emphasis is on student reasoning that focuses on the number and energy of collisions between molecules.
- **Assessment Limit:** Factors that influence the rate of reaction may include temperature, surface area, size of particles, concentration, and catalysts. Can also include concentration and titration relationships. Provide a graphic showing how a catalyst provides a different pathway for a chemical reaction to occur resulting in a lower activation energy. May include a titration curve.

**PSC2-HS-4.**  Use mathematical representations to support the claim that atoms, and therefore mass, are conserved during a chemical reaction.

- **Clarification Statement:** Emphasis is on using mathematical ideas to communicate the proportional relationships between masses of atoms in the reactants and the products, and the translation of these relationships to the macroscopic scale using the mole as the conversion from the atomic to the macroscopic scale. Emphasis is on assessing students' use of mathematical thinking and not on memorization and rote application of problem-solving techniques. Should also include calculations related to determining the concentration and/or pH of a solution.
- **Assessment Limit:** Conversion problems will be one to two steps (e.g., grams to moles to atoms/molecules). Compounds and formulas should be provided in the stem of the question. Students should be given molecular masses in problems involving gram to other unit conversions. Molar mass calculations should not be combined with conversion problems. All volumes must be at standard temperature and pressure (STP). A balanced equation and molar masses should be included in the item. Calculations may include grams/moles/volume of reactant to grams/moles/volume of product.

**PSC2-HS-5.**  Refine the design of a chemical system by specifying a change in conditions that would produce increased amounts of products at equilibrium.

- **Clarification Statement:** Emphasis is on the application of Le Chatelier's Principle and on refining designs of chemical reaction systems, including descriptions of the connection between changes made at the macroscopic level and what happens at the molecular level. Examples of designs could include different ways to increase product formation including adding reactants or removing products.
- **Assessment Boundary:** Assessment is limited to specifying the change in only one variable at a time. Assessment does not include calculating equilibrium constants and concentrations.

and show relationships among variables between systems and their components in the natural and designed worlds.

- Develop a model based on evidence to illustrate the relationships between systems or between components of a system. (PSC2-HS-2)

### Using Mathematics and Computational Thinking

Mathematical and computational thinking at the 9–12 level builds on K–8 and progresses to using algebraic thinking and analysis, a range of linear and nonlinear functions including scientific notation, significant figures, dimensional analysis, exponentials and logarithms, and computational tools for statistical analysis to analyze, represent, and model data. Simple computational simulations are created and used based on mathematical models of basic assumptions.

- Use mathematical representations of phenomena to support claims. (PSC2-HS-4)

### Constructing Explanations and Designing Solutions

Constructing explanations and designing solutions in 9–12 builds on K–8 experiences and progresses to explanations and designs that are supported by multiple and independent student-generated sources of evidence consistent with scientific ideas, principles, and theories.

- Apply scientific principles and evidence to provide an explanation of phenomena and solve design problems, taking into account possible unanticipated effects. (PSC2-HS-3)
- Construct and revise an explanation based on valid and reliable evidence obtained from a variety of sources (including students’ own investigations, models, theories, simulations, peer review) and the assumption that theories and laws that describe the natural world operate today as they did in the past and will continue to do so in the future. (PSC2-HS-1)
- Refine a solution to a complex real-world problem, based on scientific knowledge, student-generated sources of evidence, with similar physical and chemical properties in columns. The repeating patterns of this table reflect patterns of outer electron states. (PSC2-S-1)
- A stable molecule has less energy than the same set of atoms separated; one must provide at least this energy in order to take the molecule apart. (PSC2-HS-2)

#### PS1.B: Chemical Reactions

- Chemical processes, their rates, and whether or not energy is stored or released can be understood in terms of the collisions of molecules and the rearrangements of atoms into new molecules, with consequent changes in the sum of all bond energies in the set of molecules that are matched by changes in kinetic energy. (PSC2-HS-2, PSC2-HS-3)
- In many situations, a dynamic and condition-dependent balance between a reaction and the reverse reaction determines the numbers of all types of molecules present. (PSC2-HS-5)
- The fact that atoms are conserved, together with knowledge of the chemical properties of the elements involved, can be used to describe and predict chemical reactions. (PSC2-HS-1, PSC2-HS-4)

#### ETS1.C: Optimizing the Design Solution

- Criteria may need to be broken down into simpler ones that can be approached systematically, and decisions about the priority of certain criteria over others (trade-offs) may be needed. (PSC2-HS-5)

### Connections to Nature of Science

#### Energy and Matter

- The total amount of energy and matter in closed systems is conserved. (PSC2-HS-4)
- Changes of energy and matter in a system can be described in terms of energy and matter flows into, out of, and within that system. (PSC2-HS-2)

#### Stability and Change

- Much of science deals with constructing explanations of how things change and how they remain stable. (PSC2-HS-5)

#### Scientific Knowledge Assumes an Order and Consistency in Natural Systems

- Science assumes the universe is a vast single system in which basic laws are consistent. (PSC2-HS-4)
Idaho Common Core Connections

**ELA/Literacy**

**RST.11-12.1** Cite specific textual evidence to support analysis of science and technical texts, attending to important distinctions the author makes and to any gaps or inconsistencies in the account. (PSC2-HS-3)

**WHST.9-12.2** Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes. (PSC2-HS-1),(PSC2-HS-3)

**WHST.9-12.5** Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience. (PSC2-HS-1)

**WHST.9-12.7** Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation. (PSC2-HS-5)

**SL.11-12.5** Make strategic use of digital media (e.g., textual, graphical, audio, visual, and interactive elements) in presentations to enhance understanding of findings, reasoning, and evidence and to add interest. (PSC2-HS-2)

**Mathematics**

**MP.2** Reason abstractly and quantitatively. (PSC2-HS-3),(PSC2-HS-4)

**MP.4** Model with mathematics. (PSC2-HS-2)

**HSN-Q.A.1** Use units as a way to understand problems and to guide the solution of multi-step problems; choose and interpret units consistently in formulas; choose and interpret the scale and the origin in graphs and data displays. (PSC2-HS-1),(PSC2-HS-2),(PSC2-HS-3),(PSC2-HS-4)

**HSN-Q.A.2** Define appropriate quantities for the purpose of descriptive modeling. (PSC2-HS-2),(PSC2-HS-4)

**HSN-Q.A.3** Choose a level of accuracy appropriate to limitations on measurement when reporting quantities. (PSC2-HS-1),(PSC2-HS-2),(PSC2-HS-3),(PSC2-HS-4)

---

**PSC3-HS Energy**

**Performance Expectations (PE)**

**PSC3-HS-1.** Evaluate the claims, evidence, and reasoning behind the idea that electromagnetic radiation can be described either by a wave model or a particle model, and that for some situations one model is more useful than the other.

- Clarification Statement: Emphasis is on how the experimental evidence supports the claim and how a theory is generally modified in light of new evidence. Examples of a phenomenon could include interference, diffraction, and photoelectric effect.
- Assessment Boundary: Assessment does not include using quantum theory.

**PSC3-HS-2.** Create a computational model to calculate the change in the energy of one component in a system when the change in energy of the other component(s) and energy flows in and out of the system are known.

- Clarification Statement: Emphasis is on explaining the meaning of mathematical expressions used in the model.
- Assessment Limit: Provide two temperatures (initial and final), a temperature-time graph, or an enthalpy diagram.

**PSC3-HS-3.** Develop and use models to illustrate that energy at the macroscopic scale can be accounted for as a combination of energy associated with the motions of particles (objects) and energy associated with the relative positions of particles (objects).

- Clarification Statement: Examples of phenomena at the macroscopic scale could include the conversion of kinetic energy to thermal energy. Examples of models could include diagrams, drawings, descriptions, and computer simulations.
- Assessment Limit: Provide equations for the gas laws (i.e., ideal gas law, Boyle’s law, Charles’ law, and the combined gas laws).

**PSC3-HS-4*.** Design, build, and refine a device that works within given constraints to convert one form of energy into another form of energy. ---OPTIONAL

- Clarification Statement: Emphasis is on both qualitative and quantitative evaluations of devices. Examples of devices could include calorimeters, heat and cold packs, solar cells, solar ovens, and electrochemical cells. Examples of constraints could include use of renewable energy forms and efficiency.
- Assessment Limit: Assessment for quantitative evaluations is limited to total output for a given input. Assessment is limited to devices constructed with materials provided to students.

**PSC3-HS-5.** Plan and conduct an investigation to provide evidence that the transfer of thermal energy when two components of different temperature are combined within a closed system results in a more uniform energy distribution among the components in the system (second law of thermodynamics).

- Clarification Statement: Emphasis is on analyzing data from student investigations and using mathematical thinking to describe the energy changes both quantitatively and conceptually (endothermic/exothermic). Examples of investigations could include mixing liquids at different initial temperatures or adding objects at different temperatures to water.
### Developing and Using Models

Modeling in 9–12 builds on K–8 and progresses to using, synthesizing, and developing models to predict and show relationships among variables between systems and their components in the natural and designed worlds.

- Develop and use a model based on evidence to illustrate the relationships between systems or between components of a system. (PSC3-HS-3)

### Planning and Carrying Out Investigations

Planning and carrying out investigations to answer questions or test solutions to problems in 9–12 builds on K–8 experiences and progresses to include investigations that provide evidence for and test conceptual, mathematical, physical, and empirical models.

- Plan and conduct an investigation individually and collaboratively to produce data to serve as the basis for evidence, and in the design: decide on types, how much, and accuracy of data needed to produce reliable measurements and consider limitations on the precision of the data (e.g., number of trials, cost, risk, time), and refine the design accordingly. (PSC3-HS-5)

### Using Mathematics and Computational Thinking

Mathematical and computational thinking at the 9–12 level builds on K–8 and progresses to using algebraic thinking and analysis, a range of linear and nonlinear functions including trigonometric functions, exponentials and logarithms, and computational tools for statistical analysis to analyze, represent, and model data. Simple computational simulations are created and used based on mathematical models of basic assumptions.

- Create a computational model or simulation of a phenomenon, designed device, process, or system. (PSC3-HS-2)

### Disciplinary Core Ideas (DCI)

#### PS4.B: Electromagnetic Radiation

- Electromagnetic radiation (e.g., radio, microwaves, light) can be modeled as a wave of changing electric and magnetic fields or as particles called photons. The wave model is useful for explaining many features of electromagnetic radiation, and the particle model explains other features. (PSC3-HS-1)

#### PS3.A: Definitions of Energy

- Energy is a quantitative property of a system that depends on the motion and interactions of matter and radiation within that system. That there is a single quantity called energy is due to the fact that a system’s total energy is conserved, even as, within the system, energy is continually transferred from one object to another and between its various possible forms. (PSC3-HS-2, PSC3-HS-3)

- At the macroscopic scale, energy manifests itself in multiple ways, such as in motion, sound, light, and thermal energy. (PSC3-HS-3, PSC3-HS-4)

- These relationships are better understood at the microscopic scale, at which all of the different manifestations of energy can be modeled as a combination of energy associated with the motion of particles and energy associated with the configuration (relative position of the particles). In some cases the relative position energy can be thought of as stored in fields (which mediate interactions between particles). This last concept includes radiation, a phenomenon in which energy stored in fields moves across space. (PSC3-HS-3)

#### PS3.B: Conservation of Energy and Energy Transfer

- Conservation of energy means that the total change of energy in any system is always equal to the total energy transferred into or out of the system. (PSC3-HS-2)

- Energy cannot be created or destroyed, but it can be transported from one place to another and transferred between systems. (PSC3-HS-2, PSC3-HS-5)

- Mathematical expressions, which quantify how the stored energy in a system depends on its configuration (e.g., relative positions of charged particles, compression of a spring) and how kinetic energy depends on mass and speed, allow the concept of conservation of energy to be

### Crosscutting Concepts (CCC)

#### Systems and System Models

When investigating or describing a system, the boundaries and initial conditions of the system need to be defined and their inputs and outputs analyzed and described using models. (PSC3-HS-5)

Models can be used to predict the behavior of a system, but these predictions have limited precision and reliability due to the assumptions and approximations inherent in models. (PSC3-HS-2)

#### Energy and Matter

Changes of energy and matter in a system can be described in terms of energy and matter flows into, out of, and within that system. (PSC3-HS-4)

Energy cannot be created or destroyed—only moves between one place and another place, between objects and/or fields, or between systems. (PSC3-HS-3)

#### Connections to Engineering, Technology, and Applications of Science

**Influence of Science, Engineering and Technology on Society and the Natural World**

Modern civilization depends on major technological systems. Engineers continuously modify these technological systems by applying scientific knowledge and engineering design practices to increase benefits while decreasing costs and risks. (PSC3-HS-4)

#### Connections to Nature of Science

**Scientific Knowledge Assumes an Order and Consistency in Natural Systems**

Science assumes the universe is a vast single system in which basic laws are consistent. (PSC3-HS-2)
**Constructing Explanations and Designing Solutions**

Constructing explanations and designing solutions in 9–12 builds on K–8 experiences and progresses to explanations and designs that are supported by multiple and independent student-generated sources of evidence consistent with scientific ideas, principles, and theories.

- Design, evaluate, and/or refine a solution to a complex real-world problem, based on scientific knowledge, student-generated sources of evidence, prioritized criteria, and tradeoff considerations. (PSC3-HS-4)

### Performance Expectations (PE)

Students who demonstrate understanding can:

**PSP1-HS-1.** Analyze data to support the claim that Newton’s second law of motion describes the mathematical relationship among the net force on a macroscopic object, its mass, and its acceleration.

- **Clarification Statement:** Examples of data could include tables or graphs of position or velocity as a function of time for objects subject to a net unbalanced force, such as a falling object, an object rolling down a ramp, or a moving object being pulled by a constant force.
- **Assessment Boundary:** Assessment is limited to one-dimensional motion and to macroscopic objects moving at non-relativistic speeds.

**PSP1-HS-2.** Use mathematical representations to support the claim that the total momentum of a system of objects is conserved when there is no net force on the system.

- **Clarification Statement:** Emphasis is on the quantitative conservation of momentum in interactions and the qualitative meaning of this principle (Newton's first law).
- **Assessment Boundary:** Assessment is limited to systems of two macroscopic bodies moving in one dimension.

**PSP1-HS-3.** Apply scientific and engineering ideas to design, evaluate, and refine a device that minimizes the force on a macroscopic object during a collision.

- **Clarification Statement:** Examples of evaluation and refinement could include determining the success of the device at protecting an object from damage and modifying the design to improve it. Examples of a device could include a football helmet or a parachute.
- **Assessment Boundary:** Assessment is limited to qualitative evaluations and/or algebraic manipulations.

**PSP1-HS-4.** Use mathematical representations of Newton’s Law of Gravitation and Coulomb’s Law to describe and predict the gravitational and electrostatic forces between objects.

- **Clarification Statement:** Emphasis is on both quantitative and conceptual descriptions of gravitational and electric fields.
- **Assessment Boundary:** Assessment is limited to systems with two objects.

**PSP1-HS-5.** Plan and conduct an investigation to provide evidence that an electric current can produce a magnetic field and that a changing magnetic field can produce an electric current.

- **Assessment Boundary:** Assessment is limited to designing and conducting investigations with provided materials and tools.

**PSP1-HS-6.** Communicate scientific and technical information about why the molecular-level structure is important in the functioning of designed materials.

- **Clarification Statement:** Emphasis is on the attractive and repulsive forces that determine the functioning of the material. Examples could include why electrically conductive materials are often made of metal, flexible but durable materials are made up of long chained molecules, and pharmaceuticals are designed to interact with specific receptors.
- **Assessment Boundary:** Assessment is limited to provided molecular structures of specific designed materials.

### Science and Engineering Practices (SEP)

**Planning and Carrying Out Investigations**

Planning and carrying out investigations to answer questions or test solutions to problems in 9–12 builds on K–8 experiences and progresses to include:

**PS1.A:** Structure and Properties of Matter

- The structure and interactions of matter at the bulk scale are determined by electrical forces within and between atoms. (PSP1-HS-6)

### Disciplinary Core Ideas (DCI)

**Patterns**

Different patterns may be observed at each of the scales at which a system is studied and can provide evidence for causality in explanations of...
investigations that provide evidence for and test conceptual, mathematical, physical and empirical models.

- Plan and conduct an investigation individually and collaboratively to produce data to serve as the basis for evidence, and in the design: decide on types, how much, and accuracy of data needed to produce reliable measurements and consider limitations on the precision of the data (e.g., number of trials, cost, risk, time), and refine the design accordingly. (PSP1-HS-5)

Analyzing and Interpreting Data
Analyzing data in 9–12 builds on K–8 and progresses to introducing more detailed statistical analysis, the comparison of data sets for consistency, and the use of models to generate and analyze data.

- Analyze data using tools, technologies, and/or models (e.g., computational, mathematical) in order to make valid and reliable scientific claims or determine an optimal design solution. (PSP1-HS-1)

Using Mathematics and Computational Thinking
Mathematical and computational thinking at the 9–12 level builds on K–8 and progresses to using algebraic thinking and analysis, a range of linear and nonlinear functions including trigonometric functions, exponentials and logarithms, and computational tools for statistical analysis to analyze, represent, and model data. Simple computational simulations are created and used based on mathematical models of basic assumptions.

- Use mathematical representations of phenomena to describe explanations. (PSP1-HS-2, PSP1-HS-4)

Constructing Explanations and Designing Solutions
Constructing explanations and designing solutions in 9–12 builds on K–8 experiences and progresses to explanations and designs that are supported by multiple and independent student-generated sources of evidence consistent with scientific ideas, principles, and theories.

- Apply scientific ideas to solve a design problem, taking into account possible phenomena. (PSP1-HS-4)

PS2.A: Forces and Motion
- Newton’s second law accurately predicts changes in the motion of macroscopic objects. (PSP1-HS-1)
- Momentum is defined for a particular frame of reference; it is the mass times the velocity of the object. (PSP1-HS-2)
- If a system interacts with objects outside itself, the total momentum of the system can change; however, any such change is balanced by changes in the momentum of objects outside the system. (PSP1-HS-2, PSP1-HS-3)

PS2.B: Types of Interactions
- Newton’s law of universal gravitation and Coulomb’s law provide the mathematical models to describe and predict the effects of gravitational and electrostatic forces between distant objects. (PSP1-HS-4)
- Forces at a distance are explained by fields (gravitational, electric, and magnetic) permeating space that can transfer energy through space. Magnets or electric currents cause magnetic fields; electric charges or changing magnetic fields cause electric fields. (PSP1-HS-4, PSP1-HS-5)
- Attraction and repulsion between electric charges at the atomic scale explain the structure, properties, and transformations of matter, as well as the contact forces between material objects. (PSP1-HS-6, PSC1-HS-1, PSC1-HS-3)

PS3.A: Definitions of Energy
- “Electrical energy” may mean energy stored in a battery or energy transmitted by electric currents. (PSP1-HS-5)

ETS1.A: Defining and Delimiting an Engineering Problem
- Criteria and constraints also include satisfying any requirements set by society, such as taking issues of risk mitigation into account, and they should be quantified to the extent possible and stated in such a way that one can tell if a given design meets them. (PSP1-HS-3)

ETS1.C: Optimizing the Design Solution
- Criteria may need to be broken down into simpler ones that can be approached systematically, and decisions about the priority of certain criteria over others (trade-offs) may be needed. PSP1-HS-3)

### Idaho Common Core Connections

**ELA/Literacy**

- **RST.11-12.1** Cite specific textual evidence to support analysis of science and technical texts, attending to important distinctions the author makes and to any gaps or inconsistencies in the account. (PSP2-HS-4)
- **WHS.9-12.7** Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources of evidence, prioritized criteria, and tradeoff considerations. (PSP2-HS-3)

**Mathematics**

- **MP.2** Reason abstractly and quantitatively. (PSP2-HS-1), (PSP2-HS-2), (PSP2-HS-3), (PSP2-HS-4), (PSP2-HS-5)
- **MP.4** Model with mathematics. (PSP2-HS-1), (PSP2-HS-2), (PSP2-HS-3), (PSP2-HS-4), (PSP2-HS-5)
- **HSN.Q.A.1** Use units as a way to understand problems and to guide the solution of multi-step problems; choose and interpret units consistently in formulas; choose and interpret the scale and the origin in graphs and data.

---

### Using Mathematics and Computational Thinking

Mathematical and computational thinking at the 9–12 level builds on K–8 and progresses to using algebraic thinking and analysis, a range of linear and nonlinear functions including trigonometric functions, exponentials and logarithms, and computational tools for statistical analysis to analyze, represent, and model data. Simple computational simulations are created and used based on mathematical models of basic assumptions.

- Create a computational model or simulation of a phenomenon, designed device, process, or system. (PSP2-HS-1)

### Constructing Explanations and Designing Solutions

Constructing explanations and designing solutions in 9–12 builds on K–8 experiences and progresses to explanations and designs that are supported by multiple and independent student-generated sources of evidence consistent with scientific ideas, principles, and theories.

- Design, evaluate, and/or refine a solution to a complex real-world problem, based on scientific knowledge, student-generated sources of evidence, prioritized criteria, and tradeoff considerations. (PSP2-HS-3)

---

### PS3: Conservation of Energy and Energy Transfer

- **Conservation of energy means that the total change of energy in any system is always equal to the total energy transferred into or out of the system.** (PSP2-HS-1)
- **Energy cannot be created or destroyed, but it can be transported from one place to another and transferred between systems.** (PSP2-HS-1, PSP2-HS-4)
- **Mathematical expressions, which quantify how the stored energy in a system depends on its configuration (e.g. relative positions of charged particles, compression of a spring) and how kinetic energy depends on mass and speed, allow the concept of conservation of energy to be used to predict and describe system behavior.** (PSP2-HS-1)
- **The availability of energy limits what can occur in any system.** (PSP2-HS-1)
- **Uncontrolled systems always evolve toward more stable states—that is, toward more uniform energy distribution (e.g., water flows downhill, objects hotter than their surrounding environment cool down).** (PSP2-HS-4)

### PS3: Relationship Between Energy and Forces

- **When two objects interacting through a field change relative position, the energy stored in the field is changed.** (PSP2-HS-5)

### PS3: Energy in Chemical Processes

- **Although energy cannot be destroyed, it can be converted to less useful forms—for example, to thermal energy in the surrounding environment.** (PSP2-HS-3, PSP2-HS-4)

### ETS1: Defining and Delimiting an Engineering Problem

- **Criteria and constraints also include satisfying any requirements set by society, such as taking issues of risk mitigation into account, and they should be quantified to the extent possible and stated in such a way that one can tell if a given design meets them.** (PSP2-HS-3)
## Performance Expectations (PE)

**PSP3-HS-1. Use mathematical representations to support a claim regarding relationships among the frequency, wavelength, and speed of waves traveling in various media.**

- **Clarification Statement:** Examples of data could include electromagnetic radiation traveling in a vacuum and glass, sound waves traveling through air and water, and seismic waves traveling through the Earth.
- **Assessment Boundary:** Assessment is limited to algebraic relationships and describing those relationships qualitatively.

**PSP3-HS-2. Evaluate questions about the advantages of using digital transmission and storage of information.**

- **Clarification Statement:** Examples of advantages could include that digital information is stable because it can be stored reliably in computer memory, transferred easily, and copied and shared rapidly. Disadvantages could include issues of easy deletion, security, and theft.
- **Assessment Boundary:** Assessment does not include using quantum theory.

**PSP3-HS-3. Evaluate the claims, evidence, and reasoning behind the idea that electromagnetic radiation can be described either by a wave model or a particle model, and that for some situations one model is more useful than the other.**

- **Clarification Statement:** Emphasis is on how the experimental evidence supports the claim and how a theory is generally modified in light of new evidence. Examples of a phenomenon could include resonance, interference, diffraction, and photoelectric effect.
- **Assessment Boundary:** Assessment does not include using quantum theory.

**PSP3-HS-4. Evaluate the validity and reliability of claims in published materials of the effects that different frequencies of electromagnetic radiation have when absorbed by matter.**

- **Clarification Statement:** Emphasis is on the idea that photons associated with different frequencies of light have different energies, and the damage to living tissue from electromagnetic radiation depends on the energy of the radiation. Examples of published materials could include trade books, magazines, web resources, videos, and other passages that may reflect bias.
- **Assessment Boundary:** Assessment is limited to qualitative descriptions.

**PSP3-HS-5. Communicate technical information about how some technological devices use the principles of wave behavior and wave interactions with matter to transmit and capture information and energy.**

- **Clarification Statement:** Examples could include solar cells capturing light and converting it to electricity; medical imaging; and communications technology.
- **Assessment Boundary:** Assessments are limited to qualitative information. Assessments do not include band theory.
Empirically testable questions and design problems using models and simulations.

- Evaluate questions that challenge the premise(s) of an argument, the interpretation of a data set, or the suitability of a design. (PSP3-HS-2)

**Using Mathematics and Computational Thinking**

Mathematical and computational thinking at the 9–12 level builds on K–8 and progresses to using algebraic thinking and analysis, a range of linear and nonlinear functions including trigonometric functions, exponentials and logarithms, and computational tools for statistical analysis to analyze, represent, and model data. Simple computational simulations are created and used based on mathematical models of basic assumptions.

- Use mathematical representations of phenomena or design solutions to describe and/or support claims and/or explanations. (PSP3-HS-1)

**Engaging in Argument from Evidence**

Engaging in argument from evidence in 9–12 builds on K–8 experiences and progresses to using appropriate and sufficient evidence and scientific reasoning to defend and critique claims and explanations about natural and designed worlds. Arguments may also come from current scientific or historical episodes in science.

- Evaluate the claims, evidence, and reasoning behind currently accepted explanations or solutions to determine the merits of arguments. (PSP3-HS-3)

**Obtaining, Evaluating, and Communicating Information**

Obtaining, evaluating, and communicating information in 9–12 builds on K–8 and progresses to evaluating the validity and reliability of the claims, methods, and designs.

- Evaluate the validity and reliability of multiple claims that appear in scientific and technical texts or media reports, verifying the data when possible. (PSP3-HS-4)
- Communicate technical information or ideas (e.g. about phenomena and/or the process of development and the design and

- The wavelength and frequency of a wave are related to one another by the speed of travel of the wave, which depends on the type of wave and the medium through which it is passing. (PSP3-HS-1)
- Information can be digitized (e.g., a picture stored as the values of an array of pixels); in this form, it can be stored reliably in computer memory and sent over long distances as a series of wave pulses. (PSP3-HS-2, PSP3-HS-5)
- [From the 3–5 grade band endpoints] Waves can add or cancel one another as they cross, depending on their relative phase (i.e., relative position of peaks and troughs of the waves), but they emerge unaffected by each other. (Boundary: The discussion at this grade level is qualitative only; it can be based on the fact that two different sounds can pass a location in different directions without getting mixed up.) (PSP3-HS-3)

**PS4.B: Electromagnetic Radiation**

- Electromagnetic radiation (e.g., radio, microwaves, light) can be modeled as a wave of changing electric and magnetic fields or as particles called photons. The wave model is useful for explaining many features of electromagnetic radiation, and the particle model explains other features. (PSP3-HS-3)
- When light or longer wavelength electromagnetic radiation is absorbed in matter, it is generally converted into thermal energy (heat). Shorter wavelength electromagnetic radiation (ultraviolet, X-rays, gamma rays) can ionize atoms and cause damage to living cells. (PSP3-HS-4)
- Photoolectric materials emit electrons when they absorb light of a high-enough frequency. (PSP3-HS-5)

**PS4.C: Information Technologies and Instrumentation**

- Multiple technologies based on the understanding of waves and their interactions with matter are part of everyday experiences in the modern world (e.g., medical imaging, communications, scanners) and in scientific research. They are essential tools for producing, transmitting, and capturing signals and for storing and interpreting the information contained in them. (PSP3-HS-5)

Caustic and effect relationships can be suggested and predicted for complex natural and human designed systems by examining what is known about smaller scale mechanisms within the system. (PSP3-HS-4)

Systems can be designed to cause a desired effect. (PSP3-HS-5)

**Systems and System Models**

Models (e.g., physical, mathematical, computer models) can be used to simulate systems and interactions—including energy, matter, and information flows—within and between systems at different scales. (PSP3-HS-3)

**Stability and Change**

Systems can be designed for greater or lesser stability. (PSP3-HS-2)

**Connections to Engineering, Technology, and Applications of Science**

**Interdependence of Science, Engineering, and Technology**

Science and engineering complement each other in the cycle known as research and development (R&D). (PSP3-HS-5)

**Influence of Engineering, Technology, and Science on Society and the Natural World**

Modern civilization depends on major technological systems. (PSP3-HS-2, PSP3-HS-5)

Engineers continuously modify these technological systems by applying scientific knowledge and engineering design practices to increase benefits while decreasing costs and risks. (PSP3-HS-2)
performance of a proposed process or system) in multiple formats (including orally, graphically, textually, and mathematically). (PSP3-HS-5)

**Connections to Nature of Science**

**Science Models, Laws, Mechanisms, and Theories Explain Natural Phenomena**

A scientific theory is a substantiated explanation of some aspect of the natural world, based on a body of facts that have been repeatedly confirmed through observation and experiment and the science community validates each theory before it is accepted. If new evidence is discovered that the theory does not accommodate, the theory is generally modified in light of this new evidence. (PSP3-HS-3)

### ESS: Earth and Space Sciences

#### ESS1-HS Earth’s Place in the Universe

<table>
<thead>
<tr>
<th>Performance Expectations (PE)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Students who demonstrate understanding can:</td>
</tr>
</tbody>
</table>

#### ESS1-HS-1. Develop a model based on evidence to illustrate the life span of the sun and the role of nuclear fusion in the sun’s core to release energy that eventually reaches Earth in the form of radiation.
- Clarification Statement: Emphasis is on the energy transfer mechanisms that allow energy from nuclear fusion in the sun's core to reach Earth. Examples of evidence for the model include observations of the masses and lifetimes of other stars, as well as the observation that the sun's radiation varies due to solar activity (such as solar flares), the 11-year sunspot cycle, and non-cyclic variations over centuries.
- Assessment Boundary: Assessment does not include details of the atomic and sub-atomic processes involved with the sun's nuclear fusion.

#### ESS1-HS-2. Construct an explanation of the Big Bang theory based on astronomical evidence of light spectra, motion of distant galaxies, and composition of matter in the universe.
- Clarification Statement: Emphasis is on the astronomical evidence of the redshift of light from galaxies as an indication that the universe is currently expanding, the cosmic microwave background as the remnant radiation from the Big Bang, and the observed composition of ordinary matter in the universe, primarily found in stars and interstellar gases (from the spectra of electromagnetic radiation from stars), which matches that predicted by the Big Bang theory (3/4 hydrogen and 1/4 helium).

#### ESS1-HS-3. Communicate scientific ideas about the way stars, over their life cycle, produce elements.
- Clarification Statement: Emphasis is on stellar nucleosynthesis, and therefore the different elements created, varies as a function of the mass of a star and the stage of its lifetime.

#### ESS1-HS-4. Use mathematical or computational representations to predict the motion of orbiting objects in the solar system.
- Clarification Statement: Emphasis is on Newtonian gravitational laws governing orbital motions, which apply to human-made satellites as well as planets and moons.
- Assessment Boundary: Mathematical representations for the gravitational attraction of bodies and Kepler's laws of orbital motions should not deal with more than two bodies, nor involve calculus.

#### ESS1-HS-5. Evaluate evidence of the past and current movements of continental and oceanic crust and the theory of plate tectonics to explain the ages of crustal rocks.
- Clarification Statement: Emphasis is on the ability of plate tectonics to explain the ages of crustal rocks. Examples include evidence of the ages of oceanic crust increasing with distance from mid-ocean ridges (a result of plate tectonics) and the ages of North American continental crust increasing with distance away from a central ancient core (a result of past plate interactions).

#### ESS1-HS-6. Apply scientific reasoning and evidence from ancient Earth materials, meteorites, and other planetary surfaces to construct an account of Earth's formation and early history.
- Clarification Statement: Emphasis is on using available evidence within the solar system to reconstruct the early history of Earth, which formed along with the rest of the solar system 4.6 billion years ago. Examples of evidence include the absolute ages of ancient materials (obtained by radiometric dating of meteorites, moon rocks, and Earth's oldest minerals), the sizes and compositions of solar system objects, and the impact cratering record of planetary surfaces.

### Science and Engineering Practices (SEP)

- **Developing and Using Models**
  - Modeling in 9–12 builds on K–8 experiences and progresses to using, synthesizing, and developing models to predict and show relationships among variables between systems and their components in the natural and designed worlds.
  - Develop a model based on evidence to illustrate the relationships between

### Disciplinary Core Ideas (DCI)

- **ESS1.A: The Universe and Its Stars**
  - The star called the sun is changing and will burn out over a lifespan of approximately 10 billion years. (ESS1-HS-1)
  - The study of stars’ light spectra and brightness is used to identify compositional elements of stars, their movements, and their distances from Earth. (ESS1-HS-2, ESS1-HS-3)
  - The Big Bang theory is supported by observations of distant galaxies receding from our own, of the measured

### Crosscutting Concepts (CCC)

- **Patterns**
  - Empirical evidence is needed to identify patterns. (ESS1-HS-5)
- **Scale, Proportion, and Quantity**
  - The significance of a phenomenon is dependent on the scale, proportion, and quantity at which it occurs. (ESS1-HS-1)
  - Algebraic thinking is used to examine scientific data and predict the effect of a
### Using Mathematical and Computational Thinking

Mathematical and computational thinking in 9–12 builds on K–8 experiences and progresses to using algebraic thinking and analysis, a range of linear and nonlinear functions including trigonometric functions, exponentials and logarithms, and computational tools for statistical analysis to analyze, represent, and model data. Simple computational simulations are created and used based on mathematical models of basic assumptions.

- Use mathematical or computational representations of phenomena to describe explanations. (ESS1-HS-4)

### Constructing Explanations and Designing Solutions

Constructing explanations and designing solutions in 9–12 builds on K–8 experiences and progresses to explanations and designs that are supported by multiple and independent student-generated sources of evidence consistent with scientific ideas, principles, and theories.

- Construct an explanation based on valid and reliable evidence obtained from a variety of sources (including students’ own investigations, theories, simulations, peer review) and the assumption that theories and laws that describe the natural world operate today as they did in the past and will continue to do so in the future. (ESS1-HS-2)
- Apply scientific reasoning to link evidence to the claims to assess the extent to which the reasoning and data support the explanation or conclusion. (ESS1-HS-6)

### Engaging in Argument from Evidence

Engaging in argument from evidence in 9–12 builds on K–8 experiences and progresses to using appropriate and sufficient evidence and scientific reasoning to defend and critique claims and explanations about the natural and designed world(s). Arguments may also come from current scientific or historical episodes in science.

- Evaluate evidence behind currently accepted explanations or solutions to determine the merits of arguments.

### ESS1 .B: Earth and the Solar System

- Kepler's laws describe common features of the motions of orbiting objects, including their elliptical paths around the sun. Orbits may change due to the gravitational effects from, or collisions with, other objects in the solar system. (ESS1-HS-4)

### ESS1 .C: The History of Planet Earth

- Continental rocks, which can be older than 4 billion years, are generally much older than the rocks of the ocean floor, which are less than 200 million years old. (ESS1-HS-5)
- Although active geologic processes, such as plate tectonics and erosion, have destroyed or altered most of the very early rock record on Earth, other objects in the solar system, such as lunar rocks, asteroids, and meteorites, have changed little over billions of years. Studying these objects can provide information about Earth's formation and early history. (ESS1-HS-6)

### ESS2 .B: Plate Tectonics and Large-Scale System Interactions

- Plate tectonics is the unifying theory that explains the past and current movements of the rocks at Earth's surface and provides a framework for understanding its geologic history. (ESS1-HS-5)

### PS1 .C: Nuclear Processes

- Spontaneous radioactive decay follows a characteristic exponential decay law. Nuclear lifetimes allow radiometric dating to be used to determine the ages of rocks and other materials. (ESS1-HS-5, ESS1-HS-6)

### PS3 .D: Energy in Chemical Processes and Everyday Life

- Nuclear Fusion processes in the center of the sun release the energy that ultimately reaches Earth as radiation. (ESS1-HS-1)

### PS4 .B: Electromagnetic Radiation

- Atoms of each element emit and absorb characteristic frequencies of light. These characteristics allow identification of the presence of an element, even in microscopic quantities. (ESS1-HS-2)
Obtaining, Evaluating, and Communicating Information

Obtaining, evaluating, and communicating information in 9–12 builds on K–8 experiences and progresses to evaluating the validity and reliability of the claims, methods, and designs.

- Communicate scientific ideas (e.g. about phenomena and/or the process of development and the design and performance of a proposed process or system) in multiple formats (including orally, graphically, textually, and mathematically). (ESS1-HS-3)

Science Models, Laws, Mechanisms, and Theories Explain Natural Phenomena

A scientific theory is a substantiated explanation of some aspect of the natural world, based on a body of facts that have been repeatedly confirmed through observation and experiment and the science community validates each theory before it is accepted. If new evidence is discovered that the theory does not accommodate, the theory is generally modified in light of this new evidence. (ESS1-HS-2, ESS1-HS-6) Models, mechanisms, and explanations collectively serve as tools in the development of a scientific theory. (ESS1-HS-6)

Idaho Common Core Connections

ELA/Literacy

**RST.1-12.1** Cite specific textual evidence to support analysis of science and technical texts, attending to important distinctions the author makes and to any gaps or inconsistencies in the account. (ESS1-HS-1),(ESS1-HS-2),(ESS1-HS-5),(ESS1-HS-6)

**RST.1-12.8** Evaluate the hypotheses, data, analysis, and conclusions in a science or technical text, verifying the data when possible and corroborating or challenging conclusions with other sources of information. (ESS1-HS-5),(ESS1-HS-6)

**WHST.9-12.1** Write arguments focused on discipline-specific content. (ESS1-HS-6)

**WHST.9-12.2** Write informative/explanatory texts, including the narration of historical events, scientific procedures/experiments, or technical processes. (ESS1-HS-2),(ESS1-HS-3),(ESS1-HS-5)

SL.1-12.4 Present claims and findings, emphasizing salient points in a focused, coherent manner with relevant evidence, sound valid reasoning, and well-chosen details; use appropriate eye contact, adequate volume, and clear pronunciation. (ESS1-HS-3)

Mathematics

**MP.2** Reason abstractly and quantitatively. (HSS1-HS-1),(HSS1-HS-2),(HSS1-HS-3),(HSS1-HS-4),(HSS1-HS-5),(HSS1-HS-6)

**MP.4** Model with mathematics. (ESS1-HS-1),(ESS1-HS-4)

**HSN-Q.A.1** Use units as a way to understand problems and to guide the solution of multi-step problems; choose and interpret units consistently in formulas; choose and interpret the scale and the origin in graphs and data displays. (ESS1-HS-1),(ESS1-HS-2),(ESS1-HS-4),(ESS1-HS-5),(ESS1-HS-6)

**HSN-Q.A.2** Define appropriate quantities for the purpose of descriptive modeling. (ESS1-HS-1),(ESS1-HS-2),(ESS1-HS-4),(ESS1-HS-5),(ESS1-HS-6)

**HSN-Q.A.3** Choose a level of accuracy appropriate to limitations on measurement when reporting quantities. (ESS1-HS-1),(ESS1-HS-2),(ESS1-HS-4),(ESS1-HS-5),(ESS1-HS-6)

**HSA - SSE.A.1** Interpret expressions that represent a quantity in terms of its context. (ESS1-HS-1),(ESS1-HS-2),(ESS1-HS-4)

**HSA - CED.A.2** Create equations in two or more variables to represent relationships between quantities; graph equations on coordinate axes with labels and scales. (ESS1-HS-1),(ESS1-HS-2),(ESS1-HS-4)

**HSA - CED.A.4** Rearrange formulas to highlight a quantity of interest, using the same reasoning as in solving equations. (ESS1-HS-1),(ESS1-HS-2),(ESS1-HS-4)

**HSF-IF.B.5** Relate the domain of a function to its graph and, where applicable, to the quantitative
**ESS2-HS Earth’s Systems**

<table>
<thead>
<tr>
<th><strong>Performance Expectations (PE)</strong></th>
</tr>
</thead>
</table>

**ESS2-HS-1.** Develop a model to illustrate how Earth’s internal and surface processes operate at different spatial and temporal scales to form continental and ocean-floor features.
- **Clarification Statement:** Emphasis is on how the appearance of land features (such as mountains, valleys, and plateaus) and sea-floor features (such as trenches, ridges, and seamounts) are a result of both constructive forces (such as volcanism, tectonic uplift, and orogeny) and destructive mechanisms (such as weathering, mass wasting, and coastal erosion).
- **Assessment Boundary:** Assessment does not include memorization of the details of the formation of specific geographic features of Earth’s surface.

**ESS2-HS-2.** Analyze geoscience data to make the claim that one change to Earth’s surface can create feedbacks that cause changes to other Earth systems.
- **Clarification Statement:** Emphasis is on how the appearance of land features (such as mountains, valleys, and plateaus) and sea-floor features (such as trenches, ridges, and seamounts) are a result of both constructive forces (such as volcanism, tectonic uplift, and orogeny) and destructive mechanisms (such as weathering, mass wasting, and coastal erosion).
- **Assessment Boundary:** Assessment does not include memorization of the details of the formation of specific geographic features of Earth’s surface.

**ESS2-HS-3.** Develop a model based on evidence of Earth’s interior to describe the cycling of matter by thermal convection.
- **Clarification Statement:** Emphasis is on both a one-dimensional model of Earth, with radial layers determined by density, and a three-dimensional model, which is controlled by mantle convection and the resulting plate tectonics. Examples of evidence include maps of Earth’s three-dimensional structure obtained from seismic waves, records of the rate of change of Earth’s magnetic field (as constraints on convection in the outer core), and identification of the composition of Earth’s layers from high-pressure laboratory experiments.

**ESS2-HS-4.** Use a model to describe how variations in the flow of energy into and out of Earth’s systems result in changes in climate.
- **Clarification Statement:** Emphasis is on mechanical and chemical investigations with water and a variety of solid materials to provide the evidence for connections between the hydrologic cycle and system interactions commonly known as the rock cycle. Examples of mechanical investigations include stream transportation and deposition using a stream table, erosion variations in soil moisture content, or frost wedging by the expansion of water as it freezes. Examples of chemical investigations include chemical weathering and recrystallization (by testing the solubility of different materials) or melt generation (by examining water lowers the melting temperature of most solids).

**ESS2-HS-5.** Plan and conduct an investigation of the properties of water and its effects on Earth materials and surface processes.
- **Clarification Statement:** Emphasis is on mechanical and chemical investigations with water and a variety of solid materials to provide the evidence for connections between the hydrologic cycle and system interactions commonly known as the rock cycle. Examples of mechanical investigations include stream transportation and deposition using a stream table, erosion variations in soil moisture content, or frost wedging by the expansion of water as it freezes. Examples of chemical investigations include chemical weathering and recrystallization (by testing the solubility of different materials) or melt generation (by examining water lowers the melting temperature of most solids).

**ESS2-HS-6.** Develop a quantitative model to describe the cycling of carbon among the hydrosphere, atmosphere, geosphere, and biosphere.
- **Clarification Statement:** Emphasis is on modeling biogeochemical cycles that include the cycling of carbon through the ocean, atmosphere, soil, and biosphere (including humans), providing the foundation for living organisms.

**ESS2-HS-7.** Construct an argument based on evidence about the simultaneous coevolution of Earth’s systems and life on Earth.
- **Clarification Statement:** Emphasis is on the dynamic causes, effects, and feedbacks between the biosphere and Earth’s other systems, whereby geoscientific factors control the evolution of life, which in turn continuously alters Earth’s surface. Examples of include how photosynthetic life altered the atmosphere through the production of oxygen, which in turn increased weathering rates and allowed for the evolution of animal life; how microbial life on land increased the formation of soil, which in turn allowed for the evolution of land plants; or how the evolution of corals created reefs that altered patterns of erosion and deposition along coastlines and provided habitats for the evolution of new life forms.
- **Assessment Boundary:** Assessment does not include a comprehensive understanding of the mechanisms of how the biosphere interacts with all of Earth’s other systems.
### Practices (SEP)

#### Developing and Using Models
Modeling in 9–12 builds on K–8 experiences and progresses to using, synthesizing, and developing models to predict and show relationships among variables between systems and their components in the natural and designed world(s).
- Develop a model based on evidence to illustrate the relationships between systems or between components of a system. (ESS2-HS-1, ESS2-HS-3, ESS2-HS-6)
- Use a model to provide mechanistic accounts of phenomena. (ESS2-HS-4)

#### Planning and Carrying Out Investigations
Planning and carrying out investigations in 9–12 builds on K–8 experiences and progresses to include investigations that provide evidence for and test conceptual, mathematical, physical, and empirical models.
- Plan and conduct an investigation individually and collaboratively to produce data to serve as the basis for evidence, and in the design: decide on types, how much, and accuracy of data needed to produce reliable measurements and consider limitations on the precision of the data (e.g., number of trials, cost, risk, time), and refine the design accordingly. (ESS2-HS-5)

#### Analyzing and Interpreting Data
Analyzing data in 9–12 builds on K–8 experiences and progresses to introducing more detailed statistical analysis, the comparison of data sets for consistency, and the use of models to generate and analyze data.
- Analyze data using tools, technologies, and/or models (e.g., computational, mathematical) in order to make valid and reliable scientific claims or determine an optimal design solution. (ESS2-HS-2)

#### Engaging in Argument from Evidence
Engaging in argument from evidence in 9–12 builds on K–8 experiences and progresses to using appropriate and sufficient evidence and scientific reasoning to defend and critique claims and explanations about the natural and designed world(s). Arguments may also come from current

### Cause and Effect
Empirical evidence is required to differentiate between cause and correlation and make claims about specific causes and effects. (ESS2-HS-4)

### Energy and Matter
The total amount of energy and matter in closed systems is conserved. (ESS2-HS-6) Energy drives the cycling of matter within and between systems. (ESS2-HS-3)

### Structure and Function
The functions and properties of natural and designed objects and systems can be inferred from their overall structure, the way their components are shaped and used, and the molecular substructures of its various materials. (ESS2-HS-5)

### Stability and Change
Much of science deals with constructing explanations of how things change and how they remain stable. (ESS2-HS-7)
Change and rates of change can be quantified and modeled over very short or very long periods of time. Some system changes are irreversible. (ESS2-HS-1) Feedback (negative or positive) can stabilize or destabilize a system. (ESS2-HS-2)

### Connections to Engineering, Technology, and Applications of Science

### Interdependence of Science, Engineering, and Technology
Science and engineering complement each other in the cycle known as research and development (R&D). Many R&D projects may involve scientists, engineers, and others with wide ranges of expertise. (ESS2-HS-3)

### Influence of Engineering, Technology, and Science on Society and the Natural World
New technologies can have deep impacts on society and the environment, including some that were not anticipated. Analysis of costs and benefits is a critical aspect of decisions about technology. (ESS2-HS-2)
scientific or historical episodes in science.

- Construct an oral and written argument or counter-arguments based on data and evidence. (ESS2-HS-7)

**Connections to Nature of Science**

**Scientific Knowledge is Based on Empirical Evidence**

Science knowledge is based on empirical evidence. (ESS2-HS-3)

Science disciplines share common rules of evidence used to evaluate explanations about natural systems. (ESS2-HS-3)

Science includes the process of coordinating patterns of evidence with current theory. (ESS2-HS-3)

Science arguments are strengthened by multiple lines of evidence supporting a single explanation. (ESS2-HS-4)

- reflection, absorption, storage, and redistribution among the atmosphere, ocean, and land systems, and this energy’s re-radiation into space. (ESS2-HS-2, ESS2-HS-4)
- Gradual atmospheric changes were due to plants and other organisms that captured carbon dioxide and released oxygen. (ESS2-HS-6, ESS2-HS-7)
- Changes in the atmosphere due to human activity have increased carbon dioxide concentrations and thus affect climate. (ESS2-HS-6, ESS2-HS-4)

**ESS2.E: Biogeology**

- The many dynamic and delicate feedbacks between the biosphere and other Earth systems cause a continual co-evolution of Earth’s surface and the life that exists on it. (ESS2-HS-7)

**PS4.A: Wave Properties**

- Geologists use seismic waves and their reflection at interfaces between layers to probe structures deep in the planet. (ESS2-HS-3)

### ESS3-HS Earth and Human Activity

**Performance Expectations (PE)**

**ESS3-HS-1.** Construct an explanation based on evidence for how the availability of natural resources, occurrence of natural hazards, and changes in climate have influenced human activity.

- Examples of key natural resources include access to fresh water (such as rivers, lakes, and groundwater), regions of fertile soils such as river deltas, and high concentrations of minerals and fossil fuels. Examples of natural hazards can be from interior processes (such as volcanic eruptions and earthquakes), surface processes (such as tsunamis, mass wasting and soil erosion), and severe weather (such as hurricanes, floods, and droughts). Examples of the results of changes in climate that can affect populations or drive mass migrations include changes to sea level, regional patterns of temperature and precipitation, and the types of crops and livestock that can be raised.

**ESS3-HS-2.** Evaluate competing design solutions for developing, managing, and utilizing energy and mineral resources based on cost-benefit ratios.
- Clarification Statement: Emphasis is on the conservation, recycling, and reuse of resources (such as minerals and metals) where possible, and on minimizing impacts where it is not. Examples include developing best practices for agricultural soil use, mining (for coal, tar sands, and oil shales), and pumping (for petroleum and natural gas). Science knowledge indicates what can happen in natural systems—not what should happen.

**ESS3-HS-3.** Create a computational simulation to illustrate the relationships among management of natural resources, the sustainability of human populations, and biodiversity.
- Clarification Statement: Examples of factors that affect the management of natural resources include costs of resource extraction and waste management, per-capita consumption, and the development of new technologies. Examples of factors that affect human sustainability include agricultural efficiency, levels of conservation, and urban planning.
- Assessment Boundary: Assessment for computational simulations is limited to using provided multi-parameter programs or constructing simplified spreadsheet calculations.

**ESS3-HS-4.** Evaluate or refine a technological solution that reduces impacts of human activities on natural systems.
- Clarification Statement: Examples of data on the impacts of human activities could include the quantities and types of pollutants released, changes to biomass and species diversity, or areal changes in land surface use (such as for urban development, agriculture and livestock, or surface mining). Examples for limiting future impacts could range from local efforts (such as reducing, reusing, and recycling resources) to large-scale geoengineering design solutions (such as altering global temperatures by making large changes to the atmosphere or ocean).

**ESS3-HS-5.** Analyze geoscience data and the results from global climate models to make an evidence-based forecast of the current rate of global or regional climate change and associated future impacts to Earth systems.
- Clarification Statement: Examples of evidence, for both data and climate model outputs, are for climate changes (such as precipitation and temperature) and their associated impacts (such as on sea level, glacial ice volumes, or atmosphere and ocean composition).
- Assessment Boundary: Assessment is limited to one example of a climate change and its associated impacts.

**ESS3-HS-6.** Use a computational representation to illustrate the relationships among Earth systems and how those relationships are being modified due to human activity.
- Clarification Statement: Examples of Earth systems to be considered are the hydrosphere, atmosphere, cryosphere, geosphere, and/or biosphere. A n example of the far-reaching impacts from a human activity is how an increase in atmospheric carbon dioxide results in an increase in photosynthetic biomass on land and an increase in ocean acidification, with resulting impacts on sea organism health and marine populations.
- Assessment Boundary: Assessment does not include running computational representations but is limited to using the published results of scientific computational models.

### Science and Engineering Practices (SEP)

#### Analyzing and Interpreting Data
- Analyze data using computational models in order to make valid and reliable scientific claims. (ESS3-HS-5)

#### Using Mathematics and Computational Thinking
- Mathematical and computational thinking in 9-12 builds on K–8 experiences and progresses to using algebraic thinking and analysis, a range of linear and nonlinear functions including trigonometric functions, exponentials and logarithms, and computational tools for statistical analysis to analyze, represent, and model data. Simple computational simulations are created and used based on mathematical models of basic assumptions.
- Create a computational model or

### Disciplinary Core Ideas (DCI)

#### ESS2.D: Weather and Climate
- Current models predict that, although future regional climate changes will be complex and varied, average global temperatures will continue to rise. The outcomes predicted by global climate models strongly depend on the amounts of human-generated greenhouse gases added to the atmosphere each year and by the way in which these gases are absorbed by the ocean and biosphere. (ESS3-HS-6)

#### ESS3.A: Natural Resources
- Resource availability has guided the development of human society. (ESS3-HS-1)
- All forms of energy production and other resource extraction have associated economic, social, environmental, and geopolitical costs and risks as well as benefits. New technologies and social regulations can change the balance of these factors. (ESS3-HS-2)

#### ESS3.B: Natural Hazards
- Natural hazards and other geologic events have shaped the course of human history. They have significantly altered the sizes of human populations and have driven human migrations. (ESS3-HS-1)

#### ESS3.C: Human Impacts on Earth Systems
- The sustainability of human societies and the biodiversity that supports them requires responsible management of natural resources. (ESS3-HS-3)
- Scientists and engineers can make major contributions by developing technologies that produce less pollution and

### Crosscutting Concepts (CCC)

#### Cause and Effect
- Empirical evidence is required to differentiate between cause and correlation and make claims about specific causes and effects. (ESS3-HS-1)

#### Systems and System Models
- When investigating or describing a system, the boundaries and initial conditions of the system need to be defined and their inputs and outputs analyzed and described using models. (ESS3-HS-6)

#### Stability and Change
- Change and rates of change can be quantified and modeled over very short or very long periods of time. Some system changes are irreversible. (ESS3-HS-3, ESS3-HS-5)
- Feedback (negative or positive) can stabilize or destabilize a system. (ESS3-HS-4)

#### Connections to Engineering, Technology, and Applications of Science

Constructing Explanations and Designing Solutions

Constructing explanations and designing solutions in 9–12 builds on K–8 experiences and progresses to explanations and designs that are supported by multiple and independent student-generated sources of evidence consistent with scientific knowledge, principles, and theories.

- Construct an explanation based on valid and reliable evidence obtained from a variety of sources (including students’ own investigations, models, theories, simulations, peer review) and the assumption that theories and laws that describe the natural world operate today as they did in the past and will continue to do so in the future. (ESS3-HS-1)
- Design or refine a solution to a complex real-world problem, based on scientific knowledge, student-generated sources of evidence, prioritized criteria, and tradeoff considerations. (ESS3-HS-4)

Engaging in Argument from Evidence

Engaging in argument from evidence in 9–12 builds on K–8 experiences and progresses to using appropriate and sufficient evidence and scientific reasoning to defend and critique claims and explanations about natural and designed world(s). Arguments may also come from current scientific or historical episodes in science.

- Evaluate competing design solutions to a real-world problem based on scientific ideas and principles, empirical evidence, and logical arguments regarding relevant factors (e.g., economic, societal, environmental, ethical considerations). (ESS3-HS-2)

### ESS3.D: Global Climate Change

- Though the magnitudes of human impacts are greater than they have ever been, so too are human abilities to model, predict, and manage current and future impacts. (ESS3-HS-5)
- Through computer simulations and other studies, important discoveries are still being made about how the ocean, the atmosphere, and the biosphere interact and are modified in response to human activities. (ESS3-HS-6)

### ET S1.B: Developing Possible Solutions

- When evaluating solutions, it is important to take into account a range of constraints, including cost, safety, reliability, and aesthetics, and to consider social, cultural, environmental impacts. (ESS3-HS-2, ESS3-HS-4)

### Connections to Nature of Science

**Science is a Human Endeavor**

Science is a result of human endeavors, imagination, and creativity. (ESS3-HS-3)

**Science Addresses Questions About the Natural and Material World**

Science and technology may raise ethical issues for which science, by itself, does not provide answers and solutions. (ESS3-HS-2)

Science knowledge indicates what can happen in natural systems—not what should happen. The latter involves ethics, values, and human decisions about the use of knowledge. (ESS3-HS-2)

Many decisions are not made using science alone, but rely on social and cultural contexts to resolve issues. (ESS3-HS-2)

**World**

Modern civilization depends on major technological systems. (ESS3-HS-1, ESS3-HS-3)

Engineers continuously modify these technological systems by applying scientific knowledge and engineering design practices to increase benefits while decreasing costs and risks. (ESS3-HS-2, ESS3-HS-4)

New technologies can have deep impacts on society and the environment, including some that were not anticipated. (ESS3-HS-3)

Analysis of costs and benefits is a critical aspect of decisions about technology. (ESS3-HS-2)
### Scientific Investigations Use a Variety of Methods

Science investigations use diverse methods and do not always use the same set of procedures to obtain data. (ESS3-HS-5)  
New technologies advance scientific knowledge. (ESS3-HS-5)

### Scientific Knowledge is Based on Empirical Evidence

Science knowledge is based on empirical evidence. (ESS3-HS-5)  
Science arguments are strengthened by multiple lines of evidence supporting a single explanation. (ESS3-HS-5)

SUBJECT
Amendments to Docket 08-0203-1502 and 08-0203-1506

REFERENCE

November 24, 2014  Board approved a pending rule docket 08-0203-1403, adding end of course assessments in Biology and Chemistry as part of the state’s comprehensive assessment system.

December 18, 2014  Board approved the Idaho Academic Achievement Standards, including the Proficiency Line Descriptors and ISAT achievement levels at each performance level for grades 3-8 and 11.

February 19, 2015  Board approved the Idaho Academic Achievement Standards, including the Proficiency Line Descriptors and ISAT achievement levels at each performance level for grades 9 and 10; and approved a temporary rule incorporating by reference into IDAP 08.02.03.004 the ISAT Achievement Standards approved on December 18, 2014.

June 18, 2015  Board approve Proposed Rule amendment to IDAPA 08.02.03.004 incorporating the Idaho Academic Achievement Standards, including Proficiency Line Descriptors and the Idaho Standards Achievement Tests achievement levels for grades 3-11 in mathematics and English language arts.

APPLICABLE STATUTE, RULE, OR POLICY
Section 33-105, Idaho Code and Section 33-1612, Idaho Code
IDAPA 08.02.03 – Rules Governing Thoroughness – Comprehensive Assessment System

BACKGROUND/DISCUSSION
Pursuant to IDAPA 08.02.03.111.06 “Students are required to take an End of Course Assessment in science provided by the state and administered by the district”, cut scores are attached that have been set by a standards review committee and are subject to the State Board of Education approval.

ATTACHMENTS
Attachment 2 – Docket 08-0203-1502 Amendment (Temporary)  Page 3
Attachment 3 – Docket 08-0203-1506 Amendment (Proposed)  Page 5
Attachment 1 – Achievement Level Descriptors (New Section pg. 3-12)  Page 7

STAFF COMMENTS AND RECOMMENDATIONS
The Idaho Standards Achievement Tests as defined in administrative rule is the statewide tests used for measuring a student’s proficiency in the state content...
standards. This assessment has traditionally also include a science assessment in grades 5, 7 and 10. With the transition to the new assessment administration the math and English language arts are covered by the ISAT by Smarter Balanced and the science assessment is administered through the ISAT by DRC for grades 5 and 7 with an end of course assessment administered by the district to students in grades 10, 11 or 12 who have completed a biology and/or chemistry course. As a component of the overall Idaho Standards Achievement Tests the achievement standards for the end of course assessments must be approved by the Board and incorporated into the document approved by the Board when setting the achievement levels for mathematics and English Language arts in grades 3-11 (cut scores).

Because the existing cut scores were incorporated into two separate administrative rules, one a temporary rule, docket number 08-0203-1502 and the other proposed rule docket 08-0203-1506 both dockets must be amended to include the science cut scores.

**BOARD ACTION**

I move to approve the Idaho Standards Achievement Tests Achievement Standards as submitted in Attachment 3.

Moved by __________ Seconded by __________ Carried Yes _____ No _____

AND

I move to approve the amendment to temporary rule Docket 08-0203-1502 as submitted in Attachment 1.

Moved by __________ Seconded by __________ Carried Yes _____ No _____

AND

I move to approve the amendment to proposed rule Docket 08-0203-1506 as submitted in Attachment 2.

Moved by __________ Seconded by __________ Carried Yes _____ No _____

Advanced

Chemistry students performing at this level demonstrate a thorough conceptual understanding of science content and the application of skills and processes related to chemistry concepts.

Students at this level are able to do the following:

- Analyze the periodic table to predict physical and chemical properties.
- Analyze the historical developments that resulted in the modern version of the periodic table.
- Create and evaluate graphs of data.
- Analyze the key concepts of the kinetic molecular theory.
- Analyze and compare the common theories defining acids and bases.
- Compare and contrast physical and chemical properties and changes and appropriate computations.
- Perform and analyze computations using scientific notation, the metric system and dimensional analysis.
- Compute and evaluate measurement uncertainty to include precision, accuracy and the rules for significant digits.
- Perform and analyze calculations related to the conversion of grams to moles to particles, atoms, molecules and volume.
- Analyze and solve reaction stoichiometry problems.
- Calculate and compare concentrations of solutions in various ways including molarity.
- Analyze how the presence of solute particles affects the properties of a solution and be able to do calculations involving colligative properties.
- Calculate and analyze quantitative relationships involved in acid/base chemistry including pH.
- Demonstrate and apply understanding of the scientific method.
- Justify the selection and use of appropriate scientific equipment, materials and techniques.
- Correctly write symbols, formulas and names for elements, ions and compounds.
- Analyze how electrons are involved in the formation of chemical bonds using the octet rule and Lewis dot diagrams.
- Compare the polarity of chemical bonds using electronegativity.
- Predict and analyze physical properties of compounds based upon the attractive forces between atoms and molecules.
- Classify and explain the placement of all matter into appropriate categories.
- Analyze the relationship and reactions of acids, bases, and salts.
• Analyze the role of dissociation and ionization in producing strong, weak, and nonelectrolytes.
• Analyze the kinetic molecular theory and apply it to phases of matter.
• Analyze and calculate the changes in heat energy that occur during chemical reactions and phase changes.
• Apply the conservation of matter by balancing chemical equations.
• Analyze the difference between exothermic and endothermic chemical reactions during chemical or physical changes.
• Analyze the classic historical experiments that were used to identify the components of an atom and its structure.
• Determine the number of protons, neutrons and electrons for an atom, ion, or isotope.
• Analyze the relationship between the structure of atoms and light absorption and emission.
• Determine and compare and analyze electron arrangements of elements using electron configurations and orbital energy diagrams.
• Analyze the law of conservation of mass and the law of definite proportions.
• Analyze chemical equations for common types of chemical reactions and predict the products.
• Analyze the factors that influence the rates of chemical reactions.
• Analyze the role of chemistry in enabling technological advances.
• Analyze the role of chemistry in energy and environmental issues.
Proficient

Chemistry students performing at this level demonstrate a general conceptual understanding of science content and the application of skills and processes related to chemistry concepts.

Students at this level are able to do the following:

- Use the periodic table to predict physical and chemical properties.
- Describe the historical development of the periodic table.
- Create and interpret graphs of data.
- Explain and interpret the key concepts of the kinetic molecular theory.
- Distinguish the common theories defining acids and bases.
- Identify, compare and contrast physical and chemical properties and changes and appropriate computations.
- Perform computations using scientific notation, the metric system and dimensional analysis.
- Compute measurement uncertainty to include precision, accuracy and the rules for significant digits.
- Perform calculations related to the conversion of grams to moles to particles, atoms, molecules and volume.
- Analyze and solve reaction stoichiometry problems.
- Express concentrations of solutions in various ways including molarity.
- Interpret how the presence of solute particles can affect the properties of a solution and be able to do calculations involving colligative properties.
- Analyze quantitative relationships involved in acid/base chemistry including pH.
- Demonstrate an understanding of the scientific method.
- Select and use appropriate scientific equipment, materials and techniques.
- Correctly write symbols, formulas and names for common elements, ions and compounds.
- Explain and understand how electrons are involved in the formation of chemical bonds using the octet rule and Lewis dot diagrams.
- Predict the polarity of chemical bonds using electronegativity.
- Predict physical properties of compounds based upon the attractive forces between atoms and molecules.
- Distinguish and classify all matter into appropriate categories.
- Explain the relationship and reactions of acids, bases, and salts.
• Explain the role of dissociation and ionization in producing strong, weak, and nonelectrolytes.
• Describe the Kinetic Molecular Theory as it applies to phases of matter.
• Explain and calculate the changes in heat energy that occur during chemical reactions and phase changes.
• Demonstrate the conservation of matter by balancing chemical equations.
• Differentiate between exothermic and endothermic chemical reactions during chemical or physical changes.
• Interpret the classic historical experiments that were used to identify the components of an atom and its structure.
• Deduce the number of protons, neutrons and electrons for an atom or ion.
• Describe the relationship between the structure of atoms and light absorption and emission.
• Determine and illustrate electron arrangements of elements using electron configurations and orbital energy diagrams.
• Illustrate the law of conservation of mass and the law of definite proportions.
• Classify, write and balance chemical equations for common types of chemical reactions and predict the products.
• Describe the factors that influence the rates of chemical reactions.
• Assess the role of chemistry in enabling technological advances.
• Evaluate the role of chemistry in energy and environmental issues.
Basic

Chemistry students performing at this level demonstrate a partial conceptual understanding of science content and the application of skills and processes related to chemistry concepts.

Chemistry students at this level are able to do the following:

- Recognize that the periodic table can be used to predict physical and chemical properties.
- Identify the historical development of the periodic table.
- Recognize graphs of data.
- Identify the key concepts of the kinetic molecular theory.
- Recognize the common theories defining acids and bases.
- Identify physical and chemical properties and changes and appropriate computations.
- Perform basic computations using scientific notation, the metric system and dimensional analysis.
- Recognize aspects of measurement uncertainty including precision, accuracy and the rules for significant digits.
- Perform some simple calculations related to the conversion of grams to moles to particles, atoms, molecules and volume.
- Solve simple stoichiometry problems.
- Recognize concentrations of solutions in various ways including molarity.
- Identify how the presence of solute particles affects the properties of a solution and be able to do calculations involving colligative properties.
- Recognize quantitative relationships involved in acid/base chemistry including pH.
- Identify the scientific method.
- Identify scientific equipment, materials and techniques.
- Recognize symbols, formulas and names for common elements, ions and compounds.
- Identify how electrons are involved in the formation of chemical bonds using the octet rule and Lewis dot diagrams.
- Recognize the polarity of chemical bonds using electronegativity.
- Identify physical properties of compounds based upon the attractive forces between atoms and molecules.
- Classify some types of matter into appropriate categories.
• Identify the relationship and reactions of acids, bases, and salts.
• Identify the role of dissociation and ionization in producing strong, weak, and nonelectrolytes.
• Identify the Kinetic Molecular Theory.
• Recognize the changes in heat energy that occur during chemical reactions and phase changes.
• Recognize the conservation of matter by examining balanced chemical equations.
• Recognize the difference between exothermic and endothermic chemical reactions during chemical or physical changes.
• Recognize the classic historical experiments that were used to identify the components of an atom and its structure.
• Recognize the number of protons, neutrons and electrons for an atom or ion.
• Recognize the relationship between the structure of atoms and light absorption and emission.
• Identify electron arrangements of elements using electron configurations and orbital energy diagrams.
• Identify the law of conservation of mass and the law of definite proportions.
• Recognize chemical equations for common types of chemical reactions and identify the products.
• Identify the factors that influence the rates of chemical reactions.
• Identify the role of chemistry in enabling technological advances.
• Identify the role of chemistry in energy and environmental issues.
Advanced

Biology students performing at this level demonstrate a thorough conceptual understanding of science content and the application of skills and processes related to biological concepts.

Students at this performance level are able to do the following:

- Analyze and apply the scientific meaning of system, order, and organization to a given system.
- Use observations and data as evidence on which to base complex scientific explanations.
- Evaluate and analyze changes that can occur in and among systems.
- Calculate and make conversions using the metric system.
- Analyze questions and concepts that guide scientific investigations.
- Apply technology and mathematics to investigations.
- Analyze and compare alternative explanations and models.
- Analyze the differences among observations, hypotheses, and theories.
- Evaluate technical writing, graphs, charts, and diagrams.
- Apply the theory of evolution to explain how species change over time.
- Evaluate how evolution is the consequence of interactions among the potential of a species to increase its numbers, genetic variability, a finite supply of resources, and the selection by the environment of those offspring better able to survive and reproduce.
- Evaluate how matter tends toward more disorganized states (entropy).
- Analyze how organisms use the continuous input of energy and matter to maintain their chemical and physical organization.
- Explain how the energy for life is primarily derived from the Sun through photosynthesis.
- Analyze cellular respiration and the synthesis of macromolecules and compare the different processes.
- Compare how matter cycles and energy flows through the different levels of organization of living systems (cells, organs, organisms, communities) and their environment.
- Compare the particular structures that underlie the cellular functions.
- Analyze chemical reactions that occur in cells.
- Analyze how cells use DNA to store and use information for cell functions.
- Analyze how selective expression of genes can produce specialized cells from a single cell.
- Analyze complex environmental issues such as water and air quality, hazardous waste, forest health, and agricultural production.
- Predict how science advances technology and how technology advances science.
- Analyze how science and technology are pursued for different purposes.
- Compare the difference between renewable and nonrenewable resources.
Proficient

Biology students performing at this level demonstrate a general conceptual understanding of science content and the application of skills and processes related to biological concepts.

Students at this performance level are able to do the following:

- Explain the scientific meaning of system, order, and organization.
- Apply the concepts of order and organization to a given system.
- Use observations and data as evidence on which to base scientific explanations.
- Measure changes that can occur in and among systems.
- Analyze changes that can occur in and among systems.
- Measure and calculate using the metric system.
- Identify questions and concepts that guide scientific investigations.
- Use appropriate technology and mathematics to make investigations.
- Analyze alternative explanations and models.
- Explain the differences among observations, hypotheses, and theories.
- Analyze technical writing, graphs, charts, and diagrams.
- Use the theory of evolution to explain how species change over time.
- Explain how evolution is the consequence of interactions among the potential of a species to increase its numbers, genetic variability, a finite supply of resources, and the selection by the environment of those offspring better able to survive and reproduce.
- Explain how matter tends toward more disorganized states (entropy).
- Explain how organisms use the continuous input of energy and matter to maintain their chemical and physical organization.
- Show how the energy for life is primarily derived from the Sun through photosynthesis.
- Describe cellular respiration and the synthesis of macromolecules.
- Show how matter cycles and energy flows through the different levels of organization of living systems (cells, organs, organisms, communities) and their environment.
- Identify the particular structures that underlie the cellular functions.
- Explain cell functions involving chemical reactions.
- Explain how cells use DNA to store and use information for cell functions.
- Explain how selective expression of genes can produce specialized cells from a single cell.
- Analyze simple environmental issues such as water and air quality, hazardous waste, forest health, and agricultural production.
- Explain how science advances technology and how technology advances science.
- Explain how science and technology are pursued for different purposes.
- Describe the difference between renewable and nonrenewable resources.
Basic

Biology students performing at this level demonstrate a partial conceptual understanding of science content and the application of skills and processes related to biological concepts.

Students at this performance level are able to do the following:

- Identify the scientific meaning of system, order, and organization.
- Recognize the concepts of order and organization and how they are related to a given system.
- Identify observations and data as evidence on which to base scientific explanations.
- Identify changes that can occur in and among systems.
- Measure using the metric system.
- Identify questions that guide scientific investigations.
- Identify appropriate technology and mathematics to make investigations.
- Identify alternative explanations and models.
- Recognize the differences among observations, hypotheses, and theories.
- Uses technical writing, graphs, charts, and diagrams.
- Identify the theory of evolution.
- Recognize how evolution is the consequence of interactions among the potential of a species to increase its numbers, genetic variability, a finite supply of resources, and the selection by the environment of those offspring better able to survive and reproduce.
- Recognize that matter tends toward more disorganized states (entropy).
- Recognize that organisms use the continuous input of energy and matter to maintain their chemical and physical organization.
- Recognize that the energy for life is primarily derived from the sun through photosynthesis.
- Recognize the process of cellular respiration.
- Recognize that matter cycles and energy flows through the different levels of organization of living systems (cells, organs, organisms, communities) and their environment.
- Identify main cellular structures.
- Identify cell functions involving chemical reactions.
- Recognize that cells use DNA to store and use information for cell functions.
- Recognize that the selective expression of genes can produce specialized cells from a single cell.
- Identify environmental issues such as water and air quality, hazardous waste, forest health, and agricultural production.
- Recognize that science advances technology and that technology advances science.
- Recognize that science and technology are pursued for different purposes.
- Identify the difference between renewable and nonrenewable resources.

</table>
### Grade 3 English Language Arts/Literacy

#### Write simple complete opinion pieces, demonstrating some ability to state opinions about topics or sources, attend to purpose and audience, organize ideas by stating a context and focus, include structures and transitional strategies for coherence, develop few supporting reasons, and provide a conclusion.

- With some support (e.g., directive and general feedback), use language and vocabulary that is appropriate to the purpose and audience when revising or composing texts.
- Apply or edit grade-appropriate grammar, usage, and mechanics to clarify a message and edit narrative, informational, and opinion texts.
- Use tools of technology to produce texts with minimal support (e.g., whole broken into parts).

#### SPEAKING/LISTENING

**Target 4**

- Interpret or use information delivered orally or audio-visually with some support (e.g., repeated listening or viewing).

#### The student who just enters Level 3 should be able to:

• Write full opinion pieces, demonstrating ability to state opinions about topics or sources, attend to purpose and audience, organize ideas by stating a context and focus, include structures and transitional strategies for coherence, develop supporting reasons, and provide a conclusion.
• Without support, use grade-level vocabulary appropriate to the purpose and audience when revising and composing text.
• Apply or edit grade-appropriate grammar, usage, and mechanics to clarify a message and edit narrative, informational, and opinion texts.
• Without support, use tools of technology to produce texts.

SPEAKING/ LISTENING
Target 4
• Interpret and use information delivered orally or audio-visually without support.

The student who just enters Level 4 should be able to:

READING
Literary Text
Targets 1–7
• Use explicit details and information from the text to support answers and basic inferences in highly complex texts.
• Identify and summarize central ideas, key events, or the sequence of events presented in highly complex texts.
• Determine intended meaning of words through context, relationships, structure, or resources in highly complex texts.
• Use evidence to interpret and explain inferences and distinguish point of view from that of the narrator/character in highly complex texts.
• Specify, compare, and contrast relationships across highly complex texts.
• Demonstrate knowledge of text structures and text features to interpret or explain/connect information in highly complex texts.
• Begin to interpret use of language by distinguishing literal from non-literal meanings of words or phrases used in context in highly complex texts.

READING
Informational Text
Targets 8–14
• Use explicit details and information from the text to support answers and basic inferences in highly complex texts.
• Identify and summarize central ideas, key events, or the sequence of events presented in highly complex texts.
• Determine intended meaning of words through context, relationships, structure, or resources in highly complex texts.
• Use evidence to interpret and explain inferences and distinguish point of view from that of the narrator/character in highly complex texts.
• Specify, compare, and contrast relationships across highly complex texts.
• Demonstrate knowledge of text structures and text features to interpret or explain/connect information in highly complex texts.
information in highly complex texts.

- Begin to interpret use of language by distinguishing literal from non-literal meanings of words or phrases used in context in highly complex texts.
- Evaluate or interpret the impact/intent of literary devices or connotative meaning of words and phrases used in context and the impact of those word choices on reader interpretation of texts of high complexity.

### Threshold Achievement Level Descriptors

#### Grade 4 English Language Arts/Literacy

- Use supporting evidence to justify or interpret how information is presented or integrated in texts of moderate complexity.
- Interpret, explain, or connect information presented within or across texts of moderate complexity.
- Relate knowledge of text structures or text features to obtain, interpret, explain, or integrate information in texts of moderate complexity.
- Determine or interpret figurative language/literary devices or connotative meanings of words and phrases used in context and explain the impact of those word choices on meaning and tone in texts of moderate complexity.

#### WRITING Targets 1–10

- Write or revise one paragraph, demonstrating narrative techniques, chronology, appropriate transitional strategies for coherence, and begin to use author’s craft with appropriate purpose.
- Write full compositions, demonstrating specific narrative techniques, appropriate transitional strategies for coherence, and begin to use author’s craft with limited purpose.
- Write one full informational/explanatory paragraph, demonstrating ability to organize ideas by stating a focus, including transitional strategies for coherence or supporting evidence and elaboration, and begin to write body paragraphs appropriate to a purpose and audience.
- Write informational/explanatory texts on a topic, attending to purpose and audience; organize ideas by stating a focus; include structures and transitional strategies for coherence; include supporting evidence and elaboration; and begin to develop a complete conclusion.
- Use some text features in informational text to enhance meaning without support.
- Write or revise one paragraph, demonstrating ability to state opinions about topics or sources, set loose context, minimally organize ideas, develop evidence/reasons and elaboration, and develop a conclusion with limited purpose and audience.
- Write opinion pieces, demonstrating ability to state opinions about topics or sources, attending to purpose and audience; organize ideas by stating a context and focus; include structures and transitions for coherence; include some supporting evidence/reasons and elaboration; and develop an appropriate conclusion.
- Strategically use language and vocabulary appropriate to purpose and audience when revising or composing texts without support.
- Apply or edit grade-appropriate grammar, usage, and mechanics to clarify a message and edit narrative, informational, and opinion texts without support.
- Use tools of technology to gather information, make revisions, or produce texts.

#### SPEAKING/LISTENING Target 4

- Interpret and use information delivered orally or audio-visually without support.

#### RESEARCH/INQUIRY Targets 1–4

- Conduct short, limited research projects to answer multi-step questions, or to investigate and paraphrase different aspects of a broader topic or concept.
- Locate information to support central ideas and subtopics and select information and partially integrate information from data or print and non-print sources.
- Distinguish relevant-irrelevant information without support.
- Generate partial conjectures or opinions and include partial evidence to support them based on evidence collected.
## Threshold Achievement Level Descriptors

**Grade 4 English Language Arts/Literacy**

The student who just enters Level 4 should be able to:

### READING

**Literary Text Targets 1–7**

- Use explicit details and implicit information from the text to support answers and inferences in highly complex texts.
- Begin to consistently identify and summarize central ideas/key events in highly complex texts.
- Begin to determine the intended meanings of words, including words with multiple meanings, based on context, word relationships, word structure, and use of resources in highly complex texts.
- Begin to use extensive supporting evidence to justify/explain own inferences in depth in highly complex texts.
- Begin to use extensive detail to interpret, specify, or compare how information is presented across highly complex texts.
- Relate knowledge of text structures, genre-specific features, or formats to obtain, interpret, explain, or connect information within highly complex texts.
- Begin to determine and interpret figurative language, literary devices, or connotative meanings of words and phrases used in context and explain the impact of those word choices on meaning and tone in highly complex texts.

### READING

**Informational Text Targets 8–14**

- Begin to identify and explain explicit details and implicit information from highly complex texts to support answers and inferences about information presented and provided.
- Identify and summarize central ideas, key details, and procedures in highly complex texts.
- Begin to determine the intended meanings of words, academic words, domain-specific words, and words with multiple meanings, based on context, word relationships, word structure, or use of resources, with primary focus on the academic vocabulary common to highly complex texts.
- Begin to use detailed supporting evidence to justify or interpret how information is presented and integrated in highly complex texts.
- Begin to interpret, explain, or connect information presented within or across highly complex texts.
- Begin to relate knowledge of text structures or text features to obtain, interpret, explain, and integrate information in highly complex texts.
- Begin to determine or interpret figurative language/literary devices or connotative meanings of words and phrases used in context and the impact of those word choices on meaning and tone in highly complex texts.

### WRITING

**Targets 1–10**

- Begin to write or revise one or more complex paragraphs, demonstrating specific narrative techniques, chronology, appropriate transitional strategies for coherence, or author’s craft appropriate to purpose.
- Begin to write full complex compositions, demonstrating, specific narrative techniques, appropriate transitional strategies for coherence, and author’s craft appropriate to purpose.
- Begin to write or revise more than one complex informational/explanatory paragraph, demonstrating ability to including appropriate transitional strategies for coherence or supporting evidence and elaboration, and writing body paragraphs with a conclusion appropriate to purpose and audience.
- Begin to write full, complex informational/explanatory texts on a topic, attending to purpose and audience; organize ideas by stating a focus; include structures and appropriate transitional strategies for coherence; and include strong supporting details and a well-developed, appropriate conclusion.
- Begin to use text features in information texts to enhance meaning.

</table>
The student who just enters Level 2 should be able to:

**READING**

**Literary Text**

**Targets 1–7**

- Cite some textual evidence to support conclusions drawn from texts of low-to-moderate complexity.
- Use some explicit and limited implicit information to support emerging inferences or analyses.
- Partially summarize central ideas and some key events.
- Determine the intended meaning of some grade-appropriate words, including academic and domain-specific words within context.
- Use some supporting evidence to justify interpretations of information presented or indicate how information is integrated in one or more texts.
- Identify and begin to compare how information is presented within or across texts of low-to-moderate complexity.
- Use basic knowledge of text structures or genre-specific features to begin to integrate or analyze information.
- Interpret the meaning of some common figurative language.

**Informational Text**

**Targets 8–14**

- Cite some textual evidence to support conclusions drawn from texts of low-to-moderate complexity.
- Use some explicit and limited implicit information to support emerging inferences or analyses.
- Partially summarize central ideas and some key events.
- Determine the intended meaning of some grade-appropriate words, including academic and domain-specific words within context.
- Use some supporting evidence to justify interpretations of information presented or indicate how information is integrated in texts of low-to-moderate complexity.
- Identify and begin to compare how information is presented within or across texts of low-to-moderate complexity.
- Use basic knowledge of text structures or genre-specific features to begin to integrate or analyze information.
- Interpret the meaning of some common figurative language.

**WRITING**

**Targets 1–10**

- Write or revise one paragraph, demonstrating some narrative techniques, chronology, appropriate transitional strategies for coherence, or author’s craft.
- Plan, write, revise, and edit a full composition, occasionally demonstrating narrative techniques, chronology, transitional strategies for coherence, or author’s craft.
- Write or revise one informational/explanatory paragraph, demonstrating some ability to organize ideas by stating a focus, including some transitional strategies for coherence or some supporting evidence and elaboration, or writing body paragraphs or a conclusion.
- Plan, write, revise, and edit full informational/explanatory text on a topic, attending to purpose and audience, organizing ideas by stating a focus, including structures and transitional strategies for coherence, including supporting evidence and elaboration, and developing a conclusion.
- Use some appropriate text features (headings, bold text, captions, etc.) in informational texts to enhance meaning.
- Write or revise one paragraph, demonstrating some ability to state opinions about topics or sources, set a loose context, minimally organize ideas using linking words or phrases, develop evidence/reasons and some elaboration, or develop a conclusion.
### Threshold Achievement Level Descriptors

**Grade 5 English Language Arts/Literacy**

**Writing**

- Plan, write, revise, and edit opinion pieces, demonstrating some ability to state opinions about topics or sources, minimally attending to purpose and audience; organize ideas by stating a context and focus; include structures and some transitional strategies for coherence; develop some evidence/reasons and elaboration; and develop a conclusion.
- With minimal support, use some common language and vocabulary (including academic or domain-specific vocabulary) appropriate to the purpose and audience when revising or composing texts.
- Show some ability to apply and edit text, demonstrating a partial understanding of Standard English grammar conventions and usage (e.g., capitalization, punctuation, and spelling).
- Begin to use the tools of technology (including the Internet), with substantial guidance and support, to produce and publish writing.

**Speaking/Listening**

- Interpret and use information delivered orally or audio-visually with support (e.g., some directive feedback).

**Research/Inquiry**

- Begin to conduct simple, short research projects with some guidance.
- With some guidance, begin to locate information to support central ideas and subtopics; select and integrate information from multiple sources.
- With some guidance, begin to gather and distinguish relevant information, summarize/paraphrase information from multiple sources, and provide a list of sources.
- With some guidance, begin to integrate information from several sources on the same topic to generate an informed opinion in order to write about the subject knowledgeably.

### The student who just enters Level 3 should be able to:

**Reading Literary Text**

- With some consistency, identify some relevant textual evidence to support conclusions drawn from texts of moderate complexity.
- Identify and interpret the meaning of some figurative language, some literary devices, and some connotative meanings of words and phrases.
- Accurately summarize central ideas and key events.
- With some consistency, determine the intended or precise meaning of grade-appropriate words, including academic and domain-specific words.
- Apply some relevant reasoning and textual evidence to justify developing analyses or judgments.
- With some consistency, analyze how information is presented within or across texts of moderate complexity, identifying some relationships among targeted aspects.
- With some consistency, analyze some text structures and genre-specific features or formats from multiple texts, and identify the impact of those choices on meaning or presentation.

**Reading Informational Text**

- With some consistency, identify some relevant textual evidence to support conclusions drawn from texts of moderate complexity.
- Identify and interpret the meaning of some figurative language and some literary devices or connotative meanings of words and phrases.
- Accurately summarize central ideas and key events.
- With some consistency, determine the intended or precise meaning of grade-appropriate words, including academic and domain-specific words.
- Apply some relevant reasoning and textual evidence to justify developing analyses or judgments.
- With some consistency, analyze how information is presented within or across texts of moderate complexity, identifying some relationships among targeted aspects.
- With some consistency, analyze some text structures and genre-specific features or formats from multiple texts, and identify the impact of those choices on meaning or presentation.
Threshold Achievement Level Descriptors
Grade 5 English Language Arts/Literacy

| WRITING Targets 1–10 | • Write or revise one or more paragraphs, demonstrating narrative techniques, chronology, appropriate transitional strategies for coherence, or author's craft appropriate to purpose, including a conclusion.
• Plan, write, revise, and edit a full composition, demonstrating narrative techniques, chronology, appropriate transitional strategies for coherence, author's craft appropriate to purpose, including a conclusion, and evidence from texts to support analysis, reflection, and research.
• Write or revise one or more informational/explanatory paragraphs, demonstrating ability to organize ideas by stating a focus, including transitional strategies for coherence, or supporting evidence and elaboration, or writing body paragraphs or a conclusion appropriate to purpose and audience.
• Plan, write, revise, and edit full informational/explanatory text on a topic, attending to purpose and audience; organize ideas by stating a focus, include structures and transitional strategies for coherence, include supporting evidence and elaboration, and develop a conclusion.
• Use appropriate text features (headings, bold text, captions, etc.) in informational texts to enhance meaning.
• Write or revise one or more paragraphs, demonstrating ability to state opinions about topics or sources, set a context, organize ideas using linking words or phrases, develop supporting evidence/reasons and elaboration, or develop a conclusion appropriate to purpose and audience.
• Plan, write, revise and edit full opinion pieces, demonstrating ability to state opinions about topics or sources, attend to purpose and audience, organize ideas by stating a context and focus, include structures and transitional strategies for coherence, develop supporting evidence/reasons, and develop a conclusion appropriate to purpose and audience.
• Use a range of language and vocabulary (including academic or domain-specific vocabulary) appropriate to the purpose and audience when revising or composing texts.
• Adequately apply and edit text, demonstrating a understanding of Standard English grammar conventions and usage (e.g., capitalization, punctuation, and spelling).
• Use the tools of technology (including the Internet) to produce and publish writing. |

| SPEAKING/ LISTENING Target 4 | • Interpret and use information delivered orally or audio-visually. |

| RESEARCH/ INQUIRY Targets 1–4 | • Conduct short research projects.
• Locate information to support central ideas and subtopics; select and integrate information from multiple sources.
• Gather and distinguish relevant information, summarize/paraphrase information from multiple sources, and provide a list of sources.
• Integrate information from several sources on the same topic to generate an informed opinion and write about the subject knowledgeably. |
## Threshold Achievement Level Descriptors

### Grade 5 English Language Arts/Literacy

### The student who just enters Level 4 should be able to:

| READING Literary Text Targets 1–7 | • Consistently cite specific and relevant textual evidence to support conclusions drawn from highly complex texts.  
• Accurately interpret the meaning and impact of most figurative language and literary devices or cognitive meanings of words and phrases.  
• Consistently and accurately summarize central ideas and key events.  
• Determine the intended and precise meaning of most grade-appropriate words, including academic and domain-specific words.  
• Apply appropriate and relevant reasoning and a range of textual evidence to justify analysis or judgments.  
• Analyze and/or compare how information is presented within or across highly complex texts, identifying relationships among targeted aspects.  
• Consistently evaluate text structures and genre-specific features across texts, and identify the impact of those choices on meaning or presentation. |
|---|---|
| READING Informational Text Targets 8–14 | • Consistently cite specific, relevant textual evidence to support conclusions drawn from highly complex texts.  
• Accurately interpret the meaning and impact of most figurative language and literary devices or connotative meanings of words and phrases.  
• Consistently and accurately summarize central ideas and key events.  
• Determine the intended and precise meaning of most grade-appropriate words, including academic and domain-specific words.  
• Apply appropriate and relevant reasoning and a range of textual evidence to justify analysis or judgments.  
• Analyze and/or compare how information is presented within or across highly complex texts, identifying relationships among targeted aspects.  
• Consistently evaluate text structures across highly complex texts. |
| WRITING Targets 1–10 | • Write or revise more than one complex paragraphs, demonstrating specific narrative techniques, chronology, appropriate transitional strategies for coherence, or author’s craft appropriate to purpose, including a strong conclusion.  
• Plan, write, revise, and edit a full, complex composition, clearly demonstrating specific narrative techniques, chronology, appropriate transitional strategies for coherence, and author’s craft appropriate to purpose, including a well-developed conclusion and evidence from texts to support analysis, reflection, and research.  
• Write or revise more than one complex informational/explanatory paragraph, demonstrating ability to organize ideas by stating a focus, including appropriate transitional strategies for coherence, or strong supporting evidence and elaboration, or writing body paragraphs or a conclusion appropriate to purpose and audience.  
• Plan, write, revise, and edit full informational/explanatory text on a topic attending to purpose and audience, organizing ideas by stating a focus, including structures and appropriate transitional strategies for coherence, including strong supporting evidence and elaboration, and developing an appropriate conclusion.  
• Use effective text features (headings, bold text, captions, etc.) in informational texts to enhance meaning. |

• Demonstrate some ability to plan, write, revise, and edit full argument pieces, demonstrating ability to state claims about topics or sources; attend to purpose and |
### Threshold Achievement Level Descriptors

#### Grade 6 English Language Arts/Literacy

**Audience and Organization**

- Audience: organize ideas by stating a context and focus; include structures and appropriate transitional strategies for coherence; identify supporting evidence/reasons and elaboration from credible sources; and develop an appropriate conclusion.
- Style: use a range of precise language and vocabulary (including academic words, domain-specific vocabulary, and figurative language) and style appropriate to the purpose and audience when revising or composing text.
- Editing: demonstrate some ability to edit a piece of writing, showing a strong adequate understanding of Standard English grammar conventions and usage (e.g., capitalization, punctuation, and spelling) when writing.
- Technology: demonstrate some use of technology, including the Internet, to produce and publish writing.

**Speaking/Listening**

- Target 4: Engage and interact with media and source materials and account for elements that contribute to points of view.

**Research/Inquiry**

- Targets 1–4: Use research/inquiry methods to explore a topic.
- Select from and adequately analyze sources from a variety of perspectives and present findings.
- Adequately analyze authoritative sources of evidence with some diversity of formats to support a presentation.
- Search for relevant authoritative information and evaluate the uses and limitations of source material.
- Generate a specific debatable claim or main idea and cite some relevant evidence.

---

**The student who just enters Level 4 should be able to:**

**Reading**

- **Literary Text**
  - Targets 1–7: Cite specific, relevant textual evidence to support conclusions drawn from text.
  - Interpret the intent and impact of most figurative language and literary devices or connotative meanings of words and phrases.
  - Summarize central ideas and key events in texts of high complexity.
  - Determine the intended and precise meaning of most grade-appropriate words including academic and domain-specific words.
  - Apply appropriate and relevant reasoning and a range of textual evidence to justify analyses or judgments made about intended effects.
  - Analyze or compare how information is presented within or across texts, identifying relationships among targeted aspects.
  - Evaluate text structures or genre-specific features or formats from multiple sources of text and identify the impact of those choices on meaning or presentation.

- **Informational Text**
  - Targets 8–14: Cite specific, relevant textual evidence to support conclusions drawn from text.
  - Interpret the intent and impact of most figurative language and literary devices or cognitive meanings of words and phrases.
  - Summarize central ideas and key events in texts of high complexity.
  - Determine the intended and precise meaning of most grade-appropriate words including academic and domain-specific words.
  - Apply appropriate and relevant reasoning and a range of textual evidence to justify analysis or judgments made about intended effects.
  - Analyze or compare how information is presented within or across texts, identifying relationships among targeted aspects.
| WRITING Targets 1–10 | • Demonstrate effective use of multiple, specific narrative techniques, chronology, and appropriate transitional strategies for coherence.
• Demonstrate effective use of precise words and phrases and use relevant descriptive details and sensory language to convey experiences or author’s craft appropriate to purpose, including a conclusion that reflects on the narrated experience.
• Demonstrate use of multiple, specific narrative techniques, chronology, and appropriate transitional strategies for coherence when writing longer narrative texts.
• Demonstrate effective use of precise language and formal style to organize ideas by stating a focus when writing or revising more than one informational or explanatory paragraph.
• Employ advanced text features and visual components appropriate to purpose.
• Effectively use an extensive range of language and vocabulary (including academic words, domain-specific vocabulary, and figurative language) and style appropriate to the purpose and audience when revising or composing text.
• Effectively apply or edit a piece of writing, demonstrating a strong understanding of Standard English grammar conventions and usage (e.g., capitalization, punctuation, and spelling) when writing.
• Effectively use technology, including the Internet, to produce and publish writing. |
| SPEAKING/LISTENING Target 4 | • Effectively engage and interact with media and source materials and account for elements that contribute to points of view. |
| RESEARCH/INQUIRY Targets 1–4 | • Employ multimodal resources to advance a sustained exploration of a topic.
• Synthesize multiple sources of relevant, authoritative information and discriminate among them to support an analysis.
• Search for relevant information from diverse authoritative sources.
• Systematically evaluate the uses and limitations of sources.
• Generate an authoritative claim.
• Evaluate and cite substantial, relevant evidence. |
The student who just enters Level 2 should be able to:

| READING Literary Text Targets 1–7 | - Use textual evidence to justify analysis regarding theme, story elements, dialogue, and point of view in texts of low-to-moderate complexity.  
- Partially summarize central ideas and key events using some details from texts of low-to-moderate complexity.  
- Partially analyze relationships among literary elements within or across texts of low-to-moderate complexity or differing versions of texts representing various genres and text types.  
- Partially analyze the structure within or between two or more texts and genre-specific features or formats of texts and the impact of those choices on meaning or presentation.  
- Partially determine or interpret the impact/intent of literary devices or connotative meaning of contextually used words and phrases and the impact of those word choices on reader interpretation of texts of low-to-moderate complexity. |
|---|---|
| READING Informational Text Targets 8–14 | - Identify textual evidence from sources across disciplines to support conclusions, inferences, connections, and steps to processes.  
- Partially summarize central ideas, topics/subtopics, key events, or procedures using some supporting ideas and details.  
- Partially determine connotative and denotative meanings of academic- and domain-specific words/phrases and words with multiple meanings, based on context-word relationships, word structure, and differentiating vocabulary meanings, in texts of low-to-moderate complexity.  
- Partially apply reasoning and some textual evidence to justify inferences or interpret author's presentation of information; partially delineate and evaluate the argument assessing whether the reasoning is sound.  
- Partially analyze a case in which two or more texts provide conflicting information on the same topic and identify where the texts disagree on matters of fact or interpretation regarding the authors' points of view.  
- Partially relate knowledge of text structures and genre-specific features or formats of texts to compare/analyze the impact of those choices on meaning or presentation.  
- Partially determine or interpret the impact/intent of literary devices or connotative meaning of words and phrases used in context and the impact of those word choices on reader interpretation of texts of low-to-moderate complexity. |
| WRITING Targets 1–10 | - Apply some narrative strategies, textual structures, and transitional strategies for coherence.  
- Use minimal relevant details when writing or revising brief narrative texts.  
- Use minimal support and elaboration when writing brief informational/explanatory texts.  
- Demonstrate some ability to use appropriate text features.  
- Produce argumentative texts and attempt to acknowledge a counterclaim.  
- Demonstrate some awareness of audience and purpose when writing.  
- Pay limited attention to word choice and/or syntax.  
- Plan, write, revise, and edit argument pieces demonstrating partial ability to state claims about topics or sources.  
- With some support, use basic language appropriate to the purpose and audience when revising or composing text.  
- Write or edit texts, demonstrating a partial understanding of Standard English grammar conventions and usage (e.g., capitalization, punctuation, and spelling).  
- Demonstrate limited use of technology, including the Internet, to produce and publish writing. |

• Analyze a case in which two or more texts provide conflicting information on the same topic and identify where the texts disagree on matters of fact or interpretation regarding the authors' points of view.  
• Relate knowledge of text structures and genre-specific features or formats of texts to compare/analyze the impact of those choices on meaning or presentation.  
• Determine or interpret the impact/intent of literary devices or connotative meaning of words and phrases used in context and the impact of those word choices on reader interpretation of texts of moderate complexity. |
| **Informational Text** | • Identify several pieces of relevant textual evidence from sources across disciplines to support conclusions, inferences, connections, and steps to processes.  
• Summarize central ideas, topics/subtopics, key events, or procedures using relevant supporting ideas and details.  
• Determine connotative and denotative meanings of academic- and domain-specific words/phrases and words with multiple meanings, based on context-word relationships, word structure, and differentiating vocabulary meanings, in texts of moderate complexity.  
• Apply reasoning and a range of textual evidence to justify inferences or interpret author's presentation of information.  
• Analyze a case in which two or more texts provide conflicting information on the same topic and identify where the texts disagree on matters of fact or interpretation regarding the authors' points of view.  
• Relate knowledge of text structures and genre-specific features or formats of texts to compare/analyze the impact of those choices on meaning or presentation.  
• Determine or interpret the impact/intent of literary devices or connotative meaning of words and phrases used in context and the impact of those word choices on reader interpretation of texts of moderate complexity. |
| **Targets 8–14**       | ---- |
| WRITING Targets 1–10 | - Apply some narrative strategies when writing or revising one or more paragraphs.  
- Write longer narrative texts demonstrating use of specific narrative techniques, chronology, and appropriate transitional strategies for coherence.  
- Employ effective text features and visual components appropriate to purpose.  
- Demonstrate some ability to plan, write, revise, and edit full argument pieces demonstrating ability to state claims about topics or sources; attend to purpose and audience; organize ideas by stating a context and focus; include structures and appropriate transitional strategies for coherence; identify supporting evidence/reasons and elaboration from credible sources; develop an appropriate conclusion.  
- Use a range of precise language and vocabulary (including academic words, domain-specific vocabulary, and figurative language) and style appropriate to the purpose and audience when revising or composing text.  
- Demonstrate some ability to edit a piece of writing, showing an understanding of Standard English grammar conventions and usage (e.g., capitalization, punctuation, and spelling) when writing.  
- Demonstrate some use of technology, including the Internet, to produce and publish writing. |
| SPEAKING/ LISTENING Target 4 | - Engage and interact with media and source materials and account for elements that contribute to points of view. |
| RESEARCH/ INQUIRY Targets 1–4 | - Use research/inquiry methods to explore a topic.  
- Select from and adequately analyze sources from a variety of perspectives and present findings.  
- Adequately analyze authoritative sources of evidence with some diversity of formats to support a presentation.  
- Search for relevant authoritative information and evaluate the uses and limitations of source material.  
- Generate a specific debatable claim or main idea and cite some relevant evidence. |

The student who just enters Level 4 should be able to:

| READING Literary Text Targets 1–7 | - Evaluate precise meaning of words and distinguish connotative and figurative meanings of academic- and domain-specific words/phrases.  
- Evaluate meaning of words with multiple meanings based on context-word relationships and word structures; thoroughly differentiate vocabulary meanings in texts of high complexity.  
- Summarize central ideas and key events using the most significant details from longer portions of texts of high complexity.  
- Cite strong and varied textual evidence to justify analysis regarding theme, story elements, dialogue, and point of view (e.g., suspense, humor, dramatic irony) in texts of high complexity.  
- Analyze relationships by comparing and contrasting them among literary elements within or across texts of high complexity.  
- Evaluate the structures of two or more texts and genre-specific features or formats of texts and the impact of those choices on meaning or presentation.  
- Evaluate and interpret the impact and intent of literary devices or connotative meaning of contextually used words and phrases and the impact of those word choices on reader interpretation of texts of high complexity. |
## Threshold Achievement Level Descriptors
### Grade 7 English Language Arts/Literacy

| READING Informational Text Targets 8–14 | • Identify several pieces of strong and varied textual evidence from sources across disciplines to support conclusions, inferences, connections, and steps to processes.  
| | • Summarize central ideas, topics/subtopics, key events, or procedures using strong supporting ideas and details with texts of high complexity.  
| | • Determine connotative and denotative meanings of academic- and domain-specific words/phrases and words with multiple meanings, based on context-word relationships, word structure, and differentiating vocabulary meanings, in texts of texts of high complexity.  
| | • Effectively apply reasoning and a range of textual evidence to justify inferences or interpret author’s presentation of information.  
| | • Delineate and evaluate the argument assessing whether the reasoning is sound.  
| | • Effectively analyze a case in which two or more texts provide conflicting information on the same topic and identify where the texts disagree on matters of fact or interpretation regarding the authors’ points of view.  
| | • Relate knowledge of text structures and genre-specific features or formats of texts of high complexity to compare/analyze the impact of those choices on meaning or presentation.  
| | • Evaluate or interpret the impact/intent of literary devices or connotative meaning of words and phrases used in context and the impact of those word choices on reader interpretation of texts of high complexity. |

| WRITING Targets 1–10 | • Demonstrate effective use of multiple, specific narrative techniques, chronology, and appropriate transitional strategies for coherence.  
| | • Demonstrate effective use of precise words and phrases and use relevant descriptive details and sensory language to convey experiences or authors’ craft appropriate to purpose, including a conclusion that reflects on the narrated experience.  
| | • Demonstrate use of multiple, specific narrative techniques, chronology, and appropriate transitional strategies for coherence when writing longer narrative texts.  
| | • Demonstrate effective use of precise language and formal style to organize ideas by stating a focus when writing or revising more than one informational or explanatory paragraph.  
| | • Employ advanced text features and visual components appropriate to purpose.  
| | • Effectively use an extensive range of language and vocabulary (including academic words, domain-specific vocabulary, and figurative language) and style appropriate to the purpose and audience when revising or composing text.  
| | • Effectively write or edit texts, demonstrating a strong understanding of Standard English grammar conventions and usage (e.g., capitalization, punctuation, and spelling).  
| | • Effectively use technology, including the Internet, to produce and publish writing. |

| SPEAKING/LISTENING Target 4 | • Effectively engage and interact with media and source materials and account for elements that contribute to points of view. |

| RESEARCH/INQUIRY Targets 1–4 | • Employ multimodal resources to advance a sustained exploration of a topic.  
| | • Synthesize multiple sources of relevant, authoritative information and discriminate among them to support an analysis.  
| | • Search for relevant information from diverse authoritative sources.  
| | • Systematically evaluate sources’ uses and limitations.  
| | • Generate an authoritative claim.  
| | • Evaluate and cite substantial, relevant evidence. |
The student who just enters Level 2 should be able to:

### Informational Text Targets 8–14

- Summarize central ideas, topics/subtopics, key events, or procedures using strong supporting ideas and details.
- Determine connotative and denotative meanings of academic- and domain-specific words/phrases and words with multiple meanings, based on context-word relationships, word structures, and differentiating vocabulary meanings in texts of high complexity.
- Apply reasoning and a range of textual evidence to justify inferences or interpret author's presentation of information.
- Delineate and evaluate the argument assessing whether the reasoning is sound.
- Effectively analyze a case in which two or more texts provide conflicting information on the same topic and identify where the texts disagree on matters of fact or interpretation regarding the authors’ points of view.
- Relate knowledge of text structures and genre-specific features or formats of texts of high complexity to compare/analyze the impact of those choices on meaning or presentation.
- Evaluate or interpret the impact/intent of literary devices or connotative meaning of words and phrases used in context and the impact of those word choices on reader interpretation of texts of high complexity.

### WRITING Targets 1–10

- Demonstrate effective use of multiple, specific narrative strategies, structures, and appropriate transitional strategies for coherence.
- Demonstrate effective use of precise words and phrases and use relevant descriptive details and sensory language to convey experiences or authors' craft appropriate to purpose, including a conclusion that reflects on the narrated experience.
- Demonstrate use of multiple, specific narrative strategies, structures, and appropriate transitional strategies for coherence when writing longer narrative texts.
- Demonstrate effective use of precise language and formal style to organize ideas by stating a focus when writing or revising more than one informational or explanatory paragraph.
- Employ advanced text features and visual components appropriate to purpose.
- Effectively use an extensive range of language and vocabulary (including academic words, domain-specific vocabulary, and figurative language) and style appropriate to the purpose and audience when revising or composing text.
- Effectively write or edit texts, demonstrating a strong understanding of Standard English grammar conventions and usage (e.g., capitalization, punctuation, and spelling).
- Effectively use technology, including the Internet, to produce and publish writing.

### SPEAKING/LISTENING Target 4

- Thoroughly engage and interact with media and source materials and account for elements that contribute to points of view.

### RESEARCH/INQUIRY Targets 1–4

- Employ multimodal resources to advance a sustained exploration of a topic.
- Synthesize multiple sources of relevant, authoritative information and discriminate among them to support an analysis.
- Search for relevant information from diverse authoritative sources.
- Systematically evaluate uses and limitations of sources.
- Generate an authoritative claim.
- Evaluate and cite substantial, relevant evidence.
The student who just enters Level 2 should be able to:

### READING

**Literary Text**

**Targets 1–7**

- Identify key textual evidence to attempt to support simple inferences or conclusions.
- Provide a simple summary of key events and/or details of a text.
- Use sentence- and paragraph-level context and resources to determine meanings of most grade-level words.
- Apply partial reasoning and use key textual evidence to begin to justify inferences or judgments made about text.
- Analyze some interrelationships of literary elements in texts of low to moderate complexity.
- Describe basic text structures and genre-specific features or formats and show a limited understanding of their impact.
- Identify elements that contribute to points of view and how they impact meaning.
- Identify and determine meaning and impact of figurative language.

**Informational Text**

**Targets 8–14**

- Identify key textual evidence to attempt to support simple inferences, analysis, interpretations, or conclusions.
- Provide a simple summary of key events and/or details of a text.
- Use sentence- and paragraph-level context and resources to determine meanings of words.
- Apply partial reasoning and use key textual evidence to begin to justify inferences or judgments made about text.
- Analyze the connection of ideas within and between texts of low-to-moderate complexity.
- Describe basic text structures and genre-specific features or formats and show a limited understanding of their impact.
- Demonstrate emerging knowledge of obvious genre interpretations and ideas.
- Have limited engagements and interaction with source materials in common.
- Partially account for elements that contribute to points of view.
- Identify and begin to determine meaning and impact of figurative language.

### WRITING

**Targets: 1 and 3–10**

- Apply some narrative strategies, textual structures, and transitional strategies for coherence.
- Use minimal relevant details when writing or revising brief narrative texts.
- Use minimal support and elaboration when writing brief informational/explanatory texts.
- Demonstrate some ability to use appropriate text features.
- Produce argumentative texts and attempt to acknowledge a counterclaim.
- Demonstrate some awareness of audience and purpose when writing.
- Pay limited attention to word choice and/or syntax.
- Demonstrate some understanding of the conventions of grade-appropriate Standard English grammar usage and mechanics to clarify a message.
- Apply some revisions to narrative, informational, and argument texts.
- Use basic technology, with support, for gathering information, making revisions, or producing texts.

### SPEAKING/LISTENING

**Target 4**

- Have limited engagement and interaction with media and source materials and minimally account for elements that contribute to points of view.

### RESEARCH/INQUIRY

**Targets**

- Demonstrate minimal research and evaluation skills.
- Draw broad conclusions from source materials.

### Threshold Achievement Level Descriptors

#### Grade 11 English Language Arts/Literacy

- **Write full informational/explanatory texts appropriate for purpose and audience by organizing ideas, using appropriate language to maintain a suitable focus/tone, and gathering, assessing, and integrating some relevant supporting evidence from both print and digital sources.**
- **Use text features (e.g., formatting, graphics, multimedia) with some attention to audience and purpose.**
- **Apply strategies when writing or revising brief argumentative texts to develop a claim by organizing and citing some supporting evidence and counterclaims, providing transitional strategies for coherence, and using language to maintain a suitable focus/tone.**
- **Write full argumentative texts to develop a specific claim by integrating some relevant supporting evidence from both print and digital sources, to develop claims and counterclaims that are appropriate for audience and purpose, to provide a concluding statement, and to use language to maintain a suitable focus/tone.**
- **Demonstrate attempts to use varied syntax, vocabulary (including some academic and domain-specific vocabulary and figurative language), and style appropriate to the purpose and audience when revising and composing texts.**
- **Apply and edit most conventions of grade-appropriate, Standard English grammar usage and mechanics.**
- **Follow directions when using tools of technology to gather information, make revisions, or produce texts.**

<table>
<thead>
<tr>
<th>SPEAKING/ LISTENING</th>
<th>Target 4</th>

</tbody>
</table>

**Reading Informational Text Targets 8–14**
- Analyze the interrelationships among literary elements in texts of high complexity to show how connections are made in development of complex ideas or events.
- Analyze the effectiveness and impact of text structures and/or text features of texts of high complexity.
- Analyze figurative and connotative meanings of words and phrases in texts of high complexity.

**Writing Targets 1 and 3–10**
- Apply effective writing strategies and processes when writing and revising texts for all purposes.
- Use precise language.
- Use relevant and persuasive evidence.
- Assess and synthesize supporting evidence.
- Select technological tools based on appropriateness.
- Apply grade-appropriate editing and revising skills.

**Speaking/Listening Target 4**
- Synthesize diverse source materials from diverse perspectives delivered orally or through audiovisual materials.
- Systematically evaluate the ways that uses of evidence, implicit premises, and rhetorical stylistic choices enhance or undermine points of view.

**Research/Inquiry Targets 1–4**
- Employ multimodal resources to advance a persuasive and sustained exploration of a topic.
- Synthesize multiple sources of relevant, authoritative information and discriminate among them to support an analysis.
- Search for relevant information from diverse authoritative sources.
- Systematically evaluate the uses and limitations of sources.
- Generate authoritative claim.
- Evaluate and cite substantial, relevant evidence.

<td></td>
</tr>
</tbody>
</table>

- Use multiplication and division within 100 to solve one-step problems involving measurement quantities of two- or three-digit whole numbers.
- Apply strategies in multiplication.
- Use relevant ideas or procedures to multiply.
- Explain arithmetic patterns.

- Use multiple strategies to fluently add within 1,000.

- Represent a fraction approximately on a number line with no partitioning.

- Solve one-step addition problems involving all time intervals from hours to minutes.
- Find the area of a rectilinear figure in a word problem.

- N/A

- N/A

- Analyze and interpret the context of an unfamiliar situation for problems of increasing complexity.
- Begin to solve problems optimally.
- Construct multiple plausible solutions and approaches.

- Begin to construct chains of logic about abstract concepts autonomously.
The student who just enters Level 2 should be able to:

<table>
<thead>
<tr>
<th>CONCEPTS AND PROCEDURES</th>
<th>• Add and subtract to solve one-step problems involving an unknown number.</th>
</tr>
</thead>
</table>
| Target A: Operations and Algebraic Thinking | • Determine whether a given whole number in the range of 1–100 is a multiple of a given one-digit number.  
• Generate a shape pattern that follows a given rule. |
| CONCEPTS AND PROCEDURES | • Look for and use repeated reasoning to generalize place value understanding in order to read and write multi-digit whole numbers less than or equal to 100,000 using base-ten numerals and number names.  
• Use place value understanding to add and subtract two- and three-digit whole numbers using a standard algorithm. |
| Targets B and C: Operations and Algebraic Thinking | • Recognize equivalent fractions using visual models.  
• Use visual fraction models to represent a problem.  
• Express a fraction with denominator 10 as an equivalent fraction with denominator 100. |
| CONCEPTS AND PROCEDURES | • Apply the perimeter formula to rectangles in mathematical problems.  
• Use data from a given line plot using fractions 1/2, 1/4, and 1/8 to solve one-step problems.  
• Recognize whole-number degrees on a protractor. |
| Targets D and E: Number and Operations – Base Ten | • Identify points, lines, line segments, and rays. |
| CONCEPTS AND PROCEDURES | • Select tools to solve a familiar and moderately scaffolded problem and apply them with partial accuracy.  
• Use the necessary elements given in a problem situation to solve a problem.  
• Apply mathematics to propose solutions by identifying important quantities and by locating missing information from relevant external resources. |
<p>| Targets F, G, and H: Number and Operations – Fractions | • Find and identify the flaw in an argument. |</p>

## The student who just enters Level 3 should be able to:

<table>
<thead>
<tr>
<th>CONCEPTS AND PROCEDURES</th>
<th>Grade 5 Mathematics</th>
</tr>
</thead>
</table>
| **Targets A and B:** Operations and Algebraic Thinking | - Write and interpret expressions with two different operations.  
- Compare two related numerical patterns within sequences and tables. |
| **Targets C and D:** Number and Operations – Base Ten | - Use whole number exponents to denote powers of 10; round decimals to the thousandths; and read, write, and compare decimals to the thousandths using base-ten numerals, number names, and expanded form, using >, =, and < to record the results of the comparison.  
- Fluently multiply multi-digit whole numbers and find whole number quotients of whole numbers with up to four-digit dividends and two-digit divisors.  
- Perform the four operations on decimals to the hundredths.  
- Relate a strategy to a written method and explain the reasoning used. |
| **Targets E and F:** Number and Operations – Fractions | - Subtract fractions and mixed numbers with unlike denominators in word problems.  
- Use benchmark fractions and number sense of fractions to estimate and assess the reasonableness of answers.  
- Multiply a mixed number by a mixed number.  
- Use visual models when multiplying two fractions, including when one fraction is larger than 1.  
- Interpret division of a whole number by any unit fraction. |
| **Targets G and H:** Measurement and Data | - Convert from a smaller unit of measurement to a larger one, resulting in one decimal place (metric system) or a small denominator fraction (standard system).  
- Make a line plot to display data sets in fractions of a unit (1/2, 1/4, 1/8).  
- Solve one-step problems using information from line plots that require addition, subtraction, and multiplication of fractions. |
| **Target I:** Measurement and Data | - Use \( V = lwh \) and \( V = Bh \) to find the volume of rectangular prisms. |
| **Targets J and K:** Geometry | - Graph coordinate pairs where one term is a whole number and one is a fraction with a denominator of 2 or 4 on a coordinate plane with whole number axis increments.  
- Classify two-dimensional figures into subcategories by their attributes or properties. |
| **PROBLEM SOLVING & MODELING AND DATA ANALYSIS** | - Use appropriate tools to accurately solve problems arising in everyday life, society, and the workplace.  
- Apply mathematics to solve problems by identifying important quantities and mapping their relationship and by stating and using logical assumptions. |
| **COMMUNICATING REASONING** | - Use stated assumptions, definitions, and previously established results and examples to identify and repair a flawed argument.  
- Use previous information to support his or her own reasoning on a routine problem. |
The student who just enters Level 4 should be able to:

The student who just enters Level 3 should be able to:

<table>
<thead>
<tr>
<th>CONCEPTS AND PROCEDURES</th>
<th>Grade 6 Mathematics</th>
</tr>
</thead>
</table>
| **Target A:** Ratios and Proportional Relationships | • Solve unit rate problems.  
• Solve percent problems by finding the whole, given a part and the percent.  
• Describe a ratio relationship between any two number quantities and understand the concept of unit rate in problems (denominators less than or equal to 12). |
| **Targets B and C:** The Number System | • Apply and extend previous understandings of multiplication and division to divide a mixed number by a fraction and be able to connect to a visual model.  
• Multiply and divide multi-digit decimal numbers.  
• Find the greatest common factor of two numbers less than or equal to 100 and the least common multiple of two numbers less than or equal to 12. |
| **Target D:** The Number System | • Place points with rational coordinates on a coordinate plane and combine absolute value and ordering, with or without models (|−3|<|−5|). |
| **Targets E, F, and G:** Expressions and Equations | • Write and evaluate numerical expressions without exponents and expressions from formulas in real-world problems.  
• Identify equivalent expressions.  
• Write one-variable equations and inequalities of the form \(x + p =/\leq/=/\geq/=/> q \) or \(px =/\leq/=/\geq/=/> q\), where \(p\) and \(q\) are nonnegative rational numbers.  
• Graph solutions to equations and inequalities on the number line.  
• Create the graph, table, and equation for a linear relationship (\(y = kx\) or \(y = x \pm c\)) and make connections between the representations. |
| **Target H:** Geometry | • Find areas of quadrilaterals and other polygons that can be decomposed into three or fewer triangles.  
• Find the volume of right rectangular prisms with fractional or mixed number side lengths. |
| **Targets I and J:** Statistics and Probability | • Identify a reasonable center and spread for a given context and understand how this relates to the overall shape of the data distribution.  
• Understand that a measure of center summarizes all of its values with a single number.  
• Summarize or display data in box plots.  
• Find the interquartile range.  
• Use range and measures of center to describe the shape of the data distribution as it relates to a familiar context.  
• Pose statistical questions. |
| **PROBLEM SOLVING & MODELING AND DATA ANALYSIS** | • Use appropriate tools to accurately solve problems arising in everyday life, society, and the workplace.  
• Apply mathematics to solve problems by identifying important quantities and mapping their relationship and by stating and using logical assumptions. |
| **COMMUNICATING REASONING** | • Use stated assumptions, definitions, and previously established results and examples to identify and repair a flawed argument.  
• Use previous information to support his or her own reasoning on a routine problem. |

| CONCEPTS AND PROCEDURES | • Solve mathematical problems using addition, subtraction, and multiplication on rational numbers.  
• Understand that \((-1)(-1) = 1\).  
• Convert common fractions and fractions with denominators that are a factor of a power of 10 to decimals. |
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Target B: The Number System</td>
<td></td>
</tr>
</tbody>
</table>

| CONCEPTS AND PROCEDURES | • Add, subtract, and factor linear expressions with decimal coefficients.  
• Graph the solution set to a given inequality in the form of \(x > p\) or \(x < p\), where \(p\) is a rational number.  
• Understand that rewriting an expression can shed light on how quantities are related in a familiar problem-solving context with a moderate degree of scaffolding.  
• Use variables to reason with quantities in real-world and mathematical situations with a high degree of scaffolding. |
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Targets C and D: Expressions and Equations</td>
<td></td>
</tr>
</tbody>
</table>

| CONCEPTS AND PROCEDURES | • Create a scale drawing of a given figure when a scale factor is given.  
• Determine the surface area of a right prism.  
• Use vertical angles expressed as variables to solve two-step problems. |
<table>
<thead>
<tr>
<th></th>
<th></th>

</tr>
<tr>
<td><strong>Targets C and D:</strong> Expressions and Equations</td>
<td>• Construct inequalities with two variables to solve problems.</td>
</tr>
<tr>
<td><strong>Targets E and F:</strong> Geometry</td>
<td>• Describe the two-dimensional figures that result from slicing spheres and cones.</td>
</tr>
</tbody>
</table>
| **Targets G, H, and I:** Statistics and Probability | • Generate multiple samples (or simulated samples) of the same size.  
• Determine which measures of variability should be used to draw informal comparative inferences about two populations.  
• Construct a simulation experiment and generate frequencies for compound events. |
| **Problem Solving & Modeling and Data Analysis** | • Analyze and interpret the context of an unfamiliar situation for problems of increasing complexity.  
• Begin to solve problems optimally.  
• Construct multiple plausible solutions and approaches. |
| **Communicating Reasoning** | • Begin to construct chains of logic about abstract concepts autonomously. |
The student who just enters Level 2 should be able to:

**CONCEPTS AND PROCEDURES**

**Target A:** The Number System  
- Identify numbers as rational or irrational.

**CONCEPTS AND PROCEDURES**  
**Targets B, C, and D:** Expressions and Equations  
- Find the cube of one-digit numbers and the cube root of perfect cubes (less than 1,000).  
- Use appropriate tools (e.g., calculator, pencil and paper) to translate large numbers from scientific to standard notation.  
- Identify the y-intercept and calculate the slope of a line from an equation or graph.  
- Graph a system of linear equations and identify the solution as the point of intersection.

**CONCEPTS AND PROCEDURES**  
**Targets E and F:** Functions  
- Identify whether an input/output pair satisfies a function.  
- Compare properties of two linear functions represented in the same way (algebraically, graphically, or in a table).  
- Construct a table to represent a linear relationship between two quantities.  
- Qualitatively describe a graph of a linear function.

**CONCEPTS AND PROCEDURES**  
**Targets G and H:** Geometry  
- Construct reflections across an axis and translations of figures in a coordinate plane.

**CONCEPTS AND PROCEDURES**  
**Target I:** Geometry  
- Identify the appropriate formula for the volume of a cylinder and connect the key dimensions to the appropriate location in the formula.

**CONCEPTS AND PROCEDURES**  
**Target J:** Statistics and Probability  
- Identify what a linear pattern looks like from a given scatter plot.

**PROBLEM SOLVING & MODELING AND DATA ANALYSIS**  
- Select tools to solve a familiar and moderately scaffolded problem and apply them with partial accuracy.  
- Use the necessary elements given in a problem situation to solve a problem.  
- Apply mathematics to propose solutions by identifying important quantities and by locating missing information from relevant external resources.

**COMMUNICATING REASONING**  
- Find and identify the flaw in an argument.
The student who just enters Level 3 should be able to:

|-------------------------|--|---|
| • Begin to construct chains of logic about abstract concepts autonomously. | |
The student who just enters Level 2 should be able to:

<table>
<thead>
<tr>
<th>CONCEPTS AND PROCEDURES</th>
<th>Grade 11 Mathematics</th>
</tr>
</thead>
</table>
| **Targets A and B:** Number and Quantity | • Extend the properties of integer exponents to multiply expressions with rational exponents that have common denominators.  
• Perform operations on rational numbers and familiar irrational numbers.  
• Understand that rational numbers are closed under addition and multiplication. |
| **Target C:** Quantities | • Choose and interpret the correct units in a formula given in a familiar context, including making measurement conversions between simple units. |
| **Targets D, E, F, G, H, I, and J:** Algebra | • Use linear equations in one and two variables and inequalities in one variable to model a familiar situation and to solve a familiar problem.  
• Explain solution steps for solving linear equations and solve a simple radical equation.  
• Use properties of exponents to expand a single variable (coefficient of 1) repeated up to two times with a nonnegative integer exponent into an equivalent form and vice versa, e.g., \(x^2x^3 = xxxxx = x^{2+3}\).  
• Solve one-step linear equations and inequalities in one variable and understand the solution steps as a process of reasoning.  
• Represent linear equations and quadratic equations with integer coefficients in one and two variables graphically on a coordinate plane.  
• Recognize equivalent forms of linear expressions and write a quadratic expression with integer-leading coefficients in an equivalent form by factoring.  
• Add multi-variable polynomials made up of monomials of degree 2 or less.  
• Graph and estimate the solution of systems of linear equations. |
| **Targets K, L, M, and N:** Functions | • Understand the concept of a function in order to distinguish a relation as a function or not a function.  
• Interpret quadratic functions in context, and given the key features of a graph, the student should be able to identify the appropriate graph.  
• Graph quadratic functions by hand or by using technology.  
• Identify properties of two linear or two quadratic functions.  
• Understand equivalent forms of linear and quadratic functions.  
• Build an explicit function to describe or model a relationship between two quantities.  
• Add, subtract, and multiply linear functions. |
| **Target O:** Similarity, Right Triangles, and Trigonometry | • Use the Pythagorean Theorem in unfamiliar problems to solve for the missing side in a right triangle with some scaffolding. |
| **Target P:** Statistics and Probability | • Describe the differences in shape, center, and spread of two or more different data sets representing familiar contexts. |
# Threshold Achievement Level Descriptors

## Grade 11 Mathematics

### PROBLEM SOLVING & MODELING AND DATA ANALYSIS
- Select tools to solve a familiar and moderately scaffolded problem and apply them with partial accuracy.
- Use the necessary elements given in a problem situation to solve a problem.
- Apply mathematics to propose solutions by identifying important quantities and by locating missing information from relevant external resources.

### COMMUNICATING REASONING
- Find and identify the flaw in an argument.

---

### The student who just enters Level 3 should be able to:

#### CONCEPTS AND PROCEDURES

**Targets A and B: Number and Quantity**
- Apply all laws of exponents on expressions with exponents that have common denominators.
- Rewrite expressions with rational exponents of the form \((m/n)\) to radical form and vice versa.
- Use repeated reasoning to recognize that the sums and products of a rational number and a nonzero irrational number are irrational.

**Target C: Quantities**
- Reason quantitatively to choose and interpret the units in a formula given in an unfamiliar context, including making compound measurement conversions.
- Define appropriate quantities or measurements in familiar contexts with some scaffolding to construct a model.
- Choose the scale and origin of a graph or data display.

**Targets D, E, F, G, H, I, and J: Algebra**
- Create and use quadratic inequalities in two variables to model a situation and to solve a problem.
- Write a quadratic expression in one variable with rational coefficients in an equivalent form by factoring, identify its zeroes, and explain the solution steps as a process of reasoning.
- Use properties of exponents to write equivalent forms of exponential functions with one or more variables with integer coefficients with nonnegative integer exponents involving operations of addition, subtraction, and multiplication without requiring distribution of an exponent across parentheses.
- Solve a quadratic equation with integer roots in standard form.
- Represent polynomial and exponential functions graphically and estimate the solution of systems of equations displayed graphically.
- Understand that the plotted line, curve, or region represents the solution set to an equation or inequality.
- Add and subtract multi-variable polynomials of any degree and understand that polynomials are closed under subtraction.

**Targets K, L, M, and N: Functions**
- Identify the domain and range of linear, quadratic, and exponential functions presented in any form.
- Use function notation to evaluate a function for numerical or monomial inputs.
- Appropriately graph and interpret key features of linear, quadratic, and exponential functions in familiar or scaffolded contexts and specify the average rate of change of a function on a given domain from its equation or approximate the average rate of change of a function from its graph.
- Graph linear, quadratic, logarithmic, and exponential functions by hand and by using technology.
## Threshold Achievement Level Descriptors

### Grade 11 Mathematics

#### CONCEPTS AND PROCEDURES

**Target O:**
Similarity, Right Triangles, and Trigonometry

- Use trigonometric ratios and the sine and cosine of complementary angles to find missing angles or sides of a given right triangle with minimal scaffolding.

**Target P:**
Statistics and Probability

- Select the appropriate choice of spread as interquartile range or standard deviation based on the selection of the measure of center.

#### PROBLEM SOLVING & MODELING AND DATA ANALYSIS

- Use appropriate tools to accurately solve problems arising in everyday life, society, and the workplace.
- Apply mathematics to solve problems by identifying important quantities and mapping their relationship and by stating and using logical assumptions.

#### COMMUNICATING REASONING

- Use stated assumptions, definitions, and previously established results and examples to identify and repair a flawed argument.
- Use previous information to support his or her own reasoning on a routine problem.

### The student who just enters Level 4 should be able to:

#### CONCEPTS AND PROCEDURES

**Targets A and B:** Number and Quantity

- Explain the relationship between properties of integer exponents and properties of rational exponents.

**Target C:** Quantities

- Define appropriate quantities or measurements in unfamiliar contexts with some scaffolding to construct a model.

**Targets D, E, F, G, H, I, and J:** Algebra

- Choose an appropriate equivalent form of an expression in order to reveal a property of interest when solving problems.
- Solve a formula for any variable in the formula.
- Provide an example that would lead to an extraneous solution when solving linear, quadratic, radical, and rational equations.
- Use a variety of methods such as factoring, completing the square, quadratic formula, etc., to solve equations and to find minimum and maximum values of quadratic equations.
<table>

Establishing Cut-Scores for Common Grades 9 and 10 English Language Arts/Literacy (ELA/L) and Mathematics Assessments

Introduction

Part of the scope of work in the Multi-Agency Assessment Cooperative (MAAC) is to develop grades 9 and 10 English language arts/literacy (ELA/L) and mathematics tests based on the grade 11 items in the 2014 Smarter Balanced assessment. The grades 9 and 10 tests would

- be common across three states: Idaho, U.S. Virgin Islands, and West Virginia;
- be calibrated on the Smarter Balanced grades 3–11 vertical scale;
- be administered as a computer adaptive test; and
- have separate grade-specific cut-scores.

Blueprints

AIR examined the Common Core State Standards (CCSS) and determined that in ELA/L it was not possible to develop separate grades 9 and 10 blueprints. Therefore, the grades 9 and 10 tests will be based on the grade 11 blueprint. In mathematics however, AIR was able to create blueprints for grade 9 Integrated Mathematics I and grade 10 Integrated Mathematics II.

Proposed Blueprint for Grades 9 and 10 ELA/L Assessments

Because the Common Core State Standards for ELA/L are nearly identical between grades 9 and 10 and grades 11 and 12, the blueprint we propose for the grades 9 and 10 ELA/L benchmark assessments is the same blueprint Smarter uses at grade 11.

The Smarter blueprint is organized around claims and targets, within which are the CCSS for grades 11 and 12. These groupings can be found in Smarter’s content specifications located on the Smarter Balanced website (http://www.smarterbalanced.org/?s=content+specifications). The blueprint does not go down to the standard level; therefore, the specific differences between the two grade bands are indistinguishable on the blueprint itself.

Based on the content specifications, targets 4 and 5 are where we see some differences between the standards at grades 9 and 10 and grades 11 and 12. For example, standard 9, which is included in both targets 4 and 5, calls for a comparison across literary texts. At grades 11 and 12, the standard calls for a comparison that is limited to foundational works of American literature from the same time period. At grades 9 and 10, the standard calls for an examination of texts across time periods and cultures. While there is some variation in the passages that support these standards, the items themselves—and the essential skills of integrating knowledge across multiple texts—are, we believe, ostensibly the same constructs.
The Smarter blueprint also calls for brief writing tasks as well as an extended writing task associated with the performance task. The rubric used to score the performance task is the same rubric used at grade 8. It is intended to measure overall writing performance rather than grade-specific subskills. Even the conventions dimension of the rubric does not specify grade-level grammar/usage skills. A full-credit score on conventions is given if the response “demonstrates an adequate command of conventions: adequate use of correct sentence formation, punctuation, capitalization, usage grammar, and spelling; no systematic pattern of errors is displayed.”

We propose this blueprint for grades 9 and 10 ELA/L benchmark assessments as shown in Table 1.

Proposed Blueprint for Grades 9 and 10 Mathematics Assessments

Because the grade 11 Mathematics blueprint includes an accumulation of standards from concepts taught in 9th, 10th and 11th grade the 9th and 10th grade blueprints are a subset of the 11th grade blueprint. All of the targets and domains on the grade 11 Smarter mathematics test are considered to be college and career ready content. So the grades 9 & 10 blueprints are the intersection of the Smarter grade 11 blueprint and what is taught in Integrated Math I for grade 9 and Integrated Math II for grade 10.

These two blueprints were created by starting with the grade 11 Smarter mathematics blueprint. Targets in Claim 1 that contain standards that are not part of the Integrated Math I or Integrated Math II recommended standards from CCSS Appendix A were removed. Domains in Claims 2, 3, and 4 that contain standards that are not part of the Integrated Math I/Integrated Math II recommended standards from CCSS Appendix A were removed. Then the targets were allocated appropriately to calculator and non-calculator segments based on how the items were field tested on grade 11. Last, the total number of items allocated to each claim and content category were updated to be proportional to the number of items on the grade 11 Smarter assessment.

The original Smarter grade 11 blueprint for mathematics can be found here: http://www.smarterbalanced.org/wordpress/wp-content/uploads/2014/05/Math_PreliminaryBlueprint-2014_04-30Final.pdf

We propose these blueprints for grades 9 and 10 mathematics summative assessments.

</table>

– DOK: Depth of Knowledge, consistent with the Smarter Balanced Content Specifications.
– The CAT algorithm will be configured to ensure the following:
  For Claim 1, each student will receive at least 7 CAT items at DOK 2 or higher.
  For combined Claims 2 and 4, each student will receive at least 2 CAT items at DOK 3 or higher.
  For Claim 3, each student will receive at least 2 CAT items at DOK 3 or higher.

### Establishing Cut-Scores for Common Grades 9 and 10 ELA/L and Mathematics

There are several ways that cut-scores could be established for the common grades 9 and 10 tests. The most time-consuming, and expensive option would be to bring in a panel of standard setters and do a regular standard setting similar to the one done by Smarter Balanced. This could be done after the close of the testing window in 2015. The big disadvantage of this option is that scores in grades 9 and 10 could not be reported until after the standard-setting process was completed in June or July.

A second, more simple and immediate, way the cut-scores could be established would be to use a regression interpolation procedure and determine the cut-scores statistically. This is the approach taken in the results below.

---

### Establishing Cut-Scores

The CAT algorithm will be configured to ensure the following:

- For Claim 1, each student will receive at least 7 CAT items at DOK 2 or higher.
- For combined Claims 2 and 4, each student will receive at least 2 CAT items at DOK 3 or higher.
- For Claim 3, each student will receive at least 2 CAT items at DOK 3 or higher.

Note that the blueprints above are preliminary and not final. They will be firmed up after AIR completes the simulations for the assessments.

</tbody>
</table>
AIR examined the cut-scores established by Smarter Balanced in a variety of ways. Several patterns were immediately obvious when examining the cut-scores in the vicinity of grade 9 and 10. These are show in Figures 1–3 for ELA/L and Figures 4–6 for mathematics.

**Figure 1: ELA/L Level 2 Smarter Cut-Scores**

![Figure 1: ELA/L Level 2 Smarter Cut-Scores](image1)

**Figure 2: ELA/L Level 3 Smarter Cut-Scores**

![Figure 2: ELA/L Level 3 Smarter Cut-Scores](image2)
Figure 3: ELA/L Level 4 Smarter Cut-Scores

Figure 4: Mathematics Level 2 Smarter Cut-Scores
The obvious patterns in the graphs are that the cut-scores for ELA/L are curvilinear between grades 7 and 11, but the cut-scores for mathematics are linear. Therefore, in order to predict the cut-scores for grades 9 and 10 AIR used a curvilinear regression approach for ELA/L and a linear regression approach for mathematics. For ELA/L theta was converted to exp(theta). The predicted exp(theta) was converted back to the original theta metric by taking the log of predicted exp(theta). For mathematics, a simple linear regression using theta was used.

The sample sizes are listed in Table 4.
The sample sizes used in the regression analyses are listed in Table 4. Table 5 shows the values of cut-scores used in the regression for ELA/L, along with the slopes and intercepts of the regressions. Similarly, Table 6 shows the same results for mathematics. The percentage at and above for grades 9 and 10 was obtained from ETS. These percentages are based on the 2014 Smarter Balanced field-test vertical linking sample.

Lowest Observable Scaled Score (LOSS) and Highest Observable Scaled Score (HOSS) and Initial Ability Estimate
For reporting AIR would use the grade 11 lowest observable theta and highest observable theta (LOT/HOT) as well the lowest observable scaled score and highest observable scaled score (LOSS/HOSS) values. For ability estimation AIR would use the average ability of 2014 9th and 10th grade students as starting values. These are shown in Table 10. If approved by ID, WI and WV these values would be included in the Soring Specifications.

Conclusions

As stated above, there are several ways that cut-scores could be established for the common grades 9 and 10 ELA/L and mathematics test that will be developed for Idaho, the U.S. Virgin Islands, and West Virginia. One way would be to wait for the closing of the testing window and use a standard-setting workshop panel to recommend standards. This would delay the reporting of grades 9 and 10 results until after the cut-scores were adopted.

An easier, and immediate, approach is to set the cut-scores through a statistical procedure. Such an approach is reported in this paper. The cut-scores look reasonable and are probably very close to what would be established if an actual workshop were used to recommend standards. The statistical approach relies on the assumption that the results of the 2014 Grade 9 and 10 vertical linking samples are comparable to the results that would have occurred if the 2014 Grade 9 and 10 tests had been administered according to the above blueprints.

If the three states accept the cut-scores presented above, the results can then be reported on an ongoing basis during the testing window.
SUBJECT
Proposed Rule - IDAPA 08.02.03.109 – Rules Governing Thoroughness

REFERENCE
August 2010 Board approved temporary and proposed rule change to IDAPA 08.02.03.109 regarding the Special Education Individualized Education Programs.

November 2010 Board approved pending rule changes to IDAPA 08.02.03.109 regarding the Special Education Individualized Education Programs.

January 22, 2015 Board approved a temporary rule amending IDAPA 08.02.03.109 amending the timelines required for initial evaluations and determination of eligibility requirements.

APPLICABLE STATUTE, RULE, OR POLICY
Section 33-116, 33-2002, Idaho Code, IDAPA 08.02.03.109 (f)
20 U.S.C. 1411-1419; 34 CFR 300.100-300.174, Individuals with Disabilities Education Act (IDEA)

BACKGROUND/DISCUSSION
The Individuals with Disabilities Education Act (IDEA) sets certain timeframes for districts to complete particular activities such as initial evaluation for special education, reevaluation and dispute resolution. Timeframes help ensure that services for students are not unnecessarily delayed and reviewed appropriately. Federal regulation allows for 60 calendar days from the receipt of parent consent for initial evaluation to evaluate a student and determine eligibility for special education. After a student is found eligible for special education, regulations allow 30 calendar days to develop an individualized education program (IEP); implementation of that IEP must occur as soon as possible thereafter. Idaho’s rules currently set a maximum 60 day timeline for student evaluation, determination of eligibility for special education, development of an IEP and implementation of that IEP. Idaho’s timeline starts upon the receipt of parent consent for initial evaluation for special education, and excludes periods when regular school is not in session for five or more consecutive school days, or if all parties agree to an extension beyond 60 days. Idaho also requires once eligibility is determined, an IEP must be developed and implemented within 30 days (as long as those 30 days still fall within the 60 day timeframe). An example would be if a student was evaluated and found eligible by the 15th day, a district would then have 30 days (not 45 days) to ensure development and implementation of an IEP. If a student was evaluated and found eligible on the 35th day, the IEP would have to be developed and implemented within 25 days.

The Individuals with Disabilities Education Act (IDEA) only allows states to modify the timelines for times when a school is not in session for five (5) or more consecutive days for Eligibility for Special Education, this is not allowed for IEP’s
as specified in IDAPA 08.02.03 subsection 109.04. The timeline currently contained in this section violates IDEA.

IMPACT

This Temporary and Proposed Rule change is needed to bring IDAPA into compliance with the Individuals with Disabilities Education Act (IDEA)

ATTACHMENTS

Attachment 1 –Proposed Rule amendment to IDAPA 08.02.03.109 Page 3

STAFF COMMENTS AND RECOMMENDATIONS

The Board approved this amendment at a special Board meeting on January 22, 2015 as a temporary rule. During the legislative session there is a moratorium on proposed rules requiring the rule be brought back to the Board for consideration at this time to start the permanent rule amendment process. There have been no changes to the rule language from what was originally approved in January.

Proposed rules have a 21 day comment period prior to returning to the Board for consideration as a Pending rule. Based on received comments and Board direction, changes may be made to Proposed rules prior to entering the Pending stage. All Pending rules will be brought back to the Board for approval prior to submittal to the Department of Administration for publication in the Idaho Administrative Rules Bulletin as a Pending Rule. Pending rules become effective at the end of the legislative session in which they are submitted.

Staff recommends approval.

BOARD ACTION

I move to approve the Proposed Rule amendment to IDAPA 08.02.03.109 as submitted in attachment 1.

Moved by __________ Seconded by __________ Carried Yes _____ No _____
08.02.03 - RULES GOVERNING THOROUGHNESS

109. SPECIAL EDUCATION.

01. Definitions. The following definitions apply only to Section 109 of these rules.

a. Adult Student. A student who is eligible for special education, is eighteen (18) years of age or older and to whom special education rights have transferred.

b. Department. State Department of Education.

c. Due Process Hearing. An administrative hearing that is conducted to resolve disputes.

i. Regular due process hearing regarding issues on any matter related to identification, evaluation, placement, or the provision of a free appropriate public education.

ii. For disputes concerning discipline for which shortened time lines are in effect, an expedited due process hearing may be requested in accordance with the Individuals with Disabilities Education Act.

d. Education Agency. Each school district and other public agency that is responsible for providing special education and related services to students with disabilities, including the Department of Juvenile Corrections and the Idaho School for the Deaf and Blind.

e. Governing Special Education Requirements. Sections 33-201, 33-2001 through 2002, 33-2004 through 2005, and 33-2010, Idaho Code; Section 109 of these rules; the Individuals with Disabilities Education Act (IDEA), Parts A and B, (20 U.S.C., Sections 1400-1419); IDEA Regulations (34 C.F.R. Part 300); Idaho Special Education Manual; and special education case law that sets precedence in Idaho.

f. Idaho Special Education Manual. Policies and procedures, as approved by the State Board of Education, that the State Department of Education is required to adopt to meet the eligibility requirements of 20 U.S.C, Section 1412 and are consistent with state and federal laws, rules, regulations, and legal requirements.

g. Special Education. Specially designed instruction as defined by the Individuals with Disabilities Education Act or speech-language pathology services to meet the unique needs of a special education student.

02. Legal Compliance. The State Department of Education and education agencies shall comply with all governing special education requirements.

a. The Board of Trustees or other comparable governing body of each education agency shall adopt policies and procedures for providing special education services and obtain approval from the State Department of Education for the same. Department approval shall be based on current governing special education requirements. Each education agency shall revise its policies and procedures as necessary to conform with changes in governing special education requirements.

b. The State Department of Education shall provide education agencies with a sample set of policies and procedures that is consistent with governing special education requirements. The Department shall monitor all education agencies and private agencies who provide special education services to students with disabilities for...
c. Each education agency shall ensure that charter schools and alternative schools located in its jurisdiction have nondiscriminatory enrollment practices. Each education agency shall ensure the provision of special education and related services to eligible students enrolled in charter and alternative schools in accordance with governing special education requirements. (4-5-00)

d. Each education agency contracting with a private school or facility shall ensure that the private school or facility is approved by the State Department of Education to provide special education services. The Department may approve a private school or facility to provide special education services upon application to the Department if it:

i. Is an accredited school or a licensed rehabilitation center; and (4-5-00)

ii. Meets minimum health, fire and safety standards; and (4-5-00)

iii. Is nonsectarian; and (4-5-00)

iv. Provides special education services consistent with governing special education requirements. (4-5-00)

v. Any private school or facility aggrieved by the Department’s final decision may appeal that decision to the State Board of Education. (4-5-00)

e. Education agencies shall employ special education and related services professional personnel using certification standards approved by the State Board of Education or licensing standards adopted by the Bureau of Occupational Licensing. Education agencies shall employ individuals who meet the highest entry-level standard that applies to a specific discipline unless there is a shortage of fully qualified candidates for a specific position. If there is a shortage of fully qualified candidates, the education agency shall hire the most qualified individual available who is making satisfactory progress toward meeting the highest entry-level standard within three (3) years. (4-5-00)

f. Education agencies may employ paraprofessional personnel to assist in the provision of special education and related services to students with disabilities if they meet standards established by the State Department of Education. (4-5-00)

g. Education agencies shall collect and report data as necessary to meet state and federal requirements concerning special education services, staff or students. Education agencies shall develop, implement and revise district improvement plans as necessary to improve results as measured by data on goals and indicators for the performance of special education students that are established by the State Department of Education in accordance with the Individuals with Disabilities Education Act. (4-5-00)

h. Education agencies shall establish a team process to problem solve and plan general education interventions to ensure that referrals to special education are appropriate. (4-5-00)

03. **Eligibility for Special Education.** The State Department of Education shall provide state eligibility criteria for special education services for categorical eligibility consistent with the Individuals with Disabilities Education Act. Education agencies shall consider eligibility under all disability categories set forth in the Idaho Special Education Manual with the exception of developmental delay, which is an optional category. If an education agency elects to use the developmental delay category, it shall consider developmental delay for students ages three (3) through nine (9) using the eligibility criteria adopted by the Department and set forth in the Idaho Special Education Manual. The total timeline from the date of receipt of written parental consent for an initial evaluation to the date of determination of eligibility for special education and related services must not exceed sixty (60) calendar days, excluding periods when regular school is not in session for five (5) or more consecutive school days, unless all parties agree to an extension. (4-7-11)
04. Individualized Education Programs. Each education agency shall develop an individualized education program (IEP) for each student who is eligible for special education. The IEP shall be implemented as soon as possible after it is developed. The total timeline from the determination that the student needs special education and related services to the date of implementation of the initial IEP shall not exceed thirty (30) calendar days, excluding periods when regular school is not in session for five (5) or more consecutive school days, unless all parties agree to an extension. A new IEP shall be developed at least annually, on or before the date the previous IEP was developed. (4-7-11)(____)

a. IEP team meetings shall be convened upon reasonable request of any IEP team member at times other than the annual review. If the education agency refuses to convene an IEP team meeting requested by a parent or adult student, the agency shall provide written notice of the refusal. (4-5-00)

b. Education agencies shall document the attendance of all participants at each IEP team meeting. Any participant who does not agree with an IEP team decision regarding a student’s educational program may place a minority report in that student’s file. A minority report shall not prevent implementation of an IEP team decision. (4-5-00)

c. The IEP team shall determine the student’s placement in the least restrictive environment. (5-3-03)

d. At the discretion of the education agency, an individualized family service plan (IFSP) may be used in place of an IEP if:

i. The child is ages three (3) through five (5), and (4-5-00)

ii. The child’s parents are provided with a detailed explanation of the differences between an IFSP and an IEP, and (4-5-00)

iii. The child’s parents provide written consent to use the IFSP, and (4-5-00)

iv. The IFSP is developed in accordance with IDEA Part B policies and procedures. (3-29-10)

v. Nothing in this part requires education agencies to develop IFSPs rather than IEPs for three (3) through five (5) year old nor to implement more than the educational components of the IFSP. (4-5-00)

e. When a student who has been determined eligible for special education, as indicated by a current IEP, transfers from one (1) Idaho education agency to another, the student is entitled to continue to receive special education services. The receiving education agency may accept and implement the existing IEP or may convene an IEP team meeting to develop a new IEP. If a new IEP cannot be developed within five (5) school days, or if the education agency wishes to re-evaluate the child, an interim (short-term) IEP shall be implemented pending development of the standard IEP. (4-5-00)

f. If a student who is eligible for special education in another state transfers to an Idaho education agency, the Idaho education agency shall request a copy of the student’s most recent eligibility documentation and IEP within two (2) school days. Within five (5) school days of receipt of the eligibility documentation and IEP, the Idaho education agency shall determine if it will adopt the existing eligibility documentation and IEP. If the education agency disagrees with the existing eligibility documentation, or if the documentation is not available within a reasonable time period, consent for an initial assessment shall be sought. While the assessment and evaluation is in process, the education agency may implement an interim IEP if the parent or adult student agrees. If the parent or adult student does not agree to an interim IEP, the student shall be placed in general education. (4-5-00)
SUBJECT
Proposed Rule - IDAPA 08.02.03.128.01 – Curricular Materials Selection and Online Course Approval - Physical Education

REFERENCE
June 20, 2013 Board approved Proposed Fee Rule – IDAPA 08.02.03.128, Rules Governing Thoroughness-Curricular Materials Selection and Online Course Providers

November 1, 2013 Board approved Pending Fee Rule – IDAPA 08.02.03.128, Rules Governing Thoroughness – Curricular Materials Selection and Online course Providers adding limited English proficiency as a subject area.

APPLICABLE STATUTE, RULE, OR POLICY
Section 33-118; 33-118A, Idaho Code, Idaho Administrative Code, IDAPA 08.02.03.128

BACKGROUND/DISCUSSION
Idaho Administrative code, IDAPA 08.02.03.128 outlines the process for the Board to appoint the Curricular Materials Selection Committee, establishes a fee for publishers, and specifies the subject areas for which curricular materials are adopted by the Board.

Physical Education has been a part of that curriculum review the past decade, however, it is not listed as a required subject area. Pursuant to IDAPA 08.02.03.104 physical education is required to be offered in elementary, middle, and high schools, and 80% of Idaho’s districts require physical education for graduation. The proposed amendments would add physical education to the list of subjects reviewed by the Curricula Material Selection Committee bringing the administrative rule into alignment with current practice.

IMPACT
Curricular materials would be reviewed and adopted based on the Idaho State Standards for Physical Education. Publishers and independent curriculum developers of physical education materials would be held to the same accountability for review and recommendation of approved curriculum.

ATTACHMENTS
Attachment 1 – Proposed changes to IDAPA 08.02.03.128
STAFF COMMENTS AND RECOMMENDATIONS
Proposed rules have a 21 day comment period prior to returning to the Board for consideration as a Pending rule. Based on received comments and Board direction, changes may be made to Proposed rules prior to entering the Pending stage. All Pending rules will be brought back to the Board for approval prior to submittal to the Department of Administration for publication in the Idaho Administrative Rules Bulletin as a Pending Rule. Pending rules become effective at the end of the legislative session in which they are submitted.

BOARD ACTION
I move to approve the Proposed Rule changes to IDAPA 08.02.03.128 – Inclusion of Physical Education to the list of subject areas for curricular materials adoption as submitted in Attachment 1.

Moved by __________ Seconded by __________ Carried Yes _____ No ______
128. CURRICULAR MATERIALS SELECTION AND ONLINE COURSE APPROVAL (SECTIONS 33-118; 33-118A, IDAHO CODE).

The State Board of Education will appoint a committee to select curriculum materials. Committee appointments will be for a period of five (5) years. Committee appointments shall consist of not less than ten (10) total members from the following stakeholder groups: certified Idaho classroom teachers, Idaho public school administrators, Idaho higher education officials, parents, trustees, local board of education members, members of the Division of Professional Technical Education, and State Department of Education personnel. The Executive Secretary will be an employee of the State Department of Education and will be a voting member of the committee. The State Department of Education shall charge publishers submission fees of sixty dollars ($60) or equal to the retail price of each, whichever is greater, to defray the costs incurred in the curricular material review and adoption process.

(3-27-13)

01. Subject Areas. Curricular materials are adopted by the State Board of Education for a period of six (6) years in the following subject areas: reading, English, spelling, speech, journalism, languages other than English, art, drama, social studies, music, mathematics, business education, career education and counseling, vocational/technical education, science, health, physical education, handwriting, literature, driver education, limited English proficiency. (3-20-14) (   )

02. Multiple Adoptions are Made in Each Subject Area. (4-5-00)

03. Bids. Each publisher must deliver, according to the committee schedule, a sealed bid on all curricular materials presented for adoption. (4-5-00)

04. Depository. The State Board will appoint a depository for the state-adopted curricular materials. Resource materials are a local option. (4-5-00)

05. Local Policies. School districts will follow their own policies for adoption in subject areas offered by a school district for which materials are not covered by the state curriculum materials committee. (4-5-00)

06. Online Course Review and Approval Process. The State Department of Education shall administer the review and approval of online course providers and courses. Reviewers shall be certified Idaho classroom teachers. Online course providers are approved for a period of four (4) years. The State Department of Education shall
charge online course providers submission fees based on the number of courses offered, not to exceed the actual costs incurred in the online course and course provider review and approval process.  

(3-20-14)
SUBJECT
Temporary and Proposed Rule Changes IDAPA 08.02.03 regarding the Idaho English Language Assessment for clarity and cleanup.

REFERENCE
August 10, 2006 Board adopted the Idaho English Language (IEL) Development Standards
November 2, 2007 Board approved Pending Rules incorporating the IEL Development standards by reference into administrative code.
August 12, 2010 Board adopted the Limited English Proficiency Program Annual Measurable Achievement Objectives and Accountability Procedures and the Idaho English Language Assessment (IELA) Achievement Standards and approved temporary proposed rules incorporating them by reference.
November 17, 2010 Board approved pending rules
August 16, 2012 Board approved proposed rule changes to IDAPA 08.02.03.004. adopting the World Class Instructional Design and Assessment (WIDA) English Language Proficiency Standards and incorporating them by reference.
November 19, 2012 Board approved pending rules

APPLICABLE STATUTE, RULE, OR POLICY
Idaho Administrative code, IDAPA 08.02.03.004.04
Idaho Administrative code, IDAPA 08.02.03.008.01
Idaho Administrative code, IDAPA 08.02.03.111.04.c
Idaho Administrative code, IDAPA 08.02.03.112.02
Idaho Administrative code, IDAPA 08.02.03.112.05

BACKGROUND/DISCUSSION
Idaho Administrative Code incorporates the Idaho English Language Assessment (IELA) Achievement Standards by reference, defines what achievement standards are and sets the IELA proficiency levels. Proposed changes would remove duplicative standards that should have been removed when the Board adopted the World Class Instructional Design and Assessment (WIDA) English Language Proficiency Standards in 2012, update the achievement level definitions for the IELA from “beginning,” “advanced beginning,” “intermediate,” “early fluent” and “fluent” to Level 1 through Level 6 and then replaces the name of the current six levels to Level 1 through Level 6 for the IELA as part of Idaho’s accountability system, changing the names from the six levels that are currently referenced.
IMPACT

If approved the amendments would remove redundant standards that may cause districts confusion and update the proficiency levels for the IELA as well as make additional technical corrections.

ATTACHMENTS

Attachment 1 – Temporary and Proposed rule amendment to IDAPA 08.02.03

STAFF COMMENTS AND RECOMMENDATIONS

Temporary rules go into effect at the time of Board approval unless an alternative effective date is specified by Board action. To qualify as a temporary rule, the rule must meet one of three criteria: provides protection of the public health, safety, or welfare; or is to come into compliance with deadlines in amendments to governing law or federal programs; or is conferring a benefit. At the time of agenda production it was unclear whether or not this rule meets the requirements for a temporary rule. The removal of the redundant standard reference is a technical correction and does not qualify, additionally, the current proficiency standards include six standards and changing the names from the existing terms to levels 1 through 6 does not appear to meet the requirements.

Proposed rules have a 21 day comment period prior to returning to the Board for consideration as a Pending rule. Based on received comments and Board direction, changes may be made to Proposed rules prior to entering the Pending stage. All Pending rules will be brought back to the Board for approval prior to submittal to the Department of Administration for publication in the Idaho Administrative Rules Bulletin as a Pending Rule. Pending rules become effective at the end of the legislative session in which they are submitted.

Staff recommends approval as a proposed administrative rule only.

BOARD ACTION

I move to approve the temporary and proposed rule amendment to IDAPA 08.02.03. as submitted in Attachment 1.

Moved by __________ Seconded by __________ Carried Yes _____ No _____
004. INCORPORATION BY REFERENCE.
The following documents are incorporated into this rule: (3-30-07)

  02. The English Language Development (ELD) Standards. The World-Class Instructional Design and Assessment (WIDA) 2012 English Language Development (ELD) Standards as adopted by the State Board of Education on August 16, 2012. Copies of the document can be found on the WIDA website at www.wida.us/standards/eld.aspx. (4-4-13)

  03. The Limited English Proficiency Program Annual Measurable Achievement Objectives (AMAOs) and Accountability Procedures. The Limited English Proficiency Program Annual Measurable Achievement Objectives and Accountability Procedures as adopted by the State Board of Education on November 11, 2009. Copies of the document can be found on the State Department of Education website at www.sde.idaho.gov. (4-7-11)

  04. The Idaho English Language Assessment (IELA) Achievement Standards. The Idaho English Language Assessment (IELA) Achievement Standards as adopted by the State Board of Education on November 11, 2009. Copies of the document can be found on the State Department of Education website at www.sde.idaho.gov. (4-7-11)

  06. The Idaho Alternate Assessment Achievement Standards. Alternate Assessment Achievement Standards as adopted by the State Board of Education on May 18, 2011. Copies of the document can be found on the State Board of Education website at www.boardofed.idaho.gov. (3-29-12)

  07. The Idaho Standards for Infants, Toddlers, Children, and Youth Who Are Deaf or Hard of Hearing. As adopted by the State Board of Education on October 11, 2007. Copies of the document can be found on the State Board of Education website at www.boardofed.idaho.gov. (4-2-08)

  08. The Idaho Standards for Infants, Toddlers, Children, and Youth Who Are Blind or Visually Impaired. As adopted by the State Board of Education on October 11, 2007. Copies of the document can be found on the State Board of Education website at www.boardofed.idaho.gov. (4-2-08)

005. OFFICE -- OFFICE HOURS -- MAILING ADDRESS AND STREET ADDRESS.
The principal place of business of the State Board of Education is in Boise, Idaho. The office is located at 650 W. State Street, Room 307, Boise, Idaho and is open from 8 a.m. to 5 p.m., except Saturday, Sunday and legal holidays. The mailing address is: Office of the State Board of Education, PO Box 83720, Boise, Idaho 83720-0037. the telephone number is (208) 334-2270, the facsimile number is (208) 334-2632, and the email address is board@osbe.idaho.gov. (3-15-02)

006. PUBLIC RECORDS ACT COMPLIANCE.
This rule has been promulgated in accordance with the Administrative Procedures Act, Title 67, Chapter 52, Idaho
007. DEFINITIONS A - G.

01. Achievement Standards. Define “below basic,” “basic,” “proficient,” and “advanced” achievement levels on the Idaho Standards Achievement Tests (ISAT) and “beginning,” “advanced beginning,” “intermediate,” “early fluent,” and “fluent” “Level 1 through Level 6” on the Idaho’s English Language Assessment (IELA) by setting scale score cut points. These cut scores are paired with descriptions of how well students are mastering the material in the content standards. These descriptions are called performance level descriptors or PLDs, and are provided by performance level, by content area, and by grade.

02. Limited English Proficient (LEP) students, as defined in Subsection 112.04.d.iv., may receive designated supports or accommodations, or both, for the ISAT assessment if need has been indicated by the LEP student’s Educational Learning Plan (ELP) team. The team shall outline the designated supports or accommodations, or both, in an ELP prior to the assessment administration. Designated supports or accommodations, or both, shall be familiar to the student during previous instruction and for other assessments. LEP students who are enrolled in their first year of school in the United States may take the IELA - Idaho’s English Language assessment in lieu of the English language ISAT, but will still be required to take the ISAT (Mathematics and Science). Such LEP students will be counted as participants for the ninety-five percent (95%) participation target, as described in Subsection 112.04. However, such LEP students are not required to be counted for accountability purposes as described in Subsection 112.03.

112. ACCOUNTABILITY

The provisions in this section apply for the purposes of meeting the “No Child Left Behind” Act and the state of Idaho accountability requirements.

01. ISAT Student Achievement Levels. There are four (4) levels of student achievement for the ISAT: Below Basic, Basic, Proficient, and Advanced. Definitions for these levels of student achievement are adopted by reference in Subsection 004.05.

02. IELA Idaho’s English Language Proficiency Levels. There are six (6) levels of language proficiency for students testing on the Idaho’s English Language Assessment: beginning,” “advanced beginning,” “intermediate,” “early fluent,” and “fluent” “Level 1 through Level 6”. Definitions for these levels of language proficiency are adopted by reference in Subsections 004.02 and 004.04.

05. Annual Measurable Achievement Objectives (AMAOs). Local school districts are responsible for ensuring district progress of Limited English Proficient (LEP) students in their acquisition of English. Progress and proficiency are measured by the Idaho’s English Language Assessment (IELA) and determined based on three (3) AMAOs:

a. Annual increases in the percent or number of LEP students making progress in acquiring English language proficiency;

b. Annual increases in the percent or number of LEP students attaining English language proficiency by the end of the school year; and

c. Each school district must make Adequate Yearly Progress for LEP students on the spring ISAT.
