4. Proposed Rule – IDAPA 08.02.02.004, .015, .022, .023, and .024, Idaho Standards for the Initial Certification of Professional School Personnel
5. Proposed Rule – IDAPA 08.02.02.111, Bullying, Harassment and Intimidation
6. Proposed Rule – IDAPA 08.02.03.004.01 and 08.02.03.109, Special Education Revisions
7. Proposed Rule – IDAPA 08.02.03.110, Alternative Secondary Programs

INSTRUCTION, RESEARCH & STUDENT AFFAIRS
1. Amendment to Board Policy – Section III.T. Student Athletes – Second Reading
2. Boise State University – Master of Science in Biomolecular Sciences
3. Boise State University – Ph.D. in Computing
4. Boise State University – Online, Bachelor of Applied Science Program
5. Boise State University – Online, Bachelor of Arts, Multidisciplinary Studies
6. College of Western Idaho – Construction Technology Program
7. North Idaho College – Aerospace Technology Substantive Program Changes

ELECTION OF OFFICERS

If auxiliary aids or services are needed for individuals with disabilities, or if you wish to speak during the Open Forum, please contact the Board office at 334-2270 no later than two days before the meeting. While the Board attempts to address items in the listed order, some items may be addressed by the Board prior to or after the order listed.
1. **Agenda Approval**

Changes or additions to the agenda

2. **Minutes Approval**

**BOARD ACTION**

I move to approve the minutes from the April 13-14, 2016 regular Board meeting, the May 18-19, 2016 Board Retreat meeting, and the June 2, 2016 special Board meeting as submitted.

3. **Rolling Calendar**

**BOARD ACTION**

I move to set May 17-18, 2017 as the date and Boise as the location for the 2017 Board Retreat and June 21-22, 2017 as the date and North Idaho College as the location for the June 2017 regularly scheduled Board meeting.
A regularly scheduled meeting of the State Board of Education was held April 13-14, 2016 at the University of Idaho's Bruce M. Pitman Center, International Ballroom in Moscow, Idaho.

Present:
Don Soltman, President
Emma Atchley, Vice President
Bill Goesling, Secretary
Linda Clark
Richard Westerberg
Dave Hill
Debbie Critchfield

Absent:
Sherri Ybarra, State Superintendent (joined as noted for portions via phone)

Wednesday, April 13, 2016

Board President Don Soltman presided and called the meeting to order at 8:00 a.m. Pacific Time, and thanked the University of Idaho for their hospitality and campus tour which looked at some new construction as well as aging buildings on campus.
1. Agenda Review / Approval

BOARD ACTION

Board member Atchley requested unanimous consent to move Tabs 3 and 6 of the Consent Agenda to the regular Agenda. There were no objections.

M/S (Atchley/Clark): To approve the agenda as amended. The motion carried 7-0. Superintendent Ybarra was absent from voting.

2. Minutes Review / Approval

BOARD ACTION

M/S (Atchley/Goesling): To approve the minutes from the February 17-18, 2016 Regular Board Meeting, and the February 25, 2016 Special Board meeting as submitted. The motion carried 7-0. Superintendent Ybarra was absent from voting.

3. Rolling Calendar

BOARD ACTION

M/S (Atchley/Goesling): I move to set April 12-13, 2017 as the date and the University of Idaho as the location for the April 2017 regularly scheduled Board meeting. The motion carried 7-0. Superintendent Ybarra was absent from voting.

WORKSESSION

A. Business Affairs & Human Resources (BAHR)

Student Tuition & Fee Rates (Academic Year 2016-2017)
1. Boise State University – Student Tuition & Fee Rates
2. Idaho State University – Student Tuition & Fee Rates
3. Eastern Idaho Technical College – Student Tuition & Fee Rates
4. Lewis-Clark State College – Student Tuition & Fee Rates
5. University of Idaho – Student Tuition & Fee Rates

BOARD ACTION

BOISE STATE UNIVERSITY:

M/S (Westerberg/Goesling): To increase the FY 2017 annual full-time resident tuition and fees at Boise State University by 3.0% ($206) for a total dollar amount of $7,080; and to increase the annual full-time tuition for nonresident students by 2.85% ($400) for a total dollar amount of $14,450. The motion carried 7-0. Superintendent Ybarra was absent from voting.
M/S (Westerberg/Clark): To approve all other fees set forth in the FY 2017 Boise State University tuition and fees worksheet which will be made part of the written minutes. The motion carried 7-0. Superintendent Ybarra was absent from voting.

IDAHO STATE UNIVERSITY:
M/S (Westerberg/Atchley): To increase the FY 2017 annual full-time resident tuition and fees at Idaho State University by 2.5% ($172) for a total dollar amount of $6,956; to authorize the University to establish the tuition portion of this total dollar amount ($5,242.64) as the base tuition for eligible students in the first year cohort for the University’s “Tuition Lock” initiative; and to increase the annual full-time tuition for nonresident students by 5.0% ($670) for a total dollar amount of $14,068. The motion carried 7-0. Superintendent Ybarra was absent from voting.

M/S (Westerberg/Atchley): To increase the FY 2017 annual full-time resident tuition and fees at Idaho State University by 2.5% ($172) for a total dollar amount of $6,956; to authorize the University to establish the tuition portion of this total dollar amount ($5,242.64) as the base tuition for eligible students in the first year cohort for the University’s “Tuition Lock” initiative; and to increase the annual full-time tuition for nonresident students by 5.0% ($670) for a total dollar amount of $14,068. The motion carried 7-0. Superintendent Ybarra was absent from voting.

EASTERN IDAHO TECHNICAL COLLEGE:
M/S (Westerberg/Hill): To increase the FY 2017 annual full-time resident tuition and fees at Eastern Idaho Technical College by 3.0% ($70) for a total dollar amount of $2,404; and to increase the annual full-time tuition for nonresident students by 1.3% ($69) for a total dollar amount of $5,357. The motion carried 7-0. Superintendent Ybarra was absent from voting.

M/S (Westerberg/ill): To approve all other fees set forth in the FY 2017 Eastern Idaho Technical College tuition and fees worksheet which will be made part of the written minutes. The motion carried 7-0. Superintendent Ybarra was absent from voting.

LEWIS-CLARK STATE COLLEGE:
M/S (Westerberg/Atchley): To increase the FY 2017 annual full-time resident tuition and fees at Lewis-Clark State College by 2.0% ($120) for a total dollar amount of $6,120; and to increase the annual full-time tuition for nonresident students by 4.5% ($500) for a total dollar amount of $11,500. The motion carried 7-0. Superintendent Ybarra was absent from voting.

M/S (Westerberg/Atchley): To approve all other fees set forth in the FY 2017 in the Lewis-Clark State College tuition and fees worksheet which will be made part of the written minutes. The motion carried 7-0. Superintendent Ybarra was absent from voting.

UNIVERSITY OF IDAHO:
M/S (Westerberg/Atchley): To increase the FY 2017 annual full-time resident tuition and fees at University of Idaho by 3.0% ($212) for a total dollar amount of $7,232; and to increase the annual full-time tuition for nonresident tuition by 5.7%
($804) for a total dollar amount of $14,808. The motion carried 7-0. Superintendent Ybarra was absent from voting.

M/S (Westerberg/Clark): To approve all other fees set forth in the FY 2017 University of Idaho tuition and fees worksheet which will be made part of the written minutes. The motion carried 7-0. Superintendent Ybarra was absent from voting.

M/S (Westerberg/Clark): To set the statewide dual credit fee at $65 per credit for courses delivered at secondary schools, including courses taught online using instructional staff hired by the high school or the Idaho Digital Learning Academy, for fiscal year 2017. The motion carried 7-0. Superintendent Ybarra was absent from voting.

Mr. Westerberg introduced the item reminding everyone of the significant responsibility of the Board in setting tuition and fees. He pointed out the BAHR Committee and institutions both put in a considerable amount of time and work together related to fee setting. Mr. Chet Herbst, Chief Fiscal Officer from the Board office provided a summary of the process along with some historical information.

Dr. Kustra, President of Boise State University (BSU), introduced Ms. Stacy Pearson, Vice President for Finance and Administration, and Mr. Brian Garretson, President of the Associated Students of BSU who accompanied him. Dr. Kustra thanked the Board for this tuition exercise adding how important it is to the university, and remarked on the Board’s awareness of the burden on students. He indicated BSU is requesting today what it absolutely needs to get students through the pipeline at BSU. Ms. Stacy Pearson reported to the Board on BSU’s proposed tuition and fee increase. She reported that this is yet another one of the lowest tuition and fee increase requests at the university and reported on uses of new tuition revenues. Ms. Pearson pointed out that with their tuition increase, they are basically covering the fund shift for the 3% CEC and health benefits for personnel costs. She pointed out that only 18% of their Complete College Idaho (CCI) initiative was funded; and the lower funding has a direct impact on the need for additional revenues. Despite funding challenges, they are still meeting their CCI goals, and are 10% higher than their target for the last fiscal year.

Ms. Pearson indicated BSU is requesting an increase of 3.75%, and summarized the breakdown of where those fees are applied. She talked about why BSU’s increase is more than 3%, reporting on how BSU is growing and their campus plan is carefully developed to not be built on state funds. Their facilities fee request is higher for this reason – to fund their master plan. She provided some insight on future plans for the overall campus master plan. Dr. Kustra also remarked on the challenges with fundraising and finding the balance with funding. Mr. Garretson remarked on his experience while at BSU and how helpful the administration has been and how beneficial the campus recreation facility is. He remarked that the recreation fee will go largely toward much needed renovations. Mr. Soltman asked how much of the proposed increase will go to scholarships. Ms. Pearson responded roughly $500,000.
Dr. Art Vailas introduced the attendees with him from Idaho State University (ISU), Dr. Laura Woodworth Ney, Provost and Vice President for Academic Affairs, Dr. Linda Hatzenbueler, Dean of the College of Health Professions, and Mr. Jim Fletcher, Vice President for Finance and Administration, along with a student representative. Dr. Vailas indicated their intention is to minimize the impact to students with only a 2.5% requested increase in tuition and fees. Mr. Fletcher reviewed the tuition and fee proposal process for the Board and pointed out they have recently received a credit upgrade from Standard and Poor’s to A+ Stable. He reviewed tuition revenue versus state support, providing a visual showing state support has clearly been declining since FY 12. Dr. Hatzenbueler reviewed the annual professional fee increases and the process used to arrive at those fees. She pointed out a portion of the fees are being used to cover the CEC as well as to simply keep up with technology. Overall, the net increase to students is minimal.

Dr. Woodworth-Ney remarked they are working to keep their instructional costs low and fee schedule competitive in markets. The student representative commented that students were present during all budget meetings, and the student senate concluded students are in full support of ISU's tuition and fee recommendation. Mr. Fletcher reviewed uses of revenue from tuition and fee increases, which contributes largely to ongoing operation. He reported this tuition and fee increase request is the lowest in 28 years. Mr. Fletcher also outlined the details of their tuition lock and other financial incentives to accompany tuition and fee increases including the early college “step ahead” program, and a Bengal retention grant which is a need based scholarship. He outlined ISU’s move toward fiscal equilibrium at a new operating level, referring to it as a dynamic rebalancing in process.

Mr. Westerberg pointed out ISU’s tuition lock proposal is not before the Board for approval today. He encouraged discussion and questions from the Board before the process gets too far along. Ms. Atchley asked about the plan to keep track of the students and criteria for the tuition lock program and asked if they feel student loss will be affected by the tuition lock program. Dr. Woodworth-Ney responded they expect it to positively affect the full time cohort.

Dr. Rick Aman, interim President at Eastern Idaho Technical College (EITC) presented their tuition and fee request to the Board. He reported that they are seeking a 3% fee increase which will essentially be allocated into two areas; CTE and parking fees. For full time students it would amount to a $37 per semester increase. Dr. Aman reported they did have a student forum and students responded favorably; there were no concerns.

Dr. Tony Fernandez, president of Lewis-Clark State College (LCSC), introduced Mr. Ron Smith, Interim Vice President of Finance and Administration, and Ryan Rehberg, President of the Associated Students of Lewis-Clark State College. Mr. Smith presented their tuition and fee request to the Board indicating they are seeking a 2% tuition and fee increase this year. They have tried to keep financial burden on students to a minimum. LCSC has reduced parking fees, have eliminated student supported course fees, and have reduced summer course fees. Mr. Smith reported this fee
increase will cover areas not funded by the legislature and will cover employee costs associated with the increase in benefits and CEC. Enrollment estimates have been adjusted down to reflect the current year, but they do expect an increase next year. Mr. Rehberg indicated the associated students of LCSC are in full support of the tuition and fee increase.

Dr. Chuck Staben, President of Idaho State University (ISU), introduced Mr. Max Cowan, President of the Associated Students of the University of Idaho, and Mr. Brian Foisy, Vice President for Finance, along with Brian Keenan to assist with IT Support. They presented the university’s proposed tuition and fee increase to the Board. Dr. Staben pointed out they are committed to enhancing the quality of the student experience, while maintaining access to world class higher education. Dr. Staben provided an illustration of the change in funding sources for UI since FY01, showing the decrease in state funding and the increase in tuition and fees. He reviewed FY17 fiscal challenges which included the CEC, medical benefit costs, obligated costs, and other financial challenges estimated near $6.6 million. ISU’s single greatest fiscal challenge is with faculty and staff expenses.

Their resident tuition and fee proposal is made up of facilities fees, technology fees, dedicated student activity fees, and tuition. He reported the facility fee is largely to fund a court sport event arena the students have requested. He reviewed that at 3% they can fund the CEC requirements, fund the facilities fee, fund the dedicated student activities fee, and can meet the minimal library inflation charges and utility costs. Dr. Staben reported on scholarships to Idaho residents, outlining what they provided in FY16 was roughly $14.9 million from institutional funds. Dr. Staben reported on tuition and fees since 2006 and that this year’s request is the lowest. Mr. Cowan remarked that UI students are in support of the fee increase.

The approved tuition and fees report is included as Attachment 1 to the April minutes.

B. Planning, Policy & Governmental Affairs (PPGA)

Institution, Agencies, Special/Health Programs Strategic Plans

Ms. Critchfield introduced the item reminding the Board it would approve institution strategic plans in June. Today the institutions would give a short progress update on the changes in their strategic plans for the Board’s review and feedback. Ms. Bent, Chief Planning and Policy Officer for the Board, reminded Board members that as required by Idaho Code and Board Policy, the institutions, agencies, and special programs under the oversight of the Board are required to review and update their strategic plans each year. Strategic plans are submitted to the Board for approval starting in April, in alignment with the Board’s annual planning calendar. The Board also requires those plans be in alignment with the Board’s system wide strategic plan.

Ms. Bent reviewed the six required plan components which include vision statement, mission statement, goals, objectives, performance measures, benchmarks, and key external factors. In addition to the overall strategic plan, the Board has also approved
the Complete College Idaho (CCI) Plan which looks at strategies for accomplishing the overall goals of the Board’s statewide strategic plan with an emphasis on completion and attainment. Additionally, the postsecondary institutions are required to include the system-wide performance measures approved by the Board.

Ms. Bent pointed out that the mission statements contained in the University of Idaho and Eastern Idaho Technical College strategic plans include amendments to their previously Board approved mission statements, and will be approved through the approval of the strategic plans. Mr. Westerberg asked if those reworked mission statements would also be approved in June. Ms. Bent responded in the affirmative.

Ms. Critchfield expressed concern over the difficulty of going through the formats of the strategic plans and that information was hard to track. She pointed out the measures would be easier to track by using a similar format, which would also make comparisons easier. She proposed using a template for next year’s review and recommended Staff and the PPGA Committee work to develop the template. Dr. Clark echoed those remarks. Ms. Critchfield also indicated she would be asking three questions of each institution to gather more information on the strategic plans in general and the process of how they are developed. Those questions were: Who prepares the plan, who sees the plan, and how often do they refer to the plan.

Dr. Aman of EITC was present for questions on the college’s strategic plan. Mr. Westerberg remarked a shorter, simpler plan would be helpful. Ms. Critchfield and Dr. Clark asked specifically to see where EITC is in relation to its peer group. To Ms. Critchfield’s three questions, Dr. Aman responded the Vice President of Administrative Services and the Institutional Research Director prepare the plan, it is reviewed by the President’s Advisory Council, and it is given to the Executive Committee then broadcast to the institution by e-mail. They refer to it at least quarterly and more regularly now with the seven-year accreditation visit coming up.

University of Idaho was discussed next. Mr. Westerberg asked about the location of universal measures at the end of the plan rather than embedding them throughout the plan. Mr. Soltman requested seeing their undergraduate percentage of students involved in research, and the number of internships. Provost and Executive Vice President John Wiencek responded they would call those metrics out separately. He pointed out the mission statement will be updated and the intention was to reduce the number of words but encapsulate the same message. Ms. Critchfield provided some comments on how it reads presently in that it sounds like more of a description. Mr. Westerberg mentioned that some institutions provided history for the performance measures and that it would be helpful to show a couple years of history for all institutions. Ms. Critchfield noted that recommendation for the template. Regarding the three questions, Mr. Wiencek responded the plan was written by a committee and received broad university input. Mr. Wiencek is the preparer of the actual plan; it is located on their website and is circulated broadly at the university. He indicated it would become a broadly used document, and presently they refer to it fairly frequently.
From Boise State University, Provost and Vice President for Academic Affairs Dr. Marty Schimpf, and Vice Provost for Academic Planning, Dr. Jim Munger, were present for questions. Mr. Soltman asked BSU to add to their plan the number of students in undergraduate research and number of internships. Ms. Atchley indicated the vision and mission statements appear to be aspirational and descriptive, and recommended they be more active. Regarding the three questions, their plan development process included a university-wide committee who received broad input, and Dr. Schimpf worked on the wording. The plan is posted on their web page and on the provost's web page, and it is used in many of their processes.

From Idaho State University, Provost and Vice President for Academic Affairs, Dr. Woodworth-Ney, and Ms. Selena Grace, Associate Vice President for Institutional Effectiveness, were available for questions. Ms. Critchfield pointed out the use of the words "dynamic funding" and asked if that new thinking reflected in the plan. Dr. Woodworth-Ney responded it is the plan which is driving the budgeting process. They have changed their process to align strategic planning with budgeting and are still in the process of revising their plan. Ms. Critchfield asked when the Board would see the new plan. Ms. Grace responded the work is now in the mission and core themes, and they will be undergoing a campus wide inclusive process to align with the Board’s current strategic plan this Fall. She said by next year the Board will receive a revised five year strategic plan, and the plan being reviewed today should be considered as interim.

Mr. Westerberg requested, related to the percent increases included in the plan, that historical data with each objective be included in the revised plan to show progress. Dr. Goesling recommended the vision statement should be shorter. To the three questions asked by Board member Critchfield, ISU used an extensive process to develop their plan that included faculty, staff, and committee. The document construction was conducted from the Provosts office and headed by Selena Grace and her staff. For who sees and uses the plan, they hope the entire campus will use it as the guiding principle for planning processes on campus. To the question of how often do they refer to the plan historically, they haven’t but are working on making it a useful document for their decision making and project prioritization processes.

Dr. Fernandez was present from LCSC to answer questions. Ms. Critchfield commented positively on the format of LCSC’s plan and that it included a progress element. Mr. Soltman felt the plan was too long but liked Appendix One. Dr. Fernandez introduced Dr. Sean Gehrke, Director of Institutional Planning, Research and Assessment, who worked on developing the plan. Dr. Fernandez pointed out that four years ago they started a campus-wide project to develop the plan which took nearly a year. He reported they do use this plan in their planning processes. Mr. Soltman asked about the Praxis scores, pointing out that the college and statewide scores came in far below the Board’s benchmark. Mr. Soltman asked if the benchmark was too high. Dr. Gehrke responded it is in part to changes in the way the test is now being scored. LCSC Provost Ms. Lori Stinson added that at four year institutions, not every student completes the courses on which they are tested. She said it is a complex issue for them and on how they can report more accurately. Ms. Bent stated the Board should look at the benchmark on its plan as well. Ms. Critchfield asked how often they refer to
the strategic plan. Dr. Fernandez responded they use it across the entire academic year and it is used throughout all processes on the campus and is sited heavily.

Following up on the comments regarding the mission statements it was requested the institution with Board approved mission statements resubmit their mission statements with small changes to the verbiage to make them more active. That they be statements of purpose rather than definitions.

Moving on to the community colleges, Ms. Bent reminded the Board that the community colleges are slightly different in that they have their own locally elected governing boards who approve the plans, and the state Board also has a chance for review and comment. She added as a result, making changes is a more complicated process.

Executive Vice President and Chief Academic Officer for the College of Southern Idaho (CSI), Dr. Todd Schwarz, was available for questions. Ms. Critchfield indicated the remediation rate info was helpful and noted progress being made in the right direction. Dr. Clark appreciated the readability of the plan and table. Regarding Ms. Critchfield's three questions, Dr. Schwarz indicated the plan compiling takes place through their Office of Institutional Effectiveness and is authored collaboratively. He added the genesis started with a community survey and inputs, and was developed from there. It was adopted by their board at the February meeting. They use it in their annual planning process, and it is widely distributed and readily available on campus.

Ms. Lita Burns, Vice President for Instruction at North Idaho College (NIC), indicated they appreciated an institution-wide effort in compiling the plan. They have tried to align the strategic plan with core themes as well as keeping it in alignment with their accreditation process. The Office of Institutional Effectiveness compiles the plan, and the institution executive leadership team is who uses it. The accreditation working groups rely heavily on the plan as well, and also during program prioritization.

College of Western Idaho (CWI) President, Dr. Bert Glandon, was present for questions. He said their planning is very similar to that of NIC. He pointed out their original strategic plan was developed by an outside consultant in 2009-10, and a lot of the major components were accomplished in the first eighteen months of operation. Consequently, they have been developing it further as they go, and a consultant is working with them on the revisions for the second five-year plan. Dr. Glandon pointed out development is a very dynamic process that involves three different plans that all coalesce, and includes campus and community involvement. He also said they would welcome a template or clear format of some kind.

Dr. Clark urged development of a template and if there is a way to integrate the required elements for CWI to have one plan instead of three. Ms. Bent followed up on the question regarding undergrad research and the number of students participating in internships; it is not currently on the list of system wide performance measures. She asked if the Board would like it to be a measure reported on by all institutions, or just the four year institutions. The response was for the three research institutions and LCSC.
Mr. Soltman asked for feedback on this morning’s tour and activity. Feedback was that it was beneficial but somewhat long. The group recommended cutting back on the duration, but to follow the same trend. The recommendation for the tour was an hour. Ms. Atchley recommended keeping the interaction with students; more interaction with students, less of the facility. Mr. Westerberg suggested more regular interaction with students in general. Dr. Clark suggested focusing on a point of pride, a point of need, student interaction, and what may be coming before the legislature. Dr. Goesling suggested sitting down for a brief meeting with the Board of the community colleges.

At 2:58 p.m. Pacific Time, the Board made a motion to go into Executive Session.

EXECUTIVE SESSION

1. Boise State University

M/S (Atchley/Westerberg): To go into Executive Session pursuant to Section 74-206(1)(c), Idaho Code, to consider acquiring an interest in real property which is not owned by a public agency. A roll call vote was taken and the motion carried 7-0. Superintendent Ybarra was absent from voting.

2. Office of the State Board of Education

M/S (Atchley/Westerberg): To go into Executive Session pursuant to Section 74-206(1)(c), Idaho Code “to consider acquiring an interest in real property which is not owned by a public agency.”

AND

M/S (Atchley/Westerberg): To go into Executive Session pursuant to Section 74-206(1)(b), Idaho Code, “To consider the evaluation, dismissal or disciplining of … a public officer, employee, staff member, or individual agent, or public school student.”

A roll call vote was taken and the motions carried 7-0. Superintendent Ybarra was absent from voting.

M/S (Goesling/Hill): To go out of Executive Session at 5:15 p.m. The motion carried 7-0. Superintendent Ybarra was absent from voting.

The meeting was recessed at 5:15p.m. Pacific Time.

Thursday April 14, 2016, 8:00 a.m., University of Idaho, Bruce M. Pitman Center, International ballroom, Moscow, Idaho.

Board President Soltman called the meeting to order at 8:00 a.m. Pacific Time for regularly scheduled business. There were no participants for Open Forum. Superintendent Ybarra participated by phone for portions of the agenda.
CONSENT AGENDA

BOARD ACTION

M/S (Atchley/Westerberg): To approve the Consent Agenda as amended. The motion carried 7-0. Superintendent Ybarra was absent from voting.

BAHR
1. Retirement Plan Committee Appointment

BOARD ACTION
By unanimous consent to appoint Lillian Talley as a member of the State Board of Education Retirement Plan Committee.

IRSA
2. Programs and Changes Approved by Executive Director – Quarterly Report
   This item was provided agenda materials as an information item.

3. Graduate Program Review – Summary
   This item was pulled from the consent agenda.

4. Alcohol Permits – President Approved Request
   This item was provided in the agenda materials as an information item.

5. Idaho Indian Education Committee Appointments

BOARD ACTION
By unanimous consent to approve the appointment of Ms. Selena Grace representing Idaho State University, Dr. Chris Meyer to serve as the Tribal Chairperson’s designee for the Coeur d’Alene Tribe, Mr. Bob Sabotta representing Lewis-Clark State College, and Mr. Tomas Puga representing the College of Western Idaho, to the Idaho Indian Education Committee effective July 1, 2016 and expiring June 30, 2019.

SDE
6. Professional Standards Commission Appointments
   This item was pulled from the Consent Agenda.

7. BYU Idaho – Special education – Exceptional Child Generalist Program

BOARD ACTION
By unanimous consent to accept the Professional standards Commission recommendation for conditional approval of the Special Education – Exceptional Child Generalist program offered through Brigham Young University – Idaho as a vehicle for Idaho educator certification as submitted in Attachment 1.
1. University of Idaho Annual Progress Report

University of Idaho President, Dr. Chuck Staben, provided the university’s annual report to the Board. He reminded the Board of ISU’s vision to make higher education accessible and affordable at a great research university and provided an overview the vision for their next ten years. Dr. Staben indicated enrollment is around 11,372 students statewide, with 33% first generation students. He reviewed some statistics of the university, stating it contributes $1.1 billion to the Idaho economy each year. Dr. Staben reviewed enrollment data and the university’s cultural diversity. They hope to increase delivery to Hispanic/Latino, American Indian, and Alaska Native students, among others. He reported on accessibility and affordability, the number of programs to help support Idaho residents and students with their higher education, and identified a number of scholarships to Idaho residents which totaled nearly $15 million last year.

Dr. Staben provided an update on direct admissions, reporting that there are “Enroll” events at 43 locations across the state with hopes it will be the start of an annual tradition. He clarified that all Idaho institutions are invited to participate. In aiding Idaho’s go-on initiatives, Dr. Staben reported on a “life after high school” study. They found items that would aid the go-on rate include resources to guide decision making, cost and planning assistance, and awareness of the return on investment. He reported on the Complete College Idaho (CCI) Plan and how UI plays a key role in student success, along with the impact of higher education and its effect on the economy.

Dr. Staben reported on the high-impact research of the university, their partnerships with key industries, research successes in cybersecurity, wildfire research, and STEM outreach, among others. The UI is one of the leading universities in the world doing research on wildfires. Dr. Staben remarked the UI is a global institution, reflecting on their collaboration with the Confucius Institute, the South China University of Technology partnership, its growing international enrollment, and research with international impact and numerous student service opportunities. He also reported on their special programs like the WWAMI Medical Education program and the UI’s Law program. He closed by highlighting some points of academic excellence, and student recipients of some high profile scholarships, the university’s national recognition as one of Princeton Review’s 200 “Colleges That Pay You Back”, and highlighted some of its world-class facilities, and excellence in leadership.

2. President’s Council Report

Dr. Tony Fernandez, President of Lewis Clark State College and current chair of the President’s Council provided a report to the Board summarizing the council’s recent meetings from February and March.

Related to the February meeting, Dr. Fernandez reported presidents were briefed on a Computer Science Co-op Plan by Representative Rubel and Ken Edmunds from the
Department of Labor. This plan would have participating students taking one to two years of core classes and then alternate school semesters in school with working for a relevant Idaho business. All four-year institutions indicated they would like to participate in this program which starts in the Fall 2017. The STEM Action Center will oversee the creation and design of the program with input from employers and institutions.

Dr. Fernandez reported that presidents were briefed by Dwight Johnson and Wendi Secrist from the Division of Professional-Technical Education on the Idaho Skillstack program. It is an online communications platform being developed with Idaho Digital Learning Academy (IDLA) that allows for teachers and faculty to award micro certifications or “badges” for specific skills or competencies. The intention is that badges will “stack up” to equivalent college transfer credits, industry certifications, or skills that employers will value.

The Presidents received Legislative updates in February from the Board office as well.

Dr. Fernandez recapped the Council’s March meeting where they reviewed a new presidential evaluation process. Medical education was reviewed and the Governor tasked the Board with the development of a new plan for health education providers in Idaho. The plan will be for the next steps after the WWAMI build-out is complete. The Board is establishing a 7-9 member committee that will work on it for 6-8 months and include one representative from each of the four year institutions. The tuition and fee process was discussed, and BAHR members recommended staying around 3%. Dr. Fernandez reported the Learning Management System (LMS) request for proposal (RFP) is on hold indefinitely. They discussed SB1349 which would restrict research on fetal derived tissue, making specific research a possible criminal offense. Conversation with Governor Otter was recommended to address the full impact of the bill.

Dr. Fernandez pointed out presidents did meet on April 5th, and new presidential evaluations were discussed again. Some of the private institutions have expressed interest in being included with Direct Admissions. Presidents Council did not support those requests but understand those entities may develop a like initiative of their own. The presidents reviewed legislative actions from 2016. Outcomes-based funding (OBF) was discussed with the Joint Finance and Appropriations Committee (JFAC) members and individual legislators who seem supportive. Presidents discussed the new permit-less concealed-carry gun legislation and determined it does not affect Board and institutional policies regarding weapons on campus.

President Fox of CWI gave an update of HB 0512 on the Community College Trustee Zoning legislation that requires community college taxing districts to create board of trustee zones within the taxing districts. He noted the process needs to be handled rather delicately. The community college taxing districts will have five zones equally distributed by population with at least one zone per county in the taxing district. Community college boards will submit plans to the state Board office so plans can be enacted for the November election. Plans need to be submitted to the Board by May 16th to be reviewed at the June meeting.
Dr. Fernandez indicated BSU has been working with Pacific Source on a voluntary student health insurance plan and they have offered very good pricing and benefits. A Title IX policy has been drafted for first reading at the April meeting; the policy is in addition to OCR guidelines. And lastly, presidents reviewed the timelines for line items and budget guidelines. It was pointed out that a master planning calendar with this information is located on the Board’s website.

3. Nez Perce State Tribal Education Partnership

Ms. Critchfield introduced the item, pointing out that last June the Board approved the Idaho Indian Education Strategic plan. She welcomed Ms. Joyce McFarland, Nez Perce Education Department Manager and Tribal member, Mr. Bob Sabotta, Chair of the Idaho Indian Education Committee and Tribal member, and Ms. Patty Sanchez, Academic Affairs Program Manager who also provides staff support to the Idaho Indian Education Committee, to provide a report to the Board. Ms. Sanchez pointed out that the Board’s approval of the strategic plan is a first for Indian Education, and the two main goals of the plan are to promote academic excellence for American Indian students, and to increase culturally relevant pedagogy in teacher education programs. Much of the work being done will strengthen relationships with other tribal education departments, institutions, and other state agencies.

Ms. McFarland provided an overview to the Board of the State Tribal Education Partnership (STEP) program and how it is bringing agencies together at a historic level. She provided some historical background on the program which started as a pilot project and has become permanently authorized by the Every Student Succeeds Act (ESSA). The STEP programs supports, aligns, and collaborates with the Indian Education Strategic Plan on the K-20 education. This united work will increase the knowledge and awareness of the unique educational and cultural needs of American Indian students; many tribal students have significant and chronic achievements gaps and often attend low performing schools. The partners of the STEP program and others hope by 2018-19 to reduce the achievement gap by 50% in English language arts (ELA) and math for American Indian/Alaska Native students in targeted Local Education Agencies (LEAs) (Kamiah and Lapwai) and all students in Idaho based on last year’s testing results. Ms. McFarland shared the three objectives of the plan which include: to strengthen collaboration, to build the capacity, and to develop, monitor, and evaluate effective and culturally responsive standards and practices. Ms. McFarland closed by stating the STEP program was identified as a best practice for strengthening Tribal control of education and all partners must be acknowledged for this accomplishment.

Ms. Critchfield asked how the Board could help them with meeting their goals and objectives. Ms. McFarland responded that the Indian Education Committee has been helpful with communications, but the Board would benefit from being really aware of what is unique about the education of Tribal students and why research shows that cultural based education will make a difference.

4. 2015 Legislative Update
Mr. Blake Youde from the Board office provided a summary of Board approved legislation and other education related bills considered during the 2016 legislative session. He reported education was a top priority of the 2016 legislature. He pointed out that 112 pieces of education related legislation were submitted, and 81 passed. The Board office had input on around 90% of those pieces of legislation.

Mr. Youde commented that it was a very successful session, and there were increases in appropriations across the board. He pointed out some of the highlights of the passed legislation was the literacy legislation, charter school replication, residency for tuition, pupil service staff on the career ladder. The legislature showed continuing commitment to teacher professional development, mastery based education, college and career advising, technology in the classrooms, and operational funding for school districts. He also pointed out the increase in funding for career technical education. The Opportunity Scholarship received a boost of an additional $5 million which doubles the amount. The community college start-up find received $5 million, and funding for STEM programs was also increased.

Mr. Youde reported that in terms of the work ahead of the Board, staff are working to identify all areas where it needs to develop rules and prepare for next year. At first glance, they have already identified 23 instances where rules or reports need to be developed. Mr. Youde commented it will be imperative to show legislators why education funding is so important and the need to build upon it. It will be important to show legislators the outcomes for students and how funding is helping success to the students and the state.

Mr. Westerberg complemented Board staff on an exceptional legislative session. Other board members echoed those remarks. Dr. Hill recommended having Ms. Angela Hemingway, Director of the STEM Action Center, brief the Board on the workings of the STEM Action Center and how it is using its funds. Dr. Hill is the Board’s representative for the STEM Action Center.

5. Accountability Oversight Committee – Statewide Accountability System Recommendations

BOARD ACTION

M/S (Critchfield/Westerberg): To remove the state’s proficiency graduation requirement in its entirety and to direct Board staff to bring back proposed amendments to Administrative Code through the rulemaking process. The motion carried unanimously 8-0. Superintendent Ybarra was present by phone.

Ms. Critchfield relayed some details from the Accountability Oversight Committee (AOC) meeting discussions from the previous months. The AOC was tasked with developing recommendations for the framework of accountability, and a testing recommendation. She reminded the group the Smarter Balanced contract would expire in a year.
Ms. Critchfield said the recommendations lay the groundwork for an overall package. The first recommendation for the Board, through rule, is to remove the proficiency requirement for high school graduation and leave it at a participation level only, which is what is required by the Federal Government. Ms. Critchfield discussed how the AOC came up with these recommendations, noting they thoughtfully considered indicators of success. The group recognizes the need for a measure of student level achievement and proficiency, but realize it should not be the sole focus or measure. She discussed that with the new accountability system there is a need for something that has multiple indicators of success showing college and career readiness. She reviewed other markers that indicate progress toward achievement levels, and commented the Federal Government is broadening the definition of how schools and students succeed.

Dr. Clark reiterated the AOC’s commitment to bring to the Board a comprehensive accountability system that meets the needs of Idaho’s students and schools. She added that the committee is committed to rolling this out in a timeframe so the Board may consider it in June and roll it out to the school districts on a test drive thereafter. Ms. Ybarra indicated the Department is supportive, with the exception of making the college entrance exam optional; the Department would like to see it still be required.

Board members expressed confidence in the committee. There were still some concerns about the measures staying meaningful, particularly grade point. Dr. Hill remarked on clearly distinguishing between student outcomes and measuring schools.

Ms. Critchfield moved on to the second recommendation which is to eliminate the college entrance exam graduation requirement and request that the Idaho Legislature maintain funding for the state to pay for one college entrance exam per student. Examples of the exams would include the SAT or ACT. The AOC is considering the eleventh grade as the accountability year for testing and to make the SAT optional, yet recognizing the importance of a college entrance exam. She reviewed the Committee conversations relative to the recommendation. Ms. Bent explained that the current graduation requirement allows for the student to take either of the assessments at their discretion, however, the state, through the contracting process choose the SAT as the vendor for the college entrance exam that the state pays for. At the time, we were only able to obtain support for funding because it was made a graduation requirement. If it was no longer required a college entrance exam were not required it would be difficult to judge if there would still be legislative support to fund the assessment. If taking a college entrance exam was made option then the requirement would be removed from the graduation requirement section of rule. It was also brought up that the direct admissions initiative was dependent on the college entrance exam scores, and those students did not have a high enough GPA who did not be considered for admissions to the four year institutions through the initiative. If the ISAT were moved to the 11th grade it would still be a number of years out before it could be considered valid for college admissions.

Ms. Ybarra expressed concerns about making the test optional, commenting she would vote against the recommendation. Ms. Critchfield responded the recommendation assumes the ISAT by Smarter Balanced would be the accountability test for high
The reason for optional testing is it would reduce the number of times a junior would be tested. Ms. Ybarra reaffirmed her opposition. Mr. Westerberg requested unanimous consent to return the recommendation without action to the PPGA Committee. There were no objections to the request.

6. Amendment to Board Policy I.P. – Idaho Indian Education Committee - First Reading

**BOARD ACTION**

M/S (Critchfield/Clark): To approve the first reading of amendments to Board Policy I.P. Idaho Indian Education Committee – First Reading, as presented in Attachment 1. The motion carried 7-0. Superintendent Ybarra was absent from voting.

Ms. Bent introduced the item indicating that the amendments will streamline policy language and allow the committee to fulfill its intended purpose, and provide greater definition to the role of the committee and its members. Board staff worked with Department staff to develop the amendments. At the March 4, 2016 meeting, the Indian Education Committee reviewed policy and recommended approval with a few minor edits.

7. Amendment to Board Policy I.T. – Title IX Policy – First Reading

**BOARD ACTION**

M/S (Critchfield/Goesling): To approve the first reading of Board Policy I.T. Title IX as submitted in Attachment 1. The motion carried 7-0. Superintendent Ybarra was absent from voting.

Ms. Bent indicated this is a new section of Board policy that will provide guidance to the institutions on meeting Title IX requirements. Input on the proposed policy was solicited from the Institutions’ provosts and vice presidents of academic affairs, student affairs directors, Title IX coordinators and legal counsel. Once drafted, the policy was distributed to these groups with a request that they further distribute the draft to any additional constituent groups for feedback. The proposed policy has been drafted based on Office of Civil Rights (OCR) guidance, a review of existing institution policies, and the feedback received from the institutions. Board staff recommends approval.

8. Amendment to Board Policy IV.B. – State Department of Education, Standards Setting – First Reading

**BOARD ACTION**

M/S (Critchfield/Hill): To approve the first reading of Board Policy IV.B., State Department of Education, as submitted in Attachment 1. The motion carried unanimously 8-0. Superintendent Ybarra participated by phone.
Ms. Bent indicated the purpose of the changes to this policy was related to input received from legislators that they would like to see the Idaho Content Standards' review process formalized by the Board, and requested the Board consider including a required step for broader public input to the review committee recommendations prior to those recommendations being considered by the Board. The proposed policy will formally establish the process that is used for reviewing elementary and secondary standards that are approved by the Board. Additionally, the proposed policy removes outdated sections of policy that are now contained in either Idaho Code or administrative rule and formally establishes the standards review process.

9. Idaho State University – Administrative Unit Name Change

BOARD ACTION

M/S (Critchfield/Goesling): To approve the request by Idaho State University to change the name of Division of Health Sciences at Idaho State University to Kasiska Division of Health Sciences at Idaho State University. The motion carried 7-0. Superintendent Ybarra was absent from voting.

Idaho State University is seeking approval to change the name of Division of Health Sciences to Kasiska Division of Health Sciences. Dr. Vailas provided some historical information to the Board on the contributions of the Kasiska family to ISU. He said this decision was enthusiastically supported by ISU and its Foundation.

DEPARTMENT OF EDUCATION

1. Superintendent of Public Instruction Update

Superintendent Ybarra introduced Ms. Lee Posey, Federal Affairs Counsel Education Committee, for the National Conference of State Legislatures who joined via video conference to provide a presentation on the Every Student Succeeds Act (ESSA). Ms. Posey indicated the agenda materials contain what was provided to our House and Senate Education Committees, and also gave an update on what has been happening in Washington on the ESSA and its implementation. She pointed out some details pertaining to states which include provisions for state legislative involvement, that there are prohibitions on federal authority, and a new approach for accountability. Ms. Posey reviewed the implementation timeline starting with the ESEA flexibility waiver ending as of 8/1/16. New state plans will be developed in the 2016-17 school year and full implementation will occur in the 2017-18 school year.

Ms. Posey discussed the state accountability systems and required indicators; states must weigh the academic measures more heavily than other indicators and will also need to incorporate test participation in their accountability system. Schools that require intervention are in the bottom five percent, have consistently underperforming students, and are schools failing to graduate one third or more of their students. She reviewed provisions regarding subgroups of students and the kinds of support available to states.
for school and student support. There is an increased amount of Title I funding to be used for new student support and academic enrichment grants, adding that Idaho is estimated to receive $8,003,000 in FY 2017. Ms. Posey also reviewed Title II changes and other programs in the ESSA.

2. Temporary Rule  IDAPA 08.02.03.004 – Rules Governing Thoroughness, Incorporation by Reference, and the ISAT Achievement Level Descriptors

BOARD ACTION

M/S (Ybarra/Hill): To approve the Idaho Standard Achievement Tests Achievement Level Descriptors as submitted in Attachment 2. The motion carried unanimously 8-0. Superintendent Ybarra was present by phone.

AND

M/S (Ybarra/Clark): To approve the Temporary and Proposed Rule amendment to IDAPA 08.02.03.004.05 Rules Governing Thoroughness, Incorporation by Reference, as submitted in Attachment 1. The motion carried unanimously 8-0. Superintendent Ybarra was present by phone.

Ms. Ybarra indicated it is necessary to approve this temporary and proposed rule now in order to score the spring assessments. If this rule is not approved, the standards approved in May 2007, which are no longer valid, would still be in effect. This would impact the entire ISAT and Science End-of-Course assessments and affect Idaho’s ability to meet federal requirements.

At this time, the Board discussed the items removed from the Consent Agenda.

Related to Item #6 from the Consent Agenda regarding the Professional Standards Commission Appointments, Dr. Clark pointed out that the list received by the Board of members being approved for the Professional Standards Commission noted 18 individuals, each of whom represent a different entity or a different school district. She pointed out the appointments include three educators from a single school district and requested unanimous consent to return this item to the appropriate committee and to spread the appointments among the school districts and return an amended recommendation to the Board. There were no objections.

At this time Superintendent Ybarra left the meeting.

INSTRUCTION, RESEARCH & STUDENT AFFAIRS (IRSA)

1. Core Principles for Transforming Remediation

BOARD ACTION
M/S (Hill/Clark): To endorse Complete College America’s joint statement outlining Core Principles for Transforming Remediation within a Comprehensive Student Success Strategy as submitted in Attachment 1. The motion carried 7-0. Superintendent Ybarra was absent from voting.

Dr. Mathias from the Board office introduced the item indicating Idaho became a Complete College America (CCA) Alliance State in 2010. It has since worked closely with CCA on a range of academic initiatives including transforming remediation, creating guided pathways in STEM programs and, currently, the development of math pathways in promotion of co-requisite remediation. CCA has asked its alliance states to endorse a number of principles which are aligned with Board policies III.Q., III.R., and III.S., and with the current efforts of Idaho’s public postsecondary institutions to deliver highly successful remedial education. The joint statement was unanimously endorsed by the Board’s CAAP and IRSA committees.

2. Amendment to Board Policy – Section III.T. – Student Athletes – First Reading

BOARD ACTION

M/S (Hill/Goesling): To approve the first reading of amendment to Board Policy Section III.T.6., as presented in Attachment 1. The motion carried 7-0. Superintendent Ybarra was absent from voting.

Dr. Hill indicated the proposed amendment requires that student athletes report any incident which may result in a legal investigation to their head coach and the athletic director, whether or not criminal charges have yet been filed.

3. Amendment to Board Policy – Section III.P. – Student Health Insurance (SHIP) – Second Reading

BOARD ACTION

M/S (Hill/Goesling): To approve the second reading of amendments to Board Policy III.P.16., as presented in Attachment 1. The motion carried 7-0. Superintendent Ybarra was absent from voting.

Dr. Hill indicated the proposed amendment will eliminate the Board-level mandate that full-time students must obtain health insurance policies as required under federal law. The amended policy will allow BSU, and others the authority to establish health-insurance requirements for all or particular groups of students in a way that is suitable to the institutions. There were no changes between first and second reading.

4. Boise State University – Educational Specialist Degree in Educational Technology

BOARD ACTION
M/S (Hill/Clark): To approve the request by Boise State University to create a new academic program that will award an Educational Specialist degree in Educational Technology, and assess a self-support fee. The motion carried 7-0. Superintendent Ybarra was absent from voting.

Dr. Hill indicated this is a request by BSU for an Educational Specialist degree in Educational Technology. Dr. Marty Schimpf provided details of the Educational Specialist degree which will fill an existing gap in the suite of graduate programs that are offered by the Department of Education and Technology. Dr. Schimpf provided details of the program and indicated it will be offered online and will be a self-support program.

At this time the Board addressed item 3 from the Consent Agenda.

3. Graduate Program Review – Summary

Dr. Mathias from the Board office provided an overview for the Board on Policy III.G.8.b., whereby with input from the Council on Academic Affairs and Programs, the Chief Academic Officer developed a template and timeline for reports to be submitted to the Board office. The policy requires the Board’s Chief Academic Officer in consultation with the institutions to provide an initial progress report on all graduate programs approved by the Board. He summarized that it serves as a progress check on the metrics that were provided in the proposal. The materials today are the first wave of programs that were approved and implemented. These items were submitted in the Consent Agenda, and were not analyzed by staff.

Ms. Atchley expressed concern on the process used by institutions that results in projections of students and graduates in that it seemed optimistic. She pointed out there appeared to be some inaccuracies between projections and actual numbers. The Board would like a more realistic assessment of the proposed number of students the institution is anticipating for each program. Dr. Hill indicated the item would be returned to the IRSA committee for further exploration.

Ms. Atchley requested unanimous consent to return the item back to the IRSA Committee. There were no objections to the request.

At this time, Mr. Westerberg requested unanimous consent to move to Item 7 on the BAHR Finance agenda related to the issuance of bonds for Boise State University.

7. Boise State University – Issuance of General Refunding Bonds

BOARD ACTION

M/S (Westerberg/Atchley): To approve a Supplemental Resolution for the Boise State University Series 2016A Bonds, the title of which is as follows:
A SUPPLEMENTAL RESOLUTION of the Board of Trustees of Boise State University authorizing the issuance of General Revenue Refunding Bonds, Series 2016A, delegating authority to approve the terms and provisions of the Bonds, in the principal amount of up to $66,145,000; authorizing the execution and delivery of a Bond Purchase Agreement upon sale of the Bonds, and providing for other matters relating to the authorization, issuance, sale and payment of the Series 2016A Bonds.

Roll call was taken and the motion carried 7-0. Superintendent Ybarra was absent from voting.

Ms. Pearson introduced the item indicating Boise State University (BSU) requests the Idaho State Board of Education’s (Board)’s approval to issue up to $66,145,000 in revenue refunding bonds (Series 2016A Bonds), pursuant to a Supplemental Bond Resolution. She indicated BSU periodically reviews outstanding bond issues to assess whether market conditions warrant refinancing to take advantage of lower interest rates and BSU intends to refund all or portions of the Series 2007A, 2009A Bonds, which result in an aggregate net present value savings of at least three (3) percent. Ms. Pearson reviewed the rating reports which were included in the Board agenda materials, pointing out that they have an AA3-stable rating currently from Moody’s Investor Services, and an A+ from Standard and Poor’s.

Ms. Pearson reported the duration of the bonds will not be extended, but reduced slightly. The present value savings is 13.9% or $12.3 million (net present $9.3 million), BSU will realize annual savings in payments of approximately $500,000 per year, and the true interest cost is 2.86%. Ms. Pearson pointed out their debt ratio will decrease from 5.6% to 5.25%.

AUDIT

1. Amendment to Board Policy – Section V.H. - Audits – Second Reading

BOARD ACTION

M/S (Atchley/Hill): To approve the second reading of the proposed amendment to Idaho State Board of Education Policy V.H., as presented in Attachment 1. The motion carried 7-0. Superintendent Ybarra was absent from voting.

Ms. Atchley indicated the proposed amendments would clarify LSO reporting procedures and delegate the review of the LSO audit reports to the Executive Director when there are no material weaknesses or significant deficiencies included in the reports. There were no changes between first and second reading.

BUSINESS AFFAIRS & HUMAN RESOURCES (BAHR)

Section I – Human Resources
1. Amendment to Board Policy – Section II.H., II.B. and II.F. – Coaches and Athletic Directors – First Reading

BOARD ACTION

M/S (Westerberg/Goesling): To approve the first reading of the proposed amendments to Board Policy Section II.H. “Coaches and Athletic Directors”; Board Policy Section II.B. “Appointment Authority and Procedures”; and Board Policy Section II.F. “Policies Regarding Non-classified Employees” as provided in Attachments 1, 2 and 3. The motion carried 7-0. Superintendent Ybarra was absent from voting.

AND

M/S (Westerberg/Goesling): To approve the amendments to the single-year and multi-year model contracts, employment agreements and contract documentation checklist as provided in Attachments 4, 5 and 6. The motion carried 7-0. Superintendent Ybarra was absent from voting.

Mr. Westerberg indicated the proposed set of policy changes would delegate to institution presidents the responsibility for approving routine contracts for coaches and athletic directors. Board approval would continue to be required for contracts—or amendments thereto—which are longer than three years in duration or for which the total annual compensation is $200,000 or higher.

BOARD ACTION

M/S (Westerberg/Hill): To approve the request by Boise State University to enter into a two year employment agreement with Andrew Avalos, as defensive coordinator for the Boise State football team commencing on April 18, 2016 and terminating on February 28, 2018 at a base salary of $305,000 and supplemental compensation and terms as set forth in Attachment 1. The motion carried 7-0. Superintendent Ybarra was absent from voting.

Mr. Westerberg indicated BSU is seeking a two-year contract for the defensive coordinator for the men’s football program.

BOARD ACTION

M/S (Westerberg/Goesling): To the request by Boise State University to enter into a two year employment agreement with Kent Riddle, as special teams coordinator
for the Boise State football team commencing on April 18, 2016 and terminating on February 28, 2018 at a base salary of $275,000 and supplemental compensation and terms as set forth in Attachment 1. The motion carried 7-0. Superintendent Ybarra was absent from voting.

Mr. Westerberg indicated BSU is seeking a two-year contract for the special teams’ coordinator for the men’s football program. Dr. Goesling pointed out BSU is rewarding academic performance over athletic performance in its contracts. Board members indicated they were pleased by this.

BOARD ACTION

M/S (Westerberg/Clark): To approve the request by Boise State University to enter into a two year employment agreement with Scott Huff as co-offensive coordinator for the Boise State football team commencing on April 18, 2016 and terminating on February 28, 2018 at a base salary of $285,000 and supplemental compensation and terms as set forth in Attachment 1. The motion carried 7-0. Superintendent Ybarra was absent from voting.

Mr. Westerberg indicated BSU is seeking a two-year contract for the co-offensive coordinator for the men’s football program.

5. University of Idaho – Multi-Year Employment Agreement – Women’s Soccer Team Head Coach

BOARD ACTION

M/S (Westerberg/Atchley): To approve the University of Idaho’s multi-year employment contract for the Women’s Soccer Team Head Coach for a term extending through March 31, 2020, in substantial conformance to the form submitted to the Board in Attachment 2. The motion carried 7-0. Superintendent Ybarra was absent from voting.

Mr. Westerberg indicated the University of Idaho is requesting Board approval to extend the employment of the Women’s Soccer Team Head Coach, Derek Pittman.

6. Lewis-Clark State College – Chief Executive Officer Compensation

BOARD ACTION

M/S (Westerberg/Atchley): To amend the current employment contract for Dr. Tony Fernández as President of Lewis-Clark State College to include an annual salary in the amount of $212,777.10, effective April 14, 2016. The motion carried 7-0. Superintendent Ybarra was absent from voting.
Mr. Westerberg indicated that this item recognizes the fact that based on a compensation review for the institution executives, the Board determined that the current annual salary level for the president of LCSC significantly lags behind the median of base salaries for that institution’s Board-approved peers. They are recommending an increase of $29,725.66 to the annual salary for LCSC’s president.

Section II – Finance

1. Amendment to Board Policy – Section V.X. – Intercollegiate Athletics – First Reading

BOARD ACTION

M/S (Westerberg/Hill): To approve the first reading of proposed amendments to Board Policy Section V.X., Intercollegiate Athletics, as presented. The motion carried 7-0. Superintendent Ybarra was absent from voting.

Mr. Herbst from the Board office indicated the proposed changes will eliminate the current duplicative reports and formats for gender equity, operating budget, and revenue and expenditures and provide the Board with the current NCAA reports for revenues/expenses and Title IX.

2. Amendment to Board Policy V.R. – Establishment of Fees – Second Reading

BOARD ACTION

M/S (Westerberg/Goesling): To approve the second reading of proposed amendments to Board Policy Section V.R., Establishment of Fees, as presented in Attachment 1. The motion carried 6-0. Superintendent Ybarra and Ms. Critchfield were absent from voting.

Mr. Herbst indicated the proposed amendment would enable institutions to respond to the BAHR Committee’s invitation to forward any worthy candidates for differential/cost-based fees to the Board for consideration at the April tuition and fee setting meeting.

3. Intercollegiate Athletics – FY 2015 Gender Equity Reports

BOARD ACTION

M/S (Westerberg/Atchley): To approve the Gender Equity Reports as submitted. The motion carried 6-0. Superintendent Ybarra and Ms. Critchfield were absent from voting.

Mr. Herbst indicated the report summaries were provided in the agenda materials to the Board which illustrated gender equity at the institutions.

4. FY 2017 Appropriations
BOARD ACTION

M/S (Westerberg/Clark): To approve the allocation of the FY 2017 appropriation for Boise State University, Idaho State University, University of Idaho, Lewis-Clark State College, and system-wide needs, as presented on Tab 3b, Page 3. The motion carried 7-0. Superintendent Ybarra was absent from voting.

BOARD ACTION

M/S (Westerberg/Atchley): To approve the allocation of the FY 2017 appropriation for the College of Southern Idaho, College of Western Idaho and North Idaho College, as presented on Tab 3c, Page 3. The motion carried 7-0. Superintendent Ybarra was absent from voting.

BOARD ACTION

M/S (Westerberg/Goesling): To approve the request from the Division of Career & Technical Education for the allocation of the FY 2017 appropriation detailed in Attachment 1. The motion carried 7-0. Superintendent Ybarra was absent from voting.

The meeting recessed for lunch at 11:45 a.m. Pacific Time.

5. FY 2018 Budget Guidelines

BOARD ACTION

M/S (Westerberg/Goesling): To direct the college and universities to limit any Fiscal Year 2018 budget line items requests to those which will measurably support implementation of the Board’s strategic plan. Institutions may request up to two (2) line items in priority order, the total value of which shall not exceed five percent (5%) of an institution’s FY2017 total General Fund appropriation. Any requests for occupancy costs will not count towards the two line items or the 5% cap. The motion carried 7-0. Superintendent Ybarra was absent from voting.

Mr. Herbst indicated the guidelines are similar to last years, but are scaled back somewhat in anticipation that the FY2018 budget will be focusing on support for outcomes based funding which will be system wide. The number of line item requests for the institutions this year was limited to two and no more than 5% of their general fund appropriation. Mr. Herbst reported that the total sum of line items approved equaled about 3%. Mr. Freeman reminded the Board that in developing the budget for the next fiscal year, they will have a first look at line item requests at the June meeting, after which the BAHR committee will refine those requests. The requests will then come before the Board again in August for final approval.

6. Boise State University – Facility Lease – Bookstore Lease in City Center Plaza
M/S (Westerberg/Critchfield): To authorize Boise State University to enter into a lease arrangement for the “Retail C” space within the City Center Plaza in substantial conformance with the provisions outlined in Attachment 1 and Attachment 2, in coordination with the Idaho Division of Public Works. The motion carried 7-0. Superintendent Ybarra was absent from voting.

Mr. Satterlee indicated the lease is coming due on the present location, and by funding the lease on the new location they expect to generate more foot traffic and revenue.

8. Boise State University – Professional Fee Request

M/S (Westerberg/Goesling): To approve the request by Boise State University to charge a professional fee in the amount of $35 per credit for required upper division courses for baccalaureate programs the following engineering programs:

1. Civil Engineering;
2. Electrical and Computer Engineering;
3. Mechanical Engineering; and

The motion carried 7-0. Superintendent Ybarra was absent from voting.

Dr. Marty Schimpf introduced the Chair and Associate Professor of the Mechanical and Electrical Department at BSU, Dr. Don Plumlee. Dr. Schimpf indicated BSU is proposing professional fees for four College of Engineering programs that are accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology, Inc. (ABET). He outlined the details of the programs reporting that careful consideration was given to selecting programs for this request. He pointed out that one important factor for the programs selected is the high rates of employment for students who graduate from them and their high average salaries. Dr. Schimpf outlined the details of the proposed professional fees for these programs, with a projected net cost increase to the affected students estimated to be less than $600 per year.

Dr. Plumlee pointed out in particular the support for student success, stating they have something similar to a tutoring program to assist students, and also commented on the quality of the equipment available to students to work with while in the program. There was additional discussion about equipment and that it is purchased largely through research grants.

Dr. Goesling asked if there will be summer courses for these programs. Dr. Schimpf responded the upper division courses are limited during the summer. Mr. Soltman asked about the number of students who needed to repeat the class. Dr. Plumlee
responded out of 80 students they generally see around 15 who need to retake the class; which is why they are emphasizing strong student support.

Ms. Atchley pointed out the Board would be interested in the number of students who fail this type of course and if the measures to help struggling students are working. She was clear that they would trust but verify and expect that data reported in the future.

BOARD ACTION

M/S (Westerberg/Hill): To approve the request by the University of Idaho to enter into a contract with United Healthcare Student Resources for a fully-insured student health insurance plan for their domestic and international students in substantial conformance to the materials provided to the Board in Attachment 1. The motion carried 7-0. Superintendent Ybarra was absent from voting.

Mr. Brian Foisy, Vice President of Finance, introduced Debbie Huffman, Director of Administrative Fiscal Operations for Student Affairs, along with the manager of student health insurance program (SHIP). Mr. Foisy pointed out today's request is for the renewal of the contract with United Healthcare student Resources. The terms of that contract are relatively unchanged, and they have negotiated a slightly lower premium rate which drops the cost to students from $1,606 to $1,548 per academic year.

Ms. Huffman indicated the proposed SHIP contract would provide comprehensive coverage for University of Idaho Students at a very competitive price, adding they have been very successful because their management and monitoring of the program.

10. FY 2017 Opportunity Scholarship – Educational Costs

BOARD ACTION

M/S (Westerberg/Clark): To set the FY2017 educational cost for the Opportunity scholarship award not to exceed the following amounts:

1. $20,400 for students attending University of Idaho
2. $20,328 for students attending Boise State University
3. $19,755 for students attending Idaho State University
4. $16,654 for students attending Lewis-Clark State College
5. $19,284 for students attending eligible Idaho private postsecondary institutions
6. $13,138 for students attending College of Southern Idaho
7. $13,800 for students attending College of Western Idaho
8. $12,624 for students attending North Idaho College
9. $13,808 for students attending Eastern Idaho Technical College

The motion carried 7-0. Superintendent Ybarra was absent from voting.
AND

M/S (Westerberg/Clark): To approve the Opportunity Scholarship maximum award in the amount of $3,000 per year. The motion carried 7-0. Superintendent Ybarra was absent from voting.

AND

M/S (Westerberg/Atchley): To approve the FY17 student contribution be set at $3,000 and to accept student-initiated scholarships and non-institutional and non-federal aid as part of the student contribution.

The motion carried 7-0. Superintendent Ybarra was absent from voting.

Mr. Westerberg pointed out this sets the parameters for the Opportunity Scholarship.

OTHER BUSINESS

There being no further business, a motion to adjourn was entertained.

M/S (Westerberg/Goesling): To adjourn the meeting at 2:35 p.m. The motion carried 7-0. Superintendent Ybarra was absent from voting.
## Colleges & Universities

</tbody>
</table>

Note A: Due to a change to Idaho State Board of Education Policy V.F.II.3.b.iv. referencing professional fees, course fees associated with a program that has professional fees are now prohibited. As a result, the proposed increase to some professional fees includes existing course fees that are now prohibited as a separate fee. The overall net increase to professional fees meets the competitive test.

The full-time fee & part-time credit hour fee are effective Fall Semester 2016. Summer session fees are at the Part-time fee rate - effective Summer 2017.

### Notes:

- **Note A:** The university is requesting a total package for non-resident undergraduate students of $22,040 per academic year. Therefore if the tuition and fee package is approved at lower than $7,338 the non-resident fee is to be increased to maintain the $22,040 total package.
- **Note B:** The University is exploring the ability to charge increased tuition to Non-Residents for Summer Session but not to exceed full Non-Resident Tuition.
- **Note C:** The university charges a separate one-time $100 fee charged only to first time undergraduate students.

**G.E. Summary**

| Total Revenue Increase/Decrease | $1,832,800 | | $1,832,800 |
| Less Summer 2017 and Distributed | (26,600) | | (26,600) |
| Central Academic Year (FY17) | $1,906,200 | | $1,906,200 |
| Plus Summer 2016 and Other/Misc | 115,258 | | 115,258 |
| Total Central Tuition Revenue over FY16 Bud. | $1,921,458 | | $2,578,907 per BAHR Template |

The count figures indicate changes between FY16 budget and FY17 projections and therefore take into consideration the impact of FY16 actuals as well as anticipated changes for FY17. The revenues shown under Changes Due to Count and Fee Changes reflect net revenues.

Note A: The existing SUB Debt and Silverthorne Theatre facility fee are proposed to be eliminated in FY17. Funds would be reallocated to tuition, the Strategic Faculty Fee, and to numerous student activity fees, including: Alumni, Associated Students, Athletics, Center for Arts & History, DayCare, Radio Station, Scholarships, Student Activities, Student Health Center, and Student Union Building Ops.

Full-time fees and part-time credit hour fees are effective Fall Semester 2016. Summer fees are effective Summer 2017, and are requested to be authorized at the part-time credit hour rate; however, the College may opt to discount this fee further.

A special meeting of the State Board of Education was held May 18-19, 2016. It originated from the Skyline Room of the Stueckle Sky Center at Boise State University, in Boise, Idaho. Board President Don Soltman presided and called the meeting to order at 10:30 a.m. Mountain Time. During the Executive Sessions, presidential evaluations were conducted. A roll call of members was taken.

Present:
Don Soltman, President                    Richard Westerberg
Emma Atchley, Vice President             Dave Hill
Bill Goesling, Secretary                 Debbie Critchfield
Linda Clark                              Sherri Ybarra, State Superintendent

BOARDWORK - AGENDA APPROVAL

M/S (Atchley/Goesling): To approve the agenda as posted. The motion carried unanimously.

EXECUTIVE SESSION (Closed to the Public)

M/S (Atchley/Westerberg): To meet in executive session pursuant to Section 74-206(1)(b) Idaho Code, “To consider the evaluation, dismissal or disciplining of . . . a public officer, employee, staff member or individual agent, or public school student.” A roll call vote was taken and the motion carried unanimously. Board members entered into Executive Session shortly after 10:30 a.m. Mountain Time.
The Board recessed from Executive Session at 11:34 Mountain Time for lunch and to go into the open portion of the meeting to conduct regular business.

(Open Meeting)

BUSINESS AFFAIRS AND HUMAN RESOURCES (BAHR)

1. University of Idaho – Athletic Conference

BOARD ACTION

M/S (Westerberg/Hill): To approve the request by the University of Idaho to accept the invitation of the Big Sky Conference for football, joining the rest of UI Athletics teams in the regional Division I FCS conference. The motion carried unanimously.

Mr. Westerberg introduced the item indicating in November, 2015, the Big Sky Conference (BSC) reaffirmed their invitation for the University of Idaho (UI) to add football to the other sports already participating in BSC with a six month extension of the previous invitation. At this time, the UI seeks to accept this invitation and participate in all sports with the BSC.

Thursday, May 19, 2016

EXECUTIVE SESSION (Closed to the Public)

Board members resumed Executive Session shortly after 8:00 a.m. Mountain Time.

M/S (Atchley/Clark): To go out of executive session. The motion carried unanimously. The group came out of Executive Session at 12:30 p.m. Mountain Time to conduct regular business.

(Open Meeting)

BUSINESS AFFAIRS AND HUMAN RESOURCES (BAHR)

2. Idaho National Laboratory – Lease Expansions

Mr. Westerberg introduced Mr. Van Briggs from the Idaho National Laboratory (INL) who provided an overview of a proposal to expand, through new construction, the Cyber Innovation Center (CIC) and the Collaborative Computing Center (C3). He reported that related programs are currently carried out in smaller facilities, and additional space is needed to accommodate the growth in these programs.

Mr. Briggs said they will build the two new buildings either through a developer or lease options and wished to discuss how to further develop the partnership between the INL
and the State Board of Education (Board) related to that development. They are hoping to determine if sponsorship through the Board is possible in the near-term. If they partner with the state, financing for the facilities’ expansion would be through the Idaho State Building Authority (IBA). The property is owned by the Board and Idaho State University Foundation adjacent to INL Research Facilities. A summary of the proposed construction, financing, state sponsorship, and leasing arrangements was contained in the agenda materials provided to Board members. Mr. Briggs indicated the IBA could issue taxable bonds and contracts for the construction of the two facilities which would be leased to INL and that action would require a concurrent resolution of the Legislature.

Mr. Briggs outlined the benefits for state sponsorship for INL lease initiative. He outlined the benefits to the Board and the state, starting with revenue when the bonds mature. The lease will provide a defined and steady income for the state and the location would use underdeveloped state-owned properties which are sitting vacant. He commented how it supports growth for the state and creates world-class opportunities for students. Mr. Briggs discussed the feasibility of the proposal and commented they would like to enter into a long term commitment with the lease. He also remarked on INL’s commitment to the state and to learning. They intend to seek external funding sources after fully exploring those with the state. Mr. Briggs reviewed the conceptual nature of the proposed facilities and provided an illustration of the buildings and an overview of the construction timeline. He provided a diagram of who has ownership of the land around the INL campus and parcels zoned for research.

Mr. Briggs discussed the projected cost which is around $40 million per project and the various bonds and leasing options. Mr. Westerberg asked how soon they need to know a decision from the Board. Mr. Briggs responded they would like to proceed as soon as possible, and there are a series of approvals and answers they need in order to proceed. The Board wasn’t sure if it could have those answers in time for the June meeting; and the Board is not entirely the final decider on whether they can partner with the INL on this project. Mr. Herbst indicated they would likely have information from the IBA by the June meeting. Mr. Westerberg pointed out there are many questions which need to be answered, including those related to covenants, and there will be another informational update at the June meeting with perhaps an action item in August. Dr. Hill commented that conceptually this project is much larger and has the potential to create a university lab complex with research park capabilities that would attract companies and spark economic development in Idaho Falls. He requested arranging a tour for the Board members to the property while they are in Idaho Falls during the June meeting. Ms. Atchley requested a full and thorough look at legal ramifications before proceeding with this proposal. She recommended the highest level of caution and review before proceeding.

3. Eastern Idaho Technical College – Presidential Appointment

BOARD ACTION

M/S (Westerberg/Goesling): To appoint Dr. Rick Aman as President of Eastern
Idaho Technical College, effective July 1, 2016, at a salary of $116,000 annually and to authorize an annual housing allowance of $13,000. The motion carried unanimously.

4. Eastern Idaho Technical College – Real Property

BOARD ACTION

M/S (Westerberg/Atchley): That the Board finds the property in question, located at Eastern Idaho Technical College, is not surplus property at the current time. The Board will monitor the ongoing work of the Community College Citizen Study Panel regarding the potential future of the campus as a new community college site. The motion carried unanimously.

Mr. Westerberg provided some background on the item that in 2013 there was a request by EITC’s former president for approval to dispose of the referenced property. The Board approved that request, but no further action was ever taken on the property. There has recently been a request by a developer to buy that property. Mr. Westerberg pointed out there have been significant changes since 2013 to the area, and for the Board to consider how disposal of the property could positively or negatively impact the community’s efforts to establish a community college district. Also that the property lies within a significant area of the cities of Ammon and Idaho Falls’ Connecting Our Community regional master plan.

PLANNING, POLICY AND GOVERNMENTAL AFFAIRS

1. Master Teacher Premium Framework

BOARD ACTION

M/S (Critchfield/Clark): To approve the Master Teacher Premium Plan as outlined in Attachment 3, including the standards and characteristics specified in Attachment 4. The motion carried unanimously.

Ms. Tracie Bent, Chief Planning and Policy Officer from the Board Office, and Mr. Mark Jones, Chairman of the Master Teacher Premium Committee, presented the recap of the work of the Master Teacher Premium Committee. Mr. Jones remarked the committee looked at three areas in developing the plan template which included evaluation, student achievement, or a portfolio where teachers show their master teacher capabilities. The committee felt the guiding principles they looked at were thorough and helped the committee arrive at most appropriate approach for the master teacher premium criteria; that it was the most fair and logical system to use which is for teachers to use a portfolio system.

Mr. Jones described the portfolio which teachers must submit, pointing out it is provided in detail on Tab 1, page 9 of the Board agenda materials. The committee agreed on five areas as the main platform to show what a master teacher is which included:
leadership, processional collaboration and partnerships, students and learning environment, content/instruction/assessment, and professional growth. Within those areas are eight characteristics that were developed which outline what the characteristics look like. Mr. Jones reviewed the non-negotiable and negotiable types of terms of how master teacher determinations are made. Non-negotiable items are the standards and characteristics; the negotiable items are how the teacher shows how they meet those standards and characteristics. He pointed out the structure provides a considerable amount of latitude for teachers to demonstrate their own expertise and master level abilities.

Dr. Clark commented on the work of the committee and how long and detailed the process was and that they have arrived at a model which will be modeled. She felt the result exceeds what they hoped to accomplish with the committee; they feel it is a very sound proposal which passes muster of teachers, administrators, and others. She also pointed out this is a good starting point or platform and it will be reviewed and adjusted as they move forward.

Ms. Atchley expressed concern about ensuring teachers being evaluated similarly across the state. Mr. Jones responded that when the portfolios are submitted to the peer group for evaluation, the evaluators don’t know who they are evaluating. Ms. Bent clarified further that the legislation which passed did include language that would allow school districts to develop their own plans for how teachers show they are in fact master teachers. Those plans do need to come before the Board for approval and must be comparable to what has been developed. She explained the plans at the district level will have a slightly different review process.

Dr. Hill asked where the reviewers will come from. Mr. Jones responded they envision a mostly peer group, which would also include administrators, and volunteers. They envisioned an application process where there would be costs associated whereby a stipend would be paid to the reviewers. A budget would need to be developed and approved by the legislature. Training for those individuals would also be established.

2. Accountability Oversight Committee - Appointments

**BOARD ACTION**

M/S (Critchfield/Goesling): To approve the appointment of Roger Stewart to the Accountability Oversight Committee for a term of 2 years commencing immediately and ending on June 30, 2018. The motion carried unanimously.

AND

M/S (Critchfield/Clark): To approve the appointment of Julian Duffey to the Accountability Oversight Committee for a term of 2 years commencing immediately and ending on June 30, 2018. The motion carried unanimously.

Ms. Critchfield indicated the committee currently has two vacancies for at-large
members. The committee is recommending that Roger Stewart and Julian Duffey be appointed for two-year terms. Julian Duffey would serve as the at-large member with special education experience. Resumes for both individuals were included in the agenda materials.

3. Board Policy I.Q., Accountability Oversight Committee – First Reading

BOARD ACTION

M/S (Critchfield/Atchley): To approve the first reading of amendments to Board Policy I.Q. Accountability Oversight Committee as submitted in Attachment 1. The motion carried unanimously.

Ms. Bent clarified that in order to maintain consistency of leadership on the committee, if the two existing at-large committee members do not want to serve as chair, the proposed changes would provide the flexibility of selecting the chairperson from all of the existing committee members rather than only the at-large positions.

4. Board Self-Evaluation Update

Ms. Bent provided a summary of the Boards self-evaluations she received. She pointed out the evaluation had more focus on policy issues and the feedback indicated too much focus in that direction, so it will be scaled back for the future. Overall the performance was considered adequate or very good. Areas of improvement that showed consensus indicated Board members would like more discussion on the topics during the meetings and better management of the presentations. Summarizing, Board members felt the information from institutions or agencies was important but needed to lead to discussion, rather than just a presentation.

Comments were mixed on whether there was too much or too little material provided in Board materials for informational purposes. Ms. Bent clarified that the cover page is intended to have enough information for Board members to be able to make an informed decision, and the attachments are intended as backup. She pointed out that part of the material volume is a result of required materials that must be included as part of the official record.

Another recommendation was to have a better understanding of the agencies governed by the Board. Staff responded more detail would be provided so Board members understand why the agencies are part of the system and why they are governed by the Board. An explanation on how career technical education (CTE) funding works was specifically requested as well. Staff would provide that information to the Board. One area universally mentioned was general governance of the system. Staff indicated they would inquire with NASBE or AGB for additional information or a Board work session on that area.

Also universally noted was progress on strategic priorities, specifically the 60% goal. Staff felt better work could be done to connect the strategic plans so there is a fluid
connection on how those plans and the performance measures work together. There was a suggestion to incorporate more research data Board staff is working on. For instance, looking at what impact was achieved by the requirements and how those specific areas had or did not have the impact anticipated. One suggestion was for data to become a standing item. Staff indicated they will look at more data as part of the work session going forward and will have a stronger data piece and specific topics targeted at each meeting.

Ms. Bent pointed out related to institution annual reports, they would be trying a new process at the next Board meeting where the annual reports are incorporated into the campus tours.

Dr. Goesling suggested looking at programs the Board has approved a few years out – to see if they are working or not and if the intended expectations or achievements were being met. Ms. Bent indicated that is part of the strategic planning – to determine what kind of impact something has had and whether it needs adjusted. Ms. Critchfield felt that type of “auditing” might be something to put back on the institutions; to include it in the annual report. Dr. Hill felt the suggestion was important and that IRSA and Dr. Chris Mathias from the Board office are developing some sort of review mechanism. Mr. Westerberg felt that type of follow-up should remain with the germane committees.

5. Presidential Evaluation Process Debrief

Related to this year’s evaluation process and the changes to the process from previous years, Board members felt it was valuable, but results of the informal conversations with presidents was varied. Mr. Soltman recommended asking presidents if they found the conversations valuable and to request their feedback. Dr. Hill recommended informal reviews be six months off cycle from evaluations. Mr. Westerberg felt the evaluation process was better than in the past. Ms. Critchfield restated the six month reviews would give presidents a chance to touch base on goals and so forth. Mr. Freeman asked if the informal evaluations should be a formative evaluation with the whole Board or with the three of the Executive Committee. The response was for the Executive Committee. Dr. Clark remarked that the Board did speak over the last couple of days about other instruments they would like to see and will need to have that conversation regarding framework. Mr. Freeman responded he and staff would be working on it. Mr. Freeman asked about developing a schedule for 360 style evaluations (3-5 years in between). Ms. Bent reminded the Board the 360 review is very intensive. The Board recommended only one 360 evaluation per year; a consultant would need to be used to facilitate the work. After discussion on process, the consensus was to look at best practices (like from the Association of Governing Boards) and how to proceed with presidents.

Ms. Bent asked related to the materials provided to the Board in addition to the presidents’ self-evaluations, if they wanted something more or different. One question was whether to fact check what is in the president self-evaluations. Board response suggested it was not necessary.
OTHER BUSINESS

There being no further business, a motion to adjourn was entertained.

M/S (Westerberg/Goesling):  To adjourn the meeting at 2:13 p.m.  The motion carried unanimously.
A special meeting of the State Board of Education was held June 2, 2016. It originated from the Large Conference Room of the State Board of Education Office in the Len B. Jordan Building in Boise, Idaho. Board President Don Soltman presided and called the meeting to order at 3:30 p.m. Mountain Time. A roll call of members was taken.

**Present:**

Don Soltman, President
Emma Atchley, Vice President
Bill Goesling, Secretary
Richard Westerberg
Linda Clark
Debbie Critchfield

**Absent:**

Sherri Ybarra, State Superintendent
Dave Hill

**EXECUTIVE SESSION (Closed to the Public)**

M/S (Atchley/Goesling): To meet in executive session pursuant to Section 74-206(1)(b) Idaho Code, “To consider the evaluation, dismissal or disciplining of . . . a public officer, employee, staff member or individual agent, or public school student.” A roll call vote was taken and the motion carried unanimously 5-0. Board members entered into Executive Session shortly after 3:30 p.m. Mountain Time.

M/S (Westerberg/Critchfield): To go out of executive session and adjourn the meeting. The motion carried unanimously 5-0. The group exited Executive Session and adjourned the meeting at 3:52 p.m. Mountain Time.
SUBJECT
60% College Completion Goal – Data Discussion

REFERENCE
August 2010 The State Board of Education (Board) approved that the State of Idaho’s College Completion Goal be for 60% of young Idahoans (ages 25-34) to have a college degree or certificate by 2020.

BACKGROUND/DISCUSSION
Board staff uses multiple sources and measures to track progress on the 60% goal. This item is to help the Board better understand the sources of data and the reasoning behind many of the measures used. Discussion will cover:

- The American Community Survey and the 60% goal
- Dual Credit
- Retention
- Efficiency
- Remediation
- Degree Production
- Student Migration

IMPACT
This item will give the Board an opportunity to discuss various measures for tracking progress towards the Board’s goal and the progress made to date.

STAFF COMMENTS AND RECOMMENDATIONS
The Board will have the opportunity to discuss alternative or additional data that could be used to measure the impact of the various policies the Board has adopted and initiatives targeted at helping Idaho meet the 60% completion goal.

BOARD ACTION
This item is for informational purposes only. Any action will be at the Board’s discretion.

UNIVERSITY OF IDAHO

SUBJECT
Renewal of Five-Year Contract – Associate Dean for Boise Programs

REFERENCE
December 2006 The Idaho State Board of Education (Board) approved a five year contract for clinical law instructor and director of external programs in Boise (now Associate Dean for Boise Programs) Lee Dillion.

December 2011 The Board approved a renewal of the five-year contract for Associate Dean for Boise Programs Lee Dillion.

APPLICABLE STATUTE, RULE, OR POLICY
Idaho State Board of Education Governing Policies & Procedures, Section II.G.1.b.

BACKGROUND/DISCUSSION
In 2006, the Board of Regents approved a five-year contract for clinical law instructor and director of external programs at University of Idaho (UI) in Boise (now associate dean for Boise programs) Lee B. Dillion. The contract, attached, provides at paragraph 2.5 a process for renewal of the contract. In 2011, the Board of Regents approved the renewal of the contract for another five-year term. In accordance with paragraph 2.5 of the contract, Associate Dean Dillion’s performance during the current contract term was reviewed and found to be outstanding. The Dean of the College of Law (the College), with the support of the Provost, hereby recommends renewal of the contract for another five-year term.

UI initially sought approval of this five-year contract, and has subsequently sought renewal of it, based on the requirements of the College’s accrediting agency. The College of Law is accredited by the American Bar Association, Section of Legal Education and Admissions to the Bar. Accreditation by the American Bar Association is essential to the viability of the College of Law and to secure the right of its graduates to take bar examinations in any state of the United States.

Accreditation by the American Bar Association is governed by the ABA’s “Standards for Approval of Law Schools.” Standard 405(c) provides as follows:

A law school shall afford to full-time clinical faculty members a form of security of position reasonably similar to tenure, and non-compensatory perquisites reasonably similar to those provided other full-time faculty members. A law school may require these faculty members to meet standards and obligations reasonably similar to those required of other full-time faculty members. However, this Standard does not preclude a limited number of fixed, short-term appointments in a clinical program.
predominantly staffed by full-time faculty members, or in an experimental program of limited duration. [Emphasis supplied.]

This standard is further explained in Interpretation 405-6 as follows:

_A form of security of position reasonably similar to tenure includes a separate tenure track or a program of renewable long-term contracts._ … A program of renewable long-term contracts shall provide that, after a probationary period reasonably similar to that for other full-time faculty, during which the clinical faculty member may be employed on short-term contracts, the services of a faculty member may be either terminated or continued by the granting of a long-term renewable contract. _For the purposes of this Interpretation, “long term contract” means at least a five-year contract that is presumptively renewable or other arrangement sufficient to ensure academic freedom._ During the initial long-term contract or any renewal period, the contract may be terminated for good cause, including termination or material modification of the entire clinical program. [Emphasis supplied.]

**IMPACT**

UI will stay in compliance with the ABA Accreditation Standard 405.

**ATTACHMENTS**

Attachment 1 – Proposed Contract Page 3
Attachment 2 – Dean’s Letter Page 9

**STAFF COMMENTS AND RECOMMENDATIONS**

The proposed five-year contract renewal meets the accreditation criterion established by the ABA, is compliant with Board policy, and ensures continuity of leadership in this key position by a proven, outstanding administrator. Board Policy IIG.1.b allows for non-tenure faculty to be employed through employment contracts with terms of more than three years with prior Board approval. Staff recommends approval.

**BOARD ACTION**

I move to approve the request by the University of Idaho to approve a five year contract renewal for clinical law instructor and Associate Dean for Boise Programs, Lee Dillion, and to authorize the University's Vice President for Finance to execute the contract in substantial conformance to the form submitted in Attachment 1.

Moved by __________ Seconded by __________ Carried Yes _____ No _____
EMPLOYMENT AGREEMENT

This Employment Agreement (Agreement) is entered into by and between the University of Idaho (University), and Lee Dillion (Employee).

ARTICLE 1

1.1. Employment. Subject to the terms and conditions of this Agreement, the University will employ Employee as the Associate Dean for Boise Programs and Instructor in Law, a full-time, fiscal year, non-tenure track faculty position with an administrative component. Except as otherwise provided in this Agreement, Employee remains subject to all University and Regents policies generally applicable to employees of his classification.

1.2. Reporting Relationship. Employee will report and be responsible directly to Director of Clinical Programs and to the Dean of the College of Law (Dean). Annual performance evaluations will be conducted in accordance with standard University and College of Law policies.

1.3. Duties and Performance. Employee's duties will be as described in the position description attached as Exhibit A. The Director of Clinical Programs, in consultation with Dean and Employee, will review and, if appropriate, modify the position description on an annual basis in accordance with University and College of Law policies.

1.4. Compensation and Benefits. Employee will be paid at a fiscal year salary rate of $123,468.80 and will be eligible for University and College changes in employee compensation, if any, in accordance with applicable guidelines. Employee will be eligible for University benefits generally applicable to employees of his classification.

ARTICLE 2

2.1. Term. This Agreement is for a fixed-term appointment of five (5) years, commencing on December 1, 2016 and terminating on December 1, 2021, without further action by either party, unless sooner terminated in accordance with other provisions of this Agreement.

2.2. Discipline or Termination for Adequate Cause. During the term of this Agreement, Employee may be disciplined or terminated for adequate cause, as defined by Regents and University policies, and in accordance with the process set forth in the University’s Faculty-Staff Handbook.
2.3. **Termination Due to Discontinuance or Material Modification of Program.** During the term of this Agreement, Employee may be terminated upon twelve (12) months written notice from the Dean if the College discontinues or materially modifies the clinical programs or external programs.

2.4. **Renewal.** This Agreement is renewable solely upon an offer from the University and an acceptance by employee, both of which must be in writing and signed by the parties. A written offer of employment has been made by the College of Law and accepted by the Employee, subject to Board approval. This Agreement in no way grants to Employee a claim to tenure in employment.

2.5. **Process for Renewal.** At least six months prior to the expiration of this Agreement, the Dean will review Employee's responsibilities, performance, and conduct during the term of the Agreement. Based on this initial review, the Dean may recommend and initiate renewal of the Agreement or may initiate a comprehensive review. The comprehensive review will be conducted by a committee consisting of the members of the College's promotion and tenure committee plus the Director of Clinical Programs. The committee will evaluate Employee's responsibilities and effectiveness in the following areas: teaching; administration; service (College, University, professional, and public); and professional writing and communications. Evidence of effectiveness should include, but is not limited to, annual performance evaluations, student evaluations, professional writing and communications, input from the Employee, and input from the relevant constituencies both within and outside the College. Upon completion of its review, the committee will issue a written report with its findings and recommendations to the Dean, with a copy to the Employee. The Dean will then determine whether to renew this Agreement and will notify the Employee in writing of his decision and the basis for the decision.

**ARTICLE 3**

3.1. **Board Approval.** This Agreement will not be effective until and unless approved by the University's Board of Regents and fully executed by both parties as set forth below. In addition, the payment of any compensation pursuant to this Agreement will be subject to the approval of the University's Board of Regents, the President, and the Dean; the sufficiency of legislative appropriations; the receipt of sufficient funds in the account from which such compensation is paid; and Board of Regents and University rules regarding financial exigency.

3.2. **Assignment.** Neither party may assign its rights or delegate its obligations under this Agreement without the prior written consent of the other party.

3.3. **Waiver.** No waiver of any default in the performance of this Agreement will be effective unless in writing and signed by the waiving party. The waiver of a particular
breach in the performance of this Agreement will not constitute a waiver of any other or subsequent breach. The resort to a particular remedy upon a breach will not constitute a waiver of any other available remedies.

3.4 **Severability.** If any provision of this Agreement is determined to be invalid or unenforceable, the remainder of the Agreement will not be affected and will remain in effect.

3.5 **Governing Law.** This Agreement will be subject to and construed in accordance with the laws of the state of Idaho as an agreement to be performed in Idaho. Any action based in whole or in part on this Agreement will be brought in the courts of the state of Idaho.

3.6 **Oral Promises.** Oral promises of an increase in annual salary or of any supplemental or other compensation will not be binding upon the University.

3.7 **Force Majeure.** Any prevention, delay or stoppage due to strikes, lockouts, labor disputes, acts of God, inability to obtain labor or materials or reasonable substitutes therefor, governmental restrictions, governmental regulations, governmental controls, enemy or hostile governmental action, civil commotion, fire or other casualty, and other causes beyond the reasonable control of the party obligated to perform (including financial inability), will excuse the performance by such party for a period equal to any such prevention, delay or stoppage.

3.8 **Confidentiality.** Employee hereby consents and agrees that this document may be subject to disclosure upon University's receipt of a request pursuant to the Idaho Public Records Act.

3.9 **Notices.** Any notice under this Agreement will be in writing and be delivered in person or by public or private courier service (including U.S. Postal Service Express Mail) or certified mail with return receipt requested or by facsimile. All notices will be addressed to the parties at the following addresses or at such other addresses as the parties may from time to time direct in writing:

the University:  
Dean  
College of Law  
University of Idaho  
875 Perimeter Drive,  
MS 2321  
Moscow, Idaho 83844-2321
with a copy to: Director of Clinical Programs
College of Law
University of Idaho
875 Perimeter Drive
MS 2322
Moscow, Idaho 83844-2322

the Employee: Last known address on file with
University's Human Resources

Any notice will be deemed to have been given on the earlier of: (a) actual delivery or refusal to accept delivery, (b) the date of mailing by certified mail, or (c) the day facsimile delivery is verified. Actual notice, however and from whomever received, will always be effective.

3.10 Headings. The headings contained in this Agreement are for reference purposes only and will not in any way affect the meaning or interpretation hereof.

3.11 Binding Effect. This Agreement is for the benefit only of the parties hereto and will inure to the benefit of and bind the parties and their respective heirs, legal representatives, successors and assigns.

3.12 No Third Party Beneficiaries. There are no intended or unintended third party beneficiaries to this Agreement.

3.13 Entire Agreement; Amendments. This Agreement constitutes the entire agreement of the parties and supersedes all prior agreements and understandings with respect to the same subject matter. No amendment or modification of this Agreement will be effective unless in writing, signed by both parties, and approved by University's Board of Regents.

3.14 Opportunity to Consult with Attorney. Employee acknowledges that he has had the opportunity to consult and review this Agreement with an attorney. Accordingly, in all cases, the language of this Agreement will be construed simply, according to its fair meaning, and not strictly for or against any party.
Approved by the Board of Regents on the ____ day of ________________, 2016.

MEMORANDUM

Date: 4 May 2016

To: John M. Wiencek, Provost and Executive Vice President

From: Mark Adams, Dean, University of Idaho College of Law

Subject: Renewal of ABA-Required and Regents-Approved Five-Year Contract for Law Faculty Member Lee B. Dillion

As explained in the accompanying cover sheet for the Board of Regents, the American Bar Association requires in its accreditation Standard 405(c) -- and the Board approved in 2006 and again in 2011 -- a five-year renewable contract for Lee Dillion, Associate Clinical Professor of Law and Associate Dean for Boise Programs. Pursuant to paragraph 2.5 of the contract (attached), I have reviewed Lee Dillion’s responsibilities, performance, and conduct during the term of the contract. Based on that review, I recommend renewal of Lee Dillion’s contract – for the period December 1, 2016 through December 1, 2021 -- in the strongest and most unqualified terms. In elaborating on the basis for my recommendation, I should note up front that I have Lee Dillion’s consent publicly to disclose all the information provided below.

Lee Dillion’s performance in all areas of his responsibility has been outstanding, but his most extraordinary performance has concerned his central role in expanding the College’s presence in Boise. That presence has been steadily and successfully expanding during the current contract period. In 2011, Lee Dillion was implementing the expansion of the College of Law’s curricular offerings in Boise from a semester-long program of externships, in which law students participated in their final (sixth) semester, to a full third-year curriculum. In fall 2014, Lee Dillion headed a further expansion of the Boise curriculum, in which the College began offering second-year law courses at the Boise campus. Throughout this process, Lee Dillion also had chief responsibility for the plan to renovate the building known as the “old Ada County Courthouse” for use as a facility that the College of Law would share with the Idaho Supreme Court. In fall 2015, the College moved into this new facility, known as the Idaho Law and Justice Learning Center. Although Don Burnett provided the leadership and vision that guided this expansion, Lee Dillion worked hand-in-hand with Dean
(later Interim President) Burnett to transform that vision into reality. The result has been the establishment of a vibrant learning center, and a University of Idaho presence of which we can be proud, on the State Capital grounds.

Dean Dillion has also excelled in his other areas of other areas of responsibility. He has excelled as a teacher and mentor to students through his teaching of the College’s Small Business Legal Clinic, in which third-year law students assist small and start-up businesses referred to the clinic by the Idaho Small Business Development Center. Students in Lee Dillion’s clinic have almost universal praise for the valuable experiential learning opportunity that it offers and for the depth of knowledge and caring for his students that Lee Dillion models for them. In the course evaluations for the most recent semester in which he taught the course, one student, in an illustrative comment, praised Lee Dillion as an “amazing, gentle leader.” In addition to his teaching responsibilities, Lee Dillion oversees the College of Law’s Externship Program, in which third-year law students assist with legal work in public agencies and nonprofit organizations. Further, Lee Dillion has excelled in service to the University of Idaho Boise Center and the Idaho State Bar and Law Foundation. You may find details of his outreach and service in the attached university CV.

The high quality of Lee Dillion’s performance is reflected in his annual performance evaluations for the current contract period. Those evaluations include ones conducted by myself as well as former Dean Burnett and former Interim Dean Mike Satz (currently Executive Officer for Southwestern Idaho). We have consistently evaluated Lee Dillion’s performance as meeting or exceeding expectations. As Dean Burnett wrote when recommending the renewal of Lee Dillion’s contract in 2011, Lee Dillion is a treasure to the College of Law and to the University. I heartily concur in this assessment and strongly recommend that the University seek Board approval for another five-year term.
BOISE STATE UNIVERSITY

SUBJECT
Revised Purchasing Policy

REFERENCE
- February 2009: Boise State University (BSU) Annual Report to the Idaho State Board of Education (Board), discussion of need for delegated purchasing authority
- February 2010: BSU Annual Report to the Board, discussion of need for delegated purchasing authority
- June 2010: Board approved BSU Model Purchasing Policy
- August 2011: Board approved Colleges and Universities Revision of Model Purchasing Policy

APPLICABLE STATUTE, RULE, OR POLICY
- Section 67-5716 and 67-5728, Idaho Code
- Section 67-9225, Idaho Code (Effective July 1, 2016)

BACKGROUND/DISCUSSION
Section 67-5716, Idaho Code added in 2010 provides that the state institutions of higher education may establish policies and procedures for procuring and purchasing property that is substantially consistent to those required of other state agencies with Board approval, with the exception of those things that are covered by a state open contract. The Board approved BSU’s policy in June 2010 with amendments in August 2011. House Bill 538 (2016) repealed the state’s procurement sections of code, including Section 67-5716, Idaho Code, and recodified them, with amendments, in a new chapter, Chapter 92, Title 67, Idaho Code. The new language included in Section 67-9225, Idaho Code, allows the state institutions of higher education to acquire property that is covered by a state open contract from a non-statewide contract vendor when the property to be acquired is available from that vendor at a cost equal to or less than the statewide contract cost. Additional amendments contained in the new chapter require specific staff training and additional contract oversight.

Proposed changes to BSU’s purchasing policy makes technical corrections and adds language allowing the purchase of goods and services from non-open contract vendors with prior authorization as well as provisions for additional training and reporting.

IMPACT
Approval of the new policy will bring BSU’s procurement policy into alignment with the amendments to the state procurements laws made by House Bill 538 (2016)

ATTACHMENTS
STAFF COMMENTS AND RECOMMENDATIONS
The proposed update to BSU’s purchasing policy will align it with the revised purchasing procedures (established by House Bill 528 in the 2016 Legislative session) which will take effect in FY2017. Staff recommends approval.

BOARD ACTION
I move to approve Boise State University’s proposed revised purchasing policy as submitted in Attachment 1 and to find it substantially consistent with Title 67, Chapter 92 Idaho Code; and authorize the University to implement the revised purchasing policy effective July 1, 2016.

Moved by __________ Seconded by __________ Carried Yes _____ No _____
BOISE STATE PURCHASING POLICY

Purpose:
To establish policies and procedures governing purchases made with University funds.

Additional Authority:
Idaho State Board of Education Governing Policies and Procedures Section I.E.2.a
Idaho Code Section 59-1026
Idaho Code 67-5718(3)
-Idaho Code Section 67-9225

Scope:
Applies to all purchases made with University funds.

Responsible Party:
University Purchasing Director
426-1283

POLICY

I. Policy Statement

A. Procurement (purchasing) will be overseen by the Vice President of Finance and Administration. Daily operations have been delegated to the University Purchasing Director (UPD) and will be conducted in strict adherence with applicable federal and state laws and regulations and applicable State Board of Education and University policies.

B. Purchasing activities shall be administered in a manner that provides maximum practicable open competition appropriate to the type of product or service to be provided. Purchases shall support the goals of cost efficiency and good product/service quality, and these objectives shall be given consideration in the purchasing process.

C. Purchasing activities include transactions involving trade-ins, and leased property. Procurements do not include non-exchange transactions such as sponsorships and transactions not involving the expenditure of University funds.

D. The University owns all property purchased with University funds and all property received by the University as gifts. In addition, except where provided by the terms of a grant or contract by operation of law, the
University owns all personal property purchased with funds from a grant or contract. No department, departmental unit, or University employee, may hold proprietary interest in any piece of University property, or property purchased with grant or contract funds which is held by the University. Regardless of which departmental unit ordered the item, the fund cited, or the budget expensed, the principle of University ownership prevails.

E. This policy has been approved by the State Board of Education. Any changes to the policy shall be submitted in writing to the Executive Director for approval. The Executive Director may, in his or her discretion, refer proposed changes to the Board for approval.

II. Budget authority:

A. It shall be the responsibility of the requestor to determine and ensure funds are available and properly budgeted.

B. Terms may exceed one year provided that they are advantageous to the University and that such contracts contain no penalty to or restriction upon the University in the event cancellation is necessitated by a lack of financing for any such contract or contracts.

III. Requirements:

A. Small purchases are those purchases or procurements expected to cost one hundred thousand dollars ($100,000) or less. Costs are determined based on the following:

1. One-time purchases of property.

2. Total cost of a contract for services, including renewal or extension periods.

B. To enhance small business bidding opportunities, the University shall seek a minimum of three quotes from vendors having a significant Idaho economic presence as defined in Section 67-2349, Idaho Code. The request for quotation may be written, oral, electronic, telephonic or facsimile.

C. Large purchases, exceeding one hundred thousand dollars ($100,000) are procured through a formal sealed process. The issuance of Invitations to Bid (ITB) or Requests for Proposal (RFP) is the method for solicitation of offers from qualified vendors in a sealed process in order to establish pricing, specification or performance standards, and the terms and
conditions for the purchase of goods and services. The University shall ensure adequate ITB’s or RFP’s are prepared which clearly define the goods and services needed in order for bidders to properly respond to the request. At the place, date, and time set forth in the solicitation, all bids or proposals received in accordance with the submittal requirements in the solicitation shall be publically opened and read aloud by the buyer to those persons present.

D. Notice of solicitations of bids or proposals for large purchases may be electronic in nature. The University may apply the use of a variety of techniques, including but not limited to, reverse auction, electronic posting or electronic advertisement of solicitations as appropriate to the buying situation. Large purchase notices, regardless of methodology, are referenced in the vendor section of the University purchasing department’s website.

E. Preference for Idaho suppliers for purchases:

1. Reciprocal preference will be given to Idaho vendors in accordance with Idaho Code Section 67-2349, Idaho Code.

2. Printing services will be awarded to local vendors in accordance with Idaho Code Section 60-101 -103, Idaho Code.

F. Where multiple bids and quality of property offered are the same, preference shall be given to property of local and domestic production and manufacture or from bidders having a significant Idaho economic presence.

G. The University recognizes that an offered low price is not always indicative of the greatest value. Contracts will be awarded by the University pursuant to determination by the UPD of the best value to the University based on the criteria outlined in the solicitation. Award of contracts in excess of amounts as proscribed in State Board of Education (SBOE) policy V.I.3 a require the approval of the Executive Director of the State Board of Education or the State Board of Education in a public meeting.

H. No vendor or related party, or subsidiary, or affiliate of a vendor may submit a bid to obtain a contract to provide property to the University, if the vendor or related party, or affiliate or subsidiary was paid for services utilized in preparing the bid specifications or if the services influenced the procurement process.
I. No property to be acquired shall be accepted which does not meet the minimum bid specifications.

IV. Waiver of competitive bidding (Sole Source):

The determination to waive the competitive bid process may be made only by the UPD. Any request by a department to restrict a purchase to one potential supplier must be accompanied by an explanation as to why no other item is suitable or that no other vendors exist to meet the need. A requirement for a particular proprietary item does not justify a sole source purchase if there is more than one potential source for that item. The University purchasing department shall conduct negotiations, as appropriate, to determine price, availability, and terms.

V. Exemptions from bidding:

A. Purchases under $10,000

B. Bulk Contract purchasing

1. State Open Contracts
   a) Certain commodities are procured through open contracts by the State of Idaho Division of Purchasing in order to obtain the lowest possible pricing for all agencies.

b) No officer or employee shall fail to utilize an open contract without justifiable cause for such action. Justifiable cause shall be determined by the Administrator of the State Division of Purchasing and Vice President of Finance and Administration. Approved deviations from open contract use will be administered by the UPD. Deviation from approved open contracts must be in the best interests of the university and will only be considered in extreme cases.

2. Purchases from General Services Administration Federal Supply Contractors are allowed when the acquisition is advantageous to the University unless covered by State open contracts with approval from the UPD.
3. Where no state open contract exists, state institutions of higher education (as defined in 67-5728) operating under the SBOE approved model purchasing policy, may collaborate with each other or the University of Idaho on solicitations where the combined volume of multiple institutions will provide the best value.

C. Government and Agency acquisitions:
   1. Rehabilitation agency acquisitions.
   2. Correctional industries acquisitions.
   3. Federal government acquisitions including federal surplus.
   4. Interagency contracts, including contracts with other institutions of higher education.
   5. The University may contract with any one or more other public agencies or institution of higher education to perform any governmental service, activity, or undertaking which each public agency entering into the contract is authorized by law to perform, including, but not limited to joint contracting for services, supplies and capital equipment, provided that such contract shall be authorized by the governing body of each party to the contract.

D. Situational acquisitions:
   1. Legal advertising, publication or placement of advertisements directly with media sources.
   2. Contracts for legal services or bond related services.
   3. Professional, consultant and information related technology services costing $100,000 or less.
   4. University employee education, training and related travel expenses costing $100,000 or less.
   5. Purchases with special educational discounts offered by vendors exclusively to schools, colleges, universities, and other educational institutions where the property is for the express purpose of educating students.
6. Concession services where there is no expenditure of University funds.

7. Services for which competitive solicitation procedures are impractical.

8. Medical director and medical professional services.

9. Property held for resale, such as bookstore inventory.

10. Purchase of copyrighted materials available primarily from the publisher.

E. Emergency Purchases
1. The UPD, or designee, may authorize emergency purchases of goods and services when determined necessary and in the best interest of the University. Examples of circumstances that could necessitate an emergency purchase include:
   a) Unforeseen or beyond the control of the University or constituting a force majeure.
   b) Present a real, immediate or extreme threat to the proper performance of essential University functions.
   c) May reasonably be expected to result in excessive loss or damage to property or other resources, and/or bodily injury or loss of life.

2. Any affected department may make an emergency purchase in the open market at the best attainable price when a documented emergency condition exists and the need cannot be met through the University's normal procurement method, provided that:
   a) Funds are available for the purchase.
   b) Verbal authorization is obtained from the Office of the Vice President for Finance and Administration.
   c) Competition to the fullest extent practicable under existing circumstances is obtained and documented.
d) The unit cost of the purchase does not exceed amount requiring SBOE Executive Director approval as prescribed in SBOE policy V.I.3.a.

3. A fully signed explanation of the circumstances surrounding the emergency and the necessity for the purchase is filed by the requester with the UPD within two working days after such purchase or cessation of emergency conditions, whichever is later.

F. Direct Negotiations

1. In lieu of competitive bidding, and when not covered by a State open contract, negotiations may be conducted whenever any of the following conditions are applicable and authorized by the UPD:

   a) The public good as determined by the UPD will not permit the competitive bid process due to time constraints.

   b) No responsive or responsible bids are received at acceptable levels of price, service or terms.

   c) Approved sole source scenarios.

   d) The purchase is for experimental, developmental or research work, or for the manufacture of furnishing of property for experimentation, development, research or test.

   e) Where there is a particular savings through the use of educational discounts.

   f) Acquisition of federal surplus or excess property

VI. Qualification of Vendors:

A. No vendor shall be allowed to submit a bid unless such vendor is qualified. All vendors are qualified unless disqualified.

B. Vendors may be disqualified for any of the following reasons:

1. Failure to perform according to the terms of any agreement.

2. Attempts by whatever means to cause acquisition specifications to be drawn so as to favor a specific vendor.
3. Actions to obstruct or unreasonably delay acquisitions by the University. Obstruction is hereby defined as a lack of success in more than fifty percent (50%) of the appeals made in each of three (3) different acquisitions during any twenty-four (24) month period.

4. Perjury in a vendor disqualification hearing.

5. Debarment, suspension or ineligibility from federal contracting of the vendor, its principals or affiliates.

6. Any reason in Idaho law that would disqualify a particular vendor for a particular bid

C. A vendor shall be notified by registered mail within ten (10) days of disqualification and may, within thirty (30) days of the receipt of such notice, challenge the disqualification.

D. Disqualification or conditions may be imposed for a period of not more than five (5) years.

VII. Appeals:

A. Elements of a formal sealed bid that are appealable include:

1. Bid specifications

2. Determination by the university that the bid is non-responsive and does not comply with the bid invitation and specifications

3. Award to a successful vendor

B. For formal procurements utilizing the sealed bid process, the detailed process for appeals will be referenced within the posted bid information and specification package.

C. In addition, sole source determinations are appealable. The detailed process for appeal will be referenced in the legal notice.

D. Any appeal will be reviewed and a written decision setting forth reasons for denial will be provided or if upheld an amendment (for a specification or intent to award appeal) to the original bid or sole source determination will be posted.
E. Submitting a bid to the University constitutes standard acceptance of this policy including the appeals process.

F. Small purchases or purchases that are exempted from bidding requirements are not appealable.

VIII. Ethics Requirements

A. All faculty, staff and students at the University are required to adhere to the intent and spirit of these policies and directives. They are designed as a means to acquire the necessary goods and services as effectively and economically as possible, while also maintaining compliance with the laws of the State of Idaho. Employees are subject to penalties as described in Idaho Code, including, but not limited to those in Section 67-923015726.

B. Employees are prohibited from obtaining goods or services by avoiding the competitive process through such actions as splitting purchases, creating false emergency situations, and purchasing outside non-use of statewide open contracts without authorization.

C. Any effort to circumvent or abuse State and University purchasing regulations and policies or procedures will not be condoned and is subject to disciplinary action up to and including dismissal.

D. Purchasing Ethics and Vendor Relationships

1. All employees are involved in business transacted by the University in one form or another. Especially so are those professional purchasers and other personnel who purchase items and services, including those using the University P-card. Each employee has a personal responsibility to conduct University business in an ethical manner and assure the integrity of the purchasing and procurement processes.

2. Conflict of interest:

   a) A conflict of interest occurs when a person's private interests compete with his or her professional obligations to the University to a degree that an independent observer might reasonably question whether the person's professional actions or decisions are materially affected by personal considerations, including but not limited to personal gain, financial or otherwise.
b) Employees are therefore prohibited from entering into service contracts with or selling goods to the University.

3. Influencing/conspiring to influence:

The University prohibits the influencing or conspiring to influence purchasing decisions and contract awards. Attempts at influence may include kickbacks and bribes, peddling or payment of a fee, back door selling, hard-sell tactics, fraternization, or offering gifts to avoid following published procedures or gain advantages.

4. Post issuance contract oversight is required to guarantee the University receives all goods and services as per the terms of the agreement. Boise State Policy #6030 describes roles and responsibilities for contract management.

E. It is the responsibility of the University Purchasing Director to ensure that procurement staff are properly trained to execute their duties efficiently and in accordance with laws and regulations.
SUBJECT
State General Education Committee Appointments

REFERENCE
October 2014 The Board approved membership of the General Education Committee.
February 2014 The Board received a CCI Plan update that focused exclusively on General Education Reform and approved the first reading of proposed new policy III.N, General Education.
April 2014 The Board approved the second reading of proposed new Policy III.N, General Education.

BACKGROUND/DISCUSSION
Board Policy III.N, provides that the General Education Committee will review the competencies and rubrics of the General Education framework for each institution to ensure its alignment with AAC&U Essential Learning Outcomes and that faculty discipline groups will have ongoing responsibilities for ensuring consistency and relevance of General Education competencies related to their discipline. The General Education Committee consists of a representative from each of the institutions appointed by the Board; a representative from the Division of Career-Technical Education; and, as an ex officio member, a representative from the Idaho Registrars Council.

The College of Western Idaho (CWI), Idaho State University (ISU) and the University of Idaho (UI) have forwarded names for consideration to formally replace committee members due to administrative/structural changes on campuses.

IMPACT
The proposed appointment replaces CWI, ISU and UI representatives on the Committee.

ATTACHMENTS
Attachment 1 – Current Committee membership Page 3

STAFF COMMENTS AND RECOMMENDATIONS
The College of Western Idaho has hired a new General Education Coordinator, Ms. Jana McCurdy who will resume responsibilities on campus currently filled by Ms. Brenda Pettinger. The University of Idaho identified Dr. Kenton Bird to replace Dr. Rodney Frey who has retired, and Idaho State University identified Dr. Margaret Johnson to replace Dr. Jim DiSanza for the 2016-17 academic year.

Board staff recommends approval.
BOARD ACTION

I move to appoint Ms. Jana McCurdy, representing the College of Western Idaho; Dr. Margaret Johnson representing Idaho State University; and Dr. Kenton Bird, representing the University of Idaho to the General Education Committee, effective immediately.

Moved by __________ Seconded by __________ Carried Yes _____ No ______
Cindy Bond is an Instructional Dean at the College of Southern Idaho.

Larry Briggs is the Dean of General Studies at North Idaho College.

Mary Flores is the Dean for Academic Programs at Lewis-Clark State College.

Rodney Frey is the Director of General Education at the University of Idaho.

Peggy Nelson is the Division Manager for the General Education Division at Eastern Idaho Technical College.

Brenda Pettinger is the Associate Vice President for Academic Affairs at the College of Western Idaho.

Vicki Stieha is the Director of the Foundational Studies Program at Boise State University.

James DiSanza is a Professor and Department Chair.

Susan Johnson is the Director of Program Standards at the Division of Professional-Technical Education.

Kris Collins is the Registrar at Boise State University.
SUBJECT
Idaho Experimental Program to Stimulate Competitive Research (EPSCoR) Committee Appointment

REFERENCE
February 2014 Board appointed Matt Borud as the Commerce Representative to the Idaho EPSCoR Committee (Replacing Gynii Gilliam)
October 2014 Board appointed Dr. Todd Allen as the INL Representative to the Idaho EPSCoR Committee (Replacing Dr. Hill)
February 2015 Board appointed Senator Tibbits to the Idaho EPSCoR Committee (Replacing Senator Goedde)
April 2015 Board appointed Dr. Cornelis J. Van der Schyf to the Idaho Experimental Program to Stimulate Competitive Research (replacing Dr. Howard Grimes)
October 22, 2015 Board reappointed Doyle Jacklin and appointed Gynii Gilliam and Senator Roy Lacey (replacing Doug Chadderdon and Senator Tippits, respectively)

APPLICABLE STATUTE, RULE, OR POLICY
Idaho State Board of Education Governing Policies & Procedures, Section III.W.

BACKGROUND/DISCUSSION
The Experimental Program to Stimulate Competitive Research (EPSCoR) represents a federal-state partnership to enhance the science and engineering research, education, and technology capabilities of states that traditionally have received smaller amounts of federal research and development funds. As a participating state, Idaho EPSCoR is subject to federal program requirements and policy established by the Idaho State Board of Education (Board). The purpose of EPSCoR is to build a high-quality, academic research base to advance science, technology, engineering and mathematics (STEM) to stimulate sustainable improvements in research and development capacity and competitiveness.

Idaho EPSCoR is guided by a committee of sixteen (16) members appointed by the Board for five (5) year terms. The membership of this committee is constituted to provide for geographic, academic, business and state governmental representation as specified in Board policy including the Vice Presidents of Research from the University of Idaho, Boise State University, and Idaho State University. Additional Ex-officio members consist of a representative from the Idaho National Laboratory, and a representative from the Idaho Department of Commerce. Members are allowed to serve up to three (3) consecutive terms.

The Idaho EPSCoR Committee is recommending the appointment of Dr. Kelly Beierschmitt as the representative for the Idaho National Laboratory, replacing Todd Allen.
STAFF COMMENTS AND RECOMMENDATIONS
The Idaho National Laboratory (INL) has recommended to the Idaho EPSCoR Committee that Dr. Beierschmitt replace Todd Allen on the Committee as INL's representative. Positions on the Committee representing specific organization are subject to the will of the Board and are not term limited. Dr. Beierschmitt also serves as a member of the Board’s Higher Education Research Committee.

Board staff recommends approval.

BOARD ACTION
I move to appoint Dr. Beierschmitt to the Idaho Experimental Program to Stimulate Competitive Research Idaho Committee as a representative of the Idaho National Laboratory effective immediately.

Moved by___________ Seconded by___________ Carried Yes_____ No_____

Dr. Laird Noh, Chair
Idaho EPSCoR Committee
University of Idaho
872 Perimeter Dr.
MS 3029
Moscow, ID 83844-3029

SUBJECT: Appointment to the Idaho EPSCoR Committee

Dear Dr. Noh:

It is my understanding that I am being considered for appointment to the Idaho EPSCoR Committee, and I am pleased to submit this letter expressing my willingness to serve on the committee.

If I can answer any questions concerning my appointment please do not hesitate to call.

I look forward to meeting the staff and volunteers of the Committee.

Sincerely,

[Signature]

Dr. Kelly Beierschmitt, Deputy Laboratory Director
Science & Technology
   Chief Research Officer

RLO

Attachment
Dr. Kelly Beierschmitt is currently the Deputy Laboratory Director for Science and Technology and Chief Research Officer at Idaho National Laboratory (INL). He has over 30 years of experience in engineering, nuclear and materials-related R&D, production, and operations management. Kelly reports to the INL Laboratory Director and is responsible for providing strategic leadership, direction, and integration for research, science and technology at INL. As chief research officer Kelly is responsible for a broad research portfolio including, energy and materials sciences, global security R&D and nuclear energy. This work spans from fundamental science to applied R&D within an annual operating budget around $1 Billion.

He served as INL's deputy for Nuclear and Laboratory Operations from January 2014 to January 2016 and was responsible for providing strategic leadership, direction, and integration for all nuclear and laboratory operations at the INL including Materials and Fuels Complex (MFC), which is INL's center for fuel fabrication and post irradiation testing; and Advanced Test Reactor (ATR) Complex, designated as a National Scientific User Facility and is available to universities and industry for conducting in-core experiments vital to nuclear energy technology and materials development. He is also responsible for providing strategic leadership and direction to the Transient Reactor Test Facility (TREAT), specifically built to conduct transient reactor tests where the test material is subjected to neutron pulses that can simulate conditions ranging from mild upsets to severe reactor accidents. Kelly is also responsible for providing strategic direction to effect revitalization of the INL physical infrastructure and help advance research and development through management of key infrastructure components supporting Laboratory missions.

Kelly began his career at Pantex as a weapons engineer. He was responsible for the assembly, disassembly and testing of several of the nation's nuclear assemblies. While at Pantex, Kelly held several key roles that ranged from providing leadership to enhance the safeguards and security program to being responsible for high explosives production, storage and disposal. Kelly left Pantex in 1996 as the Department Manager of the Facilities Startup organization where he was responsible for commissioning and early operation of the plant's new modern weapons production, testing, assembly and storage facilities.

Following a decade at Pantex, Kelly moved to the Pacific Northwest National Laboratory where he provided support to DOE's International Nuclear Safety Program's Chernobyl evaluation. He was also a principal on a task force to conduct a priority facility environmental vulnerability analysis at Brookhaven National Laboratory, which included the hot cell facility, old graphite reactor, High Flux Beam Reactor, and Medical Reactor. Kelly served in two key leadership roles while at PNNL; Director of Quality and Deputy Director of Environment Safety and Health.
also served as an adjunct faculty member at Washington State University, Mechanical Engineering Department while working in the Pacific Northwest.

Kelly joined Oak Ridge National Laboratory in January of 2000 as Director of the Environment, Safety, Health and Quality Directorate (ESH&Q). He was responsible for developing, operating, and continuously improving ESH&Q management systems and providing ESH&Q services that enabled mission accomplishment. He also led the enhancement and implementation of ORNL's Integrated Safety Management System.

In 2004 Kelly assumed the role of Director of the Nuclear Operations Directorate where he led the renewal of ORNL's nuclear facilities capabilities bringing them up to modern standards. This included renewing HFIR to extend its mission for neutron scattering, materials irradiation, and isotope production, and consolidating ten nuclear facilities into four modern facilities with state-of-the-art capabilities. He has extensive experience in isotope production, from target preparation, irradiation, processing, and shipping, as part of the production of actinium, californium and other isotopes either produced or processed at ORNL.

Following this assignment, Kelly was Associate Laboratory Director (ALD) of the Nuclear Science and Engineering Directorate (NSED) and the Executive Director of HFIR. As Director of NSED, Kelly's experience included the development and management of complex systems used to study materials under broad time and length scales, fuel cycle and isotopes research; design, development, modeling and simulation of reactor and nuclear systems; and the development and implementation of nuclear security technology. Kelly was responsible for initiatives to build a small modular reactor to provide carbon-free electricity to the laboratory, the Consortium for Advanced Simulation of Light Water Reactors (CASL), and the cleanup of the laboratory's legacy nuclear and radiological facilities.

Kelly has played a national and international leadership role in support of nuclear science and technology, including isotope production. Kelly has helped lead the transition of the DOE Isotope Program at ORNL from the Office of Nuclear Energy to the Office of Nuclear Physics. As part of this transition, he led the development of a production model for $^{252}$Cf that is providing a reliable, cost-effective source of this isotope to the community. He has also advised the Office of Nuclear Physics on models for production of other key isotopes during this transition.

Completing his time at ORNL and just prior to joining INL, Kelly was the ALD of the Neutron Sciences Directorate responsible for the Spallation Neutron Source (SNS), the world's most powerful pulsed neutron source. This responsibility included leading a community of scientists dedicated to the study of the structure and dynamics of quantum condensed matter, biology and soft matter, chemistry and engineered materials through the application of neutron scattering techniques and supporting over 3,000 users annually. He was also responsible for the operation of the High Flux Isotope Reactor (HFIR), an 85 megawatt research reactor dedicated to neutron scattering, materials irradiation, and isotope production. During his time as ALD, he successfully oversaw the power up-ramp to 1.2 megawatts of proton energy on the target; and he updated the scientific strategy for the SNS supported by the scientific community to identify those research priorities leading to a full build-out of instruments on existing beam-lines, and the need for a second target station. During this period, Kelly served extensively on international advisory boards including support to ISIS at the Rutherford Appleton Laboratory; the European Spallation Source (ESS) in England; the Open Pool Australian Lightwater Reactor (OPAL) in Australia; and Japan Proton Accelerator Research Complex (J-PARC) in Japan.
EDUCATION

Ph.D., Industrial Engineering (Operational Analysis, Risk, Reliability Engineering), Texas Tech University
B.S., Engineering Mathematics (emphasis in Chemical Engineering and minor in Chemistry), West Texas A&M University

Director, Quality, Pacific Northwest National Laboratory (PNNL) 1999 - 2000
Deputy Director, Environment, Safety and Health (ES&H), PNNL, 1996 - 1999
Adjunct Faculty, Washington State University, Mechanical Engineering Department
Manager, Facility Readiness, Pantex 1995 - 1996
Manager, ES&H/Waste Management (WM) Integration Department, Pantex 1993 - 1995
Manager, Operations Support and Senior Project Engineer, Production 1990 - 1993
Engineering and Risk Management Department, Pantex
Staff Member, Gas Analysis, Chemistry and Production Departments, 1984 - 1990
Mason & Hanger, Silas Mason Co. Inc.,

PROFESSIONAL HIGHLIGHTS

Professional Service:
• Member, Technical Working Group on Research Reactors (TWGRR) of the International Atomic Energy Agency (IAEA), DOE
• Member, Nuclear Science Advisory Committee's Isotopes Subcommittee, DOE
• Member, Office of Science and Technology Policy (OSTP) intergovernmental panel for the emergency production of Molybdenum 99
• Member, National Nuclear Security Administration (NNSA)-led merit review committee to evaluate technical feasibility of new technologies to address domestic production of Moly-99 beyond 2014, DOE
• Member, Committee of Visitors, Nuclear Science Advisory Committee, DOE
• Member, Dean's Council, Texas Tech University
• Charter Member, Bredesen Center for Interdisciplinary Research and Graduate Education at the University of Tennessee
• Member, Japan Proton Accelerator Research Complex (J-PARC) Advisory Board
• Chairman, the DOE National Laboratories Improvement Council (NLIC)
• Member, Industrial Advisory Board for Oklahoma State University
• Member, United Way Board for Roane County
• Member, Higher Education Research Council for Idaho State Board of Education

Professional Registrations: Certified Safety Professional in Comprehensive Practice; Registered Professional Engineer in Texas

Professional Memberships: Member, American Nuclear Society, Materials Research Society, American Society for Quality Control, and American Society of Safety Engineers
SUBJECT
Appointments to the Data Management Council

APPLICABLE STATUTE, RULE, OR POLICY
Idaho State Board of Education Governing Policies & Procedures, Section I.O.

BACKGROUND/DISCUSSION
The Data Management Council (Council) is tasked with making recommendations on the oversight and development of Idaho’s Statewide Longitudinal Data System (SLDS) and oversees the creation, maintenance and usage of said system. There are 12 seats on the Council. The Council consists of representatives from the Office of the State Board of Education (OSBE), public postsecondary institutions, a registrar, State Department of Education, school districts, Professional-Technical Education, and the Department of Labor.

Each year, half of the seats are up for appointment. Each term is 2 years commencing on July 1st. The candidates for reappointment are:

Georgia Smith (Idaho Department of Labor)
Don Coberly (Boise School District)
Chris Campbell (State Department of Education)
Matthew Rauch (Kuna School District)
Shari Ellertson (Boise State University)

Ken Campbell (College of Southern Idaho) has chosen to not seek reappointment to the Data Management Council. It is proposed that Connie Black, the Registrar at the College of Western Idaho, be appointed to the Council and would fill the seat vacated by Ken Campbell as a representative of a community college.

IMPACT
Appointment of these individuals will fill all seats on the Data Management Council.

ATTACHMENTS
Attachment 1 – Current Council Membership

STAFF COMMENTS AND RECOMMENDATIONS
All of the individuals being considered for reappointment have been active members of the Council and have expressed an interest in continuing to serve.

Staff recommends approval.

BOARD ACTION
I move to approve the reappointment of Georgia Smith, Don Coberly, Chris Campbell, Matthew Rauch, and Shari Ellerton and appointment of Connie Black to the Data Management Council for terms starting on July 1, 2016 – June 30, 2018.

Accountability Oversight Committee (Committee) Appointment

REFERENCE
June 2015 Board approved second reading to amend Board Policy I.Q.
August 2015 Board approved the appointment of Deborah Hedeen and the reappointment of John Goedde and Jackie Thomason.
April 2016 Board approved second reading of amendment to Board Policy I.Q. to revise the Accountability Oversight Committee membership by adding a fifth at-large member who has a background in special education.
May 2016 Board approved the appointment of Roger Stewart and Julian Duffey.

APPLICABLE STATUTE, RULE, OR POLICY
Idaho State Board of Education Governing Policies & Procedures, Section I.Q. Accountability Oversight Committee

BACKGROUND/DISCUSSION
The Committee was established in April 2010 as an ad-hoc committee of the Idaho State Board of Education. It provides oversight of the K-12 statewide assessment system, ensures effectiveness of the statewide system, and recommends improvements or changes as needed to the Board.

The Committee consists of:
- The Superintendent of Public Instruction or designee,
- Two Board members, and
- Five at-large members appointed by the Board, one of whom must have a special education background.

Effective July 1, 2016, the Committee will have one vacancy for an at-large member. Spencer Barzee, Superintendent of Westside School District, will be completing his current term on June 30, and is not seeking reappointment.

The Committee reviewed resumes from four superintendents and is recommending that Rob Sauer be appointed for a two-year term on the Committee. Mr. Sauer’s resume is provided as Attachment 2. The other three candidates considered were: Marc Gee, Superintendent of Preston School District, Monte Woolstenhulme, Superintendent of Teton School District, and Joel Wilson, Superintendent of Butte County School District.

IMPACT
Approval of Rob Sauer will fill all the at-large seats on the Committee.
STAFF COMMENTS AND RECOMMENDATIONS

Pursuant to Board Policy I.Q., terms run from July 1 through June 30 of the applicable year. In making at-large appointments to the Committee, consideration should be given to the appointees' background, representative district/school size, and regional distribution.

Board Policy does not specify that the at-large positions must be representatives of any specific group other than the one member possessing a special education background. Having a mix of individuals with diverse backgrounds has helped to better inform committee discussions.

BOARD ACTION

I move to approve the appointment of Rob Sauer to the Accountability Oversight Committee for a term of 2 years commencing July 1, 2016 and ending on June 30, 2018.

Gooding County Commissioner 2001-2005
  • Served a four year term as an elected official in Gooding County. Served as chairman of the board from 2003-2005
  • Regional 991 Center (SIRCOMM) Board of Directors
  • 5th Judicial District Magistrate Commission
  • Magic Valley Youth Court Advisory Board
  • Idaho Human Rights Education Center Board Member
SUBJECT
President Approved Alcohol Permits Report

APPLICABLE STATUTE, RULE, OR POLICY

BACKGROUND/DISCUSSION
The chief executive officer of each institution may waive the prohibition against possession or consumption of alcoholic beverages only as permitted by, and in compliance with, Board policy. Immediately upon issuance of an Alcohol Beverage Permit, a complete copy of the application and the permit shall be delivered to the Office of the State Board of Education, and Board staff shall disclose the issuance of the permit to the Board no later than the next Board meeting.

The last update presented to the Board was at the April 2016 Board meeting. Since that meeting, Board staff has received forty-eight (48) permits from Boise State University, eleven (11) permits from Idaho State University, and thirty-one (31) permits from the University of Idaho.

Board staff has prepared a brief listing of the permits issued for use. The list is attached for the Board’s review.

ATTACHMENTS
Attachment 1 - List of Approved Permits by Institution

BOARD ACTION
This item is for informational purposes only. Any action will be at the Board's discretion.

SUBJECT
Requests for approval to transport students less than one and one-half miles for the 2015-2016 school year.

REFERENCE
June 2013  Board approved the request for 100 school districts and 12 charter schools to transport students less than one and one-half miles for the 2012-2013 school year.

June 2014  Board approved the request for 99 school districts and 10 charter schools to transport students less than one and one-half miles for the 2013-2014 school year.

June 2015  Board approved the request for 95 school districts and twelve charter schools for approval to transport students less than one and one-half miles for the 2014-2015 school year.

APPLICABLE STATUTE, RULE, OR POLICY
Section 33-1006 and 33-1501, Idaho Code

BACKGROUND/DISCUSSION
Section 33-1006, Idaho Code, states, “The State Board of Education (Board) shall determine what costs of transporting pupils, including maintenance, operation and depreciation of basic vehicles, insurance, payments under contract with other public transportation providers whose vehicles used to transport pupils comply with federal transit administration regulations, “bus testing,” 49 CFR part 665, and any revision thereto, as provided in subsection (4)(d) of this section, or other state department of education approved private transportation providers, salaries of drivers, and any other costs, shall be allowable in computing the transportation support program of school districts.”

The transportation support program of a school district shall be based upon the allowable costs of transporting pupils less than one and one-half (1½) miles as provided in Section 33-1501, Idaho Code, when approved by the Board.

Standards for Idaho School Buses and Operations states, “All school districts submitting applications for new safety busing reimbursement approval shall establish a board policy for evaluating and rating all safety busing requests. The State Department of Education (SDE) staff shall develop and maintain a measuring instrument model, which shall include an element for validating contacts with responsible organizations or persons responsible for improving or minimizing hazardous conditions. Each applying district will be required to annually affirm that conditions of all prior approved safety busing requests are unchanged. The local board of trustees shall annually, by official action (33-1502, Idaho Code), approve all new safety busing locations. School districts that
receive state reimbursement of costs associated with safety busing will re-evaluate all safety busing sites at intervals of at least every three years using the local board adopted measuring or scoring instrument. In order to qualify for reimbursement the local school board will, by official action, approve the initial safety-busing request and allow the students in question to be transported before the application is sent to the state. Consideration for reimbursement is contingent on the application being received by the SDE Transportation Section on or before March 31 of the school year in which the safety busing began.”

All requests must be submitted on the Safety Busing form found on the Pupil Transportation website. Reminders are emailed to all districts and charter schools prior to March 31st. All requests being recommended for approval are compliant with Section 33-1006, Idaho Code.

Ninety-eight (98) school districts and thirteen (13) charter schools affecting 28,169 students applied for safety busing using the correct form and are being recommended for approval.

ATTACHMENTS
Attachment 1 – 2015-2016 Safety Busing Requests

STAFF COMMENTS AND RECOMMENDATIONS
SDE annually reviews and approves the application requests that meet the Board requirements which is then sent on to the Board for approval.

BOARD ACTION
I move to approve the requests by ninety eight (98) school districts and thirteen (13) charter schools for approval to transport students less than one and one-half miles as submitted in Attachment 1.

Moved by _________ Seconded by _________ Carried Yes _____ No _____

SUBJECT
Student Transportation Funding Cap Waivers

REFERENCE
June 2013  Board approved the request for four school districts to receive a funding cap waiver for the 2012-2013 school year
June 2014  Board approved the request for six school districts to receive a funding cap waiver for the 2013-2014 school year.
June 2015  Board approved the request for ten school districts to receive a funding cap waiver for the 2014-2015 school year.

APPLICABLE STATUTE, RULE, OR POLICY
Section 33-1006, Idaho Code

BACKGROUND/DISCUSSION
During the 2001 session, the Idaho Legislature amended Section 33-1006, Idaho Code. The amendment created a student transportation funding cap affecting school districts that exceed the statewide average cost per mile and cost per rider by 103%. The 2007 and 2009 Legislatures further amended this language to provide clear objective criteria defining when a district may qualify to be reimbursed for expenses above the cap, and by how much. This new criteria designates certain bus runs as “hardship” runs, and allow the district to receive a higher cap, based on the percentage of the district’s bus runs that are categorized.

As of April 20, 2016, there were twenty-two (22) school districts and/or charter schools negatively affected by the pupil transportation funding cap:

</table>
Of these twenty-two (22), only eight (8) districts have routes meeting the statutory requirements of a hardship bus run allowing the Board to grant a waiver. These include Garden Valley, Highland, Meadows Valley, Moscow, Mountain View, Orofino, St. Maries and Lapwai school districts. All eight (8) of these districts have applied for a waiver from the student transportation funding cap.

**Garden Valley School District**
Garden Valley School District submitted three school bus routes that met the required criteria. This represents 30% of the bus runs operated by the district. When added to the 103% funding cap, as provided by law, this would allow the Board to increase their funding cap to a maximum of 133%.

**Highland School District**
Highland School District submitted four school bus routes that met the required criteria. This represents 40% of the bus runs operated by the district. When added to the 103% funding cap, as provided by law, this would allow the Board to increase their funding cap to a maximum of 143%.

**Meadows Valley School District**
Meadows Valley School District submitted one school bus route that met the required criteria. This represents 25% of the bus runs operated by the district. When added to the 103% funding cap, as provided by law, this would allow the Board to increase their funding cap to a maximum of 128%.

**Moscow School District**
Moscow School District submitted four school bus routes that met the required criteria. This represents 12.5% of the bus runs operated by the district. When added to the 103% funding cap, as provided by law, this would allow the Board to increase their funding cap to a maximum of 115.5%.

**Mountain View School District**
Mountain View School District submitted three school bus routes that met the required criteria. This represents 13% of the bus runs operated by the district. When added to the 103% funding cap, as provided by law, this would allow the Board to increase their funding cap to a maximum of 116%.
Orofino School District
Orofino School District submitted two school bus routes that met the required criteria. This represents 13% of the bus runs operated by the district. When added to the 103% funding cap, as provided by law, this would allow the Board to increase their funding cap to a maximum of 116%.

St. Maries School District
St. Maries School District submitted two school bus routes that met the required criteria. This represents 9.5% of the bus runs operated by the district. When added to the 103% funding cap, as provided by law, this would allow the Board to increase their funding cap to a maximum of 112.5%.

Lapwai School District
Lapwai School District submitted two school bus routes that met the required criteria. This represents 36% of the bus runs operated by the district. When added to the 103% funding cap, as provided by law, this would allow the Board to increase their funding cap to a maximum of 139%.

103% Funding Cap Appeal Application for Fiscal Year: Use Tab Key To Enter Data

District Name: Garden Valley Number: 71 Date: January 20, 2016

The school district identified above is subject to a pupil transportation funding cap in accordance to 33-1006, Idaho Code, and is appealing to the State Board of Education for relief from financial penalty due to a hardship bus run(s). To qualify such bus run(s) shall meet at least two (2) of the following criteria:

( Please check all applicable boxes by using mouse key).

☐ Number of student riders per mile is less than 50% of the statewide average number of student riders per mile (see call E5 on Funding Cap Model).

☐ Less than a majority of the miles on the hardship bus run(s) are by paved surface, concrete or asphalt, road

☐ Over 10% of the miles driven on the hardship bus run(s) are a 5% slope or greater

The district is requesting a funding rate increase of 30.00% more than the 103% percentage rate limit, necessary to eliminate its funding cap penalty, in accordance to 33-1006, Idaho Code. The State Board of Education may set a new limit that is greater than 103%, but is less than the percentile limit requested by the school district. However, the percentage increase in the 103% cap shall not exceed the percentage of the district's bus runs that qualify as a hardship bus run.

Please provide detailed justification and rationale for this request and appeal. Report the total number of bus routes and detailed information on the routes that are potentially considered hardship bus runs. If necessary, attach supporting information and documentation. Save document prior to submitting electronically. Submit to SDE by February 13, 2015.

Loman and Southfork have hardship runs

Loman am Run meets the requirements for the funding cap appeal as checked above. This route averages 14 riders per 76 miles daily run which equals .18 riders per mile which is below the state requirement of 50% of the statewide average number of riders per mile (.85). Loman am run travels 76 miles a day, of which 11 miles has a slope of 5% or greater which equals 14% of the route which is greater than the state requirement of 10% of the miles. These conditions were previously verified by SDE officials.

Loman pm Run meets the requirements for the funding cap appeal as checked above. This route averages 18 riders per 77 miles daily run which equals .23 riders per mile which is below the state requirement of 50% of the statewide average number of riders per mile (.85). Loman pm run travels 77 miles a day, of which 11 miles has a slope of 5% or greater which equals 14% of the route which is greater than the state requirement of 10% of the miles. These conditions were previously verified by SDE officials.

Southfork PM Run meets the requirements for the funding cap appeal as checked above. This route averages 3 riders per 5 miles daily run which equals .60 riders per mile which is below the state requirement of 50% of the statewide average number of riders per mile (.85). Southfork pm run travels 5 miles a day, with 3.5 unpaved miles which equals .70%, which is more than the majority on unpaved surface. These conditions were previously verified by SDE officials.

We have 10 runs; therefore, these run represent 30% of our runs.

103% Funding Cap Appeal Application for Fiscal Year:

Use Tab Key To Enter Data

Table 9  Page 7

District Name: Highland Jt.  Number: 305  Date: January 20, 2016

The school district identified above is subject to a pupil transportation funding cap in accordance to 33-1006, Idaho Code, and is appealing to the State Board of Education for relief from financial penalty due to a hardship bus run(s). To qualify, such bus run(s) shall meet at least two (2) of the following criteria:

(Please check all applicable boxes by using mouse key).

- Number of student riders per mile is less than 50% of the statewide average number of student riders per mile (see cell E5 on Funding Cap Model).
- Less than a majority of the miles on the hardship bus run(s) are by paved surface, concrete or asphalt, road
- Over 10% of the miles driven on the hardship bus run(s) are a 5% slope or greater

The district is requesting a funding rate increase of 40.00% more than the 103% percentage rate limit, necessary to eliminate its funding cap penalty, in accordance to 33-1006, Idaho Code. The State Board of Education may set a new limit that is greater than 103%, but is less than the percentile limit requested by the school district. However, the percentage increase in the 103% cap shall not exceed the percentage of the district's bus runs that qualify as a hardship bus run.

Please provide detailed justification and rationale for this request and appeal. Report the total number of bus routes and detailed information on the routes that are potentially considered hardship bus runs. If necessary, attach supporting information and documentation. Save document prior to submitting electronically. Submit to SDE by February 29, 2016.
Route 3 and 5, hardship routes.

Route 3/AM meets the requirements for the funding cap appeal as checked above. This run averages 18 riders per 38 miles daily run which equals .47 riders per mile which is below the state requirement of 50% of the statewide average number of riders per mile (.85). Route 3 run travels 38 miles a day, of which 5 miles has a slope of 5% or greater which equals 13% of the run which is greater than the state requirement of 10% of the miles. These conditions were previously verified by SDE officials.

Route 3/PM meets the requirements for the funding cap appeal as checked above. This run averages 23 riders per 38 miles daily run which equals .61 riders per mile which is below the state requirement of 50% of the statewide average number of riders per mile (.85). Route 3 run travels 38 miles a day, of which 5 miles has a slope of 5% or greater which equals 13% of the run which is greater than the state requirement of 10% of the miles. These conditions were previously verified by SDE officials.

Route 5/ AM run meets the requirements for the funding cap appeal as checked above. This run averages 5 riders per 55 miles daily run which equals .09 riders per mile which is below the state requirement of 50% of the statewide average number of riders per mile (.85). Route 5/AM run travels 55 miles of road, with 47 unpaved miles which equals .85%, which is more than the majority on unpaved surface.

Route 5/ PM run meets the requirements for the funding cap appeal as checked above. This run averages 5 riders per 55 miles daily run which equals .09 riders per mile which is below the state requirement of 50% of the statewide average number of riders per mile (.85). Route 5/PM run travels 55 miles of road, with 47 unpaved miles which equals .85%, which is more than the majority on unpaved surface.

We have 10 runs; therefore, these runs represent 40%.

Superintendent Signature: ____________________________ Date: 1-26-16

Route 2-2 PM, meet the hardship criteria

Route 2-2 PM run meets the requirements for the funding cap appeal as checked above. This run averages 11 riders per 19 miles daily run which equals .58 riders per mile which is below the state requirement of 50% of the statewide average number of riders per mile (.85).

Route 2-2 PM run travels 19 miles of road, with 10 unpaved miles which equals .53%, which is more than the majority on unpaved surface.

We have 4 runs; therefore, these runs represent 25%.

Superintendent Signature: [Signature] Date: [Date]

The State Board of Education approved disapproved the district’s appeal and request at its regularly scheduled meeting on at a Funding Cap Rate of % greater than the 103% percentage rate limit, necessary to eliminate the funding cap penalty.
STATE DEPARTMENT OF EDUCATION

SHERRI YBARRA
STATE SUPERINTENDENT
PUBLIC INSTRUCTION

Division of Student Transportation

103% Funding Cap Appeal Application for Fiscal Year:

District Name: Moscow Number: 281 Date: January 20, 2016

The school district identified above is subject to a pupil transportation funding cap in accordance to 33-1006, Idaho Code, and is appealing to the State Board of Education for relief from financial penalty due to a hardship bus run(s). To qualify, such bus run(s) shall meet at least two (2) of the following criteria:

(Please check all applicable boxes by using mouse key).

☐ Number of student riders per mile is less than 50% of the statewide average number of student riders per mile (see cell E5 on Funding Cap Model).

☐ Less than a majority of the miles on the hardship bus run(s) are by paved surface, concrete or asphalt, road

☐ Over 10% of the miles driven on the hardship bus run(s) are a 5% slope or greater

The district is requesting a funding rate increase of 12.50% more than the 103% percentage rate limit, necessary to eliminate its funding cap penalty, in accordance to 33-1006, Idaho Code. The State Board of Education may set a new limit that is greater than 103%, but is less than the percentile limit requested by the school district. However, the percentage increase in the 103% cap shall not exceed the percentage of the district's bus runs that qualify as a hardship bus run.

Please provide detailed justification and rationale for this request and appeal. Report the total number of bus routes and detailed information on the routes that are potentially considered hardship bus runs. If necessary, attach supporting information and documentation. Save document prior to submitting electronically. Submit to SDE by February 29, 2016.

Moscow Verbiage for Cap waiver: 101, 102 and 110 have hardship runs. These conditions were verified by SDE officials.

Route 101 am run meets the requirements for the funding cap appeal as checked above. This run averages 20 riders per 46 miles daily run which equals .43 riders per mile which is below the state requirement of 50% of the statewide average number of riders per mile (.85). Route 101 am run has 46 miles total with 16 miles at 5% slope or more, which equals 35.88% of the route which is greater than the state requirement of 10% of the miles.

Route 101 pm run meets the requirements for the funding cap appeal as checked above. This run averages 28 riders per 45 miles daily run which equals .62 riders per mile which is below the state requirement of 50% of the statewide average number of riders per mile (.85). Route 101 pm run has 45 miles total with 16 miles at 5% slope or more, which equals 35% of the route which is greater than the state requirement of 10% of the miles.

Route 102 am run meets the requirements for the funding cap appeal as checked above. This run averages 28 riders per 37 miles daily run which equals .76 riders per mile which is below the state requirement of 50% of the statewide average number of riders per mile (.85). Route 102 pm run has 37 miles total with 5.5 miles at 5% slope or more, which equals 15% of the route which is greater than the state requirement of 10% of the miles.

Route 110 am run meets the requirements for the funding cap appeal as checked above. This run has 30 miles of road with 16 unpaved which equals .53, which is more than the majority on unpaved surface. Route 110 am run has 30 miles total with 7 miles at 5% slope or more, which equals 23% of the route which is greater than the state requirement of 10% of the miles.

We have 32 runs, therefore, these runs represent 12.5% of our routes.

Superintendent Signature: [Signature] Date: 1/29/2016

The State Board of Education approved the district's appeal and request at its regularly scheduled meeting on ______ at a Funding Cap Rate of ______% greater than the 103% percentage rate limit, necessary to eliminate the funding cap penalty.
The school district identified above is subject to a pupil transportation funding cap in accordance to 33-1006, Idaho Code, and is appealing to the State Board of Education for relief from financial penalty due to a hardship bus run(s). To qualify, such bus run(s) shall meet at least two (2) of the following criteria:

(Please check all applicable boxes by using mouse key).

- Number of student riders per mile is less than 50% of the statewide average number of student riders per mile (see cell E5 on Funding Cap Model).
- Less than a majority of the miles on the hardship bus run(s) are by paved surface, concrete or asphalt, road.
- Over 10% of the miles driven on the hardship bus run(s) are a 5% slope or greater.

The district is requesting a funding rate increase of **13.00%** more than the 103% percentage rate limit, necessary to eliminate its funding cap penalty, in accordance to 33-1006, Idaho Code. The State Board of Education may set a new limit that is greater than 103%, but is less than the percentile limit requested by the school district. However, the percentage increase in the 103% cap shall not exceed the percentage of the district's bus runs that qualify as a hardship bus run.

Please provide detailed justification and rationale for this request and appeal. Report the total number of bus routes and detailed information on the routes that are potentially considered hardship bus runs. If necessary, attach supporting information and documentation. Save document prior to submitting electronically. Submit to SDE by February 29, 2016.

Mountain View school district has a total of 10 routes that meet the hardship criteria, have included 3. (Kooskia routes)

Battle Ridge route meets the requirements for the funding cap appeal for all three criteria's. It averages 23 riders per 60.6 miles daily run which equals .38 riders per mile which is below the state requirement of 50% of the statewide average number of riders equal to .85. It has 60.6 miles of road with 36.8 unpaved which equals .60, which is more than the majority on unpaved surface. It has 60.6 miles total with 10.6 miles at 5% slope, which equals 17% of the route which is greater than the state requirement of 10% of the miles.

Clearwater route meets the requirements for the funding cap appeal for two of the criteria's. It averages 21 riders per 70 miles daily run which equals .30 riders per mile which is below the state requirement of 50% of the statewide average number of riders per mile = .85. It has 70 miles total with 12 miles at 5% slope, which equals 17% of the route which is greater than the state requirement of 10% of the miles.

Lukes Gulch route meets the requirements for the funding cap appeal for two of the criteria's. It averages 19 riders per 47 miles daily run which equals .40 riders per mile which is below the state requirement of 50% of the statewide average number of riders per mile = .85. It has 47 miles total with 8.8 miles at 5% slope, which equals 18% of the route which is greater than the state requirement of 10% of the miles.

We have 23 routes, and these represent 13% of our routes.
Division of Student Transportation

103% Funding Cap Appeal Application for Fiscal Year:

District Name: Orofino  Number: 171  Date: January 20, 2016

The school district identified above is subject to a pupil transportation funding cap in accordance to 33-1006, Idaho Code, and is appealing to the State Board of Education for relief from financial penalty due to a hardship bus run(s). To qualify, such bus run(s) shall meet at least two (2) of the following criteria:

(Please check all applicable boxes by using mouse key).

- Number of student riders per mile is less than 50% of the statewide average number of student riders per mile (see cell E5 on Funding Cap Model).
- Less than a majority of the miles on the hardship bus run(s) are by paved surface, concrete or asphalt, road
- Over 10% of the miles driven on the hardship bus run(s) are a 5% slope or greater

The district is requesting a funding rate increase of 13.00% more than the 103% percentage rate limit, necessary to eliminate its funding cap penalty, in accordance to 33-1006, Idaho Code. The State Board of Education may set a new limit that is greater than 103%, but is less than the percentile limit requested by the school district. However, the percentage increase in the 103% cap shall not exceed the percentage of the district’s bus runs that qualify as a hardship bus run.

Please provide detailed justification and rationale for this request and appeal. Report the total number of bus routes and detailed information on the routes that are potentially considered hardship bus runs. If necessary, attach supporting information and documentation. Save document prior to submitting electronically. Submit to SDE by February 29, 2016.
Orofino Jr. school district has a total of 6 routes that meet the hardship criteria, have included two.

Orofino school district route 10 meets the requirements for the funding cap appeal as checked above. This route averages 23 riders per 95 miles daily run which equals .24 riders per mile which is below the state requirement of 50% of the statewide average number of riders per mile (.85). Route 10 has 95 miles total with 12 miles at 5% slope or more, which equals 12% of the route which is greater than the state requirement of 10% of the miles. These conditions were verified by SDE officials. This is a hardship route.

Orofino school district route 11 meets the requirements for the funding cap appeal as checked above. This route averages 54 riders per 86 miles daily run which equals .71 riders per mile which is below the state requirement of 50% of the statewide average number of riders per mile (.85). Route 11 has 76 miles total with 46 miles at 5% slope or more, which equals 60% of the route which is greater than the state requirement of 10% of the miles. These conditions were verified by SDE officials. This is a hardship route.

We have 15 routes; therefore, these routes represent 13% of our routes.

Division of Student Transportation

103% Funding Cap Appeal Application for Fiscal Year: 2015

District Name: St. Maries  Number: 41  Date: January 20, 2016

The school district identified above is subject to a pupil transportation funding cap in accordance to 33-1006, Idaho Code, and is appealing to the State Board of Education for relief from financial penalty due to a hardship bus run(s). To qualify, such bus run(s) shall meet at least two (2) of the following criteria:

(Please check all applicable boxes by using mouse key).

- Number of student riders per mile is less than 50% of the statewide average number of student riders per mile (see cell E5 on Funding Cap Model).
- Less than a majority of the miles on the hardship bus run(s) are by paved surface, concrete or asphalt, road
- Over 10% of the miles driven on the hardship bus run(s) are a 5% slope or greater

The district is requesting a funding rate increase of 9.50% more than the 103% percentage rate limit, necessary to eliminate its funding cap penalty, in accordance to 33-1006, Idaho Code. The State Board of Education may set a new limit that is greater than 103%, but is less than the percentile limit requested by the school district. However, the percentage increase in the 103% cap shall not exceed the percentage of the district's bus runs that qualify as a hardship bus run.

Please provide detailed justification and rationale for this request and appeal. Report the total number of bus routes and detailed information on the routes that are potentially considered hardship bus runs. If necessary, attach supporting information and documentation. Save document prior to submitting electronically. Submit to SDE by February 28, 2016.
Route B meets the requirements for the funding cap appeal as checked above. This route averages 31 riders per 101 miles daily run which equals .31 riders per mile which is below the state requirement of 50% of the statewide average number of riders per mile (.85).

Route B has 101 miles of road with 66 unpaved which equals .65, which is more than the majority on unpaved surface.

Route B has 101 miles total with 23 miles at 5% slope, which equals 23% of the route which is greater than the state requirement of 10% of the miles. These conditions were previously verified by SDE officials.

Route C meets the requirements for the funding cap appeal as checked above. This route averages 21 riders per 35 miles daily run which equals .60 riders per mile which is below the state requirement of 50% of the statewide average number of riders per mile (.85).

Route B has 35 miles total with 14 miles at 5% slope, which equals 40% of the route which is greater than the state requirement of 10% of the miles. These conditions were previously verified by SDE officials.

Superintendent Signature: __________________________ Date: __________
The school district identified above is subject to a pupil transportation funding cap in accordance to 33-1006, Idaho Code, and is appealing to the State Board of Education for relief from financial penalty due to a hardship bus run(s). **Notes:**
- **D** This column is for informational purposes only.
- **AA** Percentage of hardship waiver received from district.
- **AP** I calculated the amount before the waivers were applied.
- **AQ** Difference between reimbursement amounts with and without waivers.

For the most part, the amount in AQ is the same as in C meaning their waiver % was high enough to cover the total amount that was capped.

Garden Valley for example, asked for 30% waiver but they would have needed 63% to get total amount in column c.

On the flip side, St Maries asked for 9.5% but only needed 6% so they just get back what they need but not more.

(looking at either column Q or R)
SUBJECT
Adoption of curricular materials and related instructional materials as recommended by the Curricular Materials Selection Committee (CMSC).

REFERENCE
June 2008 Board approved the current Mathematics Curricular Review.
August 2015 Board deferred the adoption of updated Mathematics curricular materials until such time as an additional review could be completed by the committee.

APPLICABLE STATUTE, RULE, OR POLICY
Sections 33-118, 333-118A, Idaho Code
Idaho State Board of Education Governing Policies & Procedures, Section V.B.8.
IDAPA 08.02.03.128 - Rules Governing Thoroughness

BACKGROUND/DISCUSSION
The Administrative Rules of the State Board of Education, IDAPA 08.02.03.128, describe the adoption process for curricular materials as an adoption cycle of six (6) years. Curricular materials are defined as "textbook and instructional media including software, audio/visual media and internet resources" (Idaho Code 33-118A.) Idaho is a multiple adoption state which means Idaho recommends multiple titles from multiple publishers in a specific content area. The CMSC is charged with the responsibility to screen, evaluate, and recommend curricular materials for adoption by the State Board of Education.

An additional review of the Mathematics curricular materials was completed as directed by the Board at the August 2015 Board meeting. The curricular materials review week was held March 7-9, 2016. Ninety-seven content area specialists assisted the eight selection committee members in the evaluation of the curricular materials.

IMPACT
The adoption process in Idaho provides for the continuous review and evaluation of new curricular materials. This process ensures that Idaho schools have quality products available to purchase at a guaranteed low price, and equal availability to all Idaho school districts. This process maintains local control in the choice of instruction materials by providing multiple lists of approved materials. The adoption process also provides, through a contract with each publisher, a contract price that is good for the length of the adoption cycle. This ensures quality for each school district and allows for the best materials at the lowest possible price for Idaho’s schools.

ATTACHMENTS
Attachment 1 – 2016 Curricular Materials Recommendations Document Page 3
STAFF COMMENTS AND RECOMMENDATIONS
At the August 2015 Board meeting, concern was expressed by some Board members that, based on some of the reviewer comments, the review of the math materials appeared to have not been entirely based on their alignment to the state content standards. The Board requested the approval of the math curricular material be deferred until such time as an additional review can be completed by the committee.

The definitions of the rating (classification) for each recommendation may be found on page 4 of Attachment 1.

BOARD ACTION
I move to approve the adoption of the Mathematics curricular materials and related instructional materials as recommended by the Curricular Materials Selection Committee as submitted in Attachment 1.

Moved by __________ Seconded by __________ Carried Yes _____ No ______
2016 Curricular Materials Recommendations

Curricular Materials Adoption Process

Idaho State Department of Education

Sherri Ybarra,
State Superintendent of Public Instruction
Introduction

The State Curricular Materials Selection Committee is pleased to submit the following materials for your consideration for adoption in the state of Idaho. The 2016 Session called for reviewing curricular materials in the interim subject area of Mathematics.

Several of these materials have accompanying electronic instructional media. Others are deliverable via CD-ROM or the Online on the Internet.

The Curricular Materials Selection Committee considers their work an important contribution to the educational process in Idaho. This Committee reflects the diversity of Idaho’s population both geographically and philosophically. Occasionally the approval of a certain material is not a unanimous decision by the Committee.
The Curricular Materials adoption process has its basis in Idaho Code (33-118, 333-118A). It is further defined in the Administrative Rules of the State Board of Education (SBOE), IDAPA 08.02.03, subsection 128.

The Adoption Process in Idaho provides for the continuous review and evaluation of new curricular materials. This process ensures that Idaho schools have quality products available to purchase at a guaranteed low price, and equal availability to all Idaho school districts. This process maintains local control in the choice of instruction materials by providing multiple lists of approved materials. The adoption process also provides, through a contract with each publisher, a contract price that is good for the length of the adoption cycle. This ensures quality for each school district and allows for the best materials at the lowest possible price for Idaho’s schools. It is recommended that districts choose materials from the list of vetted and approved materials. School districts are not required to choose materials from this list.

Idaho adopts materials in the areas of English Language Arts, Dictionary, Thesaurus, and Speech; Limited English Proficiency/English Language Development; Mathematics; Professional Technical Education: Agriculture and Natural Resources, Business and Marketing Education, Engineering and Technology, Family and Consumer Sciences, Health Professions, Individualized Occupational Training, and Skilled and Technical Sciences; Humanities: Interdisciplinary, World Languages, Art, Drama/Theatre, Dance, Music; Drivers Education; Healthy Life Styles: Health/Wellness, and Physical Education; Social Studies: History, Geography, and Government; Economics; Science; and Computer Applications (adopted annually).

Materials are adopted in Idaho on a six-year rotating schedule. Publishers have an additional one year following the main adoption year to submit new copyrights for a particular content area, allowing each of the content area submissions a total of two years. The intent of the adoption process is to generally approve all materials meeting the established criteria and to reject those items that are considered unsuitable for use in their designated subject area.

There are advantages to adopting curricular materials at the state level:
- Contract prices are adhered to for six years (five years for interim adopted materials), which saves money for the schools.
• Publishers are required to lower the price to Idaho if they lower it to any other state after the Idaho contract has been signed.

• Most textbook publishers maintain inventory at the state depository, Caxton Printers, Ltd. which reduces delivery time and shipping costs.

• Contracts help ensure adopted materials will be available for the life of the contract (6 years).

• Materials are screened for quality, organization, vocabulary and graphic presentation. Textbooks publishers must submit Manufacturing Standards and Specifications for Textbooks (MSST) standards compliance form for each title.

• Materials are screened for fair representation on such issues as environment and industry.

• Instructional materials are screened and thoroughly reviewed by subject area experts to ensure that essential elements are covered.

• Any materials reflecting adversely upon individuals or groups due to race, ethnicity, class, gender, or religion are not approved.

• Small school districts are guaranteed to get the same textbooks and complementary materials as larger school systems.

Curricular materials in Idaho are defined as textbooks and instructional media including software, audio/visual material and internet based instructional material (Idaho Code 33-118A). Idaho is a multiple adoption state and adopts a number of materials in a designated subject area from a variety of publishing companies. This is consistent with the belief that a variety of materials has value and usefulness to the schools.

The Curricular Materials Selection Committee, which is appointed by the State Board of Education (SBOE), has the responsibility of overseeing the adoption process for the state. The Executive Secretary of this Committee is an employee of the State Department of Education (SDE).

The membership on the Selection Committee is comprised of at least 10 members who may include:

• secondary administrator(s)

• elementary administrator(s)

• secondary teacher(s)

• elementary teacher(s)
• parent representative(s)
• district school board member(s)
• representative from private/parochial schools
• representative who is not a public school educator nor trustee
• representative(s) from the state’s colleges of education
• representative from the Division of Professional-Technical Education
• content area coordinator(s) from the State Department of Education
• the Executive Secretary from the State Department of Education

All members are appointed by the SBOE for a five-year term with the exception of the SDE content coordinators and the representative from Professional-Technical Education who serve for one year. Current Committee members are listed in a separate document.

The Committee, assisted by specialists from throughout the state, meet for one week in June to review and correlate all materials to the Common Core State Standards and/or the Idaho Content Standards and specific course requirements. The Committee votes on the materials and those recommended are forwarded to the SBOE for official adoption for Idaho Schools. All meetings of the Committee are open to the public.

Following formal adoption, contracts are mailed to the publishing companies. After the return of signed contracts, the listing of newly adopted materials will be published in the State Department of Education website Adoption Guide found at: http://www.sde.idaho.gov/academic/curricular/materials.html.

A state curriculum library is maintained at Caxton as required by Idaho Code 118A. Adopted materials are housed in this library and available to the public. In addition, seven (7) Regional Centers maintain libraries of adopted materials that are available to the public as well as college students and local schools. The Regional Centers are located as follows:

N.L. Terteling Library
College of Idaho
Caldwell, Idaho

Instructional Materials Center
Idaho State University
Pocatello, Idaho

Albertson Library
Boise State University
Boise, Idaho

Curriculum Library
Lewis Clark State College
Lewiston, Idaho
Complete addresses for the Regional Centers can be found at the Schools/Regional Centers link: http://www.sde.idaho.gov/academic/curricular/contact/Curricular-Materials-Regional-Centers.pdf.

The Committee considers all requests and maintains the rights to either recommend continued adoption or remove any materials from the adopted list.

2016 Curricular Materials and Online Resources Recommendations

Curricular Materials Recommendations - Interim Year Adoption

It was moved by Laree Jansen, seconded by Stacey Jensen, and carried that the curricular materials listed and marked as approved in the Subject Area Review Books for the Interim Year Adoption of Mathematics materials and their accompanying ancillary materials, notes, and where indicated, instructional software, be recommended by the Idaho State Curricular Materials Selection Committee to the Idaho State Board of Education for adoption and use in the public schools of Idaho in accordance with the policies and regulations of the Idaho State Board of Education.

Adjournment

Motion for adjournment was made by Laree Jansen, seconded by a Unanimous Vote, and carried to adjourn the meeting on March 9, 2016.

Respectfully submitted,

Elizabeth Flasnick
Executive Secretary
2016 Curricular Materials Selection Committee Recommendations

K-12 Mathematics
Classifications of Curricular Materials:

Core Mathematics Program- a complete stand-alone program which meets the focus, coherence and rigor of the Idaho Core Mathematics Standards, with minimal or no need for supplemental materials. Substantial evidence clearly supports the designation of this program as Core.

Other Mathematics Program- a program that substantially, but partially, meets the focus, coherence and rigor of the Idaho Core Mathematics Standards, with some need for supplemental materials. Substantial evidence clearly supports the designation of this program as Other.

Component Mathematics Program- a program designed and intended to be used with another program. This program supports and/or enhances the focus, coherence and rigor of Core and Other Programs. Substantial evidence clearly supports the designation of this program as Component.

Intervention Program- a program designed and intended to target and support students’ specific needs. Substantial evidence clearly supports the designation of this program as Intervention.

### Notes:

Strengths: This book is much “smaller” in comparison to many other text books. This is due to the coherence to the CCSS with basic review instead of comprehensive review of previous grades.

The teacher’s edition is an invaluable resource that gives multiple lesson strategies, presentations of learning, and motivational strategies.

The curriculum is CCSS aligned with strict obedience to the mathematical practices and grade level vocabulary.

Hardback student text will hold up better than other books.

### Key Features:

- What You Learned Before
- Essential Questions
- What Is Your Answer?
- Meaning of the Word
- Key Vocabulary
- Key Ideas
- Now You’re Ready
- On Your Own
- Check It Out
- Vocabulary and Concept Check
- Practice and Problem Solving
- Error Analysis
- Taking Math Deeper
- Fair Game Review

</tr>
</tbody>
</table>

**Notes:**

**Strengths:**
- Lots of resources for students, teacher, and parents
- Laurie’s notes are a great resource for teachers
- Progression is great across all grades
- Different paths for regular and accelerated

**Weaknesses:**
- ELL suggestions don’t include writing prompts or realia.
- Laurie’s notes there are times where one specific method is said to be the only way to solve a problem (pg. T-100) when in fact, mathematically there are multiple ways one can arrive at the correct answer.

**Key Features:**
- What You Learned Before
- Essential Questions
- What Is Your Answer
- Meaning of the Word

</tbody>
</table>

**Notes:**

**Strengths:**
- This book is “smaller” in comparison to other math text books. This is due to the coherence to the CCSS with basic review instead of comprehensive review throughout the text.
- Many resources to help support the teacher and also the students learning at different ability levels.
- Hardback text which would hold up to multiple year use.
- The curriculum is CCSS aligned with strict adherence to the mathematical practices and grade level vocabulary.
- This book follows the accelerated Traditional Pathway found in Appendix A of the Mathematics CCSS. The standards covered in this book align directly with the Overview of the Accelerated Traditional Pathway for the CCSS found on pages 82-91 of Appendix A. Every standard is covered.

**Weaknesses:**
- The visual design is a little elementary. Otherwise, a very well designed textbook.

**Key Features:**
- What You Learned Before
- Essential Questions
- What Is Your Answer?
- Meaning of the Word
- Key Vocabulary
- Key Ideas
- Now You’re Ready
- On Your Own
- Check It Out
- Vocabulary and Concept Check
- Practice and Problem Solving

## Notes:
Overall the material aims to meet the needs of all learners. There are many attempts at building conceptual understanding that work and some that ultimately end up being procedural in nature. There are plenty of support materials and suggestions for teachers. The student’s Record and Practice Journal is a great tool for recording work on the group/partner activities utilized throughout the materials. There are a variety of assessment materials to choose from and including alternative assessments. Each of the assessment items includes either an item analysis or a scoring rubric (alternative assessment only). There are plenty of online resources for students to access and a Skills Review and Basic Skills Handbook. This does not however, indicate grade level or content standard aligned to the skills. The pacing allows adequate time for students to work through the concepts including many group and partner tasks.

Visually, the book is busy and seems jam-packed. Teachers will need to be selective in what they choose to ask students to work on. Teachers will need to push students to higher levels of instruction on mathematical practice standards. This is an area of weakness of this text. The standards are present and addressed, but are not pushing students to think critically or apply their own strategies and models to solve.

## Key Features:
- What You Learned Before
- Essential Questions
- What Is Your Answer?
- Meaning of the Word
- Key Vocabulary
- Key Ideas
- Now You’re Ready
- On Your Own
- Check It Out
- Vocabulary and Concept Check
- Practice and Problem Solving
- Error Analysis
- Taking Math Deeper
- Fair Game Review
- Study Help – Graphic Organizers
- Cartoons
- Standards Assessment
- Laurie’s Notes in the Teaching Edition
<table>
<thead>
<tr>
<th>Publisher</th>
<th>Title of Material</th>
<th>Author</th>
<th>Copyright</th>
<th>Grade Level</th>
<th>ISBN</th>
<th>Recommendation</th>
</tr>
</thead>
</table>

Notes:

Strengths:
- Clear communication and visible connections across clusters/concepts throughout text

Weaknesses:
- Little explicit attention to comparing various strategies to develop ability to apply
opportunistic strategies-leads to perhaps weaker conceptual understanding of procedures.

**Key Features:**
- Maintaining Mathematical Proficiency
- Mathematical Practices
- Essential Questions
- Communicate Your Answer
- Core Vocabulary
- Core Concepts
- Monitoring Progress
- Vocabulary and Core Concept Check
- Monitoring Progress and Modeling with Mathematics
- Error Analysis
- How Do You See It?
- Thought Provoking
- Maintaining Mathematical Proficiency
- What Did You Learn?
- Standards Assessments

---|---|---|---|---|---|---

**Notes:**
- Strengths:
  - Problems with scaffolding and differentiation
• Laurie’s Notes for beginning and advanced teachers
• Spiraling curriculum
• Lots of explorations
• List of postulates and theorems at end of text
• Dynamic real world applications
• Each chapter begins with a common core progression (ex T-298)
• Well developed, particularly if teacher uses Laurie’s Notes

Weaknesses:
• Connection between the written textbook and the online components is not readily apparent within the lessons.
• No examples or diagrams in glossary

**Key Features:**

**Notes:**
- Text is well organized, flows well.
- Supports: differentiation ideas, ELL supports, Math Practices
- Leads with vocabulary, tying lessons/chapters nicely together
- Appropriate formatting (i.e. text size)
- Well developed
- Lots of guidance for teachers with Laurie’s Notes

**Key Features:**
- Maintaining Mathematical Proficiency
- Mathematical Practices
- Essential Questions
- Communicate Your Answer

Notes:
Strengths:
- Quality exercises
- Covers Widely Applicable Prerequisites, standards, and mathematical practices
- Requires the students to write about their thinking and discuss with other students
- Extensive online resources

Weaknesses:
- Lacks accommodations for English Language Learners and gifted students
- Mathematical Practices are not clearly marked in the teacher or student texts
- Paperback, would have to be replaced often or lots of copies would need to be made
- Multiple books for the students and teachers
- Not a good text to picture ratio
- Bland and boring in appearance
- There are no examples that are fully worked out so that a student who was absent from class could go back and try and learn the material on their own

It is worth noting, that in order to adopt Carnegie Learning in high school it would be necessary to adopt the same curriculum at least in grades 6-8.

Key Features:
The Carnegie Learning Algebra I 3rd Edition text was developed to support students as they build their mathematical understanding and make connections both from previous years and within the different mathematical clusters outlined in the Common Core State Standards for Mathematics, as specified in Appendix A Pathways. The materials were strongly influenced by research into how students learn mathematics and how to best motivate them to succeed academically.

The instructional design of the Carnegie Learning Algebra I 3rd Edition text includes:
- A student-centered approach that focuses on students thinking about and discussing mathematics as active participants in their learning.

- Tasks that make use of models—real-world situations, graphs, diagrams, and worked examples, among others—to help students see and make connections between different topics.

- Questions written to promote analysis, to develop higher-order-thinking skills, and to encourage students to seek mathematical relationships.

The instructional materials provide investigations, applications, and practice with on-course-level problems. The consumable Student Text is the primary classroom resource and provides a record of the students' thinking, reasoning, and problem solving. The Lessons, each comprised of several Problems, were written to engage and motivate students, develop conceptual understanding and procedural fluency, and provide opportunities for students to assess their own understanding. The goal of the instructional materials is for students to view mathematics as a set of related topics rather than as a set of discrete topics. Students should understand why algorithms work, not just memorize procedures.

Each Lesson within the Student Text:

- Demonstrates the usefulness of mathematics in the real world

- Provides access for all students

- Connects to and builds upon prior knowledge and experiences

- Develops conceptual and procedural knowledge

- Requires thinking, modeling, reasoning, and explaining mathematical ideas

- Engages students in accountable discourse

- Provides opportunities to assess student understanding

Each Problem within a Lesson exhibits one of these attributes:

- New concept development through problem solving and investigations

- Continued practice of concepts in new situations

- Immediate practice for concepts that have been developed

- Distributive practice to reach mastery and to allow for connections to prior concepts

- Synthesis of key mathematical concepts and understandings

*Student Assignments* and *Skills Practice Worksheets* additional practice and engagement through the Carnegie Learning Online Resource Center. The *Student Assignments* provide opportunities for students to practice and apply their understanding of the mathematical objectives addressed in the corresponding student lesson. The *Student Skills Practice* is a supplemental resource that provides targeted practice of discrete skills within each student lesson. Each *Skills Practice* worksheet contains two sections—vocabulary and problem sets. Also provided on the Carnegie Learning Online Resource Center are See It-Try It videos. These videos explore, animate, or demonstrate a key concept or collection of concepts. Each
video is tagged with its corresponding text Lesson and Problem.

Each chapter includes a variety of Assessments, e.g., Pre-test, Post-test, Mid-Chapter, End of chapter, and Standardized Test Practice. Additionally, Assessments and additional practice worksheets can easily be generated through the ExamView test generator.

Carnegie Learning Algebra I 3rd Edition Table of Contents

- Quantities and Relationships
- Graphs, Equations, and Inequalities
- Linear Functions
- Sequences
- Exponential Functions
- Systems of Equations
- Analyzing Data Sets for One Variable
- Introduction to Quadratic Functions
- Polynomials and Quadratics
- Solving Quadratic Equations and Inequalities
- Real Number Systems
- Other Functions and Inverses

**Notes:**

**Strengths:**
- Guided discussion format & approach good
- Consumable materials are appealing & not overwhelming
- Lesson themes used to introduce section and carried through
- Adaptable for all students through focus on communication

**Weaknesses:**
- Specific helps for ELLs & other needs could be more explicit
- Two distinct manuals for Assignments & Skills Practice could be seen as a weakness

**Key Features:**
The Carnegie Learning Geometry 3rd Edition text was developed to support students as they build their mathematical understanding and make connections both from previous years and within the different mathematical clusters outlined in the Common Core State Standards for Mathematics, as specified in Appendix A Pathways. The materials were strongly influenced by research into how students learn mathematics and how to best motivate them to succeed academically.

The instructional design of the Carnegie Learning Geometry 3rd Edition text includes:
- A student-centered approach that focuses on students thinking about and discussing mathematics as active participants in their learning.
- Tasks that make use of models—real-world situations, graphs, diagrams, and worked examples, among others—to help students see and make connections between different topics.
- Questions written to promote analysis, to develop higher-order-thinking skills, and to
encourage students to seek mathematical relationships.

The instructional materials provide investigations, applications, and practice with on-course-level problems. The consumable *Student Text* is the primary classroom resource and provides a record of the students’ thinking, reasoning, and problem solving. The Lessons, each comprised of several Problems, were written to engage and motivate students, develop conceptual understanding and procedural fluency, and provide opportunities for them to assess their own understanding. The goal of the instructional materials is for students to view mathematics as a set of related topics rather than as a set of discrete topics. Students should understand why algorithms work, not just memorize procedures.

Each Lesson within the Student Text:
- Demonstrates the usefulness of mathematics in the real world
- Provides access for all students
- Connects to and builds upon prior knowledge and experiences
- Develops conceptual and procedural knowledge
- Requires thinking, modeling, reasoning, and explaining mathematical ideas
- Engages students in accountable discourse
- Provides opportunities to assess student understanding

Each Problem within a Lesson exhibits one of these attributes:
- New concept development through problem solving and investigations
- Continued practice of concepts in new situations
- Immediate practice for concepts that have been developed
- Distributive practice to reach mastery and to allow for connections to prior concepts
- Synthesis of key mathematical concepts and understandings

*Student Assignments and Skills Practice Worksheets* additional practice and engagement through the Carnegie Learning Online Resource Center. The *Student Assignments* provide opportunities for students to practice and apply their understanding of the mathematical objectives addressed in the corresponding student lesson. The *Student Skills Practice* is a supplemental resource that provides targeted practice of discrete skills within each student lesson. Each *Skills Practice* worksheet contains two sections—vocabulary and problem sets. Also provided on the Carnegie Learning Online Resource Center are See It-Try It videos. These videos explore, animate, or demonstrate a key concept or collection of concepts. Each video is tagged with its corresponding text Lesson and Problem.

Each chapter includes a variety of *Assessments*, e.g., Pre-test, Post-test, Mid-Chapter, End of chapter, and Standardized Test Practice. Additionally, *Assessments* and additional practice worksheets can easily be generated through the ExamView test generator.

**Carnegie Learning Geometry 3rd Edition Table of Contents**
- Tools of Geometry
- Introduction to Proof
- Perimeter and Area of Geometric Figures on the Coordinate Plane
- Three-Dimensional Figures
- Using Congruence Theorems
- Trigonometry
- Properties of Quadrilaterals
- Circles
- Arcc and Sectors of Circles
- Circles and Parabolas
- Probability
Key Features:
The Carnegie Learning Geometry 3rd Edition text was developed to support students as they build their mathematical understanding and make connections both from previous years and within the different mathematical clusters outlined in the Common Core State Standards for Mathematics, as specified in Appendix A Pathways. The materials were strongly influenced by research into how students learn mathematics and how to best motivate them to succeed academically.

The instructional design of the Carnegie Learning Geometry 3rd Edition text includes:

- A student-centered approach that focuses on students thinking about and discussing mathematics as active participants in their learning.

- Tasks that make use of models—real-world situations, graphs, diagrams, and worked examples, among others—to help students see and make connections between different topics.

- Questions written to promote analysis, to develop higher-order-thinking skills, and to encourage students to seek mathematical relationships.

The instructional materials provide investigations, applications, and practice with on-course-level problems. The consumable Student Text is the primary classroom resource and provides a record of the students’ thinking, reasoning, and problem solving. The Lessons, each comprised of several Problems, were written to engage and motivate students, develop conceptual understanding and procedural fluency, and provide opportunities for them students to assess their own understanding. The goal of the instructional materials is for students to view mathematics as a set of related topics rather than as a set of discrete topics. Students should understand why algorithms work, not just memorize procedures.

Each Lesson within the Student Text:

- Demonstrates the usefulness of mathematics in the real world

- Provides access for all students

- Connects to and builds upon prior knowledge and experiences

- Develops conceptual and procedural knowledge

- Requires thinking, modeling, reasoning, and explaining mathematical ideas

- Engages students in accountable discourse
Provides opportunities to assess student understanding

Each Problem within a Lesson exhibits one of these attributes:
- New concept development through problem solving and investigations
- Continued practice of concepts in new situations
- Immediate practice for concepts that have been developed
- Distributive practice to reach mastery and to allow for connections to prior concepts
- Synthesis of key mathematical concepts and understandings

Student Assignments and Skills Practice Worksheets additional practice and engagement through the Carnegie Learning Online Resource Center. The Student Assignments provide opportunities for students to practice and apply their understanding of the mathematical objectives addressed in the corresponding student lesson. The Student Skills Practice is a supplemental resource that provides targeted practice of discrete skills within each student lesson. Each Skills Practice worksheet contains two sections—vocabulary and problem sets. Also provided on the Carnegie Learning Online Resource Center are See It-Try It videos. These videos explore, animate, or demonstrate a key concept or collection of concepts. Each video is tagged with its corresponding text Lesson and Problem.

Each chapter includes a variety of Assessments, e.g., Pre-test, Post-test, Mid-Chapter, End of chapter, and Standardized Test Practice. Additionally, Assessments and additional practice worksheets can easily be generated through the ExamView test generator.

**Weaknesses:**
- The ELL only supports Spanish learners
- The red on white cannot be seen by some color blind students
- No differential resources for teachers

**Key Features:**
Larson's Trigonometry is known for delivering sound, consistently structured explanations and exercises of mathematical concepts. With the ninth edition, the author continues to revolutionize the way students learn material by incorporating more real-world applications, ongoing review, and innovative technology. The methodology and execution of material provides students with the tools that they need to master trigonometry.

Features include:
- **Side-By-Side Examples** help students see not only that a problem can be solved in more than one way but also how different methods--algebraically, graphically, and numerically--yield the same result. The side-by-side format also addresses many different learning styles.
- **Algebra Helps** direct students to sections of the textbook where they can review algebra skills needed to master the current topic.
- **Technology Features** offer suggestions for effectively using tools such as calculators, graphing calculators, and spreadsheet programs to deepen student understanding of concepts, ease lengthy calculations, and provide alternate solution methods for verifying answers obtained by hand.
- **Algebra of Calculus Examples and Exercises** throughout the text emphasize various algebraic techniques used in calculus.
- **Vocabulary Exercises** at the beginning of the exercise set for each section help students review previously learned vocabulary terms necessary to solve the section exercises.
- **Student Projects** in various sections and online feature in-depth applied exercises with large, real-life data sets, where students create or analyze models.
- **Chapter Summaries** include explanations and examples of the objectives taught in the chapter.
• Chapter Openers highlight real-life problems that connect to the examples and exercises presented in the following chapter.

• Innovative Summarize Features help students organize the lesson's key concepts into a concise summary, providing a valuable study tool at the end of each section.

• Unprecedented How Do You See It? Exercises in every section present real-life problems that students solve by visual inspection using the concepts in the lesson.

• Checkpoint Problems encourage immediate practice and check students' understanding of the concepts in the paired example.

• Expanded Section Objectives offer students the opportunity to preview what will be presented in the upcoming section.

• Enriched Remarks reinforce or expand on concepts helping students learn how to study mathematics, avoid common errors, address special cases, or show alternative or additional steps to a solution of an example.

Series Companion Website features chapter projects, data tables, assessments, study tools, video solutions, and more to support students outside the text.

Notes:
Strengths:
• Helpful teacher notes in the margins of the teacher's edition including common misconceptions by students
• Extensive number of procedural and conceptual problems in each lesson
• Many different examples with different levels of difficulties
• Quality scaffolding in each lesson
• Hard cover, colorful, quality graphics, good text to graphic ratio
• Extensive online resources

Publisher | Title of Material | Author | Copyright | Grade Level | ISBN | Recommendation |
--- | --- | --- | --- | --- | --- | --- |
Cengage | College Prep Algebra, 1/E | Larson | 2014 | 9-12 | 9781285182629 | Core
- Quality modeling and conceptual problems
- Highlights vocabulary
- Students spend well over 50% of their time on WAPs

**Weaknesses:**
- Doesn’t cover F-BF.2
- Doesn’t cover S-IC.1
- Doesn’t cover F-LE.1
- No ELL accommodations throughout the text
- Weak on Mathematical Practices 5 and 8
- Mathematical Practices aren’t identified
- Connections between clusters and domains is lacking

**Key Features:**
Ideal for 3rd or 4th year math students, COLLEGE PREP ALGEBRA presents a pedagogically sound, mathematically precise, and comprehensive text that provides students with the tools they need to master algebra.

Features include:
- Integrates a wide variety of real-life applications throughout the text in examples and exercises that demonstrate the relevance of algebra to the real world, many of which use real data.
- Examples that all have been carefully chosen to illustrate a particular mathematical concept or problem-solving technique, covering a wide variety of problems and titled for easy reference.
- Many examples that offer detailed, step-by-step solutions with side comments to explain the key steps of the solution process.

Provides exercises that appear on the same page and immediately follow a corresponding example, eliminating the need to flip back and forth from example to exercise.

### Key Features:
Larson's Algebra and Trigonometry delivers sound, consistently structured explanations and carefully written exercises of key mathematical concepts. With the Ninth Edition, the author continues to revolutionize the way students learn material by incorporating more real-world applications and on-going review. The methodology and execution of material provides students with the tools they need to master algebra and trigonometry.

Features include:
- Side-By-Side Examples help students not only see that a problem can be solved in more than one way but how different methods—algebraically, graphically, and numerically—yield the same result. The side-by-side format also addresses many different learning styles.
- Algebra Help features direct students to sections of the textbook where they can review algebra skills needed to master the current topic.
- Checkpoint problems encourage immediate practice and check student understanding of all the core concepts presented in the example.
- Technology Features offer suggestions for effectively using tools such as calculators, graphing calculators, and spreadsheet programs to deepen student understanding of concepts, ease lengthy calculations, and provide alternate solution methods for verifying answers obtained by hand.
- Algebra of Calculus Examples and Exercises throughout the text emphasize various algebraic techniques used in calculus.
- Vocabulary Exercises at the beginning of the exercise set for each section help students
review previously learned vocabulary terms necessary to solve the section exercises.

- Student Projects in various sections and online feature in-depth applied exercises with large, real-life data sets, where students create or analyze models.

- Each Chapter Opener highlights real-life applications used in the examples and exercises.

- A bulleted list of learning objectives lets students preview what will be presented in the upcoming section.

- Chapter Summaries include explanations and examples of the objectives taught in the chapter.

- The How Do You See It? feature in each section presents a real-life exercise students solve by visual inspection using the concepts learned in the lesson. This exercise is excellent for classroom discussion or test preparation.

- The exercise sets have been carefully and extensively examined to ensure they are rigorous and relevant and to include all topics our users have suggested. The exercises have been organized and titled so students can quickly see the connections between examples and exercises. Multi-step, real-life exercises reinforce problem-solving skills and mastery of concepts by giving students the opportunity to apply the concepts to real-life situations.

LarsonPrecalculus.com. This free companion website offers multiple tools and resources to supplement your students' learning. Students can view and listen to worked-out solutions of Checkpoint problems in English or Spanish, download data sets, explore examples, watch lesson videos, and much more.

Notes:
Strengths:
This curriculum has done a good job of supporting the ideas that are needed to the new standards. The WAP are represented in all facets of the text and conceptual understanding and real life applications are present throughout.

Weaknesses:
Some of the textbook is old school. There could be more places to pursue “we do” problems and differentiation in higher cognitive problems.
Key Features:
Larson's Precalculus with Limits is known for delivering the sound, consistently structured explanations and exercises of mathematical concepts, with a laser focus on preparing students for calculus. In Limits, the author includes a brief algebra review along with coverage of analytic geometry in three dimensions and an introduction to concepts covered in calculus. With the third edition, Larson continues to revolutionize the way students learn material by incorporating more real-world applications and ongoing review.

Features include:
- Algebra Helps directs students to sections of the textbook where they can review algebra skills needed to master the current topic.
- Checkpoint problems encourage immediate practice and check student understanding of the concepts presented.
- Algebra of Calculus Examples and Exercises throughout the text emphasize various algebraic techniques used in calculus.
- Vocabulary Exercises at the beginning of the exercise set for each section help students review previously learned vocabulary terms necessary to solve the section exercises.
- Student Projects in various sections and online feature in-depth applied exercises with large, real-life data sets, where students create or analyze models.
- Technology Features offer suggestions for effectively using tools such as calculators, graphing calculators, and spreadsheet programs to deepen student understanding of concepts, ease lengthy calculations, and provide alternate solution methods for verifying answers obtained by hand.
- Chapter Openers highlight real-life problems that connect to the examples and exercises presented in the following chapter.
- Innovative Summarize Features help students organize the lesson's key concepts into a concise summary, providing a valuable study tool at the end of each section.
- Unprecedented How Do You See It? Exercises in every section present real-life problems that students solve by visual inspection using the concepts in the lesson.
- Original Checkpoint Problems encourage immediate practice and check students' understanding of the concepts in the paired example.
- Series Companion Website features chapter projects, data tables, assessments, study tools, video solutions, and more to support students outside the text.
- Section Objectives offer students the opportunity to preview what will be presented in the upcoming section.
- Enriched Remarks reinforce or expand on concepts helping students learn how to study mathematics, avoid common errors, address special cases, or show alternative or additional steps to a solution of an example.

Series Companion Website features chapter projects, data tables, assessments, study tools, video solutions, and more to support students outside the text.

</table>

**Notes:**

**Strengths:**
- Thoughtfully structured lessons
- Contains problems with application and modeling
- Organized sequential lessons
- Good assessments and teaching components to help assist the teacher
- Consistent layout of lessons and exercises throughout the text
- Visually friendly

**Weaknesses:**
- Online Spanish resources but nothing within the text

**Key Features:**

PRECALCULUS WITH LIMITS: A GRAPHING APPROACH, 7th Edition, is an ideal student and instructor resource for high school courses that require the use of a graphing calculator. The quality and quantity of the exercises, combined with interesting applications and innovative resources, make teaching easier and help students succeed. Retaining the series' emphasis on student support, selected examples throughout the text include notations directing students to previous sections to review concepts and skills needed to master the material at hand. The book also achieves accessibility through careful writing and design—including examples with detailed solutions that begin and end on the same page, which maximizes readability. Similarly, side-by-side solutions show algebraic, graphical, and numerical representations of the mathematics and support a variety of learning styles.

**Features include:**
- Library of Parent Functions: To facilitate familiarity with the basic functions, a Library of Parent Functions contains several elementary and non-elementary functions. Each function is introduced at the first point of use in the text with a definition and description of basic characteristics. The Library of Parent Functions Examples is identified in the title of the example and there is a Review of Library of Parent Functions after Chapter 4. A summary of functions is presented on the inside cover.
- Technology Tips provide graphing calculator tips or provide alternate methods of solving a problem using a graphing utility.

- Throughout the text, special emphasis is given to the algebraic techniques used in calculus. “Algebra of Calculus” examples and exercises are integrated throughout the text.

- Algebraic-Graphical-Numerical Exercises: These exercises allow students to solve a problem using multiple approaches: algebraic, graphical, and numerical. This helps students see that a problem can be solved in more than one way and that different methods yield the same result.

- Modeling Data Exercises: These multi-part applications involve real-life data and offer students the opportunity to generate and analyze mathematical models.

- The Vocabulary and Concept Check appears at the beginning of the exercise set for each section. Each of these checks asks fill-in-the-blank, matching, and non-computational questions designed to help students learn mathematical terminology and to test basic understanding of that section’s concepts.

- What you should learn/Why you should learn it: These summarize important topics in the section and why they are important in math and life.

- The Chapter Summary includes explanations and examples of the objectives taught in the chapter.

- Error Analysis: This exercise presents a sample solution that contains a common error, which the students are asked to identify.

- Each Chapter Opener highlights real-life applications used in the examples and exercises.

- The How Do You See It? feature in each section presents a real-life exercise that students solve by visual inspection using the concepts learned in the lesson. This exercise is excellent for classroom discussion or test preparation.

- A bulleted list of learning objectives gives students the opportunity to preview what will be presented in the upcoming section.

- These hints and tips, called “Remarks,” reinforce and/or expand upon concepts, help students learn how to study mathematics, address special cases, or show alternative or additional steps to a solution of an example.

- Accompanying every example, the Checkpoint problems encourage immediate practice and check students’ understanding of the concepts presented in the example. Students can view and listen to worked-out solutions of the Checkpoint problems in English or Spanish at LarsonPrecalculus.com.

LarsonPrecalculus.com: This companion website offers free access to multiple tools and resources that supplement student learning. Students can view and listen to worked-out solutions of Checkpoint problems in English or Spanish, download data sets, explore examples, watch lesson videos, and much more.

**Publisher** | **Title of Material** | **Author** | **Copyright** | **Grade Level** | **ISBN** | **Recommendation**
---|---|---|---|---|---|---

*Submitted as Core*

**Notes:**
**Strengths:**
- The program is well written and easy to follow
- Good assessments and teaching components to assist the teacher
- Consistency in lessons and exercises throughout the text
- Organized and sequential lessons
- Real world applications and modeling problems

**Weaknesses:**
- The Pre-Calculus text does not directly list or address the practice standards; however, it does present all of the practice standards within the lessons, exercises, and assessments

**Key Features:**
This bestselling author team explains precalculus concepts simply and clearly, without glossing over difficult points. Problem solving and mathematical modeling are introduced early and reinforced throughout, providing students with a solid foundation in the principles of mathematical thinking. Comprehensive and evenly paced, the book provides complete coverage of the function concept, and integrates a significant amount of graphing calculator material to help students develop insight into mathematical ideas.

**Features include:**
- Focuses on Modeling sections illustrate modeling techniques as well as how mathematics can be applied to model real-life situations. These sections, as well as others, are devoted to teaching students how to create their own mathematical models, rather than using prefabricated formulas.
- Real-world applications from engineering, physics, chemistry, business, biology, environmental studies, and other fields demonstrate how mathematics is used to
Mathematics in the Modern World vignettes show that mathematics is a living science crucial to the scientific and technological progress of recent times, as well as to the social, behavioral, and life sciences.

Discovery/Discussion/Writing problems at the end of every section encourage students to use and develop conceptual, critical thinking, and writing skills.

Discovery Projects engage students by providing a challenging but accessible set of activities that enable them (perhaps working in groups) to explore in greater depth an interesting aspect of the topic they have just learned.

Review Sections and Chapter Tests at the end of each chapter help students gauge their learning progress. Brief answers to the odd-numbered exercises in each section and to all questions in the Chapter Tests are provided at the back of the book.

Groups of exercises now have headings that identify the type of exercise. Skills Plus exercises in most sections contain more challenging exercises that require students to extend and synthesize concepts.

Review Material: The review material at the end of each chapter now includes a summary of properties and formulas and a new Concept Check. Each Concept Check provides a step-by-step review of all the main concepts and applications of the chapter. Answers to the Concept Check questions are on tear-out sheets at the back of the book.

Geometry Review: Appendix A contains a review of the main concepts of geometry used in this book, including similarity and the Pythagorean Theorem.

</table>
|  | • Each Chapter Opener highlights five real-life applications of calculus found throughout the
chapter. The applications reference the examples or exercises featured. You can find a full listing of the applications in the Index of Applications.

- The How Do You See It? exercise in each section presents a problem that you will solve by visual inspection using the concepts learned in the lesson.

LarsonCalculus.com - We've created a free website hosting valuable resources. At this website, you can access the following: Proof Videos – Watch co-author Bruce Edwards present theorems and explain their proofs. Calculus Videos – Watch Dana Mosely explain concepts of calculus. Interactive Examples – Explore examples using Wolfram’s free CDF player (plug-in required). Rotatable Graphs – View and rotate three-dimensional graphs using Wolfram’s free CDF player (plug-in required). Biographies – Read biographies of men and women who were instrumental in creating calculus. Web Appendices – Read the web-only appendices that accompany the text. Data Downloads – Use real data to solve problems.
of traditional calculus skills a priority, while embracing the best features of new technology and review.

Features include:

- Carefully chosen applied exercises and examples from diverse sources are included throughout to address the question, "When will I use this?"

- Writing exercises at the end of each section are designed to test students' understanding of basic concepts and encourage them to verbalize answers in order to promote technical skills that will be invaluable in their future careers.

- Theorems are clearly stated and separated from the rest of the text by boxes for quick visual reference to aid in understanding the conceptual framework of calculus.

- As with theorems, definitions are clearly stated using precise, formal wording and are separated from the text by boxes for quick visual reference.

- Historical notes provide students with background information on the foundations of calculus and the people who created calculus.

- Projects provide an interesting and engaging way to encourage students to explore applications related to the topics they are studying and investigate ideas collaboratively.

- Putnam Exam Questions appear in selected sections and are meant to challenge students and push them to the limits of their understanding of calculus.

- Throughout the book, technology boxes show students how to use technology to solve problems and explore concepts of calculus.

- How Do You See It?--The "How Do You See It?" feature in each section presents a real-life problem that students solve by visual inspection using the concepts learned in the lesson. This exercise is excellent for classroom discussion or test preparation.

- Remark--These hints and tips reinforce or expand on concepts, help students learn how to study mathematics, caution students about common errors, address special cases, or show alternative or additional steps to a solution of an example.

- Exercise Sets--The exercise sets have been carefully and extensively examined to ensure they are rigorous and relevant and include all topics our users have suggested. The exercises have been reorganized and titled so students can better see the connections between examples and exercises. Multi-step, real-life exercises reinforce problem-solving skills and mastery of concepts by giving students the opportunity to apply the concepts in real-life situations.

LarsonCalculus.com--This robust companion website offers multiple tools and resources. Access to these features is free. Students can watch videos explaining concepts or proofs from the book, explore examples, view three-dimensional graphs, download articles from math journals, and much more!

Notes:
- **Strengths:**
  - Writing opportunities in "How Do You See It"
  - There are exercises throughout each section that have students explain the concepts

- **Weaknesses:**
  - Looks like a college textbook that might not engage high school students

Key Features:
With a long history of innovation in the calculus market, this AP® edition of Larson’s Calculus provides a pedagogically sound, comprehensive text book with trusted AP® review questions and new AP® Exam tips. The book and series has been widely praised by a generation of students and professors for its solid and effective pedagogy that addresses the needs of a broad range of teaching and learning styles and environments.

- **Features include:**
  - Hints and tips, called “Remarks” in the book, reinforce and/or expand upon concepts.
  - AP® Review Questions allow students to practice the type of questions encountered on the AP® exam while providing additional practice and review.
  - Exercise sets have been carefully and extensively examined to ensure they are rigorous, relevant, and cover all topics suggested by our users. The exercises have been organized and titled so you can better see the connections between examples and exercises.
  - Graded Homework Exercises: Online homework and tests are evaluated using powerful Maple software to ensure mathematical accuracy. Instructors control point values, weighting grades, and whether or not an item is graded. An electronic gradebook helps instructors manage course information easily and can be exported to other files, such as Excel.
  - CAS Investigation: Many examples throughout the book are accompanied by CAS Investigations. These are collaborative investigations using a computer algebra system (e.g., Maple) to further explore the related example.
  - Each Chapter Opener highlights five real-life applications of calculus found throughout the chapter. The applications reference the examples or exercises featured. You can find a full listing of the applications in the Index of Applications.
  - The How Do You See It? exercise in each section presents a problem that you will solve
by visual inspection using the concepts learned in the lesson.

Cengage | Calculus: Early Transcendental Functions, 6/E, AP® Edition | Larson | 2015 | 11-12 | 97812857775890 | AP Core |

Notes:

Strengths:
- The textbook is beautiful and flows well
- Good pointers and extenders in the teacher binder
- Text flow is logical
- Lesson progress from simple to complex
- Concepts appear to be in a usable order
- Includes opportunities for students to write
- Great additional resources

Weaknesses:
- Less conceptual and more mechanical
- Fewer graphs, more mechanical
- Text is sense for some learners
- It does not include enough table problems

**Key Features:**

Calculus: Early Transcendental Functions, AP® Edition, offers instructors and students innovative teaching and learning resources geared towards the AP® exam and filled with helpful AP® test taking preparation. The Larson team always has two main objectives: to develop precise, readable materials for students that clearly define and demonstrate concepts and rules of calculus; and to design comprehensive teaching resources for instructors that employ proven pedagogical techniques. Every edition from the first to the sixth of Calculus: Early Transcendental Functions has made the mastery of traditional calculus skills a priority, while embracing the best features of new technology and review.

Features include:

- Carefully chosen applied exercises and examples from diverse sources are included throughout to address the question, "When will I use this?"

- Writing exercises at the end of each section are designed to test students’ understanding of basic concepts and encourage them to verbalize answers in order to promote technical skills that will be invaluable in their future careers.

- Theorems are clearly stated and separated from the rest of the text by boxes for quick visual reference to aid in understanding the conceptual framework of calculus.

- As with theorems, definitions are clearly stated using precise, formal wording and are separated from the text by boxes for quick visual reference.

- Historical notes provide students with background information on the foundations of calculus and the people who created calculus.

- Projects provide an interesting and engaging way to encourage students to explore applications related to the topics they are studying and investigate ideas collaboratively.

- Putnam Exam Questions appear in selected sections and are meant to challenge students and push them to the limits of their understanding of calculus.

- Throughout the book, technology boxes show students how to use technology to solve problems and explore concepts of calculus.

- How Do You See It?--The "How Do You See It?" feature in each section presents a real-life problem that students solve by visual inspection using the concepts learned in the lesson. This exercise is excellent for classroom discussion or test preparation.

- Remark--These hints and tips reinforce or expand on concepts, help students learn how to study mathematics, caution students about common errors, address special cases, or show alternative or additional steps to a solution of an example.

- Exercise Sets--The exercise sets have been carefully and extensively examined to ensure they are rigorous and relevant and include all topics our users have suggested. The exercises have been reorganized and titled so students can better see the connections between examples and exercises. Multi-step, real-life exercises reinforce problem-solving skills and mastery of concepts by giving students the opportunity to apply the concepts in real-life situations.

LarsonCalculus.com--This robust companion website offers multiple tools and resources. Access to these features is free. Students can watch videos explaining concepts or proofs.

Publisher Title of Material Author Copyright Grade Level ISBN Recommendation

Notes:
Strengths:
• All standards are met
• More than 50% of the students time is spent on the Widely Applicable Prerequisites
• Connections are made in a purposeful and logical way
• Table of contents are extremely helpful
• Numerous opportunities for practice with both procedural and contextual problems
• Provides many real world mathematical application problems
• Scaffolding within lessons is strong
• General format of book is very engaging and exceptional

Weaknesses:
• Does not note Mathematical Practices
• Weak on requiring students to make mathematical arguments
• ELL accommodations are lacking
• Support for differing instructional approach is missing

Note: This curriculum could be very affective as a 4th year course at the high school level if the book is supplemented with resources that are lacking or missing.

Key Features:
Ideal for 3rd or 4th year math students, FINANCIAL ALGEBRA: ADVANCED ALGEBRA WITH
FINANCIAL APPLICATIONS applies Algebra 1 concepts in practical business and personal finance contexts. Aligned to the Common Core State Standards, FINANCIAL ALGEBRA helps students achieve success by incorporating Algebra I, Algebra II, and Geometry topics. Authors Robert Gerver and Richard Sgroi have spent their 25+ year-careers teaching students of all ability levels and they have found the most success when math is connected to the real world. FINANCIAL ALGEBRA encourages students to be actively involved in applying mathematical ideas to their everyday live – credit, banking insurance, the stock market, independent living and more!

Features include:

- Strong review of Algebra I formulas with variables, equations, functions, systems of equations, graphs, statistics, and more within a financial context your students can relate to. Students see algebra translated into powerful, financially focused, real world problems.

- Students see algebra at work within the most critical areas of finance. Students learn about investments, credit, automobile expenses, insurance, income tax, household budgeting, and more while gaining confidence in working with common algebraic functions.

- Emphasis on problem solving equips students with skills for life. Each chapter provides substantial opportunities to learn and apply a variety of problem solving strategies.

- Really? Really! Chapter Openers immediately capture student attention with fascinating topics that draw students into the chapter's content. Students conclude each chapter by revisiting the motivational topic.

- Proven applications at the end of each lesson require students to solve problems in a financial context. Real Numbers: You

- Write the Story strengthens students' skills in interpreting graphs as they examine a graph and write a story focused around the graph's information.

Reality Check extends students' learning experience well beyond the classroom with specific suggestions for research, projects, and hands-on learning.

Cengage | Statistics: Learning from Data, 1e, AP® Edition | Peck, Olsen | 2014 | 11-12 | 9781285085241 | AP Core |

Notes:

Strengths:
- Comprehensive AP textbook. Little to no supplementation would be necessary
- Real-world data sets used throughout text
- Problems are challenging and prepare students for the exam
- Online, print, and DVD resources give teachers flexibility to choose which platform to use
### Weaknesses:
- The topic of surveys is not explicitly addressed in the text
- No support for ELL students

### Key Features:

*Statistics: Learning From Data, AP® Edition,* written by the respected author team of Roxy Peck and Chris Olsen, offers an innovative approach to teaching and learning AP® Statistics, by tackling the areas that students struggle with most — probability, hypothesis testing, and selecting an appropriate method of analysis. Students must master the computational aspect of descriptive and inferential statistic and also develop an understanding of the data analysis process at a conceptual level. Supported by learning objectives, real-data examples and exercises, and technology notes, this text guides students in gaining conceptual understanding, mechanical proficiency, and the ability to put knowledge into practice.

Features include:
- The treatment of probability in this text is complete, including conditional probability and Bayes’ Rule type probability calculations. However, it is presented with a new approach that eliminates the need for the symbolism and formulas, which are a roadblock for many students by using natural frequencies to reason about probability.
- Statistics: Learning from Data, has a simple, clean design that minimizes clutter and maximizes student understanding, instead of distract students like modern graphic “features” in textbooks.
- Chapter activities guide actively engage students' thinking about important ideas and concepts.
- The learning objectives explicitly state the expectations of the student, and are presented in three categories: Conceptual Understanding, Mastery of Mechanics, and Putting It into Practice.
- Each chapter opens with a Preview and Preview Example that provide motivation for studying the concepts and methods introduced in the chapter. They address why the material is worth learning, the conceptual foundation for the methods covered, and connect to what the student already knows.
- The exercises and examples that incorporate real data are a particular strength of this text. Extracting and using data from journal articles, newspapers, and other published sources, the exercises cover a wide range of disciplines and subject areas of interest to today’s student.
- "Are You Ready to Move On?" questions serve as a comprehensive end-of-chapter review and allow students to confirm that they have achieved the chapter learning objectives,
- Chapter 7 provides an overview of statistical inference, focusing on the things students need to think about in order to select an appropriate method of analysis. Discussing these considerations up front in the form of four key questions that need to be answered before choosing an inference method makes it easier for students to make correct choices.

Real-Data Algorithmic Sampling Exercises give each student a different random sample of data from a population to answer questions off of the companion website. These unique exercises are designed to teach about sampling variability and provide a vehicle for rich classroom discussions of this important statistical concept.

<td>2016</td>
<td>11-12</td>
<td>9781305267244</td>
<td>AP Core</td>
</tr>
</tbody>
</table>

**Notes:**

**Strengths:**
- Very graphical
- Text is broken into many small sections
- Formulas and rules are easy to find in colored boxes
- Plenty of student problems in each chapter
- Organized and accessible for the ordinary student and supports the development of conceptual understanding
- Analysis emphasized and higher order thinking
- Engaging problems

**Weaknesses:**
- Difficult to find some concepts in text
- Some topics not well represented in exercises

**Key Features:**
Roxy Peck, Chris Olsen, and Jay Devore's new edition uses real data and attention-grabbing examples to introduce students to the study of statistics and data analysis. Traditional in structure yet modern in approach, this text guides students through an intuition-based learning process that stresses interpretation and communication of statistical information. Simple notation—including frequent substitution of words for symbols—helps students grasp concepts and cement their comprehension. Hands-on activities and interactive applets allow students to practice statistics firsthand. INTRODUCTION TO STATISTICS AND DATA ANALYSIS includes coverage of most major technologies, as well as expanded coverage of probability. Supporting the AP® Statistics exam, the text includes AP® multiple choice and free response questions that allow students to check their understanding, as well as AP® Tips that highlight...
Features include:

- Real data gives students authentic scenarios that help them understand statistical concepts in relevant, interesting contexts.

- The book emphasizes graphical display as a necessary component of data analysis and provides broad coverage of sampling, survey design, experimental design and transformations, and nonlinear regression.

- The role of the computer in contemporary statistics is highlighted through numerous printouts and exercises that can be solved using the computer.

- "Interpreting and Communicating the Results of Statistical Analysis" sections, which emphasize the importance of being able to interpret statistical output and communicate its meaning to non-statisticians, have assignable end-of-section questions associated with them.

- Several Java™ applets, used in conjunction with activities that appear at the end of the chapter, provide visual insight into statistical concepts.

- Chapter-ending Technology Notes on JMP, Minitab, SPSS, Microsoft Excel 2007, TI-83/84, and TI-nspire provide helpful hints and guidance on completing tasks associated with a particular chapter, as well as display screens to help students visualize and better understand the steps.

- Helpful hints in exercises that direct students to relevant examples in the text help students who may be having trouble getting started.

Margin Notes, including “Understanding the context,” “Consider the data,” “Formulate a plan,” “Do the work,” and “Interpret the results” appear in appropriate places in the examples to highlight the importance of context and to increase student awareness of the steps in the data analysis process.

</tr>
</thead>
</table>

Notes:
- Strengths:
  - Logical flow of content from specific to general, skill practice to conceptual
• Use of real world data sets
• Guided practice in each unit
• Chapter Review problems and the Using Technology at the end of each chapter help the students tie everything together
• “Preparing for the AP Statistics Examination” supplement helps students to become familiar with the exam

Weaknesses:
• The use of color may be difficult for colorblind students
• No ELL support
• No glossary

Key Features:
Understandable Statistics: Concepts and Methods, for AP®, is a thorough yet accessible program designed to help students overcome their apprehensions about statistics. Statistical methods are thoughtfully presented with a focus on understanding both the suitability of the method and the meaning of the result. The eleventh edition continues to address the importance of developing students' critical-thinking and statistical literacy as well as preparing them and building confidence leading up to the AP® Exam.

Features include:
• Updated real-world applications throughout the text include new examples from a variety of disciplines.
• Problems featuring basic computation and using small data sets give students the chance to appreciate the formulas and mathematical processes that their calculators accomplish for them--and help them to better understand what the end result means.
• The "Looking Ahead" feature gives students a taste of forthcoming topics--showing them how the concepts and skills they're reading about will be useful in helping them grasp material covered later.
• The "Critical Thinking" feature provides additional clarification on specific concepts, such as what tests are appropriate for what situations, what assumptions need to be made, what biases may affect the results, and when conclusions are justified.
• "Statistical Literacy Problems" in every section and problem set test understanding of terminology, statistical methods, and the appropriate conditions for use of the different processes. "Writing Projects" test both statistical literacy and critical thinking by asking students to express their understanding in words.
• "What Does . . . Tell Us?" and "Important Features of a . . .” provide brief just-in-time summaries of key concepts.
## Strengths:
The strengths of this curriculum are evident in the AP level questioning techniques and review. There are teacher supplements for exercises with full solutions and an available student solution manual that offers only solutions to odd exercises. The rigor of the text and the application and modeling questions are excellent especially with the preparation, mathematical vocabulary, and working for the AP Calculus test.

## Weaknesses:
The online resource material is weaker for a new teacher. There are supplemental resources for the teacher in the form of study guides, student solutions manual, complete solutions manual, test bank, resource guide, and AP test Prep but these are hard to edit and take time to work through and organize. There is a test bank, but not a test generator.

### Key Features:

- Four carefully crafted diagnostic tests in algebra, analytic geometry, functions, and trigonometry appear at the beginning of the text. These provide students with a convenient way to test their pre-existing knowledge and brush up on skills they need to successfully begin the course.
- Stewart's writing style speaks clearly and directly to students, guiding them through key ideas, theorems, and problem-solving steps, and encouraging them to think as they read and learn.
- Every concept is supported by thoughtfully worked examples—many with step-by-step explanations—and carefully chosen exercises. The quality of this pedagogical system is what sets Stewart's texts above others.
- The text's clean, user-friendly design provides a clear presentation of calculus. The art program, with its functional and consistent use of color, helps students identify and review mathematical concepts more easily.
- Stewart draws on physics, engineering, chemistry, biology, medicine, and social...
science to motivate students and demonstrate the power of calculus as a problem-solving tool in a wide variety of fields.

- Stewart’s text offers an extensive collection of more than 8,000 quality exercises. Each exercise set is carefully graded, progressing from skill-development problems to more challenging problems involving applications and proofs. The wide variety of types of exercises includes many technology-oriented, thought-provoking, real, and engaging problems.

- Comprehensive review sections follow each chapter and further support conceptual understanding.

- "Strategies" sections (based on George Polya’s problem-solving methodology) help students select what techniques they’ll need to solve problems in situations where the choice is not obvious, and help them develop true problem-solving skills and intuition.

- More challenging exercises called "Problems Plus" follow the end-of-chapter exercises. These sections reinforce concepts by requiring students to apply techniques from more than one chapter of the text, and by patiently showing them how to approach a challenging problem.

Notes:

Strengths:
- The teacher resources are fantastic. They will help lead through suggested group discussions, scaffolding assignments.
- Scope and sequence was good. Didn’t place concepts not learned before student had knowledge.
- Student guides were great for extra help with struggling students.
- Reference pages located in the back of book is perforated and can easily come out and placed in plastic covers.

Weaknesses:
- Red on white examples will create problems for colorblind students.
Key Features:
James Stewart’s Calculus is widely renowned for its mathematical precision and accuracy, clarity of exposition, and outstanding examples and problem sets. Millions of students worldwide have explored calculus through Stewart’s trademark style, while instructors have turned to his approach time and time again. In the Eighth Edition of Calculus, Stewart continues to set the standard for the course while adding carefully revised content. The patient explanations, superb exercises, focus on problem solving, and carefully graded problem sets that have made Stewart’s texts best-sellers continue to provide a strong foundation for the Eighth Edition. From the most unprepared student to the most mathematically gifted, Stewart’s writing and presentation serve to enhance understanding and build confidence.

### Notes:

**Strengths:**
- Good verbally in many areas
- Uses language that promotes precise understanding
- Book is concise
- College-level text
- Meets or exceeds all requirements for AP
- Good supplemental materials—teacher resource binder and study guide

**Weaknesses:**
- Lacking in graphical interpretation of concepts
- Difficult to navigate
- Fewer problems than many other comparable texts
- High reading level
- A few concepts are missing—area accumulation, solutions to different equations, and derivatives of inverse functions at a point

**Key Features:**

From the most unprepared student to the most mathematically gifted, Stewart's writing and presentation serve to enhance understanding and build confidence.

- Four carefully crafted diagnostic tests in algebra, analytic geometry, functions, and...
trigonometry appear at the beginning of the text. These provide students with a convenient way to test their pre-existing knowledge and brush up on skills they need to successfully begin the course.

- Stewart’s writing style speaks clearly and directly to students, guiding them through key ideas, theorems, and problem-solving steps, and encouraging them to think as they read and learn.

- Every concept is supported by thoughtfully worked examples—many with step-by-step explanations—and carefully chosen exercises. The quality of this pedagogical system is what sets Stewart’s texts above others.

- The text’s clean, user-friendly design provides a clear presentation of calculus. The art program, with its functional and consistent use of color, helps students identify and review mathematical concepts more easily.

- Stewart draws on physics, engineering, chemistry, biology, medicine, and social science to motivate students and demonstrate the power of calculus as a problem-solving tool in a wide variety of fields.

- Stewart’s text offers an extensive collection of more than 8,000 quality exercises. Each exercise set is carefully graded, progressing from skill-development problems to more challenging problems involving applications and proofs. The wide variety of types of exercises includes many technology-oriented, thought-provoking, real, and engaging problems.

- Comprehensive review sections follow each chapter and further support conceptual understanding.

- "Strategies" sections (based on George Polya’s problem-solving methodology) help students select what techniques they’ll need to solve problems in situations where the choice is not obvious, and help them develop true problem-solving skills and intuition.

- More challenging exercises called "Problems Plus" follow the end-of-chapter exercises. These sections reinforce concepts by requiring students to apply techniques from more than one chapter of the text, and by patiently showing them how to approach a challenging problem.

**Notes:**
This is a comprehensive curriculum that will prepare students for success in college level mathematics and for the AP examination.

**Strengths:**
- Overview of technology includes free options
- Teacher resources provides implementation guides for projects, tips for group work, and principles of problem solving
- Comprehensive, complete, consistent, and exhaustive
- Current data used in real world problems
- Proofs included in appendix
- Lots of practice available, including Problems Plus at the end of each chapter

**Weaknesses:**
- Despite the exhaustiveness of the text (1200+ pages), the sections are sense: new sections start immediately at the end of the previous. This could overwhelm young learners.
- Compared to other calculus texts, there are minimal photos. Visual aids help engage students in learning.

**Key Features:**
James Stewart's Calculus: Early Transcendentals is widely renowned for its mathematical precision and accuracy, clarity of exposition, and outstanding examples and problem sets. Millions of students worldwide have explored calculus through Stewart's trademark style, while instructors have turned to his approach time and time again. In the Eighth Edition of Calculus: Early Transcendentals, Stewart continues to set the standard for the course while adding carefully revised content. The patient explanations, superb exercises, focus on problem solving, and carefully graded problem sets that have made Stewart's texts best-sellers continue to provide a strong foundation for the Eighth Edition. From the most unprepared student to the most mathematically gifted, Stewart's writing and presentation serve to enhance understanding and build confidence

- Four carefully crafted diagnostic tests in algebra, analytic geometry, functions, and trigonometry appear at the beginning of the text. These provide students with a convenient way to test their pre-existing knowledge and brush up on skills they need to successfully begin the course.
- Stewart's writing style speaks clearly and directly to students, guiding them through key ideas, theorems, and problem-solving steps, and encouraging them to think as they read and learn.
- Every concept is supported by thoughtfully worked examples—many with step-by-step explanations—and carefully chosen exercises. The quality of this pedagogical system is what sets Stewart's texts above others.
- The text's clean, user-friendly design provides a clear presentation of calculus. The
art program, with its functional and consistent use of color, helps students identify and review mathematical concepts more easily.

- Stewart draws on physics, engineering, chemistry, biology, medicine, and social science to motivate students and demonstrate the power of calculus as a problem-solving tool in a wide variety of fields.

- Stewart’s text offers an extensive collection of more than 8,000 quality exercises. Each exercise set is carefully graded, progressing from skill-development problems to more challenging problems involving applications and proofs. The wide variety of types of exercises includes many technology-oriented, thought-provoking, real, and engaging problems.

- Comprehensive review sections follow each chapter and further support conceptual understanding.

- "Strategies" sections (based on George Polya’s problem-solving methodology) help students select what techniques they’ll need to solve problems in situations where the choice is not obvious, and help them develop true problem-solving skills and intuition.

- More challenging exercises called "Problems Plus" follow the end-of-chapter exercises. These sections reinforce concepts by requiring students to apply techniques from more than one chapter of the text, and by patiently showing them how to approach a challenging problem.
Notes:
Manipulatives have to be purchased separately and Professional Development is strongly encouraged.

Strengths:
- The online portion of the curriculum is user friendly
- Interactive activities are fun and engaging for the students although there are not interactive activities for every lesson
- Hands on activity in every lesson
- Vertically and horizontally aligned to CCSS
- Prerequisite skill for every lesson
- Learning progression always aligned
- Challenge activities, justification questions, lots of place value activities, ten frames and number bonds, fluency for most lessons

Weaknesses:
- There are no manipulatives provided with the curriculum
- Geometry and measurement/data units are very brief and short. You need to supplement.

Key Features:
- Curriculum Associates’ solution is research-based and proven to yield measurable improvements in students’ performance against the more challenging Common Core State Standards (CCSS). Combining valid and reliable assessment, rigorous core instruction, and meaningful practice, intervention, and enrichment for those who need it, this approach includes *Ready Common Core* and *i-Ready Diagnostic & Instruction*:
  - **Diagnose**: Identify student needs at the sub-skill level, based on the expectations of the Common Core and Idaho state standards with the computer-adaptive *i-Ready Diagnostic* assessment (three times each academic year—beginning, mid, and end).
  - **Whole-class instruction**: Use *Ready Common Core* print materials as the core day-to-day mathematics curriculum.
  - **Differentiate**: Use the teacher-friendly reports from *i-Ready Diagnostic* reports to identify specific resources and lessons for individual and small group intervention within *Ready Common Core* print program.
  - **Independent instruction, practice, and homework**: Use the *Practice and Problem Solving Book* and *i-Ready Instruction.*
  - **Progress monitoring**: Track student progress via *Ready Assessments* and *i-Ready’s* web-based diagnostic, interim growth monitoring, embedded progress monitoring, and standards mastery assessments.

Key features of these programs are summarized in the list below.
- *Ready Common Core* is a rigorous, on-grade level instruction and practice program for mathematics that fully prepares students for the Idaho Core State Standards for mathematics. Highly supportive for students, *Ready* also provides teachers of all backgrounds and experience levels with step-by-step, point-of-use professional development to teach the standards most effectively.
- Specifically designed and developed for the Common Core, *Ready Common Core* and *i-Ready Diagnostic & Instruction* reflect the Common Core Publishers’ Criteria, learning progression.
documents, and the guidance from the Smarter Balanced Assessment Consortium. The solution provides print and online resources (including interactive whiteboard lessons) to differentiate instruction for students across the performance spectrum.

- The *Ready Mathematics* Student Books contain two types of lessons—concept and skills lessons. The “Focus on Math Concepts” lessons encourage students to pause from the procedural and just concentrate on the conceptual, while the “Develop Skills and Strategies” lessons build students’ fluency by leading students to develop, practice, and apply new skills to solve problems.

- The *Ready Mathematics* Student Books expose students to multiple representations—to measure whether or not students have gained a deep understanding of a mathematical concept, assessment items must include multiple representations. EngageNY.org specifies three “buckets” of multiple representations:
  
  o **Procedural Skills**: These apply to standards that reference verbs such as compute, solve, identify, interpret, use, make, and find solutions. Procedural representations are most often multiple-choice questions that require students to apply and identify mathematical processes in various ways.
  
  o **Conceptual Understanding**: These representations use verbs such as understand, explain, represent, and describe when applied to standards, which results in students having to combine mathematical practices.
  
  o **Application**: Unique to the Common Core, application standards are represented by tasks. In general, in order to complete these tasks, students must use both procedural knowledge and conceptual understanding.

The *Ready* program addresses all three of the multiple representations buckets. Both the Develop Skills and Strategies lessons and the Focus on Math Concepts lessons use language such as solve, identify, and use, while the Focus on Math Concepts lessons encourage students to understand and explain. The Performance Tasks at the end of every unit make sure students are able to combine procedural knowledge and conceptual understanding.

- The teacher-led Mathematical Discourse feature in the *Ready* lessons guides collaborative reasoning and the exchange of ideas and mathematical arguments. Lessons also provide error analysis exercises that ask students to examine a fictional student’s wrong answer. There are also multiple opportunities throughout each lesson to explain and communicate reasoning.

- With the rigor to teach and assess the CCSS, *Ready Common Core* Depth of Knowledge (DOK) item distributions are based on item specifications from Smarter Balanced and were evaluated using the Smarter Balanced Cognitive Rigor Matrix. There is a natural progression within the *Ready* lessons that aligns DOK levels with the standards (analyzing, integrating, synthesizing).

- The *Practice and Problem Solving Book*—which extends learning with activities and games that provide repeated opportunities for students to develop understanding and fluency of key skills and concepts—can be used for independent practice in class, after school, or at home. A family letter for every lesson helps parents or caregivers understand the content and participate in the lesson activity with their child. Rigorous performance tasks ask students to integrate concepts and skills from multiple standards within the unit to solve multi-step problems, and computation practice worksheets at the end of the book require students to demonstrate procedural fluency.

- For grades K–1, *Ready* helps young learners build the conceptual understanding needed to tackle more complex mathematical concepts. Each lesson begins with an engaging group activity that draws upon prior knowledge, then moves to interactive pictorial representations of the same skill or concept, while encouraging students to show their thinking.

- For grades 2–5, Math in Action lessons at the end of every unit teach students how to solve performance tasks and require the integration of multiple standards. The Standards for Mathematical Practice Handbook in the student book makes mathematical habits of mind truly accessible. The Student Glossary embeds additional vocabulary support and enhances explicit vocabulary instruction. Lesson Quizzes in the *Teacher Toolbox* provide opportunities to assess mastery of the standard taught on the lesson.
- **i-Ready Diagnostic** computer-adaptive assessments collect a broad spectrum of data on students’ abilities, identify areas where learners are struggling, measure growth across each student’s K-12 career, and prescribe an instructional path that includes explicit next steps for teacher-led and online instruction.

- **Ready Assessments** (print) and **i-Ready Diagnostic** (online) prepare students for more complex statewide assessments with technology-enhanced items, full-length practice tests, and interim assessments that include performance tasks.

- The online, fixed-form **i-Ready Standards Mastery** assessments for grades 2–8 provide targeted insight into each student’s mastery of individual, grade-level standards through a blend of constructed-response, open-ended response, and selected-response items plus a broad range of media with embedded audio, video, and imagery.

The comprehensive **Ready Teacher Resource Book** supports teachers of all experience levels with point-of-impact professional learning—every page delivers critical background knowledge (including the Common Core learning progression and prerequisite skills). Throughout, the guide embeds best-practice teaching tips—such as integrating questions to lead meaningful classroom discussions, interactive listening and media activities to encourage real-world connections, and opportunities for students to explain their thinking and demonstrate their understanding of concepts—and explicit guidance on diagnosing student needs and differentiating instruction for a diverse range of learners (including English language learners) and learning styles.

Notes:
Manipulatives have to be purchased separately and Professional Development is strongly encouraged.

Strengths:
- Materials comprehensively and coherently align to Content Standards
- Materials comprehensively and coherently attend to and embed Practice Standards in engaging ways for both teacher and students
- Format of materials (teacher, student, and parent) enhances engagement, mathematical understandings and navigation of materials
- Diagnostic, formative, and summative assessment is well supported
- All levels of DOK are present in meaningful ways
- Materials have useful/purposefully-aligned parent supports

Weaknesses:
- The comprehensive nature of the material is a strength; however, accompanying this strength is the responsibility of teachers/districts to fully understand the components, supports and learning opportunities found in the materials. It might be difficult for teachers to realize the full breadth and depth of these materials without professional development/training.

Key Features:
- Curriculum Associates’ solution is research-based and proven to yield measurable improvements in students’ performance against the more challenging Common Core State Standards (CCSS). Combining valid and reliable assessment, rigorous core instruction, and meaningful practice, intervention, and enrichment for those who need it, this approach includes Ready Common Core and i-Ready Diagnostic & Instruction:
  - Diagnose: Identify student needs at the sub-skill level, based on the expectations of the Common Core and Idaho state standards with the computer-adaptive i-Ready Diagnostic assessment (three times each academic year—beginning, mid, and end).
  - Whole-class instruction: Use Ready Common Core print materials as the core day-to-day mathematics curriculum.
  - Differentiate: Use the teacher-friendly reports from i-Ready Diagnostic reports to identify specific resources and lessons for individual and small group intervention within Ready Common Core print program.
  - Independent instruction, practice, and homework: Use the Practice and Problem Solving Book and i-Ready Instruction.
  - Progress monitoring: Track student progress via Ready Assessments and i-Ready’s web-based diagnostic, interim growth monitoring, embedded progress monitoring, and standards mastery.
Key features of these programs are summarized in the list below.

- **Ready Common Core** is a rigorous, on-grade level instruction and practice program for mathematics that fully prepares students for the Idaho Core State Standards for mathematics. - The **Practice and Problem Solving Book**—which extends learning with activities and games that provide repeated opportunities for students to develop understanding and fluency of key skills and concepts—can be used for independent practice in class, after school, or at home. A family letter for every lesson helps parents or caregivers understand the content and participate in the lesson activity with their child. Rigorous performance tasks ask students to integrate concepts and skills from multiple standards within the unit to solve multi-step problems, and computation practice worksheets at the end of the book require students to demonstrate procedural fluency.

- For grades K–1, **Ready** helps young learners build the conceptual understanding needed to tackle more complex mathematical concepts. Each lesson begins with an engaging group activity that
draws upon prior knowledge, then moves to interactive pictorial representations of the same skill or concept, while encouraging students to show their thinking.

- For grades 2–5, Math in Action lessons at the end of every unit teach students how to solve performance tasks and require the integration of multiple standards. The Standards for Mathematical Practice Handbook in the student book makes mathematical habits of mind truly accessible. The Student Glossary embeds additional vocabulary support and enhances explicit vocabulary instruction. Lesson Quizzes in the Teacher Toolbox provide opportunities to assess mastery of the standard taught on the lesson.

- i-Ready Diagnostic computer-adaptive assessments collect a broad spectrum of data on students’ abilities, identify areas where learners are struggling, measure growth across each student’s K-12 career, and prescribe an instructional path that includes explicit next steps for teacher-led and online instruction.

- Ready Assessments (print) and i-Ready Diagnostic (online) prepare students for more complex statewide assessments with technology-enhanced items, full-length practice tests, and interim assessments that include performance tasks.

- The online, fixed-form i-Ready Standards Mastery assessments for grades 2–8 provide targeted insight into each student’s mastery of individual, grade-level standards through a blend of constructed-response, open-ended response, and selected-response items plus a broad range of media with embedded audio, video, and imagery.

The comprehensive Ready Teacher Resource Book supports teachers of all experience levels with point-of-impact professional learning—every page delivers critical background knowledge (including the Common Core learning progression and prerequisite skills). Throughout, the guide embeds best-practice teaching tips—such as integrating questions to lead meaningful classroom discussions, interactive listening and media activities to encourage real-world connections, and opportunities for students to explain their thinking and demonstrate their understanding of concepts—and explicit guidance on diagnosing student needs and differentiating instruction for a diverse range of learners (including English language learners) and learning styles.

Notes:
Manipulatives have to be purchased separately and Professional Development is strongly encouraged.

Strengths:
- Materials comprehensively and coherently align to Content Standards
- Materials comprehensively and coherently attend to and embed Practice Standards in engaging ways for both teacher and students
- Format of materials (teacher, student, and parent) enhances engagement, mathematical understandings and navigation of materials
- Diagnostic, formative, and summative assessment is well supported
- All levels of DOK are present in meaningful ways
- Materials have useful/purposefully-aligned parent supports

Weaknesses:
The comprehensive nature of the material is a strength; however, accompanying this strength is the responsibility of teachers/districts to fully understand the components, supports and learning opportunities found in the materials. It might be difficult for teachers to realize the full breadth and depth of these materials without professional development/training.

Key Features:
- Curriculum Associates’ solution is research-based and proven to yield measurable improvements in students’ performance against the more challenging Common Core State Standards (CCSS). Combining valid and reliable assessment, rigorous core instruction, and meaningful practice, intervention, and enrichment for those who need it, this approach includes Ready Common Core and i-Ready Diagnostic & Instruction:
  - Diagnose: Identify student needs at the sub-skill level, based on the expectations of the Common Core and Idaho state standards with the computer-adaptive i-Ready Diagnostic assessment (three times each academic year—beginning, mid, and end).
  - Whole-class instruction: Use Ready Common Core print materials as the core day-to-day mathematics curriculum.
  - Differentiate: Use the teacher-friendly reports from i-Ready Diagnostic reports to identify specific resources and lessons for individual and small group intervention within Ready Common Core print program.
  - Independent instruction, practice, and homework: Use the Practice and Problem Solving Book and i-Ready Instruction.
  - Progress monitoring: Track student progress via Ready Assessments and i-Ready’s web-based diagnostic, interim growth monitoring, embedded progress monitoring, and standards mastery assessments.

Key features of these programs are summarized in the list below.
- Ready Common Core is a rigorous, on-grade level instruction and practice program for mathematics that fully prepares students for the Idaho Core State Standards for mathematics. Highly supportive for students, Ready also provides teachers of all backgrounds and experience levels with step-by-step support.
step, point-of-use professional development to teach the standards most effectively.

- Specifically designed and developed for the Common Core, *Ready Common Core* and *i-Ready Diagnostic & Instruction* reflect the Common Core Publishers’ Criteria, learning progression documents, and the guidance from the Smarter Balanced Assessment Consortium. The solution provides print and online resources (including interactive whiteboard lessons) to differentiate instruction for students across the performance spectrum.

- The *Ready Mathematics* Student Books contain two types of lessons—concept and skills lessons. The “Focus on Math Concepts” lessons encourage students to pause from the procedural and just concentrate on the conceptual, while the “Develop Skills and Strategies” lessons build students’ fluency by leading students to develop, practice, and apply new skills to solve problems.

- The *Ready Mathematics* Student Books expose students to multiple representations—to measure whether or not students have gained a deep understanding of a mathematical concept, assessment items must include multiple representations. EngageNY.org specifies three “buckets” of multiple representations:
  - **Procedural Skills**: These apply to standards that reference verbs such as compute, solve, identify, interpret, use, make, and find solutions. Procedural representations are most often multiple-choice questions that require students to apply and identify mathematical processes in various ways.
  - **Conceptual Understanding**: These representations use verbs such as understand, explain, represent, and describe when applied to standards, which results in students having to combine mathematical practices.
  - **Application**: Unique to the Common Core, application standards are represented by tasks. In general, in order to complete these tasks, students must use both procedural knowledge and conceptual understanding.

The *Ready* program addresses all three of the multiple representations buckets. Both the Develop Skills and Strategies lessons and the Focus on Math Concepts lessons use language such as solve, identify, and use, while the Focus on Math Concepts lessons encourage students to understand and explain. The Performance Tasks at the end of every unit make sure students are able to combine procedural knowledge and conceptual understanding.

- The teacher-led Mathematical Discourse feature in the *Ready* lessons guides collaborative reasoning and the exchange of ideas and mathematical arguments. Lessons also provide error analysis exercises that ask students to examine a fictional student’s wrong answer. There are also multiple opportunities throughout each lesson to explain and communicate reasoning.

- With the rigor to teach and assess the CCSS, *Ready Common Core Depth of Knowledge* (DOK) item distributions are based on item specifications from Smarter Balanced and were evaluated using the Smarter Balanced Cognitive Rigor Matrix. There is a natural progression within the *Ready* lessons that aligns DOK levels with the standards (analyzing, integrating, synthesizing).

- The *Practice and Problem Solving Book*—which extends learning with activities and games that provide repeated opportunities for students to develop understanding and fluency of key skills and concepts—can be used for independent practice in class, after school, or at home. A family letter for every lesson helps parents or caregivers understand the content and participate in the lesson activity with their child. Rigorous performance tasks ask students to integrate concepts and skills from multiple standards within the unit to solve multi-step problems, and computation practice worksheets at the end of the book require students to demonstrate procedural fluency.

- For grades K–1, *Ready* helps young learners build the conceptual understanding needed to tackle more complex mathematical concepts. Each lesson begins with an engaging group activity that draws upon prior knowledge, then moves to interactive pictorial representations of the same skill or concept, while encouraging students to show their thinking.

- For grades 2–5, Math in Action lessons at the end of every unit teach students how to solve performance tasks and require the integration of multiple standards. The Standards for Mathematical Practice Handbook in the student book makes mathematical habits of mind truly accessible. The
Student Glossary embeds additional vocabulary support and enhances explicit vocabulary instruction. Lesson Quizzes in the Teacher Toolbox provide opportunities to assess mastery of the standard taught on the lesson.

- **i-Ready Diagnostic** computer-adaptive assessments collect a broad spectrum of data on students’ abilities, identify areas where learners are struggling, measure growth across each student’s K-12 career, and prescribe an instructional path that includes explicit next steps for teacher-led and online instruction.

- **Ready Assessments** (print) and **i-Ready Diagnostic** (online) prepare students for more complex statewide assessments with technology-enhanced items, full-length practice tests, and interim assessments that include performance tasks.

- The online, fixed-form i-Ready Standards Mastery assessments for grades 2–8 provide targeted insight into each student’s mastery of individual, grade-level standards through a blend of constructed-response, open-ended response, and selected-response items plus a broad range of media with embedded audio, video, and imagery.

The comprehensive Ready Teacher Resource Book supports teachers of all experience levels with point-of-impact professional learning—every page delivers critical background knowledge (including the Common Core learning progression and prerequisite skills). Throughout, the guide embeds best-practice teaching tips—such as integrating questions to lead meaningful classroom discussions, interactive listening and media activities to encourage real-world connections, and opportunities for students to explain their thinking and demonstrate their understanding of concepts—and explicit guidance on diagnosing student needs and differentiating instruction for a diverse range of learners (including English language learners) and learning styles.

**Notes:**
Manipulatives have to be purchased separately and Professional Development is strongly encouraged.

**Key Features:**
- Curriculum Associates’ solution is research-based and proven to yield measurable improvements in students’ performance against the more challenging Common Core State Standards (CCSS). Combining valid and reliable assessment, rigorous core instruction, and meaningful practice, intervention, and enrichment for those who need it, this approach includes Ready Common Core and i-Ready Diagnostic & Instruction:
  - **Diagnose:** Identify student needs at the sub-skill level, based on the expectations of the Common Core and Idaho state standards with the computer-adaptive i-Ready Diagnostic assessment (three times each academic year—beginning, mid, and end).
  - **Whole-class instruction:** Use Ready Common Core print materials as the core day-to-day mathematics curriculum.
  - **Differentiate:** Use the teacher-friendly reports from i-Ready Diagnostic reports to identify specific resources and lessons for individual and small group intervention within Ready Common Core print program.
  - **Independent instruction, practice, and homework:** Use the Practice and Problem Solving Book and i-Ready Instruction.
  - **Progress monitoring:** Track student progress via Ready Assessments and i-Ready’s web-based diagnostic, interim growth monitoring, embedded progress monitoring, and standards mastery assessments.

Key features of these programs are summarized in the list below.
- *Ready Common Core* is a rigorous, on-grade level instruction and practice program for mathematics that fully prepares students for the Idaho Core State Standards for mathematics. Highly supportive for students, Ready also provides teachers of all backgrounds and experience levels with step-by-step, point-of-use professional development to teach the standards most effectively.
- Specifically designed and developed for the Common Core, Ready Common Core and i-Ready Diagnostic & Instruction reflect the Common Core Publishers’ Criteria, learning progression documents, and the guidance from the Smarter Balanced Assessment Consortium. The solution provides print and online resources (including interactive whiteboard lessons) to differentiate instruction for students across the performance spectrum.
- The Ready Mathematics Student Books contain two types of lessons—concept and skills lessons.
The “Focus on Math Concepts” lessons encourage students to pause from the procedural and just concentrate on the conceptual, while the “Develop Skills and Strategies” lessons build students’ fluency by leading students to develop, practice, and apply new skills to solve problems.

- The Ready Mathematics Student Books expose students to multiple representations—to measure whether or not students have gained a deep understanding of a mathematical concept, assessment items must include multiple representations. EngageNY.org specifies three “buckets” of multiple representations:
  - **Procedural Skills**: These apply to standards that reference verbs such as compute, solve, identify, interpret, use, make, and find solutions. Procedural representations are most often multiple-choice questions that require students to apply and identify mathematical processes in various ways.
  - **Conceptual Understanding**: These representations use verbs such as understand, explain, represent, and describe when applied to standards, which results in students having to combine mathematical practices.
  - **Application**: Unique to the Common Core, application standards are represented by tasks. In general, in order to complete these tasks, students must use both procedural knowledge and conceptual understanding.

The Ready program addresses all three of the multiple representations buckets. Both the Develop Skills and Strategies lessons and the Focus on Math Concepts lessons use language such as solve, identify, and use, while the Focus on Math Concepts lessons encourage students to understand and explain. The Performance Tasks at the end of every unit make sure students are able to combine procedural knowledge and conceptual understanding.

- The teacher-led Mathematical Discourse feature in the Ready lessons guides collaborative reasoning and the exchange of ideas and mathematical arguments. Lessons also provide error analysis exercises that ask students to examine a fictional student’s wrong answer. There are also multiple opportunities throughout each lesson to explain and communicate reasoning.

- With the rigor to teach and assess the CCSS, Ready Common Core Depth of Knowledge (DOK) item distributions are based on item specifications from Smarter Balanced and were evaluated using the Smarter Balanced Cognitive Rigor Matrix. There is a natural progression within the Ready lessons that aligns DOK levels with the standards (analyzing, integrating, synthesizing).

- The Practice and Problem Solving Book—which extends learning with activities and games that provide repeated opportunities for students to develop understanding and fluency of key skills and concepts—can be used for independent practice in class, after school, or at home. A family letter for every lesson helps parents or caregivers understand the content and participate in the lesson activity with their child. Rigorous performance tasks ask students to integrate concepts and skills from multiple standards within the unit to solve multi-step problems, and computation practice worksheets at the end of the book require students to demonstrate procedural fluency.

- For grades K–1, Ready helps young learners build the conceptual understanding needed to tackle more complex mathematical concepts. Each lesson begins with an engaging group activity that draws upon prior knowledge, then moves to interactive pictorial representations of the same skill or concept, while encouraging students to show their thinking.

- For grades 2–5, Math in Action lessons at the end of every unit teach students how to solve performance tasks and require the integration of multiple standards. The Standards for Mathematical Practice Handbook in the student book makes mathematical habits of mind truly accessible. The Student Glossary embeds additional vocabulary support and enhances explicit vocabulary instruction. Lesson Quizzes in the Teacher Toolbox provide opportunities to assess mastery of the standard taught on the lesson.

- i-Ready Diagnostic computer-adaptive assessments collect a broad spectrum of data on students’ abilities, identify areas where learners are struggling, measure growth across each student’s K-12 career, and prescribe an instructional path that includes explicit next steps for teacher-led and online instruction.
• Ready Assessments (print) and i-Ready Diagnostic (online) prepare students for more complex statewide assessments with technology-enhanced items, full-length practice tests, and interim assessments that include performance tasks.

• The online, fixed-form i-Ready Standards Mastery assessments for grades 2–8 provide targeted insight into each student’s mastery of individual, grade-level standards through a blend of constructed-response, open-ended response, and selected-response items plus a broad range of media with embedded audio, video, and imagery.

The comprehensive Ready Teacher Resource Book supports teachers of all experience levels with point-of-impact professional learning—every page delivers critical background knowledge (including the Common Core learning progression and prerequisite skills). Throughout, the guide embeds best-practice teaching tips—such as integrating questions to lead meaningful classroom discussions, interactive listening and media activities to encourage real-world connections, and opportunities for students to explain their thinking and demonstrate their understanding of concepts—and explicit guidance on diagnosing student needs and differentiating instruction for a diverse range of learners (including English language learners) and learning styles.

### Notes:
- **Strengths:**
  - Fully aligned to standards, conceptual understanding attended to throughout, teacher and student friendly, vertical alignment charts, helps for differentiation
  - The curriculum has easy navigation, teacher and student engagement, as well as a purposeful focus on the mathematics

### Key Features:
- Curriculum Associates’ solution is research-based and proven to yield measurable improvements in students’ performance against the more challenging Common Core State Standards (CCSS). Combining valid and reliable assessment, rigorous core instruction, and meaningful practice, intervention, and enrichment for those who need it, this approach includes **Ready Common Core and i-Ready Diagnostic & Instruction**:
  - **Diagnose:** Identify student needs at the sub-skill level, based on the expectations of the Common Core and Idaho state standards with the computer-adaptive **i-Ready Diagnostic** assessment (three times each academic year—beginning, mid, and end).
  - **Whole-class instruction:** Use **Ready Common Core** print materials as the core day-to-day mathematics curriculum.
  - **Differentiate:** Use **i-Ready Diagnostic** real-time reports to identify specific **i-Ready** and **Ready Common Core** resources and lessons for individual and small group intervention, plus instructional rotations.
  - **Independent instruction, practice, and homework:** Use the **Practice and Problem Solving Book** and **i-Ready Instruction**.
  - **Progress monitoring:** Track student progress via **Ready Assessments** and **i-Ready’s** web-based diagnostic, interim growth monitoring, embedded progress monitoring, and standards mastery assessments.

Key features of these programs are summarized in the list below.
- **Ready Common Core** is a rigorous, on-grade level instruction and practice program for mathematics that fully prepares students for the Idaho Core State Standards for mathematics. Highly supportive for students, **Ready** also provides teachers of all backgrounds and experience levels with step-by-step, point-of-use professional development to teach the standards most effectively.
- Specifically designed and developed for the Common Core, **Ready Common Core** and **i-Ready Diagnostic & Instruction** reflect the Common Core Publishers’ Criteria, learning progression documents, and the guidance from the Smarter Balanced Assessment Consortium. The solution provides print and online resources (including interactive whiteboard lessons) to differentiate instruction for students across the performance spectrum.
## Consent

**JUNE 16, 2016**

- The *Ready Mathematics* Student Books contain two types of lessons—concept and skills lessons. The “Focus on Math Concepts” lessons encourage students to pause from the procedural and just concentrate on the conceptual, while the “Develop Skills and Strategies” lessons build students’ fluency by leading students to develop, practice, and apply new skills to solve problems.

- The *Ready Mathematics* Student Books expose students to multiple representations—to measure whether or not students have gained a deep understanding of a mathematical concept, assessment items must include multiple representations. EngageNY.org specifies three “buckets” of multiple representations:
  - **Procedural Skills**: These apply to standards that reference verbs such as *compute*, *solve*, *identify*, *interpret*, *use*, *make*, and *find solutions*. Procedural representations are most often multiple-choice questions that require students to apply and identify mathematical processes in various ways.
  - **Conceptual Understanding**: These representations use verbs such as *understand*, *explain*, *represent*, and *describe* when applied to standards, which results in students having to combine mathematical practices.
  - **Application**: Unique to the Common Core, application standards are represented by tasks. In general, in order to complete these tasks, students must use both procedural knowledge and conceptual understanding.

The *Ready* program addresses all three of the multiple representations buckets. Both the Develop Skills and Strategies lessons and the Focus on Math Concepts lessons use language such as *solve*, *identify*, and *use*, while the Focus on Math Concepts lessons encourage students to *understand* and *explain*. The Performance Tasks at the end of every unit make sure students are able to combine procedural knowledge and conceptual understanding.

- The teacher-led Mathematical Discourse feature in the *Ready* lessons guides collaborative reasoning and the exchange of ideas and mathematical arguments. Lessons also provide error analysis exercises that ask students to examine a fictional student’s wrong answer. There are also multiple opportunities throughout each lesson to explain and communicate reasoning.

- With the rigor to teach and assess the CCSS, *Ready Common Core* Depth of Knowledge (DOK) item distributions are based on item specifications from Smarter Balanced and were evaluated using the Smarter Balanced Cognitive Rigor Matrix. There is a natural progression within the *Ready* lessons that aligns DOK levels with the standards (analyzing, integrating, synthesizing).

- The *Practice and Problem Solving Book*—which extends learning with activities and games that provide repeated opportunities for students to develop understanding and fluency of key skills and concepts—can be used for independent practice in class, after school, or at home. A family letter for every lesson helps parents or caregivers understand the content and participate in the lesson activity with their child. Rigorous performance tasks ask students to integrate concepts and skills from multiple standards within the unit to solve multi-step problems, and computation practice worksheets at the end of the book require students to demonstrate procedural fluency.

- For grades 6–8, *Ready* provides rigorous instruction on the Common Core Math Standards and develops mathematical reasoning through lessons that use real-world problem solving as instruction—embedding the Standards for Mathematical Practice to help students develop habits of mind.

- *i-Ready Diagnostic* computer-adaptive assessments collect a broad spectrum of data on students’ abilities, identify areas where learners are struggling, measure growth across each student’s K-12 career, and prescribe an instructional path that includes explicit next steps for teacher-led and online instruction.

- *Ready Assessments (print)* and *i-Ready Diagnostic (online)* prepare students for more complex statewide assessments with technology-enhanced items, full-length practice tests, and interim assessments that include performance tasks.

- The online, fixed-form *i-Ready Standards Mastery* assessments for grades 2–8 provide targeted
The comprehensive *Ready Teacher Resource Book* supports teachers of all experience levels with point-of-impact professional learning—every page delivers critical background knowledge (including the Common Core learning progression and prerequisite skills). Throughout, the guide embeds best-practice teaching tips—such as integrating questions to lead meaningful classroom discussions, interactive listening and media activities to encourage real-world connections, and opportunities for students to explain their thinking and demonstrate their understanding of concepts—and explicit guidance on diagnosing student needs and differentiating instruction for a diverse range of learners (including English language learners) and learning styles.

CONSENT
JUNE 16, 2016
Notes:
Strengths:
The overall strength of these materials is the commitment to encouraging the kind of thinking and work that is different in the CCSS. Getting away from an emphasis on rote procedures and instead placing more emphasis on conceptual understanding by asking students to think and respond to thoughtful questions and posing questions without obvious answers. The hands on activities are easy to implement as they often use common classroom supplies like paper or cutting paper.

Weaknesses:
A weakness is that the material sometimes does not provide enough of the skill based practice, that procedural fluency piece; it is there, just not as balanced it seems. Materials are in a consumable workbook format which may be a significant cost. The series also states that Professional Development is a requirement (at a cost).

Key Features:
- Curriculum Associates’ solution is research-based and proven to yield measurable improvements in students’ performance against the more challenging Common Core State Standards (CCSS). Combining valid and reliable assessment, rigorous core instruction, and meaningful practice, intervention, and enrichment for those who need it, this approach includes Ready Common Core and i-Ready Diagnostic & Instruction:
  - **Diagnose**: Identify student needs at the sub-skill level, based on the expectations of the Common Core and Idaho state standards with the computer-adaptive i-Ready Diagnostic assessment (three times each academic year—beginning, mid, and end).
  - **Whole-class instruction**: Use Ready Common Core print materials as the core day-to-day mathematics curriculum.
  - **Differentiate**: Use i-Ready Diagnostic real-time reports to identify specific i-Ready and Ready Common Core resources and lessons for individual and small group intervention, plus instructional rotations.
  - **Independent instruction, practice, and homework**: Use the Practice and Problem Solving Book and i-Ready Instruction.
  - **Progress monitoring**: Track student progress via Ready Assessments and i-Ready’s web-based diagnostic, interim growth monitoring, embedded progress monitoring, and standards mastery assessments.

Key features of these programs are summarized in the list below.
- Ready Common Core is a rigorous, on-grade level instruction and practice program for mathematics that fully prepares students for the Idaho Core State Standards for mathematics. Highly supportive for students, Ready also provides teachers of all backgrounds and experience levels with step-by-step, point-of-use professional development to teach the standards most effectively.
- Specifically designed and developed for the Common Core, Ready Common Core and i-Ready Diagnostic & Instruction reflect the Common Core Publishers’ Criteria, learning progression documents, and the guidance from the Smarter Balanced Assessment Consortium. The solution provides print and online resources (including interactive whiteboard lessons) to differentiate instruction for students across the performance spectrum.
The *Ready Mathematics* Student Books contain two types of lessons—concept and skills lessons. The “Focus on Math Concepts” lessons encourage students to pause from the procedural and just concentrate on the conceptual, while the “Develop Skills and Strategies” lessons build students’ fluency by leading students to develop, practice, and apply new skills to solve problems.

The *Ready Mathematics* Student Books expose students to multiple representations—to measure whether or not students have gained a deep understanding of a mathematical concept, assessment items must include multiple representations. EngageNY.org specifies three “buckets” of multiple representations:

- **Procedural Skills**: These apply to standards that reference verbs such as *compute*, *solve*, *identify*, *interpret*, *use*, *make*, and *find solutions*. Procedural representations are most often multiple-choice questions that require students to apply and identify mathematical processes in various ways.

- **Conceptual Understanding**: These representations use verbs such as *understand*, *explain*, *represent*, and *describe* when applied to standards, which results in students having to combine mathematical practices.

- **Application**: Unique to the Common Core, application standards are represented by tasks. In general, in order to complete these tasks, students must use both procedural knowledge and conceptual understanding.

The *Ready* program addresses all three of the multiple representations buckets. Both the Develop Skills and Strategies lessons and the Focus on Math Concepts lessons use language such as *solve*, *identify*, and *use*, while the Focus on Math Concepts lessons encourage students to *understand* and *explain*. The Performance Tasks at the end of every unit make sure students are able to combine procedural knowledge and conceptual understanding.

The teacher-led Mathematical Discourse feature in the *Ready* lessons guides collaborative reasoning and the exchange of ideas and mathematical arguments. Lessons also provide error analysis exercises that ask students to examine a fictional student’s wrong answer. There are also multiple opportunities throughout each lesson to explain and communicate reasoning.

With the rigor to teach and assess the CCSS, *Ready Common Core* Depth of Knowledge (DOK) item distributions are based on item specifications from Smarter Balanced and were evaluated using the Smarter Balanced Cognitive Rigor Matrix. There is a natural progression within the *Ready* lessons that aligns DOK levels with the standards (analyzing, integrating, synthesizing).

The *Practice and Problem Solving Book*—which extends learning with activities and games that provide repeated opportunities for students to develop understanding and fluency of key skills and concepts—can be used for independent practice in class, after school, or at home. A family letter for every lesson helps parents or caregivers understand the content and participate in the lesson activity with their child. Rigorous performance tasks ask students to integrate concepts and skills from multiple standards within the unit to solve multi-step problems, and computation practice worksheets at the end of the book require students to demonstrate procedural fluency.

For grades 6–8, *Ready* provides rigorous instruction on the Common Core Math Standards and develops mathematical reasoning through lessons that use real-world problem solving as instruction—embedding the Standards for Mathematical Practice to help students develop habits of mind.

*i-Ready Diagnostic* computer-adaptive assessments collect a broad spectrum of data on students’ abilities, identify areas where learners are struggling, measure growth across each student’s K-12 career, and prescribe an instructional path that includes explicit next steps for teacher-led and online instruction.

*Ready Assessments* (print) and *i-Ready Diagnostic* (online) prepare students for more complex statewide assessments with technology-enhanced items, full-length practice tests, and interim assessments that include performance tasks.

The online, fixed-form *i-Ready Standards Mastery* assessments for grades 2–8 provide targeted
insight into each student’s mastery of individual, grade-level standards through a blend of constructed-response, open-ended response, and selected-response items plus a broad range of media with embedded audio, video, and imagery.

The comprehensive Ready Teacher Resource Book supports teachers of all experience levels with point-of-impact professional learning—every page delivers critical background knowledge (including the Common Core learning progression and prerequisite skills). Throughout, the guide embeds best-practice teaching tips—such as integrating questions to lead meaningful classroom discussions, interactive listening and media activities to encourage real-world connections, and opportunities for students to explain their thinking and demonstrate their understanding of concepts—and explicit guidance on diagnosing student needs and differentiating instruction for a diverse range of learners (including English language learners) and learning styles.

Notes:
The sole purpose of this program is to build basic math fact fluency.

Strengths:
The Reflex program does a great job of accomplishing its objective which is to build basic math fact fluency. The program engages and optimizes each student's individual learning experience. The program is most successful when used for 15-20 minutes each day rather than larger chunks of class or homework time sporadically. It can be accessed anywhere with internet and there is an app available.

Weakness: Reflex was not created to develop conceptual understanding and therefore does not cover requirements needed to meet the necessary evidence required for those categories (Rigor and Balance, Standards of Mathematical Practice).

Key Features:
ExploreLearning Reflex is an adaptive and individualized online system which helps students in grades 2-8 develop instant recall of their basic math facts (Addition-Subtraction 0 – 10, Multiplication-Division 0 – 10, or Multiplication-Division 0 – 12). Key Reflex features include:

- Adaptive and individualized instruction: Reflex continuously monitors and adapts to each student's performance to create the optimal experience for every student.

- Intuitive and powerful reporting: Educators have everything they need to easily monitor and support student progress in Reflex.

- Game-based design: Reflex uses engaging games and rewards to create a highly motivational environment that encourages student effort and progress.

Flexible and accessible implementation: Reflex can be used with students of all ability levels; anywhere there is an Internet connection.

### Key Features:
The Eureka Math elementary mathematics curriculum, A Story of Units®, offers print and digital components for teachers and students, as well as live and online professional development for teachers and support resources for parents. Spanish translations of student-facing materials will be available to support the 2016-2017 school year.

#### Notes:
Due to the rigor of the program, it is recommended to use as a K-5/K-8 program—not just in 2nd grade.
Notes:
Eureka Math appears to be written specifically with the standards in mind. Each module builds upon concepts learned across lessons and grade levels. It focuses a great deal of time on building conceptual understanding and giving students the opportunities to practice these skills and build on them to mastery. Many supports are provided for teachers, students, and families through the Great Minds website.

Key Features:

Notes:
It is essential for this curriculum to be adopted in K-6 if it is going to be used in 7-12. Because it is such a rigorous program, 7-12 programs need the foundational skills taught in K-6.

Eureka Math appears to be written specifically with the standards in mind. Each module builds upon concepts learned across lessons and grade levels. It focuses a great deal of time on building conceptual understanding and giving students the opportunities to practice these skills and build on them to mastery. </table>

**Notes:**
The curriculum needs to be adopted in K-5 or K-6 so that it can be transferred to 7-12. This program starts in kindergarten and follows strict patterns for building foundational skills.

Eureka Math appears to be written specifically with the standards in mind. Each module builds upon concepts learned across lessons and grade levels. It focuses a great deal of time on building conceptual understanding and giving students the opportunities to practice these skills and build on them to mastery. Many supports are provided for teachers, students, and families through the Great Minds website.

**Key Features:**
The Eureka Math elementary mathematics curriculum, A Story of Units®, offers print and digital components for teachers and students, as well as live and online professional development for teachers and support resources for parents. Spanish translations of student-facing materials will be available to support the 2016-2017 school year.

<td>Core</td>
</tr>
</tbody>
</table>

**Notes:**
The curriculum is very rigorous. It would be best to adopt K-6 so students have the foundation they need to be successful in subsequent grades.

**Key Features:**
The Eureka Math elementary mathematics curriculum, A Story of Ratios®, offers print and digital components for teachers and students, as well as live and online professional development for teachers and support resources for parents. Spanish translations of student-facing materials will be available to support the 2016-2017 school year.

**Notes:**
Strengths:
- Curriculum flows and is easy to follow
- Discussion opportunities are engaging to students and promote student participation
- Standards are thoroughly addressed throughout the curriculum
- Student exercises reinforce conceptual understanding
- Great conceptual knowledge activities
- Deep knowledge and understanding
- Students will get a deep understanding of mathematics

Weaknesses:
- There are minimal ELL supports
- The text is not visually engaging
- Sometimes the skills practice is too intense

**Key Features:**
The Eureka Math elementary mathematics curriculum, *A Story of Ratios®,* offers print and digital components for teachers and students, as well as live and online professional development for teachers and support resources for parents. Spanish translations of student-facing materials will be available to support the 2016-2017 school year.

Great Minds | Eureka Math - A Story of Functions - Algebra I Algebra I Full Class Print Bundle 30 | Great Minds | 2015-16 | 9 | 978-1-63255-324-9 | Core

**Notes:**
In order for this curriculum to be adopted and be appropriate for the grade level, Great Minds’ texts would have to have been adopted in earlier grades before this class.

**Strengths:**
- Good use of prior knowledge
- Covers all standards
- Module overview is very useful
- Good conceptual problems to support deeper learning
- Covers all mathematical practices and explicitly marks where they are covered
- Scaffolding suggestions in teacher edition are helpful

**Weaknesses:**
- Very rigorous
- In some areas/sections the amount of procedural problems are lacking
- No glossary
- Vocabulary not clearly marked throughout lessons
- Lacking in ELL and special populations accommodations
- No Spanish/English glossary

**Key Features:**
The Eureka Math elementary mathematics curriculum, A Story of Functions®, offers print and digital components for teachers and students, as well as live and online professional development for teachers and support resources for parents. Spanish translations of student-facing materials will be available to support the 2016-2017 school year.

</table>

**Notes:**
Eureka Geometry would be most successful if foundational skills and comprehension are strong to begin with due to Eureka’s rigor.

**Strengths:**
- Mathematical practice approach and the conceptual understanding it builds
- There are rich application problems and the concrete to abstract learning is seen throughout

**Weaknesses:**
- The text is not as visually appealing for students engagement
- Navigation is a bit awkward with topics on the bottom of the page instead of the top

**Key Features:**
The Eureka Math elementary mathematics curriculum, A Story of Functions®, offers print and digital components for teachers and students, as well as live and online professional development for teachers and support resources for parents. Spanish translations of student-facing materials will be available to support the 2016-2017 school year.

</tbody>
</table>

- Mathematical practice approach and the conceptual understanding it builds
- There are rich application problems and the concrete to abstract learning is seen throughout

**Weaknesses:**
- The text is not as visually appealing for students engagement
- Navigation is a bit awkward with topics on the bottom of the page instead of the top
Algebra II represents a math curriculum with high expectations for all learners. This is certainly strength, but the design of the curriculum could leave struggling learners behind without additional support provided outside of the curriculum. Referring teachers (and students) to earlier curriculum to review and reinforce standards can be useful, but it does not provide support for students that struggled in the same curriculum previously (e.g. the algebra II student that also completed work in Eureka Math: Algebra I).

The text does cover all standards and mathematical practices.

Adoption of this specific title makes sense if a school adopts Eureka Math for all grades (or at least all grades addressed within a specific story—A Story of Ratios and Functions is grade 6-12) because all stakeholders become familiar with the nuances and processes of the curriculum.

Additionally, this is a “free” curriculum that can be accessed by anyone online. This is great! With that said, schools that purchase this curriculum would either need to buy workbooks each year or print out the student materials.

**Key Features:**
The Eureka Math elementary mathematics curriculum, A Story of Functions®, offers print and digital components for teachers and students, as well as live and online professional development for teachers and support resources for parents. Spanish translations of student-facing materials will be available to support the 2016-2017 school year.

Great Minds | Eureka Math - A Story of Functions: Pre-Calculus Full Class Print Bundle 30 | Great Minds | 2015-16 | 12 | 978-1-63255-738-4 | Core

**Notes:**
Eureka Pre-calculus would be most successful if prior material is rigorous in skills and comprehension. It would be perfect material for STEM courses and motivated learners.

Strengths are in the design of the text as a whole, in building on prerequisites, on engaging application problems, in the rigor and appropriate level of vocabulary, the lesson designs, the ample procedural practice problems, the authentic assessments, and opportunities to differentiate and extend student learning.

- The text leads with the "story" of each concept, and leads teachers/students through big ideas toward procedural tasks in a cohesive manner.
- This material would also be a great tool to, possibly, engage "at-risk" students.
- Very rich material

Weaknesses are very few. Navigation was at times slightly awkward with the topic heading at the bottom of the page instead of the top.

**Key Features:**
The Eureka Math elementary mathematics curriculum, A Story of Functions®, offers print and digital components for teachers and students, as well as live and online professional development for teachers and support resources for parents. Spanish translations of student-facing materials will be available to support the 2016-2017 school year.

**Math Expressions Student Activity Book 5-Year Print Subscription (Softcover) Grade K (includes Volumes 1 & 2)**

**Notes:**

**Strengths:**
- Teacher materials allow the teacher to understand the layout of the unit(s) with ease
- Vocabulary and world problems were engaging and age appropriate
- Sub/new teachers could easily pick up and teach a lesson without too much stress

**Weaknesses:**
- It would be nice if Puzzled Penguin is right sometimes to make students think about the complexity of the concept

**Key Features:**

*Math Expressions* is a comprehensive mathematics curriculum for Kindergarten through Grade 6 that offers new ways to teach and learn mathematics. It follows the most recent recommendations for effective math instruction and aligns with many state standards and supports the Common Core State Standards. Math Expressions is:

- Comprehensive, research-based program that is fully aligned to the Common Core State Standards and Learning Progressions
- Written by well-respected researcher and author, Dr. Karen Fuson, who contributed to the research base for the CCSS, participated on the CCSS Mathematical Feedback
- Committees and is a writer of the Learning Progressions for the CCSS in Mathematics Document
- Combines the most powerful elements of standards-based instruction with the most effective methods of traditional approaches
- Emphasizes deeper understanding through real-world problems, modeling, Math Talk, and exploration in order to build ideas that make sense to students
- Students study a small number of mathematical concepts in order to have time to develop the knowledge to build in-depth understanding of big ideas
- Teachers create an exploratory environment and encourage constructive discussion. Student invent, question, model and represent, but also learn and practice important math strategies
- Through daily Math Talk, students explain methods and in turn, become more fluent in them.
- Math Talk is supported with math boards and manipulatives to develop conceptual learning and fluency
- Mathematics content and models connect and build across grade levels to provide a
progression of teaching and learning that aligns precisely with the CCSS

- As students’ confidence and experience build, use of modeling, repeated reasoning, and abstract thinking grow, leading to mastery of hallmark CCSS Mathematical Practice Standards

### Extensive teaching materials

Include research and math background with the Common Core Learning Progressions and Mathematical Practices clearly identified.

• It would be nice if Puzzled Penguin is right sometimes to make students think about the complexity of the concept

**Key Features:**

*Math Expressions* is a comprehensive mathematics curriculum for Kindergarten through Grade 6 that offers new ways to teach and learn mathematics. It follows the most recent recommendations for effective math instruction and aligns with many state standards and supports the Common Core State Standards. Math Expressions is:

- Comprehensive, research-based program that is fully aligned to the **Common Core State Standards** and **Learning Progressions**

- Written by well-respected researcher and author, **Dr. Karen Fuson**, who contributed to the research base for the CCSS, participated on the CCSS Mathematical Feedback Committee and is a writer of the Learning Progressions for the CCSS in Mathematics Document

- Combines the most powerful elements of standards-based instruction with the most effective methods of traditional approaches

- Emphasizes **deeper understanding** through real-world problems, modeling, Math Talk, and exploration in order to build ideas that make sense to students

- Students study a small number of mathematical concepts in order to have time to develop the knowledge to build in-depth understanding of big ideas

- Teachers create an **exploratory environment** and encourage constructive discussion. Student invent, question, model and represent, but also learn and practice important math strategies

- Through daily **Math Talk**, students explain methods and in turn, become more fluent in them.

- Math Talk is supported with math boards and manipulatives to develop conceptual learning and fluency

- Mathematics content and models connect and build across grade levels to provide a progression of teaching and learning that aligns precisely with the CCSS

- As students confidence and experience build, use of modeling, repeated reasoning, and abstract thinking grow, leading to mastery of hallmark CCSS **Mathematical Practice Standards**

**Extensive teaching materials** include research and math background with the Common Core Learning Progressions and Mathematical Practices clearly identified

</table>

**Notes:**
Curriculum provides detailed lessons that can be taught by all teachers with ease and fidelity, including first year teachers, new to grade teachers, and substitute teachers. It also provides a detailed coherent across grade level plan so teachers can see the expectation from grade level to grade level. Support for ALL learners can be found on EVERY lesson, allowing teachers to find the applicable level of intervention for their students.
Weaknesses:
It would be nice if Puzzled Penguin could be right sometimes, instead of always wrong. This would allow students to construct viable arguments as to why he is right.

**Notes:**  
**Strengths:**  
- Focus on grade level standards (major work)  
- Focus on and support of mathematical practices with each lesson  
- Use of manipulatives to model and develop conceptual understanding  
- Multiple supports for differentiation (for teacher and student)

**Weaknesses:**  
- Lack of independent conceptual work (not teacher lead)  
- Overabundance and time on fluency/bare problems  
- Lack of connection from conceptual work to independent exercises (connect fluency work with conceptual work)

**Key Features:**  
*Math Expressions* is a comprehensive mathematics curriculum for Kindergarten through Grade 6 that offers new ways to teach and learn mathematics. It follows the most recent recommendations for effective math instruction and aligns with many state standards and supports the Common Core State Standards. Math Expressions is:  
- Comprehensive, research-based program that is fully aligned to the [Common Core State Standards](https://www.corestandards.org) and [Learning Progressions](https://www.corestandards.org/).  
- Written by well-respected researcher and author, Dr. Karen Fuson, who contributed to the research base for the CCSS, participated on the CCSS Mathematical Feedback  
- Committees and is a writer of the Learning Progressions for the CCSS in Mathematics Document  
- Combines the most powerful elements of standards-based instruction with the most effective methods of traditional approaches  
- Emphasizes **deeper understanding** through real-world problems, modeling, Math Talk, and exploration in order to build ideas that make sense to students  
- Students study a small number of mathematical concepts in order to have time to develop the knowledge to build in-depth understanding of big ideas  
- Teachers create an **exploratory environment** and encourage constructive discussion. Student invent, question, model and represent, but also learn and practice important math strategies  
- Through daily **Math Talk**, students explain methods and in turn, become more fluent
• Math Talk is supported with math boards and manipulatives to develop conceptual learning and fluency.
• Mathematics content and models connect and build across grade levels to provide a progression of teaching and learning that aligns precisely with the CCSS.
• As students confidence and experience build, use of modeling, repeated reasoning, and abstract thinking grow, leading to mastery of hallmark CCSS Mathematical Practice Standards.

### Extensive teaching materials
include research and math background with the Common Core Learning Progressions and Mathematical Practices clearly identified.

## Key Features:
Math Expressions is a comprehensive mathematics curriculum for Kindergarten through Grade 6 that offers new ways to teach and learn mathematics. It follows the most recent recommendations for effective math instruction and aligns with many state standards and supports the Common Core State Standards. Math Expressions is:

- Comprehensive, research-based program that is fully aligned to the Common Core State Standards and Learning Progressions
- Written by well-respected researcher and author, Dr. Karen Fuson, who contributed to the research base for the CCSS, participated on the CCSS Mathematical Feedback
- Committees and is a writer of the Learning Progressions for the CCSS in Mathematics Document
- Combines the most powerful elements of standards-based instruction with the most effective methods of traditional approaches
- Emphasizes deeper understanding through real-world problems, modeling, Math Talk, and exploration in order to build ideas that make sense to students
- Students study a small number of mathematical concepts in order to have time to develop the knowledge to build in-depth understanding of big ideas
- Teachers create an exploratory environment and encourage constructive
discussion. Student invent, question, model and represent, but also learn and practice important math strategies

- Through daily **Math Talk**, students explain methods and in turn, become more fluent in them.
- Math Talk is supported with math boards and manipulatives to develop conceptual learning and fluency
- Mathematics content and models connect and build across grade levels to provide a progression of teaching and learning that aligns precisely with the CCSS
- As students confidence and experience build, use of modeling, repeated reasoning, and abstract thinking grow, leading to mastery of hallmark CCSS **Mathematical Practice Standards**

**Extensive teaching materials** include research and math background with the Common Core Learning Progressions and Mathematical Practices clearly identified

**Key Features:**

GO Math! for Kindergarten through Grade 6 was built from the ground up for the Common Core State Standards (CCSS). The program, available in English and Spanish, provides in-depth instruction with equal emphasis on conceptual understanding, procedural fluency, and real-world application. The program includes a fully integrated digital curriculum that transforms instruction and learning. GO Math! exemplifies best practices in research-based curriculum and the best of today’s educational technology. Over the past five years, Houghton Mifflin Harcourt (HMH) has provided the trusted content of the GO Math! program to over seven million students in every state in the US and in 72 countries. GO Math! was selected as a finalist in the 2015 Revere Awards from the Association of American Publishers (AAP). HMH was honored to have GO Math! identified for its excellence as a high-quality product that supports teaching and learning.

Comprehensive digital resources promote mastery and support students, teachers, administrators, and families. The next-generation digital components have been designed specifically with students and teachers in mind, with online and offline accessibility, tutorial videos, interactivities, and adaptive tools available at point-of-use. GO Math! teacher components present new levels of convenience and efficiency around planning, instructing, assigning, and assessing.

The program provides rigor and depth with increased accessibility, with the Mathematical Practices embedded in every lesson, interactivity, research-based instructional approaches, and differentiated instructional resources to ensure success for all students. The program comes with our commitment to deliver quality implementation training that meets the needs of your district through comprehensive on-site and online support. GO Math! will help you meet the goals set for Idaho’s students.

**Notes:**  
Low in Alignment Criteria

**Key Features:**  
**GO Math!** for Kindergarten through Grade 6 was built from the ground up for the Common Core State Standards (CCSS). The program, available in English and Spanish, provides in-depth instruction with equal emphasis on conceptual understanding, procedural fluency, and real-world application. The program includes a fully integrated digital curriculum that transforms instruction and learning. **GO Math!** exemplifies best practices in research-based curriculum and the best of today’s educational technology. Over the past five years, Houghton Mifflin Harcourt (HMH) has provided the trusted content of the **GO Math!** program to over seven million students in every state in the US and in 72 countries. **GO Math!** was selected as a finalist in the 2015 Revere Awards from the Association of American Publishers (AAP). HMH
was honored to have **GO Math!** identified for its excellence as a high-quality product that supports teaching and learning.

Comprehensive digital resources promote mastery and support students, teachers, administrators, and families. The next-generation digital components have been designed specifically with students and teachers in mind, with online and offline accessibility, tutorial videos, interactivities, and adaptive tools available at point-of-use. **GO Math!** teacher components present new levels of convenience and efficiency around planning, instructing, assigning, and assessing.

The program provides rigor and depth with increased accessibility, with the Mathematical Practices embedded in every lesson, interactivity, research-based instructional approaches, and differentiated instructional resources to ensure success for all students. The program continues with our commitment to deliver quality implementation training that meets the needs of your district through comprehensive on-site and online support. **GO Math!** will help you meet the goals set for Idaho’s students.

Notes:
This program meets all of the non-negotiables and most of the alignment criterion. The program is strong with use of instructional strategies, using manipulatives, vocabulary, ELL support, differentiation, assessment, performance tasks, RTI guides, and homework. The program is lacking in mathematical practices as it is weaker in teaching some additional and subtraction concepts, which is a major work in second grade. It also lacks in critiquing the arguments of others and having student pick their own tools.

Key Features:
GO Math! for Kindergarten through Grade 6 was built from the ground up for the Common Core State Standards (CCSS). The program, available in English and Spanish, provides in-depth instruction with equal emphasis on conceptual understanding, procedural fluency, and real-world application. The program includes a fully integrated digital curriculum that transforms instruction and learning. GO Math! exemplifies best practices in research-based curriculum and the best of today’s educational technology. Over the past five years, Houghton Mifflin Harcourt (HMH) has provided the trusted content of the GO Math! program to over seven million students in every state in the US and in 72 countries. GO Math! was selected as a finalist in the 2015 Revere Awards from the Association of American Publishers (AAP). HMH was honored to have GO Math! identified for its excellence as a high-quality product that supports teaching and learning.

Comprehensive digital resources promote mastery and support students, teachers, administrators, and families. The next-generation digital components have been designed specifically with students and teachers in mind, with online and offline accessibility, tutorial videos, interactivities, and adaptive tools available at point-of-use. GO Math! teacher components present new levels of convenience and efficiency around planning, instructing, assigning, and assessing.

The program provides rigor and depth with increased accessibility, with the Mathematical Practices embedded in every lesson, interactivity, research-based instructional approaches, and differentiated instructional resources to ensure success for all students. The program comes with our commitment to deliver quality implementation training that meets the needs of your district through comprehensive on-site and online support. GO Math! will help you meet the goals set for Idaho’s students.

**Notes:**
This program meets all the major, supporting, and additional clusters of third grade. It has everything needed to be a core mathematics program.

**Key Features:**
GO Math! for Kindergarten through Grade 6 was built from the ground up for the Common Core State Standards (CCSS). The program, available in English and Spanish, provides in-depth instruction with equal emphasis on conceptual understanding, procedural fluency, and real-world application. The program includes a fully integrated digital curriculum that transforms instruction and learning. GO Math! exemplifies best practices in research-based curriculum and the best of today’s educational technology. Over the past five years, Houghton Mifflin Harcourt (HMH) has provided the trusted content of the GO Math! program to over seven million students in every state in the US and in 72 countries. GO Math! was selected as a finalist in the 2015 Revere Awards from the Association of American Publishers (AAP), HMH was honored to have GO Math! identified for its excellence as a high-quality product that supports teaching and learning.

Comprehensive digital resources promote mastery and support students, teachers, administrators, and families. The next-generation digital components have been designed specifically with students and teachers in mind, with online and offline accessibility, tutorial videos, interactivities, and adaptive tools available at point-of-use. GO Math! teacher components present new levels of convenience and efficiency around planning, instructing, assigning, and assessing.

The program provides rigor and depth with increased accessibility, with the Mathematical Practices embedded in every lesson, interactivity, research-based instructional approaches, and differentiated instructional resources to ensure success for all students. The program comes with our commitment to deliver quality implementation training that meets the needs of your district through comprehensive on-site and online support. GO Math! will help you meet the goals set for Idaho’s students.

**Notes:**
This program fully supports the teacher to meet the Common Core Standards in a rigorous, conceptual manner, attending to special populations and differentiation, in a very clear, organized, easy to follow manner. The only areas of weakness noted were lack of multi-stop problems, not enough fluency and practice problems, and depth of mathematical reasoning in the areas of constructing arguments effectively and
justifying mathematical claims.

Key Features:

GO Math! for Kindergarten through Grade 6 was built from the ground up for the Common Core State Standards (CCSS). The program, available in English and Spanish, provides in-depth instruction with equal emphasis on conceptual understanding, procedural fluency, and real-world application. The program includes a fully integrated digital curriculum that transforms instruction and learning. GO Math! exemplifies best practices in research-based curriculum and the best of today’s educational technology. Over the past five years, Houghton Mifflin Harcourt (HMH) has provided the trusted content of the GO Math! program to over seven million students in every state in the US and in 72 countries. GO Math! was selected as a finalist in the 2015 Revere Awards from the Association of American Publishers (AAP). HMH was honored to have GO Math! identified for its excellence as a high-quality product that supports teaching and learning.

Comprehensive digital resources promote mastery and support students, teachers, administrators, and families. The next-generation digital components have been designed specifically with students and teachers in mind, with online and offline accessibility, tutorial videos, interactivities, and adaptive tools available at point-of-use. GO Math! teacher components present new levels of convenience and efficiency around planning, instructing, assigning, and assessing.

The program provides rigor and depth with increased accessibility, with the Mathematical Practices embedded in every lesson, interactivity, research-based instructional approaches, and differentiated instructional resources to ensure success for all students. The program comes with our commitment to deliver quality implementation training that meets the needs of your district through comprehensive on-site and online support. GO Math! will help you meet the goals set for Idaho’s students.

Notes:
The Engage activity at the start of each lesson is connected with digital resources.
Fact fluency to support conceptual learning is focused on in the digital materials.
The curriculum clearly builds upon prior knowledge and earlier concepts and then continues
the continuum of learning.
Domains, standards, and MPs are clearly identified and used meaningfully.
A strength of the curriculum is its attention to the conceptual understanding and use of
discussion. There is focus on a variety of instructional approaches and differentiation
resources.
Weaknesses lie in lack of basic fluency building and minimal use of multi-step problems.

Key Features:
**GO Math!** for Kindergarten through Grade 6 was built from the ground up for the Common
Core State Standards (CCSS). The program, available in English and Spanish, provides in-
depth instruction with equal emphasis on conceptual understanding, procedural fluency, and
real-world application. The program includes a fully integrated digital curriculum that
transforms instruction and learning. **GO Math!** exemplifies best practices in research-based
curriculum and the best of today’s educational technology. Over the past five years, Houghton
Mifflin Harcourt (HMH) has provided the trusted content of the **GO Math!** program to over
seven million students in every state in the US and in 72 countries. **GO Math!** was selected as
a finalist in the 2015 Revere Awards from the Association of American Publishers (AAP). HMH
was honored to have **GO Math!** identified for its excellence as a high-quality product that
supports teaching and learning.

Comprehensive digital resources promote mastery and support students, teachers,
administrators, and families. The next-generation digital components have been designed
specifically with students and teachers in mind, with online and offline accessibility, tutorial
videos, interactivities, and adaptive tools available at point-of-use. **GO Math!** teacher
components present new levels of convenience and efficiency around planning, instructing,
assigning, and assessing.

The program provides rigor and depth with increased accessibility, with the Mathematical
Practices embedded in every lesson, interactivity, research-based instructional approaches,
and differentiated instructional resources to ensure success for all students. The program
comes with our commitment to deliver quality implementation training that meets the needs of
your district through comprehensive on-site and online support. **GO Math!** will help you meet
the goals set for Idaho’s students.

**Notes:**

**Strengths:**
- Go Math! 6th grade covers all Common Core Standards. The Fluency Builder in each lesson provides students practice with the fluencies and/or previous grade-level fluencies and concepts. The materials provided to support RTI in the classroom provide teachers with materials for intervention and enrichment. The Spiral Review included in each lesson provides students with opportunities to practice previous concepts.
- Weaknesses:
- Go Math! 6th grade does not spend sufficient time on the Major Works for the grade level. Clear connections between standards are absent. The uses of Mathematical Practices in the student materials are not authentic in nature. The materials lack multi-step problems and lacks student to student interaction.

**Key Features:**
- **GO Math!** for Kindergarten through Grade 6 was built from the ground up for the Common Core State Standards (CCSS). The program, available in English and Spanish, provides in-depth instruction with equal emphasis on conceptual understanding, procedural fluency, and real-world application. The program includes a fully integrated digital curriculum that transforms instruction and learning. **GO Math!** exemplifies best practices in research-based curriculum and the best of today’s educational technology. Over the past five years, Houghton Mifflin Harcourt (HMH) has provided the trusted content of the **GO Math!** program to over seven million students in every state in the US and in 72 countries. **GO Math!** was selected as a finalist in the 2015 Revere Awards from the Association of American Publishers (AAP). HMH was honored to have **GO Math!** identified for its excellence as a high-quality product that supports teaching and learning.
- Comprehensive digital resources promote mastery and support students, teachers, administrators, and families. The next-generation digital components have been designed specifically with students and teachers in mind, with online and offline accessibility, tutorial videos, interactivities, and adaptive tools available at point-of-use. **GO Math!** teacher components present new levels of convenience and efficiency around planning, instructing, assigning, and assessing.
- The program provides rigor and depth with increased accessibility, with the Mathematical Practices embedded in every lesson, interactivity, research-based instructional approaches, and differentiated instructional resources to ensure success for all students. The program comes with our commitment to deliver quality implementation training that meets the needs of your district through comprehensive on-site and online support. **GO Math!** will help you meet the goals set for Idaho’s students.

### Key Features:

Houghton Mifflin Harcourt (HMH) GO Math! is a focused, middle school mathematics program designed to meet the objectives and intent of the Common Core State Standards for Mathematics. The GO Math! program was built from the ground up for the CCSS and provides in-depth instruction with equal emphasis on conceptual understanding, procedural fluency, and real-world application. The program includes a fully integrated digital curriculum that transforms instruction and learning. GO Math! exemplifies best practices in research-based curriculum and the best of today's educational technology. Over the past five years, HMH has provided the trusted content of the GO Math! program to over seven million students in every state in the US and in 72 countries. GO Math! was selected as a finalist in the 2015 Revere Awards from the Association of American Publishers (AAP). HMH was honored to have GO Math! identified for its excellence as a high-quality product that supports teaching and learning.

Comprehensive digital resources promote mastery and support students, teachers, administrators, and families. The next-generation digital components have been designed specifically with students and teachers in mind, with online and offline accessibility, tutorial videos, interactivities, and adaptive tools available at point-of-use. GO Math! teacher components present new levels of convenience and efficiency around planning, instructing, assigning, and assessing. The program provides rigor and depth with increased accessibility, with the Mathematical Practices embedded in every lesson, interactivity, research-based instructional approaches, and differentiated instructional resources to ensure success for all students. The program comes with our commitment to deliver quality implementation training that meets the needs of your districts through comprehensive on-site and online support. GO Math! will help you meet the goals set for Idaho’s middle school students.

### Notes:

The connections between clusters and the extensive modeling are strengths for this textbook. There seems to be little conceptual development before moving into procedures. Opportunities for student reasoning come after direct instruction on procedures rather than before procedural instruction. This seems to violate the idea that procedural fluency flows from conceptual understanding.

**Notes:**
This curriculum meets all the requirements; however it is not necessarily visually appealing to young adults.
Teacher’s edition has ideas to promote collaborative learning in the classroom as well as incorporate STEM activities throughout the text.
The textbook was definitely designed around the CCSS and aligns very well.
The practice problems are written more as story problems and less the traditional way. There is a task performance problem in each homework section; however, the task performance problem is just an extension of a story problem.
The 8 MPs are very apparent throughout the textbook.
The online resources really provide a lot of support when found. This requires extensive researching of the online resources.

**Key Features:**
HMH Algebra 1 provides coherent, focused, and rigorous instruction through a blended learning approach. This digital-first program offers an interactive HTML pathway that is organized around the 5E Model of Instruction (Engage, Explore, Explain, Elaborate, and Evaluate) and built to meet 100 percent of the Common Core State Standards. The concise print offering showcases interactivity with a “less talking, more doing” approach to teaching mathematics. Developed for its 2015 release, HMH Algebra 1 delivers current, relevant information that teachers and students connect with and the accuracy Idaho teachers and students can count on.
Created to reach today’s students in their preferred learning style and built around the groundbreaking HMH Player™ App, HMH Algebra 1 is uniquely organized into modules, or content clusters, that allow students to make connections across mathematical domains, better preparing them for high-stakes assessments and college and career math. The digital student experience leverages the best in digital functionality and instructional design to engage students by meeting them where they are and taking them where they need to be.
With the Mathematical Practices embedded in every lesson, the program engages and provides rigor and depth of understanding through interactivity, research-based instructional approaches, best practices, and differentiated instructional resources to ensure success for all students in Idaho’s schools.

</table>

Notes:
Strengths:
- This curriculum meets all requirements
- The textbook covers CCSS and aligns well
- The 8 MPs are apparent throughout the textbook
- Online resources are fantastic

Weakness:
- Might not be visually appealing to young adults

Key Features:
HMH Geometry provides coherent, focused, and rigorous instruction through a blended learning approach. This digital-first program offers an interactive HTML pathway that is organized around the 5E Model of Instruction (Engage, Explore, Explain, Elaborate, and Evaluate) and built to meet 100 percent of the Common Core State Standards. The concise print offering showcases interactivity with a “less talking, more doing” approach to teaching mathematics. Developed for its 2015 release, HMH Geometry delivers current, relevant information that teachers and students connect with and the accuracy Idaho teachers and students can count on.

Created to reach today’s students in their preferred learning style and built around the groundbreaking HMH Player™ App, HMH Geometry is uniquely organized into modules, or content clusters, that allow students to make connections across mathematical domains, better preparing them for high-stakes assessments and college and career math. The digital student experience leverages the best in digital functionality and instructional design to engage students by meeting them where they are and taking them where they need to be.

With the Mathematical Practices embedded in every lesson, the program engages and provides rigor and depth of understanding through interactivity, research-based instructional approaches, best practices, and differentiated instructional resources to ensure success for all students in Idaho’s schools.

**Notes:**
- Videos on PD for each module
- Digital TE
- Personal Math Tutor

**Strengths:**
- Glossary in both English and Spanish with problems worked out side by side in both English and Spanish
- RTI support is helpful
- Offering of professional development
- Student edition is consumable with blanks to help with note writing

**Weaknesses:**
- Index is limited-conjugate is not listed
- Student edition is softbound so districts would have to purchase each year

**Key Features:**
HMH Algebra 2 provides coherent, focused, and rigorous instruction through a blended learning approach. This digital-first program offers an interactive HTML pathway that is organized around the 5E Model of Instruction (Engage, Explore, Explain, Elaborate, and Evaluate) and built to meet 100 percent of the Common Core State Standards. The concise print offering showcases interactivity with a “less talking, more doing” approach to teaching mathematics. ### Notes:

**Strengths:**
- Lots of extra materials for the teacher
- Extra support materials for special populations
- Task based learning
- Lots of online resources for students and teachers
- A variety of assessment

**Weaknesses:**
- Not a lot of focus on the conceptual understanding
- Textbook is lacking in color

### Key Features:

**Houghton Mifflin Harcourt Integrated Mathematics 1 (HMH Integrated Mathematics 1),** part of the **Houghton Mifflin Harcourt Integrated Mathematics 1, 2, 3 (HMH Integrated Mathematics 1, 2, 3)** program, provides coherent, focused, and rigorous Common Core instruction though a blended learning approach. The program begins with a digital student experience organized around the 5E Model of Instruction (Engage, Explore, Explain, Elaborate, Evaluate) and follows an interactive HTML5 pathway. The concise print offering also showcases interactivity with a “less talking, more doing” approach to teaching mathematics. The program provides rigor and depth of understanding through interactive lessons, research-based instructional approaches, best practices, and differentiation of instructional resources to ensure success for all students. The program is distinguished from other programs by its:
- Seamless integration of digital features reaching today’s students in their preferred
learning style

- Digital course management tools which offer teachers flexibility in planning, instruction, and assessment for in-class or on-the-go learning

- Focused, balanced, and rigorous instruction that encompasses the philosophy and intent of the standards

- Digital-first solution, built around the groundbreaking HMH Player, which transcends the traditional approach of eBooks and online resources, providing an enhanced tablet-friendly digital experience for students, teachers, and parents

Personalized and adaptive instruction taken to the next level with Personal Math Trainer®, powered by Knewton™

### Notes:
Many resources for teachers to use reach a variety of learner at their current understanding. Easy to navigate. Book is aligned with the standards and is easy to find the alignment in the teacher’s edition. Nice glossary; however it only supports English and Spanish readers. Focus is on procedural skills. The student edition is consumable but there is an online resource.

### Key Features:
Houghton Mifflin Harcourt Integrated Mathematics 2 (HMH Integrated Mathematics 2), part of the Houghton Mifflin Harcourt Integrated Mathematics 1, 2, 3 (HMH Integrated Mathematics 1, 2, 3) program, provides coherent, focused, and rigorous Common Core instruction though a blended learning approach. The program begins with a digital student experience organized around the 5E Model of Instruction (Engage, Explore, Explain, Elaborate, Evaluate) and follows an interactive HTML5 pathway. The concise print offering also showcases interactivity with a “less talking, more doing” approach to teaching mathematics. The program provides rigor and depth of understanding through interactive lessons, research-based instructional approaches, best practices, and differentiation of instructional resources to ensure success for all students. The program is distinguished from other programs by its:

- Seamless integration of digital features reaching today’s students in their preferred learning style
- Digital course management tools which offer teachers flexibility in planning, instruction, and assessment for in-class or on-the-go learning
- Focused, balanced, and rigorous instruction that encompasses the philosophy and intent of the standards
- Digital-first solution, built around the groundbreaking HMH Player, which transcends the traditional approach of eBooks and online resources, providing an enhanced tablet-friendly digital experience for students, teachers, and parents

Personalized and adaptive instruction taken to the next level with Personal Math Trainer®, powered by Knewton®

Notes:
Strengths: This curriculum is a complete package that addresses the needs of all learners. Differentiation and tiered interventions are provided for every lesson, scaffolding is embedded in the curriculum with appropriate gradual release, language support is well developed, and extensions are provided for accelerated learners. Assistive support is included in the digital curriculum. The design of the curriculum is consistent throughout the digital and print presentations. Color, white space, and textual emphasis are used effectively to convey information without overwhelming the learner or the teacher (page layout is significantly better than some older textbooks). The digital material, especially the interactive textbooks, is quite useful. The digital glossary, including 10+ languages, is handy.

Weaknesses: The digital version of this text is accessible (a plus), but the design of the interactive textbook is concerning. Although developed as an HTML5 application, some material is hidden behind menus and options which mean some screen readers may not be able to access the material. This is problematic as students that receive this type of assistive technology may not be able to sure their screen reader of choice. Additionally, speech-to-text is not included in the interactive textbook. iOS Dictation does work in the interactive textbook, so this probably isn’t an issue for other assistive programs. The digital edition is clearly designed for tablet interfaces but common tablet interactions are not recognized, or don’t behave as expected. Swiping does not provide navigation between pages of each lesson, and zooming by pinch does not work.

Teachers can download an offline copy of the teacher resources, but it isn’t clear if a single pdf download is available for the text. As noted previously, PDF search is more efficient in external programs. If this pdf is available, it isn’t easy to find.

Key Features:
Houghton Mifflin Harcourt Integrated Mathematics 3 (HMH Integrated Mathematics 3), part of the Houghton Mifflin Harcourt Integrated Mathematics 1, 2, 3 (HMH Integrated Mathematics 1, 2, 3) program, provides coherent, focused, and rigorous Common Core instruction though a blended learning approach. The program begins with a digital student experience organized around the 5E Model of Instruction (Engage, Explore, Explain, Elaborate, Evaluate) and follows an interactive HTML5 pathway. The concise print offering also showcases interactivity with a “less talking, more doing” approach to teaching mathematics. The program provides rigor and depth of understanding through interactive lessons, research-based instructional approaches, best practices, and differentiation of instructional resources to ensure success for all students. **Notes:**
This course is great for remediating kids. However, some things seem to be more heavily addressed (fractions) than others (ratios). Homework doesn’t seem to be a big aspect of the program but regular assessment in class is a great bonus. Failure in the non-negotiables...
resulted from much of the time being spent on lower grade major works that build a foundation for on grade level works.

**Key Features:**

*MATH 180* is designed to address the needs of struggling students and their teachers equally. It utilizes adaptive software to provide students with personalized instruction and practice, while equipping teachers with an ecosystem of support.

Three key principles have been engineered into *MATH 180*:

- **Effort Leads to Success—Growth Mindset:** Many struggling students have given up on math. Working with Carol Dweck’s Mindset Works organization, *MATH 180* creates a new growth mindset by showing students that their efforts lead to success.

- **The Key to Unlocking Higher Mathematics—The Core Within the Core:** For students who are two or more years behind in math, time is critical. That’s why *MATH 180* focuses on deep understanding and mastery of the essential skills and concepts necessary to unlock algebra and advanced mathematics.

- **Dramatically Increase Your Impact—Force Multiplier for Teaching:** We know that teachers are the key force behind effective math instruction. *MATH 180*’s Teaching Ecosystem scaffolds less experienced teachers and provides a wealth of sophisticated supports for veteran math teachers to increase the effectiveness of their instruction.

**mSpace Books Course I set of Volumes 1 & 2 consumable**

**Notes:**
This course is great forremediating kids. However, some things seem to be more heavily addressed (fractions) than others (ratios). Homework doesn’t seem to be big aspect of the program but regular assessment in class is a great bonus. Failure in the non-negotiables resulted from much of the time being spent on lower grade major works that build a foundation for on grade level works.

**Key Features:**

*MATH 180* is designed to address the needs of struggling students and their teachers equally. It utilizes adaptive software to provide students with personalized instruction and practice, while equipping teachers with an ecosystem of support.

Three key principles have been engineered into *MATH 180*:

- **Effort Leads to Success—Growth Mindset:** Many struggling students have given up on math. Working with Carol Dweck’s Mindset Works organization, *MATH 180* creates a new growth mindset by showing students that their efforts lead to success.

- **The Key to Unlocking Higher Mathematics—The Core Within the Core:** For students who are two or more years behind in math, time is critical. That’s why *MATH 180* focuses on deep understanding and mastery of the essential skills and concepts necessary to unlock algebra and advanced mathematics.

- **Dramatically Increase Your Impact—Force Multiplier for Teaching:** We know that teachers are the key force behind effective math instruction. *MATH 180*’s Teaching Ecosystem scaffolds less experienced teachers and provides a wealth of sophisticated supports for veteran math teachers to increase the effectiveness of their instruction.

**mSpace Books Course II set of Volumes 1 & 2 consumable**

</tr>
</tbody>
</table>
LearnBop was developed to be used as an intervention program and/or a check for mastery of specific skills/standards. LearnBop does this in a way that each student’s individual learning experience by providing instruction when needed and progressing without instruction when students demonstrate mastery. LearnBop was not created to provide core instruction to students or to develop fluency and therefore does not cover requirements needed to meet the necessary evidence required for those categories. The individualized instruction is helpful as a supplement to core curriculum instruction. In isolation, students would not be given ample exposure to the content to reach mastery and deep conceptual understanding. The strength of this program is that it is highly modifiable by the teacher to fit classes and individuals as they need the help. The program is easily accessible for the parent to help their children.

**Key Features:**
LearnBop®, an exclusive partner of Fuel Education’s™ is an online math tutoring program that simultaneously serves as an assessment and diagnostic tool as an automated math tutoring system which uses a unique step-by-step approach to learning math, mimicking the kind of support a student would get in a tutoring session.

LearnBop allows students to investigate math concepts at their own pace and in their own progression to differentiate instruction. Since LearnBop is segmented into domains and concepts instructors can have students stop after predetermined problems to provide further learning and discussion one-to-one, in a live class-wide forum or through small groups. Any teacher using LearnBop has access to and can assign/use any of the content from the K – 12 Content Suite with their classes.

If a student makes a real time mistake or asks for help, the automated tutoring system breaks the problem down and guides the student. The one-on-one interactive platform offers hints, visuals, and videos for each student to self-pace in order to gain mastery before moving on to the next concept.

Each step covers a concept students need to understand in order to solve a mathematical problem, helping to master math concepts with confidence. Data on student performance is collected as students learn. This granular data is organized in an intuitive dashboard that provide teachers with a dynamic view of class performance, down to each individual student saving the teacher time.

Teachers integrate this learning experience based on the unique learning contours and performance of their own classroom while ensuring Common Core standards are integrated into the learning experience with automatically generated interventions down to the pre-requisite skill level. The results are teachers able to individualize instruction and make informed group instruction that fills learning gaps and increases test scores.

**Notes:**
Strengths:
- Curriculum has a consistent format and many learning through play activities

Weaknesses:
- Curriculum is hard to navigate and not teacher friendly. Online materials are difficult to navigate, not hyperlinks to units, modules, sessions, etc.
- Lots of teacher prep for workplaces and a lot of copying (teacher will need a large copy budge just for math curriculum if you go the online route).
- Differentiation for ELL, Support and Challenge are evident, but difficult to find and provide very weak and minimal support.
Cluster heading objectives are not visible throughout each lesson, module, or unit.

**Key Features:**
Bridges in Mathematics is a comprehensive K–5 curriculum that equips teachers to fully implement the Common Core State Standards for Mathematics in a manner that is rigorous, coherent, engaging, and accessible to all learners. The curriculum focuses on developing students’ deep understandings of mathematical concepts, proficiency with key skills, and ability to solve complex and novel problems. Bridges blends direct instruction, structured investigation, and open exploration. It taps into the intelligence and strengths of all students by presenting material that is as linguistically, visually, and kinesthetically rich as it is mathematically powerful.

**Notes:**
This program meets every non-negotiable. However, it is lacking in some addition support (such as addition tables and addition properties). Additionally, the ELL and differentiation support is severely lacking. Furthermore, the organization of the program is cumbersome and this program could not be implemented without the purchase of manipulatives and supplies.

Notes:
Strengths:
• Problem of the day
• Lots of problems solving
• Differentiated instruction
• Vocabulary
• Big ELL component
• Big Literature connection

Weaknesses:
• 10 frames the main model
• Rigor could be higher
• Not many games for kids to play
• Not much for counting 21-100

Key Features:
McGraw-Hill My Math for grades K-5 is organized around the Common Core State Standards for Mathematics and emphasizes Mathematical Practices in an interactive environment that makes learning fun and exciting. Students interact with math like never before, as they have the opportunity to take notes within their own textbook and even complete homework on a tablet. ConnectED, our digital platform, ensures that students have a consistent experience through grades K-8.

**Notes:**

My Math 3 provides access and practice to the major work and supporting work of the third grade.

**Key Features:**

*McGraw-Hill My Math* for grades K-5 is organized around the Common Core State Standards for Mathematics and emphasizes Mathematical Practices in an interactive environment that makes learning fun and exciting. Students interact with math like never before, as they have the opportunity to take notes within their own textbook and even complete homework on a tablet. ConnectED, our digital platform, ensures that students have a consistent experience through grades K-8.

**Notes:**

**Strength:**
- Standards and practices are clearly labeled
- The connections between the grades are easy to find and they help students and teachers understand how the lesson align

**Weakness:**
- There isn’t a lot of room to work math problems on the specific student practice page

**Key Features:**

*McGraw-Hill My Math* for grades K-5 is organized around the Common Core State Standards for Mathematics and emphasizes Mathematical Practices in an interactive environment that makes learning fun and exciting.

Students interact with math like never before, as they have the opportunity to take notes within their own textbook and even complete homework on a tablet. ConnectED, our digital platform, ensures that students have a consistent experience through grades K-8.

**Notes:**
Everyday math is a comprehensive core program. It has lots of hands-on and engaging activities to meet the common core standards.

**Key Features:**
Everyday Mathematics is a PreK-6 core mathematics program developed at University of Chicago and grounded in substantial field testing and a distinct research-based philosophy. Everyday Mathematics provides rigorous instruction, promoting long-term retention and deeply incorporated problem-solving and game-based learning.

The curriculum has a spiraled approach, distributing learning throughout the curriculum. Research has shown children learn best through distributed practice – when new topics are presented at a brisk pace, with multiple exposures over time and frequent opportunities for review and practice, often referred to as a "Spiral Curriculum". The Everyday Mathematics curriculum optimizes these conditions for learning and retaining knowledge, by introducing new concepts or skills informally and then revisited in a variety of contexts over several grades. Subsequent exposures build upon previous experience, helping children develop both knowledge of mathematics and their ability and willingness to apply what they know.

Notes:
The Student Reference book does a great job with the mathematical practices. However, there are not enough supports to assist students in structuring mathematical arguments.

Key Features:

**Notes:**
The Student Reference book does a great job with the mathematical practices.

**Key Features:**
*Everyday Mathematics* is a PreK-6 core mathematics program developed at University of Chicago and grounded in substantial field testing and a distinct research-based philosophy. *Everyday Mathematics* provides rigorous instruction, promoting long-term retention and deeply incorporated problem-solving and game-based learning.

The curriculum has a spiraled approach, distributing learning throughout the curriculum. Research has shown children learn best through distributed practice – when new topics are presented at a brisk pace, with multiple exposures over time and frequent opportunities for review and practice, often referred to as a “Spiral Curriculum”. The *Everyday Mathematics* curriculum optimizes these conditions for learning and retaining knowledge, by introducing new concepts or skills informally and then revisited in a variety of contexts over several
grades. Subsequent exposures build upon previous experience, helping children develop both knowledge of mathematics and their ability and willingness to apply what they know.

### Notes:

**Strengths:**
- Students generated manipulatives, SMP are embedded throughout the lessons, differentiation/scaffolding is readily available, Home Links with family letters and help, self-assessments

**Weaknesses:**
- Hard to know when working on major or supporting works quickly, supporting work may cover too much time, lattice multiplication

### Key Features:

*Everyday Mathematics* is a PreK-6 core mathematics program developed at University of Chicago and grounded in substantial field testing and a distinct research-based philosophy. *Everyday Mathematics* provides rigorous instruction, promoting long-term retention and deeply incorporated problem-solving and game-based learning.

The curriculum has a spiraled approach, distributing learning throughout the curriculum. ### Notes:

**Strengths:**
- Curriculum is well developed and aligned to Common Core State Standards covering a variety of problems and strategies both procedural and conceptual. The text provided great opportunity for teachers to use student thinking to develop conceptual understanding.
- Student reasoning plays a key role throughout the textbook. Teachers are equipped with a variety of materials and support to teach the lessons. The Teacher’s Edition includes a chart of the Standards and which lesson they are covered, Unit Organizer which further breaks down the lessons taught and the Standards included, a Spiral Trace of review and new concept lessons, and breakdown of the Mathematical Practices for each lesson. Materials are listed at the beginning of each lesson. The Manipulative Kit is very extensive, versatile, and adaptive to a variety of lessons and situations. There are math games included in the Kit that are accessible for all levels of learners. The Student Reference Book is not consumable and focuses on student-led learning. The Student Math Journal and Math Masters books are well organized with parent letters and strategies to use at home.

**Weaknesses:**
- The Student Math Journal and math Masters books are consumable. Some applications are actually in the 7th grade standards: scaling is used to develop ideas about proportional reasoning and this is a specific 7th grade application.

### Key Features:

*Everyday Mathematics* is a PreK-6 core mathematics program developed at University of Chicago and grounded in substantial field testing and a distinct research-based philosophy. *Everyday Mathematics* provides rigorous instruction, promoting long-term retention and deeply incorporated problem-solving and game-based learning.

Notes:
Vocabulary flash cards are available to purchase; however, this is not a necessity to the success of the program.

Key Features:
With a research-proven curriculum and extensive field testing, *Number Worlds* supports RtI
and helps schools meet their academic objectives. As RtI encourages working with at-risk students early on, *Number Worlds* is the only math intervention curriculum with a built-in prevention program for grades Pre-K to 1. *Number Worlds* gives students the confidence and skills to excel in math. Best of all, it allows teachers to make a positive difference in their students' lives. Help struggling students accelerate math success with a proven approach. PREPARE students to meet rigorous Common Core State Standards with proven curriculum and enhanced planning tools. ENGAGE students with interactive games, embedded activities, digital resources, and project-based learning. ASSESS student achievement with dynamic, digital assessment and reporting tools.

Notes:
Vocabulary flash cards are available to purchase; however, this is not a necessity to the success of the program.

This program is a 1st grade intervention program; however, it focuses on Kindergarten major works. It is a concern that students will not be exposed to the 1st grade major works.

Key Features:
With a research-proven curriculum and extensive field testing, Number Worlds supports RtI and helps schools meet their academic objectives. As RtI encourages working with at-risk students early on, Number Worlds is the only math intervention curriculum with a built-in prevention program for grades Pre-K to 1.
Number Worlds gives students the confidence and skills to excel in math. Best of all, it allows teachers to make a positive difference in their students’ lives.
Help struggling students accelerate math success with a proven approach.
PREPARE students to meet rigorous Common Core State Standards with proven curriculum and enhanced planning tools.
ENGAGE students with interactive games, embedded activities, digital resources, and project-based learning.
ASSESS student achievement with dynamic, digital assessment and reporting tools.

**Notes:**
Vocabulary flash cards are available to purchase; however, this is not a necessity to the success of the program.

**Key Features:**
With a research-proven curriculum and extensive field testing, *Number Worlds* supports RtI and helps schools meet their academic objectives. As RtI encourages working with at-risk students early on, *Number Worlds* is the only math intervention curriculum with a built-in prevention program for grades Pre-K to 1. *Number Worlds* gives students the confidence and skills to excel in math. Best of all, it allows teachers to make a positive difference in their students’ lives.

Help struggling students accelerate math success with a proven approach.

PREPARE students to meet rigorous Common Core State Standards with proven curriculum and enhanced planning tools.

ENGAGE students with interactive games, embedded activities, digital resources, and project-based learning.

ASSESS student achievement with dynamic, digital assessment and reporting tools.

**Notes:**
The activity cards in the manipulative kit are necessary for each lesson.

**Strengths:**
The daily routine provides consistency yet offers a variety of instructional strategies such as grouping, hands-on activities, and student exploration. Number Worlds can be used along with a core mathematics program and includes a “Suggestions for Implementation” guide for teachers that outlines which sections to use depending on the time allotted for intervention: 30, 45, or 60+ minutes. There are effective planning resources for the teacher: Unit overview, charts that show alignment to standards, strong student engagement, Key Standards by Lesson Week charts in the back of the Teacher’s Edition for all grades.

**Weaknesses:** The Mathematical Practices are not explicitly addressed. Students are not asked to provide arguments or defend their work.

**Key Features:**
With a research-proven curriculum and extensive field testing, Number Worlds supports RtI and helps schools meet their academic objectives. </table>
Notes:
Strengths:
Format is easy to follow for students. Vocabulary enriches understanding. Assessments are useful in placing students appropriately. Questions that call for explanations are helpful in developing conceptual understanding; problem-solving and daily lessons are useful for procedural understanding. The daily routine provides consistency yet offers a variety of instructional strategies such as grouping, hands-on activities, and student exploration. Number Worlds can be used along with a Core Mathematics Program and includes a “Suggestions for Implementation” guide for teachers that outlines which sections to use depending on the time the teacher has available for intervention: 30, 45, or 60+ minutes. There are effective planning resources for the teacher: Unit overview, charts that show alignment to standards, strong student engagement. Key Standards by Lesson Week charts in the back of the Teacher’s Edition for all grades.

Weaknesses:
The Mathematical Practices are not explicitly addressed. Students do not have opportunities to create arguments to defend their reasoning. There is a heavy emphasis on procedural fluency. Manipulative kid and teacher’s editions are necessary. Teacher’s Edition references the computer program, Building Blocks.

Key Features:
With a research-proven curriculum and extensive field testing, Number Worlds supports RtI and helps schools meet their academic objectives. As RtI encourages working with at-risk students early on, Number Worlds is the only math intervention curriculum with a built-in prevention program for grades Pre-K to 1. Number Worlds gives students the confidence and skills to excel in math. Best of all, it allows teachers to make a positive difference in their students’ lives. Help struggling students accelerate math success with a proven approach. PREPARE students to meet rigorous Common Core State Standards with proven curriculum and enhanced planning tools. ENGAGE students with interactive games, embedded activities, digital resources, and project-based learning. ASSESS student achievement with dynamic, digital assessment and reporting tools.
### Notes:

- **Strengths:**
  - Accessible for all students
  - Easy to understand/use for teachers and students
  - Different types of questioning strategies—concrete/basic, abstract/application

- **Weakness:**
  - More support needed to identify Math Practice Standards with the lessons or as a resource (appendix)

### Key Features:

With a research-proven curriculum and extensive field testing, *Number Worlds* supports RtI and helps schools meet their academic objectives. As RtI encourages working with at-risk students early on, *Number Worlds* is the only math intervention curriculum with a built-in prevention program for grades Pre-K to 1. *Number Worlds* gives students the confidence and skills to excel in math. Best of all, it allows teachers to make a positive difference in their students’ lives.

Help struggling students accelerate math success with a proven approach.

*PREPARE* students to meet rigorous Common Core State Standards with proven curriculum and enhanced planning tools.

*ENGAGE* students with interactive games, embedded activities, digital resources, and project-based learning.

*ASSESS* student achievement with dynamic, digital assessment and reporting tools.

**Notes:**

**Strengths:**
- Excellent intervention to use for the standards focused on
- Discovery based
- High level of engagement
- Hands on activities
- Vocabulary cards
- Pacing guides

**Weaknesses:**
- Student workbook must be purchased in sets of 5
- Manipulatives must be purchased
- A lot of materials

*Computer component is not necessarily needed.

**Key Features:**
- With a research-proven curriculum and extensive field testing, *Number Worlds* supports RtI and helps schools meet their academic objectives. As RtI encourages working with at-risk students early on, *Number Worlds* is the only math intervention curriculum with a built-in prevention program for grades Pre-K to 1.
- *Number Worlds* gives students the confidence and skills to excel in math. Best of all, it allows teachers to make a positive difference in their students’ lives.

**Notes:**
- Activity based use of manipulatives
- Good teacher resources (Example- ELL)
- Very high level of engagement
- Variety of instructional techniques

**Weaknesses:**
- Would like to see a stronger focus on: Functions, Radicals, and Congruence and Similarity

*Computer component is not necessarily needed.

**Key Features:**

With a research-proven curriculum and extensive field testing, *Number Worlds* supports RtI and helps schools meet their academic objectives. Notes:
This is a comprehensive program with many ancillary products. Consumable text needs more work space for student problem-solving.

Key Features:
The organization of the Glencoe Math program was purposefully designed to support a balance between the development of conceptual understandings, the need for instilling proficiency, and the desire to make the mathematics rich and meaningful to every student, so rigor is applied daily as students’ model, practice and apply concepts. Glencoe Math features a unique “Walk-Around Teacher Edition” that contains everything you need in the classroom- it is designed to be smaller and lighter and easy to carry while teaching. This paired with the comprehensive online Teacher resources provides the teacher everything they need to plan, prepare, teach, make assignments, and stay organized in the classroom.

**Notes:**

- CCSS & MP clearly evident
- Many teaching strategies
- Many problem types
- Many assessment resources
- Differentiation
Weaknesses:
- Teacher Edition—pages very flimsy & tear out easily
- Student Edition—workbook format so pages are perforated & tear out easily
- Excessive amount of lessons in supporting clusters

Key Features:
The organization of the *Glencoe Math* program was purposefully designed to support a balance between the development of conceptual understandings, the need for instilling proficiency, and the desire to make the mathematics rich and meaningful to every student, so rigor is applied daily as students’ model, practice and apply concepts. *Glencoe Math* features a unique “Walk-Around Teacher Edition” that contains everything you need in the classroom—it is designed to be smaller and lighter and easy to carry while teaching. </tbody>
</table>

**Notes:**

**Strengths:**
- Very good vocabulary and does a great job of using and teaching the mathematical practices
- Is common core aligned and the countdown to SBAC is a very nice resource
- The performance tasks are a very good resource to help the students represent the material in different ways
- The teacher's manual helps facilitate a mix of instructional approaches

**Weaknesses:**
- Many times 7th grade standards over shadow the 8th grade standards. This happens in Chapter 5 with lessons 4-6 focusing on standard deviation (which should not even be introduced yet). Also Chapter 8 is half volume and half surface area. Surface area is not a 7th grade CCSS.
- The consumable workbook format may be costly
- The materials state that Professional Development is a requirement (at a cost). But after reviewing the material we don’t think it would be necessary.

**Key Features:**
The organization of the *Glencoe Math* program was purposefully designed to support a balance between the development of conceptual understandings, the need for instilling proficiency, and the desire to make the mathematics rich and meaningful to every student, so rigor is applied daily as students’ model, practice and apply concepts.

*Glencoe Math* features a unique “Walk-Around Teacher Edition” that contains everything you need in the classroom- it is designed to be smaller and lighter and easy to carry while teaching. This paired with the comprehensive online Teacher resources provides the teacher everything they need to plan, prepare, teach, make assignments, and stay organized in the classroom.

### Notes:

**Strengths:**
- Teacher resources
- Differentiated instruction
- Visually appealing
- Interactive Student Guide is an excellent resource as well for scaffolding student learning

**Weaknesses:**
- Paper quality of the teacher’s edition (pages tear easily)
- Perforation of student guide is not best because the students keep the journal (guide) throughout as a resource
- Districts need to be aware that the Interactive Student Guides are consumable and need to be replaced yearly, however they are necessary.

**Key Features:**
Built around the Common Core Accelerated 7th Grade Pathway, *Glencoe Math Accelerated* supports each teacher’s unique teaching style and each student’s unique learning needs like never before. Get your students excited about math with this all new program that is interactive, flexible, and highly customizable. Present math in real and relevant ways to students of all learning abilities with easy-to-find resources, customizable lesson presentations, and leveled worksheets all in one convenient online location. Transition students from consumable workbooks to case bound textbooks with the Interactive Study Guide as a companion to the hardback Student Edition.

### Notes:
- **Strengths:**
  - Design focuses on active learning through investigations
  - 4-phrase lesson cycle
  - Summarize the math reflection component
  - Strong alignment with content standards and interfacial development of practice standards

- **Weakness:**
  - Explicit support for ELL and other adaptations could be increased (this is an explicit design choice, however)

### Key Features:
The Core-Plus Mathematics Project has completed a revised edition of its integrated, problem-based, technology-rich four-year curriculum. Revisions were informed by recent research on student learning, continuing feedback from teachers using the curriculum materials, and the Common Core State Standards for Mathematics (CCSS), with which the new edition is strongly aligned. The CCSS Edition of Core-Plus Mathematics builds on the strengths of the first edition that was recognized by the U.S. Department of Education as one of six exemplary mathematics programs in the U.S., and the updated and refined second edition that was recognized by the American Institute for Research and the Business-Higher Education Forum’s Strategic Ed Solutions as one of 35 education programs in the U.S. (across all subject areas) that increase student achievement and improve college and career readiness.  

In creating the CCSS edition of Core-Plus Mathematics, we have used mathematical modeling as an effective way of connecting the Mathematical Practices and the Content-related Standards across Conceptual Categories.

**Publisher**: McGraw-Hill School Education

**Title of Material**: CORE PLUS COURSE 2 SE

**Author**: Hirsch

**Copyright**: 2015

**Grade Level**: 9-12

**ISBN**: 9780076657957

**Recommendation**: Core

**Notes**: The entire Core Plus program should be adopted as a whole due to the sequencing of content. It does not fully align to Appendix A, in regards to sequence of content. A district will need to decide if a sequencing change needs to occur, depending on the pathway model the district has adopted. Again, the curriculum does not follow the integrated pathway model given in Appendix A of the CCSS-M. The minimal resources available for special populations are also a deterrent for a recommended adoption. The text relies heavily on an immersion model with students receiving support through group work. The text also relies on students having strong reading skills.

**Strengths**:
- The investigative tasks are well designed
- The text is cohesive
- The text does a nice job of using multiple representations of mathematics to reach a variety of learners

**Weaknesses**:
- Minimal ELL and Special population support
- No summative assessments were provided
- Answer keys for quizzes were not available

**Key Features**:
The Core-Plus Mathematics Project has completed a revised edition of its integrated, problem-based, technology-rich four-year curriculum. Revisions were informed by recent research on student learning, continuing feedback from teachers using the curriculum materials, and the Common Core State Standards for Mathematics (CCSS), with which the new edition is strongly aligned. The CCSS Edition of Core-Plus Mathematics builds on the strengths of the first edition that was recognized by the U.S. Department of Education as one of six exemplary mathematics programs in the U.S., and the updated and refined second edition that was recognized by the American Institute for Research and the Business-Higher Education Forum’s Strategic Ed Solutions as one of 35 education programs in the U.S. (across all subject areas) that increase student achievement and improve college and career readiness.

In creating the CCSS edition of Core-Plus Mathematics, we have used mathematical modeling as an effective way of connecting the Mathematical Practices and the Content-related Standards across Conceptual Categories.
Overall, strengths were that this is a problem based course which deepens students understanding conceptually, the layout is clear, and the problems are interesting and engaging for students. The tools provided were appropriate for the problems they were applied to. Teacher sources were strong in support of student learning.

Key Features:
The Core-Plus Mathematics Project has completed a revised edition of its integrated, problem-based, technology-rich four-year curriculum. Revisions were informed by recent research on student learning, continuing feedback from teachers using the curriculum materials, and the Common Core State Standards for Mathematics (CCSS), with which the new edition is strongly aligned. **Notes:**
This text is a problem-based text that lends itself to strong mathematical practices throughout the entire content. Students are expected to develop deep conceptual understandings that are built off of widely Applicable Prerequisites. The teacher’s support in the annotated teacher’s edition is beneficial to promote mathematical discussions. The organization of the material is easy to follow, and the flow and coherence makes this content easy to use for teachers and students. Throughout the text the students are expected to engage with other students to learn rather than just teacher directed. The online teacher materials are important but there are no hard copy materials for solutions or answers for the tests/assessments.

**Key Features:**
The Core-Plus Mathematics Project has completed a revised edition of its integrated, problem-based, technology-rich four-year curriculum. Revisions were informed by recent research on student learning, continuing feedback from teachers using the curriculum materials, and the Common Core State Standards for Mathematics (CCSS), with which the new edition is strongly aligned. The CCSS Edition of Core-Plus Mathematics builds on the strengths of the first edition that was recognized by the U.S. Department of Education as one of six exemplary mathematics programs in the U.S., and the updated and refined second edition that was recognized by the American Institute for Research and the Business-Higher Education Forum’s Strategic Ed Solutions as one of 35 education programs in the U.S. (across all subject areas) that increase student achievement and improve college and career readiness.

In creating the CCSS edition of Core-Plus Mathematics, we have used mathematical modeling as an effective way of connecting the Mathematical Practices and the Content-related Standards across Conceptual Categories.
## Notes:

**Strengths:**
- The TE indicates how the materials are supposed to meet the CCSS.
- Specific resources are cited for each lesson.
- The SE has many exercises designed to improve or enhance students’ procedural skills.

**Weaknesses:**
- The assignments are unbalanced, with way too much emphasis on procedure and very little emphasis on application or engaging problems.
- Quality of material used in textbook construction does not lend itself to durability. In the short time of the review process, binding on text began to separate.
- Review copy was missing numerous pages in the student edition.
- While attempts have been made to make this text “Common Core”, it appears to mostly be a traditional algebra textbook with CCSS labels.

## Key Features:
Balanced instruction throughout the Glencoe High School Mathematics Series, including Algebra 1, Geometry, Algebra 2, and Precalculus, emphasizes both understanding and fluency. Features include Key Concept boxes with multiple representations, a four-step problem solving plan, correlation between examples and exercises, word problems within each lesson, reading and vocabulary support, and student-centered activity labs.

The Glencoe High School Math Series is a comprehensive program, including all of the major mathematical content strands and mathematical processes. Main Ideas and Key Concepts are highlighted in the Student Edition. The Teacher Edition includes Focus on Mathematical Content for each chapter. This section provides Big Ideas, which explains why the content is important in this chapter and in later studies, and Lesson Summary features, which outline the mathematical ideas of each lesson in the chapter.

The Glencoe High School Math Series is carefully aligned with national standards. Each curriculum contains Standardized Test examples and practice problems like those found on standardized tests—within the lessons, the Mid-Chapter Quiz, and the Practice Chapter Test. The Glencoe High School Math Series curriculum is coherent and coordinated. It is vertically aligned between courses and vertically aligned at the lesson level. The Teacher Edition includes a detailed description of vertical alignment for each chapter. The Focus step in each lesson includes the vertical alignment for that lesson.

In the Student Edition, Get Ready for the Chapter provides both a diagnostic quiz and a review of related concepts that were previously studied.

Dynamic, digital features of the program include an online Interactive Student Guide (Algebra 1, Geometry, and Algebra 2) which provides opportunities for lesson reflection, higher-order thinking, performance tasks and Common Core-style assessment questions; Geometer’s Sketchpad to support visualization of difficult concepts and independent exploration; and optional embedded ALEKS for point-of-use, personalized math support and extension.

**Notes:**

**Strengths:**
Teacher’s Edition is very well-organized with chapter outlines and lesson outlines included.
Numerous opportunities for students to practice procedural fluency. Materials include a separate chapter resource book with additional problems, although these aren’t very visually appealing.

**Weaknesses:**
Student exercises clearly focus on procedural fluency with not much effort to include.
conceptual understanding. Students exercise sets are very long and many teachers may skip the problems that would best emphasize the shifts and major features of the Core Standards. This text addresses all the content standards for Algebra 2. It does not meet the standards for mathematical practices and would not promote strong conceptual understanding.

Key Features:
Balanced instruction throughout the Glencoe High School Mathematics Series, including Algebra 1, Geometry, Algebra 2, and Precalculus, emphasizes both understanding and fluency. Features include Key Concept boxes with multiple representations, a four-step problem solving plan, correlation between examples and exercises, word problems within each lesson, reading and vocabulary support, and student-centered activity labs. The Glencoe High School Math Series is a comprehensive program, including all of the major mathematical content strands and mathematical processes. Main Ideas and Key Concepts are highlighted in the Student Edition. The Teacher Edition includes Focus on Mathematical Content for each chapter. This section provides Big Ideas, which explains why the content is important in this chapter and in later studies, and Lesson Summary features, which outline the mathematical ideas of each lesson in the chapter.

The Glencoe High School Math Series is carefully aligned with national standards. ## Notes:

- This program provides great opportunity for scaffolding learning for all populations.

- The program is traditional and does not include task based learning and has minimal cooperative learning opportunities (in labs only). There is not any errors analysis type of problems.

- No list of postulates/theorems.

- The title page for the "Student Handbook" is in the back of the book. The front of the book would be a better place.

- The book has lots of resources for all types of learners.

- In the teacher's edition, the answers for all the additional problems are at the end of each unit instead of at the end of the book.

- The book is straight traditional learning with lots of support. There is not a lot of opportunity for cooperative learning. No task based learning either.

## Key Features:

Balanced instruction throughout the Glencoe High School Mathematics Series, including Algebra 1, Geometry, Algebra 2, and Precalculus, emphasizes both understanding and fluency. Features include Key Concept boxes with multiple representations, a four-step problem solving plan, correlation between examples and exercises, word problems within each lesson, reading and vocabulary support, and student-centered activity labs.

**Notes:**
- Lots of procedural and applied problems.
- The text is very well organized and easy to navigate.
- Teacher edition contains lots of helpful resources.
- Students using this text would be prepared for a calculus course.
- Online resources (eSolution guide and text materials) are helpful.

**Weaknesses:**
- Mathematical practice standards are not addressed in either the student or teacher editions.
- There are not problems that give students the opportunity to learn new mathematics through solving the problems.

**Key Features:**
Balanced instruction throughout the Glencoe High School Mathematics Series, including Algebra 1, Geometry, Algebra 2, and Glencoe Precalculus, emphasizes both understanding and fluency. Features include Key Concept boxes with multiple representations, a four-step problem solving plan, correlation between examples and exercises, word problems within each lesson, reading and vocabulary support, and student-centered activity labs.

The Glencoe High School Math Series is a comprehensive program, including all of the major mathematical content strands and mathematical processes. Main Ideas and Key Concepts are highlighted in the Student Edition. The Teacher Edition includes Focus on Mathematical Content for each chapter. ### ORIGO Stepping Stones Program

**Core Mathematics Program**

**J. Burnett**

**R. Irons**

**2012**

**K**

9781921959790

**Core**

**Notes:**

Professional Development is a must!

**Key Features:**

Stepping Stones is an innovative digital program that:

- Fosters students' thinking and reasoning skills.
- Delivers multiple ways to differentiate classroom instruction.
- Provides a valuable source of professional learning for the teacher.
- Presents methods to assess deep understanding and skills.
- Is rich in online and print resources that engage all students.
- Offers a cost-effective solution to core math implementation.
- Assists in the recommended shift to digital instructional materials.
- Delivers all content across all grade levels for each teacher.

**Notes:**
Professional development is a must for Stepping Stones! The publisher says that professional development/training is required. With an adoption teachers receive a 3 hour implementation session. Publisher recommends a follow up 3 hour session.

**Key Features:**
Stepping Stones is an innovative digital program that:
- Fosters students' thinking and reasoning skills.
- Delivers multiple ways to differentiate classroom instruction.
- Provides a valuable source of professional learning for the teacher.
- Presents methods to assess deep understanding and skills.
- Is rich in online and print resources that engage all students.
- Offers a cost-effective solution to core math implementation.
- Assists in the recommended shift to digital instructional materials.
- Delivers all content across all grade levels for each teacher.
CONSENT
JUNE 16, 2016

<table>
<thead>
<tr>
<th>PROGRAM</th>

</table>

Notes:
ORIGO Stepping Stones meets the IMET criteria. However, the components are very difficult and time consuming to find and difficult to navigate through. Multiple tabs had to be open in order to find the needed information. Navigation could be difficult for students and families to use.

Key Features:
Stepping Stones is an innovative digital program that:
• Fosters students’ thinking and reasoning skills.
• Delivers multiple ways to differentiate classroom instruction.
• Provides a valuable source of professional learning for the teacher.
• Presents methods to assess deep understanding and skills.
• Is rich in online and print resources that engage all students.
• Offers a cost-effective solution to core math implementation.
• Assists in the recommended shift to digital instructional materials.
• Delivers all content across all grade levels for each teacher.

### ORIGO STEPPING STONES

**Title of Material:** Core Mathematics Program  
**Author:** J. Burnett, C. Irons  
**Copyright:** 2012  
**Grade Level:** 5  
**ISBN:** 9781921959790  
**Recommendation:** Core

**Notes:**

It might be difficult for teachers to realize the full breadth and depth of these materials without professional development/training.

**Strengths:**

- Layout of online teacher materials, once familiar with navigation.
- Login—the program opens to the page you were viewing when last closing the program.
- Geometry is interspersed throughout the modules.
- All teachers receive the mathematical content of all grade levels. This is especially helpful for interventions (both remedial and extending).
- Teacher materials include a means for viewing the sequence of lessons across grade levels that develop the concepts and skills for that lesson.

**Weaknesses:**

- The program uses everyday items in lessons/investigation, such as boxes or scales as well as specific items such as pattern blocks. There seems to be no master list of resources needed for the entire program.
- Practice exercises, pre-tests, and summative assessments are not limited to the content of the associated module. It is not clear when any given concept or skill is expected to be mastered or when/where practice for any given skill will be presented.
- Modules seem to be organized by the constraint of 12 lessons, rather than topics that are related.
- Binding on the workbook fell apart with the second opening.

**Key Features:**

Stepping Stones is an innovative digital program that:

- Fosters students’ thinking and reasoning skills.
- Delivers multiple ways to differentiate classroom instruction.
- Provides a valuable source of professional learning for the teacher.
- Presents methods to assess deep understanding and skills.
- Is rich in online and print resources that engage all students.
- Offers a cost-effective solution to core math implementation.
- Assists in the recommended shift to digital instructional materials.
- Delivers all content across all grade levels for each teacher.

**Notes:**
enVisions Math 2.0 is easy to navigate and use as a teacher. There is a technology component built into each lesson.

**Key Features:**
enVisionmath2.0 is organized to focus on the Common Core Clusters; aligns to the next generation assessment content emphases requirements; and offers the focus, coherence, and rigor as defined by the Common Core State Standards for Mathematics. Consistent, everyday engagement of the Standards for Mathematical Practice enables learners to develop understandings and use mathematics with understanding.

enVisionmath2.0 provides print and digital resources to personalize learning and support a research-based instructional model. This enables the program to be taught in a variety of classroom models as an authentic learning experience in print, digital, and blended approaches. For example Problem-Based Learning is key to conceptual development and is an integral part of every lesson in the student print component and as a digital experience at every grade. Practice Buddy powered by MathXL provides a strong, digital student independent practice leveling experience and parallel leveled print student practice components are also provided.

enVisionmath2.0 offers rich differentiation resources for every lesson that include robust intervention activities and great variety of engaging experiences for all levels of learners through print and digital tools, games, and interactive workspaces.

enVisionmath2.0 is powered by the new Pearson Realize learning management system, providing teachers with the ability to customize content, auto-assign differentiation, and use assessment data quickly and easily. Online and print assessments reflect the new high-stakes assessments.

**Notes:**
This curriculum is very clearly aligned with the Common Core Content Standards as well as the Mathematical Practice Standards. There is a clear scope and sequence within the grade level, as well as throughout the K-6 program. It is well organized with a variety of materials (hands on manipulatives, posters, reading mats, etc.). The online component is flexible for teachers to be able to rearrange and omit lessons when appropriate. All activities and lessons keep differentiation and learner needs in perspective.

The lesson structure is consistent throughout K-6. This is a strength and a weakness. Teachers and students may feel the lessons are monotonous, and engagement may decline as students see the same structure daily for years. Teachers must be given autonomy to be able to supplement and change the daily lesson structure when needed. There are many different resources, and teachers would benefit from a professional development by the publisher to become familiar with all components available.

**Key Features:**

- **enVisionmath2.0** is organized to focus on the Common Core Clusters; aligns to the next generation assessment content emphasizes requirements; and offers the focus, coherence, and rigor as defined by the Common Core State Standards for Mathematics. Consistent, everyday engagement of the Standards for Mathematical Practice enables learners to develop understandings and use mathematics with understanding.

- **enVisionmath2.0** provides print and digital resources to personalize learning and support a research-based instructional model. This enables the program to be taught in a variety of classroom models as an authentic learning experience in print, digital, and blended approaches. For example **Problem-Based Learning** is key to conceptual development and is an integral part of every lesson in the student print component and as a digital experience at every grade. **Practice Buddy powered by MathXL** provides a strong, digital student independent practice leveling experience and parallel, leveled print student practice components are also provided.

- **enVisionmath2.0** offers rich differentiation resources for every lesson that include robust intervention activities and great variety of engaging experiences for all levels of learners through print and digital tools, games, and interactive workspaces.

- **enVisionmath2.0** is powered by the new Pearson Realize learning management system, providing teachers with the ability to customize content, auto-assign differentiation, and use assessment data quickly and easily. Online and print assessments reflect the new high-stakes assessments.

|---------------------------------|-------------------------------------------------------------------------------------|-----------------------|-----------|-------------|-------------------|----------------|----------------|

**Notes:**

**Strengths:**
- Alignments of standards
- Teaching and implementing of MP
- Ease of use due to organization of materials
- Progression of development of topics
- Problem solving
- Presentation in SE is kid friendly
- ELL-beg, inter, advanced good
- Online PD for parents-explains, give homework
- Background knowledge for teachers is well done
- Parent connection on each homework
- “Wheel”-color coding

**Weakness:**
- Maybe more activities built into lessons

**Key Features:**

**Notes:**
- Primarily and Internet-based online instruction. Must have (minimally) a computer and projector/Smartboard.

**Strengths:**
- Highly engaging
- Technology integration
- Differentiation
- Access to ELL support

**Weakness:**
- No explicit instruction for group/peer work

**Hard copies of HW available for students without online access.**

**Key Features:**
- **digits** is based on critical foundational research to achieve the following key features:
  - Simplify for the Teacher: Teachers can tap into the resource they need, exactly when they need it. Based on the interACTIVE Learning Cycle™ of assessment, instruction, and practice, **digits** provides prevention and enrichment paths along with individualized study plans, reporting, and auto-scored homework that saves time usually lost to administrative tasks.
  - Optimize Effective Time on Task: With **digits**, time spent grading or reviewing homework for the whole class is instead open for teaching and giving attention to students. Readiness assessments and auto-scored homework immediately identify students’ understanding of content so teachers can focus on individual learners’
needs during class.

- **Personalize for the Student:** Today’s students are natives in the digital world. *digits* is a one-of-kind program that will keep learners motivated using technology to provide them with individualized learning paths and self-guided exploration options. Learning math the *digits* way is highly-visual, fun, and engaging.

- **Trusted Authorship:** Representing a diverse background and many areas of expertise such as visual learning, technology, intervention and ELL, the *digits* author team is comprised of Pearson enVisionMATH™ authors as well as a cadre of noted advisors.

</tr>
</tbody>
</table>

**Notes:**
This is an online curriculum. A computer and projector are needed/essential.

Student online access is not required, but is very vital in utilizing the curriculum to its fullest potential.
Strengths: Very engaging curriculum for middle school age because it is an online based curriculum containing animations, interactive tools, and videos. Differentiation is made easy with online tools and testing.

**Key Features:**
- *digits* is based on critical foundational research to achieve the following key features:

- **Simplify for the Teacher:** Teachers can tap into the resource they need, exactly when they need it. Based on the interACTIVE Learning Cycle™ of assessment, instruction, and practice, *digits* provides prevention and enrichment paths along with individualized study plans, reporting, and auto-scored homework that saves time usually lost to administrative tasks.

</tbody>
</table>

**Notes:**

**Strengths:**

- The major works of both 7th and 8th grade are the entire focus and framework of the accelerated text.

- Students have an interactive way of engaging in the standards that could work very well for visual learners. The strong visual design of the program supports those types of learners.

- The program has multiple digital manipulatives for students to use.

**Weaknesses:**

- If the Ebook isn’t available, the teacher’s manual isn’t enough to be successful with the program. All assessments, objectives for the lesson, and overview of the lesson are on Ebook only.

**Key Features:**

- *digits* is based on critical foundational research to achieve the following key features:

- **Simplify for the Teacher:** Teachers can tap into the resource they need, exactly when they need it. Based on the interACTIVE Learning Cycle™ of assessment, instruction, and practice, *digits* provides prevention and enrichment paths along with individualized study plans, reporting, and auto-scored homework that saves time usually lost to administrative tasks.

Notes:
Strengths:
Digits is an online program for 8th grade math. The program includes the CCSSM Standards for 8th grade mathematics and includes work on the domains and clusters for the major work of the grade. The online work is engaging and interactive and includes opportunities for students to progress in their learning. The teacher’s online guide provides information for differentiation, ELL learners and middle to low level learners.

Weakness:
The digits program is designed to be an online learning program; students need to have computer access to be successful in the program. The program has few connections between domains, the clusters have a few connections, so is missing key connections between domains. Digits is to be an online program so could be frustrating for students that have low computer skills.

Key Features:
- digits is based on critical foundational research to achieve the following key features:
  - Simplify for the Teacher: Teachers can tap into the resource they need, exactly when they need it. Based on the interACTIVE Learning Cycle™ of assessment, instruction, and practice, digits provides prevention and enrichment paths along with individualized study plans, reporting, and auto-scored homework that saves time

**Notes:**

- High level of engagement for students
- Tests focus on open ended questions leading to higher conceptual understanding
- ACE problems provide a variety of opportunities to meet the needs of diverse students
- ELL supports throughout (Spanish versions available)
- Very teacher friendly: written in a way to guide teachers through teaching process
- Activity based and discovery learning
- Good vertical alignment connections across mathematical domains
- A high degree of cultural diversity in the images, names, and mathematical situations presented in the materials
- Different levels of student ability are addressed and considered to ensure access for all
- The materials include extensive background in ensuring success with implementation including building and strengthening teacher’s mathematical background, physical classroom setup, classroom culture, and even how to work with substitutes (guest teachers)

**Key Features:**

The goal of Connected Mathematics 3 is to help students develop mathematical knowledge, conceptual understanding, and procedural skills, along with an awareness of the rich connections between math topics—across grades and across Common Core content areas. Through the “Launch-Explore-Summarize” model, students investigate and solve problems that develop rigorous higher-order thinking skills and problem-solving strategies.

Curriculum development for CMP3 has been guided by an important mathematical idea: All students should be able to reason and communicate proficiently in mathematics. They should have knowledge of and skill in the use of the vocabulary, forms of representation, materials, tools, techniques, and intellectual methods of mathematics. This includes the ability to define and solve problems with reason, insight, inventiveness, and technical proficiency.

CMP3 uses technology to help teachers implement with fidelity, thus raising student achievement. Easy-to-use mobile tools help with classroom management and capture student work on the go. ExamView® delivers a full suite of assessment tools, and MathXL® provides individualized skills practice. 21st century social networking technology connects CMP3 teachers, while students benefit from interactive digital student pages that allow for instantaneous sharing and effective group work.

### Recommendation
Core

### Notes:

**Strengths:**
- High level of engagement for students
- Tests focus on open ended questions leading to higher conceptual understanding
- ACE problems provide a variety of opportunities to meet the needs of diverse students
- ELL supports throughout (Spanish versions available)
- Very teacher friendly: written in a way to guide teachers through teaching process
- Activity based and discovery learning
- Good vertical alignment connections across mathematical domains
- Great conceptual learning opportunities

**Weakness:**
- Will be a challenging curriculum, but will be worth it.

**Key Features:**
The goal of Connected Mathematics 3 is to help students develop mathematical knowledge, conceptual understanding, and procedural skills, along with an awareness of the rich connections between math topics—across grades and across Common Core content areas. Through the “Launch-Explore-Summarize” model, students investigate and solve problems that develop rigorous higher-order thinking skills and problem-solving strategies.

Curriculum development for CMP3 has been guided by an important mathematical idea: All
students should be able to reason and communicate proficiently in mathematics. They should have knowledge of and skill in the use of the vocabulary, forms of representation, materials, tools, techniques, and intellectual methods of mathematics. This includes the ability to define and solve problems with reason, insight, inventiveness, and technical proficiency.

CMP3 uses technology to help teachers implement with fidelity, thus raising student achievement. Easy-to-use mobile tools help with classroom management and capture student work on the go. ExamView® delivers a full suite of assessment tools, and MathXL® provides individualized skills practice. 21st century social networking technology connects CMP3 teachers, while students benefit from interactive digital student pages that allow for instantaneous sharing and effective group work.

TRANSFORMATIONS, SAY IT WITH SYMBOLS: MAKING SENSE OF SYMBOLS, IT'S IN THE SYSTEM: SYSTEMS OF LINEAR EQUATIONS AND INEQUALITIES

Notes:

Strengths:
- Teacher resources provide ideas and teaching examples to integrate math practices into lessons. The lessons for the students provide a wide degree of difficulty and expect all students to master clusters in standards.

- Gifted students are challenged with advanced thinking problems. Visually pleasing pages in books provide the right amount of text per page.

Weakness:
- Initial problems may be such that they can cause exacerbation with the students and cause them to quit before ideas and concepts are presented.

Key Features:
The goal of Connected Mathematics 3 is to help students develop mathematical knowledge, conceptual understanding, and procedural skills, along with an awareness of the rich connections between math topics—across grades and across Common Core content areas. **Notes:**
This curriculum meets Appendix A 8th grade accelerated pathway requirements. It meets all high school algebra standards except A-APR. C.4, A-APR.D.6, and A-REI.A.2

**Strengths:**
- Investigations of real world problems
- Cooperative learning/activity based
- Teacher resources
- Engaging
- Differentiation embedded throughout

**Weakness:**
- Curriculum materials may seem a little overwhelming at first, but once there is an understanding of how it is set up, it flows smoothly.

Notes:

- The textbook is completely aligned with the CCSS and consistently incorporates all 8 MP’s.
- Problems definitely meet the standards rigorous expectations. Would like to see more task based learning opportunities, but the practice and apply problems are well written with a conceptual understanding basis.
- Materials do a great job of connecting content standards and practice standards.
- This book does a great job in reaching all types of learners, including ELL students.
special population students, as well as advanced students.

- This program provides great opportunity for scaffolding learning for all populations and challenging honors students. The material is very traditional and lacks task based learning.
- This program provides great opportunity for scaffolding learning for all populations and challenging honors students.
- The program is traditional and does not include task based learning or cooperative learning.

**Key Features:**

*Pearson Algebra 1, Geometry, Algebra 2 Common Core Edition ©2015 is a rigorous, flexible, and data-driven program.*

**Rigorous:** The lesson design of the program was built specifically for the Common Core’s definition of rigor. Pearson’s 5-step lesson design has been proven effective by independent research. The 5-step lesson design of the program balances conceptual understanding, procedural fluency, and the application of mathematics to solve problems and formulate models— exactly as called for by the Common Core.

**Flexible:** The program is flexible and provides a wealth of resources to meet the needs of teachers and students. Four pages of differentiated resources are provided for every lesson, including appropriate resources to differentiate instruction effectively for struggling learners, English Language Learners, and advanced students. Students have access to a variety of multimedia learning aids, including a free Virtual Nerd tutorial video mobile app, digital manipulatives, and interactive online practice.

**Data-Driven:** The program is data-driven. Chapter performance tasks and technology-enhanced next-generation assessments provide the rigor required to prepare students for upcoming assessments. Students have ample opportunities to practice solving rich, multi-step tasks throughout the program. Data-driven digital resources include auto-graded online assessments where the appropriate remediation or enrichment is automatically assigned to the student.

Key Features:

Pearson Algebra 1, Geometry, Algebra 2 Common Core Edition ©2015 is a rigorous, flexible, and data-driven program.

Rigorous: The lesson design of the program was built specifically for the Common Core’s definition of rigor. Pearson’s 5-step lesson design has been proven effective by independent research. The 5-step lesson design of the program balances conceptual understanding, procedural fluency, and the application of mathematics to solve problems and formulate models—exactly as called for by the Common Core.

Flexible: The program is flexible and provides a wealth of resources to meet the needs of teachers and students. Four pages of differentiated resources are provided for every lesson, including appropriate resources to differentiate instruction effectively for struggling learners, English Language Learners, and advanced students. Students have access to a variety of multimedia learning aids, including a free Virtual Nerd tutorial video mobile app, digital manipulatives, and interactive online practice.

Data-Driven: The program is data-driven. Chapter performance tasks and technology-enhanced next-generation assessments provide the rigor required to prepare students for upcoming assessments. Students have ample opportunities to practice solving rich, multi-step tasks throughout the program. Data-driven digital resources include auto-graded online assessments where the appropriate remediation or enrichment is automatically assigned to the student.
### Notes:

The strengths throughout Trigonometry include that the lessons, and units and helps in the student edition and teacher edition, are clearly and easily organized. There are extra practice problems with many opportunities for modeling and application in every lesson. The weaknesses are the lack of a pacing guide, discussion prompts, and little discussion or critiquing of student process work. Some mathematical practices were not seen, such as approaching concepts from concrete thinking to abstract process. It is appropriate for this level of math though these would drastically improve student conceptual understanding if they were present.

### Key Features:

**Trigonometry, Tenth Edition**, by Lial, Hornsby, Schneider, and Daniels, engages and supports students in the learning process by developing both the conceptual understanding and the analytical skills necessary for success in mathematics. With the Tenth Edition, the authors recognize that students are learning in new ways, and that the classroom is evolving. For a graphing-optional course
- Develops conceptual understanding and analytical skills for maximum understanding.
- Graphing calculator use is optional and integrated where appropriate.
- Optional use of a graphing calculator.
- Real-life applications.
- Updated exercises and examples throughout.
- Explanatory side comments are increased to guide students through the steps of simplifying and solving problems in the examples.
- Cautions & Notes, and Looking Ahead to Calculus features enhance student learning and appreciation.
- Special function boxes offer a comprehensive, visual introduction to the major trigonometric functions.

</tr>
</tbody>
</table>

### Notes:

This is a good traditionally taught text that adheres to the CCSS. The exercises and lessons demonstrate a level of rigor consistent with a collegiate level course. There is a lack of teacher support and student collaboration.

**Strengths:**
- Standards for Idaho Core are met
- Mathematical Practices are met and regularly implemented
- Students can make use of technology through My Math Lab
- The level of rigor and exercise are comparable to a college level course

**Weaknesses:**
- Teacher supports for instruction
- Not exploratory, very traditional
- Not supports for ELL population or differentiation
- Repetitive style
- Student collaboration not emphasized

**Key Features:**
- Exceptionally clear and accessible presentation.
- Graphing calculator optional.
- New applications and real-world data.
- New! Great Question! feature and a new Concept and Vocabulary Check feature before each exercise set.
- “Make Sense?” classroom discussion exercises contain four critical thinking exercises to test for conceptual understanding.
- New True/False Critical Thinking exercises that encourage deeper understanding.
- Preview exercise sets help students prepare for the next section.
- New edition asks students if values obtained from mathematical models underestimate or overestimate data displayed by graphs, and, if so, by how much.
- Increased Study Tip Boxes offer suggestions for problem solving, point out common errors to avoid, and provide informal hints and suggestions.

<td>9780133541342</td>
<td>Core</td>
</tr>
</tbody>
</table>

**Notes:**
**Strengths:**
The progression of the problem sets helps the students move from a conceptual understanding of the concepts to the application level. Most of the problem sets include “Explorations” and “Extending the Ideas” sections that assist the students with acquiring a deeper understanding of the concepts and a level of proficiency needed to move on to subsequent standards.

**Weakness:**
The text relies too much on integers in the practice problems and does not incorporate as much practice with fractions and decimals.

**Key Features:**
For graphing-intensive courses
- Nationally recognized author team with years of experience and expertise in the teaching of both precalculus and calculus.
- Fully aligns to cover all (+) standards of the Common Core
- Designed for the way you teach:
- Additional coverage of topics that students are likely to struggle with.
- Shorter sections to accommodate the class period length.
- Extensive resources for new and experienced instructors.
  - Written for the needs of today's students:
    - Perfect balance of graphical and algebraic representation.
    - Applications integrated throughout the text.
    - Examples and exercises for all levels of students.
  - The Twelve Basic Functions are emphasized throughout the book as a major theme and focus.
  - Expanded sections now include Closeness and Betweenness in a Complex World and Random Variables and Expected Value
  - Updated data sets and applications
  - **Provides additional resources to meet your Common Core goals:**
    - Common Core Student Practice and Review Guide provides support for every section and includes the following resources: Problem Solving, Practice and Standardized Test Prep.
    - Common Core Implementation Guide supports teachers to make the transition to a Common Core curriculum.
      - Includes:
        - Over view of the Common Core State Standards
        - Standards for Mathematical Practice Observational Protocol
        - Common Core Correlations
        - Common Core assessment resources

</tr>
</tbody>
</table>

**Notes:**
- **Strengths:**
  - The online My Math Lab program provides ample resources for the teacher to meet the students' needs. The test generator and the Student's Solution Manual.
- **Weakness:**
  - The teacher resources did not have any supports for ELL students.
Key Features:
Praised on their ability to understand what it takes to be successful in mathematics, the Sullivans have created a text with an overall learning system that includes preparation, practice, and review to help students get the most out of their studies. The authors take into account the skills that students bring to this course and the way that technology can be used to enhance learning without sacrificing math skills.

- Dependable text known for its accuracy, precision, depth, strong student support, and abundant exercises.
- “Preparing For This Section” provides “just-in-time” review of previously presented concepts and skills.
- “Now Work” and “Are You Prepared?” help students identify what they need to review and where to review it.
- Step-by-step, annotated examples provide detailed intermediate steps.
- “Things to Know” detail important theorems, formulas, identities, definitions, and functions.
- Includes student access to MathXL for School, the online homework, assessment and tutorial program aligned directly to the textbook. For more information, including implementation ideas, walkthrough guides, and more, please visit www.mathxlforschool.com

<td>Finney et.al</td>
<td>2016</td>
<td>9-12</td>
<td>9780133314533</td>
<td>AP Core</td>
</tr>
</tbody>
</table>

Notes:
Strengths:
- Logical, consistent, thorough
- Designed for AP success on both the AB and BC calculus exams
- Optional MathXL is very good for providing additional practice with limited computer tutoring

Weakness:
- Does not explore or highlight technology that does not require institutional or student purchase (features graphing calculators, but not tools like Desmos or Geogebra)

Key Features:
The nationally recognized author team is back with the 5th Edition of Calculus: Graphical, Numerical, Algebraic written specifically for high school students and aligned to the latest AP Calculus Curriculum Framework and AP Calculus Mathematical Practices. In this edition, renowned author David Bressoud joins the author team bringing his expertise in calculus and
knowledge of the AP Calculus exam.

- Adheres to the NEW AP Calculus Curriculum Framework for AP* Calculus AB & BC
- Supports and aligns to the Mathematical Practices for AP Calculus.
- AP* Test Prep workbook written specifically for use with this text
- Includes concept outlines to both AB and BC Exams
- Detailed guidance in every chapter on the appropriate use of graphing calculators, versus when students should solve problems without them.
- Chapter 1 has been updated to focus on the function essentials and to be a more clear review of topics previously learned.
- Many chapter openers have been revised to motivate students and show how important calculus models are in real-world behavior.

Historical notes have been improved and updated with new author Bressoud's insights.

<td>Briggs</td>
<td>2014</td>
<td>9-12 Calculus</td>
<td>9780133498349</td>
<td>AP Core</td>
</tr>
</tbody>
</table>

Notes:
Strengths:
- Ideas are presented in a logical and deep manner.
- Plenty of built in AP practice problems.
- Integration of online content.
- Covers all AP topics-most of them very well.

Weaknesses:
- Some verbiage is difficult to locate mostly on variation problems.
- The book is more traditional.

Key Features:  
Renowned authors, William Briggs and Lyle Cochran have built from the ground up a program specifically for AP Calculus teachers and students.
- In collaboration with more than 90 academic experts and classroom practitioners the authors' balance rigor and intuition and prepare students to be successful on the AP exam.
- AP-specific chapter content clearly correlates to the AP Curriculum Framework and prepares students for the AB or BC exam.
- A ground breaking and award winning eBook includes more than 400 interactive figures drawn straight from the book (available in MyMathLab® for School).
- Interactive figures allow for teachers to illustrate important ideas in the classroom and students to explore concepts in ways that a static book cannot provide.
- Quick check margin notes encourage the student to read with pencil in hand.
- A cumulative exercise sets and a set of AP practice exercises conclude each chapter.
This course is very clear and well organized. There are many supplemental resources for the teacher. These help guide the teacher through the course as well as assessment, extra practice, and resource support. The Think Show Tell section is an excellent source of individual to group exercises that includes the use of mathematical practices. The deep conceptual understanding is the basis of this statistical course. Students are given opportunities to take statistical concepts from the beginning concept to a deep and full conceptual analysis.

There are very little ELL supports built into the program. There are scaffolded assignments and reviews as well as additional exercises on MathXL that can be used to help the ELL student but additional supports would need to be provided by the instructor.

**Key Features:**

- **For algebra-based Introductory Statistics courses**
  - Designed to help students leave high school equipped with the ability to make sense of statistics and see its relevance to everyday life.
  - Updated to meet and include all Common Core topics. Icons at the start of many sections identify the specific standards addressed there.
  - Leads with practical data analysis and graphics, encouraging students to "do statistics" and "think statistically" from the start.
  - Uses real-world examples wherever possible to engage students.
  - Includes the most common mistakes in statistical thinking to help students avoid errors.
  - Extensive exercise sets feature applied concepts and check students' ability to think statistically, rather than simply produce an answer.
  - A tiered exercise approach features the same concept at three levels to differentiate instruction.
  - Articles from Time, Newsweek, and the New York Times show the application of statistics in the real world.
Notes:
This text is being recommended as a core program. The text covers all required standards for HS Statistics and Probability. Lessons are thoughtfully structured. Each lesson builds on previous knowledge. This text does not explicitly allow for students to critique the work of other students in the class. The text is heavily based on individual work. Students must read the text for information. The text assumes that students have strong reading and reasoning skills. The text comes with a provided DVD and on year subscription for student to MyMathXLab. This subscription are compatible with iPads and tablets, each student is required to have their own subscription. MathXL allows teachers to create test and quizzes from a bank of questions.

Strengths:
- Objectives are written in student friendly language and easy to understand.
- Pacing of lessons allows students to build a foundation.
- Text connects to many real world situations.

Weaknesses:
- There are no explicit opportunities for students to critique the work of their classmates.
- Text is heavily based on individual work.
- No ELL supports.

Key Features:
Larson and Farber’s *Elementary Statistics: Picturing the World, Sixth Edition*, provides stepped out instruction, real-life examples and exercises, and the use of technology to offer the most accessible approach. The authors carefully develop theory through strong pedagogy, and examples show how statistics is used to picture and describe the world. In keeping with the premise that students learn best by doing, it includes more than 210 examples and more than 2300 exercises, to make the concepts of statistics a part of students’ everyday lives. *Elementary Statistics: Picturing the World, Sixth Edition*, presents a better teaching and learning experience—for you and your students. Here’s how:
- **Stepped out instruction and guided student learning** through an abundance of exercises build students’ knowledge and skills in statistics. Included are visual descriptions, unique chapter overviews and summaries, clear learning objectives, boxed definitions and formulas, margin features, and more.
- **Real-life and interactive features** present statistics at work in the real world and show how statistics is relevant to students’ lives.
- **Examples and exercises** tie the material to students’ lives.

</tr>
</tbody>
</table>

Notes:
Strengths:
- Teacher resources are well developed and extensive in supporting the teacher.
- Use of Real Data (real world app)
Scope and sequence flowed
Visual design is consistent and helps navigate the materials (without distracting)

Weaknesses:
- No glossary
- Some inconsistent language
- Math XL for schools must be purchased for every student, every year.

Key Features:
The most cited text in the College Board's AP* Statistics sample syllabi.
- Applauded for its readability—your students will read this book!
- Leads with practical data analysis and graphics, encouraging students to "do statistics" and "think statistically" from the start.
- TI-Nspire™ content integrated throughout the text, including margin pointers describing the new calculator activities.
- Updated data used in examples and exercises.
- Fully-updated AP* teacher and student supplements
- AP Test Prep Workbook aligns specifically to the text and helps students prepare for the AP Statistics exam.

<td>Core</td>
</tr>
</tbody>
</table>

Notes:
- Very clearly aligned to the CCSS and Mathematical Practices
- Multiple resources to practice major works
- Much of teaching strategies and practices are left to teacher’s expertise
- Tiered worksheets for student learning/practice support

Key Features:
Core Focus on Math is a middle school math curriculum series which addresses the Common Core State Standards (CCSS) for grades 6, 7, 8 and the Compacted Grade 7-8 program. Core Focus on Math has three texts per grade level, each focusing on multiple clusters of standards in the Common Core and collectively addressing the complete grade level standards. Core Focus on Math addresses the three shifts of the Common Core State Standards:
- **FOCUS** – The content in Core Focus on Math focuses on the Priority Clusters in the Common Core State Standards as defined by Smarter Balanced Assessment Consortium.
- **COHERENCE** – Each book in the Core Focus on Math series connects vertically with standards in each grade level as well as makes connections within a grade level with appropriate topics.
- **RIGOR** – Core Focus on Math goes deep into the focus areas by teaching for conceptual understanding, procedural skill/fluency and application. Students are given opportunities to understand the "why" behind the mathematics, practice for procedural skill and apply the mathematics in appropriate real-world setting.

</tbody>
</table>

Notes:
Overall, this program has strengths in connecting to CCSS and practice standards using an easy to follow format. Instructionally, it lacks opportunities for student to persevere through problems and reason abstractly due to the step-by-step nature of the text’s instruction.

Key Features:
Core Focus on Math is a middle school math curriculum series which addresses the Common Core State Standards (CCSS) for grades 6, 7, 8 and the Compacted Grade 7-8 program. **Notes:**

Specific areas of Strength:
- The amazing amount of material that the teacher has available at their disposal would be very valuable to the student
- The organization for the teacher allows them to design a pace that fits into the calendar for the teacher

Weaknesses:
- The material may overwhelm a teacher
- If the teacher had two years to use this material, he/she could design a program to address all students and standards

**Key Features:**

Core Focus on Math is a middle school math curriculum series which addresses the Common Core State Standards (CCSS) for grades 6, 7, 8 and the Compacted Grade 7-8 program. CONSENT
JUNE 16, 2016

SUBJECT
Appointments to the Professional Standards Commission (PSC)

REFERENCE
August 2015  Board approved one appointment to the Professional Standards Commission.
April 14, 2016 Board requested changes to the recommendation for appointments to the Professional Standards Commission to reflect a more diverse geographical representation of the state.

APPLICABLE STATUTE, RULE, OR POLICY
Section 33-1252, Idaho Code

BACKGROUND/DISCUSSION
Section 33-1252, Idaho Code sets forth the criteria for membership of the Professional Standards Commission (PSC). The PSC consists of eighteen (18) members, one (1) from the State Department of Education and one (1) from the Division of Career Technical Education. The remaining members shall be representative of the teaching profession of the state of Idaho, and not less than seven (7) members shall be certificated classroom teachers in the public school system and shall include at least one (1) teacher of exceptional children and at least one (1) teacher in pupil personnel services. The Idaho Association of School Superintendents, the Idaho Association of Secondary School Principals, the Idaho Association of Elementary School Principals, the Idaho School Boards Association, the Idaho Association of Special Education Administrators, the education departments of private colleges, and the colleges of letters and sciences of the institutions of higher education may submit nominees for one (1) position each. The community colleges and the education departments of the public institutions of higher education may submit nominees for two (2) positions.

Nominations were sought for the open positions from the Idaho Association of Colleges for Teacher Education, the Idaho Education Association, Northwest Professional Educators, and the Idaho Association of Secondary School Principals. Resumes for interested individuals are attached.

Secondary Classroom Teacher:
  Kathleen Davis, St. Maries Joint School District
  Glenda Funk, Pocatello School District

Secondary School Principal:
  Deanne Clifford, Coeur d’Alene School District
  Steve Copmann, Cassia County Joint School District

School Counselor:
  Julie Dillehay, Vallivue School District
Kristin Hagadone, Post Falls School District  
Bob Solomon, Vallivue School District  
Mike Wilkinson, Twin Falls School District

Secondary Classroom Teacher:  
Dawn Anderson, Madison School District  
Shawna Exline, Idaho Fine Arts Academy  
Mark Gorton, Lakeland Joint School District  
Mary Jackson, Lewiston School District  
Aliene (Ali) Shearer, West Ada School District

Public Higher Education (Letters and Sciences Representation):  
Tony Roark, Boise State University (reappointment)

Public Higher Education:  
Taylor Raney, University of Idaho  
Mark Neill, Idaho State University

Exceptional Child Education:  
Levi Cavener, Vallivue School District  
Christine Kaufman, Lewiston School District  
Virginia Welton, Coeur d'Alene School District (reappointment)

STAFF COMMENTS AND RECOMMENDATIONS

Section 33-1252, Idaho Code provides that individuals that are selected to serve on the Professional Standards Commission represent the constituent groups for the position to which they are appointed, such as classroom teachers or secondary school principals not the group that nominated them. Any constituent group or individual may submit nominations to the Commission for any of the 16 positions (excluding the Department and Division of Career Technical Education representatives).

BOARD ACTION

I move to appoint Kathleen Davis as a member of the Professional Standards Commission for a three-year term beginning July 1, 2016, and ending June 30, 2019, representing Secondary Classroom Teachers.

Moved by __________ Seconded by __________ Carried: Yes ____ No ____

I move to appoint Steve Copmann as a member of the Professional Standards Commission for a three-year term beginning July 1, 2016, and ending June 30, 2019, representing Secondary School Principals.

Moved by __________ Seconded by __________ Carried: Yes ____ No ____

I move to appoint Mike Wilkinson as a member of the Professional Standards Commission for a three-year term beginning July 1, 2016, and ending June 30, 2019, representing School Counselors.

Moved by __________ Seconded by __________ Carried: Yes ____ No ____

I move to appoint Mark Gorton as a member of the Professional Standards Commission for a three-year term beginning July 1, 2016, and ending June 30, 2019, representing Secondary Classroom Teachers.

Moved by __________ Seconded by __________ Carried: Yes ____ No ____

I move to reappoint Tony Roark as a member of the Professional Standards Commission for a three-year term beginning July 1, 2016, and ending June 30, 2019, representing Public Higher Education (Letters and Sciences Representation).

Moved by __________ Seconded by __________ Carried: Yes ____ No ____
I move to appoint Taylor Raney as a member of the Professional Standards Commission for a three-year term effective July 1, 2016, and ending June 30, 2019, representing Public Higher Education.

Moved by __________ Seconded by __________   Carried: Yes ____   No ____

I move to appoint Mark Neill as a member of the Professional Standards Commission for the remainder of the three-year term which began July 1, 2014, and will end June 30, 2017, representing Public Higher Education.

Moved by __________ Seconded by __________   Carried: Yes ____   No ____

I move to reappoint Virginia Welton as a member of the Professional Standards Commission for a three-year term effective July 1, 2016, and ending June 30, 2019, representing Exceptional Child Education.

Moved by __________ Seconded by __________   Carried: Yes ____   No ____

KATHLEEN A. DAVIS

Penny Cyr, IEA President
Idaho Education Association
P.O. Box 2638
Boise, ID 83701

Dear Ms. Cyr,

I respectfully submit my application and required documents for consideration for the IEA’s selection of a representative to the Idaho Professional Standards Commission.

I believe it is imperative that the profession be protected from negative influences. One way in which we, as teachers, can help in this effort is to monitor practices which ensure that ethical conduct is employed at all times. This will not only make certain that those we come into contact are protected from wrong doing, but also ensure that those in the profession of education are not tamished by the misdeeds or unprofessional choices of others. This review process also provides assurance that educators will be treated appropriately if accusations should arrive and that false accusations can be handled with integrity.

I have included the following documents: application, resume, statement of commitment to education, along with three letters of recommendation.

Should you have additional questions, please contact me so that I might provide any necessary information.

Thank you for considering me as a candidate for this appointment.

Sincerely,

[Signature]

Kathleen A. Davis

OBJECTIVE: I would like the opportunity to serve on the Professional Standards Commission.

QUALIFICATIONS
In my 14 years of teaching, I have provided appropriate instruction to children in grades Pre K-8. During this time I have taken additional responsibilities and focused on strengthening community involvement in our school. By seeking workshops and conferences that focus on subject areas for which I am responsible, I have attempted to use current research and data to offer my students an optimal learning environment. My experience has included working with preservice teachers, novice teachers, and with college instructors involved in mentoring new teachers in order to provide resources and support that will aid them in a positive transition into the profession.

EDUCATION
1974-1978 High School Diploma, St. Maries High School, St. Maries, ID
1994-1998 B.S. Elementary Education, Lewis Clark State College, Lewiston, ID
2002-2005 Endorsements in Reading K-12 and English K-9
M. Ed. Curriculum and Instruction, University of Idaho, Moscow, ID

EMPLOYMENT
1999-1999 Teacher, Heyburn Elementary, SD #041, St. Maries, ID
Sept. - Jan Served as support personnel for Special Education Department. Responsible for weekly activities for grades K-5.

1999-1999 Substitute Teacher, Heyburn Elementary, SD #041, St. Maries, ID
Jan - June Performed as long term substitute. Responsible for daily instruction and activities for twenty preschool age children including those with special needs. Responsible for all planning and assessment in fourth grade classroom. In addition assumed all committee activities and assignments for teacher on leave during the final academic quarter.

1999-2005 Classroom Teacher, UpRiver Elementary, SD #041, St. Maries, ID
Assigned instruction in Language Arts, Geography, and Math for grades 6-8. This position included work within the Title I program. During this time I served on the technology, spelling bee, and assemblies committees.

2000-2008 Teacher for Summer Reading Program, SD #041, St. Maries, ID
Provided remediation for students in primary grades identified through IRI assessments.

2005-present Classroom Teacher, St. Maries Middle School, SD #041, St. Maries, ID
Language Arts, Grades 7-8, All subjects Grade 6
Responsible for instruction in reading and English. Member of district professional development committee, and RTI team. Mentor for novice teachers. Facilitator for collaboration activities. Coordinator for building RTI team. Assisted in staff development for Danielson Evaluation Model.

RELATED ACTIVITIES
1998-present Active Member St. Maries Education Association
2003-2005 St. Maries Education Association Building Representative
2008-present St. Maries Education Association Treasurer; Delegate

Statement of Commitment to the Teaching Profession

Thirty-two years is a long time to spend in any profession, so in some ways writing a statement about my commitment to the teaching profession seems a bit like stating the obvious. Perhaps this would be true if commitment were measured by the clock, but commitment isn't a period of time. Nor is it a tradition. It isn't metered by what one does when unsure what else to do. Those who value commitment evaluate it by growth, by change, by perseverance and tenacity. I named my blog Evolving English Teacher because the name embodies my commitment to students and to my profession, a profession easily characterized as at risk.

Consider: A July 30, 2012 report, The Irreplaceables: Understanding the Real Retention Crisis in America's Urban Schools, by TNTP documents the growing crisis in teacher retention. Simply, especially in urban areas, not enough teachers are staying in the profession. Why? That's the million-dollar question. Many teachers lack commitment to a profession that fails in its commitment to them. Call it a Social Contract. Teachers often find their idealism immediately shattered for myriad reasons. The report offers two recommendations for keeping exceptional teachers in the classroom: Prioritize retaining those teachers who clearly advance student learning, which I’d argue isn't measured in test metrics alone; improve the profession “with higher expectations” of teachers, also not evaluated by such things as value-added assessment.

Herein resides my commitment to the profession. Long ago I decided to do all I can to live my professional life as a learner, to value professional growth above all else, especially politics. Last week a student commented: “You are the most helpful teacher ever.” Teaching is a service profession, and it's my job to serve my students. That's why I blog about teaching, including lesson ideas, participate in #engchat on Twitter, speak at conferences, and share, share, share books with students, teaching materials with my colleagues in Idaho and throughout the country.

When I think about why I want to serve on the Professional Standards Commission, my thoughts turn to what needs to be done to elevate the profession so that teachers are once again revered and respected, not just by their students, but by business leaders and politicians and all other stake-holders. Daniel Pink has much to say on this topic in Drive: The Surprising Truth About What Motivates Us. Among his arguments, Pink names autonomy and mastery as essential components of motivation.

The trajectory of my own career verifies Pink's premise: I find ways to exercise autonomy over my career—especially as those not vested in my profession seek to diminish it—which means seeking PD outside my classroom, and I am committed to mastery of my subject matter and the pedagogy necessary to teach it successfully.

I'm committed to holding on to what Tom Newkirk calls the "good ideas in a time of bad ones" and doing all I can to promote excellence among my students and within myself.

- National Association of Student Councils: annual fall and spring conference organizer
- Teen events volunteer
Kristen,
I didn't see where this went through yesterday, so I am sending it again. Hopefully it isn't too late. I am interested in applying for the open secondary position on the PSC. The following are a few of my qualifications:
** 1989 to 1995 - Teacher and Dean of Students at Pinon Mesa Middle School in Phelan, CA
** 1995 to 1999 --> Assistant Principal at Burley Jr. High School
** 1999 to present --> Principal at Burley Jr. High School
** This is my 21st year as an administrator in Idaho
** 2006 to present --> I am the administrator on our district negotiations team
** 2002 to present --> Member of the State Accreditation Commission
** Principal of the Year for IASSP
** Active member of IASSP for 18 of the last 21 years
** Served as a member on a PSC hearing
If I am chosen for this position, I will be very dedicated to helping this commission operate in an effective and efficient manner. There are many timely and critical issues currently facing our State and I look forward to being involved with the process.
Sincerely,
Steve Copmann
Principal, Burley Jr. High School

Lisa Colon, Director
Certification and Professional Standards
State Department of Education
Boise, ID 83702

Dear Ms. Colon:

I am pleased to support the nomination of Ms. Julie Dillehay for the Professional Standards Commission and support giving her at least six professional leave days per year from her duties with the Vallivue School District to perform her work with the PSC.

I have worked with Julie for nine years, and can honestly say that she is one of the finest educators with whom I have ever worked. Her skills as a high school counselor and as a leader of the teachers’ association in our school district are exceptional and she will bring many skills to the table as a commissioner with the PSC.

Julie Dillehay is an honest, hard-working educator who always gives her best effort to any project that she takes on. We in Vallivue also support the efforts of the Professional Standards Commission, so I am happy to send a top employee to help in this important work.

Sincerely,

Pat Charlton, Ph.D.
Objective: To obtain a seat on the Professional Standards Commission where I can apply my experience and knowledge as a teacher and counselor towards the various tasks at hand.

Education
University of Idaho 2002 - 2005
Masters of Education-Counseling and Human Services

Montana State University 1995 - 2000
B.S. Health and Human Development

Work Experience
Post Falls High School 2005 - Present
Counselor

CERTIFICATIONS FROM STATE OF IDAHO
Pupil Personnel Services Certificate (PreK-12)
Standard Secondary Education Certificate with endorsements in Spanish and History
Dawn Anderson  
324 South 3rd East  
ID 83440

Penni L. Cyr  
President, Idaho Education Association  
620 N. 6th St., P.O. Box 2638,  
Boise, ID 83701

Dear Penni,

I am applying for a secondary education position on the Professional Standards Committee because I believe in the power of educators to transform lives and fortify a healthy, civic-minded society. Additionally, I feel that teaching is not just a profession—it is a craft, honed in the classroom and enriched by continuing education and personal dedication to the field.

When I left my position as adjunct faculty at BYU-Idaho after twenty-one years, a lot of people thought I was crazy. They couldn’t understand how anyone would want to leave a cushy college position to teach in the public arena. And yet, for all those years I kept my teaching certificate current because I knew I would want to teach at the secondary level full time. I have not regretted that decision for a minute. I love my job. And my work for the past five years in the public school system teaching 8th graders has reinforced my belief that few things are more beneficial to a society than when a skilled and passionate teacher unlocks the potential of a child.

I’d like to be a part of a team that works together for the betterment of the profession—because what is good for the profession will translate into good for Idaho schools. When we treat and train teachers like the professionals they are, we not only build a quality Idaho school system, but we ensure that our students have the tools and skills they need to be successful in an increasingly globalized economy.

I bring twenty-six years of teaching experience to the table. Moreover, I’ve served in numerous collaborative capacities, including a scholarship committee, a college faculty association committee, and the Rexburg Children’s Museum Committee where I was involved in grant writing. I’ve lead friendly negotiations with the Madison School Board of Trustees and served in the position of local president of the Rexburg Education Association for two years.

Included here are copies of:

- Professional resume
- Three letters of recommendation, including one from my superintendent, my principal, and Dan Sakota who currently serves on the PSC.
- Applications form.

Thank you for your consideration. I look forward to hearing back from you.

Idaho Professional Standards Committee:

I am interested in serving on the Professional Standards Committee. I have been an educator in the state since 1984. When I was first hired I received the Code of Ethics and have always carried it with me as a reminder of my commitment to the profession. Educators must accept the responsibility to practice the profession according to the Code of Ethics. Excellence in our field supports high quality educational opportunities for our students.

Thank you for considering my nomination.

ELEMENTARY TITLE I TEACHER - JOINT SCHOOL DISTRICT No. 2
READING ENDORSEMENT SUPERVISOR – GRADUATE FELLOWSHIP, UNIVERSITY OF OREGON
ELEMENTARY TEACHER GRADES 1ST, 3RD, 4TH AND 5TH - JOINT SCHOOL DISTRICT No. 2,
CENTER FOR EARLY EDUCATION, LOS ANGELES, CA

STRENGTHS
• EXPERTISE TEACHING GRADES 6-8 IN AN ARTS MAGNET SCHOOL
• EXPERTISE IN THE LANGUAGE ARTS
• KNOWLEDGE OF COMMON CORE STANDARDS AND DISTRICT CURRICULUM REQUIREMENTS
• EXPERIENCE IN ARTS INFUSED INSTRUCTION AND DIFFERENTIATION OF INSTRUCTION
• EXPERIENCE IN SECURING GRANTS TO SUPPORT THE ARTS
• ABILITY TO EFFECTIVELY COMMUNICATE WITH A VARIETY OF AUDIENCES
• KNOWLEDGE AND SKILLS IN COLLABORATION AND CREATIVE PROBLEM-SOLVING
• STATE/DISTRICT/CLASSROOM EXPERIENCE AND SKILLS IN ORGANIZATIONAL AND CLASSROOM MANAGEMENT
• PROFICIENCY WITH TECHNOLOGY
• POSITIVE ATTITUDE
• VESTED INTEREST IN THE SUCCESS OF THE PROFESSION
• WILLINGNESS TO TAKE ON CHALLENGES AND LEARN NEW SKILLS - DISTRICT’S TEACHER OF THE YEAR 2015-2016
OBJECTIVE:
Appointment to the Idaho Professional Standards Commission.

EDUCATION:
B.S. Communication Arts, December 1997 Lewis-Clark State College, Lewiston, Idaho

CERTIFICATION:
State of Idaho Teachers Certificate 6-12
Endorsements: Social Sciences, United States History, United States Government, World History, Computer Application Technology, Public Speaking and Drama

TEACHING EXPERIENCE:

- **Teacher, Mountain View Alternative School, Lakeland School District, Rathdrum, Idaho**
  August 2001-Present
  - Public Speaking
  - Acting
  - Economics
  - U.S. Government
  - Computer Application

- **Teacher, Lakeland Junior High, Lakeland School District, Rathdrum Idaho**
  2000-2001
  - United States History
  - World History
  - Computer Application Technology

- **Teacher, Lapwai Alternative School, Lapwai, School District, Lapwai, Idaho**
  September, 1998-2000
  - United States History
  - Economics
  - United States Government

Professional Organizations:
- Northwest Professional Educators 2001
- Lakeland School NWPE employee benefit fair representative 2003-2014

Activities:
- February 2016  Master of Ceremonies Idaho District 1 and 2 Cheer and Dance Competition
- 2015/2016  Member of the Lakeland Mastery Leaning and Report Card/Grade Report committee
- 2015/2016 Member of the Lakeland Mileposts/ExamView staff training committee
- 2014/2015 Member of the Lakeland Curriculum Committee
- 2014/2015 Member of the Lakeland Idaho LEADS committee
- 2004  Recipient of the NEH scholarship and summer workshop  People, Place and Power summer workshop
- 2014-present. Volunteer coach, City of Rathdrum Parks and Recreation, Rathdrum, ID
- 2000- present. Head Track and Field Coach – Lakeland High School

CONSENT AGENDA
JUNE 16, 2016
2/4/16

To Whom This May Concern:

My name is Mary Jackson and I teach Spanish at Lewiston High School. I began teaching here in 1988. Through the years I have assisted our LHS LEA building representatives with a variety of activities. I didn’t have the time to take a lead role in my association for various reasons and tried to fill the many gaps volunteering for tasks in my building. In my later years I have felt compelled to do more as I volunteered to be the building representative for a few years.

The Professional Standards Commission was something I learned a lot about as my colleague, Dennis Ohrtman, spent time on this commission. I realized long ago that I wanted to be a part of this a decision making group. Ethical practices by qualified, competent teachers in the workplace are important to me, my colleagues, the community and the state. Equitable and fair practices for Idaho educators are a pinnacle of importance currently and looking forward into the future. Teachers working toward high achievement for their students through excellent professional practices while remaining true to Idaho standards are a clear vision for all stakeholders. Being a veteran educator on this commission sets a stage to have a powerful, reliable, realistic voice as a teacher representative position.

My goal as a board member is to be a fair, accurate, thorough, hard working decision maker in this group. Thank you for my consideration on the Professional Standards Commission.

Sincerely,

Mary Jackson

To whom it may concern:

I am writing in regard to my interest in serving on the Idaho State Department of Education Professional Standards Committee (PSC). I believe I would be an asset to this committee due to my classroom experience, my ability to communicate and lead, and my desire to promote the teaching profession as one made up of professionals who are dedicated to doing the best work they can for the children of the state of Idaho.

I have been a classroom teacher since 1998. I began my career as an English and journalism teacher at Skyview High School in Nampa. Since then, I have moved to the West Ada School District, where I have been teaching French and English Language Arts at Eagle High School. I have taught a variety of subjects throughout my career. I also work as an Instructional Coach through a technology grant at Meridian Middle School. I get to work with teachers one-on-one to improve teaching practices and to integrate technology in a meaningful way. I am so excited about the changes I see taking place in classrooms every day, and the positive impact those changes have on learning and engagement. Teaching gives me a sense of purpose. I love interacting with students and with other teachers to effect change on a daily basis.

During my time in education, I have had the opportunity to work as an IEA building representative and state delegate. I have also mentored two student teachers, and several new teachers. I have served on curriculum writing and End-of-course exam writing committees. I have been a department chair, worked on the school accreditation report, and the school improvement and RTI development committees. I also work collaboratively with other Instructional Coaches to deliver professional development that supports best teaching practices. In addition, I have been working with Digital Promise and the Verizon Foundation as a technology integration coach, and have completed my master's in Educational Leadership. All of these experiences have helped me to develop effective communication skills and to be able to work with others in a variety of capacities.

I am highly dedicated to my profession. I take continuing education classes to improve my craft, even when I don't need the credits. I hold myself to high standards of ethical conduct in all things. I believe that teachers are, and should be, held to a high standard of behavior and professionalism. Educators must protect the best interests of children and do the best job we can to teach kids life-long skills, including things such as integrity and perseverance.

I am excited about the possibility of serving on the PSC. I think it will be fascinating to be a part of monitoring and developing in-service opportunities, teacher education programs, and certification requirements. I want to help ensure that students get opportunities that they have never had before as technology and mind-shifts open up possibilities for schools. I want to be a part of the committee that helps teachers be the best they can be. I am excited to work collaboratively with other representatives of the profession to determine how to meet the needs of Idaho students, teachers, and parents.

Sincerely,

[Signature]

CERTIFIED SECONDARY SCHOOL TEACHER (Grades 6-12)

Enthusiastic and motivated secondary teacher with leadership experience seeking to use strengths to work collaboratively with committee members and education stakeholders to advance the education profession as a member of the Professional Standards Commission.

CORE COMPETENCIES

| • Organizational and Communication Skills | • Technology Integration |
| • Professionalism and Leadership Abilities | • Learner Assessment & EOC Development |
| • District Curriculum Development | • Project Based Learning |
| • Instructional Best Practices | • Familiarity with Common Core Standards |

PROFESSIONAL EXPERIENCE

WEST ADA SCHOOL DISTRICT, Meridian, ID

Instructional Coach (grades 6-8), (Meridian Middle School)
French Teacher (grades 9-12), (Centennial and Eagle High Schools)
English Teacher (grades 9-12), (Skyview, Centennial, and Eagle High Schools)

I have filled a variety of positions at the high school level. I have taught 9th and 11th grade Language Arts, Language Arts Lab, French Levels 1-4 (including IEN classes), and others. I have written district concept based curriculum, and district End of Course exams. I have been an adviser for multiple student organizations. I have been a department chair in charge of purchasing, leading collaboration, helping with accreditation reports, and acting as a resource and sounding board for peers. I have mentored new and veteran teachers. I have organized large scale school events such as the roll-out of 1,000+ tablet computers.

Key Contributions:

• Develops and delivers professional development for school staff.
• Works with Digital Promise and the Verizon Foundation to promote innovation in education.
• Provides one-on-one teacher support for best practices.
• Wrote and received a grant for technology.
• Earned Distinguished and Proficient evaluations for the quality and creativity of classroom teaching, lesson plans and instructional materials used in teaching multiple subjects.
• Developed innovative lessons that used technology integration and project based learning.
• Coordinated and participated in regular collaboration meetings with teachers across the district via video conferencing.
• Established positive relationships with students, parents, colleagues, and school administrators.
• Successfully taught and engaged students in video conference (IEN) environment.

EDUCATION & CREDENTIALS

Northwest Nazarene University, Nampa, ID
• MA in Educational Leadership, 2004
Idaho State University, Pocatello, ID
• BA in Secondary English Education, 1995
• Minors in French and Mass Communication
Professional Associations and related activities

(including offices)

American Association of Teachers of French

World Language Department Chair, Centennial HS, 2007-2012

Meridian School District French Language End of Course Exam writing

Meridian School District Language Arts Content Based Curriculum revision

Community Involvement (Please list all community service or other community activities in which you have been involved and dates)

I am the communications officer for the Track and Cross Country Booster Club at Meridian High School. I also work at fundraising events for the MHS choir program. I volunteer time at my church as needed.

The Professional Standards Commission meets as many as six (6) times a year. Each meeting spans two days. Additionally, Commission members may be asked to attend public meetings, attend State Board of Education meetings, and present at regional or state meetings. Will you be able to give the required yearly time to this position? YES  X  NO  .

Applicant's signature  

Please attach resume, three (3) letters of recommendation, and statement of commitment to the profession.

2000-01  Adjunct Professor of Philosophy, Boise State University  
1999-2000  Visiting Assistant Professor of Philosophy, The Ohio State University

COLLEGE PROFILE

Departments:  16  Full-time faculty:  308  Annual approp. budget: ~$36M  
Interdisc. programs:  6  Part-time faculty:  ~360  Research units:  5  
Undergrad. majors:  ~5,700  Admin. staff:  60  Extram. research exp.*: ~$10M  
Grad. students:  ~330  Buildings occup.:  17  * 5 yr. annual avg.  
SCH per year:  ~240K

ADMINISTRATIVE EXPERIENCE

• Curriculum and Pedagogy

General Education Reform. In 2008-2010 I co-chaired a task force charged with redesigning our nearly 30 year old core curriculum from the ground up. Engaging every program across campus, we developed AAC&U LEAP-inspired university-level learning objectives and a new curriculum to support them that features: a common, interdisciplinary first-year experience; another common course examining diversity, ethics, and civility; a writing across the curriculum requirement for all majors; and a capstone/senior experience class for all majors. Simultaneously, we reduced the minimum credits required to graduate from 128 to 120.

Pedagogy Reform. With the Dean of Engineering and the Director of our Center for Teaching and Learning, I currently serve as a co-investigator of a $2M NSF grant whose goal is to increase the use of evidence-based instructional practices among STEM instructors, which will in turn support greater student learning, higher persistence, and shorter time to graduation. Our efforts are yielding results on the ground as well as publications, presentations, and national attention.
Graduate Program Development. In the fall of 2012, COAS launched an interdisciplinary Biomolecular PhD program, which is shared jointly by the departments of Biological Sciences, Chemistry and Biochemistry, and Physics. Because the program lives at the college level, devising an effective governance structure was crucial. The program has been highly successful in recruiting and retaining students, losing only one (1) student to attrition in the first three cohorts.

COAS is currently in the development phase of a PhD in Ecology, Evolution, and Behavior, which will be administered by our Biological Sciences department.

We are also in the development phase of a PhD in Computing, which will be shared by units in the College of Engineering and several COAS departments (Mathematics, Geosciences, Biological Sciences, and others). The governance structure is modeled after the PhD in Biomolecular Sciences.

• Reorganization

In the spring of 2013, the Provost of Boise State University announced that the College of Social Sciences and Public Affairs would be dissolved in FY15. Four of the departments in that college were collected to build a new School of Public Service to support Boise State’s state-wide responsibility for delivering programs in public policy. The remaining five departments and three interdisciplinary programs were integrated into COAS, making it the largest academic unit in the university and the home of liberal arts education. I personally managed the relevant portions of the dissolution and integration. My transparency and inclusiveness resulted in a smooth process, stable results, and high morale among faculty and staff.

• Budgeting

Boise State University has operated according to a historically-based, incremental budget model for many decades. Under this regime, my approach to budgeting has always been highly collaborative and transparent with department chairs. We are currently in process of moving toward a RCM/incentive-based budget model, which will devolve much of the budgetary responsibility and authority that currently resides in our central budget office down to academic colleges. I have been following the proliferation of RCM-type models for several years and am currently playing a dean’s-level role in the development of the model to be deployed in FY18.

• Research

Facilitation of faculty research takes several forms in COAS, from the negotiation and funding of start-up packages for science faculty to the development of a college workload policy that creates greater flexibility for faculty to the creation and maintenance of NIH- and NSF-funded research centers and groups. The temperament in Boise State’s VPR’s office has made advancing research in the sciences more readily achievable (and more visible) than in other areas, but I have undertaken efforts to advance the work of colleagues in the humanities and fine and performing arts, as well. Of particular interest to me are opportunities to link artists, humanists, and scientists in ways that advance the work and interests of all parties.

• Fundraising

The Advancement office at Boise State has grown substantially in recent years, thanks to significant investment by the university. It remains relatively small, however, with only one development officer embedded within COAS. Despite that, we are remarkably successful in raising major gifts (≥$25K at Boise State) and currently have ~25% in hand toward a $5M private fundraising goal for a $35M new Fine Arts Building. My development officer and I attend CASE conferences together, and I enjoy the cultivation, solicitation, and stewardship process.

Please attach resume, three (3) letters of recommendation, and statement of commitment to the profession.
Statement of Commitment to the Profession

I will never forget my father’s response when I told him I intended to become a teacher. I was home for Christmas after my first semester of college at the University of Idaho. For the first time in my life, I had not seen my family in months, and I was excited to be home. Due to my mother’s incredible culinary talent, the Christmas dinner table could have been on the cover Fine Cooking Magazine; the meal should have been spectacular.

But is wasn’t. My father, to say the least, was less than thrilled with this decision. Bluntly, he reminded me of the trials of the teaching profession. Long hours. Grading at home. Problem students. Little pay. The list went on; the food on the table slowly steamed itself cold.

Yet, I was resilient about my decision during that dinner, and I remain resilient today. I kindly balanced my father’s argument by reminding him of the positive elements he hadn’t included. The reward of seeing students grow. The joy in nurturing young minds to mature into talented adults. The ability to make a difference with every individual student every single day in the classroom.

These reasons remain just as true to me today as they did that Christmas evening years ago. However, my father’s points proved to be easily valid. As he said, teaching is much more than a job. It is larger than a profession. It is a commitment.

It is with this commitment in mind that I desire to be part of the Professional Standards Commission. Teaching is a profession that demands the highest integrity of those in the profession. Maintaining the integrity and dignity of teachers is paramount in maintaining the continued support and trust of citizens who place their children in Idaho’s classrooms.

I truly believe I can be integral part of this commission. I feel my experience in the classroom and knowledge of the standards will allow me to effectively fulfill all the duties required of a member of the commission faithfully and with the utmost integrity. I hope you will consider my name as a new member of this important group.

Sincerely,

Levi B Cavener
February 4, 2016

To Whom It May Concern:

My name is Christine Kaufman and I am a special education teacher with Lewiston School District. I am interested in filling the open seat on the Professional Standards Commission for a professional who holds an Exceptional Child Education certificate/endorsement.

I have taken the liberty to attach my updated curriculum vitae in lieu of a resume because it allows those who are reviewing my application to see my plethora of experience in committee work, work with the IEA, my professional training, and further education. I hold a Bachelor of Science in Elementary Education with a minor in Special Education. I’ve completed all necessary coursework to hold the Exceptional Child Generalist K-12 certificate/endorsement. I also hold a Master of Science in Special Education and have completed all coursework for my Doctor of Education in Curriculum, Instruction, and Assessment. I am currently working on my proposal for my dissertation, which is the next step in completing my Doctor of Education program.

I have taught special education with the Lewiston School District for over ten years. I have worked with children who have all types of exceptionalities from language impairments, autism, emotional disturbances, hearing and visual impairments, intellectual disabilities, and/or multiple disabilities. In my over ten years of teaching, I have had the privilege to work with children who represent all categories under the Individuals with Disabilities Act. Not only have I worked with these amazing children, but I’ve had the honor to work with their families, outside agencies, outside medical professional, and outside counselors to develop quality individualized programming to meet each of these children’s learning needs.

I have always had an interest in the law and in particular ethics. I do hold a legal secretary degree, but my heart is working with children, so I never pursued this career. I believe I am a strong candidate due to the fact I am an analytical thinker, strive to be solution minded, and care deeply about my profession. I believe it my job to work hard to educate the public about the value of education and the importance of quality teachers delivering this education to our country’s future, our children.

Thank you for your time and consideration for the open seat on the Professional Standards Commission. I look forward to hearing from you soon with regards to this position.

Sincerely,

Christine M. Kaufman
Mrs. Christine Kaufman

Profile A child-centered, hardworking, highly organized, detail-oriented special educator. Able to supervise, lead, and learn from others with the child always being the focus. Highly knowledgeable with regards to curriculum, programming, state and federal law regarding education, as well as effects and attributes of individual disabilities.

Key Skills
*Able to communicate effectively while providing a professional and friendly learning environment for children and staff.
*Excellent administrative, organizational and time management skills; including knowledge of Microsoft Word, Excel, Outlook, and Enrich IEP software.
*Ability to work well under pressure whilst maintaining excellent attention to detail.
*Highly developed people skills, strong communicator, both written and oral.
*Self-motivated, life-long learner with a passion for teaching our country’s future, our children.

Career History
Jan 05-Present Independent School District #1-Lewiston, ID Special Educator

Independent School District #1 is a large school district in central Idaho. There are 7 elementary schools, 2 junior high schools, and a high school, and alternative high school, and a developmental preschool. My school, McGhee Elementary, has 323 students. Many students come from low-socioeconomic homes and several too many have had numerous adverse childhood experiences. My job requires me to supervise 6 instructional assistants, collaborate with 7 elementary classroom teachers (K-3), organize and lead our school special education department, and manage our department budget. I must make sure all children on my caseload and within my department (K-6) have the needed resources to access and learn within the educational environment. To ensure this occurs, I must train the instruction support staff how to use programs, build positive relationships with students, and when in times of crisis how to manage maladaptive behaviors. I am required to know and ensure state and federal special education laws are being followed with regards to each child’s individualized education program (IEP). As the special educator, I must know each child individually, so I can construct an individualized program to move each child toward proficiency on Common Core State Standards or Workplace Competencies for life skill students.

CONSENT
JUNE 16, 2016

SUBJECT
Idaho State University – Idaho State Program Approval Review Team Report and the National Council for the Accreditation of Teacher Education (NCATE) Accreditation Report

APPLICABLE STATUTE, RULE, OR POLICY
Sections 33-1254 and 33-1258, Idaho Code

BACKGROUND/DISCUSSION
The Professional Standards Commission (PSC) is tasked with conducting a full review of all approved teacher preparation programs in Idaho on a seven year cycle and making recommendations to the State Board of Education for continued approval of the programs. The PSC convened a State Review Team containing content experts and conducted the full program review of Idaho State University (ISU), September 20 - 22, 2015. The PSC reviewed the final report submitted by the State Review Team and voted to recommend that the State Board of Education adopt the State Team Report as written and extend approval of the programs as specified in the report. English as a New Language and the Economic Programs were not recommended for approval in the report.

Following consideration of the review team report ISU submitted additional documentation to the PSC at its March 2016 meeting showing they had already addressed the concerns with the programs that the State Team voted not to approve. The PSC felt that the documentation brought forth by ISU for their English, English as a New Language, and Economics programs provided sufficient evidence to merit a recommendation of Conditional Approval for those programs.

IMPACT
The recommendations in this report will enable ISU to continue to prepare teachers in the best possible manner, ensuring that all state teacher preparation standards are being effectively embedded in their teacher preparation programs.

ATTACHMENTS
Attachment 1 – Idaho State University Final State Team Report Page 3
Attachment 2 – Idaho State University Response Page 207
Attachment 3 – NCATE Final Report Page 235
Attachment 4 – Documentation for Revised English as a New Language and Economics Programs Page 269

STAFF COMMENTS AND RECOMMENDATIONS
Pursuant to Section 33-114, Idaho Code the review and approval of all teacher preparation programs in the state is vested in the State Board of Education. The program reviews are conducted for the Board through the Professional Standards Commission based on a seven year cycle. The reviews are done in conjunction with the preparation program’s accreditation review cycle.
Additionally, every third year following the full review and audit of state specific certification requirements is conducted. The review process is designed to assure the programs are meeting the Board approved school personnel standards for the applicable programs, that the teacher are prepared to teach the state content standards for their applicable subject areas, as well as the quality of candidates exiting the programs.

The current Board approved accrediting body for teacher preparation programs is the National Council for Accreditation of Teacher Education (NCATE). On-site preparation program reviews are conducted in partnership with NCATE based on a partnership agreement. During a concurrent visit, the NCATE team and the state team collaborate to conduct the review, however each team generates their own reports.

**BOARD ACTION**

I move to adopt the recommendation by the Professional Standards Commission and to accept the State Team Report for Idaho State University as submitted, and to grant Conditional Approval based on the additional documentation submitted by Idaho State University for their English, English as a New Language, and Economics programs.

College/University: **Idaho State University**  
Review Dates: **September 20-22, 2015**
INTRODUCTION

Idaho State University, a Carnegie Research High Doctoral University and teaching institution founded in 1901, attracts students from around the world to its Idaho campuses. At the main campus in Pocatello, and at locations in Meridian, Idaho Falls and Twin Falls, ISU offers access to high-quality education in Teacher Preparation and Educational Leadership.

The purpose of the on-site review was to determine if sufficient evidence was presented indicating that candidates at Idaho State University meet state standards for beginning teachers. The review was conducted by a thirteen member state program approval team, accompanied by two state observers. The standards used to validate the Institutional Report were the State Board of Education–approved Idaho Standards for the Initial Certification of Professional School Personnel. State Board–approved knowledge and performance indicators, as well as rubrics, were used to assist team members in determining how well standards were being met. Core standards as well as individual program foundation and enhancement standards were reviewed. Core standards and program foundation standards are not subject to approval.

Team members looked for a minimum of three applicable pieces of evidence provided by the institution to validate each standard. These evidences included but were not limited to: course syllabi, class assignment descriptions, assignment grading rubrics, candidate evaluations and letters of support, additional evaluations both formal and informal, program course requirement lists, actual class assignments, Praxis II test results, and electronic portfolio entry evidence. Some observations of candidates teaching through PreK-12 site visits and video presentations were also used. In addition to this documentation, team members conducted interviews with candidates, completers, college administrators, college faculty, PreK-12 principals and cooperating teachers.

To assist the reader, the report includes language recommended by the National Council for the Accreditation of Teacher Education, a national accrediting agency. Specifically, to assist the reader, the terms below are used throughout the report as defined below:

Candidate – a student enrolled at Idaho State University.
Student – an individual enrolled in an Idaho PreK-12 public school
Unit – the institution’s teacher preparation program
NCATE – National Council for the Accreditation of Teacher Education

Recommendation for conditional approval based on lack of completers.
Idaho Core Teacher Standards

State Program Approval Rubric for Teacher Preparation Programs

Candidate Performance Relative to the Idaho Standards

The Idaho Standards for Initial Certification provide the framework for the approval of educator preparation programs. As such, the standards set the criteria by which teacher preparation programs are reviewed for state program approval.

The following rubric is used to evaluate the extent to which teacher preparation programs prepare teachers who meet the standards. The rubric is designed to be used with each individual preparation program (i.e., Elementary, Special Education, Secondary English, Secondary Science–Biology, etc.).

Consistent with NCATE accreditation standards, the rubrics describe three levels of performance (i.e., unacceptable, acceptable, and target) for each of the Idaho Standards for Initial Certification. The rubric shall be used to make holistic judgments. Elements identified in the rubrics provide the basis upon which the State Program Approval Team evaluates the institution’s evidence that candidates meet the Idaho standards. The institution is expected to provide information about candidate performance related to the Idaho Core Teacher Standards (and Idaho Teacher Standards for specific preparation areas).

Standard #1: Learner Development. The teacher understands how learners grow and develop, recognizing that patterns of learning and development vary individually within and across the cognitive, linguistic, social, emotional, and physical areas, and designs and implements developmentally appropriate and challenging learning experiences.

Knowledge
1. The teacher understands how learning occurs--how learners construct knowledge, acquire skills, and develop disciplined thinking processes--and knows how to use instructional strategies that promote student learning.
2. The teacher understands that each learner’s cognitive, linguistic, social, emotional, and physical development influences learning and knows how to make instructional decisions that build on learners’ strengths and needs.
3. The teacher identifies readiness for learning, and understands how development in any one area may affect performance in others.
4. The teacher understands the role of language and culture in learning and knows how to modify instruction to make language comprehensible and instruction relevant, accessible, and challenging.

<table>
<thead>
<tr>

<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.1 Knowledge Learner Development</td>
<td></td>
<td>X</td>
<td></td>
</tr>
</tbody>
</table>

5
1.1 Syllabi, required coursework descriptions, candidate lesson plans, and teacher work samples provide evidence that teacher candidates demonstrate an adequate understanding of how students learn and develop.

Performance
1. The teacher regularly assesses individual and group performance in order to design and modify instruction to meet learners’ needs in each area of development (cognitive, linguistic, social, emotional, and physical) and scaffolds the next level of development.
2. The teacher creates developmentally appropriate instruction that takes into account individual learners’ strengths, interests, and needs and that enables each learner to advance and accelerate his/her learning.
3. The teacher collaborates with families, communities, colleagues, and other professionals to promote learner growth and development.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.2 Performance Learner Development</td>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

1.2 Candidate interviews, work samples, and lesson plans indicated hypothetical developmentally appropriate instruction that accounts for individual learners’ strengths, interests, and needs.

Standard #2: Learning Differences. The teacher uses understanding of individual differences and diverse cultures and communities to ensure inclusive learning environments that enable each learner to meet high standards.

Knowledge
1. The teacher understands and identifies differences in approaches to learning and performance and knows how to design instruction that uses each learner’s strengths to promote growth.
2. The teacher understands students with exceptional needs, including those associated with disabilities and giftedness, and knows how to use strategies and resources to address these needs.
3. The teacher knows about second language acquisition processes and knows how to incorporate instructional strategies and resources to support language acquisition.
4. The teacher understands that learners bring assets for learning based on their individual experiences, abilities, talents, prior learning, and peer and social group interactions, as well as language, culture, family, and community values.
5. The teacher knows how to access information about the values of diverse cultures and communities and how to incorporate learners’ experiences, cultures, and community resources into instruction.
2.1 Syllabi, required coursework descriptions, candidate lesson plans, and teacher work samples provide evidence that teacher candidates demonstrate an adequate understanding of how students differ in their approaches to learning.

**Performance**
1. The teacher designs, adapts, and delivers instruction to address each student’s diverse learning strengths and needs and creates opportunities for students to demonstrate their learning in different ways.
2. The teacher makes appropriate and timely provisions (e.g., pacing for individual rates of growth, task demands, communication, assessment, and response modes) for individual students with particular learning differences or needs.
3. The teacher designs instruction to build on learners’ prior knowledge and experiences, allowing learners to accelerate as they demonstrate their understandings.
4. The teacher brings multiple perspectives to the discussion of content, including attention to learners’ personal, family, and community experiences and cultural norms.
5. The teacher incorporates tools of language development into planning and instruction, including strategies for making content accessible to English language learners and for evaluating and supporting their development of English proficiency.
6. The teacher accesses resources, supports, and specialized assistance and services to meet particular learning differences or needs.

<table>
<thead>
<tr>

<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>2.1 Knowledge Learning Differences</td>
<td></td>
<td>X</td>
<td></td>
</tr>
</tbody>
</table>

2.2 Teacher work samples, lesson plans, and interviews with candidates demonstrate an in-depth ability of candidates to understand, design, and adapt instruction for students with multiple diverse learning needs. Candidates consistently shared that they felt exceptionally prepared in this area.

**Standard #3: Learning Environments.** The teacher works with others to create environments that support individual and collaborative learning, and that encourage positive social interaction, active engagement in learning, and self-motivation.
Knowledge
1. The teacher understands the relationship between motivation and engagement and knows how to design learning experiences using strategies that build learner self-direction and ownership of learning.
2. The teacher knows how to help learners work productively and cooperatively with each other to achieve learning goals.
3. The teacher knows how to collaborate with learners to establish and monitor elements of a safe and productive learning environment including norms, expectations, routines, and organizational structures.
4. The teacher understands how learner diversity can affect communication and knows how to communicate effectively in differing environments.
5. The teacher knows how to use technologies and how to guide learners to apply them in appropriate, safe, and effective ways.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>

</thead>
<tbody>
<tr>
<td>3.1 Knowledge</td>
<td></td>
<td>X</td>
<td></td>
</tr>
<tr>
<td>Learning Environments</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

3.1 Course syllabi and course assignments, such as classroom management plans and lesson plans provide evidence that teacher candidates demonstrate an adequate understanding of the principles of motivation and management for safe and productive student behavior.

Performance
1. The teacher collaborates with learners, families, and colleagues to build a safe, positive learning climate of openness, mutual respect, support, and inquiry.
2. The teacher develops learning experiences that engage learners in collaborative and self-directed learning and that extend learner interaction with ideas and people locally and globally.
3. The teacher collaborates with learners and colleagues to develop shared values and expectations for respectful interactions, rigorous academic discussions, and individual and group responsibility for quality work.
4. The teacher manages the learning environment to actively and equitably engage learners by organizing, allocating, and coordinating the resources of time, space, and learners’ attention.
5. The teacher uses a variety of methods to engage learners in evaluating the learning environment and collaborates with learners to make appropriate adjustments.
6. The teacher communicates verbally and nonverbally in ways that demonstrate respect for and responsiveness to the cultural backgrounds and differing perspectives learners bring to the learning environment.
7. The teacher promotes responsible learner use of interactive technologies to extend the possibilities for learning locally and globally.
8. The teacher intentionally builds learner capacity to collaborate in face-to-face and virtual environments through applying effective interpersonal communication skills.
3.2 Interviews with candidates, completers, and cooperating teachers, as well as lesson plans and classroom management analysis projects provide evidence that teacher candidates are able to create, manage, and modify learning environments to ensure they are safe and productive.

**Standard #4: Content Knowledge.** The teacher understands the central concepts, tools of inquiry, and structures of the discipline(s) he or she teaches and creates learning experiences that make the discipline accessible and meaningful for learners to assure mastery of the content.

**Knowledge**
1. The teacher understands major concepts, assumptions, debates, processes of inquiry, and ways of knowing that are central to the discipline(s) s/he teaches.
2. The teacher understands common misconceptions in learning the discipline and how to guide learners to accurate conceptual understanding.
3. The teacher knows and uses the academic language of the discipline and knows how to make it accessible to learners.
4. The teacher knows how to integrate culturally relevant content to build on learners’ background knowledge.
5. The teacher has a deep knowledge of student content standards and learning progressions in the discipline(s) s/he teaches.

4.1 Praxis II exam scores, candidate assignments, lesson plans, and teacher work samples provide evidence that teacher candidates demonstrate adequate knowledge of the content that they plan to teach and understand the ways new knowledge in the content area is discovered.

**Performance**
1. The teacher effectively uses multiple representations and explanations that capture key ideas in the discipline, guide learners through learning progressions, and promote each learner’s achievement of content standards.
2. The teacher engages students in learning experiences in the discipline(s) that encourage learners to understand, question, and analyze ideas from diverse perspectives so that they master the content.
4. The teacher stimulates learner reflection on prior content knowledge, links new concepts to familiar concepts, and makes connections to learners’ experiences.
5. The teacher recognizes learner misconceptions in a discipline that interfere with learning, and creates experiences to build accurate conceptual understanding.
6. The teacher evaluates and modifies instructional resources and curriculum materials for their comprehensiveness, accuracy for representing particular concepts in the discipline, and appropriateness for his/her learners.
7. The teacher uses supplementary resources and technologies effectively to ensure accessibility and relevance for all learners.
8. The teacher creates opportunities for students to learn, practice, and master academic language in their content.
9. The teacher accesses school and/or district-based resources to evaluate the learner’s content knowledge in their primary language.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>4.2 Performance Content Knowledge</td>
<td></td>
<td>X</td>
<td></td>
</tr>
</tbody>
</table>

4.2 Lesson plans, work samples, candidate interviews, and cooperating teacher interviews provide evidence that teacher candidates create learning experiences that make the content taught meaningful to students.

Standard #5: Application of Content. The teacher understands how to connect concepts and use differing perspectives to engage learners in critical thinking, creativity, and collaborative problem solving related to authentic local and global issues.

Knowledge
1. The teacher understands the ways of knowing in his/her discipline, how it relates to other disciplinary approaches to inquiry, and the strengths and limitations of each approach in addressing problems, issues, and concerns.
2. The teacher understands how current interdisciplinary themes (e.g., civic literacy, health literacy, global awareness) connect to the core subjects and knows how to weave those themes into meaningful learning experiences.
3. The teacher understands the demands of accessing and managing information as well as how to evaluate issues of ethics and quality related to information and its use.
4. The teacher understands how to use digital and interactive technologies for efficiently and effectively achieving specific learning goals.
5. The teacher understands critical thinking processes and knows how to help learners develop high level questioning skills to promote their independent learning.
6. The teacher understands communication modes and skills as vehicles for learning (e.g., information gathering and processing) across disciplines as well as vehicles for expressing learning.
7. The teacher understands creative thinking processes and how to engage learners in producing original work.
8. The teacher knows where and how to access resources to build global awareness and understanding, and how to integrate them into the curriculum.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>5.1 Knowledge Application of Content</td>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

5.1 Coursework, lesson plans, and teacher work samples provide evidence that teacher candidates understand how to connect concepts and use differing perspectives to engage learners in critical thinking. Aside from candidate philosophy papers, little evidence was provided to address issues related to ethics and quality of information.

Performance
1. The teacher develops and implements projects that guide learners in analyzing the complexities of an issue or question using perspectives from varied disciplines and cross disciplinary skills (e.g., a water quality study that draws upon biology and chemistry to look at factual information and social studies to examine policy implications).
2. The teacher engages learners in applying content knowledge to real world problems through the lens of interdisciplinary themes (e.g., financial literacy, environmental literacy).
3. The teacher facilitates learners’ use of current tools and resources to maximize content learning in varied contexts.
4. The teacher engages learners in questioning and challenging assumptions and approaches in order to foster innovation and problem solving in local and global contexts.
5. The teacher develops learners’ communication skills in disciplinary and interdisciplinary contexts by creating meaningful opportunities to employ a variety of forms of communication that address varied audiences and purposes.
6. The teacher engages learners in generating and evaluating new ideas and novel approaches, seeking inventive solutions to problems, and developing original work.
7. The teacher facilitates learners’ ability to develop diverse social and cultural perspectives that expand their understanding of local and global issues and create novel approaches to solving problems.
8. The teacher develops and implements supports for learner literacy development across content areas.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>5.2 Performance Application of Content</td>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
5.2 Lesson plans, teacher work samples, and unit plans provide minimal evidence that teacher candidates demonstrate the ability to connect concepts and use differing perspectives to engage learners in critical thinking, creativity, and collaborative problem solving related to authentic local and global issues. Minimal evidence was present in both Elementary and Secondary Social Studies methods and art methods. Even though candidates’ lesson plan evaluations indicated this practice was systematic, evidence was not consistently apparent.

Standard #6: Assessment. The teacher understands and uses multiple methods of assessment to engage learners in their own growth, to monitor learner progress, and to guide the teacher’s and learner’s decision making.

Knowledge
1. The teacher understands the differences between formative and summative applications of assessment and knows how and when to use each.
2. The teacher understands the range of types and multiple purposes of assessment and how to design, adapt, or select appropriate assessments to address specific learning goals and individual differences, and to minimize sources of bias.
3. The teacher knows how to analyze assessment data to understand patterns and gaps in learning, to guide planning and instruction, and to provide meaningful feedback to all learners.
4. The teacher knows when and how to engage learners in analyzing their own assessment results and in helping to set goals for their own learning.
5. The teacher understands the positive impact of effective descriptive feedback for learners and knows a variety of strategies for communicating this feedback.
6. The teacher knows when and how to evaluate and report learner progress against standards.
7. The teacher understands how to prepare learners for assessments and how to make accommodations in assessments and testing conditions, especially for learners with disabilities and language learning needs.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>6.1 Knowledge Assessment</td>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

6.1 Teacher work samples, lesson plans, and candidate and cooperating teacher interviews provide evidence that teacher candidates demonstrate an understanding of formal and informal student assessment strategies to evaluate students. Candidates and cooperating teachers expressed a desire and need for more candidate training in assessment strategies, specifically formative assessment.

Performance
1. The teacher balances the use of formative and summative assessment as appropriate to support, verify, and document learning.
2. The teacher designs assessments that match learning objectives with assessment methods and minimizes sources of bias that can distort assessment results.
3. The teacher works independently and collaboratively to examine test and other performance data to understand each learner’s progress and to guide planning.
4. The teacher engages learners in understanding and identifying quality work and provides them with effective descriptive feedback to guide their progress toward that work.
5. The teacher engages learners in multiple ways of demonstrating knowledge and skill as part of the assessment process.
6. The teacher models and structures processes that guide learners in examining their own thinking and learning as well as the performance of others.
7. The teacher effectively uses multiple and appropriate types of assessment data to identify each student’s learning needs and to develop differentiated learning experiences.
8. The teacher prepares all learners for the demands of particular assessment formats and makes appropriate accommodations in assessments or testing conditions, especially for learners with disabilities and language learning needs.
9. The teacher continually seeks appropriate ways to employ technology to support assessment practice both to engage learners more fully and to assess and address learner needs.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>6.2 Performance Assessment</td>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

6.2 Teacher work samples, lesson plans, and candidate and cooperating teacher interviews provide minimal evidence that teacher candidates use and interpret multiple forms of assessment to evaluate student performance. Although assessment is clearly an integral part of lesson plan development, faculty feedback on lesson plans and teacher work samples specific to assessment consistently identify improvements needed. Candidates and cooperating teachers expressed a desire and need for more candidate training in assessment strategies, specifically utilizing formative assessment to further plan instruction.

**Standard #7: Planning for Instruction.** The teacher plans instruction that supports every student in meeting rigorous learning goals by drawing upon knowledge of content areas, curriculum, cross-disciplinary skills, and pedagogy, as well as knowledge of learners and the community context.

**Knowledge**
1. The teacher understands content and content standards and how these are organized in the curriculum.
2. The teacher understands how integrating cross-disciplinary skills in instruction engages learners purposefully in applying content knowledge.
3. The teacher understands learning theory, human development, cultural diversity, and individual differences and how these impact ongoing planning.
4. The teacher understands the strengths and needs of individual learners and how to plan instruction that is responsive to these strengths and needs.
5. The teacher knows a range of evidence-based instructional strategies, resources, and technological tools and how to use them effectively to plan instruction that meets diverse learning needs.
6. The teacher knows when and how to adjust plans based on assessment information and learner responses.
7. The teacher knows when and how to access resources and collaborate with others to support student learning (e.g., special educators, related service providers, language learner specialists, librarians, media specialists, community organizations).

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>7.1 Knowledge Instructional Planning Skills</td>
<td></td>
<td>X</td>
<td></td>
</tr>
</tbody>
</table>

7.1 Syllabi, lesson plans, teacher work samples, and cooperating teacher interviews provide evidence that teacher candidates demonstrate an adequate understanding of how to plan and prepare instruction based upon consideration of knowledge of subject matter, students, the community, and curriculum goals. Reflection exercises indicate teacher candidates consider assessment information and learner responses when adjusting teaching plans inconsistently.

**Performance**

1. The teacher individually and collaboratively selects and creates learning experiences that are appropriate for curriculum goals and content standards, and are relevant to learners.
2. The teacher plans how to achieve each student’s learning goals, choosing appropriate strategies and accommodations, resources, and materials to differentiate instruction for individuals and groups of learners.
3. The teacher develops appropriate sequencing of learning experiences and provides multiple ways to demonstrate knowledge and skill.
4. The teacher plans for instruction based on formative and summative assessment data, prior learner knowledge, and learner interest.
5. The teacher plans collaboratively with professionals who have specialized expertise (e.g., special educators, related service providers, language learning specialists, librarians, media specialists) to design and jointly deliver as appropriate learning experiences to meet unique learning needs.
6. The teacher evaluates plans in relation to short- and long-range goals and systematically adjusts plans to meet each student’s learning needs and enhance learning.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>7.2 Performance Instructional Planning Skills</td>
<td></td>
<td>X</td>
<td></td>
</tr>
</tbody>
</table>

7.2 Lesson plans, teacher work samples, and candidate and cooperating teacher interviews provide evidence that teacher candidates plan and prepare instruction based upon consideration of subject matter, students, the community, and curriculum goals. Assessment evidence, while provided, was inconsistent. Evidence of teacher candidates’ efforts to collaborate with specialists was minimal to non-existent.
Standard #8: Instructional Strategies. The teacher understands and uses a variety of instructional strategies to encourage learners to develop deep understanding of content areas and their connections, and to build skills to apply knowledge in meaningful ways.

Knowledge
1. The teacher understands the cognitive processes associated with various kinds of learning (e.g., critical and creative thinking, problem framing and problem solving, invention, memorization and recall) and how these processes can be stimulated.
2. The teacher knows how to apply a range of developmentally, culturally, and linguistically appropriate instructional strategies to achieve learning goals.
3. The teacher knows when and how to use appropriate strategies to differentiate instruction and engage all learners in complex thinking and meaningful tasks.
4. The teacher understands how multiple forms of communication (oral, written, nonverbal, digital, visual) convey ideas, foster self-expression, and build relationships.
5. The teacher knows how to use a wide variety of resources, including human and technological, to engage students in learning.
6. The teacher understands how content and skill development can be supported by media and technology and knows how to evaluate these resources for quality, accuracy, and effectiveness.

<table>

<tbody>
<tr>
<td>8.1 Knowledge Instructional Strategies</td>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

8.1 Lesson plans, teacher work samples, and interviews with candidates and cooperating teachers provide evidence that teacher candidates demonstrate an adequate understanding of instructional strategies. Candidates work consistently shows appropriate differentiation as needed.

Performance
1. The teacher uses appropriate strategies and resources to adapt instruction to the needs of individuals and groups of learners.
2. The teacher continuously monitors student learning, engages learners in assessing their progress, and adjusts instruction in response to student learning needs.
3. The teacher collaborates with learners to design and implement relevant learning experiences, identify their strengths, and access family and community resources to develop their areas of interest.
4. The teacher varies his/her role in the instructional process (e.g., instructor, facilitator, coach, audience) in relation to the content and purposes of instruction and the needs of learners.
5. The teacher provides multiple models and representations of concepts and skills with opportunities for learners to demonstrate their knowledge through a variety of products and performances.
6. The teacher engages all learners in developing higher order questioning skills and metacognitive processes.

7. The teacher engages learners in using a range of learning skills and technology tools to access, interpret, evaluate, and apply information.
8. The teacher uses a variety of instructional strategies to support and expand learners’ communication through speaking, listening, reading, writing, and other modes.
9. The teacher asks questions to stimulate discussion that serves different purposes (e.g., probing for learner understanding, helping learners articulate their ideas and thinking processes, stimulating curiosity, and helping learners to question).

<table>

<td>8.2 Performance Instructional Strategies</td>
<td></td>
<td>X</td>
<td></td>
</tr>
</tbody>
</table>

8.2 Lesson plans, teacher work samples, unit plans, and candidate interviews provide evidence that teacher candidates use a variety of instructional strategies. Evidence indicated candidates utilize whole group, small group, individual, and technology for instructional strategies.

Standard #9: Professional Learning and Ethical Practice. The teacher engages in ongoing professional learning and uses evidence to continually evaluate his/her practice, particularly the effects of his/her choices and actions on others (learners, families, other professionals, and the community), and adapts practice to meet the needs of each learner.

Knowledge
1. The teacher understands and knows how to use a variety of self-assessment and problem solving strategies to analyze and reflect on his/her practice and to plan for adaptations/adjustments.
2. The teacher knows how to use learner data to analyze practice and differentiate instruction accordingly.
3. The teacher understands how personal identity, worldview, and prior experience affect perceptions and expectations, and recognizes how they may bias behaviors and interactions with others.
4. The teacher understands laws related to learners’ rights and teacher responsibilities (e.g., for educational equity, appropriate education for learners with disabilities, confidentiality, privacy, appropriate treatment of learners, reporting in situations related to possible child abuse).
5. The teacher knows how to build and implement a plan for professional growth directly aligned with his/her needs as a growing professional using feedback from teacher evaluations and observations, data on learner performance, and school- and system-wide priorities.

<table>
<thead>

<td>X</td>
<td></td>
</tr>
</tbody>
</table>
9.1 Syllabi, coursework, teacher work samples, unit plans, and interviews with candidates provide evidence that teacher candidates demonstrate an adequate ability to engage in ongoing professional learning and use evidence to continually evaluate his/her practice. Minimal evidence was provided to show candidate understanding of laws related to learners’ rights and teacher responsibilities.

Performance
1. The teacher engages in ongoing learning opportunities to develop knowledge and skills in order to provide all learners with engaging curriculum and learning experiences based on local and state standards.
2. The teacher engages in meaningful and appropriate professional learning experiences aligned with his/her own needs and the needs of the learners, school, and system.
3. Independently and in collaboration with colleagues, the teacher uses a variety of data (e.g., systematic observation, information about learners, research) to evaluate the outcomes of teaching and learning and to adapt planning and practice.
4. The teacher actively seeks professional, community, and technological resources, within and outside the school, as supports for analysis, reflection, and problem-solving.
5. The teacher reflects on his/her personal biases and accesses resources to deepen his/her own understanding of cultural, ethnic, gender, and learning differences to build stronger relationships and create more relevant learning experiences.
6. The teacher advocates, models, and teaches safe, legal, and ethical use of information and technology including appropriate documentation of sources and respect for others in the use of social media.

</table>

9.2 Teacher work samples, the use of IPLP’s, candidate reflections, and candidate interviews provide evidence that teacher candidates display an adequate ability to engage in appropriate professional learning experiences and evaluate their practices.

Standard #10: Leadership and Collaboration. The teacher seeks appropriate leadership roles and opportunities to take responsibility for student learning, to collaborate with learners, families, colleagues, other school professionals, and community members to ensure learner growth, and to advance the profession.

Knowledge
1. The teacher understands schools as organizations within a historical, cultural, political, and social context and knows how to work with others across the system to support learners.
2. The teacher understands that alignment of family, school, and community spheres of influence enhances student learning and that discontinuity in these spheres of influence interferes with learning.
3. The teacher knows how to work with other adults and has developed skills in collaborative interaction appropriate for both face-to-face and virtual contexts.
4. The teacher knows how to contribute to a common culture that supports high expectations for student learning.

10.1 Coursework, and candidate and cooperating teacher interviews provide evidence that teacher candidates understand how to professionally and effectively communicate and work with colleagues and families to support students’ learning and well-being.

**Performance**

1. The teacher takes an active role on the instructional team, giving and receiving feedback on practice, examining learner work, analyzing data from multiple sources, and sharing responsibility for decision making and accountability for each student’s learning.
2. The teacher works with other school professionals to plan and jointly facilitate learning on how to meet diverse needs of learners.
3. The teacher engages collaboratively in the school-wide effort to build a shared vision and supportive culture, identify common goals, and monitor and evaluate progress toward those goals.
4. The teacher works collaboratively with learners and their families to establish mutual expectations and ongoing communication to support learner development and achievement.
5. Working with school colleagues, the teacher builds ongoing connections with community resources to enhance student learning and well-being.
6. The teacher engages in professional learning, contributes to the knowledge and skill of others, and works collaboratively to advance professional practice.
7. The teacher uses technological tools and a variety of communication strategies to build local and global learning communities that engage learners, families, and colleagues.
8. The teacher uses and generates meaningful research on education issues and policies.
9. The teacher seeks appropriate opportunities to model effective practice for colleagues, to lead professional learning activities, and to serve in other leadership roles.
10. The teacher advocates to meet the needs of learners, to strengthen the learning environment, and to enact system change.
11. The teacher takes on leadership roles at the school, district, state, and/or national level and advocates for learners, the school, the community, and the profession.

State Program Approval Rubric for Teacher Preparation Programs

Candidate Performance Relative to the Idaho Standards

The Idaho Standards for Initial Certification provide the framework for the approval of educator preparation programs. As such, the standards set the criteria by which teacher preparation programs are reviewed for state program approval.

The following rubric is used to evaluate the extent to which teacher preparation programs prepare teachers relative to the standards. The rubric is designed to be used with each content-specific preparation program (i.e., Elementary, Special Education, Secondary English, Secondary Science–Biology, etc.).

Consistent with NCATE accreditation standards, the rubric describes three levels of performance (i.e., unacceptable, acceptable, and target) for each of the Idaho Standards for Initial Certification. The rubric shall be used to make holistic judgments. Performance indicators provide the lens through which the State Program Approval Team evaluates the institution’s provided evidence that candidates meet the Idaho standards. The institution is expected to provide information about candidate performance related to the Idaho Standards for Initial Preparation of Professional School Personnel.

Standard 1: Knowledge of Subject Matter -- The teacher understands the central concepts, tools of inquiry, and structures of the content area(s) taught and creates learning experiences that make these aspects of subject matter meaningful for learners.

Knowledge
1. The educator knows how young children integrate domains of development (language, cognition, social-emotional, physical, and self-help) as well as traditional content areas of learning (e.g., literacy, mathematics, science, health, safety, nutrition, social studies, art, music, drama, and movement).

2. The educator understands theories, history, and models that provide the basis for early childhood education and early childhood special education practices as identified in NAEYC Licensure and DEC Personnel Standards.

3. The educator understands the process of self-regulation that assists young children to identify and cope with emotions.

4. The educator understands language acquisition processes in order to support emergent literacy, including pre-linguistic communication and language development.

5. The educator understands the elements of play and how play assists children in learning.

6. The educator understands nutrition and feeding relationships so children develop essential and healthy eating habits.

7. The educator understands that young children are constructing a sense of self, expressing wants and needs, and understanding social interactions that enable them to be involved in friendships, cooperation, and effective conflict resolutions.
8. The educator understands the acquisition of self-help skills that facilitate the child’s growing independence (e.g., toileting, dressing, grooming, hygiene, eating, and sleeping).
9. The educator understands the comprehensive nature of children’s well being in order to create opportunities for developing and practicing skills that contribute to healthful living and enhanced quality of life.

</table>

1.1 Due to lack of variety of sources of evidence provided and an insufficient number of program completers, teacher candidates did not demonstrate adequate knowledge of understanding subject matter. A single course is insufficient to meet a majority, if not all, of the standards.

**Performance**
1. The educator demonstrates the application of theories and educational models in early childhood education and special education practices.
2. The educator applies fundamental knowledge of English language arts, science, mathematics, social studies, the arts, health, safety, nutrition, and physical education for children from birth through age 2, ages 3-5, and grades K-3.

1.2 Due to lack of variety of sources of evidence provided and an insufficient number of program completers, teacher candidates did not demonstrate an adequate ability to make subject matter meaningful. A single course is insufficient to meet a majority, if not all, of the standards.

**Standard 2: Knowledge of Human Development and Learning - The teacher understands how students learn and develop, and provides opportunities that support their intellectual, social, and personal development.**

**Knowledge**
1. The educator knows that family systems are inextricably tied to child development.
2. The educator understands the typical and atypical development of infants’ and young children’s attachments and relationships with primary caregivers.
3. The educator understands how learning occurs and that young children’s development influences learning and instructional decisions.
4. The educator understands pre-, peri-, and postnatal development and factors, such as biological and environment conditions that affect children’s development and learning.
5. The educator understands the developmental consequences of stress and trauma, protective factors and resilience, the development of mental health, and the importance of supportive relationships.

2.2 Due to lack of variety of sources of evidence provided and an insufficient number of program completers, teacher candidates did not demonstrate an adequate ability to provide opportunities for development. A single course is insufficient to meet a majority, if not all, of the standards.

Standard 3: Adapting Instruction for Individual Needs - The teacher understands how students differ in their approaches to learning and creates instructional opportunities to meet students’ diverse needs and experiences.

Knowledge
1. The educator knows aspects of medical care for premature development, low birth weight, young children who are medically fragile, and children with special health care needs, and knows the concerns and priorities associated with these medical conditions as well as their implications on child development and family resources.
2. The educator understands variations of beliefs, traditions, and values regarding disability across cultures and the effect of these on the relationships among the child, family, and their environments.
3. The educator knows the characteristics of typical and atypical development and their educational implications and effects on participation in educational and community environments.
4. The educator knows how to access information regarding specific children’s needs and disability-related issues (e.g. medical, support, and service delivery).

3.1 Interviews with university supervisors, elementary principals, review of multiple special education syllabi and assessment matrices provide evidence that teacher candidates demonstrate an adequate knowledge of how students differ in their approaches to learning. However, it must be noted that a single course is insufficient to meet a majority, if not all, of the standards.

Performance
1. The educator locates, uses, and shares information about the methods for the care of young children who are medically fragile and children with special health care needs, including the effects of technology and various medications on the educational, cognitive, physical, social, and emotional behavior of children with disabilities.

4.1 Review of multiple course syllabi, progress monitoring information and assessment guideline requirements provide evidence that the teacher candidates demonstrate adequate knowledge of using a variety of instructional strategies. However, it must be noted that a single course is insufficient to meet a majority, if not all, of the standards.

**Performance**
1. The educator uses developmentally appropriate methods to help young children develop intellectual curiosity, solve problems, and make decisions (e.g., child choice, play, small group projects, open-ended questioning, group discussion, problem solving, cooperative learning, and inquiry and reflection experiences).
2. The educator uses instructional strategies that support both child-initiated and adult-directed activities.

4.2 Multiple candidate work samples from multiple special education classes, progress monitoring work submission and final exam narratives provided show evidence that teacher candidates demonstrate an adequate ability to accommodate individual learning needs. However, it must be noted that a single course is insufficient to meet a majority, if not all, of the standards.

**Standard 5: Classroom Motivation and Management Skills** - The teacher understands individual and group motivation and behavior and creates a learning environment that encourages positive social interaction, active engagement in learning, and self-motivation.

**Performance**
1. The educator promotes opportunities for young children in natural and inclusive settings.
2. The educator embeds learning objectives within everyday routines and activities.
3. The educator creates an accessible learning environment, including the use of assistive technology.
4. The educator provides training and supervision for the classroom paraprofessional, aide, volunteer, and peer tutor.
5. The educator creates an environment that encourages self-advocacy and increased independence.
6. The educator implements the least intrusive and intensive intervention consistent with the needs of children.
7. The educator conducts functional behavior assessments and develops positive behavior supports.

Due to lack of variety of sources of evidence provided and an insufficient number of program completers, teacher candidates did not demonstrate an adequate understanding of how to plan in connection with students’ needs and community contexts. A single course is insufficient to meet a majority, if not all, of the standards.

Performance
1. The educator designs meaningful play experiences and integrated learning opportunities for development of young children.
2. The educator assists families in identifying their resources, priorities, and concerns in relation to their children’s development and provides information about a range of family-oriented services based on identified resources, priorities, and concerns through the use of the Individualized Education Programs (IEP).
3. The educator supports transitions for young children and their families (e.g., hospital, home, Infant/Toddler programs, Head Start, Early Head Start, childcare programs, preschool, and primary programs).
4. The educator analyzes activities and tasks and uses procedures for determining and monitoring children’s skill levels and progress.
5. The educator evaluates and links children’s skill development to that of same age peers.
Element | Unacceptable | Acceptable | Target
--- | --- | --- | ---
7.2 Performance Instructional Planning Skills in Connection with Students’ Needs and Community Contexts | X |  | 

7.2 Due to lack of variety of sources of evidence provided and an insufficient number of program completers, teacher candidates did not demonstrate an adequate ability to plan in connection with students’ needs and community contexts. A single course is insufficient to meet a majority, if not all, of the standards.

*Standard 8: Assessment of Student Learning - The teacher understands, uses, and interprets formal and informal assessment strategies to evaluate and advance student performance and to determine program effectiveness.*

**Knowledge**
1. The educator understands the legal provisions, regulations, guidelines, and ethical concerns regarding assessment of children.
2. The educator knows that developmentally appropriate assessment procedures reflect children’s behavior over time and rely on regular and periodic observations and record keeping of children’s everyday activities and performance.
3. The educator knows the instruments and procedures used to assess children for screening, pre-referral interventions, referral, and eligibility determination for special education services or early intervention services for birth to three years.
4. The educator knows the ethical issues and identification procedures for children with disabilities, including children from culturally and linguistically diverse backgrounds.

Element | Unacceptable | Acceptable | Target
--- | --- | --- | ---
8.1 Knowledge Assessment of Student Learning | X |  | 

8.1 Due to lack of variety of sources of evidence provided and an insufficient number of program completers, teacher candidates did not demonstrate an adequate understanding of assessment of student learning. A single course is insufficient to meet a majority, if not all, of the standards.

**Performance**
1. The educator assesses all developmental domains (e.g., social-emotional, fine and gross motor, cognition, communication, and self-help).
2. The educator implements services consistent with procedural safeguards in order to protect the rights and ensure the participation of families and children.
3. The educator collaborates with families and professionals involved in the assessment of children.
4. The educator conducts an ecological assessment and uses the information to modify various settings as needed and to integrate the children into those setting.

10.2 Due to lack of variety of sources of evidence provided and an insufficient number of program completers, teacher candidates did not demonstrate an adequate ability to interact in a professional and effective manner to support student’s learning and wellbeing. A single course is insufficient to meet a majority, if not all, of the standards.

Recommended Action on Blended Early Childhood/Early Childhood Special Education:

Approved
Approved Conditionally
Not Approved

Areas for Improvement:
The Early Childhood Education/Blended program is a work in progress. Due to the nature of this program, it is difficult to determine what pedagogical knowledge candidates enter the program with. Being a new program with no completers, the reviewer feels that it will be easier to determine candidate knowledge and performance ability at the 3 year focus visit.

It is our understanding that the SPA accreditation is for an Associate’s Degree, not a Bachelor’s Degree, and therefore is not acceptable as the ONLY evidence for the early childhood portion of the program.
The Idaho Standards for Initial Certification provide the framework for the approval of educator preparation programs. As such, the standards/principles set the criteria by which teacher preparation programs are reviewed for state program approval.

The following rubric is used to evaluate the extent to which teacher preparation programs prepare teachers who meet the standards. The rubric is designed to be used with each individual preparation program (i.e., Elementary, Special Education, Secondary English, Secondary Science–Biology, etc.).

Consistent with NCATE accreditation standards, the rubric describes three levels of performance (i.e., unacceptable, acceptable, and target) for each of the Idaho Standards for Initial Certification. The rubric shall be used to make holistic judgments. Performance indicators provide the lens through which the State Program Approval Team evaluates the institution’s evidence that candidates meet the Idaho standards. The institution is expected to provide information about candidate performance related to the Idaho Standards for Elementary Teachers.

**Standard 1: Knowledge of Subject Matter – The teacher understands the central concepts, tools of inquiry, and structure of the discipline taught and creates learning experiences that make these aspects of subject matter meaningful for students.**

**Knowledge**
1. The teacher understands how values and ethics affect communication.
2. The teacher understands the importance of audience analysis and adaptation in differing communication contexts.
3. The teacher knows the components and processes of communication.
4. The teacher understands the interactive roles of perceptions and meaning.
5. The teacher understands how symbolism and language affect communication.
6. The teacher understands the role of organization in presenting concepts, ideas, and arguments.
7. The teacher knows methods and steps of problem solving in communication arts.

<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.1 Knowledge Understanding Subject Matter</td>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

1.1 There are too few completers in this program for the last few years to be able to give this standard an acceptable rating. There were six candidates who took the Praxis II test in 2014,
and all passed. Two student work samples demonstrated adequate understanding of Communication Standards. However, the syllabi for the Communications courses were unavailable, so it is unclear where that knowledge was taught. The English Language Arts course syllabi that would have provided knowledge in the nature, value, and approaches to a variety of literary texts, print and non-print media, composing processes, and language study dealt ONLY in literature; no instruction in composing processes or language study has been shown to have occurred.

**Performance**

1. The teacher emphasizes to students the importance of values and ethics relevant to the communication process (e.g., speeches, interpersonal interactions, journalistic writing, and debate).
2. The teacher provides instruction and practice in conducting and applying research.
3. The teacher creates lessons that stress the importance of audience analysis and adaptation.
4. The teacher presents communication as a process consisting of integral components.
5. The teacher explains various methods of organization and their effects on the communication process.

1.2 There are too few completers to be able to give this standard an acceptable rating. Based on the two work samples, the teacher candidates are striving to make this subject matter meaningful, but the small number of completers gives this program an Unacceptable rating.

**Standard 2: Knowledge of Human Development and Learning –** The teacher understands how students learn and develop, and provides opportunities that support their intellectual, social, and personal development.

**Standard 3: Modifying Instruction for Individual Needs –** The teacher understands how students differ in their approaches to learning and creates instructional opportunities to meet students’ diverse needs and experiences.

**Standard 4: Multiple Instructional Strategies –** The teacher understands and uses a variety of instructional strategies to develop student learning.

**Standard 5: Classroom Motivation and Management Skills –** The teacher understands individual and group motivation and behavior creates a learning environment that encourages positive social interaction, active engagement in learning, and self-motivation.

**Standard 6: Communication Skills –** The teacher uses a variety of communication techniques to foster learning and communication skills in the classroom.
Standard 7: Instructional Planning Skills - The teacher plans and prepares instruction based on knowledge of subject matter, students, the community, and curriculum goals.

Standard 8: Assessment of Student Learning- The teacher understands, uses, and interprets formal and informal assessment strategies to evaluate and advance student performance and to determine program effectiveness.

Standard 9: Professional Commitment and Responsibility- The teacher is a reflective practitioner who demonstrates a commitment to professional standards and is continuously engaged in purposeful mastery of the art and science of teaching.

Standard 10: Partnerships- The teacher interacts in a professional, effective manner with colleagues, parents, and other members of the community to support students’ learning and well being.
The Idaho Standards for Initial Certification provide the framework for the approval of educator preparation programs. As such, the standards set the criteria by which teacher preparation programs are reviewed for state program approval.

The following rubric is used to evaluate the extent to which teacher preparation programs prepare teachers relative to the standards. The rubric is designed to be used with each content-specific preparation program (i.e., Elementary, Special Education, Secondary English, Secondary Science–Biology, etc.).

Consistent with NCATE accreditation standards, the rubric describes three levels of performance (i.e., unacceptable, acceptable, and target) for each of the Idaho Standards for Initial Certification. The rubric shall be used to make holistic judgments. Performance indicators provide the lens through which the State Program Approval Team evaluates the institution’s provided evidence that candidates meet the Idaho standards. The institution is expected to provide information about candidate performance related to the Idaho Standards for Initial Preparation of Professional School Personnel.

**Standard 1: Knowledge of Subject Matter -- The teacher understands the central concepts, tools of inquiry, and structures of the content area(s) taught and creates learning experiences that make these aspects of subject matter meaningful for learners.**

**Knowledge**
1. The teacher comprehends the fundamentals of journalistic style (e.g., news, feature, and editorial writing).
2. The teacher understands the elements of design and layout.
3. The teacher understands the purposes and elements of photojournalism (e.g., composition and processing).
4. The teacher understands the purposes, types, and rules of headline and caption writing.
5. The teacher possesses knowledge of interviewing skills.
6. The teacher knows how to organize and equip a production area.
7. The teacher knows how to organize and supervise a student staff (e.g., editors, writers, photographers, and business personnel).
8. The teacher knows how to adapt journalistic techniques to various media (e.g., radio, television, and the Internet).
9. The teacher understands advertising and finance.
10. The teacher knows the fundamentals of editing.
11. The teacher understands processes of effective critiquing.
12. The teacher understands journalistic law.
1.1 This program has no completers. The syllabi for the course work in this program cover all of the above standards, with the exception of numbers 4, 7, and 9.

Performance
1. The teacher instructs students in the fundamentals of journalistic style.
2. The teacher presents and requires students to apply the techniques of design and layout.
3. The teacher integrates the purposes and elements of photojournalism into the production process.
4. The teacher instructs students in the purposes, types, and rules of headline and caption writing.
5. The teacher provides opportunities for students to practice and use interviewing skills.
6. The teacher teaches editing skills and provides opportunities for student practice.
7. The teacher provides opportunities for students to critique and evaluate student and professional work.

1.2 This program has no completers, so there was no evidence to review.

Standard 2: Knowledge of Human Development and Learning - The teacher understands how students learn and develop, and provides opportunities that support their intellectual, social, and personal development.

Standard 3: Modifying Instruction for Individual Needs - The teacher understands how students differ in their approaches to learning and creates instructional opportunities that are adapted to learners with diverse needs.

Standard 4: Multiple Instructional Strategies - The teacher understands and uses a variety of instructional strategies to develop students' critical thinking, problem solving, and performance skills.

Standard 5: Classroom Motivation and Management Skills - The teacher understands individual and group motivation and behavior and creates a learning environment that encourages positive social interaction, active engagement in learning, and self-motivation.
Standard 6: Communication Skills- The teacher uses a variety of communication techniques including verbal, nonverbal, and media to foster inquiry, collaboration, and supportive interaction in and beyond the classroom.

Standard 7: Instructional Planning Skills- The teacher plans and prepares instruction based upon knowledge of subject matter, students, the community, and curriculum goals.

Standard 8: Assessment of Student Learning- The teacher understands, uses, and interprets formal and informal assessment strategies to evaluate and advance student performance and to determine program effectiveness.

Standard 9: Professional Commitment and Responsibility- The teacher is a reflective practitioner who demonstrates a commitment to professional standards and is continuously engaged in purposeful mastery of the art and science of teaching.

Standard 10: Partnerships- The teacher interacts in a professional, effective manner with colleagues, parents, and other members of the community to support students' learning and well being.

State Program Approval Rubric for Teacher Preparation Programs

Candidate Performance Relative to the Idaho Standards

The Idaho Standards for Initial Certification provide the framework for the approval of educator preparation programs. As such, the standards set the criteria by which teacher preparation programs are reviewed for state program approval.

The following rubric is used to evaluate the extent to which teacher preparation programs prepare teachers relative to the standards. The rubric is designed to be used with each content-specific preparation program (i.e., Elementary, Special Education, Secondary English, Secondary Science–Biology, etc.).

Consistent with NCATE accreditation standards, the rubric describes three levels of performance (i.e., unacceptable, acceptable, and target) for each of the Idaho Standards for Initial Certification. The rubric shall be used to make holistic judgments. Performance indicators provide the lens through which the State Program Approval Team evaluates the institution’s provided evidence that candidates meet the Idaho standards. The institution is expected to provide information about candidate performance related to the Idaho Standards for Initial Preparation of Professional School Personnel.

Standard 1: Knowledge of Subject Matter -- The teacher understands the central concepts, tools of inquiry, and structures of the content area(s) taught and creates learning experiences that make these aspects of subject matter meaningful for learners.

Knowledge
1. The teacher understands the models of interpersonal communication.
2. The teacher knows the processes of hearing and listening.
3. The teacher knows the nature of conflict and conflict resolution strategies in the speech process.
4. The teacher knows the dynamics of group communication (e.g., roles, functions, systems, developmental stages, and problem solving).
5. The teacher understands rhetorical theories and practices.
6. The teacher understands types of public speaking (e.g., informative, persuasive, and ceremonial).
7. The teacher understands the steps of speech preparation, rehearsal, presentation, and constructive feedback.
8. The teacher understands the necessity of adapting public speaking styles and skills to various media.
9. The teacher understands the principles of competitive debate theory (e.g., categories and styles of debate).
10. The teacher knows the theories and practices of argumentation.
11. The teacher knows the precepts of logical reasoning (e.g., syllogistic, categorical, disjunctive, and fallacies).
12. The teacher knows the various types of competitive speaking events (e.g., impromptu, extemporaneous, oratory, and debate).
13. The teacher knows how to identify and minimize communication anxiety.
1.1 The syllabi for the foundational courses for communication and speech courses were missing. The syllabus for the one course that has students learning to debate in British Parliamentary format seemed adequate. There are too few completers to give this program an acceptable rating.

Performance
1. The teacher instructs in the process of effective interpersonal communication (e.g., effective listening, components of verbal and nonverbal communication, and conflict resolution).
2. The teacher explains the components and dynamics of group communication and provides opportunities for student implementation.
3. The teacher provides opportunities for students to prepare, practice, and present various types of speeches.
4. The teacher provides instruction in presenting for various media.
5. The teacher instructs in the theory, principles, and practices of debate (e.g., argumentation, logical reasoning, and competitive speaking).
6. The teacher provides opportunities for students to participate in debate and speaking events.
7. The teacher explains various methods of organization and their effects on the communication process.
8. The teacher provides strategies for minimizing communication anxiety.

1.2 There are too few completers in this program to give it an acceptable rating. There are six completers who passed the Praxis II test in 2014, and the two student work samples provided by candidates showed acceptable knowledge and performance, but no other pieces of evidence are available to give this program an acceptable rating.

Standard 2: Knowledge of Human Development and Learning- The teacher understands how students learn and develop, and provides opportunities that support their intellectual, social, and personal development.

Standard 3: Modifying Instruction for Individual Needs - The teacher understands how students differ in their approaches to learning and creates instructional opportunities that are adapted to learners with diverse needs.
Standard 4: Multiple Instructional Strategies - The teacher understands and uses a variety of instructional strategies to develop students' critical thinking, problem solving, and performance skills. (Same as core standard)

Standard 5: Classroom Motivation and Management Skills - The teacher understands individual and group motivation and behavior and creates a learning environment that encourages positive social interaction, active engagement in learning, and self-motivation.

Standard 6: Communication Skills - The teacher uses a variety of communication techniques including verbal, nonverbal, and media to foster inquiry, collaboration, and supportive interaction in and beyond the classroom.

Standard 7: Instructional Planning Skills - The teacher plans and prepares instruction based upon knowledge of subject matter, students, the community, and curriculum goals.

Standard 8: Assessment of Student Learning - The teacher understands, uses, and interprets formal and informal assessment strategies to evaluate and advance student performance and to determine program effectiveness.

Standard 9: Professional Commitment and Responsibility - The teacher is a reflective practitioner who demonstrates a commitment to professional standards and is continuously engaged in purposeful mastery of the art and science of teaching.

Standard 10: Partnerships - The teacher interacts in a professional, effective manner with colleagues, parents, and other members of the community to support students' learning and well being.

State Program Approval Rubric for Teacher Preparation Programs

Candidate Performance Relative to the Idaho Standards

The Idaho Standards for Initial Certification provide the framework for the approval of educator preparation programs. As such, the standards/principles set the criteria by which teacher preparation programs are reviewed for state program approval.

The following rubric is used to evaluate the extent to which teacher preparation programs prepare teachers who meet the standards. The rubric is designed to be used with each individual preparation program (i.e., Elementary, Special Education, Secondary English, Secondary Science–Biology, etc.).

Consistent with NCATE accreditation standards, the rubric describes three levels of performance (i.e., unacceptable, acceptable, and target) for each of the Idaho Standards for Initial Certification. The rubric shall be used to make holistic judgments. Performance indicators provide the lens through which the State Program Approval Team evaluates the institution’s evidence that candidates meet the Idaho standards. The institution is expected to provide information about candidate performance related to the Idaho Standards for Elementary Teachers.

Standards 1: Knowledge of Subject Matter - The teacher understands the central concepts, tools of inquiry, and structures of the discipline taught and creates learning experiences that make these aspects of subject matter meaningful for students.

Knowledge
1. The teacher understands concepts of language arts and child development in order to teach reading, writing, speaking, viewing, listening, and thinking skills and to help students successfully apply their developing skills to many different situations, materials, and ideas.
2. The teacher understands how children learn language, the basic sound structure of the English language, semantics and syntactics, diagnostic tools, and test data to improve student reading ability.
3. The teacher understands the fundamental concepts and structures of science including physical, life, and earth and space sciences as well as the applications of science to technology, personal and social perspectives, history, unifying concepts, and inquiry processes scientists use in the discovery of new knowledge.
4. The teacher understands major concepts, procedures, and reasoning processes of mathematics that define number systems and number sense, computation, geometry, measurement, statistics and probability, and algebra in order to foster student understanding and use of patterns, quantities, and spatial relationships that represent phenomena, solve problems, and manage data.
5. The teacher knows the major concepts and modes of inquiry for social studies: the integrated study of history, geography, government/civics, economics, social/cultural and other related
areas to develop students’ abilities to make informed decisions as citizens of a culturally diverse, democratic society and interdependent world.

6. The teacher understands the content, functions, aesthetics, and achievements of the arts, such as dance, music, theater, and visual arts as avenues for communication, inquiry, and insight.

7. The teacher understands the comprehensive nature of students’ physical, intellectual, social, and emotional well-being in order to create opportunities for developing and practicing skills that contribute to healthful living.

8. The teacher understands human movement and physical activities as central elements for active, healthy lifestyles and enhanced quality of life.

9. The teacher understands connections across curricula and within a discipline among concepts, procedures, and applications to motivate students, build understanding, and encourage application of knowledge, skills, and ideas to real life issues and future career applications.

10. The teacher understands the principles and processes of personal skills and group dynamics incorporating respect, caring, honesty, and responsibility that enable students to effectively and appropriately communicate and interact with peers and adults.

<tr>
<td>Subject Matter</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

1.1 The program provides minimal, but acceptable evidence that candidates have adequate knowledge of elementary subject content. The importance of integrated curriculum is not evident and there is little evidence that candidates understand the relationship between inquiry and development of thinking and reasoning. Overall, there is insufficient evidence that this standard has been met.

Performance

1. The teacher models the appropriate and accurate use of language arts.

2. The teacher demonstrates competence in language arts, reading, STEM disciplines, social studies, the arts, health education, and physical education. Through inquiry the teacher facilitates thinking and reasoning.

3. The teacher provides a purpose and context to use the communication skills taught. The teacher integrates these communication skills across the curriculum.

4. The teacher conceptualizes, develops, and implements a balanced curriculum that includes language arts, reading, STEM disciplines, social studies, the arts, health education, and physical education.

5. Using his/her integrated knowledge of the curricula, the teacher motivates students, builds understanding, and encourages application of knowledge, skills, and ideas to real life issues, democratic citizenship, and future career applications.

6. The teacher models respect, integrity, caring, and responsibility in order to promote and nurture a school environment that fosters these qualities.
1.2 Observing candidates, analyzing lesson plans and other candidate performance data, and interviewing university faculty, completers, and current candidates provides minimal evidence that teacher candidates demonstrate an adequate ability to use materials, instructional strategies and/or methods that illustrate and promote relevance and real life application making learning experiences and subject matter meaningful to most students. The program provides adequate evidence that candidates teach using inquiry and exploration.

Standard 2: Knowledge of Human Development and Learning - The teacher understands how students learn and develop, and provides opportunities that support their intellectual, social, and personal development.

**Knowledge**
1. The teacher understands that young children’s and early adolescents’ literacy and language development influence learning and instructional decisions.
2. The teacher understands the cognitive processes of attention, memory, sensory processing, and reasoning, and recognizes the role of inquiry and exploration in developing these abilities.

2.1 Adequate evidence was provided to show that candidates understand how young children and early adolescents learn. The program provides evidence that candidates understand how literacy and language development influence learning and instructional decisions. Minimal evidence was provided to show that candidates understand the role of cognition, inquiry and exploration in learning.

**Performance**
1. The teacher designs instruction and provides opportunities for students to learn through inquiry and exploration.

</tr>
</tbody>
</table>

2.2 Evidence was provided to show that candidates demonstrate adequate knowledge of how young children and early adolescents learn. The program provides minimal evidence, through work samples, that candidates design instruction and provide opportunities for students to learn through inquiry and exploration.

**Standard 3: Modifying Instruction for Individual Needs - The teacher understands how students differ in their approaches to learning and creates instructional opportunities to meet students’ diverse needs and experiences.**

**Knowledge**
1. The teacher understands the necessity of appropriately and effectively collaborating with grade level peers, school intervention teams, parents/guardians, and community partners to meet differentiated needs of all learners.
2. The teacher understands that there are multiple levels of intervention and recognizes the advantages of beginning with the least intrusive.

<table>

</table>

3.1 The program provides evidence that teacher candidates demonstrate an adequate understanding of how students differ in their approaches to learning. Although evidence was minimal showing that candidates possess an understanding of collaborating with other professional peers and student’ parents, interviews and lesson plans indicated a basic understanding of the levels of interventions.

**Performance**
1. The teacher appropriately and effectively collaborates with grade level peers, school intervention teams, parents/guardians, and community partners to meet differentiated needs of all learners.
2. The teacher systematically progresses through the multiple levels of intervention, beginning with the least intrusive.
3.2 The program provides minimal evidence, through work samples and interviews with candidates and completers, that teacher candidates modify instructional opportunities to support students with diverse needs. See notes below.

**Standard 5: Classroom Motivation and Management Skills - The teacher understands individual and group motivation and behavior and creates a learning environment that encourages positive social interaction, active engagement in learning, and self-motivation.**

**Knowledge**
1. The teacher understands the importance of teaching and re-teaching classroom expectations.
2. The teacher recognizes the importance of positive behavioral supports and the need to use multiple levels of intervention to support and develop appropriate behavior.

College/University: **Idaho State University**  Review Dates: **September 20-22, 2015**

5.2 Through works samples, interviews, and candidate evaluations the program provides evidence that teacher candidates are able to create, manage, and modify learning environments to ensure they are safe and productive.

**Recommended Action on the Elementary Education Program:**

- **X** Approved
- _____Approved Conditionally
- _____Not Approved

**Areas for Improvement:**

**Standard 3.2:**

- Although there appear to be opportunities for community partnerships with neighboring communities that have diverse populations, there was little or no evidence provided that these opportunities are being taken advantage of. Though EDUC 2204 and SPED 3350 address diverse populations and have assignments that seem to engage candidates in working with diverse populations, candidate interviews and work samples reveal that the assignments for EDUC 2204 are mostly theoretical. Furthermore, those assignments that are based in the field, according to candidate interviews, rarely involve the type of engagement called for in the syllabus.

- Candidates utilized the lesson plan template that called for the recognition of the population of the class, however, judgmental language was used in the teacher work samples and lesson and unit plans and there was not sufficient evidence that candidates could apply the theory they had learned.
English as a New Language

State Program Approval Rubric for Teacher Preparation Programs

Candidate Performance Relative to the Idaho Standards

The Idaho Standards for Initial Certification provide the framework for the approval of educator preparation programs. As such, the standards set the criteria by which teacher preparation programs are reviewed for state program approval.

The following rubric is used to evaluate the extent to which teacher preparation programs prepare teachers relative to the standards. The rubric is designed to be used with each content-specific preparation program (i.e., Elementary, Special Education, Secondary English, Secondary Science–Biology, etc.).

Consistent with NCATE accreditation standards, the rubric describes three levels of performance (i.e., unacceptable, acceptable, and target) for each of the Idaho Standards for Initial Certification. The rubric shall be used to make holistic judgments. Performance indicators provide the lens through which the State Program Approval Team evaluates the institution’s provided evidence that candidates meet the Idaho standards. The institution is expected to provide information about candidate performance related to the Idaho Standards for Initial Preparation of Professional School Personnel.

Standard 1: Knowledge of Subject Matter - The teacher understands the central concepts, tools of inquiry, and structures of the discipline taught and creates learning experiences that make these aspects of subject matter meaningful for students.

Knowledge
1. The teacher understands the evolution, research, and current federal and state legal mandates of bilingual and ENL education.
2. The teacher understands and knows how to identify differences and the implications for implementation in bilingual and ENL approaches and models.
3. The teacher understands and is able to distinguish between forms, functions, and contextual usage of social and academic language.
4. (Bilingual only) The teacher possesses language proficiency at the advanced level as defined in the ACTFL Proficiency Guidelines in listening, speaking, reading and writing in English and the second target language necessary to facilitate learning in the content area(s) (Federal Requirement).
5. (ENL only) The teacher possesses the language proficiency at the advanced level as defined in the ACTFL Proficiency Guidelines in listening, speaking, reading, and writing, in English necessary to facilitate learning of academic language in the content area(s) (Federal Requirement).
6. (Bilingual only) The teacher understands the articulatory system, various registers, dialects, linguistic structures, vocabulary, and idioms of both English and the second target language.
7. (ENL only) The teacher understands the articulatory system, various registers, dialects, linguistic structures, vocabulary, and idioms of the English language.
1.1 Due to the syllabus and assignment guidelines evidence evaluated, particularly evidence submitted by ENL methods course, teacher candidates demonstrate adequate knowledge of understanding subject matter. High percentages of passing scores on the ESOL Praxis II test demonstrate that candidates are highly knowledgeable in the subject matter.

**Performance**
1. (Bilingual only) The teacher is articulate in key linguistic structures and exposes students to the various registers, dialects, and idioms of English and the second target language.
2. (ENL only) The teacher is articulate in key linguistic structures and exposes students to the various registers, dialects, and idioms of the English language.
3. The teacher uses knowledge of language and content standards and language acquisition theory content areas to establish goals, design curricula and instruction, and facilitate student learning in a manner that builds on students’ linguistic and cultural diversity.
4. The teacher demonstrates instructional strategies that an understanding of the variety of purposes that languages serve, distinguish between forms, functions, and contextual usage of social and academic language.
5. The teacher designs and implements activities that promote inter-cultural exploration, engaged observation, listening, speaking, reading, and writing.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.1 Knowledge Understanding Subject Matter</td>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

1.2 Due to lack of completers and/or current candidates there is little or no evidence that teacher candidates demonstrate an adequate ability to make subject matter meaningful.

**Standard 2: Knowledge of Human Development and Learning -** The teacher understands how students learn and develop, and provides opportunities that support their intellectual, social, and personal development.

**Knowledge**
1. The teacher understands the processes of language acquisition and development, and the role that culture plays in students’ educational experiences.
2. The teacher understands the advantages of bilingualism, biliteracy, and multiculturalism.
2.1 Due to the syllabus and assignment guideline evidence evaluated, particularly evidence submitted by ENL methods courses, teacher candidates demonstrate an adequate knowledge of understanding subject matter. High percentages of passing scores on the ESOL Praxis II test demonstrate that candidates are highly knowledgeable in how students learn and develop the process of second language acquisition, and the advantages of bilingualism and biliteracy.

Performance
1. The teacher plans and delivers instruction using knowledge of the role of language and culture in intellectual, social, and personal development.
2. The teacher integrates language and content instruction appropriate to the students’ stages of language acquisition.
3. The teacher facilitates students’ use of their primary language as a resource to promote academic learning and further development of the second language.
4. The teacher uses effective strategies and approaches that promote bilingualism, biliteracy, and multiculturalism.

2.2 Due to lack of completers and/or current candidates there is little or no evidence that teacher candidates demonstrate an adequate ability to make subject matter meaningful.

Standard 3: Modifying Instruction for Individual Needs- The teacher understands how students differ in their approaches to learning and creates instructional opportunities that are adapted to learners with diverse needs.

Knowledge
1. The teacher understands the nuances of culture in structuring academic experiences.
2. The teacher understands how a student’s first language may influence second language production (ex: accent, code-switching, inflectional endings).
3. The teacher understands there is a distinction between learning disabilities/giftedness and second language development.
4. The teacher understands how and when to provide appropriate accommodations that allow students to access academic content.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>3.1 Knowledge Understanding How Students Differ in Their Approaches to Learning</td>
<td></td>
<td>X</td>
<td></td>
</tr>
</tbody>
</table>

3.1 The program provides evidence from course syllabi and assignment guidelines and rubrics that teacher candidates demonstrate adequate knowledge of how students differ in their approaches to learning. One item of concern should be noted. A required course SPED 3350: titled Creating Inclusive Classrooms, includes attention to English Language Learners. The course syllabus supports that content specific to this standard is evident. However, speaking to a current candidate about this, she stated that she was uncomfortable with the two (special education and English language learning) being taught together and that she understands they are different and English language learners should not be considered special education. The concern here is that English Language Learners, despite the title of the course, should not be included in a special education course. Each of these topics ought to merit their own course, and in lumping them together, an inadvertent message could be sent that English Language Learners should be considered special education students.

Performance
1. The teacher promotes respect for diverse cultures by facilitating open discussion, treating all students equitably, and addressing individual student needs.
2. The teacher utilizes strategies that advance accuracy in students’ language production and socio-culturally appropriate usage with an understanding of how these are influenced by the first language.
3. The teacher collaborates with other area specialists to distinguishes between issues of learning disabilities/giftedness and second language development.
4. The teacher provides appropriate accommodations that allow students to access academic content.

<table>

<td></td>
<td>X</td>
<td></td>
</tr>
</tbody>
</table>

3.2 Due to lack of completers and/or current candidates there is little or no evidence that teacher candidates demonstrate an adequate ability to make subject matter meaningful.
Standard 4: Multiple Instructional Strategies- The teacher understands and uses a variety of instructional strategies to develop students' critical thinking, problem solving, and performance skills.

**Knowledge**
1. The teacher knows how to adapt lessons, textbooks, and other instructional materials, to be culturally and linguistically appropriate to facilitate linguistic and academic growth of language learners.
2. The teacher has a repertoire of effective strategies that promote students’ critical thinking and problem solving at all stages of language development.

<table>

<td></td>
</tr>
</tbody>
</table>

4.1 Due to syllabi, course assessments, and assignment/assessment guidelines evaluated, the program provides evidence that teacher candidates demonstrate adequate knowledge of using a variety of instructional strategies. Performance evidence submitted and candidate interviews confirm that this content knowledge is being covered in ENL methods coursework and practicum.

**Performance**
1. The teacher selects, adapts, creates and uses varied culturally and linguistically appropriate resources related to content areas and second language development.
2. The teacher employs a repertoire of effective strategies that promote students’ critical thinking and problem solving at all stages of language development.

<table>

5.2 Due to lack of completers and/or current candidates there is little or no evidence that teacher candidates demonstrate an adequate ability to make subject matter meaningful.

Standard 6: Communication Skills - The teacher uses a variety of communication techniques to foster inquiry, collaboration, and supportive interaction in and beyond the classroom.

Knowledge
1. The teacher understands that language is a system that uses listening, speaking, reading, and writing for social and academic purposes.
2. The teacher understands how to design active and interactive activities that promote proficiency in the four domains of language.

3. The teacher understands the extent of time and effort required for language acquisition.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>6.1 Knowledge Understanding of a Variety of Communication Techniques</td>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

6.1 The program provides little or no evidence that teacher candidates demonstrate an adequate understanding or the use of a variety of communication techniques. High percentages of passing scores on the ESOL Praxis II demonstrate that candidates are knowledgeable in communication to foster in inquiry collaboration, and supportive interaction in and beyond the classroom. There is evidence to support this area in assignment guidelines evidence, but not in sufficient quantity to justify an acceptable rating.

**Performance**

1. The teacher demonstrates competence in facilitating students’ acquisition and use of language in listening, speaking, reading, and writing for social and academic purposes.

2. The teacher uses active and interactive activities that promote proficiency in the four domains of language.

3. The teacher communicates to students, their families, and stakeholders the extent of time and effort required for language acquisition.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>6.2 Performance Using a Variety of Communication Techniques</td>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

6.2 Due to lack of completers and/or current candidates there is little or no evidence that teacher candidates demonstrate an adequate ability to make subject matter meaningful.

**Standard 7: Instructional Planning Skills - The teacher plans and prepares instruction based on knowledge of subject matter, students, the community, and curriculum goals.**

**Knowledge**

1. The teacher understands how to incorporate students’ diverse cultural backgrounds and language proficiency levels into instructional planning that aligns with the English Language Development Standards.
7.1 Due to the evidence evaluated, particularly evidence submitted by ENL methods courses/practicum, teacher candidates demonstrate adequate knowledge of understanding how to prepare and plan instruction that both incorporate diverse cultural backgrounds and language demands for varying levels of English language proficiency. Interviews supported the level of preparedness candidates felt in being confident in planning and preparing instruction for students.

**Performance**
1. The teacher creates and delivers lessons that incorporate students’ diverse cultural backgrounds and language proficiency levels into instructional planning that aligns with the English Language Development Standards.

7.2 Due to lack of completers and/or current candidates there is little or no evidence that teacher candidates demonstrate an adequate ability to make subject matter meaningful.

*Standard 8: Assessment of Student Learning - The teacher understands, uses, and interprets formal and informal assessment strategies to evaluate and advance student performance and to determine program effectiveness.*

**Knowledge**
1. The teacher understands variations in assessment of student progress that may be related to cultural and linguistic differences.
2. (Bilingual only) The teacher understands how to measure students’ level of English language proficiency and second target language proficiency.
3. (ENL only) The teacher understands how to measure the level of English language proficiency.
4. The teacher understands the relationship and difference between levels of language proficiency and students’ academic achievement.
5. The teacher is familiar with the state English language proficiency assessment.
6. The teacher knows how to interpret data and explain the results of standardized assessments to students with limited English proficiency, the students’ families, and to colleagues.
7. The teacher understands appropriate accommodations for language learners being tested in the content areas.
8. The teacher understands how to use data to make informed decisions about program effectiveness.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>8.1 Knowledge Assessment of Student Learning</td>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

8.1 The program provides little or no evidence that teacher candidates demonstrate an adequate understanding of assessment of student learning. High percentages of passing scores on the ESOL Praxis II demonstrate that candidates have knowledge of assessment specific to English language learners and English language proficiency. Candidate interviews support that there is an overall general need in the area of both formal and informal assessment. It is noted by the reviews that the state is in the initial adoption of a new ELPA and therefore has not allowed sufficient time for this content to be embedded in course content.

**Performance**
1. The teacher selects and administers assessments suited to the students’ culture, literacy and communication skills.
2. The teacher uses a combination of observation and other assessments to make decisions about appropriate program services for language learners.
3. The teacher uses a combination of assessments that measure language proficiency and content knowledge respectively to determine how level of language proficiency may affect the demonstration of academic performance.
4. The teacher uses appropriate accommodations for language learners being tested in the content areas.
5. The teacher uses data to make informed decisions about program effectiveness.

10.1 The program provides syllabi and curriculum guide evidence that teacher candidates demonstrate an adequate knowledge of how to interact in a professional, effective manner. Overwhelmingly, student interviews supported that the knowledge gained in the “EDUC 2204 Families, Communities, Cultures” course is a highlight in their educator preparation.

Performance
1. The teacher creates family and community partnerships that promote students’ linguistic, academic, and social development.
2. The teacher collaborates with colleagues to promote opportunities for language learners.
3. The teacher assists other educators and students in promoting cultural respect and validation of students’ and families’ diverse backgrounds and experiences.

Recommended Action on English as a New Language:

_____ Approved
_____ Approved Conditionally
X Not Approved
Areas for Improvement:

As Idaho joins the WIDA consortium and adopts the W-APT and ACCESS 2.0 this may provide an ideal time for the design and implementation of a standalone ELL instruction and assessment course. Considering that ELLs are the fastest growing special population of students, it might be beneficial to separate ELL out of the special education course and design a general education course, for all candidates’ preparation, covering multiple components of lesson design, delivery, modification, assessment, ELL legislation (state and federal), as well as cultural competence. All of these are crucial in the education of ELLs that candidates are bound to encounter regardless of a general education, content area, or specialist placement in a school.

It is evident that the ENL methods courses are well designed, implemented, and received by candidates. Conversely, it is not evident how the other course requirements for an ENL credential connect or that they are as thoughtful and intentional. Unfortunately, a few great methods courses don’t constitute an approved program.
English Language Arts

State Program Approval Rubric for Teacher Preparation Programs

Candidate Performance Relative to the Idaho Standards

The Idaho Standards for Initial Certification provide the framework for the approval of educator preparation programs. As such, the standards set the criteria by which teacher preparation programs are reviewed for state program approval.

The following rubric is used to evaluate the extent to which teacher preparation programs prepare teachers relative to the standards. The rubric is designed to be used with each content-specific preparation program (i.e., Elementary, Special Education, Secondary English, Secondary Science–Biology, etc.).

Consistent with NCATE accreditation standards, the rubric describes three levels of performance (i.e., unacceptable, acceptable, and target) for each of the Idaho Standards for Initial Certification. The rubric shall be used to make holistic judgments. Performance indicators provide the lens through which the State Program Approval Team evaluates the institution’s provided evidence that candidates meet the Idaho standards. The institution is expected to provide information about candidate performance related to the Idaho Standards for Initial Preparation of Professional School Personnel.

Standard 1: Knowledge of Subject Matter - The teacher understands the central concepts, tools of inquiry, and structures of the disciplines and creates learning experiences that make these aspects of subject matter meaningful for students.

Knowledge
1. The teacher understands that reading, writing, speaking, listening, viewing, and language study are interrelated.
2. The teacher understands the elements of effective writing such as audience, purpose, organization, development, voice, coherence, emphasis, unity, and style.
3. The teacher understands the conventions of standard written language, i.e., grammar, punctuation, capitalization, and spelling.
4. The teacher understands a variety of literary and nonliterary forms (e.g., novels, plays, poetry, essays, technical writing, and film).
5. The teacher understands how literature functions as artistic expression and as a reflection of human experience.
6. The teacher understands the nature and conventions of multicultural literatures, literary devices, and methods of literary analysis and criticism.
7. The teacher understands how culture and history influence literature, literary recognition, and curriculum selections.
8. The teacher understands the social and historical implications of print and nonprint media.
9. The teacher understands the history of the English language.
10. The teacher understands how children learn language, the basic sound structure of the English language, semantics, syntax, and usage.
11. The teacher understands reading as a developmental process.
12. The teacher knows that writing is an act of discovery and a form of inquiry, reflection, and expression.
13. The teacher understands that composition is a recursive process that includes brainstorming, drafting, revising, editing for correctness and clarity, and publishing; that the process will vary with the individual and the situation; and that learning to write is a developmental process.
14. The teacher recognizes the student’s need for authentic purposes, audiences, and forms of writing.
15. The teacher understands the appropriate selection, evaluation, and use of primary and secondary sources in research processes.

<td></td>
<td></td>
</tr>
<tr>
<td>Subject Matter</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

1.1 The knowledge provided by the English Content courses is minimal or non-existent for preparing candidates for the knowledge needed to be secondary teachers in public schools. Of the 15 standards listed above, a survey of syllabi only showed instruction dealing with standards 4-9. The standards require candidates to be prepared in reading, writing, speaking, listening, viewing, and language study, but the syllabi for the English Content are heavily based in literature only. In interviews with candidates and cooperating teachers, the same knowledge gap was identified. Elementary education candidates with an emphasis in English felt more prepared than those in the secondary education program. The candidates and the cooperating teacher all said that grammar, writing, and assessment instruction, and methods for teaching those subjects were not taught at the university, but rather were learned in the field while student teaching or while working as a first-year teacher.

Performance
1. The teacher uses skills and knowledge congruent with current research on best practices for teaching reading and writing.
2. The teacher integrates reading, writing, speaking, listening, viewing, and language study.
3. The teacher builds a reading, writing, listening, speaking, and viewing community in which students respond, interpret, and think critically.
4. The teacher instructs student on the conventions of standard written language, i.e., grammar, punctuation, capitalization, and spelling.
5. The teacher reviews, interprets, evaluates, and selects content presented by print and nonprint media and models these processes for students.
6. The teacher integrates information from traditional, technical, and electronic sources for critical analysis and evaluation by students.
7. The teacher helps students with their understanding of a variety of literary and nonliterary forms and genres.
College/University: [Idaho State University] Review Dates: [September 20-22, 2015]

8. The teacher presents social, cultural, and historical significance of a variety of texts and connects these to students’ experiences.

9. The teacher demonstrates the writing process as a recursive and developmental process.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.2 Performance Making Subject Matter Meaningful</td>
<td></td>
<td>X</td>
<td></td>
</tr>
</tbody>
</table>

1.2 In spite of having huge gaps in content knowledge courses teaching writing and language study, for the most part, the student work samples showed minimally acceptable levels of competency in teaching literature, though the writing included in the candidates’ samples often contained glaring grammatical errors, indicating candidates themselves may not feel confident in their own grammatical and writing abilities. In observing a candidate doing student teaching, the candidate was able to engage her students in reading, writing, and class discussion, which utilized speaking and listening standards. In the past two years, fifteen students have taken and passed the Praxis II test for the English Content area. Most of the performance standards listed are shown in student work samples, though writing and language study standards are not usually demonstrated.

**Standard 2: Knowledge of Human Development and Learning - The teacher understands how students learn and develop, and provides opportunities that support their intellectual, social, and personal development.**

**Knowledge**

1. The teacher understands the processes, developmental stages, and diverse ways of learning reading, writing, listening, viewing, and speaking.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>2.1 Knowledge Understanding Human Development and Learning</td>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

2.1 The student work samples show some understanding of the developmental processes of adolescents, but no course content syllabi, assignments, or observation data indicate how or where this knowledge is being taught to the candidates.

**Performance**

1. The teacher identifies levels of development in reading, writing, listening, viewing, and speaking and plans for developmental stages and diverse ways of learning.

2. The teacher promotes and monitors growth in reading, writing, listening, viewing, and speaking for all ability levels.
2.2 Observing language arts teacher candidates, analyzing student teacher work samples and interviewing candidates and a cooperating teacher show levels of development in reading and teaching literature, but evidence showing development levels in writing and speaking levels for all ability levels and diverse ways of learning for students is not evident.

**Standard 4: Multiple Instructional Strategies -** The teacher understands and uses a variety of instructional strategies to develop students’ critical thinking, problem solving, and performance skills.

**Knowledge**
1. The teacher knows a variety of classroom strategies for improving fluency, comprehension, and critical thinking (e.g., strategies for discussion, peer editing, critical analysis and interpretation, inquiry, oral presentations, SSR, and brainstorming).
2. The teacher understands reading comprehension strategies (e.g., organizing information, visualizing, making connections, using context clues, building background knowledge, predicting, paraphrasing, summarizing, questioning, drawing conclusions, synthesizing, and making inferences) for enabling students with a range of abilities to understand, respond to, and interpret what they read.
3. The teacher is familiar with a variety of strategies for promoting student growth in writing.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>4.1 Knowledge Understanding of Multiple Instructional Strategies</td>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

4.1 Course content syllabi do not show any instruction for classroom strategies for improving reading comprehension or fluency. Interviews with candidates showed that instructors at the university level focus mostly on the nuances of literature and the history of a literary time period, but not on teaching strategies for understanding that can be used in the classroom. The English methods course focused only on writing three unit plans for literature that were graded. Though three books about grammar instruction and writing were required reading for the course, there was no accountability piece to show that the material had been mastered by the candidates. Student lesson plans in work samples are uneven in their presentation of strategies to use with students, and the strategies utilized are often provided by the cooperating teacher rather than having the candidate utilizing knowledge acquired from the university course work. Elementary education candidates
with an emphasis in English expressed more knowledge of multiple classroom instructional strategies than candidates in the secondary education program with a major in English.

**Performance**
1. The teacher effectively uses comprehension strategies.
2. The teacher incorporates a variety of analytical and theoretical approaches in teaching literature and composition.
3. The teacher monitors and adjusts strategies in response to individual literacy levels.
4. The teacher creates logical sequences for reading, writing, speaking, listening, viewing, and language study.
5. The teacher uses students’ creations and responses as part of the instructional program.
6. The teacher builds a reading, writing, listening, speaking, and viewing community in which students respond, interpret, and think critically (e.g., engages students in discussion, inquiry, and evaluation).
7. The teacher enriches and expands the students’ language resources for adapting to diverse social, cultural, and workplace settings.
8. The teacher provides opportunities for students to create authentic responses to cultural, societal, and workplace experiences.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>4.2 Performance Application of Multiple Instructional Strategies</td>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

4.2 The evidence for candidates demonstrating multiple instructional strategies is uneven. Candidate interviews with elementary education with an emphasis in English expressed more experience in using instructional strategies in their early course work. Secondary English education candidates expressed a lack of ability and knowledge to implement multiple instructional strategies. The student work samples were also uneven in demonstrating use of multiple instructional strategies, and were often employing strategies suggested by the cooperating teachers.

**Knowledge**
1. The teacher knows methods of assessing students’ written and oral communication skills and reading performance (e.g., holistic, analytic, and primary trait scoring; portfolios of student work; projects; student self-assessment; peer assessment; journals; rubrics; reading response logs; reading inventories; reflective and formal writing; student/teacher-developed guidelines; exhibitions; oral and dramatic presentations; and the Idaho State Direct Writing Assessment).

<tr>
<td>8.1 Knowledge Assessment of Student Learning</td>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
8.1 No evidence of assessment methodology, as listed in the standards, was found in syllabi of content courses. Interviews with candidates and cooperating teachers expressed a lack of knowledge in this area.

**Performance**

1. The teacher constructs and uses a variety of formal and informal assessments for reading, writing, speaking, listening, and viewing.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>8.2 Performance Using and Interpreting Program and Student Assessment Strategies</td>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

8.2 Student work samples show minimal use of assessment, but utilizing assessment to inform instruction is distinctly absent, and there were no other lines of evidence regarding assessment to consider.

**Standard 9: Professional Commitment and Responsibility - The teacher is a reflective practitioner who demonstrates a commitment to professional standards and is continuously engaged in purposeful mastery of the art and science of teaching.**

**Performance**

1. The teacher engages in reading and writing for professional growth and satisfaction.
2. The teacher stimulates student enthusiasm for and appreciation of literature, writing, language, and literacy.

<table>
<thead>
<tr>
<th>Element</th>

<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>9.2 Performance Developing in the Art and Science of Teaching</td>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

9.2 There was little or no evidence showing the candidates’ ability to develop in the art and science of teaching. It was not observable from the candidate interviews, course syllabi, student work samples, or candidate observations.
Recommended Action on English Language Arts:

- _____ Approved
- _____ Approved Conditionally
- X____ Not Approved

Areas for Improvement:

The coursework for the English Language Arts Certification must be revamped to include ALL areas of English Language Arts including, reading, writing, including grammar, speaking, listening, and viewing. At this point the only area that is thoroughly covered is the reading of literature. Additional consideration needs to be given to the assessment and multiple instructional strategies standards in order to adequately prepare future English Language Arts teachers.
Health

State Program Approval Rubric for Teacher Preparation Programs

Candidate Performance Relative to the Idaho Standards

The Idaho Standards for Initial Certification provide the framework for the approval of educator preparation programs. As such, the standards set the criteria by which teacher preparation programs are reviewed for state program approval.

The following rubric is used to evaluate the extent to which teacher preparation programs prepare teachers relative to the standards. The rubric is designed to be used with each content-specific preparation program (i.e., Elementary, Special Education, Secondary English, Secondary Science–Biology, etc.).

Consistent with NCATE accreditation standards, the rubric describes three levels of performance (i.e., unacceptable, acceptable, and target) for each of the Idaho Standards for Initial Certification. The rubric shall be used to make holistic judgments. Performance indicators provide the lens through which the State Program Approval Team evaluates the institution’s provided evidence that candidates meet the Idaho standards. The institution is expected to provide information about candidate performance related to the Idaho Standards for Initial Preparation of Professional School Personnel.

Standard 1: Knowledge of Subject Matter - The teacher understands the central concepts, tools of inquiry, and structures of the discipline taught and creates learning experiences that make these aspects of subject matter meaningful for students.

Knowledge
1. The teacher understands the following content areas of health: fitness and personal health; health promotion and disease prevention; prevention and care of injuries; mental and emotional health; alcohol, tobacco, and other drugs; nutrition; relationships; growth, development, and family health; consumer health; health literacy; and community and environmental health.
2. The teacher understands the following health risk behaviors: tobacco, alcohol, and other drug use; sexual behaviors that result in human immunodeficiency virus (HIV) infection, other sexually transmitted diseases (STDs), and unplanned pregnancies; poor dietary behaviors; lack of or excessive physical activity; and behaviors that result in intentional injury.
3. The teacher understands the relationship between health education content areas and youth risk behaviors.
4. The teacher understands the concepts and components of coordinated school health, an approach where partnerships are developed within the school and community (components of coordinated school health: school environment, health education, school meals and nutrition, physical education, health services, counseling and mental health services, staff wellness, and parent/community partnerships).
5. The teacher understands that health is multidimensional (e.g., physical, intellectual, emotional, social, cultural, spiritual, and environmental).
### Element: Knowledge

1.1 Course syllabi, learning plan rubrics, Praxis II scores, candidate and completer interviews, and candidate lesson plans provide evidence that teacher candidates demonstrate adequate understanding of health education; the importance of engaging students in identification of health risk behaviors; and the ability to describe for students the ways new knowledge in a content area is applied.

1.2 Candidate lesson plans, student teacher portfolio, faculty observations, Praxis II scores, and interviews provide evidence that teacher candidates are prepared to adequately instruct the students about health-enhancing behaviors, recognize the importance of modeling health-enhancing behaviors, and create learning environments that respect and are sensitive to controversial health issues.

**Standard 5: Classroom Motivation and Management Skills** - The teacher understands individual and group motivation and behavior and creates a learning environment that encourages positive social interaction, active engagement in learning, and self-motivation.

**Knowledge**

1. The teacher understands developmentally appropriate practices that motivate students to participate in health-enhancing behaviors.
2. The teacher knows strategies and techniques that develop positive health behavior changes in students.
5.1 Course syllabi, interviews with completers and candidates, candidate lesson plans, Praxis II scores, and instructor feedback provide evidence that teacher candidates demonstrate adequate understanding of the principles of and strategies for motivating students to participate in physical activity and other health-enhancing behaviors, and classroom management for safe physical activity and health-enhancing behaviors.

**Performance**
1. The teacher motivates students to participate in positive health-enhancing behaviors inside and outside the school setting.
2. The teacher helps students learn and use personal and social behaviors that promote positive relationships (e.g., avoiding abusive relationships, using refusal skills, setting life goals, and making healthy decisions).

5.2 Lesson plans, candidate and completer interviews, university supervisor feedback/rubrics, and Praxis II scores provide adequate evidence that teacher candidates demonstrate an adequate ability to introduce, manage, and promote, health-enhancing behaviors related to personal and social choices.

**Standard 6: Communication Skills** - The teacher uses a variety of communication techniques to foster inquiry, collaboration, and supportive interaction in and beyond the classroom.

**Knowledge**
1. The teacher understands student jargon and slang associated with high-risk behaviors.
6.1 Course syllabi, candidate and completer interviews, student teacher interview, lesson plans and instructor feedback provide evidence that teacher candidates demonstrate an adequate understanding of how to model and use communication skills appropriate to the target audience and understand the terminology and slang associated with high-risk behaviors.

**Performance**
1. The teacher identifies and defines student jargon and slang associated with high-risk behaviors and translates these terms into terms appropriate to the educational setting.
2. The teacher facilitates responsible decision making, goal setting, and alternatives to high-risk behaviors that enhance health.
3. The teacher creates a respectful learning environment that is sensitive to controversial health issues.
4. The teacher applies techniques that aid in addressing sensitive issues (e.g., ground rules, question boxes, open-ended questions, and establishment of appropriate confidentiality).
5. The teacher demonstrates the ability to use interpersonal communication skills to enhance health.

6.2 Candidate lesson plans and work samples, candidate/student teacher/completer interviews, instructor feedback and student work provide evidence that teacher candidates demonstrate an adequate ability to create safe and sensitive learning experiences that promote student input, communication, and listening skills which facilitate responsible decision making and alternatives to high-risk behavior.

**Standard 7: Instructional Planning Skills** - The teacher plans and prepares instruction based on knowledge of subject matter, students, the community, and curriculum goals.

**Knowledge**
1. The teacher understands the differing community health values and practices.
2. The teacher understands how to access valid, appropriate health information and health-promoting products and services.
3. The teacher understands the influence of culture, media, technology, and other factors on health.
7.1 Course syllabi, lesson plan rubrics and templates, candidate lesson plans, and completer and candidate interviews provide evidence that teacher candidates demonstrate an adequate understanding of how to plan and prepare instruction based on knowledge, health education, students, the community, and curriculum goals.

**Performance**
1. The teacher modifies instruction to reflect current health-related research and local health policies.
2. The teacher accesses valid, appropriate health information and health-promoting products and services.
3. The teacher analyzes the influence of culture, media, technology, and other factors on health.

7.2 Candidate lesson plans, candidate interviews, faculty and university supervisor evaluations, and candidate produced demographic analysis of students provide evidence that teacher candidates demonstrate an adequate ability to plan and implement instruction reflective of current health research, trends, and local health policies compatible with community values and acceptable practices.

**Standard 9: Professional Commitment and Responsibility - The teacher is a reflective practitioner who demonstrates a commitment to professional standards and is continuously engaged in purposeful mastery of the art and science of teaching.**

**Knowledge**
1. The teacher knows the laws and codes specific to health education and health services to minors.
9.1 Course syllabi, candidate interviews, Praxis II scores and candidate self-reflections provide evidence that teacher candidates demonstrate an adequate understanding of laws and codes specific to health education and health services to minors.

**Performance**

1. The teacher uses appropriate intervention following the identification, disclosure, or suspicion of student involvement in a high-risk behavior.

9.2 Candidate lesson plans, candidate assessment data analysis, candidate instructional goals, instructor feedback/observation, and candidate self-reflections provide evidence that teacher candidates demonstrate an adequate ability to engage in appropriate intervention following the identification or disclosure of information of a sensitive nature and/or student involvement in a high-risk behavior.

**Standard 10: Partnerships** - The teacher interacts in a professional, effective manner with colleagues, parents, and other members of the community to support students’ learning and well-being.

**Knowledge**

1. The teacher understands methods of advocating for personal, family, and community health (e.g. letters to editor, community service projects, health fairs, and health races/walks).
Element | Unacceptable | Acceptable | Target
--- | --- | --- | ---
10.1 Knowledge Interacting Professionally and Effectively with Colleagues, Parents, and Community in Partnerships |  | X |  

10.1 Praxis II scores, candidate interviews, faculty interviews and course syllabi provide evidence that teacher candidates understand methods of how to advocate for personal, family, and community health (e.g. letters to editor, community service projects, health fairs, and health races/walks).

**Performance**

1. The teacher demonstrates the ability to advocate for personal, family, and community health.
2. The teacher works collaboratively to assess resources and advocate for a coordinated school health education program.

State Program Approval Rubric for Teacher Preparation Programs

Candidate Performance Relative to the Idaho Standards

The Idaho Standards for Initial Certification provide the framework for the approval of educator preparation programs. As such, the standards set the criteria by which teacher preparation programs are reviewed for state program approval.

The following rubric is used to evaluate the extent to which teacher preparation programs prepare teachers relative to the standards. The rubric is designed to be used with each content-specific preparation program (i.e., Elementary, Special Education, Secondary English, Secondary Science–Biology, etc.).

Consistent with NCATE accreditation standards, the rubric describes three levels of performance (i.e., unacceptable, acceptable, and target) for each of the Idaho Standards for Initial Certification. The rubric shall be used to make holistic judgments. Performance indicators provide the lens through which the State Program Approval Team evaluates the institution’s provided evidence that candidates meet the Idaho standards. The institution is expected to provide information about candidate performance related to the Idaho Standards for Initial Preparation of Professional School Personnel.

Standard 1: Knowledge of Subject Matter - The teacher understands the central concepts, tools of inquiry, and structures of mathematics and creates learning experiences that make these aspects of mathematics meaningful for students.

Knowledge
1. The teacher knows a variety of problem-solving approaches for investigating and understanding mathematics.
2. The teacher understands concepts of algebra.
3. The teacher understands the major concepts of geometry (Euclidean and non-Euclidean) and trigonometry.
4. The teacher understands basic concepts of number theory and number systems.
5. The teacher understands concepts of measurement.
6. The teacher understands the concepts of limit, continuity, differentiation, integration, and the techniques and application of calculus.
7. The teacher understands the techniques and applications of statistics, data analysis, and probability (e.g., random variable and distribution functions).
8. The teacher knows how to effectively evaluate the legitimacy of alternative algorithms.
9. The teacher understands the historical and cultural significance of mathematics and the changing way individuals learn, teach, and do mathematics.
1.1 Interviews with teachers and candidates, Praxis II scores, and work samples provide minimal or no evidence that teacher candidates demonstrate adequate understanding of subject matter and structure of the discipline related to teaching and learning with regards to a variety of problem-solving approaches for investigating and understanding mathematics, evaluation of legitimate alternative algorithms, or the changing way individuals learn, teach, and do mathematics. It was noted syllabi contained course descriptions and referenced Idaho standards; however, several course syllabi were unavailable or provided incomplete course outline.

Performance
1. The teacher incorporates the historical perspective and current development of mathematics in teaching students.
2. The teacher applies appropriate and correct mathematical concepts in creating learning experiences.

1.2 Interviews, lesson plans and work samples provide minimal evidence that teacher candidates demonstrate an adequate ability to create meaningful learning experiences including multiply problem-solving approaches for investigating and understanding mathematics as delineated in the Idaho Standards for Mathematics Teachers.

Standard 2: Knowledge of Human Development and Learning - The teacher understands how students learn and develop, and provides opportunities that support their intellectual, social, and personal development.

Knowledge
1. The teacher knows how to make use of students’ mathematical development, knowledge, understandings, interests, and experiences.
2. The teacher knows how to plan learning activities that respect and value students’ ideas, ways of thinking, and mathematical dispositions.
2.1 The program provides evidence that teacher candidates demonstrate an adequate understanding of human development and learning as delineated by the knowledge indicators in the Idaho Standards for Mathematics Teachers; however, interviews with teachers and candidates expressed the clear need for secondary mathematics methods courses to better understand the mathematical development for secondary students.

**Performance**
1. The teacher encourages students to make connections and develop a cohesive framework for mathematical ideas.
2. The teacher plans and delivers learning activities that respect and value students’ ideas, ways of thinking, and promote positive mathematical dispositions.

2.2 The program provide evidence that teacher candidates demonstrate an adequate understanding of human development and learning as delineated by the performance indicators in the Idaho Standards for Mathematics Teachers; however, interviews with teachers and candidates expressed clear need for secondary mathematics methods courses to further develop knowledge of mathematical development.

**Standard 3: Modifying Instruction for Individual Needs** - The teacher understands how students differ in their approaches to learning and creates instructional opportunities that are modified for students with diverse needs.

**Knowledge**
1. The teacher knows how to create tasks at a variety of levels of mathematical development, knowledge, understanding, and experience.
3.1 Interviews with candidates, lesson plans, and reflections provide evidence that teacher candidates demonstrate an adequate understanding of individual learning needs as delineated by the knowledge indicators in the Idaho Standards for Mathematics Teachers.

Performance
1. The teacher assists students in learning sound and significant mathematics and in developing a positive disposition toward mathematics by adapting and changing activities as needed.

3.2 Interviews with candidates, lesson plans, and reflections provide evidence that teacher candidates demonstrate an adequate ability to modify instruction for individual learning needs as delineated by the performance indicators in the Idaho Standards for Mathematics Teachers.

Standard 4: Multiple Instructional Strategies - The teacher understands and uses a variety of instructional strategies to develop students’ critical thinking, problem solving, and performance skills.

Knowledge
1. The teacher knows how to formulate or access tasks that elicit students’ use of mathematical reasoning and problem-solving strategies.
2. The teacher knows a variety of instructional strategies for investigating and understanding mathematics including problem solving approaches.
3. The teacher understands the role of axiomatic systems and proofs in different branches of mathematics as it relates to reasoning and problem solving.
4. The teacher knows how to frame mathematical questions and conjectures.
5. The teacher knows how to make mathematical language meaningful to students.
6. The teacher understands inquiry-based learning in mathematics.
7. The teacher knows how to communicate concepts through the use of mathematical representations (e.g., symbolic, numeric, graphic, verbal, and concrete models).
8. The teacher understands the appropriate use of technology in teaching and learning of mathematics (e.g., graphing calculators, dynamic geometry software, and statistical software)

</table>
4.1 The program provides minimal or no evidence that teacher candidates demonstrate an adequate understanding of a variety of mathematical instructional strategies as delineated by the knowledge indicators in the Idaho Standards for Mathematics Teachers. Distinctly missing was information regarding knowledge of inquiry based learning, as well as utilizing and developing students’ use of mathematical reasoning. Interviews, lesson plans and work samples demonstrated limited understanding as it applied to secondary mathematics. Teachers and candidates expressed the need for a secondary mathematics methods course and assessment course.

**Performance**

1. The teacher formulates or accesses tasks that elicit students’ use of mathematical reasoning and problem-solving strategies.
2. The teacher uses a variety of instructional strategies to support students in investigating and understanding mathematics, including problem solving approaches.
3. The teacher uses and involves students in both formal proofs and intuitive, informal exploration.
4. The teacher uses a variety of instructional strategies to develop students’ use of standard mathematical terms, notations, and symbols.
5. The teacher uses and encourages the students to use a variety of representations to communicate mathematically.
6. The teacher engages students in mathematical discourse by encouraging them to make conjectures, justify hypotheses and processes, and use appropriate mathematical representations.
7. The teacher uses and involves students in appropriate use of technology to develop students’ understanding (e.g., graphing calculators, dynamic geometry software, and statistical software).

<table>

<td>X</td>
<td></td>
</tr>
</tbody>
</table>

4.2 The program provides minimal evidence that teacher candidates demonstrate an adequate understanding of a variety of mathematical instructional strategies as delineated by the performance indicators in the Idaho Standards for Mathematics Teachers. Interviews, lesson plans and work samples demonstrate limited understanding as it applied to secondary mathematics. Interviews indicate that much of the performance evidence candidates utilized was learned while in the classroom instructing with a K-12 teacher rather than in the university setting.

**Standard 6: Communication Skills -** The teacher uses a variety of communication techniques to foster inquiry, collaboration, and supportive interaction in and beyond the classroom.

Knowledge
1. The teacher knows and uses appropriate mathematical vocabulary/terminology.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>6.1 Knowledge Communication Skills</td>
<td></td>
<td>X</td>
<td></td>
</tr>
</tbody>
</table>

6.1 Interviews with teachers and candidates, lesson plans, and work samples provide evidence that teacher candidates demonstrate adequate understanding of communication skills as delineated by the knowledge indicators in the Idaho Standards for Mathematics Teachers.

Performance
1. The teacher encourages students to use appropriate mathematical vocabulary/terminology.
2. The teacher fosters mathematical discourse.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>6.2 Performance Application of Communication Skills</td>
<td></td>
<td>X</td>
<td></td>
</tr>
</tbody>
</table>

6.2 Interviews with teachers and candidates, lesson plans, work samples and reflections provide evidence that teacher candidates demonstrate adequate application of communication skills as delineated by the performance indicators in the Idaho Standards for Mathematics Teachers.

Standard 8: Assessment of Student Learning - The teacher understands, uses, and interprets formal and informal assessment strategies to evaluate and advance student performance and to determine program effectiveness.

Knowledge
1. The teacher knows how to assess students’ mathematical reasoning.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>

<tbody>
<tr>
<td>8.1 Knowledge Understanding of how to Assess Students’ Mathematical Reasoning</td>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

8.1 Syllabi, interviews, teacher lesson plans, reflections, and student work samples provide little or no evidence that teacher candidates demonstrate an adequate understanding of how to
assess students’ mathematical understanding and reasoning and to utilize that evidence to inform instruction. Teachers and candidates expressed need for assessment course designed to support teacher understanding and use of assessments, particularly formative assessments to assess students’ mathematical reasoning and to utilize that assessment evidence to inform instruction.

**Performance**

1. The teacher assesses students’ mathematical reasoning.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>8.2 Performance Assessing Students’ Mathematical Reasoning</td>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

8.2 Interviews, teacher lesson plans, reflections, and work samples provide little or no evidence that teacher candidates demonstrate an adequate understanding of how to assess students’ mathematical understanding and reasoning and to utilize that evidence to inform instruction. Teachers and candidates expressed need for assessment course designed to support teacher understanding and use of assessments, particularly formative assessments to assess students’ mathematical reasoning and to utilize that assessment evidence to inform instruction.

**Standard 11: Connections among Mathematical Ideas** – The teacher understands significant connections among mathematical ideas and the application of those ideas within mathematics, as well as to other disciplines.

**Knowledge**

1. The teacher has a broad base of knowledge and understanding of mathematics beyond the level at which he or she teaches to include algebra, geometry and measurement, statistics and data analysis, and calculus.
2. The teacher understands the interconnectedness between strands of mathematics.
3. The teacher understands a variety of real-world applications of mathematics.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>

</thead>
<tbody>
<tr>
<td>11.1 Knowledge Significant Mathematical Connections</td>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

11.1 Interviews, lesson plans, and reflections provide minimal or no evidence that teacher candidates demonstrate an adequate understanding of significant mathematical connections. Again a lack of a specific secondary mathematics methods course was noticeably missing which would provide the opportunity for this learning to take place.

**Performance**
1. The teacher uses and encourages students to use mathematical applications to solve problems in realistic situations from other fields (e.g. natural science, social science, business, and engineering).
2. The teacher encourages students to identify connections between mathematical strands.
3. The teacher uses and encourages students to use mathematics to identify and describe patterns, relationships, concepts, processes, and real-life constructs.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>

State Program Approval Rubric for Teacher Preparation Programs

Candidate Performance Relative to the Idaho Standards

The Idaho Standards for Initial Certification provide the framework for the approval of educator preparation programs. As such, the standards set the criteria by which teacher preparation programs are reviewed for state program approval.

The following rubric is used to evaluate the extent to which teacher preparation programs prepare teachers relative to the standards. The rubric is designed to be used with each content-specific preparation program (i.e., Elementary, Special Education, Secondary English, Secondary Science–Biology, etc.).

Consistent with NCATE accreditation standards, the rubric describes three levels of performance (i.e., unacceptable, acceptable, and target) for each of the Idaho Standards for Initial Certification. The rubric shall be used to make holistic judgments. Performance indicators provide the lens through which the State Program Approval Team evaluates the institution’s provided evidence that candidates meet the Idaho standards. The institution is expected to provide information about candidate performance related to the Idaho Standards for Initial Preparation of Professional School Personnel.

Standard #1: Knowledge of Online Education - The online teacher understands the central concepts, tools of inquiry, and structures in online instruction and creates learning experiences that take advantage of the transformative potential in online learning environments.

Knowledge
1. The online teacher understands the current standards for best practices in online teaching and learning.
2. The online teacher understands the role of online teaching in preparing students for the global community of the future.
3. The online teacher understands concepts, assumptions, debates, processes of inquiry, and ways of knowing that are central to the field of online teaching and learning.
4. The online teacher understands the relationship between online education and other subject areas and real life situations.
5. The online teacher understands the relationship between online teaching and advancing technologies.
6. The online teacher understands appropriate uses of technologies to promote student learning and engagement with the content.
7. The online teacher understands the instructional delivery continuum. (e.g., fully online to blended to face-to-face).
1.1 The plans for assessment, as well as the expected artifacts for specific courses and the OTE are outlined in the Online Teaching Endorsement document.

**Performance**
1. The online teacher utilizes current standards for best practices in online teaching to identify appropriate instructional processes and strategies.
2. The online teacher demonstrates application of communication technologies for teaching and learning (e.g., Learning Management System [LMS], Content Management System [CMS], email, discussion, desktop video conferencing, and instant messaging tools).
3. The online teacher demonstrates application of emerging technologies for teaching and learning (e.g., blogs, wikis, content creation tools, mobile technologies, virtual worlds).
4. The online teacher demonstrates application of advanced troubleshooting skills (e.g., digital asset management, firewalls, web-based applications).
5. The online teacher demonstrates the use of design methods and standards in course/document creation and delivery.
6. The online teacher demonstrates knowledge of access, equity (digital divide) and safety concerns in online environments.

<table>

<td>1.1 Knowledge Understanding Subject Matter</td>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

1.2 Due to lack of completers and/or current candidates, the program provides little or no evidence that candidates utilize current standards for best practices or demonstrate knowledge of performance.

**Standard 2: Knowledge of Human Development and Learning - The teacher understands how students learn and develop, and provides opportunities that support their intellectual, social, and personal development.**

**Performance**
1. The online teacher understands the continuum of fully online to blended learning environments and creates unique opportunities and challenges for the learner (e.g., Synchronous and Asynchronous, Individual and Group Learning, Digital Communities).
2. The online teacher uses communication technologies to alter learning strategies and skills (e.g., Media Literacy, visual literacy).

3. The online teacher demonstrates knowledge of motivational theories and how they are applied to online learning environments.

4. The online teacher constructs learning experiences that take into account students’ physical, social, emotional, moral, and cognitive development to influence learning and instructional decisions. (Physical (e.g., Repetitive Use Injuries, Back and Neck Strain); Sensory Development (e.g. Hearing, Vision, Computer Vision Syndrome, Ocular Lock); Conceptions of social space (e.g. Identity Formation, Community Formation, Autonomy); Emotional (e.g. Isolation, cyber-bullying); Moral (i.e. Enigmatic communities, Disinhibition effect, Cognitive, Creativity)).

<table>
<thead>
<tr>

<tbody>
<tr>
<td>2.2 Performance Provide Opportunities for Development</td>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

2.2 Due to lack of completers and/or current candidates, the program provides little or no evidence that candidates utilize current standards for best practices or demonstrate knowledge of performance.

Standard 3: Modifying Instruction for Individual Needs - The teacher understands how students differ in their approaches to learning and creates instructional opportunities that are adapted to learners with diverse needs.

Knowledge

1. The online teacher is familiar with legal mandates stipulated by the Americans with Disabilities Act (ADA), the Individuals with Disabilities Education Act (IDEA), the Assistive Technology Act and Section 508 requirements for accessibility.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>3.1 Knowledge Understanding How Students Differ in Their Approaches to Learning</td>
<td></td>
<td>X</td>
<td></td>
</tr>
</tbody>
</table>

3.1 Those candidates in the OTE serve in an internship position for which in-depth, reflective instructional design practices are integrated. The IDLA Internship Checklist includes a section called Project Assessment, which requires the candidate to objectively “deconstruct” either an existing K-12 course offering or one that is being planned. This process involves a careful examination of the targeted curriculum through the lens of an instructional designer. A report is generated and an oral, digital presentation to the curriculum committee of the
organization will be conducted. A faculty member in the OTE program will participate in this endeavor and provide an evaluation using a rubric aligned with instructional design principles.

**Performance**

1. The online teacher knows how adaptive/assistive technologies are used to help people who have disabilities gain access to information that might otherwise be inaccessible.
2. The online teacher modifies, customizes and/or personalizes activities to address diverse learning styles, working strategies and abilities (e.g., provide multiple paths to learning objectives, differentiate instruction, strategies for non-native English speakers).
3. The online teacher coordinates learning experiences with adult professionals (e.g., parents, local school contacts, mentors).

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>

<td>Accommodating Individual Learning Needs</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

3.2 Due to lack of completers and/or current candidates, the program provides little or no evidence that candidates utilize current standards for best practices or demonstrate knowledge of performance.

**Standard 4: Multiple Instructional Strategies** - The online teacher understands and uses a variety of instructional strategies to develop students’ critical thinking, problem solving, and performance skills.

**Knowledge**

1. The online teacher understands the techniques and applications of various online instructional strategies (e.g., discussion, student-directed learning, collaborative learning, lecture, project-based learning, forum, small group work).
2. The online teacher understands appropriate uses of learning and/or content management systems for student learning.

<table>

<td></td>
<td></td>
</tr>
</tbody>
</table>

4.1 A variety of elements have been provided through syllabus, lesson plan, learning activity plan rubrics, oral capstone presentation, and include rubric scoring guides.
Performance
1. The online teacher evaluates methods for achieving learning goals and chooses various teaching strategies, materials, and technologies to meet instructional purposes and student needs. (e.g., online teacher-gathered data and student offered feedback).
2. The online teacher uses student-centered instructional strategies to engage students in learning. (e.g., Peer-based learning, peer coaching, authentic learning experiences, inquiry-based activities, structured but flexible learning environment, collaborative learning, discussion groups, self-directed learning, case studies, small group work, collaborative learning, and guided design)
3. The online teacher uses a variety of instructional tools and resources to enhance learning (e.g., LMS/CMS, computer directed and computer assisted software, digital age media).

<table>
<thead>

4.2 Due to lack of completers and/or current candidates, the program provides little or no evidence that candidates utilize current standards for best practices or demonstrate knowledge of performance.

Standard 5: Classroom Motivation and Management Skills - The teacher understands individual and group motivation and behavior and creates a learning environment that encourages positive social interaction, active engagement in learning, and self-motivation.

Performance
1. The online teacher establishes a positive and safe climate in the classroom and participates in maintaining a healthy environment in the school or program as a whole (e.g., digital etiquette, Internet safety, Acceptable Use Policy [AUP]).
2. The online teacher performs management tasks (e.g., tracks student enrollments, communication logs, attendance records, etc.).
3. The online teacher uses effective time management strategies (e.g., timely and consistent feedback, provides course materials in a timely manner, use online tool functionality to improve instructional efficiency).
Element | Unacceptable | Acceptable | Target
--- | --- | --- | ---
5.2 Performance Creating a Learning Environment that Encourages Positive Social Interaction, Active Engagement in Learning, and Self-Motivation. | X |  |  

5.2 Due to lack of completers and/or current candidates, the program provides little or no evidence that candidates utilize current standards for best practices or demonstrate knowledge of performance.

**Standard #6: Communication Skills, Networking, and Community Building** - The online teacher uses a variety of communication techniques including verbal, nonverbal, and media to foster inquiry, collaboration, and supportive interaction in and beyond the classroom.

**Knowledge**
1. The online teacher knows the importance of verbal (synchronous) as well as nonverbal (asynchronous) communication.

Element | Unacceptable | Acceptable | Target
--- | --- | --- | ---
6.1 Knowledge Understanding of a Variety of Communication Techniques |  | X |  

6.1 Knowledge and understanding of a variety of communications techniques are provided through syllabus, key assessments reviewed in literature. Student centered instruction report documents are through oral presentations and scored with a set rubric.

**Performance**
1. The online teacher is a thoughtful and responsive communicator.
2. The online teacher models effective communication strategies in conveying ideas and information and in asking questions to stimulate discussion and promote higher-order thinking (e.g., discussion board facilitation, personal communications, and web conferencing).
3. The online teacher demonstrates the ability to communicate effectively using a variety of mediums.
4. The online teacher adjusts communication in response to cultural differences (e.g., wait time and authority).

<table>

6.2 Due to lack of completers and/or current candidates, the program provides little or no evidence that candidates utilize current standards for best practices or demonstrate knowledge of performance.

Standard 7: Instructional Planning Skills - The teacher plans and prepares instruction based on knowledge of subject matter, students, the community, and curriculum goals.

Performance
1. The online teacher clearly communicates to students stated and measurable objectives, course goals, grading criteria, course organization and expectations.
2. The online teacher maintains accuracy and currency of course content, incorporates internet resources into course content, and extends lesson activities.
3. The online teacher designs and develops subject-specific online content.
4. The online teacher uses multiple forms of media to design course content.
5. The online teacher designs course content to facilitate interaction and discussion.
6. The online teacher designs course content that complies with intellectual property rights and fair use standards.

7.2 Due to lack of completers and/or current candidates, the program provides little or no evidence that candidates utilize current standards for best practices or demonstrate knowledge of performance.

Standard 8: Assessment of Student Learning - The online teacher understands, uses, and interprets formal and informal assessment strategies to evaluate and advance student performance and to determine program effectiveness.

Performance
1. The online teacher selects, constructs, and uses a variety of formal and informal assessment techniques (e.g., observation, portfolios of student work, online teacher-made tests, performance
tasks, projects, student self-assessment, peer assessment, standardized tests, tests written in primary language, and authentic assessments) to enhance knowledge of individual students, evaluate student performance and progress, and modify teaching and learning strategies.

2. The online teacher enlists multiple strategies for ensuring security of online student assessments and assessment data.

State Program Approval Rubric for Teacher Preparation Programs

Candidate Performance Relative to the Idaho Standards

The Idaho Standards for Initial Certification provide the framework for the approval of educator preparation programs. As such, the standards set the criteria by which teacher preparation programs are reviewed for state program approval.

The following rubric is used to evaluate the extent to which teacher preparation programs prepare teachers relative to the standards. The rubric is designed to be used with each content-specific preparation program (i.e., Elementary, Special Education, Secondary English, Secondary Science–Biology, etc.).

Consistent with NCATE accreditation standards, the rubric describes three levels of performance (i.e., unacceptable, acceptable, and target) for each of the Idaho Standards for Initial Certification. The rubric shall be used to make holistic judgments. Performance indicators provide the lens through which the State Program Approval Team evaluates the institution’s provided evidence that candidates meet the Idaho standards. The institution is expected to provide information about candidate performance related to the Idaho Standards for Initial Preparation of Professional School Personnel.

Standard 1: Knowledge of Subject Matter - The teacher understands the central concepts, tools of inquiry, and structures of the discipline taught and creates learning experiences that make these aspects of subject matter meaningful for students.

Knowledge
1. The teacher understands the components of physical fitness and their relationship to a healthy lifestyle.
2. The teacher understands the sequencing of motor skills (K-12).
3. The teacher understands human anatomy and physiology (structure and function), exercise physiology, and bio-mechanical principles.
4. The teacher knows the appropriate rules, etiquette, instructional cues, and skills for physical education activities (e.g., aquatics, sports, games, lifetime activities, dance, rhythmical activities, and outdoor/adventure activities).
5. The teacher understands that daily physical provides opportunities for enjoyment, challenge, self-expression, and social interaction.
6. The teacher understands Adaptive Physical Education and how to work with students with special and diverse needs (e.g., various physical abilities and limitations, culture, and gender).
7. The teacher understands technology operations and concepts pertinent to physical activity (e.g. heart rate monitors, pedometers, global positioning system).
1.1 Course syllabi, Praxis II scores, unit plans, and instructor feedback provide evidence that teacher candidates demonstrate an adequate understanding of the components of physical fitness and their relationship to a healthy lifestyle; human anatomy and physiology (structure and function), exercise physiology appropriate rules, etiquette, instructional cues, and skills for physical education activities; Adaptive Physical Education and how to work with special and diverse student needs; and the sequencing of motor skills (K-12); opportunities for enjoyment, challenge, self-expression, and social interaction; and technology operations and concepts pertinent to physical activity.

Performance
1. The teacher instructs students about disciplinary concepts and principles related to physical activities, fitness, and movement expression.
2. The teacher instructs students in the rules, skills, and strategies of a variety of physical activities (e.g., aquatics, sports, games, lifelong activities, dance, rhythmical activities, and outdoor/adventure activities).
3. The teacher models a variety of physical education activities (e.g., aquatics, sports, games, lifelong activities, dance, rhythmical activities, and outdoor/adventure activities).
4. The teacher models the use of technology operations and concepts pertinent to physical activity (e.g. heart rate monitors, pedometers, global positioning system, and computer software).

1.2 Faculty observations, candidate portfolio, unit and lesson plans, and Praxis II scores provide evidence that teacher candidates demonstrate an adequate ability to create learning experiences that make physical education meaningful to students.

Standard 2: Knowledge of Human Development and Learning - The teacher understands how students learn and develop, and provides opportunities that support their intellectual, social, and personal development.

Performance
1. The teacher assesses the individual physical activity, movement, and fitness levels of students and makes developmentally appropriate adaptations to instruction.

90
2. The teacher promotes physical activities that contribute to good health.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>

<td></td>
<td>X</td>
<td></td>
</tr>
</tbody>
</table>

3.2 Lesson plans, instructor observations, and candidate interviews provide evidence that teacher candidates demonstrate an adequate ability to create opportunities that incorporate individual variations to movement and to help students gain physical competence and positive self-esteem.

**Standard 5: Classroom Motivation and Management Skills - The teacher understands individual and group motivation and behavior and creates a learning environment that encourages positive social interaction, active engagement in learning, and self-motivation.**

**Knowledge**
1. The teacher knows how to help students cultivate responsible personal and social behaviors that promote positive relationships and a productive environment in physical education settings.
2. The teacher knows strategies to help students become self-motivated in physical education.
3. The teacher understands that individual performance is affected by anxiety.
4. The teacher understands principles of effective management in indoor and outdoor movement settings.

<table>
<thead>
<tr>
<th>Element</th>

<tr>
<td>5.1 Knowledge Understanding of Classroom Motivation and Management Skills</td>
<td></td>
<td>X</td>
<td></td>
</tr>
</tbody>
</table>

5.1 Course syllabi, faculty observations/rubrics, Praxis II scores, and candidate and faculty interviews provide evidence that teacher candidates demonstrate an adequate understanding of how to help students cultivate responsible personal and social behaviors.

Performance
1. The teacher implements strategies, lessons, and activities to promote positive peer relationships (e.g., mutual respect, support, safety, sportsmanship, and cooperation).
2. The teacher uses strategies to motivate students to participate in physical activity inside and outside the school setting.
3. The teacher utilizes principles of effective management in indoor and outdoor movement settings.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>5.2 Performance Creating, Managing, and Modifying for Safe and Positive Learning Environments</td>
<td></td>
<td>X</td>
<td></td>
</tr>
</tbody>
</table>

5.2 Completer interviews, candidate reflections, and faculty observations provide evidence that teacher candidates demonstrate an adequate ability to effectively manage physical activity in indoor and outdoor settings and promote positive peer relationships and appropriate motivational strategies for participation in physical activity.

Standard 7: Instructional Planning Skills - The teacher plans and prepares instruction based on knowledge of subject matter, students, the community, and curriculum goals.

Knowledge
1. The teacher knows a variety of management (e.g., space, people, and equipment) and instructional strategies to maximize physical education activity time and student success.
2. The teacher knows how to expand the curriculum through the use of community resources (e.g., golf courses, climbing walls, YMCA, and service organizations).
7.1 Course syllabi, faculty interviews, Praxis II scores, and lesson plans provide evidence that teacher candidates demonstrate an adequate understanding of strategies to maximize physical education activity time and student success in physical education, as well as how to expand the curriculum through the use of community resources.

Performance  
1. The teacher uses and assesses management (e.g., space, people, and equipment) and instructional strategies to maximize physical education activity time and student success.

7.2 Candidate lesson plans, candidate reflections, candidate interviews and faculty observations provide evidence that teacher candidates demonstrate an adequate ability to plan and prepare instruction to maximize physical education activity time and student success and to utilize community resources to expand the curriculum.

Standard 8: Assessment of Student Learning - The teacher understands, uses, and interprets formal and informal assessment strategies to evaluate and advance student performance and to determine program effectiveness.

Knowledge  
1. The teacher knows how to select and use a variety of developmentally appropriate assessment techniques (e.g., authentic, alternative, and traditional) congruent with physical education activity, movement, and fitness goals.
8.1 Syllabi, faculty interviews, lesson plan guidelines/rubrics, and candidate lesson plans provide evidence that teacher candidates demonstrate an adequate understanding of how to select and use a variety of developmentally appropriate assessment techniques (e.g., authentic, alternative, traditional) congruent with physical education activity, movement, and fitness goals.

**Performance**

1. The teacher uses a variety of developmentally appropriate assessment techniques (e.g., authentic, alternative, and traditional) congruent with physical education activity, movement, and fitness goals.

8.2 Candidate lesson/unit plans, candidate and faculty interviews, and faculty observations provide evidence that teacher candidates demonstrate an adequate ability to use a variety of developmentally appropriate assessment techniques (e.g., authentic, alternative, traditional) congruent with physical education activity, movement, and fitness goals to evaluate student performance and determine program effectiveness.

**Standard 9: Professional Commitment and Responsibility** - The teacher is a reflective practitioner who demonstrates a commitment to professional standards and is continuously engaged in purposeful mastery of the art and science of teaching.

**Knowledge**

1. The teacher knows how his/her personal physical fitness and activity levels may impact teaching and student motivation.
Element | Unacceptable | Acceptable | Target
---|---|---|---
9.1 Knowledge Professional Commitment and Responsibility as Reflective Practitioners |  | X |  

9.1 Course syllabi, Praxis II scores, and faculty and candidate interviews provide evidence that teacher candidates demonstrate an adequate understanding of professional commitment and responsibility as reflective practitioners.

Knowledge
1. The teacher understands the inherent dangers involved in physical education activities.
2. The teacher understands the need to consider safety when planning and providing instruction.
3. The teacher understands the factors that influence safety in physical education activity settings (e.g., skill, fitness, developmental level of students, equipment, attire, facilities, travel, and weather).
4. The teacher understands the level of supervision required for the health and safety of all students in all locations (e.g., teaching areas, locker rooms, and travel to off-campus activities).
5. The teacher understands school policies regarding student injury and medical treatment.
6. The teacher understands the steps for providing appropriate treatment for injuries occurring in physical education activities.
7. The teacher understands the appropriate steps when responding to safety situations.
8. The teacher knows cardiopulmonary resuscitation (CPR) and first aid.

Performance
1. The teacher identifies, monitors, and documents safety issues when planning and implementing instruction to ensure a safe learning environment.
2. The teacher informs students of the risks associated with physical education activities.

11.1 Course syllabi, faculty and candidate interviews, and Praxis II scores provide evidence that teacher candidates demonstrate an adequate understanding of CPR, first aid, and factors that influence safety in physical education activity settings and the supervision and response required.
3. The teacher instructs students in appropriate safety procedures for physical education activities and corrects inappropriate actions.
4. The teacher identifies and corrects potential hazards in physical education facilities, grounds, and equipment.
5. The teacher identifies and follows the steps for providing appropriate treatment for injuries occurring in physical education activities.
6. The teacher identifies safety situations and responds appropriately.
7. The teacher maintains CPR and first aid certification.

Foundation Standards for Professional Technical Education

State Program Approval Rubric for Teacher Preparation Programs

Candidate Performance Relative to the Idaho Standards

The Idaho Standards for Initial Certification provide the framework for the approval of educator preparation programs. As such, the standards set the criteria by which teacher preparation programs are reviewed for state program approval.

The following rubric is used to evaluate the extent to which teacher preparation programs prepare teachers relative to the standards. The rubric is designed to be used with each content-specific preparation program (i.e., Elementary, Special Education, Secondary English, Secondary Science–Biology, etc.).

Consistent with NCATE accreditation standards, the rubric describes three levels of performance (i.e., unacceptable, acceptable, and target) for each of the Idaho Standards for Initial Certification. The rubric shall be used to make holistic judgments. Performance indicators provide the lens through which the State Program Approval Team evaluates the institution’s provided evidence that candidates meet the Idaho standards. The institution is expected to provide information about candidate performance related to the Idaho Standards for Initial Preparation of Professional School Personnel.

Standard 1: Knowledge of Subject Matter -- The teacher understands the central concepts, tools of inquiry, and structures of the content area(s) taught, and creates learning experiences that make these aspects of subject matter meaningful for learners.

Knowledge
1. The teacher understands basic technological principles, processes, and skills such as design and problem solving, team decision making, information gathering, and safety.
2. The teacher understands how basic academic skills and advanced technology can be integrated into an occupational learning environment.
3. The teacher understands industry logistics, technical terminologies, and procedures for the occupational area.
4. The teacher understands industry trends and labor market needs.
5. The teacher understands workplace leadership models.
6. The teacher understands the philosophical principles and the practices of professional-technical education.
7. The teacher understands the importance of student leadership qualities in technical program areas.

</tbody>
</table>

1.1 Praxis II scores, an interview with a cooperating teacher, and perusing student work samples provide evidence that teacher candidates demonstrate in-depth knowledge and understanding of Professional Technical teacher skills, including implementation of instructional strategies, formative and summative assessments, and applying technology in the classroom.

Performance
1. The teacher maintains current technical skills and seeks continual improvement.
2. The teacher demonstrates specific occupational skills necessary for employment.
3. The teacher uses current terminology, industry logistics, and procedures for the occupational area.
4. The teacher incorporates and promotes leadership skills in state-approved Professional-Technical Student Organizations (PTSO).
5. The teacher writes and evaluates occupational objectives and competencies.
6. The teacher uses a variety of technical instructional resources.
7. The teacher assesses the occupational needs of the community.
8. The teacher facilitates experiences designed to develop skills for successful employment.
9. The teacher informs students about opportunities to develop employment skills (e.g., work-study programs, internships, volunteer work, and employment opportunities).

1.2 The awarding of industry certification via Certiport/Microsoft in areas such as Word and Excel, and the development of presentations, schedules, handouts, and course assessments provide evidence that candidates know how to create learning experiences that make these aspects of subject matter meaningful for students.

Standard 4: Multiple Instructional Strategies – The teacher understands and uses a variety of instructional strategies to develop student learning.

Knowledge
1. The teacher understands the entry-level skills in the occupation.
2. The teacher understands workplace culture and ethics.
3. The teacher understands how to provide students with realistic occupational and/or work experiences.
4. The teacher knows how to use education professionals, trade professionals, and research to enhance student understanding of processes, knowledge, and safety.
5. The teacher understands how occupational trends and issues affect the workplace.
6. The teacher understands how to integrate academic skills into technical content areas.
7. The teacher understands the role of innovation and entrepreneurship in the workplace.
8. The teacher understands integration of leadership training, community involvement, and personal growth into instructional strategies.

4.1 Observing Professional Technical Teacher candidates and completers and analyzing teacher lesson plans provide evidence that teacher candidates demonstrate an adequate ability to use resources and learning activities that support instructional and curriculum goals that reflect effective teaching practice and accurately reflect the discipline’s content.

Performance
1. The teacher models appropriate workplace practices and ethics.
2. The teacher discusses state guidelines to aid students in understanding the trends and issues of an occupation.
3. The teacher integrates academic skills appropriate for each occupational area.
4. The teacher uses simulated and/or authentic occupational applications of course content.
5. The teacher uses experts from business, industry, and government as appropriate for the content area.
6. The teacher develops a scope and sequence of instruction related to the students’ prior knowledge and that aligns with articulation requirements and course competencies.
7. The teacher integrates instructional strategies and techniques that accommodate prior student knowledge.
8. The teacher discusses innovation and the entrepreneurial role in the workforce and incorporates them where possible.

**Standard 10: Partnerships** - The teacher interacts in a professional, effective manner with colleagues, parents, and other members of the community to support students’ learning and well-being.

**Knowledge**

1. The teacher knows the contributions of advisory committees.
2. The teacher understands the importance of using the employment community to validate occupational skills.
3. The teacher understands how to effect change in professional-technical education and in the occupational area taught.
4. The teacher knows about professional organizations within the occupational area.
5. The teacher knows how to cooperatively develop articulation agreements between secondary and postsecondary programs.
6. The teacher understands the structure of state-approved PTSOs.
7. The teacher understands the ideas, opinions, and perceptions of business and industry.
10.1 Candidate and completer interviews, a cooperating teacher interview, instructional units, and student teaching files provide evidence that Professional Technical teacher candidates understand how to interact professionally and effectively with colleagues, parents, and community in partnerships.

**Performance**
1. The teacher establishes and uses advisory committees for program development and improvement.
2. The teacher cooperates with educators in other content areas to develop appropriate instructional strategies and to integrate learning.
3. The teacher interacts with business, industry, labor, government, and the community to build effective partnerships.
4. The teacher participates in appropriate professional organizations.
5. The teacher cooperatively constructs articulation agreements.
6. The teacher incorporates an active state-approved PTSO in his or her program.
7. The teacher understands the role of PTSOs as an integral part of the total professional-technical education program.

10.2 Candidate and completer interviews, a cooperating teacher interview, instructional units, and student teaching files provide evidence that Professional Technical teacher candidates are able to interact professionally and effectively with colleagues, parents, and community in partnerships.

Standard 11: Learning Environments - The teacher creates and manages a safe and productive learning environment.

**Knowledge**
1. The teacher understands how to dispose of waste materials.
2. The teacher understands how to care for, inventory, and maintain materials and equipment.
3. The teacher understands safety contracts and operation procedures.
4. The teacher understands legal safety issues related to the program area.
5. The teacher understands safety requirements necessary to conduct laboratory and field activities.
6. The teacher understands time and organizational skills in laboratory management.
7. The teacher is aware of safety regulations at school and work sites.
8. The teacher understands how to incorporate PTSOs as intracurricular learning experiences.

State Program Approval Rubric for Teacher Preparation Programs

Candidate Performance Relative to the Idaho Standards

The Idaho Standards for Initial Certification provide the framework for the approval of educator preparation programs. As such, the standards set the criteria by which teacher preparation programs are reviewed for state program approval.

The following rubric is used to evaluate the extent to which teacher preparation programs prepare teachers relative to the standards. The rubric is designed to be used with each content-specific preparation program (i.e., Elementary, Special Education, Secondary English, Secondary Science–Biology, etc.).

Consistent with NCATE accreditation standards, the rubric describes three levels of performance (i.e., unacceptable, acceptable, and target) for each of the Idaho Standards for Initial Certification. The rubric shall be used to make holistic judgments. Performance indicators provide the lens through which the State Program Approval Team evaluates the institution’s provided evidence that candidates meet the Idaho standards. The institution is expected to provide information about candidate performance related to the Idaho Standards for Initial Preparation of Professional School Personnel.

Standard 1: Knowledge of Subject Matter -- The teacher understands the central concepts, tools of inquiry, and structures of the content area(s) taught and creates learning experiences that make these aspects of subject matter meaningful for learners.

Knowledge
1. The teacher understands the significance of family and its impact on the well-being of children, adults, and society and the multiple life roles and responsibilities in family, career, and community settings.
2. Teacher understands the impact of families’ multiple roles within the home, workplace and community.
3. The teacher knows of community agencies and organizations that provide assistance to individuals and families.
4. The teacher understands how interpersonal relationships, cultural patterns, and diversity affect individuals, families, community, and the workplace.
5. The teacher understands the roles and responsibilities of parenting and factors that affect human growth and development across the life span.
6. The teacher understands the science and practical application involved in planning, selecting, preparing, and serving food according to the principles of sound nutrition, cultural and economic needs of individuals, families, and industry; along with practices to encourage wellness for life.
7. The teacher understands the design, selection, and care of textiles and apparel products.
8. The teacher understands housing, design, furnishings, technology, and equipment needs for individuals, families, and industry.
9. The teacher understands consumer economic issues and behavior for managing individual and family resources to achieve goals at various stages of the life cycle.
10. The teacher understands resource conservation and environmental issues in relation to family and community health.
11. The teacher understands the nature of the profession and knows of careers related to family and consumer sciences.
12. The teacher understands how social media can influence communication and outcomes between individuals, family members, and community connections.
13. The teacher understands how to incorporate Family, Career and Community Leaders of America (FCCLA) as intracurricular learning experiences.

Standard 7: Instructional Planning Skills - The teacher plans and prepares instruction based on knowledge of subject matter, students, the community, curriculum goals, and instructional strategies.

Knowledge
1. The teacher understands how to apply knowledge about the current subject matter, learning theory, instructional strategies, curriculum development, evaluation, and child and adolescent development to meet curriculum goals using family and consumer sciences national standards and other resources.
2. The teacher understands how program alignment across grade levels and disciplines maximizes learning.

Element | Unacceptable | Acceptable | Target
--- | --- | --- | ---
7.1 Knowledge Planning and Preparing Instruction | | X | 

7.1 Observation of a candidate, teacher lesson plans, and an interview with a university supervisor provide evidence that teacher candidates demonstrate an adequate ability to use resources and learning activities that support instructional and curriculum goals that reflect effective teaching practice and accurately reflect the discipline’s content.

Performance
1. The teacher maximizes such elements as instructional materials; individual student interests, needs, and aptitudes; technology and community resources in planning instruction that creates an effective bridge between curriculum goals and students learning.
7.2 Observation of a candidate, teacher lesson plans, and an interview with a university supervisor provide little or no evidence that teacher candidates demonstrate an adequate ability to use instructional planning skills in connection with students’ needs and community contexts.

Standard 8: Assessment of Student Learning - The teacher understands, uses, and interprets formal and informal assessment strategies to evaluate and advance student performance and to determine teaching effectiveness.

Knowledge
1. The teacher understands formal and informal comprehensive and industry assessment strategies to evaluate and advance student performance and to determine program effectiveness.

8.1 Observation of a candidate, teacher lesson plans, and an interview with a university supervisor provide evidence that teacher candidates demonstrate an adequate ability to assess student learning.

Performance
1. The teacher uses and interprets formal and informal comprehensive and industry assessment strategies to evaluate and advance student performance and to determine program effectiveness.
8.2 Observation of a candidate, teacher lesson plans, and an interview with a university supervisor provide little or no evidence that teacher candidates demonstrate an adequate ability to use and interpret program and student assessment strategies.

Standard 9: Professional Commitment and Responsibility - The teacher is a reflective practitioner who demonstrates a commitment to professional standards and is continuously engaged in purposeful mastery of the art and science of teaching.

Knowledge
1. The teacher understands how to research and select relevant professional development aligned to curriculum and industry standards.

9.2 An interview with a cooperating teacher, observation of candidate performance, Praxis II scores, student files and transcripts, and student work samples provide little or no evidence that teacher candidates demonstrate continuous engagement in purposeful mastery of the art and science of teaching.

Recommended Action on Family and Consumer Sciences:
   _______Approved
   X _______Approved Conditionally
   _______Not Approved

Areas for Improvement:
Due to lack of completers, the Family and Consumer Science program provides little or no evidence that teacher candidates demonstrate an ability to continuously engage in the purposeful mastery of the art and science of teaching.
Foundation Standards for Science

State Program Approval Rubric for Teacher Preparation Programs

Candidate Performance Relative to the Idaho Standards

The Idaho Standards for Initial Certification provide the framework for the approval of educator preparation programs. As such, the standards set the criteria by which teacher preparation programs are reviewed for state program approval.

The following rubric is used to evaluate the extent to which teacher preparation programs prepare teachers who meet the standards. The rubric is designed to be used with each individual preparation program (i.e., Elementary, Special Education, Secondary English, Secondary Science–Biology, etc.).

Consistent with NCATE accreditation standards, the rubrics describe three levels of performance (i.e., unacceptable, acceptable, and target) for each of the Idaho Standards for Initial Certification. The rubric shall be used to make holistic judgments, rather than as an element-by-element checklist. Elements identified in the rubrics provide the basis upon which a State Program Approval Team evaluates the institution’s evidence that candidates meet the Idaho Standards. The institution is expected to provide information about candidate performance related to the Idaho Core Teacher Standards (and Idaho Teacher Standards for specific preparation areas).

In addition to the standards listed here, science teachers must meet Idaho Core Teacher Standards and at least one of the following: (1) Idaho Standards for Biology Teachers, (2) Idaho Standards for Chemistry Teachers, (4) Idaho Standards for Natural Science Teachers, (5) Idaho Standards for Physical Science Teachers, or (6) Idaho Standards for Physics Teachers. Rubrics for these standards are listed after the rubrics for the Foundation Standards for Science Teachers.

**Standard 1: Knowledge of Subject Matter - The teacher understands the central concepts, tools of inquiry, and structures of the discipline taught and creates learning experiences that make these aspects of subject matter meaningful for students.**

**Knowledge**
1. The teacher knows the history and nature of science and scientific theories.
2. The teacher understands the science content within the context of the Idaho Science Content Standards within their appropriate certification.
3. The teacher understands the concepts of form and function.
4. The teacher understands the interconnectedness among the science disciplines.
5. The teacher understands the process of scientific inquiry: investigate scientific phenomena, interpret findings, and communicate results.
6. The teacher knows how to construct deeper understanding of scientific phenomena through study, demonstrations, and laboratory and field activities.
7. The teacher understands the importance of accurate and precise measurements in science and reports measurements in an understandable way.

<table>

<tbody>
<tr>
<td>1.1 Knowledge Subject Matter and Structure of Science</td>
<td></td>
<td>X</td>
</tr>
</tbody>
</table>

1.1 Topics across science content included in course syllabi, PRAXIS II scores in all areas (biology, chemistry, physics), and candidate/completer interviews provide evidence that teacher candidates demonstrate an adequate understanding of their science content and the nature of scientific knowledge and how to articulate the importance of engaging in the process of science.

Performance
1. The teacher provides students with opportunities to view science in its cultural and historical context by using examples from history and including scientists of both genders and from varied social and cultural groups.
2. The teacher continually adjusts curriculum and activities to align them with new scientific data.
3. The teacher provides students with a holistic, interdisciplinary understanding of concepts in life, earth systems/space, physical, and environmental sciences.
4. The teacher helps students build scientific knowledge and develop scientific habits of mind.
5. The teacher demonstrates competence in investigating scientific phenomena, interpreting findings, and communicating results.
6. The teacher models and encourages the skills of scientific inquiry, including creativity, curiosity, openness to new ideas, and skepticism that characterize science.
7. The teacher creates lessons, demonstrations, and laboratory and field activities that effectively communicate and reinforce science concepts and principles.
8. The teacher engages in scientific inquiry in science coursework.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.2 Performance Making Science Meaningful</td>
<td></td>
<td>X</td>
</tr>
</tbody>
</table>

1.2 Candidate portfolio lesson plans, student teaching unit plans, and additional lesson plan reflections provide evidence that teacher candidates demonstrate an adequate ability to create learning experiences that make the concepts of science, tools of inquiry, structure of scientific knowledge, and the processes of science meaningful to students through the use of materials and resources that support instructional goals and learning activities, including laboratory and field activities, that are consistent with curriculum goals and reflect principles of effective instruction.
Standard 2: Knowledge of Human Development and Learning - The teacher understands how students learn and develop, and provides opportunities that support their intellectual, social, and personal development.

Knowledge
1. The teacher knows how students construct scientific knowledge and develop scientific habits of mind.
2. The teacher knows commonly held conceptions and misconceptions about science and how they affect student learning.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>2.1 Knowledge Understanding Human Development and Learning</td>
<td></td>
<td>X</td>
<td></td>
</tr>
</tbody>
</table>

2.1 Required course syllabi and course objectives and some student teaching portfolio reflections provide minimal evidence that teacher candidates demonstrate an adequate understanding of the conceptions and misconceptions that students are likely to bring to class that can interfere with learning the science. Additional evidence of how candidates learn about student conceptions and misconceptions and how to navigate these issues would benefit the program’s work toward meeting this standard.

Performance
1. The teacher identifies students’ conceptions and misconceptions about the natural world.
2. The teacher engages students in constructing deeper understandings of the natural world.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>

<tbody>
<tr>
<td>2.2 Performance Provide Opportunities for Development</td>
<td></td>
<td>X</td>
<td></td>
</tr>
</tbody>
</table>

2.2 Candidate portfolios, lesson plans, and candidate/completer interviews provide minimal evidence that teacher candidates demonstrate an adequate ability to carry out activities that facilitate students’ conceptual development in science. While learning activities in candidate work samples included demos and lab-based activities, many activities were focused on lower-level thinking tasks (e.g. note taking, multiple choice test questions, worksheets) as opposed to an emphasis on higher level thinking tasks that lead to deep understanding and learning.
Standard 4: Multiple Instructional Strategies - The teacher understands and uses a variety of instructional strategies to develop students’ critical thinking, problem solving, and performance skills.

Knowledge
1. The teacher understands how to apply mathematics and technology to analyze, interpret, and display scientific data.
2. The teacher understands how to implement scientific inquiry.
3. The teacher understands how to engage students in making deeper sense of the natural world through careful orchestration of demonstrations of phenomena for larger groups when appropriate.
4. The teacher understands how to use research based best practices to engage students in learning science.

<table>
<thead>

</tbody>
</table>

4.2 Candidate portfolios, and other course lesson plans provide minimal evidence that teacher candidates demonstrate an adequate ability to appropriately use models, simulations, laboratory and field activities, and demonstrations for larger groups, where appropriate, to facilitate students' critical thinking, problem solving, and performance skills. A majority of candidate work samples did not emphasize true inquiry learning and instead emphasized
traditional information delivery/lecture-based teaching (outside of lab-based learning situations).

**Standard 6: Communication Skills - The teacher uses a variety of communication techniques to foster inquiry, collaboration, and supportive interaction in and beyond the classroom.**

**Knowledge**

1. The teacher knows how to use a variety of interfaced electronic hardware and software for communicating data.
2. The teacher knows how to use graphics, statistical, modeling, and simulation software, as well as spreadsheets to develop and communicate science concepts.
3. The teacher understands technical writing as a way to communicate science concepts and processes.

<table>
<thead>
<tr>

</thead>
<tbody>
<tr>
<td>6.1 Knowledge Communication Skills</td>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

6.1 Some work samples (EDUC449 student teaching portfolios) were provided, but little or no evidence that teacher candidates demonstrate an adequate knowledge of how to use standard forms of scientific communications in their fields (i.e., graphs, technical writing, results of mathematical analysis, scientific posters, and multimedia presentations). During the interview session, candidates and completers noted that the topic of standard communication forms in science was not an instructional emphasis in their methods course(s).

**Performance**

1. The teacher models the appropriate scientific interpretation and communication of scientific evidence through technical writing, scientific posters, multimedia presentations, and electronic communications media.
2. The teacher engages students in sharing data during laboratory investigation to develop and evaluate conclusions.
3. The teacher engages students in the use of computers in laboratory/field activities to gather, organize, analyze, and graphically present scientific data.
4. The teacher engages students in the use of computer modeling and simulation software to communicate scientific concepts.

<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
6.2 Some work samples (EDUC497 Student teaching portfolio and a school visit interview/observation) including the use of technology, graphs, and data were provided, but overall there was little or no evidence that teacher candidates demonstrate an adequate ability to engage students in the practical application of standard forms of scientific communications in their fields (i.e., graphs, technical writing, results of mathematical analysis, scientific posters, and multimedia presentations). Overall, evidence did not demonstrate an emphasis on the teaching and use of varied standard communication forms in science.

Standard 9: Professional Commitment and Responsibility - The teacher is a reflective practitioner who demonstrates a commitment to professional standards and is continuously engaged in purposeful mastery of the art and science of teaching.

Knowledge
1. The teacher understands the importance of keeping current on research related to how students learn science.
2. The teacher understands the importance of keeping current on scientific research findings.

9.2 Due to lack of artifacts, the program provides little or no evidence that teacher candidates demonstrate an adequate ability to incorporate an understanding of recent developments in their fields and knowledge of how students learn science into instruction. There was some knowledge evidence about the reading/discussion of scientific or educational journals in methods course syllabi, but there was not a consistent pattern of application of research in candidate lessons/units.

**Principle 11: Safe Learning Environment – The science teacher provides for a safe learning environment.**

**Knowledge**
1. The teacher knows how to select materials that match instructional goals as well as how to maintain a safe environment.
2. The teacher is aware of available resources and standard protocol for proper disposal of waste materials.
3. The teacher knows how to properly care for, inventory, and maintain materials and equipment.
4. The teacher is aware of legal responsibilities associated with safety.
5. The teacher knows the safety requirements necessary to conduct laboratory and field activities and demonstrations.
6. The teacher knows how to procure and use Material Safety Data Sheets (MSDS).

<table>

11.1 Required course syllabi and course descriptions provide evidence that teacher candidates demonstrate an adequate knowledge of material selection, safety, waste disposal, care and maintenance of materials and equipment, legal responsibilities associated with safety, safety requirements for laboratory, field activities, and demonstrations, and the procurement and use of Material Safety Data Sheets (MSDS).

**Performance**
1. The teacher develops instruction that uses appropriate materials and ensures a safe environment.
2. The teacher creates and ensures a safe learning environment by including appropriate documentation of activities.
3. The teacher makes informed decisions about the use of specific chemicals or performance of a lab activity regarding facilities and student age and ability.
4. The teacher models safety at all times.
5. The teacher makes use of Material Safety Data Sheet (MSDS) and storage information for laboratory materials.
6. The teacher creates lesson plans and teaching activities consistent with appropriate safety considerations.
7. The teacher evaluates lab and field activities for safety.
8. The teacher evaluates a facility for compliance to safety regulations.
9. The teacher uses safety procedures and documents safety instruction.
10. The teacher demonstrates the ability to acquire, use, and maintain materials and lab equipment.
11. The teacher implements laboratory, field, and demonstration safety techniques.

**Biology**

*Principle 1: Knowledge of Subject Matter* - *The teacher understands the central concepts, tools of inquiry, and structures of the discipline taught and creates learning experiences that make these aspects of subject matter meaningful for students.*

**Knowledge**

1. The teacher understands that there are unifying themes in biology, including levels from molecular to whole organism.
2. The teacher knows the currently accepted taxonomy systems used to classify living things.
3. The teacher understands scientifically accepted theories of how living systems evolve through time.
4. The teacher understands how genetic material and characteristics are passed between generations and how genetic material guide cell and life processes.
5. The teacher knows biochemical processes that are involved in life functions.
6. The teacher knows that living systems interact with their environment and are interdependent with other systems.
7. The teacher understands that systems in living organisms maintain conditions necessary for life to continue.
8. The teacher understands the cell as the basis for all living organisms and how cells carry out life functions.
9. The teacher understands how matter and energy flow through living and non-living systems.
10. The teacher knows how the behavior of living organisms changes in relation to environmental stimuli.

1.1 Required course syllabi and Praxis II scores provide evidence that teacher candidates demonstrate adequate of understanding of biology content and the nature of biological knowledge.

**Performance**

1. The teacher prepares lessons that help students understand the flow of matter and energy through living systems.
2. The teacher assists students in gaining an understanding of the ways living things are interdependent.
3. The teacher assists students in understanding how living things impact/change their environment and how the physical environment impacts(changes living things.
4. The teacher helps students understand how the principles of genetics apply to the flow of characteristics from one generation to the next.
5. The teacher helps students understand how genetic “information” is translated into living tissue and chemical compounds necessary for life.
6. The teacher helps students understand accepted scientific theories of how life forms have evolved through time and the principles on which these theories are based.
7. The teacher helps students understand the ways living organisms are adapted to their environments.
8. The teacher helps students understand the means by which organisms maintain an internal environment that will sustain life.
9. The teacher helps students classify living organisms into appropriate groups by the current scientifically accepted taxonomic techniques.
10. The teacher helps students understand a range of plants and animals from one-celled organisms to more complex multi-celled creatures composed of systems with specialized tissues and organs.
11. The teacher helps students develop the ability to evaluate ways humans have changed living things and the environment of living things to accomplish human purposes (e.g., agriculture, genetic engineering, dams on river systems, burning fossil fuels, seeding clouds, and making snow).
12. The teacher helps students understand that the cell, as the basis for all living organisms, carries out life functions.

Chemistry

Standard 1: Knowledge of Subject Matter - The teacher understands the central concepts, tools of inquiry, and structures of the discipline taught and creates learning experiences that make these aspects of subject matter meaningful for students.

Knowledge
1. The teacher has a broad knowledge of mathematical principles, including calculus, and is familiar with the connections that exist between mathematics and chemistry.
2. The teacher understands the subdivisions and procedures of chemistry and how they are used to investigate and explain matter and energy.
3. The teacher understands that chemistry is often an activity organized around problem solving and demonstrates ability for the process.
4. The teacher understands the importance of accurate and precise measurements in chemistry and reports measurements in an understandable way.
5. The teacher understands the importance of accurate and precise measurements in science and reports measurements in an understandable way.
6. The teacher knows matter contains energy and is made of particles (subatomic, atomic and molecular).
7. The teacher can identify and quantify changes in energy and structure.
8. The teacher understands the historical development of atomic and molecular theory.
9. The teacher knows basic chemical synthesis to create new molecules from precursors.
10. The teacher understands the organization of the periodic table and can use it to predict physical and chemical properties.
11. The teacher knows the importance of carbon chemistry and understands the nature of chemical bonding and reactivity of organic molecules.
12. The teacher understands the electronic structure of atoms and molecules and the ways quantum behavior manifests itself at the molecular level.
13. The teacher has a fundamental understanding of quantum mechanics as applied to model systems (e.g., particles in a box).
14. The teacher understands the role of energy and entropy in chemical reactions and knows how to calculate concentrations and species present in mixtures at equilibrium.
15. The teacher knows how to use thermodynamics of chemical systems in equilibrium to control and predict chemical and physical properties.
16. The teacher understands the importance of research in extending and refining the field of chemistry and strives to remain current on new and novel results and applications.

1.1 Required course syllabi, Praxis II scores, and CHEM4496 candidate work samples provide evidence that teacher candidates demonstrate an adequate understanding of chemistry content and the nature of chemical knowledge.

**Performance**

1. The teacher consistently reinforces the underlying themes, concepts, and procedures of the basic areas of chemistry during instruction, demonstrations, and laboratory activities to facilitate student understanding.
2. The teacher models the application of mathematical concepts for chemistry (e.g., dimensional analysis, statistical analysis of data, and problem-solving skills).
3. The teacher helps the student make accurate and precise measurements with appropriate units and to understand that measurements communicate precision and accuracy.
4. The teacher helps the student develop strategies for solving problems using dimensional analysis and other methods.
5. The teacher helps the student understand that matter is made of particles and energy and that matter and energy are conserved in chemical reactions.
6. The teacher helps the student understand the composition of neutral and ionic atoms and molecules.
7. The teacher helps the student learn the language and symbols of chemistry, including the symbols of elements and the procedures for naming compounds and distinguishing charged states.
8. The teacher helps the student understand the structure of the periodic table and the information that structure provides about chemical and physical properties of the elements.
9. The teacher helps the student begin to categorize and identify a variety of chemical reaction types.
10. The teacher helps the student understand stoichiometry and develop quantitative relationships in chemistry.
11. The teacher helps the student understand and apply modern atomic, electronic and bonding theories.
12. The teacher helps the student understand ionic and covalent bonding in molecules and predict the formula and structure of stable common molecules.
13. The teacher helps the student understand the quantitative behavior of gases.
14. The teacher helps the student understand and predict the qualitative behavior of the liquid and solid states and determine the intermolecular attraction of various molecules.
15. The teacher helps the student understand molecular kinetic theory and its importance in chemical reactions, solubility, and phase behavior.
16. The teacher helps the student understand the expression of concentration and the behavior and preparation of aqueous solutions.
17. The teacher helps the student understand and predict the properties and reactions of acids and bases.
18. The teacher helps the student understand chemical equilibrium in solutions.
19. The teacher helps the student understand and use chemical kinetics.
20. The teacher helps the student understand and apply principles of chemistry to fields such as earth science, biology, physics, and other applied fields.
21. The teacher helps the student learn the basic organizing principles of organic chemistry.
22. The teacher can do chemical calculations in all phases using a variety of concentration units including pH, molarity, number density, molality, mass and volume percent, parts per million and other units.
23. The teacher can prepare dilute solutions at precise concentrations and perform and understand general analytical procedures and tests, both quantitative and qualitative.
24. The teacher can use stoichiometry to predict limiting reactants, product yields and determine empirical and molecular formulas.
25. The teacher can correctly name acids, ions, inorganic and organic compounds, and can predict the formula and structure of stable common compounds.
26. The teacher can identify, categorize and understand common acid-base, organic and biochemical reactions.
27. The teacher can demonstrate basic separations in purifications in the lab, including chromatography, crystallization, and distillation.

Foundation Standards for Social Studies Teachers

State Program Approval Rubric for Teacher Preparation Programs

Candidate Performance Relative to the Idaho Standards

The Idaho Standards for Initial Certification provide the framework for the approval of educator preparation programs. As such, the standards set the criteria by which teacher preparation programs are reviewed for state program approval.

The following rubric is used to evaluate the extent to which teacher preparation programs prepare teachers relative to the standards. The rubric is designed to be used with each content-specific preparation program (i.e., Elementary, Special Education, Secondary English, Secondary Science–Biology, etc.).

Consistent with NCATE accreditation standards, the rubric describes three levels of performance (i.e., unacceptable, acceptable, and target) for each of the Idaho Standards for Initial Certification. The rubric shall be used to make holistic judgments. Performance indicators provide the lens through which the State Program Approval Team evaluates the institution’s provided evidence that candidates meet the Idaho standards. The institution is expected to provide information about candidate performance related to the Idaho Standards for Initial Preparation of Professional School Personnel.

**Standard 1: Knowledge of Subject Matter - The teacher understands the central concepts, tools of inquiry, and structures of the discipline taught and creates learning experiences that make these aspects of subject matter meaningful for students.**

**Knowledge**

1. The teacher has a broad knowledge base of the social studies and related disciplines (e.g., history, economics, geography, political science, behavioral sciences, and humanities).
2. The teacher understands the ways various governments and societies have changed over time.
3. The teacher understands ways in which independent and interdependent systems of trade and production develop.
4. The teacher understands the impact that cultures, religions, technologies, social movements, economic systems, and other factors have on civilizations.
5. The teacher understands the responsibilities and rights of citizens in the United States political system, and how citizens exercise those rights and participate in the system.
6. The teacher understands geography affects relationships between people, and environments over time.
7. The teacher understands the appropriate use of primary and secondary sources (i.e., documents, artifacts, maps, graphs, charts, tables, and statistical data) in interpreting social studies concepts.
1.1 Due to the lack of content area syllabi and student work samples, the program provides little evidence that teacher candidates demonstrate adequate knowledge of the social studies disciplines. No courses aligning to knowledge were listed. Passing Praxis II scores indicate candidate knowledge; however these scores were unsupported by course syllabi.

**Performance**
1. The teacher demonstrates chronological historical thinking
2. The teacher compares and contrasts various governments and cultures in terms of their diversity, commonalities, and interrelationships.
3. The teacher integrates knowledge from the social studies in order to prepare students to live in a world with limited resources, cultural pluralism, and increasing interdependence.
4. The teacher incorporates current events, global perspectives, and scholarly research into the curriculum.
5. The teacher uses primary and secondary sources (i.e., documents, artifacts, maps, graphs, charts, tables, and data interpretation) when presenting social studies concepts.

1.2 Interviewing teacher candidates and completers, in addition to multiple rubrics and student teaching unit plans, provide evidence of adequate preparation for candidates to create quality learning experiences. The evidence provided indicates candidates are able to draw from multiple sources, primary and secondary, to create lessons that discuss the concepts surrounding the world’s history, cultures, the influences on populations, and interdependencies.

**Standard 2: Knowledge of Human Development and Learning - The teacher understands how students learn and develop, and provides opportunities that support their intellectual, social, and personal development.**

**Knowledge**
1. The teacher understands the influences that contribute to intellectual, social, and personal development.
2. The teacher understands the impact of student environment on student learning.
2.1 Due to the lack of content syllabi and student work samples, there was little evidence that teacher candidates demonstrate adequate knowledge of the social studies disciplines. Passing Praxis II scores indicate candidate knowledge; however these scores were unsupported by course syllabi.

**Performance**
1. The teacher provides opportunities for students to engage in civic life, politics, and government.

2.2 Interviewing teacher candidates and completers and multiple rubrics and student teaching unit plans provide evidence of adequate preparation for candidates to create quality learning experiences. The evidence provided indicates candidates are able to provide students with opportunities for engagement in civic life, politics, and government relevant to the social sciences.

**Areas for Improvement:**
Areas 1.1 and 2.1 rely on Praxis II performance data and student teaching artifacts to demonstrate candidate competency. While these are supportive to demonstrating candidate knowledge, actual course lists, syllabi, and content course work samples are needed to adequately demonstrate candidate content knowledge.
Economics

Standard 1: Knowledge of Subject Matter - The teacher understands the central concepts, tools of inquiry, and structures of the discipline taught and creates learning experiences that make these aspects of subject matter meaningful for students.

Knowledge
1. The teacher understands basic economic concepts and models (e.g., scarcity, productive resources, voluntary exchange, unemployment, supply and demand credit/debt, market incentives, interest rate, and imports/exports).
2. The teacher understands the functions of money.
3. The teacher understands economic systems and the factors that influence each system (e.g., culture, values, belief systems, environmental and geographic impacts, and technology).
4. The teacher knows different types of economic institutions and how they differ from one another (e.g., business structures, stock markets, banking institutions, and labor unions).
5. The teacher understands how economic institutions shaped history and influence current economic practices.
6. The teacher understands the principles of sound personal finance and entrepreneurship.
7. The teacher understands fiscal and monetary policy.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.1 Knowledge Understanding Matter</td>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

1.1 The program provides little evidence that teacher candidates possess adequate understanding of basic economic concepts. The students are not required to take a foundational history of economics course that provides background economic knowledge, including but not limited to: culture, values, belief systems, environmental and geographic impacts, labor unions, etc. Foundational knowledge and understanding of economics was not evident in student work. Additionally, based on low enrollment and a low number of passing Praxis II scores, evidence provided was insufficient.

Performance
1. The teacher demonstrates comprehension and analysis of economic principles and concepts.
2. The teacher engages students in the application of economic concepts in their roles as consumers, producers, and workers.
3. The teacher uses graphs, models, and equations to illustrate economic concepts.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.2 Performance Making Subject Matter Meaningful</td>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
1.2 Based on a very limited amount of student work samples and evidence, the program provided little evidence the teacher candidates possess the ability to engage students in the application of economic concepts.

Recommended Action on Economics:

- Approved
- Approved Conditionally
- X Not Approved

Areas for Improvement:

Area 1.1 relies on Praxis II performance data and student teaching artifacts to demonstrate candidate competency. While these are supportive in demonstrating candidate knowledge, actual course lists, syllabi, and content course work samples are needed to adequately demonstrate candidate content knowledge. Additionally, the low number of completers limits the usefulness of the Praxis II scores. The fundamentals of economics are not present in the only required course work for economics. This foundational content is given in an elective economics course, The History of Economics Econ 3323.
Government and Civics

Standard 1: Knowledge of Subject Matter - The teacher understands the central concepts, tools of inquiry, and structures of the discipline taught and creates learning experiences that make these aspects of subject matter meaningful for students.

Knowledge
1. The teacher understands the relationships between civic life, politics, and government.
2. The teacher understands the foundations of government and constitutional and principles of the United States political system.
3. The teacher understands the organization of local, state, federal, and tribal governments, and how power and responsibilities are organized, distributed, shared, and limited as defined by the United States Constitution.
4. The teacher understands the importance of international relations (e.g., evolution of foreign policy, national interests, global perspectives, international involvements, human rights, economic impacts, and environmental issues).
5. The teacher understands the role of public policy in shaping the United States political system.
6. The teacher understands the civic responsibilities and rights of all individuals in the United States (e.g., individual and community responsibilities, participation in the political process, rights and responsibilities of non-citizens, and the electoral process).
7. The teacher understands the characteristics of effective leadership.

1.1 Due to the lack of content syllabi and student work samples, the program provides little evidence that teacher candidates demonstrate adequate knowledge of government and civics. No courses aligning to knowledge were listed. Passing Praxis II scores indicate candidate knowledge; however these scores were unsupported by course syllabi.

Performance
1. The teacher promotes student engagement in civic life, politics, and government.
2. The teacher demonstrates comprehension and analysis of the foundations and principles of the United States political system and the organization and formation of the United States government.
3. The teacher demonstrates comprehension and analysis of United States foreign policy and international relations.
4. The teacher integrates global perspectives into the study of civics and government.
1.2 Interviewing teacher candidates and completers, in addition to multiple rubrics and student teaching unit plans, provide evidence of adequate preparation for candidates to create quality learning experiences. The evidence provided indicates candidates are able to provide students with opportunities for engagement in civic life, politics, and government relevant to government and civics.

**Recommended Action on Government and Civics:**

- Approved
- X Approved Conditionally
- Not Approved

**Areas for Improvement:**
Area 1.1 relies on Praxis II performance data and student teaching artifacts to demonstrate candidate competency. While these are supportive in demonstrating candidate knowledge, actual course lists, syllabi, and content course work samples are needed to adequately demonstrate candidate content knowledge.
History

Standard 1: Knowledge of Subject Matter - The teacher understands the central concepts, tools of inquiry, and structures of the discipline taught and creates learning experiences that make these aspects of subject matter meaningful for students.

Knowledge
1. The teacher understands themes and concepts in history (e.g., exploration, expansion, migration, immigration).
2. The teacher understands the political, social, cultural, and economic responses to industrialization and technological innovation.
3. The teacher understands how international relations impacted the development of the United States.
4. The teacher understands how significant compromises and conflicts defined and continue to define the United States.
5. The teacher understands the political, social, cultural, and economic development of the United States.
6. The teacher understands the political, social, cultural, and economic development of the peoples of the world.
7. The teacher understands the impact of gender, race, ethnicity, religion, and national origin on history.
8. The teacher understands the appropriate use of primary and secondary sources (i.e., documents, artifacts, maps, graphs, charts, tables, and statistical data) in interpreting social studies concepts.

<table>

</table>

1.1 Course syllabi, Praxis II scores, and student work samples provide evidence that teacher candidates possess an adequate understanding of world, national, and local history. In addition, candidates possess an understanding of how ethnicity, religion and other diversities have influenced the history of the world.

Performance
1. The teacher makes connections between political, social, cultural, and economic themes and concepts.
2. The teacher incorporates the issues of gender, race, ethnicity, religion, and national origin into the examination of history.
3. The teacher facilitates student inquiry on how international relationships impact the United States.
4. The teacher relates the role of conflicts to continuity and change across time.
5. The teacher demonstrates an ability to research, analyze, and interpret history.
1.2 Interviewing teacher candidates and completers, in addition to multiple rubrics and student teaching unit plans, provides evidence of adequate preparation for candidates to create quality learning experiences. The evidence provided indicates candidates are able to provide students with opportunities for engagement in world, national, and local history.

Special Education Generalists

State Program Approval Rubric for Teacher Preparation Programs

Candidate Performance Relative to the Idaho Standards

The Idaho Standards for Initial Certification provide the framework for the approval of educator preparation programs. As such, the standards/principles set the criteria by which teacher preparation programs are reviewed for state program approval.

In addition to the standards listed here, special education teachers must meet Idaho Core Teacher Standards and the Idaho Generalist Standards and may meet one of the following, if applicable: (1) Idaho Standards for Teachers of the Blind and Visually Impaired or (2) Idaho Standards for Teachers of the Deaf and Hard of Hearing.

The following rubric is used to evaluate the extent to which teacher preparation programs prepare teachers who meet the standards. The rubric is designed to be used with each individual preparation program (i.e., Elementary, Special Education, Secondary English, Secondary Science–Biology, etc.).

Consistent with NCATE accreditation standards, the rubric describes three levels of performance (i.e., unacceptable, acceptable, and target) for each of the Idaho Standards for Initial Certification. The rubric shall be used to make holistic judgments. Performance indicators provide the lens through which the State Program Approval Team evaluates the institution’s evidence that candidates meet the Idaho standards. The institution is expected to provide information about candidate performance related to the Idaho Standards for Special Education Generalist Teachers.

**Standard 1: Knowledge of Subject Matter - The teacher understands the central concepts, tools of inquiry, and structures of the discipline taught and creates learning experiences that make these aspects of subject matter meaningful for students.**

**Knowledge**

1. The teacher understands the theories, history, philosophies, and models that provide the basis for special education practice.
2. The teacher understands concepts of language arts in order to help students develop and successfully apply their skills to many different situations, materials, and ideas.
3. The teacher understands major concepts, procedures, and reasoning processes of mathematics in order to foster student understanding.

<table>
<thead>

<tr>
<td>Subject Matter and Structure of the Discipline</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

141
1.1 The program provides evidence that teacher candidates demonstrate adequate understanding of the benefits, strengths, and constraints of theories and educational models in special education practice. Instructional design principles focus primarily on Universal Design for Learning (UDL) (two course assignments), and partially on SRSD (learning module and discussion board). Interviews with teacher candidates indicate that they feel adequately prepared for parts of special education practice, but would like to receive more support in specific instructional practices, legal paperwork, and procedures.

**Performance**
1. The teacher demonstrates the application of theories and research-based educational models in special education practice.
2. The teacher implements best practice instruction across academic and non-academic areas to improve student outcomes.

<table>
<thead>
<tr>

<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

1.2 Through work samples, interviews, and evaluations, the program provides evidence that teacher candidates demonstrate an adequate ability to apply some of the theories and educational models of special education practice.

**Standard 2: Knowledge of Human Development and Learning** - The teacher understands how students learn and develop, and provides opportunities that support their intellectual, social, and personal development.

**Knowledge**
1. The teacher understands how the learning patterns of students with disabilities may differ from the norm.

<table>
<thead>
<tr>
<th>Element</th>

<tr>
<td>Understanding Human Development and Learning</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

2.1 The program provides evidence that teacher candidates demonstrate adequate understanding of how the learning patterns of students with disabilities may differ from the norm. Course syllabi, interviews and some observation data support this standard.

Performance
1. The teacher uses research-supported instructional strategies and practices (e.g., functional embedded skills approach, community-based instruction, task analysis, multi-sensory strategies, and concrete/manipulative techniques) to provide effective instruction in academic and nonacademic areas for students with disabilities.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>

</thead>
<tbody>
<tr>
<td>2.2 Performance Provide Opportunities for Development</td>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

2.2 The program provides little or no evidence that teacher candidates demonstrate an adequate ability to use research-supported developmentally and age-appropriate instructional strategies and practices to provide effective instruction in academic and non-academic areas for students with disabilities. Student coursework examples were provided, but multiple forms of performance-based assessments to support this standard were missing.

Standard 3: Modifying Instruction for Individual Needs - The teacher understands how students differ in their approaches to learning and creates instructional opportunities that are adapted to students with diverse needs (same as Core Rubrics).

Knowledge
1. The teacher understands strategies for accommodating and adapting curriculum and instruction for students with disabilities.
2. The teacher knows the educational implications of exceptional conditions (e.g., sensory, cognitive, communication, physical, behavioral, emotional, and health impairments).
3. The teacher knows how to access information regarding specific student needs and disability-related issues (e.g., medical, support, and service delivery).

<table>

<td></td>
<td>X</td>
<td></td>
</tr>
</tbody>
</table>

3.1 Course syllabi, interviews, Praxis II scores, and some observation data provide evidence that teacher candidates demonstrate an adequate understanding of educational implications of exceptional conditions and strategies for accommodating and adapting curriculum and instruction for students with disabilities.

Performance
1. The teacher individualizes instruction to support student learning and behavior in various settings.

2. The teacher accesses and uses information about characteristics and appropriate supports and services for students with high and low incidence disabilities and syndromes.
3. The teacher locates, uses, and shares information on special health care needs and on the effects of various medications on the educational, cognitive, physical, social, and emotional behavior of students with disabilities.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>

</thead>
<tbody>
<tr>
<td>3.2 Performance Accommodating Individual Learning Needs</td>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

3.2 The program provides little or no evidence that teacher candidates demonstrate an adequate ability to individualize instruction and provide support for student learning. The evidence provided was limited in demonstrating candidate’s ability to individualize instruction, provide academic supports for a range of exceptionalities, and specific health care needs. Student coursework examples were provided, but multiple forms of performance-based assessments to support this standard were missing.

**Standard 4: Multiple Instructional Strategies** - The teacher understands and uses a variety of instructional strategies to develop students’ critical thinking, problem solving, and performance skills.

**Knowledge**
1. The teacher understands individualized skills and strategies necessary for positive support of academic success (e.g., comprehension, problem solving, organization, study skills, test taking, and listening)
2. The teacher understands the developmental nature of social skills.
3. The teacher understands that appropriate social skills facilitate positive interactions with peers, family members, educational environments, and the community.
4. The teacher understands characteristics of expressive and receptive communication and the effect this has on designing social and educational interventions.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>4.1 Knowledge Understanding of multiple learning strategies</td>
<td></td>
<td>X</td>
<td></td>
</tr>
</tbody>
</table>

4.1 Course syllabi, interviews, Praxis II scores and some observation data provide evidence that teacher candidates demonstrate an adequate understanding of how to design and implement instructional programs to support academic and social development of students with disabilities.
Performance
1. The teacher demonstrates the ability to teach students with disabilities in a variety of educational settings.
2. The teacher designs, implements, and evaluates instructional programs that enhance a student’s participation in the family, the school, and community activities.
3. The teacher advocates for and models the use of appropriate social skills.
4. The teacher provides social skills instruction that enhances student success.
5. The teacher creates an accessible learning environment through the use of assistive technology.
6. The teacher demonstrates the ability to implement strategies that enhance students’ expressive and receptive communication.

<table>
<thead>
<tr>

</table>

4.2 The program provides little or no evidence that teacher candidates demonstrate an adequate ability to design and implement instructional programs to support academic and social development of students with disabilities. Performance-based assessment data were provided at the individual candidate level, but the evidence was limited in supporting the comprehensiveness of this standard. Student coursework examples were provided, but multiple forms of performance-based assessments to support this standard were missing.

Standard 5: Classroom Motivation and Management Skills - The teacher understands individual and group motivation and behavior and creates a learning environment that encourages positive social interaction, active engagement in learning, and self-motivation.

Knowledge
1. The teacher understands applicable laws, rules, regulations, and procedural safeguards regarding behavior management planning for students with disabilities.
2. The teacher understands applied behavioral analysis and ethical considerations inherent in behavior management (e.g., positive behavioral supports, functional behavioral assessment, behavior plans).
3. The teacher understands characteristics of behaviors concerning individuals with disabilities (e.g., self-stimulation, aggression, non-compliance, self-injurious behavior).
4. The teacher understands the theories and application of conflict resolution and crisis prevention/intervention.
5. The teacher understands that students with disabilities may require specifically designed strategies for motivation and instruction in socially appropriate behaviors and self-control.
5.1 Course syllabi, interviews, Praxis II scores and some observation data provide evidence that teacher candidates demonstrate adequate knowledge of theories of behavior concerning students with disabilities.

**Performance**
1. The teacher modifies the learning environment (e.g., schedule, transitions, and physical arrangements) to prevent inappropriate behaviors and enhance appropriate behaviors.
2. The teacher coordinates the implementation of behavior plans with all members of the educational team.
3. The teacher creates an environment that encourages self-advocacy and increased independence.
4. The teacher demonstrates a variety of effective behavior management techniques appropriate to students with disabilities.
5. The teacher designs and implements positive behavior intervention strategies and plans appropriate to the needs of the individual student.

5.2 The program provides little or no evidence that teacher candidates demonstrate an adequate ability to develop and implement positive behavior supports for students with disabilities. Student coursework examples were provided, but multiple forms of performance-based assessments to support this standard were missing. The content in the coursework examples do not fully support the comprehensiveness of this standard.

**Standard 6: Communication Skills** - The teacher uses a variety of communication techniques to foster inquiry, collaboration, and supportive interaction in and beyond the classroom

**Knowledge**
1. The teacher understands the characteristics of normal, delayed, and disordered communication and their effect on participation in educational and community environments.
2. The teacher knows strategies and techniques that facilitate communication for students with disabilities.

<table>

</tr>
</tbody>
</table>

6.2 The program provides evidence that teacher candidates demonstrate an adequate ability to use a variety of verbal and non-verbal communication techniques that expand the communication skills of students with disabilities.

Standard 7: Instructional Planning Skills – The teacher plans and prepares instruction based on knowledge of subject matter, students, the community, and curriculum goals (same as Core Rubrics).

Knowledge
1. The teacher understands curricular and instructional practices used in the development of academic, social, language, motor, cognitive, and affective skills for students with disabilities.
2. The teacher understands curriculum and instructional practices in self-advocacy and life skills relevant to personal living and participation in school, community, and employment.
3. The teacher understands the general education curriculum and state standards developed for student achievement.
7.1 The program provides evidence that teacher candidates demonstrate an adequate understanding of curricular and instructional practices used in the development of skills for students with disabilities. Course syllabi suggest limited preparation for specific instructional practices, but the observation data indicate very limited applications of instructional practices.

**Performance**

1. The teacher develops comprehensive, outcome-oriented Individual Education Plans (IEP) in collaboration with IEP team members.
2. The teacher conducts task analysis to determine discrete skills necessary for instruction and to monitor student progress.
3. The teacher evaluates and links the student’s skill development to the general education curriculum.
4. The teacher develops and uses procedures for monitoring student progress toward individual learning goals.
5. The teacher uses strategies for facilitating maintenance and generalization of skills across learning environments.
6. The teacher, in collaboration with parents/guardians and other professionals, assists students in planning for transition to post-school settings.
7. The teacher develops opportunities for career exploration and skill development in community-based settings.
8. The teacher designs and implements instructional programs that address independent living skills, vocational skills, and career education for students with disabilities.
9. The teacher considers issues related to integrating students with disabilities into and out of special centers, psychiatric hospitals, and residential treatment centers and uses resources accordingly.

<table>

</table>
7.2 The program provides little or no evidence that teacher candidates demonstrate an adequate ability to design and implement individualized instructional programs for students with disabilities. Student coursework examples were provided, but multiple forms of performance-based assessments and implementation of instruction to support this standard were missing.

Standard 8: Assessment of Student Learning - The teacher understands, uses, and interprets formal and informal assessment strategies to evaluate and advance student performance and to determine program effectiveness.

Knowledge
1. The teacher understands the legal provisions, regulations, and guidelines regarding assessment of students with disabilities.
2. The teacher knows the instruments and procedures used to assess students for screening, pre-referral interventions, and following referral for special education services.
3. The teacher understands how to assist colleagues in designing adapted assessments.
4. The teacher understands the relationship between assessment and its use for decisions regarding special education service and support delivery.
5. The teacher knows the ethical issues and identification procedures for students with disabilities, including students from culturally and linguistically diverse backgrounds.
6. The teacher knows the appropriate accommodations and adaptations for state and district assessments.

</table>

8.1 Course syllabi, interviews, Praxis II scores and some observation data provide evidence that teacher candidates demonstrate an adequate understanding of the instruments and procedures that comply with legal and ethical concerns regarding the assessment of students with disabilities.

Performance
1. The teacher analyzes assessment information to identify student needs and to plan how to address them in the general education curriculum.
2. The teacher collaborates with families and professionals involved in the assessment of students with disabilities.
3. The teacher gathers background information regarding academic, medical, and social history.
4. The teacher uses assessment information in making instructional decisions and planning individual programs that result in appropriate placement and intervention for all students with disabilities, including those from culturally or linguistically diverse backgrounds.
5. The teacher facilitates and conducts assessments related to secondary transition planning, supports, and services.
6. The teacher participates as a team member in creating the assessment plan that may include ecological inventories, portfolio assessments, functional assessments, and high and low assistive technology needs to accommodate students with disabilities.

9.2 Course syllabi, interviews, Praxis II scores and some observation data provide minimal but sufficient evidence that teacher candidates display an adequate ability to practice within the Council for Exceptional Children Code of Ethics and other standards and policies of the profession.

**Standard 10: Partnerships** - The teacher interacts in a professional, effective manner with colleagues, parents, and other members of the community to support students’ learning and well-being (same as Core Rubrics).
Knowledge
1. The teacher understands current federal and state laws pertaining to students with disabilities, including due process rights related to assessment, eligibility, and placement.
2. The teacher understands variations of beliefs, traditions, and values regarding disability across cultures and the effect of these on the relationship among the student, family, and school.
3. The teacher knows the rights and responsibilities of parents/guardians, students, teachers, professionals, and schools as they relate to students with disabilities.
4. The teacher is aware of factors that promote effective communication and collaboration with students, parents/guardians, colleagues, and the community in a culturally responsive manner.
5. The teacher is familiar with the common concerns of parents/guardians of students with disabilities and knows appropriate strategies to work with parents/guardians to deal with these concerns.
6. The teacher knows the roles of students with disabilities, parents/guardians, teachers, peers, related service providers, and other school and community personnel in planning and implementing an individualized program.
7. The teacher knows how to train or access training for paraprofessionals.
8. The teacher knows about services, networks, and organizations for individuals with disabilities and their families, including advocacy and career, vocational, and transition support.

10.1 Course syllabi, interviews, Praxis II scores and some observation data provide evidence that teacher candidates demonstrate an adequate understanding of the roles of students with disabilities, parents/guardians, teachers, peers, and other school and community personnel in planning an individualized program support this standard.

Performance
1. The teacher facilitates communication between the educational team, students, their families, and other caregivers.
2. The teacher trains or accesses training for paraprofessionals.
3. The teacher collaborates with team members to develop effective student schedules.
4. The teacher communicates the benefits, strengths, and constraints of special education services.
5. The teacher creates a manageable system to maintain all program and legal records for students with disabilities as required by current federal and state laws.
6. The teacher encourages and assists families to become active participants in the educational team (e.g., participating in collaborative decision making, setting instructional goals, and charting progress).

7. The teacher collaborates and consults with the student, the family, peers, regular classroom teachers, related service personnel, and other school and community personnel in integrating students with disabilities into various learning environments.

8. The teacher communicates with regular classroom teachers, peers, the family, the student, administrators, and other school personnel about characteristics and needs of students with disabilities.

9. The teacher participates in the development and implementation of rules and appropriate consequences at the classroom and school wide levels.

**Recommended Action on Special Education Generalist:**

- Approved
- X Approved Conditionally
- Not Approved

**Areas for Improvement:**

One important area for improvement is developing a formal system of teacher preparation. The SPED 4495 Student Teaching Internship syllabus (field guide) uploaded to the Taskstream evidence room for Standards 1-2, 4-5, and 7-10 has not been revised since 2011, and is based on the ‘old’ certification standards (which are not used for licensure anymore). The coursework included in the 4495 syllabus requires a variety of assignments, and examples of some of these assignments were provided, suggesting that this is the field guide currently in use. For this reviewer, it was not clear what is expected of special education teacher candidates during their internship/student teaching year. The provided evidence suggests that formal systems are in the process of being built, but this evidence only goes back to 2014.
Specific types of evidence (i.e., syllabi and coursework) provided were substantial in parts, but these forms of evidence alone were not enough to support the robustness of some standards, especially those based in instruction and assessment. For example, interviews with teacher candidates indicate that they are evaluated on the Framework for Teaching in their field experience by both their liaisons and cooperating teachers. Interviews with university supervisors and partner schools also indicated that candidates are evaluated (and that some supervisors complete the Danielson certified rater training). However, a formal system that includes evaluation data in addition to accompanying lesson plans and evidence of observations (i.e., videos), does not appear to be in place.

State Program Approval Rubric for Teacher Preparation Programs

Candidate Performance Relative to the Idaho Standards

The Idaho Standards for Initial Certification provide the framework for the approval of educator preparation programs. As such, the standards set the criteria by which teacher preparation programs are reviewed for state program approval.

The following rubric is used to evaluate the extent to which teacher preparation programs prepare teachers relative to the standards. The rubric is designed to be used with each content-specific preparation program (i.e., Elementary, Special Education, Secondary English, Secondary Science–Biology, etc.).

Consistent with NCATE accreditation standards, the rubric describes three levels of performance (i.e., unacceptable, acceptable, and target) for each of the Idaho Standards for Initial Certification. The rubric shall be used to make holistic judgments. Performance indicators provide the lens through which the State Program Approval Team evaluates the institution’s provided evidence that candidates meet the Idaho standards. The institution is expected to provide information about candidate performance related to the Idaho Standards for Initial Preparation of Professional School Personnel.

Standard 1: Knowledge of Subject Matter - The teacher understands the central concepts, tools of inquiry, and structures of the discipline taught and creates learning experiences that make these aspects of subject matter meaningful for students.

Knowledge
1. The teacher understands the theories, history, philosophies, and models that provide the basis for education of the deaf and/or hard of hearing.
2. The teacher knows the various educational placement options that are consistent with program philosophy and how they impact a deaf and/or hard of hearing student’s cultural identity and linguistic, academic, social, and emotional development.
3. The teacher understands the complex facets regarding issues related to deaf and/or hard of hearing individuals and working with their families (e.g., cultural and medical perspectives).

<table>

<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.1 Knowledge Subject Matter and Structure of the Discipline</td>
<td></td>
<td>X</td>
<td></td>
</tr>
</tbody>
</table>
1.1 An interview with faculty, course syllabi, and candidate work samples provide minimal evidence that teacher candidates demonstrate adequate understanding of subject matter and structure of the discipline. It is noted that syllabi contained course descriptions and referenced Idaho standards; however, the majority of them did not include course outcomes or objectives. In addition, several assessments (mid-term and final exams) were knowledge based and lacked rigor.

**Performance**
1. The teacher uses the tools, models, and strategies appropriate to the needs of students who are deaf and/or hard of hearing.
2. The teacher communicates the benefits, strengths, and constraints of educating the deaf and/or hard of hearing (e.g., cochlear implants, hearing aids, other amplification usage, sign language systems, use of technologies, and communication modalities).

<td></td>
<td></td>
</tr>
</tbody>
</table>

1.2 Due to lack of completers and/or current candidates, the program provides little or no evidence that teacher candidates demonstrate an adequate ability to create learning experiences that make these aspects of subject matter meaningful for students.

**Standard 2: Knowledge of Human Development and Learning - The teacher understands how students learn and develop, and provides opportunities that support their intellectual, social, and personal development.**

**Knowledge**
1. The teacher understands how etiology, age of onset, and degree of hearing loss impact a student’s language development and ability to learn.
2. The teacher understands that being deaf and/or hard of hearing alone does not necessarily preclude normal academic development, cognitive development, or communication ability.
3. The teacher understands how learning and language development occur and the impact of instructional choices on deaf and/or hard of hearing students so they achieve age appropriate levels of literacy.

<table>

2.2 Due to lack of completers and/or current candidates, the program provides little or no evidence that teacher candidates demonstrate an adequate ability to provide opportunities that support the intellectual, social, and personal development of students.

**Standard 3: Modifying Instruction for Individual Needs - The teacher understands how students differ in their approaches to learning and creates instructional opportunities that are adapted to students with diverse needs.**

**Knowledge**
1. The teacher understands how hearing loss may impact student development (i.e., sensory, cognitive, communication, physical, behavioral, social, and emotional).
2. The teacher knows the characteristics and impacts of hearing loss, and the subsequent need for alternative modes of communication and/or instructional strategies.
3. The teacher understands the need for accommodation for English language learning for students whose native language is American Sign Language (ASL).
4. The teacher understands that an IEP for deaf/hard of hearing students should consider the following: communication needs and the student and family’s preferred mode of communication; linguistic needs; severity of hearing loss and potential for using residual hearing; academic level; and social, emotional, and cultural needs, including opportunities for peer interactions and communication (i.e., Federal Policy Guidance, October 30, 1993).

3.2 Due to lack of completers and/or current candidates, the program provides little or no evidence that teacher candidates demonstrate an adequate ability to individualize instruction and provide support for student learning.

Standard 4: Multiple Instructional Strategies - The teacher understands and uses a variety of instructional strategies to develop students’ critical thinking, problem solving, and performance skills.

Knowledge
1. The teacher knows how to enhance instruction through the use of visual materials and experiential activities to increase outcomes for students who are deaf and/or hard of hearing.

4.2 Due to lack of completers and/or current candidates, the program provides little or no evidence that teacher candidates demonstrate an adequate ability to use a variety of instructional strategies to develop student learning.

Standard 5: Classroom Motivation and Management Skills - The teacher understands individual and group motivation and behavior and creates a learning environment that encourages positive social interaction, active engagement in learning, and self-motivation.

Knowledge
1. The teacher understands the unique social and emotional needs of students who are deaf and/or hard of hearing and knows strategies to facilitate the development of healthy self-esteem.
2. The teacher understands that deaf cultural factors, communication challenges, and family influences impact classroom management of students.
3. The teacher understands the role of and the relationship among the teacher, interpreter, and student.

<table>

It is noted that syllabi contained course descriptions and referenced Idaho standards; however, the majority of them did not include course outcomes or objectives. In addition, several assessments (mid-term and final exams) were knowledge based and lacked rigor.

Performance
1. The teacher designs a classroom environment to maximize opportunities for students’ visual and/or auditory learning.
2. The teacher plans and implements instruction for students who are deaf and/or hard of hearing and have multiple disabilities.
3. The teacher prepares students for the appropriate use of interpreters.

<table>

5.2 Due to lack of completers and/or current candidates, the program provides little or no evidence that teacher candidates demonstrate an adequate ability to create a learning environment that encourages positive social interaction, active engagement in learning, and self-motivation.

Standard 6: Communication Skills - The teacher uses a variety of communication techniques to foster learning and communication skills in the classroom.

Knowledge
1. The teacher understands the role of the interpreter and the use and maintenance of assistive devices.
2. The teacher knows resources, materials, and techniques relevant to communication choices (e.g., total communication, cued speech, ASL, aural/oral, hearing aids, cochlear implants, augmentative and assistive equipment, FM systems, and closed captioning).

<table>

6.2 Due to lack of completers and/or current candidates, the program provides little or no evidence that teacher candidates demonstrate an adequate ability to use a variety of communication techniques to foster learning and communication skills in the classroom.

Standard 8: Assessment of Student Learning – The teacher understands, uses, and interprets formal and informal assessment strategies to evaluate and advance student performance and to determine teaching effectiveness.

Knowledge
1. The teacher knows specialized terminology used in the assessment of students who are deaf and/or hard of hearing.
2. The teacher knows the appropriate accommodations for the particular degree of hearing loss.
3. The teacher understands the components of an adequate evaluation for eligibility, placement, and program planning decisions for students (e.g., interpreters and special tests).

<table>

8.1 An interview with faculty, course syllabi, and candidate work samples provide minimal evidence that teacher candidates demonstrate an adequate understanding of assessment of student learning. It is noted that several assessments (mid-term and final exams) were knowledge based and lacked rigor.

Performance
1. The teacher participates in the design of appropriate assessment tools that use the natural, native, or preferred language of the student who is deaf and/or hard of hearing.
2. The teacher gathers and analyzes communication samples to determine nonverbal and linguistic skills of students who are deaf and/or hard of hearing as a function of appropriate academic assessment.
Element	Unacceptable	Acceptable	Target
---
8.2 Performance Using and Interpreting Program and Student Assessment Strategies	X

8.2 Due to lack of completers and/or current candidates, the program provides little or no evidence that teacher candidates demonstrate an adequate ability to use and interprets formal and informal assessment strategies to evaluate and advance student performance and to determine teaching effectiveness.

Standard 10: Partnerships - The teacher interacts in a professional, effective manner with colleagues, parents, and other members of the community to support students’ learning and well-being.

Knowledge
1. The teacher understands the roles and responsibilities of teachers and support personnel in educational practice for deaf and/or hard of hearing students (e.g., educational interpreters, class teachers, translators, tutors, note takers, and audiologist).
2. The teacher knows resources available to help parents/guardians deal with concerns regarding educational options and communication modes/philosophies for deaf/hard of hearing children.
3. The teacher understands the effects of communication on the development of family relationships and knows strategies to facilitate communication with students who are deaf and/or hard of hearing students.
4. The teacher knows the services provided by individuals and by governmental and non-governmental agencies in the ongoing management of students who are deaf and/or hard of hearing.

Element	Unacceptable	Acceptable	Target

Recommended Action on Special Education Teachers of Students who are Deaf and/or Hard of Hearing:
- [ ] Approved
- [X] Approved Conditionally
- [ ] Not Approved

Areas for Improvement:
According to the ISU Website, the Deaf Education Graduate Courses include ten (10) courses. Two (2) of the ten (10) courses (EDHH6607 and EDHH6608) were not aligned to any of the Idaho Standards for Special Education Teachers of Students Who are Deaf and/or Hard of Hearing, nor were they included in any of the artifacts.

EDHH6627, EDHH6628, EDHH6651, EDHH6658 included the majority of the content for the Idaho Standards. The syllabi included content delivered and outcomes of the course which correlated to the standards. However, it should be noted that evidence provided seemed to indicate a low level of knowledge recall for a masters level program.
Foundation Standards for Visual and Performing Arts

State Program Approval Rubric for Teacher Preparation Programs

Candidate Performance Relative to the Idaho Standards

The Idaho Standards for Initial Certification provide the framework for the approval of educator preparation programs. As such, the standards set the criteria by which teacher preparation programs are reviewed for state program approval.

The following rubric is used to evaluate the extent to which teacher preparation programs prepare teachers relative to the standards. The rubric is designed to be used with each content-specific preparation program (i.e., Elementary, Special Education, Secondary English, Secondary Science–Biology, etc.).

Consistent with NCATE accreditation standards, the rubric describes three levels of performance (i.e., unacceptable, acceptable, and target) for each of the Idaho Standards for Initial Certification. The rubric shall be used to make holistic judgments. Performance indicators provide the lens through which the State Program Approval Team evaluates the institution’s provided evidence that candidates meet the Idaho standards. The institution is expected to provide information about candidate performance related to the Idaho Standards for Initial Preparation of Professional School Personnel.

Standard 1: Knowledge of Subject Matter – The teacher understands the central concepts, tools of inquiry, and structure of the discipline taught and creates learning experiences that make these aspects of subject matter meaningful for students.

Knowledge
1. The teacher understands the history and foundation of arts education.
2. The teacher understands the processes and content of the arts discipline being taught.
3. The teacher understands the relationships between the arts and how the arts enhance a comprehensive curriculum.
4. The teacher understands how to interpret, critique, and assess the arts discipline being taught.
5. The teacher understands the cultural and historical contexts surrounding works of art.
6. The teacher understands that the arts communicate, challenge, and influence cultural and societal values.
7. The teacher understands the aesthetic purposes of the arts and that arts involve a variety of perspectives and viewpoints (e.g., formalist, feminist, social, and political).
8. The teacher understands how to select and evaluate a range of artistic subject matter and ideas appropriate for students’ personal and/or career interests.
1.1 Syllabi, University catalog course descriptions, and Praxis II scores provide minimal evidence that teacher candidates demonstrate adequate knowledge of historical, critical, performance, and aesthetic concepts, and a technical and expressive proficiency in a particular area of the visual and performing arts. It should be noted minimal evidence (syllabi and catalog descriptions were all that were provided) from content classes made it difficult to determine candidate knowledge of these items.

**Performance**

1. The teacher provides students with a knowledge base of historical, critical, performance, and aesthetic concepts.
2. The teacher helps students create, understand, and become involved in the arts relevant to students’ interests and experiences.
3. The teacher demonstrates technical and expressive proficiency in the particular arts discipline being taught.
4. The teacher helps students identify relationships between the arts and a comprehensive curriculum.
5. The teacher provides instruction to make a broad range of art genres and relevant to students.
6. The teacher instructs students in making interpretations and judgments about their own artworks and the works of other artists.
7. The teacher creates opportunities for students to explore a variety of perspectives and viewpoints related to the arts.

1.2 Due to lack of completer and current candidate evidence available, there is little or no evidence that teacher candidates demonstrate an adequate ability to help students create, understand, and participate in the traditional, popular, folk and contemporary arts, as relevant to the students’ interests and experiences, and an ability to instruct students in interpreting and judging their own artworks, as well as the works of others. Although a few teacher work samples were available from past student interns, these did not provide adequate evidence of the ability to instruct students in interpreting and judging their own artworks as well as the works of others within the portfolios provided. Nor were there examples from traditional, popular, fold, and contemporary arts.
College/University: **Idaho State University**   Review Dates: **September 20-22, 2015**

*Standard 7: Instructional Planning Skills - The teacher plans and prepares instruction based on knowledge of subject matter, students, the community, and curriculum goals.*

**Knowledge**

1. The teacher understands state standards for the arts discipline being taught and how to apply those standards in instructional planning.
2. The teacher understands that the processes and tools necessary for communicating ideas in the arts are sequential, holistic, and cumulative.

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

7.2 Due to lack of program completer and candidate artifacts, there is little or no evidence that teacher candidates plan and prepare instruction based upon consideration of the sequential, holistic, and cumulative processes and tools necessary for the communication of ideas in the arts.

*Standard 8: Assessment of Student Learning - The teacher understands, uses, and interprets formal and informal assessment strategies to evaluate and advance student performance and to determine teaching effectiveness.*

**Knowledge**

1. The teacher understands assessment strategies specific to the creative process.
2. The teacher understands the importance of providing appropriate opportunities for students to demonstrate what they know and can do in the arts.
3. The teacher understands how arts assessments enhance evaluation and student performance across a comprehensive curriculum (e.g. portfolio, critique, performance/presentation).

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>8.1 Knowledge Assessment of Student Learning</td>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

8.1 Drama and Art content syllabi provide little or no evidence that teacher candidates demonstrate an adequate knowledge of assessment of student learning. Although teacher work sample evidence provided does some assessment evidence, the evidence does not indicate how assessment strategies are specific to the creative process, or how arts assessments enhance evaluation and student performance across a comprehensive curriculum.

**Performance**
1. The teacher assesses students' learning and creative processes as well as finished products.
2. The teacher provides appropriate opportunities for students to display, perform, and be assessed for what they know and can do in the arts.
3. The teacher provides a variety of arts assessments to evaluate student performance.

<table>
<thead>
<tr>

<tbody>
<tr>
<td>8.2 Performance Using and Interpreting Program and Student Assessment Strategies</td>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

8.2 Due to lack of program completer and candidate artifacts, little or no evidence was provided to show that teacher candidates demonstrate an adequate ability to use and interpret program and student assessment strategies.

**Standard 9: Professional Commitment and Responsibility** - The teacher is a reflective practitioner who demonstrates a commitment to professional standards and is continuously engaged in purposeful mastery of the art and science of teaching.

**Knowledge**
1. The teacher understands the importance of continued professional growth in his or her discipline.
9.1 Drama and Art content syllabi provide little or no evidence that teacher candidates demonstrate an adequate knowledge of professional commitment and responsibility as reflective practitioners.

**Performance**
1. The teacher contributes to his or her discipline (e.g., exhibits, performances, publications, and presentations).

9.2 Due to lack of program completer and candidate artifacts, little or no evidence was provided to show that teacher candidates demonstrate an adequate ability to develop in the art and science of teaching.

**Standard 10: Partnerships** - The teacher interacts in a professional, effective manner with colleagues, parents, and other members of the community to support students’ learning and well being.

**Knowledge**
1. The teacher understands appropriate administrative, financial, management, and organizational aspects specific to the school/district arts program and its community partners.
2. The teacher understands the unique relationships between the arts and their audiences.
College/University: Idaho State University  
Review Dates: September 20-22, 2015

<table>

10.2 Due to lack of program completer and candidate artifacts, little or no evidence was provided that teacher candidates demonstrate an adequate knowledge of how to promote the arts for the enhancement of the school and the community.

**Standard 11: Learning Environments - The teacher creates and manages a safe, productive learning environment.**

**Knowledge**
1. The teacher knows the procedures for safely handling, operating, storing, and maintaining the tools and equipment appropriate to his or her art discipline.
2. The teacher understands the use and management of necessary performance and exhibit technologies specific to his or her discipline.
11.1 Drama and Art content syllabi provide little or no evidence that teacher candidates demonstrate an adequate knowledge of creating and managing a safe, productive learning environment. Several Theater syllabi indicate some safety topics may be discussed, but it is not indicated if these would aide a teacher candidate in creating and managing a safe productive learning environment. None of these types of topics appeared in the art syllabi provided.

**Performance**
1. The teacher ensures that students have the skills and knowledge necessary to accomplish art task safety.
2. The teacher manages the simultaneous activities that take place daily in the arts classroom.
3. The teacher operates and manages necessary performance and exhibit technology specific to his or her discipline in a safe manner.

11.2 Due to lack of program completer and candidate artifacts, little or no evidence was provided that teacher candidates demonstrate an adequate ability to create and manage a safe, productive learning environment.
Drama

The Idaho Standards for Initial Certification provide the framework for the approval of educator preparation programs. As such, the standards set the criteria by which teacher preparation programs are reviewed for state program approval.

The following rubric is used to evaluate the extent to which teacher preparation programs prepare teachers relative to the standards. The rubric is designed to be used with each content-specific preparation program (i.e., Elementary, Special Education, Secondary English, Secondary Science–Biology, etc.).

Consistent with NCATE accreditation standards, the rubric describes three levels of performance (i.e., unacceptable, acceptable, and target) for each of the Idaho Standards for Initial Certification. The rubric shall be used to make holistic judgments. Performance indicators provide the lens through which the State Program Approval Team evaluates the institution’s provided evidence that candidates meet the Idaho standards. The institution is expected to provide information about candidate performance related to the Idaho Standards for Initial Preparation of Professional School Personnel.

**Standard 1: Knowledge of Subject Matter** - The teacher understands the central concepts, tools of inquiry, and structures of the discipline taught and creates learning experiences that make these aspects of subject matter meaningful for students.

**Knowledge**
1. The teacher knows the history of theater as a form of entertainment and as a societal influence.
2. The teacher knows the basic theories and processes of play writing.
3. The teacher understands the history and process of acting and its various styles.
4. The teacher understands the elements and purpose of design and technologies specific to the art of theater (e.g., set, make-up, costume, lighting, and sound).
5. The teacher understands the theory and process of directing theater.

</table>

1.2 Due to lack of program completer and candidate artifacts, little or no evidence was provided that teacher candidates demonstrate an adequate ability make subject matter meaningful. There has been only one drama candidate in recent years and this candidate’s work sample was provided utilizing an additional certification the candidate was seeking in English.

Standards 11: Learning Environment- The teacher creates and manages a safe, productive learning environment.

Knowledge
1. The teacher understands how to safely operate and maintain the theatre facility.
2. The teacher understands how to safely operate and maintain technical theatre equipment.
3. The teacher understands OSHA and State Safety standards specific to the discipline.
4. The teacher understands how to safely manage the requirements unique to the drama classroom (e.g. stage combat, choreography, blocking, rigging, etc.)

</table>

11.1 Drama syllabi provide little or no evidence that teacher candidates demonstrate an adequate knowledge of creating and managing a safe, productive learning environment. Several Theater syllabi indicate some safety topics may be discussed but it is not indicated if these would aide a teacher candidate in creating and managing a safe productive learning environment.
College/University: **Idaho State University**   Review Dates:  **September 20-22, 2015**

**Performance**
1. The teacher can safely operate and maintain the theatre facility.
2. The teacher can safely operate and maintain technical theatre equipment.
3. The teacher employs OSHA and State Safety standards specific to the discipline.
4. The teacher can safely manage the requirements unique to the drama classroom (e.g. stage combat, choreography, blocking, rigging, etc.)

**Areas for Improvement:**
Foundation and Enhancement Standards refer to additional knowledge and performances a teacher must know in order to teach a certain content area. The Foundation and Enhancement Standards, therefore, further "enhance" the Core Standards. For that reason, it serves that if the Foundation Standards for Visual/Performing Arts have little or no evidence of being met either in knowledge or performance, a program may not be able to produce candidates with the knowledge and skills needed to become practicing Visual Arts teachers. This would require more evidence in the areas based on the Visual Arts Foundational standards taught in courses required of a Visual Arts candidates seeking drama or art certification. Content course syllabi provided seem to be disconnected from state standards for initial teacher certification. Many syllabi did not refer to state standards at all, or if they did, the course description and/or topic descriptions did not match the standards stated. Several key syllabi were not available for the reviewer to utilize. Nor were any course work samples, samples of the candidate’s own work, or observation data made available.
Visual Arts

State Program Approval Rubric for Teacher Preparation Programs

Candidate Performance Relative to the Idaho Standards

The Idaho Standards for Initial Certification provide the framework for the approval of educator preparation programs. As such, the standards set the criteria by which teacher preparation programs are reviewed for state program approval.

The following rubric is used to evaluate the extent to which teacher preparation programs prepare teachers relative to the standards. The rubric is designed to be used with each content-specific preparation program (i.e., Elementary, Special Education, Secondary English, Secondary Science–Biology, etc.).

Consistent with NCATE accreditation standards, the rubric describes three levels of performance (i.e., unacceptable, acceptable, and target) for each of the Idaho Standards for Initial Certification. The rubric shall be used to make holistic judgments. Performance indicators provide the lens through which the State Program Approval Team evaluates the institution’s provided evidence that candidates meet the Idaho standards. The institution is expected to provide information about candidate performance related to the Idaho Standards for Initial Preparation of Professional School Personnel.

Standard 1: Knowledge of Subject Matter - The teacher understands the central concepts, tools of inquiry, and structures of the discipline taught and creates learning experiences that make these aspects of subject matter meaningful for student.

Knowledge
1. The teacher understands a variety of media, styles, and techniques in multiple art forms.
2. The teacher has knowledge of individual artists’ styles and understands the historical movements and cultural contexts of those works.
3. The teacher understands the elements and principles of art and how they relate to quality in works of art.
4. The teacher understands art vocabulary, its relevance to art interpretation, its relationship to other art forms and to disciplines across the curriculum.
5. The teacher understands how to use the creative process (brainstorm, research, rough sketch, final product, and reflection) and how to write an artist’s statement.
6. The teacher understands the value of visual art as an expression of our culture and possible career choices.

Art syllabi, college catalog descriptions, and Praxis II scores indicate minimal but adequate evidence that teacher candidates demonstrate adequate knowledge of subject matter. Additional evidence from courses including assignment samples, assessment samples, or samples of the drama candidates own work within the theater would be very beneficial evidence.

**Performance**
1. The teacher applies a variety of media, styles, and techniques in multiple art forms.
2. The teacher instructs students in individual artist styles and understands historical movements and cultural context of the those work
3. The teacher applies the elements and principles of art and how they relate to quality in works of art.
4. The teacher applies art vocabulary, its relevance to art interpretation, and relationship to other art forms and to disciplines across the curriculum
5. The teacher demonstrates how to use the creative process (brainstorm, research, rough sketch, final product) and how to write an artist statement.
6. The teacher creates an emotionally safe environment for individual interpretation and expression in the visual arts.
7. The teacher makes reasoned and insightful selections of works of art to support teaching goals.
8. The teacher provides opportunities for students to collect work over time (portfolio) to reflect on their progress, and to exhibit their work.
9. The teacher creates opportunities for students to realize the value of visual art as an expression of our culture and possible career choices.

State Program Approval Rubric for Teacher Preparation Programs

Candidate Performance Relative to the Idaho Standards

The Idaho Standards for Initial Certification provide the framework for the approval of educator preparation programs. As such, the standards set the criteria by which teacher preparation programs are reviewed for state program approval.

The following rubric is used to evaluate the extent to which teacher preparation programs prepare teachers relative to the standards. The rubric is designed to be used with each content-specific preparation program (i.e., Elementary, Special Education, Secondary English, Secondary Science–Biology, etc.).

Consistent with NCATE accreditation standards, the rubric describes three levels of performance (i.e., unacceptable, acceptable, and target) for each of the Idaho Standards for Initial Certification. The rubric shall be used to make holistic judgments. Performance indicators provide the lens through which the State Program Approval Team evaluates the institution’s provided evidence that candidates meet the Idaho standards. The institution is expected to provide information about candidate performance related to the Idaho Standards for Initial Preparation of Professional School Personnel.

Standard 1: Knowledge of Subject Matter - The teacher understands the central concepts, tools of inquiry, and structures of the discipline taught and creates learning experiences that make these aspects of subject matter meaningful for students.

Knowledge
1. The teacher knows the ACTFL (American Council on the Teaching of Foreign Languages) Proficiency Guidelines for listening, speaking, reading, and writing.
2. The teacher knows the target culture(s) in which the language is used.
3. The teacher understands key linguistic structures particular to the target language and demonstrates the way(s) in which they compare to English communication patterns.
4. The teacher knows the history, arts, and literature of the target culture(s).
5. The teacher knows the current social, political, and economic realities of the countries related to the target language.
6. The teacher understands how the U.S. culture perceives the target language and culture(s).
7. The teacher understands how the U.S. is perceived by the target language culture(s).
8. The teacher understands the stereotypes held by both the U.S. and target cultures and the impacts of those beliefs.

1.1 Due to the evidence submitted that was reviewable in a language understood by the reviewer, the program provides evidence that teacher candidates demonstrate adequate understanding of state and national foreign language standards, language skills, and target cultures.

Performance
1. The teacher demonstrates advanced level speaking, reading and writing proficiencies as defined in the ACTFL Proficiency Guidelines established by the American Council on the Teaching of Foreign Languages.
2. The teacher incorporates into instruction the following activities in the target language: listening, speaking, reading, writing, and culture.
3. The teacher promotes the value and benefits of world language learning to students, educators, and the community.
4. The teacher uses the target language extensively in formal, informal, and conversational contexts and provides opportunities for the students to do so.
5. The teacher provides opportunities to communicate in the target language in meaningful, purposeful activities that simulate real-life situations.
6. The teacher systematically incorporates culture into instruction.
7. The teacher incorporates discussions of the target culture’s contributions to the students’ culture and vice-versa.
8. The teacher encourages students to understand that culture and language are intrinsically tied.

<table>

1.2 Due to the evidence submitted that was reviewable in a language understood by the reviewer, the program provides evidence that teacher candidates demonstrate adequate understanding of state and national foreign language standards, language skills, and target cultures. High percentages of passing Praxis II scores support that both the knowledge and performance of candidates is evident.

Standard 2: Knowledge of Human Development and Learning - The teacher understands how students learn and develop, and provides opportunities that support their intellectual, social, and personal development.

Knowledge
1. The teacher understands that the process of second language acquisition includes the interrelated skills of listening, speaking, reading, and writing.
2. The teacher understands that cultural knowledge is essential for the development of second language acquisition.
3. The teacher understands the skills necessary to create an instructional environment that encourages students to take the risks needed for successful language learning.

4. The teacher knows the methodologies and theories specific to second language acquisition.

5. The teacher knows university/college expectations of world languages and the life-long benefits of second-language learning.

<table>

<tbody>
<tr>
<td>2.1 Knowledge Understanding Human Development and Learning</td>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

2.1 The program provides little or no evidence that teacher candidates demonstrate an adequate understanding of the process and acquisition of second language learning, including viewing, listening, speaking, reading, and writing skills. The Teaching Foreign Languages course provides evidence of this standard, but not enough to meet the requirement of three pieces of evidence to receive an acceptable rating. Some evidence was provided in this area from the methods/practicum courses and might have been evident in the language content courses, but due the evidence being provided in a language other than English, this content was unable to be evaluated. There appears to be extensive coursework in content areas (12 credits worth of electives) that might provide additional evidence for this standard.

**Performance**

1. The teacher uses a variety of instructional strategies that incorporate culture, listening, reading, writing and speaking in the target language.

2. The teacher integrates cultural knowledge into language instruction.

3. The teacher builds on the language learning strengths of students rather than focusing on their weaknesses.

4. The teacher uses cognates, expressions, and other colloquial techniques common to English and the target language to help further the students’ understanding and fluency.

5. The teacher explains the world language entrance and graduation requirements at national colleges/universities and the general benefits of second language learning.

<table>

4.1 The program provides little or no evidence that teacher candidates demonstrate an adequate understanding of how to use and adapt authentic materials for foreign language instruction. The Teaching Foreign Languages course provides evidence of this standard, but not enough to meet the requirement of three pieces of evidence to receive an acceptable rating. Some evidence was provided in this area from the methods/practicum courses and might have been evident in the language content courses but due the evidence being provided in a language other than English this content was unable to be evaluated. There appears to be extensive coursework in content areas (12 credits worth of electives) that might provide additional evidence for this standard.

**Performance**
1. The teacher uses a variety of instructional strategies based on current research to enhance students’ understanding of the target language and culture.
2. The teacher remains current in second-language pedagogy by means of attending conferences, maintaining memberships in professional organizations, reading professional journals, and/or on-site and on-line professional development opportunities.
3. The teacher incorporates a variety of instructional tools such as technology, local experts, and on-line resources to encourage higher-level thinking skills.
4.2 Syllabi, candidate portfolios, and Praxis scores provides evidence that teacher candidates demonstrate an adequate ability to use and adapt authentic materials for foreign language instruction. High percentages of passing Praxis II scores and candidates interviews support that both the knowledge and performance of candidates and program is evident.

Standard 5: Classroom Motivation and Management Skills - Classroom Motivation and Management Skills - The teacher understands individual and group motivation and behavior and creates a learning environment that encourages positive social interaction, active engagement in learning, and self-motivation.

Knowledge
1. The teacher understands that, due to the nature of second-language acquisition, students need additional instruction in positive group/pair work and focused practice.
2. The teacher knows current practices of classroom management techniques that successfully allow for a variety of activities, such as listening and speaking, that take place in a world language classroom.

5.1 The program provides little or no evidence that teacher candidates demonstrate an adequate understanding of classroom motivation and management skills. The Teaching Foreign Languages course provides evidence of this standard, but not enough to meet the requirement of three pieces of evidence to receive an acceptable rating. Some evidence was provided in this area from the methods/practicum courses and might have been evident in the language content courses but due the evidence being provided in a language other than English this content was unable to be evaluated. There appears to be extensive coursework in content areas (12 credits worth of electives) that might provide additional evidence for this standard.

Performance
1. The teacher implements classroom management techniques that use current research-based practices to facilitate group/pair interactions and maintain a positive flow of instruction.

Foundation Standards for School Administrators

State Program Approval Rubric for Teacher Preparation Programs

Candidate Performance Relative to the Idaho Standards

The Idaho Standards for Initial Certification provide the framework for the approval of educator preparation programs. As such, the standards set the criteria by which teacher preparation programs are reviewed for state program approval.

All School Administrators, including Principals, Special Education Directors, and Superintendents, must meet the following Idaho Foundation Standards for School Administrators and the standards specific to their certification area at the “acceptable” level or above.

The following rubrics are used to evaluate the extent to which teacher preparation programs prepare administrators who meet the standards. The rubric is designed to be used with each individual preparation program (i.e., School Administrator, School District Superintendent, and Special Education Director).

Consistent with NCATE accreditation standards, the rubrics describe three levels of performance (i.e., unacceptable, acceptable, and target) for each of the Idaho Standards for Initial Certification. The rubric shall be used to make holistic judgments. Elements identified in the rubrics provide the basis upon which a State Program Approval Team evaluates the institution’s evidence that candidates meet the Idaho Standards. The institution is expected to provide information about candidate performance related to the Idaho Standards for School Administrators (and Idaho Standards for specific preparation areas, e.g., School District Superintendent, Special Education Director).

Standard 1: Visionary and Strategic Leadership - A school administrator is an educational leader who promotes the success of each students and staff member by facilitating the development, articulation, implementation, and stewardship of a vision of learning that is shared and supported by all stakeholders.

Knowledge
1. The administrator understands that each student can learn and that varied and data-informed learning goals are an important part of the process.
2. The administrator understands the principles of developing and implementing strategic plans.
3. The administrator understands systems theory and its application to educational settings.
4. The administrator knows effective individual and group communication skills.
5. The administrator knows group leadership and decision-making skills.
6. The administrator knows team-building, coaching, mediation, negotiation, and consensus-building skills.
Element | Unacceptable | Acceptable | Target
---|---|---|---
1.1 Knowledge Understanding Visionary and Strategic Leadership | | X | 

1.1 Interviews with cooperating mentors, candidates, portfolios, syllabus, handbook and list of standards provide evidence that the candidates demonstrate in-depth knowledge and understanding in this element.

**Performance**
1. The administrator facilitates processes and engages in activities that create a shared vision and mission with all stakeholders.
2. The administrator uses effective individual and group communication skills.
3. The administrator engages others to ensure that a clearly articulated strategic plan is implemented, monitored, evaluated, and revised.
4. The administrator acknowledges the contributions of the school community to the realizations of the vision and mission.
5. The administrator seeks and allocates resources to support the strategic plan.
6. The administrator models professional growth, and supports the professional growth of the community of learners.
7. The administrator makes decisions through the application of systems theory.
8. The administrator uses varied sources of information, data collection, and data analysis strategies for the purpose of planning school improvement and increasing student achievement.
9. The administrator demonstrates and encourages strategies to facilitate the improved learning of each student.
10. The administrator ensures that each student is educated in an appropriate and the least restrictive learning environment.
11. The administrator practices team building, coaching, mediation, negotiation, and consensus building.

Element | Unacceptable | Acceptable | Target
---|---|---|---
1.2 Performance Application of Visionary and Strategic Leadership | | X | 

1.2 Work samples, interviews internship summative assessments, and portfolios provide evidence that administrator candidates adequately demonstrate the ability to implement leadership concept and reflect the leadership model.
Standard 2: Instructional Leadership - The school administrator is an educational leader who promotes the success of each student by advocating, nurturing, and sustaining a school culture and instructional program conducive to student learning and staff professional growth.

Knowledge
1. The administrator understands how to enhance school culture and instructional programs through research, best practice, and curriculum design.
2. The administrator knows how to develop and implement a standards-based curriculum that aligns with assessment.
3. The administrator understands the principles of effective instruction, differentiated instruction, learning theories, motivation strategies, and positive classroom management.
4. The administrator understands student growth and development.
5. The administrator understands the effective use of assessment and evaluation.
6. The administrator understands adult learning and professional development.
7. The administrator understands the change process for systems, organizations, and individuals.
8. The administrator knows how to effectively use instructional supervision, evaluation, and due process.
9. The administrator understands community diversity and its influence on education.
10. The administrator understands the essential role of technology in education.
11. The administrator understands how to develop, implement, and evaluate co-curricular and extracurricular programs that enhance student growth and character development.

</table>

2.1 Course work, handbook, standards, feedback from mentors and candidates gave a strong example of knowledge in school culture, best practices, professional development, and student growth.

Performance
1. The school administrator oversees the development, implementation, evaluation, and refinement of curriculum and assessment based on research, best practice, teacher expertise, student and community needs, and state and national curriculum standards.
2. The administrator promotes a culture of high expectations and life-long learning for self, students, and staff.
3. The administrator promotes a school environment in which the responsibilities and contributions of students, parents/guardians, and staff members are valued.
4. The administrator promotes effective and innovative research-based instructional strategies.
5. The administrator researches a variety of information sources to make decisions that organize and align the school for success.
6. The administrator reduces barriers through proactive identification, clarification, and resolution of problems.
7. The administrator uses data to monitor student achievement.
8. The administrator supervises, evaluates, and assists teachers.
9. The administrator creates a learning environment that recognizes diversity.
10. The administrator uses and promotes technology to advance student learning, accommodate student needs, professional development, and overall school success.
11. The administrator participates in professional organizations.
12. The administrator promotes instructional goals and objectives that integrate academic, co-curricular, and extracurricular programs.

<tbody>
<tr>
<td>2.2 Performance Application of Instructional Leadership</td>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

2.2 Course syllabi, case studies, portfolios, and interviews provide evidence that candidates demonstrate adequate knowledge and application; however, resources to design, development and deliver assessment reflect an inadequacy. Candidates were given very little opportunity to be involved in student assessments, other than phone calls or speaking with students about daily performances. Candidates were given the opportunity to assess teacher performance and to perform teacher evaluations.

Standard 3: Management and Organizational Leadership—A school administrator is an educational leader who promotes a safe, efficient, and effective learning environment, and manages the organization, operations, and resources for the success of each student.

Knowledge
1. The administrator understands organizational theories.
2. The administrator understands operational policies and procedures.
3. The administrator knows school safety and security principles and issues.
4. The administrator understands human resources management.
5. The administrator knows sound fiscal operations principles and issues.
6. The administrator knows school facilities and use of space principles and issues.
7. The administrator understands legal issues impacting personnel, management, and operations.
8. The administrator understands current technologies that effectively support management functions.
9. The administrator understands principles and procedures of problem solving, conflict resolution, and group processes.
3.1 Course syllabi, lesson plans, handbook, and instructor feedback show acceptable evidence of knowledge in this element.

**Performance**

1. The administrator uses knowledge of learning, teaching, and student development in making management decisions based on current, valid research.
2. The administrator designs and manages operational and organizational procedures to maximize opportunities for successful learning.
3. The administrator uses and actively promotes problem-solving and conflict management skills and strategies that foster positive educational outcomes.
4. The administrator uses knowledge of collective bargaining and other contractual agreements.
5. The administrator implements and monitors high-quality standards related to management performances.
6. The administrator manages the operations school facilities, equipment, and support services to provide an environment conducive to learning.
7. The administrator involves stakeholders in shared decision-making.
8. The administrator recognizes potential problems and opportunities and acts on them in a timely manner.
9. The administrator uses effective communication skills.
10. The administrator aligns all resources, using appropriate technology available to maximize attainment of school and organizational goals.
11. The administrator implements records management that meets confidentiality and documentation requirements.
12. The administrator facilitates recruitment, mentoring, coaching, supervision, and evaluation of personnel to accomplish goals of the school and district.

3.2 Course syllabus, interviews with candidates and completers, portfolios, lesson plans, evaluations, and university supervisors provide evidence that candidates demonstrate a
target ability to use technology, manage conflict, use effective communications skills, collaborate, and problem solve to foster positive educational outcomes.

**Standard 4: Family and Community Partnerships**—A school administrator is an educational leader who promotes the success of all students by collaborating with families and community members, responding to diverse community interests and needs, and mobilizing community resources.

**Knowledge**
1. The administrator understands emerging issues and trends impacting families, school, and community.
2. The administrator knows resources available in the community.
3. The administrator understands public relations, successful partnerships, and marketing strategies.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>4.1 Knowledge Understanding of Family and Community Partnerships</td>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

4.1 Candidate interviews expressed lack of knowledge of community resources. Examples of using the school resource officer were given in portfolios, but no other evidence was provided from course work or syllabi for this element. Portfolios of candidates who were acting as counselors showed minor examples within their portfolios.

**Performance**
1. The administrator develops relationships with community leaders through visibility and involvement within the larger community.
2. The administrator uses relevant information about family and community concerns, expectations, and needs.
3. The administrator facilitates opportunities between the school and community to share resources.
4. The administrator establishes partnerships with area businesses, institutions of higher education, and community groups to strengthen programs and support school goals.
5. The administrator integrates community and youth/family services with school programs.
6. The administrator facilitates activities that recognize and value diversity within the family, community, school, and district.
7. The administrator develops and maintains a comprehensive network of community and media connections.
8. The administrator models and supports the use of collaborative skills.
4.2 Candidate portfolios gave examples of involvement in PTO, Christmas programs, extracurricular events, youth programs and communication with school resource officers. No other examples were provided to demonstrate an adequate ability to use resources and learning activities that support instructional and curriculum goals that reflect effective administrative practices.

**Standard 5: Professional and Ethical Leadership**—The school administrator is a professional who demonstrates personal and professional values, ethics, and integrity.

**Knowledge**
1. The administrator understands the purposes of education.
2. The administrator understands the roles of leadership.
3. The administrator understands ethical frameworks and perspectives.
4. The administrator understands the diverse values of a community.

5.1 Interviews with cooperating administrators, portfolios, student work and professional literature samples provide evidence that candidates demonstrated in-depth knowledge and understanding of this element.

**Performance**
1. The administrator behaves in a manner consistent with the values, beliefs, and attitudes that inspire others to higher levels of performance.
2. The administrator demonstrates responsibility for the learning of each student.
3. The administrator demonstrates sensitivity regarding the impact of administrative practices on others.
4. The administrator demonstrates appreciation for and sensitivity to the diversity in the school community.
6. The administrator requires ethical, professional behavior in others.
7. The administrator interacts with all individuals with consistency, fairness, dignity, and respect.
8. The administrator implements appropriate policies and facilitates procedures to protect individual rights.

<tbody>
<tr>
<td>5.2 Performance Application of Professional and Ethical Leadership</td>
<td></td>
<td>X</td>
<td></td>
</tr>
</tbody>
</table>

5.2 Ethics courses are demonstrated in syllabi across graduate and undergraduate courses. Interviewing candidates and analyzing lesson plans were the only evidence that candidates demonstrate an adequate ability in this element. Candidates expressed very little ability to practice or implement this element due to the school culture in their practical experience.

**Standard 6: Governance and Legal Leadership—A school administrator is an educational leader who promotes the success of each student by understanding, responding to, and influencing the larger political, social, economic, legal, and cultural contexts.**

**Knowledge**
1. The administrator understands the role of public education in developing and renewing a democratic society and an economically productive nation.
2. The administrator knows principles of representative governance that underpin the system of American education.
3. The administrator understands the political, social, cultural, and economic systems and processes that support and impact education.
4. The administrator understands effective models and strategies of leadership as applied to the larger political, social, cultural, and economic contexts of education.
5. The administrator understands global issues affecting teaching and learning.
6. The administrator understands the dynamics of policy development and advocacy under a democratic political system.
7. The administrator understands the importance of diversity and equity in a democratic society.
8. The administrator knows the law as related to education.
9. The administrator understands the impact of education on personal and professional opportunities, social mobility, and a democratic society.

<td></td>
<td>X</td>
</tr>
</tbody>
</table>
6.1 Course work examples, assessment, facilitated dialogue, portfolios, and interviews with candidates and program completers, demonstrated that the program provides evidence that administrator candidates have an in-depth understanding of school administrator in responding to and influencing the larger political, social, economic, legal, and cultural contexts to promote the success of each student.

Performance
1. The administrator facilitates and engages in activities to shape public policy in order to enhance education.
2. The administrator facilitates communication with the school community concerning trends, issues, and potential forces affecting education.
3. The administrator engages representatives of diverse community groups in ongoing dialogue.
4. The administrator develops lines of communication with decision-makers outside of the school community.
5. The administrator facilitates a governance system to meet local needs within the framework of policies, laws, and regulations enacted by local, state, and federal authorities.
6. The administrator adheres to the law and district policies.
7. The administrator implements appropriate policies and facilitates to protect student rights and improve student opportunities for success.

<table>
<thead>
<tr>

<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>6.2 Performance Application of Governance and Legal Leadership</td>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

6.2 The program provides little or no evidence that administrator candidates demonstrate an adequate ability to respond to and influence the larger political, social, economic, legal, and cultural contexts to promote the success of each student. Program completers expressed lack of knowledge in their performance and had only minimal exposure during their internship. Course 6612 covered this area minimally in performance data. Program completers stated this was learned through experience and expressed a need for more knowledge of special education.

Recommended Action on School Administrator:

X Approved
____ Approved Conditionally
____ Not Approved

Areas for Improvement:

- The program seems to be lacking a specific Special Education Law Course.
• The program seems to be lacking in coursework information in the area of law and district policies.
• Continue to collect data and utilize evaluations to improve course assignments and meet program standards. Continue to implement assessment methods to move more in the direction of standards based, rather than course based.
• Additional staff and program support may positively affect both the culture for candidates and foster relationships with advisees.
School Superintendents

Standard 1: Superintendent Leadership - The superintendent is the catalyst and the advocate for an effective school community; demonstrates an enhanced knowledge, thorough understanding, and performance within all six standards listed in the Idaho Foundation Standards for School Administrators; and is prepared to lead a school system with increasing organizational complexity.

Knowledge
1. The superintendent understands the dynamics of systemic change within school districts.
2. The superintendent understands the importance of questioning, innovation, and innovative thinking in order to create new educational cultures and maximize system efficiency, effectiveness, and accountability.
3. The superintendent knows the breadth of P-12 curriculum and instructional programs.
4. The superintendent knows the importance of planning, maintaining, and budgeting for adequate school facilities, personnel, support services, and effective instructional programs.
5. The superintendent understands how to facilitate processes and activities to establish and maintain an effective and efficient governance structure for school districts.
6. The superintendent knows the role of local, regional, state, national and international partnerships in the development of educational opportunities and support services for students.
7. The superintendent understands the district’s role in and responsibility for employee induction, career development, and enhancement.
8. The superintendent understands the organizational complexity of school districts.
9. The superintendent understands the dynamics of collective bargaining, mediation, arbitration, and contract management.
10. The superintendent knows the importance of districtwide policy development and effective implementation.

</table>

1.1 Knowledge evidence is target for this program and includes field interviews, quizzes, verbal participation, essay questions, journal reviews, simulations, text readings, legal briefs, research papers, and case studies. This program was recently moved into the Department of Education and is currently providing an outstanding opportunity to grow the program with a new staff member.

Performance
1. The superintendent promotes districtwide innovation and change through the application of a systems approach.
2. The superintendent accepts responsibility and promotes strategies for continuous reassessment and improved performance for each student, school, and the district as a whole.
3. The superintendent accepts responsibility for planning, maintaining, and budgeting for adequate school facilities, personnel, support services, and effective instructional programs.
4. The superintendent facilitates processes and engages in activities to promote an effective and efficient governance structure for school districts.
5. The superintendent fosters, creates, and sustains local, regional, state, national, and international partnerships as needed to enhance the opportunities for all learners.
6. The superintendent creates a system by which all employees have opportunities to seek career development and enhancement.
7. The superintendent advises the board of trustees on legal, ethical, and current educational issues.
8. The superintendent works effectively within the organizational complexity of school districts.
9. The superintendent develops and monitors the system for policy development and implementation in all facets of district operations.

Introduction

On September 20, 2015 the Idaho State University College of Education leadership team welcomed state reviewers to campus, urging them to thoroughly and critically evaluate each program within our educator preparation unit. Over the last few years, unit leadership realized that some content (delivered outside of the College of Education) needed revision. Meetings have taken place over time to help colleagues in other colleges understand the strict requirements set forth by the Professional Standards Commission to ensure adequate preparation of secondary teachers; these meetings, however, seldom resulted in significant change. The unit leadership understood that the state review of our educator preparation programs could provide us with the leverage to make the necessary changes. We even asked reviewers to focus on particular programs that we believed to be in need of revision.

We are grateful to the state review team and state observers for their commitment of time and energy to assist us with program improvement. The review was helpful to the college in a number of ways, particularly in its detailed analysis of individual programs. As hoped, the final state report did help us create a sense of urgency among our colleagues, and provided impetus for the changes we were seeking. Even more significant, it has set in motion a path for going forward that relies upon greater collaboration among colleges providing content for our educator preparation programs.

In this Response we will not be disputing any findings within the State Report. Instead, we acknowledge the opportunity for growth in three programs that did not receive approval, and herein submit new program proposals that specifically address the state’s findings. It is our sincere hope that the Standards Committee will be able to recognize the commitment to improvement that is foundational to all of these revisions, and recommend to the entire PSC an addendum to the original report granting conditional approval of all three programs based on those revisions. Such an addendum approved by the Professional Standards Commission, and submitted alongside the original state report, would allow ISU to make the appropriate curricular changes immediately without disrupting any programs.
### Program Approval Recommendations

Overview: Report of Program Findings and Remedies

The following pages address findings and remedies for programs deemed *Not Approved* by state reviewers. For each program, this section of the *Response* is made up of four areas of information designed to present the Commission with the clearest perspective possible:

- **List of Unacceptable Substandards** - Text, taken directly from the State Report, provide detail;
- **Program Recommendation and Areas for Improvement** - Program summaries found in the original state report for each unapproved program are included verbatim;
- **Actions Taken** – A brief narrative of how the problems were addressed and which university partners were involved;
- **Program Proposal in Response to Findings** – A matrix aligning new coursework to required substandards outlined in the Idaho Standards for Initial Certification of Professional School Personnel.
RESPONSE TO STATE REPORT: Idaho State University  
Program Approval Review: Conducted September 20-22, 2015

English Language Arts

A.1 Unacceptable Sub-Standards from State Report:

Standard 1: Knowledge of Subject Matter – The teacher understands the central concepts, tools of inquiry, and structures of the disciplines and creates learning experiences that make these aspects of subject matter meaningful for students.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>5.3 Knowledge Understanding Subject Matter</td>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

5.3 The knowledge provided by the English Content courses is minimal or non-existent for preparing candidates for the knowledge needed to be secondary teachers in public schools. Of the 15 standards listed above, a survey of syllabi only showed instruction dealing with standards 4-9. The standards require candidates to be prepared in reading, writing, speaking, listening, viewing, and language study, but the syllabi for the English Content are heavily based in literature only. In interviews with candidates and cooperating teachers, the same knowledge gap was identified. Elementary education candidates with an emphasis in English felt more prepared than those in the secondary education program. The candidates and the cooperating teacher all said that grammar, writing, and assessment instruction, and methods for teaching those subjects were not taught at the university, but rather were learned in the field while student teaching or while working as a first-year teacher.

Standard 2: Knowledge of Human Development and Learning – The teacher understands how students learn and develop, and provides opportunities that support their intellectual, social, and personal development.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>2.1 Knowledge Understanding Human Development and Learning</td>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

2.1 The student work samples show some understanding of the developmental processes of adolescents, but no course content syllabi, assignments, or observation data indicate how or where this knowledge is being taught to the candidates.
2.2 Observing language arts teacher candidates, analyzing student teacher work samples and interviewing candidates and a cooperating teacher show levels of development in reading and teaching literature, but evidence showing development levels in writing and speaking levels for all ability levels and diverse ways of learning for students is not evident.

Standard 4: Multiple Instructional Strategies – The teacher understands and uses a variety of instructional strategies to develop students’ critical thinking, problem solving, and performance skills.

4.1 Course content syllabi do not show any instruction for classroom strategies for improving reading comprehension or fluency. Interviews with candidates showed that instructors at the university level focus mostly on the nuances of literature and the history of a literary time period, but not on teaching strategies for understanding that can be used in the classroom. The English methods course focused only on writing three unit plans for literature that were graded. Though three books about grammar instruction and writing were required reading for the course, there was no accountability piece to show that the material had been mastered by the candidates. Student lesson plans in work samples are uneven in their presentation of strategies to use with students, and the strategies utilized are often provided by the cooperating teacher rather than having the candidate utilizing knowledge acquired from the university course work. Elementary education candidates with an emphasis in English expressed more knowledge of multiple classroom instructional strategies than candidates in the secondary education program with a major in English.
4.2 The evidence for candidates demonstrating multiple instructional strategies is uneven. Candidate interviews with elementary education with an emphasis in English expressed more experience in using instructional strategies in their early course work. Secondary English education candidates expressed a lack of ability and knowledge to implement multiple instructional strategies. The student work samples were also uneven in demonstrating use of multiple instructional strategies, and were often employing strategies suggested by the cooperating teachers.

</tr>
</tbody>
</table>
9.2 There was little or no evidence showing the candidates’ ability to develop in the art and science of teaching. It was not observable from the candidate interviews, course syllabi, student work samples, or candidate observations.

A.2 Recommended Action on English Language Arts:

_____ Approved
_____ Approved Conditionally
X Not Approved

Areas for Improvement:

The coursework for the English Language Arts Certification must be revamped to include all areas of English Language Arts including, reading, writing, including grammar, speaking, listening, and viewing. At this point the only area that is thoroughly covered is the reading of literature. Additional consideration needs to be given to the assessment and multiple instructional strategies standards in order to adequately prepare future English Language Arts teachers.

A.3 Actions Taken:

Within a week of the receipt of the State Report, COE leadership began regular meetings with key faculty from the English Department, including occasional meetings with Deans from both the College of Education and the College of Arts and Letters. When faculty in the English department realized that half of their students were education majors, and that if changes were not made immediately the health of their program would be in jeopardy, there was a clear sense of urgency to better understand the standards and remedy the deficits pointed out by the State Report. Working primarily with the English Chair, courses were carefully reviewed and aligned to the Standards, considering also the requirements of the Praxis II.

The initial proposal was vetted by all faculty responsible for teaching the recommended classes, as well as all English faculty involved in the preparation of teachers. The goal of the meetings was to ensure that each proposed class could be purposefully aligned to the standards, and that faculty understood that those standards would need to appear on each syllabi to better connect the intent of each course with the overall preparation of English teachers. With only minor revisions, this group recommended the proposal to go before the all faculty at the following English Department meeting.

COE leadership attended the full department meeting to be available to answer any questions, and explain the educator program approval process if necessary. Though some faculty resisted the implementation of strict standards as an imposition upon their academic freedoms, the majority understood the necessity of a prescribed curricular approach. Following the meeting, a ballot was sent to all faculty for approval of the changes.
RESPONSE TO STATE REPORT: Idaho State University
Program Approval Review: Conducted September 20-22, 2015

Following the vote on February 8, 2016, English Chair Dr. Jennifer Attebery wrote: “I am pleased to report that the English faculty has endorsed the proposed changes to the English Education curricula. The motion passed with 22 yes, 2 no, and 5 abstentions. Votes from both the tenure-track and lecturers produced solid super-majorities. I am producing a draft Curriculum Council document that the College of Education can use as the basis for a proposal to ISU’s Curriculum Council.” The draft document mentioned here represents the official catalog changes that will go into effect immediately should the Professional Standards Commission grant the program conditional approval.

The tables below provide an overview of the program proposal, showing alignment between coursework and standards. However, because such significant changes were necessarily made to the English program, Appendix A details the extensive shifts between the original program and the proposed program in comparing the alignment of standards before and after the state approval visit.

A.4 Program Proposal in Response to Findings:

| ENGL2211 - Intro Lit Analysis | ENGL3311 - Writing & Research about Lit|
| ENGL2257 or 58 - Survey of Wrld Lit | ENGL 2267 or 68 - Survey of Brit Lit|
| ENGL2277 or 78 - Survey of Amer Lit | ENGL 2280 - Grammar and Usage|
| ENGL2281 - Intro Lang Studies | ENGL 3327 - Spec Topic in Young Adult Lit*|
| ENGL3356 - Ethnicity in Lit | ENGL 4407 - Prof. Writing for Teachers**|
| ENGL4431 - Teaching and Writing Projects*** | ENGL 4433 - Methods Teach English***|
| ENGL44XX - Pre-1800 Period/Major Figure**** | ENGL44XX - Post-1800 Period/Major Figure+|
| ENGL4476 or 77 - Shakespeare | ENGL4487 - History English Lang|

* offered specifically as YA Literature, including selections from global literature
** pending advice from our composition/rhetoric professors, an offering specifically for teachers, to include multimodal communication as well as writing in the field of education
*** to include listening skills
**** ENGL 4461, 4462, 4463, 4464, 4465, 4473, or 4474
+ ENGL 4466, 4467, 4468, 4469, or 4472 with Post-1800 Focus

English as a New Language

B.1 Unacceptable Sub-Standards from State Report:

Standard 1: Knowledge of Subject Matter – The teacher understands the central concepts, tools of inquiry, and structures of the discipline taught and creates learning experiences that make these aspects of subject matter meaningful for students.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.2 Performance Making Subject Matter Meaningful</td>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Due to lack of completers and/or current candidates there is little or no evidence that teacher candidates demonstrate an adequate ability to make subject matter meaningful.

Standard 2: Knowledge of Human Development and Learning – The teacher understands how students learn and develop, and provides opportunities that support their intellectual, social, and personal development.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>2.2 Performance Provide Opportunities for Development</td>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Due to lack of completers and/or current candidates there is little or no evidence that teacher candidates demonstrate an adequate ability to make subject matter meaningful.

Standard 3: Modifying Instruction for Individual Needs- The teacher understands how students differ in their approaches to learning and creates instructional opportunities that are adapted to learners with diverse needs.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>3.2 Performance Accommodating Individual Learning Needs</td>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Due to lack of completers and/or current candidates there is little or no evidence that teacher candidates demonstrate an adequate ability to make subject matter meaningful.
Standard 4: Multiple Instructional Strategies- The teacher understands and uses a variety of instructional strategies to develop students’ critical thinking, problem solving, and performance skills.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>4.2 Performance Understanding and Using a Variety of Instructional Strategies</td>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

4.2 Due to lack of completers and/or current candidates there is little or no evidence that teacher candidates demonstrate an adequate ability to make subject matter meaningful.

Standard 5: Classroom Motivation and Management Skills – The teacher understands individual and group motivation and behavior and creates a learning environment that encourages positive social interaction, active engagement in learning, and self-motivation.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>5.1 Knowledge Understanding of Classroom Motivation and Management Skills</td>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

5.1 The program provides little or no evidence that teacher candidates demonstrate an adequate understanding of the influence of culture on student motivation and management skills. There is no mention of classroom management or motivation in evidence submitted under this standard.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>5.2 Performance Creating a Learning Environment that Encourages Positive Social Interaction, Active Engagement in Learning, and Self-Motivation.</td>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
5.2 Due to lack of completers and/or current candidates there is little or no evidence that teacher candidates demonstrate an adequate ability to make subject matter meaningful.

**Standard 6: Communication Skills – The teacher uses a variety of communication techniques to foster inquiry, collaboration, and supportive interaction in and beyond the classroom.**

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>6.1 Knowledge Understanding of a Variety of Communication Techniques</td>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

6.1 The program provides little or no evidence that teacher candidates demonstrate an adequate understanding or the use of a variety of communication techniques. High percentages of passing scores on the ESOL Praxis II demonstrate that candidates are knowledgeable in communication to foster inquiry collaboration, and supportive interaction in and beyond the classroom. There is evidence to support this area in assignment guidelines evidence, but not in sufficient quantity to justify an acceptable rating.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>6.2 Performance Using a Variety of Communication Techniques</td>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

6.2 Due to lack of completers and/or current candidates there is little or no evidence that teacher candidates demonstrate an adequate ability to make subject matter meaningful.

**Standard 7: Instructional Planning Skills – The teacher plans and prepares instruction based on knowledge of subject matter, students, the community, and curriculum goals.**

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>7.2 Performance Instructional Planning Skills in Connection with Students’ Needs and Community Contexts</td>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

7.2 Due to lack of completers and/or current candidates there is little or no evidence that teacher candidates demonstrate an adequate ability to make subject matter meaningful.
Standard 8: Assessment of Student Learning – The teacher understands, uses, and interprets formal and informal assessment strategies to evaluate and advance student performance and to determine program effectiveness.

8.1 The program provides little or no evidence that teacher candidates demonstrate an adequate understanding of assessment of student learning. High percentages of passing scores on the ESOL Praxis II demonstrate that candidates have knowledge of assessment specific to English language learners and English language proficiency. Candidate interviews support that there is an overall general need in the area of both formal and informal assessment. It is noted by the reviews that the state is in the initial adoption of a new ELPA and therefore has not allowed sufficient time for this content to be embedded in course content.

8.2 Due to lack of completers and/or current candidates there is little or no evidence that teacher candidates demonstrate an adequate ability to make subject matter meaningful.

Standard 9: Professional Commitment and Responsibility- The teacher is a reflective practitioner who demonstrates a commitment to professional standards and is continuously engaged in purposeful mastery of the art and science of teaching.

9.2 Due to lack of completers and/or current candidates there is little or no evidence that teacher candidates demonstrate an adequate ability to make subject matter meaningful.
Standard 10: Partnerships- The teacher interacts in a professional, effective manner with colleagues, parents, and other members of the community to support students’ learning and well-being.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>10.2 Performance Continuous Engages in Purposeful Mastery of the Art and Science of Teaching</td>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

10.2 Due to lack of completers and/or current candidates there is little or no evidence that teacher candidates demonstrate an adequate ability to make subject matter meaningful.

B.2 Recommended Action on English As A New Language:

- Approved
- Approved Conditionally
- Not Approved

Areas for Improvement:

As Idaho joins the WIDA consortium and adopts the W-APT and ACCESS 2.0 this may provide an ideal time for the design and implementation of a standalone ELL instruction and assessment course. Considering that ELLs are the fastest growing special population of students, it might be beneficial to separate ELL out of the special education course and design a general education course, for all candidates’ preparation, covering multiple components of lesson design, delivery, modification, assessment, ELL legislation (state and federal), as well as cultural competence. All of these are crucial in the education of ELLs that candidates are bound to encounter regardless of a general education, content area, or specialist placement in a school.

It is evident that the ENL methods courses are well designed, implemented, and received by candidates. Conversely, it is not evident how the other course requirements for an ENL credential connect or that they are as thoughtful and intentional. Unfortunately, a few great methods courses don’t constitute an approved program.

B.3 Actions Taken:

This program report was a bit more difficult to address, as the majority of unapproved substandards were related to performance areas. Because the program is so small, limited
performance evidence was available to reviewers, even though the inputs and knowledge standards were found to be acceptable. The COE leadership decided to focus on the three areas found to be deficit in Knowledge Standards, believing that if all knowledge standards are acceptable at the time of the next visit, the program will be approved regardless of a limited number of candidates. However, in trying to address where program changes needed to be made, another difficulty for COE leadership was the fact that candidates are highly successful on the Praxis II exam, which is the primary indicator of knowledge standards being met. This indicated that evidence of knowledge requirements may not have been adequately highlighted in the ENL syllabi, which may have been weighed equally with the Praxis scores by the reviewer.

Supplementing Knowledge Standards 5.1, 6.1, and 8.1 was addressed by working with content experts in the anthropology and English departments to add new coursework requirements to strengthen the language acquisition foundation of the program. Because the ENL program is primarily housed within the College of Education, no formal proposals had to be presented outside of the college, as was the case with the English revisions. The ENL program lead is revising syllabi to directly and purposefully show alignment to the standards and, as suggested in the Areas for Improvement section, the program lead is staying current with the WIDA Consortium.

The primary change adopted by the college, however, is the addition of a focused internship in ENL. Prior to the state visit, candidates were placed in classrooms with high ENL populations, and asked to focus lesson planning and delivery on ENL strategies. The college’s field placement department has since identified ENL endorsed teachers in our local schools who will assist us with making placements in classrooms where interventions for second language learners will be the focus of the entire practicum (EDUC 4464).

The program changes illustrated below will lead to a stronger, more focused ENL program, and catalog changes will be submitted to the Curriculum Council for immediate implementation once the PSC approves these changes.

Economics

C.1 Unacceptable Sub-Standards from State Report:

Standard 1: Knowledge of Subject Matter - The teacher understands the central concepts, tools of inquiry, and structures of the discipline taught and creates learning experiences that make these aspects of subject matter meaningful for students.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.1 Knowledge Understanding Subject Matter</td>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

1.1 The program provides little evidence that teacher candidates possess adequate understanding of basic economic concepts. The students are not required to take a foundational history of economics course that provides background economic knowledge, including but not limited to: culture, values, belief systems, environmental and geographic impacts, labor unions, etc. Foundational knowledge and understanding of economics was not evident in student work. Additionally, based on low enrollment and a low number of passing Praxis II scores, evidence provided was insufficient.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.2 Performance Making Subject Matter Meaningful</td>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

1.2 Based on a very limited amount of student work samples and evidence, the program provided little evidence the teacher candidates possess the ability to engage students in the application of economic concepts.

C.2 Recommended Action on Economics:

- Approved
- Approved Conditionally
- Not Approved

X Not Approved
RESPONSE TO STATE REPORT: Idaho State University
Program Approval Review: Conducted September 20-22, 2015

Areas for Improvement:
Area 1.1 relies on Praxis II performance data and student teaching artifacts to demonstrate candidate competency. While these are supportive in demonstrating candidate knowledge, actual course lists, syllabi, and content course work samples are needed to adequately demonstrate candidate content knowledge. Additionally, the low number of completers limits the usefulness of the Praxis II scores. The fundamentals of economics are not present in the only required course work for economics. This foundational content is given in an elective economics course, The History of Economics Econ 3323.

C.3 Actions Taken:
As with the ENL program, a low numbers of completers make it difficult to truly know where program adjustments are necessary – particularly when candidates are scoring well on the Praxis II indicating that foundational knowledge is primarily acceptable. The COE recognized the deficit in coursework related to the foundations of economic history and philosophy. Prior to the state’s visit, the recommended class, Econ 3323, was a requirement for economic majors only. The college has not produced any economics majors, and so the course syllabi was conspicuously absent during the review.

Proposed program changes include a foundations class now required for any candidate seeking an endorsement in Economics, specifically Econ 3306 in place of Econ 3323. Additionally, a personal finance class has been added as a requirement to ensure that candidates have knowledge that will allow them to assist students in directly applying content in a relevant way. The chair of the economics department worked with COE leadership to determine which courses best met candidates’ needs according to the state report, and these new requirement will go forward to curriculum council once the PSC reviews the proposed program changes.

The table below is different from the other two programs in that only one standard was found to be in deficit. The economics department worked collaboratively to align knowledge standards and performance evidence to make evident the acquisition of necessary knowledge to meet this one standard.
C.4 Program Proposal in Response to Findings:

Students are assessed with questions embedded in exams covering all the options for organizing and starting a business, the pros and cons or organizational forms and funding options.

**Personal Investment**
Students research online sources of data for common financial assets (mutual funds and stocks), compare the features of a defined contribution and defined benefit retirement plan, develop an understanding of the role of risk and individual risk tolerance in investing decisions, read and research stock and mutual fund data.

Fiscal policy, taxes

Students will understand how taxes influence aggregate economic activity by performance on tests and problem sets.

Fiscal policy, deficits and debt

Students will work with current data to understand federal budget deficits, the national debt, and the impact of changing demographics on these metrics on tests and problem sets.
Conclusion

The Idaho State University College of Education leadership thanks the Standards Committee and the entire Professional Standards Commission for considering the above changes. It is our strong desire to continuously improve our preparation program in order to best serve Idaho school districts and, most importantly, Idaho’s K-12 students. The COE is dedicated to implementing the above changes, as well as others, to meet and exceed the increasingly rigorous requirements set forth by the state in the preparation of educators.

I. Introduction

I.1 Brief Overview of the institution and the unit.

Idaho State University is a public, Carnegie-classified research high and teaching institution located in Pocatello, Idaho. The university serves over 14,000 students on its main and satellite campuses. The institution offers over 250 programs in seven major units: The colleges of arts and letters, business, education, science and engineering, and technology; the division of health sciences; and the graduate school. The student body is 56 percent female. The university is regionally accredited, has a full complement of athletic programs, and features the L.E. and Thelma E. Stephens Performing Arts Center.

The mission of ISU is to advance scholarly and creative endeavors through the creation of new knowledge, cutting-edge research, innovative artistic pursuits, and high-quality academic instruction; to use these qualities to enhance technical, undergraduate, graduate, and professional education, health
care, and other services provided to the people of Idaho, the nation, and the world; and to develop citizens who will learn from the past, think critically about the present, and provide leadership to enrich the future in a diverse, global society.

The unit is the College of Education. The college is organized into four departments, two of which prepare educators at the initial and advanced levels. These departments offer programs at the the bachelors, masters, specialist, and doctoral level. The head of the unit is the Dean of Education, and she is assisted by an associate dean. The unit in fall of 2015 had 43 faculty members and 511 candidates, 136 at the advanced level and 375 at the initial level.

The unit's mission is "Through excellence in teaching, scholarship, and service, we foster professionalism in all that we do."

Idaho has never been one of the most generous states in its support of higher education. And, as mentioned in Standard 6, ISU suffered losses during the "great recession" from which it has not fully recovered. Complicating the funding issue is that enrollment at ISU declined an average of 1.6 percent annually from 2010 to 2014. While the EPP suffered no more, probably, than any unit, none prospered.

In the midst of the recession in February 2011 the State Board of Education, which governs public higher education in Idaho and acting upon the recommendation of the university president, suspended ISU's faculty senate. This action came after years of academic governance disputes that had culminated in a four-to-one faculty vote of no confidence in the president. The Board in its action also instructed the president to "implement an interim faculty advisory structure," which led to faculty elections for this alternative group in April of that year. The faculty elected virtually the same group that had served in the suspended senate. Central administration, according to the AAUP, declined to consider the initial actions of the provisional senate, refused to give the group the keys to the senate office, and forbid the group's use of university email. The history of disputes on governance issues over years led the AAUP that June to sanction the university for "substantial noncompliance with generally accepted standards of academic governance." Open lines of communication across faculty and administration at all levels are still difficult.

<tr>
<th>1.2 Summary of state partnership that guided this visit (i.e., joint visit, concurrent visit, or an NCATE-only visit). Were there any deviations from the state protocol?</th>
</tr>
</thead>
<tbody>
<tr>
<td>The State of Idaho does not generally utilize SPA recognition processes. Rather it uses a State approval process for the recognition of programs. At the time of the NCATE team visit, virtually all of the unit's programs were approved.</td>
</tr>
<tr>
<td>This NCATE visit was a concurrent visit. A team of 15 State members, led by a senior staff person from the SEA and two of her assistants, trained team members in the approval process, and then the entire delegation reviewed the unit's programs while the NCATE team was on campus. The NCATE team was generally informed regarding what the State team recommendations were going to be. Those recommendations are positive.</td>
</tr>
<tr>
<td>The two teams' interactions, though rare, were cordial, helpful, and collaborative. To the NCATE team's knowledge, there were no deviations from the State protocol.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>1.3 Indicate the programs offered at a branch campus, at an off-campus site, or via distance learning? Describe how the team collected information about those programs (e.g., visited selected sites, talked to faculty and candidates via two-way video, etc).</th>
</tr>
</thead>
<tbody>
<tr>
<td>The unit has several on-line advanced programs and a number of blended programs at the initial and advanced levels. Faculty from the satellite campuses traveled to the main campus and participated in the</td>

</table>
onsite review. Team members viewed on-campus distance learning sites and interviewed branch campus faculty.

I.4 Describe any unusual circumstances (e.g., weather conditions, readiness of the unit for the visit, other extenuating circumstances) that affected the visit.

II. Conceptual Framework

The conceptual framework establishes the shared vision for a unit’s efforts in preparing educators to work effectively in P–12 schools. It provides direction for programs, courses, teaching, candidate performance, scholarship, service, and unit accountability. The conceptual framework is knowledge based, articulated, shared, coherent, consistent with the unit and institutional mission, and continuously evaluated.

II.1 Provide a brief overview of the unit's conceptual framework and how it is integrated across the unit.

The unit's Conceptual Framework at Idaho State University reflects the "Discover Opportunity" mission of the university. This mission has four themes: Learning and Discovery, Access and Opportunity, Leadership in the Health Sciences, and Community Engagement and Impact. From these flow the College of Education's vision and mission. The unit is comprised of the EPPs in two of the four departments within the college.

The college's vision is "Building on a tradition of excellence, we will work to continuously improve the education we offer." Its mission is "Through excellence in teaching, scholarship, and service, we foster professionalism in all that we do." The mission has five themes. They are:

1. We prepare and support professionals who are ethical and reflective and known for the quality of their work.
2. We provide recognized leadership in the support of our students, professional partners, and those who employ our graduates.
3. We promote a culture of caring, respect, and intellectual rigor within our college and beyond.
4. We foster collaborative relationships with the schools, communities, and professional organizations that we serve.
5. We advance our understanding of the professions we serve and the application of that understanding in practice.

The EPP’s guiding values and beliefs promote a culture of learning through care, respect and rigor; foster collaborative relationships to maximize learning; and, prepare and support education professionals who are ethical and reflective.

The unit strives to reach for its vision and live by its mission while operating within a regulated State educational system.

III. Unit Standards

The following pages contain a summary of the findings for each of the six NCATE unit standards.
Standard 1. Candidate Knowledge, Skills, and Professional Dispositions

Candidates preparing to work in schools as teachers or other school professionals know and demonstrate the content knowledge, pedagogical content knowledge and skills, pedagogical and professional knowledge and skills, and professional dispositions necessary to help all students learn. Assessments indicate that candidates meet professional, state, and institutional standards.

1.1 Overall Findings

What did the evidence reveal about the unit continuing to meet this standard?

Candidate assessment data revealed that candidates met institutional and state standards for content knowledge at various points during their program. GPA minimum (2.75) and Praxis I exam minimums were required at admission. Also, candidates entering the student teaching internship had the required content area GPA and had passed the Praxis II test specific to their certification area. Pedagogical content knowledge standards were met though the assessments that were addressed by the State Standard 7. Data presented evidence that candidates, in their candidate internship met and exceeded these standards in multiple assessments, including the Teacher Work Sample II (TWS II), where 99 percent of candidates were at acceptable or target levels.

The unit provided examples of how candidates considered school, family, and community contexts in beginning coursework. In EDUC 2204, teacher candidates identified and discussed research-based options for connecting schools, families, and communities in the Partnership Presentation. In this assessment, 51 percent of students met the target, and 42 percent were rated acceptable. Candidates were then assessed again, during their pre-internship and internship semesters, on their connection to the context of the classrooms in which they were placed. In the Teacher Work Sample 1 (pre-internship semester), 69 percent were at target, and 27 percent were rated acceptable; these scores had improved in the TWS 2 (internship), with 91 percent meeting target and nine percent rated acceptable. Additionally, candidates reflected on their practice in the TWS 1 and TWS 2 with both “inaction” and “on-action.” Scores demonstrated candidate improvement as they moved throughout the program, with 71 percent meeting target in the TWS 1 and 89 percent in the TWS 2 (in-action) and candidates increasing from 56 percent for the TWS 1 to 89 percent (on-action) for the TWS 2.

Teacher candidates in initial programs focused on student learning and demonstrated this through various assessments. In particular, in the former Teacher Work Sample and the Teaching and Learning Plan I and II, candidates documented their effectiveness and impact in fostering P-12 student learning through candidate-created assessments related to learning targets. Teacher work sample data demonstrated that candidates met institutional standards in the design and implementation of instructional plans, the assessment of student learning, and the ability to reflect critically on their teaching effectiveness. The Teaching and Learning Plan required candidates to document their proficiency related to the four domains of the State mandated Danielson Framework for Teaching: planning and preparation, the learning environment, instruction, and professional responsibilities.

Moreover, work sample data presented evidence of growth in candidate pedagogical and professional knowledge and skills from the first work sample to the second. Data from work samples similarly identified that candidates were able to plan, teach, assess student learning and conduct themselves in a professional manner. For example, candidates, on average, showed a positive impact on student learning as indicated by the percentage of their students showing improvements from the pre-assessment to the post-assessment on achievement targets. Data from exit interviews demonstrate that candidates are well prepared as judged on the five dimensions taken from the unit's standards for beginning teachers: verbal communication, professionalism, attitudes, thinking skills, and judgment.
According to the unit's assessment plan, candidates are evaluated on their dispositions at multiple points in their programs. All applicants for admission to initial teacher education programs must complete an admission interview. The interview assessed each candidate's prerequisite dispositions and skills based on five criteria: professionalism, communication skills, attitudes, thinking skills, and judgment. All current teacher candidates were judged to qualify for admission based on the interview performances. In addition, data from the Instructor Recommendation Evaluation measured dispositions prior to admittance. Of those admitted, 100 percent met the targets related to Professional Commitment and Responsibility.

Prior to and during the Student Teaching Internship, candidates were evaluated through a discretionary assessment, the Professional Progress Report (PPR), submitted by course instructors. The PPR has 14 standards-linked dispositional dimensions that are rated using three-point descriptive scales. The PPRs used to commend student dispositions or to recommend areas of needed improvement. In 2012-2013 only 9 (18.8 percent) of the 48 PPRs reported concerns and/or recommended improvements. Thirty-five PPRs (72.9 percent) were used to identify positive achievements, and four (8.3 percent) were used for both purposes. During their program coursework, candidates were also assessed on dispositional standards through the following assessments: Philosophy Paper, Classroom Management Case Analysis, and the Teacher Work Sample I and II.

Follow-up surveys asked alumni and principal/employers to respond to candidates' performance in relation to professional dispositions. Per the unit's assessment system, in earlier years advanced school leadership candidates' knowledge and skills were assessed through a cycle of standards-based assessments, educationally-based scenarios, and classroom presentations. Standards-based rubrics now assess candidates' knowledge, skills, and dispositions at the end of every course. Faculty use documentation and feedback from clinical placements to help determine candidates' ability to apply knowledge to practice in operational settings. A case study requires candidates to resolve complex school problems using acquired knowledge, skills, and dispositions. Annual assessment data indicates that school leadership candidates consistently meet standard indicators at the target or acceptable target levels. Interviews did reveal that leadership candidates' special education content knowledge was not at the highest level.

Candidate knowledge of learner, family, and community needs is assessed and documented through standards-based assignments, course discussions and clinical placement portfolio entries. Candidates are required to review, analyze, and apply current research to complex educational problems and to apply that research during the case study and clinic placement assignments. Candidates integrated technology into professional practice as part of course and clinical placement assignments. Data regarding candidate use of technology are gathered in multiple courses. Faculty use assignment rubrics to assess candidate's ability to integrate technology to facilitate learner engagement and achievement. Candidates log standards-based experiences and provided relevant examples of the application of standards during clinical placements.

Advanced program candidates are assessed on understanding and demonstrating pedagogical and professional knowledge and skills. The educational leadership program utilizes portfolios from internships and practicums to assess candidates' abilities for creating effective learning environment and building upon the developmental levels of P-12 students. Candidates in the elementary and secondary M.Ed. programs use capstone projects to document their impact on student learning. According to the IR and interview data, all courses emphasize topics and assignments that support a positive learning environment for all learners. Candidates develop vision and belief statements, supervise lesson presentations, develop a school-wide discipline plan, and formulate a school budget as examples of course activities that support a positive learning environment for students. Candidates complete clinical placements; they work with different age-level students at the elementary, middle, and high school levels. All advanced level courses include topics and assignments that support a positive learning
environment for all learners. During clinical placements, candidates invest time fostering positive learning environments for all students and assess the impact of administrative decisions on student learning. Candidates are provided with educational situations specific to diverse learner characteristics at all educational levels and provided research-based rationale to support decisions impacting learners at that level. Candidate decisions are assessed according to the developmental needs of the learners. Candidates complete clinical placements at the elementary, middle, and high school levels. Candidates collect, analyze and use diversity data in their clinical placements to address the unique learning needs of all students. Courses incorporate educational diversity topics into class discussions, assignments, and assessments. Courses aim to help candidates understand how policy guides their work as leaders. Candidates are required to justify their educational decisions based on existing policy, using standards-based rubrics that assess candidate's understanding of those education policies. Even given all of the emphases on student learning in candidates' programs, program completers in interviews stated that they needed more expertise working with special education populations and issues.

Candidates in clinical placements are required to know and follow existing school policies. Dispositions are highlighted in course syllabi and emphasized in course discussions as essential to educational effectiveness. Dispositions are continuously assessed by faculty via course assignments and during professional interactions using standards-based rubrics and during clinical placements by on-site supervisors. Candidates provide evidence of meeting dispositional standards, such as acting ethically and with integrity and fairness via field placement documentation and when responding to class-based situations. Candidates draft a vision statement and demonstrate, via peer evaluations that they incorporate strategies that promote fairness and a belief that all students can learn. Documentation of clinical experiences reveal candidate dispositions toward student learning. Clinical coordinators interview on-site supervisors to assess dispositional levels. Dialogue during course discussions and clinical placements reinforce candidates' awareness, understanding, and commitment to student achievement. Candidate dispositions are evident in their written responses and oral presentation on the capstone project. Candidates in clinical placements submit evidence of interactions with students, families, and communities. Candidates are required to attend school and community events, school board meetings, and extracurricular events where candidates interact with key educational stakeholders. Documentation of these interactions is submitted for class assignments. Candidates also develop a comprehensive school community relations plan.

In summary, knowledge and skills for other school personnel (OSP) are demonstrated through syllabi, rubrics, and the narrative in the IR. Candidates are assessed through a cycle of standards-based assessments, case studies, and classroom presentations. OSP syllabi indicate that standards-based rubrics are used to assess candidates' knowledge, skills, and dispositions at the end of every course. The program utilizes a case study method, which requires candidates to resolve complex school problems using acquired knowledge, skills, and dispositions. Unit programs were subjected to a standard based review with careful evaluation of the IR and all submitted exhibits related to the preparation of candidates to work in schools as teachers or other school professionals. Special attention was given to on-campus interviews with faculty, administrators, candidates, and program completers, and a review of assessments. The team found that candidates met professional, state, and institutional standards. Unit measures demonstrated evidence and trends supportive of continuous improvement. The IR and exhibits documented focused and assessment-driven continuous improvement strategies and actions by program leaders and faculty. The intentional alignment of the unit's curriculum and instruction with state and institutional standards was evident in all programs.
1.2 Moving Toward Target or Continuous Improvement

Please respond to 1.2.a if this is the standard on which the unit is moving to the target level. If it is not the standard on which the unit is moving to the target level, respond to 1.2.b.

1.2.a Movement Toward Target.

Based on the criteria for Movement Toward Target, provide a summary of the unit's performance.

1.2.b Continuous Improvement.

What activities and outcomes demonstrate that the unit has been engaged in continuous improvement?

For initial and advanced programs for teacher candidates, and in response to changes in requirements at the state level, faculty developed new assessments and realigned or revised existing assessments to meet new standards and requirements. The unit compared the new standards to the older Idaho Core Teacher Standards (ICTS), which were adopted by the College of Education in 2005 along with three additional standards.

New requirements emerged in 2008 that all teachers were expected to meet the requirements defined in State Board rule (08.02.02: Rules Governing Uniformity) and outlined in the Outline of State-Specific Core Teaching Requirements for Program Approval. These new requirements and state mandated assessments served to inform the conceptual framework, coursework, fieldwork, and practical experiences to reflect current practice.

These requirements included the Idaho Comprehensive Literacy/ELA Common Core Instructional Shifts Assessment, Technology Assessment, Mathematics Common Core Instructional Shifts and Mathematical Thinking for Instruction (MTI), and Clinical Practices and Summative Performance Assessment. Praxis Core Academic Skills for Educators Tests measured academic skills in reading, writing and mathematics. These tests were designed to provide comprehensive assessments that measured the skills and content knowledge of candidates entering teacher preparation programs. The Core Reading test required the integration and analysis of multiple documents. The Core Writing test assessed both argumentative writing and informative/explanatory writing, and assessed strategies for revising and improving text. The Core Mathematics test included numeric entry and multiple choice questions that tested mathematical reasoning.

The unit created a Moodle course to help prepare identified candidates. The intent of the Moodle course was to provide familiarity with the exams and provide a resource to students taking them. During the summer 2013, faculty worked to bring the Teacher Work Sample I and II into alignment with new standards and state requirements for clinical work based on the Charlotte Danielson Framework for Teaching (FfT).

The State of Idaho suggested the adoption of a 21st Century Lesson Plan Template for classroom teachers to follow; this template was incorporated into the unit assessments and was renamed the Teaching and Learning Plan I and II (TLP I and TLP II). The TLP I was piloted in the on-campus based EDUC3309 (pre-internship) courses during the 2013-2014 school year and was adapted based on faculty/student input. It was fully adopted as the assessment of pre-internship clinical work for the 2014-
2015 academic year. Faculty viewed it as a better indicator to use, as it would better prepare candidates for the use of the State mandated Common Summative Assessment and Individualized Professional Learning Plan, which were adopted as summative assessments of performance in the Student Teaching Internship course. Both assessments were based on the Charlotte Danielson Framework for Teaching.

At present, student teaching interns complete the TWS II assessment or the TLP II, based on when they completed their pre-internship semester (EDUC 3309). In the student teaching internship, the unit piloted a TLPII that requires much more autonomy and purpose and requires significantly less scaffolding than the TLP I in selecting and justifying artifacts that show evidence of proficiency on the Framework for Teaching. The pilot TLPII should be revised and in place for use in the 2015-2016 academic year. Along this same line, most of the curricula, assessments, guidelines and rubrics for the developmental coursework building to the Student Teaching Internship were revised to include instruction and assessment in the Common Core State Standards Instructional Shifts and the Framework for Teaching as appropriate.

An additional area of planned improvement is the development of a more intentional scope and sequence within the coursework. Candidates do not receive common instruction (in Core coursework) in assessment until their pre-internship. Most methods courses (which are not core teacher education courses, but are program specific) provide instruction about assessment specific to course content.

A committee has been formed to reorganize coursework and propose a more coherent scope and sequence of coursework, which begins with assessment and planning, so that these topics and concepts can be integrated into more courses and be implemented throughout the rest of programs. A new Online Teaching Endorsement has been added that will expand access to and interest in the master's degree programs in Instructional Technology, Elementary Education, and Secondary Education. The unit is also developing another advanced endorsement program, Mathematical Consulting, for the improvement of outreach into public schools across the region. That endorsement is expected to begin accepting students as early as the fall of 2015.

Additionally, a faculty committee is working to develop a new degree program, the Masters of Arts in Teaching (MAT), that will be an addition to the current accelerated certification program and allow qualified college graduates to work toward initial certification, while earning a master's degree. Development of this program will allow the unit to tap into and contribute to the quality of the estimated 40 percent of teachers in Idaho who enter teaching via an alternative pathway.

Faculty have developed standards-based outcomes and assessments for each course in the unit's current programs. Assessment data and faculty perceptions of candidate progress and program quality are reviewed at program area meetings. When significant program revisions are identified, faculty involve regional practitioners in the development and improvement of program design and course outcomes.

1.2.b.i Strengths.

What areas of the standard are being addressed at the target level?
Clear, convincing and sufficient evidence was not presented to demonstrate that the unit is performing as described in any aspect of the target level rubric for this standard.

**AND**

There are no plans and timelines for attaining target level performance as described in the unit standard.

Clear, convincing and sufficient evidence demonstrates that the unit is performing as described in some aspect of the target level rubric for this standard.

**OR**

There are plans and timelines for attaining and/or sustaining target level performance as described in the unit standard.

[BOE specifies which is present and which is not in their findings.]

Clear, convincing and sufficient evidence demonstrates that the unit is performing as described in some aspect of the target level of the rubric for this standard.

**AND**

There are plans and timelines for attaining and/or sustaining target level performance as described in the unit standard.

**AND**

There are plans and timelines for sustaining target level performance as described in the unit standard.

### 1.3 Areas for Improvement and Rationales

#### 1.3.a What AFI s have been removed?

<table>
<thead>

### 1.4 Recommendations
Standard 2

Standard 2: Assessment System And Unit Evaluation

The unit has an assessment system that collects and analyzes data on applicant qualifications, candidate and graduate performance, and unit operations to evaluate and improve the performance of candidates, the unit, and its programs.

2.1 Overall Findings

What did the evidence reveal about the unit continuing to meet this standard?

The unit has an assessment system, which has been in transition since 2013, and to date, has focused primarily on candidate assessment. The reconstruction of the assessment system involves reorganizing assessment functions among three information technologies, namely a database-relational system, a portfolio aligned with multiple-standards software, and Excel, respectively. Currently, FileMakerPro (FMP), the relational database, serves as the unit's primary information technology, and most recently, TaskStream provides candidates a portfolio of key assessments aligned with multiple-standards. According to the unit's TaskStream Implementation Timeline plan, the system continues to evolve to incorporate TaskStream in assessing initial and advanced candidates on multiple professional standards and admission requirements and to create a comprehensive integrated technological assessment system. Currently, the assessment system aligns the initial candidate proficiencies based on Danielson's work with the State of Idaho's Teacher Education Preparation Program Standards (also based on Danielson) and the national Interstate New Teacher Assessment and Support Consortium (InTASC) standards. The initial key assessments have been transferred from FMP and are being assessed in TaskStream, beginning with the 2014-2015 academic year. The advanced educational administration program has rubrics for key assessments aligned with Interstate School Leaders Licensure Consortium (ISLLC) standards. For advanced programs in school counseling and speech therapy, assessments are aligned with Council for Accreditation of Counseling and Related Education Programs (CACREP) and American Speech-Language Hearing Association (ASHA), respectively. There are plans to transfer and assess advanced key assessments into TaskStream. Current initial candidates, most faculty, and program assessment coordinators affirm their access and use of TaskStream to monitor candidate performance. According to the former associate dean and program assessment coordinators, data analysis and synthesized results in report form are shared with faculty who reflect on and use the data to make course level decisions.

To reduce bias and increase fairness, rubrics are used in initial and advanced programs, as evidenced in TaskStream for initial candidates and confirmed by university supervisors and advanced and initial candidates interviewed. University supervisors, school principals, and anti-bias training material provided evidence of regular workshops on reducing bias conducted for cooperating teachers. University supervisors and principals spoke about training they receive in assessments and assessment language,
increasing their efficacy and accuracy in unit assessment expectations. Advanced and initial candidates attributed, in part, fairness in assessments to availability of faculty, and university supervisors stated that assigned faculty mentors contribute to their ability to be fair in assessing candidates. Advanced candidates, school principals, and university supervisors believe that the Danielson framework standardizes instruction and learning and reduces bias. Advanced programs have pairs or teams of faculty assess select assignments to heighten inter-rater reliability and increase consistency and accuracy. Assessor guidelines have been written for most assessments to ensure scoring accuracy and consistency. For initial programs, core teacher education instructor teams meet regularly to review assessment guidelines, scoring rubrics, and assessor guidelines for the core teacher education assessments. Each course team leader or program assessment coordinator conducts periodic rater training to foster inter-rater agreement. Instructors also exchange sets of performance assessments completed by candidates and independently score them to examine the consistency of their ratings. For the advanced programs, similar efforts are planned and underway for the core master of education assessments.

The unit assesses initial and advanced candidates multiple times in multiple forms. Cooperating teachers, partnering principals, faculty, and initial candidates affirmed that initial candidates are assessed on standards in every course multiple times by faculty, who assess candidates on knowledge, and cooperating principals and teachers, who during clinical experiences assess candidate performance relative to the standards. Examples of multiple forms of initial assessment include admission interviews, PRAXIS I skills, PRAXIS II subject matter, portfolio entries, teacher work samples, and surveys. Initial candidates are also assessed at four key transition points at admission, clinical placement, exit from clinical, program completion and after program completion as transition points. Non-licensure advanced candidates also have five transition points: admission, completion of coursework, portfolio or practicum, comprehensive exam and dissertation, and graduate surveys. Evidence of multiple assessments were found in initial programs in TaskStream, and multiple assessments for advanced programs were found in both FileMakerPro and faculty Excel summaries.

The unit's assessment system is, or has been, maintained, evaluated, and refined by the program accreditation coordinators, the associate dean, the assessment coordinator, and the former associate dean, who managed the system prior to 2014. The associate dean and assessment coordinator are in charge of data management; preparation of annual assessment reports on candidate performance; assessments and reports on unit operations; assessment of unit operations and program assessment plans; and, follow up surveys on the success of program graduates. The unit conducts studies on reliability, validity, and fairness of common performance assessments when new assessments are designed and implemented, as evidenced by assessment records, publications, and the former associate dean. According to the dean, the associate dean, and program accreditation coordinators, during the transition years 2014-2015 the responsibilities for assessment, which included working in consultation with members of the professional community including professionals from other colleges, practicing P-12 educators, Graduate Studies Committee, and the Teacher Education Core Assessment Committee, have been in flux. For instance, the Teacher Education Core Assessment Committee had been dissolved, and in its place are program-based committees.

The context is complicated by the history of assessment and accreditation personnel in the unit. Historically, an associate dean had been the director of assessment. He maintained a relatively comprehensive set of some data on FileMakerPro. He resigned his associate deanship at the beginning of the spring semester 2013; however, he maintained his title as assessment director and professor until the end of academic year 2014-2015. A new associate dean, hired from the State Department of Education, came on board early in the spring semester of 2014. At the end of the fall semester 2014, the NCATE coordinator unexpectedly left the university. The new associate dean assumed the NCATE coordinator's role in addition to her other responsibilities. The work of assessment coordinator fell to an interim from May 2015 until September 2015 when she was named coordinator. The processes for the assessment
system are partially, as a result, a work in progress.

There was documented evidence of collaboration in assessments review among the internal and external stakeholders prior to the transition years. There was evidence of the 2008 assessment plan tentatively providing governance and maintenance of the system, and the emergence of the current assessment plan's implementation. According to the documentation, the accreditation coordinators, and the dean, assessment plans have been developed for initial and advanced programs in general, and also for each program. Faculty who serve as program assessment coordinators are assigned to monitor each program's plan on candidates' meeting core state standards. However, some programs, such as the Early Childhood Education programs, the Music Education program, and the revised Special Education program do not require their candidates to complete all of the core teacher education courses and therefore, do not require their candidates to pass all of the core teacher education assessments. The plans have a heavy emphasis on the initial teacher education programs but minimally address the advanced education programs in school counselor education, school psychology, speech, and educational leadership.

A unit assessment plan for advanced programs was not available. Annual reports are generated based on the focus of the program assessment plans. An assessment report for 2014 exists for the advanced master's degree program in elementary and secondary education, but not for all advanced programs.

The unit has a system in place for candidates' formal complaints or grievances associated with academic issues as well as a system for candidates with nonacademic complaints/grievances. Formal complaints are handled in a manner consistent with university policy. University policy procedures for informal and formal complaints are also outlined in the College of Education post on the intranet. The document is also available to candidates from the College of Education Advising Center. Advanced candidates believe the advantage of having small classes enabled them to approach faculty with complaints or to address complaints with their advisors. Candidates, alumni, faculty, the advising center, and the dean provided evidence of managing candidate complaints systematically.

There is evidence that the unit collects initial and advanced data annually, or at other designated times, from key/common assessments and completes a variety of assessment reports at the course level. However, the process that is used to collect, compile, aggregate, summarize, and analyze the data during this period of transition is not clear in a unit assessment plan. The changes made in programs (initial and advanced) and unit operations are not systematic, nor based on data collected and analyzed by the assessment system. The system is designed to report analyzed data at the program and unit level. At the unit level, the unit does not have an established follow-up on the data generated. At the program level, program coordinators facilitate faculty course-related reflections and course changes based on the data from the assessment system. However, the course level reflections and changes do not systematically impact or inform improvements made in the program and the unit.

2.2 Moving Toward Target or Continuous Improvement

Please respond to 2.2.a if this is the standard on which the unit is moving to the target level. If it is not the standard on which the unit is moving to the target level, respond to 2.2.b.

2.2.a Movement Toward Target.

Based on the criteria for Movement Toward Target, provide a summary of the unit's performance.

2.2.b Continuous Improvement.
What activities and outcomes demonstrate that the unit has been engaged in continuous improvement?

The unit has currently enhanced its technological component of the assessment system by adding TaskStream to existing technologies, FilemakerPro and Excel. An important aspect of the unit's assessment system is the ongoing development and continuous improvement of its data management system. At present, the unit plans to continue to expand and to improve their FileMakerPro databases, the integration of TaskStream, and supportive role of Excel. As the institution moves forward with its assessment system transition the plan is to take advantage of new opportunities to increase the relational organization of candidate information and performance assessment data. The unit plans to revise their data management system periodically to take advantage of changes in information technology and develop systems that help the unit produce initial and advanced graduates, proficient in unit, state, and national professional standards.

External sources, such as NCATE and state program reviews, provide feedback that informs continuous improvement decisions of the unit. Internal sources, also impact unit change. For example, according to the advanced candidates, advanced program alumni expressed internships of 400-600 hours were prone to decrease in the quality of the experience. The unit responded by changing the internship hours to 260. Additionally, principals of partner K-12 schools were dissatisfied with the process used to place candidates in internships. The dean and the principals have designed a more streamlined candidate placement process in response to the principals' concerns.

The former associate dean of assessment conducts credibility evidence analyses, and reliability/validity studies on newly developed and implemented assessments. The results are published in journals and presented at conferences. The unit has at its disposal valid and reliable values of its assessment.

The unit's assessment system is currently in transition, with the intent to mature and continuously improve, by merging the best of the old system and the new.

Standard 3

Standard 3: Field Experiences And Clinical Practice

The unit and its school partners design, implement, and evaluate field experiences and clinical practice so that teacher candidates and other school professionals develop and demonstrate the knowledge, skills, and professional dispositions necessary to help all students learn.
What did the evidence reveal about the unit continuing to meet this standard?

The unit continues to provide field experiences and clinical practice programming that is informed and supported by the unit and school districts. This programming helps ensure that graduates are able to meet effectively State teaching standards and licensure requirements, and have the dispositions needed to help all students learn. The unit maintains both unofficial partnerships with schools that agree to host candidates and with official Partnership Schools. The Partnership Schools are four elementary schools, one middle school, and two high schools in the Pocatello/Chubbuck School District. Partnership Schools enter into an MOU after both the unit and the school come to agreement on a Partnership School Plan. In the plan, the unit specifies the required criteria needed for the partnership, and the school provides information on what it hopes to gain from the partnership. Partnership Schools must provide demographic information related to their levels of diversity, both among the student body and the teaching staff. Official Partnership School agreements expire after three years at which time the school must reapply, if it wishes to continue the relationship with the unit.

Throughout the initial program 16-week student teaching internship, the CTs and university supervisors (USs) observe and evaluate candidates six times each for a total of 12 observations; they provide oral and written feedback for each candidate. Prior to candidates taking full control of the classroom, candidates and CTs are encouraged to co-teach as much as possible. Candidates are also required to attend three full day seminars during their student teaching internship. The first seminar focuses on topics that will assist candidates in having a successful internship, the second focuses on the Idaho Core Standards, and the third is dedicated to assisting candidates with licensure and securing a teaching position. Candidates also meet on a weekly basis throughout their internships to receive assistance on resumes, interviewing training, and other job ready skills. While hours vary in length among advanced programs, candidates at this level must complete and defend a Capstone Project and complete their internships. They are supervised by both school personnel and university faculty. The internship is educational leadership is 260 clock hours in length.

Candidates and school administrators interviewed agreed that the unit ensures that field experiences appropriately scaffold preparation and experiences so that candidates are well prepared for their internship. As the district has experienced a severe teacher shortage, several candidates from the unit have been hired as "Emergency Hires" in conjunction with their internship. In all cases presented, school principals cited the candidate's level of preparation and demonstrated competencies in dispositions as the reason for these extraordinary measures. Feedback from school principals indicates that many candidates, particularly those who have served as emergency hires, have been offered full contracts by the schools in which they have interned.

Interviews with administrators from Partnership Schools revealed that the partnerships also provided valuable opportunities for the schools themselves. In a number of cases, professional development in line with the vision and mission of the unit has been provided for the Partnership Schools and Cooperating Teachers (CTs). Because of the partnership, Other School Personnel are able to access the unit's on-campus resources as needed, and staff members have been able to complete advanced degrees. Candidates in advanced programs confirmed that the arrangements helps to ensure that school partners are able to both inform the work of the unit and be informed by it as well.

The unit exemplifies the reflective component of its CF by utilizing multiple informal feedback loops to make improvements in its placement process, placement procedures, communications; it assists the unit in the determination of changes to coursework and course requirements. These actions do not reflect a unit-wide system of overall collaborative policy, structure, process or assessment. Interns do complete evaluation surveys for their cooperating teachers, their university supervisors, and the overall program. The surveys ask candidates to rate the effectiveness of their programs in preparing them to teach. CT surveys, Clinical Supervisor (CS) surveys, and a Building Partnership Survey also provide information.
that the unit uses to help determine the efficacy of the candidate preparation program. Numerous files in both TaskStream and FileMakerPro show examples of completed surveys and aggregated data from candidates, CTs, school principals, and university staff. It is not clear that decisions have been made from the data.

In discussions with current initial and advanced candidates, graduates, and staff, it is clear that there are feedback loops. When pressed to speak about formal protocols that extend beyond the evaluation surveys, all stated that, while they did not know of other formal protocols, they believed that they are able to give actionable input through direct contact with any staff member of the unit. Further, they believe that changes have been made based on their input. Both staff and candidates from distance learning programs were particularly confident about their ability to impact change despite lack of formal protocols and their remoteness from the main campus. Although changes in field experiences and clinical experiences for candidates may have been made, it is not clear that they are really data based, fully vetted, informed, and part of the unit's assessment system.

Cooperating teachers must have three years of teaching experience, licensure in the area in which they teach, and must be recommended by their principal. A unit-developed CT Seminar is offered annually. As the unit has begun to adopt the Charlotte Danielson Framework for Teaching (FfT), CTs must either be trained in the FfT, or be willing to be trained in the FfT, in order to serve as CTs for the unit. Twenty hour on-line training in the FfT has also been provided to university supervisors (USs) as part of their professional development. Expectations and requirements for candidates, CTs, USs, and school administrators are specifically itemized in the Teacher Education Field Experience Handbook.

3.2 Moving Toward Target or Continuous Improvement

Please respond to 3.2.a if this is the standard on which the unit is moving to the target level. If it is not the standard on which the unit is moving to the target level, respond to 3.2.b.

3.2.a Movement Toward Target.

Based on the criteria for Movement Toward Target, provide a summary of the unit's performance.

3.2.b Continuous Improvement.

What activities and outcomes demonstrate that the unit has been engaged in continuous improvement?

The unit has adopted Core Standards for Beginning Teachers. In identifying the standards, the unit has also developed comprehensive assessments that provide the feedback and scaffolding that candidates need to successfully exit from the program. In adopting the Charlotte Danielson Framework for Teaching, the unit is incorporating the teaching methods and exemplars that are needed for continued improvement for candidates, CTs, USs and the unit itself. CTs, School Principals and USs are expected to participate in FfT training so that they are able to effectively evaluate and advise candidates throughout their internship. The training requires participation in live sessions, on-line sessions and completion of a variety of reading reviews. CTs who have served previously report that the transition to the FfT has been challenging at times, but both the CTs and school principals agree that the end-of-internship conferences have been much improved by the ability to use a common language in discussing candidate performance. The unit has also moved the data collection system to TaskStream.

This new system allows student coursework as well as evaluations, reports, and outcomes to be reported
in a manner that can inform continuous feedback needed for course, program and unit improvement. At
this time, examples of various data points available in the exhibits provide a basic template for what is
possible when TaskStream becomes fully utilized.

Standard 4

Standard 4: Diversity

The unit designs, implements, and evaluates curriculum and provides experiences for candidates to acquire and demonstrate the knowledge, skills, and professional dispositions necessary to help all students learn. Assessments indicate that candidates can demonstrate and apply proficiencies related to diversity. Experiences provided for candidates include working with diverse populations, including higher education and P–12 school faculty, candidates, and students in P–12 schools.

4.1 Overall Findings

What did the evidence reveal about the unit continuing to meet this standard?

Idaho State University is located in a largely agrarian and rural part of the U.S. The population of the state is predominately white, with the largest minority group Hispanic or Latino, at over 10 percent of the total. The education professionals in the state are virtually all white. The IR reports that "(o)nly about two percent of the certified school personnel in Idaho are Black, Hispanic, Asian or Pacific Islander, American Indian, or Alaskan Native." The IR continues "(w)e are pleased that our candidate contacts reflect this demographic."

The unit's Conceptual Framework states that the university is "a public research institution that serves a diverse population..." Its Core Theme Two is Access and Opportunity, and it states that the university "provides opportunities for students with a broad range of educational preparation and backgrounds." Diversity seems addressed in the state's Core Standards for Beginning Teachers and the Idaho Core Teacher Standards.

In the unit's initial programs, diversity concepts are addressed in several courses and through field experiences. The two courses that most address multicultural and equity issues for all are EDUC 2204 Families, Communities, Culture and SPED 3350 Creating Inclusive Classrooms. Both courses are standards based. EDUC 2204 is a university-approved general education course, taken by both pre-education and other students. A course requirement is the development of an "Informed Belief Statement on Diversity." The course also has a 15-hour field experience, which requires reports on a school board meeting, parent/teacher interaction, some community service, and a "multicultural event." The course's topics include those from course texts, to include cultural diversity in the classroom, what teachers need to know about language acquisition, school experiences for English learners, and how teachers can help parents. The special education course is only for candidates, and it includes topics related to appropriate curricula for students with disabilities, those who are gifted and talented, those who are otherwise at risk, and students who are English language learners. The course requires a four clock hour experience where candidates are expected to work in a special education classroom and interview the teacher.
regarding ways for special education and general education teachers can best work together. Candidates also complete work samples, which assess in part sensitivity to diversity concerns and whether candidates believe that all students can learn. The IR reports that a total of 181 field experience hours before student teaching provide our candidates with opportunities to observe, reflect, and act on issues of diversity in the classroom, with families, and in the community at large.

Diversity is approached in advanced programs through class discussions, presentations, assignments, assessments and case studies concerning working with diverse students. Rubrics for assignments related to diversity in courses in Educational Leadership and School Psychology are available. Formal class assessments are said to be aligned with diversity standards. The program area in educational leadership provides candidates with class presentations from guest speakers and visiting scholars so that candidates have some contact with diverse faculty. Interviews with a limited number of program completers at the advanced level indicated that they wished that they had received more content regarding special education populations and issues.

Exhibit 4.4.b Curriculum Component and Field Experience Diversity Matrix is, particularly at the initial level, helpful in showing how diversity proficiencies are integrated across unit programs. The matrix is less helpful at the advanced level, particularly in assessment areas. Of the 504 candidates in initial programs in 2013, over 84 percent were white. The largest minority or ethnic group was Hispanic or Latino with over five percent. Nearly five percent of the total were "unknown." Nearly 60 percent of the total were female, a bit over 40 percent male. Advanced candidate diversity data were limited.

In the fall of 2014 among the professional education faculty reported, slightly over one third were male, a bit less than two thirds female. In the fall of 2015 the unit employed four non-white faculty members. The 2014-2015 demographic data was provided on 16 P-12 schools, the schools where most candidates were placed for field experiences and internships. Most of the schools enroll predominantly white students, although two (one elementary, one middle) are minority majority, with large numbers of Hispanic or Latino students. The enrollments of two other elementary schools are about one fourth Hispanic or Latino. It is clear that many candidates have extensive field experiences. The unit does not, however, ensure that all candidates have diverse experiences.

The retention of diverse faculty members has been a concern for the unit. The unit has made, and continues to make, good-faith efforts to maintain and increase faculty diversity. In recent years, candidates have had the opportunity to work with new faculty members that are Native American or Alaskan Native, Asian, Hispanic, Black, or have multiracial backgrounds. Some diverse faculty members have joined the faculty, as others have left.

4.2 Moving Toward Target or Continuous Improvement

Please respond to 4.2.a if this is the standard on which the unit is moving to the target level. If it is not the standard on which the unit is moving to the target level, respond to 4.2.b.

4.2.a Movement Toward Target.

Based on the criteria for Movement Toward Target, provide a summary of the unit's performance.

Standard 4 is the Target standard. There is evidence that diversity is important to the unit, the university, and the state. There is considerable evidence that the initial program curriculum meets the standard, at least at the acceptable level if not at the target. Some evidence is provided that advanced programs present standards-based diversity content and assess it using rubrics.

At the initial level, the mission of the Teaching and Educational Studies Department focuses on the
establishment of communities to support learning of diverse student populations. The curriculum, field experiences, and clinical practice of initial programs promote candidates' development of knowledge, skills, and professional dispositions related to diversity; for example, EDUC 2204 Family, Communities, & Culture requires 15 hours of field experience that includes a multicultural event. In addition, SPED 3350 Creating Inclusive Classrooms is designed to target work with students who have diverse learning needs. They identify student strengths and weaknesses in order to consider the barriers certain instructional practices may create in the classroom context. Self-reflection helps candidates contextualize teaching and draw effectively on representations for the student's experiences and cultures. These concepts are carried forward into EDUC 3309 (field experience), the pre-internship and student teaching. The curriculum and experiences are based on well-developed knowledge bases and conceptualizations of diversity and inclusion so candidates can apply them effectively in schools. TaskStream, when fully operationalized, should allow for regularly reviewed candidate assessment data using the Framework for Teaching observation tool for measurement of candidates' ability to work with all students as well as develop a plan for improving their practice and the unit's programs accordance to the unit's conceptual framework.

At the advanced level, faculty are committed to developing student knowledge and understanding of human diversity, which is evident from program coursework. The design, development, and evaluation of course content incorporate best practice for all students, including students from diverse groups. Candidate interactions with diverse populations of students are identified as an integral part of class activities, field placements, and clinical practice experiences that serve populations representative of the local communities. Evaluations of student performance allow faculty and supervisors to provide candidates with individualized formative and summative feedback on the skills associated with responding to and working effectively with diverse populations of learners.

The unit has made an effort to maximize the opportunities for candidates to interact with individuals from diverse groups though flexible schedules, seminars, visiting scholars, and recruiting a more diverse faculty.

Candidates engage in professional education experiences in conventional and distance learning programs with candidates that represent a range of diverse groups. The majority of the unit's candidates are White non-Hispanic. However, in initial programs the percent of candidates from identified racial and ethnic groups is the same or higher than the representation at the institutional level. The active participation of candidates from diverse cultures and with different experiences is solicited, valued, and promoted in classes through activities, discussions, and group projects. Field experience and clinical practice placements strive to provide candidates with opportunities to work with diverse populations. Candidates are expected to reflect on their experiences working together to gain a broader perspective and deeper appreciation for the cultural backgrounds and diverse experiences all candidates. Candidates reflect and analyze experiences in conversations with mentors, cooperative teachers, supervisors, and peers to develop and enhance professional understanding of diversity.

At the initial level and to encourage candidate interaction with exceptional students and students from a broad range of diverse groups, candidates' major field experiences and clinical practice pre-intern and intern placements are at different sites within the unit's service network. The policy helps candidates confront issues of diversity with regard to race, ethnicity, socioeconomic status, exceptionalities, and school cultures, which affect teaching and student learning. Although a policy is in place, there seems to be no tracking procedure that helps the unit ensure that all candidates at both levels have diverse experiences.

At the advanced level, schools reflect the changing cultural, linguistic, and ethnic diversity of the region. Faculty do believe that it is essential for candidates to be prepared to work effectively with learners from diverse backgrounds.
Plans to continue moving towards target include the use of assessment data on standards related to diversity, to identify courses or experiences needed for candidate improvement, and to implement the changes the data informs. Increased collaboration with the local Native American Shoshone-Bannock Tribe should strengthen candidates' knowledge, skills, and dispositions, as well as improve programs, the unit, and student learning. Partnerships are developing with faculty providing professional development to teachers, with the goal being improved field experience and clinical practice placements.

Standard 5

Standard 5: Faculty Qualifications, Performance And Development

Faculty are qualified and model best professional practices in scholarship, service, and teaching, including the assessment of their own effectiveness as related to candidate performance; they also collaborate with colleagues in the disciplines and schools. The unit systematically evaluates faculty performance and facilitates professional development.

5.1 Overall Findings

What did the evidence reveal about the unit continuing to meet this standard?

The faculty data enumerated in the IR were reconciled in the Addendum to accurately reflect the total number of faculty in the unit. Based on evidence presented and confirmed by its leadership team, the unit during 2014-15 had 43 faculty members: 18 tenured faculty, 16 tenure-track faculty, and nine non-tenure track faculty. The 34 faculty members identified as tenured/tenure track hold terminal degrees.
Evidence was presented that those non-tenure track faculty without terminal degrees have at least master's degrees in their respective fields and are well-qualified for their assignments.

Two faculty members teach at the off-site satellite campuses, one at the Twin Falls campus and one at the Idaho Falls site. The off-site faculty have academic appointments on the Idaho State campus. As reported by the unit leadership and off-site faculty, cohesion is built between the main campus and the two off-site programs by networking between and among the faculty at the various sites, sharing student advising responsibilities, jointly participating in professional development activities, and making use of TaskStream, all of which serve to promote joint decision making, develop able candidates, and enhance the general welfare of programs. In essence, the two satellite campuses candidates receive comparable resources to those on the main campus.

According to the leadership team and confirmed by principals and supervisors, interns are placed with cooperating teachers who have at least three years of successful teaching experience, are licensed in the areas that they teach, and are identified by their respective school principals as demonstrating best practices in the classroom. Candidate placements are done with the recommendations of appropriate administrative personnel in the schools and the approval of the unit. Because of the teacher shortage in the region, it is not uncommon for interns to be employed by the school district as "emergency hires" and become the classroom teacher-of-record. The practice to date has been successful and has led interns after graduation to be offered permanent positions in the participating districts.

Interviews with unit candidates and recent graduates revealed that faculty members model best practices in instruction, reflecting the conceptual framework as well as stressing professional and state standards in the goals/objectives of their course work. The candidates emphasized that issues related to diversity and the integration of technology are parts of instructional practice in the majority of courses. Candidates confirmed faculty use a variety of teaching strategies, which supports candidate learning styles and models approaches that prepare them for their practice. As reflected in syllabi, candidates confirm that faculty's teaching and their coursework require them to reflect, think critically, and problem solve. P-12 educators confirm initial candidates begin clinical practice generally well prepared in these areas.

Unit faculty report having access to multiple sources of technology to use in their instruction, including interactive white boards, multi-media presentations incorporating PowerPoint and video, and smart classrooms. Faculty also report that they show the integration of diversity content and technology throughout the programs of professional study. In several instances course units are included on diversity topics including, but not limited to, gender, race, and special needs. It was also confirmed that faculty assess their own effectiveness as teachers, including their effects on candidate learning, as shown through faculty self-assessment during the formal evaluation process, candidate evaluations, and other data sources.

Evidence confirmed that many scholarship activities reflect faculty engagement in the improvement of schools, teaching, and learning. It was confirmed that faculty scholarship has focused on a variety of topics, including research on pre-service teachers, in-service teachers, pedagogy, educational leadership, physical education, classroom technology, and assessment, all of which are related to the teaching and learning process. In conversations with faculty and the unit leadership, it was also confirmed that faculty are engaged in a wide array of scholarship and service to the university and broader community in ways consistent with the institution and unit's mission and conceptual framework.

Examples of faculty on-campus service activities include, but are not limited to, serving on executive councils, promotion and tenure committees, assessment committees, faculty search committees, undergraduate and graduate committees. Faculty also provide service to P-12 schools. Interviews with faculty and other on-line evidence revealed an array of external funded projects involving faculty collaboration with teachers and school districts. Artifacts list numerous instances of faculty engaging in
service to the community, schools, local, national and international professional organizations.

Information in the IR Addendum and confirmed through conversations and interviews with faculty provided additional information pertaining to the tenure and promotion process. Unit faculty members are evaluated using multiple assessments. The annual process begins with a template-driven self-evaluation that lays the foundation for review by the department's leadership. As part of this review, faculty have opportunities to consider their teaching loads, teaching effectiveness (based on candidate feedback), and need for course revisions. Inherent in this process faculty have the opportunity to self-reflect, after which time a follow up meeting is scheduled with the chair. Based on the outcome of this review, and where appropriate, the need for professional development may be discussed. Faculty who are seeking tenure and promotion can be partnered with peers for guidance and as they participate in the process. All faculty seeking tenure and promotion undergo a Third Year Review. This review allows any deficiencies to be identified while allowing sufficient time to correct deficiencies through mentoring and faculty development prior to the final decision, rendered usually during the fifth or sixth year.

Adjuncts and clinical faculty are evaluated by candidates in courses. The unit makes efforts to remediate any unsatisfactory performance, but does not retain those who do not meet high expectations for instruction.

Based on evidence presented the unit has a systematic and comprehensive process for evaluation of faculty performance in the three work areas of teaching, research and service.

Opportunities for professional development for faculty members are available through activities offered by the unit. As confirmed in conversations and interviews with faculty, professional development opportunities offered by the unit include such topics as assessment, technology, emerging theories and practices. The institution's Instructional Resource Center has provided training for faculty members who teach on-line or are interested in improving their course design. The majority of faculty do participate in professional development opportunities. Faculty receive $1,200 per year to help defray expenses associated with attending state, national, and international conferences. In addition, faculty receive $200 annually to purchase instructional supplies. A formal system is also in place for unit faculty to present emerging or innovative teaching strategies to their peers.

5.2 Moving Toward Target or Continuous Improvement

Please respond to 5.2.a if this is the standard on which the unit is moving to the target level. If it is not the standard on which the unit is moving to the target level, respond to 5.2.b.

5.2.a Movement Toward Target.

Based on the criteria for Movement Toward Target, provide a summary of the unit's performance.

5.2.b Continuous Improvement.

What activities and outcomes demonstrate that the unit has been engaged in continuous improvement?

The unit has engaged in a number of activities that have led to continuous improvement. The unit has established standardized procedures for comprehensive evaluation of faculty across the unit. To aid in this effort, the unit has adopted new policies for third-year review in the tenure and promotion process. Effective with the 2013-2014 academic year, a unit-wide research symposium was established to allow
faculty members to present and share with their peers individual research that had been presented at national conferences. Faculty can also present at the unit symposiums as part of their preparation for national presentations. Unit faculty members continue to improve their skills in instructional technology in order to model a variety of instructional strategies. The unit is currently aligning instruction to the Charlotte Danielson Teaching Framework, the standard to which in-service teachers in the state are accountable. Training was provided over the course of several months to both professional and clinical faculty members to familiarize them with the Framework and provide them with ideas on how to better align current coursework. An outgrowth of the Framework training was a four-hour workshop for all unit faculty members on adult learning theory and active teaching strategies.

To sum, the unit has implemented a number of activities to support professional development activities for faculty and their assessment. These actions have ranged from increasing the amount of funds for travel and faculty development to providing workshops for faculty members.

Standard 6

Standard 6: Unit Governance And Resources

The unit has the leadership, authority, budget, personnel, facilities, and resources, including information technology resources, for the preparation of candidates to meet professional, state, and institutional standards.

6.1 Overall Findings

What did the evidence reveal about the unit continuing to meet this standard?

Interviews with the dean and others in leadership positions confirmed that the unit has the leadership and authority to plan, deliver, and administer coherent programs of study. During the onsite visit, the dean highlighted the significant administrative and structural changes since her arrival ten years ago. These included changes in both department and committee structures.

Exhibits and interviews with unit faculty, P-12 partners, and faculty from other units showed that a comprehensive formal organizational program structure for the design, implementation, and evaluation of unit educator preparation programs was not in place. There were informal program processes evident, usually taking place at the faculty level. But, the lack of collaboration between unit faculty and faculty in other units of the institution involved in the preparation of professional educators was evident. Between the prior accreditation visit and the current visit the unit eliminated its Teacher Education Committee. This action eliminated the formal mechanism the unit had to oversee and manage the educator programs offered through the other units. Interviews with content faculty from other colleges remembered the Teacher Education Committee and indicated their support for re-instituting it or something similar.

Interviews with the deans, chairs, provost, and vice president for administration demonstrated that the budget for the unit is equitable and proportional to other units on campus that have clinical components.
Over the past few years the state has suffered a significant budget crisis that affected all of higher education, from which the unit has not recovered. However, it does not appear the institution has decreased the unit's funding in an inequitable manner. For example, the amount per student the College of Education receives is consistent with the amount received by the School of Rehabilitation and Communication Science, which was identified by the provost as the best unit comparison given its size and clinical component. The provost has recently increased the base budget of the unit with permanent funding to specifically support the clinical components of the unit.

The unit does expect faculty members to effectively engage in teaching, scholarship, assessment, advisement, collaborative work in P-12 schools, and service. Data from faculty vitae, interviews, and summary tables show the unit faculty engage in teaching, scholarship, and service. Despite the lack of a formal connection with faculty in other units, some faculty do engage faculty from other colleges in scholarship and service efforts. Course schedule data, as well as interviews with faculty and administrators, confirmed the application of the unit's course workload policy. Dissertation load is not an issue currently as the doctoral enrollment is manageable for the full-time faculty.

Unit support personnel is adequate. Through interviews and additional data from the website, the unit demonstrated that support personnel provide services that allow the programs to prepare candidates to meet standards. There were adequate support staff by area including the dean's office, field experience office, Department of Organizational Learning and Performance, Department of School Psychology and Educational Leadership, Department of Sport Science and Physical Education, and Teaching and Educational Studies. Adequate support personnel were also in place in the unit's Undergraduate Advising Center, Graduate Advising Center, and Instructional Materials Center.

The unit has offered on-going professional development for its faculty, personnel, and staff. The unit consistently demonstrated its use of surveys to determine the professional development needs of its faculty. Each department manages faculty travel funds and supports them in attending and presenting at various national and international conferences in their fields. Junior faculty members are given additional travel funds as they establish their careers.

The unit has adequate campus and school facilities to support candidates in meeting standards. The facilities support faculty and candidate use of information technology in instruction. A tour of facilities confirmed the unit's narrative. The unit emphasizes utilizing technology in the preparation of candidates at all levels, as confirmed by candidates and the P12 leaders who hire them. Hiring authorities made it clear that candidates from the unit have significant technology skills. The unit has both a classroom technology replacement and integration plan, as well as a faculty computer replacement process. The unit's technology director provided a replacement schedule that listed every faculty and staff member and when their computers were scheduled for replacement. The unit has moved from a five-year to a four-year replacement schedule. A variety of technologies are integrated in the courses, the field and clinical experiences, student teaching, and professional development for all candidates, faculty, and research activities.

6.2 Moving Toward Target or Continuous Improvement

Please respond to 6.2.a if this is the standard on which the unit is moving to the target level. If it is not the standard on which the unit is moving to the target level, respond to 6.2.b.

6.2.a Movement Toward Target.

Based on the criteria for Movement Toward Target, provide a summary of the unit's performance.
6.2.b Continuous Improvement.

What activities and outcomes demonstrate that the unit has been engaged in continuous improvement?

The unit has clearly recognized the limitations of its current assessment system, and its need for more formal collaboration with p-12 partners and program faculty in other units of the institution. The unit's orientation session for the team illustrated the continued improvements the new assessment technology will create. In addition, new committees are being formed that should provide the structure needed for P12 partners and content faculty input.

Especially at the initial level, the unit has taken steps to improve advising, including field placements. The development of the ATLAS office was based on unit data concerning overall success of candidates. ATLAS stands for the Advising, Teaching, Learning, and Student Success Center. Based on interviews, the difference in satisfaction in this area between new candidates and graduating candidates was significant. The unit has also developed an online appointment system for initial candidate advising. It has allowed the advisors to focus on specific programs providing more consistency for candidate/advisor relationships.

6.2.b.i Strengths.

What areas of the standard are being addressed at the target level?

Faculty are not only engaged in a wide-range of professional activities, including teaching, scholarship, and service at the local level, but they also make significant professional contributions at the state, national, and international levels.

### 6.3.c What new AFIs are recommended?

<table>
<thead>
<tr>
<th>AFI</th>
<th>AFI Rationale</th>
</tr>
</thead>
<tbody>
<tr>
<td>The governance structure does not ensure a cohesive and integrated assessment system.</td>
<td>The unit currently has three unrelated methods of collecting and sharing data - FileMakerPro model, the transition to TaskStream, and some programs using individual Excel based processes. This lack of coherence prevents the unit from having a coordinated and uniform assessment system.</td>
</tr>
<tr>
<td>The governance structure, at all levels, does not provide for the effective monitoring of the implementation and utilization of the assessment data for decision-making at the program and unit levels.</td>
<td>Program and unit level changes were not clearly connected to data from the assessment system.</td>
</tr>
<tr>
<td>The unit’s governance structure does not allow the unit to manage and coordinate the education programs that are located in other units of the institution.</td>
<td>There is no evidence of any committee or process that allows the unit to oversee programs or collaborate with content faculty located in other colleges in the institution. There is no evidence that the unit maintains regular and systematic connection with those colleges and faculty.</td>
</tr>
<tr>
<td>The unit does not effectively engage P-12 teachers and other practicing educators in the design, implementation, and evaluation of the unit and its programs.</td>
<td>While there was evidence of meetings with some partners and individuals, there was no evidence of an effective and consistent process for collaborative efforts with P-12 partners.</td>
</tr>
</tbody>
</table>

Candidates demonstrate knowledge of the structure and forms of English language as they relate to various rhetorical situations (grammar, usage, and mechanics); they apply the concept of dialect and relevant grammar systems (e.g., descriptive and prescriptive); they facilitate principles of language acquisition; they connect the influence of English language history on ELA content and its impact of language on society.</td>
<td></td>
<td>ENGL 2280 AND ENGL 2281</td>
</tr>
</tbody>
</table>
### Standard #4: Content Knowledge (continued)

4.3. Candidates demonstrate knowledge and compose a range of formal and informal texts, taking into consideration the interrelationships among form, audience, context, and purpose; candidates understand that writing involves strategic and recursive processes across multiple stages (e.g., planning, drafting, revising, editing, and publishing); candidates use contemporary technologies and/or digital media to compose multimodal discourse.

| ENGL 3311; ENGL 4407; ENGL 4431 |

4.4. Candidates demonstrate knowledge and use strategies for acquiring and applying vocabulary knowledge to general academic and domain specific words as well as unknown terms important to comprehension (reading and listening) or expression (speaking and writing).

| ENGL 2280 AND ENGL 2281 |

### Standard #5: Application of Content

5.1. Candidates design and/or implement instruction related to the strategic use of language conventions (grammar, usage, and mechanics) in the context of students’ writing for different audiences, purposes, and modalities.

| ENGL 4433-Methods |

5.2. Candidates design and/or implement English language arts and literacy instruction that promotes social justice and critical engagement with complex issues related to maintaining a diverse, inclusive, equitable society.

| ENGL 3356; EDUC 3327; ENGL 2281; ENGL 4433; EDUC 3309; ST Teaching |

5.3. Candidates design and/or implement instruction related to a breadth and depth of texts, purposes, and complexities (e.g., literature, digital, visual, informative, argument, narrative, poetic) that lead to students becoming independent, critical, and strategic readers, writers, speakers, and listeners.

| ENGL 3356; ENGL 2281; ENGL 4433; EDUC 3309; ST Teaching |

5.4. Candidates design and/or implement instruction related to speaking and listening that lead to students becoming critical and active participants in conversations and collaborations.

| ENGL 3356; ENGL 2281; ENGL 4433; EDUC 3309; ST Teaching |

### Standard #6: Assessment

6.1 Candidates design a range of authentic assessments (e.g. formal and informal, formative and summative) of reading and literature that demonstrate an understanding of how learners develop and that address interpretive, critical, and evaluative abilities in reading, writing, speaking, listening, viewing, and presenting.

| ENGL 3327 |

6.2. Candidates design or knowledgeably select appropriate reading assessments in response to student interests, reading proficiencies, and/or reading strategies.

| ENGL 2281; ENGL 3327 |

6.3. Candidates design or knowledgeably select a range of assessments for students that promote their development as writers, are appropriate to the writing task, and are consistent with current research and theory. Candidates respond to students’ writing throughout the students’ writing processes in ways that engage students’ ideas and encourage their growth as writers over time.

| ENGL 4431 |

6.4. Candidates differentiate instruction based on multiple kinds of assessments of learning in English language arts (e.g., students’ self-assessments, formal assessments, informal assessments); candidates communicate with students about their performance in ways that actively involve students in their own learning.

| ENGL 4431; ENGL 4433; EDUC 3309; ST Teaching |
## 2016 TEACHER PREPARATION PROGRAM REVISION - DETAIL
### ENGLISH LANGUAGE ARTS

Course Descriptions – English Language Arts

ENG 2211 Intro Lit Analysis - Writing-intensive course. Teaches students how to perform close readings of poetry and prose. Introduces major theoretical approaches to literature. Includes orientation to finding and evaluating secondary criticism.

ENG 3311 Writ & Res about Lit - Writing-intensive course with continued emphasis on close reading. Fosters independent work with criticism. Students first learn to identify current scholarly conversations on issues relevant to the course. Then, in longer essays, they position their own arguments in the context of these discussions.

ENG 2257 or 58 Surv Wrld Lit - Examination of major works and authors in historical perspective, with emphasis upon literary and cultural backgrounds.

ENG 2267 or 68 Surv Brit Lit - Examination of major works and authors in historical perspective, with emphasis upon literary and cultural backgrounds.

ENG 2277 or 78 Surv Am Lit - Examination of major works and authors in historical perspective with emphasis upon literary and cultural backgrounds.

ENG 2280 Grammar and Usage - Introduction to the grammar of standard written English. The course is designed to give students an improved knowledge of grammar in order to improve usage and writing skills at both the sentence and paragraph level.

ENG 2281 Intro Lang Studies - Introduction to basic concepts and models for the study of English phonology, morphology, syntax, and lexis.

ENG 3327 Spec Topic Genre - Focused study of a generic tradition modified by thematic or historical contexts, with emphasis on young adult literature including selections from global literature.

ENG 3356 Ethnicity in Lit - Study of the construction of ethnicity in literature, with attention to specific concerns relevant to one or more ethnic groups.

ENG 4407 Topics in Prof Writing - Topics in professional writing, including standard genres, new media, and emerging trends in research and the workplace. Emphasis on developing practical skills, theoretical knowledge, and finished professional documents offered specifically for teachers, to include multimodal communication as well as writing in the field of education.

ENG 4431 Teach and Writ Proj - Aids teachers of all grade levels and all academic subjects in developing skills in teaching writing and listening skills. Combines composition theory and practical classroom exercises with daily writing and critiques.

ENG 4433 Meth Teach English - Study of the objectives and methods of teaching literature and composition in secondary schools. Ideally taken semester before student teaching Pre-1800 period or maj fig****

ENG 4476 or 4477 Shakespeare - Intensive study of selected works by Shakespeare, with special emphasis placed upon performance issues.

ENG 4487 Hist English Lang - Study of the linguistic and socio-political changes and developments in the English language.
ENL Course Descriptions

EDUC 4460 - Study of ESL learner characteristics, historical, philosophical, cultural and linguistic foundations of ESL. Theories of language acquisition and those of leaders in the field will be included.

EDUC 4463 - Language assessment, planning, and delivery, for teaching limited English proficient K-12 students. Appropriate methods for students at various developmental stages of language acquisition will be studied.

EDUC 4464 - Field experience in settings with English-as-a-second-language learners; intensive focus on intervention strategies.

ENGL 3356 - Study of the construction of ethnicity in literature, with attention to specific concerns relevant to one or more ethnic groups.

ENGL 4488/ANTH 4450 - Study of the patterned covariation of language and society, social dialects and social styles in language; problems of bilingualism, multilingualism, creoles and language uses.

ENGL 1107/ANTH 1107 – General survey of structure and use of language. Topics include language origins, descriptive and historical linguistics, language and culture, and history of the English language.

ENGL 2280 - Introduction to the grammar of standard written English. The course is designed to give students an improved knowledge of grammar in order to improve usage and writing skills at both the sentence and paragraph level.
Economics Course Descriptions

**ECON 2201** - Introduction to the U.S. economy. Includes analysis of demand and supply as well as the topics of national output, unemployment and inflation. Examines the roles of governmental spending and taxation and monetary policy conducted by the Federal Reserve.

**ECON 2202** - Introduction to demand and supply with applications to elasticity, consumer behavior, the cost structure of firms, the behavior of firms in industries that range from having monopoly power to being competitive, and the role of government in a market economy.

**ECON 3301** - Examines and analyzes aggregate economic activity as measured by the unemployment rate, inflation rate, and total output. Monetary and fiscal policy are explored and evaluated for stabilization purposes; economic growth is explained.

**ECON 3302** - Examines and analyzes how rational buyers make optimal choices given their budgetary constraints and preferences. Examines and analyzes how sellers make profit maximizing decisions under different market structures. Explains how these individual choices are coordinated into outcomes which result in an efficient allocation of limited resources.

**ECON 3306** - Overview of the academic and philosophical development of economic thought since its inception to modern times. Readings will come from original sources including Aristotle, Aquinas, Smith, Malthus, Ricardo, Marx, Mill, Marshall, Veblen, and Keynes.

**FIN 1115** - Evaluate and analyze personal and public information and databases to develop financial literacy for budgeting, credit, borrowing, planning, insurance, investing and estate planning. Examine financial literacy within the larger context of the regulatory environment, society, data integrity and ethics.

JUNE 16, 2016

SUBJECT
Northwest Nazarene University – Program Review

APPLICABLE STATUTE, RULE, OR POLICY
Sections 33-1254 and 33-1258, Idaho Code

BACKGROUND/DISCUSSION
The Professional Standards Commission (PSC) is tasked with conducting a full review, and making recommendations, of all approved teacher preparation programs in Idaho on a seven year cycle and making recommendations to the State Board of Education (Board) for continued approval of the programs. The PSC convened a State Review Team containing content experts and conducted the full program review of Northwest Nazarene University (NNU) February 28 through March 3, 2015. The PSC reviewed the final report submitted by the State Review Team and voted to recommend that the State Board of Education adopt the State Team Report as written and extend approval of the programs as specified in the report.

IMPACT
The approval of the recommendations in this report will enable NNU to continue to prepare teachers in the best possible manner, ensuring that all state teacher preparation standards are being effectively embedded in their teacher preparation programs.

ATTACHMENTS
Attachment 1 – Northwest Nazarene University Final State Team Report Page 3
Attachment 2—NCATE Final Report Page 129

STAFF COMMENTS AND RECOMMENDATIONS
Pursuant to Section 33-114, Idaho Code the review and approval of all teacher preparation programs in the state is vested in the Board. The program reviews are conducted for the Board through the PSC based on a seven year cycle. The reviews are done in conjunction with the preparation program’s accreditation review cycle. Additionally, every third year following the full review and audit of state specific certification requirements is conducted. The review process is designed to assure the programs are meeting the Board approved school personnel standards for the applicable programs, that the teacher are prepared to teach the state content standards for their applicable subject areas, as well as the quality of candidates exiting the programs.

The current Board approved accrediting body for teacher preparation programs is the National Council for Accreditation of Teacher Education (NCATE). On-site preparation program reviews are conducted in partnership with NCATE based on a partnership agreement. During a concurrent visit, the NCATE team and the state team collaborate to conduct the review, however each team generates their own reports.

CONSENT-SDE TAB 13 Page 1
BOARD ACTION
I move to adopt the recommendations by the Professional Standards Commission and to accept the State Team Report for Northwest Nazarene University as submitted.

Moved by ___________ Seconded by ___________ Carried Yes _____ No _____

INTRODUCTION

Founded in 1913, Northwest Nazarene University is a liberal arts institution sponsored by the Church of the Nazarene and governed by a Board of Trustees, representing seven church districts in eight Northwest states. Located in Nampa, a city of 84,000 that is 20 miles west of Boise, the 34-building campus covers 90 acres. A downtown Boise site has served graduate students in that area since about 2001. The university also has remote sites in Idaho Falls and Twin Falls.

Their mission is to be a Christ-centered unit that develops capable, compassionate educators who are determined and prepared to meet the educational needs of young people and schools in a changing world.

The purpose of the on-site review was to determine if sufficient evidence was presented indicating that candidates at Northwest Nazarene University meet state standards for beginning teachers. The review was conducted by a twelve member state program approval team, accompanied by two state observers. The standards used to validate the Institutional Report were the State Board of Education–approved Idaho Standards for the Initial Certification of Professional School Personnel. State Board–approved knowledge and performance indicators, as well as rubrics, were used to assist team members in determining how well standards are being met. Core standards, as well as individual program foundational and enhancement standards, were reviewed. Core standards are not subject to approval, since they permeate all programs, but are not in themselves, a program.

Team members looked for a minimum of three applicable pieces of evidence to validate each standard. These evidences included but were not limited to: course syllabi, class assignment descriptions, assignment grading rubrics, candidate evaluations and letters of support, additional evaluations—both formal and informal, program course requirement lists, actual class assignments, Praxis II test results, and electronic portfolio entry evidence. Some observations of candidates teaching through PreK-12 site visits and video presentations were also used. In addition to this documentation, team members conducted interviews with candidates, completers, college administrators, college faculty, PreK-12 principals, and cooperating teachers.

To assist the reader, the report includes language recommended by the National Council for the Accreditation of Teacher Education, a national accrediting agency. Specifically, to assist the reader, the terms below are used throughout the report as defined below:

Candidate – a student enrolled at the Northwest Nazarene University.
Student – an individual enrolled in an Idaho PreK-12 public school
Unit – the institution’s teacher preparation program
NCATE – National Council for the Accreditation of Teacher Education

* A review of Northwest Nazarene’s Communication and Economics programs was requested by the institution; however, it was known that there were not enough program completers to gain full approval. The decision was made to grant conditional approval and then review these programs in three years.
Idaho Core Teacher Standards

State Program Approval Rubric for Teacher Preparation Programs

Candidate Performance Relative to the Idaho Standards

The Idaho Standards for Initial Certification provide the framework for the approval of educator preparation programs. As such, the standards set the criteria by which teacher preparation programs are reviewed for state program approval.

The following rubric is used to evaluate the extent to which teacher preparation programs prepare teachers who meet the standards. The rubric is designed to be used with each individual preparation program (i.e., Elementary, Special Education, Secondary English, Secondary Science–Biology, etc.).

Consistent with NCATE accreditation standards, the rubrics describe three levels of performance (i.e., unacceptable, acceptable, and target) for each of the Idaho Standards for Initial Certification. The rubric shall be used to make holistic judgments. Elements identified in the rubrics provide the basis upon which the State Program Approval Team evaluates the institution’s evidence that candidates meet the Idaho standards. The institution is expected to provide information about candidate performance related to the Idaho Core Teacher Standards (and Idaho Teacher Standards for specific preparation areas).

Standard #1: Learner Development. The teacher understands how learners grow and develop, recognizing that patterns of learning and development vary individually within and across the cognitive, linguistic, social, emotional, and physical areas, and designs and implements developmentally appropriate and challenging learning experiences.

Knowledge
1. The teacher understands how learning occurs--how learners construct knowledge, acquire skills, and develop disciplined thinking processes--and knows how to use instructional strategies that promote student learning.
2. The teacher understands that each learner’s cognitive, linguistic, social, emotional, and physical development influences learning and knows how to make instructional decisions that build on learners’ strengths and needs.
3. The teacher identifies readiness for learning, and understands how development in any one area may affect performance in others.
4. The teacher understands the role of language and culture in learning and knows how to modify instruction to make language comprehensible and instruction relevant, accessible, and challenging.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.1 Knowledge Learner Development</td>
<td></td>
<td>X</td>
<td></td>
</tr>
</tbody>
</table>
1.1 Syllabi, required coursework, candidate lesson plans, candidate instructional units, and candidate papers provide evidence that teacher candidates demonstrate an adequate understanding of how students learn and develop.

**Performance**

1. The teacher regularly assesses individual and group performance in order to design and modify instruction to meet learners’ needs in each area of development (cognitive, linguistic, social, emotional, and physical) and scaffolds the next level of development.
2. The teacher creates developmentally appropriate instruction that takes into account individual learners’ strengths, interests, and needs and that enables each learner to advance and accelerate his/her learning.
3. The teacher collaborates with families, communities, colleagues, and other professionals to promote learner growth and development.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.2 Performance</td>
<td>X</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Learner Development</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

1.2 Candidate interviews, work samples, and lesson plans indicated some hypothetical developmentally appropriate instruction that accounts for individual learners’ strengths, interests, and needs. However, minimal evidence was provided in field experience planning or student teaching implementation in learner development. There was also minimal evidence found to indicate overall ability to collaborate with families to promote learner growth and development, as well as indications that candidates create instruction based on individual learner’s strengths, interests, or needs.

**Standard #2: Learning Differences.** The teacher uses understanding of individual differences and diverse cultures and communities to ensure inclusive learning environments that enable each learner to meet high standards.

**Knowledge**

1. The teacher understands and identifies differences in approaches to learning and performance and knows how to design instruction that uses each learner’s strengths to promote growth.
2. The teacher understands students with exceptional needs, including those associated with disabilities and giftedness, and knows how to use strategies and resources to address these needs.
3. The teacher knows about second language acquisition processes and knows how to incorporate instructional strategies and resources to support language acquisition.
4. The teacher understands that learners bring assets for learning based on their individual experiences, abilities, talents, prior learning, and peer and social group interactions, as well as language, culture, family, and community values.
5. The teacher knows how to access information about the values of diverse cultures and communities and how to incorporate learners’ experiences, cultures, and community resources into instruction.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>2.1 Knowledge Learning Differences</td>
<td></td>
<td>X</td>
<td></td>
</tr>
</tbody>
</table>

2.1 Syllabi, required coursework, course assignments, as well as candidate lesson plans, instructional units, and behavior intervention plans provide evidence that teacher candidates demonstrate an adequate understanding of how students differ in their approaches to learning. All candidates take coursework in teaching students with cultural diversities, English Language Learners, and exceptionalities. These courses require fieldwork and journaling which allow candidates to gain a wide knowledge of learning differences.

Performance
1. The teacher designs, adapts, and delivers instruction to address each student’s diverse learning strengths and needs and creates opportunities for students to demonstrate their learning in different ways.
2. The teacher makes appropriate and timely provisions (e.g., pacing for individual rates of growth, task demands, communication, assessment, and response modes) for individual students with particular learning differences or needs.
3. The teacher designs instruction to build on learners’ prior knowledge and experiences, allowing learners to accelerate as they demonstrate their understandings.
4. The teacher brings multiple perspectives to the discussion of content, including attention to learners’ personal, family, and community experiences and cultural norms.
5. The teacher incorporates tools of language development into planning and instruction, including strategies for making content accessible to English language learners and for evaluating and supporting their development of English proficiency.
6. The teacher accesses resources, supports, and specialized assistance and services to meet particular learning differences or needs.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>2.2 Performance Learning Differences</td>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

2.2 Candidate instructional units, lesson plans, and student teaching binders as well as interviews with candidates, completers, and cooperating teachers demonstrate minimal candidate understanding of designing and adapting instruction for students with multiple diverse learning needs. At times, candidate work identified hypothetical accommodations or adaptations. It was apparent through conversations with candidates and cooperating instructors that focus in this area
is clearly centered on English Language Learners. However, little focus seems to be placed on students with other exceptionalities. Interviews indicated that candidates gain necessary experience in their student teaching working with students with exceptionalities, if their cooperating teacher emphasizes and encourages candidate engagement in this process. Reading coursework emphasizes how to work with struggling readers. Such an emphasis throughout all the programs would assist all teachers who are new to the profession.

Standard #3: Learning Environments. The teacher works with others to create environments that support individual and collaborative learning, and that encourage positive social interaction, active engagement in learning, and self-motivation.

Knowledge
1. The teacher understands the relationship between motivation and engagement and knows how to design learning experiences using strategies that build learner self-direction and ownership of learning.
2. The teacher knows how to help learners work productively and cooperatively with each other to achieve learning goals.
3. The teacher knows how to collaborate with learners to establish and monitor elements of a safe and productive learning environment including norms, expectations, routines, and organizational structures.
4. The teacher understands how learner diversity can affect communication and knows how to communicate effectively in differing environments.
5. The teacher knows how to use technologies and how to guide learners to apply them in appropriate, safe, and effective ways.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>3.1 Knowledge</td>
<td></td>
<td></td>
<td>X</td>
</tr>
<tr>
<td>Learning Environments</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

3.1 Course syllabi and assignments, such as candidate behavior change projects, classroom management plans, cooperative learning lessons, and instructional units provide evidence that teacher candidates demonstrate an adequate understanding of the principles of motivation and management for safe and productive student behavior.

Performance
1. The teacher collaborates with learners, families, and colleagues to build a safe, positive learning climate of openness, mutual respect, support, and inquiry.
2. The teacher develops learning experiences that engage learners in collaborative and self-directed learning and that extend learner interaction with ideas and people locally and globally.
3. The teacher collaborates with learners and colleagues to develop shared values and expectations for respectful interactions, rigorous academic discussions, and individual and group responsibility for quality work.
4. The teacher manages the learning environment to actively and equitably engage learners by organizing, allocating, and coordinating the resources of time, space, and learners’ attention.
5. The teacher uses a variety of methods to engage learners in evaluating the learning environment and collaborates with learners to make appropriate adjustments.
6. The teacher communicates verbally and nonverbally in ways that demonstrate respect for and responsiveness to the cultural backgrounds and differing perspectives learners bring to the learning environment.
7. The teacher promotes responsible learner use of interactive technologies to extend the possibilities for learning locally and globally.
8. The teacher intentionally builds learner capacity to collaborate in face-to-face and virtual environments through applying effective interpersonal communication skills.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>3.2 Performance Learning Environments</td>
<td></td>
<td>X</td>
<td></td>
</tr>
</tbody>
</table>

3.2 Interviews with candidates, completers, cooperating teachers, and university faculty, as well as student teaching binders, lesson plans, and classroom technology portfolios, provide evidence that teacher candidates are able to create, manage, and modify learning environments to ensure they are safe and productive. The use of ITeach technology also allows candidates to gain real-world type experience with the non-real world ability to stop and analyze and re-try various situations.

**Standard #4: Content Knowledge.** The teacher understands the central concepts, tools of inquiry, and structures of the discipline(s) he or she teaches and creates learning experiences that make the discipline accessible and meaningful for learners to assure mastery of the content.

**Knowledge**
1. The teacher understands major concepts, assumptions, debates, processes of inquiry, and ways of knowing that are central to the discipline(s) s/he teaches.
2. The teacher understands common misconceptions in learning the discipline and how to guide learners to accurate conceptual understanding.
3. The teacher knows and uses the academic language of the discipline and knows how to make it accessible to learners.
4. The teacher knows how to integrate culturally relevant content to build on learners’ background knowledge.
5. The teacher has a deep knowledge of student content standards and learning progressions in the discipline(s) s/he teaches.
4.1 Final Praxis II exam scores, candidate and completer GPA information, candidate assignments, lesson plans, instructional units, and teacher work samples provide evidence that teacher candidates demonstrate adequate knowledge of the content that they plan to teach and understand the ways new knowledge in the content area is discovered. Eighty percent or more of the candidates meet the qualifying scores on Idaho State Board-required academic examination(s).

Performance
1. The teacher effectively uses multiple representations and explanations that capture key ideas in the discipline, guide learners through learning progressions, and promote each learner’s achievement of content standards.
2. The teacher engages students in learning experiences in the discipline(s) that encourage learners to understand, question, and analyze ideas from diverse perspectives so that they master the content.
4. The teacher stimulates learner reflection on prior content knowledge, links new concepts to familiar concepts, and makes connections to learners’ experiences.
5. The teacher recognizes learner misconceptions in a discipline that interfere with learning, and creates experiences to build accurate conceptual understanding.
6. The teacher evaluates and modifies instructional resources and curriculum materials for their comprehensiveness, accuracy for representing particular concepts in the discipline, and appropriateness for his/her learners.
7. The teacher uses supplementary resources and technologies effectively to ensure accessibility and relevance for all learners.
8. The teacher creates opportunities for students to learn, practice, and master academic language in their content.
9. The teacher accesses school and/or district-based resources to evaluate the learner’s content knowledge in their primary language.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>4.2 Performance Content Knowledge</td>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

4.2 Candidate instructional units, student teaching binders, and lesson plans as well as interviews and observations of candidates during student teaching, provide evidence that teacher candidates create learning experiences that make the content taught meaningful to students. Candidates have multiple opportunities to design instruction which embeds their content knowledge within the instruction.

Standard #5: Application of Content. The teacher understands how to connect concepts and use differing perspectives to engage learners in critical thinking, creativity, and collaborative problem solving related to authentic local and global issues.
Knowledge
1. The teacher understands the ways of knowing in his/her discipline, how it relates to other disciplinary approaches to inquiry, and the strengths and limitations of each approach in addressing problems, issues, and concerns.
2. The teacher understands how current interdisciplinary themes (e.g., civic literacy, health literacy, global awareness) connect to the core subjects and knows how to weave those themes into meaningful learning experiences.
3. The teacher understands the demands of accessing and managing information as well as how to evaluate issues of ethics and quality related to information and its use.
4. The teacher understands how to use digital and interactive technologies for efficiently and effectively achieving specific learning goals.
5. The teacher understands critical thinking processes and knows how to help learners develop high level questioning skills to promote their independent learning.
6. The teacher understands communication modes and skills as vehicles for learning (e.g., information gathering and processing) across disciplines as well as vehicles for expressing learning.
7. The teacher understands creative thinking processes and how to engage learners in producing original work.
8. The teacher knows where and how to access resources to build global awareness and understanding, and how to integrate them into the curriculum.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>5.1 Knowledge Application of Content</td>
<td></td>
<td>X</td>
<td></td>
</tr>
</tbody>
</table>

5.1 Candidate instructional units, lesson plans, and classroom technology portfolios provide evidence that teacher candidates understand how to connect concepts and use differing perspectives to engage learners in critical thinking, creativity, and collaborative problem solving related to authentic and global issues. Interviews also indicated that University faculty modeled for candidates differing perspectives, engaging learners, accessing resources and integrating curriculum.

Performance
1. The teacher develops and implements projects that guide learners in analyzing the complexities of an issue or question using perspectives from varied disciplines and cross disciplinary skills (e.g., a water quality study that draws upon biology and chemistry to look at factual information and social studies to examine policy implications).
2. The teacher engages learners in applying content knowledge to real world problems through the lens of interdisciplinary themes (e.g., financial literacy, environmental literacy).
3. The teacher facilitates learners’ use of current tools and resources to maximize content learning in varied contexts.
4. The teacher engages learners in questioning and challenging assumptions and approaches in order to foster innovation and problem solving in local and global contexts.
5. The teacher develops learners’ communication skills in disciplinary and interdisciplinary contexts by creating meaningful opportunities to employ a variety of forms of communication that address varied audiences and purposes.

6. The teacher engages learners in generating and evaluating new ideas and novel approaches, seeking inventive solutions to problems, and developing original work.

7. The teacher facilitates learners’ ability to develop diverse social and cultural perspectives that expand their understanding of local and global issues and create novel approaches to solving problems.

8. The teacher develops and implements supports for learner literacy development across content areas.

5.2 Candidate lesson plans, instructional units, candidate and cooperating teaching interviews, and student teaching binders provide evidence that teacher candidates demonstrate the ability to connect concepts and use differing perspectives to engage learners in critical thinking, creativity, and collaborative problem solving related to authentic local and global issues.

**Standard #6: Assessment.** The teacher understands and uses multiple methods of assessment to engage learners in their own growth, to monitor learner progress, and to guide the teacher’s and learner’s decision making.

**Knowledge**
1. The teacher understands the differences between formative and summative applications of assessment and knows how and when to use each.
2. The teacher understands the range of types and multiple purposes of assessment and how to design, adapt, or select appropriate assessments to address specific learning goals and individual differences, and to minimize sources of bias.
3. The teacher knows how to analyze assessment data to understand patterns and gaps in learning, to guide planning and instruction, and to provide meaningful feedback to all learners.
4. The teacher knows when and how to engage learners in analyzing their own assessment results and in helping to set goals for their own learning.
5. The teacher understands the positive impact of effective descriptive feedback for learners and knows a variety of strategies for communicating this feedback.
6. The teacher knows when and how to evaluate and report learner progress against standards.
7. The teacher understands how to prepare learners for assessments and how to make accommodations in assessments and testing conditions, especially for learners with disabilities and language learning needs.

6.1 Candidate assessment plans, teacher work samples, and reflective journals, as well as faculty interviews, candidate and completer interviews, provide evidence that teacher candidates demonstrate an adequate understanding of formal and informal student assessment strategies to evaluate students. There is minimal evidence to indicate that candidates learn about using assessment practices to advance student performance and to determine teaching effectiveness.

**Performance**

1. The teacher balances the use of formative and summative assessment as appropriate to support, verify, and document learning.
2. The teacher designs assessments that match learning objectives with assessment methods and minimizes sources of bias that can distort assessment results.
3. The teacher works independently and collaboratively to examine test and other performance data to understand each learner’s progress and to guide planning.
4. The teacher engages learners in understanding and identifying quality work and provides them with effective descriptive feedback to guide their progress toward that work.
5. The teacher engages learners in multiple ways of demonstrating knowledge and skill as part of the assessment process.
6. The teacher models and structures processes that guide learners in examining their own thinking and learning as well as the performance of others.
7. The teacher effectively uses multiple and appropriate types of assessment data to identify each student’s learning needs and to develop differentiated learning experiences.
8. The teacher prepares all learners for the demands of particular assessment formats and makes appropriate accommodations in assessments or testing conditions, especially for learners with disabilities and language learning needs.
9. The teacher continually seeks appropriate ways to employ technology to support assessment practice both to engage learners more fully and to assess and address learner needs.

6.2 Candidate and faculty interviews, student teaching observations, and candidate assessment plans, student teaching binders, and teacher work samples provide evidence that teacher candidates use and interpret formal and informal assessment strategies to evaluate student performance. There seems to be less evidence of candidates using assessment information to advance student performance and determine teaching effectiveness.
Standard #7: Planning for Instruction. The teacher plans instruction that supports every student in meeting rigorous learning goals by drawing upon knowledge of content areas, curriculum, cross-disciplinary skills, and pedagogy, as well as knowledge of learners and the community context.

Knowledge
1. The teacher understands content and content standards and how these are organized in the curriculum.
2. The teacher understands how integrating cross-disciplinary skills in instruction engages learners purposefully in applying content knowledge.
3. The teacher understands learning theory, human development, cultural diversity, and individual differences and how these impact ongoing planning.
4. The teacher understands the strengths and needs of individual learners and how to plan instruction that is responsive to these strengths and needs.
5. The teacher knows a range of evidence-based instructional strategies, resources, and technological tools and how to use them effectively to plan instruction that meets diverse learning needs.
6. The teacher knows when and how to adjust plans based on assessment information and learner responses.
7. The teacher knows when and how to access resources and collaborate with others to support student learning (e.g., special educators, related service providers, language learner specialists, librarians, media specialists, community organizations).

<tbody>
<tr>
<td>7.1 Knowledge Instructional Planning Skills</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

7.1 Candidate instructional units, lesson plans, student teaching binders, and candidate and cooperating teacher interviews provide in-depth evidence that teacher candidates demonstrate an adequate understanding of how to plan and prepare instruction based upon consideration of knowledge of subject matter, students, the community, and curriculum goals. Candidates overwhelmingly expressed how prepared they felt to be successful in the classroom because of the emphasis placed early and often in the program on effective lesson and unit planning. Cooperating teachers provided further support, identifying that because candidates came to the student teaching experience with sound planning skills, they were able to respond to changing day-to-day needs in a nimble fashion.

Performance
1. The teacher individually and collaboratively selects and creates learning experiences that are appropriate for curriculum goals and content standards, and are relevant to learners.
2. The teacher plans how to achieve each student’s learning goals, choosing appropriate strategies and accommodations, resources, and materials to differentiate instruction for individuals and groups of learners.
3. The teacher develops appropriate sequencing of learning experiences and provides multiple ways to demonstrate knowledge and skill.
4. The teacher plans for instruction based on formative and summative assessment data, prior learner knowledge, and learner interest.
5. The teacher plans collaboratively with professionals who have specialized expertise (e.g., special educators, related service providers, language learning specialists, librarians, media specialists) to design and jointly deliver as appropriate learning experiences to meet unique learning needs.
6. The teacher evaluates plans in relation to short- and long-range goals and systematically adjusts plans to meet each student’s learning needs and enhance learning.

7.2 Candidate instructional units, lesson plans, student teaching binders, and candidate and cooperating teacher interviews provide in-depth evidence that teacher candidates plan and prepare instruction based upon consideration of subject matter, students, the community, and curriculum goals. In addition, candidates seem to receive the opportunity to utilize a variety of lesson planning templates, allowing them to utilize techniques that fit their own needs and those of their students. Of specific note was candidates’ use of backward design as a strong addition.

**Standard #8: Instructional Strategies.** The teacher understands and uses a variety of instructional strategies to encourage learners to develop deep understanding of content areas and their connections, and to build skills to apply knowledge in meaningful ways.

**Knowledge**
1. The teacher understands the cognitive processes associated with various kinds of learning (e.g., critical and creative thinking, problem framing and problem solving, invention, memorization and recall) and how these processes can be stimulated.
2. The teacher knows how to apply a range of developmentally, culturally, and linguistically appropriate instructional strategies to achieve learning goals.
3. The teacher knows when and how to use appropriate strategies to differentiate instruction and engage all learners in complex thinking and meaningful tasks.
4. The teacher understands how multiple forms of communication (oral, written, nonverbal, digital, visual) convey ideas, foster self-expression, and build relationships.
5. The teacher knows how to use a wide variety of resources, including human and technological, to engage students in learning.
6. The teacher understands how content and skill development can be supported by media and technology and knows how to evaluate these resources for quality, accuracy, and effectiveness.

**8.1** Candidate instructional units, lesson plans, teacher work samples, and student teaching binders as well as interviews with cooperating teachers and candidates, provide evidence that teacher candidates demonstrate an adequate understanding of instructional strategies. Again it was noted several times how course instructors themselves modeled various instructional strategies in their own teaching.

**Performance**
1. The teacher uses appropriate strategies and resources to adapt instruction to the needs of individuals and groups of learners.
2. The teacher continuously monitors student learning, engages learners in assessing their progress, and adjusts instruction in response to student learning needs.
3. The teacher collaborates with learners to design and implement relevant learning experiences, identify their strengths, and access family and community resources to develop their areas of interest.
4. The teacher varies his/her role in the instructional process (e.g., instructor, facilitator, coach, audience) in relation to the content and purposes of instruction and the needs of learners.
5. The teacher provides multiple models and representations of concepts and skills with opportunities for learners to demonstrate their knowledge through a variety of products and performances.
6. The teacher engages all learners in developing higher order questioning skills and metacognitive processes.
7. The teacher engages learners in using a range of learning skills and technology tools to access, interpret, evaluate, and apply information.
8. The teacher uses a variety of instructional strategies to support and expand learners’ communication through speaking, listening, reading, writing, and other modes.
9. The teacher asks questions to stimulate discussion that serves different purposes (e.g., probing for learner understanding, helping learners articulate their ideas and thinking processes, stimulating curiosity, and helping learners to question).

**8.2** Candidate lesson plans, student teaching binders, lesson observations, candidate exhibits, and interviews with cooperating teachers provide evidence that teacher candidates use a variety of instructional strategies. Cooperating teachers noted in interviews how candidates seemed to be
confident utilizing the various strategies and well versed in the advantages and disadvantages of each.

**Standard #9: Professional Learning and Ethical Practice.** The teacher engages in ongoing professional learning and uses evidence to continually evaluate his/her practice, particularly the effects of his/her choices and actions on others (learners, families, other professionals, and the community), and adapts practice to meet the needs of each learner.

**Knowledge**
1. The teacher understands and knows how to use a variety of self-assessment and problem solving strategies to analyze and reflect on his/her practice and to plan for adaptations/adjustments.
2. The teacher knows how to use learner data to analyze practice and differentiate instruction accordingly.
3. The teacher understands how personal identity, worldview, and prior experience affect perceptions and expectations, and recognizes how they may bias behaviors and interactions with others.
4. The teacher understands laws related to learners’ rights and teacher responsibilities (e.g., for educational equity, appropriate education for learners with disabilities, confidentiality, privacy, appropriate treatment of learners, reporting in situations related to possible child abuse).
5. The teacher knows how to build and implement a plan for professional growth directly aligned with his/her needs as a growing professional using feedback from teacher evaluations and observations, data on learner performance, and school- and system-wide priorities.

9.1 Sylabi, required coursework, faculty and candidate interviews provide evidence that teacher candidates demonstrate an adequate ability to engage in ongoing professional learning and use evidence to continually evaluate his/her practice. Candidates are required to take coursework regarding the laws and confidentiality practices in education as well as looking at their own world view and potential bias’.

**Performance**
1. The teacher engages in ongoing learning opportunities to develop knowledge and skills in order to provide all learners with engaging curriculum and learning experiences based on local and state standards.
2. The teacher engages in meaningful and appropriate professional learning experiences aligned with his/her own needs and the needs of the learners, school, and system.
3. Independently and in collaboration with colleagues, the teacher uses a variety of data (e.g., systematic observation, information about learners, research) to evaluate the outcomes of teaching and learning and to adapt planning and practice.
4. The teacher actively seeks professional, community, and technological resources, within and outside the school, as supports for analysis, reflection, and problem-solving.
5. The teacher reflects on his/her personal biases and accesses resources to deepen his/her own understanding of cultural, ethnic, gender, and learning differences to build stronger relationships and create more relevant learning experiences.
6. The teacher advocates, models, and teaches safe, legal, and ethical use of information and technology including appropriate documentation of sources and respect for others in the use of social media.

9.2 Student teaching binders, the use of IPLP’s, and candidate reflections, in addition to candidate, faculty, and cooperating teacher interviews, provide evidence that teacher candidates display an adequate ability to engage in appropriate professional learning experiences, collaborate with colleagues, and to seek resources as needed. In addition, interviews indicate that candidates use legal and ethical behaviors when dealing with student information outside of the school situation.

**Standard #10: Leadership and Collaboration.** The teacher seeks appropriate leadership roles and opportunities to take responsibility for student learning, to collaborate with learners, families, colleagues, other school professionals, and community members to ensure learner growth, and to advance the profession.

**Knowledge**
1. The teacher understands schools as organizations within a historical, cultural, political, and social context and knows how to work with others across the system to support learners.
2. The teacher understands that alignment of family, school, and community spheres of influence enhances student learning and that discontinuity in these spheres of influence interferes with learning.
3. The teacher knows how to work with other adults and has developed skills in collaborative interaction appropriate for both face-to-face and virtual contexts.
4. The teacher knows how to contribute to a common culture that supports high expectations for student learning.

10.1 Field experience logs, engagement in Professional Learning Community activities, candidate interviews, and cooperating teacher feedback provide in-depth evidence that teacher candidates understand how to professionally and effectively collaborate with colleagues, parents, and other members of the community to support students’ learning and well-being.

Performance
1. The teacher takes an active role on the instructional team, giving and receiving feedback on practice, examining learner work, analyzing data from multiple sources, and sharing responsibility for decision making and accountability for each student’s learning.
2. The teacher works with other school professionals to plan and jointly facilitate learning on how to meet diverse needs of learners.
3. The teacher engages collaboratively in the school-wide effort to build a shared vision and supportive culture, identify common goals, and monitor and evaluate progress toward those goals.
4. The teacher works collaboratively with learners and their families to establish mutual expectations and ongoing communication to support learner development and achievement.
5. Working with school colleagues, the teacher builds ongoing connections with community resources to enhance student learning and wellbeing.
6. The teacher engages in professional learning, contributes to the knowledge and skill of others, and works collaboratively to advance professional practice.
7. The teacher uses technological tools and a variety of communication strategies to build local and global learning communities that engage learners, families, and colleagues.
8. The teacher uses and generates meaningful research on education issues and policies.
9. The teacher seeks appropriate opportunities to model effective practice for colleagues, to lead professional learning activities, and to serve in other leadership roles.
10. The teacher advocates to meet the needs of learners, to strengthen the learning environment, and to enact system change.
11. The teacher takes on leadership roles at the school, district, state, and/or national level and advocates for learners, the school, the community, and the profession.

Recent graduates and cooperating teachers both shared that they continue to remain connected to one another, even though their formal relationship through the program has concluded. Members of both groups expressed gratitude and appreciation for the ongoing professional support.
Elementary Education

State Program Approval Rubric for Teacher Preparation Programs

Candidate Performance Relative to the Idaho Standards

The Idaho Standards for Initial Certification provide the framework for the approval of educator preparation programs. As such, the standards/principles set the criteria by which teacher preparation programs are reviewed for state program approval.

The following rubric is used to evaluate the extent to which teacher preparation programs prepare teachers who meet the standards. The rubric is designed to be used with each individual preparation program (i.e., Elementary, Special Education, Secondary English, Secondary Science–Biology, etc.).

Consistent with NCATE accreditation standards, the rubric describes three levels of performance (i.e., unacceptable, acceptable, and target) for each of the Idaho Standards for Initial Certification. The rubric shall be used to make holistic judgments. Performance indicators provide the lens through which the State Program Approval Team evaluates the institution’s evidence that candidates meet the Idaho standards. The institution is expected to provide information about candidate performance related to the Idaho Standards for Elementary Teachers.

Standards 1: Knowledge of Subject Matter - The teacher understands the central concepts, tools of inquiry, and structures of the discipline taught and creates learning experiences that make these aspects of subject matter meaningful for students.

Knowledge
1. The teacher understands concepts of language arts and child development in order to teach reading, writing, speaking, viewing, listening, and thinking skills and to help students successfully apply their developing skills to many different situations, materials, and ideas.
2. The teacher understands how children learn language, the basic sound structure of the English language, semantics and syntactics, diagnostic tools, and test data to improve student reading ability.
3. The teacher understands the fundamental concepts and structures of science including physical, life, and earth and space sciences as well as the applications of science to technology, personal and social perspectives, history, unifying concepts, and inquiry processes scientists use in the discovery of new knowledge.
4. The teacher understands major concepts, procedures, and reasoning processes of mathematics that define number systems and number sense, computation, geometry, measurement, statistics and probability, and algebra in order to foster student understanding and use of patterns, quantities, and spatial relationships that represent phenomena, solve problems, and manage data.
5. The teacher knows the major concepts and modes of inquiry for social studies: the integrated study of history, geography, government/civics, economics, social/cultural and other related

19
areas to develop students' abilities to make informed decisions as citizens of a culturally diverse, democratic society and interdependent world.

6. The teacher understands the content, functions, aesthetics, and achievements of the arts, such as dance, music, theater, and visual arts as avenues for communication, inquiry, and insight.

7. The teacher understands the comprehensive nature of students’ physical, intellectual, social, and emotional well-being in order to create opportunities for developing and practicing skills that contribute to healthful living.

8. The teacher understands human movement and physical activities as central elements for active, healthy lifestyles and enhanced quality of life.

9. The teacher understands connections across curricula and within a discipline among concepts, procedures, and applications to motivate students, build understanding, and encourage application of knowledge, skills, and ideas to real life issues and future career applications.

10. The teacher understands the principles and processes of personal skills and group dynamics incorporating respect, caring, honesty, and responsibility that enable students to effectively and appropriately communicate and interact with peers and adults.

<table>
<thead>
<tr>

<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.1 Knowledge Understanding Subject Matter</td>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

1.1 Candidate work samples, unit plans, graded reflection papers, and instructional units demonstrate attention to understanding the importance of integrated curriculum and the relationship between inquiry and the development of thinking and reasoning. Praxis II scores, candidate field experience binders, and reflection papers address attention to the knowledge standard indicators in Standard 1. Interviews with methods instructors, candidates, completers and school partners indicate candidates are well-prepared with content knowledge to plan accordingly and teach across content areas in an elementary curriculum, including an emphasis on student rapport and understanding the “whole child.”

**Performance**

1. The teacher models the accurate use of English language arts.

2. The teacher demonstrates competence in English language arts, reading, science, mathematics, social studies, the arts, health education, and physical education.

3. The teacher conceptualizes, develops, and implements a balanced curriculum that includes English language arts, reading, science, mathematics, social studies, the arts, health education, and physical education.

4. The teacher models respect, honesty, caring, and responsibility in order to promote and nurture a school environment that fosters these qualities.
1.2 Candidate work samples demonstrate multiple examples of attention to inquiry-based instruction and relevance to real life. Student teaching binders evidence proficient work in the areas of managing student learning and interventions. Faculty feedback on candidate work pushes candidates to think deeply about levels of fundamentals of reading intervention and assessment. Interviews with candidates demonstrate appreciation for the authentic modeling of important pedagogical practices and making subject matter meaningful. The candidate exhibits highlighted inquiry across disciplines and real life applications for subject matter knowledge.

**Standard 2: Knowledge of Human Development and Learning - The teacher understands how students learn and develop, and provides opportunities that support their intellectual, social, and personal development.**

**Knowledge**

1. The teacher understands how learning occurs and that young children’s and early adolescents’ literacy and language development influence learning and instructional decisions.

2.1 Candidate work samples, student teaching binders, Reading & Content Literacy lesson plans, and attention to academic language access in syllabi and assignments demonstrate a nuanced emphasis on understanding how literacy and language development influence learning and instructional decisions. Cognition and learning is evidenced through test questions, but there is no data on candidate performance on psychology exams or assigned sheltered instruction lesson plans. Candidates appear to have an appropriate understanding of how young children and early adolescents learn via multiple lesson and unit artifacts, including reflection papers as evidence. Additionally, evidence includes excellent math plan sequences to address mathematics CCSS shifts and conceptual understanding.
<table>
<thead>
<tr>

<tbody>
<tr>
<td>2.2 Performance Provide Opportunities for Development</td>
<td></td>
<td>X</td>
<td></td>
</tr>
</tbody>
</table>

2.2 Inquiry Science lessons with Math plan sequences demonstrate stellar evidence of opportunities for students to learn through inquiry and exploration. Candidate, partner school, and methods instructor interviews highlight understandings of differentiating instruction for learners and learning styles. An emphasis on accommodations for exceptional learners involved in learning through inquiry and exploration is not evident.

**Standard 3: Modifying Instruction for Individual Needs - The teacher understands how students differ in their approaches to learning and creates instructional opportunities to meet students’ diverse needs and experiences.**

**Knowledge**
1. The teacher understands the necessity of appropriately and effectively collaborating with grade level peers, school intervention teams, parents/guardians, and community partners to meet differentiated needs of all learners.
2. The teacher understands that there are multiple levels of intervention and recognizes the advantages of beginning with the least intrusive.

<table>
<thead>
<tr>

<tbody>
<tr>
<td>3.2 Performance Modifying Instruction for Individual Learning Needs</td>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

3.2 Candidate work samples, student teacher binders, and interviews do not indicate evidence for multiple levels of intervention or demonstrate accommodations are made in and in planning for instruction. Interviews with cooperating teachers indicate they work with candidates on collaborative intervention when necessary, or appropriate. This could be a place to more systematically integrate accommodations for exceptional learners in the program.

**Areas for Improvement:**
Modifying instruction for individual learning needs could more systematically be integrated into required lesson plans, student teacher binders, and intervention plans required through faculty coursework assignments.

**Standard 5: Classroom Motivation and Management Skills - The teacher understands individual and group motivation and behavior and creates a learning environment that encourages positive social interaction, active engagement in learning, and self-motivation.**

**Knowledge**
1. The teacher understands the importance of teaching and re-teaching classroom expectations.
2. The teacher recognizes the importance of positive behavioral supports and the need to use multiple levels of intervention to support and develop appropriate behavior.

State Program Approval Rubric for Teacher Preparation Programs

Candidate Performance Relative to the Idaho Standards

The Idaho Standards for Initial Certification provide the framework for the approval of educator preparation programs. As such, the standards set the criteria by which teacher preparation programs are reviewed for state program approval.

The following rubric is used to evaluate the extent to which teacher preparation programs prepare teachers relative to the standards. The rubric is designed to be used with each content-specific preparation program (i.e., Elementary, Special Education, Secondary English, Secondary Science–Biology, etc.).

Consistent with NCATE accreditation standards, the rubric describes three levels of performance (i.e., unacceptable, acceptable, and target) for each of the Idaho Standards for Initial Certification. The rubric shall be used to make holistic judgments. Performance indicators provide the lens through which the State Program Approval Team evaluates the institution’s provided evidence that candidates meet the Idaho standards. The institution is expected to provide information about candidate performance related to the Idaho Standards for Initial Preparation of Professional School Personnel.

Principle 1: Knowledge of Subject Matter - The teacher understands the central concepts, tools of inquiry, and structures of the English language arts and creates learning experiences that make these aspects of subject matter meaningful for students.

Knowledge
1. The teacher understands that reading, writing, speaking, listening, viewing, and language study are interrelated.
2. The teacher understands the elements of effective writing such as audience, purpose, organization, development, voice, coherence, emphasis, unity, and style.
3. The teacher understands the conventions of standard written language, i.e., grammar, punctuation, capitalization, and spelling.
4. The teacher understands a variety of literary and nonliterary forms (e.g., novels, plays, poetry, essays, technical writing, and film).
5. The teacher understands how literature functions as artistic expression and as a reflection of human experience.
6. The teacher understands the nature and conventions of multicultural literatures, literary devices, and methods of literary analysis and criticism.
7. The teacher understands how culture and history influence literature, literary recognition, and curriculum selections.
8. The teacher understands the social and historical implications of print and nonprint media.
9. The teacher understands the history of the English language.
10. The teacher understands how children learn language, the basic sound structure of the English language, semantics, syntax, and usage.
11. The teacher understands reading as a developmental process.
12. The teacher knows that writing is an act of discovery and a form of inquiry, reflection, and expression.
13. The teacher understands that composition is a recursive process that includes brainstorming, drafting, revising, editing for correctness and clarity, and publishing; that the process will vary with the individual and the situation; and that learning to write is a developmental process.
14. The teacher recognizes the student’s need for authentic purposes, audiences, and forms of writing.
15. The teacher understands the appropriate selection, evaluation, and use of primary and secondary sources in research processes.

<table>

<td></td>
</tr>
<tr>
<td>Subject Matter</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

1.1 Interviews with education faculty, student teacher candidates and recent graduates, Praxis II scores (100% passing rate on first attempt), checking syllabi, and perusing the student teaching binder provide evidence that teacher candidates demonstrate adequate knowledge and understanding of English language arts, including the nature, value, and approaches to a variety of literary texts, print and non-print media, composing processes, and language study.

**Performance**
1. The teacher uses skills and knowledge congruent with current research on best practices for teaching reading and writing.
2. The teacher integrates reading, writing, speaking, listening, viewing, and language study.
3. The teacher builds a reading, writing, listening, speaking, and viewing community in which students respond, interpret, and think critically.
4. The teacher instructs student on the conventions of standard written language, i.e., grammar, punctuation, capitalization, and spelling.
5. The teacher reviews, interprets, evaluates, and selects content presented by print and nonprint media and models these processes for students.
6. The teacher integrates information from traditional, technical, and electronic sources for critical analysis and evaluation by students.
7. The teacher helps students with their understanding of a variety of literary and nonliterary forms and genres.
8. The teacher presents social, cultural, and historical significance of a variety of texts and connects these to students’ experiences.
9. The teacher demonstrates the writing process as a recursive and developmental process.
1.2 Interviewing language arts teacher candidates, analyzing teacher lesson plans, and interviewing university supervisors provide evidence that teacher candidates demonstrate an adequate ability to use resources and learning activities that support instructional and curriculum goals that reflect effective teaching practice, and accurately reflect language arts content.

**Principle 2: Knowledge of Human Development and Learning** - The teacher understands how students learn and develop, and provides opportunities that support their intellectual, social, and personal development.

**Knowledge**
1. The teacher understands the processes, developmental stages, and diverse ways of learning reading, writing, listening, viewing, and speaking.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>2.1 Knowledge Understanding Human Development and Learning</td>

<td>X</td>
<td></td>
</tr>
</tbody>
</table>

2.1 Interviews with cooperating teachers, student teaching candidates and recent graduates, Praxis II scores, reviewing professor feedback to candidate work, and perusing the student teaching binder with student teaching work samples provide evidence that teacher candidates demonstrate adequate knowledge of the role of maturation in growth in writing, language acquisition, and understanding of literary concepts.

**Performance**
1. The teacher identifies in reading, writing, listening, viewing, and speaking and plans for developmental stages and diverse ways of learning.
2. The teacher promotes and monitors growth in reading, writing, listening, viewing, and speaking for all ability levels.
2.2 Interviewing language arts teacher candidates, analyzing student teacher lesson plans, and reading college student work samples provide evidence that teacher candidates demonstrate an adequate ability to recognize students’ levels of language maturity and identify strategies to promote growth. These same evidences indicate that candidates are able to monitor growth in reading, writing, listening, viewing, and speaking for all ability levels. However, evidence was more limited regarding how candidates accommodated for all ability levels, including students at the gifted and talented end of the spectrum.

**Principle 4: Multiple Instructional Strategies - The teacher understands and uses a variety of instructional strategies to develop students’ critical thinking, problem solving, and performance skills.**

**Knowledge**
1. The teacher knows a variety of classroom strategies for improving fluency, comprehension, and critical thinking (e.g., strategies for discussion, peer editing, critical analysis and interpretation, inquiry, oral presentations, SSR, and brainstorming).
2. The teacher understands reading comprehension strategies (e.g., organizing information, visualizing, making connections, using context clues, building background knowledge, predicting, paraphrasing, summarizing, questioning, drawing conclusions, synthesizing, and making inferences) for enabling students with a range of abilities to understand, respond to, and interpret what they read.
3. The teacher is familiar with a variety of strategies for promoting student growth in writing.

4.1 Interviews with student teacher candidates, Praxis II scores, checking college course syllabi, and perusing college student work samples and the student teaching binder provide evidence that teacher candidates demonstrate adequate knowledge and understanding of a variety of instructional strategies needed to develop students’ critical thinking, problem solving, and performance skills at varying literacy levels. Evidence also indicates that the candidate is familiar with a variety of strategies for promoting student growth in writing, as well.

**Performance**
1. The teacher effectively uses comprehension strategies.
2. The teacher incorporates a variety of analytical and theoretical approaches in teaching literature and composition.
3. The teacher monitors and adjusts strategies in response to individual literacy levels.
4. The teacher creates logical sequences for reading, writing, speaking, listening, viewing, and language study.
5. The teacher uses students’ creations and responses as part of the instructional program.
6. The teacher builds a reading, writing, listening, speaking, and viewing community in which students respond, interpret, and think critically (e.g., engages students in discussion, inquiry, and evaluation).

7. The teacher enriches and expands the students’ language resources for adapting to diverse social, cultural, and workplace settings.

8. The teacher provides opportunities for students to create authentic responses to cultural, societal, and workplace experiences.

4.2 Interviews with language arts student teacher candidates and recent graduates, analyzing student teacher lesson plans, and reviewing university supervisors’ student teacher observations provide evidence that teacher candidates demonstrate an adequate ability to use a variety of basic instructional strategies to develop students’ critical thinking, problem solving, and performance skills; and engage students through a variety of language activities (e.g. reading, writing, speaking, listening) and teaching approaches (e.g. small group, whole-class discussion, projects). Student teaching binder and lesson plans clearly show varied instructional strategies and strong reflective processes to evaluate teaching success.

**Principle 8: Assessment of Student Learning - The teacher understands, uses, and interprets formal and informal assessment strategies to evaluate and advance student performance and to determine program effectiveness.**

**Knowledge**

1. The teacher knows methods of assessing students’ written and oral communication skills and reading performance (e.g., holistic, analytic, and primary trait scoring; portfolios of student work; projects; student self-assessment; peer assessment; journals; rubrics; reading response logs; reading inventories; reflective and formal writing; student/teacher-developed guidelines; exhibitions; oral and dramatic presentations; and the Idaho State Direct Writing Assessment).

**Principle 9: Professional Commitment and Responsibility** - The teacher is a reflective practitioner who demonstrates a commitment to professional standards and is continuously engaged in purposeful mastery of the art and science of teaching.

**Performance**
1. The teacher engages in reading and writing for professional growth and satisfaction.
2. The teacher stimulates student enthusiasm for and appreciation of literature, writing, language, and literacy.

State Program Approval Rubric for Teacher Preparation Programs

Candidate Performance Relative to the Idaho Standards

The Idaho Standards for Initial Certification provide the framework for the approval of educator preparation programs. As such, the standards set the criteria by which teacher preparation programs are reviewed for state program approval.

The following rubric is used to evaluate the extent to which teacher preparation programs prepare teachers relative to the standards. The rubric is designed to be used with each content-specific preparation program (i.e., Elementary, Special Education, Secondary English, Secondary Science–Biology, etc.).

Consistent with NCATE accreditation standards, the rubric describes three levels of performance (i.e., unacceptable, acceptable, and target) for each of the Idaho Standards for Initial Certification. The rubric shall be used to make holistic judgments. Performance indicators provide the lens through which the State Program Approval Team evaluates the institution’s provided evidence that candidates meet the Idaho standards. The institution is expected to provide information about candidate performance related to the Idaho Standards for Initial Preparation of Professional School Personnel.

Standard 1: Knowledge of Subject Matter - The teacher understands the central concepts, tools of inquiry, and structures of the discipline taught and creates learning experiences that make these aspects of subject matter meaningful for students.

Knowledge
1. The teacher understands the following content areas of health: fitness and personal health; health promotion and disease prevention; prevention and care of injuries; mental and emotional health; alcohol, tobacco, and other drugs; nutrition; relationships; growth, development, and family health; consumer health; health literacy; and community and environmental health.
2. The teacher understands the following health risk behaviors: tobacco, alcohol, and other drug use; sexual behaviors that result in human immunodeficiency virus (HIV) infection, other sexually transmitted diseases (STDs), and unplanned pregnancies; poor dietary behaviors; lack of or excessive physical activity; and behaviors that result in intentional injury.
3. The teacher understands the relationship between health education content areas and youth risk behaviors.
4. The teacher understands the concepts and components of coordinated school health, an approach where partnerships are developed within the school and community (components of coordinated school health: school environment, health education, school meals and nutrition, physical education, health services, counseling and mental health services, staff wellness, and parent/community partnerships).
5. The teacher understands that health is multidimensional (e.g., physical, intellectual, emotional, social, cultural, spiritual, and environmental).
1.1 Candidate interviews, unit plans, lesson plans, and cooperating teacher interviews, provide little or no evidence that teacher candidates demonstrate adequate understanding of health education; the importance of engaging students in identification of health risk behaviors; and the ability to describe for students the ways new knowledge in a content area is applied. Six of twelve who took the Health Praxis II did not pass on the first attempt. Eighty three percent did eventually pass the Praxis II. Content knowledge is indicated in other evidence but there is no evidence to show where exactly that knowledge is acquired. The institution has recognized this, and is making attempts to change class structure and offerings.

**Performance**

1. The teacher instructs students about increasing health-enhancing behaviors and about reducing health-risk behaviors.

1.2 Candidate interviews, observations, and lesson plans provide evidence that teacher candidates adequately instruct the students about health-enhancing behaviors, recognize the importance of modeling health-enhancing behaviors, and create learning environments that respect and are sensitive to controversial health issues.

**Standard 5: Classroom Motivation and Management Skills** - The teacher understands individual and group motivation and behavior and creates a learning environment that encourages positive social interaction, active engagement in learning, and self-motivation.

**Knowledge**

1. The teacher understands developmentally appropriate practices that motivate students to participate in health-enhancing behaviors.

2. The teacher knows strategies and techniques that develop positive health behavior changes in students.
<table>

5.1 Classroom management plans, course syllabi, instructor feedback, candidate lesson plans, and candidate interviews provide evidence that teacher candidates demonstrate adequate understanding of the principles of and strategies for motivating students to participate in physical activity and other health-enhancing behaviors, as well as classroom management for safe physical activity and health-enhancing behaviors.

**Performance**
1. The teacher motivates students to participate in positive health-enhancing behaviors inside and outside the school setting.
2. The teacher helps students learn and use personal and social behaviors that promote positive relationships (e.g., avoiding abusive relationships, using refusal skills, setting life goals, and making healthy decisions).

<table>

<td></td>
</tr>
</tbody>
</table>

6.1 Lesson plans, course syllabi, faculty and candidate interviews provide evidence that teacher candidates demonstrate an adequate understanding of how to model and use communication skills appropriate to the target audience and the terminology and slang associated with the at-risk behaviors.

**Performance**
1. The teacher identifies and defines student jargon and slang associated with high-risk behaviors and translates these terms into terms appropriate to the educational setting.
2. The teacher facilitates responsible decision making, goal setting, and alternatives to high-risk behaviors that enhance health.
3. The teacher creates a respectful learning environment that is sensitive to controversial health issues.
4. The teacher applies techniques that aid in addressing sensitive issues (e.g., ground rules, question boxes, open-ended questions, and establishment of appropriate confidentiality).
5. The teacher demonstrates the ability to use interpersonal communication skills to enhance health.

</table>

6.2 Lesson plans, reflection journals, candidate interviews, faculty observation reports and cooperating teacher interviews provide evidence that teacher candidates demonstrate an adequate ability to create safe and sensitive learning experiences that promote student input, communication, and listening skills which facilitate responsible decision making and alternatives to high-risk behavior.

**Standard 7: Instructional Planning Skills** - The teacher plans and prepares instruction based on knowledge of subject matter, students, the community, and curriculum goals.

**Knowledge**
1. The teacher understands the differing community health values and practices.
2. The teacher understands how to access valid, appropriate health information and health-promoting products and services.
3. The teacher understands the influence of culture, media, technology, and other factors on health.
<table>
<thead>

<td>X</td>
<td></td>
</tr>
</tbody>
</table>

10.2 Candidate coursework, interviews, student teaching binders, faculty observations provide evidence that teacher candidates demonstrate the ability to advocate for personal, family, and community health.

**Areas for Improvement:** Six of twelve who took the Health Praxis II did not pass on the first attempt. Eighty three percent did eventually pass the Praxis II. Content knowledge seems to show in other evidence, but there seems to be a gap. The institution has recognized this and is making attempts to change class structure and offerings. Also, two classes, Health Issues and Nutrition are not required for the Health/PE endorsement. More health content taught in the classroom may be needed. One report from a completer is that the Health/PE program seems to be PE “heavy.” During a faculty interview, it was noted that a natural extension would be to require the Praxis II study guide as a required text.

State Program Approval Rubric for Teacher Preparation Programs

Candidate Performance Relative to the Idaho Standards

The Idaho Standards for Initial Certification provide the framework for the approval of educator preparation programs. As such, the standards set the criteria by which teacher preparation programs are reviewed for state program approval.

The following rubric is used to evaluate the extent to which teacher preparation programs prepare teachers relative to the standards. The rubric is designed to be used with each content-specific preparation program (i.e., Elementary, Special Education, Secondary English, Secondary Science–Biology, etc.).

Consistent with NCATE accreditation standards, the rubrics describe three levels of performance (i.e., unacceptable, acceptable, and target) for each of the Idaho Standards for Initial Certification. The rubric shall be used to make holistic judgments. Elements identified in the rubrics provide the basis upon which a State Program Approval Team evaluates the institution’s evidence that candidates meet the Idaho Standards. The institution is expected to provide information about candidate performance related to the Idaho Standards for Initial Preparation of Professional School Personnel.

Standard 1: Knowledge of Subject Matter - The teacher understands the central concepts, tools of inquiry, and structures of mathematics and creates learning experiences that make these aspects of mathematics meaningful for students.

Knowledge
1. The teacher understands the historical and cultural significance of mathematics and the changing ways individuals learn, teach, and do mathematics.
2. The teacher understands concepts of algebra.
3. The teacher understands the major concepts of geometry (Euclidean and non-Euclidean) and trigonometry.
4. The teacher understands basic concepts of number theory.
5. The teacher understands concepts of measurement.
6. The teacher understands the concepts of limit, continuity, differentiation, integration, and the techniques and application of calculus.
7. The teacher understands the techniques and applications of statistics and data analysis (e.g., random variable, distribution functions, and probability).

<table>

</tbody>
</table>
1.1 Knowledge: Syllabi, Praxis II scores, required mathematics coursework, a candidate research paper, candidate projects, and a candidate student teacher binder provide evidence that teacher candidates demonstrate an adequate understanding of mathematics, as delineated in the Idaho Standards for Mathematics Teachers.

Performance
1. The teacher incorporates the historical perspective and current development of mathematics in teaching students.
2. The teacher applies concepts of number, number theory, and number systems.
3. The teacher uses numerical computation and estimation techniques and applies them to algebraic expressions.
4. The teacher applies the process of measurement to two- and three-dimensional objects using customary and metric units.
5. The teacher uses descriptive and inferential statistics to analyze data, make predictions, and make decisions.
6. The teacher uses concepts and applications of graph theory, recurrence relations, matrices, and combinatorics.

1.2 Performance: Analyzing lesson plans, a completer interview, and student teacher observation provide evidence that teacher candidates demonstrate an adequate ability to create meaningful learning experiences as delineated in the Idaho Standards for Mathematics Teachers.

Standard 2: Knowledge of Human Development and Learning - The teacher understands how students learn and develop, and provides opportunities that support their intellectual, social, and personal development.

Knowledge
1. The teacher knows how to make use of students’ mathematical development, knowledge, understandings, interests, and experiences.
2. The teacher knows how to plan learning activities that respect and value students’ ideas, ways of thinking, and mathematical dispositions.

<table>
<thead>
<tr>

3.2 A cooperating teacher interview, lesson plans, and field experience requirements provide evidence that teacher candidates assist students in learning sound and significant mathematics and to develop a positive disposition toward mathematics by adapting and changing activities as needed. However, it was noted that many lesson plan samples and other evidence did not specifically note adaptations or modifications to various lessons.

**Standard 4: Multiple Instructional Strategies** - The teacher understands and uses a variety of instructional strategies to develop students’ critical thinking, problem solving, and performance skills.

Knowledge
1. The teacher knows how to formulate and pose problems, how to access a large repertoire of problem-solving strategies, and how to use problem-solving approaches to investigate and understand mathematics.
2. The teacher understands the role of axiomatic systems and proofs in different branches of mathematics as it relates to reasoning and problem solving.
3. The teacher knows how to frame mathematical questions and conjectures.
4. The teacher knows how to make mathematical language meaningful to students.
5. The teacher understands inquiry-based learning in mathematics.
6. The teacher knows how to communicate concepts through the use of mathematical representations (e.g., symbolic, numeric, graphic, verbal, and concrete models).
7. The teacher understands the appropriate use of technology in teaching and learning of mathematics (e.g., graphing calculators, dynamic geometry software, and statistical software)

</tbody>
</table>

4.1 Educational coursework, inquiry lesson plan, pedagogy paper, and a faculty member interview provide evidence that teacher candidates demonstrate adequate understanding of a
variety of mathematical instructional strategies as delineated by the Knowledge indicators in the Idaho Standards for Mathematics Teachers.

**Performance**
1. The teacher formulates and poses problems, uses different strategies to solve problems to verify and interpret results, and uses problem-solving approaches to investigate and understand mathematics.
2. The teacher uses both formal proofs and intuitive, informal exploration.
3. The teacher develops students’ use of standard mathematical terms, notations, and symbols.
4. The teacher communicates mathematics through the use of a variety of representations.
5. The teacher engages students in mathematical discourse by encouraging them to make conjectures, justify hypotheses, and use appropriate mathematical representations.
6. The teacher uses technology appropriately to develop students’ understanding (e.g., graphing calculators, dynamic geometry software, and statistical software).

<table>
<thead>
<tr>

</tbody>
</table>

8.1 Lesson plans, a student teacher binder, and a candidate interview provide evidence that teacher candidates understand, use, and interpret formal and informal assessment strategies to evaluate student performance. Less evidence is available to indicate that candidates use assessment to advance student performance and to determine program effectiveness.

**Performance**
1. The teacher assesses students' mathematical reasoning.
8.2 Lesson plans, a student teacher binder, and a candidate interview provide evidence that teacher candidates demonstrate an adequate ability to assess students’ mathematical reasoning.

**Standard 11: Connections among Mathematical Ideas** – The teacher understands significant connections among mathematical ideas and their applications of those ideas within mathematics, as well as to other disciplines.

Knowledge
1. The teacher has a broad base of knowledge and understanding of mathematics beyond the level at which he or she teaches to include algebra, geometry and measurement, statistics and data analysis, and calculus.
2. The teacher understands the interconnectedness between strands of mathematics.
3. The teacher understands a variety of real-world applications of mathematics.

State Program Approval Rubric for Teacher Preparation Programs

Candidate Performance Relative to the Idaho Standards

The Idaho Standards for Initial Certification provide the framework for the approval of educator preparation programs. As such, the standards set the criteria by which teacher preparation programs are reviewed for state program approval.

The following rubric is used to evaluate the extent to which teacher preparation programs prepare teachers relative to the standards. The rubric is designed to be used with each content-specific preparation program (i.e., Elementary, Special Education, Secondary English, Secondary Science–Biology, etc.).

Consistent with NCATE accreditation standards, the rubric describes three levels of performance (i.e., unacceptable, acceptable, and target) for each of the Idaho Standards for Initial Certification. The rubric shall be used to make holistic judgments. Performance indicators provide the lens through which the State Program Approval Team evaluates the institution’s provided evidence that candidates meet the Idaho standards. The institution is expected to provide information about candidate performance related to the Idaho Standards for Initial Preparation of Professional School Personnel.

**Standard 1: Knowledge of Subject Matter - The teacher understands the central concepts, tools of inquiry, and structures of the discipline taught and creates learning experiences that make these aspects of subject matter meaningful for students.**

**Knowledge**

1. The teacher understands the components of physical fitness and their relationship to a healthy lifestyle.
2. The teacher understands the sequencing of motor skills (K-12).
3. The teacher understands human anatomy and physiology (structure and function), exercise physiology, and bio-mechanical principles.
4. The teacher knows the appropriate rules, etiquette, instructional cues, and skills for physical education activities (e.g., aquatics, sports, games, lifetime activities, dance, rhythmical activities, and outdoor/adventure activities).
5. The teacher understands that daily physical provides opportunities for enjoyment, challenge, self-expression, and social interaction.
6. The teacher understands Adaptive Physical Education and how to work with students with special and diverse needs (e.g., various physical abilities and limitations, culture, and gender).
7. The teacher understands technology operations and concepts pertinent to physical activity (e.g. heart rate monitors, pedometers, global positioning system).
1.1 Examining course syllabi, perusing candidate coursework, conducting candidate interviews, observations of recent completer, and Praxis II scores provide evidence that teacher candidates demonstrate an adequate understanding of the components of physical fitness and their relationship to a healthy lifestyle; human anatomy and physiology (structure and function), exercise physiology appropriate rules, etiquette, instructional cues, and skills for physical education activities; Adaptive Physical Education and how to work with special and diverse student needs; and the sequencing of motor skills (K-12); opportunities for enjoyment, challenge, self-expression, and social interaction; and technology operations and concepts pertinent to physical activity.

**Performance**
1. The teacher instructs students about disciplinary concepts and principles related to physical activities, fitness, and movement expression.
2. The teacher instructs students in the rules, skills, and strategies of a variety of physical activities (e.g., aquatics, sports, games, lifelong activities, dance, rhythmical activities, and outdoor/adventure activities).
3. The teacher models a variety of physical education activities (e.g., aquatics, sports, games, lifelong activities, dance, rhythmical activities, and outdoor/adventure activities).
4. The teacher models the use of technology operations and concepts pertinent to physical activity (e.g. heart rate monitors, pedometers, global positioning system, and computer software).

3.2 Analyzing candidate and teacher unit and lesson plans, interviews with cooperating teachers, candidates and completers, observation of a completer, and perusing student coursework provide evidence that teacher candidates demonstrate an adequate ability to create opportunities that incorporate individual variations to movement and to help students gain physical competence and positive self-esteem.

Standard 5: Classroom Motivation and Management Skills - The teacher understands individual and group motivation and behavior and creates a learning environment that encourages positive social interaction, active engagement in learning, and self-motivation.
Knowledge
1. The teacher knows how to help students cultivate responsible personal and social behaviors that promote positive relationships and a productive environment in physical education settings.
2. The teacher knows strategies to help students become self-motivated in physical education.
3. The teacher understands that individual performance is affected by anxiety.
4. The teacher understands principles of effective management in indoor and outdoor movement settings.

<table>

State Program Approval Rubric for Teacher Preparation Programs

Candidate Performance Relative to the Idaho Standards

The Idaho Standards for Initial Certification provide the framework for the approval of educator preparation programs. As such, the standards/principles set the criteria by which teacher preparation programs are reviewed for state program approval.

The following rubric is used to evaluate the extent to which teacher preparation programs prepare teachers who meet the standards. The rubric is designed to be used with each individual preparation program (i.e., Elementary, Special Education, Secondary English, Secondary Science–Biology, etc.).

Consistent with NCATE accreditation standards, the rubrics describe three levels of performance (i.e., unacceptable, acceptable, and target) for each of the Idaho Standards for Initial Certification. The rubric shall be used to make holistic judgments, rather than as an element-by-element checklist. Elements identified in the rubrics provide the basis upon which a State Program Approval Team evaluates the institution's evidence that candidates meet the Idaho Standards. The institution is expected to provide information about candidate performance related to the Idaho Core Teacher Standards (and Idaho Teacher Standards for specific preparation areas).

In addition to the standards listed here, science teachers must meet Idaho Core Teacher Standards and at least one of the following: (1) Idaho Standards for Biology Teachers, (2) Idaho Standards for Chemistry Teachers, (3) Idaho Standards for Earth and Space Science Teachers, (4) Idaho Standards for Natural Science Teachers, (5) Idaho Standards for Physical Science Teachers, or (6) Idaho Standards for Physics Teachers. Rubrics for these standards are listed after the rubrics for the Foundation Standards for Science Teachers.

Standard 1: Knowledge of Subject Matter - The teacher understands the central concepts, tools of inquiry, and structures of the discipline taught and creates learning experiences that make these aspects of subject matter meaningful for students.

Knowledge
1. The teacher knows the history and nature of science and scientific theories.
2. The teacher understands that all sciences are related.
3. The teacher understands the concepts of form and function.
4. The teacher understands the interconnectedness among the science disciplines.
5. The teacher understands the process of scientific inquiry.
6. The teacher knows how to investigate scientific phenomena, interpret findings, and communicate information to students.
7. The teacher knows how to effectively engage students in constructing deeper understanding of scientific phenomena through lessons, demonstrations, and laboratory and field activities.
1.1 Sequence of courses and syllabi in all areas (biology, chemistry, and physics), Praxis II scores and GPA data, handouts, assignments, lab documents, samples of candidate work, lab techniques and field work, and interviews with completers and university faculty provide evidence that teacher candidates demonstrate an in-depth understanding of science and the nature of scientific knowledge, as well as an in-depth understanding of how to make connections between their science and other disciplines and to engage students in the process of science.

**Performance**

1. The teacher provides students with opportunities to view science in its cultural and historical context by using examples from history and including scientists of both genders and from varied social and cultural groups.
2. The teacher continually adjusts curriculum and activities to align them with new scientific data.
3. The teacher provides students with a holistic, interdisciplinary understanding of concepts in life, earth systems/space, physical, and environmental sciences.
4. The teacher helps students build scientific knowledge and develop scientific habits of mind.
5. The teacher demonstrates competence in investigating scientific phenomena, interpreting findings, and communicating information to students.
6. The teacher models and encourages the skills of scientific inquiry, including creativity, curiosity, openness to new ideas, and skepticism that characterize science.
7. The teacher creates lessons, demonstrations, and laboratory and field activities that effectively communicate and reinforce science concepts and principles.
8. The teacher engages in scientific inquiry in science coursework.

1.2 Candidate instructional units, candidate student teaching binders, classroom observation forms for candidate teacher lessons (multiple candidates/reviewers/schools), and interviews with completers and university faculty provide evidence that teacher candidates demonstrate an in-depth ability to create and evaluate teaching resources and curriculum materials for their comprehensiveness, accuracy, and usefulness in making scientific ideas and concepts, tools of inquiry, structure of scientific knowledge, and the processes of science meaningful to students; use/develop learning activities that are consistent with curriculum goals and progress coherently within the unit of instruction; and use/develop learning activities, including laboratory and field activities, that foster multiple viewpoints and ways of knowing science.
Standard 2: Knowledge of Human Development and Learning - The teacher understands how students learn and develop, and provides opportunities that support their intellectual, social, and personal development.

Knowledge
1. The teacher knows how students construct scientific knowledge and develop scientific habits of mind.
2. The teacher knows commonly held conceptions about science and how they affect student learning.

<table>

2.1 Course syllabi, candidate student teaching binder requirements, candidate instructional units, candidate coursework samples, pedagogical research papers, senior research projects, and interviews with completers and university faculty provide evidence that teacher candidates demonstrate an adequate understanding of the conceptions students are likely to bring to class that can interfere with learning the science.

Performance
1. The teacher identifies students' conceptions about the natural world.
2. The teacher engages students in constructing deeper understandings of the natural world.

</table>

2.2 Candidate student teaching binders, lesson plans and reflections, lesson observations, and interviews with completers and university faculty provide evidence that teacher candidates demonstrate an adequate ability to carry out activities that facilitate students' conceptual development in science.

Standard 4: Multiple Instructional Strategies - The teacher understands and uses a variety of instructional strategies to develop students' critical thinking, problem solving, and performance skills.
Knowledge
1. The teacher understands how to apply mathematics and technology to analyze, interpret, and display scientific data.
2. The teacher understands how to implement scientific inquiry.
3. The teacher understands how to engage students in making deeper sense of the natural world through careful orchestration of demonstrations of phenomena for larger groups when appropriate.

<table>

4.2 Instructional models toolkit, instructional units, candidate student teacher binders (lessons and reflections), and interviews with completers and university faculty provide evidence that teacher candidates demonstrate an adequate ability to appropriately use models, simulations, laboratory and field activities, and demonstrations for larger groups, where appropriate, to facilitate students' critical thinking, problem solving, and performance skills.

Standard 6: Communication Skills - The teacher uses a variety of communication techniques to foster inquiry, collaboration, and supportive interaction in and beyond the classroom.
Knowledge
1. The teacher knows how to use a variety of interfaced electronic hardware and software for communicating data.
2. The teacher knows how to use graphics, statistical, modeling, and simulation software, as well as spreadsheets to develop and communicate science concepts.
3. The teacher understands technical writing as a way to communicate science concepts and processes.

<table>

6.1 Syllabi; inquiry lesson plans, templates, and rubrics; sample labs using technology; candidate lab write-ups, and interviews with completers and university faculty provide evidence that teacher candidates demonstrate an adequate knowledge of how to use standard forms of scientific communications in their fields (i.e., graphs, technical writing, results of mathematical analysis, scientific posters, and multimedia presentations).

Performance
1. The teacher models the appropriate scientific interpretation and communication of scientific evidence through technical writing, scientific posters, multimedia presentations, and electronic communications media.
2. The teacher engages students in sharing data during laboratory investigation to develop and evaluate conclusions.
3. The teacher engages students in the use of computers in laboratory/field activities to gather, organize, analyze, and graphically present scientific data.
4. The teacher engages students in the use of computer modeling and simulation software to communicate scientific concepts.

<table>

9.2 Candidate student teacher binder lesson reflections, instructional model toolkits, pedagogy research papers, science methods course discussions, and interviews with completers and university faculty provide evidence that teacher candidates demonstrate an adequate ability to incorporate an understanding of recent developments in their fields and knowledge of how students learn science into instruction.

Knowledge
1. The teacher knows how to select materials that match instructional goals as well as how to maintain a safe environment.
2. The teacher knows how to properly dispose of waste materials.
3. The teacher knows how to properly care for, inventory, and maintain materials and equipment.
4. The teacher is aware of legal responsibilities associated with safety.
5. The teacher knows the safety requirements necessary to conduct laboratory and field activities and demonstrations.
6. The teacher knows how to procure and use Material Safety Data Sheets (MSDS).

11.1 Course syllabi, lab lessons and activities, science lab work, and interviews with completers and university faculty provide evidence that teacher candidates demonstrate an adequate knowledge of material selection, safety, waste disposal, care and maintenance of materials and equipment, legal responsibilities associated with safety, safety requirements for laboratory, field activities, and demonstrations, and the procurement and use of MSDS.

**Performance**

1. The teacher develops instruction that uses appropriate materials and ensures a safe environment.
2. The teacher creates and ensures a safe learning environment by including appropriate documentation of activities.
3. The teacher makes informed decisions about the use of specific chemicals or performance of a lab activity regarding facilities and student age and ability.
4. The teacher models safety at all times.
5. The teacher makes use of Material Safety Data Sheet (MSDS) and storage information for laboratory materials.
6. The teacher creates lesson plans and teaching activities consistent with appropriate safety considerations.
7. The teacher evaluates lab and field activities for safety.
8. The teacher evaluates a facility for compliance to safety regulations.
9. The teacher uses safety procedures and documents safety instruction.
10. The teacher demonstrates the ability to acquire, use, and maintain materials and lab equipment.
11. The teacher implements laboratory, field, and demonstration safety techniques.

12.2 Content from candidate student teacher binders, lab safety lessons, other lab-based instructional contexts, candidate reflections, and interviews with completers and university faculty provide evidence that teacher candidates engage students in experiencing the phenomena they are studying by means of laboratory and field exercises.
Biology

Principle 1: Knowledge of Biology - The teacher understands the central concepts, tools of inquiry, and structures of Biology and creates learning experiences that make these aspects of Biology meaningful for students.

Knowledge
1. The teacher understands that there are unifying themes in biology, including levels from molecular to whole organism.
2. The teacher knows the currently accepted taxonomy systems used to classify living things.
3. The teacher understands scientifically accepted theories of how living systems evolve through time.
4. The teacher understands that genetic material and characteristics are passed between generations.
5. The teacher knows biochemical processes that are involved in life functions.
6. The teacher knows that living systems interact with their environment and are interdependent with other systems.
7. The teacher understands that systems in living organisms maintain conditions necessary for life to continue.
8. The teacher understands the cell as the basis for all living organisms and how cells carry out life functions.
9. The teacher understands how matter and energy flow through living and non-living systems.
10. The teacher knows how the behavior of living organisms changes in relation to environmental stimuli.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>

</tr>
</tbody>
</table>

1.1 Sequence of courses and syllabi, Praxis II scores and GPA data, handouts, assignments, labs and complete lab sheets, candidate presentations, extensive lab experiences, field experiences, and techniques, and interviews with completers and university faculty provide evidence that teacher candidates demonstrate an in-depth understanding of biology content and the nature of biological knowledge. The program provides evidence that teacher candidates make connections between biology and other disciplines.

Performance
1. The teacher prepares lessons that help students understand the flow of matter and energy through living systems.
2. The teacher assists students in gaining an understanding of the ways living things are interdependent.
3. The teacher assists students in understanding how living things impact/change their environment and how the physical environment impacts/changes living things.
4. The teacher helps students understand how the principles of genetics apply to the flow of characteristics from one generation to the next.
5. The teacher helps students understand how genetic “information” is translated into living tissue and chemical compounds necessary for life.
6. The teacher helps students understand accepted scientific theories of how life forms have evolved through time and the principles on which these theories are based.
7. The teacher helps students understand the ways living organisms are adapted to their environments.
8. The teacher helps students understand the means by which organisms maintain an internal environment that will sustain life.
9. The teacher helps students classify living organisms into appropriate groups by the current scientifically accepted taxonomic techniques.
10. The teacher helps students understand a range of plants and animals from one-celled organisms to more complex multi-celled creatures composed of systems with specialized tissues and organs.
11. The teacher helps students develop the ability to evaluate ways humans have changed living things and the environment of living things to accomplish human purposes (e.g., agriculture, genetic engineering, dams on river systems, burning fossil fuels, seeding clouds, and making snow).
12. The teacher helps students understand that the cell, as the basis for all living organisms, carries out life functions.

Chemistry

Principle 1: Knowledge of Chemistry - The teacher understands the central concepts, tools of inquiry, and structures of Chemistry and creates learning experiences that make these aspects of Chemistry meaningful for students.

Knowledge
1. The teacher understands the fundamental components and procedures of chemistry and how they interact to create a holistic understanding of matter and energy.
2. The teacher knows the fundamental principles of chemistry, including kinetic molecular theory, periodicity and atomic structure, solutions, stoichiometry, and chemical reactions.
3. The teacher knows organic chemistry, inorganic chemistry, analytic chemistry, physical chemistry, and biochemistry.
4. The teacher has a broad knowledge of mathematical principles, including calculus, and is familiar with the connections that exist between mathematics and chemistry.
5. The teacher knows alternative explanations and models of chemistry concepts.

1.1 Course syllabi, Praxis II scores and GPA data, assignments, exams, labs, candidate work (including lab reports and other assignment), and interview with university faculty provide that teacher candidates demonstrate an adequate understanding of chemistry content and the nature of chemical knowledge.

Performance
1. The teacher consistently reinforces the underlying themes, concepts, and procedures of the basic areas of chemistry during instruction, demonstrations, and laboratory activities to facilitate student understanding.
2. The teacher uses scientific criteria to develop alternative models to explain chemistry concepts.
3. The teacher models the application of mathematical concepts for chemistry (e.g., factor-label method, statistical analysis of data, and problem-solving skills).

Physics

Principle 1: Knowledge of Physics - The teacher understands the central concepts, tools of inquiry, and structures of physics and creates learning experiences that make these aspects of physics meaningful for students.

Knowledge
1. The teacher understands electromagnetic and gravitational interactions as well as concepts of matter and energy to formulate a coherent understanding of the natural world.
2. The teacher understands the major concepts and principles of the basic areas of physics, including mechanics, thermodynamics, waves, optics, electricity, magnetism, and nuclear physics.
3. The teacher knows how to apply appropriate mathematical principles of algebra, geometry, trigonometry, calculus, and statistics in the description of the physical world and is familiar with the connections between mathematics and physics.
4. The teacher understands contemporary physics events and research.
5. The teacher knows multiple explanations and models of physical phenomena and the process of developing and evaluating explanations of the physical world.
6. The teacher knows the history of the development of models used to explain physical phenomena and is able to explain why models were considered appropriate when they were developed.

1.1 Course syllabi, Praxis II scores and GPA data, lab directions and candidate work in lab activities, lab reports (both typical and exemplary), presentations and homework examples, rubrics, quiz and labs; and interviews with completers provide evidence that teacher candidates demonstrate an adequate understanding of physics content.

Performance
1. The teacher engages students in developing and applying conceptual models to describe the natural world.
2. The teacher engages students in testing and evaluating physical models through direct comparison with the phenomena via laboratory and field activities and demonstrations.
3. The teacher engages students in the appropriate use of mathematical principles in examining and describing models for explaining physical phenomena.
4. The teacher engages student in the examination and consideration of the models used to explain the physical world.

Foundation Standards for Social Studies

State Program Approval Rubric for Teacher Preparation Programs

Candidate Performance Relative to the Idaho Standards

The Idaho Standards for Initial Certification provide the framework for the approval of educator preparation programs. As such, the standards set the criteria by which teacher preparation programs are reviewed for state program approval.

The following rubric is used to evaluate the extent to which teacher preparation programs prepare teachers relative to the standards. The rubric is designed to be used with each content-specific preparation program (i.e., Elementary, Special Education, Secondary English, Secondary Science–Biology, etc.).

Consistent with NCATE accreditation standards, the rubric describes three levels of performance (i.e., unacceptable, acceptable, and target) for each of the Idaho Standards for Initial Certification. The rubric shall be used to make holistic judgments. Performance indicators provide the lens through which the State Program Approval Team evaluates the institution’s provided evidence that candidates meet the Idaho standards. The institution is expected to provide information about candidate performance related to the Idaho Standards for Initial Preparation of Professional School Personnel.

Standard 1: Knowledge of Subject Matter - The teacher understands the central concepts, tools of inquiry, and structures of the discipline taught and creates learning experiences that make these aspects of subject matter meaningful for students.

Knowledge
1. The teacher has a broad knowledge base of the social studies and related disciplines (e.g., history, economics, geography, political science, behavioral sciences, and humanities).
2. The teacher understands the ways various governments and societies have changed over time.
3. The teacher understands ways in which independent and interdependent systems of trade and production develop.
4. The teacher understands the impact that cultures, religions, technologies, social movements, economic systems, and other factors have on civilizations.
5. The teacher understands the responsibilities and rights of citizens in the United States political system, and how citizens exercise those rights and participate in the system.
6. The teacher understands geography affects relationships between people, and environments over time.
7. The teacher understands the appropriate use of primary and secondary sources (i.e., documents, artifacts, maps, graphs, charts, tables, and statistical data) in interpreting social studies concepts.
<table>

</thead>
<tbody>
<tr>
<td>1.1 Knowledge Understanding Subject Matter</td>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

1.1 Course syllabi, interviews with faculty and cooperating teachers, Praxis II scores, and teacher candidate work samples (papers and exams) provide evidence of knowledge of the subject matter (Social Studies). The program provides evidence that teacher candidates demonstrate an adequate knowledge of the social studies disciplines (i.e., history, economics, geography, and political science) that they plan to teach and the ways new knowledge in social studies disciplines is discovered; the ways various governments and societies have changed over time; and the impact that cultures, religions, technologies, vision/structure of social justice, as well as the impact other factors have on historical processes.

**Performance**
1. The teacher demonstrates chronological historical thinking.
2. The teacher compares and contrasts various governments and cultures in terms of their diversity, commonalities, and interrelationships.
3. The teacher integrates knowledge from social studies in order to prepare students to live in a world with limited resources, cultural pluralism, and increasing interdependence.
4. The teacher incorporates current events, global perspectives, and scholarly research into the curriculum.
5. The teacher uses primary and secondary sources (i.e., documents, artifacts, maps, graphs, charts, tables, and data interpretation) when presenting social studies concepts.

<table>

<tbody>
<tr>
<td>1.2 Performance Making Subject Matter Meaningful</td>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

1.2 Interviews with cooperating teachers, observations by cooperating teachers, review of submitted teacher candidate work samples (student teacher binder, self-reflection journals, and instructional unit plans) provide evidence of acceptable candidate performance. The program provides evidence that teacher candidates demonstrate an adequate ability to create learning experiences that provide opportunities to trace and analyze chronological periods and to examine the relationships of significant historical concepts; encourage and guide investigation of various governments and cultures in terms of their diversity, commonalities, and interrelationships; and incorporate current events, global perspectives and scholarly research into the curriculum; and integrate social sciences and humanities knowledge in order to prepare students to live in a world with limited resources.
Standard 2: Knowledge of Human Development and Learning - The teacher understands how students learn and develop, and provides opportunities that support their intellectual, social, and personal development.

**Knowledge**
1. The teacher understands the influences that contribute to intellectual, social, and personal development.
2. The teacher understands the impact of student environment on student learning.

<table>

2.1 Course syllabi, Praxis II scores, and review of submitted teacher candidate samples (including exams, cross-cultural reflection papers, and behavior intervention plans) provide evidence of acceptable knowledge of Human Development and Learning. The program provides evidence that teacher candidates demonstrate an adequate understanding of how leadership, groups, and cultures influence intellectual, social, and personal development.

**Performance**
1. The teacher provides opportunities for students to engage in civic life, politics, and government.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>2.2 Performance Provide Opportunities for Development</td>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

2.2 Candidate work samples in Instructional Units 1 and 2, and the Student Teacher Binder are the only evidence found to show the teacher candidate’s abilities to perform this standard. The program provides little evidence that teacher candidates demonstrate an adequate ability to provide students with opportunities for engagement in civic life, politics, and government relevant to the social sciences. It is recommended that other components (i.e., observations by cooperating teacher, self-reflection on lessons specific to this standard, samples of student’s reflection after involvement in lessons specific to this standard) be included as evidence that teacher candidates are providing their students with engaging activities.
Government and Civics

Standard 1: Knowledge of Subject Matter - The teacher understands the central concepts, tools of inquiry, and structures of the discipline taught and creates learning experiences that make these aspects of subject matter meaningful for students.

Knowledge
1. The teacher understands the relationships between civic life, politics, and government.
2. The teacher understands the foundations of government and constitutional principles of the United States political system.
3. The teacher understands the organization of local, state, federal, and tribal governments, and how power and responsibilities are organized, distributed, shared, and limited as defined by the United States Constitution.
4. The teacher understands the importance of international relations (e.g., evolution of foreign policy, national interests, global perspectives, international involvements, human rights, economic impacts, and environmental issues).
5. The teacher understands the role of public policy in shaping the United States political system.
6. The teacher understands the civic responsibilities and rights of all inhabitants of the United States (e.g., individual and community responsibilities, participation in the political process, rights and responsibilities of non-citizens, and the electoral process).

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>

<td>1.1 Knowledge Understanding Subject Matter</td>
<td></td>
<td>X</td>
<td></td>
</tr>
</tbody>
</table>

1.1 Course syllabi, Praxis II scores, and review of submitted teacher candidate samples (including course work and lesson plans) provide evidence of acceptable knowledge and understanding of the subject matter (Government and Civics). The program provides evidence that teacher candidates demonstrate an adequate understanding of the foundations and principles of the United States political system; the organization and formation of the United States government and how power and responsibilities are organized, distributed, shared, and limited as defined in the United States Constitution; the significance of United States foreign policy; the role of international relations; an awareness of global perspectives; and the civic responsibilities and rights of all inhabitants of the United States. (The phrase, in shaping the United States political system, was deleted from the rubric requirements as it is not found in the Idaho Standards. Evidence was found to support inclusion of the role of international relations but no evidence was to found to connect those relations to the shaping of the United States political system.)

Performance
1. The teacher promotes student to engagement in civic life, politics, and government.
2. The teacher demonstrates comprehension and analysis of the foundations and principles of the United States political system and the organization and formation of the United States government.
3. The teacher demonstrates comprehension and analysis of United States foreign policy and international relations.
4. The teacher integrates global perspectives into the study of civics and government.

- **Approved Conditionally**
- **Not Approved**
History

Standard 1: Knowledge of Subject Matter - The teacher understands the central concepts, tools of inquiry, and structures of the discipline taught and creates learning experiences that make these aspects of subject matter meaningful for students.

Knowledge
1. The teacher understands themes and concepts in history (e.g., exploration, expansion, migration, immigration).
2. The teacher understands the political, social, cultural, and economic responses to industrialization and technological innovation.
3. The teacher understands how international relations impacted the development of the United States.
4. The teacher understands how significant conflicts defined and continue to define the United States.
5. The teacher understands the political, social, cultural, and economic development of the United States.
6. The teacher understands the political, social, cultural, and economic development of the peoples of the world.
7. The teacher understands the impact of gender, race, ethnicity, religion, and national origin on history.
8. The teacher understands the appropriate use of primary and secondary sources (i.e., documents, artifacts, maps, graphs, charts, tables and statistical data) in interpreting social studies concepts.

</table>

1.1 Course syllabi, lecture notes, and review of submitted teacher candidate samples (essays, exams) provide evidence of acceptable knowledge and understanding of the subject matter (History). The program provides evidence that teacher candidates demonstrate an adequate understanding of historical themes and concepts; the political, social, cultural, and economic development of the United States and the world; how the development of the United States is related to international relations and significant conflicts; and the impact of gender, race, ethnicity, religion, and national origin on history.

Performance
1. The teacher makes connections between political, social, cultural, and economic themes and concepts.
2. The teacher incorporates the issues of gender, race, ethnicity, religion, and national origin into the examination of history.
3. The teacher facilitates student inquiry on how international relationships impact the United States.
4. The teacher relates the role of conflicts to continuity and change across time.
5. The teacher demonstrates an ability to research, analyze, and interpret history.

State Program Approval Rubric for Teacher Preparation Programs

Candidate Performance Relative to the Idaho Standards

The Idaho Standards for Initial Certification provide the framework for the approval of educator preparation programs. As such, the standards set the criteria by which teacher preparation programs are reviewed for state program approval.

The following rubric is used to evaluate the extent to which teacher preparation programs prepare teachers who meet the standards. The rubric is designed to be used with each individual preparation program (i.e., Elementary, Special Education, Secondary English, Secondary Science–Biology, etc.).

Consistent with NCATE accreditation standards, the rubrics describe three levels of performance (i.e., unacceptable, acceptable, and target) for each of the Idaho Standards for Initial Certification. The rubric shall be used to make holistic judgments. Elements identified in the rubrics provide the basis upon which the State Program Approval Team evaluates the institution’s evidence that candidates meet the Idaho standards. The institution is expected to provide information about candidate performance related to the Idaho Core Teacher Standards (and Idaho Teacher Standards for specific preparation areas).

Standard 1: Knowledge of Subject Matter - The teacher understands the central concepts, tools of inquiry, and structures of the discipline taught and creates learning experiences that make these aspects of subject matter meaningful for students.

Knowledge
1. The teacher understands the history and foundation of arts education.
2. The teacher understands the processes and content of the arts discipline being taught.
3. The teacher understands the relationships between the arts and how the arts enhance a comprehensive curriculum.
4. The teacher understands how to interpret, critique, and assess the arts discipline being taught.
5. The teacher understands the cultural and historical contexts surrounding works of art.
6. The teacher understands that the arts communicate, challenge, and influence cultural and societal values.
7. The teacher understands the aesthetic purposes of the arts and that arts involve a variety of perspectives and viewpoints (e.g., formalist, feminist, social, and political).
8. The teacher understands how to select and evaluate a range of artistic subject matter and ideas appropriate for students’ personal and/or career interests.

1.1 Music and Art curriculum/sequences, syllabi, signature assignments, 100% music and 83% first-time Praxis II music and art pass rates indicate that visual and performing arts candidates understand the central concepts, tools of inquiry, and structures of the discipline taught. Evidence also indicates that candidates create learning experiences that make these aspects of subject matter meaningful for students.

Performance
1. The teacher provides students with a knowledge base of historical, critical, performance, and aesthetic concepts.
2. The teacher helps students create, understand, and become involved in the arts relevant to students’ interests and experiences.
3. The teacher demonstrates technical and expressive proficiency in the particular arts discipline being taught.
4. The teacher helps students identify relationships between the arts and a comprehensive curriculum.
5. The teacher provides instruction to make a broad range of art genres and relevant to students.
6. The teacher instructs students in making interpretations and judgments about their own artworks and the works of other artists.
7. The teacher creates opportunities for students to explore a variety of perspectives and viewpoints related to the arts.

1.2 Art presentations, pictures from senior art shows, concert/recital programs, completed homework assignments, course assessments, arrangements and compositions demonstrate candidates understand the central concepts, tools of inquiry, and structures of the discipline taught and creates learning experiences that make these aspects of subject matter meaningful for students.

Standard 7: Instructional Planning Skills - The teacher plans and prepares instruction based on knowledge of subject matter, students, the community, and curriculum goals.

Knowledge
1. The teacher understands state standards for the arts discipline being taught and how to apply those standards in instructional planning.
2. The teacher understands that the processes and tools necessary for communicating ideas in the arts are sequential, holistic, and cumulative.
7.1 The education core and arts education curricula provide numerous opportunities for candidates to plan and prepare instruction based on knowledge of subject matter. Evidence also indicates that candidates understand that the processes and tools necessary for communicating ideas in the arts are sequential, holistic, and cumulative in nature.

**Performance**
1. The teacher incorporates state standards for the arts discipline in his or her instructional planning.
2. The teacher demonstrates that the processes and uses of the tools necessary for the communication of ideas in the arts are sequential, holistic, and cumulative.

7.2 Visual performing arts candidate lesson plans, Student Teaching Binders, and interviews with candidates and completers indicate that candidates are able to refer to the appropriate standards, as well as demonstrate sequential instruction, knowledge of subject matter, students, the community, and curriculum goals.

**Standard 8: Assessment of Student Learning - The teacher understands, uses, and interprets formal and informal assessment strategies to evaluate and advance student performance and to determine teaching effectiveness.**

**Knowledge**
1. The teacher understands assessment strategies specific to the creative process.
2. The teacher understands the importance of providing appropriate opportunities for students to demonstrate what they know and can do in the arts.
3. The teacher understands how arts assessments enhance evaluation and student performance across a comprehensive curriculum (e.g. portfolio, critique, performance/presentation).
8.1 Music education teacher candidates take MUSC3450/MUSC3460 Teaching Music in the Elementary School, as well as MUSC3470/MUSC3480 Teaching Music in the Secondary School, while art candidates learn to use a variety of assessment tools in ARDE3330 Teaching Art in the K-8 Classroom and ARDE3530 Teaching Art in the Secondary School, as well as Methods of Instruction for Secondary Schools. These courses provide ample opportunities for arts education teacher candidates to understand, use, and interpret formal and informal assessment strategies to evaluate and advance student performance and to determine teaching effectiveness.

**Performance**
1. The teacher assesses students’ learning and creative processes as well as finished products.
2. The teacher provides appropriate opportunities for students to display, perform, and be assessed for what they know and can do in the arts.
3. The teacher provides a variety of arts assessments to evaluate student performance.

State Program Approval Rubric for Teacher Preparation Programs

Candidate Performance Relative to the Idaho Standards

The Idaho Standards for Initial Certification provide the framework for the approval of educator preparation programs. As such, the standards set the criteria by which teacher preparation programs are reviewed for state program approval.

The following rubric is used to evaluate the extent to which teacher preparation programs prepare teachers relative to the standards. The rubric is designed to be used with each content-specific preparation program (i.e., Elementary, Special Education, Secondary English, Secondary Science–Biology, etc.).

Consistent with NCATE accreditation standards, the rubric describes three levels of performance (i.e., unacceptable, acceptable, and target) for each of the Idaho Standards for Initial Certification. The rubric shall be used to make holistic judgments. Performance indicators provide the lens through which the State Program Approval Team evaluates the institution’s provided evidence that candidates meet the Idaho standards. The institution is expected to provide information about candidate performance related to the Idaho Standards for Initial Preparation of Professional School Personnel.

Standard 1: Knowledge of Subject Matter - The teacher understands the central concepts, tools of inquiry, and structures of the discipline taught and creates learning experiences that make these aspects of subject matter meaningful for students.

Knowledge
1. The teacher understands how to find and select appropriate music repertoire for various educational purposes.
2. The teacher knows representative solo, small ensemble, and large ensemble works of the past and present.
3. The teacher understands how to perform written accompaniments on a music keyboard or chord instrument and how to transpose accompaniments to appropriate keys.
4. The teacher knows techniques in improvising, composing, and arranging music.
5. The teacher knows fundamental instrumental and pedagogical techniques to teach wind, string, and percussion instruments to beginning students in groups.
6. The teacher knows fundamental vocal and pedagogical techniques to teach effective use of the voice.
7. The teacher knows the technical and symbolic language of music.
8. The teacher understands how to evaluate music and music performance.
9. The teacher understands the acoustical challenges of presenting successful performances in various types of facilities.
1.1 One hundred percent first-time Praxis II pass rate, music course curriculum/sequences, syllabi, signature assignments, concert/recital programs provide evidence that music teacher candidates understand the central concepts, tools of inquiry, and structures of the discipline taught and create learning experiences that make these aspects of subject matter meaningful for students.

**Performance**
1. The teacher demonstrates an ability to improvise, compose, and arrange in a variety of styles and settings.
2. The teacher sufficiently performs on wind, string, and percussion instruments to teach beginning students in groups.
3. The teacher demonstrates fundamental vocal and pedagogical skill to teach effective use of the voice.
4. a. The instrumental teacher demonstrates experience in instrumental solo and ensemble performances.
   - or -
   b. The vocal teacher demonstrates experience in vocal solo and ensemble performances.
5. a. The instrumental teacher effectively uses the singing voice for instructional purposes.
   - or -
   b. The vocal teacher effectively uses at least one instrument for instructional purposes.

1.2 Completed homework assignments, course assessments, arrangements, solo and ensemble videos and sound files, concert/recital programs, and compositions demonstrate candidates understand the central concepts, tools of inquiry, and structures of the discipline taught and create learning experiences that make these aspects of subject matter meaningful for students.

**Standard 7: Instructional Planning Skills - The teacher plans and prepares instruction based on knowledge of subject matter, students, the community, and curriculum goals.**

**Knowledge**
1. The teacher knows how to design and implement comprehensive music education opportunities in addition to traditional ensemble instruction (e.g., music appreciation, theory, history, and specialized ensembles such as madrigals, jazz choir, jazz band, and pep band).
2. The teacher understands the planning skills inherent in teaching and managing performances in various environments.

7.1 Education and music course syllabi, music education course sequences, and course signature assignments in both music education and core education classes demonstrate the unit prepares music teacher candidates how to plan and prepare instruction based on knowledge of subject matter, students, the community, and curriculum goals.

Performance
1. The teacher designs a variety of musical learning opportunities for students (e.g., music appreciation, theory, and history).
2. The teacher modifies teaching plans based on a discriminating aural perception of in-class activities.

State Program Approval Rubric for Teacher Preparation Programs

Candidate Performance Relative to the Idaho Standards

The Idaho Standards for Initial Certification provide the framework for the approval of educator preparation programs. As such, the standards set the criteria by which teacher preparation programs are reviewed for state program approval.

The following rubric is used to evaluate the extent to which teacher preparation programs prepare teachers relative to the standards. The rubric is designed to be used with each content-specific preparation program (i.e., Elementary, Special Education, Secondary English, Secondary Science–Biology, etc.).

Consistent with NCATE accreditation standards, the rubric describes three levels of performance (i.e., unacceptable, acceptable, and target) for each of the Idaho Standards for Initial Certification. The rubric shall be used to make holistic judgments. Performance indicators provide the lens through which the State Program Approval Team evaluates the institution’s provided evidence that candidates meet the Idaho standards. The institution is expected to provide information about candidate performance related to the Idaho Standards for Initial Preparation of Professional School Personnel.

Standard 1: Knowledge of Subject Matter - The teacher understands the central concepts, tools of inquiry, and structures of the discipline taught and creates learning experiences that make these aspects of subject matter meaningful for student.

Knowledge
1. The teacher knows the formal and expressive aesthetic qualities of the visual arts.
2. The teacher knows a variety of media, styles, and techniques in multiple art forms.
3. The teacher understands the historical and contemporary meanings of visual culture.

</table>

1.1 Syllabi, Praxis II scores, required coursework, and interviews with an adjunct faculty member provide evidence that the teacher candidates demonstrate an adequate understanding of formal, and expressive aesthetic qualities of the visual arts; a variety of media, styles, and techniques in multiple art forms; and the historical and contemporary meanings of visual culture. Candidates are required to take courses utilizing a variety of techniques, styles, and media as well as an art history course.
**Performance**

1. The teacher applies the knowledge of formal and aesthetic qualities to communicate ideas in the visual arts.
2. The teacher applies a variety of media, styles, and techniques in multiple art forms.
3. The teacher instructs students in the historical and contemporary meanings of visual culture.
4. The teacher supports individual interpretation and expression in the visual arts.
5. The teacher makes reasoned and insightful selections of works of art to support teaching goals.

State Program Approval Rubric for Teacher Preparation Programs

Candidate Performance Relative to the Idaho Standards

The Idaho Standards for Initial Certification provide the framework for the approval of educator preparation programs. As such, the standards set the criteria by which teacher preparation programs are reviewed for state program approval.

The following rubric is used to evaluate the extent to which teacher preparation programs prepare teachers relative to the standards. The rubric is designed to be used with each content-specific preparation program (i.e., Elementary, Special Education, Secondary English, Secondary Science–Biology, etc.).

Consistent with NCATE accreditation standards, the rubric describes three levels of performance (i.e., unacceptable, acceptable, and target) for each of the Idaho Standards for Initial Certification. The rubric shall be used to make holistic judgments. Performance indicators provide the lens through which the State Program Approval Team evaluates the institution’s provided evidence that candidates meet the Idaho standards. The institution is expected to provide information about candidate performance related to the Idaho Standards for Initial Preparation of Professional School Personnel.

Standard 1: Knowledge of Subject Matter - The teacher understands the central concepts, tools of inquiry, and structures of the discipline taught and creates learning experiences that make these aspects of subject matter meaningful for students.

Knowledge
1. The teacher knows the target language and understands the culture(s) in which the language is used.
2. The teacher understands key linguistic structures particular to the target language and the way(s) in which they compare to English communication patterns.
3. The teacher knows the history and literature of the target culture(s).
4. The teacher knows the current social, political, and economic realities of the countries related to the target language.
5. The teacher knows the commonly held stereotypes of the target culture(s).
6. The teacher understands the impact of the target language and culture(s) on American society.
7. The teacher knows the similarities and differences between the students’ culture(s) and the target culture(s).
8. The teacher understands the ACTFL (American Council on the Teaching of Foreign Languages) Proficiency Guidelines for listening, speaking, reading, writing, and culture.

1.1 Interviews with current teacher candidates, analysis of Praxis II Test Scores, and analysis of Unit Plans and Student Teacher binder (1 binder) data demonstrate that teacher candidates who are in their senior year have adequate Spanish language skills and cultural knowledge, can articulate the value of learning new languages and cultures, and can plan and create language and culture learning experiences. Data seem to indicate that the Spanish minor is insufficient to ensure language skills that lead to passing the Praxis II Spanish test.

**Performance**

1. The teacher incorporates listening, speaking, reading, writing, and culture into instruction.
2. The teacher articulates the value of foreign language learning to students, educators, and the community.
3. The teacher uses the target language extensively in formal, informal, and conversational contexts and encourages the students to do so.
4. The teacher provides opportunities to communicate in the target language in meaningful, purposeful activities that simulate real-life situations.
5. The teacher systematically incorporates culture into instruction.
6. The teacher incorporates discussions of the target culture’s contributions to the students’ culture.
7. The teacher encourages students to understand that culture and language are intrinsically tied.
8. The teacher makes generous use of cognates and expressions common to English and the foreign language when those comparisons will further the students’ understanding and fluency.

<table>
<thead>
<tr>

</thead>
<tbody>
<tr>
<td>1.2 Performance Making Subject</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Matter Meaningful</td>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

1.2 Performance data was minimal, making it difficult to ascertain the teacher candidates’ performance skills. Examples of student data were provided for one assignment, from one student. That data showed integration of culture, writing, and speaking. Interviews with teacher candidates, review of unit plans, and review of one student’s Student Teaching Notebook provided little additional evidence of “extensive use of the target language.” Some evidence of using Spanish for instruction was evident in Spanish II lesson plans. The interview of the Spanish language faculty member did provide a single point of evidence that students he had observed in their internships were using Spanish as the language of instruction at least half of the time. Further evidence was provided from one teacher candidate that all language skills, including culture, were used and assessed in the classroom.
Standard 2: Knowledge of Human Development and Learning - The teacher understands how students learn and develop, and provides opportunities that support their intellectual, social, and personal development.

Knowledge
1. The teacher understands that the process of second language acquisition includes the interrelated skills of listening, speaking, reading, and writing.
2. The teacher understands that the development of cultural knowledge is essential for second language acquisition.
3. The teacher understands how to create an instructional environment that encourages students to take the risks necessary for successful language learning.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>2.1 Knowledge Understanding Human Development and Learning</td>
<td></td>
<td>X</td>
<td></td>
</tr>
</tbody>
</table>

2.1 Interviews with teacher candidates and review of coursework, including unit plans and one student teacher notebook provided evidence of candidates’ understanding and knowledge of the language acquisition process. These candidates have had experiences learning and reflecting on the importance of culture learning and the connections between language and culture. Candidates’ out-of-country experiences have deepened their cultural understandings and they were able to provide examples of the linkages between language and culture. An interview with the primary language faculty member indicated strong connections between language and culture instruction.

Performance
1. The teacher builds on the language learning strengths of students rather than focusing on their weaknesses.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>2.2 Performance Provide Opportunities for Development</td>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

2.2 There were no opportunities to observe foreign language instruction, making it difficult to assess performance aspects of this standard. Review of unit plans provided evidence of candidate knowledge, but not performance. One candidate’s student data provided clear evidence of language and culture skill integration. Additional student data provided, demonstrated use of student work to provide feedback, but did not demonstrate skills beyond
writing and grammar. Some evidence indicated focus on the four skills, but integration was difficult to ascertain from more than one source of data.

Standard 3: Adapting Instruction for Individual Needs - The teacher understands how students differ in their approaches to learning and creates instructional opportunities that are adapted to students with diverse needs.

Knowledge
1. The teacher understands that gender, age, socioeconomic background, ethnicity, and other factors play a role in how individuals perceive and relate to their own culture and that of others.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>

<td>X</td>
</tr>
<tr>
<td>Accommodating Individual Learning Needs</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

3.1 Review of teacher candidate assignments, interviews with teacher candidates, and review of unit plans and the one student teacher notebook indicate adequate knowledge of student differences.

Performance
1. The teacher plans learning activities that enable students to grasp the significance of language and cultural similarities and differences.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>3.2 Performance Understanding of Individual Learning Needs</td>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

3.2 Little or no data was provided in the form of one Student Teacher notebook, and one candidate’s PreK-12 student data, including assessment data. The student teacher notebook included a statement at the end of every lesson plan, indicating that accommodations are built into every lesson (students may ask for more time, use notes for assignments, etc.). No actual performance data (teacher candidate reflections, actual K-12 student data, etc.) showing accommodations was presented.

Standard 4: Multiple Instructional Strategies - The teacher understands and uses a variety of instructional strategies to develop students’ critical thinking, problem solving, and performance skills.
**Knowledge**

1. The teacher understands that foreign language methodology continues to change.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>4.1 Knowledge Understanding of Multiple Learning Strategies</td>
<td></td>
<td>X</td>
<td></td>
</tr>
</tbody>
</table>

4.1 A review of unit plans, course assignments, and interviews with teacher candidates provide evidence of knowledge of multiple methods for language instruction. Multiple methods are also modeled by the primary language faculty.

**Performance**

1. The teacher uses a variety of instructional strategies to enhance students’ understanding of the target language and culture.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>
</tr>
</thead>
<tbody>
<tr>
<td>4.2 Performance Application of Multiple Learning Strategies</td>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

4.2 An analysis of one student teacher notebook and interviews provided little or no evidence of use of multiple methods of instruction. One notebook used direct instruction exclusively. While games and other strategies were used for review and practice, no evidence was available to suggest that multiple methods were used to accommodate for multiple learning strategies. Evidence from another teacher candidate provided evidence of a culminating activity that integrated language and culture skills. While this data was a clear piece of evidence of using multiple strategies, it was insufficient to demonstrate that the performance is a program expectation.

**Standard 7: Instructional Planning Skills** - The teacher plans and prepares instruction based on knowledge of subject matter, students, the community, and curriculum goals.

**Knowledge**

1. The teacher understands how to incorporate the ACTFL Standards for Foreign Language Learning of communication, cultures, connections, comparisons, and communities into instructional planning.
<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>

<tbody>
<tr>
<td>7.2 Knowledge Instructional Planning Skills</td>
<td>X</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

7.2 Little or no evidence data was presented to provide evidence of actual use of standards during teaching. While it was clear that lesson plans correlated to standards, it was not clear that standards drove instruction decisions.

**Standard 8: Assessment of Student Learning - The teacher understands, uses, and interprets formal and informal assessment strategies to evaluate and advance student performance and to determine program effectiveness.**

**Knowledge**
1. The teacher understands the ACTFL Proficiency Guidelines for listening, speaking, reading, writing, and culture.
2. The teacher understands the need to assess progress in the five language acquisition skills (listening, speaking, reading, writing, and culture).

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>

</thead>
<tbody>
<tr>
<td>8.1 Knowledge Assessment of Student Learning</td>
<td></td>
<td>X</td>
<td></td>
</tr>
</tbody>
</table>

8.1 Interviews with teacher candidates, course assignments, unit plans and student teaching notebooks provide evidence of an understanding of ACTFL proficiency guidelines. Teacher
candidates demonstrate an understanding of the importance of the 5 language skills. Assessment examples also provided evidence of meeting this standard.

**Performance**

1. The teacher motivates the students to reach level-appropriate proficiency based on ACTFL Proficiency Guidelines for listening, speaking, reading, writing, and culture.
2. The teacher employs a variety of ways of assessing the five language skill areas.
3. The teacher constructs and uses a variety of formal and informal assessment techniques, including tests in the primary and target languages, to enhance knowledge of individual students, evaluate student performance and progress, and modify teaching and learning strategies.

<table>
<thead>
<tr>
<th>Element</th>
<th>Unacceptable</th>
<th>Acceptable</th>
<th>Target</th>

<tbody>
<tr>
<td>8.2 Performance Using and Interpreting Program and Student Assessment Strategies</td>
<td></td>
<td>X</td>
<td></td>
</tr>
</tbody>
</table>

8.2 Performance data provided (one student teaching notebook) was minimal in its presentation of assessment data. Quizzes and exams were used for grammar and vocabulary. Some evidence of oral skills was presented. Cultural understanding was assessed. Listening and speaking skills were rarely assessed. Another teacher candidate’s data demonstrated a clear positive example of assessment data of integration of the 5 language skills. Two additional teacher candidates’ K-12 student data demonstrated assessment and use of assessment data that later informed next steps.

**Standard 10: Partnerships - The teacher interacts in a professional, effective manner with colleagues, parents, and other members of the community to support students’ learning and well-being.**

**Knowledge**

1. The teacher knows about career and other opportunities available to students proficient in a foreign language.
2. The teacher is aware of opportunities for students and teachers to communicate with native speakers.

<table>
<thead>
<tr>
<th>Element</th>

<tbody>
<tr>
<td>10.1 Knowledge Interacting with Colleagues, Parents, and Community in Partnerships</td>
<td></td>
<td>X</td>
<td></td>
</tr>
</tbody>
</table>
Coursework, field experiences, interviews with teacher candidates all confirm an in-depth knowledge of teacher candidate understanding of the importance of working with and using the community of language speakers as resources for language and culture learning. Strong experiences are provided/required for teacher candidates to interact with community language speakers, including the requirement to study in a country with native language speakers.

**Performance**

1. The teacher informs students of career and other opportunities available to students proficient in a foreign language.
2. The teacher provides opportunities for students to communicate with native speakers of the target language in person or via technology.
3. The teacher encourages students to participate in community experiences related to the target culture.

<table>

**Foundation Standards for School Administrators**

State Program Approval Rubric for Teacher Preparation Programs

Candidate Performance Relative to the Idaho Standards

The Idaho Standards for Initial Certification provide the framework for the approval of educator preparation programs. As such, the standards set the criteria by which teacher preparation programs are reviewed for state program approval.

All School Administrators, including Principals, Special Education Directors, and Superintendents, must meet the following Idaho Foundation Standards for School Administrators and the standards specific to their certification area at the “acceptable” level or above.

The following rubrics are used to evaluate the extent to which teacher preparation programs prepare administrators who meet the standards. The rubric is designed to be used with each individual preparation program (i.e., School Administrator, School District Superintendent, and Special Education Director).

Consistent with NCATE accreditation standards, the rubrics describe three levels of performance (i.e., unacceptable, acceptable, and target) for each of the Idaho Standards for Initial Certification. The rubric shall be used to make holistic judgments. Elements identified in the rubrics provide the basis upon which a State Program Approval Team evaluates the institution’s evidence that candidates meet the Idaho Standards. The institution is expected to provide information about candidate performance related to the Idaho Standards for School Administrators (and Idaho Standards for specific preparation areas, e.g., School District Superintendent, Special Education Director).

**Standard 1: Visionary and Strategic Leadership** - A school administrator is an educational leader who promotes the success of each students and staff member by facilitating the development, articulation, implementation, and stewardship of a vision of learning that is shared and supported by all stakeholders.

**Knowledge**
1. The administrator understands that each student can learn and that varied and data-informed learning goals are an important part of the process.
2. The administrator understands the principles of developing and implementing strategic plans.
3. The administrator understands systems theory and its application to educational settings.
4. The administrator knows effective individual and group communication skills.
5. The administrator knows group leadership and decision-making skills.
6. The administrator knows team-building, coaching, mediation, negotiation, and consensus-building skills.
<table>

<tbody>
<tr>
<td>1.1 Knowledge Understanding Visionary and Strategic Leadership</td>
<td></td>
<td>X</td>
<td></td>
</tr>
</tbody>
</table>

1.1 Interviews with NNU faculty and graduate students, reading course syllabi, and reviewing rubrics and candidate work samples provide minimal evidence that administrator candidates have an adequate understanding of specific models and processes of visionary leadership and how to engage stakeholders in strategic planning and data collection.

**Performance**

1. The administrator facilitates processes and engages in activities that create a shared vision and mission with all stakeholders.
2. The administrator uses effective individual and group communication skills.
3. The administrator engages others to ensure that a clearly articulated strategic plan is implemented, monitored, evaluated, and revised.
4. The administrator acknowledges the contributions of the school community to the realizations of the vision and mission.
5. The administrator seeks and allocates resources to support the strategic plan.
6. The administrator models professional growth, and supports the professional growth of the community of learners.
7. The administrator makes decisions through the application of systems theory.
8. The administrator uses varied sources of information, data collection, and data analysis strategies for the purpose of planning school improvement and increasing student achievement.
9. The administrator demonstrates and encourages strategies to facilitate the improved learning of each student.
10. The administrator ensures that each student is educated in an appropriate and the least restrictive learning environment.
11. The administrator practices team building, coaching, mediation, negotiation, and consensus building.

<table>

</thead>
<tbody>
<tr>
<td>1.2 Performance Application of Visionary and Strategic Leadership</td>
<td></td>
<td>X</td>
<td></td>
</tr>
</tbody>
</table>

1.2 Interviews with NNU faculty and graduate students, reading course syllabi, and reviewing rubrics and candidate work samples provide minimal evidence that administrator candidates demonstrate an adequate ability to facilitate the development and implementation of visioning and strategic leadership, using key concepts and models.
Standard 2: Instructional Leadership - The school administrator is an educational leader who promotes the success of each student by advocating, nurturing, and sustaining a school culture and instructional program conducive to student learning and staff professional growth.

Knowledge
1. The administrator understands how to enhance school culture and instructional programs through research, best practice, and curriculum design.
2. The administrator knows how to develop and implement a standards-based curriculum that aligns with assessment.
3. The administrator understands the principles of effective instruction, differentiated instruction, learning theories, motivation strategies, and positive classroom management.
4. The administrator understands student growth and development.
5. The administrator understands the effective use of assessment and evaluation.
6. The administrator understands adult learning and professional development.
7. The administrator understands the change process for systems, organizations, and individuals.
8. The administrator knows how to effectively use instructional supervision, evaluation, and due process.
9. The administrator understands community diversity and its influence on education.
10. The administrator understands the essential role of technology in education.
11. The administrator understands how to develop, implement, and evaluate co-curricular and extracurricular programs that enhance student growth and character development.
