<ul style="list-style-type: none"> <li>• <u>Identify and describe shapes.</u></li> <li>• <u>Analyze, compare, create, and compose shapes.</u></li> </ul>

<b><u>Progress Indicator: E.DPS.1a posing questions of interest that can be answered by counting or collecting data (e.g., concrete comparisons about students, classroom materials, science topics) with teacher guidance</u></b>		
<b><u>Core Content Connectors: K</u></b>	<b><u>CCRA Domain/Cluster</u></b>	<b><u>Idaho Content Standard</u></b>
<b><u>K.DPS.1a1 Select a question that is answered by collected data</u></b>	<b><u>Counting and Cardinality</u></b> <u>K CC Count to tell the number of objects.</u>	<u>K.CC.B.5 Count to answer "how many?" questions about as many as 20 things arranged in a line, a rectangular array, or a circle, or as many as 10 things in a scattered configuration; given a number from 1–20, count out that many objects.</u>

<b><u>Progress Indicator: E.GM.1a recognizing, describing (using spatial language) and naming shapes regardless of orientation or size and locating shapes in the environment</u></b>		
<b><u>Core Content Connectors: K</u></b>	<b><u>CCRA Domain/Cluster</u></b>	<b><u>Idaho Content Standard</u></b>

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

<b><u>K.GM.1a1 Recognize two-dimensional shapes (e.g., circle, square, triangle, rectangle) regardless of orientation or size</u></b>	<b><u>Geometry</u></b>  <u>K G Identify and describe shapes (squares, circles, triangles, rectangles, hexagons, cubes, cones, cylinders, and spheres)</u>	<u>K.G.A.2 Correctly name shapes regardless of their orientations or overall size.</u>
<b><u>K.GM.1a2 Recognize two-dimensional shapes in environment regardless of orientation or size</u></b>	<b><u>Geometry</u></b>  <u>K G Identify and describe shapes (squares, circles, triangles, rectangles, hexagons, cubes, cones, cylinders, and spheres)</u>	<u>K.G.A.1 Describe objects in the environment using names of shapes, and describe the relative position of these objects using terms such as <i>above</i>, <i>below</i>, <i>beside</i>, <i>in front of</i>, <i>behind</i>, and <i>next to</i>.</u>
<b><u>K.GM.1a3 Use spatial language (e.g., above, below, etc.) to describe two-dimensional shapes</u></b>	<b><u>Geometry</u></b>  <u>K G Identify and describe shapes (squares, circles, triangles, rectangles, hexagons, cubes, cones, cylinders, and spheres)</u>	<u>K.G.A.1 Describe objects in the environment using names of shapes, and describe the relative position of these objects using terms such as <i>above</i>, <i>below</i>, <i>beside</i>, <i>in front of</i>, <i>behind</i>, and <i>next to</i>.</u>
<b><u>Progress Indicator: E.GM.1c composing two-dimensional shapes (rectangles, squares, triangles, half-circles, and quarter circles)</u></b>		
<b><u>Core Content Connectors: K</u></b>	<b><u>CCRA Domain/Cluster</u></b>	<b><u>Idaho Content Standard</u></b>
<b><u>K.GM.1c 1 Compose a larger shape from smaller shapes</u></b>	<b><u>Geometry</u></b>  <u>K G Analyze, compare, create, and compose shapes.</u>	<u>K.G.B.6 Compose simple shapes to form larger shapes. For example, "Can you join these two triangles with full sides touching to make a rectangle?"</u>

<b><u>Progress Indicator: E.ME.1a recognizing, identifying, and describing the measurable attributes of objects</u></b>		
<b><u>Core Content Connectors: K</u></b>	<b><u>CCRA Domain/Cluster</u></b>	<b><u>Idaho Content Standard</u></b>
<b><u>K.ME.1a1 Describe objects in terms of measurable attributes (longer, shorter, heavier, lighter...)</u></b>	<b><u>Measurement and Data</u></b>  <u>K MD Describe and compare measurable</u>	<u>K.MD.A.1 Describe measurable attributes of objects, such as length or weight. Describe several measureable attributes of a single object.</u>

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

	<u>attributes.</u>	
<b><u>Progress Indicator: E.ME.1b comparing and ordering objects/events according to their specified attributes (using standard or non-standard units of measure), including indirectly by using a third object, or using common referents to estimate or compare</u></b>		
<b><u>Core Content Connectors: K</u></b>	<b><u>CCRA Domain/Cluster</u></b>	<b><u>Idaho Content Standard</u></b>
<b><u>K.ME.1b1 Sort objects by characteristics (e.g., big/little, colors, shapes, etc.)</u></b>	<b><u>Measurement and Data</u></b> <u>K MD Classify objects and count the number of objects in each category.</u>	<b><u>K. MD.B.3 Classify objects into given categories; count the numbers of objects in each category and sort the categories by count.</u></b>
<b><u>K.ME.1b2 Compare 2 objects with a measurable attribute in common to see which object has more/less of the attribute (length, height, weight)</u></b>	<b><u>Measurement and Data</u></b> <u>K MD Describe and compare measurable attributes.</u>	<b><u>K.MD.A.2 Directly compare two objects with a measurable attribute in common to see which object has "more of/less of" the attribute, and describe the difference. For example, directly compare the heights of two children and describe one child as taller/shorter.</u></b>

<b><u>Progress Indicator: E.ME.2a applying non-standard and common standard units to measure (length, height, weight, time)</u></b>		
<b><u>Core Content Connectors: K</u></b>	<b><u>CCRA Domain/Cluster</u></b>	<b><u>Idaho Content Standard</u></b>
<u>No CCCs developed for this PI</u>		<u>No CCRA linked</u>
<b><u>Progress Indicator: E.ME.2b selecting tools and using units of measures appropriately and consistently, with no gaps or overlaps in the technique of measuring</u></b>		
<u>No CCCs developed for this PI</u>		<u>No CCRA linked</u>
<b><u>Progress Indicator: E.ME.2c recognizing situations that require precision and those where an estimation or proportional matching is appropriate</u></b>		
<u>No CCCs developed for this PI</u>		<u>No CCRA linked</u>
<b><u>Progress Indicator: E.ME.2d describing a unit as an amount/quantity (rather than an object or a mark on a scale)</u></b>		
<u>No CCCs developed for this PI</u>		<u>No CCRA linked</u>

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

<b><u>Progress Indicator: E.NO.1a showing mastery of the prerequisite core skills of cardinality, constancy, and 1:1 correspondence</u></b>		
<b><u>Core Content Connectors: K</u></b>	<b><u>CCRA Domain/Cluster</u></b>	<b><u>Idaho Content Standard</u></b>
<b><u>K.NO.1a1 Rote count up to 10</u></b>	<b><u>Counting and Cardinality</u></b> <u>K CC Know number names and the count sequence.</u>	<u>K.CC.A.1 Count to 100 by ones and by tens.</u>
<b><u>K.NO.1a2 Rote count up to 31</u></b>	<b><u>Counting and Cardinality</u></b> <u>K CC Know number names and the count sequence.</u>	<u>K.CC.A.1 Count to 100 by ones and by tens.</u>
<b><u>K.NO.1a3 Rote count up to 100</u></b>	<b><u>Counting and Cardinality</u></b> <u>K CC Know number names and the count sequence.</u>	<u>K.CC.A.1 Count to 100 by ones and by tens.</u>
<b><u>K.NO.1a4 Count up to 10 objects in a line, rectangle, or array</u></b>	<b><u>Counting and Cardinality</u></b> <u>K CC Count to tell the number of objects.</u>	<u>K.CC.B.4 Understand the relationship between numbers and quantities; connect counting to cardinality.</u>  <u>a) When counting objects, say the number names in the standard order, pairing each object with one and only one number name and each number name with one and only one object.</u>  <u>K.CC.B.5 Count to answer "how many?" questions about as many as 20 things arranged in a line, a rectangular array, or a circle, or as many as 10 things in a scattered configuration; given a number from 1-20, count out that many objects.</u>
<b><u>Progress Indicator: E.NO.1b developing an understanding of number and principles of quantity (e.g., hold up 5 fingers at once to show 5, locate things in 2s without counting; using number words to indicate small exact numbers or relative change in quantity - more, small)</u></b>		

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

<b><u>Core Content Connectors: K</u></b>	<b><u>CCRA Domain/Cluster</u></b>	<b><u>Idaho Content Standard</u></b>
<b><u>K.NO.1b1 Match the numeral to the number of objects in a set</u></b>	<b><u>Counting and Cardinality</u></b> <u>K CC Count to tell the number of objects.</u>	<u>K.CC.B.4 Understand the relationship between numbers and quantities; connect counting to cardinality.</u>  <u>a) When counting objects, say the number names in the standard order, pairing each object with one and only one number name and each number name with one and only one object.</u>  <u>K.CC.B.5 Count to answer "how many?" questions about as many as 20 things arranged in a line, a rectangular array, or a circle, or as many as 10 things in a scattered configuration; given a number from 1-20, count out that many objects.</u>
<b><u>K.NO.1b2 Identify the set that has more</u></b>	<b><u>Counting and Cardinality</u></b> <u>K CC Count to tell the number of objects.</u>	<u>K.CC.B.4 Understand the relationship between numbers and quantities; connect counting to cardinality.</u>  <u>b) Understand that the last number name said tells the number of objects counted. The number of objects is the same regardless of their arrangement or the order in which they were counted.</u>
<b><u>Progress Indicator: E.NO.1d identifying numbers (names, symbols, quantity) and the count sequence</u></b>		
<b><u>Core Content Connectors: K</u></b>	<b><u>CCRA Domain/Cluster</u></b>	<b><u>Idaho Content Standard</u></b>
<b><u>K.NO.1d1 Identify numerals 1-10</u></b>	<b><u>Counting and Cardinality</u></b> <u>K CC Know number names and the count sequence.</u>	<u>K.CC.A.3 Write numbers from 0 to 20. Represent a number of objects with a written numeral 0-20 (with 0 representing a count of no objects).</u>
<b><u>K.NO.1d2 Identify the numerals 1-10 when presented the name of the number</u></b>	<b><u>Counting and Cardinality</u></b> <u>K CC Know number names and the count sequence.</u>	<u>K.CC.A.3 Write numbers from 0 to 20. Represent a number of objects with a written numeral 0-20 (with 0 representing a count of no objects).</u>

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

<b><u>Progress Indicator: E.NO.1e reading and writing numbers; counting and estimating (e.g., how many?; skip counting by 2s, 5s, 10s; even/odd)</u></b>		
<b><u>Core Content Connectors: K</u></b>	<b><u>CCRA Domain/Cluster</u></b>	<b><u>Idaho Content Standard</u></b>
<b><u>K.NO.1e1 Write or select the numerals 1-10</u></b>	<b><u>Counting and Cardinality</u></b>  K CC Know number names and the count sequence.	<b><u>K.CC.A.3 Write numbers from 0 to 20. Represent a number of objects with a written numeral 0-20 (with 0 representing a count of no objects).</u></b>
<b><u>Progress Indicator: NO.1f representing, ordering, and comparing whole numbers</u></b>		
<b><u>Core Content Connectors: 1</u></b>	<b><u>CCRA Domain/Cluster</u></b>	<b><u>Idaho Content Standard</u></b>
<b><u>K.NO.1f1 Identify the smaller or larger number given 2 numbers between 0-10</u></b>	<b><u>Counting and Cardinality</u></b>  K CC Compare numbers.	<b><u>K.CC.C.7 Compare two numbers between 1 and 10 presented as written numerals.</u></b>

<b><u>Progress Indicator: E.NO.2a representing addition and subtraction in multiple ways (composing/ decomposing numbers, diagrams, using objects, arrays, equations, number lines), including regrouping</u></b>		
<b><u>Core Content Connectors: K</u></b>	<b><u>CCRA Domain/Cluster</u></b>	<b><u>Idaho Content Standard</u></b>
<b><u>K.NO.2a1 Count 2 sets to find sums up to 10</u></b>	<b><u>Operations and Algebraic Thinking</u></b>  K OA Understand addition as putting together and adding to, and understand subtraction as taking apart and taking from.	<b><u>K.OA.A.2 Solve addition and subtraction word problems, and add and subtract within 10, e.g., by using objects or drawings to represent the problem.</u></b>
<b><u>K.NO.2a2 Decompose a set of up to 10 objects into a group; count the quantity in each group</u></b>	<b><u>Operations and Algebraic Thinking</u></b>  K OA Understand addition as putting together and adding to, and understand subtraction as taking apart and taking from.	<b><u>K.OA.A.3 Decompose numbers less than or equal to 10 into pairs in more than one way, e.g., by using objects or drawings, and record each decomposition by a drawing or equation (e.g., <math>5 = 2 + 3</math> and <math>5 = 4 + 1</math>).</u></b>
<b><u>K.NO.2a3 Solve word problems within 10</u></b>	<b><u>Operations and Algebraic Thinking</u></b>  K OA Understand addition as putting together	<b><u>K.OA.A.2 Solve addition and subtraction word problems, and add and subtract within 10, e.g., by using objects or drawings to</u></b>

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

	<u>and adding to, and understand subtraction as taking apart and taking from.</u>	<u>represent the problem.</u>
--	---	-------------------------------

**Progress Indicator: E.PRF.1b exploring and describing how addition or subtraction changes a quantity**

<b><u>Core Content Connectors: K</u></b>	<b><u>CCRA Domain/Cluster</u></b>	<b><u>Idaho Content Standard</u></b>
<b><u>K.PRF.1b1 Use objects or pictures to respond appropriately to "add " and "take away "</u></b>	<b><u>Operations and Algebraic Thinking</u></b> <u>K OA Understand addition as putting together and adding to, and understand subtraction as taking apart and taking from.</u>	<u>K.OA.A.1 Represent addition and subtraction with objects, fingers, mental images, drawings<sup>1</sup>, sounds (e.g., claps), acting out situations, verbal explanations, expressions, or equations.</u>  <u>(1 Drawings need not show details, but should show the mathematics in the problem. (This applies wherever drawings are mentioned in the Standards.))</u>
<b><u>K.PRF.1b2 Communicate answer after adding or taking away</u></b>	<b><u>Operations and Algebraic Thinking</u></b> <u>K OA Understand addition as putting together and adding to, and understand subtraction as taking apart and taking from.</u>	<u>K.OA.A.1 Represent addition and subtraction with objects, fingers, mental images, drawings<sup>1</sup>, sounds (e.g., claps), acting out situations, verbal explanations, expressions, or equations.</u>  <u>(1 Drawings need not show details, but should show the mathematics in the problem. (This applies wherever drawings are mentioned in the Standards.))</u>

**Progress Indicator: E.PRF.1c modeling problem solving situations that involve addition and subtraction of whole numbers using objects, diagrams, and symbols**

<b><u>Core Content Connectors: K</u></b>	<b><u>CCRA Domain/Cluster</u></b>	<b><u>Idaho Content Standard</u></b>
<b><u>K.PRF.1c1 Solve one step addition and subtraction word problems, and add and subtract within 10 using</u></b>	<b><u>Operations and Algebraic Thinking</u></b> <u>K OA Understand addition as putting together</u>	<u>K.OA.A.2 Solve addition and subtraction word problems, and add and subtract within 10, e.g., by using objects or drawings to</u>

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

<u>objects, drawings, pictures</u>	<u>and adding to, and understand subtraction as taking apart and taking from.</u>	<u>represent the problem.</u>
<u>Explanations and clarifications:</u>		

<u>Progress Indicator: E.PRF.2a recognizing, describing, and extending simple repeating (ABAB) and growing (A+1, A+2, A+3) patterns (e.g., colors, sounds, words, shapes, numeric – counting, odd, even)</u>		
<u>Core Content Connectors: K</u>	<u>CCRA Domain/Cluster</u>	<u>Idaho Content Standard</u>
<u>K.PRF.2a1 Describe or select the repeating pattern using objects or pictures (AB or ABC)</u>		<u>No CCRA linked</u>
<u>K.PRF.2a2 Extend a repeating pattern using objects or pictures (AB or ABC)</u>		<u>No CCRA linked</u>
<u>K.PRF.2a3 Extend a repeating numerical AB pattern</u>		<u>No CCRA linked</u>
<u>Progress Indicator: E.PRF.2b creating and explaining repeating and growing patterns using objects or numbers</u>		
<u>Core Content Connectors: K</u>	<u>CCRA Domain/Cluster</u>	<u>Idaho Content Standard</u>
<u>K.PRF.2b1 Create a repeating pattern using objects, pictures, or numbers</u>		<u>No CCRA linked</u>

## Mathematics | Grade 1 | Overview

<b><u>Operations and Algebraic Thinking (OA)</u></b>
<ul style="list-style-type: none"> <li>• <u>Represent and solve problems involving addition and subtraction.</u></li> <li>• <u>Understand and apply properties of operations and the relationship between addition and subtraction.</u></li> <li>• <u>Add and subtract within 20.</u></li> </ul>

**SUBJECT**

Proposed Rule, Docket No. 08-0203-1704, Rules Governing Thoroughness, Incorporation by Reference

**REFERENCE**

June 2016	Revised Idaho Special Education Manual approved and adopted by the State Board of Education.
November 2016	Board approved Pending Rule Docket No. 08-0203-1604, incorporating by reference updates to the Idaho Special Education Manual.

**APPLICABLE STATUTE, RULE, OR POLICY**

Idaho State Board of Education Governing Policies & Procedures, Section V.B.8  
Section 33-2002, Idaho Code  
IDAPA 08.02.03.004 Rules Governing Thoroughness, Incorporation by Reference

**BACKGROUND/DISCUSSION**

Proposed Rule Docket No. 08-0203-1704 provides for the amendment of the Idaho Special Education Manual (Manual), incorporated by reference into IDAPA 08.02.03.004.

The updated Manual replaces the outdated terms “deafness” and “hearing impairment” with “deaf or hard of hearing.” The definition of “deaf or hard of hearing” now includes language regarding the child’s access, comprehension, and/or use of linguistic information through hearing. In addition, state eligibility criteria for “deafness” and “hearing impairment” have been replaced by criteria for “deaf or hard of hearing.” The modified eligibility criteria, used by evaluation teams when determining the disability category for a student, compliment the updated definition of “deaf or hard of hearing.”

Other changes to the Manual include minor language corrections or deletions necessary to maintain document consistency and to align with the Every Student Succeeds Act, Idaho Code, or teacher certification standards.

The modified eligibility criteria were revised by a committee consisting of members of the Idaho Educational Services for the Deaf and the Blind, the State Department of Education’s Early Childhood and Interagency Coordinator, several Idaho Special Education Support and Technical Assistance staff, a Speech and Language Pathologist from Idaho State University, a Boise School District Education Audiologist, a West Ada School District School Psychologist, the Special Education Director for Emmett School District, and the Executive Director of the Idaho Council for the Deaf and Hard of Hearing.

During the revision process, a committee representative presented and elicited feedback regarding the proposed changes to stakeholders throughout the state including: the Special Education Advisory Panel, regional special education director’s meetings, the Idaho Council for the Deaf and Hard of Hearing Board, the

**STATE DEPARTMENT OF EDUCATION**  
**AUGUST 10, 2017**

---

Idaho Association of the Deaf, the Director's Advisory Committee, and the Idaho Educational Services for the Deaf and the Blind. The revision was emailed to all deaf/hard of hearing teachers and education audiologists in Idaho requesting feedback. Feedback was favorable.

In addition, a Notice of Intent to Promulgate Rules was published in the April 5, 2017, edition of the Administrative Bulletin. Six (6) public meetings were held across the state between April 11 and 20, 2017, during which any member of the public could provide verbal or written feedback on the suggested amendments to the incorporated document. One (1) comment in support of the "deaf or hard of hearing" change was received during the public meetings. No written comments were received through the SDE's public comment online submission form.

The proposed changes to the Idaho Special Education Manual include:

Acronyms and Abbreviations: Remove HOUSSE (Highly Objective Uniform State Standard of Evaluation) which is no longer applicable.

Glossary: Clarify the term "audiologist" for consistency with professional responsibilities. Replace "deafness" and "hearing impairment" with "deaf or hard of hearing." Remove "modification" to be consistent with use of terms "accommodation" and "adaptation."

Chapter 4: Evaluation and Eligibility: Replace "deafness" and "hearing impairment" with "deaf or hard of hearing." Provide clarification of the Language Impairment category if a student does not qualify under the criteria for Deaf or Hard of Hearing.

Chapter 9: Private School Students: Remove terminology "or dual enrollment" to align with Idaho Code 33-203 and other areas of the manual. The term in this section of the manual was misappropriated.

Chapter 10: Improving Results: Change "Computer Based Route to Teacher Certification" to "Non-Traditional Route to Certification" to align with teacher certification standards. Remove reference to alternative route preparation program for para-educators that is no longer available.

General: Remove references to "highly qualified" teachers to align with the Every Student Succeeds Act. Change the term "modifications" to "accommodations" or "adaptations" for consistency. Correct terminology from "specifically designed instruction" to "specially designed instruction."

**IMPACT**

The proposed changes will bring the Idaho Special Education Manual into compliance with the Individuals with Disabilities Education Act and align with the Every Student Succeeds Act, Idaho Code, and teacher certification standards. In addition, the proposed changes will provide clear, consistent guidance for school personnel.

**ATTACHMENTS**

Attachment 1 – Proposed Rule, Docket No. 08-0203-1704

Page 5

Attachment 2 – Revised Idaho Special Education Manual

Page 9

**STAFF COMMENTS AND RECOMMENDATIONS**

Once approved by the Board, proposed rules are published in the Administrative Bulletin. Publication of the proposed rule starts the 21-day public comment period. At the close of the public comment period, based on comments received and Board direction, changes may be made to proposed rules prior to entering the pending stage. All pending rules are brought back to the board for approval prior to re-submittal to the Department of Administration for publication as a pending (or final rule) in the Idaho Administrative Bulletin. The Department of Administration then forwards all pending rules to the legislature for consideration during the next legislative session. Pending rules go into effect at the end of the session in which they are reviewed, if they are not rejected by the legislature. The legislature may reject a rule in whole or in part.

Staff recommends approval.

**BOARD ACTION**

I move to approve the revised Idaho Special Education Manual as submitted in Attachment 2.

Department of Special Education

*Approved by the State Board of Education*

*~~June 16, 2016~~ August 10, 2017*

IDAPA 08.02.03.004

**Nondiscrimination Clause**

Federal law prohibits discrimination on the basis of race, color, religion, sex, national origin, age, or disability in any educational programs or activities receiving federal financial assistance. (Title VI and VII of the Civil Rights Act of 1964; Title IX of the Education Amendments of 1972; Section 504 of the Rehabilitation Act of 1973; and the Americans with Disabilities Act of 1990.)

It is the policy of the Idaho State Department of Education not to discriminate in any educational programs or activities, or in employment practices.

Inquiries regarding compliance with this nondiscriminatory policy may be directed to the State Superintendent of Public Instruction, P.O. Box 83720, Boise, ID 83720-0027, (208) 332-6800, or to the Director, Office of Civil Rights, Department of Education, Washington, D.C.

**Idaho Special Education Manual**

The policies and procedures contained in this Idaho Special Education Manual have been developed by the State Department of Education (SDE) and offered to local education agencies (LEA) for adoption. This Manual has been approved by the State Board of Education, meets the IDEA eligibility requirement of 20 U.S.C. Section 1412, and is consistent with state and federal laws, rules, regulations, and legal requirements.

In the case of any conflict between Idaho Administrative Code (IDAPA) and the Individuals with Disabilities Education Act (IDEA), the IDEA shall supersede the IDAPA, and IDAPA shall supersede this Manual.

*This document was developed and printed by the Idaho State Department of Education using grant funds from the Individuals with Disabilities Education Act, PR/Award #H027A080088A.*

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

**ACKNOWLEDGMENTS**

On August 14, 2006, the Individuals with Disabilities Improvement Act (IDEA) was signed into law. Revisions to the IDEA regulations were issued in 2007, 2008, 2013 and 2014. The Idaho State Department of Education (SDE) published a first edition of this Manual in 2007, later revised in 2009. The original Manual Task Force members' efforts are recognized here for their work in creating the framework for this Manual.

2006 Task Force members included:

Larry Streeter, Chairman, SDE; Ellie Atkinson, Boise School District #1; Beverly Benge, SDE; Mary Bostick, SDE; Alyssa Carter, Director of Special Education Services, Kuna School District #3; Robin Carter, SDE; Liz Compton, SDE; JoAnn Curtis, Post Falls School District #273; Beth Eloee-Reep, SDE; Paul Epperson, Dispute Resolution Contractor; Dina Flores-Brewer, Special Education Advisory Panel and Staff Attorney Co-Ad, Inc.; Vickie Green, SDE; Mark Gunning, Idaho Parents Unlimited; Russ Hammond, SDE; Gina Hemenway, Boise School District #1; Richard Henderson, SDE; Mont Hibbard, Mont Hibbard Consulting; Frank Howe, SDE; Jacque Hyatt, SDE; Mark Kuskie, SDE; Deborah Lund, Jefferson School District #251; Rene Rohrer, SDE; Annette Schwab, SDE; Debbie Smith, SDE; Lynda Steenrod, Pocatello/Chubbuck School District #25; Jean Taylor, SDE; Tom Trotter, Coeur d'Alene School District #271; and Marybeth Wells, SDE.

The 2006 Task Force members offered their appreciation to:

Art Cernosia, Attorney at Law/Educational Consultant; Tamara White, Editor; Annette Schwab, SDE; Valerie Schorzman, State Department of Education; William "Bill" Elvey, SDE; Lester Wyer, SDE; Bonnie Steiner-Leavitt, SDE; Misty Knuchell, SDE; and Cheryl Kary, SDE.

**2016 Idaho Special Education Manual**

For this 2016 Idaho Special Education Manual, the following individuals have been instrumental in creating these updates. Manual reviewers served with distinction and volunteered their time to discuss and debate issues and make thoughtful recommendations and decisions to develop this update to the Manual. Thank you to:

Jarl Allen	School Psychologist, Cassia County
Clara Allred	Special Education Director, Twin Falls
Michelle Clement-Taylor	School Choice and Innovation Coordinator, SDE
JoAnn Curtis	Special Education Director, Post Falls
Shannon Dunstan	Early Childhood and Medicaid Coordinator, SDE
Elaine Eberharter-Maki	Special Education Attorney
Paul Epperson	Contractor, Dispute Resolution

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

Pat Farmer	Special Education Director (Ret.)
Cliff Hart	Special Education Director, American Falls
Russell Hammond	Contractor, General SDE
Richard Henderson	Director of Special Education, SDE
Mont Hibbard	Contractor, Dispute Resolution
Angela Lindig	Executive Director, Idaho Parents Unlimited (IPUL)
Ed Litteneker	Contractor, Dispute Resolution
Alison Lowenthal	Secondary Transition Coordinator, SDE
Allison Moore	Contractor, General SDE
William Morriss	Special Populations Coordinator, SDE
Richard O'Dell	Quality Assurance and Reporting Coordinator, SDE
Melanie Reese	Dispute Resolution Coordinator, SDE
Sue Shelton	Regional Coordinator, SDE
Julie Solberg	School Psychologist (Ret.)
Cathy Thornton	Special Education Director, West Ada SD #2
Toni Wheeler	Statewide Assessments Coordinator, SDE
Lester Wyer	Funding and Accountability Coordinator, SDE
Jennifer Zielinski	Program Coordinator, Idaho Parents Unlimited (IPUL)

To those parents, advocates, teachers, parent attorneys, special education directors, service providers, Special Education Advisory Panel (SEAP) members, and others in the state who provided insights, questions, and suggestions throughout the review process, we thank you.

Special appreciation and acknowledgements to:

Art Cernosia	Legal and Educational Consultant
Melanie Reese	Committee Chair and Editor
Lily Robb	Program Specialist, SDE

GLOSSARY

**Academic achievement.** A student’s level of performance in basic school subjects, measured either formally or informally.

**Accommodation.** Changes in the curriculum, instruction, or testing format or procedures that enable students with disabilities to participate in a way that allows them to demonstrate their abilities rather than disabilities. Accommodations are generally considered to include assistive technology as well as changes in presentation, response, timing, scheduling, and settings that do not fundamentally alter the requirements. Accommodations do not invalidate assessment results and do not fundamentally alter the requirements (or course expectations).

**Adaptation.** Changes to curriculum, instruction, or assessments that fundamentally alter the requirements, but that enable a student with an impairment that significantly impacts performance an opportunity to participate. Adaptations include strategies such as reading the reading portion of a test, using spell/grammar check for language arts assessments, and substituting out-of-level testing. Adaptations fundamentally alter requirements and invalidate assessment results and provide non-comparable results.

**Adaptive behavior.** Behavior that displays an age-appropriate level of self-sufficiency and social responsibility which includes the following areas: communication, self-care, home living, social/interpersonal skills, use of community resources, direction, functional academic skills, work, leisure, health, or safety.

**Adverse Impact (adverse effect).** A determination made by the evaluation team that the student’s progress is impeded by the disability to the extent that the educational performance is significantly and consistently below the level of similar age peers preventing the student from benefitting from general education. The phrases “adverse impact” and “adverse effect” are used interchangeably in this Manual and have the same meaning. See also “educational performance.”

**Adult student.** A student with a disability, age eighteen (18) or older, to whom rights have transferred under the IDEA and Idaho Code, and who has not been deemed legally incompetent by a court or deemed ineligible to give informed consent by the IEP team.

**Age-appropriate activities.** Activities that typically-developing children of the same age would be performing or would have achieved.

**Age of majority.** The age at which, by law, a child assumes the responsibilities of an adult. In Idaho, the age of majority is eighteen (18).

**Aggregated data.** Information that is considered as a whole. In this Manual, the term refers to collective data on all students, including students with disabilities.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

- Alternate assessment.** A specific assessment, developed by the state in lieu of statewide assessments or by the district in lieu of districtwide assessments, designed to measure functional skills within the same domains required by the regular statewide or district wide assessments. It is designed for students who are unable to demonstrate progress in the typical manner and who meet the state-established criteria.
- Alternative authorization/teacher to new certification.** One of the State Board of Education’s alternative routes to teacher certification as outlined in the Idaho Certification Manual distributed by the Idaho State Department of Education.
- Alternative or supplementary curriculum.** Curriculum not based on or drawn directly from the general education curriculum.
- Alternative school.** A public school placement option that may be utilized for students who are not succeeding in the traditional school environment but may benefit through the use of modified curriculum or flexible programming.
- Articulation.** The ability to speak distinctly and connectedly.
- Articulation disorder.** Incorrect productions of speech sounds, including omissions, distortions, substitutions and/or additions that may interfere with intelligibility.
- American with Disabilities Act (ADA) of 1990.** A federal law prohibiting discrimination on the basis of disability in employment, State and local government, public accommodations, commercial facilities, transportation, and telecommunications. An individual with a disability is defined by the ADA as a person who has a physical or mental impairment that substantially limits one or more major life activities, a person who has a history or record of such an impairment, or a person who is perceived by others as having such an impairment. The ADA does not specifically name all of the impairments that are covered.
- Assessment.** The formal or informal process of systematically observing, gathering, and recording credible information to help answer evaluation questions and make decisions. It is an integral component of the evaluation process. A test is one method of obtaining credible new information within the assessment process. Assessment data may also include observations, interviews, medical reports, data regarding the effects of general education accommodations and adaptations and interventions, and other formal or informal data.
- Assistive technology device.** Any item, piece of equipment, or product system whether acquired commercially, off a shelf, modified, or customized that is used to increase, maintain, or improve the functional capabilities of a student with a disability. Excludes surgically implanted medical devices.
- Assistive technology service.** Any service that directly assists a student with a disability with the assessment, selection, acquisition, or use of an assistive technology device. The term

STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017

includes the evaluation of the need of the student; purchasing, leasing, or otherwise providing for the acquisition of assistive technology devices; selecting, designing, fitting, customizing, adapting, applying, maintaining, repairing, or replacing devices; coordinating and using other therapies, interventions, or services with existing education and rehabilitation plans and programs; training or technical assistance for a student and/or family; and training or technical assistance for professionals, employers, or other individuals who provide services to, employ, or are otherwise substantially involved in the major life functions of the student.

**Attention deficit disorder (ADD).** A biologically based mental disorder that has these typical characteristics: short attention span; distractive behavior; difficulty following directions and staying on task; and an inability to focus behavior. The disorder compromises many skills needed for academic success, including starting, following through with, and completing tasks; moving from task to task; and following directions.

**Attention deficit hyperactivity disorder (ADHD).** A biologically based mental disorder in which a person has inappropriate degrees of inattention, impulsiveness and hyperactivity.

**Audiologist.** A licensed health care professional who diagnoses and supports management of hearing loss, counseling to auditory needs across environments and ~~selects and fits~~ fitting of hearing aids technology.

**Autism.** A disability category in which a developmental disability, generally evident before age three (3), significantly affects verbal or nonverbal communication skills and social interactions and adversely affects educational performance. Other characteristics often associated with autism are engagement in repetitive activities and stereotyped movements, resistance to environmental change or change in daily routines, and unusual responses to sensory experiences.

**Basic reading skills.** For the purpose of specific learning disability eligibility, includes sight word recognition, phonics, and word analysis. Essential skills include identification of individual sounds and the ability to manipulate them, identification of printed letters and sounds associated with letters, and decoding of written language.

**Behavioral intervention plan (BIP).** A plan comprising practical and specific strategies designed to increase or reduce a definable behavior. These strategies address preventative techniques, teaching replacement behaviors, how to respond or resolve behaviors, and crisis management, if necessary.

**Benchmark.** A major milestone which describes the progress the student is expected to make toward annual goals within a specified period of time. Similar to an objective.

**Braille.** A tactile system of reading and writing, used by students who are blind or visually impaired, with an official code composed of Braille characters or cells that consist of

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

various patterns of raised dots that correspond to alphabetic letters, punctuation marks and other symbols.

**Business day.** A workday (Monday through Friday) except for federal and state holidays, unless specifically included.

**Case manager.** A member of the evaluation and/or IEP team (usually the special education teacher) who is designated to perform administrative functions for the team, including: (1) setting up meetings; (2) ensuring appropriate forms are completed; (3) ensuring timelines are met; and (4) includes the responsibility of coordinating and overseeing the implementation of the IEP.

**Change of placement.** A change in educational placement relates to whether the student is moved from one type of educational program -- i.e., regular class -- to another type -- i.e., home instruction. Or it may also occur when there is a significant change in the student's educational program even if the student remains in the same setting.

**Change of placement for disciplinary reasons.** A removal from the current educational placement for more than ten (10) consecutive school days or a series of removals that constitute a pattern when they total more than ten (10) school days in a school year. Factors such as the length of the removal, the proximity of the removals to one another, the total amount of time the student is removed are indicators of a pattern, and whether the child's behavior is substantially similar to the child's behavior in previous incidents that resulted in the series of removals.

**Charter school within a district.** A publicly funded, nonprofit, nonsectarian public school that is created by a formal agreement (charter) between a group of individuals and the board of trustees of the local school district and operates independently within the district. It is governed by the conditions of its approved charter and federal and state laws. It is the responsibility of the local district to ensure that students attending such charter schools receive appropriate services as required by IDEA, Section 504 and the ADA.

**Charter school LEA.** A publicly funded, nonprofit, nonsectarian public school that operates as its own local education agency or district. Charter LEAs do not have an agreement with the local school district within whose boundaries they operate. Charter LEAs must be authorized by the Idaho Public Charter School Commission and are required to provide services in accordance with IDEA, Section 504 and the ADA.

**Child.** An individual who has not attained age eighteen (18).

**Child count.** For purposes of the annual report required under IDEA, the State must count and report the number of children with disabilities receiving special education and related services on any date between October 1 and December 1 of each year.

**Child find.** A process to locate, identify, and evaluate individuals ages three (3) to twenty-one (21) who are suspected of having a disability and in need of special education.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

- Civil action.** A judicial action that any party who is aggrieved by the final decision of a due process hearing officer may bring in either a federal district court or a state court of competent jurisdiction (as designated by Idaho law).
- Cognitive academic language proficiency (CALP).** A test to determine a student’s appropriate language dominance/usage.
- Compensatory education.** Educational services or remedies which are above and beyond those normally due a student under his or her state’s education law. The principle is acknowledged by most courts that have considered the issue to be an appropriate equitable remedy when a student has been denied free appropriate public education. Services that would put the student in the same position had they not been denied a FAPE.
- Complaint. (State complaint)** A formal, written, and signed statement submitted to the Idaho State Department of Education by an individual or organization that contains one or more allegations and the facts on which the statement is based that a district or agency has violated a requirement of IDEA within the last year (365 days).
- Coordinated early intervening services (CEIS).** Services for students (K-12) who need additional academic and behavioral support to succeed in a general education environment. These students have not been identified as having a disability under the IDEA.
- Consensus.** Following the opportunity for each member to provide input and gain clarification, the resulting outcome where each member agrees to support the decision of the group. Consensus is both the general agreement to support the decision, and the process of reaching such agreement to support the decision.
- Consent.** Voluntary, written approval of a proposed activity, as indicated by a parent/adult student signature. The parent/adult student must be fully informed of all relevant information in his or her native language or other mode of communication and must understand all information relevant to the activity to make a rational decision.
- Conservator.** A person appointed by the court to handle financial decisions for a person who is incapacitated or debilitated. In Idaho the conservator has all of the powers conferred in Idaho Statute 15-5-424 and any additional powers conferred by law on trustees in this state. In addition, a conservator of the estate of an unmarried minor under the age of eighteen (18) years, as to whom no one has parental rights, has the duties and powers of a guardian of a minor described in section 15-5-209 of this code until the minor attains the age of eighteen (18) or marries, but the parental rights so conferred on a conservator do not preclude appointment of a guardian as provided by part 2 of this chapter, Idaho Statute 15-5-424.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

**Controlled substance.** Any drug so designated by law whose availability is restricted; i.e., so designated by federal Controlled Substances Acts. Included in such classifications are narcotics, stimulants, depressants, hallucinogens, and marijuana. (See Schedule I, II, III, IV or V in section (c) of the Controlled Substances Act (21 U.S.C. 812(c))

**Core academic subjects.** These include English, reading or language arts, mathematics, science, foreign languages, civics and government, economics, arts, history, and geography under the ESEA.

**Corrective action plan (CAP).** A plan that orders a district as a result of an IDEA complaint to take corrective actions to resolve legal deficiency as found by the SDE.

**Critical life skill.** Skills that lead to independent functioning. Development of these skills can lead to reduced dependency on future caretakers and enhance students' integration with nondisabled individuals. Skills may include such things as toileting, feeding, mobility, communication, dressing, self-help, and social/emotional functioning.

**Dangerous weapon.** A weapon, device, instrument, material, or substance, animate or inanimate, that is used for, or is readily capable of causing death or serious bodily injury, except that such term does not include a pocket knife with a blade of less than 2 ½ inches in length.

**Data-based decision making.** The collecting of information that can be charted or graphed to document performance over time followed by an analysis of the information to determine needed changes in policies, programs, or procedures.

**Day.** Refers to a calendar day unless otherwise indicated as a business or school day.

**Deaf-blindness.** An IDEA disability category in which a student demonstrates hearing and visual impairments, and where the combination of these two disabilities causes such severe communication and other developmental and educational needs that the student cannot be accommodated with special education services designed solely for students with deafness or blindness.

~~**Deafness-Deaf or Hard of Hearing.** An IDEA disability category in which hearing loss or inability is so severe that the student, A child with a hearing loss, whether permanent or fluctuating, that impairs the access, comprehension, and/or use of linguistic information through hearing, with or without amplification, is limited in processing linguistic information through hearing, which and that adversely affects a child's educational performance.~~

**Detained youth.** Anyone aged three (3) through twenty-one (21) who is being held for a crime regardless of whether or not that person has appeared before the court.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

- Developmental achievement.** Gains a student makes which follow the pedagogic theory that all children learn in the same basic way and in the same sequence, although at different rates.
- Developmental delay.** An IDEA disability category used only for students ages three (3) through nine (9) for whom a significant delay exists in one or more of the following skill areas: receptive/expressive language; cognitive abilities; gross/fine motor functioning; social/emotional development; or self-help/adaptive functioning. The use of this category is optional for districts.
- Disaggregated data.** Information that is reported and/or considered separately on the basis of a particular characteristic. In this Manual, the term refers to data on special education students as a group that is reported and/or considered separately from the same data on all students in a school, district, or state.
- Discipline.** Actions taken in response to a student’s violation of the student conduct code.
- Disclosure.** The access to or the release, transfer or other communication of education records, or personally identifiable information contained in these records by oral, written, electronic, or other means.
- Disproportionality.** A disparity or inequality. In this Manual, the term refers to a statistical range of data where students of a specific race or ethnicity are identified in either greater or fewer numbers than expected when compared to the representation of that race or ethnicity within the general school population. The areas addressed in the IDEA are: (1) identification as a student with a disability; (2) identification of a student with a specific category of disability; and (3) placement in a particular educational setting and (4) the incidence, duration of any type of disciplinary actions, including suspensions and expulsions.
- District.** A local educational agency (LEA), inclusive of the following terms: a local district, a state authorized charter school, a state operated program, and a traditional school. See also “LEA.”
- Dropout.** A student who has voluntarily left an education system before completion of requirements and is not known to be enrolled in any other educational program.
- Dual enrollment.** A child of school-age who is enrolled in a nonpublic school (including a homeschool) or a public charter school and enrolled in a public school to participate in public school programs and activities, Idaho Statue 33-203. See also “nonpublic school” and “nonpublic student.”
- Due process hearing.** An administrative hearing conducted by an SDE-appointed hearing officer to resolve disputes on any matter related to identification, evaluation, educational placement, or the provision of a free appropriate public education under the IDEA.

STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017

**Educational performance.** A student’s educational performance in achievement, developmental and or functional skills.

**Education record.** A student’s record containing personally identifiable information maintained by an educational agency or institution, or by a party acting for the agency or institution, which may include, but is not limited to print, handwriting, computer media, video or audio tape, film, microfilm, and microfiche, but is not within the exceptions set out in the Family Educational Rights and Privacy Act (FERPA). The documents in the education record used to determine current eligibility and monitor current progress are considered part of the education record and are maintained. Items in the educational record that are no longer used, or have been summarized, may be removed from the educational record after written parental notification.

**Educational services agency, other public institution or agencies.** (1) An educational service agency, as defined in 34 CFR §300.12; and (2) Any other public institution or agency having administrative control and direction of a public elementary school or secondary school, including a public nonprofit charter school that is established as an LEA under state law.

**Elementary school.** The term “elementary school” means a nonprofit institutional day or residential school, including a public elementary charter school, that provides elementary education, as determined under state law, 34 CFR §300.13. An elementary school includes a grade configuration of grades one (1) through eight (8) inclusive, or any combination thereof, Section 33-116, Idaho Code.

**Eligibility/evaluation team.** A group of people, including the parent/adult student, charged with the responsibility to make decisions regarding evaluation, assessments, and eligibility. This team includes the same membership as the IEP team (although not necessarily the same individuals) and other qualified professionals as appropriate.

**Emotional disturbance.** An IDEA disability category in which a student has a condition exhibiting one or more of five behavioral or emotional characteristics over a long period of time, and to a marked degree, that adversely affects educational performance. The term *does not* include students who are socially maladjusted unless it is determined they have an emotional disturbance. The term emotional disturbance *does* include students who are diagnosed with schizophrenia.

**Essential Components of Reading Instruction.** The term means explicit and systematic instruction in (1) phonemic awareness, (2) phonics, (3) vocabulary development, (4) reading fluency, including oral reading skills, and (5) reading comprehension strategies.

**Evaluation.** A term that means using all required procedures to determine whether a child has a disability and the nature and extent of the special education and related services that the child needs.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

**Expedited due process hearing.** An administrative hearing conducted by an SDE-appointed hearing officer to resolve disputes concerning discipline for which shortened timelines are in effect in accordance with the IDEA.

**Expulsion.** Removal of a student from school for an extended period of time. For general education students, services usually cease during an expulsion.

**Extended school year (ESY).** A program to provide special education and related services to an eligible student with a disability beyond the conventional number of instructional days in a school year and at no cost to the parents. An ESY program must be based on an IEP team decision and meet Idaho standards.

**Extracurricular activities.** Programs sponsored by a district that are not part of the required curriculum but are offered to further the interests and abilities of students.

**FAPE.** (See “Free appropriate public education.”)

**FERPA.** (See “Family Educational Rights and Privacy Act.”)

**Facilitation.** A voluntary process during which a neutral and impartial individual, contracted by the SDE, is appointed to conduct an IEP team or other special education related meeting.

**Family Educational Rights and Privacy Act (FERPA).** A federal law protecting the privacy of students and parents by mandating that personally identifiable information about a student contained in education records must be kept confidential unless otherwise provided by law. FERPA also contains provisions for access to records by parents, students, staff, and others.

**Fluency disorder.** Stoppages in the flow of speech that are abnormally frequent and/or abnormally long. These interludes take the form of repetitions of sounds, syllables, or single syllable words; prolongations of sounds; or blockages of airflow and/or voicing in speech.

**Free Appropriate Public Education (FAPE).** A basic IDEA requirement which states that special education and related services are provided at public expense (free); in conformity with an appropriately developed IEP (appropriate); under public supervision and direction (public); and include preschool, elementary, and secondary education that meets the education standards, regulations, and administrative policies and procedures issued by the State Department of Education (education).

**Functional achievement and performance.** Gains made by a student which include programming in community living, reading, communication, self-care, social skills, domestic maintenance, recreation, employment or vocational skills. Also called independent living skills.

STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017

**Functional behavioral assessment (FBA).** A systematic process for defining problem behavior and gathering medical, environmental, social, and instructional information that can be used to hypothesize about the function of student behavior.

**General education curriculum.** The curriculum that is designed for all students, usually consisting of a common core of subjects and curriculum areas adopted by a district that are aligned to the Idaho Achievement Standards or district standards. The general education curriculum is defined by either the Idaho Achievement Standards or the district content standards if they are as rigorous.

**General education interventions.** Educational interventions designed to address the students using the core and supplemental interventions. Such interventions may include whole-school approaches, scientifically based programs, and positive behavior supports, including accommodations and instructional interventions conducted in the general education environment. These interventions may also include professional development for teachers and other staff to enable such personnel to deliver scientifically based literacy instruction and/or instruction on the use of adaptive and instructional software.

**Goal.** A measurable statement of desired progress. In an IEP, annual goals must include academic and functional goals designed to meet a child's needs that result from his or her disability, enable the child to be involved in and make progress in the general curriculum, and meet the child's other educational needs that result from the child's disability.

**Graduation.** The point in time when a student meets the district and State requirements for receipt of a regular high school diploma.

**Guardianship.** A judicial determination under which a competent adult has the legal right and duty to deal with problems, make decisions, and give consent for an adult with a disability (at least eighteen (18) years of age) who cannot act on his or her own behalf. The court will specify the nature and scope of the guardian's authority.

**Health services.** See "School health services."

~~**Hearing impairment.** An IDEA disability category in which a student has a permanent or fluctuating hearing loss that adversely affects the student's educational performance but is not included under the category of deafness. Also referred to as hard of hearing.~~

**High school.** Idaho Statute 33-119 defines secondary school as grades seven (7) through twelve (12) inclusive of any combination thereof. See "secondary school."

**Homebound student.** A student whose IEP team determines the child's home is the least restrictive environment.

**Homeless children and youth.** Children and youth who lack a fixed, regular, and adequate nighttime residence as defined in the McKinney-Vento Homeless Assistance Act.

STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017

**Homeschool.** An education program delivered by parents who have decided to provide instruction in the home and not in a public or private school. A homeschool is a nonpublic school, but is not considered a private school. A virtual public school is not a homeschool.

**Homeschooled students.** A homeschooled student is one whose parents have decided to provide an educational program in the home with instruction provided by the parents. A homeschool student is considered a nonpublic school student, but is not considered a private school student. A student who is enrolled in a virtual public school is not considered a homeschooled student for the duration that they attend that virtual public school.

**Honig Injunction.** A court order to remove a special education student from school or current educational placement due to factors of dangerousness. Districts are required to continue with the provision of FAPE.

**Idaho core standards.** Educational standards in math and English language arts detailing what K-12 students should know at the end of each grade and establishing consistent standards across the states, as well as ensuring that students graduating from high school are prepared to enter credit-bearing courses at two- or four-year college programs or enter the workforce.

**Illegal use of drugs.** The unlawful use, possession or distribution of substances identified under the Controlled Substances Act, but does not include the use of a drug taken under supervision by a licensed health care professional.

**Independent educational evaluation (IEE).** One or more assessment(s) conducted by a qualified examiner(s) who is not employed by or contracted by the public agency or district responsible for the education of the student in question.

**Individualized education program (IEP).** A written document (developed collaboratively by an IEP team made up of parents and school personnel) which outlines the special education program for a student with a disability. This document is developed, reviewed and revised at an IEP meeting at least annually.

**Individualized education program (IEP) team.** A team established by the IDEA and comprised but not limited to the student's general education teacher, a special education teacher, a district representative, parents, the student when appropriate, and other knowledgeable persons. The team is responsible for developing an IEP, determining placement, and reviewing and revising the student's IEP and placement at least annually.

**Individualized family service plan (IFSP).** A written individualized plan for an infant or toddler (birth to three (3) years of age) with a disability that is developed by a multidisciplinary team, including the parents, under Part C of the IDEA.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

**Individuals with Disabilities Education Act (IDEA).** A federal law ensuring services to children with disabilities. The IDEA governs how states and public agencies provide early intervention, special education and related services to individuals with disabilities. Infants and toddlers with disabilities (birth to two) and their families receive services under IDEA Part C. Children and youth (ages three (3) to twenty-one (21) receive special education and related services under IDEA Part B.

**Initial provision of service.** The first time that a child with a disability is provided special education and related services. This is also referred to as the “initial placement” and means the first time a parent is offered special education and related services for their child after an initial evaluation and eligibility determination.

**In-lieu of transportation.** Alternate method of transporting students to and from school.

**Instructional intervention.** An action or strategy based on an individual student’s problem that is designed to remedy, improve, or eliminate the identified problem.

**Intellectual disability.** An IDEA disability category in which significant sub-average general intellectual functioning exists concurrently with deficits in adaptive behavior. These deficits are manifested during the student’s developmental period and adversely affect the student’s educational performance. The terms “mental retardation” and “cognitive impairment” were previously used to refer to this condition.

**Interagency agreement.** A written document that defines the coordination between the state and/or public/private agencies and/or districts with respect to the responsibilities of each party for providing and funding special education programs and special education and related services.

**Interim alternative educational setting (IAES).** The educational setting in which a district may place a student with a disability, for not more than forty-five (45) school days, if the student while at school, on school premises or at a school function carries a weapon or possesses a weapon; knowingly possesses, uses, sells or solicits the sale of illegal drugs or controlled substances; or has inflicted serious bodily injury upon another person. An IAES may also be ordered by a due process hearing officer based upon evidence that maintaining the current placement is substantially likely to result in injury to the student or others.

**Interim IEP.** A short-term IEP with all the components of a standard IEP developed by the IEP team. It may be used for students transferring from other districts pending the development of the standard IEP or other purposes as needed.

**Interpreting services.** The process of providing accessible communication between and among persons who are deaf, hard of hearing, or deaf-blind, and those who are hearing. The process includes, but is not limited to, communication between American Sign Language

STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017

or other form of manual communication and English. The process may also involve various other modalities that involve visual, gestural and tactile methods including oral transliteration services, cued language transliteration services, sign language transliteration and interpreting services, and transcription services, such as communication access real-time translation (CART), C-Print, and TypeWell.

**Intervention plan (I-Plan).** An individual intervention plan designed by a general education team to improve a student’s academic performance or behavior through general education interventions. This plan must be documented, and include the development, implementation and monitoring of the plan.

**Itinerant specialist.** A teacher who normally travels and provides services to students in different schools or in the home or consults with teachers and administrators.

**Joint custody.** A court order awarding custody of a minor child to both parents and providing that physical and/or legal custody shall be shared by the parents.

**Joint legal custody.** A court order providing that the parents of a child are required to share the decision-making rights, responsibilities, and authority relating to the health, education, and general welfare of the child.

**Joint physical custody.** A court order awarding each parent significant periods of time in which a child resides with or is under the care and supervision of each parent. The actual amount of time is determined by the court.

**Language impairment.** An IDEA disability category in which a delay or disorder exists in the development of comprehension and/or the uses of spoken or written language and/or other symbol systems and which adversely affects the student’s educational performance. A language impairment may involve any one or a combination of the following: the form of language (morphological and syntactic systems); the content of language (semantic systems); and/or the function of language in communication (pragmatic systems).

**Learning disability.** See “specific learning disability.”

**Least restrictive environment (LRE).** The IDEA requirement that students with disabilities, including those in public or private institutions or other care facilities, be educated with students who are nondisabled to the maximum extent appropriate.

**Limited English proficient (LEP).** An individual aged three (3) to twenty-one (21), who is enrolled or preparing to enroll in elementary or secondary school, he or she was not born in the United States or his or her native language is a language other than English; he or she is a Native American or Alaska Native, or a native resident of the outlying areas; he or she comes from an environment where a language other than English has had a significant impact on the individual’s level of English language proficiency; or the individual is migratory, whose native language is a language other than English, and who

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

comes from an environment where a language other than English is dominant. The LEP individual's difficulties in speaking, reading, writing, or understanding the English language may be sufficient to deny the him or her the ability to meet the State's proficient level of achievement on State assessments; the ability to successfully achieve in classrooms where the language of instruction is English; or the opportunity to participate fully in society.

**Listening comprehension.** For the purpose of specific learning disability eligibility, refers to the understanding of the implications and explicit meanings of words and sentences of spoken language. This includes following directions, comprehending questions, and listening and comprehending in order to learn (e.g., auditory attention, auditory memory, and auditory perception). Listening comprehension also includes the ability to make connections to previous learning.

**Local district.** See "district" and "local educational agency (LEA)."

**Local educational agency (LEA).** A public board of education or other public authority legally constituted within a State for either administrative control or direction of, or to perform a service function for, public elementary or secondary schools in a city, county, township, school district, or other political subdivision of a State, or for a combination of school districts or counties as are recognized in a State as an administrative agency for its public elementary schools or secondary schools. See "district."

**Manifestation determination.** A determination by the parent and relevant members of the IEP team of whether the conduct in question was caused by or had a direct and substantial relationship to the student's disability or if the conduct in question was the direct result of the LEA's failure to implement the IEP.

**Mathematics calculation.** For the purpose of specific learning disability eligibility, this refers to the knowledge and retrieval of mathematical facts and the application of procedural knowledge in computation.

**Mathematics problem solving.** For the purpose of specific learning disability eligibility, refers to the ability to apply mathematical concepts and understandings to real-world situations, often through word problems. It is the functional combination of computation knowledge and application knowledge, and involves the use of mathematical computation skills and fluency, language, reasoning, reading, and visual-spatial skills in solving problems. Essentially, it is applying mathematical knowledge at the conceptual level.

**McKinney-Vento Homeless Assistance Act.** This law is designed to address the problems that homeless children and youth have faced in enrolling, attending, and succeeding in school. Under this law, state educational agencies (SEAs) must ensure that each homeless child and youth has equal access to the same free, appropriate public education, including a public preschool education, as other children and youth.

STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017

**Mediation.** A voluntary, confidential, and structured process during which an SDE-contracted individual is appointed to serve as an impartial and neutral third party to help parents and district or agency personnel resolve an IDEA-related conflict. Mediation usually results in a written, legally-binding agreement that is mutually acceptable to both parties and enforceable in court.

**Medicaid services (school-based).** Those services, assessment and plan development for students receiving Medicaid which school districts may bill for reimbursement with the consent of the parent.

**Medical services.** Medical services mean services provided by a licensed physician to determine a child's medically related disability that results in the child's need for special education and related services.

**Middle school.** A middle school is a school that does not meet the definition of an elementary school and contains grade eight (8) but does not contain grade twelve (12).

**Migrant student.** A student who has not graduated from high school or completed a high school equivalency certificate and resides within a family that is composed of migrant fisher or agricultural workers. The student has moved within the preceding thirty-six (36) months in order for the family to obtain or seek this type of temporary or seasonal employment that is a principal means of livelihood.

~~**Modification.** Changes in course content, teaching strategies, standards, test presentation, location, timing, scheduling, expectations, student responses, environmental structuring, and/or other attributes which provide access for a student with a disability to participate in a course/standard/test, which fundamentally alters or lowers the standard or expectations of the course/standard/test.~~

**Monitoring.** An activity conducted by the State Department of Education to review a school district's compliance with federal laws, regulations, and state rules.

**Multiple disabilities.** An IDEA disability category in which two or more impairments co-exist (excluding deaf-blindness), whose combination causes such severe educational needs that the student cannot be accommodated in special education services designed solely for one of the impairments.

**Multi-tiered system of support (MTSS).** A systemic educational practice of matching educational instruction and interventions to the needs of students. MTSS is a data-driven model involving frequent monitoring of student progress to determine if interventions are needed to improve individual student outcomes using evidenced-based practices.

**Native language.** The language or mode of communication normally used by an individual or, in the case of a student, the language normally used by the student's parents. In all direct

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

contact with a student, the native language would be the language or mode of communication normally used by the student in the home or learning environment.

**New teacher.** A teacher who has less than one (1) year of teaching experience.

**Nonpublic school.** An educational institution or program providing instruction outside a public school, including but not limited to a private school or homeschool.

**Nonpublic student.** Any student who receives educational instruction outside of a public school, including but not limited to a private school or homeschool student.

**Nonprofit.** The term ‘nonprofit,’ as applied to a school, agency, organization, or institution, means a school, agency, organization, or institution owned and operated by one (1) or more nonprofit corporations or associations no part of the net earnings of which inures, or may lawfully inure, to the benefit of any private shareholder or individual.

**Nursing services.** See “School health services.”

**Objectives.** Measurable, intermediate steps that describe the progress the student is expected to make toward an annual goal in a specified amount of time; similar to a benchmark.

**Occupational therapist.** A professional licensed through the Bureau of Occupational Licenses who, in a school setting, is responsible for assessing fine motor skills, including student’s use of hands and fingers and developing and implementing plans for improving related motor skills. The occupational therapist focuses on daily living skills such as eating, dressing, schoolwork, play, and leisure.

**Office of special education programs (OSEP).** The branch of the Office of Special Education and Rehabilitative Services (OSERS) within the U.S. Department of Education which is responsible for administering programs relating to the free appropriate public education to all eligible beneficiaries under the IDEA.

**Oral expression.** For the purpose of specific learning disability eligibility, the ability to convey wants, needs, thoughts, and ideas in a meaningful way using appropriate syntactic, pragmatic, semantic, and phonological language structures. It relates to a student’s ability to express ideas, explain thinking, retell stories, categorize, and compare and contrast concepts or ideas, make references, and problem solve verbally.

**Orientation and mobility (O&M) services.** Services provided by qualified personnel to blind and visually impaired students by qualified personnel to enable these students to attain systematic orientation to and safe movement within the home, school, and community, including teaching (1) spatial and environmental concepts and use of information received by the senses to establish, maintain, or regain orientation and line of travel; (2) use of the long white cane, or a service animal, as appropriate to supplement visual travel skills or as a tool for safely negotiating the environment for students with no available

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

travel vision; (3) understanding and use of remaining vision and distance low vision aids; and (4) other concepts, techniques, and tools.

**Orthopedic impairment.** An IDEA disability category that includes severe orthopedic impairments that adversely affects a student's educational performance and are caused by congenital anomaly (e.g., clubfoot, absence of an appendage, etc.); disease (e.g., poliomyelitis, bone tuberculosis, etc.); or from other causes (e.g., cerebral palsy, amputations, and fractures or burns that cause contracture).

**Other health impairment (OHI).** An IDEA disability category in which a student exhibits limited strength, vitality or alertness, including heightened alertness to environmental stimuli that results in limited alertness with the respect to the educational environment that is due to chronic or acute health problems (such as asthma, ADD or ADHD, cancer, diabetes, epilepsy, Fetal Alcohol Syndrome, a heart condition, hemophilia, lead poisoning, leukemia, nephritis, rheumatic fever, sickle cell anemia, Tourette syndrome and stroke) to such a degree that it adversely affects the student's educational performance.

**Paraprofessional.** A noncertified, non-licensed individual who is employed by a district and who is appropriately qualified, trained and supervised in accordance with state standards to assist in the provision of special education and related services.

**Parent.** As defined by IDEA, a parent is: (1) a biological or adoptive parent of a child; (2) a foster parent who has lived with the child for six (6) or more months; (3) a guardian generally authorized to act as the child's parent, or authorized to make educational decisions for the child (but not the State if the child is a ward of the State); (4) An individual acting in the place of a biological or adoptive parent (including a grandparent, stepparent, or other relative) with whom the child lives, or an individual who is legally responsible for the child's welfare; or (5) A surrogate parent who has been appointed by the school district. If the child is a ward of the state, the judge overseeing the child's case may appoint the surrogate. The surrogate may not be an employee of the state or local education agency or any other agency that is involved in the education or care of the child, has no personal or professional interest which conflicts with the interest of the child, has knowledge and skills that ensure adequate representation of the child.

**Part B.** Part of the IDEA that relates to the assistance to states for the education of students with disabilities who are ages three (3) through the semester in which a student turns twenty-one (21). Part B is administered by the State Department of Education and carried out by school districts and other public agencies.

**Part C.** Part of the IDEA that relates to the assistance to states for the education of children with disabilities and the early intervention programs for infants and toddlers, ages birth through two (2), with disabilities. In Idaho, Part C is administered by the Department of Health and Welfare.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

**Peer-reviewed research.** A higher level of non-biased research, which has been accepted by a peer-reviewed journal or approved by a panel of independent experts through a comparably rigorous, objective and scientific review.

**Personally identifiable information.** Includes but not limited to, student's name, name of parent or other family member, address of student or family, social security number, student number, list of personal characteristics or other information that would make it possible to identify the student with reasonable certainty.

**Phonology.** The process used in our language that has common elements (sound patterns) which affect different sounds.

**Phonology disorders.** Phonology disorders are errors involving phonemes, sound patterns and the rules governing their combinations.

**Physical therapist.** A professional licensed through the Bureau of Occupational Licenses who, in the school setting, assesses students' needs and provides interventions related to gross motor skills. In working with students with disabilities, the physical therapist provides treatment to increase muscle strength, mobility, endurance, physical movement and range of motion; improve posture, gait and body awareness; and monitor function, fit and proper use of mobility aids and devices.

**Plan for improving results (PIR).** A plan developed collaboratively between the SDE and a district to address needs identified as a result of the district's self-evaluation and/or an SDE monitoring visit.

**Positive behavioral intervention and supports (PBIS).** Positive reinforcement, rewards or consequences provided to a child for specific instances of behavior that impedes learning or the learning of others (or refraining from behavior) as appropriate for the purpose of allowing the student to meet his or her behavioral goals/benchmarks.

**Power of attorney.** The designation, in writing, by a competent person of another to act in place of or on behalf of another person.

**Present level of performance (PLOP) or Present levels of academic achievement and functional performance (PLAAPF).** Used interchangeably, this is a statement of the student's current level of achievement or development in an area of need and how the student's disability affects his or her involvement and progress in the general education curriculum offered to students without disabilities. For preschool students, as appropriate, how the disability affects the child's participation in appropriate activities.

**Private school.** A nonpublic school that is not funded by or under federal or state control or supervision. A homeschool is not a private school.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

**Private school student.** Any student who receives educational instruction in a school not funded by or under federal or state control or supervision is considered a nonpublic private school student. A homeschool student is not a private school student.

**Problem-solving team.** A general education team established at the local level, whose name may vary, with the purpose to problem solve regarding the educational needs of any student. Procedures, meeting schedules, and team membership are established locally. The team is likely to include general educators and administrators and could include counselors, specialists, and special education personnel. Parent participation is valuable, but not required.

**Procedural safeguards.** The requirements of Part B of the IDEA that are designed to allow a parent/adult student to participate meaningfully in decisions concerning an appropriate educational program for a student with a disability and, if necessary, dispute such decisions. Also referred to as special education rights.

**Professional development.** High-quality comprehensive programs that are essential to ensure that persons responsible for the education or transition of students with disabilities possess the skills necessary to address the educational and related needs of these students. These should be scientifically-based and reflect successful practices including strategies for recruiting, hiring, preparing and retaining personnel.

**Public expense.** When a district or public agency either pays for the full cost of an evaluation or special education services or ensures that it is otherwise provided at no cost to the parent; for example, through joint agreements with other state agencies.

**Reading components.** The term “reading” means a complex system of deriving meaning from print that requires all of the following skills, which are the essential components of reading instruction: (1) Phonemic awareness: The skills and knowledge to understand how phonemes, or speech sounds, are connected to print; (2) Phonics: The ability to decode unfamiliar words; (3) Reading fluency: The ability to read fluently; (4) Vocabulary development: Sufficient background information and vocabulary to foster reading comprehension; and (5) Reading comprehension: The development of appropriate active strategies to construct meaning from print.

**Reading comprehension.** For the purpose of specific learning disability eligibility, refers to the ability to understand and make meaning of written text and includes a multifaceted set of skills. Reading comprehension is influenced by oral language development including new vocabulary acquisition, listening comprehension, working memory, application of comprehension-monitoring strategies, and understanding of text structure including titles, paragraphing, illustrations, and other details. Reading comprehension is significantly affected by basic reading skills.

**Reading fluency.** For the purpose of specific learning disability eligibility, refer to the ability to read words and text accurately, using age-appropriate chunking strategies and a repertoire

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

of sight words, and with appropriate rate, phrasing, and expression (prosody). Reading fluency facilitates reading comprehension.

**Reasonable measures.** A combination of recorded written and/or oral documentation to meet notification requirements of the district to parents/adult students.

**Reasonable time.** A period of ten (10) calendar days unless there are exceptional circumstances that warrant a shortened period of time such as an emergency or disciplinary meeting.

**Reevaluation.** A periodic evaluation conducted at least every three years, or more frequently if conditions warrant, or if the student's parent or teacher requests an evaluation of a student already identified as eligible for services under the IDEA. Reevaluations may occur not more than once a year, unless the parent and the district agree otherwise or may be waived by the parent and LEA.

**Related services.** Refers to transportation and such developmental, corrective, and other supportive services required to assist a student with a disability to benefit from special education and includes the following: speech therapy, language therapy, audiology services, psychological services, physical therapy, occupational therapy, recreation, therapeutic recreation, early identification and assessment of disabilities in children, counseling services, rehabilitation counseling, orientation and mobility services, interpreting services, medical services for diagnostic or evaluation purposes, school health/nursing services (excluding surgically implanted medical devices), social work services in schools, and parent counseling and training.

**Response to intervention (RTI).** A formal process for evaluating student response to scientifically research-based interventions, consisting of the core components of: (1) problem identification, (2) problem analysis, (3) applying research-based interventions, and (4) progress monitoring/decisions rules. As used in the IDEA, RTI is only mentioned as an alternative to the severe discrepancy criteria in determining whether a student has a Specific Learning Disability.

**Resolution session.** A meeting involving the parents, relevant members of the IEP team, and a representative of the district who has decision-making authority, required prior to a due process hearing if the parent has requested the due process hearing.

**School-age.** Includes all persons between the ages of five (5) (i.e., turns five (5) on or before September 1) and twenty-one (21) years who reside in Idaho. For students with disabilities who qualify for special education and related services under the IDEA, school-age begins at age three (3) and continues through the semester of school in which the student attains the age of twenty-one (21).

**School day.** Any day, including a partial day, when students are in attendance at school for instructional purposes.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

**School health services.** School health services and school nurse services means health services that are designed to enable a child with a disability to receive FAPE as described in the child's IEP. School nurse services are services provided by a qualified school nurse. School health services are services that may be provided by either a qualified school nurse or other qualified person.

**School psychologist.** A professional who holds an Idaho Pupil Personnel Services Certificate with an endorsement in Psychology and is charged with the responsibility to conduct assessments and determine a student's cognitive, academic, social, emotional, and/or behavioral functioning. This professional also provides direct services to students, consults with district staff, and may be a member of the evaluation and/or IEP team.

**Scientifically-based research (SBR).** Scientifically based research (as defined in the ESEA) means research that involves the application of rigorous, systematic, and objective procedures to obtain reliable and valid knowledge relevant to education activities and programs; and includes research that (1) employs systematic, empirical methods that draw on observation or experiment; (2) involves rigorous data analyses that are adequate to test the stated hypotheses and justify the general conclusions drawn; (3) relies on measurements or observational methods that provide reliable and valid data across evaluators and observers, across multiple measurements and observations, and across studies by the same or different investigators; (4) is evaluated using experimental or quasi-experimental designs in which individuals, entities, programs, or activities are assigned to different conditions and with appropriate controls to evaluate the effects of the condition of interest, with a preference for random-assignment experiments, or other designs to the extent that those designs contain within-condition or across-condition controls; (5) ensures that experimental studies are presented in sufficient detail and clarity to allow for replication or, at a minimum, offer the opportunity to build systematically on their findings; and (6) has been accepted by a peer-reviewed journal or approved by a panel of independent experts through a comparably rigorous, objective, and scientific review.

**Screening.** An informal, although organized process, of identifying students who are not meeting or who may not be meeting Idaho Content Standards or Idaho Core Standards.

**Secondary school.** The term "secondary school" means a nonprofit institutional day or residential school, including a public secondary charter school, that provides secondary education, as determined under state law, except that it does not include any education beyond grade. The term secondary school is not defined in Idaho Code. See "high school."

**Section 504 of the Rehabilitation Act of 1973.** A federal law designed to protect the rights of individuals with disabilities in programs and activities that receive Federal financial assistance from the U.S. Department of Education (ED). Section 504 provides: "No otherwise qualified individual with a disability in the United States . . . shall, solely by reason of her or his disability, be excluded from the participation in, be denied the

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance . . ."

**Secular.** An adjective used to describe a private, non-religious educational entity.

**Serious bodily injury (SBI).** Bodily injury which involves (1) a substantial risk of death; (2) extreme physical pain; (3) protracted and obvious disfigurement; or (4) protracted loss or impairment of the function of bodily member, organ, or mental faculty.

**Services plan (SP).** Services plan means a written statement that describes the special education and related services the LEA will provide to a parentally-placed child with a disability enrolled in a private school who has been designated to receive services, including the location of the services and any transportation necessary.

**Setting.** The location where special education services occur.

**Social worker.** A professional who holds an Idaho Pupil Personnel Services Certificate with an endorsement in Social Work and helps students and teachers address social and emotional issues. This professional may be a member of the evaluation and/or IEP team.

**Socially maladjusted.** A child who has a persistent pattern of violating societal norms with truancy, substance abuse, a perpetual struggle with authority, is easily frustrated, impulsive, and manipulative.

**Special education.** Specially designed instruction or speech/language therapy at no cost to the parent to meet the unique needs of a student with a disability including instruction in the classroom, the home, hospitals, institutions, and other settings; instruction in physical education; speech therapy and language therapy; transition services; travel training; assistive technology services; and vocational education.

**Special educational placement.** Refers to the provision of special education services along the continuum of placements under the least restrictive environment requirements, rather than a specific place or location, such as a specific classroom or school. The balance of setting and services to meet an individual student's needs.

**Specially designed instruction.** Adapting the content, methodology, or delivery of instruction to address the unique needs of an eligible student that result from the student's disability and to ensure access to the general education curriculum so that the student can meet the education standards of that district that apply to all students.

**Specific learning disability (SLD).** A disorder in one or more of the basic psychological processes involved in understanding or in using language, spoken or written, that may manifest itself in the imperfect ability to listen, think, speak, read, write, spell, or to do mathematical calculations, including conditions such as perceptual disabilities, brain injury, minimal brain dysfunction, dyslexia, and developmental aphasia. Specific

STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017

Learning Disability does not include learning problems that are primarily the result of visual, hearing, or motor disabilities, of intellectual disability, of emotional disturbance, or of environmental, cultural, or economic disadvantage.

**Speech impairment.** A speech-language disorder, such as speech fluency, impaired articulation/phonology, a language impairment, or a voice impairment that adversely affects a student's educational performance.

**Speech-language pathologist.** A professional holding an Idaho Pupil Personnel Services Certificate who can assess and treat persons with speech, language, voice, and fluency disorders. This professional coordinates with and may be a member of the evaluation and IEP teams.

**Student (school-age).** For resident children with disabilities who qualify for special education and related services under the IDEA and subsequent amendments thereto, and applicable state and federal regulations, "school-age" shall begin at the attainment of age three (3) and shall continue through the semester of school in which the student attains the age of twenty-one (21) years.

**Stay put.** A requirement that a district or agency maintain a student with a disability in his or her present educational placement while a due process hearing or subsequent judicial proceeding is pending unless the parties agree otherwise.

**Substantial evidence.** A legal term that means "beyond a preponderance of the evidence" or "beyond more likely than not."

**Summary of performance (SOP).** A document given to secondary students when a student exits special education as a result of earning a diploma or aging out. This document describes the academic achievement and functional performance along with recommendations to assist the student in meeting post-secondary goals.

**Supplementary aids and services.** Supplementary aids and services means aids, services, and other supports that are provided in regular education classes, other education-related settings, and in extracurricular and nonacademic settings, to enable children with disabilities to be educated with nondisabled children to the maximum extent appropriate.

**Surrogate parent.** An individual assigned and trained by a district or an agency to assume the rights and responsibilities of a parent under the IDEA when no parent can be identified or located for a particular student or when the child is a ward of the state.

**Suspension.** A temporary stop, delay, interruption, or cessation of educational service due to a violation of the student conduct code. This may include in-school suspension.

**Traditional public school.** "Traditional public school" means any school existing or to be built that is operated and controlled by a school district in this state as per Idaho Statute, Chapter 33-5202A(7).

STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017

**Transition age student.** A student whose upcoming IEP will be in effect when the student is sixteen (16) to twenty-one (21) years of age.

**Transition services.** A coordinated set of activities for a student with a disability designed within a results oriented process focused on improving the academic and functional achievement of the student to facilitate the student's movement from school to post-school activities. Services are based on individual student needs addressing instruction, related services, community experiences, employment, post-school adult living objectives, and, when appropriate, acquisition of daily living skills and functional vocational evaluation.

**Traumatic brain injury (TBI).** An IDEA disability category that refers to an injury to the brain caused by an external physical force and resulting in a total or partial functional disability or psychosocial impairment, or both, that adversely affects educational performance. The term applies to open or closed head injuries resulting in impairments in one or more areas such as cognition, language, memory, attention, reasoning, abstract thinking, judgment, problem solving, sensory perception and motor abilities, psychosocial behavior, physical functions, information processing, and speech. The term does not apply to congenital or degenerative brain injuries or to brain injuries induced by birth trauma.

**Travel training.** Instruction to students with significant cognitive disabilities and any other students with disabilities who require instruction to enable them to develop an awareness of the environment in which they live and to learn the skills necessary to move effectively and safely from place to place within the home, school, and community.

**Twice exceptional.** Twice exceptional students are identified as gifted and talented in one or more areas of exceptionality (specific academics, general intellectual ability, creativity, leadership, visual or performing arts) and also identified with a disability defined by State eligibility criteria (LD, ED, Autism, Orthopedic Impairments, or ADHD) that qualifies the student for an IEP or a 504 plan.

**Unilateral placement.** A decision by a parent, at his or her own discretion, to remove his or her child with a disability from a public school and enroll the student in a private facility because the parent believes that the district did not provide FAPE in a timely manner.

**Universal design.** A concept or philosophy for designing and delivering products and services that are usable by people with the widest possible range of functional capabilities, which include products and services that are directly usable (without requiring assistive technologies) and products and service that are made usable with assistive technologies.

**Visual impairment including blindness.** An IDEA disability category characterized by an impairment in vision that, even with correction, adversely affects a student's educational performance. The term includes partial sight, which refers to the ability to use vision as one channel of learning if educational materials are adapted, and blindness.

STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017

**Voice disorder.** (See “speech impairment”) Refers to the absence or abnormal production of voice quality, pitch, intensity, or resonance. Voice disorders may be the result of a functional or an organic condition.

**Voluntary enrollment in a private placement.** Enrollment by a parent of a student with a disability in a private facility or homeschool for religious, philosophical, curricular, or other personal reasons.

**Ward of the state.** A child who, as determined by the State where the child resides, is a foster child (unless the foster parent meets the definition of a “parent” in Section 34 CFR §300.30), a ward of the State, or in the custody of a public child welfare agency.

**Weapon.** (See “dangerous weapon”)

**Written expression.** For the purpose of specific learning disability eligibility, the processes related to the transcription of ideas and thoughts into a written product, such as handwriting and spelling. It also involves generative processes such as the communication of ideas, thoughts, and feelings. Required skills include using oral language, thought, grammar, text fluency, sentence construction, and planning to produce a written product.

**Written notice.** A written statement provided by the district to a parent/adult student within a reasonable amount of time before proposing or refusing to initiate or change to the identification, evaluation, educational placement, or the provision of FAPE.

**LEGAL CITATIONS**  
INTRODUCTION

The legal citations and topical reference for this Manual follow the chapter outlines and present references to federal and state statutes, regulations and rules for the enforcement of IDEA. The citations listed are the primary references for each chapter and section, not an all-inclusive reference list.

The entire IDEA and regulations are posted on the U.S. Department of Education website under the title of “Building the Legacy: IDEA 2004” at <http://idea.ed.gov/explore/home>. This site provides a topical search.

Idaho statutes and rules can be found at <http://legislature.idaho.gov/statutesrules.htm>.

Some of the policies/procedures stated in this Manual are based upon case law and letters of clarification from the U.S. Office of Special Education Programs (OSEP).

STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

**Chapter 1  
Overview**

Three (3) federal laws have been passed to ensure educational opportunities for individuals with disabilities:

- the Individuals with Disabilities Education Act (IDEA)
- Section 504 of the Rehabilitation Act of 1973 (Section 504)
- the Americans with Disabilities Act of 1990 (ADA)

The last reauthorization of the IDEA was in 2004 and aligned the law with the Elementary and Secondary Education Act of 2001. In 2015, the Every Student Succeeds Act (ESSA) was passed. Revisions to the IDEA regulations were issued in 2007, 2008, 2013, and 2014 with additional regulatory changes to the IDEA currently pending. The IDEA preserves the basic structure and civil rights of previous reauthorizations and emphasizes both *access* to education and *improved results* for students with disabilities based on data and public accountability.

This Manual provides information regarding district responsibilities under the IDEA and relevant Idaho legal requirements.

**Section 1. Child Find**

The district is responsible for establishing and implementing an ongoing Child Find system. Child Find activities are conducted to create public awareness of special education programs; to advise the public of the rights of students; and, to alert community residents of the need for identifying and serving students with disabilities from the age of three (3) through the semester in which they turn twenty-one (21).

The district is also responsible for coordinating with the Department of Health and Welfare regarding the Child Find system for children ages birth through two (2) years. The Child Find system includes children with disabilities who are homeless, as defined by the McKinney-Vento Homeless Act (see Glossary), wards of the state, or attending private schools, regardless of the severity of the disability.

See Chapter 3 for more information on Child Find.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

**Section 2. Procedural Safeguards**

A parent/adult student has specific procedural safeguards assured by the IDEA and state law. The district provides a document titled *Procedural Safeguards Notice* to parents/adult students that contain a full explanation of special education rights.

See Chapter 11 for more information on procedural safeguards.

**Section 3. Student Eligibility under the IDEA**

To be eligible for services under the IDEA, a student must have a disability that:

1. meets the Idaho state disability criteria as established in this manual;
2. adversely affects educational performance; and
3. results in the need for specially designed instruction and related services.

The process used to make this determination is called “eligibility evaluation.” During an eligibility evaluation, an evaluation team (which includes educators and the parent/adult student) reviews information from the evaluation completed (multiple sources including, but not limited to, general education interventions, formal and informal assessments, and progress in the general curriculum) in making the eligibility determination.

See Chapter 4 for more information on eligibility and evaluation.

**Section 4. Free Appropriate Public Education (FAPE)**

The district (LEA) is required to ensure that a free appropriate public education (FAPE) is available to students who reside in the district and are eligible for special education. FAPE is individually determined for each student that qualifies for special education. FAPE *must* include special education in the least restrictive environment (LRE) and *may* include related services, transition services, supplementary aids and services, and/or assistive technology devices and services. A definition of each of these terms can be found in the glossary.

See Chapter 2 for more information on FAPE.

**Section 5. District Programs and Services**

The district shall ensure that the same array of academic, nonacademic, and extracurricular activities and services is available to students with disabilities as is available to students without disabilities.

**A. Educational Programs and Services**

The district shall take steps to ensure that students with disabilities have the variety of educational programs and services that are available to all other students served by the district. These may include art, music, industrial arts, consumer and homemaking education, vocational education, and other programs in which students without disabilities participate.

**B. Physical Education**

Physical education services, specially designed if necessary, shall be made available to every student with a disability receiving FAPE, unless the public agency enrolls children without disabilities and does not provide physical education to children without disabilities in the same grades.

**C. Nonacademic and Extracurricular Services and Activities**

The district shall take steps, including the provision of supplementary aids and services determined appropriate and necessary by the student's Individualized Education Program (IEP) team, to provide nonacademic and extracurricular services and activities in a manner that affords students with disabilities an equal opportunity to participate in those services and activities. This includes counseling services, athletics, transportation, health services, recreational activities, special interest groups or clubs sponsored by the district, referrals to agencies that provide assistance to persons with disabilities, and employment of students, including both employment by the district and assistance in making outside employment available.

**Section 6. Individualized Education Program (IEP)**

The IEP is a document that outlines how a particular student with a disability will receive a free appropriate public education (FAPE) in the least restrictive environment (LRE). It is a working document that can be amended as the student's needs change. The IEP is created collaboratively by IEP team members, including parents, the student, if appropriate, the student's teachers and other district personnel.

See Chapter 5 for more information on IEP development.

### Section 7. Least Restrictive Environment (LRE)

The IDEA states that, to the maximum extent appropriate, students with disabilities are to be educated with students who are not disabled. The IEP team determines what constitutes LRE for the individual student. This includes considering that a continuum of alternative placements is available to meet the needs of children with disabilities and for special education and related services.

See Chapter 6 for more information on LRE.

### Section 8. Summary of Activities That May Lead to Special Education Services

This section describes the steps that may lead to special education services. The activities that are within each step are often sequential, but could occur simultaneously. The process might occur in a different sequence for emergency or interim placements. A flowchart of these steps is provided at the end of this chapter.

#### A. General Education Interventions (carried out by the problem-solving team)

A general education problem-solving team addresses student learning needs and ensures that referrals to consider special education are appropriate. The general education problem-solving process may include comprehensive early intervening services based on whole-school approaches such as: a three-tiered model using scientifically based reading (and other content area) programs, positive behavior supports, and a response-to-intervention system.

Accommodations and instructional and/or behavioral interventions shall be attempted during the problem-solving process. These accommodations and interventions shall be of sufficient scope and duration to determine the effects on the student's educational performance and shall be clearly documented.

If the student shows adequate progress with general education interventions and accommodations, a referral to consider a special education evaluation may be unnecessary. However, if general education interventions and accommodations need to be provided on an ongoing basis or if the student shows limited or no progress *and* the student's performance is significantly discrepant from peers, a referral to consider a special education evaluation may be warranted. Also, a parent of a student may initiate a referral for special education at any time and a district may not deny that referral simply because the student had not gone through the general education intervention process.

See Chapter 4 for more information on problem-solving activities and the three tiered model.

**B. Referral to Consider a Special Education Evaluation**

Following the problem-solving team’s review of the student’s response to general education interventions, if the team suspects that the student has a disability and may be in need of special education, the problem-solving team shall initiate a referral to consider a special education evaluation. The purpose of this referral is to bring a student to the attention of an evaluation team so that it can determine whether to conduct a special education evaluation.

A referral for a special education evaluation marks the point at which procedural safeguards are provided to the parent. The parent/adult student shall be involved in decisions once a written referral has been made to the evaluation team to consider a special education evaluation.

The evaluation team shall review existing data, which may include progress monitoring data from the student’s IEP, assessments and information provided by the parent/adult student, and document the review process, to determine the need for further assessment. The evaluation team will procure the necessary written consents for additional assessments.

See Chapter 3 for more information on the referral process to consider a special education evaluation and who can make a referral.

**C. Written Notice and Written Consent** (completed by an evaluation team)

Before administering assessments as part of the special education evaluation, written notice shall be provided to the parent/adult student along with the procedural safeguards and written consent shall be requested from the parent/adult student. The district may use a single form that meets the requirements of written notice and consent for assessment. In addition, if the evaluation team needs information for an evaluation from a non-educational agency or an individual, such as a doctor, written consent for the release of information shall be obtained from the parent/adult student.

See Chapter 4 and Chapter 11 for more information.

**D. Evaluation and Eligibility Determination** (completed by evaluation team)

After receiving consent, the evaluation team shall schedule assessments and ensure they are conducted. The evaluation must be sufficiently comprehensive to identify all of the child’s special education and related-services needs. Next, the evaluation team reviews the assessment data, the response to general education targeted interventions, and parent/adult student input and recommendations to determine whether the student is eligible for special education services. Then the evaluation team compiles an *Eligibility Report* using data collected from individual assessments and provides the parent/adult student with a copy of the report. The eligibility report shall address, to the extent required, the general education classroom, targeted interventions previously employed and the student’s response to those interventions.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

For children transferring from the Infant Toddler Program (ITP), eligibility shall be determined and an IEP developed or IFSP adopted by the child's third (3<sup>rd</sup>) birthday. See Chapter 5 for guidance on expectations. If a child turns three (3) during the summer, and the child does not require Extended School Year (ESY) services, special education and related services may begin in the new school year.

For children ages three (3) through twenty-one (21), the time between receiving consent for initial assessment and determining eligibility cannot exceed sixty (60) calendar days, excluding periods when regular school is not in session for five (5) or more consecutive school days (with the exception of ITP referrals which must be completed by the child's third (3<sup>rd</sup>) birthday). The parent and district may agree, in writing, to extend the sixty (60) day period. See Chapter 4 for guidance on timeline exceptions.

If the student is not eligible, the district shall provide written notice to the parent/adult student that the evaluation data does not indicate eligibility under the IDEA even though the parent is a member of the team that determines eligibility. The district shall maintain documentation in permanent records.

If the parent/adult student disagrees with the district's evaluation and/or the eligibility determination, he or she has the right to request SDE mediation, file a due process hearing challenging the decision, or seek an independent educational evaluation (IEE). See Chapter 11 for more information.

**E. IEP Development and Implementation** (completed by IEP team)

The following activities are included in the development and implementation of the IEP:

1. Conduct an IEP team meeting to develop and implement an IEP within thirty (30) calendar days of a determination that the student is eligible for special education and related services. For eligible students, the IEP can be developed at the same meeting at which eligibility is determined if all required IEP team members are present and agree to proceed.
2. After determining goals and services, determine the placement in the LRE in which the IEP can be implemented. For those goals that are aligned to the alternate achievement standards, benchmarks/objectives shall be written.
3. Obtain documentation indicating participation in the IEP team meeting.
4. Obtain consent from the parent/adult student for initial provision of special education services.
5. Provide copies of the IEP to the parent/adult student and other participants, as appropriate.

6. Provide written notice to the parent/adult student before implementing the IEP if the provision of FAPE or the educational placement is proposed to change or if the team refused to make a change based on the parent's request.
7. Make arrangements for IEP services by informing staff of their specific responsibilities under the IEP.
8. Implement the IEP as soon as possible, but no later than within thirty (30) days of eligibility. (See Chapter 4 for guidance on timeline exceptions.)
9. Provide the parent/adult student with periodic reports of the student's progress towards IEP goals (such as quarterly or other periodic reports, concurrent with the issuance of report cards).

See Chapter 5 for more information on IEP development.

**F. Review and Revision of IEP and Placement Decision** (completed by IEP team)

1. Send the parent/adult student a *Procedural Safeguards Notice* with an invitation to attend an IEP meeting (required at least once annually).
2. Convene an IEP team meeting under these circumstances:
  - a. when changes in the IEP are requested or if the student is not making progress. In addition, the IDEA allows changes to the IEP without an IEP team meeting between the annual review dates if the district and parent agree; and
  - b. at least annually to develop a new IEP.
3. Provide a copy of the revised IEP to the parent and the adult student when an IEP is amended or rewritten. In addition, written notice is required if the district is proposing to change or refusing to change the educational placement or the provision of FAPE.
4. Under Idaho regulations, the parent/adult student has the right to file a written objection to an IEP program change or placement change. If, within ten (10) calendar days of receiving written notice from the district, the parent/adult student files a written objection, the district shall not implement the change(s) to which the parent/adult student objects. See Chapter 11 for more information.

See Chapter 5 for more information on IEP reviews.

**G. Reevaluation** (completed by evaluation team)

Reevaluations are conducted by the evaluation team. A reevaluation shall be completed as follows: (a) at least every three years, (b) when requested by the student's teacher or the parent/adult student, and (c) whenever conditions warrant. Approximately one month before conducting the reevaluation, the district shall inform the parent/adult student that a reevaluation is due. The parent/adult student and district may agree in writing that a three-year reevaluation is not necessary. In addition, a reevaluation need not be conducted more than once per year unless the district and the parents agree.

The evaluation team shall include the following activities in the reevaluation process:

1. Invite the parent/adult student to participate in the review of existing data and to determine what additional data, if any, is needed as part of the reevaluation. Unless the parent/adult student requests that the evaluation team members meet as a group in a formal meeting, data can be gathered from individual team members at various times using a variety of methods.
2. Obtain written consent from the parent/adult student if additional assessments shall be conducted. After gaining consent, ensure the completion of assessments and eligibility reports. The IDEA does not require consent for a reevaluation if the district has made documented attempts to get consent and the parent has not responded.
3. If the evaluation team determines that additional assessments are not needed, provide written notice to the parent/adult student of this decision and of the parent's/adult student's right to request assessments.
4. Prepare an *Eligibility Report* that details the eligibility requirements for the student, even when no new assessments are conducted. The report shall address each required eligibility component.
5. Provide the parent/adult student with a copy of the *Eligibility Report*.
6. Determine whether revisions to the IEP are necessary and implement an IEP, if the student continues to be eligible. If the student is not eligible, follow procedures to discontinue services.

See Chapter 4 for more information on reevaluation.

**H. Discontinuation of Services**

Provide prior written notice to the parent/adult student informing them of the discontinuation of services when:

1. The evaluation team determines the student no longer meets eligibility requirements for special education services; or

STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017

2. The student meets the district and State requirements that apply to all students for receipt of a regular high school diploma; or
3. The student completes the semester in which he or she reaches the age of twenty-one (21) years.
4. Parent/adult student revokes consent for special education services.

When a student exits from special education as a result of graduating or aging out, the district shall provide the student with a summary of his or her academic achievement and functional performance, along with recommendations on how to assist the student in meeting postsecondary goals.

See Chapter 7 for more information on the discontinuation of services.

STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017

- Receive consent from the parent/adult student for assessments if planning to assess **OR** Provide the parent/adult student with written notice that no further assessments shall be conducted if the evaluation team determines that existing information is adequate. Inform parent/adult student of his or her right to request additional assessments.
- Schedule and conduct assessments.
- Review assessment information with parent/adult student. Determine eligibility and complete the *Eligibility Report*. (Meeting with the entire team is a parent/adult student option.)
- Provide the parent/adult student with a copy of the *Eligibility Report*.

**Go to steps in Box F or Box H.**

**H. Discontinuation of Services**

- Provide written notice to the parent/adult student before discontinuing special education services.

**Upon graduation provide a summary of performance to the parent/adult student.**

STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017

Idaho Special Education Manual Chapter 2: Free Appropriate Public Education

**Chapter 2**  
**Free Appropriate Public Education**

The district (local education agency) is required to ensure that a free appropriate public education (FAPE) is available to residents, homeless individuals and individuals from migrant families ages three (3) to twenty-one (21) in the district and who are eligible for special education. FAPE is individually determined for each student with a disability. FAPE *must* include special education in the least restrictive environment (LRE) and *may* include related services, transition services, supplementary aids and services, and/or assistive technology devices and services. A definition of each of these terms can be found in the glossary.

**Section 1. Definition of a Free Appropriate Public Education (FAPE)**

The definition of FAPE under the IDEA means special education and related services that:

1. are provided at public expense (free);
2. are provided in conformity with an appropriately developed individualized education program, or IEP (appropriate);
3. are provided under public supervision and direction (public); and
4. include an appropriate preschool, elementary, and secondary education that meets the education standards, regulations, and administrative policies and procedures issued by the State Department of Education (education).

**Section 2. Provision of FAPE**

**A. District Obligation**

The district is required to ensure that FAPE is available to students in the district who are eligible for special education. This includes students who reside in group, personal care, or foster homes, as well as institutions, if their legal guardian is a resident of Idaho, even though the guardian may reside in another Idaho school district. It also includes students who are migratory or homeless as defined by the McKinney-Vento Homeless Act (see Glossary). If a student from another state is placed in Idaho by an out-of-state agency, parent, or district, the placing district, parent, or agency is responsible for the educational costs. If a student is placed in a district by an Idaho agency, the student is entitled to FAPE and the responsible agency is determined upon Idaho Code regarding the specific situation.

The district is obligated to make FAPE available to each eligible student in the district as follows:

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

1. The district shall provide FAPE to an individual who is at least three (3) years old and who qualifies for special education services unless the parent/adult student has refused special education services. Students aged three (3) to five (5) must have their special education services identified on an IEP since Idaho does not have state-funded preschool programs.
2. The district shall offer FAPE to parentally placed private school students in accordance to statutory and regulatory language, which states that parentally placed private school students with disabilities do not have an individual right to some or all of the special education and related services that the student would receive if enrolled in a public school.
3. A free appropriate public education shall be available to any individual child with a disability who needs special education and related services, even though the child has not failed or been retained in a course, and is advancing from grade to grade.

Note: Participation in Comprehensive Early Intervening Services neither limits nor creates a right to FAPE.

**B. Limit to District Obligation**

1. A student with a disability who has been placed in a private school or facility by the parent does not have an individual right to receive all or part of the special education and related services that the child would receive if enrolled in a public school. However the district would have Child Find responsibilities. See Chapter 9 for more information.
2. Students who are homeschooled are considered nonpublic students for the purpose of dual enrollment, however a student being homeschooled is not considered a private school student. Students who are dually enrolled in a school district's general education program may be considered for a Section 504 plan if needed to provide supports and/or accommodations for those general education courses for which they are enrolled. A student who is enrolled in a virtual public school is not considered a homeschooled student for the duration that they attend that virtual public school.

Homeschool students who are dually enrolled are considered to be nonpublic school students. The district shall allow homeschool students who are eligible for special education and who are otherwise qualified to participate in school programs under the dual enrollment law to:

1. enroll in general education courses under the same criteria and conditions as students without disabilities; and
2. receive accommodations in the general education courses for which they are enrolled on a Section 504 plan, if needed.

Homeschool students may not dually enroll solely for special education and/or related services. The dual enrollment statute does not establish an entitlement to FAPE for a student with a disability. This means that there is no individual right to receive some or all special education services that the student would receive if enrolled in public school.

**C. When District Obligation to Provide FAPE Ends**

The District's obligation to provide FAPE to a student ends:

1. at the completion of the semester in which the student turns twenty-one (21) years old;
2. when the student meets the district requirements that apply to all students for receipt of a regular high school diploma; a regular high school diploma does not include an alternative degree that is not fully aligned with the Idaho Content Standards or Idaho Core Standards, such as a certificate or a general educational development credential (GED);
3. when the student no longer meets the eligibility criteria for special education services, as determined by the team after a reevaluation; or
4. when a parent/adult student has revoked consent for the continued provision of special education services.

**D. Temporary Suspension of FAPE**

The district is not required to provide FAPE to an eligible student during the suspension of ten (10) cumulative school days or less during a school year (unless the district provides services to students who are not disabled who are also suspended); however, FAPE must be provided following this ten (10) day exception.

**Section 3. FAPE Considerations**

**A. Case Law Interpretations of FAPE**

The courts have further defined the term FAPE as a result of lawsuits between parents and districts. In 1982, the United States Supreme Court ruled in the case of Board of Education of the Hendrick Hudson Central School District, et al. v. Rowley, et al. This landmark case set a standard for FAPE that is commonly referred to as the *Rowley Standard*. The *Rowley* decision defines FAPE as including these two components:

1. an IEP developed in adequate compliance with the IDEA procedures; and

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

2. an IEP reasonably calculated to enable the student to receive educational benefit.

The *Rowley* decision also states that, if a student is being educated in the general education classroom, the IEP should be reasonably calculated to enable the student to achieve passing marks and advance from grade to grade, although passing grades are not determinative that FAPE has been provided.

**B. Applicability to Charter and Alternative Schools**

Federal law requires the district to provide students with disabilities educational choices comparable to those choices offered to students without disabilities. These choices include the opportunity to attend a public charter school or alternative public school. Students enrolled in public charter and alternative schools are entitled to FAPE and retain all the rights and protections that are available under the IDEA.

**C. Applicability to Detained Youth**

Students with disabilities or suspected disabilities who are detained in city or county jails, juvenile detention centers, juvenile correctional facilities, or in Idaho prisons are entitled to FAPE.

1. Services to Youth Detained in City or County Jails

The district in which the facility is located has the responsibility for Child Find and the provision of FAPE to eligible youth.

2. Services to Youth Detained in Juvenile Detention Centers (JDC)

The district in which the facility is located has the responsibility for the provision of FAPE to eligible youth. Typically, detention in a JDC is short term, and the student most likely returns to his or her home district. If a district has a student who is detained in a JDC not located within the district boundaries, the district may find it beneficial to coordinate school assignments through the JDC's education staff while the student is in the facility.

3. Services to Youth Placed in the Custody of the Department of Juvenile Corrections (DJC)

When a student is placed in the custody of the Department of Juvenile Corrections, the responsibility for the provision of FAPE resides with the Department of Juvenile Corrections.

4. Services to Youth in the Custody of the Department of Correction (DOC)

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

When a student is placed in the custody of the Department of Correction, the responsibility for the provision of FAPE resides with the Department of Correction through an agreement between the SDE and the Department of Correction.

**D. Using Public and Private Insurance Funds to Provide FAPE**

If a student is covered by a parent's private or public insurance or benefits, the district may access this insurance only if the parent provides informed consent. The consent requirements are different for accessing a parent's private insurance as opposed to public insurance (such as Medicaid).

If a district proposing to access a parent's public insurance to cover any of the costs associated with the provision of special education and/or related services, the district must do the following:

1. Provide written notification to the child's parents before accessing the child's or the parent's public benefits or insurance for the first time and prior to obtaining the one-time parental consent and annually thereafter. The written notification must explain all of the protections available to parents to ensure that parents are fully informed of their rights before a public agency can access their or their child's public benefits or insurance to pay for services under the IDEA. The notice must include a statement that the refusal to provide consent or the withdrawal of consent will not relieve the district's responsibility to ensure that all the required IEP services are provided at no cost to the parent. The notice must be written in language understandable to the general public and in the native language of the parent or other mode of communication used by the parent unless it is clearly not feasible to do so.
2. Obtain a one-time written consent from the parent after providing the written notification before accessing the child's or the parent's public benefits or insurance for the first time. This consent must specify (a) the personally identifiable information that may be disclosed (e.g., records or information about the services that may be provided to a particular child); (b) the purpose of the disclosure (e.g., billing for services); and (c) the agency to which the disclosure may be made (e.g., Medicaid). The consent also must specify that the parent understands and agrees that the public agency may access the child's or parent's public benefits or insurance to pay for services. Such consent may be withdrawn at any time by the parent.
3. If the child on an IEP moves into a new district, the new district responsible for providing a FAPE must provide the parents with written notice and must obtain consent before accessing the parent's public insurance.

If a district is proposing to access a parent's private insurance to cover any of the costs associated with the provision of special education and/or related services, the district must get parental consent each time the district proposes to access private insurance.

**Chapter 3  
Child Find**

The Child Find system involves three basic steps leading to the determination of whether or not a student has a disability and requires special education. The steps are location, identification, and evaluation. This chapter describes location and identification activities. The evaluation process is covered in Chapter 4.

**Section 1. District Responsibility**

The district is responsible for establishing and implementing an ongoing Child Find system to locate, identify, and evaluate students suspected of having disabilities, ages three (3) through the semester they turn twenty-one (21), who may need special education, regardless of the severity of the disabilities. The district is also responsible for coordinating with the Department of Health and Welfare (DHW) regarding the Child Find system for children ages birth through two (2) years. The district may appoint an individual to coordinate the development, revision, implementation, and documentation of the Child Find system.

The Child Find system shall include all students within the district's geographic boundaries including students who are:

1. enrolled in the district, however this would not include a student who is placed in that public school by another district;
2. enrolled in charter and alternative schools;
3. enrolled in homeschool;
4. enrolled in parentally placed private elementary and secondary schools (including religious schools) located in the district; including out-of-state parentally-placed private school children with disabilities;
5. not enrolled in elementary or secondary school, including resident children ages three (3) through five (5);
6. advancing from grade to grade;
7. highly mobile students (such as migrant and homeless as defined by the McKinney Vento Homeless Act [see Glossary]); and
8. wards of the state.

### Section 2. Locating Students

Locating students who may have disabilities involves coordinating with other agencies and promoting public awareness.

#### A. Coordination

For infants and toddlers, birth through two (2) years of age, Child Find is provided by the Idaho Infant/ Toddler Program (ITP). Although lead responsibility for the ITP has been designated to the DHW, interagency agreements provide for collaboration and coordination. The district shall use local interagency agreements for efficient use of resources and ease of service accessibility for students and families.

#### B. Public Awareness

The district shall take and document the necessary steps to ensure that district staff and the general public are informed of the following:

1. the availability of special education services;
2. a student's right to a free appropriate public education (FAPE);
3. confidentiality protections; and
4. the referral process.

This information may be provided through a variety of methods such as distributing brochures or flyers, including information in school or district publications, disseminating articles and announcements to newspapers, arranging for radio and television messages and appearances, speaking at faculty meetings or district in-services, and making presentations.

### Section 3. Identification

The identification component of Child Find includes screening, early intervening through a problem-solving process, and referral to consider a special education evaluation. The procedural rights under the IDEA are afforded when the student is referred for a special education evaluation by the parent/adult student or the district.

#### A. Screening

Screening is an informal, although organized process, of identifying students who are not meeting or who may not be meeting Idaho Content Standards, Idaho Core Standards, or Idaho Early Learning Guidelines (eGuidelines). A variety of methods may be used to screen students, including performance on statewide assessments, curriculum-based measures, daily work in the

classroom, teacher observations, hearing and vision screeners, developmental milestones, and/or kindergarten readiness measures.

Screening for instructional purposes is not an evaluation. The screening of a student by a teacher or specialist to determine appropriate instructional strategies for curriculum implementation shall not be considered to be an evaluation for eligibility for special education and related services.

Although screening is an important part of the Child Find system, screening cannot be used to delay processing a referral to consider a special education evaluation where immediate action is warranted.

**B. General Education Intervention (Comprehensive Early Intervening Services)**

Under the Local Education Agency (LEA) funding option, early intervening services are services for K-12 students who need additional academic and behavioral support to succeed in the *general education environment*. When a school's screening process reveals that a student or groups of students are at risk of not meeting the Idaho Content Standards or Idaho Core Standards, the general education problem-solving team shall consider the students' need for "supported" instructional and/or behavioral interventions in order to help the students succeed. These interventions are referred to as early intervening services or general education interventions, accommodations, and strategies. It is important to remember that students who receive early intervening services are not currently identified as needing special education or related services and do not have a right to a free appropriate public education. Therefore, the IDEA procedural safeguards are not applicable at this time.

Districts shall implement comprehensive coordinated services and activities that involve providing educational and behavioral evaluations, services, and supports. These services may also include professional development for teachers and other staff to enable them to deliver scientifically based academic and behavioral interventions, including scientifically based literacy instruction, and where appropriate, instruction on the use of adaptive and instructional software. Comprehensive Early Intervening Services (CEIS) should be based on whole-school approaches such as; the three-tiered model, scientifically based curriculum and instruction, positive behavior supports, and a response to intervention system.

If a district chooses to use up to 15% of IDEA Part B funds for CEIS for students in K-12 who are not currently identified as needing special education, but who need additional support in the general education environment, additional requirements may apply that will affect maintenance of effort. In addition, if IDEA Part B funds are used, the district must annually report to the SDE:

1. The number of children receiving CEIS; and
2. The number of children who received CEIS and subsequently received special education services during the preceding two year period.

If a district is found to have a significant disproportionate representation in special education, there are additional requirements for use of funds in CEIS. Please see Chapter 10 for more information on CEIS.

### C. General Education Problem Solving

#### 1. Establishing a Problem-Solving Team

The district shall establish a problem-solving team and a process to plan accommodations and interventions in general education and to ensure that referrals to consider a special education evaluation are appropriate. Team membership is established by the school or the district and would likely involve general educators and administrators, and could include counselors, specialists, and special education personnel. While parent/adult student involvement is valuable and encouraged, the district is not required to include the parent/adult student on the team.

When problem solving involves a child three to five (3-5) years of age, the team should seek input from family members, child care programs, private preschools, or Head Start Programs, as appropriate. An early childhood problem-solving process needs to consider early childhood environments and the preschool student's need for supported instructional interventions in order for the student to participate in appropriate activities. IDEA Part B funds cannot be used to provide CEIS to preschoolers.

#### 2. Referrals to the Problem-Solving Team

Referrals to the problem-solving team may come from a variety of sources including parents, students, other family members, public or private school personnel, agencies, screening programs, or as a result of annual public notice.

Referrals may be made for a variety of reasons dealing with academic and behavioral concerns and may involve, but are not limited to, teaching strategies, material accommodations, social skills training, cooperative learning concepts, classroom organization, and scheduling.

#### 3. Interventions

- a. Interventions in general education or an early childhood environment shall be attempted before a student is referred to an evaluation team, unless the student's performance indicates an evaluation is warranted or a parent makes a request for a referral for a special education evaluation.
- b. Interventions shall be of sufficient scope and duration to determine the effects on the student's educational performance and should be clearly documented.

- c. Documentation of the success or failure of accommodations and interventions shall be reviewed and discussed by the problem-solving team.

#### 4. Problem-Solving Team Decisions Following General Education Intervention

Based on a review of data and information presented by the referring party and others, the team has several decision options. In the case of a preschool student, data and information shall be gathered and reviewed from such settings as child care programs, private preschools, Head Start Programs, or the home. Following an intervention, the problem-solving team shall review progress monitoring data from the intervention and other relevant information to determine what action is warranted. The team considers a variety of options, including whether to:

- a. continue the general education intervention because the student is making adequate progress but needs more time to reach goals;
- b. continue the intervention in a modified form;
- c. explore services or programs outside of special education (such as Title I of the Elementary and Secondary Education Act, including English language programs; Section 504 accommodations; counseling); or
- d. make a referral to consider a special education evaluation.

Although problem-solving activities are an important part of the system, they cannot be used to delay processing a referral for consideration of a special education evaluation where immediate action is warranted. Either a parent or a public agency may initiate a request for an initial evaluation. If a parent initiates a referral for a special education evaluation, the evaluation cannot be delayed or denied due to the child not completing the general education intervention process.

### Section 4. Referral to Consider a Special Education Evaluation

#### A. Evaluation Team

The evaluation team is the group of people established by the IDEA that has the responsibility for making decisions regarding evaluation, assessments, and eligibility. The composition of the evaluation team will vary depending on the nature of the student's suspected disability and other relevant factors. The evaluation team shall include the same membership (although not necessarily the same individuals) as the IEP team and other professionals as needed to ensure that appropriate, informed decisions are made.

Unlike an IEP team, an evaluation team has the flexibility of conducting business with or without a meeting. The case manager can gather input from evaluation team members in a variety of ways. The parent/adult student shall be included in the evaluation team and shall be given the

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

opportunity to indicate whether he or she wishes the team to hold a meeting with all members attending.

**B. Referrals to Consider Special Education**

The procedure for handling referrals to consider a special education evaluation for students suspected of having a disability includes the following:

1. Unless immediate action is warranted and documented, a referral to consider a special education evaluation is sent to the evaluation team *after* the problem-solving team has determined:
  - a. the student's response to research-based interventions in general education (or age-appropriate activities for preschool) has not resulted in adequate progress; and
  - b. language and cultural issues are not the main source of the student's academic or behavioral discrepancy from peers.
2. A *Referral to Consider a Special Education Evaluation/Reevaluation* form shall be completed.
3. Procedural safeguards are activated when a referral is made to consider a special education evaluation. If the referral came from someone other than the parent/adult student (see Glossary) the parent/adult student shall be notified. In either case, the parent/adult student shall be provided with a copy of the *Procedural Safeguards Notice*. At the same time, the parent/adult student shall be afforded an opportunity to provide input regarding the need for and scope of the initial evaluation, including the opportunity to hold a meeting if desired.
4. The evaluation team (including the parent/adult student) reviews all available records, including family and health history, past school experiences, the results of general education interventions, and previous assessments and evaluations. The evaluation team shall decide what additional assessments, if any, are needed. This review and determination process can take place at a face-to-face meeting of the evaluation team or through an alternate format, unless the parent/adult student desires that a meeting be held.
  - a. If the evaluation team determines that an evaluation is warranted, written notice shall be provided to the parent/adult student describing the proposed evaluation and written consent shall be obtained from the parent/adult student.
  - b. If the evaluation team determines that an evaluation is not warranted at this time, the team should seek other avenues for services to meet the student's needs. The person initiating the referral, if other than the parent/adult student,

STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017

may be informed as to why the evaluation is not being conducted. Written notice of the district's refusal to evaluate a student for special education services shall be provided to the parent/adult student when he or she makes a referral for a special education evaluation and the district determines that the evaluation is not warranted.

Note: Districts are prohibited from requiring that a student obtain a prescription for a substance covered by the Controlled Substances Act as a condition of attending school, receiving an evaluation, or receiving services under the IDEA.

See Chapter 4 for more information on evaluation and eligibility.

**Chapter 4**  
**Evaluation and Eligibility**

Chapter 3 discusses Child Find procedures used to locate and identify students with suspected disabilities. This chapter contains the requirements for the special education evaluation and eligibility process, from referral to consider special education through to the determination of eligibility. The Idaho State Department of Education has provided State Eligibility Criteria for special education services for eligibility consistent with the IDEA for districts to use while determining eligibility.

**Section 1. Evaluation Team**

The evaluation team is a group of people outlined by IDEA with the responsibility to make decisions regarding evaluation, assessments, and eligibility. This team includes the same membership as the individualized education program (IEP) team (although not necessarily the same individuals) and other qualified professionals as needed to ensure that appropriate and informed decisions are made. The specific composition of the evaluation team reviewing existing data will vary depending upon the nature of the student's suspected disability and other relevant factors. The parent/adult student is a member of the evaluation team and shall be provided an opportunity to provide input and participate in making team decisions. The evaluation team may conduct its review without a meeting unless the parent/adult student requests that a meeting be held.

**Additional Membership Requirements:**

The determination of whether a student suspected of having a *specific learning disability* shall be made by the student's parents and a team of qualified professionals, which shall include:

1. The student's regular teacher; or if the child does not have a regular teacher, a regular classroom teacher qualified to teach a child of his or her age; and
2. A school psychologist is a required member of the team. When considering oral expression and listening comprehension, a speech language pathologist is a required member who may collaborate with or replace the school psychologist as the professional required to conduct and interpret evaluative examinations

**Section 2. Purpose of an Evaluation**

The purpose of the evaluation process is to determine the eligibility of a student for special education services. This pertains to both initial determination and three year review of eligibility, or re-evaluation. It is also a process for gathering important information about a student's strengths and service needs. An evaluation process shall include a variety of assessment tools and strategies to gather relevant functional, developmental, and academic information about the student, including information provided by the parent.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

**A. Definitions**

Although the terms “evaluation” and “assessment” are often interchanged, there are significant differences between the meanings of the two terms. In an effort to clarify, the terms are defined as follows:

1. Evaluation refers to procedures used to determine whether a child has a disability and the nature and extent of the special education and related services that the child needs. The screening of a student by a teacher or specialist to determine appropriate *instructional* strategies for curriculum implementation shall not be considered to be an evaluation for eligibility for special education and related services.
2. Assessment is integral to the evaluation process and includes the formal and informal processes of systematically observing, gathering, and recording credible information to help answer evaluation questions and make decisions. A test is one method of obtaining credible information within the assessment process. Tests may be standardized or non-standardized, criterion-referenced (e.g. curriculum-based measures) or norm-referenced, and usually elicit responses from students to situations, questions, or problems to be solved. Assessment data may also include observations, interviews, medical reports, data regarding the effects of general education accommodations and interventions, and other formal or informal data.

**B. Evaluation Components**

The district shall conduct a full and individual initial evaluation before the provision of special education and related services are provided to a student suspected of having a disability. A parent or a public agency may initiate a request for an initial evaluation to determine eligibility.

To be eligible for services under the IDEA, a student must have a disability that:

1. meets the Idaho state disability criteria;
2. adversely affects educational performance; and
3. results in the need for specially designed instruction and related services.

In addition, the information from the evaluation can be used to consider the following:

1. the nature and extent of special education and related services needed by the student in order to participate and progress in the general education curriculum or curriculum aligned to the Idaho Content Standards, Idaho Core Standards, or the Idaho Early Learning Guidelines (eGuidelines); and
2. the least restrictive environment (LRE) for the student.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

The above information also pertains to evaluations for determining Part B eligibility for children transitioning from the Infant/Toddler Program (ITP).

**Section 3. Written Notice and Consent for Assessment**

Written notice shall be provided and informed consent shall be obtained before assessments are administered to a student as part of an evaluation.

**A. Written Notice Requirements**

Written notice shall be provided to the parent/adult student within a reasonable time before the district proposes to initiate the evaluation or re-evaluation of a student. Written notice shall be in words understandable to the general public. It shall be provided in the native language or other mode of communication normally used by a parent/adult student unless it is clearly not feasible to do so.

If the native language or other mode of communication is not a written language, the district shall take steps to ensure the following:

1. the notice is translated orally or by other means in the native language or other mode of communication;
2. the parent/adult student understands the content of the notice; and
3. there is written evidence that the above two requirements have been met.

The written notice shall include the following:

1. a description of the evaluation or reevaluation proposed or refused by the district;
2. an explanation of why the district proposes to evaluate or reevaluate the student;
3. a description of any other options the district considered and the reasons why those options were rejected;
4. a description of each assessment procedure, test, record, or report that the district used as a basis for the proposed or refused evaluation or reevaluation;
5. a description of any other factors relevant to the evaluation or reevaluation;
6. a statement that the parent/adult student has special education rights and how to obtain a copy of the *Procedural Safeguards Notice* (Note: If this is the initial evaluation, the parents should get a copy of the procedural safeguards with the initial notice of the special education evaluation); and

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

7. sources for parents to contact in obtaining assistance in understanding the *Procedural Safeguards Notice*.

Written notice shall be provided to the parent/adult student within a reasonable time in the following instances:

1. to conduct any additional assessments and review initial information as part of the initial evaluation or reevaluation;
2. to explain refusal to initiate assessment; and
3. when the evaluation team determines that additional assessments are not required

See Chapter 11 for more information on written notice.

**B. Consent Requirements**

1. Definition of Consent: Consent means that the parent/adult student:
  - a. has been fully informed in his or her native language or other mode of communication of all information relevant to the assessment for which consent is sought;
  - b. understands and agrees in writing (as indicated by signature) to the activities described; and
  - c. understands that granting of consent is voluntary and may be revoked in writing at any time *before* the assessment is completed. However, once the assessment has been completed, revocation of consent cannot be used to have the assessment disregarded.
2. Consent for initial evaluation
  - a. Informed written consent shall be obtained from the parent/adult student before the district conducts assessments as a part of an initial evaluation of the student to determine if he or she qualifies as a child with a disability;
  - b. Parental consent for initial evaluation should not be construed as consent for initial provision of special education and related services;
  - c. The school district shall make reasonable documented efforts to obtain the informed consent from the parent for an initial evaluation to determine whether the child has a disability and to identify the educational needs of the child. If a parent refuses consent, the district does not violate its obligation to provide FAPE if it declines to pursue the evaluation. If the parent does not

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

provide consent, the district may offer an SDE facilitated meeting, mediation, or request a due process hearing to challenge the decision.

- d. If the child is a ward of the State and is not residing with the child's parent, the district is not required to obtain informed consent from the parent for an initial evaluation to determine eligibility if:
  - 1) despite reasonable efforts to do so, the district cannot locate the parent;
  - 2) the rights of the parents of the child have been terminated in accordance with Idaho law; or
  - 3) the rights of the parent to make educational decisions have been subrogated by a judge in accordance with Idaho law and consent for initial evaluation has been given by an individual appointed by the judge to represent the child.
- e. If a district is using any data gathered during general education interventions for a student suspected of being a student with a disability, and that data may be used for a later eligibility determination, the district shall promptly request consent to evaluate the student.

**C. Consent for Reevaluation**

- 1. Written consent shall be sought for reevaluation that requires new assessments. Reevaluation consisting solely of review of existing data does not require written notice.
- 2. Informed parental consent for a reevaluation need not be obtained if the public agency can demonstrate through documentation that it made reasonable efforts to obtain consent and the child's parent has failed to respond.

**D. When Consent Is Not Required**

Parental consent is *not* required for:

- 1. the review of existing data as part of an evaluation or reevaluation;
- 2. the administration of a test or other assessment that is administered to all students, unless consent is required of parents of all students;
- 3. teacher or related service provider observations, ongoing classroom evaluations, or criterion-referenced tests that are used to determine the student's progress toward achieving goals on the IEP; and

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

4. screening by a teacher or specialist to determine appropriate instructional strategies for curriculum implementation, which may include group or individual curriculum-based or norm-referenced measures.

**E. Refusing Consent or Failure to Respond to a Request for Consent**

1. The parent/adult student can refuse consent for assessment(s).
2. For an initial evaluation, if consent is refused or the parent/adult student fails to respond, the student cannot be assessed. However, the district may request SDE facilitation, mediation, or a due process hearing. If the mediation results in consent to assess, or if a hearing officer's decision indicates that assessment is appropriate and there is no appeal, then the student may be assessed. However, the district does not violate its obligations to provide FAPE if it declines to pursue the evaluation. Consent for the initial evaluation shall not be construed as consent for the initial provision of special education services should the student be deemed eligible.
3. If a parent of a child who is homeschooled or placed in a private school by the parents at their own expense does not provide consent for initial evaluation or reevaluation, or the parent fails to respond to a request to provide consent, the district may not use SDE mediation or due process procedures in order to gain consent and the district is not required to consider the child eligible for services.

Note: A district shall not use a parent's refusal for consent to one service or activity to deny the parent or student any other service, benefit, or activity.

See Chapter 11 for more information on consent and reasonable efforts.

**F. Timeline**

The time between receiving written consent for initial assessment and eligibility determination cannot exceed sixty (60) calendar days, excluding periods when regular school is not in session for five (5) or more consecutive school days. The time between eligibility determination and the development of the IEP cannot exceed thirty (30) calendar days. The implementation of the IEP shall not exceed thirty (30) calendar days from the eligibility determination, unless all parties agree to an extension. For children transferring from ITP, eligibility shall be determined and an IEP developed by the child's third birthday. If a child turns three during the summer, and the child does not require Extended School Year (ESY) services, special education and related services may begin in the new school year.

In unusual circumstances, all parties may agree in writing to an extension of the sixty (60) day period for the purpose of initial assessment. These circumstances may include the following:

1. The child enrolls in a school in another school district after the sixty (60) day timeline began and prior to the determination by the child's eligibility in the previous school

district. If the new school district is making sufficient progress in determining eligibility, the parent and district may agree to a different timeline.

2. The parent repeatedly fails or refuses to produce the student for an evaluation after the district has made reasonable efforts to schedule an evaluation.

#### Section 4. Information from Other Agencies or Districts

Consent for release of information shall be received before the district seeks to obtain information about the student from other agencies, unless otherwise authorized by law. Upon receipt of consent, the case manager will send letters requesting information to individuals or agencies that have relevant information about the student. A copy of the signed consent form for release of information shall be included with the letters and a copy shall be retained in the student's confidential file. Sources of this additional information may include records from health and social service agencies, private preschool programs, legal service agencies, and non-school professionals such as physicians, social workers, and psychologists.

Federal laws and regulations do not require consent for the district to:

1. request information from other districts that the student has attended; or
2. send information to other districts in which the student intends to enroll.

For children transferring from the ITP, eligibility shall be determined and the IEP developed by the date that the child turns three (3) years of age. See Chapter 5 for additional information on collaboration with the ITP throughout the transition process.

#### Section 5. Evaluation and Eligibility Determination Procedures

##### A. Areas to Assess

The student shall be assessed in all areas related to the suspected disability, which includes areas such as functional, developmental, and academic skills needed to participate and progress in the general education curriculum. If needed, qualified personnel shall conduct an individual assessment of assistive technology needs, including a functional evaluation in the individual's customary environment. The evaluation of each ~~suspected to be a~~ student with a suspected disability shall be full and individualized and sufficiently comprehensive to identify all of the student's suspected special education and related service needs whether or not commonly linked to the disability category in which the student may be classified. For youth with IEPs, no later than age sixteen (16), appropriate transition assessments shall be conducted. Beginning with the IEP to be in effect when a student is sixteen (16) years old (or younger if determined appropriate by the IEP team), appropriate transition assessments shall be conducted.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

Evaluation teams shall be especially mindful of cultural and linguistic differences during the evaluation and eligibility process. Caution is advised in the selection of informal or formal assessments that are nonbiased, administration of assessments, interpretation, and application of outcomes in order to appropriately identify culturally or linguistically diverse students for special education services.

**B. Determination of Needed Initial or Reevaluation Data**

As part of an initial evaluation or reevaluation, the evaluation team shall review existing evaluation data regarding the student including:

1. assessments and information provided by the parent/adult student concerning the student;
2. current classroom-based assessments and observations, and/or data regarding the student's response to scientific research-based interventions;
3. observations by teachers and related service providers; and
4. results from statewide and district wide testing.

Based on that review, and input from the parent/adult student, the evaluation team will decide on a case-by-case basis what additional data, if any, are needed to determine:

1. whether the student meets eligibility criteria for special education;
2. the student's present levels of academic and functional performance, including academic achievement and related developmental needs of the student;
3. whether the student needs specially designed instruction; or
4. whether any additions to the special education and related services are needed to enable the student to:
  - a. meet the measurable annual goals set out in the student's IEP; and
  - b. be involved in and progress in the general education curriculum (for preschool students, to participate in appropriate activities).

If the evaluation team determines additional assessments are not required for the purpose of determining whether the student meets eligibility criteria during an initial evaluation or a reevaluation, the district shall provide written notice to the parent/adult student of the decision and the reasons for that decision. The parent/adult student shall also be informed of his or her right to request assessments to determine eligibility and to determine the child's educational

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

needs. The district will provide written notice if a parental request for additional assessment is denied.

**C. Assessment Procedures and Instruments**

The district shall ensure the evaluation or reevaluation meets the following requirements:

1. The child shall be assessed in all areas related to the suspected disability, including, if appropriate, health, vision, hearing, social and emotional status, general intelligence, academic performance, communicative status, motor abilities, and transition needs.
2. Assessments and other materials shall be selected and administered so as not to be discriminatory on a racial or cultural basis.
3. Assessments and other materials shall be provided and administered in the student's native language, and in the form most likely to yield accurate information on what the student knows and can do academically, developmentally and functionally unless it is not feasible to provide or administer. Attempts to provide a qualified examiner in the student's native language or mode of communication shall be documented.

In all direct contact with a student, the language normally used by the student in the home or learning environment shall be used. For an individual with ~~deafness or~~ blindness or deaf or hard of hearing, or for an individual with no written language, the mode of communication is that which is normally used by the individual (e.g., sign language, Braille, or oral communication).

4. Materials used to assess a student with limited English proficiency shall be selected and administered to ensure that they measure the extent to which the student has a disability and needs special education, rather than solely measuring the student's English language skills.
5. A variety of assessment tools and strategies shall be used to gather relevant academic, developmental and functional information about the student, including information provided by the parent/adult student and information related to enabling the student to be involved in and progress in the general education curriculum (or, for a preschooler, to participate in appropriate activities).
6. Assessments are used for the purposes for which the assessments or measures are valid and reliable.
7. Assessments shall be administered by trained and knowledgeable personnel in accordance with any instructions provided by the producer of the tests.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

8. Assessments and other evaluation materials shall include those tailored to assess specific areas of educational need and not merely those that are designed to provide a single general intelligence quotient or standard score.
9. Assessments shall be selected and administered to ensure that if a test is administered to a student with impaired sensory, manual, or speaking skills, the test results accurately reflect the student's aptitude or achievement level or whatever other factors the test purports to measure, rather than reflecting the student's impaired sensory, manual, or speaking skills (unless those are the factors that the test purports to measure).
10. No single measure or assessment may be used as the sole criterion for determining whether a student is a student with a disability and for determining an appropriate educational program for the student.
11. The district shall use technically sound instruments that may assess the relative contribution of cognitive and behavioral factors in addition to physical or developmental factors.
12. The district shall provide and use assessment tools and strategies that produce relevant information that directly assists persons in determining the educational needs of the student.
13. All services and assessments shall be provided at no expense to the parent/adult student.
14. Assessments of children with disabilities who transfer from one public agency to another public agency in the same school year are coordinated with the child's prior and subsequent schools to ensure prompt completion of the full evaluation.
15. The evaluation shall be full and individualized and sufficiently comprehensive to identify all of the child's special education and related service needs, whether or not commonly linked to the disability category.

**D. Eligibility Determination**

1. Upon completion of the student's initial evaluation or reevaluation, the evaluation team will consider the findings and determine whether the student meets or continues to meet eligibility criteria found in Section 7 of this chapter. The evaluation team will draw upon information from a variety of sources, such as norm-referenced, standardized tests, parent/adult student input, teacher input, physical condition, social or cultural background, adaptive behavior, and functional assessments to interpret evaluation data and determine eligibility.
2. Special Rule for Eligibility Determination

A student cannot be identified as a student with a disability if the primary reason for such a decision is:

- a. lack of appropriate instruction in reading, including the essential components of reading instruction as defined by the Elementary and Secondary Education Act—phonemic awareness, phonics, vocabulary development, reading fluency, including oral reading skills and reading comprehension strategies;
  - b. lack of appropriate instruction in math; or
  - c. Limited English Proficiency.
3. Related Services

Related services means transportation and such developmental, corrective, and other supportive services as are required to assist a child with a disability to benefit from special education. An IEP team may determine that a student found eligible for special education has a need for a related service. However, if a student with a disability needs only a related service and not special education, then the student is not eligible for the related service, unless it is considered to be special education under State standards, as in the case of speech therapy and language therapy.

#### **E. The Eligibility Report**

The evaluation team shall prepare an Eligibility Report and provide a copy of the report to the parent/adult student.

The Eligibility Report shall include:

1. names and positions of all evaluation team members;
2. information regarding the student's need for specially designed instruction (special education and related services);
3. confirmation and supporting data that the disability is not primarily due to lack of appropriate instruction in reading, including the essential components of reading — phonemic awareness, phonics, vocabulary development, reading fluency, including oral reading skills and reading comprehension strategies or math;
4. information about how the student's disability adversely affects his or her educational performance;
5. all data on the student as required in the State Eligibility Criteria for the area of suspected disability;

6. confirmation and supporting data that the student's learning difficulties are not primarily due to Limited English Proficiency;
7. the date of the eligibility determination;
8. the name and position of all those administering assessments; and
9. in the case of Specific Learning Disability eligibility determination, certification in writing that the report reflects each member's conclusions (agreement), and in the case of team member disagreement with the conclusions, a written statement shall be attached to the eligibility report presenting the dissenting team member's conclusions.

### **Section 6. Reevaluation and Continuing Eligibility**

#### **A. Reevaluation Requirements**

The district shall ensure that an individual reevaluation of each student with a disability is conducted in accordance with all the required evaluation procedures outlined in this chapter.

A reevaluation:

1. shall occur at least once every three (3) years unless the parent/adult student and the district agree in writing that a three (3) year reevaluation is not necessary. However, an updated Eligibility Report, documenting all eligibility criteria, shall be completed by the reevaluation due date to establish and document continuing eligibility;
2. a reevaluation is not required more than once per year unless the parent/adult student and the district agree otherwise. If the parent makes a request within the year and the district does not agree, the district shall send written notice of refusal.

The district shall ensure a reevaluation is conducted more frequently than every three (3) years if:

1. it is determined that the education or related service needs, including academic achievement and functional performance, of the student warrants a reevaluation; or
2. if the parent/adult student or the student's teacher requests a reevaluation.

#### **B. Reevaluation Prior to Discontinuation**

1. The district shall evaluate a student with a disability before the team determines that the student is no longer eligible for special education.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

2. Reevaluation is not required in the following two circumstances:
  - a. before the termination of a child's eligibility due to graduation, if the student meets comparable academic requirements that are equally as rigorous as those required of nondisabled students and receives a regular diploma;
  - b. the student has reached the end of the semester in which he or she turns twenty-one (21) years of age.

Note: Although a reevaluation is not required in these two cases, the district shall provide the student with a summary of his or her academic achievement and functional performance, including recommendations on how to assist the student in meeting his or her post school goals.

**C. Informing the Parent/Adult Student**

Approximately one month before the reevaluation is due, contact shall be made with the parent/adult student informing him or her that:

1. the reevaluation will be scheduled within the month, unless the district and parent/adult student agree it is unnecessary; and
2. input will be sought from the parent/adult student.

Note: The IDEA allows the process of reviewing existing data and determining what, if any, additional, assessments are required without a meeting.

**D. Nature and Extent of Reevaluation**

Before any reassessment of the student, the evaluation team will determine the nature and extent of the student's needs by reviewing existing data. See Section 5 of this chapter for more information regarding the determination of needed data.

1. No Additional Information Needed
  - a. If the evaluation team decides that no additional assessments are needed to determine whether the student continues to be eligible for special education services, the district shall provide written notice to the parent/adult student of his or her right to request further assessment.
  - b. If the parent/adult student requests an additional assessment to determine whether the student continues meet criteria for special education services under the IDEA, then the district shall conduct the assessment.

- c. If the parent/adult student requests an additional assessment for reasons other than eligibility, such as admission to college, then the district shall consider the request and provide written notice of its decision.

## 2. Additional Assessments Needed

Based on recommendations from the evaluation team, the district will seek consent to administer the needed assessments and provide the parent/adult student with written notice regarding proposed assessments. If the parent/adult student fails to respond after the district has taken reasonable measures to obtain consent for assessments as part of a reevaluation, the district may proceed with the assessments. The district shall maintain documentation of its measures to seek consent. See section 3B of this chapter for a definition of reasonable measures.

If the parent/adult student denies consent to reassess, the student cannot be assessed. However, the district may request SDE mediation or a due process hearing. If the mediation results in consent to assess, or if a hearing officer's decision indicates the assessment is appropriate and there is no appeal, then the student may be assessed. All reevaluation procedures shall be provided at no cost to the parent/adult student.

### E. Eligibility Report for Reevaluations

The evaluation team will consider evaluation findings and determine whether the student continues to meet criteria for special education services.

The evaluation team is required to prepare an Eligibility Report detailing how review of existing data demonstrates that the student continues to meet eligibility requirements even if no new assessments were conducted. The report shall address each required eligibility component and include results of previous assessments if they are being used to determine eligibility. Refer to Section 5 of this chapter for eligibility requirements.

### Section 7. State Eligibility Criteria

The district will use the eligibility criteria and assessment procedures set forth by the SDE for placement in special education. This section contains a definition and the eligibility criteria for each specific disability that shall be used to determine whether an individual qualifies as a student with a disability in need of special education.

All disabilities except Specific Learning Disability (SLD) and Developmental Delay (DD) are applicable for students three (3) through twenty-one (21) years of age. For Specific Learning Disability, students must be legal kindergarten age through twenty-one (21) years. Only students ages three (3) through nine (9) can be identified in the Developmental Delay (DD) category. Use of the DD category is optional for the district. If the district elects to use the DD category, it

applies only to students from age three (3) up until their tenth (10<sup>th</sup>) birthday, in addition to the criteria outlined in this chapter.

### A. Three-Prong Test of Eligibility

To demonstrate eligibility for special education services all three of the following criteria shall be met and documented. This is often called the three-prong test for eligibility.

The Eligibility Report shall document each of the following three criteria:

1. the student has a disability according to the established Idaho criteria;
2. the student's condition adversely affects educational performance; and
3. the student needs specially designed instruction.

**Meets State Eligibility Requirements:** The state eligibility requirements for specific disabilities are listed in this chapter.

**Adverse Impact:** A determination made by the evaluation team that the student's progress is impeded by the disability to the extent that the student's educational performance measures significantly and consistently below the level of similar age peers preventing the student from benefiting from general education. Educational performance refers the student's performance in academic achievement, developmental and or functional skills. The phrases "adverse impact" and "adverse effect" are used interchangeably in this Manual and have the same meaning.

**Needs Specially Designed Instruction:** Special education is specially designed instruction, provided at no cost to the parents, to meet the unique needs of a student with a disability. Specially designed instruction means adapted, as appropriate to meet the needs of an eligible student, the content, methodology, or delivery of instruction to address the unique needs of the student that result from the student's disability and to ensure access of the child to the general curriculum so that he or she can meet Idaho Content Standards or Idaho Core Standards that apply to all students.

### B. Disability Categories

#### 1. Autism Spectrum Disorder

**Definition:** An Autism Spectrum Disorder is a developmental disability, generally evident in the early developmental period, significantly affecting verbal or nonverbal communication and social interaction, and adversely affecting educational performance.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

- a. Persistent deficits in social communication and social interaction across multiple contexts, currently or by history:
- b. Symptoms must be present in the early developmental period, but may not become fully manifest until social demands exceed limited capacities, or may be masked by learned strategies in later life.
- c. Other characteristics often associated with autism include, but are not limited to, engagement in repetitive activities and stereotyped movements, resistance to environmental change or change in daily routines, and hyper- or hypo-reactivity to sensory input.
- d. Characteristics vary from mild to severe as well as in the number of symptoms present and are not primarily the result of intellectual disability, developmental delay, or an emotional disturbance.

**State Eligibility Criteria for Autism:** An evaluation team will determine that a student is eligible for special education services as a student with autism when all of the following criteria are met:

- a. An evaluation that meets the procedures outlined in Section 5 of this chapter has been conducted;
- b. The student has a developmental disability, generally evident in the early developmental period that significantly affects social communication and social interaction;
- c. The student must meet the disability definition (above) of an autism spectrum disorder as determined by an evaluation team to include a school psychologist and a speech-language pathologist (a team must consider a private evaluation or diagnosis provided by a parent from a psychiatrist, a physician or a licensed psychologist as meeting the definition of autism spectrum disorder);
- d. The student's condition adversely affects educational performance;
- e. The student needs specially designed instruction.

## 2. Intellectual Disability

**Definition:** Intellectual Disability is defined as significantly sub-average intellectual functioning that exists concurrently with deficits in adaptive behavior. These deficits are manifested during the student's developmental period, and adversely affect the student's educational performance.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

**State Eligibility Criteria for Intellectual Disability:** An evaluation team will determine that a student is eligible for special education services as a student with an intellectual disability when all of the following criteria are met:

- a. An evaluation that meets the procedures outlined in Section 5 of this chapter has been conducted.
- b. The student has a full-scale intelligence standard score (IQ) at or below 70, plus or minus the standard error of measurement (at the 95 percent confidence level) of the test being used, based on an assessment by a licensed psychologist or certified school psychologist using an individually administered intelligence test.
- c. The student exhibits concurrent deficits in adaptive functioning unexpected for his or her age in at least two of the following areas: communication, self-care, home living, social/interpersonal skills, use of community resources, self-direction, functional academic skills, work, leisure, health, or safety.
- d. The student's condition adversely affects educational performance.
- e. The student needs specially designed instruction.

Caution is advised when assessing students with cultural and language issues to prevent inappropriate identification of these students as having an intellectual disability. When determining eligibility, tests measuring intellectual ability shall be used with care; that is, only those tests designed and normed for the population being tested may be used. Tests measuring intellectual ability that are translated into another language by the examiner or an interpreter yield invalid test results and shall not be used.

### 3. Deaf-Blindness

**Definition:** A student with deaf-blindness demonstrates both hearing and visual impairments, the combination of which causes such severe communication and other developmental and educational needs that the student cannot be appropriately educated with special education services designed solely for students with deafness or blindness.

**State Eligibility Criteria for Deaf-Blindness:** An evaluation team will determine that a student is eligible for special education services as a student with deaf-blindness when all of the following criteria are met:

- a. An evaluation that meets the procedures outlined in Section 5 of this chapter has been conducted.

- b. The student exhibits simultaneous hearing and visual impairments, the combination of which causes such severe communication and other developmental and educational needs that the student cannot be accommodated with special education services designed solely for students with deafness or blindness.
- c. The student is diagnosed by an optometrist or ophthalmologist for vision loss and by an otologist, audiologist, or physician for hearing loss to make a final diagnosis as deaf-blindness.
- d. The student's condition adversely affects educational performance.
- e. The student needs specially designed instruction.

4. **Deafness**~~Deaf or Hard of Hearing~~

**Definition:** ~~Deafness is a type of hearing loss that adversely affects educational performance and is so severe that~~ **Deaf or Hard of Hearing means a child with a hearing loss, whether permanent or fluctuating, that impairs the access, comprehension, and/or use of linguistic information through hearing,** with or without amplification, ~~and that adversely affects a child's educational performance, the student is limited in processing linguistic information through hearing.~~

**State Eligibility Criteria for**~~Deafness~~ **Deaf or Hard of Hearing:** An evaluation team will determine that a student is eligible for special education services as a student who is deaf ~~or hard of hearing~~ when all of the following criteria are met:

- a. An evaluation that meets the procedures outlined in Section 5 of this chapter has been conducted.
- b. The student exhibits a ~~severe~~ hearing loss that hinders his or her ability to ~~access, comprehend, and/or use process~~ linguistic information through hearing, with or without amplification.
- c. The student has been diagnosed by an audiologist as ~~having a hearing loss, deaf.~~
- d. The student's condition adversely affects educational performance.
- e. The student needs specially designed instruction.

5. **Developmental Delay**

**Definition:** The term developmental delay may be used only for students ages three (3) until their tenth (10<sup>th</sup>) birthday who are experiencing developmental delays as

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

measured by appropriate diagnostic instruments and procedures in one or more of the following areas:

- a. cognitive development – includes skills involving perceptual discrimination, memory, reasoning, academic skills, and conceptual development;
- b. physical development – includes skills involving coordination of both the large and small muscles of the body (i.e., gross, fine, and perceptual motor skills);
- c. communication development – includes skills involving expressive and receptive communication abilities, both verbal and nonverbal;
- d. social or emotional development – includes skills involving meaningful social interactions with adults and other children including self-expression and coping skills; or
- e. adaptive development – includes daily living skills (e.g., eating, dressing, and toileting) as well as skills involving attention and personal responsibility.

The category of developmental delay should not be used when the student clearly meets the eligibility criteria for another specific disability category.

A student cannot qualify for special education services under developmental delay beyond his or her tenth (10<sup>th</sup>) birthday unless he or she has been determined to be eligible as having a disability other than developmental delay.

**State Eligibility Criteria for Developmental Delay:** An evaluation team may determine that a student is eligible for special education services as a student with a developmental delay when all of the following criteria are met:

- a. An evaluation that meets the procedures outlined in Section 5 of this chapter has been conducted.
- b. The student is at least three (3) years of age but less than ten (10) years of age.
- c. The student has developmental and/or learning problems that are not primarily the result of limited English proficiency, cultural difference, environmental disadvantage, or economic disadvantage.
- d. The student meets either of the following two criteria, in one or more of the broad developmental areas listed below.

Criteria:

- 1) The student functions at least 2.0 standard deviations below the mean in one broad developmental area (30 percent delay in age equivalency, or functions at or below the 3rd percentile).
- 2) The student functions at least 1.5 standard deviations below the mean in two or more broad developmental areas (25 percent delay in age equivalency, or functions at or below the 7th percentile).

Broad Developmental Areas:

- 1) Cognitive skills (e.g., perceptual discrimination, memory, reasoning, pre-academic, and conceptual development);
  - 2) Physical skills (i.e., fine, gross, and perceptual motor skills);
  - 3) Communication skills (i.e., including verbal and nonverbal, and receptive and expressive);
  - 4) Social or emotional skills; or
  - 5) Adaptive skills, including self-help skills.
- e. The student's condition adversely affects educational performance.
  - f. The student needs specially designed instruction.

**6. Emotional Disturbance**

**Definition:** A student with an emotional disturbance exhibits one or more of the following characteristics over a long period of time, and to a marked degree, that adversely affects his or her educational performance:

- a. an inability to learn that is not primarily the result of intellectual disability; hearing, vision, or motor impairment, or other health impairment;
- b. an inability to build or maintain satisfactory interpersonal relationships with peers and teachers;
- c. inappropriate types of behavior or feelings under normal circumstances;
- d. a general pervasive mood of unhappiness or depression;
- e. a tendency to develop physical symptoms or fears associated with personal or school problems; or

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

f. Schizophrenia.

The term *does not* include students who are socially maladjusted unless it is determined they have an emotional disturbance.

**State Eligibility Criteria for Emotional Disturbance:** An evaluation team will determine that a student is eligible for special education services as a student with emotional disturbance when all of the following criteria are met:

- a. An evaluation that meets the procedures outlined in Section 5 of this chapter has been conducted.
- b. The student has been documented exhibiting characteristics consistent with the criteria (a-f in this section) by one or more of the following: school psychologist, licensed psychologist, psychiatrist, physician, or certified social worker.
- c. The student has been observed exhibiting one or more of the six (6) behavioral or emotional characteristics listed in the definition of emotional – behavioral disability.
- d. The characteristic(s) has been observed:
  - 1) for a long period of time (at least 6 months); and
  - 2) by more than one knowledgeable observer; and
  - 3) in more than one setting; and
  - 4) at a level of frequency, duration, and/or intensity that is significantly different from other students' behavior in the same or similar circumstances.
- e. The student's condition adversely affects educational performance in the area of academics, peer and teacher interaction, participation in class activities, and/or classroom conduct.
- f. The student needs specially designed instruction.

**7. Other Health Impairment (OHI)**

**Definition:** A student classified as having Other Health Impairment exhibits limited strength, vitality, or alertness, including heightened alertness to environmental stimuli that results in limited alertness with respect to the educational environment that is due to chronic or acute health problems. These health problems may include, but are not limited to, asthma, attention deficit disorder (ADD), attention deficit hyperactivity

disorder (ADHD), cancer, diabetes, epilepsy, Fetal Alcohol Syndrome, a heart condition, hemophilia, lead poisoning, leukemia, nephritis, rheumatic fever, sickle cell anemia, Tourette syndrome, and stroke to such a degree that it adversely affects the student's educational performance.

A student with ADD/ADHD may also be eligible under another category (generally specific learning disability or emotional disturbance) if he or she meets the criteria for that other category and needs special education and related services. All students with a diagnosis of ADD/ADHD are not necessarily eligible to receive special education under the IDEA, just as all students who have one of the other conditions listed under other health impairment are not necessarily eligible, unless it is determined to adversely affect educational performance and require specially designed instruction.

**State Eligibility Criteria for Other Health Impairment:** An evaluation team will determine that a student is eligible for special education services as a student with an Other Health Impairment when all of the following criteria are met:

- a. An evaluation that meets the procedures outlined in Section 5 of this chapter has been conducted.
- b. The student exhibits limited strength, vitality, or alertness, including heightened alertness to environmental stimuli that results in limited alertness with respect to the educational environment that is due to chronic or acute health problems.
- c. The student has been diagnosed by a physician with a condition consistent with an Other Health Impairment described above. In the case of ADD/ADHD, an educational determination may be provided by a school psychologist. Diagnosis from a licensed psychologist or other diagnostician must be considered by the evaluation team.
- d. The student's condition adversely affects educational performance.
- e. The student needs specially designed instruction.

#### ~~8. Hearing Impairment~~

~~**Definition:** The IDEA disability category of hearing impairment describes a permanent or fluctuating hearing loss that adversely affects a student's educational performance but is not included under the category of deafness.~~

~~State Eligibility Criteria for Hearing Impairment: An evaluation team will determine that a student is eligible for special education services as a student with a hearing impairment when all of the following criteria are met:~~

- ~~a. An evaluation that meets the procedures outlined in Section 5 of this chapter has been conducted.~~
- ~~b. The student does not qualify as deaf.~~
- ~~c. The student is diagnosed by an otologist, audiologist or physician as having a substantial hearing loss.~~
- ~~d. The student's condition adversely affects educational performance.~~
- ~~e. The student needs specially designed instruction.~~

#### 9. Specific Learning Disability

**Definition:** Specific Learning Disability (SLD) means a disorder in one or more of the basic psychological processes involved in understanding or in using language, spoken or written, that may manifest itself in the imperfect ability to listen, think, speak, read, write, spell, or to do mathematical calculations, including conditions such as perceptual disabilities, brain injury, minimal brain dysfunction, dyslexia, and developmental aphasia.

Specific Learning Disability does not include learning problems that are primarily the result of visual, hearing, or motor disabilities, of intellectual disability, of emotional disturbance, or of environmental, cultural, or economic disadvantage.

Only a school age child may be identified as a student with a specific learning disability.

**State Eligibility Criteria for Specific Learning Disability:** In determining whether a child has an SLD, the child must meet at a minimum, the following criteria:

STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017

- a. The student does not make sufficient progress in response to effective, evidence-based instruction and intervention for the child's age or to meet state-approved grade-level standards when provided with learning experiences and instruction appropriate for the child's age or State approved grade level standards in one or more of the following areas:
- 1) Oral expression;
  - 2) Listening comprehension;
  - 3) Written expression;
  - 4) Basic reading skills;
  - 5) Reading comprehension;
  - 6) Reading fluency
  - 7) Mathematics calculation; or
  - 8) Mathematics problem solving.

AND

- b. The student demonstrates low achievement in the area(s) of suspected disability listed above as evidenced by a norm-referenced, standardized achievement assessment. For culturally and linguistically diverse students, the preponderance of evidence must indicate low achievement.

AND

- c. The student demonstrates a pattern of strengths and weaknesses in psychological processing skills that impact learning.

AND

- d. The student's lack of achievement is *not* primarily the result of:
- 1) A visual, hearing, or motor impairment;
  - 2) Intellectual disability
  - 3) Emotional disturbance
  - 4) Environmental, cultural or economic disadvantage
  - 5) Limited English Proficiency
  - 6) A lack of appropriate instruction in reading, including the essential components of reading;
  - 7) A lack of appropriate instruction in math.

AND

- e. The disability adversely impacts the student's educational performance and the student requires specially designed instruction.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

**Evaluation Procedures:**

In order to demonstrate the initial eligibility criteria under this category, the following procedures must be followed.

- 1) The evaluation for determining SLD eligibility and requirements for parent notification and involvement shall be conducted in accordance with the procedures detailed in Chapter 4, Section 3, of this Manual.
- 2) The evaluation must address the eligibility criteria as listed in the *SLD Eligibility Criteria* (see above). To meet these criteria, the following information is required:
  - i. Evidence of insufficient progress in response to effective, evidence-based instruction and intervention indicates the student's performance level and rate of improvement are significantly below that of grade-level peers. This is documented/demonstrated with the following data:
    - a) Data that helps establish that the core curriculum is effective for most students. The most recent whole grade performance data to verify appropriate instruction in the area(s) of concern may include results from the standards-based assessment system. If the referred student belongs to a population of students whose performance is regularly disaggregated, whole grade data for the disaggregated group should also be reviewed and considered.
    - b) Information documenting that prior to, or as part of, the referral process, the student was provided appropriate instruction in general education settings. Appropriate instruction includes consideration of both child specific information and whole grade performance data. Child specific data regarding appropriate instruction may include: (1) verification that core (universal) instruction was provided regularly; (2) data indicating that the student attended school regularly to receive instruction; (3) verification that core instruction was delivered according to its design and methodology by qualified personnel; and (4) verification that differentiated instruction in the core curriculum was provided.
    - c) Data-based documentation of student progress during instruction and intervention using standardized, norm-

STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017

referenced progress monitoring measures in the area of disability.

- d) A record of an observation of the student's academic performance and behavior in the child's learning environment (including the general classroom setting) has been conducted by an evaluation team member other than the student's general education teacher. The purpose of the observation is to document how the areas of concern impact the student's performance in the classroom. The observation should also document the name and title of the observer and the site, date, and duration of the observation. The team must decide to:
  1. Use information from an observation in routine classroom instruction and monitoring of the child's performance that was conducted before the child was referred for an evaluation; or
  2. Have at least one member of the team conduct an observation of the child's academic performance in the educational environment after the child has been referred for an evaluation, and parental consent has been obtained.

AND

- ii. Evidence of low achievement in one or more of the suspected area(s). These include:
  - a) Oral expression;
  - b) Listening comprehension;
  - c) Written expression;
  - d) Basic reading skills;
  - e) Reading comprehension;
  - f) Reading fluency
  - g) Mathematics calculation; or
  - h) Mathematics problem solving

This evidence must indicate performance that is significantly below the mean on a cluster, composite, or two (2) or more subtest scores of a norm-referenced, standardized, achievement assessment in the specific academic area(s) of suspected disability. There are cases when the use of norm-referenced

STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017

assessment is not appropriate, for example, students who are culturally and linguistically diverse. Refer to guidance documents regarding procedures on evaluating students who are culturally and linguistically diverse and the use of preponderance of evidence.

AND

- iii. Evidence of a pattern of strengths and weaknesses in psychological processing skills that impact learning.

An assessment of psychological processing skills is linked to the failure to achieve adequately in the academic area(s) of suspected disability and must rely on standardized assessments. These assessments must be conducted by a professional who is qualified to administer and interpret the assessment results. The student's performance on a psychological processing assessment demonstrates a pattern of strengths and weaknesses that help explain why and how the student's learning difficulties occur. Such tests may include measures of memory, phonological skills, processing speed as well as other measures which explicitly test psychological processing.

AND

- iv. The following criteria must be considered when evaluating the student's low achievement. The team must determine that the student's learning difficulty is *not* primarily the result of:
  - a) a visual, hearing, or motor impairment
  - b) an intellectual disability
  - c) an emotional disturbance
  - d) environmental or economic disadvantage
  - e) cultural factors
  - f) Limited English Proficiency (LEP)

#### 10. Multiple Disabilities

**Definition:** Multiple disabilities are two or more co-existing severe impairments, one of which usually includes an intellectual disability, such as intellectual disability/blindness, intellectual disability/orthopedic, etc. Students with multiple disabilities exhibit impairments that are likely to be life long, significantly interfere

with independent functioning, and may necessitate environmental modifications accommodations or adaptations to enable the student to participate in school and society. The term does not include deaf-blindness.

**State Eligibility Criteria for Multiple Disabilities:** An evaluation team will determine that a student is eligible for special education services as a student with multiple disabilities when all of the following criteria are met:

- a. An evaluation that meets the procedures outlined in Section 5 of this chapter has been conducted.
- b. The student meets eligibility criteria for severe concomitant impairments, the combination of which causes such significant educational problems that the student cannot be accommodated by special education services designed solely for one of the disabilities.
- c. The student meets State Eligibility Criteria as outlined for each disability category.
- d. The student's condition adversely affects educational performance.
- e. The student needs specially designed.

#### 11. Orthopedic Impairment

**Definition:** Orthopedic impairment means a severe physical limitation that adversely affects a student's educational performance. The term includes impairments caused by congenital anomaly (clubfoot, or absence of an appendage), an impairment caused by disease (poliomyelitis, bone tuberculosis, etc.), or an impairment from other causes (cerebral palsy, amputations, and fractures or burns that cause contracture).

**State Eligibility Criteria for Orthopedic Impairment:** An evaluation team will determine that a student is eligible for special education services as a student with an orthopedic impairment when all of the following criteria are met:

- a. An evaluation that meets the procedures outlined in Section 5 of this chapter has been conducted.
- b. The student exhibits a severe orthopedic impairment. The term includes congenital anomalies, impairments caused by disease, and impairments from other causes that are so severe as to require special education services.
- c. The student has documentation of the condition by a physician or other qualified professional.

- d. The student's condition adversely affects educational performance.
- e. The student needs specially designed instruction.

**12. Speech or Language Impairment: Language**

**Definition:** A language impairment exists when there is a disorder or delay in the development of comprehension and/or the uses of spoken or written language and/or other symbol systems. The impairment may involve any one or a combination of the following:

- a. the form of language (morphological and syntactic systems);
- b. the content of language (semantic systems); and/or
- c. the function of language in communication (pragmatic systems).

A language disorder does not exist when language differences are due to non-standard English or regional dialect or when the evaluator cannot rule out environmental, cultural, or economic disadvantage as primary factors causing the impairment. The evaluation team is encouraged to ask if a hearing screening has been completed. Also note, a student can be considered as having a Language Impairment if the criteria for Deaf or Hard of Hearing have not been met.

**State Eligibility Criteria for Language Impairment:** An evaluation team will determine that a student is eligible for special education and related services as a student who has a language impairment when all of the following criteria are met:

- a. An evaluation that meets the procedures outlined in Section 5 of this chapter has been conducted.
- b. At least two procedures, at least one of which yields a standard score, are used to assess receptive language and/or expressive language.
- c. The student has attained scores on a standardized measure that are 1.5 standard deviations or more below the mean, or at or below the 7<sup>th</sup> percentile, in either receptive or expressive language.
- d. The student's disability adversely affects educational performance.
- e. The student needs specially designed instruction. (Speech/language therapy can be specially designed instruction or a related service.)

Caution is advised when evaluating a student whose native language is other than English. The acquisition of the English language is not to be mistaken as a language impairment.

### 13. Speech or Language Impairment: Speech

The term speech impairment includes articulation/phonology disorders, voice disorders, or fluency disorders that adversely impact a child's educational performance. The following eligibility criteria and minimum assessment procedures have been established for all three types of speech impairments.

#### a. Articulation/Phonology Disorder

**Definition:** Articulation is the ability to speak distinctly and connectedly. Articulation disorders are incorrect productions of speech sounds including omissions, distortions, substitutions, and/or additions that may interfere with intelligibility. Phonology is the process used in our language that has common elements (sound patterns) that affect different sounds. Phonology disorders are errors involving phonemes, sound patterns, and the rules governing their combinations.

- 1) An articulation/phonology disorder exists when:
  - i. the disorder is exhibited by omissions, distortions, substitutions, or additions;
  - ii. the articulation interferes with communication and calls attention to itself; and
  - iii. the disorder adversely affects educational or developmental performance.
- 2) An articulation/phonology disorder does not exist when:
  - i. errors are temporary in nature or are due to temporary conditions such as dental changes;
  - ii. differences are due to culture, bilingualism or dialect, or from being non-English speaking; or
  - iii. there are delays in developing the ability to articulate only the most difficult blends of sound or consonants within the broad range for the student's age.

**State Eligibility Criteria for Articulation/Phonology Disorder:** An evaluation team will determine that a student is eligible for special education and related services as a student who has an articulation/phonology disorder (speech impairment) when all of the following criteria are met:

- 1) An evaluation that meets the procedures outlined in Section 5 of this chapter has been conducted.
- 2) At least two procedures are used to assess the student, one of which yields a standard score.
- 3) The student must have a score that is at least 1.5 standard deviations below the mean, or at or below the 7th percentile, on a standardized articulation/phonological assessment, or the speech impairment is judged as moderate on the standardized measure for students ages three (3) through twenty-one (21) years.
- 4) The student's disability adversely affects educational performance.
- 5) The student needs specially designed instruction. (Speech/language therapy can be specially designed instruction or a related service.)

**b. Fluency Disorder**

**Definition:** A fluency disorder consists of stoppages in the flow of speech that is abnormally frequent and/or abnormally long. The stoppages usually take the form of repetitions of sounds, syllables, or single syllable words; prolongations of sounds; or blockages of airflow and/or voicing in speech.

- 1) A fluency disorder exists when an abnormal rate of speaking, speech, interruptions, repetitions, prolongations, blockages of airflow and/or voicing interferes with effective communication.
- 2) A fluency disorder does not exist when developmental dysfluencies are part of normal speech development and do not interfere with educational or developmental performance.

**State Eligibility Criteria for Fluency Disorder:** An evaluation team will determine that an individual is eligible for special education and related services as a student who has a fluency disorder (speech impairment) when all of the following criteria are met:

- 1) An evaluation that meets the procedures outlined in Section 5 of this chapter has been conducted.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

- 2) The student has a fluency rating of moderate or severe on the Fluency Communication Rating Scale for student's age three (3) through twenty-one (21) years. See the documents section of this chapter for the Fluency Communication Rating Scale.
- 3) The student's disability adversely affects educational performance.
- 4) The student needs specially designed instruction. (Speech/language therapy can be a primary or a related service.)

**c. Voice Disorder**

**Definition:** Voice disorders are the absence or abnormal production of voice quality, pitch, intensity, or resonance. Voice disorders may be the result of a functional or an organic condition.

A student who has a suspected laryngeal-based voice disorder and has not been evaluated by an ear, nose, and throat (ENT) physician (otorhinolaryngologist/otolaryngologist) may not receive voice therapy services from a speech-language pathologist.

- 1) A voice disorder exists when the vocal characteristics of quality, pitch, intensity, or resonance:
  - i. interfere with communication;
  - ii. draw unfavorable attention to the speaker;
  - iii. adversely affect the speaker or listener; or
  - iv. are inappropriate to the age and gender of the speaker.
- 2) A voice disorder does not exist when the vocal characteristics of quality, pitch, intensity, or resonance:
  - i. are the result of temporary physical factors such as allergies, colds, or abnormal tonsils or adenoids;
  - ii. are the result of regional dialectic or cultural differences or economic disadvantage; or
  - iii. do not interfere with educational or developmental performance.

**State Eligibility Criteria for Voice Disorder:** An evaluation team will determine that a student is eligible for special education and related services as a student who has a voice disorder (speech impairment) when all of the following criteria are met:

- 1) An evaluation that meets the procedures outlined in Section 5 of this chapter has been conducted.
- 2) The student has a voice production rating of moderate or severe on the Voice Rating Scale for students aged three (3) through twenty-one (21) years. See the documents section of this chapter for the Voice Rating Scale.
- 3) An ear, nose, and throat (ENT) physician's (otorhinolaryngologist) statement documents that voice therapy is not contraindicated.
- 4) The student's disability adversely affects educational performance.
- 5) The student needs specially designed instruction. (Speech/language therapy can be a primary or a related service.)

See the documents section of this chapter for information on documenting adverse effects on educational performance for students with speech/language disorders.

NOTE: A student may receive speech or language services if he or she is eligible for special education under another disability category and needs speech or language services as a related service in order to benefit from special education without meeting the eligibility criteria for speech and language impairment.

#### 14. Traumatic Brain Injury (TBI)

**Definition:** Traumatic brain injury refers to an acquired injury to the brain caused by an external physical force resulting in a total or partial functional disability or psychosocial impairment, or both, that adversely affects educational performance. The term applies to open or closed head injuries resulting in impairments in one or more areas such as cognition, language, memory, attention, reasoning, abstract thinking, judgment, problem solving, sensory, perceptual and motor abilities, psychosocial behavior, physical functions, information processing, and speech. The term does not apply to congenital or degenerative brain injuries or to brain injuries induced by birth trauma.

**State Eligibility Criteria for Traumatic Brain Injury:** An evaluation team will determine that a student is eligible for special education services as a student who has a traumatic brain injury when all of the following criteria are met:

- a. An evaluation that meets the procedures outlined in Section 5 of this chapter has been conducted.
- b. The student has an acquired injury to the brain caused by an external physical force resulting in a total or partial functional disability or psychosocial impairment, or both.
- c. The student has documentation of a traumatic brain injury.
- d. The student's condition adversely affects educational performance.
- e. The student needs specially designed instruction.

#### 15. Visual Impairment Including Blindness

**Definition:** Visual impairment refers to an impairment in vision that, even with correction, adversely affects a student's educational performance. The term includes both partial sight and blindness. Partial sight refers to the ability to use vision as one channel of learning if educational materials are adapted. Blindness refers to the prohibition of vision as a channel of learning, regardless of the adaptation of materials.

**State Eligibility Criteria for Visual Impairment:** An evaluation team will determine that a student is eligible for special education services as a student with a visual impairment when all of the following criteria are met:

- a. An evaluation that meets the procedures outlined in Section 5 of this chapter has been conducted.
- b. The student has documentation of a visual impairment, not primarily perceptual in nature, resulting in measured acuity of 20/70 or poorer in the better eye with correction, or a visual field restriction of 20 degrees as determined by an optometrist or ophthalmologist.
- c. The student's physical eye condition, even with correction, adversely affects educational performance.
- d. The student needs specially designed instruction.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

**DOCUMENTATION OF ADVERSE EFFECTS  
ON EDUCATIONAL PERFORMANCE  
FOR STUDENTS WITH SPEECH/LANGUAGE DISORDERS (SLD)**

Documentation of adverse effects on educational performance can be gathered from a thorough assessment of communication skills. The assessment shall include student, parent, and teacher input.

Information shall be recorded by the speech-language pathologist (SLP) on the *Eligibility Report* form.

An assessment of a student's ability to communicate, rather than isolated skill assessment, will provide information on how the impairment affects the student overall. The following errors and problems should be considered when determining how the student's ability to communicate may adversely affect educational performance:

1. Sound errors, voice quality, or fluency disorders inhibit the student from reading orally in class, speaking in front of the class, or being understood by teachers, peers, or family members.
2. Sound errors, voice quality, or fluency disorders embarrass the student. Peer relationships suffer as a result, or peers may make fun of the student.
3. Sound errors cause the student to make phonetic errors in spelling or have difficulty in phonics.
4. Grammatical errors create problems with a student's orientation in time.
5. Morphological errors inhibit the student from using or making complete sentences.
6. Semantic problems slow the student's ability to follow directions, give directions, make wants and needs known, make oneself understood, relate information to others, or fully participate in daily living.

Section 6. Students with Disabilities in Adult Prisons .....107

**Chapter 5**  
**Individualized Education Programs**

If a student is eligible for special education services, they have met the requirements of eligibility under the IDEA. Eligibility requires a student to meet the following three prongs: 1) the student has a disability that meets the criteria; 2) the disability adversely affects the student's educational performance; and 3) the student requires specially designed instruction.

Special education means specially designed instruction, at no cost to the parents, to meet the unique needs of a student with a disability including instruction conducted in the classroom, the home, hospitals, institutions, and other settings. The definition of special education also includes the following: instruction in physical education, speech/language pathology, travel training, and vocational education.

Specially designed instruction means adapting, as appropriate to the needs of an eligible student, the content, methodology, or delivery of instruction to (1) address the unique needs of the student that result from his or her disability and (2) to ensure access to the general curriculum so that the student can meet the Idaho Content Standards and Idaho Core Standards that apply to all students.

The Individualized Education Program (IEP) is a written document that is developed for each eligible student with a disability and documents the specially designed instruction and related services. The IEP is the product of team collaboration among a parent/adult student, district personnel, and other IEP team members who, through full and equal participation, identify the unique needs of a student with a disability and plan the special education services to meet those needs.

In developing each student's IEP, the IEP team shall consider: 1) the strengths of the student; 2) the concerns of the parents for enhancing the education of their child; 3) the results of the initial or most recent evaluation of the student; and 4) the academic achievement, developmental, and functional needs of the student.

**Section 1. IEP Initiation**

**A. Purpose of Meeting**

The primary purpose of an IEP team meeting is to design an IEP that shall meet the unique needs of a student with a disability. The IEP team determines the special education and related services reasonably calculated to enable the student to receive educational benefits in the least restrictive environment. The parent/adult student shall be invited to the meeting and participate meaningfully. (Note: transition age students shall be invited to the IEP meeting). The IEP team members should come prepared to discuss specific information about the student's individual needs and the type of services to be provided to address those needs.

The meeting format should invite open discussion that allows participants to identify and consider all the relevant needs of the student related to his or her disability and what is necessary to provide access to, participate in, and make progress in the general education curriculum. Placement decisions shall be considered *after* the special education services are determined and shall not be the determining factor in developing the IEP content.

Informal or unscheduled conversations involving district personnel on various issues (e.g., teaching methodology, lesson plans, or coordination of service provisions) are not considered a meeting as long as no decisions are made regarding issues addressed on the student's IEP. A meeting does not include preparatory activities in which district personnel engage to develop a proposal or a response to a parent/adult student proposal that will be discussed at a later meeting.

#### **B. Team Decision Making**

The IEP meeting serves as a communication vehicle between IEP team members enabling them, as equal participants, to make joint, informed decisions regarding the student's special education services. All members of the IEP team are expected to work toward consensus regarding IEP decisions to ensure that the student receives a free appropriate public education (FAPE). Consensus means consent of all IEP team members to support the decision of the team, which requires that all members of the team have had an opportunity for meaningful participation.

If there is a lack of consensus between the parent/adult student, district personnel, and other IEP team members regarding an IEP decision, then school personnel on the IEP team should seek consensus within the school team and make the decision providing written notice to the parent/adult student. If there is a lack of consensus among school personnel, then the district representative on the IEP team shall make the decision and provide written notice to the parent/adult student. The parent/adult student should be made aware of the procedures in Section 2J of this chapter, "Parent/Adult Student Objection to the IEP" and their procedural safeguards, including due process rights.

#### **C. When IEP Meetings Are Held**

An IEP meeting shall be held for one or more of the following reasons:

1. to develop an IEP within thirty (30) calendar days of determination that the student needs special education and related services;
2. to review the IEP periodically, but no longer than one year (365 days) from the date of development of the current IEP, with the IEP in effect at the beginning of each school year;
3. when another agency fails to deliver transition or other services outlined in the IEP;
4. to consider revisions to the IEP if there is any lack of expected progress toward annual goals and in the general education curriculum, where appropriate;

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

5. at a reasonable request (as determined by the district) of any member of the IEP team (Note: Written notice shall be provided the parent/adult student who requests an IEP meeting when a district refuses to hold one);
6. to review behavioral intervention strategies and/or develop a behavioral plan as part of the IEP;
7. to address the IDEA discipline requirements (see Chapter 12); or
8. to review the results of any reevaluation or independent educational evaluation (IEE).

NOTE: Under the IDEA, an IEP team meeting may not be required to amend the IEP (see IEP Amendments).

**D. IEP Team Members and Roles**

The IEP team is a group of individuals responsible for developing, reviewing, or revising an IEP for a student with a disability.

<b>Role</b>	<b>Description</b>
Parent of the student <i>or</i> Adult Student if rights have transferred	The term “parent” refers to a biological or adoptive parent, foster parent, a judicially decreed guardian (does not include State agency personnel if the student is a ward of the state), a person acting in place of a parent, or a surrogate parent who has been appointed by the district. The term “acting in place of a biological or adoptive parent” includes persons such as a grandparent, stepparent, or other relative with whom the student lives as well as persons who are legally responsible for a student’s welfare. A foster parent may act as a parent if the natural parent’s authority to make educational decisions on behalf of his or her child has been terminated by law. A foster parent shall be an individual who is willing to make educational decisions required of a parent, and has no interest that would conflict with the interests of the student. If more than the biological or adoptive parents meet the definition of parent, the biological or adoptive parents serve as the parents in the IEP process, unless a judicial decree or order identifies a specific person or persons to make educational decisions for the student.  An “adult student” is a student with a disability who is eighteen (18) years of age or older to whom special education rights have transferred under the IDEA and Idaho Code. (See Chapter 11, Section 2C, for more information.) In this case, the parent may attend the IEP meeting as an individual who has knowledge or special expertise regarding the student at the invitation of the adult

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

<b>Role</b>	<b>Description</b>
	student or the district.
District Representative	The district representative or designee shall be qualified to provide or supervise the provision of special education to meet the unique needs of students with disabilities. The representative shall be knowledgeable about the general education curriculum and about the availability of resources in the district. They shall have the authority to allocate resources and to ensure that the IEP will be implemented. Examples of the district representative include the building principal, the special education director, the district superintendent and others who meet the criteria described above. The district representative may be another member of the IEP team if all the criteria above are met.
Special Education Teacher/Provider—not less than one	This individual generally will be the student’s special education teacher or service provider who is responsible for implementing the student’s IEP. For example, in the case of a student receiving services from a speech-language pathologist, but not a special education teacher, it is more appropriate for the speech-language pathologist to fill this role on the IEP team.
General Education Teacher—not less than one	A general education teacher of the student is required to participate in developing the IEP if a student is, or may be, participating in the general education environment. Regardless, a representative that is knowledgeable of the general education curriculum at the student’s grade level shall be present.  For preschool-age students, the general education teacher may be the kindergarten teacher or an appropriate designee. Designees at the preschool level may include a care provider, Head Start teacher, or community preschool teacher if that person meets State and/or national licensing standards.
Individual who can interpret evaluation results and implications	This person may be someone who participated in the evaluation of the student. He or she shall be able to explain the results, the instructional implications, and the recommendations of the evaluation.
Student	Whenever appropriate, the IEP team includes the student with a disability. A student shall be invited by the district to attend any IEP meeting at which post-secondary goals and transition services needed to assist the student in reaching those goals will be discussed. If the student does not attend the IEP team meeting, the district shall take other steps to ensure that the student’s preferences and interests are considered.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

<b>Role</b>	<b>Description</b>
Representative of a Private School (if applicable)	If a student is enrolled in or referred to a private school, the district shall ensure that a representative of the private school is invited to the IEP meeting. If a representative cannot attend, the district shall use other methods to ensure participation by the private school, including individual or conference telephone calls.
Representative of Transition Agency(s) (Parent/Adult student consent shall be obtained prior to inviting the Transition Agency Representative to participate in the IEP team meeting).	If transition services are being discussed, a representative of any participating agency that is likely to be responsible for providing or paying for transition services shall be invited (with the prior consent of a parent/adult student). If a representative does not attend, steps should be taken to obtain participation from the agency in transition planning.
Part C Coordinator or Representative	A Part C coordinator or other representative may be invited by the district to the IEP meeting. Parents shall be informed of their right to request an invitation of an Infant Toddler Program representative(s) to the initial IEP meeting.
Other	At the discretion of the parent/adult student or the district, other individuals who have knowledge or special expertise regarding the student, including related service personnel, may be included as IEP team members. The determination of having knowledge and special expertise regarding the student shall be made by the parent/adult student or district person who invited the individual to be a member of the IEP team.

NOTE: The general education teacher, special education teacher, district representative, or individual who can interpret implications of evaluation results may be excused from an IEP meeting, in whole or in part, if the parent/adult student and district agree in writing. If the meeting deals with the excused member's areas of the curriculum and/or services, he or she shall provide written input to the IEP team prior to the meeting. Written input shall include substantive data (e.g., based on assessment, providing meaningful guidance to the team, regarding the purpose of the meeting, reflecting on general education curriculum). If a district representative is excused, a staff member in attendance shall have the authority to bind the district to the decisions of the team.

**E. The General Educator's Role in IEP Development**

If a student is or may be participating in the general education curriculum or environment, not less than one of the student's general education teachers shall participate to the extent appropriate in developing the IEP. The general education teacher's role in the development, review, and revision of the IEP includes:

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

1. discussion of the student's involvement and progress in the general education curriculum, if known;
2. determination of appropriate positive behavioral interventions and other strategies for the student; and
3. determination of supplementary aids and services, program accommodations/adaptations, and supports for school personnel.

**F. Invitation to IEP Team Meetings**

To the extent possible, the district should encourage the consolidation of all IEP team meetings, including meetings that may involve eligibility, reevaluation and IEP development.

The district shall meet the following requirements.

1. Schedule the meeting at a place and time mutually agreed on by the parent/adult student and the district.
2. Invite the parent/adult student, and if applicable the secondary transition age student, to the meeting early enough to ensure that he or she can attend. The district shall keep a record of this invitation. The invitation shall include the following:
  - a. the purpose(s), time, and location of the meeting;
  - b. who will attend the meeting by role;
  - c. information regarding the parent's/adult student's right to bring other people to the meeting and invite a Part C representative if appropriate; and
  - d. notification that post-secondary goals and transition services will be discussed, as applicable.

The invitation should clarify the parent's/adult student's (or secondary transition age student's) role on the team and request that he or she come prepared to discuss the unique needs and characteristics of the student, the types of services needed, and the goals that would indicate the success of the services.

3. Invite the student, if appropriate or required, to attend and participate in his or her IEP team meeting. If the student is a minor, the parent shall make the decision regarding the student's attendance. If a purpose of the meeting is to consider transition, and the student does not attend, the district shall take other steps to ensure that the student's preferences and interests are considered.
4. The invitation may be either written or oral. In either case, the district shall document that all the required components noted in item 2 above were included in the

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

invitation. In addition, the parent/adult student shall be given a physical copy of the *Procedural Safeguards Notice* once annually, preferably at the annual review, unless the parent requests additional copies.

5. When one of the purposes of the IEP team meeting is to consider transition services, the invitation shall:
  - a. indicate this purpose;
  - b. invite the student; and
  - c. identify any other agency that will be invited, with parent's/adult student's consent, to send a representative.
6. The district shall take appropriate action to ensure that a parent/adult student understands the proceedings at an IEP team meeting, including arranging for an interpreter for a parent/adult student who has hearing loss or whose native language is other than English.
7. The IEP team may meet without the parent/adult student if he or she cannot attend the meeting or cannot be convinced to attend the meeting. However, the district shall document its attempts to arrange a mutually agreed upon time and place for the meeting. Documentation could include records of telephone calls or conversations, copies of correspondence sent to the parent/adult student and any responses received, and detailed records of any visits made to the parent/adult student. If a meeting is held without the parent/adult student, the district shall offer and document alternative methods, such as conference calls, to gain his or her participation in the development of the IEP.

Alternatives to physical meetings such as video and telephone conferencing may take the place of physical IEP meetings if the parent/adult student and district agree.

**Section 2. IEP Development**

Nothing requires additional information be included in a student's IEP beyond what is explicitly required by IDEA or requires the IEP team to include information under one component of a student's IEP that is already contained under another component of the student's IEP.

NOTE: IEP team meeting minutes are not part of the official IEP document.

**A. General Demographic Components for All IEPs**

All IEPs shall include the date of the IEP meeting and the following general demographic components: the student's name as it appears in school records, native language, birth date, and

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

identification number (for State reporting or Medicaid purposes only), names of parents, address, phone number, school, and grade.

**B. Documentation of Participants**

The district shall ensure the attendance and participation of the IEP team members at the IEP meeting. Documentation of attendance can be accomplished by listing team member roles on the IEP and checking their attendance status. Prior to the beginning of the meeting, an excusal form, with the parent/adult student's signature of approval, shall be attached identifying any required district members not present at the IEP team meeting.

The attendance list is not a reflection of agreement or disagreement with the IEP; it is only an indication of attendance. As with any team member, the parent's/adult student's inclusion on the list does not indicate agreement or disagreement with the IEP contents. If the parent/adult student disagrees with all or part of the IEP, the district should remind the parent/adult student that he or she may file a written objection. Any participant at the IEP team meeting may file a minority report if he or she disagrees with a program decision. A minority report shall not prevent the implementation of an IEP team decision.

NOTE: See Section 2J of this chapter for additional information on parent/adult student objections.

**C. Present Levels of Academic Achievement and Functional Performance, Goals, and Benchmarks/Objectives**

The IEP identifies present levels of academic achievement and functional performance and measurable goals that enable the IEP team to track the effectiveness of services and to report progress toward goals.

1. Statements of present levels of academic achievement and functional performance in an area of need include:
  - a. How a school-age student's disability affects his or her involvement and progress in the general education curriculum (i.e., the same curriculum used by students without disabilities).
  - b. For preschool students, present levels of academic achievement and functional performance should describe how the disability affects the student's participation in appropriate activities.
2. Although the content of present levels of academic and functional performance statements are different for each student individual present level of academic and functional performance statements will meet the following requirements:
  - a. the statement shall be written in objective, measurable terms and easy-to-understand non-technical language;

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

- b. the other components of the IEP, including special education services, annual goals, and, if applicable, benchmarks/objectives for students who participate in Alternate Assessments based on Alternate Achievement Standards shall show a direct relationship with the content of present levels of academic and functional performance;
  - c. the statement shall provide baseline data for goal development;
  - d. the statement shall reference general education Idaho Content Standards or Idaho Core Standards or Idaho Employability Skills for Career Ready Practice or Idaho Early Learning Guidelines (eGuidelines), as applicable;
  - e. a statement of the student's strengths and needs; and
  - f. a statement how a student's disability affects his or her involvement and progress in the general education curriculum (i.e., the same curriculum used by students without disabilities).
3. Annual goals shall reflect the needs described in the present levels of academic and functional performance statements. Measurable academic achievement, developmental, and functional annual goals are designed to meet the student's needs that result from the student's disability, to enable the student to be involved in and make progress in the general education curriculum, and to meet each of the student's other educational needs that result from the student's disability.
- a. A goal is a written, measurable statement, developed from the baseline data, describing what a student is reasonably expected to accomplish within the time period covered by the IEP, generally one year.
  - b. Goals are written to enable the student to be involved in and make progress in the general education curriculum and to meet other educational needs that result from the disability.
  - c. A goal shall include the behavior, the performance criteria, and the evaluation procedure.
4. For students taking Alternate Assessments based on Alternate Achievement Standards a description of benchmarks or short-term objectives. The district has the discretion which benchmarks/objectives as described in this paragraph for all students eligible for IEP services to use.

**D. Progress Toward Goals**

The IEP shall include a statement describing:

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

1. How the student's progress toward IEP goals will be measured and the progress monitoring schedule;
2. How and when the parent/adult student will be informed of the student's progress toward the annual goals, including the extent to which progress is sufficient to enable the student to achieve the goals by the end of the IEP time period.

Periodic written progress statements related to progress toward annual goals will be reported, at minimum, concurrent with the issuance of report cards.

**E. Statements of Special Education and Related Services**

Each student's IEP shall describe the specific special education and related services, based on peer-reviewed research to the extent practicable, which will be provided to or on behalf of the student. Special education includes specially designed instruction to meet the unique needs of the student.

The term "related services" refers to transportation and such developmental, corrective, and other supportive services required to assist a student with a disability to benefit from special education as described in the IEP. These services include, but are not limited to:

- audiology
- speech therapy
- language therapy
- psychological services
- physical therapy
- occupational therapy
- therapeutic recreation
- early identification and assessment of students' disabilities
- rehabilitation counseling services
- orientation and mobility services
- medical services for diagnostic or evaluative purposes
- school nurse services
- social work services in school
- supports for school staff
- parent counseling and training. Parent counseling and training includes helping a parent (a) understand child development and the special needs of his or her child and (b) acquire skills to support the implementation of his or her child's IEP.
- interpreter services

NOTE: The Idaho Educational Interpreter Act (Title 33, Chapter 13) was implemented on July 1, 2009, this statute establishes standards for all educational interpreters in Idaho. The complete statute can be found at: <http://www3.state.id.us/idstat/TOC/33013KTOC.html>

The above list of related services is not exhaustive and may include other developmental, corrective, or supportive services, transition services or assistive technology. Although services

may be of benefit to a student with a disability, all of the services listed above may not be required for each individual student. Related services are the responsibility of the district only if the IEP team determines they are required to assist the student to benefit from special education. Further, the student is not entitled to related services if (a) he or she is not eligible for special education or (b) the parent/adult student does not consent to initial provision of special education services.

EXCEPTION: “Related Services” does not include a medical device that is surgically implanted or the replacement of such device, the optimization of that device’s functioning (e.g., mapping), maintenance of that device, or the replacement of that device. The district is responsible to appropriately monitor and check devices to make sure the devices are functioning properly. This responsibility applies to devices that are needed to maintain the health and safety of the child, including breathing, nutrition, or operation of other bodily functions, while the child is transported to and from school or is at school.

THIRD PARTY PAYERS: Consent from the parents/adult student is required when the district bills Medicaid or the parent’s insurance for services provided. See Chapter 11 for details.

#### **F. Supplementary Aids, Services, and Other IEP Considerations**

Supplementary aids and services may include general education curriculum accommodations and/or adaptations, support for school staff, positive behavioral intervention plans, extended school year services, transportation, transition services, assistive technology services, and travel training services deemed appropriate by the IEP team shall be provided whether or not the district currently has these services in place.

The description of services in the IEP shall:

1. Identify the program accommodations and supplementary aids to be provided to the student in the areas of need.
2. List the specific services that will meet the unique needs of the student, allowing him or her to advance appropriately toward attaining the annual goals, and:
  - a. be involved in and make progress in the general education curriculum;
  - b. participate in extracurricular and other nonacademic activities; and
  - c. be educated and participate with other students with disabilities and with students without disabilities to the maximum extent appropriate.

NOTE: The public agency shall ensure that each student with a disability has the supplementary aids and services determined by the student’s IEP team to be appropriate and necessary for the student to participate in nonacademic settings.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

3. State the projected starting date and expected duration of the services, and accommodations/adaptations.
4. List the anticipated time per session and frequency of sessions per week or month. The amount of service may not be stated as a range.
5. State the location where services and accommodations/adaptations will be provided (such as a general education classroom, resource room, etc.) Note: Location does not mean specific site.

Based on the unique needs of each student, the IEP team should consider any of the following services that may be appropriate for the student and should document such services on the IEP accordingly:

1. Supplementary Aids and Services

“Supplementary aids and services” means aids, services, and other supports that are provided in general education classes or other education-related settings and in extracurricular and nonacademic settings to enable students with disabilities to be educated with students without disabilities to the maximum extent appropriate in accordance with LRE requirements.

The determination of which supplementary aids and services are appropriate for a particular student shall be made on an individual basis. Supplementary aids and services may include the following: assistance of an itinerant special education teacher, related service provider, or paraprofessional; support or training for the general educator; use of resource services; provision of note takers; supports for extracurricular or other nonacademic activities; and supports for participation in statewide or district wide achievement testing.

2. Accommodations and Adaptations

NOTE: “Modifications” include accommodations and adaptations. Idaho uses the terms accommodations and adaptations to describe two separate instructional and assessment practices.

Accommodations and adaptations include any changes that allow students with disabilities the same opportunity as students without disabilities to participate in and benefit from the educational program, activities, and services of the district.

Accommodations are intended to make educational opportunities more accessible. This may involve the setting, communication modality, equipment, and/or supplemental aids and services. Examples include Braille editions, large print, pencil grips, tape recorders, note takers, and computers with spell check.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

Accommodations are changes in the curriculum, instruction, or testing format or procedures that enable students with disabilities to participate in a way that allows them to demonstrate their abilities rather than disabilities. Accommodations are generally considered to include assistive technology as well as changes in presentation, response, timing, scheduling, and settings that do not fundamentally alter the requirements. Accommodations do not invalidate assessment results and do not fundamentally alter the requirements or course expectations.

Adaptations are changes in educational expectations for the student with a disability compared to peers without disabilities. These adaptations include actual changes in the general education curriculum and instruction or the use of an alternative or supplemental curriculum. Adaptations include strategies such as reading aloud the reading portion of a test, using spell/grammar check for language arts assessments, and substituting out-of-level testing. Adaptations fundamentally alter requirements and invalidate assessment results and provide non-comparable results. Examples include fewer concepts to be mastered, different test questions, and material at a different reading level.

Whenever the IEP team determines that accommodations and/or adaptations are needed to ensure academic progress, these shall be indicated in the IEP. Any accommodations and/or adaptations required in physical education, vocational education, and statewide or district wide assessments shall be included in the IEP.

3. Assistive Technology Devices and/or Services

The district shall ensure that assistive technology devices and/or services are made available to a student, if required, as special education, related services, or supplementary aids and services. The following points are definitions and clarifications of terms:

- a. "Assistive technology device" means any item, piece of equipment, or product system, whether acquired commercially, modified, or customized, that is used to increase, maintain, or improve the functional capabilities of a student with a disability. The term does not include a device that is surgically implanted or the replacement of such device.

The district shall permit the student to use school-purchased assistive technology devices at home and in other settings if the IEP team determines that the student needs access to these devices in non-school settings to receive FAPE. An example of this would be to complete homework. The district may hold a parent/adult student liable for the replacement or repair of an assistive technology device that is purchased or otherwise procured by the district if it is lost, stolen, or damaged because of negligence or misuse at home or in another setting outside of school time.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

Assistive technology devices should be designed using “universal design” principles. The term “universal design” means a concept or philosophy for designing and delivering products and services that are usable by people with the widest possible range of functional capabilities. This includes products and services that are directly accessible (without requiring assistive technologies) and products and services that are interoperable with assistive technologies.

- b. “Assistive technology service” means any service that directly assists a student with a disability in the selection, acquisition, or use of an assistive technology device. The term includes the following:
  - 1) an evaluation of the student’s assistive technology needs, including a functional assessment in the student’s customary environment;
  - 2) purchasing, leasing, or otherwise providing for the acquisition of assistive technology devices;
  - 3) selecting, designing, fitting, customizing, adapting, applying, maintaining, repairing, or replacing assistive technology devices;
  - 4) coordinating and using other therapies, interventions, or services with assistive technology devices, such as those associated with existing education and rehabilitation plans and programs;
  - 5) training or technical assistance for a student with a disability or, if appropriate, that student’s family; and
  - 6) training or technical assistance for professionals, including individuals providing education or rehabilitation services, employers, or other individuals who provide services or are otherwise substantially involved in the major life functions of a student with a disability.
- c. The district shall ensure that the hearing ~~aids-technology~~ worn by deaf or hard-of-hearing students in school are functioning properly.
- d. The district is responsible to appropriately monitor and check surgically implanted devices to make sure the devices are functioning properly, if the team has determined that those services are necessary. This responsibility applies to devices that are needed to maintain the health and safety of the child, including breathing, nutrition, or operation of other bodily functions, while the child is transported to and from school or is at school.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

4. Extended School Year Services

The district shall provide extended school year (ESY) services for students with disabilities who qualify for such services. The ESY programs for eligible students shall meet the requirements of FAPE. The student's educational program is based on individual needs and is not determined by what programs are readily available within the district. The student cannot be required to fail, or to go for an entire school year without ESY services, simply to prove a need. The IEP team shall consider the following in the development and provision of an ESY program:

- a. The term "extended school year services" means special education and/or related services that are provided beyond the regular school year:
  - 1) to a student with a disability;
  - 2) in accordance with the student's IEP; and
  - 3) at no cost to the parent/adult student.

The goal of ESY services is to assist students with disabilities with the emergence and maintenance of specific IEP goals addressed during the school year preceding the ESY. These may include goals related to independence, behavior, socialization, communication, and academics. The ESY services for special education students provide a different focus from general summer school programs.

- b. The ESY services shall be considered in light of the totality of the circumstances, including the following:
  - 1) Emerging skill: Few, if any, gains are made during the regular school year. A skill is in the process of emerging, and the IEP team believes that with ESY services the student would make reasonable gains; or
  - 2) Regression-Recoupment: The student would regress to such an extent and the amount of time required to relearn a skill or behavior becomes so significant that the student would be unable to benefit from his or her special education; or
  - 3) Self-Sufficiency: An interruption in services would threaten the acquisition of critical life skills that aid in the student's ability to function as independently as possible, thereby continuing the student's reliance on caretakers, including institutionalized care. Critical life skills relate to those skills that lead to independent functioning. Development of these skills can lead to reduced dependency on future caretakers and enhance the student's integration with individuals without disabilities. Skills may include such things as toileting,

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

feeding, mobility, communication, dressing, self-help, and social/emotional functioning.

- c. Decisions concerning ESY services shall be based on collected data and written documentation. Types of data and information may include, but are not limited to, the following:
  - 1) Criterion-referenced test data: Consider daily/weekly probes or pre-test/post-test data.
  - 2) Norm-referenced test data: Consider pre-test/post-test data.
  - 3) Anecdotal records: Consider information collected throughout the school year.
  - 4) Physical, mental, or emotional health factors: Consider the educational, medical, and psychological records of the student as well as the prognosis or judgments of educators, medical personnel, parents, and others that work with the student. Consider degenerative types of difficulties that may become intensified during breaks in educational programming.
  - 5) History: Consider evidence of past regression or past ESY services. The IEP team should not automatically assume that a student who has received ESY services in the past will be eligible for ESY services in the future, but it is a factor to consider.
  - 6) Data on observed performance: Consider data maintained on the student concerning performance observed in the classroom, during community-based activities, and as part of IEP progress monitoring.
  - 7) Teacher interviews and recommendations: Consider progress reports by teachers, therapists, and others who have direct contact with the student before and after breaks in educational programming.
  - 8) Parent/Adult student input: Consider parent observations of the student as well as parent/adult student requests for ESY services.
- d. The ESY services shall be clearly delineated in an IEP. The district can meet this requirement by amending the current IEP using an amendment form or by developing a complete ESY IEP. See Section 1C of this chapter for more information.
- e. The district may not limit ESY services to particular categories of disability or unilaterally limit the amount or duration of these services.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

5. Transportation

Transportation is a related service if special arrangements resulting from the student's disability are required to assist a student with a disability to benefit from special education. The student's individual needs concerning his or her education are the main considerations in determining services—this includes transportation services.

The IEP team shall consider how the student's disability affects his or her need for transportation, including determining whether the student's disability prevents the student from using the same transportation provided to students without disabilities, or from getting to school in the same manner as students without disabilities. This includes transporting a preschool-age student to the site at which the district provides special education and related services to the student, if that site is different from the site at which the student receives other preschool or day-care services.

When the IEP team determines that special transportation is required and documents it on the IEP, all procedural safeguards under the IDEA shall be afforded to the student in matters concerning transportation.

Transportation needs may include, but are not limited to, the following:

- a. travel to and from school and between schools to access special education;
- b. travel in and around school buildings;
- c. specialized equipment including lifts and ramps, if required to provide special transportation; or
- d. other services that support the student's use of transportation, such as:
  - 1) special assistance (e.g., an aide on the bus and assistance getting on and off the bus);
  - 2) safety restraints, wheelchair restraints, and child safety seats;
  - 3) accommodations (e.g., preferential seating, a positive behavioral support plan for the student on the bus, and altering the bus route);
  - 4) training for the bus driver regarding the student's disability or special health-related needs; or
  - 5) attending non-academic and extracurricular activities if required by the IEP.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

6. Special Considerations

As appropriate, the IEP team shall also consider and include in the IEP the following:

- a. If the student’s behavior impedes his or her learning or that of others, the IEP team shall consider the use of positive behavioral interventions, supports and other strategies to address that behavior.
- b. If the student has limited English proficiency, the IEP team shall consider the language needs of the student. Cognitive academic language proficiency (CALP) shall be determined by administering appropriate language dominance tests.
- c. If the student is blind or visually impaired, the IEP team shall provide for instruction in Braille and the use of Braille unless the IEP team determines that Braille is not appropriate for the student. This determination can only be made after an evaluation of the student’s reading and writing skills, needs, and appropriate reading and writing media (including an evaluation of the student’s future needs for instruction in Braille or the use of Braille).
- d. The IEP team shall consider the communication needs of the student. In the case of the student who is deaf or ~~hard of hearing~~ ~~hearing impaired~~, the IEP team shall consider the language needs of the student, opportunities for direct communication with peers and professional personnel in the student’s language and communication mode, the student’s academic level, and his or her full range of needs including opportunities for direct instruction in the student’s language and communication mode.

**G. Statewide and Districtwide Achievement Testing**

Students with disabilities are to be included in all statewide and district wide assessments. Participation rates and performance data, both aggregate and disaggregate, for students with disabilities are reported to the public annually.

The IEP team shall determine how the student will participate in statewide and district wide assessments—without accommodations, with accommodations, with adaptations, or by means of the alternate assessment. The IEP team determines what accommodations and/or adaptations to use based on those that are used regularly by the student during instruction or classroom testing and on what is listed in the accommodations section of the IEP.

The IEP team shall determine whether the student meets the state criteria for the alternate assessment. It should be noted that some students might participate in parts of the regular assessment and parts of the alternate assessment. For example, a student may participate with accommodations in the *regular* reading portion of the statewide assessment and may participate in the math portion of the statewide assessment using the *alternate* assessment.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

The following guidelines shall be used to determine how the student will participate in statewide and district wide assessments:

1. Regular Assessment without Accommodations

The IEP team determines and documents in the IEP that a student with a disability can adequately demonstrate his or her knowledge, abilities, or skills on statewide and district wide assessments without accommodations.

2. Regular Assessment with Accommodations

Appropriate accommodations for students with disabilities shall be based on the individual needs of each student. Accommodation decisions are made by the IEP team and shall be recorded in the IEP. Accommodations should facilitate an accurate demonstration of academic achievement, developmental, and functional performance on State and district-wide assessments. They should not provide the student with an unfair advantage or change the underlying skills that are being measured by the test. Accommodations shall be the same or nearly the same as those used by the student in completing classroom assignments and assessment activities. The accommodations shall be necessary for enabling the student to demonstrate knowledge, ability, skill, or mastery. Accommodations *do not* invalidate test results.

3. Regular Assessments with Adaptations

A student may be unable to demonstrate what he or she knows or is able to do without using an adaptation. However, an adaptation inherently circumvents the underlying skills that the test is measuring; therefore, an adaptation *always* invalidates the assessment result. If an adaptation is included in the IEP for statewide and/or district wide assessments, it shall be one that the student uses in completing classroom assignments and assessment activities on a regular basis. Further, the use of an adaptation in statewide and district wide assessments shall be clearly coded on the student's score sheet.

The IEP team has the authority to make the decision that a student needs an adaptation in order to participate in statewide and district wide assessments, even though the adaptation *will* cause the student to score as "not proficient" and to be counted as NOT participating in the assessment under AYP determinations. All IEP team members, including the parent/adult student, shall understand (a) the possible consequences that could result from this decision and (b) its effect on diploma options and post school activities involving education, career opportunities, military service, and community participation.

4. Alternative Assessments based on Alternate Achievement Standards

If the student cannot participate in some or all of the general assessments, the IEP shall contain a statement that includes the reason the student cannot participate in the

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

general assessment and the alternate assessments—language arts, reading, math or science—in which the student will participate.

a. Students Eligible to Take Alternative Assessments based on Alternate Achievement Standards

The IEP team shall find that the student meets all of the criteria listed below to determine that he or she is eligible to participate in the alternate assessment:

- 1) The student’s demonstrated cognitive ability and adaptive behavior prevent completion of the general academic curriculum even with program accommodations and/or adaptations;
- 2) The student’s course of study is primarily functional-skill and living-skill oriented (typically not measured by State or district assessments); and
- 3) The student is unable to acquire, maintain, or generalize skills in multiple settings and to demonstrate performance of these skills without intensive and frequent individualized instruction.

b. Students Not Eligible to Take Alternative Assessments based on Alternate Achievement Standards

Students are *not* to be included in Alternative Assessments based on Alternate Achievement Standards for any of the following reasons:

- 1) The only determining factor is that the student has an IEP;
- 2) The student is academically behind because of excessive absences or lack of instruction; or
- 3) The student is unable to complete the general academic curriculum because of socioeconomic or cultural differences.

**H. LRE Explanation and Placement Decisions**

The IEP shall explain the extent, if any, to which the student will *not* participate in the general education classroom, the general education curriculum, or extracurricular or other nonacademic activities.

In recommending the appropriate placement in the least restrictive environment (LRE) for the student with a disability, the IEP team shall consider the student’s needs and the continuum of services to meet those needs. The parent/adult student shall be involved in the placement decision. Removal from the general education environment occurs only when the nature or severity of the disability is such that education in general classes with the use of supplementary

aids and services cannot be achieved satisfactorily. A student with a disability is not to be removed from age-appropriate general education classrooms solely because of needed accommodations and adaptations in the general education curriculum. In addition, a student with a disability shall be educated with students without disabilities in the general education classroom to the maximum extent appropriate.

NOTE: The district's reassignment of students (with or without disabilities) to another classroom or building in the district is *not* a change of placement for a student with a disability as long as the IEP goals remain unchanged and the degree of interaction with peers without disabilities remains the same. Examples include, but are not limited to, dividing a class because of overcrowding; moving an entire grade level to a different building; and going to a different school as a result of moving from one grade level to another grade level.

See Chapter 6 for more information on placement in the LRE

#### **I. Consent for Initial Provision of Special Education and Related Services**

The district shall make reasonable efforts to obtain informed consent from the parent/adult student before the initial provision of special education and related services to the student.

If the parent/adult student communicates in writing, he or she refuses special education and related services following the evaluation and determination of eligibility, the district shall not provide special education and related services to the student. If the parent/adult student fails to respond to a district's documented efforts to gain consent for initial provision of special education and related services, the district shall not provide special education and related services to the student. In both cases:

1. The district shall not be in violation of the requirement to provide FAPE to the student or the requirement to provide special education and related services;
2. The district shall not be required to convene an IEP meeting or develop an IEP for the student; and
3. The district shall not use mediation and/or due process in order to obtain consent or a ruling allowing initial placement.

If the parent/adult student wishes to move forward with the provision of services stated on the IEP and placement in special education, consent for initial placement in special education shall be obtained after the development of an IEP. Consent means that the parent/adult student understands and agrees in writing to the carrying out of the activity for which consent is sought.

#### **J. Parent/Adult Student Objection to the IEP**

If the parent/adult student disagrees with an IEP team's proposed IEP for the student, the parent or adult student may file a written objection to all or parts of the proposed IEP. If the parent/adult student files a written objection that is emailed, postmarked or hand delivered within ten (10)

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

days of the date he or she receives written notice from the district of the proposed IEP, the changes to which the parent/adult student objects cannot be implemented for fifteen (15) calendar days, or as extended through mutual agreement by the district and the parent or adult student, while parties work to resolve the dispute. If the changes have already been implemented, implementation of those changes shall cease. The district and parent/adult student may use methods such as additional IEP team meetings, IEP facilitation, or SDE mediation to resolve the disagreement. If these attempts to resolve the dispute fail or are refused, the proposed IEP shall be implemented after fifteen (15) calendar days unless a due process hearing is filed to obtain a hearing officer's decision regarding the proposed IEP, unless it is an initial IEP. The written objection cannot be used to prevent the district from placing a student in an interim alternative educational setting (IAES) in accordance with the IDEA procedures for discipline of a student, or to challenge an eligibility/identification determination.

If the parent/adult student files a written objection to an IEP change or placement change proposed by the district any time *after* ten (10) calendar days of receiving written notice, the student shall remain in the placement described in the disputed IEP, and that IEP is implemented as written until the disagreement is resolved unless the parent/adult student and the district agree otherwise.

See Chapter 11 for information about the prior written notice requirements regarding the provision of FAPE and educational placement.

See Chapter 13 for more information about the various forms of dispute resolution [including facilitation and mediation](#).

#### **K. Additional Transition Components for Secondary-Level IEPs**

Secondary transition services are defined as a coordinated set of activities for a student with a disability that are designed within a results-oriented process focused on improving the academic and functional achievement of the student to facilitate movement from school to post school activities including postsecondary education, vocational education, integrated employment (including supported employment), continuing in adult education, adult services, independent living, or community participation. The activities include instruction, community experiences, development of employment and other post school adult-living objectives and, if appropriate, acquisition of daily living skills and a functional vocational evaluation. These activities are based on the individual student's needs, taking into account the student's strengths, preferences and interests. The following are required components for all secondary students receiving special education services.

1. Beginning with the IEP to be in effect when a student is sixteen (16) years old (or younger if determined appropriate by the IEP team), the IEP shall include:
  - a. present levels of academic and/or functional performance based on an age appropriate transition evaluation;

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

- b. appropriate measurable postsecondary goals based upon age appropriate transition assessments related to training, education, employment, and where appropriate, independent living skills;
- c. transition services, including courses of study, that will reasonably enable the student in reaching postsecondary goals identified on the IEP;
- d. evidence that the student was invited to the IEP team meeting where transition services are to be discussed; if the student does not attend the IEP meeting, the IEP team must take other steps to ensure the student's preferences and interests are considered;
- e. if appropriate, evidence a representatives of any participating agency was invited to the IEP team meeting with a prior consent of the parent or student who has reached age of majority; and
- f. the graduation requirements for the student receiving special education services. Refer to Chapter 7 for more detailed information on documentation of high school graduation in the IEP.

The postsecondary goals and transition services shall be updated on the IEP annually.

- 2. Not later than the student's seventeenth (17<sup>th</sup>) birthday, the IEP shall include a statement that the student and parent has been informed whether or not special education rights will transfer to the student on his or her eighteenth (18<sup>th</sup>) birthday. Special education rights will transfer from the parent to the student when the student turns eighteen (18) years old unless the IEP team determines that:
  - a. the student is unable to provide informed consent with respect to his or her special education program; or
  - b. the parent has obtained legal guardianship.

*(For more information on the transfer of rights see Chapter 11)*

- 3. When a student exits from special education as a result of earning a regular diploma or aging out, the district shall provide the student with a summary of his or her academic achievement and performance along with recommendations concerning how to assist the student in meeting postsecondary goals.

**L. Following the Meeting**

Following the IEP team meeting, a copy of the IEP and written notice of proposed or refused actions shall be given to the parent/adult student. IEPs and written notice should also be given to the parent/adult student whenever a change is made to the IEP or upon request.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

Each general education teacher, special education teacher, related service provider, and any other service provider who is responsible for implementing any portion of the IEP shall have access to the IEP and be informed of his or her specific responsibilities. This includes being informed of any specific accommodations, adaptations, or supports that shall be provided to the student to ensure that the IEP is implemented appropriately.

**Section 3. IEP Reviews**

**A. Annual Reviews**

Each student's IEP shall be reviewed at least annually by the IEP team, once every year (365 days). Meetings may be held any time throughout the school year, as long as the IEP is reviewed annually and is in effect at the beginning of each school year. Either at or after the annual review, written notice that the new IEP changes will be implemented shall be provided to the parent/adult student.

The IEP review includes the following purposes:

1. to determine whether the student's annual goals have been achieved;
2. to revise the IEP if there is any lack of expected progress toward annual goals and in the general education curriculum, where appropriate;
3. to determine whether any additional assessments are necessary and to address the results of those conducted;
4. to address information about the student provided to, or by, the parent/adult student;
5. to address the student's anticipated needs;
6. to monitor the continuing eligibility of the student based on an evaluation or review of a variety of data, which may include formal or informal assessment, progress toward IEP goals and when applicable benchmarks/objectives;
7. to write a new IEP; and
8. to consider a reevaluation to determine if a student is no longer eligible and special education services should be discontinued.

**B. IEP Amendments**

In making changes to a student's IEP after the annual IEP meeting for a school year, the parent/adult student and the district may agree in writing not to convene an IEP meeting for the purposes of making such changes, and instead may develop a written document to amend the

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

student's current IEP. The parent/adult student will be provided with a revised copy of the IEP with the amendments incorporated. The annual review date remains the date of the original IEP.

If the parent/adult student believes that the student is not progressing satisfactorily or that there is a problem with the current IEP, he or she may request an IEP team meeting. The district shall grant any reasonable request for such a meeting. If the district refuses to convene an IEP meeting requested by the parent/adult student, the district shall provide written notice to the parent/adult student, including an explanation of why the district has determined the meeting is unnecessary.

If any other member of the IEP team feels that the student's placement or IEP services are not appropriate, that team member may request an IEP team meeting.

Each general education teacher, special education teacher, related service provider, and any other service provider who is responsible for implementing any portion of the amended IEP shall have access to the amendment and be informed of his or her specific responsibilities.

**Section 4. IEPs for Transfer Students**

Idaho Administrative Procedures Act [IDAPA 08.02.03.109.04(f)] requires the new (receiving) district to request a copy of the eligibility documentation and most current IEP within two (2) school days. Within five (5) school days of receiving this information, the new district determines if a new assessment is required. In the meantime, if the parent agrees, an interim IEP may be developed and implemented, or the existing IEP implemented. If there is no agreement, the student is placed in general education. Within fourteen (14) calendar days the receiving district will request the full educational record of the transferring student from the former school.

**A. Transfer from an Idaho School District**

When a student with a disability transfers school districts with a current IEP in Idaho, the district shall provide the student with FAPE. This includes services comparable to those described in the previously held IEP, in consultation with the parent/adult student, until such time as the district adopts the previously held IEP or develops, adopts, and implements a new IEP. The receiving district shall request, as soon as possible, but no more than two (2) school days, the eligibility documents and the most current IEP from the sending district. Once the district has formally received a request for a student's record from another Idaho district, the district shall forward copies or the original documents as soon as possible, but no more than five (5) school days, of the request. Within fourteen (14) calendar days the receiving district will request the full educational record of the transferring student from the former school. If originals are sent, the sending district shall maintain a copy for audit purposes.

Note: The current IEP shall be implemented if a new IEP cannot be developed within five (5) school days of the student's enrollment or if a reevaluation will be taking place.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

**B. Transfer from an Out-of-State District**

When a student with a disability transfers from out of state to an Idaho school district with a current IEP in that other state, the district shall provide the student with FAPE. This includes services comparable to those described in the previously held IEP, in consultation with the parent/adult student, until such time as the district conducts an evaluation, if determined necessary, and develops, adopts, and implements a new IEP.

**C. Transfer to an Out-of-State District**

Within ten (10) school days of receiving a request from an out of state school district for copies of eligibility documentation and a transferring student's IEP, a district shall send the requested information to the receiving district.

**Section 5. IEPs for Children from the Infant/Toddler Program**

**A. Interagency Agreement and Protocols**

The school district, as the local lead agency for Part B, shall initiate the development of a signed interagency protocol with the regional Infant/Toddler Program (ITP) of the Department of Health and Welfare (DHW), the lead agency under Part C of the IDEA. The protocol shall be in accordance with the current state Interagency Agreement for Early Childhood Special Education Services and Early Intervention for Children Ages Two through Five.

The protocol will outline the obligations of each agency to ensure:

1. a smooth and effective transition of children served under Part C to early childhood special education services (ECSE) under Part B;
2. by the child's third birthday, eligibility for Part B services has been determined and an IEP or Individual Family Service Plan (IFSP) has been developed and implemented; and
3. each district and agency shall participate in transition planning conferences.

NOTE: A child, who turns three (3) after May 1, has been determined eligible for Part B services, and parental consent has been obtained for initial placement for Part B services, can be served as outlined in the IFSP by the ITP until school starts in the fall. This is the case unless specified differently in the local interagency protocol.

**B. Part C to Part B Transition Planning**

In the case of a child who may be eligible for ECSE services, the district shall participate in a transition planning conference with the family arranged by the ITP. The conference will be conducted at least ninety (90) calendar days (and up to nine (9) months at the discretion of all

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

parties) before the child's third (3<sup>rd</sup>) birthday to discuss eligibility requirements under Part B of the IDEA, needs and concerns of the child and family, and any services the child may receive.

The ITP has the responsibility to:

1. notify the school district and SDE of potentially eligible children;
2. invite and coordinate a transition planning meeting to review the process to determine eligibility and assess service options available;
3. establish a plan for facilitating the transition of the toddler with a disability to early childhood special education services;
4. provide the district with a copy of the Child Outcome Summary Form (COSF) completed at exit; and
5. upon invitation, attend the initial IEP meeting.

The school district has the responsibility to:

1. make contact with the family and provide notice of procedural safeguards and written information about the Part B and early childhood special education services (this information may be provide in person, at a transition conference, or by mail);
2. attend and participate in the transition planning meeting;
3. determine eligibility and develop an IEP or IFSP prior to child's third birthday;
4. consider the Part C COSF exit outcome data to help determine Part B early childhood entry outcome data;
5. invite ITP representatives, at the request of the parent, to the initial IEP meeting; and
6. obtain consent for initial provision of special education and related services under Part B.

**C. IEP or IFSP Required**

1. By the child's third (3<sup>rd</sup>) birthday, the district shall have an IEP or IFSP in place for each student three (3) through five (5) years old who is eligible for ECSE services.
2. In developing the IEP, the IEP team shall consider the content of the IFSP including:
  - a. the least restrictive environment statement; and
  - b. the educational component that promotes school readiness, pre-literacy, language and numeracy skills.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

3. The IFSP may serve as the IEP of the child, if:
  - a. agreed by the district and the child's parents;
  - b. a detailed explanation of the differences between the IFSP and the IEP is provided to the parents);
  - c. parental written informed consent is obtained; and
  - d. developed according to the IEP procedures outlined in Section 2 of this chapter. If the district elects to use an IFSP, the district is required to implement only the educational components of the IFSP.

**D. Consent and Notice Requirements**

1. Notice Announcing Initial IEP Team Meeting: The district shall inform the parents of their rights to request the participation of ITP representatives at the initial IEP team meeting for children previously served by Part C.
2. Release of Information: The district shall obtain written parental consent for the release of information to obtain pertinent student records from non-educational agencies such as ITP, developmental disabilities agencies, medical providers, day-care centers, and Head Start.
3. Assessments: At the transition planning conference, if further assessments are necessary to determine eligibility, the student's present levels of academic and functional performance, and goals or services on the IEP, informed consent to evaluate is required. (Parental consent for assessment under Part B is required even though the parent may have given consent earlier under Part C). Otherwise, only written notice to inform the parent of the district's decision to use the current evaluation data, and not to conduct any further assessments, shall be provided to the parent. The parent shall also be informed of his or her right to request additional assessments.
4. Consent for Initial Provision of Special Education and Related Services: Parental consent for the initial provision of special education and related services and written notice for the implementation of the IEP or IFSP under Part B is required. Eligibility, initial provision of services, and LRE placement shall be documented for Part B services.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

Idaho Special Education Manual Chapter 5: Individualized Education Programs

**Section 6. Students with Disabilities in Adult Prisons**

The following requirements apply for students with disabilities ages eighteen (18) to the semester when they turn twenty-one (21) who are convicted as adults under Idaho law and incarcerated in adult prisons:

1. A student identified as a student with a disability, who is eligible for special education, and who is convicted as an adult and incarcerated in an adult prison, is not subject to child find, but if already identified is entitled to FAPE until age twenty-one (21).
2. The student will not participate in statewide assessments.
3. Transition planning and services do not apply if the student will remain in prison beyond the semester of his or her twenty-first (21<sup>st</sup>) birthday.

The IEP team may revise the student's IEP and placement, regardless of the LRE requirements, if the state has demonstrated a bona fide security or other compelling penological interest that cannot be otherwise accommodated.

    A. When to Make and Review Placement Decision Considerations.....[111](#)  
    B. Considerations in Placement Decisions.....[111](#)  
    C. Documentation of Placement Decisions.....[112](#)  
Section 2. District Responsibility for Continuum of Settings and Services.....[113](#)  
Section 3. Federal Reporting of LRE.....[113](#)

STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017

**Chapter 6**  
**Least Restrictive Environment**

The IDEA states that, to the maximum extent appropriate, all students with disabilities, three (3) to twenty-one (21) years of age, are to be educated with age appropriate peers who are nondisabled. This is known as the least restrictive environment (LRE). The LRE is the appropriate balance of settings and services to meet the student's individual needs. The district shall have an array of services and a continuum of educational setting options available to meet the individual LRE needs of each student.

An appropriate LRE is one that enables the student to make reasonable gains toward goals identified in an individualized education program (IEP) while being educated with peers who are nondisabled to the maximum extent appropriate as determined by the IEP team on a case by case basis. The student's IEP shall indicate the LRE for the student and explain to what extent, if any, the student will or will not participate in the general education classroom environment, the general education curriculum, and extracurricular or other nonacademic activities. This provision includes students with disabilities placed in public or private institutions or other care facilities.

Special classes, separate schooling, and other removals of a student with a disability from the general education environment may occur only when the nature or severity of the disability is such that education in the general education class, even with the use of supplementary aids and services, cannot be achieved satisfactorily.

**Section 1. Least Restrictive Environment Considerations**

**A. When to Make and Review Placement Decisions**

1. Placement decisions for a student with a disability are made following the determination of the individual needs, goals, and required services.
2. Placement decisions are revisited at least annually by the IEP team, which includes the parent/adult student and other persons knowledgeable about the student, the meaning of the evaluation data, and the placement options available.
3. Placement decisions are reconsidered, as appropriate, when an IEP team is convened to review a student's academic, functional, or developmental progress.

**B. Considerations in Placement Decisions**

LRE decisions are made, at least annually, individually for each student. The IEP team shall consider the following when determining the LRE in which the IEP can be implemented:

1. IEP Goals and Services: The student's goals and services are developed prior to the determination of the services and settings. The services and settings needed by each

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

student with a disability must be based on the student's unique needs that result from his or her disability, not on the student's category of disability.

2. **Age Appropriate Peers:** Students with disabilities shall be educated with age-appropriate peers to the maximum extent appropriate. A student with a disability is not removed from age-appropriate general education environments solely because of needed accommodations and/or adaptations in the general education curriculum.
3. **School of Attendance:** A student with a disability shall be educated in the school he or she should attend if not disabled unless the IEP requires some other arrangement. In such case, the child's placement shall be based on the child's IEP and as close to possible to the child's home.
4. **Harmful Effects:** Consideration shall be given to any potential harmful effect on the student or on the quality of services the student needs.
5. **Accommodations and/or Adaptations:** A student with a disability is not removed from general education settings solely because of needed accommodations and/or adaptations in the general education curriculum.
6. **Participation in Nonacademic and Extracurricular Services and Activities:**
  - a. A student with a disability shall be allowed to participate with students without disabilities in nonacademic and extracurricular services and activities to the maximum extent appropriate. These services and activities may include meals, recess, field trips, counseling services, athletics, transportation, health services, recreational activities, special interest groups or clubs sponsored by the district, referrals to community agencies, career development, and assistance in making outside employment available.
  - b. The IEP team determines the supplementary aids and services that are appropriate and necessary for the student to participate in nonacademic settings and extracurricular services and activities.

**C. Documentation of Placement Decisions**

If the student will not participate *entirely* in the general education classroom, curriculum, and/or nonacademic and extracurricular activities, the IEP shall include a written explanation justifying the IEP team's decisions including the consideration of supplementary aids and services. The district shall provide the parent/adult student with prior written notice whenever the IEP team proposes to change or refuses to change the educational placement of the student.

### Section 2. District Responsibility for Continuum of Settings and Services

The continuum of settings includes instruction in general classes, special classes, special schools, home instruction and instruction in hospitals and institutions. In addition, the continuum makes provision for supplemental services, such as resource services or itinerant instruction, to be provided in conjunction with the general classroom. In determining appropriate settings and services for a student with a disability, the IEP team shall consider the student's needs and the continuum of alternate placements and related services available to meet those needs. Regardless of placement, the student shall be given appropriate access to the general education curriculum, as determined by the IEP team. The district shall be able to justify the available continuum of services and placement decisions for individual students.

All LRE considerations also apply to preschool students ages three (3) to five (5) years with disabilities who are entitled to receive a free appropriate public education (FAPE). Settings for implementing IEPs for students of legal kindergarten-age are the same as for all other school-age students. Settings for implementing IEPs for preschool-age students may include public or private early childhood programs. Public schools that do not operate early childhood programs for preschool students without disabilities are not required to initiate such programs solely to satisfy LRE requirements. IEP teams in public schools that do not have an inclusive public preschool that can provide all the appropriate services and supports to meet the individual needs of preschool students with disabilities, shall explore alternative methods to ensure LRE requirements are met for preschool students ages three (3) to five (5) years, which may include:

1. providing opportunities for participation (even part-time) of preschool students with disabilities in public or private regular early childhood programs operated for preschool students without disabilities by other agencies, such as Head Start;
2. placing preschool students with disabilities in the following:
  - a. private early childhood programs for preschool students *without* disabilities; or,
  - b. private early childhood programs or other community-based early childhood settings that integrate students *with and without* disabilities; and,
3. locating classes for preschool students with disabilities in elementary schools.

See Chapter 11 for information regarding prior written notice requirements that apply to proposed or refused changes in educational placement.

### Section 3. Federal Reporting of LRE

The IEP includes a section for reporting the educational environments required for the Federal Child Count (annual report of children served collected on any date between October 1 and December 1 of each year). This section is for reporting the amount of time the student spends in

STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017

the general education environment, with or without special education and related services. After determining the LRE and the educational environments in which the student will receive their general education instruction and special education services, the IEP team will document the educational environment for federal reporting.

Idaho Special Education Manual Chapter 7: Discontinuation of Services, Graduation & Grading

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

Idaho Special Education Manual Chapter 7: Discontinuation of Services, Graduation & Grading

**Chapter 7  
Discontinuation of Services, Graduation, and Grading**

**Section 1. Discontinuation of Services**

**A. Students Who Are No Longer Entitled to Services**

The district will follow appropriate procedures to discontinue special education services to students who are no longer entitled to those services.

1. Student No Longer Meets Eligibility Criteria

If it is suspected that a student no longer meets the eligibility criteria for the IDEA, the evaluation team will conduct a reevaluation and arrange to have additional assessments conducted if necessary. If the student is no longer eligible under the Idaho eligibility standards, the district will provide the parent/adult student with written notice of this decision prior to discontinuing special education services.

2. Student Completes Requirements for a Regular High School Diploma

The district's obligation to provide special education services ends when the student meets the district and State requirements that apply to all students for receipt of a regular high school diploma without adaptations. Although this is considered a change of placement, a reevaluation is not required. Prior to graduation and the discontinuation of special education services the district shall:

- a. provide the parent/adult student with written notice of the district's obligation to provide special education services ends when the student obtains a regular high school diploma; and
- b. provide the parent/adult student with a written summary of academic achievement and functional performance which shall include recommendations to assist the student in meeting his or her postsecondary goals. This summary is known as the Summary of Performance (SOP).

3. Student Reaches Maximum Age

For students who have not yet met their district's high school graduation requirements, the district's obligation to provide special education services ends at the completion of the semester in which the student turns twenty-one (21) years of age. This is considered a change of placement that does not require a reevaluation. If a student is turning twenty-one (21), the district shall:

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

Idaho Special Education Manual Chapter 7: Discontinuation of Services, Graduation & Grading

- a. provide the parent/adult student with written notice the district's obligation to provide special education services ends at the completion of the semester in which the student turns twenty-one (21) years of age; and,
- b. provide the parent/adult student written summary of academic achievement and functional performance which shall include recommendations to assist the student in meeting his or her postsecondary goals. This summary is known as the Summary of Performance (SOP).

**B. Change in District Obligation to Provide Services**

Under certain circumstances, a student may continue to be eligible for special education services, but the district's obligation to provide services changes.

1. Transfer to Another District

When a student is no longer a legal resident of the district, the district will forward the student's special education records electronically or by mail within five (5) calendar days of the request from the new district. The records shall include, at least, the student's most recent individualized education program (IEP) and eligibility documentation. The sending district will retain copies or originals of the most recent five (5) years of programmatic and fiscal records, including IEPs and eligibility documentation. During an audit, Child Count verification, or monitoring, this documentation may be needed to demonstrate that the student was eligible for special education and received special education services from the district. Note: Districts are required to maintain Medicaid-related records for six (6) years. See Chapter 11 for more information.

2. Enrollment in Private School or Receives Homeschooling

When a parent/adult student withdraws a student from public school and enrolls him or her in a private school or provides homeschooling, the district's responsibilities vary depending on the circumstances. See Chapters 2 and 9 for more information.

3. Dropouts

When a student drops out of school, written notice will be sent to the parent/adult student and a copy of the notice will be placed in the student's special education confidential file. If the student reenrolls and is still eligible for special education, the previous IEP can be implemented if it is current and appropriate. A new IEP shall be developed if needed.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

Idaho Special Education Manual Chapter 7: Discontinuation of Services, Graduation & Grading

**C. Parent/Adult Student Revokes Consent for Special Education Services**

When a parent/adult student revokes consent for special education services in writing, prior written notice shall be provided specifying when the special education and related services will cease. Note: A parent/adult student has the right to revoke consent for IEP services in their entirety, not service by service. The written notice shall include a statement indicating the district stands ready, willing, and able to provide FAPE should the student remain eligible for special education services.

**Section 2. Graduation**

Graduation means meeting district and State requirements for receipt of a regular high school diploma. If a student is not granted a regular high school diploma or if the high school diploma is granted based on completion of adapted graduation requirements, the student is entitled to receive a free appropriate public education (FAPE) through the semester in which he or she turns twenty-one (21) years of age or determined no longer eligible as a result of a reevaluation. A General Education Development (GED) certificate does not meet district requirements that are comparable to a regular high school diploma. The IEP team making these decisions shall include a district representative knowledgeable about State and local graduation requirements.

**A. Individualized Education Program (IEP) Team Requirements Regarding Graduation**

1. Determine whether the student will meet all state and local requirements to be eligible to graduate from high school and anticipated graduation date.
2. Develop the course of study in collaboration with the Parent Approved Student Learning Plan required for every student prior to the end of eighth (8<sup>th</sup>) grade. The Student Learning Plan will be reviewed annually and may be revised at any time.
3. Beginning no later than the end of the student's ninth (9<sup>th</sup>) grade, review annually the student's course of study, identify and make changes to the course of study needed for the student to meet graduation requirements.
4. Document any accommodations and adaptations made to the district's and State's regular graduation requirements on the student's behalf.

a. Graduation Requirements with Accommodations

Accommodations to graduation requirements are determined by the IEP team and are deemed necessary for the student to complete graduation requirements. Further:

- 1) Accommodations to graduation requirements must specifically address completion of the student's secondary program.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

Idaho Special Education Manual Chapter 7: Discontinuation of Services, Graduation & Grading

→2) \_\_\_\_\_ Accommodations will maintain the same level of rigor to the district and State graduation requirements. For example, a teacher may use different instructional strategies or alternate methods for assessing the student's acquisition of skills that are equally rigorous.

→3) \_\_\_\_\_ Accommodations made to any district or State graduation requirement shall be stated in the student's IEP.

b. Graduation Requirements with Adaptations

Long-term consequences for the student shall be considered when adaptations are made to graduation requirements. Further:

- 1) Adaptations to graduation requirements shall specifically address completion of the student's secondary program.
- 2) Adaptations may alter the level of rigor required in the district or State graduation requirements. Examples of adaptations include changes made to course content, objectives, or grading standard that alter the level of rigor.
- 3) Adaptations of any district or State graduation requirement shall be stated on the student's IEP. The team shall discuss with the parents the effect of adaptations on regular education diploma and FAPE.

5. Demonstration of Proficiency of State Content Standards State Board of Education rule (IDAPA 08.02.03.105.06) requires that each student achieve a proficient or advanced score on the Grade 10 Idaho Standards Achievement Test (ISAT) in math reading and language usage in order to graduate. Each student's IEP will include a statement of how the student will demonstrate proficiency on the Grade 10 Idaho Standards Achievement Test as a condition of graduation. If the method to demonstrate proficiency is different than meeting proficient or advanced scores on the high school ISAT or the ISAT-Alt, a student with an IEP may meet this requirement by:

- a. achieving the proficient or advanced score on the Idaho Standard Achievement Test (ISAT) or, for eligible students, on the Idaho Standard Achievement Test – Alternate (ISAT-Alt); or
- b. demonstrating proficiency on the content standards through some other locally established plan; or
- c. having an IEP that outlines alternate requirements for graduation or documents assessment adaptations (adaptations that will invalidate the assessment score).

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

Idaho Special Education Manual Chapter 7: Discontinuation of Services, Graduation & Grading

**B. Graduation Ceremonies**

A special education student who completes his or her secondary program through meeting graduation requirements or criteria established on his or her IEP will be afforded the same opportunity to participate in graduation ceremonies, senior class trips, etc., as students without disabilities. It should be noted the participation in a graduation ceremony does not, in and of itself, equate to the receipt of a regular high school diploma or completion of a secondary program.

**Section 3. Transcripts and Diplomas**

**A. Transcript**

The transcript serves as a record of individual accomplishments, achievements, and courses completed. Transcripts shall adhere to the following conditions:

1. Accommodations that allow the student to complete and demonstrate that he or she has met graduation requirements will not be noted on the transcript.
2. Adapted course work may be noted on the transcript if the parent/adult student is informed in advance and the designation is not discriminatory or identify the student as having a disability or receiving special education.
3. Course designations, titles, or symbols that are used solely to identify adapted course work that is taken by students with disabilities will not be used.

**B. Diploma**

1. For students who are eligible for special education services, the district will use a regular diploma at the completion of their secondary program through meeting graduation requirements or criteria established on his or her IEP; this includes students who meet the graduation requirements with accommodations and/or adaptations.
2. A modified or differentiated diploma or certificate may not be used for students who are eligible for special education unless the same diploma or certificate is granted to students without disabilities in the same graduating class.

**Section 4. Grades, Class Ranking, and Honor Roll**

Grades earned by students with disabilities will not be categorically disregarded or excluded from district wide grade point average (GPA) standing. The district may establish objective criteria for class rankings, honors, etc., that weight courses according to degree of difficulty or exclude non-core courses so long as such practices are nondiscriminatory.

STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017

**Chapter 8**  
**Charter Schools**

Federal law requires that students with disabilities be offered educational choices comparable to those offered to students without disabilities. One of these choices is the opportunity to attend a public charter school. Each public charter school, whether a charter school within a district or a charter school LEA (Local Education Agency), shares in the obligation to accept and appropriately serve students with disabilities under the IDEA in the same manner as any other public school.

The LEA charter school board of directors/trustees is required to adopt and ensure that the LEA implements this Manual.

**Section 1. Definition and Parent/Student Rights**

**A. Definition of Charter Schools**

In Idaho, a charter school is a public school authorized by Section 33-5205, Idaho Code. A charter school operates as a nonprofit, publicly funded, nonsectarian school in one of three ways:

1. as a school within a district, if authorized by the local board of trustees of a school district (LEA);
2. as a school authorized by the district, but operating as a separate LEA; or
3. as its own LEA, if authorized by the Idaho Public Charter School Commission or a college or university.

A charter school is bound by the conditions of its charter, all applicable state and federal law.

**B. The Rights of Charter School Students and Their Parents**

A charter school student is a public school student. Students with disabilities who attend charter schools and their parents have all of the same rights granted to students who attend other public schools. These rights are provided under the IDEA: the Elementary and Secondary Education Act (ESEA); the Every Student Succeeds Act (ESSA); Section 504 of the Rehabilitation Act (Section 504), the Americans with Disabilities Act (ADA); and the Family Education Rights and Privacy Act (FERPA). Idaho law specifically states that charter schools cannot discriminate against any student on any basis prohibited by federal or state constitutions or any federal, state or local law.

1. Charter schools must have open enrollment that includes:
  - a. giving all students an equal opportunity to attend

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

- b. being open and accessible to all students, including students with disabilities; and
  - c. admitting students on the basis of a lottery if more students apply for admission than can be accommodated
2. A charter school shall not adopt an admission standard, policy or procedure that would have the effect of prohibiting or discouraging a student with a disability from enrolling or attending, or have the effect of prohibiting or discouraging a parent of a student with a disability from enrolling his or her child in the charter school by:
- a. establishing an examination or other academic criteria for admission;
  - b. requiring any activity in which the school is unwilling to accommodate or adapt their curriculum or academic standards to meet the needs of the student with a disability; and
  - c. requiring any activity in which the school suggests implicitly or explicitly that another school district would be a better placement or more capable of providing special education services or delivering education instruction (commonly referred to as “counseling out”).
3. A charter school must provide every student with a disability a Free and Appropriate Public Education (FAPE), which shall include appropriate special education services starting the first day of school or upon the first day the student enrolls and begins attending school.

Under Idaho state law, the charter of an authorized charter school outlines specific mission statements, policies and procedures, and the manner by which special education services will be provided.

**Section 2. Responsibility for Services**

**A. Charter School Authorized by the District and Not an LEA** (See definition in Section 1.A.1)

The district is ultimately responsible to ensure that the requirements of the IDEA are met with respect to students attending charter schools authorized by the district. A charter school’s compliance with the IDEA, Part B, is required regardless of whether the charter school receives any Part B funds.

- 1. To ensure that a charter school authorized by the district meets the IDEA requirements, the district shall ensure services to students with disabilities attending the charter schools are provided in the same manner as the district serves students with disabilities in its’ other schools, including providing supplementary and related

services onsite at the charter school to the same extent to which the district has a policy or practice of providing such services on the site to its' other public schools.

2. The district shall have information on file with the State Department of Education (SDE) that demonstrates students with disabilities who attend charter schools authorized by the district will receive special education and related services from either the district or the charter school (or a combination of both).
3. The district will ensure that its charter schools participate in all monitoring activities conducted by the SDE.
4. The district shall provide Part B funds and comparable services to the charter school within the district on the same basis as it provides such funds to other public schools within the district.

**B. Charter School Operating as an LEA** (See definition in Section 1.A.2)

Charter schools authorized by the Idaho Public Charter School Commission or a college or university are automatically LEAs. A district authorized school may with the approval of the district become an LEA. A charter school LEA, whether virtual or brick-and-mortar or combination thereof, has an obligation to accept and appropriately serve students with disabilities and is solely responsible to ensure that the requirements of the IDEA are met with respect to students enrolled. Compliance with the IDEA, Part B, is required regardless of whether the public charter school receives any Part B funds. A charter school LEA shall:

1. participate in all monitoring activities conducted by the SDE; and,
2. in its first year of operation, participate in an onsite technical assistance visit by an SDE special education team to ensure that the essential components of a special education program are in place.

**Section 3. Essential Components of a Special Education Program**

The Idaho charter school law requires each petition for a charter to describe the manner by which special education and related services will be provided to eligible students with disabilities.

Prior to approving a petition for a charter school, the authorizing entity shall ensure the petition includes:

1. provisions for nondiscriminatory enrollment procedures to be publically displayed on the charter school's website and in the charter school's enrollment application form;
2. adequate plans, policies, procedures, contractual or other arrangements, and budget to ensure that students with disabilities attending the charter school will receive special

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

education and related services that meet all the requirements of the IDEA. The petition should describe how the charter school will:

- a. have special education and related services as identified in student IEPs, in place by the first day of the school year;
  - b. conduct Child Find activities and evaluations;
  - c. develop, review, and revise IEPs in accordance with state and federal law;
  - d. employ and use qualified special education personnel;
  - e. meet LRE requirements;
  - f. implement the IDEA discipline procedures; and
  - g. protect student and parent rights.
3. provisions to employ special education and related services professionals who are appropriately licensed and/or certificated for the duties they are assigned;
  4. a provision for professional development plan for the training needs of special education personnel as well as general education teachers in order to meet the needs of students with disabilities who are enrolled in the charter school;
  5. a plan that ensures access to charter school programs, as required by the ADA. This plan may include the actual location of the school, classrooms, and settings within the classrooms to permit access by students with disabilities;
  6. a transportation plan for special education students who may, because of the nature of their disabilities, be entitled to specialized transportation as a related service, even if the charter school does not provide transportation to other students; and
  7. provisions for notifying the authorizing entity in the event that a formal complaint or due process hearing request is filed by or on behalf of a charter school student.

**Section 4. Charter Schools and Dual Enrollment**

Under Section 33-204, Idaho Code, parents of public charter school students “shall be allowed to enroll the student in a public school for dual enrollment purposes.” Special education services (~~specifically~~ specifically designed instruction and services calculated to meet the unique needs of a student with a disability) shall be the obligation of the public charter school. The district shall allow public charter school students who are eligible for special education and who are otherwise qualified to participate in school programs under the dual enrollment law to:

1. enroll in general education courses under the same criteria and conditions as students without disabilities; and
2. receive accommodations in the general education courses for which they are enrolled on a 504 plan, if needed.

Public charter school students may not dually enroll solely for special education. The Board of Directors/Trustees of the public charter school and the traditional school district shall adopt procedures governing dual enrollment.

For detailed requirements and responsibilities governing dual enrollment of charter school students, see Section 33-203, Idaho Code.

### Section 5. Funding

#### A. State Funds

The SDE will make apportionment payments (from state general funds) to each charter school based on attendance figures. The SDE will pay state funds directly to charter schools using the funding formula described in state law. A charter school may also be eligible for the following funds:

1. state funds for special education students who live in licensed group, foster, or personal care services homes under the provision of Section 33-1002B, Idaho Code;
2. district-to-agency contract funds under a provision of Section 33-2004, Idaho Code;
3. funds to serve high numbers of students with emotional disturbance under Section 33-2005, Idaho Code; and
4. state enhancement funding sources.

#### B. Federal Funds

The SDE disburses federal flow-through funds to all authorized local education agencies (LEAs).

1. Charter School as Part of a District (not an independent LEA)

The district provides funds under Part B to those charter schools that are part of the district on the same basis as the district provides funds and comparable services to the other public schools. This includes proportional distribution based on relative enrollment of students with disabilities. This distribution is made at the same time as the district distributes funds to their other public schools and must be consistent with

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

Idaho's charter school law. The individual school's approved charter will identify whether the district will provide funding or services of comparable value.

- a. The amount of funds or comparable services will generally be equal to the per student amount the district is allocated from the SDE in the current year multiplied by the charter school's Child Count from the **previous** school year.
- b. Under certain circumstances the district shall allocate Part B funds to an eligible charter school based on the number of special students enrolled and served in the **current** school year.
  - 1) The district will allocate funds to a charter school within five (5) months of opening or significantly expanding its enrollment if the charter school notifies the district at least 120 calendar days before it opens or significantly expands its enrollment due to a significant event that is unlikely to occur on a regular basis (such as the addition of one or more grades or educational programs in major curriculum areas), and it takes place before February 1.
  - 2) When these conditions are met, the district will allocate funds to the charter school as follows:
    - i. If the opening or expansion occurs prior to November 1, the charter school will be allocated funds in the current school year based on the current school year's Child Count.
    - ii. If the opening or expansion occurs after November 1 but before February 1, the charter school will be allocated a pro-rata share of funds in the current school year based on the number of enrolled special education students with active IEPs 30 days after the opening or expansion. The pro-rata share will be the number of days the charter school will be open or expanded, divided by the number of days in the school year, multiplied by the number of special education students.
  - 3) If the opening or expansion occurs on or after February 1, the charter school will be allocated funds in the following school year based on the **following** school year's Child Count.
- c. For school districts that have authorized a virtual charter school and the charter school's students are enrolled in the district but live outside district boundaries and receive education outside the district, the SDE will determine the district's Part B funding in the following way:

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

- 1) The calculation of the district's allocation will be made exclusive of the charter school's enrollment and special education enrollment (student count).
- 2) After calculating the allocations for all districts using the federal funding formula and the distribution formula for any supplemental award, the SDE will determine the statewide average per-student allocation.
- 3) The SDE will add to the district's base allocation an amount equal to the statewide average per-student allocation times the number of students with disabilities enrolled in and determined to be eligible for and receiving special education services.

2. Charter School Operating as an LEA

Public charter schools that are LEA's are responsible for adopting and implementing approved policies and procedures for special education and providing an assurance that funds will be used in accordance with Part B allowable uses.

- a. In the second and subsequent years of operation, Charter School LEAs will be allocated Part B funds in the same manner as all school districts – in accordance with the federally prescribed funding formula for the distribution of flow through funds.
- b. The policy for providing federal special education funds to new charter LEAs in the first year of operation, as required by federal regulation, includes the following steps:
  - 1) The LEA submits its Child Count as required by IDEA.
  - 2) A SDE Special Education Monitoring Team visits the new LEA to review the files of the students reported on the Child Count.
  - 3) The monitoring team determines the number of students meeting all eligibility requirements and receiving appropriate special education and related services.
  - 4) Based upon the number of students determined to be eligible, amounts of first- year Part B funds for allocation to the charter LEA are calculated as follows:
    - i. The statewide average per-student amount of Part B funding in the current year is determined.

STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017

- ii. That amount is multiplied by the number of students who meet all eligibility requirements and are receiving appropriate special education services to determine the total allocation.
- 5) The charter LEA then shall complete the Part B application documents. These include:
  - i. Assurances and Policies and Procedures Adoption
  - ii. Maintenance of Effort Assurance
  - iii. Title Part B Budget Form
- 6) Once the application is submitted and approved, the charter LEA may begin drawing down these funds for the approved special education purposes.

STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017

**Chapter 9**  
**Private School Students**

Note: For the purposes of this Manual, the term “private school student” is the same as a “nonpublic school student.” A homeschool student is not considered a private school student. A student who is enrolled in a virtual public school is not considered a homeschooled student for the duration that they attend that virtual public school.

The IDEA and Idaho Administrative Code includes the following:

- statutory and regulatory language, which states that students who are voluntarily enrolled in private schools are not entitled to all of the same services, including the right to a free appropriate public education (FAPE), as public school students;
- district responsibilities for special education students under Idaho’s dual enrollment law; and
- the legal requirements that come into play when a parent unilaterally enrolls his or her child in a private school and asks the district for reimbursement of these costs.

**Section 1. Definitions of Private School Placements**

In order to describe the district’s responsibilities for serving private school students, it is helpful to distinguish three separate ways that students are placed in private schools. These are defined by who enrolls or places the student in a private school and why.

**A. Definition of Voluntary Enrollment by a Parent**

A parent may choose to enroll his or her child in a private school for a variety of personal reasons, such as to obtain a religious education, to attend a school with a particular philosophy or curriculum, or because the parent is dissatisfied with the services offered or provided by the district. This is considered a voluntary enrollment. See Section 2 and Section 4 of this chapter for district responsibilities. Note: The IDEA distinguishes between for profit and nonprofit private schools. If a student is placed in a for profit private school by their parents the service plan provisions do not apply.

**B. Definition of District Placement**

At times, the district may place a student in a private school or facility to fulfill its obligation to provide FAPE. These placements are always made by an individualized education program (IEP) team in accordance with the requirements of Section 3 of this chapter.

**C. Definition of Unilateral Placement by Parents when FAPE is an Issue**

A parent may enroll a student in a private school or provide services from a private provider at parental expense. The parent may initiate a due process hearing to seek reimbursement for the costs associated with the placement from the district. All students who are placed by a parent when FAPE is an issue are also voluntarily enrolled in a private school. Specific information regarding a parent's request for reimbursement of costs of student enrollment in a private school in this situation is included in Section 5 of this chapter.

**Section 2. Students Voluntarily Enrolled by Parents**

**A. District Consultation with Private School Representatives** (may be done in coordination with Title 1 requirements for consultation)

To ensure timely and meaningful consultation a district will consult with private nonprofit elementary and secondary school representatives and representatives of parents of parentally placed private school students with disabilities during the design and development of special education and related services for the students. The consultation process shall include:

1. **Child Find:** The Child Find process and how parentally placed private school children suspected of having a disability can participate equitably, including how parents, teachers, and private school officials will be informed of the process.
2. **Proportionate Share of Funds:** The determination of the proportionate amount of federal special education funds available to serve parentally placed private school children with disabilities under this subparagraph, including the determination of how the amount was calculated. Refer to Section 2G of this chapter for information regarding the calculation of the proportionate share of funds.
3. **Determination of Special Education and Related Services:** Given the amount of funds to be dedicated by the district, the discussion will include the consideration of how, where, and by whom special education and related services will be provided for parentally placed private school students with disabilities, including:
  - a. types of services, including direct services and alternate service delivery mechanisms;
  - b. how such services will be apportioned if funds are insufficient to serve all students;
  - c. how and when these decisions will be made; and
  - d. how the provided services will be evaluated.
4. **Ongoing Communication:** Clarify how the private school and district will operate throughout the school year to ensure that parentally placed private school students with disabilities identified through the Child Find process can meaningfully

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

participate in special education and related services. Annual consultation is not required to make these decisions. The district determines the period between consultations based on changing circumstances within the district, such as significant changes in the total amount of funds to be expended and/or the number and location of private school students with disabilities.

5. Written Affirmation: When timely and meaningful consultation has occurred:
  - a. the district will obtain a written affirmation signed by the representatives of participating private schools;
  - b. if the representatives do not provide the affirmation within a reasonable period of time the district will forward the documentation of the consultation process to the State Department of Education (SDE).
6. District Decisions: Following consultation with the private school representatives, the district will make final decisions concerning items a-d addressed above in number 3.
7. Written Explanation by the District Regarding Services: If the district disagrees with the views of the private school officials on the provision of services or the types of services, whether provided directly or through a contract, the district will provide to the private school officials a written explanation of the reasons why the district chose not to provide services directly or through a contract.

**B. Compliance with Consultation Process**

1. General Compliance: A private school official has the right to submit a complaint to the SDE that the district:
  - a. did not engage in consultation that was meaningful and timely; or
  - b. did not give due consideration to the views of the private school official.
2. Procedure for Complaint
  - a. If the private school official wishes to submit a complaint, the official will provide the basis of the complaint to the SDE.
  - b. The district will forward the appropriate documentation to the SDE.
  - c. The SDE will render a written decision whether the district complied with the consultation process requirements.
  - d. If the private school official is dissatisfied with the decision of the SDE, the official may submit a complaint to the Secretary of the US Department of Education by providing the basis of the complaint against the district to the

Secretary, and the SDE will forward the appropriate documentation to the Secretary.

### C. Child Find Requirements

The district shall have an ongoing Child Find system to locate, identify, and evaluate all students with disabilities ages three (3) through twenty-one (21) who are educated within the district's geographic boundaries. This includes students who have been placed by a parent in a private nonprofit elementary or secondary school (including a religious school) located in the district regardless of the student's state or local residency. Note: Parents can also ask the district of residence (assuming it is different than the district where the private school is located) to evaluate their student. Both districts would have Child Find responsibilities and cannot share information between the districts without written parental consent. The district of residence would have Child Find responsibilities for students placed in for-profit schools and for children aged three (3) to five (5).

The Child Find process will be designed to encompass the following:

1. The Child Find process will ensure the equitable participation of parentally placed private and homeschool students with disabilities.
2. Child Find activities for private school students will be similar to Child Find activities for public school students, which include the evaluation process within comparable timelines.
3. The district will consult with private school representatives and representatives of parents who place their children in private schools regarding the Child Find procedures.

Note: The cost of Child Find is not counted toward the pro-rated proportionate share that the district must spend on services.

### D. Annual Count of Eligible Students

The district shall conduct an annual count of eligible students and report to the State Department of Education the number of private school children evaluated, the number found eligible and the number who are provided with special education services. Students aged three (3) to five (5) must have their special education services identified on an IEP since Idaho does not have state-funded preschool programs. This count will be used to determine the amount of funds the district shall expend providing special education and related services to private school students in the next school year (see Section 2E). The district will consult with representatives of private school students to determine how to conduct the count.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

**E. Provision of Services**

Provision of services applies to all eligible students who attend non-profit private elementary and secondary schools within the district's geographical boundaries regardless of where they reside. Parentally placed private school students with disabilities do not have an individual right to receive some or all of the special education and related services that the student would receive if enrolled in a public school. Services offered to parentally placed private school students are determined through the district and private school consultation process.

1. District Responsibilities

- a. Private school students with disabilities may receive a different amount of services than public students with disabilities; they are not entitled to every service or the amount of service that they would receive if enrolled in public school. This means that it is possible for a private school student to receive only a related service or piece of equipment.
- b. Special education and related services provided to parentally placed private school students with disabilities, including materials and equipment, will be secular, neutral and non-ideological.
- c. The district is required to offer FAPE to private school students who reside in their district, including when the student attends a private school outside of the district boundaries. Unless the parent makes clear their intention to keep their child in the private school, the district of residence must develop an IEP.
- d. Services may be provided at a public school building or another agreed upon site (including parochial schools to the extent consistent with the law) determined by the district in consultation with appropriate representatives of private school students.
- e. Services provided to private school students with disabilities must be provided by personnel meeting the same standards as personnel providing services in the public schools.

2. Eligibility for Services

If an evaluation team determines that a student needs special education and related services:

- a. The district of residence shall offer to make FAPE available upon enrollment ~~or dual enrollment~~ in a district public school. The district of residence must develop an IEP for the student who is parentally placed in private school unless the parent makes clear an intent not to consider public school enrollment. The district has no obligation to implement that IEP unless the student enrolls in the public school.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

- b. If the parent chooses not to enroll the student in the district of residence and designated funds are available in the district in which the private school is located, a meeting will be held to develop a Services Plan (SP). The meeting will include a representative of the private school to develop a SP. The SP is developed by the same members that would constitute the IEP team.
  - c. Any services the district provides to a private school student shall be in accordance with an SP.
3. Service Plan (SP) Development

The SP shall describe the specific special education and related services that will be provided to the student in light of the determinations that have been made by the district. To the extent appropriate, the district shall initiate and conduct meetings to develop, review, and revise SPs in accordance with the following requirements:

- a. Given the services that the district has elected to provide to private school students, the SP must meet the requirements of the IEP to the extent appropriate (see Chapter 5). The SP excludes sections pertaining to:
  - 1) extended school year (ESY) services;
  - 2) participation in statewide and district wide assessments;
  - 3) placement determination (least restrictive environment);
  - 4) Child Count federal report settings; and
  - 5) elements that, although typical for an IEP, would be inappropriate given the services the district has elected to provide.
- b. An SP shall be in effect at the beginning of each school year and accessible to each person responsible for its implementation.
- c. Meetings shall be held to review and revise SPs at least annually to address any lack of student progress toward goals and in the general education curriculum.
- d. The SP team members include the same members as an IEP team. The district will ensure that a representative of the private school attends these meetings or participates by some other means.
- e. A parent shall be invited to SP meetings at a mutually agreed upon date and time. The invitation must indicate the purpose, time, and location of the meeting. The parent shall be informed that he or she may bring other persons knowledgeable about the student to the meeting. A copy of the SP will be given to the parent.

- f. The team developing the SP will consider the student's strengths and results of the most recent evaluations. The private school general education teacher should participate in the development, review, and revision of the SP.
- g. If necessary for a private school student to benefit from or participate in the services the district has elected to provide, the district shall provide transportation from the student's school or home to the site where services will be provided. The district shall take the student back to either the private school or the home, depending on the timing of the services. In this sense, transportation is not a related service but a means of making the services offered accessible. Transportation costs may be included in the district's expenditure requirement. The district is not required to transport the student from home to the private school.

#### F. Dispute Resolution

Due process hearings are available to parents of private school students only on the issue of Child Find and evaluation. Parents may challenge decisions regarding the provision of services by filing a state complaint with the SDE. (See Chapter 13 for more information on dispute resolution options.)

#### G. Determining the Proportionate Funding for Private School Students

IDEA requires school districts to dedicate at least a proportionate share of funds received under Part B to provide services for parentally placed students with disabilities who attend private schools within the boundaries of the district, regardless of their place of residence. To determine this proportionate amount, the district shall first determine the number of these private school students through the Child Find activities developed in the consultation process with private school representatives.

The number of parentally placed private school students is divided by the total (public and private) number of students with disabilities in the district to arrive at the percentage of private school students with disabilities. This percentage is then applied to the total funding received by the district under Part B grants Section 611 (ages three (3) to twenty-one (21) and Section 619 (ages three (3) to five (5) to determine the district's obligation.

##### Example for the XYZ School District:

- a. The number of parentally placed private school children within the district on December 1, 2017: **10**
- b. The number of public school children with disabilities on December 1, 2017: **90**
- c. Percentage of private school children with disabilities:  $A$  divided by  $A+B$  = **10%**

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

- d. Total Part B funds allocated for school year 2017-2018: **\$150,000**
  - e. Amount the district shall spend on providing special education and related services to parentally placed private school students in 2017-2018: **C x D = \$15,000**
1. State and local funds may supplement but may not supplant the proportionate amount of federal funds required to be expended for parentally placed private school children with disabilities.
  2. The costs of private school consultations and of carrying out Child Find activities may not be paid from the proportionate share of funds.
  3. The cost of any special education or related service, such as direct service, consultation, equipment, materials, or transportation may be used to determine that the district has satisfied its expenditure requirement for private school students with disabilities.
  4. If all proportionate funds set aside for private school students in a given fiscal year are not expended in that year they shall be carried forward into the next year for the purpose of providing equitable services.

**H. Expenditure Guidelines**

1. The district may place equipment and supplies that are purchased with Part B funds in a private school for a period of time needed for a program for eligible students with disabilities; however, the district shall:
  - a. retain title and exercise continuing administrative control over all equipment and supplies;
  - b. ensure that all equipment and supplies are used only for Part B purposes;
  - c. ensure that all equipment and supplies can be removed without remodeling the private school; and
  - d. remove equipment and supplies if necessary to prevent unauthorized use.
2. The district may use Part B funds to pay an employee of a private school to provide services to students with disabilities when the employee performs the services:
  - a. outside of his or her regular hours of duty; and
  - b. under public supervision and control.
3. Part B funds shall not be used to:

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

- a. finance the existing level of instruction in the private school or otherwise benefit the private school;
  - b. meet the needs of the private school; or
  - c. meet the general needs of students enrolled in the private school.
4. Part B funds shall not be used for repairs, remodeling, or construction of private school facilities.
  5. If it is possible for classes to include students enrolled in both public and private schools, then the classes must not be organized separately on the basis of school enrollment or religion.
  6. The district shall not appropriate any funds to private schools controlled by any church, sectarian, or religious denomination.

**Section 3. Students Placed by the District**

When the district places a student with a disability in a private school or facility, as a means of providing special education services through the IEP team process, the district shall ensure the following:

1. All special education procedures and timelines are followed.
2. Special education and related services are provided in accordance with an IEP.
3. A representative of the private school or facility attends or participates in the meeting to develop the IEP. If the representative cannot attend other measures such as conference telephone calls will be used to ensure participation.
4. The responsibility for reviewing and revising IEPs remain with the district.
5. Services are provided at no cost to the parent, including reimbursement to the parent for transportation and other costs associated with participation at an IEP meeting conducted in a geographical area outside the jurisdiction of the district.
6. The placement in the private school or facility is the least restrictive environment for that student.
7. The student is provided an education that meets state and district standards.
8. The student is afforded the same rights as students with disabilities who attend public schools.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

9. The parent is afforded the same rights as parents of students attending public schools.

In accordance with federal and state law, the SDE shall approve special education programs in private schools and facilities. The district shall ensure a program is approved prior to placing a student in that school or facility.

At the discretion of the district, once a student with a disability enters a private school or facility, meetings to review and revise the IEP may be initiated and conducted by the private school or facility. If the private school conducts a meeting, the district shall ensure that the parent and a district representative are involved in and agree to any proposed changes in the IEP before the changes are implemented.

**Section 4. Dual Enrollment of Private School Students by Parents**

According to Idaho Code, parents of private school students “shall be allowed to enroll the student in a public school for dual enrollment purposes.” Private school students who are dually enrolled are considered to be nonpublic school students. The district shall allow private school students who are eligible for special education and who are otherwise qualified to participate in school programs under the dual enrollment law to:

1. enroll in general education courses under the same criteria and conditions as students without disabilities; and
2. receive accommodations in the general education courses for which they are enrolled on a Section 504 plan, if needed.

Private school students may not dually enroll solely for special education and/or related services. The dual enrollment statute does not establish an entitlement to FAPE for a student with a disability. This means that there is no individual right to receive some or all special education services that the student would receive if enrolled in public school.

The reporting of attendance for private school students in the district is allowed under dual enrollment. If a student attends at least 2.5 hours per week without rounding hours, he or she shall be included in the weekly aggregate attendance. The average daily attendance (A.D.A.) is computed as .5 if the aggregate weekly hours are 2.5 or greater but less than 4.0 hours. When there are 4.0 hours or greater, divide by 4 to get the A.D.A.

Dually enrolled private school students could also be eligible to receive services that have been agreed upon through the district and private school consultation process. These services would be delivered through a SP.

**Section 5. Unilateral Placement of Student by Parents when FAPE is an Issue**

**A. General Provisions for Reimbursement to the Parent**

1. The district is required to make FAPE available to all eligible students with disabilities. If parents do not access FAPE, then the district is required to make provisions for private school students to receive Part B services consistent with Section 2E of this chapter.
2. The district is not required to pay for costs of tuition, special education, or related services and associated costs at a private school or facility for a student who was unilaterally placed there by a parent if the district made FAPE available to the student in a timely manner. If a parent disagrees with the availability of FAPE and there is a question about financial responsibility, the parent may request a due process hearing.
3. If the parent of a student with a disability enrolls the student in a private elementary or secondary school, without the consent of the district, a court or hearing officer may order the district to reimburse the parent for the costs of unilaterally placing the student in a private school if the court or a hearing officer determines that:
  - a. the district had not made FAPE available to the eligible student in a timely manner prior to the time the parent enrolled the student in the private school; and
  - b. the parent's placement is appropriate.
4. A hearing officer may find a student's placement in a private school or facility by a parent appropriate even if the private school or facility does not meet state standards. A private school will be deemed appropriate if the parent demonstrates that the private placement provides educational instruction specially designed to meet the unique needs of the child with a disability, supported by such services as are necessary to permit the child to benefit from that instruction.

**B. Denial or Reduction of Reimbursement to the Parent**

A court or hearing officer may reduce or deny reimbursement to a parent for the cost of a unilateral placement in a private school or facility under the following circumstances:

1. The parent did not inform the district that he or she rejected the placement proposed by the district to provide FAPE and did not state his or her concerns and intent to enroll the student in a private school. This notification by the parent shall be provided to:
  - a. the IEP team at the most recent IEP meeting prior to removing the student from the public school; or

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

- b. the district, in writing, at least ten (10) business days (including any holidays that occur on a business day) prior to removing the student from public school.
2. Prior to removal of the student from the public school, the district informed the parent of its intent to evaluate the student (including a statement of the purpose of the evaluation that was appropriate and reasonable), but the parent did not make the student available for the evaluation.
3. A judicial decision finds unreasonableness with respect to the actions taken by the parent.

Reimbursement shall not be reduced or denied under any of the following circumstances:

1. The district did not notify the parent of his or her obligation to provide the notice set forth in number 3 above or the district prevented the parent from providing that notice.
2. The parent had not received written notice.
3. The district's proposed placement would likely result in physical harm to the student.

Reimbursement may not be reduced or denied at the discretion of a court or hearing officer for failure to provide this notice if:

1. The parents are not literate or cannot write in English, or
2. The district's proposed placement would likely result in serious emotional harm to the student.

**Section 6. Out of State Students Residing in Residential Facilities**

For school-age special education students from outside the state of Idaho who, due to the nature and severity of their disabilities, are residing in licensed public or private residential facilities within the state of Idaho, the school district in which the residential facility is located will provide education services to such students if requested by the licensed public or private residential facility and an agreement is entered into with the residential facility. The district will be given the opportunity to provide input on any federally required education programs or plans for such students.

**A. Contract for Education Services**

The contract with a residential facility will include the following provisions:

1. The education services to be provided by the district.

STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017

2. The amount to be paid by the licensed public or private residential facility.

The amount paid will be equal to the district's full cost of providing the education services delineated by the contract as determined by the district. Such students will be excluded from all average daily attendance and other reports provided to the state that would result in the distribution of state funding to the district.

In the event a residential facility fails to sign a contract with the district agreeing to pay the full cost for providing education services, the school district in which the residential facility is located will not be responsible for providing education services to the out-of-state students residing in the residential facility.

**B. Determining Residency**

In determining whether a student is from outside the state of Idaho, the school district in which the residential facility is located will determine the primary residency of the student's parent or guardian. Proof of Idaho residency will be established by showing an Idaho motor vehicle driver's license, payment of Idaho state income taxes, or other documentation evidencing residency within the state of Idaho.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

**Affirmation of Consultation with Private School Officials  
and Representatives of Parents**

P.L. 108-448 Individuals with Disabilities Education Improvement Act (IDEA) requires that timely and meaningful consultation occur between the district and private school representatives.

The following topics are to be discussed during the consultation:

- The Child Find process and how parentally placed private school students suspected of having a disability can participate equitably, including how parents, teachers, and private school officials will be informed of the process;
- The determination of the proportionate amount of Federal funds available to serve such students, including the determination of how the amount was calculated;
- The consultation process among the district, private school officials, and representatives of such students, including how such process will operate throughout the school year to ensure that such students identified through the Child Find process can meaningfully participate in special education and related services;
- How, where, and by whom special education and related services will be provided for such students, including a discussion of types of services, including direct services and alternate service delivery mechanism, how such services will be apportioned if funds are insufficient to serve all [such students], and how and when these decisions will be made; and
- If the district and a private school official disagree on the provision of services or types of services, the district will provide a written explanation of its decision to the private school official.

The district shall obtain a written affirmation signed by the representatives of participating private schools. If such representatives do not provide such affirmation within a reasonable period of time, the district shall forward documentation of the consultation process to the State Department of Education (SDE).

A private school official shall have the right to submit a complaint to the SDE that the district did not engage in consultation that was meaningful and timely or did not give due consideration to the views of the private school official. The district shall forward the appropriate documentation to the SDE. If the private school official is dissatisfied with the decision of the SDE, such official may submit a complaint to the Secretary of Education by providing the basis for the noncompliance.

Provision of equitable services shall be provided by employees of the district or through contract by the district with an individual, association, agency, organization, or other entity. Special education and related services provided to such students, including materials and equipment, shall be secular, neutral, and non-ideological.

STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017

Idaho Special Education Manual Chapter 9: Private School Students

The control of funds used to provide special education and related services, and title to materials, equipment, and property purchased with [Federal special education] funds shall be in the district for the uses and purposes provided, and the district shall administer the funds and property.

We agree that the district provided timely and meaningful consultation regarding the bulleted items above.

**Chapter 10**  
**Improving Results**

This chapter reflects the changes in the IDEA that focus on improving educational outcomes, analyzing and reporting data to the public, and ensuring that personnel who work with students with disabilities are prepared to meet their unique needs.

**Section 1. Monitoring Priorities and Indicators**

IDEA requires increased accountability for programs serving students with disabilities. Monitoring priorities include both performance and compliance goals. Accountability areas established by IDEA include a free appropriate public education (FAPE) in the least restrictive environment (LRE), Effective General Supervision, and Disproportionality. Each priority area encompasses specific performance indicators. These indicators include both performance and compliance components. Data on those indicators shall be collected, submitted to the State Department of Education (SDE), and publicly reported annually. That data shall be used to evaluate the effectiveness of programs and identify strategies to improve student outcomes.

The district is required to submit timely and accurate data from which the district's performance will be calculated based on the indicators in the Idaho's State Performance Plan, posted online annually on the SDE website.

**A. SDE Responsibility**

As part of the SDE general supervision responsibilities, the SDE is required to collect, review, and analyze data on an annual basis to determine if the state and districts are making adequate progress toward the required performance goals. This accountability process includes:

1. measuring performance on goals both for the state and the districts;
2. monitoring based on district performance and compliance data with the IDEA, and progress made toward meeting state goals;
3. identifying districts in one of the following categories: Meets Requirements, Needs Assistance, Needs Intervention, Needs Substantial Intervention;
4. providing professional development and technical assistance statewide and targeted technical assistance to districts demonstrating the highest needs;
5. reporting to the public on the state and districts' performance on state goals; and
6. developing and submitting an Annual Performance Report/State Performance Plan, as needed, to address state performance on required goals.

**B. District Responsibility**

Progress on the state's performance goals is directly linked to the districts' efforts and progress in these same areas. On an annual basis and as part of the SDE's general supervision and accountability, the district shall:

1. ensure the data it collects and reports to the SDE regarding special education students and personnel is accurate;
2. use data-based decision-making procedures to review and analyze data to determine if the district is making adequate progress toward performance goals; and
3. adjust strategies, as needed, to meet goals and improve student outcomes.

**Section 2. Comprehensive Early Intervening Services (CEIS)**

Under the IDEA, the district may use up to 15% of its IDEA Part B allocation in any fiscal year to provide comprehensive early intervening services (CEIS) for students in kindergarten through grade twelve (12), (with a particular emphasis on students in kindergarten through grade three (3) who are not currently identified as needing special education or related services, but who need additional academic and behavioral support to succeed in a general education environment.

These funds may be used for activities that include:

1. Professional development for teachers and other school staff to enable such personnel to deliver scientifically based academic and behavioral interventions, including scientifically based literacy instruction, and, where appropriate, instruction on the use of adaptive and instructional software
2. Providing educational and behavioral evaluations, services, and supports, including scientifically based literacy instruction.

Should a district be found in having significant disproportionality as provided under Part B, the district shall use 15% of its IDEA Part B allocations to provide comprehensive coordinated early intervening services.

**A. Budget Requirements**

If the district chooses to use IDEA Part B funds in any fiscal year to provide CEIS, the district will budget the amount used to provide these services, up to a maximum of 15% of the total allocation, in the Part B budget that is submitted annually to the SDE as part of the Part B and Preschool Application.

**B. Reporting Requirements**

When the district uses IDEA Part B funds to provide CEIS, an annual report shall be submitted to the SDE on:

1. The number of children who received CEIS; and
2. The number of children who received CEIS and subsequently receive special education and related services during the preceding two (2) year period.

**C. Relationship between FAPE and CEIS**

CEIS provided by the district shall not be construed to either limit or create a right to FAPE under the IDEA or to delay appropriate evaluation of a student suspected of having a disability.

**Section 3. Personnel**

The district shall ensure that personnel working with students with disabilities meet the qualifications established by the SDE and have the content knowledge and skills to meet the needs of these students.

**A. Appropriate Certification or Licensure**

Public school personnel shall meet the appropriate certification or licensure requirements for position assignments. Complete certification standards for personnel providing special education or related services may be found in the handbook titled Idaho Standards for the Initial Certification of Professional School Personnel. This handbook is available from the SDE Division of Certification.

The lists that follow are examples only. They do not include every possible position or licensing situation. For more information call the SDE Division of Certification at (208) 332-6800.

1. The following special education and related services positions require individuals who are employed by the district to be certificated and to meet any additional licensure requirements:
  - a. audiologist;
  - b. consulting teacher;
  - c. counselor;
  - d. director of special education;
  - e. early childhood special education teacher;

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

- f. school psychologist;
  - g. special education teacher;
  - h. speech-language pathologist; and
  - i. supervisor/coordinator of special education.
2. Some special education service providers need both licensure in their area of expertise and certification from the SDE.
- a. School nurses are certificated by the SDE and licensed by the State Board of Nursing.
  - b. School social workers are certificated by the SDE and licensed by the Bureau of Occupational Licenses.
3. Some special education service providers must meet the licensure or certification requirements in their respective professions, but certification from the SDE is not required.
- a. Occupational therapists and physical therapists are licensed by the State Board of Medicine.
  - b. Vocational education teachers are certificated by the Idaho Division of Professional-Technical Education.
  - c. Vocational rehabilitation counselors must meet national standards for Certified Rehabilitation Counseling (CRC) to be employed by the Idaho Division of Vocational Rehabilitation.
4. Individuals who used a consultant specialist provision or a letter of authorization in the past are no longer able to use these emergency certificates as an alternative for individuals to become certificated teachers in Idaho. The district shall use the alternative authorization options to request alternative endorsement/certification when a professional position cannot be filled with someone who holds the appropriate endorsement/certification.

**B. Shortage of Personnel**

If there is a shortage of qualified personnel, the district shall take measurable steps to recruit and hire highly qualified personnel to provide special education and related services to students with disabilities. However, when a professional position cannot be filled with an individual who has the appropriate certification, vacant positions may be filled with personnel on the following approved alternate pathways to teaching:

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

1. Teacher to New Certification: An individual holds a Bachelor’s degree and a valid teaching certificate without full endorsement in area of need. The candidate works towards completing a preparation program for special education certification and is employed by the district.
2. Content Specialist: An individual who is ~~highly and~~ uniquely qualified in an area ~~and~~ holds a Bachelor’s degree. The candidate works towards completing a preparation program while employed by the district. The preparation program must include mentoring, one classroom observation per month until certified, and prior to entering the classroom; the candidate completes an accelerated study in education pedagogy.
3. ~~Computer Based Route to Teacher Certification Non-Traditional Route to Certification~~: An individual may acquire interim certification through a ~~computer-based-non-traditional~~ alternative route to teacher certification that is approved by the State Board of Education. ~~On November 4, 2003, the Idaho State Board of Education passed a temporary rule approving ABCTE (American Board for Certification of Teacher Excellence) as an alternate route to Idaho certification.~~ During the interim certification, teaching shall be done in conjunction with a two year mentoring program approved by the State Board of Education.

Further information and all requirements for each alternative route to certification are available in Idaho Administrative Code (IDAPA 08.02.02), ~~and the Idaho Standards for the Initial Certification of Professional School Personnel document.~~

Nothing in the IDEA creates a right of action for due process on behalf of a student or class of students for failure to employ qualified staff.

**C. Paraprofessionals, Assistants, and Aides**

The district may employ paraprofessionals, assistants, and aides who are appropriately trained and supervised to assist in the provision of special education and related services to students with disabilities if they meet standards established by the SDE (find the “Standards for Paraprofessionals Supporting Students with Special Needs” on the SDE website).

Appropriate duties to be performed by paraprofessionals are:

1. provide one-on-one services for students as specified in the students’ IEP;
2. assist with classroom management and organizing materials;
3. provide assistance in a computer lab or media center;
4. conduct parental involvement activities;
5. act as a translator;

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

6. assist in provision of services only under the direct supervision of a certified teacher or related service provider, specifically:
  - a. a teacher/related service provider plans instruction and evaluates student achievement; and
  - b. the paraprofessional works in conjunction with the teacher or related service provider as determined by the student's IEP.

A special education paraprofessional working in a Title I school-wide program shall be ~~highly~~ qualified as demonstrated by the competencies listed in the ESEA.

1. All Title I paraprofessionals must have a secondary school diploma or its recognized equivalent.
2. Additionally, except as noted below, paraprofessionals hired after January 8, 2002, and working in a program supported with Title I, Part A funds must have:
  - a. Completed two years of study at an institution of higher education (In Idaho, this is thirty-two (32) credits from an accredited university or college); **or**
  - b. Obtained an associate's (or higher) degree; **or**
  - c. Met a rigorous standard of quality and be able to demonstrate, through a formal State or local academic assessment, knowledge of and the ability to assist in instructing, reading, writing, and mathematics (or, as appropriate, reading readiness, writing readiness, and mathematics readiness) (in Idaho this is the ETS Parapro Praxis with a minimum score of 460).

The district may encourage qualified paraprofessionals employed in their classrooms to become certified teachers. ~~The alternative route preparation program for para-educator to teacher must be completed within five (5) years of admission to the program. Candidates work toward completion of a preparation program while employed by the school district.~~

#### **D. Educational Interpreters**

The district may only employ an individual as an educational interpreter if they have met the state qualifications identified in Section 33-1304, Idaho Code. Educational interpreters employed by the district shall complete a minimum of eighty (80) hours of training in the areas of interpreting or translating every five (5) years.

#### **E. Supervision of Staff**

A teacher and/or a related service provider with appropriate certification or licensure who has been informed of his or her specific responsibilities related to a student's IEP has the primary

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

responsibility to ensure the appropriate implementation of the IEP. The district has policies and procedures for the supervision and evaluation of all certificated/licensed or contracted employees.

The certificated/licensed teacher and/or related service provider will generally be responsible for the supervision of all paraprofessionals, assistants, and aides who provide direct services to students with disabilities. All paraprofessionals, assistants, and aides must have a supervision plan developed by a certificated or licensed professional.

**F. Professional Development Plan**

The district will take measures to ensure that all personnel necessary to provide special education and related services according to the IDEA are appropriately and adequately prepared. Personnel may use a variety of opportunities for technical assistance and training activities to further develop professional knowledge and skills in order to meet the needs of students with disabilities.

To the extent the district determines it is appropriate, paraprofessional personnel may use the technical assistance and training activities offered by the district or SDE to improve practice for paraprofessional supports for special needs.

**Chapter 11  
Procedural Safeguards**

This chapter reflects changes in procedural safeguards as a result of the IDEA.

**Section 1. Procedural Safeguards Notice**

A parent/adult student has specific procedural safeguards given to him or her by the IDEA and state law. Each district has a document titled *Procedural Safeguards Notice* that is provided to parents/adult students which contains a full explanation of the special education rights. The *Procedural Safeguards Notice* shall include a full explanation of the procedural safeguards, written in the native language of the parents (unless it clearly is not feasible to do so) and written in an easily understandable manner.

**A. Procedural Safeguards Notice Contents**

The following table lists various topics contained in the *Procedural Safeguards Notice* and identifies what chapter in this Manual provides more information about each topic.

<b>Topic</b>	<b>Chapter</b>
1. parental consent	11
2. written notice	11
3. access to educational records	11
4. independent educational evaluation (IEE)	11
5. the opportunity to present and resolve complaints, including: a. the time period in which to make a complaint b. the opportunity for the district to resolve the complaint c. the availability of SDE mediation d. the differences between a due process hearing complaint and state complaint	13
6. the student's placement during pendency of due process proceedings	13
7. procedures for students who are subject to placement in an interim alternative educational setting (IAES)	12
8. requirements for unilateral placement by parents of students in private schools at public expense	9
9. due process hearings, including requirements for disclosure of evaluation results and recommendations	13
10. civil actions, including the time period in which to file such actions	13
11. attorney fees	13

**B. When the Procedural Safeguards Notice Is Provided**

The district will provide a *Procedural Safeguards Notice* that includes a full explanation of the special education rights afforded the parent/adult student only once per year, except that a copy will be given to the parent/adult student:

1. upon an initial referral or parent/adult student request for evaluation;
2. upon the first occurrence of a filing of a due process hearing or a state complaint;
3. when a decision is made to take a disciplinary action that constitutes a change of placement; and
4. upon request by the parent.

A *Procedural Safeguards Notice* suitable for copying can be found in the document section of this chapter.

**Section 2. Domestic Considerations**

**A. Parent**

1. Definition

The term “parent” means:

- a. a biological, adoptive, or foster parent of a child;
- b. a guardian (but not the state if the child is a ward of the state);
- c. an individual acting in the place of a biological or adoptive parent (including a grandparent, stepparent, or other relative) with whom the child lives;
- d. an individual who is legally responsible for the child’s welfare;
- e. an adult student; or
- f. a surrogate parent who has been appointed by the district.

2. Determining Who Has Parental Rights

In determining who has parental rights, individuals should be considered in the following order of priority:

- a. a biological parent; unless a Court orders a specific person to act as the parent or to make educational decisions on behalf of the child;
- b. a person who has legal documentation (guardianship, power of attorney, custody agreement) of being responsible for the student's welfare;
- c. a grandparent, stepparent, other relative, or foster parent with whom the student lives and who is acting as a parent; or
- d. a surrogate parent appointed by the district to represent the student's interests in educational decisions.

**B. Surrogate Parent**

1. Definition

A "surrogate parent" is an individual assigned by the district to assume the rights and responsibilities of a parent under the IDEA in any of the following circumstances:

- a. No parent can be identified or located for a particular student.
- b. The student is a ward of the state.
- c. The student is an unaccompanied homeless youth.

The surrogate parent has the same rights as a biological parent throughout the special educational decision-making process.

2. Referral for a Surrogate Parent

Any person who is aware that a student may need a surrogate parent may make a referral for a determination to the district's special education director or an appropriate district administrator. The district will appoint a surrogate in any of the following circumstances:

- a. A parent cannot be identified.
- b. A parent cannot be found after reasonable efforts to locate the parent.
- c. The student is a ward of the state. If a state judge has appointed a surrogate to oversee the care of a student who is a ward of the state, the judge-appointed surrogate may make decisions regarding the student's education, including special education, provided he or she meets the criteria for a district-appointed surrogate.

- d. The student is a homeless youth who is unaccompanied.

The district will make a good faith effort and maintain records of attempts to locate a parent. The district cannot appoint a surrogate parent when the biological parent is available but chooses not to participate. When a surrogate parent is needed for a student, the district will appoint a surrogate who meets the conditions set forth in item 3, below. The district will make reasonable efforts to assign a surrogate within thirty (30) calendar days after it determines that the student needs a surrogate.

### 3. Criteria for Serving as a Surrogate Parent

A surrogate parent may represent the student in all matters relating to identification, evaluation, placement, and the provision of FAPE. The surrogate parent shall:

- a. Have knowledge and skills that ensure effective representation.
- b. Have no personal or professional interest that conflicts with the interest of the student.
- c. Meet the following conditions:
  - 1) is not an employee of the SDE, the district, or any other agency that is involved in the education or care of the student; and
  - 2) is not an employee of a nonpublic agency that provides educational care for the student.

Note: A person who otherwise qualifies to be a surrogate parent is not an employee of the district or agency solely because he or she is paid to serve as a surrogate parent.

In the case of a student who is an unaccompanied homeless youth, appropriate staff of emergency shelters, transitional shelters, independent living programs, and street outreach programs may be appointed as temporary surrogate parents until a surrogate can be appointed that meets all the requirements.

### C. Adult Students and the Transfer of Rights

An “adult student” is a student who is at least eighteen (18) years of age to whom special education rights have transferred under the IDEA and Idaho Code.

1. Discussion of the Transfer of Rights: Not later than the student’s seventeenth (17<sup>th</sup>) birthday, the IEP team shall discuss the transfer of special education rights to the student. Special education rights will transfer from the parent to the adult student when the student turns eighteen (18) years of age unless:

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

- a. the IEP team determines that the student does not have the ability to make informed decisions with respect to his or her educational program; or
  - b. a parent has obtained legal guardianship from a Court including the scope of educational matters.
2. Basis for Denial of Transfer: During the IEP meeting to discuss the transfer of rights, the IEP team will use the following as the basis for any denial of the transfer:
  - a. Evaluation data, test results, written reports, teacher observation, education records, and parent input, including whether the parent intends to seek guardianship.
  - b. Answers to the following questions:
    - 1) Is the student capable of understanding his or her rights?
    - 2) Is the student capable of exercising his or her rights?
    - 3) Is the student capable of understanding the consequences and impact of his or her decisions?
3. Following a Determination Concerning the Transfer of Rights: When the student's special education rights transfer at age eighteen (18), the parent and student will be informed that rights have transferred. The IEP shall contain a statement referring to the transfer (or not) of rights:
  - a. If the team determines that there is no relevant information about the student to prohibit the transfer of rights at age eighteen (18), the student's IEP shall contain a statement that the student has been informed that special education rights will transfer to him or her. The parent retains the right to receive notices required by the IDEA.
  - b. If the IEP team determines that the student lacks the ability to provide informed consent with respect to his or her educational program, a statement will be included in the IEP indicating that the parent, or other individual if the parent is not available, will retain all special education rights after the student reaches age eighteen (18).
  - c. If rights have transferred, the district shall continue to provide notices to the parent, but nothing under the IDEA requires parent participation in the process.
4. Revoking a Transfer of Rights: There is nothing in federal or state law that prohibits the IEP team from changing its decision later, based on new information and input.

Under state law, a parent can provide legal documentation of a student's incompetence *after* the student reaches age eighteen (18).

**D. Emancipated or Married Minors**

Idaho law does not provide for the emancipation of minors. However, minors who have been emancipated by a court of law in another state are considered an adult in Idaho. Emancipated minors should be able to provide the legal court document awarding them the power and capacity of an adult. A student under age eighteen (18) who claims to be an emancipated minor, but is unable to provide documentation should be assigned a surrogate parent by the district if a parent cannot be located.

Students under the age of eighteen (18) who are married to an adult, eighteen (18) years or older, are not emancipated minors in Idaho and do not have the power and capacity of an adult student. Instead, the spouse acts as the guardian of the student regarding legal rights and responsibilities.

**E. Ward of the State**

The term "ward of the state" means a child who, as determined by the state where the child resides, is a foster child, or a ward of the state *or* is in the custody of a public child welfare agency. The term does not include a foster child who has a foster parent who meets the definition of a parent in Section 2A.

**F. Child Custody**

1. Definitions of Custody

The following definitions of custody are used by Idaho courts in divorce proceedings:

- a. **Joint custody** means an order awarding custody of a minor child to both parents and providing that physical custody shall be shared by the parents in such a way as to assure the child frequent or continuing contact with both parents. A court may award either joint physical custody or joint legal custody, or both. If the court has declined an order awarding joint custody, the court order shall state in the decision the reason for denial of joint custody.
- b. **Joint physical custody** means awarding each of the parents significant periods of time in which a child resides with or is under the care and supervision of each of the parents. The actual amount of time with each parent is determined by the court. Generally, one of the parents is awarded primary physical custody.
- c. **Joint legal custody** means that the parents or parties are required to share the decision-making rights, responsibilities, and authority relating to the health,

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

education, and general welfare of a child. In Idaho, parents have joint legal custody unless the rights of one or both parents have been terminated.

2. Conflicts Between Parents Who Have Joint Custody

- a. **Custody questions:** When it is known that a custody question exists that involves the relevant legal status of one or both parents of a student, the district will ask the parent(s) to furnish a copy of the pertinent court order or decree, if one exists, to clarify the question at issue. School personnel will abide by the most recent court order or decree.

When district personnel receive conflicting information about custody, they will (a) initially follow the instructions of the parent with whom the child currently resides and (b) request a certified court document to clarify the custody issue.

- b. **Conflicting instructions:** When parents who have joint legal custody give conflicting instructions, the district's obligation is to inform the parents that any action proposed or refused will be based on the needs of the student and in accordance with the IDEA requirements. Both the district and either parent have options under the IDEA to resolve disagreements, including SDE Dispute Resolution processes such as mediation and due process hearings.
- c. **Access to records:** A parent who does not have primary physical custody has the same right to access records and to participate in special education decision making as does the parent with primary physical custody, unless otherwise specifically stipulated by a court. Idaho Code states, "Notwithstanding any other provisions of law, access to records and information pertaining to a minor child including, but not limited to medical, dental, health, and school or educational records, shall not be denied to a parent because the parent is not the child's custodial parent." Another provision of the law allows the parent with primary physical custody to request in writing that a minor child's address be deleted from any record to prohibit the other parent from learning the child's address by having access to school records.
- d. **Parental disagreement of consent:** When parents, both with legal authority to make educational decisions for their child, disagree on the revocation of consent for special education and related services, one parent may revoke consent for his or her child's receipt of special education and related services at any time. The district must accept either parent's revocation of consent, and provide written notice to the parents. After revoking consent, a parent maintains the right to subsequently request an initial evaluation which must be treated as an initial evaluation and not a re-evaluation for special education. A parent who disagrees with another parent regarding revocation of special

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

education services is not entitled to resolve the dispute through an IDEA due process hearing.

**Section 3. Informed Consent**

**A. Definition**

Consent is written approval given by a parent/adult student who has been fully informed of and understands all information relevant to the activity for which consent is sought. The request for consent describes the activity for which consent is sought and lists the records, if any, that will be released and to whom. All information shall be provided in the native language or mode of communication of the parent/adult student, unless not feasible. The parent/adult student shall be informed that the approval is voluntary and may be revoked at any time prior to the action. Consent is indicated by the parent's/adult student's signature.

**B. Actions Requiring Consent**

The following actions require the district to obtain written consent. Some of the actions that require written consent from the parent/adult student also require prior written notice from the district.

1. Informed written consent *and* written notice are required when:
  - a. Conducting assessments as part of an initial evaluation to determine whether a student is eligible for special education.
  - b. Conducting any assessment for reevaluation that involves more than a review of existing information. This includes any assessments that are conducted after a student has been determined eligible for special education. If a specific assessment was not listed on the *Consent for Assessment* form, then the district shall secure written consent again in order to conduct that particular assessment.
  - c. Initially providing special education and related services to a student with a disability.
2. Informed written consent is required when:
  - a. Using an individual family service plan (IFSP) instead of an IEP for students ages three (3) through five (5).
  - b. Disclosing personally identifiable information to unauthorized persons, unless provided as an exception under the Family Educational Rights and Privacy Act (FERPA) regulations. The written consent shall specify the records that

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

may be disclosed, state the purpose of the disclosure, and identify the party to whom the disclosure will be made.

- c. Accessing private insurance to pay for services listed in the IEP.
- d. The district requests to bill Medicaid (with some exceptions). The parent/adult student shall be informed of the frequency, amount, and type of services that the district will be submitting to Medicaid for reimbursement as identified on the student's IEP.
- e. Inviting outside agency representatives providing transition services to an IEP team meeting.
- f. Sharing of information between the district of location and the district of residence with a parentally placed elementary or secondary student.
- g. The excusal of an IEP team member from an IEP meeting when the meeting involves a modification or discussion of the member's area of the curriculum or related services.

**C. When Consent Is Not Required**

The district is not required to obtain informed consent when:

- 1. a review of existing data is part of an evaluation or a reevaluation;
- 2. tests are administered to both general and special education students in a grade or class and consent is not required for all students;
- 3. teacher or related-service-provider observations, ongoing classroom evaluation, or criterion-referenced tests are used as assessments in determining the student's progress toward goals and benchmarks/objectives on the IEP;
- 4. screening to determine appropriate instruction strategies for curriculum implementation;
- 5. a disclosure of personally identifiable information to persons authorized to have access under FERPA or the Idaho Student Data Privacy Act, Section 33-133, Idaho Code; **or**
- 6. an IEP team reviews and revises a student's IEP. However, the parent/adult student may file a written objection if he or she disagrees with all or part of the changes to the IEP.

**D. Refusal to Give Consent**

A parent/adult student may refuse to give written consent for an assessment, initial services or the release of information that the district believes is necessary to ensure FAPE during the reevaluation process.

If the parent does not provide consent for the reevaluation assessment, the district may choose not to pursue requesting SDE mediation and/or a due process hearing if the district determines through a review of existing data, that the information does not continue to support the determination of eligibility for special education services. In this case the district shall provide the parent with written notice of the proposed action to discontinue the provision of FAPE to the student based on a review of existing data.

The district may also choose to pursue the reevaluation through SDE mediation and/or by requesting a due process hearing. If the hearing officer determines that the action is necessary, and the parent/adult student does not appeal the decision, the district may proceed with the proposed action. The district shall provide the parent with written notice of the proposed actions.

The district shall secure written consent for the initial provision of special education and related services. There is no mechanism available to overturn a parent's/adult student's decision *not* to provide written consent for initial evaluation or initial provision of services. In the case of an initial evaluation or initial provision of services, if a parent/adult student fails to respond to reasonable measures to gain consent or does not consent, the district cannot be charged with failing to provide FAPE to the student and is not required to convene an IEP meeting or develop an IEP for special education or related services.

**E. Failure to Respond to a Request for Consent Regarding Reevaluation Assessment**

When a parent/adult student fails to respond to reasonable measures taken by the district to obtain written consent to determine continued eligibility, the district may proceed with the evaluation. The district shall have a record of its attempts to gain consent by documenting telephone calls made or attempted, correspondence sent, or visits made to the home or place of employment. Failure to respond is not the same as refusing consent for reevaluation.

**F. Revoking Consent for Evaluation**

Consent previously given for an evaluation or an individual assessment, the initial provision of special education and related services, and the disclosure of information may be revoked only before the action occurs. If consent is revoked for evaluation, the district may continue to pursue the action by requesting a due process hearing. If the hearing officer determines that the action for which consent is sought is necessary, and the decision is not appealed, the district may proceed with the action without the written consent of the parent/adult student. Consent must be revoked in writing.

**Section 4. Written Notice**

**A. Definition**

Written notice is the act of informing a parent/adult student in writing within a reasonable amount of time, before the district proposes to initiate or change, or refuses to initiate or change, the student's special education identification, the evaluation, educational placement, or provision of FAPE.

**B. Criteria for Written Notice**

1. Written notice must be provided in a reasonable amount of time before implementing the proposed action.
2. Written notice shall be in language understandable to the general public. It must be provided in the native language or other mode of communication normally used by the parent/adult student unless it is clearly not feasible to do so. If the native language or other mode of communication is not a written language, the district shall take steps to ensure the following:
  - a. The notice is translated orally or by other means in the native language or other mode of communication.
  - b. The parent/adult student understands the content of the notice.
  - c. There is written evidence that the notice requirements of this section have been met, such as a written record in the student's special education file documenting what was discussed.

When a parent/adult student disagrees with the district's written notice of a proposed or refused action, he or she can attempt to remedy the dispute using SDE processes, such as IEP facilitation, mediation, formal complaint procedures, or due process hearing procedures afforded by the IDEA. In addition, the parent/adult student may have the right to prevent the district from taking action by filing a written objection with the district.

**C. Written Notice Is Required**

1. The district shall provide written notice before proposing to initiate or change the following:
  - a. identification of the student;
  - b. any assessments for initial evaluation or reevaluation;
  - c. educational placement; or

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

- d. the provision of FAPE.
- 2. After the district's decision to refuse a parent's/adult student's request to initiate or change the identification, assessment, placement, or provision of FAPE.
- 3. If the district refuses to convene an IEP team meeting at the request of a parent/adult student.
- 4. When the evaluation team determines that additional assessments are not required during a reevaluation to determine whether the student continues to meet eligibility criteria, the district shall provide written notice to the parent/adult student of the decision and the reasons for that decision. The parent/adult student must also be informed of his or her right to request assessments when necessary to determine continued eligibility.
- 5. If a parent files a due process hearing request, the district is required to give written notice specific to the issues raised in the due process hearing request within ten (10) days.
- 6. If the district has determined that the student is being removed for disciplinary purposes which constitutes a change of placement.
- 7. If the parent/adult student revokes consent for the continued provision of special education.

**D. Written Notice is Not Required**

The district is not required to provide written notice in the following situations:

- 1. when reviewing existing data as part of an evaluation or a reevaluation (however, the parent/adult student shall be afforded the opportunity to participate in the review of existing data);
- 2. when tests are administered to both general and special education students in a grade or class;
- 3. when teacher or related service provider observations, ongoing classroom evaluation, or criterion-referenced tests are used as assessments in determining the student's progress toward goals and benchmarks/objectives on the IEP; or
- 4. if outside observation is in relation to teacher's general practices.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

**E. Content of Written Notice**

The content of written notice is intended to provide the parent/adult student with enough information so that he or she is able to fully understand the district's proposed action or refused action and to make informed decisions, if necessary.

The written notice shall include the following:

1. a description of the action proposed or refused by the district;
2. an explanation of why the district proposes or refuses to take the action;
3. a description of any other options the IEP team considered and the reasons why those options were rejected;
4. a description of each procedure, assessment, record, or report that the district used as a basis for the proposed or refused action;
5. a description of any other factors relevant to the proposed or refused action;
6. a statement that the parent/adult student has special education rights and a description of how to obtain a copy of the *Procedural Safeguards Notice*; and
7. sources to contact in obtaining assistance in understanding the *Procedural Safeguards Notice*.

**F. Objection to District Proposal**

If a parent/adult student disagrees with an IEP program change or placement change that is proposed by the IEP team, he or she may file a written objection to all or part of the proposed change. The district will respond as follows:

1. If the objection is postmarked or hand delivered within ten (10) calendar days of the date the parent/adult student received the written notice, the changes to which the parent/adult student objects cannot be implemented.
2. If a proposed change is being implemented during the ten (10) day period and an objection is received, the implementation of that change shall cease.
3. If an objection is made after ten (10) calendar days, the district may continue to implement the change, but the parent/adult student retains the right to exercise other procedures under the IDEA.

The parties may resolve a disagreement using methods such as holding additional IEP team meetings, or utilizing SDE Dispute Resolution processes, such as facilitation or mediation. If

these attempts fail, the district may request a due process hearing regarding the proposed change. A parent's/adult student's written objection to an IEP or placement change cannot be used to prevent the district from unilaterally placing the student in an IAES in accordance with the IDEA procedures for discipline of a student.

### **Section 5. Confidentiality and Access to Records**

The district shall collect, use, and maintain information about a student to make appropriate decisions concerning special education and the provision of FAPE. A student's special education case manager, usually the special education teacher, should organize all relevant records specific to district guidelines and the IDEA requirements.

The IDEA and FERPA contain provisions to protect the confidentiality of personally identifiable information in student special education records. These statutes also provide for the right to review and inspect records.

#### **A. Definition**

A "record" is defined as personally identifiable information directly related to the student and maintained by the district or a party acting for the district. A student record can be written or electronic.

1. The term "record" may include, but is not limited to, the following:
  - a. identifying data (name, address, parents, siblings, Social Security number, list of personal characteristics making identification reasonably certain by a person in the school community);
  - b. academic work completed (courses taken, transcript);
  - c. level of achievement (grades, portfolios, performance assessments, scores on standardized achievement tests, etc.);
  - d. attendance data;
  - e. scores and protocols of standardized intelligence, aptitude, and psychological tests;
  - f. records of teachers, counselors, medical personnel, and psychologists working directly with a student if disclosed to others;
  - g. interest inventory results;
  - h. observations and verified reports of serious or recurring behavior patterns;

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

- i. videotapes or audiotapes;
  - j. health data including medical assessments;
  - k. family background information;
  - l. transportation records;
  - m. student records maintained by agencies and individuals contracting with the district; and
  - n. email, text messages, or other written notes sent regarding the student or the student's family.
2. The term "record" does not include:
- a. records of instructional, supervisory, ancillary, and administrative personnel that are kept in the sole possession of the maker of the record and are not accessible or revealed to any other person except a temporary substitute for the maker of the record;
  - b. records created by law enforcement units of schools and maintained separately for non-educational purposes; and
  - c. employment records about a student who is employed by a school or district- (Note: Records relating to an individual in attendance at the agency or institution who is employed as a result of his or her status as a student are education records and not excepted);
  - d. records on a student who is eighteen (18) years of age or older, or is attending an institution of postsecondary education, that are:
    - 1) made or maintained by a physician, psychiatrist, psychologist, or other recognized professional or paraprofessional acting in his or her professional capacity or assisting in a paraprofessional capacity;
    - 2) made, maintained, or used only in connection with treatment of the student;
    - 3) disclosed only to individuals providing the treatment (Note: "Treatment" does not include remediation educational activities or activities that a part of the program of instruction); and
  - e. grades on peer-graded papers before they are collected and recorded by a teacher.

**B. Protection of Records**

The district shall prevent unauthorized disclosure of personally identifiable information pertaining to students with disabilities. "Disclosure" is the release, transfer, or other communication of education records or of personally identifiable information contained in those records to any party, by any means, including oral, written, or electronic. Districts must have a policy to protect personally identifiable information from security risk resulting from unsecured data transmittal or storage.

To ensure protection of records, the district shall do the following:

1. Obtain written and dated consent from the parent/adult student before disclosing personally identifiable information:
  - a. to unauthorized individuals; or
  - b. for any purpose except as authorized by law.
2. Designate and train a records manager to assure security of confidential records for students with disabilities.
3. Maintain a log of requests for access to education records if the request is not from a:
  - a. a parent/adult student;
  - b. a school employee with a legitimate educational interest;
  - c. a party seeking designated directory information; or
  - d. a party receiving the records as directed by a federal jury or other subpoena ordering no one to disclose the existence of the request to access records.

This log includes the name, agency affiliation, date, and purpose for accessing the records. A log documenting denials for records and partially fulfilled requests should also be maintained.

4. Maintain, for public inspection, a current listing of names and positions of employees who have access to personally identifiable information.
5. Establish procedures to ensure the confidentiality of personally identifiable information at collection, storage, disclosure, and destruction stages.
6. Ensure that, if any education record includes information on more than one student, a parent/adult student will only be allowed to inspect, review, or be informed about the record of the student at issue.

7. Ensure that each person collecting or using personally identifiable information receives training or instruction regarding the policies and procedures governing confidentiality. All staff members, even those who do not have access to special education records, should be informed about what is considered appropriate and inappropriate access to and use of information within the records. The district may maintain a record of the training provided—including the name of the person or persons providing the training, dates of the training, those attending, and the subjects covered—for the purpose of documenting that new staff members have been trained as soon as possible after they have been hired.

**C. Access to Records**

The district shall:

1. Annually notify the parents of all students, including students with disabilities currently in attendance, of their rights under FERPA. The notice shall include all of the following:
  - a. procedures for exercising the right to inspect and review education records;
  - b. procedures for requesting amendment of records; and
  - c. a specification of criteria for determining who constitutes a school official or employee in the district and what constitutes a legitimate educational interest.
2. Permit a parent/adult student, or his or her representative, to inspect and review any record relating to educational matters that is collected, maintained, or used by the district. The district will presume that a custodial or non-custodial parent has the authority to inspect and review a record relating to his or her child unless there are legal documents limiting access to those records under state law. A minor student's address will be deleted from any record if requested in writing by a custodial parent to prohibit a non-custodial parent from learning the address simply by having access to the school records.

The district will make records available to a parent/adult student for review:

- a. without delay but no later than forty-five (45) days after the request;
- b. before any meeting regarding an IEP;
- c. before a resolution session; and
- d. not less than five (5) business days before any due process hearing.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

The district should note that test protocols may be part of a student's educational record. Test publishers require districts to maintain the integrity and validity of tests. Parents or others authorized by the parent/adult student interested in a student's test results are allowed to view the student's responses to test items, but only if the information is shared in the presence of a person qualified to explain the results and meaning of the various items and data contained in the protocol.

3. Upon request, provide a parent/adult student with a list of the types of education records the school collects, maintains, or uses and where they are kept.
4. Respond to any reasonable request made by a parent/adult student for an explanation and interpretation of a record.
5. Provide a copy of education records if a parent/adult student would otherwise be unable to effectively exercise his or her right to inspect and review those records. An education record may include copyrighted test protocols which include personally identifiable information. A fee may be charged for the copies, but not to search for or retrieve information. The district shall publish a schedule of fees it intends to charge.
6. Always provide a parent/adult student a copy of the IEP and any documentation of identification and eligibility.

**D. Disclosures Not Requiring Consent**

Consent is generally required to disclose personally identifiable information to others. However, consent is not required when:

1. A school official or employee has a legitimate educational interest to access the records.
2. A representative of the Federal Comptroller General, the United States Department of Education, or the State Department of Education (SDE) accesses records necessary for an audit or evaluation of a federal program or for enforcement or compliance with federal regulations.
3. A student transfers to another school or school system in which the student intends to enroll unless a district has adopted a procedure requiring consent. However, the parent/adult student should be notified of the request for records at the last known address of the parent/adult student unless he or she initiated the request.
4. The health and safety of the student or other individuals is in jeopardy because of an emergency.
5. The disclosure concerns the juvenile justice system's ability to effectively serve the student or the ability to respond to court orders or subpoenas, as specified in state

law. The district will make a reasonable effort to notify the parent of the court order in advance of compliance, unless the subpoena specifically states that it is not to be disclosed.

6. An organization conducts studies on behalf of education agencies or institutions under specified FERPA criteria.
7. The disclosure is in connection with an application for financial aid and is necessary to determine eligibility for the aid, the amount of the aid, conditions for the aid, or to enforce the terms and conditions of the aid (“financial aid” means a payment of funds to an individual that is conditioned on the individual’s attendance at an education agency or institution).
8. The district has designated information as “directory information” under the conditions in FERPA.

**E. Destruction of Records**

The district will maintain education records, including eligibility documentation and IEPs, for at least five (5) years after disenrollment from the district to demonstrate fiscal accountability and program compliance with the IDEA requirements. The district shall inform a parent/adult student when personally identifiable information collected, maintained, or used is to be destroyed because the information is no longer needed to provide educational services to the student.

Electronic copies will be treated as the original so long as those copies adequately capture any handwritten notes and signatures. Test Protocols and other assessment information shall be maintained during the period in which the report which utilizes such information is in effect.

Note: Medicaid-related records, specifically expenditure documentation, cost allocation process, all student records related to the Medicaid billing and service delivery (e.g., data sheets, IEPs, health care plans, physician recommendations for assessments and IEP services, evaluation recommendations, documented supervision of paraprofessionals), and revenue documentation, must be kept for a period of six (6) years.

The parent/adult student must be informed of the personally identifiable information that the district intends to destroy and that the information will be destroyed no earlier than forty-five (45) calendar days from the date of the notice. The parent/adult student must also be informed of the procedure to follow if he or she wishes to formally object to the destruction of the information and wants the records sent to him or her.

Written and electronic records of individual students are confidential. The district will ensure the complete destruction of the records which may include but is not limited to: shredding, permanently deleting, or burning, under supervision of the staff member responsible for the records if not released to the parent/adult student. The records manager should maintain a log that documents the date of destruction or release of records.

A permanent record of the student's name, address, phone number, grades, classes attended, immunization records, test scores, attendance record, grade level, and year completed may be maintained by the district without a time limitation. Any other personally identifiable information shall be destroyed at the request of the parent/adult former student. When informing the parent/adult student of his or her rights, the district should remind the parent/adult student that the records might be needed for Social Security benefits or other purposes in the future.

#### **F. Request for Amendment of Records**

A parent/adult student may request that the district amend the student's records if he or she believes that information collected, maintained, or used in the education record is inaccurate, misleading, or in violation of the privacy or other rights of the student. The district will use the following procedure:

1. The district, within a reasonable period of time—not to exceed forty-five (45) days of receipt of the request—must decide whether to amend the record. If the district refuses to amend the record, the parent/adult student must be informed of the refusal and be advised of the right to and procedure for requesting a district hearing under the district's FERPA policy. A district hearing is an informal hearing that does not have all the requirements of a due process hearing.
2. If a district hearing is requested and the district decides that the information is inaccurate, misleading, or in violation of the student's rights, the district shall amend the record and inform the parent/adult student in writing.
3. If a district hearing is requested and the district decides the information is accurate and does not violate the student's rights, the district shall inform the parent/adult student that he or she may place a statement in the record. This statement may comment on the information in the record or set forth the parent's/adult student's reasons for disagreeing with the district. Any statement placed with a record must accompany the record for as long as the district maintains the record. If the district discloses the record to any person, the district shall also disclose the statement.

#### **G. District Hearings on Procedures for Records**

Each district is required to have a FERPA policy which includes the rights to request a hearing challenging the accuracy of records.

#### **H. Students' Rights**

When special education rights transfer to a student under the IDEA and Idaho Code, the FERPA rights regarding education records also transfer to the student. The district shall inform the parent/adult student that both the IDEA and FERPA rights regarding education records transfer

although FERPA gives the parent of a student who is claimed to be a dependent for IRS purposes the right to request access without the consent of the student.

### **Section 6. Independent Educational Evaluations**

#### **A. Definition**

An independent educational evaluation (IEE) means one or more individual assessments, each completed by a qualified examiner who is not employed by the district responsible for the education of the student in question.

#### **B. Right to an IEE**

1. A parent/adult student has the right to obtain an IEE at public expense if he or she disagrees with an evaluation obtained or conducted by the district. The parent/adult student is entitled to only one IEE at public expense for each district evaluation.
2. The parent/adult student has the right to an IEE at his or her own expense at any time, and the IEP team shall consider the results.
3. The parent/adult student is not automatically entitled to have additional assessments beyond those determined necessary by the district for an evaluation. However, if parent/adult student is interested in additional or different assessments and the district refuses to provide them and provides written notice of refusal. The parent/adult student may request a due process hearing.
4. A district may initiate a due process hearing, without undue delay, to determine if the evaluation it conducted is appropriate. If the final decision of a hearing officer, or a court of law's decision on an appeal, is that the evaluation conducted by the district was appropriate, the parent and/or adult student still has the right to an IEE but at his or her own expense.
5. A hearing officer may order an IEE at public expense if he or she determines that the evaluation conducted by the district was not appropriate.

#### **C. Procedures for Requesting an IEE**

If a parent/adult student requests an IEE at public expense, the district may ask why he or she disagrees with the evaluation obtained by the district, but the district cannot require an explanation. The district shall give the parent/adult student the criteria under which an IEE can be obtained. The district's IEE criteria shall include the following information:

1. the location for the evaluation;

2. the required qualifications of the examiner;
3. the eligibility requirements for the specific disability categories; and
4. reasonable cost containment criteria applicable to personnel for specified assessments to eliminate unreasonably excessive fees.

Except for the criteria listed above, the district may not impose other conditions or timelines if doing so would be inconsistent with the parent's/adult student's right to an IEE. Upon request, a list of qualified examiners who can conduct an IEE will be provided.

A parent/adult student may request an opportunity to demonstrate that unique circumstances justify an IEE that does not fall within the district's cost criteria. If an IEE that falls outside the district's cost criteria is justified, that IEE will be publicly funded.

**D. District Responsibilities Following IEE Requests**

1. If a parent/adult student requests an IEE at public expense, the district shall do one of the following without unnecessary delay:
  - a. Provide the district's IEE criteria and information about where an IEE may be obtained.
  - b. Request a due process hearing to show that the district's evaluation is appropriate. If the final hearing decision is that the district's evaluation is appropriate, the parent/adult student may pursue an IEE, but at his or her own expense.
2. If a parent/adult student asks the district to pay for an IEE that has already been obtained, the district shall pay for the IEE if it meets the criteria for publicly funded IEEs. If the district believes that its evaluation was appropriate, but agrees to pay for the IEE, the district should state this in writing within the same document in which it agrees to pay. The district can also request SDE mediation.

**E. Consideration of the IEE Results**

If a parent/adult student obtains an IEE and makes that evaluation available to the district, the results must be considered by the district in any decision made with respect to the provision of FAPE. The results may also be presented as evidence at a hearing regarding the student. This is true regardless of whether the IEE is at the expense of the parent/adult student or district.

The results of an IEE cannot be the sole determining factor for eligibility. The evaluation team has the responsibility to use existing evaluation data in addition to the IEE to determine whether a student has or continues to have a disability under the IDEA.

STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017

## Part B PROCEDURAL SAFEGUARDS NOTICE

Revised: June 2016

Dear Parent,

This document provides you with the required notice of the procedural safeguards available under the Individuals with Disabilities Education Act (IDEA) and U.S. Department of Education regulations. The IDEA, the Federal law concerning the education of students with disabilities, requires schools to provide the parent(s) of a child with a disability a notice containing a full explanation of the procedural safeguards available. A copy of this notice must be given only one time per school year, except that a copy must also be given:

- (1) Upon initial referral or your request for evaluation;
- (2) Upon receipt of your first State complaint and upon receipt of your first due process complaint in a school year;
- (3) When a decision is made to take a disciplinary action against your child that constitutes a change of placement; and
- (4) Upon your request.

Please contact the school district for more information on these rights.

For further explanation you may also contact:

## GENERAL INFORMATION

### PRIOR WRITTEN NOTICE

#### 34 CFR §300.503

##### Notice

Your school district must give you written notice (provide you certain information in writing), within a reasonable amount of time before it:

1. Proposes to initiate or to change the identification, evaluation, or educational placement of your child, or the provision of a free appropriate public education (FAPE) to your child; or
2. Refuses to initiate or to change the identification, evaluation, or educational placement of your child, or the provision of FAPE to your child.

##### Content of notice

The written notice must:

1. Describe the action that your school district proposes or refuses to take;
2. Explain why your school district is proposing or refusing to take the action;
3. Describe each evaluation procedure, assessment, record, or report your school district used in deciding to propose or refuse the action;
4. Include a statement that you have protections under the procedural safeguards provisions in Part B of IDEA;
5. Tell you how you can obtain a description of the procedural safeguards if the action that your school district is proposing or refusing is not an initial referral for evaluation;
6. Include resources for you to contact for help in understanding Part B of IDEA;
7. Describe any other options that your child's individualized education program (IEP) Team considered and the reasons why those options were rejected; and
8. Provide a description of other reasons why your school district proposed or refused the action.

##### Notice in understandable language

The notice must be:

1. Written in language understandable to the general public; and
2. Provided in your native language or other mode of communication you use, unless it is clearly not feasible to do so.

If your native language or other mode of communication is not a written language, your school district must ensure that:

1. The notice is translated for you orally or by other means in your native language or other mode of communication;
2. You understand the content of the notice; **and**
3. There is written evidence that the requirements in paragraphs 1 and 2 have been met.

## **NATIVE LANGUAGE**

---

### **34 CFR §300.29**

*Native language*, when used regarding an individual who has limited English proficiency, means the following:

1. The language normally used by that person, or, in the case of a child, the language normally used by the child's parents;
2. In all direct contact with a child (including evaluation of the child), the language normally used by the child in the home or learning environment.

For a person with deafness or blindness, or for a person with no written language, the mode of communication is what the person normally uses (such as sign language, Braille, or oral communication).

## **ELECTRONIC MAIL**

---

### **34 CFR §300.505**

If your school district offers parents the choice of receiving documents by e-mail, you may choose to receive the following by e-mail:

1. Prior written notice;
2. Procedural safeguards notice; **and**
3. Notices related to a due process complaint.

## **PARENTAL CONSENT - DEFINITION**

---

### **34 CFR §300.9**

#### **Consent**

*Consent* means:

1. You have been fully informed in your native language or other mode of communication (such as sign language, Braille, or oral communication) of all information about the action for which you are giving consent.

2. You understand and agree in writing to that action, and the consent describes that action and lists the records (if any) that will be released and to whom; **and**
3. You understand that the consent is voluntary on your part and that you may withdraw your consent at any time.

If you wish to revoke (cancel) your consent after your child has begun receiving special education and related services, you must do so in writing. Your withdrawal of consent does not negate (undo) an action that has occurred after you gave your consent but before you withdrew it. In addition, the school district is not required to amend (change) your child's education records to remove any references that your child received special education and related services after your withdrawal of consent.

## **PARENTAL CONSENT**

### **34 CFR §300.300**

#### **Consent for initial evaluation**

Your school district cannot conduct an initial evaluation of your child to determine whether your child is eligible under Part B of IDEA to receive special education and related services without first providing you with prior written notice of the proposed action and obtaining your consent as described under the headings **Prior Written Notice** and **Parental Consent**.

Your school district must make reasonable efforts to obtain your informed consent for an initial evaluation to decide whether your child is a child with a disability.

Your consent for initial evaluation does not mean that you have also given your consent for the school district to start providing special education and related services to your child.

Your school district may not use your refusal to consent to one service or activity related to the initial evaluation as a basis for denying you or your child any other service, benefit, or activity, unless another Part B requirement requires the school district to do so.

If your child is enrolled in public school or you are seeking to enroll your child in a public school and you have refused to provide consent or failed to respond to a request to provide consent for an initial evaluation, your school district may, but is not required to, seek to conduct an initial evaluation of your child by using the IDEA's mediation or due process complaint, resolution meeting, and impartial due process hearing procedures. Your school district will not violate its obligations to locate, identify and evaluate your child if it does not pursue an evaluation of your child in these circumstances.

#### **Special rules for initial evaluation of wards of the State**

If a child is a ward of the State and is not living with his or her parent —

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

The school district does not need consent from the parent for an initial evaluation to determine if the child is a child with a disability if:

1. Despite reasonable efforts to do so, the school district cannot find the child's parent;
2. The rights of the parents have been terminated in accordance with State law; **or**
3. A judge has assigned the right to make educational decisions to an individual other than the parent and that individual has provided consent for an initial evaluation.

*Ward of the State*, as used in IDEA, means a child who, as determined by the State where the child lives, is:

1. A foster child;
2. Considered a ward of the State under State law; **or**
3. In the custody of a public child welfare agency.

There is one exception that you should know about. *Ward of the State* does not include a foster child who has a foster parent who meets the definition of a *parent* as used in IDEA.

**Parental consent for services**

Your school district must obtain your informed consent before providing special education and related services to your child for the first time.

The school district must make reasonable efforts to obtain your informed consent before providing special education and related services to your child for the first time.

If you do not respond to a request to provide your consent for your child to receive special education and related services for the first time, or if you refuse to give such consent or later revoke (cancel) your consent in writing, your school district may not use the procedural safeguards (i.e., mediation, due process complaint, resolution meeting, or an impartial due process hearing) in order to obtain agreement or a ruling that the special education and related services (recommended by your child's IEP Team) may be provided to your child without your consent.

If you refuse to give your consent for your child to receive special education and related services for the first time, or if you do not respond to a request to provide such consent or later revoke (cancel) your consent in writing and the school district does not provide your child with the special education and related services for which it sought your consent, your school district:

1. Is not in violation of the requirement to make a free appropriate public education (FAPE) available to your child for its failure to provide those services to your child; **and**
2. Is not required to have an individualized education program (IEP) meeting or develop an IEP for your child for the special education and related services for which your consent was requested.

If you revoke (cancel) your consent in writing at any point after your child is first provided special education and related services, then the school district may not

continue to provide such services, but must provide you with prior written notice, as described under the heading **Prior Written Notice**, before discontinuing those services.

#### Parent's Right to Object

Once you consent to the initial start of services, the school district is not required to obtain your consent to make changes to the IEP. However, if you do not want the school district to implement the changes to the IEP, you must submit your objections in writing. Your written objections must either be postmarked or hand-delivered to the school district within 10 days of receiving the written notice of the changes.

IDAPA 8.02.03.109.05a

#### Parental consent for reevaluations

Your school district must obtain your informed consent before it reevaluates your child, unless your school district can demonstrate that:

1. It took reasonable steps to obtain your consent for your child's reevaluation; **and**
2. You did not respond.

If you refuse to consent to your child's reevaluation, the school district may, but is not required to, pursue your child's reevaluation by using the mediation, due process complaint, resolution meeting, and impartial due process hearing procedures to seek to override your refusal to consent to your child's reevaluation. As with initial evaluations, your school district does not violate its obligations under Part B of IDEA if it declines to pursue the reevaluation in this manner.

#### Documentation of reasonable efforts to obtain parental consent

Your school must maintain documentation of reasonable efforts to obtain your consent for initial evaluations, to provide special education and related services for the first time, for a reevaluation, and to locate parents of wards of the State for initial evaluations. The documentation must include a record of the school district's attempts in these areas, such as:

1. Detailed records of telephone calls made or attempted and the results of those calls;
2. Copies of correspondence sent to you and any responses received; **and**
3. Detailed records of visits made to your home or place of employment and the results of those visits.

#### Other consent requirements

Your consent is not required before your school district may:

1. Review existing data as part of your child's evaluation or a reevaluation; **or**
2. Give your child a test or other evaluation that is given to all children unless, before that test or evaluation, consent is required from parents of all children.

The school district must develop and implement procedures to ensure that your refusal to consent to any of these other services and activities does not result in a failure to provide your child with a free appropriate public education (FAPE). Also, your school district may not use your refusal to consent to one of these services or activities as a basis for denying any other service, benefit, or activity, unless another Part B requirement requires the school district to do so.

If you have enrolled your child in a private school at your own expense or if you are home schooling your child, and you do not provide your consent for your child's initial evaluation or your child's reevaluation, or you fail to respond to a request to provide your consent, the school district may not use its dispute resolution procedures (i.e., mediation, due process complaint, resolution meeting, or an impartial due process hearing) and is not required to consider your child as eligible to receive equitable services (services made available to some parentally-placed private school children with disabilities).

## **INDEPENDENT EDUCATIONAL EVALUATIONS**

### **34 CFR §300.502**

#### **General**

As described below, you have the right to obtain an independent educational evaluation (IEE) of your child if you disagree with the evaluation of your child that was obtained by your school district.

If you request an independent educational evaluation, the school district must provide you with information about where you may obtain an independent educational evaluation and about the school district's criteria that apply to independent educational evaluations.

#### **Definitions**

*Independent educational evaluation* means an evaluation conducted by a qualified examiner who is not employed by the school district responsible for the education of your child.

*Public expense* means that the school district either pays for the full cost of the evaluation or ensures that the evaluation is otherwise provided at no cost to you, consistent with the provisions of Part B of IDEA, which allow each State to use whatever State, local, Federal, and private sources of support are available in the State to meet the requirements of Part B of the Act.

#### **Right to evaluation at public expense**

You have the right to an independent educational evaluation of your child at public expense if you disagree with an evaluation of your child obtained by your school district, subject to the following conditions:

1. If you request an independent educational evaluation of your child at public expense, your school district must, without unnecessary delay, either: (a) File a

due process complaint to request a hearing to show that its evaluation of your child is appropriate; or (b) Provide an independent educational evaluation at public expense, unless the school district demonstrates in a hearing that the evaluation of your child that you obtained did not meet the school district's criteria.

2. If your school district requests a hearing and the final decision is that your school district's evaluation of your child is appropriate, you still have the right to an independent educational evaluation, but not at public expense.
3. If you request an independent educational evaluation of your child, the school district may ask why you object to the evaluation of your child obtained by your school district. However, your school district may not require an explanation and may not unreasonably delay either providing the independent educational evaluation of your child at public expense or filing a due process complaint to request a due process hearing to defend the school district's evaluation of your child.

You are entitled to only one independent educational evaluation of your child at public expense each time your school district conducts an evaluation of your child with which you disagree.

#### **Parent-initiated evaluations**

If you obtain an independent educational evaluation of your child at public expense or you share with the school district an evaluation of your child that you obtained at private expense:

1. Your school district must consider the results of the evaluation of your child, if it meets the school district's criteria for independent educational evaluations, in any decision made with respect to the provision of a free appropriate public education (FAPE) to your child; **and**
2. You or your school district may present the evaluation as evidence at a due process hearing regarding your child.

#### **Requests for evaluations by hearing officers**

If a hearing officer requests an independent educational evaluation of your child as part of a due process hearing, the cost of the evaluation must be at public expense.

#### **School district criteria**

If an independent educational evaluation is at public expense, the criteria under which the evaluation is obtained, including the location of the evaluation and the qualifications of the examiner, must be the same as the criteria that the school district uses when it initiates an evaluation (to the extent those criteria are consistent with your right to an independent educational evaluation).

Except for the criteria described above, a school district may not impose conditions or timelines related to obtaining an independent educational evaluation at public expense.

## **CONFIDENTIALITY OF INFORMATION**

---

### **34 CFR §300.611**

As used under the heading **Confidentiality of Information**:

*Destruction* means physical destruction or removal of personal identifiers from information so that the information is no longer personally identifiable.

*Education records* means the type of records covered under the definition of “education records” in 34 CFR Part 99 (the regulations implementing the Family Educational Rights and Privacy Act of 1974, 20 U.S.C. 1232g (FERPA)).

*Participating agency* means any school district, agency or institution that collects, maintains, or uses personally identifiable information, or from which information is obtained, under Part B of IDEA.

## **PERSONALLY IDENTIFIABLE**

---

### **34 CFR §300.32**

*Personally identifiable* means information that includes:

- (a) Your child's name, your name as the parent, or the name of another family member;
- (b) Your child's address;
- (c) A personal identifier, such as your child's social security number or student number; **or**
- (d) A list of personal characteristics or other information that would make it possible to identify your child with reasonable certainty.

## **NOTICE TO PARENTS**

---

### **34 CFR §300.612**

The State Educational Agency must give notice that is adequate to fully inform parents about confidentiality of personally identifiable information, including:

1. A description of the extent to which the notice is given in the native languages of the various population groups in the State;
2. A description of the children on whom personally identifiable information is maintained, the types of information sought, the methods the State intends to use in gathering the information (including the sources from whom information is gathered), and the uses to be made of the information;
3. A summary of the policies and procedures that participating agencies must follow regarding storage, disclosure to third parties, retention, and destruction of personally identifiable information; **and**

4. A description of all of the rights of parents and children regarding this information, including the rights under the Family Educational Rights and Privacy Act (FERPA) and its implementing regulations in 34 CFR Part 99.

Before any major activity to identify, locate, or evaluate children in need of special education and related services (also known as “child find”), the notice must be published or announced in newspapers or other media, or both, with circulation adequate to notify parents throughout the State of these activities.

## ACCESS RIGHTS

### 34 CFR §300.613

The participating agency must permit you to inspect and review any education records relating to your child that are collected, maintained, or used by your school district under Part B of IDEA. The participating agency must comply with your request to inspect and review any education records on your child without unnecessary delay and before any meeting regarding an individualized education program (IEP), or any impartial due process hearing (including a resolution meeting or a hearing regarding discipline), and in no case more than 45 calendar days after you have made a request.

Your right to inspect and review education records includes:

1. Your right to a response from the participating agency to your reasonable requests for explanations and interpretations of the records;
2. Your right to request that the participating agency provide copies of the records if you cannot effectively inspect and review the records unless you receive those copies; **and**
3. Your right to have your representative inspect and review the records.

The participating agency may presume that you have authority to inspect and review records relating to your child unless advised that you do not have the authority under applicable State law governing such matters as guardianship, separation, and divorce.

## RECORD OF ACCESS

### 34 CFR §300.614

Each participating agency must keep a record of parties obtaining access to education records collected, maintained, or used under Part B of IDEA (except access by parents and authorized employees of the participating agency), including the name of the party, the date access was given, and the purpose for which the party is authorized to use the records.

## **RECORDS ON MORE THAN ONE CHILD**

---

### **34 CFR §300.615**

If any education record includes information on more than one child, the parents of those children have the right to inspect and review only the information relating to their child or to be informed of that specific information.

## **LIST OF TYPES AND LOCATIONS OF INFORMATION**

---

### **34 CFR §300.616**

On request, each participating agency must provide you with a list of the types and locations of education records collected, maintained, or used by the agency.

## **FEES**

---

### **34 CFR §300.617**

Each participating agency may charge a fee for copies of records that are made for you under Part B of IDEA, if the fee does not effectively prevent you from exercising your right to inspect and review those records.

A participating agency may not charge a fee to search for or to retrieve information under Part B of IDEA.

## **AMENDMENT OF RECORDS AT PARENT'S REQUEST**

---

### **34 CFR §300.618**

If you believe that information in the education records regarding your child collected, maintained, or used under Part B of IDEA is inaccurate, misleading, or violates the privacy or other rights of your child, you may request the participating agency that maintains the information to change the information.

The participating agency must decide whether to change the information in accordance with your request within a reasonable period of time of receipt of your request.

If the participating agency refuses to change the information in accordance with your request, it must inform you of the refusal and advise you of your right to a hearing as described under the heading ***Opportunity For a Hearing***.

## **OPPORTUNITY FOR A HEARING**

---

### **34 CFR §300.619**

The participating agency must, on request, provide you an opportunity for a hearing to challenge information in education records regarding your child to ensure that it is not inaccurate, misleading, or otherwise in violation of the privacy or other rights of your child.

## **HEARING PROCEDURES**

---

### **34 CFR §300.621**

A hearing to challenge information in education records must be conducted according to the procedures for such hearings under the Family Educational Rights and Privacy Act (FERPA).

## **RESULT OF HEARING**

---

### **34 CFR §300.620**

If, as a result of the hearing, the participating agency decides that the information is inaccurate, misleading or otherwise in violation of the privacy or other rights of your child, it must change the information accordingly and inform you in writing.

If, as a result of the hearing, the participating agency decides that the information is not inaccurate, misleading, or otherwise in violation of the privacy or other rights of your child, it must inform you of your right to place in the records that it maintains on your child a statement commenting on the information or providing any reasons you disagree with the decision of the participating agency.

Such an explanation placed in the records of your child must:

1. Be maintained by the participating agency as part of the records of your child as long as the record or contested portion is maintained by the participating agency; **and**
2. If the participating agency discloses the records of your child or the challenged information to any party, the explanation must also be disclosed to that party.

## **CONSENT FOR DISCLOSURE OF PERSONALLY IDENTIFIABLE INFORMATION**

---

### **34 CFR §300.622**

Unless the information is contained in education records, and the disclosure is authorized without parental consent under the Family Educational Rights and Privacy Act (FERPA), your consent must be obtained before personally identifiable information

is disclosed to parties other than officials of participating agencies. Except under the circumstances specified below, your consent is not required before personally identifiable information is released to officials of participating agencies for purposes of meeting a requirement of Part B of IDEA.

Your consent, or consent of an eligible child who has reached the age of majority under State law, must be obtained before personally identifiable information is released to officials of participating agencies providing or paying for transition services.

If your child is in, or is going to go to, a private school that is not located in the same school district you reside in, your consent must be obtained before any personally identifiable information about your child is released between officials in the school district where the private school is located and officials in the school district where you reside.

## **SAFEGUARDS**

---

### **34 CFR §300.623**

Each participating agency must protect the confidentiality of personally identifiable information at collection, storage, disclosure, and destruction stages.

One official at each participating agency must assume responsibility for ensuring the confidentiality of any personally identifiable information.

All persons collecting or using personally identifiable information must receive training or instruction regarding your State's policies and procedures regarding confidentiality under Part B of IDEA and the Family Educational Rights and Privacy Act (FERPA).

Each participating agency must maintain, for public inspection, a current listing of the names and positions of those employees within the agency who may have access to personally identifiable information.

## **DESTRUCTION OF INFORMATION**

---

### **34 CFR §300.624**

Your school district must inform you when personally identifiable information collected, maintained, or used under Part B of IDEA is no longer needed to provide educational services to your child.

The information must be destroyed at your request. However, a permanent record of your child's name, address, and phone number, his or her grades, attendance record, classes attended, grade level completed, and year completed may be maintained without time limitation.

## STATE COMPLAINT PROCEDURES

### DIFFERENCES BETWEEN THE PROCEDURES FOR DUE PROCESS COMPLAINTS AND HEARINGS AND FOR STATE COMPLAINTS

---

The regulations for Part B of IDEA set forth separate procedures for State complaints and for due process complaints and hearings. As explained below, any individual or organization may file a State complaint alleging a violation of any Part B requirement by a school district, the State Educational Agency, or any other public agency. Only you or a school district may file a due process complaint on any matter relating to a proposal or a refusal to initiate or change the identification, evaluation, or educational placement of a child with a disability, or the provision of a free appropriate public education (FAPE) to the child. While staff of the State Educational Agency generally must resolve a State complaint within a 60-calendar-day timeline, unless the timeline is properly extended, an impartial hearing officer must hear a due process complaint (if not resolved through a resolution meeting or through mediation) and issue a written decision within 45-calendar-days after the end of the resolution period, as described in this document under the heading Resolution Process, unless the hearing officer grants a specific extension of the timeline at your request or the school district's request. The State complaint and due process complaint, resolution and hearing procedures are described more fully below. The State Educational Agency must develop model forms to help you file a due process complaint and help you or other parties to file a State complaint as described under the heading *Model Forms*.

### ADOPTION OF STATE COMPLAINT PROCEDURES

---

#### 34 CFR §300.151

##### General

Each State Educational Agency must have written procedures for:

1. Resolving any complaint, including a complaint filed by an organization or individual from another State;
2. The filing of a complaint with the State Educational Agency;
3. Widely disseminating the State complaint procedures to parents and other interested individuals, including parent training and information centers, protection and advocacy agencies, independent living centers, and other appropriate entities.

### Remedies for denial of appropriate services

In resolving a State complaint in which the State Educational Agency has found a failure to provide appropriate services, the State Educational Agency must address:

1. The failure to provide appropriate services, including corrective action appropriate to address the needs of the child (such as compensatory services or monetary reimbursement); **and**
2. Appropriate future provision of services for all children with disabilities.

## MINIMUM STATE COMPLAINT PROCEDURES

### 34 CFR §300.152

#### Time limit; minimum procedures

Each State Educational Agency must include in its State complaint procedures a time limit of 60 calendar days after a complaint is filed to:

1. Carry out an independent on-site investigation, if the State Educational Agency determines that an investigation is necessary;
2. Give the complainant the opportunity to submit additional information, either orally or in writing, about the allegations in the complaint;
3. Provide the school district or other public agency with the opportunity to respond to the complaint, including, at a minimum: (a) at the option of the agency, a proposal to resolve the complaint; **and** (b) an opportunity for a parent who has filed a complaint and the agency to agree voluntarily to engage in mediation;
4. Review all relevant information and make an independent determination as to whether the school district or other public agency is violating a requirement of Part B of IDEA; **and**
5. Issue a written decision to the complainant that addresses each allegation in the complaint and contains: (a) findings of fact and conclusions; **and** (b) the reasons for the State Educational Agency's final decision.

#### Time extension; final decision; implementation

The State Educational Agency's procedures described above also must:

1. Permit an extension of the 60 calendar-day time limit only if: (a) exceptional circumstances exist with respect to a particular State complaint; **or** (b) you and the school district or other public agency involved voluntarily agree to extend the time to resolve the matter through mediation or alternative means of dispute resolution, if available in the State.
2. Include procedures for effective implementation of the State Educational Agency's final decision, if needed, including: (a) technical assistance activities; (b) negotiations; **and** (c) corrective actions to achieve compliance.

### State complaints and due process hearings

If a written State complaint is received that is also the subject of a due process hearing as described under the heading **Filing a Due Process Complaint**, or the State complaint contains multiple issues of which one or more are part of such a hearing, the State must set aside any part of the State complaint that is being addressed in the due process hearing until the hearing is over. Any issue in the State complaint that is not a part of the due process hearing must be resolved using the time limit and procedures described above.

If an issue raised in a State complaint has previously been decided in a due process hearing involving the same parties (for example, you and the school district), then the due process hearing decision is binding on that issue and the State Educational Agency must inform the complainant that the decision is binding.

A complaint alleging a school district's or other public agency's failure to implement a due process hearing decision must be resolved by the State Educational Agency.

## FILING A STATE COMPLAINT

---

### 34 CFR §300.153

An organization or individual may file a signed written State complaint under the procedures described above.

The State complaint must include:

1. A statement that a school district or other public agency has violated a requirement of Part B of IDEA or its implementing regulations in 34 CFR Part 300;
2. The facts on which the statement is based;
3. The signature and contact information for the party filing the complaint; and
4. If alleging violations regarding a specific child:
  - (a) The name of the child and address of the residence of the child;
  - (b) The name of the school the child is attending;
  - (c) In the case of a homeless child or youth, available contact information for the child, and the name of the school the child is attending;
  - (d) A description of the nature of the problem of the child, including facts relating to the problem; **and**
  - (e) A proposed resolution of the problem to the extent known and available to the party filing the complaint at the time the complaint is filed.

The complaint must allege a violation that occurred not more than one year prior to the date that the complaint is received as described under the heading **Adoption of State Complaint Procedures**.

STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017

The party filing the State complaint must forward a copy of the complaint to the school district or other public agency serving the child at the same time the party files the complaint with the State Educational Agency.

## DUE PROCESS COMPLAINT PROCEDURES

### FILING A DUE PROCESS COMPLAINT

#### 34 CFR §300.507

##### General

You or the school district may file a due process complaint on any matter relating to a proposal or a refusal to initiate or change the identification, evaluation or educational placement of your child, or the provision of a free appropriate public education (FAPE) to your child.

The due process complaint must allege a violation that happened not more than two years before you or the school district knew or should have known about the alleged action that forms the basis of the due process complaint.

The above timeline does not apply to you if you could not file a due process complaint within the timeline because:

1. The school district specifically misrepresented that it had resolved the issues identified in the complaint; or
2. The school district withheld information from you that it was required to provide you under Part B of IDEA.

##### Information for parents

The school district must inform you of any free or low-cost legal and other relevant services available in the area if you request the information, or if you or the school district file a due process complaint.

### DUE PROCESS COMPLAINT

#### 34 CFR §300.508

##### General

In order to request a hearing, you or the school district (or your attorney or the school district's attorney) must submit a due process complaint to the other party. That complaint must contain all of the content listed below and must be kept confidential.

Whoever files the complaint must also provide the State Educational Agency with a copy of the complaint.

##### Content of the complaint

The due process complaint must include:

1. The name of the child;
2. The address of the child's residence;

3. The name of the child's school;
4. If the child is a homeless child or youth, the child's contact information and the name of the child's school;
5. A description of the nature of the problem of the child relating to the proposed or refused action, including facts relating to the problem; **and**
6. A proposed resolution of the problem to the extent known and available to the complaining party (you or the school district) at the time.

**Notice required before a hearing on a due process complaint**

You or the school district may not have a due process hearing until you or the school district (or your attorney or the school district's attorney) files a due process complaint that includes the information listed above.

**Sufficiency of complaint**

In order for a due process complaint to go forward, it must be considered sufficient. The due process complaint will be considered sufficient (to have met the content requirements above) unless the party receiving the due process complaint (you or the school district) notifies the hearing officer and the other party in writing, within 15 calendar days of receiving the complaint, that the receiving party believes that the due process complaint does not meet the requirements listed above.

Within five calendar days of receiving the notification that the receiving party (you or the school district) considers a due process complaint insufficient, the hearing officer must decide if the due process complaint meets the requirements listed above, and notify you and the school district in writing immediately.

**Complaint amendment**

You or the school district may make changes to the complaint only if:

1. The other party approves of the changes in writing and is given the chance to resolve the due process complaint through a resolution meeting, described under the heading **Resolution Process**; **or**
2. By no later than five days before the due process hearing begins, the hearing officer grants permission for the changes.

If the complaining party (you or the school district) makes changes to the due process complaint, the timelines for the resolution meeting (within 15 calendar days of receiving the complaint) and the time period for resolution (within 30 calendar days of receiving the complaint) start again on the date the amended complaint is filed.

**Local educational agency (LEA) or school district response to a due process complaint**

If the school district has not sent a prior written notice to you, as described under the heading **Prior Written Notice**, regarding the subject matter contained in your due process complaint, the school district must, within 10 calendar days of receiving the due process complaint, send to you a response that includes:

1. An explanation of why the school district proposed or refused to take the action raised in the due process complaint;
2. A description of other options that your child's individualized education program (IEP) Team considered and the reasons why those options were rejected;
3. A description of each evaluation procedure, assessment, record, or report the school district used as the basis for the proposed or refused action; **and**
4. A description of the other factors that are relevant to the school district's proposed or refused action.

Providing the information in items 1-4 above does not prevent the school district from asserting that your due process complaint was insufficient.

**Other party response to a due process complaint**

Except as stated under the sub-heading immediately above, **Local educational agency (LEA) or school district response to a due process complaint**, the party receiving a due process complaint must, within 10 calendar days of receiving the complaint, send the other party a response that specifically addresses the issues in the complaint.

**MODEL FORMS**

**34 CFR §300.509**

The State Educational Agency must develop model forms to help you to file a due process complaint and to help you and other parties to file a State complaint. However, your State or the school district may not require the use of these model forms. In fact, you can use the model form or another appropriate form, so long as it contains the required information for filing a due process complaint or a State complaint.

**MEDIATION**

**34 CFR §300.506**

**General**

The school district must develop procedures that make mediation available to allow you and the school district to resolve disagreements involving any matter under Part B of IDEA, including matters arising prior to the filing of a due process complaint. Thus,

mediation is available to resolve disputes under Part B of IDEA, whether or not you have filed a due process complaint to request a due process hearing as described under the heading *Filing a Due Process Complaint*.

### Requirements

The procedures must ensure that the mediation process:

1. Is voluntary on your part and the school district's part;
2. Is not used to deny or delay your right to a due process hearing, or to deny any other rights provided under Part B of IDEA; **and**
3. Is conducted by a qualified and impartial mediator who is trained in effective mediation techniques.

The school district may develop procedures that offer parents and schools that choose not to use the mediation process, an opportunity to meet, at a time and location convenient to you, with a disinterested party:

1. Who is under contract with an appropriate alternative dispute resolution entity, or a parent training and information center or community parent resource center in the State; **and**
2. Who would explain the benefits of, and encourage the use of, the mediation process to you.

The State must keep a list of people who are qualified mediators and know the laws and regulations relating to the provision of special education and related services. The State Educational Agency must select mediators on a random, rotational, or other impartial basis.

The State is responsible for the costs of the mediation process, including the costs of meetings.

Each meeting in the mediation process must be scheduled in a timely manner and held at a place that is convenient for you and the school district.

If you and the school district resolve a dispute through the mediation process, both parties must enter into a legally binding agreement that sets forth the resolution and:

1. States that all discussions that happened during the mediation process will remain confidential and may not be used as evidence in any subsequent due process hearing or civil proceeding (court case); **and**
2. Is signed by both you and a representative of the school district who has the authority to bind the school district.

A written, signed mediation agreement is enforceable in any State court of competent jurisdiction (a court that has the authority under State law to hear this type of case) or in a district court of the United States.

Discussions that happened during the mediation process must be confidential. They cannot be used as evidence in any future due process hearing or civil proceeding of any Federal court or State court of a State receiving assistance under Part B of IDEA.

### Impartiality of mediator

The mediator:

1. May not be an employee of the State Educational Agency or the school district that is involved in the education or care of your child; **and**
2. Must not have a personal or professional interest which conflicts with the mediator's objectivity.

A person who otherwise qualifies as a mediator is not an employee of a school district or State agency solely because he or she is paid by the agency or school district to serve as a mediator.

## RESOLUTION PROCESS

---

### 34 CFR §300.510

#### Resolution meeting

Within 15 calendar days of receiving notice of your due process complaint, and before the due process hearing begins, the school district must convene a meeting with you and the relevant member or members of the individualized education program (IEP) Team who have specific knowledge of the facts identified in your due process complaint. The meeting:

1. Must include a representative of the school district who has decision-making authority on behalf of the school district; **and**
2. May not include an attorney of the school district unless you are accompanied by an attorney.

You and the school district determine the relevant members of the IEP Team to attend the meeting.

The purpose of the meeting is for you to discuss your due process complaint, and the facts that form the basis of the complaint, so that the school district has the opportunity to resolve the dispute.

The resolution meeting is not necessary if:

1. You and the school district agree in writing to waive the meeting; **or**
2. You and the school district agree to use the mediation process, as described under the heading **Mediation**.

#### Resolution period

If the school district has not resolved the due process complaint to your satisfaction within 30 calendar days of the receipt of the due process complaint (during the time period for the resolution process), the due process hearing may occur.

The 45-calendar-day timeline for issuing a final due process hearing decision, as described under the heading, **Hearing Decisions**, begins at the expiration of the 30-

calendar-day resolution period, with certain exceptions for adjustments made to the 30-calendar-day resolution period, as described below.

Except where you and the school district have both agreed to waive the resolution process or to use mediation, your failure to participate in the resolution meeting will delay the timelines for the resolution process and due process hearing until the meeting is held.

If after making reasonable efforts and documenting such efforts, the school district is not able to obtain your participation in the resolution meeting, the school district may, at the end of the 30-calendar-day resolution period, request that a hearing officer dismiss your due process complaint. Documentation of such efforts must include a record of the school district's attempts to arrange a mutually agreed upon time and place, such as:

1. Detailed records of telephone calls made or attempted and the results of those calls;
2. Copies of correspondence sent to you and any responses received; and
3. Detailed records of visits made to your home or place of employment and the results of those visits.

If the school district fails to hold the resolution meeting within 15 calendar days of receiving notice of your due process complaint or fails to participate in the resolution meeting, you may ask a hearing officer to begin the 45-calendar-day due process hearing timeline.

#### **Adjustments to the 30-calendar-day resolution period**

If you and the school district agree in writing to waive the resolution meeting, then the 45-calendar-day timeline for the due process hearing starts the next day.

After the start of mediation or the resolution meeting and before the end of the 30-calendar-day resolution period, if you and the school district agree in writing that no agreement is possible, then the 45-calendar-day timeline for the due process hearing starts the next day.

If you and the school district agree to use the mediation process but have not yet reached agreement, at the end of the 30-calendar-day resolution period the mediation process may be continued until an agreement is reached if both parties agree to the continuation in writing. However, if either you or the school district withdraws from the mediation process during this continuation period, then the 45-calendar-day timeline for the due process hearing starts the next day.

#### **Written settlement agreement**

If a resolution to the dispute is reached at the resolution meeting, you and the school district must enter into a legally binding agreement that is:

1. Signed by you and a representative of the school district who has the authority to bind the school district; and
2. Enforceable in any State court of competent jurisdiction (a State court that has authority to hear this type of case) or in a district court of the United States or by

the State Educational Agency, if your State has another mechanism or procedures that permit parties to seek enforcement of resolution agreements.

**Agreement review period**

If you and the school district enter into an agreement as a result of a resolution meeting, either party (you or the school district) may void the agreement within 3 business days of the time that both you and the school district signed the agreement.

## HEARINGS ON DUE PROCESS COMPLAINTS

### IMPARTIAL DUE PROCESS HEARING

#### 34 CFR §300.511

##### General

Whenever a due process complaint is filed, you or the school district involved in the dispute must have an opportunity for an impartial due process hearing, as described in the *Due Process Complaint* and *Resolution Process* sections.

##### Impartial hearing officer

At a minimum, a hearing officer:

1. Must not be an employee of the State Educational Agency or the school district that is involved in the education or care of the child. However, a person is not an employee of the agency solely because he or she is paid by the agency to serve as a hearing officer;
2. Must not have a personal or professional interest that conflicts with the hearing officer's objectivity in the hearing;
3. Must be knowledgeable and understand the provisions of IDEA, Federal and State regulations pertaining to IDEA, and legal interpretations of IDEA by Federal and State courts; **and**
4. Must have the knowledge and ability to conduct hearings, and to make and write decisions, consistent with appropriate, standard legal practice.

Each school district must keep a list of those persons who serve as hearing officers that includes a statement of the qualifications of each hearing officer.

##### Subject matter of due process hearing

The party (you or the school district) that requests the due process hearing may not raise issues at the due process hearing that were not addressed in the due process complaint, unless the other party agrees.

##### Timeline for requesting a hearing

You or the school district must request an impartial hearing on a due process complaint within two years of the date you or the school district knew or should have known about the issue addressed in the complaint.

### Exceptions to the timeline

The above timeline does not apply to you if you could not file a due process complaint because:

1. The school district specifically misrepresented that it had resolved the problem or issue that you are raising in your complaint; or
2. The school district withheld information from you that it was required to provide to you under Part B of IDEA.

## HEARING RIGHTS

### 34 CFR §300.512

#### General

You have the right to represent yourself at a due process hearing (including a hearing relating to disciplinary procedures) or an appeal with a hearing to receive additional evidence, as described under the subheading, ***Appeal of decisions; impartial review***. In addition, any party to a hearing has the right to:

1. Be accompanied and advised by an attorney and/or persons with special knowledge or training regarding the problems of children with disabilities;
2. Be represented at the hearing by an attorney;
3. Present evidence and confront, cross-examine, and require the attendance of witnesses;
4. Prohibit the introduction of any evidence at the hearing that has not been disclosed to the other party at least five business days before the hearing;
5. Obtain a written, or, at your option, electronic, word-for-word record of the hearing; and
6. Obtain written, or, at your option, electronic findings of fact and decisions.

#### Additional disclosure of information

At least five business days prior to a due process hearing, you and the school district must disclose to each other all evaluations completed by that date and recommendations based on those evaluations that you or the school district intend to use at the hearing.

A hearing officer may prevent any party that fails to comply with this requirement from introducing the relevant evaluation or recommendation at the hearing without the consent of the other party.

#### Parental rights at hearings

You must be given the right to:

1. Have your child present at the hearing;

2. Open the hearing to the public; **and**
3. Have the record of the hearing, the findings of fact and decisions provided to you at no cost.

## HEARING DECISIONS

### 34 CFR §300.513

#### Decision of the hearing officer

A hearing officer's decision on whether your child received a free appropriate public education (FAPE) must be based on evidence and arguments that directly relate to FAPE.

In matters alleging a procedural violation (such as "an incomplete IEP Team"), a hearing officer may find that your child did not receive FAPE only if the procedural violations:

1. Interfered with your child's right to a free appropriate public education (FAPE);
2. Significantly interfered with your opportunity to participate in the decision-making process regarding the provision of a free appropriate public education (FAPE) to your child; **or**
3. Caused your child to be deprived of an educational benefit.

None of the provisions described above can be interpreted to prevent a hearing officer from ordering a school district to comply with the requirements in the procedural safeguards section of the Federal regulations under Part B of IDEA (34 CFR §§300.500 through 300.536).

#### Separate request for a due process hearing

Nothing in the procedural safeguards section of the Federal regulations under Part B of IDEA (34 CFR §§300.500 through 300.536) can be interpreted to prevent you from filing a separate due process complaint on an issue separate from a due process complaint already filed.

#### Findings and decision provided to the advisory panel and general public

The State Educational Agency or the school district, (whichever was responsible for your hearing) after deleting any personally identifiable information, must:

1. Provide the findings and decisions in the due process hearing or appeal to the State special education advisory panel; **and**
2. Make those findings and decisions available to the public.

## APPEALS

### **FINALITY OF DECISION; APPEAL; IMPARTIAL REVIEW**

#### **34 CFR §300.514**

##### **Finality of hearing decision**

A decision made in a due process hearing (including a hearing relating to disciplinary procedures) is final, except that any party involved in the hearing (you or the school district) may appeal the decision by bringing a civil action, as described under the heading *Civil Actions, Including the Time Period in Which to File Those Actions*.

### **TIMELINES AND CONVENIENCE OF HEARINGS AND REVIEWS**

#### **34 CFR §300.515**

The State Educational Agency must ensure that not later than 45 calendar days after the expiration of the 30-calendar-day period for resolution meetings or, as described under the sub-heading *Adjustments to the 30-calendar-day resolution period*, not later than 45 calendar days after the expiration of the adjusted time period:

1. A final decision is reached in the hearing; and
2. A copy of the decision is mailed to each of the parties.

A hearing officer may grant specific extensions of time beyond the 45-calendar-day time period described above at the request of either party (you or the school district).

Each hearing must be conducted at a time and place that is reasonably convenient to you and your child.

### **CIVIL ACTIONS, INCLUDING THE TIME PERIOD IN WHICH TO FILE THOSE ACTIONS**

#### **34 CFR §300.516**

##### **General**

Any party (you or the school district) who does not agree with the findings and decision in the due process hearing (including a hearing relating to disciplinary procedures) has the right to bring a civil action with respect to the matter that was the subject of the due process hearing. The action may be brought in a State court of competent jurisdiction (a State court that has authority to hear this type of case) or in a district court of the United States without regard to the amount in dispute.

**Time limitation**

The party (you or the school district) bringing the action shall have 42 calendar days from the date of the decision of the hearing officer to file a civil action.

IDAPA 08.02.03.109.05g

**Additional procedures**

In any civil action, the court:

1. Receives the records of the administrative proceedings;
2. Hears additional evidence at your request or at the school district's request; and
3. Bases its decision on the preponderance of the evidence and grants the relief that the court determines to be appropriate.

Under appropriate circumstances, judicial relief may include reimbursement of private school tuition and compensatory education services.

**Jurisdiction of district courts**

The district courts of the United States have authority to rule on actions brought under Part B of IDEA without regard to the amount in dispute.

**Rule of construction**

Nothing in Part B of IDEA restricts or limits the rights, procedures, and remedies available under the U.S. Constitution, the Americans with Disabilities Act of 1990, Title V of the Rehabilitation Act of 1973 (Section 504), or other Federal laws protecting the rights of children with disabilities, except that before the filing of a civil action under these laws seeking relief that is also available under Part B of IDEA, the due process procedures described above must be exhausted to the same extent as would be required if the party filed the action under Part B of IDEA. This means that you may have remedies available under other laws that overlap with those available under IDEA, but in general, to obtain relief under those other laws, you must first use the available administrative remedies under IDEA (i.e., the due process complaint; resolution process, including the resolution meeting; and impartial due process hearing procedures) before going directly into court.

**THE CHILD'S PLACEMENT WHILE THE DUE PROCESS  
COMPLAINT AND HEARING ARE PENDING**

**34 CFR §300.518**

Except as provided below under the heading *PROCEDURES WHEN DISCIPLINING CHILDREN WITH DISABILITIES*, once a due process complaint is sent to the other party, during the resolution process time period, and while waiting for the decision of any impartial due process hearing or court proceeding, unless you and the State or

school district agree otherwise, your child must remain in his or her current educational placement.

If the due process complaint involves an application for initial admission to public school, your child, with your consent, must be placed in the regular public school program until the completion of all such proceedings.

If the due process complaint involves an application for initial services under Part B of IDEA for a child who is transitioning from being served under Part C of IDEA to Part B of IDEA and who is no longer eligible for Part C services because the child has turned three, the school district is not required to provide the Part C services that the child has been receiving. If the child is found eligible under Part B of IDEA and you consent for your child to receive special education and related services for the first time, then, pending the outcome of the proceedings, the school district must provide those special education and related services that are not in dispute (those which you and the school district both agree upon).

If a hearing officer in a due process hearing conducted by the State Educational Agency agrees with you that a change of placement is appropriate, that placement must be treated as your child's current educational placement where your child will remain while waiting for the decision of any impartial due process hearing or court proceeding.

## **ATTORNEYS' FEES**

### **34 CFR §300.517**

#### **General**

In any action or proceeding brought under Part B of IDEA, the court, in its discretion, may award reasonable attorneys' fees as part of the costs to you, if you prevail (win).

In any action or proceeding brought under Part B of IDEA, the court, in its discretion, may award reasonable attorneys' fees as part of the costs to a prevailing State Educational Agency or school district, to be paid by your attorney, if the attorney: (a) filed a complaint or court case that the court finds is frivolous, unreasonable, or without foundation; or (b) continued to litigate after the litigation clearly became frivolous, unreasonable, or without foundation; or

In any action or proceeding brought under Part B of IDEA, the court, in its discretion, may award reasonable attorneys' fees as part of the costs to a prevailing State Educational Agency or school district, to be paid by you or your attorney, if your request for a due process hearing or later court case was presented for any improper purpose, such as to harass, to cause unnecessary delay, or to unnecessarily increase the cost of the action or proceeding (hearing).

**Award of fees**

A court awards reasonable attorneys' fees as follows:

1. Fees must be based on rates prevailing in the community in which the action or proceeding arose for the kind and quality of services furnished. No bonus or multiplier may be used in calculating the fees awarded.
2. Attorneys' fees may not be awarded and related costs may not be reimbursed in any action or proceeding under Part B of IDEA for services performed after a written offer of settlement is made to you if:
  - a. The offer is made within the time prescribed by Rule 68 of the Federal Rules of Civil Procedure or, in the case of a due process hearing or State-level review, at any time more than 10 calendar days before the proceeding begins;
  - b. The offer is not accepted within 10 calendar days; **and**
  - c. The court or administrative hearing officer finds that the relief finally obtained by you is not more favorable to you than the offer of settlement.

Despite these restrictions, an award of attorneys' fees and related costs may be made to you if you prevail and you were substantially justified in rejecting the settlement offer.

3. Fees may not be awarded relating to any meeting of the individualized education program (IEP) Team unless the meeting is held as a result of an administrative proceeding or court action.

Fees also may not be awarded for a mediation as described under the heading **Mediation**.

A resolution meeting, as described under the heading **Resolution Process**, is not considered a meeting convened as a result of an administrative hearing or court action, and also is not considered an administrative hearing or court action for purposes of these attorneys' fees provisions.

The court reduces, as appropriate, the amount of the attorneys' fees awarded under Part B of IDEA, if the court finds that:

1. You, or your attorney, during the course of the action or proceeding, unreasonably delayed the final resolution of the dispute;
2. The amount of the attorneys' fees otherwise authorized to be awarded unreasonably exceeds the hourly rate prevailing in the community for similar services by attorneys of reasonably similar skill, reputation, and experience;
3. The time spent and legal services furnished were excessive considering the nature of the action or proceeding; **or**
4. The attorney representing you did not provide to the school district the appropriate information in the due process request notice as described under the heading **Due Process Complaint**.

STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017

However, the court may not reduce fees if the court finds that the State or school district unreasonably delayed the final resolution of the action or proceeding or there was a violation under the procedural safeguards provisions of Part B of IDEA.

## PROCEDURES WHEN DISCIPLINING CHILDREN WITH DISABILITIES

### AUTHORITY OF SCHOOL PERSONNEL

#### 34 CFR §300.530

##### Case-by-case determination

School personnel may consider any unique circumstances on a case-by-case basis when determining whether a change of placement, made in accordance with the following requirements related to discipline, is appropriate for a child with a disability who violates a school code of student conduct.

##### General

To the extent that they also take such action for children without disabilities, school personnel may, for not more than **10 school days** in a row, remove a child with a disability who violates a code of student conduct from his or her current placement to an appropriate interim alternative educational setting, another setting, or suspension. School personnel may also impose additional removals of the child of not more than **10 school days** in a row in that same school year for separate incidents of misconduct, as long as those removals do not constitute a change of placement (see the heading ***Change of Placement Because of Disciplinary Removals*** for the definition).

Once a child with a disability has been removed from his or her current placement for a total of **10 school days** in the same school year, the school district must, during any subsequent days of removal in that school year, provide services to the extent required below under the sub-heading ***Services***.

##### Additional authority

If the behavior that violated the student code of conduct was not a manifestation of the child's disability (see the subheading ***Manifestation determination***) and the disciplinary change of placement would exceed **10 school days** in a row, school personnel may apply the disciplinary procedures to that child with a disability in the same manner and for the same duration as it would to children without disabilities, except that the school must provide services to that child as described below under ***Services***. The child's IEP Team determines the interim alternative educational setting for such services.

##### Services

The school district does not provide services to a child with a disability or a child without a disability who has been removed from his or her current placement for **10 school days or less** in that school year.

A child with a disability who is removed from the child's current placement for **more than 10 school days** and the behavior is not a manifestation of the child's disability

(see subheading, **Manifestation determination**) or who is removed under special circumstances (see the subheading, **Special circumstances**) must:

1. Continue to receive educational services (have available a free appropriate public education), so as to enable the child to continue to participate in the general education curriculum, although in another setting (that may be an interim alternative educational setting), and to progress toward meeting the goals set out in the child's IEP; **and**
2. Receive, as appropriate, a functional behavioral assessment, and behavioral intervention services and modifications, which are designed to address the behavior violation so that it does not happen again.

After a child with a disability has been removed from his or her current placement for **10 school days** in that same school year, and **if** the current removal is for **10 school days** in a row or less **and** if the removal is not a change of placement (see definition below), **then** school personnel, in consultation with at least one of the child's teachers, determine the extent to which services are needed to enable the child to continue to participate in the general education curriculum, although in another setting, and to progress toward meeting the goals set out in the child's IEP.

If the removal is a change of placement (see the heading, **Change of Placement Because of Disciplinary Removals**), the child's IEP Team determines the appropriate services to enable the child to continue to participate in the general education curriculum, although in another setting (that may be an interim alternative educational setting), and to progress toward meeting the goals set out in the child's IEP.

#### **Manifestation determination**

Within **10 school days** of any decision to change the placement of a child with a disability because of a violation of a code of student conduct (except for a removal that is for **10 school days** in a row or less and not a change of placement), the school district, you, and other relevant members of the IEP Team (as determined by you and the school district) must review all relevant information in the student's file, including the child's IEP, any teacher observations, and any relevant information provided by you to determine:

1. If the conduct in question was caused by, or had a direct and substantial relationship to, the child's disability; **or**
2. If the conduct in question was the direct result of the school district's failure to implement the child's IEP.

If the school district, you, and other relevant members of the child's IEP Team determine that either of those conditions was met, the conduct must be determined to be a manifestation of the child's disability.

If the school district, you, and other relevant members of the child's IEP Team determine that the conduct in question was the direct result of the school district's failure to implement the IEP, the school district must take immediate action to remedy those deficiencies.

**Determination that behavior was a manifestation of the child's disability**

If the school district, you, and other relevant members of the IEP Team determine that the conduct was a manifestation of the child's disability, the IEP Team must either:

1. Conduct a functional behavioral assessment, unless the school district had conducted a functional behavioral assessment before the behavior that resulted in the change of placement occurred, and implement a behavioral intervention plan for the child; or
2. If a behavioral intervention plan already has been developed, review the behavioral intervention plan, and modify it, as necessary, to address the behavior.

Except as described below under the sub-heading **Special circumstances**, the school district must return your child to the placement from which your child was removed, unless you and the district agree to a change of placement as part of the modification of the behavioral intervention plan.

**Special circumstances**

Whether or not the behavior was a manifestation of your child's disability, school personnel may remove a student to an interim alternative educational setting (determined by the child's IEP Team) for not more than 45 school days, if your child:

1. Carries a weapon (see the definition below) to school or has a weapon at school, on school premises, or at a school function under the jurisdiction of the State Educational Agency or a school district;
2. Knowingly has or uses illegal drugs (see the definition below), or sells or solicits the sale of a controlled substance, (see the definition below), while at school, on school premises, or at a school function under the jurisdiction of the State Educational Agency or a school district; or
3. Has inflicted serious bodily injury (see the definition below) upon another person while at school, on school premises, or at a school function under the jurisdiction of the State Educational Agency or a school district.

**Definitions**

*Controlled substance* means a drug or other substance identified under schedules I, II, III, IV, or V in section 202(c) of the Controlled Substances Act (21 U.S.C. 812(c)).

*Illegal drug* means a controlled substance; but does not include a controlled substance that is legally possessed or used under the supervision of a licensed health-care professional or that is legally possessed or used under any other authority under that Act or under any other provision of Federal law.

*Serious bodily injury* has the meaning given the term "serious bodily injury" under paragraph (3) of subsection (h) of section 1365 of title 18, United States Code.

*Weapon* has the meaning given the term "dangerous weapon" under paragraph (2) of the first subsection (g) of section 930 of title 18, United States Code.

### Notification

On the date it makes the decision to make a removal that is a change of placement of your child because of a violation of a code of student conduct, the school district must notify you of that decision, and provide you with a procedural safeguards notice.

## CHANGE OF PLACEMENT BECAUSE OF DISCIPLINARY REMOVALS

---

### 34 CFR §300.536

A removal of your child with a disability from your child's current educational placement is a **change of placement** if:

1. The removal is for more than 10 school days in a row; **or**
2. Your child has been subjected to a series of removals that constitute a pattern because:
  - a. The series of removals total more than 10 school days in a school year;
  - b. Your child's behavior is substantially similar to the child's behavior in previous incidents that resulted in the series of removals; and
  - c. Of such additional factors as the length of each removal, the total amount of time your child has been removed, and the proximity of the removals to one another.

Whether a pattern of removals constitutes a change of placement is determined on a case-by-case basis by the school district and, if challenged, is subject to review through due process and judicial proceedings.

## DETERMINATION OF SETTING

---

### 34 CFR §300.531

The individualized education program (IEP) Team determines the interim alternative educational setting for removals that are **changes of placement**, and removals under the subheadings **Additional authority** and **Special circumstances**.

## APPEAL

---

### 34 CFR §300.532

#### General

You may file a due process complaint (see the heading **Due Process Complaint Procedures**) to request a due process hearing if you disagree with:

1. Any decision regarding placement made under these discipline provisions; **or**

2. The manifestation determination described above.

The school district may file a due process complaint (see above) to request a due process hearing if it believes that maintaining the current placement of your child is substantially likely to result in injury to your child or to others.

**Authority of hearing officer**

A hearing officer that meets the requirements described under the subheading **Impartial hearing officer** must conduct the due process hearing and make a decision. The hearing officer may:

1. Return your child with a disability to the placement from which your child was removed if the hearing officer determines that the removal was a violation of the requirements described under the heading **Authority of School Personnel**, or that your child's behavior was a manifestation of your child's disability; or
2. Order a change of placement of your child with a disability to an appropriate interim alternative educational setting for not more than 45 school days if the hearing officer determines that maintaining the current placement of your child is substantially likely to result in injury to your child or to others.

These hearing procedures may be repeated, if the school district believes that returning your child to the original placement is substantially likely to result in injury to your child or to others.

Whenever you or a school district files a due process complaint to request such a hearing, a hearing must be held that meets the requirements described under the headings **Due Process Complaint Procedures, Hearings on Due Process Complaints**, except as follows:

1. The State Educational Agency or school district must arrange for an expedited due process hearing, which must occur within **20** school days of the date the hearing is requested and must result in a determination within **10** school days after the hearing.
2. Unless you and the school district agree in writing to waive the meeting, or agree to use mediation, a resolution meeting must occur within **seven** calendar days of receiving notice of the due process complaint. The hearing may proceed unless the matter has been resolved to the satisfaction of both parties within **15** calendar days of receipt of the due process complaint.
3. A State may establish different procedural rules for expedited due process hearings than it has established for other due process hearings, but except for the timelines, those rules must be consistent with the rules in this document regarding due process hearings.

You or the school district may appeal the decision in an expedited due process hearing in the same way as for decisions in other due process hearings (see the heading **Appeal**).

## **PLACEMENT DURING APPEALS**

### **34 CFR §300.533**

When, as described above, you or the school district file a due process complaint related to disciplinary matters, your child must (unless you and the State Educational Agency or school district agree otherwise) remain in the interim alternative educational setting pending the decision of the hearing officer, or until the expiration of the time period of removal as provided for and described under the heading **Authority of School Personnel**, whichever occurs first.

## **PROTECTIONS FOR CHILDREN NOT YET ELIGIBLE FOR SPECIAL EDUCATION AND RELATED SERVICES**

### **34 CFR §300.534**

#### **General**

If your child has not been determined eligible for special education and related services and violates a code of student conduct, but the school district had knowledge (as determined below) before the behavior that brought about the disciplinary action occurred, that your child was a child with a disability, then your child may assert any of the protections described in this notice.

#### **Basis of knowledge for disciplinary matters**

A school district will be deemed to have knowledge that your child is a child with a disability if, before the behavior that brought about the disciplinary action occurred:

1. You expressed concern in writing to supervisory or administrative personnel of the appropriate educational agency, or to your child's teacher that your child is in need of special education and related services;
2. You requested an evaluation related to eligibility for special education and related services under Part B of IDEA; **or**
3. Your child's teacher or other school district personnel expressed specific concerns about a pattern of behavior demonstrated by your child directly to the school district's director of special education or to other supervisory personnel of the school district.

#### **Exception**

A school district would not be deemed to have such knowledge if:

1. You have not allowed an evaluation of your child or have refused special education services; **or**
2. Your child has been evaluated and determined to not be a child with a disability under Part B of IDEA.

**Conditions that apply if there is no basis of knowledge**

If prior to taking disciplinary measures against your child, a school district does not have knowledge that your child is a child with a disability, as described above under the sub-headings ***Basis of knowledge for disciplinary matters*** and ***Exception***, your child may be subjected to the disciplinary measures that are applied to children without disabilities who engage in comparable behaviors.

However, if a request is made for an evaluation of your child during the time period in which your child is subjected to disciplinary measures, the evaluation must be conducted in an expedited manner.

Until the evaluation is completed, your child remains in the educational placement determined by school authorities, which can include suspension or expulsion without educational services.

If your child is determined to be a child with a disability, taking into consideration information from the evaluation conducted by the school district, and information provided by you, the school district must provide special education and related services in accordance with Part B of IDEA, including the disciplinary requirements described above.

**REFERRAL TO AND ACTION BY LAW ENFORCEMENT AND JUDICIAL AUTHORITIES**

**34 CFR §300.535**

Part B of IDEA does not:

1. Prohibit an agency from reporting a crime committed by a child with a disability to appropriate authorities; **or**
2. Prevent State law enforcement and judicial authorities from exercising their responsibilities with regard to the application of Federal and State law to crimes committed by a child with a disability.

**Transmittal of records**

If a school district reports a crime committed by a child with a disability, the school district:

1. Must ensure that copies of the child's special education and disciplinary records are transmitted for consideration by the authorities to whom the agency reports the crime; **and**
2. May transmit copies of the child's special education and disciplinary records only to the extent permitted by the Family Educational Rights and Privacy Act (FERPA).

## REQUIREMENTS FOR UNILATERAL PLACEMENT BY PARENTS OF CHILDREN IN PRIVATE SCHOOLS AT PUBLIC EXPENSE

### GENERAL

#### 34 CFR §300.148

Part B of IDEA does not require a school district to pay for the cost of education, including special education and related services, of your child with a disability at a private school or facility if the school district made a free appropriate public education (FAPE) available to your child and you choose to place the child in a private school or facility. However, the school district where the private school is located must include your child in the population whose needs are addressed under the Part B provisions regarding children who have been placed by their parents in a private school under 34 CFR §§300.131 through 300.144.

#### Reimbursement for private school placement

If your child previously received special education and related services under the authority of a school district, and you choose to enroll your child in a private preschool, elementary school, or secondary school without the consent of or referral by the school district, a court or a hearing officer may require the agency to reimburse you for the cost of that enrollment if the court or hearing officer finds that the agency had not made a free appropriate public education (FAPE) available to your child in a timely manner prior to that enrollment and that the private placement is appropriate. A hearing officer or court may find your placement to be appropriate, even if the placement does not meet the State standards that apply to education provided by the State Educational Agency and school districts.

#### Limitation on reimbursement

The cost of reimbursement described in the paragraph above may be reduced or denied:

1. If: (a) At the most recent individualized education program (IEP) meeting that you attended prior to your removal of your child from the public school, you did not inform the IEP Team that you were rejecting the placement proposed by the school district to provide FAPE to your child, including stating your concerns and your intent to enroll your child in a private school at public expense; or (b) At least 10 business days (including any holidays that occur on a business day) prior to your removal of your child from the public school, you did not give written notice to the school district of that information;
2. If, prior to your removal of your child from the public school, the school district provided prior written notice to you of its intent to evaluate your child (including a statement of the purpose of the evaluation that was appropriate and reasonable), but you did not make the child available for the evaluation; or
3. Upon a court's finding that your actions were unreasonable.

However, the cost of reimbursement:

1. Must not be reduced or denied for failure to provide the notice if: (a) The school prevented you from providing the notice; (b) You had not received notice of your responsibility to provide the notice described above; or (c) Compliance with the requirements above would likely result in physical harm to your child; **and**
2. May, in the discretion of the court or a hearing officer, not be reduced or denied for your failure to provide the required notice if: (a) You are not literate or cannot write in English; or (b) Compliance with the above requirement would likely result in serious emotional harm to your child.

STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017

**Chapter 12**  
**Discipline**

Schools are encouraged to address student misconduct through appropriate school-wide discipline policies, instructional services, and/or related services. If a student with a disability has behavior problems that interfere with his or her learning or the learning of others, an individualized education program (IEP) team shall consider the use of strategies, including positive behavioral supports and interventions, to address the behavior. If the IEP team determines that such services are needed, they must be included in the IEP and must be implemented.

Students with disabilities who are subject to disciplinary actions by a district are entitled to all of the due process rights afforded students without disabilities under Section 33-205, Idaho Code and state and local policies. In addition to these rights, the IDEA provides special education rights and additional discipline procedures to a student with a disability whom the district is removing from his or her current educational placement. These procedures come into play when the district is unable to work out an appropriate placement for the student with the parent/adult student. Further, these procedures do not prevent district personnel from maintaining a safe environment conducive to learning that is critical for all students.

Even though Idaho Code allows district personnel to “temporarily suspend” students for up to twenty (20) school days, all students with disabilities who have been suspended or expelled for more than ten (10) consecutive or cumulative school days in a school year retain the right to a free appropriate public education. (FAPE).

**Section 1. General Discipline Provisions**

The general requirements pertaining to the discipline procedures of special education students are as follows:

1. District personnel may remove a student from his or her current placement to an appropriate Interim Alternative Education Setting (IAES) or another setting for not more than ten (10) consecutive days to the extent those alternatives are applied to students without disabilities.
2. District personnel may suspend any student, including a special education student, for up to ten (10) cumulative school days in a school year if he or she violates the code of student conduct, and services may cease during this period. In accordance with Idaho Code (unless services are provided to students who are nondisabled who are also suspended):
  - a. A school principal has the authority to order a temporary disciplinary suspension for up to five (5) school days.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

- b. The superintendent can extend the disciplinary suspension for an additional ten (10) school days.
  - c. Provided, that on a finding by the Board of Trustees that the student's immediate return to school would be detrimental to other students' health, welfare or safety, the Board of Trustees may extend the temporary suspension for an additional five (5) school days.
  - d. Prior to suspending any student, the superintendent or principal shall grant an informal hearing on the reasons for the suspension and the opportunity to challenge those reasons. Any student who has been suspended may be readmitted to the school by the superintendent or principal who suspended him or her upon such reasonable conditions as said superintendent or principal may prescribe.
3. A series of suspensions exceeding ten (10) days in a school year shall not constitute a pattern of removals resulting in a change of placement, without following the procedures discussed in this chapter.
4. Students who have not been determined eligible for special education may be entitled to an evaluation and other IDEA rights—including the right to FAPE during periods of disciplinary suspension that extend beyond ten (10) cumulative school days in a school year if:
  - a. The district had basis of knowledge that the student met the IDEA eligibility prior to the behavior that precipitated the disciplinary suspension; and
  - b. The parent/adult student asserts the right to FAPE.

**Section 2. Actions Involving a Change of Placement for Disciplinary Reasons**

A change of placement is a removal from the student's current educational placement for more than ten (10) consecutive school days or a series of removals that constitute a pattern when they total more than ten (10) cumulative school days in a school year. Factors such as the student's behavior is substantially similar to behavior in previous incidents that resulted in series of removals, the length of the removal, the proximity of the removals to one another, and the total amount of time the student is removed are indicators of a pattern. Whether a pattern of removals constitutes a change of placement will be determined on a case-by-case basis by the district; the district's determination is subject to review through an expedited due process hearing and judicial proceedings. The district may consider any unique circumstances in determining whether to pursue a disciplinary change of placement.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

The parent shall be provided with written notice on the date on which the decision is made to remove the student if it constitutes a change of placement. A copy of the IDEA's procedural safeguards shall be provided with the notice.

Even if the disciplinary action is to suspend or expel a student, FAPE [educational services] cannot cease for more than ten (10) cumulative school days in a school year.

A manifestation determination is required if the district is considering removing a student with a disability from his or her educational placement for disciplinary reasons which constitute a change of placement or placing a student in an IAES. A manifestation determination is defined as a review of the relationship between the student's disability and the behavior subject to disciplinary action. See Section 4 of this chapter for more information.

**A. District Actions Resulting in a Change of Placement**

District administrators change a student's placement by:

1. Unilaterally removing a special education student from his or her current placement for:
  - a. more than ten (10) consecutive school days in a school year; or
  - b. subjecting a special education student to a series of removals that constitute a pattern:
    - 1) because the series of removals total more than ten (10) school days in a school year;
    - 2) because the student's behavior is substantially similar to behavior in previous incidents that resulted in the series of removals; and
    - 3) because of such additional factors as the length of each removal, the total amount of time the student is removed, and the proximity of the removals to one another.
2. District personnel may remove a student to an IAES for not more than forty-five (45) school days without regard to whether the behavior is determined to be a manifestation of the student's disability if the student:
  - a. carries a weapon to or possesses a weapon at school, on school premises, or to or at a school function under the jurisdiction of a State Education Agency (SEA) or a Local Education Agency (LEA); or

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

- b. knowingly possesses or uses illegal drugs *or* sells or solicits the sale of a controlled substance while at school, on school premises, or at a school function under the jurisdiction of an SEA or an LEA; or
- c. has inflicted serious bodily injury upon another person while at school, on school premises, or at a school function under the jurisdiction of an SEA or an LEA.

**B. Hearing Officer Actions Resulting in a Change of Placement**

Through an expedited due process hearing, district administrators may ask a hearing officer to place a student with a disability in an appropriate IAES.

- 1. In requesting a hearing officer to place a student in an IAES, the district must:
  - a. demonstrate by substantial evidence that maintaining the current placement is substantially likely to result in injury to the student or others; and
  - b. indicate whether the request is for an *initial* period of not more than forty-five (45) school days or an *additional* period of not more than forty-five (45) school days.
- 2. In determining whether to grant a district's request to place a student in an IAES, the hearing officer must determine that the IAES proposed by district personnel in consultation with the student's special education teacher or the IEP team is appropriate.

**C. Court Actions Resulting in a Change of Placement**

District administrators may seek a court order (called a "Honig Injunction") to remove a special education student from school or the current placement at any time. Educational services [FAPE] shall not cease during an injunction.

**Section 3. FAPE Considerations**

Services shall not cease and the district shall always provide FAPE to the student with a disability:

- 1. after a student with a disability is removed for ten (10) school days in the same school year and subsequent days of removal; and
- 2. there is a disciplinary change of placement.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

**A. District Actions When There is Not a Change in Placement**

1. Notify the parent/adult student of the disciplinary action to be taken on the date of the decision.
2. School personnel, in consultation with at least one of the child's teachers, determine the extent to which services are needed so as to enable the child to continue to participate in the general education curriculum although in another setting and to progress towards meeting IEP goals.
3. Conduct as appropriate a functional behavioral assessment (FBA) and provide behavioral intervention services and ~~modifications~~ accommodations or adaptations designed to address the behavior violation so that it does not recur.

**B. District Actions When There is a Change of Placement**

Whenever disciplinary action results in a change in placement, the district must:

1. notify the parent/adult student of the disciplinary action to be taken on the date of the decision and provide a copy of the *Procedural Safeguards Notice*;
2. hold an IEP team meeting to determine the extent to which services are needed so as to enable the child to continue to participate in the general education curriculum although in another setting and to progress towards meeting IEP goals; and
3. conduct a manifestation determination immediately, if possible, but not later than ten (10) school days after the date on which the decision to take the disciplinary action is made.

**C. FAPE Requirements in an IAES**

If the student's placement will change to an IAES, the IEP team shall select an IAES that enables the student to:

1. continue to participate in the general education curriculum;
2. progress toward meeting the goals set out in his or her IEP; and
3. receive, as appropriate, an FBA and behavioral intervention services to address the behavior violation so that it does not recur.

#### **D. Transportation**

If the IEP team determines that special transportation is required as a related service it must be included in the IEP, all procedural safeguards under the IDEA shall be afforded to the student in matters concerning transportation. Whether a suspension from the bus counts as a suspension from school depends on whether bus transportation is identified on the IEP:

1. If bus transportation is on the IEP, a suspension from the bus would be treated as a suspension from school (unless the district provides transportation services in some other way, such as “transportation in lieu of”) because transportation is necessary for the student to obtain access to the location where all other services will be delivered.
2. If bus transportation is not on the IEP, a suspension from the bus would not be counted as suspension from school. In these cases, the student and the parent would have the same obligation to get to and from school as a student without a disability who had been suspended from the bus.

If the student’s behavior on the bus results in a suspension from the bus, the IEP team shall consider whether the behavior should be addressed in a Behavioral Intervention Plan (BIP).

#### **Section 4. Procedures for a Manifestation Determination**

A manifestation determination by the parent/adult student and relevant IEP team members (as determined by the district and parents/adult students) involves a review of the relationship between the student’s disability and the behavior subject to disciplinary action.

##### **A. Actions Involving a Manifestation Determination**

When a disciplinary action results in a change of placement or placement in an IAES, the district will take the following actions:

1. The parent/adult student will be notified of the disciplinary action and provided with a copy of the *Procedural Safeguards Notice* not later than the date on which the decision to take disciplinary action is made.
2. A meeting will be held immediately, if possible, but no later than ten (10) school days after the date on which the decision to take disciplinary action is made. This meeting will include the district, the parent/adult student, and other relevant members of the IEP team (as determined by the parent and the district). The purpose of the meeting is to review all relevant information in the student’s file including:
  - a. the student’s IEP;

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

- b. any teacher observations; and
  - c. any relevant information provided by the parent/adult student.
3. Based on a review of the information, the district, parent, and relevant members IEP team as determined by the parent and the district, will determine if the conduct in question was:
- a. caused by or had a direct and substantial relationship to the student's disability; or
  - b. the direct result of the district's failure to implement the IEP (if so, the deficiencies must be immediately remedied).

If the district, parent, and relevant members IEP team find that either a or b above is true, the student's behavior will be determined to be a manifestation of his or her disability.

**B. When Behavior Is a Manifestation of the Disability**

If a student's behavior is determined to be a manifestation of his or her disability, the IEP team, (relevant members determined by the parent and the district), will:

- 1. conduct an FBA and implement a BIP for the student if the district had not conducted such an assessment prior to the behavior that resulted in a change in placement;
- 2. review the BIP if one had previously been developed and modify it as necessary to address the behavior;
- 3. return the student to the placement from which he or she was removed, unless the parent and district agree in writing to a change of placement as part of the modification of the BIP.

If there were grounds to place a student in an IAES, the student may remain in the IAES even if there was a manifestation.

**C. When Behavior Is Not a Manifestation of the Disability**

If the IEP team, (relevant members determined by the parent and the district), determines that the student's behavior was not a manifestation of his or her disability, the same disciplinary procedures applicable to students without disabilities, including long-term suspension or expulsion, may be applied to the student with a disability. The district will forward special education and disciplinary records for consideration to the board of trustees, which makes the final decision regarding the disciplinary action.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

Even if the disciplinary action is to suspend or expel, the following provisions shall be met:

1. Educational services cannot cease for more than ten (10) school days in a school year. Educational services shall be provided to the extent necessary to allow the student with a disability to continue to participate in the general education curriculum and the opportunity to advance toward achieving the goals set out in his or her IEP.
2. An IEP team shall convene to develop an IEP that specifies what special education and related services will be provided during the period of suspension or expulsion.

**Section 5. Other Considerations**

**A. Request for an Expedited Hearing**

An expedited hearing is a hearing that occurs within twenty (20) school days of the request with a decision rendered within ten (10) school days of the hearing.

1. The parent/adult student may request an expedited due process hearing if he or she:
  - a. disagrees with the determination that the behavior was not a manifestation of the student's disability;
  - b. disagrees with any decision of the IEP team regarding a change of placement during a disciplinary proceeding; or
  - c. disagrees with the decision regarding the student's placement in an IAES.
2. The district may request an expedited hearing if it believes that maintaining the current placement is substantially likely to result in injury to the student or to others.
3. When an appeal of a disciplinary action is requested (by the parent/adult student to challenge the action or by the district to seek removal to an interim setting), the student remains in the IAES pending the decision of the hearing officer or the expiration of the disciplinary placement term, whichever occurs first unless the parent/adult student and district agree otherwise.
4. Resolution meeting requirements apply but are shortened to fifteen (15) and seven (7) days. No challenge for sufficiency of request is available.
5. A decision of a hearing officer in an expedited hearing may be appealed to federal or state district court.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

See Chapter 13, Sections 4 and 5, for an explanation of regular and expedited due process hearing rights and procedures.

**B. Protections for Students Not Yet Eligible for Special Education**

A student who has not been determined eligible for special education and who has violated any rule or code of conduct of the district may assert the protections of the IDEA *if* the district had knowledge that the student was a student with a disability before the behavior that precipitated the disciplinary action.

1. Basis of knowledge

With limited exceptions, which are described in item 2 below, the district will be deemed to have knowledge that an individual is a student with a disability if before the behavior that precipitated the disciplinary action occurred one or more of the following is true:

- a. The parent/adult student has expressed concern to supervisory or administrative district personnel or a teacher of the child that the student is in need of special education and related services. The concern must be expressed in writing unless the parent/adult student is unable to write or has a disability that prevents a written statement.
- b. The parent/adult student has requested that the student be evaluated for special education.
- c. The student's teacher or other district personnel have expressed specific concerns about a pattern of behavior demonstrated by the student directly to the director of special education or to other district supervisory personnel in accordance with the district's established Child Find system or special education referral system.

2. No basis of knowledge

The district will be deemed not to have knowledge that an individual is a student with a disability if one or more of the following is true:

- a. An evaluation was conducted and a determination was made that the student did not have a disability.
- b. The parent/adult student did not give written consent for an evaluation.
- c. The parent/adult student refused special education services.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

If the district did not have a basis of knowledge that a student was a student with a disability prior to taking disciplinary measures, the student is subjected to the same disciplinary measures applied to all other students who engage in comparable behaviors.

**C. Parent/Adult Student Request for Evaluation of a Disciplined Student**

If a request for an evaluation of a student who is not currently eligible for special education is made during the period in which the student is subject to disciplinary measures, the evaluation will be conducted in an expedited manner. Pending the results of the evaluation, the student will remain in the educational placement determined by district officials, which can include suspension or expulsion without educational services.

1. If the student is subsequently determined eligible for special education, the district will:
  - a. Convene an IEP team meeting to develop an IEP.
  - b. Conduct a manifestation determination.
    - 1) If the behavior is caused by or had a substantial relationship to the student's disability, the disciplinary action must be set aside, and the student must be provided appropriate educational services in the least restrictive environment (LRE).
    - 2) If the behavior is not caused by nor had a substantial relationship to the student's disability, the student is subject to the disciplinary placement that had been determined, but he or she is still entitled to receive FAPE, which is determined by the IEP team. Educational services cannot cease for more than ten (10) school days in a school year. Educational services shall be provided to the extent necessary to allow the student with a disability access to the general education curriculum and the opportunity to advance toward achieving the goals set out in his or her IEP.
2. If the evaluation team determines that the student is not eligible for special education, he or she will be subject to the same disciplinary actions as all other students.

**D. Referrals to and Action by Law Enforcement and Judicial Authorities**

1. The district may report a crime committed by a student with a disability to appropriate authorities. The IDEA does not prevent state law enforcement or judicial authorities from exercising their responsibilities, with regard to the application of federal and state law, for crimes committed by a student with a disability.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

2. If a student brings a firearm to school, law enforcement shall be contacted pursuant to the Gun-Free Schools Act.
  
3. If the district reports a crime, it will ensure that copies of the special education and disciplinary records of the student are given to the appropriate law enforcement authorities for their consideration, to the extent the release of records is permitted by the Family Educational Rights and Privacy Act (FERPA). Generally, the release of records requires consent, but exceptions are listed in Chapter 11, Section 5.

**E. Transfer of Discipline Records**

Section 33-209, Idaho Code, requires that whenever a student transfers to a new school and a school record contains information concerning violent or disruptive behavior or disciplinary action involving the student, this information will be included in the transfer of records to the new school. The transmission of the student's record shall include both the student's current IEP, including the FBA, BIP, and any current or previous disciplinary action taken. This information will be contained in a sealed envelope marked to indicate the confidential nature of the contents and addressed to the principal or other administrative officer of the school.

When the district initiates disciplinary proceedings applicable to all students, the special education and disciplinary records of students with disabilities shall be given to authorized district personnel for their consideration in making the final determination regarding the disciplinary action.

**Chapter 13**  
**Dispute Resolution**

On occasion, conflicts arise between school districts and families. Several mechanisms are available through the State Department of Education (SDE) to assist in resolving a dispute. The processes are facilitation, informal conflict resolution, mediation, state complaints, due process hearings, and expedited due process hearings. This chapter contains information on each of these processes. The information contained within this chapter is not intended to limit in any manner the procedural due process/dispute resolution rights provided by federal or state law.

**Contact Information**

In addition to providing general information and support concerning IDEA related issues, the SDE accepts requests for facilitation, informal conflict resolution, and mediation by telephone and e-mail. State complaints and due process hearings are accepted via fax, mail, personal delivery, or may be scanned and attached to an email. All state complaints and due process hearing requests must include a signature of the filing party.

Requests for dispute resolution should be directed to the Dispute Resolution Coordinator (DRC) at:

## Section 1. Facilitation

### A. Definition of Facilitation

Facilitation is a voluntary process during which dispute resolution contracted individual or individuals facilitate an IEP team meeting or other IDEA-related meeting. The role of the facilitator is to help team members communicate more effectively and efficiently. Facilitation supports early dispute resolution by providing assistance to the team before a conflict develops into a formal dispute. A facilitator is trained to help teams focus on key issues and move toward productive outcomes. Because the facilitator is not a member of the team, he or she can act as a neutral and impartial third-party providing balance, offer an outsider's perspective on the process, and help parties to be heard and understood by the rest of the team. Note: A facilitator will not be responsible for creating or documenting agreements made by the team.

### B. Facilitation Requests

A request for facilitation may be made by either a parent/adult student or a designated district representative, such as the director of special education. Facilitation may be requested for any IDEA-related meeting including: eligibility meetings; annual or amended IEP team meetings; due process hearing meetings such as resolution sessions or settlement meetings; as well as manifestation determination meetings.

Requests for facilitation should be made at least two weeks in advance to the meeting. Upon the request for facilitation, the Dispute Resolution Coordinator (DRC) will immediately contact the other party for approval. As facilitation is voluntary, both parties must agree to facilitation for the process to go forward. The DRC will contact both the parent/adult student and the district representative, notifying each who the facilitator will be. The facilitator will contact the parties to conduct pre-facilitation interviews to help build an agenda for the facilitation. Generally meetings are scheduled by the district who is responsible for sending out the *Invitation to Meeting*.

### C. Facilitator Role

The role of the facilitator is to lead the meeting and guide parties through the process. The facilitator may work with parties to establish the agenda and identify issues important for parties to cover in the meeting. Facilitators may ask pertinent questions of parties providing occasional clarification or perspective, and work to ensure that participants are able to participate in a productive and balanced meeting. Facilitators are not to make decisions for teams, serve as definitive experts on IDEA processes or matters of law, record minutes for meetings, or finalize documents, although they may facilitate the crafting of language parties will include in a student's IEP.

Facilitators shall not be called to testify in due process hearings or civil proceedings regarding facilitated meetings they have conducted as dispute resolution contractors.

**D. Dispute Resolution Facilitators**

Facilitators are trained in effective conflict resolution processes, communication, negotiation, problem-solving, and in laws and regulations relating to the provision of special education and related services. While a facilitator in this context will not offer advice on a particular course of action, he or she is required to help parties explore the soundness of any assumptions or agreements. The DRC may appoint one or two individuals to serve as facilitator(s) of a meeting.

1. In all cases a facilitator shall not:
  - a. be an employee of the district involved in the dispute;
  - b. have children enrolled in the district involved in the dispute;
  - c. have a personal or professional interest that may affect the ability to remain impartial or neutral; or
  - d. be used if either party rejects the facilitator(s) based on a perceived inability to be neutral or impartial.

**E. Facilitation Timelines**

The DRC will appoint a facilitator within five (5) business days of an acceptance of a request. Every effort will be made to complete the process within twenty-one (21) calendar days.

**Section 2. Informal Conflict Resolution**

**A. Definition of Informal Conflict Resolution**

Informal conflict resolution is offered in an effort to improve relationships between parties and foster healthy communication. This informal conflict resolution may include topics outside of those set forth as appropriate for IDEA mediation, extending beyond the identification, evaluation, educational placement or the provision of FAPE. As with mediation, the process of informal conflict resolution is confidential and voluntary, and the third-party is a trained neutral and impartial third-party. Informal conflict resolution may be appropriate when parties face difficulties communicating productively or need to reach understanding on differing perspectives. Any agreements reached between parties are self-enforced.

**B. Informal Conflict Resolution Requests**

A request for informal conflict resolution may be made in person, writing or via telephone by either a parent/adult student or a district representative. The DRC will screen requests to determine the appropriateness of the process for each individual case. Informal conflict resolution can be scheduled prior to, or concurrent with, a request for a due process hearing or investigation of a state complaint involving an individual student, however cannot be used to delay the state complaint process or a due process hearing timelines.

Upon request for informal conflict resolution, the DRC or the assigned facilitator will contact all parties to schedule the meeting. Because informal conflict resolution is voluntary, both parties must verbally state their agreement to participate for the process to go forward. Informal conflict resolution can be conducted by dispute resolution contractors or dispute resolution staff as assigned by the DRC. Informal conflict resolution is offered at no charge to the district or to the parent/adult student.

**C. Informal Conflict Resolution Procedures**

1. No video or audio recording of the meeting proceedings will be made.
2. Because informal conflict resolution is a non-adversarial process that offers the parties the opportunity to communicate directly with each other, legal representation during the meeting is discouraged, and a school district may not have legal representation present if a parent/adult student does not.
3. The DR office will not retain any documentation or informal agreements created by the parties. No other records of the content of the meeting will be kept by the SDE.
4. Either party has the option to end the informal conflict resolution meeting at any time.

**D. Informal Conflict Resolution Timelines**

The DRC will appoint a facilitator within five (5) business days of an acceptance of a request. The meeting will be held in a location convenient to the parties involved, and every effort will be made to complete the process within twenty-one (21) calendar days.

**E. Confidentiality**

Discussions that occur during the informal conflict resolution process are confidential and cannot be used as evidence in any subsequent due process hearing or civil proceeding in any state or federal court. Facilitators shall not be called to testify in due process hearings or civil proceedings regarding facilitated meetings they have conducted as dispute resolution contractors. The facilitator may require a confidentiality agreement be signed by participants.

## F. Nature of Agreements

An agreement reached by the parties through informal conflict resolution, whether memorialized in writing or agreed to verbally, are self-enforced and not enforceable by the SDE.

### Section 3. Mediation

#### A. Definition of Mediation

Mediation is a confidential and voluntary process where a trained neutral and impartial third-party provides a structure for parents/adult students and district personnel to identify areas of agreement and work to resolve points of disagreement concerning the identification, evaluation, educational placement, or provision of FAPE. Mediation aims to build positive working relationships, encourage mutual understanding, and help the parties focus on their common interest—the student.

While discussions in mediation are not discoverable in due process hearing or court process, and parties are provide a Notification of Confidentiality (see the *Notification of Confidentiality* form in the Documents section of this chapter), written agreements produced in mediation are legally-binding and enforceable in state or federal court. With the agreement of all parties in the mediation, an IEP may be amended as part of a written agreement.

Mediation may be appropriate when parties are in disagreement and seem unable to move forward without outside assistance, or they, after making a good-faith effort, face an impasse in an attempt to resolve the disagreement. Mediation can be scheduled prior to, or concurrent with, a request for a due process hearing or investigation of a state complaint.

#### B. Mediation Requests

A request for mediation may be made in person, writing or via telephone by either a parent/adult student or a district representative at any point in a dispute. The DRC will screen all mediation requests to determine the appropriateness of the process for each individual case. Mediation is automatically offered when a state complaint involving an individual student or a request for a due process hearing has been filed. Mediation cannot be used to delay the state complaint process or a due process hearing timelines.

Upon request for mediation, the Dispute Resolution office will contact all parties to schedule the mediation. Because mediation is voluntary, both parties must verbally agree to mediate for the process to go forward. Mediators are selected by the DRC from a list of trained professionals. Mediation is provided at no charge to the district or to the parent/adult student.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

**C. Mediation Procedures**

1. The mediation will be conducted in compliance with the IDEA.
2. No video or audio recording of the mediation proceedings will be made.
3. Each party is limited to no more than three participants who have the authority to make final resolution decisions. The mediator may increase this number at his or her discretion and with agreement of all parties.
4. The district shall have at least one representative present who has the authority to commit resources.
5. Because mediation is a non-adversarial process that offers the parties the opportunity to communicate directly with each other, legal representation during a mediation session is discouraged. A district may not have legal representation present if a parent/adult student does not.
6. The Dispute Resolution office will retain copies of the signed agreement, if an agreement is reached. No other records of the mediation will be kept by the SDE.
7. The mediator will provide signed copies of the agreement, if an agreement is reached, to each party and the Dispute Resolution office. (See the *Mediation Agreement* form in the Documents section of this chapter).
8. The mediator, afforded mediator privilege under Idaho law, will be excluded from participation in subsequent actions specific to the case mediated including complaint investigations, due process hearings, and legal proceedings. The mediator may mediate again for the parties if assigned and parties approve or if the mediated agreement calls for the mediator's potential future participation with the parties.
9. A due process hearing requested prior to mediation may be canceled by the requesting party as a result of the mediation agreement. The requesting party will immediately provide the hearing officer with documentation of the voluntary withdrawal of the due process hearing request. The mediator will immediately inform the Dispute Resolution office of the decision to withdraw the due process hearing request.
10. If for any reason the mediation does not end in a written agreement, the mediator will provide each party and the Dispute Resolution Coordinator with a statement certifying that mediation occurred but no agreement was reached.
11. Either party has the option to end the mediation at any time.

#### **D. Dispute Resolution Mediators**

Dispute resolution mediators are trained in effective conflict resolution processes, communication, negotiation, problem-solving skills, and in laws and regulations relating to the provision of special education and related services. While a mediator will not offer advice on a particular course of action, a mediator is required to help parties explore the soundness of any agreement. Mediators are assigned on a rotational basis with consideration for geographical location.

1. In all cases a mediator shall not:
  - a. be an employee of the SDE or district involved in the dispute;
  - b. have children enrolled in the district involved in the dispute;
  - c. have a personal or professional interest that may affect the ability to remain impartial or neutral; or
  - d. be used if either party rejects the mediator based on a perceived inability to be neutral or impartial.
2. Additionally, if the parties have agreed to mediation following a due process hearing request, co-mediators may not be used.

#### **E. Mediator Role**

The mediator has the responsibility to contact the parties to explain the mediation process, identify issues, and help the parties establish a date, time, and place to hold the mediation. The mediator also: establishes the ground rules for all parties to follow; guides the process; encourages open and honest communication; ensures that each party is heard; phrases information and summarizes issues; and facilitates the writing of the agreement.

#### **F. Mediation Timelines**

The DRC will appoint a mediator within three (3) business days of all parties agreeing to mediate. The mediation will be held in a location convenient to the parties involved, and every effort will be made to complete the process within twenty-one (21) calendar days.

#### **G. Confidentiality**

Discussions that occur during the mediation process cannot be used as evidence in any subsequent due process hearing or civil proceeding. Parties in the mediation process will be

provided a copy of the *Notification of Confidentiality* form. (See the *Notification of Confidentiality* in the Documents section of this chapter).

#### **H. Mediation Agreement**

An agreement reached by the parties through mediation shall be set forth in writing and is enforceable in state and federal courts.

### **Section 4. State Complaints**

#### **A. Definition of State Complaint**

State complaints can be filed by any individual or organization alleging any violation of the IDEA, including an alleged failure to comply with a previous due process hearing decision. State complaint procedures are outlined in IDEA regulations requiring, in part, a complaint must allege a violation that occurred no more than one year (365 days) prior to the date the complaint has been received. (See IDEA regulations 34 CFR§300.150 through 300.153).

The filing party must provide a written complaint that includes the name and contact information of the complainant, the name, address, and attending school of child (if applicable), description and facts of the alleged problem to the extent known and available to the complainant at the time, and a proposed resolution. The party filing the complaint must forward a copy of the complaint to the district at the same time the party files the complaint with the Dispute Resolution office. IDEA allows sixty (60) days to resolve the complaint with mediation, investigation and final report, or a pre-investigation corrective action plan (CAP).

The DRC determines whether the complainant's submission meets the IDEA requirements for a complaint. If the complaint is ruled insufficient, the complainant will be notified in writing. The DRC will determine if an onsite investigation is necessary and will assign a complaint investigator to engage in neutral fact-finding if the complaint is accepted. If investigated, a written decision will be provided to the complainant and the district addressing each allegation, findings of fact, conclusions, and any corrective actions ordered.

#### **B. Filing a State Complaint**

The state complaint will be accepted if received by mail, fax, hand delivery, or scanned and attached to an email with the complainant's signature included. Reasonable accommodations will be provided to individuals who need assistance in filing complaints. A state complaint filed by a parent/adult student or public agency must be signed and must include all of the information indicated on the *Form for Filing a State Complaint* (located in the Document section of this chapter). The DRC will develop allegations of violation of IDEA for investigation from the submitted complaint.

### C. Methods of Resolving State Complaints

Mediation will be offered in a case regarding an individual student. If mediation is not accepted by the parties or fails to resolve the allegation(s) that gave rise to the complaint, then resolution of a state complaint may be achieved through one or more of the following processes:

1. **Verification of resolution:** Upon receipt of the allegations determined by the complaint investigator and the DRC, the district may submit information to document that one or more of the allegations of the complaint have been resolved. The Dispute Resolution office may also receive similar information from other sources.
2. **Corrective action plan (CAP):** The district may propose a CAP to address the allegations in the complaint. The DRC may accept, reject, or negotiate the proposed CAP, or require other corrective actions or timelines to ensure the district will achieve compliance for each allegation stated in the complaint. If this process is not successful, an investigation will be conducted on unresolved allegations.
3. **Investigation:** The SDE will appoint a complaint investigator to the case who will conduct a fact finding investigation which may include interviews and reviews of files, correspondence, and other information. An onsite investigation may occur as part of the investigation. The complaint investigator will submit his or her findings of fact, conclusions, and, in coordination with the SDE, identify appropriate corrective actions, if required.

### D. State Complaint Procedures

Upon receipt of a written state administration complaint, the DRC will ensure the following procedures are followed:

1. Verify proper filing procedures were followed and determine if the complaint meets established criteria, including sufficient allegations of violation of IDEA (as developed by the DRC from the submitted complaint) and facts within five (5) business days. The complainant will be notified if a submission is insufficient to process as a complaint. The complainant will be given the opportunity to submit additional information about the allegations, whereas upon receipt of the additional information, the sixty (60) day timeline for completion will start.
2. The district (specifically the superintendent, the special education director, and the school board chair) will be notified by the DRC that the complaint has been received and what, if any, allegations have been accepted for investigation within ten (10) business days of receiving the complaint. The school district is given an opportunity to respond to the complaint and may initiate within fourteen (14) days of receipt of

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

the complaint a corrective action proposal (CAP) to resolve all or some of the allegations in the complaint, subject to DRC approval. At the complaint investigator's discretion, the timeline for a CAP may be extended, or the complaint investigation may progress until a CAP has been accepted by the Dispute Resolution office. The complaint investigator is responsible for managing the timelines of the investigation and may submit a final report at any point within the 60-day timeline.

3. Mediation can be requested by either party at any time and must be offered for complaints regarding an individual student. While parties are generally encouraged to resolve complaints collaboratively, choosing not to participate in mediation will not be considered relevant in an investigation. If parties opt for mediation, it will not delay the timelines required for resolving a complaint unless all parties agree.
4. Provide the parent/adult student a copy of the Procedural Safeguards Notice.
5. Complainants will be given an opportunity to provide additional information about the allegations, either orally or in writing.
6. All or any part of the written complaint will be set aside by the hearing officer, if the allegation is being addressed in a pending due process hearing or a hearing decision which has already been rendered. Any issue not a part of a due process action will be resolved following the state complaint procedures and timelines.
7. The Dispute Resolution office will investigate a complaint alleging that a final hearing officer decision is not being implemented by a public agency.
8. A final report of the investigation will be issued to the district superintendent, board chairperson, special education director, and complainant, that shall include but is not limited to the findings of fact, conclusions, and corrective action(s) for each allegation within sixty (60) calendar days of receipt of a sufficient complaint (see D.1). This time period may be extended, but only under exceptional circumstances, which shall be documented by the DRC, or if the complainant and public agency agree to extend the time to engage in mediation or other alternative dispute resolution procedures.
9. If a violation of the IDEA is verified by the complaint investigator, the report shall include corrective actions addressing, as appropriate:
  - a. how to remedy any denial of FAPE, which may include the award of compensatory services, monetary reimbursement or other corrective action as appropriate to the needs of the student;

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

- b. the future provision of services to be considered by an IEP team for the student with a disability, when appropriate; and
  - c. the provisions of technical assistance, documentation of compliance, or written assurances, if needed.
10. The SDE will ensure the district takes corrective action if it is determined that the district was out of compliance through technical assistance activities, negotiations, and/or corrective actions no later than one year after the identification of non-compliance. A complaint investigation final report cannot amend a student's IEP.
11. The Dispute Resolution office ensures noncompliance has been corrected and verifies through review of documentation or interviews, or both, the corrective actions were implemented no later than one year (365 days) after the determination of noncompliance. If necessary, the SDE must use appropriate enforcement mechanisms such as the provision of technical assistance, conditions on funding, a corrective action, an improvement plan, and/or withholding funds, in whole or in part.

**Section 5. Due Process Hearings**

**A. Definition**

A due process hearing request involves an allegation or a series of allegations by either a parent/adult student or the district on issues relating to the identification, evaluation, educational placement, and the provision of FAPE.

The due process hearing is overseen by a hearing officer appointed by the DRC. At the due process hearing, the parent/adult student presents evidence, cross examines witnesses, and presents the case to an impartial hearing officer. The hearing officer renders a decision on the merits of the issues relating to the due process hearing.

The due process hearing request must allege a violation occurred not more than two (2) years before the date the parent/adult student or public agency knew or should have known about the alleged action that forms the basis of the due process hearing request, subject to the exceptions described later in this section. Mediation is offered in an effort to resolve issues and parties may request mediation at any time. If mediation is rejected by either party, the due process hearing timelines will remain in effect.

**B. Due Process Hearings and Expedited Due Process Hearings**

Idaho's due process system has two settings for due process hearings: a regular due process hearing and an expedited due process hearing.

1. A regular due process hearing is an administrative hearing to resolve disputes on any matter related to the identification, evaluation, educational placement, and the provision of FAPE.
2. An expedited due process hearing is an administrative hearing to resolve disputes concerning discipline and/or placement related to discipline.

### C. Filing a Due Process Hearing

Due process hearing requests must include a complete and signed copy of the *Due Process Hearing Request Form* (located in the Documents section at the end of this chapter) or a signed document providing all of the general information, issue(s), and resolution(s) information required in the *Due Process Hearing Request Form*. Reasonable accommodations will be provided to individuals who need assistance in filing a written request.

A parent/adult student or public agency (or their attorney authorized to practice law in the state of Idaho) filing a due process hearing request must provide the due process hearing complaint to the other party and to the Dispute Resolution office. The request shall be mailed, faxed, hand delivered, or scanned and attached to an email with a signature of the filing party. All applicable timelines will start when the request has been received by the non-requesting party and the SDE.

1. Due Process Hearing Request from Parent/Adult Student: A due process hearing may be requested on behalf of a student by a parent, adult student, or by an attorney, properly licensed in Idaho, representing the student.
  - a. A due process hearing shall be initiated within two (2) years of the date the parent/adult student knew or should have known of the issues giving rise to the allegation(s). The two-year timeline will not apply if the parent/adult student was prevented from requesting a hearing due to specific misrepresentations or the withholding of information by the public agency required to be provided by the IDEA.
  - b. A due process hearing can be initiated regarding issues pertaining to identification, evaluation, educational placement, or the provision of FAPE if the district proposes to initiate or change any of these matters, or if the district refuses the parent's/adult student's request to initiate or change any of these matters.
2. Due Process Hearing Request by a District: If the district initiates a hearing request, the district must inform the parent/adult student and the SDE. A district may initiate a due process hearing within two years of the dispute in an attempt to accomplish one or more of the following:

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

- a. override a parent's/adult student's refusal of consent for an initial evaluation or re-evaluation, or release of information;
- b. override a parent's/adult student's written objection to an IEP program change, an educational placement change, or disciplinary actions when there is an imminent threat to safety;
- c. the placement of a student in an Interim Alternate Education Setting (IAES) when there is substantial evidence that maintaining the current educational placement is likely to result in injury to the student or others;
- d. a determination whether an evaluation conducted by the district was appropriate or whether an evaluation obtained by a parent/adult student meets the criteria for a publicly funded Independent Educational Evaluation (IEE);
- e. resolution if a parent/adult student disagrees with an IEP or placement change by the district, where the parent/adult student filed a written objection to the IEP or to all or parts of the proposed change in writing within ten (10) calendar days of receiving written notice of the proposed change, thereby stopping the implementation of the proposed change. If resolution through additional IEP meetings or mediation fails to resolve the disagreement, the district may request a due process hearing to obtain a hearing officer's decision regarding the proposed change. (Note: the written objection cannot be used to prevent the public agency from placing a student in an Interim Alternative Educational Setting (IAES) in accordance with the IDEA); or
- f. a determination if a proposed IEP is appropriate even if the parent/adult student has not filed a formal objection.

**D. Hearing Officer Appointment**

1. The hearing officer shall be appointed within ten (10) calendar days of the SDE receiving the due process hearing request or within five (5) business days of an expedited hearing. Hearing officers are selected from a list of specially trained and impartial professionals. A list of qualifications for each hearing officer is kept by the DRC.
2. The hearing officer must not be a member of the district school board, an employee of the school district, or an employee of the SDE.
3. The hearing officer must not have a personal or professional interest that conflicts with the objectivity required of a hearing officer.

4. The hearing officer must be specially trained in conducting due process hearings, possess knowledge and understanding of the provisions of Idaho law, the IDEA, and judicial interpretations, and ability to conduct hearing and render and write decisions with appropriate, standard legal practice.
5. The district will pay for all actual expenses incurred by the hearing officer and for the cost of a verbatim transcript of the hearing, if requested by the parent. The hearing officer will be compensated at rates set by the SDE.

**E. Due Process Hearing Policies**

After a due process request is filed by the parent/adult student or the district, the following procedures will be followed.

1. The Dispute Resolution office offers mediation as a voluntary option to both parties. Parties may request mediation at any time. Choosing mediation shall not alter or delay the timeline of the due process hearing.
2. The receiving party may challenge the sufficiency of the due process hearing request within fifteen (15) days of the receipt of the hearing request by filing a written sufficiency objection with the hearing officer. Challenges to the sufficiency of the due process hearing complaint must be in writing and provided to all parties. The hearing officer shall render a decision regarding the sufficiency of the allegation(s) within five (5) calendar days and immediately notify the parties of the decision in writing.
  - a. If the complaint is found not to be sufficient, the party may amend its due process complaint if the other party consents in writing to the amendment and has the opportunity to resolve the complaint through a resolution meeting, or the hearing officer grants permission to amend no later than five (5) days before the due process hearing begins.
  - b. Timelines for amended due process hearings begin again on the filing date of the amended request.
3. If the district has not previously sent written notice (as outlined in IDEA) regarding the subject matter in the parent's/adult student's complaint, the district must, within ten (10) calendar days of receiving the request, send the response to the parent/adult student a letter explaining the reasons behind their actions, options considered, evaluations conducted, and other factors relevant to the district's response, in accordance with IDEA prior written notice requirements.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

4. The district shall inform a parent/adult student of any free or low-cost legal or other relevant services available to him or her and provide a copy of the Procedural Safeguards if a due process hearing is requested or if the parent/adult student requests such information.
5. Within fifteen (15) days of receiving the parent's/adult student's due process hearing request, the district convenes a pre-hearing resolution session, unless both parties agree in writing to waive the resolution meeting, both parties agree to go to mediation, or the district initiates the hearing.
  - a. A resolution meeting includes parent/adult student, a representative of the district who has decision-making authority, and relevant members of the IEP team who have specific knowledge of the facts identified in the request for a due process hearing as determined by the parties.
  - b. The district's attorney shall not attend the resolution session unless the parent/adult student will be accompanied by an attorney.
  - c. The DRC will provide a contractor specially trained in facilitating a resolution session or a contracted mediator, if requested. Either process requires approval by both parties.
  - d. The purpose of the meeting is for the parent/adult student to discuss the due process hearing request, and the facts that form the basis of the request, so that the district has the opportunity to resolve the dispute.
    - 1) If a resolution is reached regarding the issues raised in the request for a due process hearing, the district representative and the parent/adult student will sign a settlement agreement, a legally binding document enforceable in state and federal court. The parties will immediately forward to the hearing officer signed documentation of the voluntary withdrawal of the due process hearing complaint by the requesting party.
    - 2) Either party may void this agreement within three (3) business days of signing the agreement.
  - e. A due process hearing will be scheduled if no resolution is reached within thirty (30) calendar days of receiving the request for a due process hearing.
  - f. If the district is unable to obtain the participation of the parent/adult student after reasonable efforts have been made and documented, at the conclusion of the thirty (30) calendar day resolution period the district may request that the

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

hearing officer dismiss the parent's/adult student's due process hearing request.

- g. A parent/adult student may request an immediate due process hearing from the hearing officer if the district has not scheduled or participated in a resolution session within fifteen (15) days of the request.
- h. The district must report to the DRC and to the hearing officer when the resolution meeting is to be held, or provide documentation indicating it was waived by both parties, or provided documentation of attempts to reach the other party, within fifteen (15) days of SDE receiving the due process hearing request.

6. The forty-five (45) day timeline for the due process hearing request starts the day after one of the following events:
- a. both parties agree in writing to waive the resolution meeting;
  - b. after either the mediation or resolution meeting starts but before the end of the thirty (30) day period, the parties agree in writing that no agreement is possible;
  - c. both parties agree in writing to continue the mediation at the end of the thirty (30) day resolution period, but later, the parent/adult student or public agency withdraws from the mediation process; or
  - d. the district files a hearing request.

All of the above events must be documented, with dates of determination, and provided to the DRC and the assigned hearing officer immediately.

**F. The Due Process Hearing**

1. Hearing Preparation

- a. A parent/adult student will be allowed to inspect and review reports, files, and records pertaining to the student prior to a resolution session or due process hearing. A district may charge a fee for copies of records if the fee does not effectively prevent a parent/adult student from exercising his or her right to inspect and review those records. The district may not charge a fee to search for or retrieve records.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

- b. Not less than five (5) business days prior to a due process hearing, each party will disclose to all other parties: evaluations completed by that date; recommendations based on those evaluations intended to be used at the hearings; copies of exhibits to be introduced; and a list of witnesses each party intends to call at the hearing.
- c. The hearing officer will provide notification as to the time and place of the due process hearing to the parent/adult student, district officials, and the SDE. The hearing shall be conducted at a time and place reasonably convenient to the parent/adult student.
- d. Parties shall cooperate with the hearing officer in any business or communication and the planning for a location, date and time for the hearing.

2. The Due Process Hearing

- a. The hearing officer will preside over and conduct the proceedings in a fair and impartial manner, permitting all parties an opportunity to present their information and opinions. Due process hearings shall be conducted pursuant to the *Idaho Rules of Administrative Procedure of the Attorney General* (IDAPA), IDEA requirements, and this Manual. In case of any conflict between IDAPA and the IDEA, the IDEA shall supersede. IDAPA rules shall supersede this Manual.
- b. A parent/adult student and district personnel may be accompanied and advised by legal counsel properly licensed in Idaho.
- c. A parent/adult student has the right to open the hearing to the public and to have the student who is the subject of the hearing present.
- d. Each party has the right to present evidence, to compel the attendance of witnesses and the production of documents, and to confront and cross examine witnesses.
- e. New issues (issues not in the original due process request) may not be raised at the hearing unless agreed to by the other party.
- f. Any party may prohibit the introduction of any evidence at the hearing that was disclosed less than five (5) business days before the hearing.
- g. During the hearing the district will provide reasonable accommodations as required by federal regulations. Disputes will be referred to the DRC for resolution.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

- h. An audio recording of the hearing will be made. The parent/adult student may formally request a written verbatim transcript. The parent/adult student may choose an electronic verbatim record instead. If transcribed, the district will pay the transcription costs, and a copy of the transcript will remain with the SDE.

3. Decision of the Hearing Officer

- a. The decision of the hearing officer will be based solely on presentations made at the due process hearing.
- b. The decision made by the hearing officer will be made on substantive grounds based on a determination of whether a student received FAPE.
  - 1) In matters alleging a procedural violation, a hearing officer may find that a student did not receive FAPE only if there is evidence that the procedural inadequacies:
    - i. impeded the student's right to FAPE;
    - ii. significantly impeded a parent's/adult student's opportunity to participate in the decision-making process; or
    - iii. caused a deprivation of educational benefit.
  - 2) If a hearing officer finds that there is a procedural deficiency that did not deny FAPE, he or she may order the district to comply with the procedural requirements.
- c. The hearing officer's decision will include findings of fact and conclusions of law. In addition, the decision shall include an order of relief, if appropriate.
- d. The hearing officer's written decision shall be mailed within forty-five (45) calendar days from the date both parties agreed in writing to waive the resolution meeting, or both parties agreed to go to mediation, or the date the district initiated the hearing. The hearing officer may grant an extension of the forty-five (45) day period upon the request of a party. The hearing officer shall issue a written decision in response to each request.
- e. The findings of fact and decision shall be sent to the parent/adult student at no cost. Copies will also be mailed to the district superintendent, the DRC, and representatives of the district.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

- f. A hearing officer's decision will be enforceable in state and federal court. It will be implemented not later than fourteen (14) calendar days from the date of issuance unless:
  - 1) the decision specifies a different implementation date; or
  - 2) either party appeals the decision by initiating civil action in state or federal district court within applicable appeal periods.
- g. Nothing in this section can be interpreted to prevent a parent/adult student from filing a separate due process hearing request on an issue separate from the request already filed. The SDE may consolidate multiple hearing requests involving the same IEP.
- h. Stay Put
  - 1) During the pendency of any due process hearing, the student shall remain, or "stay put," in his or her current educational placement unless the district and parent/adult student agree otherwise.
  - 2) The stay put placement continues during any subsequent appeals unless a hearing officer agrees with a parent/adult student that a change of placement is appropriate, in which case, the placement identified in the hearing officer's decision becomes the stay-put placement.
  - 3) If the dispute involves an application for initial admission to public school in Idaho, the student, with the written consent of his or her parent, shall be placed in the public school program until the proceedings are completed.
  - 4) "Stay put" does not apply when a student is transitioning from Part C (the Infant/Toddler Program) to Part B services in Idaho. Following the development of an IEP or an individual family service plan (IFSP), if an educational placement dispute arises involving a student transitioning from Part C to Part B, the student cannot "stay put" in Part C.
    - i. With written consent of the parent, the student shall be placed in the public school until completion of all the hearing proceedings.

- ii. If the parent does not give written consent, the student will not receive services until completion of the hearing proceedings.
- iii. If the student is eligible for special education and related services, and the parent consents, then the district shall provide those special education and related services which are not in dispute.

### Section 6. Expedited Due Process Hearings

#### A. Definition

An expedited due process hearing is defined as an administrative hearing to resolve disputes concerning discipline occurring within twenty (20) school days of the request, with a decision rendered within ten (10) school days of the hearing.

#### B. Filing an Expedited Hearing Request

Parties filing expedited due process hearing requests must include a complete and signed copy of the *Expedited Due Process Hearing Request Form* (located in Documents section of this chapter) or a signed document providing, in the same order, all of the general information, issue(s), and resolution(s) information required in the *Expedited Due Process Hearing Request Form*. Reasonable accommodations will be provided to individuals who need assistance in filing a written request.

1. A district may request an expedited hearing if the district believes maintaining the current placement or returning the student to the prior placement is substantially likely to result in injury to the student or others.
2. A parent/adult student may request an expedited hearing if:
  - a. he or she disagrees with a determination that the student's behavior was not a manifestation of the disability; or
  - b. he or she disagrees with the district's discipline decision, which resulted in a change of placement.

A parent/adult student or district filing an expedited due process hearing request must provide, in a confidential manner, the due process complaint and request for hearing to the other party. The request shall be mailed, faxed, or hand delivered (electronic copies are not accepted). The party filing an expedited due process hearing must be able to show proof of receipt of the expedited due process hearing request by the other party. Additionally, when the request is provided to the

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

non-requesting party, the party filing the request shall simultaneously send a written copy to the DRC by mail, fax, hand delivery, or scanned and attached to an email with a signature of the filing party. All applicable timelines for expedited due process hearing will start when the request has been received by the non-requesting party.

**C. The Expedited Hearing Process and Decision**

An expedited hearing will be conducted in a fair and impartial manner. Guidelines and proceedings will be the same as those in a regular due process hearing, except for the following changes:

1. The DRC will appoint a hearing officer within five (5) business days of a request.
2. A resolution session shall occur within seven (7) days of receiving a due process hearing request unless the parties agree in writing to waive the resolution session or go to mediation.
3. A due process hearing may proceed unless the matter has been resolved to the satisfaction of both parties within fifteen (15) days of the receipt of the expedited due process hearing request.
4. There is no process for challenging the sufficiency of the due process hearing request in an expedited case.
5. Any party may prohibit the introduction of any evidence at the hearing that was not disclosed at least five (5) business days before the hearing.
6. The hearing shall occur within twenty (20) school days of the request, with a decision rendered within ten (10) school days of the hearing and no extensions may be granted by the hearing officer.
7. A written decision will be mailed to both parties by the Dispute Resolution office.
8. A party may appeal the decision in an expedited due process hearing in the same way as allowed for decisions in other original due process hearings.

**D. Placement During an Expedited Hearing**

When a hearing has been requested by either the parent/adult student or the district regarding placement decisions, the student shall “stay put” during the pendency of the hearing. In relation to disciplinary proceedings, stay put means:

1. the student will remain in the IAES until the timeline for the disciplinary action expires or the hearing officer renders a decision, whichever occurs first; and/or
2. upon expiration of the IAES placement, the student will be placed in the setting he or she was in prior to the IAES. However, if district personnel maintain that it is dangerous for the student to return to that placement, the district may request an expedited hearing to continue the IAES for up to an additional forty-five (45) school days. This procedure may be repeated as necessary.

If the hearing officer findings are in favor of the parent/adult student, the change of placement cannot occur. The IEP team will need to determine the extent of services appropriate to meet the student's individual needs, as well as address the student's behavior. If the hearing officer finds for the district, the district may use the same disciplinary procedures, including expulsion, available for any other student, except that FAPE must be provided according to the requirements in Chapter 12, Section 3.

If an educational placement dispute arises involving a child transitioning from Part C to Part B, the child cannot remain in Part C services when he or she is over the age of three (3). If the child is found eligible for special education and related services under Part B and the parent consents to the initial provision of special education and related services, then the school district shall provide those special education and related services that are not in dispute between the parent and district until completion of all the hearing proceedings. If the parent does not give written consent for the special education or related services, the student will not receive services until completion of the hearing proceedings.

#### **Section 7. Appeals and Civil Action**

An appeal to state court shall be filed within twenty-eight (28) days from the date of issuance of the hearing officer's decision; an appeal to federal district court shall be filed within forty-two (42) calendar days from the date of issuance of the hearing officer's decision.

A party must exhaust administrative remedies before initiating a civil action under IDEA unless otherwise determined by the court. However, nothing in the IDEA restricts or limits the rights, procedures, and remedies available under the U.S. Constitution, the Americans with Disabilities Act, Section 504 of the Rehabilitation Act, or other federal laws protecting the rights of children with disabilities.

#### **Section 8. Attorney Fees**

A district court will have jurisdiction in the awarding, determination, or prohibition of attorney fees. The court may:

1. award reasonable attorney fees as part of the costs to the prevailing party; and

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

2. determine the amount of attorney fees, using prevailing rates in the community in which the action occurred, for the kind and quality of services provided. No bonus or multiplier may be used in calculating the amount of fees awarded.

Funds under Part B of the IDEA cannot be used by the district to pay any attorney fees or costs of a party related to an action or proceeding, such as deposition, expert witnesses, settlements, and other related costs. However, Part B funds may be used to pay hearing officer fees or the costs of a meeting room to conduct the hearing.

**A. Prohibition of Attorney Fees**

1. Attorney fees may not be awarded:
  - a. for legal representation at an IEP meeting, including a resolution session, unless such a meeting is convened as a result of a due process hearing or a judicial action; or
  - b. for mediation that is conducted prior to a request for a due process hearing.
2. Attorney fees may not be awarded and related costs may not be reimbursed in any action or proceeding for services performed subsequent to the time of a written offer of settlement to a parent/adult student if:
  - a. the district makes an offer at least ten (10) calendar days before a due process hearing or a civil proceeding begins;
  - b. the offer is not accepted by the parent/adult student within ten (10) calendar days after it is made; and
  - c. a court or due process hearing officer finds that the relief obtained by the parent/adult student is not more favorable to the parent/adult student than the offer of settlement.

**B. Exception to the Prohibition of Attorney Fees**

An award of attorney fees and related costs may be made to a parent/adult student who is a prevailing party and who was substantially justified in rejecting the district's settlement offer.

**C. Reduction in the Amount of Attorney Fees**

A court may reduce an award for attorney fees under any of the following circumstances:

1. during the course of the action or proceeding, the parent/adult student or his or her attorney unreasonably extended the final resolution;
2. the amount of the award unreasonably exceeds the prevailing rate in the community for similar services by attorneys of reasonably comparable skills, reputation, and experience;
3. the time spent and legal services rendered were excessive considering the nature of the action;
4. the attorney representing the parent/adult student did not provide the information required in a due process hearing request; and/or
5. a party represented him or herself, or his or her child.

**D. Exception to the Reduction of Attorney Fees**

The amount of attorney fees will not be reduced if the court finds that the district or SDE unreasonably extended the final resolution of the action or proceeding.

**E. Special Provisions Regarding Attorney Fees**

1. A district or SDE that prevails may seek attorney fees from a court against the parent's/adult student's attorney if the action is deemed frivolous, unreasonable, without foundation or prolongs the litigation.
2. A district or SDE that prevails may seek attorney fees from a court against the parent's/adult student's attorney or the parent/adult student if the hearing request was presented for improper purposes such as to harass the district, cause unnecessary delay or needlessly increase the cost of litigation.

**NOTIFICATION OF MEDIATION CONFIDENTIALITY**

Mediation is a voluntary, no cost, confidential service provided by the State Department of Education (SDE). Maintaining confidentiality is critical to the integrity of the process. Confidentiality encourages free, open communication toward a collaborative settlement.

IDEA requires that all discussions that occur during a mediation will remain confidential and will not be used as evidence in any subsequent due process hearing or civil proceeding [34 CFR 300.506 (b)(8)]. All parties in the mediation will receive a copy of this Notification of Confidentiality.

1. The mediator or any prior approved SDE observer cannot be called as a witness or be deposed in any subsequent due process hearing or civil proceeding;
2. In order to maintain the confidentiality of the process, the mediator will collect personal notes of the participants to be destroyed at the conclusion of the mediation session;
3. No recording of the mediation session will be made;
4. The only record retained of the mediation will be the written mediation agreement if one results and this notification of confidentiality. If parties come to an agreement, a copy of the written agreement will be given to both parties and filed with the SDE by the mediator. If for any reason the mediation fails to produce a written agreement, the mediator will inform the SDE that no agreement was reached. However, the mediator will not make any other report to the SDE;
5. The mediator is responsible for collecting and retaining the acknowledgment of mediation and the signed written agreement if one results.
6. The confidentiality of the mediation continues even if an agreement is not reached.

**STATE DEPARTMENT OF EDUCATION**

**SUBJECT**

Proposed Rule – Docket No. 08-0203-1705, Rules Governing Thoroughness, Incorporated by Reference – Idaho Content Standards

**REFERENCE**

August 2008	Board approved updated Content Standards in Driver Education.
April 2009	Board approved updated Content Standards in Science.
April 2010	Board adopted revised Content Standards in Information and Communication Technology.
August 2015	Board approved updated Science standards (rejected by legislature).
December 2016	Board approved updated Science Content Standards (partially rejected by legislature)

**APPLICABLE STATUTE, RULE, OR POLICY**

Idaho State Board of Education, Organization Specific Policies & Procedures, Section IV.B.9  
Section 33-1612, Idaho Code  
IDAPA 08.02.03.004.01, Rules Governing Thoroughness – The Idaho Content Standards

**BACKGROUND/DISCUSSION**

The Idaho Content Standards reflect statements of what students should know and do in various content disciplines and grades. Content standards are adopted statewide and reviewed every six (6) years by teams of educators and stakeholders for possible revision. These standards provide a consistent foundational level of academic expectation at each grade level in a number of content areas across Idaho's public schools. Proposed rule Docket No. 08-0203-1705 provides for the amendment of the Idaho Content Standards for Science, Driver Education, and Information and Communication Technology. While the review cycle applies to the Idaho Content Standards for Driver Education and Information and Communication Technology, the Idaho Content Standards for Science have been in review and revision since 2015.

The Idaho Legislature rejected the Idaho Content Standards for Science in Spring 2016, citing the need for additional public input. The State Department of Education (Department) began negotiated rulemaking in April 2016, which included solicitation of public comment online and through state-wide, face-to-face meetings and meetings of the science standards working committee. The resulting science standards included substantial revisions of structure and organization, including eliminating correlations to Idaho Content Standards in Mathematics and

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

---

English Language Arts and Literacy, as well as other correlations to engineering practices. In addition, the committee made revisions to the standards to accommodate and address concerns of stakeholders and legislators regarding how ideas describing impacts on the earth and age of the earth are expressed.

The revised science standards were presented to the 2017 Legislature as a temporary rule, and the standards were approved with the exception of five (5) paragraphs dealing with human impacts on the environment. The Department was asked to gather additional public comment and consider revisions to the five (5) paragraphs that address both positive and negative impacts.

The Department published a Notice of Intent to Promulgate Rules in the April 5, 2017, edition of the Administrative Bulletin to initiate negotiated rulemaking. Six (6) public meetings were held across the state between April 11 and 20, 2017, and an online comment form was posted to the Department's website. Approximately 65 verbal comments were received during the public meetings, all regarding science standards. Of the approximately 950 written comments received by mail, email, and through the SDE's online comment form, all but a few specifically addressed the science standards. The vast majority of the science content standards comments spoke in favor of retaining the language in the five (5) removed paragraphs with little or no change. Two (2) written comments were received for driver education content standards.

The science standards working committee reconvened on May 12, 2017, and made revisions to the science standards addressing discussion of problems of human impacts and potential methods for mitigation.

**IMPACT**

These changes to the Idaho Content Standards for Driver Education, Information and Communication Technology, and Science will have no discernible financial impact other than the cyclical and expected nature of adopting new curriculum when any content standards undergo significant change.

While changes in Driver Education and Information and Communication Technology are relatively minor, the shift in Science is significant as it focuses on students demonstrating deep knowledge of scientific principles and processes by engaging directly in 'doing' science. This emphasis on performance and learning by doing is a paradigm shift with direct implications for growing a scientifically literate citizenry and workforce. It also reflects the deep interest and profound concern in raising the bar in science education indicated by several years of public and legislative input. The revised standards as a foundation of an integrated educational system are the first step in a necessary and synchronous series of ongoing efforts involving professional learning for educators centered on supporting instructional shifts, curricular material review, and development of high cognitive demand, valid, and reliable assessments deeply aligned to the standards.

Attachment 6 – Information and Communication Technology Content Standards Crosswalk	Page 161

**STAFF COMMENTS AND RECOMMENDATIONS**

Idaho’s science content standards were last updated in 2009. During the 2015 rulemaking cycle new science standards were adopted by the Board and incorporated by reference into Administrative Code. When the rules and incorporated science standards were presented during the 2016 legislative session Senate and House Education Committee members expressed concern that the public may not have had enough opportunity to provide feedback on the new standards. The rule was rejected, and it was requested that it be brought back again for consideration in 2017. The standards were rejected by the Legislature to provide for additional comment and vetting. At the December 2016 Board meeting the Department brought forward a temporary rule incorporating amended science content standards into administrative rule for the Board’s consideration. The temporary rule was approved by the Board and forwarded to the 2017 Legislature for consideration and extension to allow for the negotiated rulemaking process to be conducted during the next year. The 2017 Legislature granted the extension to the majority of the rule and rejected sections that were considered to provide a partial view of human impact on the environment. The Legislature requested that when the rule was brought back in 2018 that sections regarding the human impact on the environment take into effect both negative and positive aspects, rather than only negative.

The temporary rule extended by the 2017 Legislature will expire at the end of the 2018 legislative session. The proposed rule is needed as part of the rulemaking process for establishing a “permanent” rule. Once approved by the Board, proposed rules are published in the Administrative Bulletin. Publication of the proposed rule starts the 21-day public comment period. At the close of the public comment period, based on comments received and Board direction, changes may be made to proposed rules prior to entering the pending stage. All pending rules are brought back to the board for approval prior to re-submittal to the Department of Administration for publication as a pending (or final rule) in the Idaho Administrative Bulletin. The Department of Administration then forwards all pending rules to the legislature for consideration during the next legislative session. Pending rules go into effect at the end of the session in which they are reviewed, if they are not rejected by the legislature. The legislature may reject a rule in whole or in part.

CHAPTER 03**

**08.02.03 - RULES GOVERNING THOROUGHNESS**

**000. LEGAL AUTHORITY.**

All rules in this Thoroughness chapter (IDAPA 08.02.03) are promulgated pursuant to the authority of the State Board of Education under Article IX, Section 2 of the Idaho Constitution and under sections 33-116, 33-118, and 33-1612, Idaho Code. Specific statutory references for particular rules are also noted as additional authority where appropriate.  
(4-5-00)

**001. TITLE AND SCOPE.**

**01. Title.** These rules shall be known as IDAPA 08.02.03 “Rules Governing Thoroughness.” (4-5-00)

**02. Scope.** These rules shall govern the thorough education of all public school students in Idaho.  
(4-5-00)

**002. WRITTEN INTERPRETATIONS.**

Any written interpretations are on file at the office of the State Board of Education at 650 West State Street, Boise, Idaho 83702.  
(3-15-02)

**003. ADMINISTRATIVE APPEALS.**

Unless otherwise provided for in the Rules of the State Board of Education or in the State Board of Education Governing Policies and Procedures, all administrative appeals allowed by law shall be conducted pursuant to the Idaho Administrative Procedure Act and IDAPA 04.11.01, “Idaho Rules of Administrative Procedure of the Attorney General.”  
(4-5-00)

**004. INCORPORATION BY REFERENCE.**

The following documents are incorporated into this rule: (3-30-07)

**01. The Idaho Content Standards.** The Idaho Content Standards as adopted by the State Board of Education. Individual subject content standards are adopted in various years in relation to the curricular materials adoption schedule. Copies of the document can be found on the State Board of Education website at [www.boardofed.idaho.gov](http://www.boardofed.idaho.gov). (3-29-10)

**a.** Arts and Humanities Categories: (3-24-17)

i. Dance, as revised and adopted on August 11, 2016; (3-24-17)

ii. Interdisciplinary Humanities, as revised and adopted on August 11, 2016; (3-24-17)

iii. Media Arts, as adopted on August 11, 2016. (3-24-17)

iv. Music, as revised and adopted on August 11, 2016; (3-24-17)

v. Theater, as revised and adopted on August 11, 2016; (3-24-17)

vi. Visual Arts, as revised and adopted on August 11, 2016; (3-24-17)

vii. World languages, as revised and adopted on August 11, 2016. (3-24-17)

**b.** Computer Science, adopted on November 28, 2016. (3-24-17)

**STATE DEPARTMENT OF EDUCATION**  
**AUGUST 10, 2017**

---

- c. Driver Education, as revised and adopted on August ~~21, 2008~~10, 2017. (3-29-10)
  - d. English Language Arts/Literacy, as revised and adopted on November 28, 2016. (3-24-17)
  - e. Health, as revised and adopted on August 11, 2016. (3-24-17)
  - f. Information and Communication Technology, as revised and adopted on ~~April 22, 2010~~August 10, 2017. (~~4-7-11~~)
  - g. Limited English Proficiency, as revised and adopted on August 21, 2008. (3-29-10)
  - h. Mathematics, as revised and adopted on August 11, 2016. (3-24-17)
  - i. Physical Education, as revised and adopted on August 11, 2016. (3-24-17)
  - j. Science, as revised and adopted on ~~December 15, 2016~~August 10, 2017. (~~12-15-16~~)T
  - k. Social Studies, as revised and adopted on November 28, 2016. (3-24-17)
  - l. Career Technical Education Categories: (3-29-17)
    - i. Agricultural and Natural Resources, as adopted on June 16, 2016. (3-29-17)
    - ii. Business and Marketing Education, as adopted on June 16, 2016. (3-29-17)
    - iii. Engineering and Technology Education, as adopted on June 16, 2016. (3-29-17)
    - iv. Family and Consumer Sciences, as adopted on June 16, 2016. (3-29-17)
    - v. Skilled and Technical Sciences, as adopted on June 16, 2016. (3-29-17)
    - vi. Workplace Readiness, as adopted on June 16, 2016. (3-29-17)
- 02. The English Language Development (ELD) Standards.** The World-Class Instructional Design and Assessment (WIDA) 2012 English Language Development (ELD) Standards as adopted by the State Board of Education on August 16, 2012. Copies of the document can be found on the WIDA website at [www.wida.us/standards/eld.aspx](http://www.wida.us/standards/eld.aspx). (4-4-13)
- 03. The Limited English Proficiency Program Annual Measurable Achievement Objectives (AMAOs) and Accountability Procedures.** The Limited English Proficiency Program Annual Measurable Achievement Objectives and Accountability Procedures as adopted by the State Board of Education on November 11, 2009. Copies of the document can be found on the State Department of Education website at [www.sde.idaho.gov](http://www.sde.idaho.gov). (4-7-11)
- 04. The Idaho English Language Proficiency Assessment (ELPA) Achievement Standards.** The Idaho English Language Proficiency Assessment (ELPA) Achievement Standards as adopted by the State Board of Education on April 20, 2017. Copies of the document can be found on the State Board of Education website at [www.boardofed.idaho.gov](http://www.boardofed.idaho.gov). (4-20-17)T
- 05. The Idaho Standards Achievement Tests (ISAT) Achievement Level Descriptors.** Achievement Level Descriptors as adopted by the State Board of Education on April 14, 2016. Copies of the document can be found on the State Board of Education website at [www.boardofed.idaho.gov](http://www.boardofed.idaho.gov). (3-29-17)
- 06. The Idaho Extended Content Standards.** The Idaho Extended Content Standards as adopted by the State Board of Education on April 17, 2008. Copies of the document can be found at the State Board of Education

IDAHO CONTENT STANDARDS

KINDERGARTEN

SCIENCE

Standard 1: Nature of Science

~~Students explore the process of scientific investigation through observations and collection of data over time. Students follow instructions and work with others.~~

~~Goal 1.1: Understand Systems, Order, and Organization~~

~~No objectives at this grade level.~~

~~Goal 1.2: Understand Concepts and Processes of Evidence, Models, and Explanations~~

~~Objective(s): By the end of Kindergarten, the student will be able to:~~

~~K.S.1.2.1— Make observations and collect data. (528.01.a)~~

~~Goal 1.3: Understand Constancy, Change, and Measurement~~

~~Objective(s): By the end of Kindergarten, the student will be able to:~~

~~K.S.1.3.1— Measure in non standard units. (528.02.b)~~

~~Goal 1.4: Understand the Theory that Evolution is a Process that Relates to the Gradual Changes in the Universe and of Equilibrium as a Physical State~~

~~Objective(s): By the end of Kindergarten, the student will be able to:~~

~~K.S.1.4.1— Apply the concepts of yesterday, today, and tomorrow. (528.03.a)~~

~~Goal 1.5: Understand Concepts of Form and Function~~

~~No objectives at this grade level.~~

~~Goal 1.6: Understand Scientific Inquiry and Develop Critical Thinking Skills~~

~~Objective(s): By the end of Kindergarten, the student will be able to:~~

~~K.S.1.6.1— Make observations. (529.01.a)~~

~~Goal 1.7: Understand That Interpersonal Relationships Are Important in Scientific Endeavors~~

~~Objective(s): By the end of Kindergarten, the student will be able to:~~

~~K.S.1.7.1— Use cooperation and interaction skills. (538.01.a)~~

~~Goal 1.8: Understand Technical Communication~~

~~Objective(s): By the end of Kindergarten, the student will be able to:~~

~~K.S.1.8.1— Follow instructions. (538.02.a)~~

Standard 2: Physical Science

~~Students use their senses to investigate the organizational patterns in the world around them and describe a variety of objects.~~

~~Goal 2.1: Understand the Structure and Function of Matter and Molecules and Their Interactions~~

~~Objective(s): By the end of Kindergarten, the student will be able to:~~

~~K.S.2.1.1—Use senses to describe matter. (530.01.a)~~

~~Goal 2.2: Understand Concepts of Motion and Forces~~

~~No objectives at this grade level.~~

~~Goal 2.3: Understand the Total Energy in the Universe is Constant~~

~~No objectives at this grade level.~~

~~Goal 2.4: Understand the Structure of Atoms~~

~~No objectives at this grade level.~~

~~Goal 2.5: Understand Chemical Reactions~~

~~No objectives at this grade level.~~

Standard 3: Biology

~~Students observe plants and animals and describe their characteristics.~~

~~Goal 3.1: Understand the Theory of Biological Evolution~~

~~Objective(s): By the end of Kindergarten, the student will be able to:~~

~~K.S.3.1.1—Observe and describe the characteristics of plants and animals. (532.01.a)~~

~~Goal 3.2: Understand the Relationship between Matter and Energy in Living Systems~~

~~Objective(s): By the end of Kindergarten, the student will be able to:~~

~~K.S.3.2.1—Describe the difference between living and non-living things. (533.01.a)~~

~~Goal 3.3: Understand the Cell is the Basis of Form and Function for All Living Things~~

~~No objectives at this grade level.~~

Standard 4: Earth and Space Systems

~~Students make and describe observations of seasonal changes.~~

~~Goal 4.1: Understand Scientific Theories of Origin and Subsequent Changes in the Universe and Earth Systems~~

~~Objective(s): By the end of Kindergarten, the student will be able to:~~

~~K.S.4.1.1—Name the four seasons. (534.01.a)~~

~~K.S.4.1.2—Place the four seasons in order. (534.01.a)~~

~~Goal 4.2: Understand Geo-chemical Cycles and Energy in the Earth System~~

~~No objectives at this grade level.~~

~~Standard 5: Personal and Social Perspectives; Technology~~

~~Students describe local environments~~

~~Goal 5.1: Understand Common Environmental Quality Issues, Both Natural and Human Induced~~

~~Objective(s): By the end of Kindergarten, the student will be able to:~~

~~K.S.5.1.1— Describe characteristics of a man-made environment (home, school...). (536.01.a)~~

~~Goal 5.2: Understand the Relationship between Science and Technology~~

~~No objectives at this grade level.~~

~~Goal 5.3: Understand the Importance of Natural Resources and the Need to Manage and Conserve Them~~

~~No objectives at this grade level.~~

---

**Standard 1: Nature of Science**

~~Students explore the process of scientific investigation through observations and data collection, using standard and non-standard units of measurement. Students follow multi-step instructions and work with others.~~

**~~Goal 1.1: Understand Systems, Order, and Organization~~**

~~No objectives at this grade level.~~

**~~Goal 1.2: Understand Concepts and Processes of Evidence, Models, and Explanations~~**

**~~Objective(s): By the end of Grade 1, the student will be able to:~~**

~~1.S.1.2.1—Make observations, collect data, and use data. (543.01.a)~~

**~~Goal 1.3: Understand Constancy, Change, and Measurement~~**

**~~Objective(s): By the end of Grade 1, the student will be able to:~~**

~~1.S.1.3.1—Measure in both standard and non-standard units. (543.02.b)~~

**~~Goal 1.4: Understand the Theory that Evolution is a Process that Relates to the Gradual Changes in the Universe and of Equilibrium as a Physical State~~**

**~~Objective(s): By the end of Grade 1, the student will be able to:~~**

~~1.S.1.4.1—Explain the concepts of past, present, and future. (543.03.a)~~

**~~Goal 1.5: Understand Concepts of Form and Function~~**

~~No objectives at this grade level.~~

**~~Goal 1.6: Understand Scientific Inquiry and Develop Critical Thinking Skills~~**

**~~Objective(s): By the end of Grade 1, the student will be able to:~~**

~~1.S.1.6.1—Make and record observations. (544.01.a)~~

**~~Goal 1.7: Understand That Interpersonal Relationships Are Important in Scientific Endeavors~~**

**~~Objective(s): By the end of Grade 1, the student will be able to:~~**

~~1.S.1.7.1—Demonstrate cooperation and interaction skills. (553.01.a)~~

**~~Goal 1.8: Understand Technical Communication~~**

**~~Objective(s): By the end of Grade 1, the student will be able to:~~**

~~1.S.1.8.1—Follow multi-step instructions. (553.02.a)~~

**Standard 2: Physical Science**

~~Students describe properties of common objects and how movement is a change of position.~~

**~~Goal 2.1: Understand the Structure and Function of Matter and Molecules and Their Interactions~~**

**Objective(s): By the end of Grade 1, the student will be able to:**

~~1.S.2.1.1—Describe properties of objects. (545.01.a)~~

**Goal 2.2: Understand Concepts of Motion and Forces**

**Objective(s): By the end of Grade 1, the student will be able to:**

~~1.S.2.2.1—Describe the position and motion of objects. (ex. revolve, rotate, at rest, float, and fall) (545.02.a)~~

**Goal 2.3: Understand the Total Energy in the Universe is Constant**

~~No objectives at this grade level.~~

**Goal 2.4: Understand the Structure of Atoms**

~~No objectives at this grade level.~~

**Goal 2.5: Understand Chemical Reactions**

~~No objectives at this grade level.~~

**Standard 3: Biology**

~~Students describe the life cycles of living things and how they survive in their environment.~~

**Goal 3.1: Understand the Theory of Biological Evolution**

**Objective(s): By the end of Grade 1, the student will be able to:**

~~1.S.3.1.1—Describe the life cycle of a plant (seed, growth, reproduction, death). (547.01.a)~~

~~1.S.3.1.2—Describe the life cycle of an animal (birth, development, reproduction, death). (547.01.a)~~

**Goal 3.2: Understand the Relationship between Matter and Energy in Living Systems**

**Objective(s): By the end of Grade 1, the student will be able to:**

~~1.S.3.2.1—State that living things need food to survive. (548.01.a)~~

**Goal 3.3: Understand the Cell is the Basis of Form and Function for All Living Things**

~~No objectives at this grade level.~~

**Standard 4: Earth and Space Systems**

~~Students describe characteristics for each season and the cycle of the seasons.~~

**Goal 4.1: Understand Scientific Theories of Origin and Subsequent Changes in the Universe and Earth Systems**

**Objective(s): By the end of Grade 1, the student will be able to:**

~~1.S.4.1.1—Identify the four seasons and their characteristics for a local region. (549.01.a)~~

**Goal 4.2: Understand Geo-chemical Cycles and Energy in the Earth System**

~~No objectives at this grade level.~~

~~**Standard 5: Personal and Social Perspectives; Technology**~~

~~Students describe characteristics of the local environment.~~

~~**Goal 5.1: Understand Common Environmental Quality Issues, Both Natural and Human Induced**~~

~~**Objective(s): By the end of Grade 1, the student will be able to:**~~

~~1.S.5.1.1—Identify the characteristics of local natural environments. (playground, backyard). (551.01.a)~~

~~**Goal 5.2: Understand the Relationship between Science and Technology**~~

~~No objectives at this grade level.~~

~~**Goal 5.3: Understand the Importance of Natural Resources and the Need to Manage and Conserve Them**~~

~~No objectives at this grade level.~~

---

~~Students are expected to know content and apply skills from previous grades.~~

~~**Standard 1: Nature of Science**~~

~~Students identify questions that can be answered through observation, collection, recording, and analysis of data. Students explain that the shape of an item is determined by its function. Students follow multi-step instructions, work cooperatively and use communication skills.~~

~~**Goal 1.1: Understand Systems, Order, and Organization**~~

~~No objectives at this grade level.~~

~~**Goal 1.2: Understand Concepts and Processes of Evidence, Models, and Explanations**~~

~~**Objective(s): By the end of Grade 2, the student will be able to:**~~

~~2.S.1.2.1—Make observations, record and interpret data. (558.01.a)~~

~~**Goal 1.3: Understand Constancy, Change, and Measurement**~~

~~**Objective(s): By the end of Grade 2, the student will be able to:**~~

~~2.S.1.3.1—Measure in standard and non-standard units. (558.01.b)~~

~~**Goal 1.4: Understand the Theory that Evolution is a Process that Relates to the Gradual Changes in the Universe and of Equilibrium as a Physical State**~~

~~**Objective(s): By the end of Grade 2, the student will be able to:**~~

~~2.S.1.4.1—Apply the concepts of past, present, and future. (558.03.a)~~

~~**Goal 1.5: Understand Concepts of Form and Function**~~

~~**Objective(s): By the end of Grade 2, the student will be able to:**~~

~~2.S.1.5.1—Identify shape and use of objects. (558.04.a)~~

~~**Goal 1.6: Understand Scientific Inquiry and Develop Critical Thinking Skills**~~

~~**Objective(s): By the end of Grade 2, the student will be able to:**~~

~~2.S.1.6.1—Identify questions to be investigated. (559.01.a)~~

~~2.S.1.6.2—Make observations. (559.01.b)~~

~~2.S.1.6.3—Analyze information and evidence. (559.01.d)~~

~~2.S.1.6.4—Communicate observations. (559.01.f)~~

~~**Goal 1.7: Understand That Interpersonal Relationships Are Important in Scientific Endeavors**~~

~~**Objective(s): By the end of Grade 2, the student will be able to:**~~

~~2.S.1.7.1—Practice cooperation and interaction skills. (568.01.a)~~

**Goal 1.8: Understand Technical Communication**

**Objective(s): By the end of Grade 2, the student will be able to:**

2.S.1.8.1—Follow multi-step instructions. (568.02.a)

**Standard 2: Physical Science**

~~Students describe objects by their properties and explain the affect motion has on an object.~~

**Goal 2.1: Understand the Structure and Function of Matter and Molecules and Their Interactions**

**Objective(s): By the end of Grade 2, the student will be able to:**

2.S.2.1.1—List properties of an object. (560.01.a)

**Goal 2.2: Understand Concepts of Motion and Forces**

**Objective(s): By the end of Grade 2, the student will be able to:**

2.S.2.2.1—Explain how force affects the position and motion of objects. (560.01.a)

**Goal 2.3: Understand the Total Energy in the Universe is Constant**

~~No objectives at this grade level.~~

**Goal 2.4: Understand the Structure of Atoms**

~~No objectives at this grade level.~~

**Goal 2.5: Understand Chemical Reactions**

~~No objectives at this grade level.~~

**Standard 3: Biology**

~~Students list the basic needs of animals.~~

**Goal 3.1: Understand the Theory of Biological Evolution**

~~No objectives at this grade level.~~

~~**Goal 3.2: Understand the Relationship between Matter and Energy in Living Systems**~~

**Objective(s): By the end of Grade 2, the student will be able to:**

2.S.3.2.1—Identify four basic needs of all living things (food, shelter, water, space). (563.01.a)

2.S.3.2.2—Discuss how animals are suited to live in different habitats. (547.01.b)

~~**Goal 3.3: Understand the Cell is the Basis of Form and Function for All Living Things**~~

~~No objectives at this grade level.~~

**Standard 4: Earth and Space Systems**

~~Students describe weather conditions.~~

~~Goal 4.1: Understand Scientific Theories of Origin and Subsequent Changes in the Universe and Earth Systems~~

~~Objective(s): By the end of Grade 2, the student will be able to:~~

~~2.S.4.1.1—Describe the characteristics of different weather conditions. (564.01.b)~~

~~Goal 4.2: Understand Geo-chemical Cycles and Energy in the Earth System~~

~~No objectives at this grade level.~~

~~Standard 5: Personal and Social Perspectives; Technology~~

~~Students compare man-made and natural environments. Students identify scientific tools.~~

~~Goal 5.1: Understand Common Environmental Quality Issues, Both Natural and Human Induced~~

~~Objective(s): By the end of Grade 2, the student will be able to:~~

~~2.S.5.1.1—Compare and contrast man-made and natural environments. (566.01.a)~~

~~Goal 5.2: Understand the Relationship between Science and Technology~~

~~Objective(s): By the end of Grade 2, the student will be able to:~~

~~2.S.5.2.1—Identify tools people have invented for everyday life and for scientific investigations. (565.01.b)~~

~~Goal 5.3: Understand the Importance of Natural Resources and the Need to Manage and Conserve Them~~

~~No objectives at this grade level.~~

---

~~Students are expected to know content and apply skills from previous grades.~~

~~**Standard 1: Nature of Science**~~

~~Students apply scientific methods to conduct experiments. Students read and give multi-step instructions.~~

~~**Goal 1.1: Understand Systems, Order, and Organization**~~

~~**Objective(s): By the end of Grade 3, the student will be able to:**~~

~~3.S.1.1.1—Label the parts of a system. (573.01.a)~~

~~**Goal 1.2: Understand Concepts and Processes of Evidence, Models, and Explanations**~~

~~**Objective(s): By the end of Grade 3, the student will be able to:**~~

~~3.S.1.2.1—Make observations, collect data and evaluate it. (573.02.a)~~

~~3.S.1.2.2—Replicate and/or use models. (573.02.b)~~

~~**Goal 1.3: Understand Constancy, Change, and Measurement**~~

~~**Objective(s): By the end of Grade 3, the student will be able to:**~~

~~3.S.1.3.1—Measure changes that occur. (573.03.b)~~

~~3.S.1.3.2—Measure in both U.S. Customary and International System of Measurement (metric system) units. (573.03.c)~~

~~**Goal 1.4: Understand the Theory that Evolution is a Process that Relates to the Gradual Changes in the Universe and of Equilibrium as a Physical State**~~

~~No objectives at this grade level.~~

~~**Goal 1.5: Understand Concepts of Form and Function**~~

~~**Objective(s): By the end of Grade 3, the student will be able to:**~~

~~3.S.1.5.1—Describe the relationship between shape and use. (573.05.a)~~

~~**Goal 1.6: Understand Scientific Inquiry and Develop Critical Thinking Skills**~~

~~**Objective(s): By the end of Grade 3, the student will be able to:**~~

~~3.S.1.6.1—Identify questions that can be answered by conducting scientific tests. (574.01.a)~~

~~3.S.1.6.2—Conduct scientific tests (574.01.b)~~

~~3.S.1.6.3—Use appropriate tools and techniques to gather and display data. (574.01.c)~~

~~3.S.1.6.4—Use data to construct a reasonable explanation. (574.01.d)~~

~~3.S.1.6.5—Make simple predictions based on data. (574.01.e)~~

~~3.S.1.6.6—Identify logical alternative explanations. (574.01.f)~~

~~3.S.1.6.7—Communicate the results of tests to others. (574.01.g)~~

~~**Goal 1.7: Understand That Interpersonal Relationships Are Important in Scientific Endeavors**~~

~~No objectives at this grade level.~~

**Goal 1.8: Understand Technical Communication**

**Objective(s): By the end of Grade 3, the student will be able to:**

- 3.S.1.8.1—Read and give multi-step instructions. (583.02.a)

**Standard 2: Physical Science**

Students use scientific instruments to describe the physical properties of the three states of matter.

**Goal 2.1: Understand the Structure and Function of Matter and Molecules and Their Interactions**

**Objective(s): By the end of Grade 3, the student will be able to:**

- 3.S.2.1.1—Use instruments to measure properties. (575.01.a)
- 3.S.2.1.2—Identify the physical properties of solids, liquids, and gases. (575.01.b)
- 3.S.2.1.3—Explain that heating and cooling can cause changes of state in common materials. (575.01.e)

**Goal 2.2: Understand Concepts of Motion and Forces**

No objectives at this grade level.

**Goal 2.3: Understand the Total Energy in the Universe is Constant**

- 3.S.2.3.1—Identify potential and kinetic energy. (590.03.a)

**Goal 2.4: Understand the Structure of Atoms**

No objectives at this grade level.

**Goal 2.5: Understand Chemical Reactions**

No objectives at this grade level.

**Standard 3: Biology**

Students explore the diversity of plants and animals in their environments. Students demonstrate an understanding of food webs.

**Goal 3.1: Understand the Theory of Biological Evolution**

**Objective(s): By the end of Grade 3, the student will be able to:**

- 3.S.3.1.1—Describe the adaptations of plants and animals to their environment. (577.01.a)

**Goal 3.2: Understand the Relationship between Matter and Energy in Living Systems**

**Objective(s): By the end of Grade 3, the student will be able to:**

- 3.S.3.2.1—Describe the energy needed for living systems to survive. (578.01.a)
- 3.S.3.2.2—Compare and contrast the energy requirements of plants and animals. (593.01.a)
- 3.S.3.2.3—Label a food chain that shows how organisms cooperate and compete in an ecosystem. (578.01.b)
- 3.S.3.2.4—Diagram the food web and explain how organisms both cooperate and compete in ecosystems. (593.01.b)

**Goal 3.3: Understand the Cell is the Basis of Form and Function for All Living Things**

~~No objectives at this grade level.~~

**Standard 4: Earth and Space Systems**

~~Students explore the relationship between the sun and Earth.~~

**Goal 4.1: Understand Scientific Theories of Origin and Subsequent Changes in the Universe and Earth Systems**

**Objective(s): By the end of Grade 3, the student will be able to:**

~~3.S.4.1.1— Explain the reasons for length of a day, the seasons, and the year on Earth. (594.01.a)~~

**Goal 4.2: Understand Geo-chemical Cycles and Energy in the Earth System**

~~No objectives at this grade level.~~

**Standard 5: Personal and Social Perspectives; Technology**

~~Students identify local environmental issues. Students identify the relationship of tools to scientific investigation.~~

**Goal 5.1: Understand Common Environmental Quality Issues, Both Natural and Human Induced**

**Objective(s): By the end of Grade 3, the student will be able to:**

~~3.S.5.1.1— Identify local environmental issues. (581.01.a)~~

**Goal 5.2: Understand the Relationship between Science and Technology**

**Objective(s): By the end of Grade 3, the student will be able to:**

~~3.S.5.2.1— Describe how technology helps develop tools. (580.01.a)~~

~~3.S.5.2.2— Describe the development of tools over time. (580.01.b)~~

**Goal 5.3: Understand the Importance of Natural Resources and the Need to Manage and Conserve Them**

**Objective(s): By the end of Grade 3, the student will be able to:**

~~3.S.5.3.1— Explain the concept of recycling. (581.03.a)~~

---

~~Students are expected to know content and apply skills from previous grades.~~

~~**Standard 1: Nature of Science**~~

~~Students apply scientific methods to conduct experiments, analyze alternative explanations and communicate results of tests. Students analyze and follow multi-step instructions.~~

~~**Goal 1.1: Understand Systems, Order, and Organization**~~

~~**Objective(s): By the end of Grade 4, the student will be able to:**~~

- ~~4.S.1.1.1— Explain that a system consists of an organized group of related objects that form a whole. (588.01.a)~~

~~**Goal 1.2: Understand Concepts and Processes of Evidence, Models, and Explanations**~~

~~**Objective(s): By the end of Grade 4, the student will be able to:**~~

- ~~4.S.1.2.1— Make and record observations then analyze and communicate the collected data. (588.02.a)  
4.S.1.2.2— Define observations and inferences. (588.02.b)  
4.S.1.2.3— Make, describe and/or use models. (588.02.c)~~

~~**Goal 1.3: Understand Constancy, Change, and Measurement**~~

~~**Objective(s): By the end of Grade 4, the student will be able to:**~~

- ~~4.S.1.3.1— Describe how changes occur and can be measured. (588.03.b)  
4.S.1.3.2— Measure in both U.S. Customary and International System of Measurement (metric system) units. (588.03.c)~~

~~**Goal 1.4: Understand the Theory that Evolution is a Process that Relates to the Gradual Changes in the Universe and of Equilibrium as a Physical State**~~

~~No objectives at this grade level.~~

~~**Goal 1.5: Understand Concepts of Form and Function**~~

~~**Objective(s): By the end of Grade 4, the student will be able to:**~~

- ~~4.S.1.5.1— Explain the relationship between shape and use. (588.05.a)~~

~~**Goal 1.6: Understand Scientific Inquiry and Develop Critical Thinking Skills**~~

~~**Objective(s): By the end of Grade 4, the student will be able to:**~~

- ~~4.S.1.6.1— Write questions that can be answered by conducting scientific tests. (589.01.a)  
4.S.1.6.2— Conduct scientific tests. (589.01.b)  
4.S.1.6.3— Use appropriate tools and techniques to gather and display data. (589.01.c)  
4.S.1.6.4— Use data to construct a reasonable explanation. (589.01.d)  
4.S.1.6.5— Make predictions based on data. (589.01.e)  
4.S.1.6.6— Analyze alternative explanations. (589.01.f)  
4.S.1.6.7— Communicate the results of tests to others in multiple formats. (589.01.g)~~

~~**Goal 1.7: Understand That Interpersonal Relationships Are Important in Scientific Endeavors**~~

~~No objectives at this grade level.~~

~~**Goal 1.8: Understand Technical Communication**~~

~~**Objective(s): By the end of Grade 4, the student will be able to:**~~

~~4.S.1.8.1—Analyze and follow multi-step instructions. (598.02.a)~~

~~**Standard 2: Physical Science**~~

~~Students use scientific instruments to describe and measure the properties of the three states of matter.~~

~~**Goal 2.1: Understand the Structure and Function of Matter and Molecules and Their Interactions**~~

~~**Objective(s): By the end of Grade 4, the student will be able to:**~~

~~4.S.2.1.1—Use instruments to measure properties (590.01.a)~~

~~4.S.2.1.2—Describe the physical properties of solids, liquids, and gases. (590.01.b)~~

~~4.S.2.1.3—Explain the changes caused by heating and cooling materials. (590.01.c)~~

~~**Goal 2.2: Understand Concepts of Motion and Forces**~~

~~No objectives at this grade level.~~

~~**Goal 2.3: Understand the Total Energy in the Universe is Constant**~~

~~No objectives at this grade level.~~

~~**Goal 2.4: Understand the Structure of Atoms**~~

~~No objectives at this grade level.~~

~~**Goal 2.5: Understand Chemical Reactions**~~

~~No objectives at this grade level.~~

~~**Standard 3: Biology**~~

~~Students analyze how plants and animals adapt to their environments. Students classify vertebrates.~~

~~**Goal 3.1: Understand the Theory of Biological Evolution**~~

~~**Objective(s): By the end of Grade 4, the student will be able to:**~~

~~4.S.3.1.1—Analyze and communicate the adaptations of plants and animals to their environment. (592.01.a)~~

~~4.S.3.1.2—Describe the difference between vertebrate and invertebrate animals. (592.01.c)~~

~~4.S.3.1.3—Classify the five groups of vertebrates (mammal, reptiles, amphibians, birds, and fish) based on characteristics. (592.01.c)~~

~~**Goal 3.2: Understand the Relationship between Matter and Energy in Living Systems**~~

~~No objectives at this grade level.~~

~~**Goal 3.3: Understand the Cell is the Basis of Form and Function for All Living Things**~~

~~No objectives at this grade level.~~

**Standard 4: Earth and Space Systems**

~~Students investigate the basic contents of our solar system.~~

**~~Goal 4.1: Understand Scientific Theories of Origin and Subsequent Changes in the Universe and Earth Systems~~**

**~~Objective(s): By the end of Grade 4, the student will be able to:~~**

- ~~4.S.4.1.1— Compare and contrast the basic components of our solar system (planets, sun, moon, asteroids, comets, meteors). (594.01.b)~~
- ~~4.S.4.1.2— Explain the effect of gravity on orbits and objects. (594.01.c)~~
- ~~4.S.4.1.3— Explain the effect of moon's gravity on Earth's tides. (594.01.c)~~

**~~Goal 4.2: Understand Geo-chemical Cycles and Energy in the Earth System~~**

~~No objectives at this grade level.~~

**Standard 5: Personal and Social Perspectives; Technology**

~~Students explain how people have invented tools to meet a need or do a job.~~

**~~Goal 5.1: Understand Common Environmental Quality Issues, Both Natural and Human Induced~~**

~~No objectives at this grade level.~~

**~~Goal 5.2: Understand the Relationship between Science and Technology~~**

**~~Objective(s): By the end of Grade 4, the student will be able to:~~**

- ~~4.S.5.2.1— Identify tools used for space exploration and for scientific investigations. (595.01.b)~~

**~~Goal 5.3: Understand the Importance of Natural Resources and the Need to Manage and Conserve Them~~**

~~No objectives at this grade level.~~

---

~~Students are expected to know content and apply skills from previous grades.~~

~~**Standard 1: Nature of Science**~~

~~Students identify the components of a system and explain their relationship to the whole. Students read, execute, and give technical instructions.~~

~~**Goal 1.1: Understand Systems, Order, and Organization**~~

~~**Objective(s): By the end of Grade 5, the student will be able to:**~~

~~5.S.1.1.1—Compare and contrast different systems. (603.01.a)~~

~~**Goal 1.2: Understand Concepts and Processes of Evidence, Models, and Explanation**~~

~~**Objective(s): By the end of Grade 5, the student will be able to:**~~

~~5.S.1.2.1—Use observations and data as evidence on which to base scientific explanations and predictions. (603.02a)~~

~~5.S.1.2.2—Explain the difference between observation and inference. (603.02.b)~~

~~5.S.1.2.3—Use models to explain or demonstrate a concept. (603.02.c)~~

~~**Goal 1.3: Understand Constancy, Change, and Measurement**~~

~~**Objective(s): By the end of Grade 5, the student will be able to:**~~

~~5.S.1.3.1—Analyze changes that occur in and among systems. (603.03.b)~~

~~5.S.1.3.2—Measure in both U.S. Customary and International System of Measurement (metric system) units with an emphasis on the metric system. (603.03.c)~~

~~**Goal 1.4: Understand the Theory that Evolution is a Process that Relates to the Gradual Changes in the Universe and of Equilibrium as a Physical State**~~

~~No objectives at this grade level.~~

~~**Goal 1.5: Understand Concepts of Form and Function**~~

~~**Objective(s): By the end of Grade 5, the student will be able to:**~~

~~5.S.1.5.1—Explain how the shape or form of an object or system is frequently related to its use or function. (603.05.a)~~

~~**Goal 1.6: Understand Scientific Inquiry and Develop Critical Thinking Skills**~~

~~**Objective(s): By the end of Grade 5, the student will be able to:**~~

~~5.S.1.6.1—Write and analyze questions that can be answered by conducting scientific experiments. (604.01.a)~~

~~5.S.1.6.2—Conduct scientific investigations using a control and a variable. (604.01.b)~~

~~5.S.1.6.3—Select and use appropriate tools and techniques to gather and display data. (604.01.c)~~

~~5.S.1.6.4—Use evidence to analyze descriptions, explanations, predictions, and models. (604.01.d)~~

~~5.S.1.6.5—State a hypothesis based on observations. (604.01.e)~~

~~5.S.1.6.6—Compare alternative explanations and predictions. (604.01.f)~~

~~5.S.1.6.7—Communicate scientific procedures and explanations. (604.01.g)~~

**Goal 1.7: Understand That Interpersonal Relationships Are Important in Scientific Endeavors**

No objectives at this grade level.

**Goal 1.8: Understand Technical Communication**

**Objective(s): By the end of Grade 5, the student will be able to:**

5.S.1.8.1—Read and follow technical instructions. (613.02.a)

**Standard 2: Physical Science**

Students explain the difference between an element, a mixture, and a compound.

**Goal 2.1: Understand the Structure and Function of Matter and Molecules and Their Interactions**

**Objective(s): By the end of Grade 5, the student will be able to:**

5.S.2.1.1—Describe the differences among elements, compounds, and mixtures. (605.01.a)

5.S.2.1.2—Compare the physical differences among solids, liquids, and gases. (605.01.e)

5.S.2.1.3—Explain the nature of physical change and how it relates to physical properties. (605.01.d)

**Goal 2.2: Understand Concepts of Motion and Forces**

No objectives at this grade level.

**Goal 2.3: Understand the Total Energy in the Universe is Constant**

No objectives at this grade level.

**Goal 2.4: Understand the Structure of Atoms**

No objectives at this grade level.

**Goal 2.5: Understand Chemical Reactions**

No objectives at this grade level.

**Standard 3: Biology**

Students explain the differences between plant and animal cells. Students understand that plants convert energy. Students know that traits are passed from parents to offspring.

**Goal 3.1: Understand the Theory of Biological Evolution**

No objectives at this grade level.

**Goal 3.2: Understand the Relationship between Matter and Energy in Living Systems**

**Objective(s): By the end of Grade 5, the student will be able to:**

5.S.3.2.1—Communicate how plants convert energy from the sun through photosynthesis. (608.01.a)

**Goal 3.3: Understand the Cell is the Basis of Form and Function for All Living Things**

**Objective(s): By the end of Grade 5, the student will be able to:**

5.S.3.3.1—Compare and contrast the structural differences between plant and animal cells. (606.01.b)

~~5.S.3.3.2— Explain the concept that traits are passed from parents to offspring. (606.01.c)~~

**Standard 4: Earth and Space Systems**

~~Students describe the dynamic changes that occur on Earth.~~

**~~Goal 4.1: Understand Scientific Theories of Origin and Subsequent Changes in the Universe and Earth Systems~~**

**~~Objective(s): By the end of Grade 5, the student will be able to:~~**

~~5.S.4.1.1— Describe the interactions among the solid earth, oceans and atmosphere (erosion, climate, tectonics and continental drift). (609.01.a)~~

**~~Goal 4.2: Understand Geo-chemical Cycles and Energy in the Earth System~~**

**~~Objective(s): By the end of Grade 5, the student will be able to:~~**

~~5.S.4.2.1— Explain the rock cycle and identify the three classifications of rocks. (609.02.a)~~

**Standard 5: Personal and Social Perspectives; Technology**

~~Students use the scientific method to identify environmental issues.~~

**~~Goal 5.1: Understand Common Environmental Quality Issues, Both Natural and Human Induced~~**

**~~Objective(s): By the end of Grade 5, the student will be able to:~~**

~~5.S.5.1.1— Identify issues for environmental studies. (611.01.a)~~

**~~Goal 5.2: Understand the Relationship between Science and Technology~~**

**~~Objective(s): By the end of Grade 5, the student will be able to:~~**

~~5.S.5.2.1— Describe how science and technology are part of a student's life. (610.01.a)~~

~~5.S.5.2.2— List examples of science and technology. (610.01.b)~~

**~~Goal 5.3: Understand the Importance of Natural Resources and the Need to Manage and Conserve Them~~**

**~~Objective(s): By the end of Grade 5, the student will be able to:~~**

~~5.S.5.3.1— Identify the differences between renewable and nonrenewable resources. (611.03.a)~~

---

~~Students are expected to know content and apply skills from previous grades.~~

~~**Standard 1: Nature of Science**~~

~~Students gather evidence to differentiate between predictions, observations, and inferences. Students read, give, and execute technical instructions.~~

~~**Goal 1.1: Understand Systems, Order, and Organization**~~

~~**Objective(s): By the end of Grade 6, the student will be able to:**~~

~~6.S.1.1.1—Analyze different systems. (618.01.a)~~

~~**Goal 1.2: Understand Concepts and Processes of Evidence, Models, and Explanation**~~

~~**Objective(s): By the end of Grade 6, the student will be able to:**~~

~~6.S.1.2.1—Explain how observations and data are used as evidence on which to base scientific explanations and predictions. (618.02.a)~~

~~6.S.1.2.2—Use observations to make inferences. (618.02.b)~~

~~6.S.1.2.3—Use models to explain or demonstrate a concept. (618.02.c)~~

~~**Goal 1.3: Understand Constancy, Change, and Measurement**~~

~~**Objective(s): By the end of Grade 6, the student will be able to:**~~

~~6.S.1.3.1—Analyze changes that occur in and among systems. (618.03.b)~~

~~6.S.1.3.2—Measure in both U.S. Customary and International System of Measurement (metric system) units with an emphasis on the metric system. (618.03.c)~~

~~**Goal 1.4: Understand the Theory that Evolution is a Process that Relates to the Gradual Changes in the Universe and of Equilibrium as a Physical State**~~

~~No objectives at this grade level.~~

~~**Goal 1.5: Understand Concepts of Form and Function**~~

~~**Objective(s): By the end of Grade 6, the student will be able to:**~~

~~6.S.1.5.1—Analyze how the shape or form of an object or system is frequently related to its use and/or function. (618.05.a)~~

~~**Goal 1.6: Understand Scientific Inquiry and Develop Critical Thinking Skills**~~

~~**Objective(s): By the end of Grade 6, the student will be able to:**~~

~~6.S.1.6.1—Write and analyze questions that can be answered by conducting scientific experiments. (619.02.a)~~

~~6.S.1.6.2—Conduct scientific investigations using a control and variables. Repeat same experiment using alternate variables. (619.02.b)~~

~~6.S.1.6.3—Select and use appropriate tools and techniques to gather and display data. (619.02.c)~~

~~6.S.1.6.4—Use evidence to analyze data in order to develop descriptions, explanations, predictions, and models. (619.2.d)~~

~~6.S.1.6.5—Test a hypothesis based on observations. (619.02.e)~~

~~6.S.1.6.6—Communicate scientific procedures and explanations. (619.02.g)~~

~~**Goal 1.7: Understand That Interpersonal Relationships Are Important in Scientific Endeavors**~~

~~No objectives at this grade level.~~

~~**Goal 1.8: Understand Technical Communication**~~

~~**Objective(s): By the end of Grade 6, the student will be able to:**~~

~~6.S.1.8.1—Read, give, and execute technical instructions. (628.01a)~~

~~**Standard 2: Physical Science**~~

~~Students compare and contrast elements, compounds and mixtures. Students explore the effects of force and energy on objects.~~

~~**Goal 2.1: Understand the Structure and Function of Matter and Molecules and Their Interactions**~~

~~**Objective(s): By the end of Grade 6, the student will be able to:**~~

~~6.S.2.1.1—Compare and contrast the differences among elements, compounds and mixtures. (620.01.a)~~

~~6.S.2.1.2—Define the properties of matter. (620.01.b)~~

~~6.S.2.1.3—Compare densities of equal volumes of a solid, a liquid, or a gas. (619.01.c)~~

~~6.S.2.1.4—Describe the effect of temperature on density. (620.01.c)~~

~~6.S.2.1.5—Explain the nature of physical change and how it relates to physical properties (the distance between molecules as water changes from ice to liquid water, and to water vapor). (620.01.d)~~

~~**Goal 2.2: Understand Concepts of Motion and Forces**~~

~~**Objective(s): By the end of Grade 6, the student will be able to:**~~

~~6.S.2.2.1—Describe the effects of different forces (gravity and friction) on the movement, speed, and direction of an object. (620.03.d)~~

~~**Goal 2.3: Understand the Total Energy in the Universe is Constant**~~

~~No objectives at this grade level.~~

~~**Goal 2.4: Understand the Structure of Atoms**~~

~~No objectives at this grade level.~~

~~**Goal 2.5: Understand Chemical Reactions**~~

~~No objectives at this grade level.~~

~~**Standard 3: Biology**~~

~~Students understand the building blocks of organisms.~~

~~**Goal 3.1: Understand the Theory of Biological Evolution**~~

~~No objectives at this grade level.~~

**Goal 3.2: Understand the Relationship between Matter and Energy in Living Systems**

No objectives at this grade level.

**Goal 3.3: Understand the Cell is the Basis of Form and Function for All Living Things**

**Objective(s): By the end of Grade 6, the student will be able to:**

- 6.S.3.3.1—Identify the different structural levels of which an organism is comprised (cells, tissues, organs, organ systems, and organisms). (621.01.a)
- 6.S.3.3.2—Analyze the structural differences between plant and animal cells. (621.01.b)
- 6.S.3.3.3—Describe how traits are passed from parents to offspring. (621.01.e)

**Standard 4: Earth and Space Systems**

Students understand and explain the relationship among the systems on Earth, such as solid earth, oceans, atmosphere, and organisms.

**Goal 4.1: Understand Scientific Theories of Origin and Subsequent Changes in the Universe and Earth Systems**

**Objective(s): By the end of Grade 6, the student will be able to:**

- 6.S.4.1.1—Explain the interactions among the solid earth, oceans, atmosphere, and organisms. (624.01.a)
- 6.S.4.1.2—Explain the water cycle and its relationship to weather and climate. (624.01.b)
- 6.S.4.1.3—Identify cumulus, cirrus, and stratus clouds and how they relate to weather changes. (624.01.c)

**Goal 4.2: Understand Geo-chemical Cycles and Energy in the Earth System**

No objectives at this grade level.

**Standard 5: Personal and Social Perspectives; Technology**

Students identify issues for environmental studies and understand the difference between renewable and nonrenewable resources.

**Goal 5.1: Understand Common Environmental Quality Issues, Both Natural and Human Induced**

**Objective(s): By the end of Grade 6, the student will be able to:**

- 6.S.5.1.1—Identify issues for environmental studies. (626.01.a)

**Goal 5.2: Understand the Relationship between Science and Technology**

**Objective(s): By the end of Grade 6, the student will be able to:**

- 6.S.5.2.1—Describe how science and technology are part of our society. (625.01.a)
- 6.S.5.2.2—Describe how science and technology are interrelated. (625.01.b)

**Goal 5.3: Understand the Importance of Natural Resources and the Need to Manage and Conserve Them**

**Objective(s): By the end of Grade 6, the student will be able to:**

- 6.S.5.3.1—Explain the difference between renewable and nonrenewable resources. (626.03.a)

~~Students are expected to know content and apply skills from previous grades.~~

~~**Standard 1: Nature of Science**~~

~~Students carry out investigations over time using appropriate tools and equipment. Students make inferences based upon data they collect. Students accurately communicate the results of their investigations and observations. Students support or revise their conclusions by critically analyzing alternate explanations. Students carry out investigations following written lab procedures. Students follow safety protocols in carrying out investigations.~~

~~**Goal 1.1: Understand Systems, Order, and Organization**~~

~~**Objective(s): By the end of Grade 7 the student will be able to:**~~

- ~~7.S.1.1.1— Define small systems as a part of a whole system. (633.01.a)~~
- ~~7.S.1.1.2— Determine how small systems contribute to the function of the whole. (633.01.a)~~
- ~~7.S.1.1.3— Identify the different structural levels of an organism (cells, tissues, organs, and organ systems). (633.01.b)~~

~~**Goal 1.2: Understand Concepts and Processes of Evidence, Models, and Explanation**~~

~~**Objective(s): By the end of Grade 7, the student will be able to:**~~

- ~~7.S.1.2.1— Describe how observations and data are evidence on which to base scientific explanations and predictions. (633.02.a)~~
- ~~7.S.1.2.2— Use observations to make defensible inferences. (633.02.b)~~
- ~~7.S.1.2.3— Use models to explain or demonstrate a concept. (633.02.c)~~

~~**Goal 1.3: Understand Constancy, Change, and Measurement**~~

~~**Objective(s): By the end of Grade 7, the student will be able to:**~~

- ~~7.S.1.3.1— Identify concepts of science that have been stable over time. (633.03.a)~~
- ~~7.S.1.3.2— Recognize changes that occur within systems. (633.03.b)~~
- ~~7.S.1.3.3— Make metric measurements using appropriate tools. (633.03.c)~~

~~**Goal 1.4: Understand the Theory that Evolution is a Process that Relates to the Gradual Changes in the Universe and of Equilibrium as a Physical State**~~

~~Reference to objective 7.S.3.2.1~~

~~**Goal 1.5: Understand Concepts of Form and Function**~~

~~No objectives at this grade level.~~

**Goal 1.6: Understand Scientific Inquiry and Develop Critical Thinking Skills**

**Objective(s): By the end of Grade 7, the student will be able to:**

- 7.S.1.6.1—Identify controls and variables used in scientific investigations. (634.01.b)
- 7.S.1.6.2—Use appropriate tools and techniques to gather and display data. (634.01c)
- 7.S.1.6.3—Evaluate data in order to form conclusions. (634.01.d)
- 7.S.1.6.4—Use evidence and critical thinking to accept or reject a hypothesis. (634.01.e)
- 7.S.1.6.5—Evaluate alternative explanations or predictions. (634.01.f)
- 7.S.1.6.6—Communicate and defend scientific procedures and explanations. (634.01.g)

**Goal 1.7: Understand That Interpersonal Relationships Are Important in Scientific Endeavors**

No objectives at this grade level.

**Goal 1.8: Understand Technical Communication**

**Objective(s): By the end of Grade 7, the student will be able to:**

- 7.S.1.8.1—Read and evaluate technical instructions. (643.02.a)

**Standard 2: Physical Science**

No goals or objectives at this grade level.

**Standard 3: Biology**

Students state the levels of cellular organization and list cell parts and their respective functions. Students explain how traits are passed from one generation to another. Students differentiate between plant and animals cells by identifying the characteristic parts of each. Students explain how organisms are adapted to their environment and interact with the biotic and abiotic components of the environment.

**Goal 3.1: Understand the Theory of Biological Evolution**

**Objective(s): By the end of Grade 7, the student will be able to:**

- 7.S.3.1.1—Describe how natural selection explains species change over time. (637.01.a)

**Goal 3.2: Understand the Relationship between Matter and Energy in Living Systems**

**Objective(s): By the end of Grade 7, the student will be able to:**

- 7.S.3.2.1—Describe how energy stored in food is primarily derived from the sun through photosynthesis. (638.01.a)
- 7.S.3.2.2—Describe how the availability of resources (matter and energy) limits the distribution and abundance of organisms. (638.01.b)
- 7.S.3.2.3—Illustrate how atoms and molecules cycle among the living and nonliving components of the biosphere. (638.01.e)
- 7.S.3.2.4—Identify how energy flows through ecosystems in one direction, from photosynthetic organisms to herbivores, carnivore, and decomposers. (638.01.d)

**Goal 3.3: Understand the Cell is the Basis of Form and Function for All Living Things**

**Objective(s): By the end of Grade 7, the student will be able to:**

- 7.S.3.3.1—Explain the relationships among specialized cells, tissues, organs, organ systems, and organisms. (636.01.a)
- 7.S.3.3.2—Identify the parts of specialized plant and animal cells. (636.01.b)

~~7.S.3.3.3—Identify the functions of cell structures. (636.01.b)~~

~~7.S.3.3.4—Describe cell functions that involve chemical reactions. (630.01.e)~~

~~7.S.3.3.5—Describe how dominant and recessive traits are inherited. (636.01.e)~~

**Standard 4: Earth and Space Systems**

~~No goals or objectives at this grade level.~~

**Standard 5: Personal and Social Perspectives; Technology**

~~Students understand that science and technology interact and impact both individuals and society.~~

**Goal 5.1: Understand Common Environmental Quality Issues, Both Natural and Human Induced**

~~No objectives at this grade level.~~

**Goal 5.2: Understand the Relationship between Science and Technology**

**Objective(s): By the end of Grade 7, the student will be able to:**

~~7.S.5.2.1—Explain how science and technology are interrelated. (640.01.a)~~

~~7.S.5.2.2—Explain how science advances technology. (640.01.b)~~

**Goal 5.3: Understand the Importance of Natural Resources and the Need to Manage and Conserve Them**

**Objective(s): By the end of Grade 7, the student will be able to:**

~~7.S.5.3.1—Identify alternative sources of energy. (641.03.a)~~

---

~~Students are expected to know content and apply skills from previous grades.~~

~~**Standard 1: Nature of Science**~~

~~Students exercise the basic tenets of scientific investigation, make accurate observations, exercise critical thinking skills, apply proper scientific instruments of investigation and measurement tools, and communicate results in problem solving. Students evaluate the validity of information by utilizing the tools of scientific thinking and investigation. Students summarize their findings by creating lab reports using technical writing including graphs, charts, and diagrams to communicate the results of investigations.~~

~~**Goal 1.1: Understand Systems, Order, and Organization**~~

~~**Objective(s): By the end of Physical Science, the student will be able to:**~~

- ~~8-9.PS.1.1.1— Explain the scientific meaning of system, order, and organization. (648.01a)~~
- ~~8-9.PS.1.1.2— Apply the concepts of order and organization to a given system. (648.01a)~~

~~**Goal 1.2: Understand Concepts and Processes of Evidence, Models, and Explanation**~~

~~**Objective(s): By the end of Physical Science, the student will be able to:**~~

- ~~8-9.PS.1.2.1— Use observations and data as evidence on which to base scientific explanations. (648.02a)~~
- ~~8-9.PS.1.2.2— Develop models to explain concepts or systems. (648.02b)~~
- ~~8-9.PS.1.2.3— Develop scientific explanations based on knowledge, logic, and analysis. (648.02c)~~

~~**Goal 1.3: Understand Constancy, Change, and Measurement**~~

~~**Objective(s): By the end of Physical Science, the student will be able to:**~~

- ~~8-9.PS.1.3.1— Measure changes that can occur in and among systems. (648.03b)~~
- ~~8-9.PS.1.3.2— Analyze changes that can occur in and among systems. (648.03b)~~
- ~~8-9.PS.1.3.3— Measure and calculate using the metric system. (648.03c)~~

~~**Goal 1.4: Understand the Theory that Evolution is a Process that Relates to the Gradual Changes in the Universe and of Equilibrium as a Physical State**~~

~~No objectives in Physical Science.~~

~~**Goal 1.5: Understand Concepts of Form and Function**~~

~~No objectives in Physical Science.~~

~~**Goal 1.6: Understand Scientific Inquiry and Develop Critical Thinking Skills**~~

~~**Objective(s): By the end of Physical Science, the student will be able to:**~~

- ~~8-9.PS.1.6.1— Identify questions and concepts that guide scientific investigations. (649.01a)~~
- ~~8-9.PS.1.6.2— Utilize the components of scientific problem solving to design, conduct, and communicate results of investigations. (649.01b)~~
- ~~8-9.PS.1.6.3— Use appropriate technology and mathematics to make investigations. (649.01c)~~
- ~~8-9.PS.1.6.4— Formulate scientific explanations and models using logic and evidence. (649.01d)~~
- ~~8-9.PS.1.6.5— Analyze alternative explanations and models. (649.01e)~~

~~8-9.PS.1.6.6—Communicate and defend a scientific argument. (649.01f)~~

~~8-9.PS.1.6.7—Explain the differences among observations, hypotheses, and theories. (649.01g)~~

**Goal 1.7: Understand That Interpersonal Relationships Are Important in Scientific Endeavors**

No objectives in Physical Science.

**Goal 1.8: Understand Technical Communication**

**Objective(s): By the end of Physical Science, the student will be able to:**

~~8-9.PS.1.8.1—Analyze technical writing, graphs, charts, and diagrams. (658.02a)~~

**Standard 2: Physical Science**

~~Students explain the structure and properties of atoms, including isotopes. Students explain how chemical reactions, while requiring or releasing energy, can neither destroy nor create energy or matter. Students explain the differences between fission and fusion. Students explain the interactions of force and mass in describing motion using Newton's Laws. Students explain how energy can be transformed from one form to another while the total amount of energy remains constant. Students classify energy as potential and/or kinetic, and as energy contained in a field.~~

**Goal 2.1: Understand the Structure and Function of Matter and Molecules and Their Interactions**

No objectives in Physical Science.

**Goal 2.2: Understand Concepts of Motion and Forces**

**Objective(s): By the end of Physical Science, the student will be able to:**

~~8-9.PS.2.2.1—Explain motion using Newton's Laws of Motion. (650.04b)~~

**Goal 2.3: Understand the Total Energy in the Universe is Constant**

**Objective(s): By the end of Physical Science, the student will be able to:**

~~8-9.PS.2.3.1—Explain that energy can be transformed but cannot be created nor destroyed. (650.05a)~~

~~8-9.PS.2.3.2—Classify energy as potential and/or kinetic and as energy contained in a field. (650.05b)~~

**Goal 2.4: Understand the Structure of Atoms**

**Objective(s): By the end of Physical Science, the student will be able to:**

~~8-9.PS.2.4.1—Describe the properties, function, and location of protons, neutrons, and electrons. (650.01a)~~

~~8-9.PS.2.4.2—Explain the processes of fission and fusion. (650.01b)~~

~~8-9.PS.2.4.3—Describe the characteristics of isotopes. (650.01c)~~

~~8-9.PS.2.4.4—State the basic electrical properties of matter. (650.01d)~~

~~8-9.PS.2.4.5—Describe the relationships between magnetism and electricity.~~

**Goal 2.5: Understand Chemical Reactions**

**Objective(s): By the end of Physical Science, the student will be able to:**

~~8-9.PS.2.5.1—Explain how chemical reactions may release or consume energy while the quantity of matter remains constant. (650.03a)~~

**Standard 3: Biology**

No goals or objectives in Physical Science.

**Standard 4: Earth and Space Systems**

No goals or objectives in Physical Science.

**Standard 5: Personal and Social Perspectives; Technology**

Students understand that science and technology interact and impact both society and the environment.

**Goal 5.1: Understand Common Environmental Quality Issues, Both Natural and Human Induced**

No objectives in Physical Science.

**Goal 5.2: Understand the Relationship between Science and Technology**

**Objective(s): By the end of Physical Science, the student will be able to:**

~~8-9.PS.5.2.1— Explain how science advances technology. (655.01a)~~

~~8-9.PS.5.2.2— Explain how technology advances science. (655.01a)~~

~~8-9.PS.5.2.3— Explain how science and technology are pursued for different purposes. (656.01b)~~

**Goal 5.3: Understand the Importance of Natural Resources and the Need to Manage and Conserve Them**

No objectives in Physical Science.

---

~~Students are expected to know content and apply skills from previous grades.~~

~~**Standard 1: Nature of Science**~~

~~Students exercise the basic tenets of scientific investigation, make accurate observations, exercise critical thinking skills, apply proper scientific instruments of investigation and measurement tools, and communicate results in problem solving. Students evaluate the validity of information by utilizing the tools of scientific thinking and investigation. Students summarize their findings by creating lab reports using technical writing including graphs, charts, and diagrams to communicate the results of investigations.~~

~~**Goal 1.1: Understand Systems, Order, and Organization**~~

~~**Objective(s): By the end of Earth Science, the student will be able to:**~~

- ~~8-9.ES.1.1.1— Explain the scientific meaning of system, order, and organization. (648.01a)~~
- ~~8-9.ES.1.1.2— Apply the concepts of order and organization to a given system. (648.01a)~~

~~**Goal 1.2: Understand Concepts and Processes of Evidence, Models, and Explanation**~~

~~**Objective(s): By the end of Earth Science, the student will be able to:**~~

- ~~8-9.ES.1.2.1— Use observations and data as evidence on which to base scientific explanations. (648.02a)~~
- ~~8-9.ES.1.2.2— Develop models to explain concepts or systems. (648.02b)~~
- ~~8-9.ES.1.2.3— Develop scientific explanations based on knowledge, logic, and analysis. (648.02c)~~

~~**Goal 1.3: Understand Constancy, Change, and Measurement**~~

~~**Objective(s): By the end of Earth Science, the student will be able to:**~~

- ~~8-9.ES.1.3.1— Measure changes that can occur in and among systems. (648.03b)~~
- ~~8-9.ES.1.3.2— Analyze changes that can occur in and among systems. (648.03b)~~
- ~~8-9.ES.1.3.3— Measure and calculate using the metric system. (648.03c)~~

~~**Goal 1.4: Understand the Theory that Evolution is a Process that Relates to the Gradual Changes in the Universe and of Equilibrium as a Physical State**~~

~~No objectives in Earth Science.~~

~~**Goal 1.5: Understand Concepts of Form and Function**~~

~~No objectives in Earth Science.~~

~~**Goal 1.6: Understand Scientific Inquiry and Develop Critical Thinking Skills**~~

~~**Objective(s): By the end of Earth Science, the student will:**~~

- ~~8-9.ES.1.6.1— Identify questions and concepts that guide scientific investigations. (649.01a)~~
- ~~8-9.ES.1.6.2— Utilize the components of scientific problem solving to design, conduct, and communicate results of investigations. (649.01b)~~
- ~~8-9.ES.1.6.3— Use appropriate technology and mathematics to make investigations. (649.01c)~~
- ~~8-9.ES.1.6.4— Formulate scientific explanations and models using logic and evidence. (649.01d)~~
- ~~8-9.ES.1.6.5— Analyze alternative explanations and models. (649.01e)~~

~~8-9.ES.1.6.6—Communicate and defend a scientific argument. (649.01f)~~

~~8-9.ES.1.6.7—Explain the differences among observations, hypotheses, and theories. (649.01g)~~

~~**Goal 1.7: Understand That Interpersonal Relationships Are Important in Scientific Endeavors**~~

~~No objectives in Earth Science.~~

~~**Goal 1.8: Understand Technical Communication**~~

~~**Objective(s): By the end of Earth Science, the student will be able to:**~~

~~8-9.ES.1.8.1—Analyze technical writing, graphs, charts, and diagrams. (658.02a)~~

~~**Standard 2: Physical Science**~~

~~No goals or objectives in Earth Science.~~

~~**Standard 3: Biology**~~

~~No goals or objectives in Earth Science.~~

~~**Standard 4: Earth and Space Systems**~~

~~Students describe the current theory explaining the formation of the solar system. Students explain earth processes, events (erosion, uplifting, earthquakes, volcanic eruptions, etc.), and geological time. Students explain Earth's heat sources.~~

~~**Goal 4.1: Understand Scientific Theories of Origin and Subsequent Changes in the Universe and Earth Systems**~~

~~**Objective(s): By the end of Earth Science, the student will be able to:**~~

~~8-9.ES.4.1.1—Explain the current scientific theory that suggests that the solar system formed from a nebular cloud of dust and gas. (654.01a)~~

~~8-9.ES.4.1.2—Identify methods used to estimate geologic time. (654.01b)~~

~~8-9.ES.4.1.3—Show how interactions among the solid earth, oceans, atmosphere, and organisms have changed the earth system over time. (654.01c)~~

~~**Goal 4.2: Understand Geo-chemical Cycles and Energy in the Earth System**~~

~~**Objective(s): By the end of Earth Science, the student will be able to:**~~

~~8-9.ES.4.2.1—Explain the internal and external energy sources of the earth (654.02a)~~

~~**Standard 5: Personal and Social Perspectives; Technology**~~

~~Students understand that science and technology interact and impact both society and the environment. Students describe issues such as water and air quality, hazardous waste, renewable and nonrenewable resources.~~

~~**Goal 5.1: Understand Common Environmental Quality Issues, Both Natural and Human Induced**~~

~~**Objective(s): By the end of Earth Science, the student will be able to:**~~

~~8-9.ES.5.1.1—Analyze environmental issues such as water and air quality, hazardous waste, and depletion of natural resources. (656.01a)~~

~~**Goal 5.2: Understand the Relationship between Science and Technology**~~

STATE DEPARTMENT OF EDUCATION

August 10, 2017

~~Objective(s): By the end of Earth Science, the student will be able to:~~

~~8-9.ES.5.2.1— Explain how science advances technology. (655.01a)~~

~~8-9.ES.5.2.2— Explain how technology advances science. (655.01a)~~

~~8-9.ES.5.2.3— Explain how science and technology are pursued for different purposes. (655.01b)~~

~~Goal 5.3: Understand the Importance of Natural Resources and the Need to Manage and Conserve Them~~

~~Objective(s): By the end of Earth Science, the student will be able to:~~

~~8-9.ES.5.3.1— Describe the difference between renewable and nonrenewable resources. (656.03a)~~

---

~~Students are expected to know content and apply skills from previous grades.~~

~~**Standard 1: Nature of Science**~~

~~Students exercise the basic tenets of scientific investigation, make accurate observations, exercise critical thinking skills, apply proper scientific instruments of investigation and measurement tools, and communicate results in problem solving. Students evaluate the validity of information by utilizing the tools of scientific thinking and investigation. Students summarize their findings by creating lab reports using technical writing including graphs, charts, and diagrams to communicate the results of investigations.~~

~~**Goal 1.1: Understand Systems, Order, and Organization**~~

~~**Objective(s): By the end of Biology, the student will be able to:**~~

- ~~9-10.B.1.1.1— Explain the scientific meaning of system, order, and organization. (648.01a)~~
- ~~9-10.B.1.1.2— Apply the concepts of order and organization to a given system. (648.01a)~~

~~**Goal 1.2: Understand Concepts and Processes of Evidence, Models, and Explanation**~~

~~**Objective(s): By the end of Biology, the student will be able to:**~~

- ~~9-10.B.1.2.1— Use observations and data as evidence on which to base scientific explanations. (648.02a)~~
- ~~9-10.B.1.2.2— Develop models to explain concepts or systems. (648.02b)~~
- ~~9-10.B.1.2.3— Develop scientific explanations based on knowledge, logic and analysis. (648.02c)~~

~~**Goal 1.3: Understand Constancy, Change, and Measurement**~~

~~**Objective(s): By the end of Biology, the student will be able to:**~~

- ~~9-10.B.1.3.1— Measure changes that can occur in and among systems. (648.03b)~~
- ~~9-10.B.1.3.2— Analyze changes that can occur in and among systems. (648.03b)~~
- ~~9-10.B.1.3.3— Measure and calculate using the metric system. (648.03c)~~

~~**Goal 1.4: Understand the Theory that Evolution is a Process that Relates to the Gradual Changes in the Universe and of Equilibrium as a Physical State**~~

~~Reference to 7.S.3.2.1~~

~~**Goal 1.5: Understand Concepts of Form and Function**~~

~~No objectives in Biology.~~

~~**Goal 1.6: Understand Scientific Inquiry and Develop Critical Thinking Skills**~~

~~**Objective(s): By the end of Biology, the student will be able to:**~~

- ~~9-10.B.1.6.1— Identify questions and concepts that guide scientific investigations. (649.01a)~~
- ~~9-10.B.1.6.2— Utilize the components of scientific problem solving to design, conduct, and communicate results of investigations. (649.01b)~~
- ~~9-10.B.1.6.3— Use appropriate technology and mathematics to make investigations. (649.01c)~~
- ~~9-10.B.1.6.4— Formulate scientific explanations and models using logic and evidence. (649.01d)~~
- ~~9-10.B.1.6.5— Analyze alternative explanations and models. (649.01e)~~

~~9-10.B.1.6.6—Communicate and defend a scientific argument. (649.01f)~~

~~9-10.B.1.6.7—Explain the differences among observations, hypotheses, and theories. (649.01g)~~

**Goal 1.7: Understand That Interpersonal Relationships Are Important in Scientific Endeavors**

No objectives in Biology.

**Goal 1.8: Understand Technical Communication**

**Objective(s): By the end of Biology, the student will be able to:**

~~9-10.B.1.8.1—Analyze technical writing, graphs, charts, and diagrams. (658.02a)~~

**Standard 2: Physical Science**

No goals or objectives in Biology.

**Standard 3: Biology**

~~Students explain the importance of cells as they relate to the organization and structure of complex organisms, differentiation and specialization during development, and the chemical reactions necessary to sustain life. Students describe the functions of cell structures. Students use the theory of evolution to explain diversity of life.~~

**Goal 3.1: Understand the Theory of Biological Evolution**

**Objective(s): By the end of Biology, the student will be able to:**

~~9-10.B.3.1.1—Use the theory of evolution to explain how species change over time. (652.01a)~~

~~9-10.B.3.1.2—Explain how evolution is the consequence of interactions among the potential of a species to increase its numbers, genetic variability, a finite supply of resources, and the selection by the environment of those offspring better able to survive and reproduce. (652.01a)~~

**Goal 3.2: Understand the Relationship between Matter and Energy in Living Systems**

**Objective(s): By the end of Biology, the student will be able to:**

~~9-10.B.3.2.1—Explain how matter tends toward more disorganized states (entropy). (653.01a)~~

~~9-10.B.3.2.2—Explain how organisms use the continuous input of energy and matter to maintain their chemical and physical organization. (653.01b)~~

~~9-10.B.3.2.3—Show how the energy for life is primarily derived from the sun through photosynthesis. (653.01c)~~

~~9-10.B.3.2.4—Describe cellular respiration and the synthesis of macromolecules. (653.01d)~~

~~9-10.B.3.2.5—Show how matter cycles and energy flows through the different levels of organization of living systems (cells, organs, organisms, communities) and their environment. (653.01h)~~

**Goal 3.3: Understand the Cell is the Basis of Form and Function for All Living Things**

**Objective(s): By the end of Biology, the student will be able to:**

~~9-10.B.3.3.1—Identify the particular structures that underlie the cellular functions. (651.01a)~~

~~9-10.B.3.3.2—Explain cell functions involving chemical reactions. (651.01b)~~

~~9-10.B.3.3.3—Explain how cells use DNA to store and use information for cell functions. (651.01c)~~

~~9-10.B.3.3.4—Explain how selective expression of genes can produce specialized cells from a single cell. (651.01e)~~

**Standard 4: Earth and Space Systems**

No goals or objectives in Biology.

**Standard 5: Personal and Social Perspectives; Technology**

~~Students understand that science and technology interact and impact both society and the environment. Students describe issues such as water and air quality, hazardous waste, renewable and nonrenewable resources.~~

**~~Goal 5.1: Understand Common Environmental Quality Issues, Both Natural and Human Induced~~**

**~~Objective(s): By the end of Biology, the student will be able to:~~**

- ~~9-10.B.5.1.1—Analyze environmental issues such as water and air quality, hazardous waste, forest health, and agricultural production. (656.01a)~~

**~~Goal 5.2: Understand the Relationship between Science and Technology~~**

**~~Objective(s): By the end of Biology, the student will be able to:~~**

- ~~9-10.B.5.2.1—Explain how science advances technology. (655.01a)~~
- ~~9-10.B.5.2.2—Explain how technology advances science. (655.01a)~~
- ~~9-10.B.5.2.3—Explain how science and technology are pursued for different purposes. (656.01b)~~

**~~Goal 5.3: Understand the Importance of Natural Resources and the Need to Manage and Conserve Them~~**

**~~Objective(s): By the end of Biology, the student will be able to:~~**

- ~~9-10.B.5.3.1—Describe the difference between renewable and nonrenewable resources. (656.03a)~~
-

IDAHO CONTENT STANDARDS  
GRADE 11-12  
CHEMISTRY

~~Students are expected to know content and apply skills from previous grades.~~

~~Standard 1: Nature of Science~~

~~Students exercise the basic tenets of scientific investigation, make accurate observations, exercise critical thinking skills, apply proper scientific instruments of investigation and measurement tools, and communicate results in problem solving. Students evaluate the validity of information by utilizing the tools of scientific thinking and investigation. Students summarize their findings by creating lab reports using technical writing including graphs, charts, and diagrams to communicate the results of investigations.~~

~~Goal 1.1: Understand Systems, Order, and Organization~~

~~Objective(s): By the end of Chemistry, the student will be able to:~~

~~11-12.C.1.1.1—Use the periodic table to predict physical and chemical properties.~~

~~Goal 1.2: Understand Concepts and Processes of Evidence, Models, and Explanation~~

~~Objective(s): By the end of Chemistry, the student will be able to:~~

~~11-12.C.1.2.1—Describe the historical development of the periodic table.~~

~~11-12.C.1.2.2—Create and interpret graphs of data.~~

~~11-12.C.1.2.3—Explain and interpret the key concepts of the kinetic-molecular theory.~~

~~11-12.C.1.2.4—Distinguish the common theories defining acids and bases.~~

~~Goal 1.3: Understand Constancy, Change, and Measurement~~

~~Objective(s): By the end of Chemistry, the student will be able to:~~

~~11-12.C.1.3.1—Identify, compare and contrast physical and chemical properties and changes and appropriate computations.~~

~~11-12.C.1.3.2—Perform computations using scientific notation, the metric system and dimensional analysis.~~

~~11-12.C.1.3.3—Compute measurement uncertainty to include precision, accuracy and the rules for significant digits.~~

~~11-12.C.1.3.4—Perform calculations related to the conversion of grams to moles to particles, atoms, molecules and volume.~~

~~11-12.C.1.3.5—Analyze and solve reaction stoichiometry problems.~~

~~11-12.C.1.3.6—Express concentrations of solutions in various ways including molarity.~~

~~11-12.C.1.3.7—Interpret how the presence of solute particles affect the properties of a solution and be able to do calculations involving colligative properties.~~

~~11-12.C.1.3.8—Analyze quantitative relationships involved in acid/base chemistry including pH.~~

~~Goal 1.4: Understand the Theory that Evolution is a Process that Relates to the Gradual Changes in the Universe and of Equilibrium as a Physical State~~

~~No objectives in Chemistry.~~

~~Goal 1.5: Understand Concepts of Form and Function~~

~~No objectives in Chemistry.~~

**Goal 1.6: Understand Scientific Inquiry and Develop Critical Thinking Skills****Objective(s): By the end of Chemistry, the student will be able to:**

- ~~11-12.C.1.6.1—Demonstrate an understanding of the scientific method.~~
- ~~11-12.C.1.6.2—Select and use appropriate scientific equipment, materials and techniques.~~

**Goal 1.7: Understand That Interpersonal Relationships Are Important in Scientific Endeavors****Objective(s): By the end of Chemistry, the student will be able to:**

- ~~11-12.C.1.7.1—Explain how a series of historically related and documented experiments led to the current model and structure of the atom.~~

**Goal 1.8: Understand Technical Communication****Objective(s): By the end of Chemistry, the student will be able to:**

- ~~11-12.C.1.8.1—Correctly write symbols, formulas and names for common elements, ions and compounds.~~
- ~~11-12.C.1.8.2—Communicate scientific investigations and information clearly.~~

**Standard 2: Physical Science**

~~Students explain the structure and properties of atoms, including isotopes. Students explain how chemical reactions, while requiring or releasing energy, can neither destroy nor create energy or matter. Students explain the differences between fission and fusion. Students explain the interactions of force and mass in describing motion using Newton's Laws. Students explain how energy can be transformed from one form to another while the total amount of energy remains constant. Students classify energy as potential and/or kinetic, and as energy contained in a field.~~

**Goal 2.1: Understand the Structure and Function of Matter and Molecules and Their Interactions****Objective(s): By the end of Chemistry, the student will be able to:**

- ~~11-12.C.2.1.1—Explain and understand how electrons are involved in the formation of chemical bonds using the octet rule and Lewis dot diagrams.~~
- ~~11-12.C.2.1.2—Predict the polarity of chemical bonds using electronegativity.~~
- ~~11-12.C.2.1.3—Predict physical properties of compounds based upon the attractive forces between atoms and molecules.~~
- ~~11-12.C.2.1.4—Distinguish and classify all matter into appropriate categories.~~
- ~~11-12.C.2.1.5—Explain the relationship and reactions of acids, bases, and salts.~~
- ~~11-12.C.2.1.6—Explain the role of dissociation and ionization in producing strong, weak, and nonelectrolytes.~~

**Goal 2.2: Understand Concepts of Motion and Forces****Objective(s): By the end of Chemistry, the student will be able to:**

- ~~11-12.C.2.2.1—Describe the Kinetic Molecular Theory as it applies to phases of matter.~~

**Goal 2.3: Understand the Total Energy in the Universe is Constant****Objective(s): By the end of Chemistry, the student will be able to:**

- ~~11-12.C.2.3.1—Explain and calculate the changes in heat energy that occur during chemical reactions and phase changes.~~
- ~~11-12.C.2.3.2—Demonstrate the conservation of matter by balancing chemical equations.~~
- ~~11-12.C.2.3.3—Differentiate between exothermic and endothermic chemical reactions during chemical or physical changes.~~

**Goal 2.4: Understand the Structure of Atoms**

**Objective(s): By the end of Chemistry, the student will be able to:**

- ~~11-12.C.2.4.1—Interpret the classic historical experiments that were used to identify the components of an atom and its structure.~~
- ~~11-12.C.2.4.2—Deduce the number of protons, neutrons and electrons for an atom or ion.~~
- ~~11-12.C.2.4.3—Describe the relationship between the structure of atoms and light absorption and emission.~~
- ~~11-12.C.2.4.4—Determine and illustrate electron arrangements of elements using electron configurations and orbital energy diagrams.~~

**Goal 2.5: Understand Chemical Reactions**

**Objective(s): By the end of Chemistry, the student will be able to:**

- ~~11-12.C.2.5.1—Illustrate the Law of Conservation of Mass and the Law of Definite Proportions.~~
- ~~11-12.C.2.5.2—Classify, write and balance chemical equations for common types of chemical reactions and predict the products.~~
- ~~11-12.C.2.5.3—Describe the factors that influence the rates of chemical reactions.~~

**Standard 3: Biology**

No goals or objectives in Chemistry.

**Standard 4: Earth and Space Systems**

No goals or objectives in Chemistry.

**Standard 5: Personal and Social Perspectives; Technology**

Students understand that science and technology interact and impact both society and the environment.

**Goal 5.1: Understand Common Environmental Quality Issues, Both Natural and Human Induced**

**Objective(s): By the end of Chemistry, the student will be able to:**

- ~~11-12.C.5.1.1—Demonstrate the ability to work safely and effectively in a chemistry laboratory.~~

**Goal 5.2: Understand the Relationship between Science and Technology**

**Objective(s): By the end of Chemistry, the student will be able to:**

- ~~11-12.C.5.2.1—Assess the role of chemistry in enabling technological advances.~~

**Goal 5.3: Understand the Importance of Natural Resources and the Need to Manage and Conserve Them**

**Objective(s): By the end of Chemistry, the student will be able to:**

- ~~11-12.C.5.3.1—Evaluate the role of chemistry in energy and environmental issues.~~

<u>Appendix A: Suggested Middle and High School Course Progressions.....</u>	<u>71</u>
<u>Appendix B: Glossary of Terms.....</u>	<u>74</u>

## Introduction

The Idaho State Science Standards are essential for developing the science literacy of Idaho students, as it is vital that our students understand the fundamental laws and practices within scientific disciplines. This document provides stakeholders with a set of rigorous and relevant science performance standards that prepare students to be informed, contributing citizens of the 21st century world. The unifying goal is for Idaho students to practice and perform science and use their working knowledge of science to successfully function in a complex world.

## Elementary School (Kindergarten)

### PS: Physical Sciences

#### PS1-K Motion and Stability: Forces and Interactions

#### Performance Standards

Students who demonstrate understanding can:

**PS1-K-1. Plan and conduct an investigation to compare the effects of different strengths or different directions of pushes and pulls on the motion of an object.**

- Further Explanation: Examples of pushes or pulls could include a string attached to an object being pulled, a person pushing an object, a person stopping a rolling ball, and two objects colliding and pushing on each other.
- Content Limit: Assessment is limited to different relative strengths or different directions, but not both at the same time. Assessment does not include non-contact pushes or pulls such as those produced by magnets.

**PS1-K-2. Analyze data to determine if a design solution works as intended to change the speed or direction of an object with a push or a pull.**

- Further Explanation: Examples of problems requiring a solution could include having a marble or other object move a certain distance, follow a particular path, and knock down other objects. Examples of solutions could include tools such as a ramp to increase the speed of the object and a structure that would cause an object such as a marble or ball to turn.
- Content Limit: Assessment does not include friction as a mechanism for change in speed.

#### Supporting Content

**PS2.A: Forces and Motion**

- Pushes and pulls can have different strengths and directions. (PS1-K-1, PS1-K-2)
- Pushing or pulling on an object can change the speed or direction of its motion and can start or stop it. (PS1-K-1, PS1-K-2)

**PS2.B: Types of Interactions**

- When objects touch or collide, they push on one another and can change motion. (PS1-K-1)

**PS3.C: Relationship Between Energy and Forces**

- A bigger push or pull makes things speed up or slow down more quickly. (PS1-K-1)

**ETS1.A: Defining Engineering Problems**

- A situation that people want to change or create can be approached as a problem to be solved through engineering. Such problems may have many acceptable solutions. (PS1-K-2)

## PS2-K Energy

### Performance Standards

Students who demonstrate understanding can:

**PS2-K-1. Make observations to determine the effect of sunlight on Earth's surface.**

- Further Explanation: Examples of Earth's surface could include sand, soil, rocks, and water.
- Content Limit: Assessment of temperature is limited to relative measures such as warmer/cooler.

**PS2-K-2. Use tools and materials to design and build a structure that will reduce the warming effect of sunlight on an area.**

- Further Explanation: Examples of structures could include umbrellas, canopies, and tents that minimize the warming effect of the sun.

### Supporting Content

**PS3.B: Conservation of Energy and Energy Transfer**

- Sunlight warms Earth's surface. (PS2-K-1, PS2-K-2)

## LS: Life Sciences

### LS1-K Molecules to Organisms: Structure and Processes

#### Performance Standards

Students who demonstrate understanding can:

**LS1-K-1. Use observations to describe patterns of what plants and animals (including humans) need to survive.**

- Further Explanation: Examples of patterns could include that animals need to take in food but plants produce their own; the different kinds of food needed by different types of animals; the requirement of plants to have light; and, that all living things need water.

**LS1-K-2. Use classification supported by evidence to differentiate between living and non-living items.**

- Further Explanation: Use chart or Venn diagram to sort objects or pictures into living and not-living items.

#### Supporting Content

**LS1.C: Organization for Matter and Energy Flow in Organisms**

- All animals need food in order to live and grow. They obtain their food from plants or from other animals. Plants need water and light to live and grow. (LS1-K-1)
- Living and non-living things have distinct characteristics. (LS1-K-2)

## **ESS: Earth and Space Sciences**

### **ESS1-K Earth's Systems**

#### **Performance Standards**

Students who demonstrate understanding can:

#### **ESS1-K-1. Use and share observations of local weather conditions to describe patterns over time, which includes the 4 seasons.**

- Further Explanation: Examples of qualitative observations could include descriptions of the weather (such as sunny, cloudy, rainy, and warm); examples of quantitative observations could include numbers of sunny, windy, and rainy days in a month. Examples of patterns could include that it is usually cooler in the morning than in the afternoon and the number of sunny days versus cloudy days in different months.
- Content Limit: Assessment of quantitative observations limited to whole numbers and relative measures such as warmer/cooler.

#### **ESS1-K-2. Construct an argument supported by evidence for how plants and animals (including humans) can change the environment to meet their needs.**

- Further Explanation: Examples of plants and animals changing their environment could include a squirrel digs in the ground to hide its food and tree roots can break concrete.

#### **Supporting Content**

#### **ESS2.D: Weather and Climate**

- Weather is the combination of sunlight, wind, snow or rain, and temperature in a particular region at a particular time. People measure these conditions to describe and record the weather and to notice patterns over time. (ESS1-K-1)
- The four seasons occur in a specific order due to their weather patterns. (ESS1-K-1)

#### **ESS2.E: Biogeology**

- Plants and animals can change their environment. (ESS1-K-2)

#### **ESS3.C: Human Impacts on Earth Systems**

- Things that people do to live comfortably can affect the world around them. But they can make choices that reduce their impacts on the land, water, air, and other living things. (ESS1-K-2)

## ESS2-K Earth and Human Activity

### Performance Standards

Students who demonstrate understanding can:

**ESS2-K-1. Use a model to represent the relationship between the needs of different plants and animals (including humans) and the places they live.**

- Further Explanation: Examples of relationships could include that deer eat buds and leaves, therefore, they usually live in forested areas; and, grasses need sunlight so they often grow in meadows. Plants, animals, and their surroundings make up a system.

**ESS2-K-2. Ask questions to obtain information about the purpose of weather forecasting to prepare for, and respond to, severe weather.**

- Further Explanation: Emphasis is on local forms of severe weather.

**ESS2-K-3. Communicate solutions that will reduce the impact of humans on the land, water, air, and/or other living things in the local environment.**

- Further Explanation: Examples of human impact on the land could include cutting trees to produce paper and using resources to produce bottles. Examples of solutions could include reusing paper and recycling cans and bottles.

### Supporting Content

**ESS3.A: Natural Resources**

- Living things need water, air, and resources from the land, and they live in places that have the things they need. Humans use natural resources for everything they do. (ESS2-K-1)

**ESS3.B: Natural Hazards**

- Some kinds of severe weather are more likely than others in a given region. Weather scientists forecast severe weather so that the communities can prepare for and respond to these events. (ESS2-K-2)

**ESS3.C: Human Impacts on Earth Systems**

- Things that people do to live comfortably can affect the world around them. But they can make choices that reduce their impacts on the land, water, air, and other living things. (ESS2-K-3)

**ETS1.A: Defining and Delimiting an Engineering Problem**

- Asking questions, making observations, and gathering information are helpful in thinking about problems. (ESS2-K-2)

**ETS1.B: Developing Possible Solutions**

- Designs can be conveyed through sketches, drawings, or physical models. These representations are useful in communicating ideas for a problem's solutions to other people. (ESS2-K-3)

## Elementary School (1<sup>st</sup> Grade)

### PS: Physical Sciences

#### PS1-1 Waves

#### Performance Standards

Students who demonstrate understanding can:

**PS1-1-1. Plan and conduct investigations to provide evidence that vibrating materials can make sound and that sound can make materials vibrate.**

- Further Explanation: Examples of vibrating materials that make sound could include tuning forks and plucking a stretched string. Examples of how sound can make matter vibrate could include holding a piece of paper near a speaker making sound and holding an object near a vibrating tuning fork.

**PS1-1-2. Make observations to construct an evidence-based account that objects in darkness can be seen only when illuminated.**

- Further Explanation: Examples of observations could include those made in a completely dark room, a pinhole box, and a video of a cave explorer with a flashlight. Illumination could be from an external light source or by an object giving off its own light.

**PS1-1-3. Plan and conduct investigations to determine the effect of placing objects made with different materials in the path of a beam of light.**

- Further Explanation: Examples of materials could include those that are transparent (such as clear plastic), translucent (such as wax paper), opaque (such as cardboard), and reflective (such as a mirror).
- Content Limit: Assessment does not include the speed of light.

**PS1-1-4. Use tools and materials to design and build a device that uses light or sound to solve the problem of communicating over a distance.**

- Further Explanation: Examples of devices could include a light source to send signals, paper cup and string “telephones,” and a pattern of drum beats.
- Content Limit: Assessment does not include technological details for how communication devices work.

#### Supporting Content

**PS4.A: Wave Properties**

- Sound can make matter vibrate, and vibrating matter can make sound. (PS1-1-1)

**PS4.B: Electromagnetic Radiation (light)**

- Objects can be seen if light is available to illuminate them or if they give off their own light. (PS1-1-2)
- Some materials allow light to pass through them, others allow only some light through and others block all the light and create a dark shadow on any surface beyond them, where the light cannot reach. Mirrors can be used to redirect a light beam. (Boundary: The idea that light travels from place to place is developed through experiences with light sources, mirrors, and shadows, but no attempt is made to discuss the speed of light.) (PS1-1-3)

**PS4.C: Information Technologies and Instrumentation**

- People also use a variety of devices to communicate (send and receive information) over long distances. (PS1-1-4)

## **LS: Life Sciences**

### **LS1-1 Molecules to Organisms: Structure and Processes**

#### **Performance Standards**

Students who demonstrate understanding can:

**LS1-1-1. Use materials to design a solution to a human problem by mimicking how plants and/or animals use their external parts to help them survive, grow, and meet their needs.**

- Further Explanation: Examples of human problems that can be solved by mimicking plant or animal solutions could include designing clothing or equipment to protect bicyclists by mimicking turtle shells, acorn shells, and animal scales; stabilizing structures by mimicking animal tails and roots on plants; keeping out intruders by mimicking thorns on branches and animal quills; and, detecting intruders by mimicking eyes and ears.

**LS1-1-2. Read texts and use media to determine patterns in behavior of parents and offspring that help offspring survive.**

- Further Explanation: Examples of patterns of behaviors could include the signals that offspring make (such as crying, cheeping, and other vocalizations) and the responses of the parents (such as feeding, comforting, and protecting the offspring).

**LS1-1-3. Develop models to describe that organisms have unique and diverse life cycles but all have in common birth, growth, reproduction, and death.**

- Further Explanation: Changes organisms go through during their life form a pattern.
- Content Limit: Assessment of plant life cycles is limited to those of flowering plants. Assessment does not include details of human reproduction.

#### **Supporting Content**

**LS1.A: Structure and Function**

- All organisms have external parts. Different animals use their body parts in different ways to see, hear, grasp objects, protect themselves, move from place to place, and seek, find, and take in food, water and air. Plants also have different parts (roots, stems, leaves, flowers, fruits) that help them survive and grow. (LS1-1-1)

**LS1.B: Growth and Development of Organisms**

- Adult plants and animals can have young. In many kinds of animals, parents and the offspring themselves engage in behaviors that help the offspring to survive. (LS1-1-2)
- Reproduction is essential to the continued existence of every kind of organism. Plants and animals have unique and diverse life cycles. (LS1-1-3)

**LS1.D: Information Processing**

- Animals have body parts that capture and convey different kinds of information needed for growth and survival. Animals respond to these inputs with behaviors that help them survive. Plants also respond to some external inputs. (LS1-1-1)

## LS2-1 Heredity: Inheritance and Variation of Traits

### **Performance Standards**

Students who demonstrate understanding can:

**LS2-1-1. Make observations to construct an evidence-based account that young plants and animals are like, but not exactly like, their parents.**

- Further Explanation: Examples of patterns could include features plants or animals share. Examples of observations could include leaves from the same kind of plant are the same shape but can differ in size; and, a particular breed of dog looks like its parents but is not exactly the same.
- Content Limit: Assessment does not include inheritance or animals that undergo metamorphosis or hybrids.

### **Supporting Content**

**LS3.A: Inheritance of Traits**

- Young animals are very much, but not exactly like, their parents. Plants also are very much, but not exactly, like their parents. (LS2-1-1)

**LS3.B: Variation of Traits**

- Individuals of the same kind of plant or animal are recognizable as similar but can also vary in many ways. (LS2-1-1)

## **ESS: Earth and Space Sciences**

### **ESS1-1 Earth's Place in the Universe**

#### **Performance Standards**

Students who demonstrate understanding can:

##### **ESS1-1-1. Use observations of the sun, moon, and stars to describe patterns that can be predicted.**

- Further Explanation: Examples of patterns could include that the sun and moon appear to rise in one part of the sky, move across the sky, and set; and stars other than our sun are visible at night but not during the day.
- Content Limit: Assessment of star patterns is limited to stars being seen at night and not during the day.

##### **ESS1-1-2. Make observations at different times of year to relate the amount of daylight to the time of year.**

- Further Explanation: Emphasis is on relative comparisons of the amount of daylight in the winter to the amount in the spring or fall.
- Content Limit: Assessment is limited to relative amounts of daylight, not quantifying the hours or time of daylight.

#### **Supporting Content**

##### **ESS1.A: The Universe and its Stars**

- Patterns of the motion of the sun, moon, and stars in the sky can be observed, described, and predicted. (ESS1-1-1)

##### **ESS1.B: Earth and the Solar System**

- Seasonal patterns of sunrise and sunset can be observed, described, and predicted. (ESS1-1-2)
- Seasons are created by weather patterns for a particular region and time. Local patterns create 4 distinct seasons. (ESS1-1-2)

## Elementary School (2<sup>nd</sup> Grade)

### PS: Physical Sciences

#### PS1-2 Matter and Its Interactions

#### Performance Standards

Students who demonstrate understanding can:

**PS1-2-1. Plan and conduct an investigation to describe and classify different kinds of materials by their observable properties.**

- Further Explanation: Observations could include color, texture, hardness, and flexibility. Patterns could include the similar properties that different materials share.

**PS1-2-2. Analyze data obtained from testing different materials to determine which materials have the properties that are best suited for an intended purpose.**

- Further Explanation: Examples of properties could include, strength, flexibility, hardness, texture, and absorbency.
- Content Limit: Assessment of quantitative measurements is limited to length.

**PS1-2-3. Make observations to construct an evidence-based account of how an object made of a small set of pieces can be disassembled and made into a new object.**

- Further Explanation: Examples of pieces could include blocks, building bricks, or other assorted small objects.

**PS1-2-4. Construct an argument with evidence that some changes caused by heating or cooling can be reversed and some cannot.**

- Further Explanation: Examples of reversible changes could include materials such as water and butter at different temperatures. Examples of irreversible changes could include cooking an egg, freezing a plant leaf, and heating paper.

#### Supporting Content

**PS1.A: Structure and Properties of Matter**

- Different kinds of matter exist and many of them can be solid, liquid, or gas depending on temperature. Matter can be described and classified by its observable properties. (PS1-2-1)
- Different properties are suited to different purposes. (PS1-2-2), (PS1-2-3)
- A great variety of objects can be built up from a small set of pieces. (PS1-2-3)

**PS1.B: Chemical Reactions**

- Heating or cooling a substance may cause changes that can be observed. Sometimes these changes are reversible, and sometimes they are not. (PS1-2-4)

## **LS: Life Sciences**

### **LS1-2 Ecosystems: Interactions, Energy, and Dynamics**

#### **Performance Standards**

Students who demonstrate understanding can:

**LS1-2-1. Plan and conduct an investigation to determine if plants need sunlight and water to grow.**

- Content Limit: Assessment is limited to testing one variable at a time.

**LS1-2-2. Develop a simple model that mimics the function of an animal in dispersing seeds or pollinating plants.**

#### **Supporting Content**

**LS2.A: Interdependent Relationships in Ecosystems**

- Plants depend on water and light to grow. (LS1-2-1)
- Plants depend on animals for pollination or to move their seeds around. (LS1-2-2)

**ETS1.B: Developing Possible Solutions**

- Designs can be conveyed through sketches, drawings, or physical models. These representations are useful in communicating ideas for a problem's solutions to other people. (LS1-2-2)

### **LS2-2 Biological Adaptation: Unity and Diversity**

#### **Performance Standards**

Students who demonstrate understanding can:

**LS2-2-1. Make observations of plants and animals to compare the diversity of life in different habitats.**

- Further Explanation: Emphasis is on the diversity of living things in each of a variety of different habitats.
- Content Limit: Assessment does not include specific animal and plant names in specific habitats.

#### **Supporting Content**

**LS4.D: Biodiversity and Humans**

- There are many different kinds of living things in any area, and they exist in different places on land and in water. (LS2-2-1)

## **ESS: Earth and Space Sciences**

### **ESS1-2 Earth's Place in the Universe**

#### **Performance Standards**

Students who demonstrate understanding can:

**ESS1-2-1. Use information from several sources to provide evidence that Earth events can occur quickly or slowly.**

- Further Explanation: Examples of events and timescales could include volcanic explosions and earthquakes, which happen quickly and erosion of rocks, which occurs slowly.
- Content Limit: Assessment does not include quantitative measurements of timescales.

#### **Supporting Content**

**ESS1.C: The History of Planet Earth**

- Some events happen very quickly; others occur very slowly, over a time period much longer than one can observe. (ESS1-2-1)

## ESS2-2 Earth's Systems

### Performance Standards

Students who demonstrate understanding can:

**ESS2-2-1. Compare multiple solutions designed to slow or prevent wind or water from changing the shape of the land.**

- Further Explanation: Examples of solutions could include different designs of dikes and windbreaks to hold back wind and water, and different designs for using shrubs, grass, and trees to hold back the land.

**ESS2-2-2. Develop a model to represent the shapes and kinds of land and bodies of water in an area.**

- Content Limit: Assessment does not include quantitative scaling in models.

**ESS2-2-3. Obtain information to identify where water is found on Earth and that it can be solid, liquid or gas.**

### Supporting Content

**ESS2.A: Earth Materials and Systems**

- Wind and water can change the shape of the land. (ESS2-2-1)

**ESS2.B: Plate Tectonics and Large-Scale System Interactions**

- Maps show where things are located. One can map the shapes and kinds of land and water in any area. (ESS2-2-2)

**ESS2.C: The Roles of Water in Earth's Surface Processes**

- Water is found in the ocean, rivers, lakes, and ponds. Water exists as solid ice and in liquid form. (ESS2-2-3)

**ETS1.C: Optimizing the Design Solution**

- Because there is always more than one possible solution to a problem, it is useful to compare and test designs. (ESS2-2-1)

## Elementary School (3<sup>rd</sup> Grade)

### PS: Physical Sciences

#### PS1-3 Motion and Stability: Forces and Interactions

#### Performance Standards

Students who demonstrate understanding can:

##### PS1-3-1. Plan and conduct an investigation to provide evidence of the effects of balanced and unbalanced forces on the motion of an object.

- Further Explanation: Examples could include an unbalanced force on one side of a ball can make it start moving; and, balanced forces pushing on a box from both sides will not produce any motion at all.
- Content Limit: Assessment is limited to one variable at a time: number, size, or direction of forces. Assessment does not include quantitative force size, only qualitative and relative. Assessment is limited to gravity being addressed as a force that pulls objects down.

##### PS1-3-2. Make observations and/or measurements of an object's motion to provide evidence that a pattern can be used to predict future motion.

- Further Explanation: Examples of motion with a predictable pattern could include a child swinging in a swing, a ball rolling back and forth in a bowl, and two children on a see-saw.
- Content Limit: Assessment does not include technical terms such as period and frequency.

##### PS1-3-3. Ask questions to determine cause and effect relationships of electric or magnetic interactions between two objects not in contact with each other.

- Further Explanation: Examples of an electric force could include the force on hair from an electrically charged balloon and the electrical forces between a charged rod and pieces of paper; examples of a magnetic force could include the force between two permanent magnets, the force between an electromagnet and steel paperclips, and the force exerted by one magnet versus the force exerted by two magnets. Examples of cause and effect relationships could include how the distance between objects affects strength of the force and how the orientation of magnets affects the direction of the magnetic force.
- Content Limit: Assessment is limited to forces produced by objects that can be manipulated by students, and electrical interactions are limited to static electricity.

##### PS1-3-4. Define a simple design problem that can be solved by applying scientific ideas about magnets.

- Further Explanation: Examples of problems could include constructing a latch to keep a door shut and creating a device to keep two moving objects from touching each other.

#### Supporting Content

##### PS2.A: Forces and Motion

- Each force acts on one particular object and has both strength and a direction. An object at rest typically has multiple forces acting on it, but they add to give zero net force on the object. Forces that do not sum to zero can cause changes in the object's speed or direction of motion. (Boundary: Qualitative and conceptual, but not quantitative additions of forces are used at this level.) (PS1-3-1)
- Force applied to an object can alter the position and motion of that object: revolve, rotate, float, sink, fall and at rest. (PS1-3-2)
- The patterns of an object's motion in various situations can be observed and measured: when that past motion exhibits a regular pattern, future motion can be predicted from it. (Boundary: Technical terms, such as magnitude, velocity, momentum, and vector quantity, are not introduced at this level, but the concept that some quantities need both size and direction to be described is developed.) (PS1-3-2)

##### PS2.B: Types of Interactions

## LS: Life Sciences

### LS1-3 Ecosystems: Interactions, Energy, and Dynamics

#### Performance Standards

Students who demonstrate understanding can:

**LS1-3-1. Construct an argument that some animals form groups that help members survive**

#### Supporting Content

**LS2.D: Social Interactions and Group Behavior**

- Being part of a group helps animals obtain food, defend themselves, and cope with changes. Groups may serve different functions and vary dramatically in size. (LS1-3-1)

### LS2-3 Heredity: Inheritance and Variation of Traits

#### Performance Standards

Students who demonstrate understanding can:

**LS2-3-1. Analyze and interpret data to provide evidence that plants and animals have traits inherited from parents and that variation of these traits exists in a group of similar organisms.**

- Further Explanation: Patterns are the similarities and differences in traits shared between offspring and their parents, or among siblings. Emphasis is on organisms other than humans.
- Content Limit: Assessment does not include genetic mechanisms of inheritance and prediction of traits. Assessment is limited to non-human examples.

**LS2-3-2. Use evidence to support the explanation that traits can be influenced by the environment.**

- Further Explanation: Examples of the environment affecting a trait could include normally tall plants grown with insufficient water are stunted; and, a pet dog that is given too much food and little exercise may become overweight.

#### Supporting Content

**LS3.A: Inheritance of Traits**

- Many characteristics of organisms are inherited from their parents. (LS2-3-1)
- Other characteristics result from individuals' interactions with the environment, which can range from diet to learning. Many characteristics involve both inheritance and environment. (LS2-3-2)

**LS3.B: Variation of Traits**

- Different organisms vary in how they look and function because they have different inherited information. (LS2-3-1)
- The environment also affects the traits that an organism develops. (LS2-3-2)

## ESS: Earth and Space Sciences

### ESS1-3 Earth's Systems

#### Performance Standards

Students who demonstrate understanding can:

**ESS1-3-1. Represent data in tables and graphical displays to describe typical weather conditions expected during a particular season.**

- Further Explanation: Examples of data could include average temperature, precipitation, and wind direction.
- Content Limit: Assessment of graphical displays is limited to pictographs and bar graphs. Assessment does not include climate change.

**ESS1-3-2. Obtain and combine information to describe climates in different regions of the world.**

#### Supporting Content

**ESS2.D: Weather and Climate**

- Scientists record patterns of the weather across different times and areas so that they can make predictions about what kind of weather might happen next. (ESS1-3-1)
- Climate describes a range of an area's typical weather conditions and the extent to which those conditions vary over years. (ESS1-3-2)

### ESS2-3 Earth and Human Activity

#### Performance Standards

Students who demonstrate understanding can:

**ESS2-3-1. Make a claim about the merit of a design solution that reduces the impacts of a weather-related hazard.**

- Further Explanation: Examples of design solutions to weather-related hazards could include barriers to prevent flooding, wind resistant roofs, and lightning rods.

#### Supporting Content

**ESS3.B: Natural Hazards**

- A variety of natural hazards result from natural processes. Humans cannot eliminate natural hazards but can take steps to reduce their impacts. (ESS2-3-1)

## Elementary School (4<sup>th</sup> Grade)

### PS: Physical Sciences

#### PS1-4 Energy

#### Performance Standards

Students who demonstrate understanding can:

**PS1-4-1. Use evidence to construct an explanation relating the speed of an object to the energy of that object.**

- Content Limit: Assessment does not include quantitative measures of changes in the speed of an object or on any precise or quantitative definition of energy.

**PS1-4-2. Make observations to provide evidence that energy can be transferred from place to place by sound, light, heat, and electric currents.**

- Content Limit: Assessment does not include quantitative measurements of energy.

**PS1-4-3. Ask questions and predict outcomes about the changes in energy that occur when objects collide.**

- Further Explanation: Emphasis is on the change in the energy due to the change in speed, not on the forces, as objects interact.
- Content Limit: Assessment does not include quantitative measurements of energy.

**PS1-4-4. Apply scientific ideas to design, test, and refine a device that converts energy from one form to another.**

- Further Explanation: Examples of devices could include electric circuits that convert electrical energy into motion energy of a vehicle, light, or sound; and, a passive solar heater that converts light into heat. Examples of constraints could include the materials, cost, or time to design the device.
- Content Limit: Devices should be limited to those that convert motion energy to electric energy or use stored energy to cause motion or produce light or sound.

## Supporting Content

### **PS3.A: Definitions of Energy**

- The faster a given object is moving, the more energy it possesses. (PS1-4-1)
- Energy can be moved from place to place by moving objects or through sound, light, or electric currents. (PS1-4-2, PS1-4-3)

### **PS3.B: Conservation of Energy and Energy Transfer**

- Energy is present whenever there are moving objects, sound, light, or heat. When objects collide, energy can be transferred from one object to another, thereby changing their motion. In such collisions, some energy is typically also transferred to the surrounding air; as a result, the air gets heated and sound is produced. (PS1-4-2, PS1-4-3)
- Light also transfers energy from place to place. (PS1-4-2)
- Energy can also be transferred from place to place by electric currents, which can then be used locally to produce motion, sound, heat, or light. The currents may have been produced to begin with by transforming the energy of motion into electrical energy. (PS1-4-2, PS1-4-4)

### **PS3.C: Relationship Between Energy and Forces**

- When objects collide, the contact forces transfer energy so as to change the objects' motions. (PS1-4-3)

### **PS3.D: Energy in Chemical Processes and Everyday Life**

- The expression "produce energy" typically refers to the conversion of stored energy into a desired form for practical use. (PS1-4-4)

### **ETS1.A: Defining Engineering Problems**

- Possible solutions to a problem are limited by available materials and resources (constraints). The success of a designed solution is determined by considering the desired features of a solution (criteria). Different proposals for solutions can be compared on the basis of how well each one meets the specified criteria for success or how well each takes the constraints into account. (PS1-4-4)

## PS2-4 Waves

### Performance Standards

Students who demonstrate understanding can:

**PS2-4-1. Develop a model of waves to describe patterns in terms of amplitude and wavelength and that waves can cause objects to move.**

- Further Explanation: Examples of models could include diagrams, analogies, and physical models using wire to illustrate wavelength and amplitude of waves.
- Content Limit: Assessment does not include interference effects, electromagnetic waves, non-periodic waves, or quantitative models of amplitude and wavelength.

**PS2-4-2. Develop a model to describe that light reflecting from objects and entering the eye allows objects to be seen.**

- Content Limit: Assessment does not include knowledge of specific colors reflected and seen, the cellular mechanisms of vision, or how the retina works.

**PS2-4-3. Generate and compare multiple solutions that use patterns to transfer information.**

- Further Explanation: Examples of solutions could include drums sending coded information through sound waves, using a grid of 1's and 0's representing black and white to send information about a picture, and using Morse code to send text.

### Supporting Content

**PS4.A: Wave Properties**

- Waves, which are regular patterns of motion, can be made in water by disturbing the surface. When waves move across the surface of deep water, the water goes up and down in place; there is no net motion in the direction of the wave except when the water meets a beach. (PS2-4-1)
- Waves of the same type can differ in amplitude (height of the wave) and wavelength (spacing between wave peaks). (PS2-4-1)

**PS4.B: Electromagnetic Radiation**

- An object can be seen when light reflected from its surface enters the eyes. (PS2-4-2)

**PS4.C: Information Technologies and Instrumentation**

- Digitized information can be transmitted over long distances without significant degradation. High-tech devices, such as computers or cell phones, can receive and decode information—convert it from digitized form to voice—and vice versa. (PS2-4-3)

**ETS1.C: Optimizing The Design Solution**

- Different solutions need to be tested in order to determine which of them best solves the problem, given the criteria and the constraints. (PS2-4-3)

## LS: Life Sciences

### LS1-4 Molecules to Organisms: Structure and Processes

#### **Performance Standards**

Students who demonstrate understanding can:

**LS1-4-1. Construct an argument that plants and animals have internal and external structures that function to support survival, growth, behavior, and reproduction.**

- Further Explanation: Examples of structures could include thorns, stems, roots, colored petals, heart, stomach, lung, brain, and skin.
- Content Limit: Assessment is limited to macroscopic structures within plant and animal systems.

**LS1-4-2. Use a model to describe that animals receive different types of information through their senses, process the information in their brain, and respond to the information in different ways.**

- Further Explanation: Emphasis is on systems of information transfer.
- Content Limit: Assessment does not include the mechanisms by which the brain stores and recalls information or the mechanisms of how sensory receptors function.

#### **Supporting Content**

**LS1.A: Structure and Function**

- Plants and animals have both internal and external structures that serve various functions in growth, survival, behavior, and reproduction. (LS1-4-1)
- Animals have various body systems with specific functions for sustaining life: skeletal, circulatory, respiratory, muscular, digestive, etc. (LS1-4-1).

**LS1.D: Information Processing**

- Different sense receptors are specialized for particular kinds of information, which may be then processed by the animal's brain. Animals are able to use their perceptions and memories to guide their actions. (LS1-4-2)

## LS2-4 Ecosystems: Interactions, Energy, and Dynamics

### Performance Standards

Students who demonstrate understanding can:

#### LS2-4-1. Develop a model to describe the movement of matter among plants, animals, decomposers, and the environment.

- Further Explanation: Emphasis is on the idea that matter that is not food (air, water, decomposed materials in soil) is changed by plants into matter that is food. Examples of systems could include organisms, ecosystems, and the Earth.
- Content Limit: Assessment does not include molecular explanations.

### Supporting Content

#### LS2.A: Interdependent Relationships in Ecosystems

- The food of almost any kind of animal can be traced back to plants. Organisms are related in food webs in which some animals eat plants for food and other animals eat the animals that eat plants. Some organisms, such as fungi and bacteria, break down dead organisms (both plants or plants parts and animals) and therefore operate as "decomposers." Decomposition eventually restores (recycles) some materials back to the soil. Organisms can survive only in environments in which their particular needs are met. A healthy ecosystem is one in which multiple species of different types are each able to meet their needs in a relatively stable web of life. Newly introduced species can damage the balance of an ecosystem. (LS2-4-1)

#### LS2.B: Cycles of Matter and Energy Transfer in Ecosystems

- Matter cycles between the air and soil and among plants, animals, and microbes as these organisms live and die. Organisms obtain gases, and water, from the environment, and release waste matter (gas, liquid, or solid) back into the environment. (LS2-4-1)

## **ESS: Earth and Space Sciences**

### **ESS1-4 Earth's Place in the Universe**

#### **Performance Standards**

Students who demonstrate understanding can:

#### **ESS1-4-1. Identify evidence from patterns in rock formations and fossils in rock layers for changes in a landscape over time to support an explanation for changes in a landscape over time.**

- Further Explanation: Examples of evidence from patterns could include rock layers with marine shell fossils above rock layers with plant fossils and no shells, indicating a change from land to water over time; and, a canyon with different rock layers in the walls and a river in the bottom, indicating that over time a river cut through the rock.
- Content Limit: Assessment does not include specific knowledge of the mechanism of rock formation or memorization of specific rock formations and layers. Assessment is limited to relative time.

#### **Supporting Content**

#### **ESS1.C: The History of Planet Earth**

- Local, regional, and global patterns of rock formations reveal changes over time due to earth forces, such as earthquakes. The presence and location of certain fossil types indicate the order in which rock layers were formed. (ESS1-4-1)
- There are three classifications of rocks produced within the rock cycle: sedimentary, metamorphic, and igneous. (ESS1-4-1).

## ESS2-4 Earth's Systems

### Performance Standards

Students who demonstrate understanding can:

#### ESS2-4-1. Make observations and/or measurements to provide evidence of the effects of weathering or the rate of erosion by water, ice, wind, or vegetation.

- Further Explanation: Examples of variables to test could include angle of slope in the downhill movement of water, amount of vegetation, speed of wind, relative rate of deposition, cycles of freezing and thawing of water, cycles of heating and cooling, and volume of water flow.
- Content Limit: Assessment is limited to a single form of weathering or erosion.

#### ESS2-4-2. Analyze and interpret data from maps to describe patterns of Earth's features.

- Further Explanation: Maps can include topographic maps of Earth's land and ocean floor, as well as maps of the locations of mountains, continental boundaries, volcanoes, and earthquakes.

### Supporting Content

#### ESS2.A: Earth Materials and Systems

- Rainfall helps to shape the land and affects the types of living things found in a region. Water, ice, wind, living organisms, and gravity break rocks, soils, and sediments into smaller particles and move them around. (ESS2-4-1)

#### ESS2.B: Plate Tectonics and Large-Scale System Interactions

- The locations of mountain ranges, deep ocean trenches, ocean floor structures, earthquakes, and volcanoes occur in patterns. Most earthquakes and volcanoes occur in bands that are often along the boundaries between continents and oceans. Major mountain chains form inside continents or near their edges. Maps can help locate the different land and water features areas of Earth. (ESS2-4-2)

#### ESS2.E: Biogeology

- Living things affect the physical characteristics of their regions. (ESS2-4-1)

## ESS3-4 Earth and Human Activity

### Performance Standards

Students who demonstrate understanding can:

**ESS3-4-1. Obtain and combine information to describe that energy and fuels are derived from natural resources and their uses affect the environment.**

- Further Explanation: Examples of renewable energy resources could include wind energy, water behind dams, and sunlight; non-renewable energy resources are fossil fuels and atomic energy. Examples of environmental effects could include negative biological impacts of wind turbines, erosion due to deforestation, loss of habitat due to dams, loss of habitat due to surface mining, and air pollution from burning of fossil fuels.

**ESS3-4-2. Generate and compare multiple solutions to reduce the impacts of natural Earth processes on humans.**

- Further Explanation: Examples of solutions could include designing an earthquake resistant building and improving monitoring of volcanic activity.
- Content Limit: Assessment is limited to earthquakes, floods, tsunamis, and volcanic eruptions.

### Supporting Content

**ESS3.A: Natural Resources**

- Energy and fuels that humans use are derived from natural sources, and their use affects the environment in multiple ways. Some resources are renewable over time, and others are not. (ESS3-4-1)

**ESS3.B: Natural Hazards**

- A variety of hazards result from natural processes (e.g., earthquakes, tsunamis, volcanic eruptions). Humans cannot eliminate the hazards but can take steps to reduce their impacts. (ESS3-4-2)

**ETS1.B: Designing Solutions to Engineering Problems**

- Testing a solution involves investigating how well it performs under a range of likely conditions. (ESS3-4-2)

## Elementary School (5<sup>th</sup> Grade)

### PS: Physical Sciences

#### PS1-5 Matter and Its Interactions

#### Performance Standards

Students who demonstrate understanding can:

##### PS1-5-1. Develop a model to describe that matter is made of particles too small to be seen.

- Further Explanation: Examples of evidence supporting a model could include adding air to expand a basketball, compressing air in a syringe, dissolving sugar in water, and evaporating salt water.
- Content Limit: Assessment does not include the atomic-scale mechanism of evaporation and condensation or defining the unseen particles.

##### PS1-5-2. Measure and graph quantities to provide evidence that regardless of the type of change that occurs when heating, cooling, or mixing substances, the total weight of matter is conserved.

- Further Explanation: Examples of reactions or changes could include phase changes, dissolving, and mixing that form new substances.
- Content Limit: Assessment does not include distinguishing mass and weight.

##### PS1-5-3. Make observations and measurements to identify materials based on their properties.

- Further Explanation: Examples of materials to be identified could include baking soda and other powders, metals, minerals, and liquids. Examples of properties could include color, hardness, reflectivity, electrical conductivity, thermal conductivity, response to magnetic forces, and solubility; density is not intended as an identifiable property.
- Content Limit: Assessment does not include density or distinguishing mass and weight.

##### PS1-5-4. Conduct an investigation to determine whether the mixing of two or more substances results in new substances.

#### Supporting Content

##### PS1.A: Structure and Properties of Matter

- Matter of any type can be subdivided into particles that are too small to see, but even then the matter still exists and can be detected by other means. A model showing that gases are made from matter particles that are too small to see and are moving freely around in space can explain many observations, including the inflation and shape of a balloon and the effects of air on larger particles or objects. (PS1-5-1)
- The amount (weight) of matter is conserved when it changes form, even in transitions in which it seems to vanish. (PS1-5-2)
- Measurements of a variety of properties can be used to identify materials. (Boundary: At this grade level, mass and weight are not distinguished, and no attempt is made to define the unseen particles or explain the atomic-scale mechanism of evaporation and condensation.) (PS1-5-3)

##### PS1.B: Chemical Reactions

- When two or more different substances are mixed, a new substance with different properties may be formed. (PS1-5-4)
- No matter what reaction or change in properties occurs, the total weight of the substances does not change. (Boundary: Mass and weight are not distinguished at this grade level.) (PS1-5-2)

## PS2-5 Motion and Stability: Forces and Interactions

### Performance Standards

Students who demonstrate understanding can:

**PS2-5-1. Support an argument that the gravitational force exerted by Earth on objects is directed down.**

- Further Explanation: "Down" is a local description of the direction that points toward the center of the spherical Earth.
- Content Limit: Assessment does not include mathematical representation of gravitational force.

### Supporting Content

**PS2.B: Types of Interactions**

- The gravitational force of Earth acting on an object near Earth's surface pulls that object toward the planet's center. (PS2-5-1)

## PS3-5 Energy

### Performance Standards

Students who demonstrate understanding can:

**PS3-5-1. Use models to describe that energy in animals' food (used for body repair, growth, motion, and to maintain body warmth) was once energy from the sun.**

- Further Explanation: Examples of models could include diagrams, and flow charts.

### Supporting Content

**PS3.D: Energy in Chemical Processes and Everyday Life**

- The energy released from food was once energy from the sun that was captured by plants in the chemical process that forms plant matter (from air and water). (PS3-5-1)

**LS1.C: Organization for Matter and Energy Flow in Organisms**

- Food provides animals with the materials they need for body repair and growth and the energy they need to maintain body warmth and for motion. (PS3-5-1)

## LS: Life Sciences

### LS1-5 Molecules to Organisms: Structure and Processes

#### **Performance Standards**

Students who demonstrate understanding can:

**LS1-5-1. Support an argument that plants get the materials they need for growth chiefly from air and water.**

- Further Explanation: Emphasis is on the idea that plant matter comes mostly from air and water, not from the soil.

#### **Supporting Content**

**LS1.C: Organization for Matter and Energy Flow in Organisms**

- Plants acquire their material for growth chiefly from air and water. (LS1-5-1)

### LS2-5 Biological Adaptation: Unity and Diversity

#### **Performance Standards**

Students who demonstrate understanding can:

**LS2-5-1. Analyze and interpret data from fossils to provide evidence of the organisms and the environments in which they lived long ago.**

- Further Explanation: Examples of data could include type, size, and distributions of fossil organisms. Examples of fossils and environments could include marine fossils found on dry land, tropical plant fossils found in Arctic areas, and fossils of extinct organisms.
- Content Limit: Assessment does not include identification of specific fossils or present plants and animals. Assessment is limited to major fossil types and relative ages.

**LS2-5-2. Use evidence to construct an explanation for how the variations in characteristics among individuals of the same species may provide advantages in surviving, finding mates, and reproducing.**

- Further Explanation: Examples of cause and effect relationships could be plants that have larger thorns than other plants may be less likely to be eaten by predators; and, animals that have better camouflage coloration than other animals may be more likely to survive and therefore more likely to leave offspring.

**LS2-5-3. Construct an argument with evidence that in a particular habitat some organisms can survive well, some survive less well, and some cannot survive at all.**

- Further Explanation: Examples of evidence could include needs and characteristics of the organisms and habitats involved. The organisms and their habitat make up a system in which the parts depend on each other.

**LS2-5-4. Make a claim about the merit of a solution to a problem caused when the environment changes and the types of plants and animals that live there may change.**

- Further Explanation: Examples of environmental changes could include changes in land characteristics, water distribution, temperature, food, and other organisms.
- Content Limit: Assessment is limited to a single environmental change. Assessment does not include the greenhouse effect or climate change.

## Supporting Content

### LS2.C: Ecosystem Dynamics, Functioning, and Resilience

- When the environment changes in ways that affect a place's physical characteristics, temperature, or availability of resources, some organisms survive and reproduce, others move to new locations, yet others move into the transformed environment, and some die. (LS2-5-4)

### LS4.A: Evidence of Common Ancestry and Diversity

- Some kinds of plants and animals that once lived on Earth are no longer found anywhere. (LS2-5-1)
- Fossils provide evidence about the types of organisms that lived long ago and also about the nature of their environments. (LS2-5-1)

### LS4.B: Natural Selection

- Sometimes the differences in characteristics between individuals of the same species provide advantages in surviving, finding mates, and reproducing. (LS2-5-2)

### LS4.C: Adaptation

- For any particular environment, some kinds of organisms survive well, some survive less well, and some cannot survive at all. (LS2-5-3)

### LS4.D: Biodiversity and Humans

- Populations of animals are classified by their characteristics. (LS2-5-2)
- Populations live in a variety of habitats, and change in those habitats affects the organisms living there. (LS2-5-4)

## **ESS: Earth and Space Sciences**

### **ESS1-5 Earth's Place in the Universe**

#### **Performance Standards**

Students who demonstrate understanding can:

**ESS1-5-1. Support an argument that differences in the apparent brightness of the sun compared to other stars is due to their relative distances from the Earth.**

- Content Limit: Assessment is limited to relative distances, not sizes, of stars. Assessment does not include other factors that affect apparent brightness (such as stellar masses, age, or stage).

**ESS1-5-2. Represent data in graphical displays to reveal patterns of daily changes in length and direction of shadows, day and night, and the seasonal appearance of some stars in the night sky.**

- Further Explanation: Examples of patterns could include the position and motion of Earth with respect to the sun and selected stars that are visible only in particular months.
- Content Limit: Assessment does not include causes of seasons.

#### **Supporting Content**

**ESS1.A: The Universe and its Stars**

- The sun is a star that appears larger and brighter than other stars because it is closer. Stars range greatly in their distance from Earth. (ESS1-5-1)

**ESS1.B: Earth and the Solar System**

- The orbits of Earth around the sun and of the moon around Earth, together with the rotation of Earth about an axis between its North and South poles, cause observable patterns. These include day and night; daily changes in the length and direction of shadows; and different positions of the sun, moon, and stars at different times of the day, month, and year. (ESS1-5-2)

## ESS2-5 Earth's Systems

### Performance Standards

Students who demonstrate understanding can:

#### ESS2-5-1. Develop a model using an example to describe ways the geosphere, biosphere, hydrosphere, and/or atmosphere interact.

- Further Explanation: Examples could include the influence of the ocean on ecosystems, landform shape, and climate; the influence of the atmosphere on landforms and ecosystems through weather and climate; and the influence of mountain ranges on winds and clouds in the atmosphere. The geosphere, hydrosphere, atmosphere, and biosphere are each a system.
- Content Limit: Assessment is limited to the interactions of two systems at a time.

#### ESS2-5-2. Describe and graph the amounts and percentages of water and fresh water in various reservoirs to provide evidence about the distribution of water on Earth.

- Content Limit: Assessment is limited to oceans, lakes, rivers, glaciers, ground water, and polar ice caps, and does not include the atmosphere.

### Supporting Content

#### ESS2.A: Earth Materials and Systems

- Earth's major systems are the geosphere (solid and molten rock, soil, and sediments), the hydrosphere (water and ice), the atmosphere (air), and the biosphere (living things, including humans). These systems interact in multiple ways to affect Earth's surface materials and processes. The ocean supports a variety of ecosystems and organisms, shapes landforms, and influences climate. Winds and clouds in the atmosphere interact with the landforms to determine patterns of weather. (ESS2-5-1)

#### ESS2.C: The Roles of Water in Earth's Surface Processes

- Nearly all of Earth's available water is in the ocean. Most fresh water is in glaciers or underground; only a tiny fraction is in streams, lakes, wetlands, and the atmosphere. (ESS2-5-2)

## ESS3-5 Earth and Human Activity

### Performance Standards

Students who demonstrate understanding can:

#### ESS3-5-1. Support Obtain and combine information about ways individual communities use science ideas to protect the Earth's resources and environment.

### Supporting Content

#### ESS3.C: Human Impacts on Earth Systems

- Human activities in agriculture, industry, and everyday life have effects on the land, vegetation, streams, ocean, air, and even outer space. Individuals and communities are doing things to help protect Earth's resources and environments. (ESS3-5-1)

## Middle School (6-8)

### PS: Physical Sciences

#### PS1-MS Matter and Its Interactions

#### Performance Standards

Students who demonstrate understanding can:

##### PS1-MS-1. Develop models to describe the atomic composition of simple molecules and extended structures.

- Further Explanation: Emphasis is on developing models of molecules that vary in complexity. Examples of simple molecules could include ammonia and methanol. Examples of extended structures could include sodium chloride or diamonds. Examples of molecular-level models could include drawings, 3D ball and stick structures, or computer representations showing different molecules with different types of atoms.
- Content Limit: Assessment does not include valence electrons and bonding energy, discussing the ionic nature of subunits of complex structures, or a complete depiction of all individual atoms in a complex molecule or extended structure.

##### PS1-MS-2. Analyze and interpret data on the properties of substances before and after the substances interact to determine if a chemical reaction has occurred.

- Further Explanation: Examples of reactions could include burning sugar or steel wool, fat reacting with sodium hydroxide, and mixing zinc with hydrogen chloride.
- Content Limit: Assessment is limited to analysis of the following properties: density, melting point, boiling point, solubility, flammability, and odor.

##### PS1-MS-3. Gather and make sense of information to describe that synthetic materials come from natural resources and impact society.

- Further Explanation: Emphasis is on natural resources that undergo a chemical process to form the synthetic material. Examples of new materials could include new medicine, foods, and alternative fuels.
- Content Limit: Assessment is limited to qualitative information.

##### PS1-MS-4. Develop a model that predicts and describes changes in particle motion, temperature, and state of a pure substance when thermal energy is added or removed.

- Further Explanation: Emphasis is on qualitative molecular-level models of solids, liquids, and gases to show that adding or removing thermal energy increases or decreases kinetic energy of the particles until a change of state occurs. Examples of models could include drawings and diagrams. Examples of particles could include molecules or inert atoms. Examples of pure substances could include water, carbon dioxide, and helium.

##### PS1-MS-5. Develop and use a model to describe how the total number of atoms does not change in a chemical reaction and thus mass is conserved.

- Further Explanation: Emphasis is on law of conservation of matter and on physical models or drawings, including digital forms, that represent atoms.
- Content Limit: Assessment does not include the use of atomic masses, balancing symbolic equations, or intermolecular forces.

##### PS1-MS-6. Undertake a design project to construct, test, and modify a device that either releases or absorbs thermal energy by chemical processes.

- Further Explanation: Emphasis is on the design, controlling the transfer of energy to the environment, and modification of a device using factors such as type and concentration of a substance. Examples of designs could involve chemical reactions such as dissolving ammonium chloride or calcium chloride.
- Content Limit: Assessment is limited to the criteria of amount, time, and temperature of substance in testing the device.

## Supporting Content

### **PS1.A Structure and Properties of Matter**

- Substances are made from different types of atoms, which combine with one another in various ways. Atoms form molecules that range in size from two to thousands of atoms. (PS1-MS-1)
- Each pure substance has characteristic physical and chemical properties (for any bulk quantity under given conditions) that can be used to identify it. (PS1-MS-2, PS1-MS-3)
- Gases and liquids are made of molecules or inert atoms that are moving about relative to each other. (PS1-MS-4)
- In a liquid, the molecules are constantly in contact with others; in a gas, they are widely spaced except when they happen to collide. In a solid, atoms are closely spaced and may vibrate in position but do not change relative locations. (PS1-MS-4)
- Solids may be formed from molecules, or they may be extended structures with repeating subunits (e.g., crystals). (PS1-MS-1)
- The changes of state that occur with variations in temperature or pressure can be described and predicted using these models of matter. (PS1-MS-4)

### **PS1.B Chemical Reactions**

- Substances react chemically in characteristic ways. In a chemical process, the atoms that make up the original substances are regrouped into different molecules, and these new substances have different properties from those of the reactants. (PS1-MS-1, PS1-MS-3, PS1-MS-5)
- The total number of each type of atom is conserved, and thus the mass does not change. (PS1-MS-5)
- Some chemical reactions release energy, others store energy. (PS1-MS-6)

### **PS3A: Definitions of Energy**

- The term "heat" as used in everyday language refers both to thermal energy (the motion of atoms or molecules within a substance) and the transfer of that thermal energy from one object to another. In science, heat is used only for this second meaning; it refers to the energy transferred due to the temperature difference between two objects. (PS1-MS-4)
- The temperature of a system is proportional to the average internal kinetic energy and potential energy per atom or molecule (whichever is the appropriate building block for the system's material). The details of that relationship depend on the type of atom or molecule and the interactions among the atoms in the material. Temperature is not a direct measure of a system's total thermal energy. The total thermal energy (sometimes called total internal energy) of a system depends jointly on the temperature, the total number of atoms in the system, and the state of the material. (PS1-MS-6)

### **ETS1.B Developing Possible Solutions**

- A solution needs to be tested, and then modified on the basis of the test results in order to improve it. (PS1-MS-6)
- The iterative process of testing the most promising solutions and modifying what is proposed on the basis of the test results leads to greater refinement and ultimately to an optimal solution. (PS1-MS-6)

## PS2-MS Motion and Stability: Forces and Interactions

### Performance Standards

Students who demonstrate understanding can:

#### **PS2-MS-1. Apply Newton's Third Law to design a solution to a problem involving the motion of two colliding objects.**

- Further Explanation: Examples of practical problems could include the impact of collisions between two cars, between a car and stationary objects, and between a meteor and a space vehicle.
- Content Limit: Assessment is limited to vertical or horizontal interactions in one dimension.

**PS2-MS-2. Plan an investigation to provide evidence that the change in an object's motion depends on the sum of the forces on the object and the mass of the object.**

- Further Explanation: Emphasis is on balanced (Newton's First Law) and unbalanced forces in a system, qualitative comparisons of forces, mass and changes in motion (Newton's Second Law), frame of reference, and specification of units.
- Content Limit: Assessment is limited to forces and changes in motion in one-dimension in an inertial reference frame and to change in one variable at a time. Assessment does not include the use of trigonometry.

**PS2-MS-3. Ask questions about data to determine the factors that affect the strength of electric and magnetic forces.**

- Further Explanation: Examples of devices that use electric and magnetic forces could include electromagnets, electric motors, or generators. Examples of data could include the effect of the number of turns of wire on the strength of an electromagnet, or the effect of increasing the number or strength of magnets on the speed of an electric motor.
- Content Limit: Assessment about questions that require quantitative answers is limited to proportional reasoning and algebraic thinking.

**PS2-MS-4. Construct and present arguments using evidence to support the claim that gravitational interactions are attractive and depend on the masses of interacting objects.**

- Further Explanation: Examples of evidence for arguments could include data generated from simulations or digital tools; and charts displaying mass, strength of interaction, distance from the Sun, and orbital periods of objects within the solar system.
- Content Limit: Assessment does not include Newton's Law of Gravitation or Kepler's Laws.

**PS2-MS-5. Conduct an investigation and evaluate the experimental design to provide evidence that fields exist between objects exerting forces on each other even though the objects are not in contact.**

- Further Explanation: Examples of this phenomenon could include the interactions of magnets, electrically-charged strips of tape, and electrically-charged pith balls. Examples of investigations could include first-hand experiences or simulations.
- Content Limit: Assessment is limited to electric and magnetic fields, and limited to qualitative evidence for the existence of fields.

## Supporting Content

**PS2.A: Forces and Motion**

- For any pair of interacting objects, the force exerted by the first object on the second object is equal in strength to the force that the second object exerts on the first, but in the opposite direction (Newton's third law). (PS2-MS-1)
- The motion of an object is determined by the sum of the forces acting on it; if the total force on the object is not zero, its motion will change. The greater the mass of the object, the greater the force needed to achieve the same change in motion. For any given object, a larger force causes a larger change in motion. (PS2-MS-2)
- All positions of objects and the directions of forces and motions must be described in an arbitrarily chosen reference frame and arbitrarily chosen units of size. In order to share information with other people, these choices must also be shared. (PS2-MS-2)

**PS2.B: Types of Interactions**

- Electric and magnetic (electromagnetic) forces can be attractive or repulsive, and their sizes depend on the magnitudes of the charges, currents, or magnetic strengths involved and on the distances between the interacting objects. (PS2-MS-3)
- Gravitational forces are always attractive. There is a gravitational force between any two masses, but it is very small except when one or both of the objects have large mass—e.g., Earth and the sun. (PS2-MS-4)
- Forces that act at a distance (electric, magnetic, and gravitational) can be explained by fields that extend through space and can be mapped by their effect on a test object (a charged object, or a ball, respectively). (PS2-MS-5)

## PS3-MS Energy

### Performance Standards

Students who demonstrate understanding can:

**PS3-MS-1. Construct and interpret graphical displays of data to describe the relationships of kinetic energy to the mass of an object and to the speed of an object.**

- Further Explanation: Emphasis is on descriptive relationships between kinetic energy and mass separately from kinetic energy and speed. Examples could include riding a bicycle at different speeds, rolling different sizes of rocks downhill, and getting hit by a wiffle ball versus a tennis ball.

**PS3-MS-2. Develop a model to describe that when the arrangement of objects interacting at a distance changes, different amounts of potential energy are stored in the system.**

- Further Explanation: Emphasis is on relative amounts of potential energy, not on calculations of potential energy. Examples of objects within systems interacting at varying distances could include: the Earth and either a roller coaster cart at varying positions on a hill or objects at varying heights on shelves, changing the direction/orientation of a magnet, and a balloon with static electrical charge being brought closer to a classmate's hair. Examples of models could include representations, diagrams, pictures, and written descriptions of systems.
- Content Limit: Assessment is limited to two objects and electric, magnetic, and gravitational interactions.

**PS3-MS-3. Apply scientific principles to design, construct, and test a device that either minimizes or maximizes thermal energy transfer.**

- Further Explanation: Examples of devices could include an insulated box, a solar cooker, and a Styrofoam cup.
- Content Limit: Assessment does not include calculating the total amount of thermal energy transferred.

**PS3-MS-4. Plan an investigation to determine the relationships among the energy transferred, the type of matter, the mass, and the change in the average kinetic energy of the particles as measured by the temperature of the sample.**

- Further Explanation: Examples of experiments could include comparing final water temperatures after different masses of ice melted in the same volume of water with the same initial temperature, the temperature change of samples of different materials with the same mass as they cool or heat in the environment, or the same material with different masses when a specific amount of energy is added.
- Content Limit: Assessment does not include calculating the total amount of thermal energy transferred.

**PS3-MS-5. Construct, use, and present arguments to support the claim that when the kinetic energy of an object changes, energy is transferred to or from the object.**

- Further Explanation: Examples of empirical evidence used in arguments could include an inventory or other representation of the energy before and after the transfer in the form of temperature changes or motion of object.
- Content Limit: Assessment does not include calculations of energy.

**PS3.A: Definitions of Energy**

- Motion energy is properly called kinetic energy; it is proportional to the mass of the moving object and grows with the square of its speed. (PS3-MS-1)
- A system of objects may also contain stored (potential) energy, depending on their relative positions. (PS3-MS-2)
- Temperature is a measure of the average kinetic energy of particles of matter. The relationship between the temperature and the total energy of a system depends on the types, states, and amounts of matter present. (PS3-MS-3, PS3-MS-4)

**PS3.B: Conservation of Energy and Energy Transfer**

- When the motion energy of an object changes, there is inevitably some other change in energy at the same time. (PS3-MS-5)
- The amount of energy transfer needed to change the temperature of a matter sample by a given amount depends on the nature of the matter, the size of the sample, and the environment. (PS3-MS-4)
- Energy is spontaneously transferred out of hotter regions or objects and into colder ones. (PS3-MS-3)

**PS3.C: Relationship Between Energy and Forces**

- When two objects interact, each one exerts a force on the other that can cause energy to be transferred to or from the object. (PS3-MS-2)

**ETS1.A: Defining and Delimiting an Engineering Problem**

- The more precisely a design task's criteria and constraints can be defined, the more likely it is that the designed solution will be successful. Specification of constraints includes consideration of scientific principles and other relevant knowledge that is likely to limit possible solutions. (PS3-MS-3)

**ETS1.B: Developing Possible Solutions**

- A solution needs to be tested, and then modified on the basis of the test results in order to improve it. There are systematic processes for evaluating solutions with respect to how well they meet criteria and constraints of a problem. (PS3-MS-3)

## PS4-MS Waves

### Performance Standards

Students who demonstrate understanding can:

**PS4-MS-1. Use mathematical representations to describe a simple model for waves that includes how the amplitude of a wave is related to the energy in a wave.**

- Further Explanation: Emphasis is on describing waves with both qualitative and quantitative thinking.
- Content Limit: Assessment does not include electromagnetic waves and is limited to standard repeating waves.

**PS4-MS-2. Develop and use a model to describe that waves are reflected, absorbed, or transmitted through various materials.**

- Further Explanation: Emphasis is on both light and mechanical waves. Examples of models could include drawings, simulations, and written descriptions.
- Content Limit: Assessment is limited to qualitative applications pertaining to light and mechanical waves.

**PS4-MS-3. Integrate qualitative scientific and technical information to support the claim that digitized signals are a more reliable way to encode and transmit information than analog signals.**

- Further Explanation: Emphasis is on a basic understanding that waves can be used for communication purposes. Examples could include using fiber optic cable to transmit light pulses, radio wave pulses in WIFI devices, and conversion of stored binary patterns to make sound or text on a computer screen.
- Content Limit: Assessment does not include binary counting. Assessment does not include the specific mechanism of any given device.

### Supporting Content

**PS4.A: Wave Properties**

- A simple wave has a repeating pattern with a specific wavelength, frequency, and amplitude. (PS4-MS-1)
- A sound wave needs a medium through which it is transmitted. (PS4-MS-2)

**PS4.B: Electromagnetic Radiation**

- When light shines on an object, it is reflected, absorbed, or transmitted through the object, depending on the object's material and the frequency (color) of the light. (PS4-MS-2)
- The path that light travels can be traced as straight lines, except at surfaces between different transparent materials (e.g., air and water, air and glass) where the light path bends. (PS4-MS-2)
- A wave model of light is useful for explaining brightness, color, and the frequency-dependent bending of light at a surface between media. (PS4-MS-2)
- However, because light can travel through space, it cannot be a matter wave, like sound or water waves. (PS4-MS-2)

**PS4.C: Information Technologies and Instrumentation**

- Digitized signals (sent as wave pulses) are a more reliable way to encode and transmit information. (PS4-MS-3)

## **LS: Life Sciences**

### **LS1-MS Molecules to Organisms: Structure and Processes**

#### **Performance Standards**

Students who demonstrate understanding can:

**MS-LS1-1. Conduct an investigation to provide evidence that living things are made of cells; either one cell or many different numbers and types of cells.**

- Further Explanation: Emphasis is on developing evidence that living things are made of cells, distinguishing between living and non-living cells, and understanding that living things may be made of one cell or many and varied cells.

**MS-LS1-2. Develop and use a model to describe the function of a cell as a whole and ways parts of cells contribute to the function.**

- Further Explanation: Emphasis is on the cell functioning as a whole system and the primary role of identified parts of the cell, specifically the nucleus, chloroplasts, mitochondria, cell membrane, and cell wall. These are visible with a light microscope.
- Content Limit: Assessment of organelle structure/function relationships is limited to the cell wall and cell membrane. Assessment of the function of the other organelles is limited to their relationship to the whole cell. Assessment does not include the biochemical function of cells or cell parts.

**MS-LS1-3. Use argument supported by evidence for how a living organism is a system of interacting subsystems composed of groups of cells.**

- Further Explanation: Emphasis is on the conceptual understanding that cells form tissues and tissues form organs specialized for particular body functions. Examples could include the interaction of subsystems within a system and the normal functioning of those systems.
- Content Limit: Assessment does not include the mechanism of one body system independent of others. Assessment is not focused on human body systems.

**MS-LS1-4. Construct a scientific argument based on evidence to defend a claim of life for a specific object or organism.**

- Further Explanation: Examples should include both biotic and abiotic items, and should be defended using accepted characteristics of life.
- Content Limit: Assessment does not include viruses, or other disputed examples.

**MS-LS1-5. Construct a scientific explanation based on evidence for the role of photosynthesis in the cycling of matter and flow of energy into and out of organisms.**

- Further Explanation: Emphasis is on tracing movement of matter and flow of energy.
- Content Limit: Assessment does not include the biochemical mechanisms of photosynthesis.

**MS-LS1-6. Develop a model to describe how food is rearranged through chemical reactions forming new molecules that support growth and/or release energy as this matter moves through an organism.**

- Further Explanation: Emphasis is on describing that molecules are broken apart and put back together and that in this process, energy is released. Also understanding that the elements in the products are the same as the elements in the reactants.
- Content Limit: Assessment does not include details of the chemical reactions for photosynthesis or respiration.

#### **Supporting Content**

**LS1.A: Structure and Function**

- All living things are made up of cells, which is the smallest unit that can be said to be alive. An organism may consist of one single cell (unicellular) or many different numbers and types of cells (multicellular). (LS1-MS-1)
- Within cells, special structures are responsible for particular functions, and the cell membrane forms the boundary that controls what enters and leaves the cell. (LS1-MS-2) In multicellular organisms, the body is a system of multiple interacting subsystems. These subsystems are groups of cells that work together to form tissues and organs that are specialized for particular body functions. (LS1-MS-3)

**SDE**

**TAB 7 Page 83**

**LS1.B: Characteristics of Living Things**

- Organisms reproduce, either sexually or asexually, and transfer their genetic information to their offspring. (LS1-MS-4)
- Living things share certain characteristics. (These include response to environment, reproduction, energy use, growth and development, life cycles, made of cells, etc.) (LS1-MS-4)

**LS1.C: Organization for Matter and Energy Flow in Organisms**

- Plants, algae (including phytoplankton), and many microorganisms use the energy from light to make sugars (food) from carbon dioxide from the atmosphere and water through the process of photosynthesis, which also releases oxygen. These sugars can be used immediately or stored for growth or later use. (LS1-MS-5)
- Within individual organisms, food moves through a series of chemical reactions (cellular respiration) in which it is broken down and rearranged to form new molecules, to support growth, or to release energy. (LS1-MS-6)

**LS2-MS Ecosystems: Interactions, Energy, and Dynamics**

**Performance Standards**

Students who demonstrate understanding can:

**LS2-MS-1. Analyze and interpret data to provide evidence for the effects of resource availability on organisms and populations of organisms in an ecosystem.**

- Further Explanation: Emphasis is on cause and effect relationships between resources and growth of individual organisms and the numbers of organisms in ecosystems during periods of abundant and scarce resources.

**LS2-MS-2. Construct an explanation that predicts patterns of interactions among organisms across multiple ecosystems.**

- Further Explanation: Emphasis is on predicting consistent patterns of interactions in different ecosystems in terms of the relationships among and between organisms and abiotic components of ecosystems. Examples of types of interactions could include competitive, predatory, and mutually beneficial.

**LS2-MS-3. Develop a model to describe the cycling of matter and flow of energy among living and nonliving parts of an ecosystem.**

- Further Explanation: Emphasis is on describing the conservation of matter and flow of energy into and out of various ecosystems, and on defining the boundaries of the system.
- Content Limit: Assessment does not include the use of chemical reactions to describe the processes.

**LS2-MS-4. Develop a model to describe the flow of energy through the trophic levels of an ecosystem.**

- Further Explanation: Emphasis is on describing the transfer of mass and energy beginning with producers, moving to primary and secondary consumers, and ending with decomposers.
- Content Limit: Assessment does not include the use of chemical reactions to describe the processes.

**LS2-MS-5. Construct an argument supported by empirical evidence that changes to physical or biological components of an ecosystem affect populations.**

- Further Explanation: Emphasis is on recognizing patterns in data and making warranted inferences about changes in populations, and on evaluating empirical evidence supporting arguments about changes to ecosystems.

**LS2-MS-6. Evaluate competing design solutions for maintaining biodiversity and ecosystem services.**

- Further Explanation: Examples of ecosystem services could include water purification, nutrient recycling, and prevention of soil erosion. Examples of design solution constraints could include scientific, economic, and social considerations.

## Supporting Content

**LS2.A: Interdependent Relationships in Ecosystems**

- Organisms, and populations of organisms, are dependent on their environmental interactions both with other living things and with nonliving factors. (LS2-MS-1)
- In any ecosystem, organisms and populations with similar requirements for food, water, oxygen, or other resources may compete with each other for limited resources, access to which consequently constrains their growth and reproduction. (LS2-MS-1)
- Growth of organisms and population increases are limited by access to resources. (LS2-MS-1)
- Similarly, predatory interactions may reduce the number of organisms or eliminate whole populations of organisms. Mutually beneficial interactions, in contrast, may become so interdependent that each organism requires the other for survival. Although the species involved in these competitive, predatory, and mutually beneficial interactions vary across ecosystems, the patterns of interactions of organisms with their environments, both living and nonliving, are shared. (LS2-MS-2)

**LS2.B: Cycle of Matter and Energy Transfer in Ecosystems**

- Food webs are models that demonstrate how matter and energy is transferred between producers, consumers, and decomposers as the three groups interact within an ecosystem. Transfers of matter into and out of the physical environment occur at every level. Decomposers recycle nutrients from dead plant or animal matter back to the soil in terrestrial environments or to the water in aquatic environments. The atoms that make up the organisms in an ecosystem are cycled repeatedly between the living and nonliving parts of the ecosystem. (LS2-MS-3)
- Food webs can be broken down into multiple energy pyramids. Concepts should include the 10% rule of energy and biomass transfer between trophic levels and the environment. (LS2-MS-4)

**LS2.C: Ecosystem Dynamics, Functioning, and Resilience**

- Ecosystems are dynamic in nature; their characteristics can vary over time. Disruptions to any physical or biological component of an ecosystem can lead to shifts in all its populations. (LS2-MS-5)
- Biodiversity describes the variety of species found in Earth's terrestrial and oceanic ecosystems. The completeness or integrity of an ecosystem's biodiversity is often used as a measure of its health. (LS2-MS-6)

**LS4.D: Biodiversity and Humans**

- Changes in biodiversity can influence humans' resources, such as food, energy, and medicines, as well as ecosystem services that humans rely on—for example, water purification and recycling. (LS2-MS-6)

**ETS1.B: Developing Possible Solutions**

- There are systematic processes for evaluating solutions with respect to how well they meet the criteria and constraints of a problem. (LS2-MS-6)

## LS3-MS Heredity: Inheritance and Variation of Traits

### Performance Standards

Students who demonstrate understanding can:

#### LS3-MS-1. Develop and use a model to describe why mutations may result in harmful, beneficial, or neutral effects to the structure and function of the organism.

- Further Explanation: Emphasis is on conceptual understanding that changes in genetic material may result in making different proteins.
- Content Limit: Assessment does not include specific changes at the molecular level, mechanisms for protein synthesis, or specific types of mutations.

#### LS3-MS-2. Develop and use a model to describe why asexual reproduction results in offspring with identical genetic information and sexual reproduction results in offspring with genetic variation.

- Further Explanation: Emphasis is on using models such as Punnett squares, diagrams, and simulations to describe the cause and effect relationship of gene transmission from parent(s) to offspring and resulting genetic variation.

### Supporting Content

#### LS1.B: Growth and Development of Organisms

- Organisms reproduce, either sexually or asexually, and transfer their genetic information to their offspring. (LS3-MS-2)

#### LS3.A: Inheritance of Traits

- Genes are located in the chromosomes of cells, with each chromosome pair containing two variants of each of many distinct genes. Each distinct gene chiefly controls the production of specific proteins, which in turn affects the traits of the individual. Changes (mutations) to genes can result in changes to proteins, which can affect the structures and functions of the organism and thereby change traits. (LS3-MS-1)
- Variations of inherited traits between parent and offspring arise from genetic differences that result from the subset of chromosomes (and therefore genes) inherited. (LS3-MS-2)

#### LS3.B: Variation of Traits

- In sexually reproducing organisms, each parent contributes half of the genes acquired (at random) by the offspring. Individuals have two of each chromosome and hence two alleles of each gene, one acquired from each parent. These versions may be identical or may differ from each other. (LS3-MS-2)
- In addition to variations that arise from sexual reproduction, genetic information can be altered because of mutations. Though rare, mutations may result in changes to the structure and function of proteins. Some changes are beneficial, others harmful, and some neutral to the organism. (LS3-MS-1)

## LS4-MS Biological Adaptation: Unity and Diversity

### Performance Standards

Students who demonstrate understanding can:

#### LS4-MS-1. Analyze and interpret data for patterns in the fossil record that document the existence, diversity, extinction, and change of life forms throughout the history of life on Earth under the assumption that natural laws operate today as in the past.

- Further Explanation: Emphasis is on finding patterns of changes in the level of complexity of anatomical structures in organisms and the chronological order of fossil appearance in the rock layers.
- Content Limit: Assessment does not include the names of individual species or geological eras in the fossil record.

**LS4-MS-2. Apply scientific ideas to construct an explanation for the anatomical similarities and differences among modern organisms and between modern and fossil organisms to infer relationships.**

- Further Explanation: Emphasis is on explanations of the relationships among organisms in terms of similarity or differences of the gross appearance of anatomical structures.

**LS4-MS-3. Analyze displays of pictorial data to compare patterns of similarities in the anatomical structures across multiple species of similar classification levels to identify relationships.**

- Further Explanation: Emphasis is on inferring general patterns of relatedness among structures of different organisms by comparing the appearance of diagrams or pictures.
- Content Limit: Assessment of comparisons is limited to gross appearance of anatomical structures within genus and species levels. No memorization of classification levels is required.

**LS4-MS-4. Construct an explanation based on evidence that describes how genetic variations of traits in a population increase some individuals' probability of surviving and reproducing in a specific environment.**

- Further Explanation: Emphasis is on using concepts of natural selection like overproduction of offspring, passage of time, variation in a population, selection of favorable traits, and heritability of traits.

**LS4-MS-5. Gather and synthesize information about the technologies that have changed the way humans influence the inheritance of desired traits in organisms.**

- Further Explanation: Emphasis is on synthesizing information from reliable sources about the influence of humans on genetic outcomes in artificial selection (such as genetic modification, animal husbandry, gene therapy); and, on the impacts these technologies have on society as well as the technologies leading to these scientific discoveries.

**LS4-MS-6. Use mathematical representations to support explanations of how natural selection may lead to increases and decreases of specific traits in populations over time.**

- Further Explanation: Emphasis is on using mathematical models, probability statements, and proportional reasoning to support explanations of trends in changes to populations over time. Examples could include Peppered moth population changes before and after the industrial revolution.
- Content Limit: Assessment does not include Hardy Weinberg calculations.

## Supporting Content

**LS4.A: Classification of Organisms**

- The collection of fossils and their placement in chronological order is known as the fossil record and documents the change of many life forms throughout the history of the Earth. Anatomical similarities and differences between various organisms living today and between them and organisms in the fossil record enable the classification of living things. (LS4-MS-1, LS4-MS-2)
- Scientific genus and species level names indicate a degree of relationship. (LS4-MS-3)

**LS4.B: Natural Selection**

- Natural selection leads to the predominance of certain traits in a population, and the suppression of others. (LS4-MS-4)
- In artificial selection, humans have the capacity to influence certain characteristics of organisms by selective breeding. One can choose desired parental traits determined by genes, which are then passed on to offspring. (LS4-MS-5)

**LS4.C: Adaptation**

- Adaptation by natural selection acting over generations is one important process by which species change over time in response to changes in environmental conditions. Traits that support successful survival and reproduction in the new environment become more common; those that do not become less common. Thus, the distribution of traits in a population changes. (LS4-MS-6)

## ESS: Earth and Space Sciences

### ESS1-MS Earth's Place in the Universe

#### **Performance Standards**

Students who demonstrate understanding can:

**ESS1-MS-1. Develop and use a model of the Earth-sun-moon system to describe the cyclic patterns of lunar phases, eclipses of the sun and moon, and seasons.**

- Further Explanation: Examples of models can be physical, graphical, or conceptual.

**ESS1-MS-2. Develop and use a model to describe the role of gravity in the motions within galaxies and the solar system.**

- Further Explanation: Emphasis for the model is on gravity as the force that holds together the solar system and Milky Way galaxy and controls orbital motions within them. Examples of models can be physical (such as the analogy of distance along a football field or computer visualizations of elliptical orbits) or conceptual (such as mathematical proportions relative to the size of familiar objects such as students' school or state).
- Content Limit: Assessment does not include Kepler's Laws of orbital motion or the apparent retrograde motion of the planets as viewed from Earth.

**ESS1-MS-3. Analyze and interpret data to determine scale properties of objects in the solar system.**

- Further Explanation: Emphasis is on the analysis of data from Earth-based instruments, space-based telescopes, and spacecraft to determine similarities and differences among solar system objects. Examples of scale properties include the sizes of an object's layers (such as crust and atmosphere), surface features (such as volcanoes), and orbital radius. Examples of data include statistical information, drawings and photographs, and models.
- Content Limit: Assessment does not include recalling facts about properties of the planets and other solar system bodies.

**ESS1-MS-4. Construct a scientific explanation based on evidence from rock strata for how the geologic time scale is used to organize Earth's history.**

- Further Explanation: Emphasis is on how analyses of rock formations and the fossils they contain are used to establish relative ages of major events in Earth's history. Examples of Earth's major events could range from being very recent (such as the last Ice Age or the earliest fossils of homo sapiens) to very old (such as the formation of Earth or the earliest evidence of life). Examples can include the formation of mountain chains and ocean basins, the evolution or extinction of particular living organisms, or large volcanic eruptions.
- Content Limit: Assessment does not include recalling the names of specific periods or epochs and events within them.

#### **Supporting Content**

**ESS1.A: The Universe and Its Stars**

- Patterns of the apparent motion of the sun, the moon, and stars in the sky can be observed, described, predicted, and explained with models. (ESS1-MS-1)
- Earth and its solar system are part of the Milky Way galaxy, which is one of many galaxies in the universe. (ESS1-MS-2)

**ESS1.B: Earth and the Solar System**

- The solar system consists of the sun and a collection of objects, including planets, their moons, and asteroids that are held in orbit around the sun by its gravitational pull on them. (ESS1-MS-2, ESS1-MS-3)
- This model of the solar system can explain eclipses of the sun and the moon. Earth's spin axis is fixed in direction over the short-term but tilted relative to its orbit around the sun. The seasons are a result of that tilt and are caused by the differential intensity of sunlight on different areas of Earth across the year. (ESS1-MS-1)
- The solar system appears to have formed from a disk of dust and gas, drawn together by gravity. (ESS1-MS-2)

**ESS1.C: The History of Planet Earth**

- The geologic time scale interpreted from rock strata provides a way to organize Earth's history. Analyses of rock strata and the fossil record provide only relative dates, not an absolute scale. (ESS1-MS-4)

## ESS2-MS Earth's Systems

### Performance Standards

Students who demonstrate understanding can:

#### ESS2-MS-1. Develop a model to describe the cycling of Earth's materials and the flow of energy that drives this process.

- Further Explanation: Emphasis is on the processes of melting, crystallization, weathering, deformation, and sedimentation, which act together to form minerals and rocks through the cycling of Earth's materials.
- Content Limit: Assessment does not include the identification and naming of minerals.

#### ESS2-MS-2. Construct an explanation based on evidence for how geoscience processes have changed Earth's surface at varying time and spatial scales.

- Further Explanation: Emphasis is on how processes change Earth's surface at time and spatial scales that can be large (such as slow plate motions or the uplift of large mountain ranges) or small (such as rapid landslides or microscopic geochemical reactions), and how many geoscience processes (such as earthquakes, volcanoes, and meteor impacts) usually behave gradually but are punctuated by catastrophic events. Examples of geoscience processes include surface weathering and deposition by the movements of water, ice, and wind. Emphasis is on geoscience processes that shape local geographic features, where appropriate.

#### ESS2-MS-3. Analyze and interpret data on the distribution of fossils and rocks, continental shapes, and seafloor structures to provide evidence of the past plate motions.

- Further Explanation: Examples of data include similarities of rock and fossil types on different continents, the shapes of the continents (including continental shelves), and the locations of ocean structures (such as ridges, fracture zones, and trenches).
- Content Limit: Paleomagnetic anomalies in oceanic and continental crust are not assessed.

#### ESS2-MS-4. Develop a model to describe the cycling of water through Earth's systems driven by energy from the sun and the force of gravity.

- Further Explanation: Emphasis is on the ways water changes its state as it moves through the multiple pathways of the hydrologic cycle. Examples of models can be conceptual or physical.
- Content Limit: A quantitative understanding of the latent heats of vaporization and fusion is not assessed.

#### ESS2-MS-5. Collect data to provide evidence for how the motions and complex interactions of air masses results in changes in weather conditions.

- Further Explanation: Emphasis is on how air masses flow from regions of high pressure to low pressure, causing weather (defined by temperature, pressure, humidity, precipitation, and wind) at a fixed location to change over time, and how sudden changes in weather can result when different air masses collide. Emphasis is on how weather can be predicted within probabilistic ranges. Examples of data can be provided to students (such as weather maps, diagrams, and visualizations) or obtained through laboratory experiments (such as with condensation).
- Content Limit: Assessment does not include recalling the names of cloud types or weather symbols used on weather maps or the reported diagrams from weather stations.

#### ESS2-MS-6. Develop and use a model to describe how unequal heating and rotation of the Earth cause patterns of atmospheric and oceanic circulation that determine regional climates.

- Further Explanation: Emphasis is on how patterns vary by latitude, altitude, and geographic land distribution. Emphasis of atmospheric circulation is on the sunlight-driven latitudinal banding, the Coriolis effect, and resulting prevailing winds; emphasis of ocean circulation is on the transfer of heat by the global ocean convection

- cycle, which is constrained by the Coriolis effect and the outlines of continents. Examples of models can be diagrams, maps and globes, or digital representations.
- Content Limit: Assessment does not include the dynamics of the Coriolis effect.

## Supporting Content

### **ESS1.C: The History of Planet Earth**

- Tectonic processes continually generate new ocean sea floor at ridges and destroy old sea floor at trenches. (ESS2-MS-3)

### **ESS2.A: Earth's Materials and Systems**

- All Earth processes are the result of energy flowing and matter cycling within and among the planet's systems. This energy is derived from the sun and Earth's hot interior. The energy that flows and matter that cycles produce chemical and physical changes in Earth's materials and living organisms. (ESS2-MS-1)
- The planet's systems interact over scales that range from microscopic to global in size, and they operate over fractions of a second to billions of years. These interactions have shaped Earth's history and will determine its future. (ESS2-MS-2)

### **ESS2.B: Plate Tectonics and Large-Scale System Interactions**

- Maps of ancient land and water patterns, based on investigations of rocks and fossils, make clear how Earth's plates have moved great distances, collided, and spread apart. (ESS2-MS-3)

### **ESS2.C: The Roles of Water in Earth's Surface Processes**

- Water continually cycles among land, ocean, and atmosphere via transpiration, evaporation, condensation and crystallization, and precipitation, as well as downhill flows on land. (ESS2-MS-4)
- The complex patterns of the changes and the movement of water in the atmosphere, determined by winds, landforms, and ocean temperatures and currents, are major determinants of local weather patterns. (ESS2-MS-5)
- Global movements of water and its changes in form are propelled by sunlight and gravity. (ESS2-MS-4)
- Variations in density due to variations in temperature and salinity drive a global pattern of interconnected ocean currents. (ESS2-MS-6)
- Water's movements—both on the land and underground—cause weathering and erosion, which change the land's surface features and create underground formations. (ESS2-MS-2)

### **ESS2.D: Weather and Climate**

- Weather and climate are influenced by interactions involving sunlight, the ocean, the atmosphere, ice, landforms, and living things. These interactions vary with latitude, altitude, and local and regional geography, all of which can affect oceanic and atmospheric flow patterns. (ESS2-MS-6)
- Because these patterns are so complex, weather can only be predicted using probability. (ESS2-MS-5)
- The ocean exerts a major influence on weather and climate by absorbing energy from the sun, releasing it over time, and globally redistributing it through ocean currents. (ESS2-MS-6)

## ESS3-MS Earth and Human Activity

### Performance Standards

Students who demonstrate understanding can:

#### **ESS3-MS-1. Construct a scientific explanation based on evidence for how the uneven distributions of Earth's mineral, energy, and groundwater resources are the result of past and current geoscience processes.**

- Further Explanation: Emphasis is on how these resources are limited and typically non-renewable, and how their distributions are changing as a result of removal by humans. Examples of uneven distributions of resources as a result of past processes include but are not limited to petroleum (locations of the burial of organic marine sediments and subsequent geologic traps), metal ores (locations of past volcanic and hydrothermal activity associated with subduction zones), and soil (locations of active weathering and/or deposition of rock).

**ESS3-MS-2. Analyze and interpret data on natural hazards to forecast future catastrophic events and inform the development of technologies to mitigate their effects.**

- Further Explanation: Emphasis is on how some natural hazards, such as volcanic eruptions and severe weather, are preceded by phenomena that allow for reliable predictions, but others, such as earthquakes, occur suddenly and with no notice, and thus are not yet predictable. Examples of natural hazards can be taken from interior processes (such as earthquakes and volcanic eruptions), surface processes (such as mass wasting and tsunamis), or severe weather events (such as hurricanes, tornadoes, and floods). Examples of data can include the locations, magnitudes, and frequencies of the natural hazards. Examples of technologies can be global (such as satellite systems to monitor hurricanes or forest fires) or local (such as building basements in tornado-prone regions or reservoirs to mitigate droughts).

**ESS3-MS-3. Apply scientific principles to design a method for monitoring and minimizing a human impact on the environment.**

- Further Explanation: Examples of the design process include examining human environmental impacts, assessing the kinds of solutions that are feasible, and designing and evaluating solutions that could reduce that impact. Examples of human impacts can include water usage (such as the withdrawal of water from streams and aquifers or the construction of dams and levees), land usage (such as urban development, agriculture, or the removal of wetlands), and pollution (such as of the air, water, or land).

**ESS3-MS-4. Construct an argument supported by evidence for how increases in human population and per-capita consumption of natural resources impact Earth's systems.**

- Further Explanation: Examples of evidence include grade-appropriate databases on human populations and the rates of consumption of food and natural resources (such as freshwater, mineral, and energy). Examples of impacts can include changes to the appearance, composition, and structure of Earth's systems as well as the rates at which they change. The consequences of increases in human populations and consumption of natural resources are described by science, but science does not make the decisions for the actions society takes.

**ESS3-MS-5. Ask questions to clarify evidence of the factors that have caused the rise in global temperatures over the past century.**

- Further Explanation: Examples of factors include human activities (such as fossil fuel combustion, cement production, and agricultural activity) and natural processes (such as changes in incoming solar radiation or volcanic activity). Examples of evidence can include tables, graphs, and maps of global and regional temperatures, atmospheric levels of gases such as carbon dioxide and methane, and the rates of human activities. Emphasis is on the major role that human activities play in causing the rise in global temperatures.

**ESS3-MS-5. Ask questions to interpret evidence of the factors that cause climate variability over time.**

- Further Explanation: Examples of factors include human activities (such as fossil fuel combustion and changes in land use) and natural processes (such as changes in incoming solar radiation and volcanic activity). Examples of evidence can include tables, graphs, and maps of global and regional temperatures, atmospheric levels of gases such as carbon dioxide and methane, and natural resource use.

**Supporting Content**

**ESS3.A: Natural Resources**

- Humans depend on Earth's land, ocean, atmosphere, and biosphere for many different resources. Minerals, fresh water, and biosphere resources are limited, and many are not renewable or replaceable over human lifetimes. These resources are distributed unevenly around the planet as a result of past geologic processes. (ESS3-MS-1)

**ESS3.B: Natural Hazards**

- Mapping the history of natural hazards in a region, combined with an understanding of related geologic forces can help forecast the locations and likelihoods of future events. (ESS3-MS-2)

**ESS3.C: Human Impacts on Earth Systems**

- Human activities have altered the biosphere, sometimes damaging or destroying natural habitats and causing the extinction of other species. But changes to Earth's environments can have different impacts (negative and positive) for different living things. (ESS3-MS-3)
- Typically, as human populations and per capita consumption of natural resources increase, so do the negative impacts on Earth unless the activities and technologies involved are engineered otherwise. (ESS3-MS-3, ESS3-MS-4)
- Human activities (such as the release of greenhouse gases from the burning of fossil fuel combustion) are major factors in the current rise in Earth's mean surface temperature. Other natural activities (such as volcanic activity) are also contributors to changing global temperatures. Reducing the level of climate change and reducing human vulnerability to whatever climate changes do occur depend on the understanding of climate science, engineering capabilities, and other kinds of knowledge, such as understanding of human behavior and on applying that knowledge wisely in decisions and activities. (ESS3-MS-5)

**ESS3.C: Human Impacts on Earth Systems**

- Human activities can have consequences (negative and positive) on the biosphere, sometimes altering natural habitats and causing the extinction of other species. (ESS3-MS-3)
- Technology and engineering can potentially mitigate impacts on Earth's systems as both human populations and per-capita consumption of natural resources increase. (ESS3-MS-3, ESS3-MS-4)
- Mitigating current changes in climate depends on understanding climate science. Current scientific models indicate that human activities, such as the release of greenhouse gases from fossil fuel combustion, are the primary factors in the measured rise in Earth's mean surface temperature. Natural activities, such as changes in incoming solar radiation, also contribute to changing global temperatures. (ESS3-MS-5)

## High School (9-12)

### LS: Life Sciences (Biology)

#### LS1-HS Molecules to Organisms: Structure and Processes

##### Performance Standards

Students who demonstrate understanding can:

**LS1-HS-1. Construct an explanation based on evidence for how the structure of DNA determines the structure of proteins which carry out the essential functions of life through systems of specialized cells.**

- Further Explanation: Emphasis is on the structure of the double helix, the pairing and sequencing of the nitrogenous bases, transcription, translation, and protein synthesis.
- Content Limit: Assessment does not include identification of specific cell or tissue types, whole body systems, specific protein structures and functions, or the biochemistry of protein synthesis.

**LS1-HS-2. Develop and use a model to illustrate the hierarchical organization of interacting systems that provide specific functions within multicellular organisms.**

- Further Explanation: Emphasis is on functions at the organism system level such as nutrient uptake, water delivery, and organism movement in response to neural stimuli. An example of an interacting system could be an artery depending on the proper function of elastic tissue and smooth muscle to regulate and deliver the proper amount of blood within the circulatory system.
- Content Limit: Assessment does not include interactions and functions at the molecular or chemical reaction level.

**LS1-HS-3. Plan and conduct an investigation to provide evidence that feedback mechanisms maintain homeostasis.**

- Further Explanation: Examples of investigations could include heart rate response to exercise, stomate response to moisture and temperature, and root development in response to water levels.
- Content Limit: Assessment does not include the cellular processes involved in the feedback mechanism.

**LS1-HS-4. Use a model to illustrate the role of cellular division (mitosis) and differentiation in producing and maintaining complex organisms.**

- Content Limit: Assessment does not include specific gene control mechanisms or rote memorization of the steps of mitosis.

**LS1-HS-5. Use a model to illustrate how photosynthesis transforms light energy into stored chemical energy.**

- Further Explanation: Emphasis is on illustrating inputs and outputs of matter and the transfer and transformation of energy in photosynthesis by plants and other photosynthesizing organisms. Examples of models could include diagrams, chemical equations, and conceptual models.
- Content Limit: Assessment does not include specific biochemical steps.

**LS1-HS-6. Construct and revise an explanation based on evidence for how carbon, hydrogen, and oxygen from sugar molecules may combine with other elements to form amino acids and/or other large carbon-based molecules.**

- Further Explanation: Emphasis is on using evidence from models and simulations to support explanations.
- Content Limit: Assessment does not include the details of the specific chemical reactions or identification of macromolecules.

**LS1-HS-7. Use a model to illustrate that cellular respiration is a chemical process whereby the bonds of food molecules and oxygen molecules are broken and the bonds in new compounds are formed resulting in a net transfer of energy.**

- Further Explanation: Emphasis is on the conceptual understanding of the inputs and outputs of the process of cellular respiration.
- Content Limit: Assessment should not include identification of the steps or specific processes involved in cellular respiration.

## Supporting Content

### LS1.A: Structure and Function

- Systems of specialized cells within organisms help them perform the essential functions of life. (LS1-HS-1)
- All cells contain genetic information in the form of DNA molecules. Genes are regions in the DNA that contain the instructions that code for the formation of proteins, which carry out most of the work of cells. (LS1-HS-1)
- Multicellular organisms have a hierarchical structural organization, in which any one system is made up of numerous parts and is itself a component of the next level. (LS1-HS-2)
- Feedback mechanisms maintain a living system's internal conditions within certain limits and mediate behaviors, allowing it to remain alive and functional even as external conditions change within some range. Feedback mechanisms can encourage (through positive feedback) or discourage (negative feedback) what is going on inside the living system. (LS1-HS-3)

### LS1.B: Growth and Development of Organisms

- In multicellular organisms individual cells grow and then divide via a process called mitosis, thereby allowing the organism to grow. The organism begins as a single cell (fertilized egg) that divides successively to produce many cells, with each parent cell passing identical genetic material (two variants of each chromosome pair) to both daughter cells. Cellular division and differentiation produce and maintain a complex organism, composed of systems of tissues and organs that work together to meet the needs of the whole organism. (LS1-HS-4)

### LS1.C: Organization for Matter and Energy Flow in Organisms

- The process of photosynthesis converts light energy to stored chemical energy by converting carbon dioxide plus water into sugars plus released oxygen. (LS1-HS-5)
- The sugar molecules thus formed contain carbon, hydrogen, and oxygen: their hydrocarbon backbones are used to make amino acids and other carbon-based molecules that can be assembled into larger molecules (such as proteins or DNA), used for example to form new cells. (LS1-HS-6)
- As matter and energy flow through different organizational levels of living systems, chemical elements are recombined in different ways to form different products. (LS1-HS-6, LS1-HS-7)
- As a result of these chemical reactions, energy is transferred from one system of interacting molecules to another. Cellular respiration is a chemical process in which the bonds of food molecules and oxygen molecules are broken and new compounds are formed that can transport energy to cells. Cellular respiration also releases the energy needed to maintain body temperature despite ongoing energy transfer to the surrounding environment. (LS1-HS-7)

## LS2-HS Ecosystems: Interactions, Energy, and Dynamics

### Performance Standards

Students who demonstrate understanding can:

#### LS2-HS- 1. Use mathematical and/or computational representations to support explanations of factors that affect carrying capacity of ecosystems at different scales.

- Further Explanation: Emphasis is on quantitative analysis and comparison of the relationships among interdependent factors including boundaries, resources, climate, and competition. Examples of mathematical comparisons could include graphs, charts, histograms, and population changes gathered from simulations or historical data sets.
- Content Limit: Assessment does not include deriving mathematical equations to make comparisons.

**LS2-HS-2. Use mathematical representations to support and revise explanations based on evidence about factors affecting biodiversity and populations in ecosystems of different scales.**

- Further Explanation: Examples of mathematical representations include finding the average, determining trends, and using graphical comparisons of multiple sets of data.
- Content Limit: Assessment is limited to provided data.

**LS2-HS-3. Construct and revise an explanation based on evidence for the cycling of matter and flow of energy in aerobic and anaerobic conditions.**

- Further Explanation: Emphasis is on conceptual understanding of the role of aerobic and anaerobic respiration in different environments.
- Content Limit: Assessment does not include the specific chemical processes of either aerobic or anaerobic respiration.

**LS2-HS-4. Use mathematical representations to support claims for the cycling of matter and flow of energy among organisms in an ecosystem.**

- Further Explanation: Emphasis is on using a mathematical model of stored energy in biomass to describe the transfer of energy from one trophic level to another and that matter and energy are conserved as matter cycles and energy flows through ecosystems. Emphasis is on atoms and molecules such as carbon, oxygen, hydrogen and nitrogen being conserved as they move through an ecosystem.
- Content Limit: Assessment is limited to proportional reasoning to describe the cycling of matter and flow of energy.

**LS2-HS-5. Develop a model to illustrate the role of photosynthesis and cellular respiration in the cycling of carbon among the biosphere, atmosphere, hydrosphere, and geosphere.**

- Further Explanation: Examples of models could include simulations and mathematical models.
- Content Limit: Assessment does not include the specific chemical steps of photosynthesis and respiration.

**LS2-HS-6. Evaluate the claims, evidence, and reasoning that the complex interactions in ecosystems maintain relatively consistent numbers and types of organisms in stable conditions, but changing conditions may result in a new ecosystem.**

- Further Explanation: Examples of changes in ecosystem conditions could include modest biological or physical changes, such as a seasonal flood; and extreme changes, such as volcanic eruption or sea level rise.

**LS2-HS-7. Design, evaluate, and refine a solution for reducing the impacts of human activities on the environment and biodiversity.**

- Further Explanation: Examples of human activities can include urbanization, building dams, and dissemination of invasive species, utilization of non-renewable resources as opposed to renewable resource.

**LS2-HS-8. Evaluate the evidence for the role of group behavior on individual and species' chances to survive and reproduce.**

- Further Explanation: Emphasis is on: (1) distinguishing between group and individual behavior, (2) identifying evidence supporting the outcomes of group behavior, and (3) developing logical and reasonable arguments based on evidence. Examples of group behaviors could include flocking, schooling, herding, and cooperative behaviors such as hunting, migrating, and swarming.

**Supporting Content**

**LS2.A: Interdependent Relationships in Ecosystems**

- Ecosystems have carrying capacities, which are limits to the numbers of organisms and populations they can support. These limits result from such factors as the availability of living and nonliving resources and from such challenges such as predation, competition, and disease. Organisms would have the capacity to produce populations of great size were it not for the fact that environments and resources are finite. This fundamental tension affects the abundance (number of individuals) of species in any given ecosystem. (LS2-HS-1, LS2-HS-2)

**LS2.B: Cycles of Matter and Energy Transfer in Ecosystems**

- Photosynthesis and cellular respiration (including anaerobic processes) provide most of the energy for life processes. (LS2-HS-3)
- Plants or algae form the lowest level of the food web. At each link upward in a food web, only a small fraction of the matter consumed at the lower level is transferred upward, to produce growth and release energy in cellular respiration at the higher level. Given this inefficiency, there are generally fewer organisms at higher levels of a food web. Some matter reacts to release energy for life functions, some matter is stored in newly made structures, and much is discarded. The chemical elements that make up the molecules of organisms pass through food webs and into and out of the atmosphere and soil, and they are combined and recombined in different ways. At each link in an ecosystem, matter and energy are conserved. (LS2-HS-4)
- Photosynthesis and cellular respiration are important components of the carbon cycle, in which carbon is exchanged among the biosphere, atmosphere, oceans, and geosphere through chemical, physical, geological, and biological processes. (LS2-HS-5)

#### **LS2.C: Ecosystem Dynamics, Functioning, and Resilience**

- A complex set of interactions within an ecosystem can keep its numbers and types of organisms relatively constant over long periods of time under stable conditions. If a modest biological or physical disturbance to an ecosystem occurs, it may return to its more or less original status (i.e., the ecosystem is resilient), as opposed to becoming a very different ecosystem. Extreme fluctuations in conditions or the size of any population, however, can challenge the functioning of ecosystems in terms of resources and habitat availability. (LS2-HS-2, LS2-HS-6)
- Moreover, anthropogenic changes (induced by human activity) in the environment—including habitat destruction, pollution, introduction of invasive species, overexploitation, and climate change—can disrupt an ecosystem and threaten the survival of some species. (LS2-HS-7)

#### **LS2.D: Social Interactions and Group Behavior**

- Group behavior has evolved because membership can increase the chances of survival for individuals and their genetic relatives, gene pool. (LS2-HS-8)

#### **LS4.D: Biodiversity and Humans**

- Biodiversity is increased by the formation of new species (speciation) and decreased by the loss of species (extinction). (LS2-HS-7)
- Humans depend on the living world for the resources and other benefits provided by biodiversity. But human activity is also having adverse impacts on biodiversity through overpopulation, overexploitation, habitat destruction, pollution, introduction of invasive species, and climate change. Thus sustaining biodiversity so that ecosystem functioning and productivity are maintained is essential to supporting and enhancing life on Earth. Sustaining biodiversity also aids humanity by preserving landscapes of recreational or inspirational value. (LS2-HS-7, LS4-HS-6.)

#### **LS4.D: Biodiversity and Humans**

- Biodiversity is increased by the formation of new species (speciation) and decreased by the loss of species (extinction). (LS2-HS-7)
- Sustaining ecosystem health and biodiversity is essential to supporting and enhancing life on Earth. Sustaining biodiversity also aids humanity by preserving landscapes of recreational, cultural, or inspirational value. Humans depend on the living world for the resources and other benefits provided by biodiversity. Impacts on biodiversity can be mitigated through actions such as habitat conservation, reclamation practices, wildlife management, and invasive species control. Understanding the effects of population growth, wildfire, pollution, and climate variability on changes in biodiversity could help maintain the integrity of biological systems. (LS2-HS-7, LS4-HS-6.)

## LS3-HS Heredity: Inheritance and Variation of Traits

### Performance Standards

Students who demonstrate understanding can:

**LS3-HS- 1. Ask questions to clarify relationships about the role of DNA and chromosomes in coding the instructions for characteristic traits passed from parents to offspring.**

- Content Limit: Assessment does not include the phases of meiosis or the biochemical mechanism of specific steps in the process.

**LS3-HS-2. Make and defend a claim based on evidence that inheritable genetic variations may result from: (1) new genetic combinations through meiosis, (2) viable errors occurring during replication, and/or (3) mutations caused by environmental factors.**

- Further Explanation: Emphasis is on using data to support arguments for the way variation occurs.
- Content Limit: Assessment does not include the phases of meiosis or the biochemical mechanism of specific steps in the process.

**LS3-HS-3. Apply concepts of statistics and probability to explain the variation and distribution of expressed traits in a population.**

- Further Explanation: Emphasis is on the use of mathematics to describe the probability of traits (alleles) as it relates to genetic and environmental factors in the expression of traits.
- Content Limit: Assessment does not include Hardy-Weinberg calculations.

### Supporting Content

#### **LS1.A: Structure and Function**

- All cells contain genetic information in the form of DNA molecules. Genes are regions in the DNA that contain the instructions that code for the formation of proteins. (LS3-HS-1, LS1-HS-1.)

#### **LS3.A: Inheritance of Traits**

- Each chromosome consists of a single very long DNA molecule, and each gene on the chromosome is a particular segment of that DNA. The instructions for forming species' characteristics are carried in DNA. All cells in an organism have the same genetic content, but the genes used (expressed) by the cell may be regulated in different ways. Not all DNA codes for a protein: some segments of DNA are involved in regulatory or structural functions, and some have no as-yet known function. (LS3-HS-1)

#### **LS3.B: Variation of Traits**

- In sexual reproduction, chromosomes can sometimes swap sections during the process of meiosis (cell division), thereby creating new genetic combinations and thus more genetic variation. Although DNA replication is tightly regulated and remarkably accurate, errors do occur and result in mutations, which are also a source of genetic variation. Environmental factors can also cause mutations in genes, and viable mutations are inherited. (LS3-HS-2)
- Environmental factors also affect expression of traits, and hence affect the probability of occurrences of traits in a population. Thus the variation and distribution of traits observed depends on both genetic and environmental factors. (LS3-HS-2, LS3-HS-3)

## LS4-HS Biological Adaptation: Unity and Diversity

### **Performance Standards**

Students who demonstrate understanding can:

**LS4-HS- 1. Communicate scientific information that common ancestry and biological evolution are supported by multiple lines of empirical evidence.**

- Further Explanation: Emphasis is on a conceptual understanding of the role each line of evidence has relating to common ancestry and biological evolution. Examples of evidence could include similarities in DNA sequences, anatomical structures, and order of appearance of structures in embryological development.

**LS4-HS-2. Construct an explanation based on evidence that the process of evolution primarily results from four factors: (1) the potential for a species to increase in number, (2) the heritable genetic variation of individuals in a species due to mutation and sexual reproduction, (3) competition for limited resources, and (4) the proliferation of those organisms that are better able to survive and reproduce in the environment.**

- Further Explanation: Emphasis is on using evidence to explain the influence each of the four factors has on number of organisms, behaviors, morphology, or physiology in terms of ability to compete for limited resources and subsequent survival of individuals and adaptation of species. Examples of evidence could include mathematical models such as simple distribution graphs and proportional reasoning.
- Content Limit: Assessment does not include other mechanisms of evolution, such as genetic drift, gene flow through migration, and co-evolution.

**LS4-HS-3. Apply concepts of statistics and probability to support explanations that organisms with an advantageous heritable trait tend to increase in proportion to organisms lacking this trait.**

- Further Explanation: Emphasis is on analyzing shifts in numerical distribution of traits and using these shifts as evidence to support explanations.
- Content Limit: Assessment is limited to basic statistical and graphical analysis. Assessment does not include allele frequency calculations.

**LS4-HS-4. Construct an explanation based on evidence for how natural selection leads to adaptation of populations.**

- Further Explanation: Emphasis is on using data to provide evidence for how specific biotic and abiotic differences in ecosystems (such as ranges of seasonal temperature, long-term climate change, acidity, light, geographic barriers, or evolution of other organisms) contribute to a change in gene frequency over time, leading to adaptation of populations.

**LS4-HS-5. Evaluate the evidence supporting claims that changes in environmental conditions may result in: (1) increases in the number of individuals of some species, (2) the emergence of new species over time, and (3) the extinction of other species.**

- Further Explanation: Emphasis is on determining cause and effect relationships for how changes to the environment such as deforestation, over fishing, application of fertilizers and pesticides, drought, flood, and the rate of change of the environment affect distribution or disappearance of traits in species.

**LS4-HS-6. Create or revise a simulation to test a solution to mitigate adverse impacts of human activity on biodiversity.**

- Further Explanation: Emphasis is on designing solutions for a proposed problem related to threatened or endangered species, or to genetic variation of organisms for multiple species.

## Supporting Content

### **LS4.A: Evidence of Common Ancestry and Diversity**

- Genetic information, like the fossil record, provides evidence of evolution. DNA sequences vary among species, but there are many overlaps: in fact, the ongoing branching that produces multiple lines of descent can be inferred by comparing the DNA sequences of different organisms. Such information is also derivable from the similarities and differences in amino acid sequences and from anatomical and embryological evidence. (LS4-HS-1)

### **LS4.B: Natural Selection**

- Natural selection occurs only if there is both (1) variation in the genetic information between organisms in a population and (2) variation in the expression of that genetic information—that is, trait variation—that leads to differences in performance among individuals. (LS4-HS-2, LS4-HS-3)
- The traits that positively affect survival are more likely to be reproduced, and thus are more common in the population. (LS4-HS-3)

### **LS4.C: Adaptation**

- Evolution is a consequence of the interaction of four factors: (1) the potential for a species to increase in number, (2) the genetic variation of individuals in a species due to mutation and sexual reproduction, (3) competition for an environment's limited supply of the resources that individuals need in order to survive and reproduce, and (4) the ensuing proliferation of those organisms that are better able to survive and reproduce in that environment. (LS4-HS-2)
- Natural selection leads to adaptation, that is, to a population dominated by organisms that are anatomically, behaviorally, and physiologically well suited to survive and reproduce in a specific environment. That is, the differential survival and reproduction of organisms in a population that have an advantageous heritable trait leads to an increase in the proportion of individuals in future generations that have the trait and to a decrease in the proportion of individuals that do not. (LS4-HS-3, LS4-HS-4)
- Adaptation also means that the distribution of traits in a population can change when conditions change. (LS4-HS-3)
- Changes in the physical environment, whether naturally occurring or human induced, have thus contributed to the expansion of some species, the emergence of new distinct species as populations diverge under different conditions, and the decline—and sometimes the extinction—of some species. (LS4-HS-5, LS4-HS-6)
- Species become extinct because they can no longer survive and reproduce in their altered environment. If members cannot adjust to change that is too fast or drastic, the opportunity for the species' evolution is lost. (LS4-HS-5)

### **LS4.D: Biodiversity and Humans**

- ~~Humans depend on the living world for the resources and other benefits provided by biodiversity. But human activity is also having adverse impacts on biodiversity through overpopulation, overexploitation, habitat destruction, pollution, introduction of invasive species, and climate change. Thus sustaining biodiversity so that ecosystem functioning and productivity are maintained is essential to supporting and enhancing life on Earth. Sustaining biodiversity also aids humanity by preserving landscapes of recreational or inspirational value. (LS4-HS-6, LS2-HS-7.)~~

### **LS4.D: Biodiversity and Humans**

- Biodiversity is increased by the formation of new species (speciation) and decreased by the loss of species (extinction). (LS2-HS-7)
- Sustaining ecosystem health and biodiversity is essential to supporting and enhancing life on Earth. Sustaining biodiversity also aids humanity by preserving landscapes of recreational, cultural, or inspirational value. Humans depend on the living world for the resources and other benefits provided by biodiversity. Impacts on biodiversity can be mitigated through actions such as habitat conservation, reclamation practices, wildlife management, and invasive species control. Understanding the effects of population growth, wildfire, pollution, and climate variability on changes in biodiversity could help maintain the integrity of biological systems. (LS2-HS-7, LS4-HS-6.)

### **ETS1.B: Developing Possible Solutions**

- When evaluating solutions, it is important to take into account a range of constraints, including cost, safety, reliability, and aesthetics, and to consider social, cultural, and environmental impacts. (LS4-HS-6)
- Both physical models and computers can be used in various ways to aid in the engineering design process. Computers are useful for a variety of purposes, such as running simulations to test different ways of solving a problem or to see which one is most efficient or economical; and in making a persuasive presentation to a client about how a given design will meet his or her needs. (LS4-HS-6)

## PSC: Physical Sciences (Chemistry)

### PSC1-HS Structure and Properties of Matter

#### **Performance Standards**

Students who demonstrate understanding can:

#### **PSC1-HS-1. Develop models to describe the atomic composition of simple molecules and extended structures.**

- Further Explanation: Emphasis is on reviewing how to develop models of molecules that vary in complexity. This should build on the similar middle school standard (PS1-MS-1). Examples of simple molecules could include ammonia and methanol. Examples of extended structures could include sodium chloride or diamonds. Examples of molecular-level models could include drawings, 3D ball and stick structures, or computer representations showing different molecules with different types of atoms.
- Content Limit: Students will be provided with the names of the elements, a list of common ions, a list of numerical prefixes and their meanings, and the charges of all cations and anions within the item as necessary. Confine element symbols to the representative and familiar transition metal elements.

#### **PSC1-HS-2. Use the periodic table as a model to predict the relative properties of elements based on the patterns of electrons in the outermost energy level of atoms.**

- Further Explanation: Examples of properties that could be predicted from patterns could include reactivity of metals, types of bonds formed, numbers of bonds formed, and reactions with oxygen.
- Content Limit: Elements will be limited to main group elements. Properties assessed will be limited to reactivity, valence electrons, atomic radius, electronegativity, ionization energy (first), shielding effect, and the most common oxidation number.

#### **PSC1-HS-3. Plan and conduct an investigation to gather evidence to compare the structure of substances at the bulk scale to infer the strength of electrical forces between particles.**

- Further Explanation: Emphasis is on understanding the strengths of forces between particles, not on naming specific intermolecular forces (such as dipole-dipole). Examples of particles could include ions, atoms, molecules, and networked materials (such as graphite). Examples of bulk properties of substances could include the melting point and boiling point, vapor pressure, and surface tension.
- Content Limit: Metallic, ionic, and covalent bonds may be included. Graphical representations of melting or boiling points of different substances may be used in the item (e.g., graph of boiling points vs. molar mass or simple bar graph). Structural formulas of compounds may be used to compare the melting/boiling points of compounds

#### **PSC1-HS-4. Develop models to illustrate the changes in the composition of the nucleus of the atom and the energy released during the processes of fission, fusion, and other types of radioactive decay.**

- Further Explanation: Emphasis is on simple qualitative models, such as pictures or diagrams, and on the scale of energy released in nuclear processes relative to other kinds of transformations.
- Content Limit: Assessment does not include quantitative calculation of energy released. Assessment is limited to alpha, beta, and gamma radioactive decays.

#### **PSC1-HS-5. Communicate scientific and technical information about why the molecular-level structure is important in the functioning of designed materials.**

- Further Explanation: Emphasis is on the attractive and repulsive forces that determine the functioning of the material. Examples could include why electrically conductive materials are often made of metal, flexible but durable materials are made up of long chained molecules, and pharmaceuticals are designed to interact with specific receptors.
- Content Limit: Assessment is limited to provided molecular structures of specific designed materials. For questions involving polar vs. nonpolar bonds, item distractors containing ionic bonds may not be used. Electronegativity differences of  $< 0.5$  should be used for nonpolar covalent bonds. Electronegativity differences of  $0.5 - 1.7$  should be used for polar covalent bonds.

## Supporting Content

### **PS1.A: Structure and Properties of Matter**

- Substances are made from different types of atoms, which combine with one another in various ways. Atoms form molecules that range in size from two to thousands of atoms. (PSC1-HS-1)
- Each atom has a substructure consisting of a nucleus, which is made of protons and neutrons, surrounded by electrons. (PSC1-HS-2)
- The periodic table orders elements horizontally by the number of protons in the atom's nucleus and places those with similar chemical properties in columns. The repeating patterns of this table reflect patterns of outer electron states. (PSC1-HS-2)
- The structure and interactions of matter at the bulk scale are determined by electrical forces within and between atoms. (PSC1-HS-3, PSC1-HS-5)

### **PS1.C: Nuclear Processes**

- Nuclear processes, including fusion, fission, and radioactive decays of unstable nuclei, involve release or absorption of energy. The total number of neutrons plus protons does not change in any nuclear process. (PSC1-HS-4)

### **PS2.B: Types of Interactions**

- Attraction and repulsion between electric charges at the atomic scale explain the structure, properties (physical and chemical), and transformations of matter, as well as the contact forces between material objects. (PSC1-HS-2, PSC1-HS3, PSC1-HS-5)

## PSC2-HS Chemical Reactions

### Performance Standards

Students who demonstrate understanding can:

#### **PSC2-HS-1 Construct and revise an explanation for the outcome of a simple chemical reaction based on the outermost electron states of atoms, trends in the periodic table, and knowledge of the patterns of chemical properties.**

- Further Explanation: Examples of chemical reactions could include the reaction of sodium and chlorine, of carbon and oxygen, or of carbon and hydrogen.
- Content Limit: Identify types of chemical reactions including: synthesis/formation/combination reactions, decomposition reactions, single replacement/displacement reactions, double replacement/displacement reactions, oxidation-reduction (redox) reactions (single replacement only), acid base reactions, and combustion reactions (for hydrocarbons). Predict the products of double replacement, single replacement, and combustion reactions only. For the second skill statement, do not use acid names or hydrocarbons when translating between words and formulas. Items will include a list of common ions, as needed.

#### **PSC2-HS-2. Develop a model to illustrate that the release or absorption of energy from a chemical reaction system depends upon the changes in total bond energy.**

- Further Explanation: Emphasis is on the idea that a chemical reaction is a system that affects the energy change. Examples of models could include molecular-level drawings and diagrams of reactions, graphs showing the relative energies of reactants and products, and representations showing energy is conserved.
- Content Limit: Assessment does not include calculating the total bond energy changes during a chemical reaction from the bond energies of reactants and products.

#### **PSC2-HS-3. Apply scientific principles and evidence to provide an explanation about the effects of changing the temperature or concentration of the reacting particles on the rate at which a reaction occurs.**

- Further Explanation: Emphasis is on student reasoning that focuses on the number and energy of collisions between molecules.
- Content Limit: Factors that influence the rate of reaction may include temperature, surface area, size of particles, concentration, and catalysts. Can also include concentration and titration relationships. Provide a graphic showing how a catalyst provides a different pathway for a chemical reaction to occur resulting in a lower activation energy. May include a titration curve.

**PSC2-HS-4. Use mathematical representations to support the claim that atoms, and therefore mass, are conserved during a chemical reaction.**

- Further Explanation: Emphasis is on using mathematical ideas to communicate the proportional relationships between masses of atoms in the reactants and the products, and the translation of these relationships to the macroscopic scale using the mole as the conversion from the atomic to the macroscopic scale. Emphasis is on assessing students' use of mathematical thinking and not on memorization and rote application of problem-solving techniques. Should also include calculations related to determining the concentration and/or pH of a solution.
- Content Limit: Conversion problems will be one to two steps (e.g., grams to moles to atoms/molecules). Compounds and formulas should be provided in the stem of the question. Students should be given molecular masses in problems involving gram to other unit conversions. Molar mass calculations should not be combined with conversion problems. All volumes must be at standard temperature and pressure (STP). A balanced equation and molar masses should be included in the item. Calculations may include grams/moles/volume of reactant to grams/moles/volume of product.

**PSC2-HS-5. Refine the design of a chemical system by specifying a change in conditions that would produce increased amounts of products at equilibrium.**

- Further Explanation: Emphasis is on the application of Le Chatelier's Principle and on refining designs of chemical reaction systems, including descriptions of the connection between changes made at the macroscopic level and what happens at the molecular level. Examples of designs could include different ways to increase product formation including adding reactants or removing products.
- Content Limit: Assessment is limited to specifying the change in only one variable at a time. Assessment does not include calculating equilibrium constants and concentrations.

## Supporting Content

**PS1.A: Structure and Properties of Matter**

- The periodic table orders elements horizontally by the number of protons in the atom's nucleus and places those with similar physical and chemical properties in columns. The repeating patterns of this table reflect patterns of outer electron states. (PSC2-S-1)
- A stable molecule has less energy than the same set of atoms separated; one must provide at least this energy in order to take the molecule apart. (PSC2-HS-2)

**PS1.B: Chemical Reactions**

- Chemical processes, their rates, and whether or not energy is stored or released can be understood in terms of the collisions of molecules and the rearrangements of atoms into new molecules, with consequent changes in the sum of all bond energies in the set of molecules that are matched by changes in kinetic energy. (PSC2-HS-2, PSC2-HS-3)
- In many situations, a dynamic and condition-dependent balance between a reaction and the reverse reaction determines the numbers of all types of molecules present. (PSC2-HS-5)
- The fact that atoms are conserved, together with knowledge of the chemical properties of the elements involved, can be used to describe and predict chemical reactions. (PSC2-HS-1, PSC2-HS-4)

**ETS1.C: Optimizing the Design Solution**

- Criteria may need to be broken down into simpler ones that can be approached systematically, and decisions about the priority of certain criteria over others (trade-offs) may be needed. (PSC2-HS-5)

## PSC3-HS Energy

### Performance Standards

Students who demonstrate understanding can:

**PSC3-HS-1. Evaluate the claims, evidence, and reasoning behind the idea that electromagnetic radiation can be described either by a wave model or a particle model, and that for some situations one model is more useful than the other.**

- Further Explanation: Emphasis is on how the experimental evidence supports the claim and how a theory is generally modified in light of new evidence. Examples of a phenomenon could include interference, diffraction, and photoelectric effect.
- Content Limit: Assessment does not include using quantum theory.

**PSC3-HS-2 Create a computational model to calculate the change in the energy of one component in a system when the change in energy of the other component(s) and energy flows in and out of the system are known.**

- Further Explanation: Emphasis is on explaining the meaning of mathematical expressions used in the model.
- Content Limit: Provide two temperatures (initial and final), a temperature-time graph, or an enthalpy diagram.

**PSC3-HS-3. Develop and use models to illustrate that energy at the macroscopic scale can be accounted for as a combination of energy associated with the motions of particles (objects) and energy associated with the relative positions of particles (objects).**

- Further Explanation: Examples of phenomena at the macroscopic scale could include the conversion of kinetic energy to thermal energy. Examples of models could include diagrams, drawings, descriptions, and computer simulations.
- Content Limit: Provide equations for the gas laws (i.e., ideal gas law, Boyle's law, Charles' law, and the combined gas laws).

**PSC3-HS-4\*. Design, build, and refine a device that works within given constraints to convert one form of energy into another form of energy. ---OPTIONAL**

- Further Explanation: Emphasis is on both qualitative and quantitative evaluations of devices. Examples of devices could include calorimeters, heat and cold packs, solar cells, solar ovens, and electrochemical cells. Examples of constraints could include use of renewable energy forms and efficiency.
- Content Limit: Assessment for quantitative evaluations is limited to total output for a given input. Assessment is limited to devices constructed with materials provided to students.

**PSC3-HS-5. Plan and conduct an investigation to provide evidence that the transfer of thermal energy when two components of different temperature are combined within a closed system results in a more uniform energy distribution among the components in the system (second law of thermodynamics).**

- Further Explanation: Emphasis is on analyzing data from student investigations and using mathematical thinking to describe the energy changes both quantitatively and conceptually (endothermic/exothermic). Examples of investigations could include mixing liquids at different initial temperatures or adding objects at different temperatures to water.
- Content Limit: For items involving specific heat, provide the equation  $Q = mC_p\Delta T$  and specific heats. Include the melting and boiling points of water. Perform calculations for changes that do not involve a change of state. Perform gram to mole and mole to  $\Delta H$  calculations. Use joules as a unit of measure, as opposed to calories.

### Supporting Content

**PS4.B: Electromagnetic Radiation**

- Electromagnetic radiation (e.g., radio, microwaves, light) can be modeled as a wave of changing electric and magnetic fields or as particles called photons. The wave model is useful for explaining many features of electromagnetic radiation, and the particle model explains other features. (PSC3-HS-1)

**PS3.A: Definitions of Energy**

- Energy is a quantitative property of a system that depends on the motion and interactions of matter and radiation within that system. That there is a single quantity called energy is due to the fact that a system's total energy is conserved, even as, within the system, energy is continually transferred from one object to another and between its various possible forms. (PSC3-HS-2, PSC3-HS-3)
- At the macroscopic scale, energy manifests itself in multiple ways, such as in motion, sound, light, and thermal energy. (PSC3-HS-3, PSC3-HS-4)
- These relationships are better understood at the microscopic scale, at which all of the different manifestations of energy can be modeled as a combination of energy associated with the motion of particles and energy associated with the configuration (relative position of the particles). In some cases the relative position energy can be thought of as stored in fields (which mediate interactions between particles). This last concept includes radiation, a phenomenon in which energy stored in fields moves across space. (PSC3-HS-3)

**PS3.B: Conservation of Energy and Energy Transfer**

- Conservation of energy means that the total change of energy in any system is always equal to the total energy transferred into or out of the system. (PSC3-HS-2)
- Energy cannot be created or destroyed, but it can be transported from one place to another and transferred between systems. (PSC3-HS-2, PSC3-HS-5)
- Mathematical expressions, which quantify how the stored energy in a system depends on its configuration (e.g. relative positions of charged particles, compression of a spring) and how kinetic energy depends on mass and speed, allow the concept of conservation of energy to be used to predict and describe system behavior. (PSC3-HS-2)
- The availability of energy limits what can occur in any system. (PSC3-HS-2)
- Uncontrolled systems always evolve toward more stable states—that is, toward more uniform energy distribution (e.g., water flows downhill, objects hotter than their surrounding environment cool down). (PSC3-HS-5)

**PS3.D: Energy in Chemical Processes**

- Although energy cannot be destroyed, it can be converted to less useful forms—for example, to thermal energy in the surrounding environment. (PSC3-HS-4, PSC3-HS-5)

## Physical Sciences (Physics)

### PSP1-HS Motion and Stability: Forces and Interactions

#### Performance Standards

Students who demonstrate understanding can:

**PSP1-HS-1. Analyze data to support the claim that Newton's second law of motion describes the mathematical relationship among the net force on a macroscopic object, its mass, and its acceleration.**

- Further Explanation: Examples of data could include tables or graphs of position or velocity as a function of time for objects subject to a net unbalanced force, such as a falling object, an object rolling down a ramp, or a moving object being pulled by a constant force.
- Content Limit: Assessment is limited to one-dimensional motion and to macroscopic objects moving at non-relativistic speeds.

**PSP1-HS-2. Use mathematical representations to support the claim that the total momentum of a system of objects is conserved when there is no net force on the system.**

- Further Explanation: Emphasis is on the quantitative conservation of momentum in interactions and the qualitative meaning of this principle (Newton's first law).
- Content Limit: Assessment is limited to systems of two macroscopic bodies moving in one dimension.

**PSP1-HS-3. Apply scientific and engineering ideas to design, evaluate, and refine a device that minimizes the force on a macroscopic object during a collision.**

- Further Explanation: Examples of evaluation and refinement could include determining the success of the device at protecting an object from damage and modifying the design to improve it. Examples of a device could include a football helmet or a parachute.
- Content Limit: Assessment is limited to qualitative evaluations and/or algebraic manipulations.

**PSP1-HS-4. Use mathematical representations of Newton's Law of Gravitation and Coulomb's Law to describe and predict the gravitational and electrostatic forces between objects.**

- Further Explanation: Emphasis is on both quantitative and conceptual descriptions of gravitational and electric fields.
- Content Limit: Assessment is limited to systems with two objects.

**PSP1-HS-5. Plan and conduct an investigation to provide evidence that an electric current can produce a magnetic field and that a changing magnetic field can produce an electric current.**

- Content Limit: Assessment is limited to designing and conducting investigations with provided materials and tools.

**PSP1-HS-6. Communicate scientific and technical information about why the molecular-level structure is important in the functioning of designed materials.**

- Further Explanation: Emphasis is on the attractive and repulsive forces that determine the functioning of the material. Examples could include why electrically conductive materials are often made of metal, flexible but durable materials are made up of long chained molecules, and pharmaceuticals are designed to interact with specific receptors.
- Content Limit: Assessment is limited to provided molecular structures of specific designed materials.

## Supporting Content

### **PS1.A: Structure and Properties of Matter**

- The structure and interactions of matter at the bulk scale are determined by electrical forces within and between atoms. (PSP1-HS-6)

### **PS2.A: Forces and Motion**

- Newton's second law accurately predicts changes in the motion of macroscopic objects. (PSP1-HS-1)
- Momentum is defined for a particular frame of reference; it is the mass times the velocity of the object. (PSP1-HS-2)
- If a system interacts with objects outside itself, the total momentum of the system can change; however, any such change is balanced by changes in the momentum of objects outside the system. (PSP1-HS-2, PSP1-HS-3)

### **PS2.B: Types of Interactions**

- Newton's law of universal gravitation and Coulomb's law provide the mathematical models to describe and predict the effects of gravitational and electrostatic forces between distant objects. (PSP1-HS-4)
- Forces at a distance are explained by fields (gravitational, electric, and magnetic) permeating space that can transfer energy through space. Magnets or electric currents cause magnetic fields; electric charges or changing magnetic fields cause electric fields. (PSP1-HS-4, PSP1-HS-5)
- Attraction and repulsion between electric charges at the atomic scale explain the structure, properties, and transformations of matter, as well as the contact forces between material objects. (PSP1-HS-6, PSC1-HS-1, PSC1-HS-3)

### **PS3.A: Definitions of Energy**

- "Electrical energy" may mean energy stored in a battery or energy transmitted by electric currents. (PSP1-HS-5)

### **ETS1.A: Defining and Delimiting an Engineering Problem**

- Criteria and constraints also include satisfying any requirements set by society, such as taking issues of risk mitigation into account, and they should be quantified to the extent possible and stated in such a way that one can tell if a given design meets them. (PSP1-HS-3)

### **ETS1.C: Optimizing the Design Solution**

- Criteria may need to be broken down into simpler ones that can be approached systematically, and decisions about the priority of certain criteria over others (trade-offs) may be needed. PSP1-HS-3)

## PSP2-HS Energy

### Performance Standards

Students who demonstrate understanding can:

#### **PSP2-HS-1 Create a computational model to calculate the change in the energy of one component in a system when the change in energy of the other component(s) and energy flows in and out of the system are known.**

- Further Explanation: Emphasis is on explaining the meaning of mathematical expressions used in the model.
- Content Limit: Assessment is limited to basic algebraic expressions or computations; to systems of two or three components; and to thermal energy, kinetic energy, and/or the energies in gravitational, magnetic, or electric fields.

#### **PSP2-HS-2. Develop and use models to illustrate that energy at the macroscopic scale can be accounted for as a combination of energy associated with the motions of particles (objects) and energy associated with the relative positions of particles (objects).**

Further Explanation: Examples of phenomena at the macroscopic scale could include the conversion of kinetic energy to thermal energy, the energy stored due to position of an object above the earth, and the energy stored between two electrically-charged plates. Examples of models could include diagrams, drawings, descriptions, and computer simulations.

**PSP2-HS-3. Design, build, and refine a device that works within given constraints to convert one form of energy into another form of energy.**

- Further Explanation: Emphasis is on both qualitative and quantitative evaluations of devices. Examples of devices could include Rube Goldberg devices, wind turbines, solar cells, solar ovens, and generators. Examples of constraints could include use of renewable energy forms and efficiency.
- Content Limit: Assessment for quantitative evaluations is limited to total output for a given input. Assessment is limited to devices constructed with materials provided to students.

**PSP2-HS-4. Plan and conduct an investigation to provide evidence that the transfer of thermal energy when two components of different temperature are combined within a closed system results in a more uniform energy distribution among the components in the system (second law of thermodynamics).**

- Further Explanation: Emphasis is on analyzing data from student investigations and using mathematical thinking to describe the energy changes both quantitatively and conceptually. Examples of investigations could include mixing liquids at different initial temperatures or adding objects at different temperatures to water.
- Content Limit: Assessment is limited to investigations based on materials and tools provided to students.

**PSP2-HS-5. Develop and use a model of two objects interacting through electric or magnetic fields to illustrate the forces between objects and the changes in energy of the objects due to the interaction.**

- Further Explanation: Examples of models could include drawings, diagrams, and texts, such as drawings of what happens when two charges of opposite polarity are near each other.
- Content Limit: Assessment is limited to systems containing two objects.

## Supporting Content

**PS3.A: Definitions of Energy**

- Energy is a quantitative property of a system that depends on the motion and interactions of matter and radiation within that system. That there is a single quantity called energy is due to the fact that a system's total energy is conserved, even as, within the system, energy is continually transferred from one object to another and between its various possible forms. (PSP2-HS-1, PSP2-HS-2)
- At the macroscopic scale, energy manifests itself in multiple ways, such as in motion, sound, light, and thermal energy. (PSP2-HS-2, PSP2-HS-3)
- These relationships are better understood at the microscopic scale, at which all of the different manifestations of energy can be modeled as a combination of energy associated with the motion of particles and energy associated with the configuration (relative position of the particles). In some cases the relative position energy can be thought of as stored in fields (which mediate interactions between particles). This last concept includes radiation, a phenomenon in which energy stored in fields moves across space. (PSP2-HS-2)

**PS3.B: Conservation of Energy and Energy Transfer**

- Conservation of energy means that the total change of energy in any system is always equal to the total energy transferred into or out of the system. (PSP2-HS-1)
- Energy cannot be created or destroyed, but it can be transported from one place to another and transferred between systems. (PSP2-HS-1, PSP2-HS-4)
- Mathematical expressions, which quantify how the stored energy in a system depends on its configuration (e.g. relative positions of charged particles, compression of a spring) and how kinetic energy depends on mass and speed, allow the concept of conservation of energy to be used to predict and describe system behavior. (PSP2-HS-1)
- The availability of energy limits what can occur in any system. (PSP2-HS-1)
- Uncontrolled systems always evolve toward more stable states—that is, toward more uniform energy distribution (e.g., water flows downhill, objects hotter than their surrounding environment cool down). (PSP2-HS-4)

**PS3.C: Relationship Between Energy and Forces**

- When two objects interacting through a field change relative position, the energy stored in the field is changed. (PSP2-HS-5)

**PS3.D: Energy in Chemical Processes**

- Although energy cannot be destroyed, it can be converted to less useful forms—for example, to thermal energy in the surrounding environment. (PSP2-HS-3, PSP2-HS-4)

**ETS1.A: Defining and Delimiting an Engineering Problem**

- Criteria and constraints also include satisfying any requirements set by society, such as taking issues of risk mitigation into account, and they should be quantified to the extent possible and stated in such a way that one can tell if a given design meets them. (PSP2-HS-3)

**PSP3-HS Waves**

**Performance Standards**

Students who demonstrate understanding can:

**PSP3-HS-1. Use mathematical representations to support a claim regarding relationships among the frequency, wavelength, and speed of waves traveling in various media.**

- Further Explanation: Examples of data could include electromagnetic radiation traveling in a vacuum and glass, sound waves traveling through air and water, and seismic waves traveling through the Earth.
- Content Limit: Assessment is limited to algebraic relationships and describing those relationships qualitatively.

**PSP3-HS-2. Evaluate questions about the advantages of using digital transmission and storage of information.**

- Further Explanation: Examples of advantages could include that digital information is stable because it can be stored reliably in computer memory, transferred easily, and copied and shared rapidly. Disadvantages could include issues of easy deletion, security, and theft.

**PSP3-HS-3. Evaluate the claims, evidence, and reasoning behind the idea that electromagnetic radiation can be described either by a wave model or a particle model, and that for some situations one model is more useful than the other.**

- Further Explanation: Emphasis is on how the experimental evidence supports the claim and how a theory is generally modified in light of new evidence. Examples of a phenomenon could include resonance, interference, diffraction, and photoelectric effect.
- Content Limit: Assessment does not include using quantum theory.

**PSP3-HS-4. Evaluate the validity and reliability of claims in published materials of the effects that different frequencies of electromagnetic radiation have when absorbed by matter.**

- Further Explanation: Emphasis is on the idea that photons associated with different frequencies of light have different energies, and the damage to living tissue from electromagnetic radiation depends on the energy of the radiation. Examples of published materials could include trade books, magazines, web resources, videos, and other passages that may reflect bias.
- Content Limit: Assessment is limited to qualitative descriptions.

**PSP3-HS-5. Communicate technical information about how some technological devices use the principles of wave behavior and wave interactions with matter to transmit and capture information and energy.**

- Further Explanation: Examples could include solar cells capturing light and converting it to electricity; medical imaging; and communications technology.
- Content Limit: Assessments are limited to qualitative information. Assessments do not include band theory.

## Supporting Content

### PS3.D: Energy in Chemical Processes

- Solar cells are human-made devices that likewise capture the sun's energy and produce electrical energy. (PSP3-HS-5)

### PS4.A: Wave Properties

- The wavelength and frequency of a wave are related to one another by the speed of travel of the wave, which depends on the type of wave and the medium through which it is passing. (PSP3-HS-1)
- Information can be digitized (e.g., a picture stored as the values of an array of pixels); in this form, it can be stored reliably in computer memory and sent over long distances as a series of wave pulses. (PSP3-HS-2, PSP3-HS-5)
- [From the 3–5 grade band endpoints] Waves can add or cancel one another as they cross, depending on their relative phase (i.e., relative position of peaks and troughs of the waves), but they emerge unaffected by each other. (Boundary: The discussion at this grade level is qualitative only; it can be based on the fact that two different sounds can pass a location in different directions without getting mixed up.) (PSP3-HS-3)

### PS4.B: Electromagnetic Radiation

- Electromagnetic radiation (e.g., radio, microwaves, light) can be modeled as a wave of changing electric and magnetic fields or as particles called photons. The wave model is useful for explaining many features of electromagnetic radiation, and the particle model explains other features. (PSP3-HS-3)
- When light or longer wavelength electromagnetic radiation is absorbed in matter, it is generally converted into thermal energy (heat). Shorter wavelength electromagnetic radiation (ultraviolet, X-rays, gamma rays) can ionize atoms and cause damage to living cells. (PSP3-HS-4)
- Photoelectric materials emit electrons when they absorb light of a high-enough frequency. (PSP3-HS-5)

### PS4.C: Information Technologies and Instrumentation

- Multiple technologies based on the understanding of waves and their interactions with matter are part of everyday experiences in the modern world (e.g., medical imaging, communications, scanners) and in scientific research. They are essential tools for producing, transmitting, and capturing signals and for storing and interpreting the information contained in them. (PSP3-HS-5)

## **ESS: Earth and Space Sciences**

### **ESS1-HS Earth's Place in the Universe**

#### **Performance Standards**

Students who demonstrate understanding can:

**ESS1-HS-1. Develop a model based on evidence to illustrate the life span of the sun and the role of nuclear fusion in the sun's core to release energy that eventually reaches Earth in the form of radiation.**

- Further Explanation: Emphasis is on the energy transfer mechanisms that allow energy from nuclear fusion in the sun's core to reach Earth. Examples of evidence for the model include observations of the masses and lifetimes of other stars, as well as the ways that the sun's radiation varies due to sudden solar flares ("space weather"), the 11-year sunspot cycle, and non-cyclic variations over centuries.
- Content Limit: Assessment does not include details of the atomic and sub-atomic processes involved with the sun's nuclear fusion.

**ESS1-HS-2. Construct an explanation of the current model of the origin of the universe based on astronomical evidence of light spectra, motion of distant galaxies, and composition of matter in the universe.**

- Further Explanation: Emphasis is on the astronomical evidence of the redshift of light from galaxies as an indication that the universe is currently expanding, the cosmic microwave background as the remnant radiation from the event, and the observed composition of ordinary matter of the universe, primarily found in stars and interstellar gases (from the spectra of electromagnetic radiation from stars), which matches that predicted by the scientific model (3/4 hydrogen and 1/4 helium).

**ESS1-HS-3. Communicate scientific ideas about the way stars, over their life cycle, produce elements.**

- Further Explanation: Emphasis is on the way nucleosynthesis, and therefore the different elements created, varies as a function of the mass of a star and the stage of its lifetime.
- Content Limit: Details of the many different nucleosynthesis pathways for stars of differing masses are not assessed.

**ESS1-HS-4. Use mathematical or computational representations to predict the motion of orbiting objects in the solar system.**

- Further Explanation: Emphasis is on Newtonian gravitational laws governing orbital motions, which apply to human-made satellites as well as planets and moons.
- Content Limit: Mathematical representations for the gravitational attraction of bodies and Kepler's Laws of orbital motions should not deal with more than two bodies, nor involve calculus.

**ESS1-HS-5. Evaluate evidence of the past and current movements of continental and oceanic crust and the theory of plate tectonics to explain the ages of crustal rocks.**

- Further Explanation: Emphasis is on the ability of plate tectonics to explain the ages of crustal rocks. Examples include evidence of the ages oceanic crust increasing with distance from mid-ocean ridges (a result of plate spreading) and the ages of North American continental crust increasing with distance away from a central ancient core (a result of past plate interactions).

**ESS1-HS-6. Apply scientific reasoning and evidence from ancient Earth materials, meteorites, and other planetary surfaces to construct an account of Earth's formation and early history.**

- Further Explanation: Emphasis is on using available evidence within the solar system to reconstruct the early history of Earth, which formed along with the rest of the solar system. Examples of evidence include the absolute ages of ancient materials (obtained by radiometric dating of meteorites, moon rocks, and Earth's oldest minerals), the sizes and compositions of solar system objects, and the impact cratering record of planetary surfaces.

## Supporting Content

### ESS1 .A : The Universe and Its Stars

- The star called the sun is changing and will burn out over a lifespan of approximately 10 billion years. (ESS1-HS-1)
- The study of stars' light spectra and brightness is used to identify compositional elements of stars, their movements, and their distances from Earth. (ESS1-HS-2, ESS1-HS-3)
- The Big Bang theory is a current scientific model of the origin of the universe that is supported by evidence such as observations of distant galaxies receding from our own, of the measured composition of stars and non-stellar gases, and of the maps of spectra of the primordial radiation (cosmic microwave background) that still fills the universe. Other than the hydrogen and helium formed at the time of the event, nuclear fusion within stars produces all atomic nuclei lighter than and including iron, and the process releases electromagnetic energy. Heavier elements are produced when certain massive stars achieve a supernova stage and explode. (ESS1-HS-2, ESS1-HS-3)

### ESS1 .B: Earth and the Solar System

- Kepler's laws describe common features of the motions of orbiting objects, including their elliptical paths around the sun. Orbits may change due to the gravitational effects from, or collisions with, other objects in the solar system. (ESS1-HS-4)

### ESS1 .C: The History of Planet Earth

- Continental rocks are generally much older than the rocks of the ocean floor. (ESS1-HS-5)
- Although active geologic processes, such as plate tectonics and erosion, have destroyed or altered most of the very early rock record on Earth, other objects in the solar system, such as lunar rocks, asteroids, and meteorites, have changed little over billions of years. Studying these objects can provide information about Earth's formation and early history. (ESS1-HS-6)

### ESS2 .B: Plate Tectonics and Large-Scale System Interactions

- Plate tectonics is the unifying theory that explains the past and current movements of the rocks at Earth's surface and provides a framework for understanding its geologic history. (ESS1-HS-5)

### PS1 .C: Nuclear Processes

- Spontaneous radioactive decay follows a characteristic exponential decay law. Nuclear lifetimes allow radiometric dating to be used to determine the ages of rocks and other materials. (ESS1-HS-5, ESS1-HS-6)

### PS3 .D: Energy in Chemical Processes and Everyday Life

- Nuclear Fusion processes in the center of the sun release the energy that ultimately reaches Earth as radiation. (ESS1-HS-1)

### PS4 .B Electromagnetic Radiation

- Atoms of each element emit and absorb characteristic frequencies of light. These characteristics allow identification of the presence of an element, even in microscopic quantities. (ESS1-HS-2)

## ESS2-HS Earth's Systems

### Performance Standards

Students who demonstrate understanding can:

#### ESS2-HS-1. Develop a model to illustrate how Earth's internal and surface processes operate at different spatial and temporal scales to form continental and ocean-floor features.

- Further Explanation: Emphasis is on how the appearance of land features (such as mountains, valleys, and plateaus) and sea-floor features (such as trenches, ridges, and seamounts) are a result of both constructive forces (such as volcanism, tectonic uplift, and orogeny) and destructive mechanisms (such as weathering, mass wasting, and coastal erosion).
- Content Limit: Assessment does not include memorization of the details of the formation of specific geographic features of Earth's surface.

**ESS2-HS-2. Analyze geoscience data to make the claim that one change to Earth's surface can create feedbacks that cause changes to other Earth systems.**

- Further Explanation: Examples should include climate feedbacks, such as how an increase in greenhouse gases causes a rise in global temperatures that melts glacial ice, which reduces the amount of sunlight reflected from Earth's surface, increasing surface temperatures and further reducing the amount of ice. Examples could also be taken from other system interactions, such as how the loss of ground vegetation causes an increase in water runoff and soil erosion; how dammed rivers increase groundwater recharge, decrease sediment transport, and increase coastal erosion; or how the loss of wetlands causes a decrease in local humidity that further reduces the wetland extent.

**ESS2-HS-3. Develop a model based on evidence of Earth's interior to describe the cycling of matter by thermal convection.**

- Further Explanation: Emphasis is on both a one-dimensional model of Earth, with radial layers determined by density, and a three-dimensional model, which is controlled by mantle convection and the resulting plate tectonics. Examples of evidence include maps of Earth's three-dimensional structure obtained from seismic waves, records of the rate of change of Earth's magnetic field (as constraints on convection in the outer core), and identification of the composition of Earth's layers from high-pressure laboratory experiments.

**ESS2-HS-4. Use a model to describe how variations in the flow of energy into and out of Earth's systems result in changes in climate.**

- Further Explanation: Examples of the causes of climate change differ by timescale, over 1-10 years: large volcanic eruption, ocean circulation; 10-100s of years: changes in human activity, ocean circulation, solar output; 10-100s of thousands of years: changes to Earth's orbit and the orientation of its axis; and 10-100s of millions of years: long-term changes in atmospheric composition.
- Content Limit: Assessment of the results of changes in climate is limited to changes in surface temperatures, precipitation patterns, glacial ice volumes, sea levels, and biosphere distribution.

**ESS2-HS-5. Plan and conduct an investigation of the properties of water and its effects on Earth materials and surface processes.**

- Further Explanation: Emphasis is on mechanical and chemical investigations with water and a variety of solid materials to provide the evidence for connections between the hydrologic cycle and system interactions commonly known as the rock cycle. Examples of mechanical investigations include stream transportation and deposition using a stream table, erosion using variations in soil moisture content, or frost wedging by the expansion of water as it freezes. Examples of chemical investigations include chemical weathering and recrystallization (by testing the solubility of different materials) or melt generation (by examining how water lowers the melting temperature of most solids).

**ESS2-HS-6. Develop a quantitative model to describe the cycling of carbon among the hydrosphere, atmosphere, geosphere, and biosphere.**

- Further Explanation: Emphasis is on modeling biogeochemical cycles that include the cycling of carbon through the ocean, atmosphere, soil, and biosphere (including humans), providing the foundation for living organisms.

**ESS2-HS-7. Construct an argument based on evidence about the simultaneous coevolution of Earth's systems and life on Earth.**

- Further Explanation: Emphasis is on the dynamic causes, effects, and feedbacks between the biosphere and Earth's other systems, whereby geoscience factors control the evolution of life, which in turn continuously alters Earth's surface. Examples of include how photosynthetic life altered the atmosphere through the production of oxygen, which in turn increased weathering rates and allowed for the evolution of animal life; how microbial life on land increased the formation of soil, which in turn allowed for the evolution of land plants; or how the evolution of corals created reefs that altered patterns of erosion and deposition along coastlines and provided habitats for the evolution of new life forms.
- Content Limit: Assessment does not include a comprehensive understanding of the mechanisms of how the biosphere interacts with all of Earth's other systems.

## Supporting Content

### **ESS2.A: Earth Materials and Systems**

- Earth's systems, being dynamic and interacting, cause feedback effects that can increase or decrease the original changes. (ESS2-HS-1, ESS2-HS-2)
- Evidence from deep probes and seismic waves, reconstructions of historical changes in Earth's surface and its magnetic field, and an understanding of physical and chemical processes lead to a model of Earth with a hot but solid inner core, a liquid outer core, a solid mantle and crust. Motions of the mantle and its plates occur primarily through thermal convection, which involves the cycling of matter due to the outward flow of energy from Earth's interior and gravitational movement of denser materials toward the interior. (ESS2-HS-3)
- The geological record shows that changes to global and regional climate can be caused by interactions among changes in the sun's energy output or Earth's orbit, tectonic events, ocean circulation, volcanic activity, glaciers, vegetation, and human activities. These changes can occur on a variety of time scales from sudden (e.g., volcanic ash clouds) to intermediate (ice ages) to very long-term tectonic cycles. (ESS2-HS-4)

### **ESS2.B: Plate Tectonics and Large-Scale System Interactions**

- The radioactive decay of unstable isotopes continually generates new energy within Earth's crust and mantle, providing the primary source of the heat that drives mantle convection. Plate tectonics can be viewed as the surface expression of mantle convection. (ESS2-HS-3)
- Plate tectonics is the unifying theory that explains the past and current movements of the rocks at Earth's surface and provides a framework for understanding its geologic history. Plate movements are responsible for most continental and ocean-floor features and for the distribution of most rocks and minerals within Earth's crust. (ESS2-HS-1)

### **ESS2.C: The Roles of Water in Earth's Surface Processes**

- The abundance of liquid water on Earth's surface and its unique combination of physical and chemical properties are central to the planet's dynamics. These properties include water's exceptional capacity to absorb, store, and release large amounts of energy, transmit sunlight, expand upon freezing, dissolve and transport materials, and lower the viscosities and melting points of rocks. (ESS2-HS-5)

### **ESS2.D: Weather and Climate**

- The foundation for Earth's global climate systems is the electromagnetic radiation from the sun, as well as its reflection, absorption, storage, and redistribution among the atmosphere, ocean, and land systems, and this energy's re-radiation into space. (ESS2-HS-2, ESS2-HS-4)
- Gradual atmospheric changes were due to plants and other organisms that captured carbon dioxide and released oxygen. (ESS2-HS-6, ESS2-HS-7)
- Changes in the atmosphere due to human activity have increased carbon dioxide concentrations and thus affect climate. (ESS2-HS-6, ESS2-HS-4)

### **ESS2.E: Biogeology**

- The many dynamic and delicate feedbacks between the biosphere and other Earth systems cause a continual co-evolution of Earth's surface and the life that exists on it. (ESS2-HS-7)

### **PS4.A: Wave Properties**

- Geologists use seismic waves and their reflection at interfaces between layers to probe structures deep in the planet. (ESS2-HS-3)

## ESS3-HS Earth and Human Activity

### Performance Standards

Students who demonstrate understanding can:

#### ESS3-HS-1. Construct an explanation based on evidence for how the availability of natural resources, occurrence of natural hazards, and changes in climate have influenced human activity.

- Further Explanation: Examples of key natural resources include access to fresh water (such as rivers, lakes, and groundwater), regions of fertile soils such as river deltas, and high concentrations of minerals and fossil fuels. Examples of natural hazards can be from interior processes (such as volcanic eruptions and earthquakes), surface processes (such as tsunamis, mass wasting and soil erosion), and severe weather (such as hurricanes, floods, and droughts). Examples of the results of changes in climate that can affect populations or drive mass migrations include changes to sea level, regional patterns of temperature and precipitation, and the types of crops and livestock that can be raised.

#### ESS3-HS-2. Evaluate competing design solutions for developing, managing, and utilizing energy and mineral resources based on cost-benefit ratios.

- Further Explanation: Emphasis is on the conservation, recycling, and reuse of resources (such as minerals and metals) where possible, and on minimizing impacts where it is not. Examples include developing best practices for agricultural soil use, mining (for coal, tar sands, and oil shales), and pumping (for petroleum and natural gas). Science knowledge indicates what can happen in natural systems—not what should happen.

#### ESS3-HS-3. Create a computational simulation to illustrate the relationships among management of natural resources, the sustainability of human populations, and biodiversity.

- Further Explanation: Examples of factors that affect the management of natural resources include costs of resource extraction and waste management, per-capita consumption, and the development of new technologies. Examples of factors that affect human sustainability include agricultural efficiency, levels of conservation, and urban planning.
- Content Limit: Assessment for computational simulations is limited to using provided multi-parameter programs or constructing simplified spreadsheet calculations.

#### ESS3-HS-4. Evaluate or refine a technological solution that reduces impacts of human activities on natural systems.

- Further Explanation: Examples of data on the impacts of human activities could include the quantities and types of pollutants released, changes to biomass and species diversity, or areal changes in land surface use (such as for urban development, agriculture and livestock, or surface mining). Examples for limiting future impacts could range from local efforts (such as reducing, reusing, and recycling resources) to large-scale geoengineering design solutions (such as altering global temperatures by making large changes to the atmosphere or ocean).

#### ESS3-HS-5. Analyze geoscience data and the results from global climate models to make an evidence-based forecast of the current rate of global or regional climate change and associated future impacts to Earth systems.

- Further Explanation: Examples of evidence, for both data and climate model outputs, are for climate changes (such as precipitation and temperature) and their associated impacts (such as on sea level, glacial ice volumes, or atmosphere and ocean composition).
- Content Limit: Assessment is limited to one example of a climate change and its associated impacts.

#### ESS3-HS-6. Use a computational representation to illustrate the relationships among Earth systems and how those relationships are being modified due to human activity.

- Further Explanation: Examples of Earth systems to be considered are the hydrosphere, atmosphere, cryosphere, geosphere, and/or biosphere. An example of the far-reaching impacts from a human activity is how an increase in atmospheric carbon dioxide results in an increase in photosynthetic biomass on land and an increase in ocean acidification, with resulting impacts on sea organism health and marine populations.
- Content Limit: Assessment does not include running computational representations but is limited to using the published results of scientific computational models.

## Supporting Content

### ESS2 .D: Weather and Climate

- Current models predict that, although future regional climate changes will be complex and varied, average global temperatures will continue to rise. The outcomes predicted by global climate models strongly depend on the amounts of human-generated greenhouse gases added to the atmosphere each year and by the ways in which these gases are absorbed by the ocean and biosphere. (ESS3-HS-6)

### ESS2 .D: Weather and Climate

- Current models project that, without human intervention, average global temperatures will continue to rise. The outcomes projected by global climate models strongly depend on the amounts of greenhouse gases added to the atmosphere each year and by the ways in which these gases are stored by Earth's systems. (ESS3-HS-6)

### ESS3 .A : Natural Resources

- Resource availability has guided the development of human society. (ESS3-HS-1)
- All forms of energy production and other resource extraction have associated economic, social, environmental, and geopolitical costs and risks as well as benefits. New technologies and social regulations can change the balance of these factors. (ESS3-HS-2)

### ESS3 .B: Natural Hazards

- Natural hazards and other geologic events have shaped the course of human history. They have altered the sizes of human populations and have driven human migrations. (ESS3-HS-1)

### ESS3 .C: Human Impacts on Earth Systems

- The sustainability of human societies and the biodiversity that supports them requires responsible management of natural resources. (ESS3-HS-3)
- Scientists and engineers can make major contributions by developing technologies that produce less pollution and waste and that preclude ecosystem degradation. (ESS3-HS-4)
- Though the magnitudes of human impacts are greater than they have ever been, so too are human abilities to model, predict, and manage current and future impacts. (ESS3-HS-5)
- Through computer simulations and other studies, important discoveries are still being made about how the ocean, the atmosphere, and the biosphere interact and are modified in response to human activities. (ESS3-HS-6)

### ET S1 .B: Developing Possible Solutions

- When evaluating solutions, it is important to take into account a range of constraints, including cost, safety, reliability, and aesthetics, and to consider social, cultural, environmental impacts. (ESS3-HS-2, ESS3-HS-4)

## **Appendix B: Glossary of Terms**

This tool provides terminologies that represent the overarching concepts and ideas needed to understand the Idaho State Science Standards. The Glossary of Terms is not meant to be exhaustive, but seeks to address critical terms and definitions essential in building science content knowledge and understanding. This tool will assist in promoting consistency across disciplines, increasing student outcomes, and improving stakeholder communication.

**analyze** - studying the data of an investigation or experiment and looking for trends or patterns in the data or graph to see if the change had an effect

**argument/evidence-based account** - a reason or set of reasons given with the aim of persuading others that an action or idea is right or wrong, based on empirical evidence

**cause and effect** - the relationship between events or things, where one is the result of the other or others (action and reaction)

**claim** - to state or assert that something is true, typically without providing evidence

**classify** - grouping items together based on traits and/or characteristics

**data** - the result of your experimentation (facts, figures, and other evidence) that you usually record on a chart and then make a graph

**empirical** - verifiable by observation (using senses) or experience

**evidence** - the available body of facts or information indicating whether a claim or proposition is true or valid

**example** - a thing characteristic of its kind or illustrating a general rule/idea

**experimental design** - a method of research in which a controlled experimental variable is subjected to special treatment for the purpose of comparison with a variable kept constant

**fact** - an observation that has been repeatedly confirmed

**graph** - a diagram showing the visual relationship between variable quantities

**hypothesis** - a testable statement about the natural world that can be used to build more complex inferences and explanations

**inference** - a conclusion reached on the basis of evidence and reasoning

**interpret** - to explain and understand the meaning of evidence based on credible scientific information

**investigation** - a process to carry out a systematic or formal inquiry to discover and examine the facts

**law** - a descriptive generalization about how some aspect of the natural world behaves under stated circumstances

**measure** - to determine the dimensions, quantity or capacity of an object

**model (computational, mathematical, etc.)**- a representation of an idea, object, process or a system that is used to describe, explain, and make predictions about phenomena that cannot be experienced directly

**observation** - receiving knowledge of the natural world through our senses, recording information using scientific tools or instruments

**pattern/trend** - consistent and recurring set of characteristics or traits that helps in the identification of a phenomenon or problem and serves as an indicator or model for predicting future behavior

**prediction** - a forecast or statement about an uncertain event that is based upon experience or evidence

**relationship** - the connections between two variables

**science** - the process of trying to understand the world around us through exploration, invention, and problem solving

**scientific reasoning** - a justification that connects evidence to a claim

**simulation** - the imitation of the operation of a real-world process or system over time

**solution** - a method or a process for dealing with a problem that relies on scientific and/or engineering practices

**theory** - a substantiated explanation of some aspect of the natural world, based on a body of facts that have been repeatedly confirmed through observation and experiment; the scientific community validates each theory before it is accepted; if new evidence is discovered that the theory does not accommodate, the theory is generally modified in light of this new evidence

**variable** - any factor that can be controlled, changed, and/or measured; usually in an experiment

**STATE DEPARTMENT OF EDUCATION**  
**August 10, 2017**

K-6 Crosswalk of the Revised Idaho Science Standards to the 2010 Science Standards

<b>Crosswalk from Revised to Current Idaho Content Standards in Science</b>					
<b>Grade Level</b>	<b>Proposed Idaho Science Standards (ISS 2016)</b>	<b>Unit</b>	<b>Performance Standards</b>	<b>2007/2010 Science Standard</b>	<b>2007/10 Nature of Science Standards (now embedded in scientific and engineering practices required to complete Performance Expectations)</b>
<b>Kindergarten</b>	<b>Physical Science</b>	<b>Motion: Forces and Interactions</b>	PS1-K-1. Plan and conduct an investigation to compare the effects of different strengths or different directions of pushes and pulls on the motion of an object.	1.S.2.2.1 Describe the position and motion of objects. (ex. revolve, rotate, at rest, float, and fall)	K.S.1.2.1 Make observations and collect data
			PS1-K-2. Analyze data to determine if a design solution works as intended to change the speed or direction of an object with a push or a pull.		K.S.1.3.1 Measure in non-standard units
		<b>Energy</b>	PS2-K-1. Make observations to determine the effect of sunlight on Earth's surface.		K.S.1.4.1 Apply the concepts of yesterday, today, and tomorrow.
	PS2-K-2. Use tools and materials to design and build a structure that will reduce the warming effect of sunlight on an area.			K.S.1.6.1 Make observations.	
	<b>Life Science</b>	<b>Molecules to Organisms</b>	LS1-K-1. Use observations to describe patterns of what plants and animals (including humans) need to survive.	K.S.3.1.1 Observe and describe the characteristics of plants and animals.	K.S.1.7.1 Use cooperation and interaction skills
				1.S.3.2.1 State that living things need food to survive.	
			LS1-K-2. Use classification supported by evidence to differentiate between living and non-living items.	K.S.3.2.1 Describe the difference between living and non-living things.	K.S.1.8.1 Follow instructions.
	<b>Earth and Space Science</b>	<b>Earth's Systems</b>	ESS1-K-1. Use and share observations of local weather conditions to describe patterns over time, which includes the 4 seasons.	K.S.4.1.1 Name the four seasons.	
				K.S.4.1.2 Place the four seasons in order.	
				1.S.4.1.1 Identify the four seasons and their characteristics for a local region	
			ESS1-K-2. Construct an argument supported by evidence for how plants and animals (including humans) can change the environment to meet their needs.		
				K.S.5.1.1 Describe characteristics of a man-made environment (home, school...).	
		<b>Earth and Human Activity</b>	ESS2-K-1. Use a model to represent the relationship between the needs of different plants and animals (including humans) and the places they live.		
			ESS2-K-2. Ask questions to obtain information about the purpose of weather forecasting to prepare for, and respond to, severe weather.		
			ESS2-K-3. Communicate solutions that will reduce the impact of humans on the land, water, air, and/or other living things in the local environment.		
<b>1st Grade</b>	<b>Physical Science</b>	<b>Waves</b>	PS1-1-1. Plan and conduct investigations to provide evidence that vibrating materials can make sound and that sound can make materials vibrate.		1.S.1.2.1 Make observations, collect data, and use data
			PS1-1-2. Make observations to construct an evidence-based account that objects in darkness can be seen only when illuminated.		1.S.1.3.1 Measure in both standard and non-standard units.
			PS1-1-3. Plan and conduct investigations to determine the effect of placing objects made with different materials in the path of a beam of light.		1.S.1.4.1 Explain the concepts of past, present, and future.
			PS1-1-4. Use tools and materials to design and build a device that uses light or sound to solve the problem of communicating over a distance.		1.S.1.6.1 Make and record observations.
	<b>Life Science</b>	<b>Molecules to Organisms</b>	LS1-1-1. Use materials to design a solution to a human problem by mimicking how plants and/or animals use their external parts to help them survive, grow, and meet their needs.		1.S.1.7.1 Demonstrate cooperation and interaction skills
			LS1-1-2. Read texts and use media to determine patterns in behavior of parents and offspring that help offspring survive.		1.S.1.8.1 Follow multi-step instructions
			LS1-1-3. Develop models to describe that organisms have unique and diverse life cycles but all have in common birth, growth, reproduction, and death.	1.S.3.1.1 Describe the life cycle of a plant (seed, growth, reproduction, death).	
				1.S.3.1.2 Describe the life cycle of an animal (birth, development, reproduction, death).	
		<b>Heredity</b>	LS2-1-1. Make observations to construct an evidence-based account that young plants and animals are like, but not exactly like, their parents.		
<b>Earth and Space Science</b>	<b>Earth's Place in the Universe</b>	ESS1-1-1. Use observations of the sun, moon, and stars to describe patterns that can be predicted.			

**STATE DEPARTMENT OF EDUCATION  
August 10, 2017**

K-6 Crosswalk of the Revised Idaho Science Standards to the 2010 Science Standards

<b>2nd Grade</b>			ESS1-1-2. Make observations at different times of year to relate the amount of daylight to the time of year.		
<b>2nd Grade</b>	<b>Physical Science</b>	<b>Matter and its Interactions</b>	PS1-2-1. Plan and conduct an investigation to describe and classify different kinds of materials by their observable properties.	K.S.2.1.1 Use senses to describe matter	2.S.1.2.1 Make observations, record and interpret data.
				1.S.2.1.1 Describe properties of objects	2.S.1.3.1 Measure in standard and non-standard units.
				2.S.2.1.1 List properties of an object	2.S.1.4.1 Apply the concepts of past, present, and future
			PS1-2-2. Analyze data obtained from testing different materials to determine which materials have the properties that are best suited for an intended purpose.		2.S.1.5.1 Identify shape and use of objects.
			PS1-2-3. Make observations to construct an evidence-based account of how an object made of a small set of pieces can be disassembled and made into a new object.		2.S.1.6.1 Identify questions to be investigated.
			PS1-2-4. Construct an argument with evidence that some changes caused by heating or cooling can be reversed and some cannot.		2.S.1.6.2 Make observations.
	<b>Life Science</b>	<b>Ecosystems</b>	LS1-2-1. Plan and conduct an investigation to determine if plants need sunlight and water to grow.		2.S.1.6.3 Analyze information and evidence
			LS1-2-2. Develop a simple model that mimics the function of an animal in dispersing seeds or pollinating plants.		2.S.1.6.4 Communicate observations.
		<b>Biological Adaptation</b>	LS2-2-1. Make observations of plants and animals to compare the diversity of life in different habitats.	1.S.5.1.1 Identify the characteristics of local natural environments. (playground, backyard).	2.S.1.7.1 Practice cooperation and interaction skills.
				2.S.3.2.1 Identify four basic needs of all living things (food, shelter, water, space).	2.S.1.8.1 Follow multi-step instructions.
				2.S.3.2.2 Discuss how animals are suited to live in different habitats.	2.S.5.2.1 Identify tools people have invented for everyday life and for scientific investigations.
				2.S.5.1.1 Compare and contrast manmade and natural environments.	
				3.S.3.1.1 Describe the adaptations of plants and animals to their environment	
	<b>Earth and Space Science</b>	<b>Earth's Place in the Universe</b>	ESS1-2-1. Use information from several sources to provide evidence that Earth events can occur quickly or slowly.		
		<b>Earth's Systems</b>	ESS2-2-1. Compare multiple solutions designed to slow or prevent wind or water from changing the shape of the land.		
			ESS2-2-2. Develop a model to represent the shapes and kinds of land and bodies of water in an area.		
			ESS2-2-3. Obtain information to identify where water is found on Earth and that it can be solid, liquid or gas.		
<b>3rd Grade</b>	<b>Physical Science</b>	<b>Motion: Forces and Interactions</b>	PS1-3-1. Plan and conduct an investigation to provide evidence of the effects of balanced and unbalanced forces on the motion of an object.	2.S.2.2.1 Explain how force affects the position and motion of objects.	3.S.1.1.1 Label the parts of a system
			PS1-3-2. Make observations and/or measurements of an object's motion to provide evidence that a pattern can be used to predict future motion.		3.S.1.2.1 Make observations, collect data and evaluate it
			PS1-3-3. Ask questions to determine cause and effect relationships of electric or magnetic interactions between two objects not in contact with each other.		3.S.1.2.2 Replicate and/or use models
			PS1-3-4. Define a simple design problem that can be solved by applying scientific ideas about magnets.		3.S.1.3.1 Measure changes that occur.
	<b>Life Science</b>	<b>Ecosystems</b>	LS1-3-1. Construct an argument that some animals form groups that help members survive		3.S.1.3.2 Measure in both U.S. Customary and International System of Measurement (metric system) units
		<b>Heredity</b>	LS2-3-1. Analyze and interpret data to provide evidence that plants and animals have traits inherited from parents and that variation of these traits exists in a group of similar organisms.	5.S.3.3.2 Explain the concept that traits are passed from parents to offspring.	3.S.1.5.1 Describe the relationship between shape and use
			LS2-3-2. Use evidence to support the explanation that traits can be influenced by the environment.		3.S.1.6.1 Identify questions that can be answered by conducting scientific tests.
	<b>Earth and Space Science</b>	<b>Earth's Systems</b>	ESS1-3-1. Represent data in tables and graphical displays to describe typical weather conditions expected during a particular season.	2.S.4.1.1 Describe the characteristics of different weather conditions.	3.S.1.6.2 Conduct scientific tests
<b>3rd Grade</b>			ESS1-3-2. Obtain and combine information to describe climates in different regions of the world.		3.S.1.6.3 Use appropriate tools and techniques to gather and display data.

**STATE DEPARTMENT OF EDUCATION  
August 10, 2017**

K-6 Crosswalk of the Revised Idaho Science Standards to the 2010 Science Standards

		<b>Earth and Human Activity</b>	ESS2-3-1. Make a claim about the merit of a design solution that reduces the impacts of a weather-related hazard.		3.S.1.6.4 Use data to construct a reasonable explanation.
					3.S.1.6.5 Make simple predictions based on data
					3.S.1.6.6 Identify logical alternative explanations.
					3.S.1.6.7 Communicate the results of tests to others.
					3.S.1.8.1 Read and give multi-step instructions
					3.S.2.1.1 Use instruments to measure properties.
					3.S.5.2.1 Describe how technology helps develop tools.
					3.S.5.2.2 Describe the development of tools over time
<b>4th Grade</b>	<b>Physical Science</b>	<b>Energy</b>	PS1-4-1. Use evidence to construct an explanation relating the speed of an object to the energy of that object.	3.S.2.3.1 Identify potential and kinetic energy	4.S.1.1.1 Explain that a system consists of an organized group of related objects that form a whole.
			PS1-4-2. Make observations to provide evidence that energy can be transferred from place to place by sound, light, heat, and electric currents.		4.S.1.2.1 Make and record observations then analyze and communicate the collected data.
			PS1-4-3. Ask questions and predict outcomes about the changes in energy that occur when objects collide.		4.S.1.2.2 Define observations and inferences.
			PS1-4-4. Apply scientific ideas to design, test, and refine a device that converts energy from one form to another.		4.S.1.2.3 Make, describe and/or use models.
		<b>Waves</b>	PS2-4-1. Develop a model of waves to describe patterns in terms of amplitude and wavelength and that waves can cause objects to move.		4.S.1.3.1 Describe how changes occur and can be measured.
			PS2-4-2. Develop a model to describe that light reflecting from objects and entering the eye allows objects to be seen.		4.S.1.3.2 Measure in both U.S. Customary and International System of Measurement (metric system) units.
			PS2-4-3. Generate and compare multiple solutions that use patterns to transfer information.		4.S.1.5.1 Explain the relationship between shape and use.
	<b>Life Science</b>	<b>Molecules to Organisms</b>	LS1-4-1. Construct an argument that plants and animals have internal and external structures that function to support survival, growth, behavior, and reproduction.	4.S.3.1.2 Describe the difference between vertebrate and invertebrate animals	4.S.1.6.1 Write questions that can be answered by conducting scientific tests.
				4.S.3.1.3 Classify the five groups of vertebrates (mammal, reptiles, amphibians, birds, and fish) based on characteristics.	
			LS1-4-2. Use a model to describe that animals receive different types of information through their senses, process the information in their brain, and respond to the information in different ways.		4.S.1.6.2 Conduct scientific tests.
		<b>Ecosystems</b>	LS2-4-1. Develop a model to describe the movement of matter among plants, animals, decomposers, and the environment.	3.S.3.2.3 Label a food chain that shows how organisms cooperate and compete in an ecosystem.	4.S.1.6.3 Use appropriate tools and techniques to gather and display data.
				3.S.3.2.4 Diagram the food web and explain how organisms both cooperate and compete in ecosystems	4.S.1.6.4 Use data to construct a reasonable explanation.
	<b>Earth and Space Science</b>	<b>Earth's Place in the Universe</b>	ESS1-4-1. Identify evidence from patterns in rock formations and fossils in rock layers for changes in a landscape over time to support an explanation for changes in a landscape over time.		4.S.1.6.5 Make predictions based on data.
		<b>Earth's Systems</b>	ESS2-4-1. Make observations and/or measurements to provide evidence of the effects of weathering or the rate of erosion by water, ice, wind, or vegetation.		4.S.1.6.6 Analyze alternative explanations.
			ESS2-4-2. Analyze and interpret data from maps to describe patterns of Earth's features.		4.S.1.6.7 Communicate the results of tests to others in multiple formats
		<b>Earth and Human Activity</b>	ESS3-4-1. Obtain and combine information to describe that energy and fuels are derived from natural resources and their uses affect the environment.	5.S.5.3.1 Identify the differences between renewable and nonrenewable resources.	4.S.1.8.1 Analyze and follow multistep instructions.
<b>4th Grade</b>			ESS3-4-2. Generate and compare multiple solutions to reduce the impacts of natural Earth processes on humans.	3.S.5.1.1 Identify local environmental issues	4.S.2.1.1 Use instruments to measure properties

**STATE DEPARTMENT OF EDUCATION**  
**August 10, 2017**

K-6 Crosswalk of the Revised Idaho Science Standards to the 2010 Science Standards

				3.S.5.3.1 Explain the concept of recycling	4.S.5.2.1 Identify tools used for space exploration and for scientific investigations
<b>5th Grade</b>	<b>Physical Science</b>	<b>Matter and its Interactions</b>	PS1-5-1. Develop a model to describe that matter is made of particles too small to be seen.	5.S.2.1.1 Describe the differences among elements, compounds, and mixtures.	5.S.1.1.1 Compare and contrast different systems.
			PS1-5-2. Measure and graph quantities to provide evidence that regardless of the type of change that occurs when heating, cooling, or mixing substances, the total weight of matter is conserved.	4.S.2.1.3 Explain the changes caused by heating and cooling materials.	5.S.1.2.1 Use observations and data as evidence on which to base scientific explanations and predictions.
			PS1-5-3. Make observations and measurements to identify materials based on their properties.	4.S.2.1.2 Describe the physical properties of solids, liquids, and gases	5.S.1.2.2 Explain the difference between observation and inference.
				5.S.2.1.2 Compare the physical differences among solids, liquids and gases.	
			PS1-5-4. Conduct an investigation to determine whether the mixing of two or more substances results in new substances.	5.S.2.1.3 Explain the nature of physical change and how it relates to physical properties.	5.S.1.2.3 Use models to explain or demonstrate a concept.
		<b>Motion: Forces and Interactions</b>	PS2-5-1. Support an argument that the gravitational force exerted by Earth on objects is directed down.		5.S.1.3.1 Analyze changes that occur in and among systems.
		<b>Energy</b>	PS3-5-1. Use models to describe that energy in animals' food (used for body repair, growth, motion, and to maintain body warmth) was once energy from the sun.	3.S.3.2.1 Describe the energy needed for living systems to survive.	5.S.1.3.2 Measure in both U.S. Customary and International System of Measurement (metric system) units with an emphasis on the metric system.
				3.S.3.2.2 Compare and contrast the energy requirements of plants and animals.	
	<b>Life Science</b>	<b>Molecules to Organisms</b>	LS1-5-1. Support an argument that plants get the materials they need for growth chiefly from air and water.	5.S.3.2.1 Communicate how plants convert energy from the Sun through photosynthesis.	5.S.1.5.1 Explain how the shape or form of an object or system is frequently related to its use or function.
		<b>Biological Adaptation</b>	LS2-5-1. Analyze and interpret data from fossils to provide evidence of the organisms and the environments in which they lived long ago.		5.S.1.6.1 Write and analyze questions that can be answered by conducting scientific experiments.
			LS2-5-2. Use evidence to construct an explanation for how the variations in characteristics among individuals of the same species may provide advantages in surviving, finding mates, and reproducing.		5.S.1.6.2 Conduct scientific investigations using a control and a variable.
			LS2-5-3. Construct an argument with evidence that in a particular habitat some organisms can survive well, some survive less well, and some cannot survive at all.	4.S.3.1.1 Analyze and communicate the adaptations of plants and animals to their environment.	5.S.1.6.3 Select and use appropriate tools and techniques to gather and display data.
			LS2-5-4. Make a claim about the merit of a solution to a problem caused when the environment changes and the types of plants and animals that live there may change.		5.S.1.6.4 Use evidence to analyze descriptions, explanations, predictions, and models.
	<b>Earth and Space Science</b>	<b>Earth's Place in the Universe</b>	ESS1-5-1. Support an argument that differences in the apparent brightness of the sun compared to other stars is due to their relative distances from the Earth.		5.S.1.6.5 State a hypothesis based on observations.
			ESS1-5-2. Represent data in graphical displays to reveal patterns of daily changes in length and direction of shadows, day and night, and the seasonal appearance of some stars in the night sky.	3.S.4.1.1 Explain the reasons for length of a day, the seasons, and the year on Earth.	5.S.1.6.6 Compare alternative explanations and predictions.
		<b>Earth's Systems</b>	ESS2-5-1. Develop a model using an example to describe ways the geosphere, biosphere, hydrosphere, and/or atmosphere interact.	5.S.4.1.1 Describe the interactions among the solid earth, oceans and atmosphere (erosion, climate, tectonics and continental drift).	5.S.1.6.7 Communicate scientific procedures and explanations.
			ESS2-5-2. Describe and graph the amounts and percentages of water and fresh water in various reservoirs to provide evidence about the distribution of water on Earth.		5.S.1.8.1 Read and follow technical instructions.
		<b>Earth and Human Activity</b>	ESS3-5-1. Support Obtain and combine information about ways individual communities use science ideas to protect the Earth's resources and environment.	5.S.5.1.1 Identify issues for environmental studies.	5.S.5.2.1 Describe how science and technology are part of a student's life.
					5.S.5.2.2 List examples of science and technology.

Middle School (6-8) Crosswalk of the Revised Idaho Science Standards to the 2010 Science Standards

<b>Crosswalk from Revised to Current Idaho Content Standards in Science</b>					
<b>Grade Level</b>	<b>Proposed Idaho Science Standards (ISS 2016)</b>	<b>Unit</b>	<b>Performance Standards</b>	<b>2007/2010 Science Standard</b>	<b>2007/10 Nature of Science Standards (now embedded in scientific and engineering practices required to complete Performance Expectations)</b>
Middle School (6-8)	Physical Science	Matter and its Interactions	PS1-MS-1. Develop models to describe the atomic composition of simple molecules and extended structures.	6.S.2.1.1* Compare and contrast the differences among elements, compounds, and mixtures.	7.S.1.1.1 Define small systems as a part of a whole system.
					7.S.1.1.2 Determine how small systems contribute to the function of the whole.
				6.S.2.1.2* Define the properties of matter.	7.S.1.1.3 Identify the different structural levels of an organism (cells, tissues, organs, and organ systems).
			PS1-MS-2. Analyze and interpret data on the properties of substances before and after the substances interact to determine if a chemical reaction has occurred.		7.S.1.2.1 Describe how observations and data are evidence on which to base scientific explanations and predictions .
			PS1-MS-3. Gather and make sense of information to describe that synthetic materials come from natural resources and impact society.		
			PS1-MS-4. Develop a model that predicts and describes changes in particle motion, temperature, and state of a pure substance when thermal energy is added or removed.	6.S.2.1.3* Compare densities of equal volumes of a solid, a liquid, or a gas.	7.S.1.2.2 Use observations to make defensible inferences.
			6.S.2.1.4* Describe the effect of temperature on density.	7.S.1.2.3 Use models to explain or demonstrate a concept.	
			6.S.2.1.5* Explain the nature of physical change and how it relates to physical properties (the distance between molecules as water changes from ice to liquid water and to water vapor).	7.S.1.3.1 Identify concepts of science that have been stable over time.	
				7.S.1.3.2 Recognize changes that occur within systems.	
			3.S.2.1.2 Identify the physical properties of solids, liquids, and gases.		
			3.S.2.1.3 Explain that heating and cooling can cause changes of state in common materials	7.S.1.3.3 Make metric measurements using appropriate tools.	
			PS1-MS-5. Develop and use a model to describe how the total number of atoms does not change in a chemical reaction and thus mass is conserved.		7.S.1.6.1 Identify controls and variables used in scientific investigations.
		PS1-MS-6. Undertake a design project to construct, test, and modify a device that either releases or absorbs thermal energy by chemical processes.		7.S.1.6.2 Use appropriate tools and techniques to gather and display data.	
		Motion: Forces and Interactions	PS2-MS-1. Apply Newton's Third Law to design a solution to a problem involving the motion of two colliding objects.		7.S.1.6.3 Evaluate data in order to form conclusions.
			PS2-MS-2. Plan an investigation to provide evidence that the change in an object's motion depends on the sum of the forces on the object and the mass of the object.		7.S.1.6.4 Use evidence and critical thinking to accept or reject a hypothesis.
			PS2-MS-3. Ask questions about data to determine the factors that affect the strength of electric and magnetic forces.	8-9.PS.2.4.5 Describe the relationships between electricity and magnetism.	7.S.1.6.5 Evaluate alternative explanations or predictions.
			PS2-MS-4. Construct and present arguments using evidence to support the claim that gravitational interactions are attractive and depend on the masses of interacting objects.	6.S.2.2.1* Describe the effects of different forces (gravity and friction) on the movement, speed, and direction of an object.	7.S.1.6.6 Communicate and defend scientific procedures and explanations.
			PS2-MS-5. Conduct an investigation and evaluate the experimental design to provide evidence that fields exist between objects exerting forces on each other even though the objects are not in contact.		7.S.1.8.1 Read and evaluate technical instructions.
		Energy	PS3-MS-1. Construct and interpret graphical displays of data to describe the relationships of kinetic energy to the mass of an object and to the speed of an object.	8-9. PS.2.3.2* Classify energy as potential and/or kinetic and as energy contained in a field.	7.S.5.2.1 Explain how science and technology are interrelated.
			PS3-MS-2. Develop a model to describe that when the arrangement of objects interacting at a distance changes, different amounts of potential energy are stored in the system.		7.S.5.2.2 Explain how science advances technology.
			PS3-MS-3. Apply scientific principles to design, construct, and test a device that either minimizes or maximizes thermal energy transfer.		
			PS3-MS-4. Plan an investigation to determine the relationships among the energy transferred, the type of matter, the mass, and the change in the average kinetic energy of the particles as measured by the temperature of the sample.		
			PS3-MS-5. Construct, use, and present arguments to support the claim that when the kinetic energy of an object changes, energy is transferred to or from the object.		
		Waves	PS4-MS-1. Use mathematical representations to describe a simple model for waves that includes how the amplitude of a wave is related to the energy in a wave.		
	PS4-MS-2. Develop and use a model to describe that waves are reflected, absorbed, or transmitted through various materials.				
	PS4-MS-3. Integrate qualitative scientific and technical information to support the claim that digitized signals are a more reliable way to encode and transmit information than analog signals.				

**STATE DEPARTMENT OF EDUCATION**  
**August 10, 2017**

Middle School (6-8) Crosswalk of the Revised Idaho Science Standards to the 2010 Science Standards

<b>Middle School (6-8)</b>	<b>Life Science</b>	<b>Molecules to Organisms</b>	LS1-MS-1. Conduct an investigation to provide evidence that living things are made of cells; either one cell or many different numbers and types of cells.	5.S.3.3.1 Compare and contrast the structural differences between plant and animal cells.
			LS1-MS-2. Develop and use a model to describe the function of a cell as a whole and ways parts of cells contribute to the function.	7.S.3.3.3 Identify the functions of cell structures.
			LS1-MS-3. Use argument supported by evidence for how a living organism is a system of interacting subsystems composed of groups of cells.	7.S.3.3.1 Explain the relationships among specialized cells, tissues, organs, organ systems, and organisms.
				7.S.3.3.2 Identify the parts of specialized plant and animal cells.
			LS1-MS-4. Construct a scientific argument based on evidence to defend a claim of life for a specific object or organism.	
			LS1-MS-5. Construct a scientific explanation based on evidence for the role of photosynthesis in the cycling of matter and flow of energy into and out of organisms.	7.S.3.2.1 Describe how energy stored in food is primarily derived from the Sun through photosynthesis.
			LS1-MS-6. Develop a model to describe how food is rearranged through chemical reactions forming new molecules that support growth and/or release energy as this matter moves through an organism	7.S.3.3.4 Describe cell functions that involve chemical reactions.
		<b>Ecosystems</b>	LS2-MS-1. Analyze and interpret data to provide evidence for the effects of resource availability on organisms and populations of organisms in an ecosystem.	7.S.3.2.2 Describe how the availability of resources (matter and energy) limits the distribution and abundance of organisms.
			LS2-MS-2. Construct an explanation that predicts patterns of interactions among organisms across multiple ecosystems.	
			LS2-MS-3. Develop a model to describe the cycling of matter and flow of energy among living and nonliving parts of an ecosystem.	7.S.3.2.3 Illustrate how atoms and molecules cycle among the living and nonliving components of the biosphere.
			LS2-MS-4. Develop a model to describe the flow of energy through the trophic levels of an ecosystem.	7.S.3.2.4 Identify how energy flows through ecosystems in one direction, from photosynthetic organisms to herbivores, carnivores, and decomposers.
			LS2-MS-5. Construct an argument supported by empirical evidence that changes to physical or biological components of an ecosystem affect populations.	
			LS2-MS-6. Evaluate competing design solutions for maintaining biodiversity and ecosystem services.	
		<b>Heredity</b>	LS3-MS-1. Develop and use a model to describe why mutations may result in harmful, beneficial, or neutral effects to the structure and function of the organism.	
			LS3-MS-2. Develop and use a model to describe why asexual reproduction results in offspring with identical genetic information and sexual reproduction results in offspring with genetic variation.	7.S.3.3.5 Describe how dominant and recessive traits are inherited.
		<b>Biological Adaptation</b>	LS4-MS-1. Analyze and interpret data for patterns in the fossil record that document the existence, diversity, extinction, and change of life forms throughout the history of life on Earth under the assumption that natural laws operate today as in the past.	
			LS4-MS-2. Apply scientific ideas to construct an explanation for the anatomical similarities and differences among modern organisms and between modern and fossil organisms to infer relationships.	
			LS4-MS-3. Analyze displays of pictorial data to compare patterns of similarities in the anatomical structures across multiple species of similar classification levels to identify relationships.	
			LS4-MS-4. Construct an explanation based on evidence that describes how genetic variations of traits in a population increase some individuals' probability of surviving and reproducing in a specific environment.	
			LS4-MS-5. Gather and synthesize information about the technologies that have changed the way humans influence the inheritance of desired traits in organisms.	
LS4-MS-6. Use mathematical representations to support explanations of how natural selection may lead to increases and decreases of specific traits in populations over time.	7.S.3.1.1 Describe how natural selection explains species change over time.			
<b>Middle School (6-8)</b>	<b>Earth and Space Science</b>	<b>Earth's Place in the Universe</b>	ESS1-MS-1. Develop and use a model of the Earth-sun-moon system to describe the cyclic patterns of lunar phases, eclipses of the sun and moon, and seasons.	
			ESS1-MS-2. Develop and use a model to describe the role of gravity in the motions within galaxies and the solar system.	8-9.ES.4.1.1* Explain the current scientific theory that suggests that the solar system formed from a nebular cloud of dust and gas.
				4.S.4.1.2 Explain the effect of gravity on orbits and objects.
				4.S.4.1.3 Explain the effect of moon's gravity on Earth's tides.
		ESS1-MS-3. Analyze and interpret data to determine scale properties of objects in the solar system.	4.S.4.1.1 Compare and contrast the basic components of our solar system (planets, sun, moon, asteroids, comets, meteors).	

**STATE DEPARTMENT OF EDUCATION**  
**August 10, 2017**

Middle School (6-8) Crosswalk of the Revised Idaho Science Standards to the 2010 Science Standards

<b>Middle School (6-8)</b>			ESS1-MS-4. Construct a scientific explanation based on evidence from rock strata for how the geologic time scale is used to organize Earth's history.	8-9.ES.4.1.2* Identify methods used to estimate geologic time.		
		<b>Earth's Systems</b>	ESS2-MS-1. Develop a model to describe the cycling of Earth's materials and the flow of energy that drives this process.	6.S.4.1.1* Explain the interactions among the solid earth, oceans, atmosphere, and organisms.		
					5.S.4.2.1 Explain the rock cycle and identify the three classifications of rocks.	
				ESS2-MS-2. Construct an explanation based on evidence for how geoscience processes have changed Earth's surface at varying time and spatial scales.	8-9.ES.4.1.3* Show how interactions among solid earth, oceans, atmosphere, and organisms have changed the earth system over time.	
				ESS2-MS-3. Analyze and interpret data on the distribution of fossils and rocks, continental shapes, and seafloor structures to provide evidence of the past plate motions.		
				ESS2-MS-4. Develop a model to describe the cycling of water through Earth's systems driven by energy from the sun and the force of gravity.	6.S.4.1.2* Explain the water cycle and its relationship to weather and climate.	
				ESS2-MS-5. Collect data to provide evidence for how the motions and complex interactions of air masses results in changes in weather conditions.	6.S.4.1.3* Identify cumulus, cirrus, and stratus clouds and how they relate to weather changes.	
			ESS2-MS-6. Develop and use a model to describe how unequal heating and rotation of the Earth cause patterns of atmospheric and oceanic circulation that determine regional climates.			
		<b>Earth and Human Activity</b>	ESS3-MS-1. Construct a scientific explanation based on evidence for how the uneven distributions of Earth's mineral, energy, and groundwater resources are the result of past and current geoscience processes.			
				ESS3-MS-2. Analyze and interpret data on natural hazards to forecast future catastrophic events and inform the development of technologies to mitigate their effects.		
				ESS3-MS-3. Apply scientific principles to design a method for monitoring and minimizing a human impact on the environment.	9-10.B.5.1.1 Analyze environmental issues such as water and air quality, hazardous waste, forest health, and agricultural production.	
				ESS3-MS-4. Construct an argument supported by evidence for how increases in human population and per-capita consumption of natural resources impact Earth's systems.	7.S.5.3.1 Identify alternative sources of energy.	
					9-10.B.5.3.1 Describe the difference between renewable and nonrenewable resources.	
				ESS3-MS-5. Ask questions to clarify evidence of the factors that have caused the rise in global temperatures over the past century.		

**STATE DEPARTMENT OF EDUCATION**  
**August 10, 2017**

High School (9-12) Crosswalk of the Revised Idaho Science Standards to the 2010 Science Standards

<b>Crosswalk from Revised to Current Idaho Content Standards in Science</b>					
<b>Grade Level</b>	<b>Proposed Idaho Science Standards (ISS 2016)</b>	<b>Unit</b>	<b>Performance Standards</b>	<b>2007/2010 Science Standard</b>	<b>2007/10 Nature of Science Standards (now embedded in scientific and engineering practices required to complete Performance Expectations)</b>
<b>High School</b>	<b>Life Science (Biology)</b>	<b>Molecules to Organisms</b>	LS1-HS-1. Construct an explanation based on evidence for how the structure of DNA determines the structure of proteins which carry out the essential functions of life through systems of specialized cells.	9-10.B.3.3.2 Explain cell functions involving chemical reactions.	9-10.B.1.1.1 Explain the scientific meaning of system, order, and organization.
			LS1-HS-2. Develop and use a model to illustrate the hierarchical organization of interacting systems that provide specific functions within multicellular organisms.	9-10.B.3.3.1 Identify the particular structures that underlie the cellular functions.	9-10.B.1.1.2 Apply the concepts of order and organization to a given system.
			LS1-HS-3. Plan and conduct an investigation to provide evidence that feedback mechanisms maintain homeostasis.		9-10.B.1.2.1 Use observations and data as evidence on which to base scientific explanations.
			LS1-HS-4. Use a model to illustrate the role of cellular division (mitosis) and differentiation in producing and maintaining complex organisms.	9-10.B.3.3.3 Explain how cells use DNA to store and use information for cell functions.	9-10.B.1.2.2 Develop models to explain concepts or systems.
			LS1-HS-5. Use a model to illustrate how photosynthesis transforms light energy into stored chemical energy.		9-10.B.1.2.3 Develop scientific explanations based on knowledge, logic and analysis.
			LS1-HS-6. Construct and revise an explanation based on evidence for how carbon, hydrogen, and oxygen from sugar molecules may combine with other elements to form amino acids and/or other large carbon-based molecules.		9-10.B.1.3.1 Measure changes that can occur in and among systems.
			LS1-HS-7. Use a model to illustrate that cellular respiration is a chemical process whereby the bonds of food molecules and oxygen molecules are broken and the bonds in new compounds are formed resulting in a net transfer of energy.	9-10.B.3.2.4 Describe cellular respiration and the synthesis of macromolecules.	9-10.B.1.3.2 Analyze changes that can occur in and among systems.
			9-10.B.1.3.3 Measure and calculate using the metric system.		
		<b>Ecosystems</b>	LS2-HS-1. Use mathematical and/or computational representations to support explanations of factors that affect carrying capacity of ecosystems at different scales.		9-10.B.1.6.1 Identify questions and concepts that guide scientific investigations.
			LS2-HS-2. Use mathematical representations to support and revise explanations based on evidence about factors affecting biodiversity and populations in ecosystems of different scales.		9-10.B.1.6.2 Utilize the components of scientific problem solving to design, conduct, and communicate results of investigations.
			LS2-HS-3. Construct and revise an explanation based on evidence for the cycling of matter and flow of energy in aerobic and anaerobic conditions.	9-10.B.3.2.1 Explain how matter tends toward more disorganized states (entropy).	9-10.B.1.6.3 Use appropriate technology and mathematics to make investigations.
			LS2-HS-4. Use mathematical representations to support claims for the cycling of matter and flow of energy among organisms in an ecosystem.	9-10.B.3.2.2 Explain how organisms use the continuous input of energy and matter to maintain their chemical and physical organization.	9-10.B.1.6.4 Formulate scientific explanations and models using logic and evidence.
			LS2-HS-5. Develop a model to illustrate the role of photosynthesis and cellular respiration in the cycling of carbon among the biosphere, atmosphere, hydrosphere, and geosphere.	9-10.B.3.2.3 Show how the energy for life is primarily derived from the Sun through photosynthesis.	9-10.B.1.6.5 Analyze alternative explanations and models.

**STATE DEPARTMENT OF EDUCATION**  
**August 10, 2017**

High School (9-12) Crosswalk of the Revised Idaho Science Standards to the 2010 Science Standards

High School				9-10.B.3.2.5 Show how matter cycles and energy flows through the different levels of organization of living systems (cells, organs, organisms, communities and their environment).	9-10.B.1.6.6 Communicate and defend a scientific argument.
			LS2-HS-6. Evaluate the claims, evidence, and reasoning that the complex interactions in ecosystems maintain relatively consistent numbers and types of organisms in stable conditions, but changing conditions may result in a new ecosystem.		9-10.B.1.6.7 Explain the differences among observations, hypotheses, and theories.
			LS2-HS-7. Design, evaluate, and refine a solution for reducing the impacts of human activities on the environment and biodiversity.		9-10.B.1.8.1 Analyze technical writing, graphs, charts, and diagrams.
			LS2-HS-8. Evaluate the evidence for the role of group behavior on individual and species' chances to survive and reproduce.		9-10.B.5.2.1 Explain how science advances technology.
		<b>Heredity</b>	LS3-HS-1. Ask questions to clarify relationships about the role of DNA and chromosomes in coding the instructions for characteristic traits passed from parents to offspring.	9-10.B.3.3.4 Explain how selective expression of genes can produce specialized cells from a single cell.	9-10.B.5.2.2 Explain how technology advances science.
			LS3-HS-2. Make and defend a claim based on evidence that inheritable genetic variations may result from: (1) new genetic combinations through meiosis, (2) viable errors occurring during replication, and/or (3) mutations caused by environmental factors.		9-10.B.5.2.3 Explain how science and technology are pursued for different purposes.
			LS3-HS-3. Apply concepts of statistics and probability to explain the variation and distribution of expressed traits in a population.		
		<b>Biological Adaptation</b>	LS4-HS-1. Communicate scientific information that common ancestry and biological evolution are supported by multiple lines of empirical evidence.		
			LS4-HS-2. Construct an explanation based on evidence that the process of evolution primarily results from four factors: (1) the potential for a species to increase in number, (2) the heritable genetic variation of individuals in a species due to mutation and sexual reproduction, (3) competition for limited resources, and (4) the proliferation of those organisms that are better able to survive and reproduce in the environment.	9-10.B.3.1.2 Explain how evolution is the consequence of interactions among the potential of a species to increase its numbers, genetic variability, a finite supply of resources, and the selection by the environment of those offspring better able to survive and reproduce.	
			LS4-HS-3. Apply concepts of statistics and probability to support explanations that organisms with an advantageous heritable trait tend to increase in proportion to organisms lacking this trait.		
			LS4-HS-4. Construct an explanation based on evidence for how natural selection leads to adaptation of populations.	9-10.B.3.1.1 Use the theory of evolution to explain how species change over time.	
			LS4-HS-5. Evaluate the evidence supporting claims that changes in environmental conditions may result in: (1) increases in the number of individuals of some species, (2) the emergence of new species over time, and (3) the extinction of other species.		
			LS4-HS-6. Create or revise a simulation to test a solution to mitigate adverse impacts of human activity on biodiversity.		
High School	<b>Physical Science Chemistry</b>	<b>Structure and Properties</b>	PSC1-HS-1. Develop models to describe the atomic composition of simple molecules and extended structures.		
			PSC1-HS-2. Use the periodic table as a model to predict the relative properties of elements based on the patterns of electrons in the outermost energy level of atoms.	8-9.PS.2.4.1 Describe the properties, function, and location of protons, neutrons, and electrons.	
High School			PSC1-HS-3. Plan and conduct an investigation to gather evidence to compare the structure of substances at the bulk scale to infer the strength of electrical forces between particles.	8-9.PS.2.4.4 State the basic electrical properties of matter.	

**STATE DEPARTMENT OF EDUCATION**  
**August 10, 2017**

High School (9-12) Crosswalk of the Revised Idaho Science Standards to the 2010 Science Standards

			PSC1-HS-4. Develop models to illustrate the changes in the composition of the nucleus of the atom and the energy released during the processes of fission, fusion, and other types of radioactive decay.	8-9 PS.2.4.2. Explain the processes of fission and fusion.	
				8-9.PS.2.4.3 Describe the characteristics of isotopes.	
			PSC1-HS-5. Communicate scientific and technical information about why the molecular-level structure is important in the functioning of designed materials.		
		<b>Chemical Reactions</b>	PSC2-HS-1 Construct and revise an explanation for the outcome of a simple chemical reaction based on the outermost electron states of atoms, trends in the periodic table, and knowledge of the patterns of chemical properties.		
			PSC2-HS-2. Develop a model to illustrate that the release or absorption of energy from a chemical reaction system depends upon the changes in total bond energy.	8-9.PS.2.5.1 Explain how chemical reactions release or consume energy while the quantity of matter remains constant.	
			PSC2-HS-3. Apply scientific principles and evidence to provide an explanation about the effects of changing the temperature or concentration of the reacting particles on the rate at which a reaction occurs.		
			PSC2-HS-4. Use mathematical representations to support the claim that atoms, and therefore mass, are conserved during a chemical reaction.		
			PSC2-HS-5. Refine the design of a chemical system by specifying a change in conditions that would produce increased amounts of products at equilibrium.		
		<b>Energy</b>	PSC3-HS-1. Evaluate the claims, evidence, and reasoning behind the idea that electromagnetic radiation can be described either by a wave model or a particle model, and that for some situations one model is more useful than the other.		
			PSC3-HS-2 Create a computational model to calculate the change in the energy of one component in a system when the change in energy of the other component(s) and energy flows in and out of the system are known.		
			PSC3-HS-3. Develop and use models to illustrate that energy at the macroscopic scale can be accounted for as a combination of energy associated with the motions of particles (objects) and energy associated with the relative positions of particles (objects).		
			PSC3-HS-4*. Design, build, and refine a device that works within given constraints to convert one form of energy into another form of energy. ---OPTIONAL		
			PSC3-HS-5. Plan and conduct an investigation to provide evidence that the transfer of thermal energy when two components of different temperature are combined within a closed system results in a more uniform energy distribution among the components in the system (second law of thermodynamics).		
<b>High School</b>	<b>Physical Science Physics</b>	<b>Motion: Forces and Interactions</b>	PSP1-HS-1. Analyze data to support the claim that Newton's second law of motion describes the mathematical relationship among the net force on a macroscopic object, its mass, and its acceleration.	8-9*.PS.2.2.1 Explain motion using Newton's Laws of Motion.	

**STATE DEPARTMENT OF EDUCATION**  
**August 10, 2017**

High School (9-12) Crosswalk of the Revised Idaho Science Standards to the 2010 Science Standards

			PSP1-HS-2. Use mathematical representations to support the claim that the total momentum of a system of objects is conserved when there is no net force on the system.		
			PSP1-HS-3. Apply scientific and engineering ideas to design, evaluate, and refine a device that minimizes the force on a macroscopic object during a collision.		
			PSP1-HS-4. Use mathematical representations of Newton's Law of Gravitation and Coulomb's Law to describe and predict the gravitational and electrostatic forces between objects.		
			PSP1-HS-5. Plan and conduct an investigation to provide evidence that an electric current can produce a magnetic field and that a changing magnetic field can produce an electric current.		
			PSP1-HS-6. Communicate scientific and technical information about why the molecular-level structure is important in the functioning of designed materials.		
		<b>Energy</b>	PSP2-HS-1 Create a computational model to calculate the change in the energy of one component in a system when the change in energy of the other component(s) and energy flows in and out of the system are known.		
			PSP2-HS-2. Develop and use models to illustrate that energy at the macroscopic scale can be accounted for as a combination of energy associated with the motions of particles (objects) and energy associated with the relative positions of particles (objects).	8-9.PS.2.3.1* Explain that energy can be transformed but cannot be created nor destroyed.	
			PSP2-HS-3. Design, build, and refine a device that works within given constraints to convert one form of energy into another form of energy.		
			PSP2-HS-4. Plan and conduct an investigation to provide evidence that the transfer of thermal energy when two components of different temperature are combined within a closed system results in a more uniform energy distribution among the components in the system (second law of thermodynamics).		
			PSP2-HS-5. Develop and use a model of two objects interacting through electric or magnetic fields to illustrate the forces between objects and the changes in energy of the objects due to the interaction.		
		<b>Waves</b>	PSP3-HS-1. Use mathematical representations to support a claim regarding relationships among the frequency, wavelength, and speed of waves traveling in various media.		
			PSP3-HS-2. Evaluate questions about the advantages of using digital transmission and storage of information.		
			PSP3-HS-3. Evaluate the claims, evidence, and reasoning behind the idea that electromagnetic radiation can be described either by a wave model or a particle model, and that for some situations one model is more useful than the other.		
<b>High School</b>			PSP3-HS-4. Evaluate the validity and reliability of claims in published materials of the effects that different frequencies of electromagnetic radiation have when absorbed by matter.		

**STATE DEPARTMENT OF EDUCATION**  
**August 10, 2017**

High School (9-12) Crosswalk of the Revised Idaho Science Standards to the 2010 Science Standards

			PSP3-HS-5. Communicate technical information about how some technological devices use the principles of wave behavior and wave interactions with matter to transmit and capture information and energy.		
<b>High School</b>	<b>Earth and Space Science</b>	<b>Earth's Place in the Universe</b>	ESS1-HS-1. Develop a model based on evidence to illustrate the life span of the sun and the role of nuclear fusion in the sun's core to release energy that eventually reaches Earth in the form of radiation.		
			ESS1-HS-2. Construct an explanation of the Big Bang theory based on astronomical evidence of light spectra, motion of distant galaxies, and composition of matter in the universe.		
			ESS1-HS-3. Communicate scientific ideas about the way stars, over their life cycle, produce elements.		
			ESS1-HS-4. Use mathematical or computational representations to predict the motion of orbiting objects in the solar system.		
			ESS1-HS-5. Evaluate evidence of the past and current movements of continental and oceanic crust and the theory of plate tectonics to explain the ages of crustal rocks.		
			ESS1-HS-6. Apply scientific reasoning and evidence from ancient Earth materials, meteorites, and other planetary surfaces to construct an account of Earth's formation and early history.		
		<b>Earth's Systems</b>	ESS2-HS-1. Develop a model to illustrate how Earth's internal and surface processes operate at different spatial and temporal scales to form continental and ocean-floor features.		
			ESS2-HS2. Analyze geoscience data to make the claim that one change to Earth's surface can create feedbacks that cause changes to other Earth systems.		
			ESS2-HS-3. Develop a model based on evidence of Earth's interior to describe the cycling of matter by thermal convection.	8-9.ES.4.2.1* Explain the internal and external energy sources of the earth.	
			ESS2-HS-4. Use a model to describe how variations in the flow of energy into and out of Earth's systems result in changes in climate.		
			ESS2-HS-5. Plan and conduct an investigation of the properties of water and its effects on Earth materials and surface processes.		
			ESS2-HS-6. Develop a quantitative model to describe the cycling of carbon among the hydrosphere, atmosphere, geosphere, and biosphere.		
			ESS2-HS-7. Construct an argument based on evidence about the simultaneous coevolution of Earth's systems and life on Earth.		
		<b>Earth and Human Activity</b>	ESS3-HS-1. Construct an explanation based on evidence for how the availability of natural resources, occurrence of natural hazards, and changes in climate have influenced human activity.		
			ESS3-HS-2. Evaluate competing design solutions for developing, managing, and utilizing energy and mineral resources based on cost-benefit ratios.		
			ESS3-HS-3. Create a computational simulation to illustrate the relationships among management of natural resources, the sustainability of human populations, and biodiversity.		

**STATE DEPARTMENT OF EDUCATION**  
**August 10, 2017**

High School (9-12) Crosswalk of the Revised Idaho Science Standards to the 2010 Science Standards

			ESS3-HS-4. Evaluate or refine a technological solution that reduces impacts of human activities on natural systems.	9-10.B.5.1.1 Analyze environmental issues such as water and air quality, hazardous waste, forest health, and agricultural production.	
			ESS3-HS-5. Analyze geoscience data and the results from global climate models to make an evidence-based forecast of the current rate of global or regional climate change and associated future impacts to Earth systems.		
			ESS3-HS-6. Use a computational representation to illustrate the relationships among Earth systems and how those relationships are being modified due to human activity.		

THIS PAGE INTENTIONALLY LEFT BLANK

**IDAHO PUBLIC DRIVER EDUCATION AND  
TRAINING CONTENT STANDARDS AND  
BENCHMARKS**

*Mission: Idaho Public Driver Education programs provide an introduction to the tools and skills necessary to become safer drivers.*

**Content Standards** indicate the essential knowledge and skills based on Idaho traffic laws and principles of safety that a student should know and be able to do for successful completion of an Idaho approved public driver education and training program.

**Benchmarks** define the content knowledge, skills, abilities, and behaviors upon successful completion of the Idaho public driver education and training course.

**CONTENT STANDARD 1**

**COURSE OVERVIEW AND PARENT ORIENTATION**

**1.1 Understanding Course Requirements**

**BENCHMARKS:**

The student and parent/guardian will ~~describe and/or discuss:~~ **be presented:**

- (a) [1.1.1](#) the Idaho public driver education and training program goals
- (b) [1.1.2](#) the course structure, policies and rules
- (c) [1.1.3](#) the Graduated Driver Licensing Law and procedures for compliance
- (d) [1.1.4](#) the responsibilities of the instructor, parent and student during the course
- (e) [1.1.5](#) the process of obtaining ~~and~~, maintaining, **and renewing**, an Idaho driver's license
- (f) [1.1.6](#) the types of driver's licenses and instruction permits
- (g) [1.1.7](#) special information that may be placed on a driver license or instruction permit
- (h) [1.1.8](#) licensing restrictions, suspensions, and revocations placed on driving privileges (i) ~~the license renewal process~~
- (j) [1.1.9](#) the purpose of the Supervised Driving Guide or a comparable document (k) ~~ways to obtain guided behind the wheel practice~~

## 1.2 Understanding the Nature of Driving

### **BENCHMARKS:**

The student will:

- (a) [1.2.1](#) examine the behaviors resulting in driver errors and crashes in Idaho
- (b) [1.2.2](#) examine crash statistics in Idaho and nationally
- (c) [1.2.3](#) review the risks associated with poor driving habits and how risk can be minimized

## CONTENT STANDARD 2

### VEHICLE AWARENESS

## 2.1 Identifying Gauges and Warning Symbols Inside a Vehicle

### **BENCHMARKS:**

The student will locate and describe:

- (a) [2.1.1](#) the function of alert and warning symbols and gauges found in a ~~driver education~~ vehicle
- (b) ~~the function of alert and warning symbols and gauges found in a family vehicle~~

## 2.2 Operating Vehicle Control Devices

### **BENCHMARKS:**

The student will describe and demonstrate:

- (a) [2.2.1](#) the use of vehicle control devices found in a driver education vehicle
- (b) [2.2.2](#) the use of safety, communication, and convenience devices found in a driver education vehicle

## 2.3 Preparing to Drive

### **BENCHMARKS:**

The student will describe and demonstrate:

- (a) [2.3.1](#) pre-entry tasks
- (b) [2.3.2](#) entry tasks made prior to starting and moving a motor vehicle to accommodate air bags and maximize safety
- (c) [2.3.3](#) check all passengers for safety restraint use
- (d) [2.3.4](#) traditional **and enhanced** mirror adjustments **to reduce blind spots and glare**
- (e) ~~enhanced mirror adjustments to reduce blind spots and glare~~

⊕ [2.3.5](#) the steps involved in securing a vehicle after it is stopped and a drive is completed

## 2.4 Protecting Occupants

### **BENCHMARKS:**

The student will:

- ⊕ [2.4.1](#) describe the three collisions of a crash and the effect on the restrained and unrestrained human body
- ⊕ [2.4.2](#) identify and/or describe locations and purpose of airbags, belt adjusters, and head restraints and demonstrate proper adjustments and operation to provide crash survival protection

## CONTENT STANDARD 3

## TRAFFIC CONTROL

### 3.1 Traffic Control Devices and Laws

#### **BENCHMARKS:**

The student will:

- ⊕ [3.1.1](#) describe the purposes for traffic control devices
- ⊕ [3.1.2](#) list the colors and shapes and describe the functions of traffic signs, traffic signals, and traffic signal/sign combinations
- ⊕ [3.1.3](#) list and explain meanings of colors and meaning of roadway markings
- ⊕ [3.1.4](#) describe and/or demonstrate appropriate driver responses to roadway signs, traffic signals, and roadway markings
- ⊕ [3.1.5](#) apply traffic laws for operating a motor vehicle on public streets and highways.

### 3.2 Right of Way Rules

#### **BENCHMARKS:**

The student will:

- ⊕ [3.2.1](#) define “right of way”
- ⊕ [3.2.2](#) discuss the consequences for failure to yield the right of way
- ⊕ [3.2.3](#) apply the rules of yielding the right of way at intersections
- ⊕ [3.2.4](#) apply the rules of yielding the right of way when merging
- ⊕ [3.2.5](#) discuss reasons for and/or apply rules of yielding right of way to emergency vehicles, funerals, school buses, and pedestrians

- (f) 3.2.6 discuss and/or apply rules of yielding in school zones and construction zones
- 3.2.7 discuss and/or apply rules of yielding right of way at intersections with highway-rail grade crossings
- (g) 3.2.8 discuss and/or demonstrate procedures to safely navigate a center shared turn lane, turn lanes and roundabouts.

## CONTENT STANDARD 4

### VEHICLE CONTROL

#### 4.1 Vehicle Positioning

##### **BENCHMARKS:**

The student will identify, describe, and/or demonstrate:

- (a) 4.1.1 the blind areas to the front, sides, and rear of a vehicle
- (b) 4.1.2 a visual reference point that will place the front bumper at a line or curb when stopping
- (c) 4.1.3 a visual reference point that will place the right side tires 6-12 inches, 3 feet, and 6 feet from a line or curb
- (d) 4.1.4 a visual reference point that will place the left side tires 6-12 inches from a line or curb
- (e) 4.1.5 a visual reference point for placement of a vehicle in the center of a lane
- (f) 4.1.6 visual reference points for placement of the rear bumper at a line or curb
- (g) 4.1.7 lane placement and visual reference points for setup, entry to, and exiting from a turn

#### 4.2 Performing Basic Control

##### **BENCHMARKS:**

The student will describe and demonstrate:

- (a) 4.2.1 proper starting procedures ~~tasks (i.e.: Parking brake set, proper gear selection, foot on brake, proper use of ignition, headlights on for safety)~~
- (b) 4.2.2 steering wheel control techniques ~~(i.e.: Push Pull, Hand Over Hand, One Hand Backing and Limited Evasive)~~ and when each is used
- (c) 4.2.3 procedures for entering and leaving the roadway ~~(i.e.: identify open space before moving foot from brake to accelerator, communication)~~
- (d) 4.2.4 acceleration control \_\_\_\_\_

**STATE DEPARTMENT OF EDUCATION**  
**AUGUST 10, 2017**

---

- (e) [4.2.5](#) controlled, threshold, and trail braking control
- (f) [4.2.6](#) proper entry into and exit out of a 90 degree corner
- (g) [4.2.7](#) procedures for left and right precision turns from a stopped and moving position
- (h) [4.2.8](#) procedures for backing straight and while turning

### **4.3 Lane Changes and Passing**

#### **BENCHMARKS:**

The student will describe and demonstrate:

- (a) [4.3.1](#) compliance with the legal requirements for a lane change
- (b) [4.3.2](#) safe gap selection for a lane change
- (c) [4.3.3](#) appropriate lane positions prior to a lane change
- (d) [4.3.4](#) effective speed adjustments for a lane change
- (e) [4.3.5](#) effective blind area checks and mirror use prior to making a lane

change The student will describe:

- (a) [4.3.6](#) the legal requirements for passing
- (b) [4.3.7](#) safe gap selection and lane return for passing another vehicle
- (c) [4.3.8](#) effective speed adjustments for passing another vehicle and lane return
- (d) [4.3.9](#) appropriate lane positions prior to passing another vehicle

### **4.4 Performing Turnabouts**

#### **BENCHMARKS:**

The student will describe and demonstrate:

- (a) [4.4.1](#) U-turns
- (b) [4.4.2](#) 2-point turns
- (c) [4.4.3](#) 3-point turns

### **4.5 Parking Maneuvers**

#### **BENCHMARKS:**

The student will demonstrate:

- (a) [4.5.1](#) angled parking
- (b) [4.5.2](#) parallel parking
- (c) [4.5.3](#) street/curb parking
- (d) [4.5.4](#) perpendicular forward parking

- (e) [4.5.5](#) perpendicular backing-into parking
- (f) [4.5.6](#) parking on a hill – uphill with a curb
- (g) [4.5.7](#) parking on a hill – uphill without a curb
- (h) [4.5.8](#) parking on a hill – downhill with a curb
- (i) [4.5.9](#) parking on a hill – downhill without a curb
- (j) [4.5.10](#) recognition of restricted parking areas

## **CONTENT STANDARD 5**

### **CONTROLLING THE AREA AROUND YOUR VEHICLE**

#### **5.1 Using Vision for Vehicle Control**

##### **BENCHMARKS:**

The student will:

- (a) [5.1.1](#) identify fields of vision and their use while operating a motor vehicle ~~(b) identify strategies for overcoming physical visual problems~~
- (e) [5.1.2](#) analyze the effect speed has on vision
- (f) [5.1.3](#) identify techniques to improve vision while driving
- (e) [5.1.4](#) describe the vehicle control sequence of vision, motion, and steering control
- (f) [5.1.5](#) discuss how optical illusions can affect the driving task

#### **5.2 Time and Space Management Systems and Strategies**

##### **BENCHMARKS:**

The student will describe and/or demonstrate:

- (a) [5.2.1](#) the components of a space management system
- (b) [5.2.2](#) responses to changes in line of sight restrictions
- (e) [5.2.3](#) responses to changes in path of travel restrictions
- (f) [5.2.4](#) the six zone locations around a vehicle
- (e) [5.2.5](#) adjusting lane positions and speed to control space around a vehicle
- (f) [5.2.6](#) how to select a safe gap for vehicle maneuvers
- (g) [5.2.7](#) responses to traffic to the front, sides, and rear of the vehicle
- (h) [5.2.8](#) safe following intervals
- (i) [5.2.9](#) appropriate communication techniques to inform other roadway users of driver actions prior to a speed or lane position adjustment

### 5.3 Intersections

**BENCHMARKS:**

- (a) The student will identify and/or describe appropriate responses to/for:
- (a) 5.3.1 recognition of and responses to different intersection types
- (b) 5.3.2 searching for and responding to traffic signs, signals, and markings at intersections
- (c) 5.3.3 identification of and response to controlled and uncontrolled railroad crossings
- (d) 5.3.4 visual searching skills to the left, front, right, and rear of the vehicle at intersections
- (e) 5.3.5 visual searching skills to identify and select the best lane position, best speed, and communication at intersections
- (f) 5.3.6 recognition of and response to legal, staggered, and safety stop positions at intersections

**CONTENT STANDARD 6**

### THE PHYSICS OF DRIVING

#### 6.1 The Effects of Gravity and Energy of Motion on a Vehicle

**BENCHMARKS:**

The student will describe and/or demonstrate:

- (a) 6.1.1 definitions of gravity and energy of motion
- (b) 6.1.2 the effects gravity and energy of motion have on friction and traction
- (c) 6.1.3 the effect of speed on energy of motion
- (d) 6.1.4 the forces of an impact
- (e) 6.1.5 the impact of tire condition and air pressure on traction
- (f) 6.1.6 the forces involved while in a curve
- (g) 6.1.7 the factors that affect braking distance
- (h) 6.1.8 the consequences of vehicle modifications on vehicle balance and traction
- (i) 6.1.9 the forces of energy on vehicles of different weights and size
- (j) 6.1.10 the effect of vehicle load on vehicle balance
- (k) 6.1.11 the cause and effect of vehicle load changes from side to side, front to rear, and rear to front
- (l) 6.1.12 how aggressive steering, braking, and acceleration affects vehicle balance and control
- (m) 6.1.13 traction loss to both the front and rear wheels

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

---

- (+) [6.1.14](#) how to manage traction loss on a front-wheel drive, rear-wheel drive, and all-wheel drive vehicle
- (+) [6.1.15](#) conditions that can create traction loss and vehicle imbalance
- (+) [6.1.16](#) how traction and vehicle balance are affected by steering, acceleration, deceleration, and roadway surfaces
- (+) [6.1.17](#) the function, advantages, and proper braking techniques of two and four-wheel anti-lock braking systems
- (+) [6.1.18](#) various steering, stability control, and traction control systems

## **6.2 Negotiating Hills and Curves**

### **Benchmarks:**

The student will describe and/or demonstrate:

- (+) [6.2.1](#) line of sight and path of travel restrictions on hills and curves
- (+) [6.2.2](#) proper approach to hills and curves
- (+) [6.2.3](#) proper speed for ascending and descending a hill
- (+) [6.2.4](#) proper stopping and starting on a hill
- (+) [6.2.5](#) proper speed and lane positions for approach, apex and exit on hills and curves
- (+) [6.2.6](#) conditions that can affect traction and procedures to maintain traction on hills and curves

## **CONTENT STANDARD 7**

### **DRIVING ENVIRONMENTS**

#### **7.1 Rural Driving**

##### **BENCHMARKS:**

The student will describe and/or demonstrate:

- (+) [7.1.1](#) characteristics and hazards of rural driving environments
- (+) [7.1.2](#) recognition and response to signs, signals and markings in rural environments
- (+) [7.1.3](#) responses to animals in rural areas and abide by Idaho's Open Range Law
- (+) [7.1.4](#) responses to road conditions and surfaces with proper lane selection, lane position, and speed in rural environments
- (+) [7.1.5](#) recognition of and responses to slow moving vehicles

#### **7.2 Urban Driving**

##### **BENCHMARKS:**

---

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

---

The student will describe and/or demonstrate:

- (a) [7.2.1](#) characteristics and hazards of urban driving environments
- (b) [7.2.2](#) recognition and response to signs, signals and markings in urban environments
- (c) [7.2.3](#) recognition of and response to problems due to congestion and plan alternate appropriate routes
- (d) [7.2.4](#) responses to road conditions and surfaces with proper lane selection, lane position, and speed in urban environments
- (e) [7.2.5](#) appropriate lane choice, lane changes and passing

### **7.3 Driving on Limited Access Highways (Freeways)**

#### **BENCHMARKS:**

The student will describe and/or demonstrate:

- (a) [7.3.1](#) the characteristics, advantages and disadvantages of limited access highways (freeways)
- (b) [7.3.2](#) recognition of and responses to signs, signals, and markings on limited access highways (freeways)
- (c) [7.3.3](#) recognition of and responses to the types of expressway interchanges, (i.e.: the ~~cloverleaf, diamond, trumpet, and directional interchange~~)
- (d) [7.3.4](#) appropriate lane choice, lane changes and passing
- (e) [7.3.5](#) recognition of and responses to problems due to congestion and plan alternate appropriate routes
- (f) [7.3.6](#) appropriate entering and exiting limited access highways (freeways)
- (g) [7.3.7](#) recognition of how higher speeds affect vehicle control

### **7.4 Driving at Night and in Other Reduced Visibility Conditions**

#### **BENCHMARKS:**

The student will describe and/or demonstrate:

- (a) [7.4.1](#) sources of glare and procedures to protect from glare
- (b) [7.4.2](#) driving strategies during low light or darkness conditions
- (c) [7.4.3](#) the laws and the proper use of headlights
- (d) [7.4.4](#) limited visibility conditions (i.e.: ~~fog, smoke, snow, rain and dust, etc.~~) and procedures to reduce risk

### **7.5 Driving During Adverse Weather Conditions**

The student will describe and/or demonstrate:

- (a) 7.5.1 adverse weather driving conditions (~~i.e.: flooding, heat, cold, storms, blizzards, strong wind, etc~~)
- (b) 7.5.2 risks associated with and strategies to compensate for driving during adverse weather driving conditions

## CONTENT STANDARD 8

### COOPERATING WITH OTHER ROADWAY USERS

#### 8.1 Driving Within the Highway Transportation System

##### **BENCHMARKS:**

The student will describe:

- (a) 8.1.1 the components of the Highway Transportation System
- (b) 8.1.2 the impact and consequences of personal driving attitudes, choices, and behaviors on themselves and others.
- (c) 8.1.3 driver responsibilities for sharing the road with a variety of motorized and non- motorized roadway users and animals
- (d) 8.1.4 procedures for traffic stops by a police officer

#### 8.2 Responding to Emergencies.

##### **BENCHMARKS:**

The student will identify and/or describe appropriate responses to/for:

- (a) 8.2.1 sudden tire deflation, problems with the accelerator, engine, cooling system, steering, electrical system, lighting, brake failures, vehicle fire, etc.
- (b) ~~8.2.2~~ conditions resulting in skids
- (c) 8.2.3 conditions requiring emergency evasive steering
- (d) 8.2.4 returning a vehicle to the roadway from an off-road condition.

#### 8.3 Responsibilities after a Crash

##### **BENCHMARKS:**

The student will describe:

- (a) 8.3.1 Idaho's Good Samaritan Law

- (b) [8.3.2](#) what to do at the scene of a crash
- (e) [8.3.3](#) the criteria for when law enforcement must be called after a crash
- (d) [8.3.4](#) the importance of following emergency personnel's directions
- (e) [8.3.5](#) Idaho's vehicle insurance requirements

## CONTENT STANDARD 9

### BEING A RESPONSIBLE DRIVER

#### 9.1 Effects of Emotions on Driving

##### **BENCHMARKS:**

The student will describe and/or discuss:

- (a) [9.1.1](#) emotions and their ~~affect~~ effect on driver attitudes, choices and behaviors
- (b) [9.1.2](#) ways to manage emotions while driving

#### 9.2 Disabilities and Driving

##### **BENCHMARKS:**

The student will describe and/or discuss:

- (a) [9.2.1](#) temporary and permanent disabilities that may affect the driving task
- (b) [9.2.2](#) actions drivers can take to compensate for disabilities while driving

#### 9.3 Alcohol and Drugs

##### **BENCHMARKS:**

The student will describe and/or discuss:

- (a) [9.3.1](#) how legal and illegal alcohol and drugs affect people differently; ~~(i.e.:~~  
body weight, tolerance, time, etc.)
- (b) [9.3.2](#) the amount of alcohol in various drinks
- (c) [9.3.3](#) the multiplying effects of alcohol and/or drugs
- (d) [9.3.4](#) the effects of alcohol and drugs on driver perception, vision, reaction time, and risk-taking
- (e) [9.3.5](#) the increased probability of being involved in a fatal traffic crash after drinking and/or using drugs

#### 9.4 Alcohol / Drug Involved Crashes and Idaho Laws

The student will describe and/or discuss:

- ~~(a) why alcohol is the most commonly used and abused drug involved with driving~~

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

---

- (b) 9.4.1 facts about teenage ~~drinking and~~ impaired driving in Idaho and the United States
- (c) 9.4.2 reasons and excuses for why people drive ~~drunk or drugged~~ impaired
- (d) 9.4.3 the effect ~~alcohol-related~~ impaired crashes have on families and communities
- (e) 9.4.4 Idaho rules, regulations, and penalties for alcohol and drug use ~~use and~~  
abuse in Idaho
- (f) 9.4.5 ways to intervene when someone is impaired and intends to drive

## **9.5 Drowsy Driving**

### **BENCHMARKS:**

The student will describe and/or discuss:

- (a) 9.5.1 the physical and mental symptoms and effects ~~affect~~ of fatigue on driver behavior
- (b) ~~the importance of sleep and its effect on performance~~
- (c) ~~the physical and mental symptoms of fatigue on the driving task~~
- (d) 9.5.2 strategies to prevent and/or reduce driving while fatigued and drowsy

## **9.6 Aggressive Driving**

### **BENCHMARKS:**

The student will ~~describe and/or demonstrate:~~ discuss:

- (a) 9.6.1 aggressive driving behaviors
- (b) 9.6.2 strategies to reduce conflicts while driving
- (c) 9.6.3 how emotions and situations can lead to dangerous driving behaviors
- (d) 9.6.4 how aggressive driving behaviors can lead to road rage

## **9.7 Distracted Driving**

### **BENCHMARKS:**

The student will identify and describe:

- (h) 9.7.1 how mental, physical, and visual distractions effect driving
- 9.7.2 how mobile devices and other technologies can create distractions while driving
- (a) 9.7.3 how passengers can create distractions while driving
- (b) 9.7.4 personal habits that can create distractions while driving
- (c) 9.7.5 conditions inside and outside the vehicle that can create distractions while driving
- (d) 9.7.6 strategies for reducing distractions while driving
- (e) 9.7.7 the relationship between distracted driving and vehicle crashes and fatalities in Idaho and nationally

**PROFESSIONAL STANDARDS COMMISSION**

**SUBJECT**

Temporary Rule, IDAPA 08.02.02.015.02, Rules Governing Uniformity

**APPLICABLE STATUTE, RULE, OR POLICY**

Section 33-1258, Idaho Code  
IDAPA 08.02.02, Rules Governing Uniformity

**BACKGROUND/DISCUSSION**

This proposed temporary rule provides for the amendment of IDAPA 08.02.02.015.02, which will add the Occupational Therapist Endorsement and Physical Therapist Endorsement to the Pupil Personnel Services Certificate.

Occupational therapists (OT) and physical therapists (PT) are professional school personnel and should reflect professional school personnel salaries. Since there are currently no endorsements for OT or PT, districts that employ them must code them as classified, which has a significantly lower funding allocation. Creating the endorsement for OT and PT will allow OT and PT staff the option to become certified, which will permit the districts that employ them to code them as a certificated position, which will increase their funding allocation.

The temporary rule will confer a benefit, in that those OT and PT staff may be coded as certificated positions effective the commencement of the 2017-2018 school year. This change is also being addressed in Pending Rule Docket No. 08-0202-1701, which, if approved, will become effective upon expiration of the temporary rule.

**IMPACT**

The creation of endorsements for these professionals will allow districts additional funding options for these types of student services. This temporary rule confers a benefit to those OT/PT employed by districts at the start of the 2017-2018 school year.

**ATTACHMENTS**

Attachment 1 – Proposed changes to IDAPA 08.02.02.015.02

Page 3

**STAFF COMMENTS AND RECOMMENDATIONS**

Staff in our public school system are made up of classified and certificated staff. Funding provided by the state for these positions is based on the average daily attendance of students converted into support units, the support units are then used to calculate the school district or charter schools staff allowance. The staff allowance is calculated for instructional staff (certificated), pupil service staff (certificated), administrative staff (certificated), and classified staff. School districts and charter schools are then distributed personnel funds based on their

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

---

staff allowance for each category. The state appropriates personnel funds at a higher rate for certificated staff than it does for classified staff. School districts and charter schools may hire more staff than the state pays for, however, there is a limit on the number of staff under the amount calculated that a school district may hire without their salary based apportionment being reduced. Creating an endorsement for the Pupil Personnel Services Certificate for occupational and physical therapist will allow these individuals to be certificated and will allow for them to be funded based on the career ladder funding model, which will require the state to calculate funding for these positions at a higher rate than the funding calculations for classified staff. The actual amount distributed to the school districts for certificated staff is the average salary of the staff in the category multiplied by the school districts or charter schools staff allowance for that category. If a school district has hired more certificated staff in the pupil service staff category than their staff allowance, then any benefit would be negligible, if a school district or charter school has additional positions in their pupil personnel services staff allowance than they may be able to receive additional funding for these staff.

Administrative rules are made up of three types of rules. Temporary rules, proposed rules and pending rules. Temporary and proposed rules may be promulgated jointly with a single docket number or temporary rules may be promulgated as a stand alone rule. A rule must go through the proposed rule and pending rule steps to become a final rule. Temporary rules go into effect at the time of Board approval unless an alternative effective date is specified by Board action. To qualify as a temporary rule, the rule must meet one of three criteria:

- provides protection of the public health, safety, or welfare; or
- is to come into compliance with deadlines in amendments to governing law or federal programs; or
- is conferring a benefit.

Temporary rules that are approved prior to the start of a legislative session expire at the end of that legislative session unless action is taken by the legislature to extend the rule. The legislature does not see temporary rules unless there is a request for an extension.

**BOARD ACTION**

I move to approve the temporary rule amendment to IDAPA 08.02.02.015.02, Rules Governing Uniformity, as submitted in Attachment 1.

**IDAPA 08  
TITLE 02  
CHAPTER 02**

**08.02.02 - RULES GOVERNING UNIFORMITY**

**015. IDAHO EDUCATOR CREDENTIAL.**

The State Board of Education authorizes the State Department of Education to issue certificates and endorsements to those individuals meeting the specific requirements for each area provided herein. (3-25-16)

**01. Standard Instructional Certificate.** A Standard Instructional Certificate makes an individual eligible to teach all grades, subject to the grade ranges and subject areas of the valid endorsement(s) attached to the certificate. A standard instructional certificate may be issued to any person who has a baccalaureate degree from an accredited college or university and who meets the following requirements: (3-29-17)

**a.** Professional education requirements: (3-29-17)

**i.** Earned a minimum of twenty (20) semester credit hours, or thirty (30) quarter credit hours, in the philosophical, psychological, methodological foundations, instructional technology, and in the professional subject matter, which shall include at least three (3) semester credit hours, or four (4) quarter credit hours, in reading and its application to the content area; (3-29-17)

**ii.** The required minimum credit hours must include at least six (6) semester credit hours, or nine (9) quarter credit hours, of student teaching in the grade range and subject areas as applicable to the endorsement; and (3-29-17)

**b.** Completed an approved teacher preparation program and have an institutional recommendation from an accredited college or university specifying the grade ranges and subjects for which they are eligible to receive an endorsement in; (3-29-17)

**c.** Individuals seeking endorsement in a secondary grade (pursuant to section 33-1001, Idaho Code) range must complete preparation in at least two (2) fields of teaching. One (1) of the teaching fields must consist of at least thirty (30) semester credit hours, or forty-five (45) quarter credit hours and a second field of teaching consisting of at least twenty (20) semester credit hours, or thirty (30) quarter credit hours. Preparation of not less than forty-five (45) semester credit hours, or sixty-seven (67) quarter credit hours, in a single subject area may be used in lieu of the two (2) teaching field requirements; (3-29-17)

**d.** Proficiency in areas noted above is measured by completion of the credit hour requirements provided herein. Additionally, each candidate must meet or exceed the state qualifying score on the state board approved content area and pedagogy assessments. (3-29-17)

**e.** The Standard Instructional Certificate is valid for five (5) years. Six (6) semester credit hours are required every five (5) years in order to renew the certificate. (3-29-17)

**02. Pupil Personnel Services Certificate.** Persons who serve as school counselors, school psychologists, speech-language pathologists, school social workers, school nurses and school audiologists are required to hold the Pupil Personnel Services Certificate, with the respective endorsement(s) for which they qualify. (3-25-16)

**a.** Counselor Endorsement (K-12). To be eligible for a Pupil Personnel Services Certificate-Endorsed

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

---

Counselor K-12, a candidate must have satisfied the following requirements. The Pupil Personnel Services Certificate with a Counselor endorsement is valid for five (5) years. Six (6) semester credit hours are required every five (5) years in order to renew the endorsement. (3-25-16)

i. Hold a master's degree and provide verification of completion of an approved program of graduate study in school counseling from a college or university approved by the Idaho State Board of Education or the state educational agency of the state in which the program was completed. The program must include successful completion of seven hundred (700) clock hours of supervised field experience, seventy-five percent (75%) of which must be in a K-12 school setting. This K-12 experience must be in each of the following levels: elementary, middle/junior high, and high school. Previous school counseling experience may be considered to help offset the field experience clock hour requirement; and (3-25-16)

ii. An institutional recommendation is required for a Counselor K-12 Endorsement. (3-25-16)

**b.** School Psychologist Endorsement. This endorsement is valid for five (5) years. In order to renew the endorsement, six (6) professional development credits are required every five (5) years. The renewal credit requirement may be waived if the applicant holds a current valid National Certification for School Psychologists (NCSP) offered through the National Association of School Psychologists (NASP). To be eligible for initial endorsement, a candidate must complete a minimum of sixty (60) graduate semester credit hours which must be accomplished through one (1) of the following options: (3-25-16)

i. Completion of an approved thirty (30) semester credit hour, or forty-five (45) quarter credit hours, master's degree in education or psychology and completion of an approved thirty (30) semester credit hour, or forty-five (45) quarter credit hour, School Psychology Specialist Degree program, and completion of a minimum of twelve hundred (1,200) clock-hour internship within a school district under the supervision of the training institution and direct supervision of a certificated school psychologist; (3-25-16)

ii. Completion of an approved sixty (60) semester credit hour, or ninety (90) quarter credit hour, master's degree program in School Psychology, and completion of a minimum of twelve hundred (1,200) clock-hour internship within a school district under the supervision of the training institution and direct supervision of a certificated school psychologist; (3-25-16)

iii. Completion of an approved sixty (60) semester credit hour, or ninety (90) quarter credit hour, School Psychology Specialist degree program which did not require a master's degree as a prerequisite, with laboratory experience in a classroom, which may include professional teaching experience, student teaching or special education practicum, and completion of a minimum twelve hundred (1,200) clock-hour internship within a school district under the supervision of the training institution and direct supervision of a certificated school psychologist; and (3-25-16)

iv. Earn a current and valid National Certification for School Psychologists (NCSP) issued by the National Association of School Psychologists (NASP). (3-25-16)

**c.** School Nurse Endorsement. This endorsement is valid for five (5) years. Six (6) credits are required every five (5) years in order to renew the endorsement. Initial endorsement may be accomplished through completion of either requirements in Subsections 015.02.c.i. or 015.02.c.ii. in addition to the requirement of Subsection 015.02.c.iii. (3-29-17)

i. The candidate must possess a valid nursing (RN) license issued by the Idaho State Board of Nursing, and a baccalaureate degree in nursing, education, or a health-related field from an accredited institution. (3-29-17)

ii. The candidate must possess a valid professional nursing (RN) license issued by the Idaho State Board of Nursing and have completed nine (9) semester credit hours from a university or college in at least three (3) of the following areas: (3-25-16)

(1) Health program management; (3-25-16)

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

---

- (2) Child and adolescent health issues; (3-25-16)
- (3) Counseling, psychology, or social work; or (3-25-16)
- (4) Methods of instruction. (3-25-16)

iii. Additionally, each candidate must have two (2) years of full-time (or part-time equivalent) school nursing, community health nursing, or any area of pediatric, adolescent, or family nursing experience. (3-25-16)

**d.** Interim Endorsement - School Nurse. This endorsement will be granted for those who do not meet the educational and/or experience requirements but who hold a valid professional nursing (RN) license in Idaho. An Interim School Nurse Endorsement will be issued for three (3) years while the applicant is meeting the educational requirements, and it is not renewable. (3-29-17)

**e.** Speech-Language Pathologist Endorsement. This endorsement is valid for five (5) years. Six (6) credits are required every five (5) years in order to renew the endorsement. The initial endorsement will be issued to candidates who possess a master's degree from an accredited college or university in a speech/language pathology program approved by the State Board of Education, and who receive an institutional recommendation from an accredited college or university. (3-25-16)

**f.** Audiology Endorsement. This endorsement is valid for five (5) years. Six (6) credits are required every five (5) years in order to renew the endorsement. The initial endorsement will be issued to candidates who possess a master's degree from an accredited college or university in an audiology program approved by the State Board of Education, and who receive an institutional recommendation from an accredited college or university. (3-25-16)

**g.** School Social Worker Endorsement. This endorsement is valid for five (5) years. Six (6) credit hours are required every five (5) years in order to renew the endorsement. Initial endorsement shall be accomplished by meeting the requirements of Subsections 015.02.g.i. through iii., or by meeting the requirement in Subsection 015.02.g.iv.: (3-29-17)

i. A master's degree in social work (MSW) from a postsecondary institution accredited by an organization recognized by the State Board of Education. The program must be currently approved by the state educational agency of the state in which the program was completed; and (3-29-17)

ii. An institution recommendation from an Idaho State Board of Education approved program; and (3-29-17)

iii. The successful completion of a school social work practicum in a kindergarten through grade twelve 12 (K-12) setting. Post-MSW extensive experience working with children and families may be substituted for the completion of a school social work practicum in a K-12 setting. (3-29-17)

iv. A current and valid master's degree or higher social work license pursuant to chapter 32, title 54 and the rules of the State Board of Social Work Examiners. (3-29-17)

**h.** Interim Endorsement-Speech Language Pathologist. This certificate will be granted for those who do not meet the educational requirements but who hold a baccalaureate degree in speech language pathology and are pursuing a master's degree in order to obtain the pupil personnel services certificate endorsed in speech language pathology. An interim certificate will be issued for three (3) years while the applicant is meeting the educational requirements, and it is not renewable. (3-29-17)

**i.** Occupational Therapist Endorsement. A candidate with a current and valid Occupational Therapy license issued by the State of Idaho Bureau of Occupational Licenses shall be granted an Occupational Therapist Endorsement. The Pupil Personnel Services Certificate with an Occupational Therapist endorsement is valid for five (5) years. Candidate must maintain current and valid Occupational Therapy Licensure through the State of Idaho

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

---

Bureau of Occupational License.

( - - )

j. Physical Therapist Endorsement. A candidate with a current and valid Physical Therapy license issued by the State of Idaho Bureau of Occupational Licenses shall be granted a Physical Therapist Endorsement. The Pupil Personnel Services Certificate with a Physical Therapist endorsement is valid for five (5) years. Candidate must maintain current and valid Physical Therapy Licensure through the State of Idaho Bureau of Occupational License. ( - - )

**03. Administrator Certificate.** Every person who serves as a superintendent, a secondary school principal, or principal of an elementary school with eight (8) or more teachers (including the principal), or is assigned administrative duties over and above those commonly assigned to teachers, is required to hold an Administrator Certificate. The certificate may be endorsed for service as a school principal, a superintendent, or a director of special education and related services. Assistant superintendents are required to hold the Superintendent endorsement. Assistant principals or vice-principals are required to hold the Principal endorsement. Applicants for the Director of Special Education and Related Services endorsement will hold that endorsement on an Administrator Certificate. Proof of proficiency in evaluating teacher performance shall be required of all Administrator Certificate holders. Proof of proficiency in evaluating performance shall be demonstrated by passing a proficiency assessment approved by the State Department of Education as an initial certification requirement. Possession of an Administrator Certificate does not entitle the holder to serve as a teacher at a grade level for which the educator is not qualified or certificated. All administrator certificates require candidates to meet the following competencies of the Idaho Foundation Standards for School Administrators: School Climate, Collaborative Leadership, and Instructional Leadership. The Administrator Certificate is valid for five (5) years. Six (6) semester credit hours are required every five (5) years in order to renew the certificate. (3-29-17)

**a. School Principal Endorsement (Pre-K-12).** To be eligible for an Administrator Certificate endorsed for School Principal Pre-K-12, a candidate must have satisfied the following requirements: (3-25-16)

i. Hold a master's degree from an accredited college or university. (3-25-16)

ii. Have four (4) years of full-time certificated experience working with students, Pre-K-12, while under contract in an accredited school setting. (3-25-16)

iii. Have completed an administrative internship in a state-approved program, or have one (1) year of experience as an administrator in grades Pre-K-12. (3-25-16)

iv. Provide verification of completion of a state-approved program of at least thirty (30) semester credit hours, forty-five (45) quarter credit hours, of graduate study in school administration for the preparation of school principals at an accredited college or university. This program shall include the competencies of the Idaho Foundation Standards for School Administrators: School Climate, Collaborative Leadership, and Instructional Leadership. (3-25-16)

v. An institutional recommendation is required for a School Principal Pre-K-12 Endorsement. (3-25-16)

**b. Superintendent Endorsement.** To be eligible for an Administrator Certificate with a Superintendent endorsement, a candidate must have satisfied the following requirements: (3-25-16)

i. Hold an education specialist or doctorate degree or complete a comparable post-master's sixth year program at an accredited college or university. (3-25-16)

ii. Have four (4) years of full-time certificated/licensed experience working with Pre-K-12 students while under contract in an accredited school setting. (3-25-16)

iii. Have completed an administrative internship in a state-approved program for the superintendent endorsement or have one (1) year of out-of-state experience as an assistant superintendent or superintendent in grades Pre-K-12. (3-25-16)

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

---

iv. Provide verification of completion of an approved program of at least thirty (30) semester credit hours, or forty-five (45) quarter credit hours, of post-master's degree graduate study for the preparation of school superintendents at an accredited college or university. This program in school administration and interdisciplinary supporting areas shall include the competencies in Superintendent Leadership, in addition to the competencies in the Idaho Foundation Standards for School Administrators: School Climate, Collaborative Leadership, and Instructional Leadership. (3-25-16)

v. An institutional recommendation is required for a School Superintendent Endorsement. (3-25-16)

c. Director of Special Education and Related Services Endorsement (Pre-K-12). To be eligible for an Administrator Certificate endorsed for Director of Special Education and Related Services Pre-K-12, a candidate must have satisfied all of the following requirements: (3-25-16)

i. Hold a master's degree from an accredited college or university; (3-25-16)

ii. Have four (4) years of full-time certificated/licensed experience working with students Pre-K-12, while under contract in a school setting; (3-25-16)

iii. Obtain college or university verification of demonstrated the competencies of the Idaho Foundation Standards for School Administrators: School Climate, Collaborative Leadership, and Instructional Leadership; (3-25-16)

iv. Obtain college or university verification of demonstrated competencies in the following areas, in addition to the competencies in the Idaho Foundation Standards for School Administrators: Concepts of Least Restrictive Environment; Post-School Outcomes and Services for Students with Disabilities Ages Three (3) to Twenty-one (21); Collaboration Skills for General Education Intervention; Instructional and Behavioral Strategies; Individual Education Programs (IEPs); Assistive and Adaptive Technology; Community-Based Instruction and Experiences; Data Analysis for Instructional Needs and Professional Training; Strategies to Increase Program Accessibility; Federal and State Laws and Regulations and School District Policies; Resource Advocacy; and Technology Skills for Referral Processes, and Record Keeping; (3-25-16)

v. Have completed an administrative internship/practicum in the area of administration of special education and related services; and (3-25-16)

vi. An institutional recommendation is required for Director of Special Education and Related Services Pre-K-12 Endorsement. (3-25-16)

**04. Certification Standards For Career Technical Educators.** Teachers of career technical courses or programs in secondary or postsecondary schools must hold an endorsement in an appropriate occupational discipline. This endorsement may be held on a Standard Instructional Certificate or on an Occupational Specialist Certificate. For postsecondary instructors and administrators, certification fees are set by the State Board for Career Technical Education, and application processes are managed by the Division of Career Technical Education. (3-29-17)

**05. Degree Based Career Technical Certification.** (3-25-16)

a. Individuals graduating from an approved occupational teacher preparation degree program qualify to teach in the following five (5) disciplines: Agricultural and Natural Resources; Business Technology Education; Family and Consumer Sciences; Marketing Technology Education; Computer Science Technology and Engineering Technology Education. Occupational teacher preparation course work must meet the Idaho Standards for the Initial Certification of Professional School Personnel. The occupational teacher education program must provide appropriate content to constitute a major in the identified field. Student teaching shall be in an approved program and include experiences in the major field. Applicants shall have accumulated four thousand (4,000) clock hours of related work experience or shall have completed a Division of Career Technical Education approved practicum in their respective field of specialization. (3-29-17)

**STATE DEPARTMENT OF EDUCATION**  
**AUGUST 10, 2017**

---

**b.** The Career Technical Administrator certificate is required for an individual serving as an administrator, director, manager or coordinator of career technical education at the state, secondary or postsecondary level. Individuals must meet the following prerequisites to qualify for the Career Technical Administrator Certificate. Equivalence in each area will be determined on an individual basis by the Division of Career Technical Education. (3-29-17)

i. Qualify for or hold an Occupational Specialist certificate or hold an occupational endorsement on a standard instructional certificate with an applicable endorsement; (3-29-17)

ii. Provide evidence of a minimum of four (4) years' teaching, three (3) of which must be in a career technical discipline; (3-29-17)

iii. Hold a master's degree; and (3-25-16)

iv. Complete at least fifteen (15) semester credits of administrative course work. Applicants must have completed: financial aspects of career technical education; administration of personnel; and legal aspects of career technical education, and statewide framework for teacher evaluations that includes a laboratory component. Additional course work can be selected from any of the following areas: administration and supervision of occupational programs; instructional supervision; administration internship; curriculum development; curriculum evaluation; research in curriculum; school community relations; communication; teaching the adult learner; coordination of work-based learning programs; and/or measurement and evaluation. (3-29-17)

v. To renew the Career Technical Administrator Certificate, individuals are required to complete six (6) semester hours of related course work or meet renewal requirements for career technical instructional staff. (3-29-17)

**c.** Work-Based Learning Coordinator Endorsement. Educators assigned to coordinate approved work-based experiences must hold the Work-Based Learning Coordinator endorsement. To be eligible, applicants must hold an occupational endorsement on the Standard Instructional Certificate or qualify for an Occupational Specialist Certificate, plus complete course work in coordination of work-based learning programs. (3-29-17)

**d.** Career Counselor Endorsement. The endorsement for a Career Counselor may be issued to applicants who hold a current Pupil Personnel Services Certificate-Endorsed Counselor K-12 and who have satisfied the following career technical requirement: Career Pathways and Career Technical Guidance; Principles/Foundations of Career Technical Education; and Theories of Occupational Choice. (3-25-16)

**06. Occupational Specialist Certificate.** The Occupational Specialist Certificates are industry based career technical certifications issued in lieu of a degree based career technical certificate. Certificate holders must meet the following eligibility requirements: (3-29-17)

**a.** Be eighteen (18) years of age; document full-time, successful, recent, gainful employment in the area for which certification is requested; possess either a high school diploma or General Educational Development (GED) certificate; meet provisions of Idaho Code; and, verify technical skills through work experience, certification or testing as listed below. When applicable, requirements of occupationally related state agencies must also be met. Since educational levels and work experiences vary, applicants may be determined highly qualified under any one (1) of the following three (3) options: (3-29-17)

i. Have eight (8) years or sixteen thousand (16,000) hours of recent, gainful employment in the occupation for which certification is requested. Up to forty-eight (48) months credit or up to eight thousand (8,000) hours can be counted toward the eight (8) years on a month-to-month basis for journeyman training or completed postsecondary training in a career technical education program; or (3-29-17)

ii. Have a baccalaureate degree in the specific occupation or related area, plus three (3) years or six thousand (6,000) hours of recent, gainful employment in the occupation; or (3-29-17)

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

---

- iii. Meet one (1) of the following: (3-25-16)
- (1) Be a journeyman with two (2) years of recent, full-time, gainful, related work experience, or have completed a formal apprenticeship program in the occupation or related area for which certification is requested. The apprenticeship must be under the direction of an employer and the Bureau of Apprenticeship and Training or an approved state apprenticeship agency; (3-29-17)
- (2) Pass an approved state or national certification examination plus three (3) years of recent, gainful, related work experience (length and type of work experience will be determined on an individual basis); or (3-29-17)
- (3) Pass approved industry related certification for skill level requirements (vendor and industry specific) plus three (3) years of recent, gainful, related work experience (length and type of work experience will be determined on an individual basis). If no competency test exists, a written recommendation from a representative occupational advisory council/committee and recorded in its minutes is required to verify occupational competence. (3-29-17)
- b. Limited Occupational Specialist Certificate.** This certificate is issued to individuals who are new to teaching in public schools. The certificate is valid for three (3) years and is non-renewable: (3-29-17)
- i. Within the first eighteen (18) months, the holder must complete the pre-service workshop sponsored by the Division of Career Technical Education and an approved course in career technical methods and student assessment; (3-29-17)
- ii. Complete a new-teacher induction workshop at the state or district level; (3-25-16)
- iii. Within the three-year (3) period of the Limited Occupational Specialist Certificate, the instructor must satisfactorily demonstrate competencies in Principles/Foundations of Occupational Education and Methods of Teaching Occupational Education. Additionally, the instructor must satisfactorily demonstrate competencies in two (2) of the following areas: Career Pathways and Guidance; Analysis, Integration, and Curriculum Development; and Measurement and Evaluation. (3-29-17)
- c. Standard Occupational Specialist Certificate.** This certificate is issued to individuals who have: (3-29-17)
- i. Completed the pre-service workshop sponsored by the Division of Career Technical Education and an approved course in career technical methods and student assessment; and (3-29-17)
- ii. Completed a new-teacher induction workshop at the state or district level; and (3-29-17)
- iii. Can satisfactorily demonstrate competencies in Principles/Foundations of Occupational Education and Methods of Teaching Occupational Education; and (3-29-17)
- iv. Can demonstrate competencies in two (2) of the following areas: Career Pathways and Guidance; Analysis, Integration, and Curriculum Development; and Measurement and Evaluation; and (3-29-17)
- v. The Standard Occupational Specialist Certificate is valid for five (5) years and must be renewed pursuant to Section 060 of these rules. Credit equivalencies will be based on verification of one hundred twenty (120) hours of approved related work experience or forty-five (45) hours of participation at approved technical conferences, institutes, or workshops or any equivalent combination thereof, and having on file a new professional development plan for the next certification period. Work experience may be prorated at the rate of forty (40) hours per credit. Technical conference, institutes, or workshop participation may be prorated at the rate of fifteen (15) hours per credit. (3-29-17)
- d. Advanced Occupational Specialist Certificate.** This certificate is issued to individuals who: (3-29-17)

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

---

- i. Meet the requirements for the Standard Occupational Specialist Certificate; (3-29-17)
- ii. Can provide evidence of completion of a teacher training degree program or eighteen (18) semester credits of approved education related course work, such as educational methodology in the content area, in addition to the twelve (12) semester credits required for the Standard Occupational Specialist Certificate (a total of thirty (30) semester credits); and (3-29-17)
- iii. File a new professional development plan for the next certification period; and (3-25-16)
- iv. The Advanced Occupational Specialist Certificate is valid for five (5) years and must be renewed pursuant to Section 060. At least three (3) educationally focused semester credits must be taken for university or college credit. Verification will be based on an official transcript. In addition to the minimum of three (3) semester credits, in-service activities or related work experience may be used. Credit equivalencies will be based on verification of one hundred twenty (120) hours of approved related work experience or forty-five (45) hours of participation at approved technical conferences, institutes and workshops or any equivalent combination thereof, and having on file a new professional development plan for the next certification period. Work experience may be prorated at the rate of forty (40) hours per credit. Technical conference, institutes, or workshop participation may be prorated at the rate of fifteen (15) hours per credit. (3-29-17)

**07. Postsecondary Specialist.** A Postsecondary Specialist certificate will be granted to a current academic faculty member whose primary employment is with any accredited Idaho postsecondary institution. To be eligible to teach in the public schools under this postsecondary specialist certificate, the candidate must supply a recommendation from the employing institution (faculty's college dean). The primary use of this state-issued certificate will be for distance education, virtual classroom programs, and for public and postsecondary partnerships. (3-29-17)

**a. Renewal.** This certificate is good for five (5) years and is renewable. To renew the certificate, the renewal application must be accompanied with a new written recommendation from the postsecondary institution (faculty's college dean level or higher). (3-25-16)

**b. Fees.** The fee is the same as currently in effect for an initial or renewal certificate as established in Section 066 of these rules. (3-25-16)

**c. The candidate must meet the following qualifications:** (3-25-16)

- i. Hold a master's degree or higher in the content area being taught; (3-25-16)
- ii. Be currently employed by the postsecondary institution in the content area to be taught; and (3-25-16)
- iii. Complete and pass a criminal history background check as required according to Section 33-130, Idaho Code. (3-25-16)

**08. American Indian Language.** Each Indian tribe shall provide to the State Department of Education the names of those highly and uniquely qualified individuals who have been designated to teach the tribe's native language in accordance with Section 33-1280, Idaho Code. Individuals identified by the tribe(s) may apply for an Idaho American Indian Certificate as American Indian languages teachers. (3-25-16)

**a. The Office of Indian Education at the State Department of Education will process an application that has met the requirements of the Tribe(s) for an American Indian languages teacher.** (3-25-16)

**b. Once an application with Tribal approval has been received, it will be reviewed and, if approved, it will be forwarded to the Office of Certification for a criminal history background check as required in Section 33-130, Idaho Code. The application must include a ten finger fingerprint card or scan and a fee for undergoing a criminal history check pursuant to Section 33-130, Idaho Code.** (3-25-16)

**STATE DEPARTMENT OF EDUCATION**  
**AUGUST 10, 2017**

---

**c.** The Office of Certification will review the application and verify the applicant is eligible for an Idaho American Indian Certificate. The State Department of Education shall authorize an eligible applicant as an American Indian languages teacher. An Idaho American Indian Certificate is valid for not more than five (5) years. Individuals may apply for a renewal certificate. (3-25-16)

**09. Junior Reserved Officer Training Corps (Junior ROTC) Instructors.** (3-25-16)

**a.** Each school district with a Junior ROTC program shall provide the State Department of Education with a list of the names of those individuals who have completed an official armed forces training program to qualify as Junior ROTC instructors in high schools. (3-25-16)

**b.** Each school district with a Junior ROTC program shall provide the State Department of Education with a notarized copy of their certificate(s) of completion. (3-25-16)

**c.** Authorization Letter. Upon receiving the items identified in Subsections 015.09.a. and b., the State Department of Education shall issue a letter authorizing these individuals as Junior ROTC instructors. (3-29-17)

**10. Additional Renewal Requirements.** In addition to specific certificate or endorsement renewal requirements, applicants must meet the following renewal requirements as applicable: (3-25-16)

**a.** Mathematics In-Service Program. In order to recertify, the state approved mathematics instruction course titled “Mathematical Thinking for Instruction”, or another State Department of Education approved alternative course, shall be required. The “Mathematical Thinking for Instruction” course consists of three (3) credits. Teachers must take one (1) of the three (3) courses developed that is most closely aligned with their current assignment. Any teacher successfully completing said course shall be deemed to have met the requirement of Subsection 060.02.c. of this rule as long as said course is part of an official transcript or completed before September 1, 2013, and verified by the State Department of Education. Successful completion of a state approved mathematics instruction course shall be a one-time requirement for renewal of certification for those currently employed in an Idaho school district and shall be included within current requirements for continuing education for renewal. The following must successfully complete the “Mathematical Thinking for Instruction” course or another State Department of Education approved alternative course in order to recertify: (3-29-17)

i. Each teacher holding an Early Childhood/Early Childhood Special Education Blended endorsement (Birth - Grade 3) who is employed by a school district or charter school as a K-3 multi-subject or special education teacher; (3-29-17)

ii. Each teacher holding a Standard Instructional Certificate (K-8) who is employed by a school district or charter school as a K-6 multi-subject teacher; (3-29-17)

iii. Each teacher holding a Standard Instructional Certificate (6-12) teaching in a mathematics content classroom (grade six (6) through grade twelve (12)) including Title I who is employed by a school district or charter school; and (3-29-17)

iv. Each teacher holding a Standard Exceptional Child Generalist Endorsement who is employed by a school district or charter school as a special education teacher. (3-29-17)

v. Each school administrator coming from out-of-state holding an Administrator Certificate who is employed by a school district or charter school. (3-29-17)

**b.** Waiver of Mathematics In-Service Program. When applying for certificate renewal, an automatic waiver of the mathematics in-service program requirement shall be granted for any certificated individual living outside of the state of Idaho who is not currently employed as an educator in the state of Idaho. This waiver applies only as long as the individual remains outside the state of Idaho or as long as the individual is not employed as an educator in the state of Idaho. Upon returning to Idaho or employment in an Idaho public school, the educator will need to complete this requirement prior to the next renewal period. (3-25-16)

**STATE DEPARTMENT OF EDUCATION**  
**AUGUST 10, 2017**

---

**c.** Idaho Comprehensive Literacy Course. In order to recertify, a state approved Idaho Comprehensive Literacy Course shall be required. Successful completion of a state approved Idaho Comprehensive Literacy course shall be a one-time requirement for renewal of certification for those currently employed in an Idaho school district and shall be included within current requirements for continuing education for renewal. The following individuals must successfully complete an Idaho Comprehensive Literacy course in order to recertify:

(3-25-16)

i. Each teacher holding an Early Childhood/Early Childhood Special Education Blended Endorsement (Birth - Grade 3) who is employed by a school district or charter school;

(3-29-17)

ii. Each teacher holding a Standard Instructional Certificate (K-8) who is employed by a school district or charter school; and

(3-29-17)

iii. Each teacher holding a Standard Exceptional Child Generalist Endorsement who is employed by a school district or charter school.

(3-29-17)

**d.** Administrator certificate renewal. In order to recertify, holders of an administrator certificate must complete a course consisting of a minimum of three (3) semester credits in the Idaho framework for teachers' evaluation pursuant to Section 33-1204, Idaho Code. Credits must be earned through an approved teacher preparation program and include a laboratory component. The laboratory component must include in-person or video observation and scoring of teacher performance using the statewide framework for teacher's evaluation.

(3-29-17)

**STATE DEPARTMENT OF EDUCATION**  
**AUGUST 10, 2017**

---

**SUBJECT**

Requesting excision of territory from Nampa School District No. 131 for annexation to Vallivue School District No. 139

**APPLICABLE STATUTE, RULE, OR POLICY**

Section 33-308, Idaho Code, IDAPA 08.02.01.050

**BACKGROUND/DISCUSSION**

Homeowners of the Colter Bay, Astoria Park, and North Pointe Subdivisions and the surrounding properties submitted a petition requesting an excision of territory from Nampa School District No. 131 to be annexed to Vallivue School District No. 139. The Nampa School Board considered the petition at its December 13, 2016 meeting and voted to neither support nor oppose the petition. The Vallivue School Board considered the petition at its December 13, 2016 meeting and voted to maintain a neutral position.

Section 33-308, Idaho Code, provides a process whereby the State Board of Education shall consider amendment of the boundaries of adjoining school districts and direct that an election be held, provided that the proposed excision and annexation is in the best interest of the children residing in the area described, and excision of the territory would not leave a school district with a bonded debt in excess of the limit prescribed by law.

IDAPA 08.02.01.050 includes criteria for review of the petition by a hearing officer appointed by the Superintendent of Public Instruction for purposes of making recommendations to the State Board of Education.

Jean Uranga, Attorney at Law, acted as hearing officer for this petition. A notice of hearing was mailed to the petitioner, Nampa and Vallivue School Districts, and the State Department of Education on April 28, 2017. The hearing was conducted on May 15, 2017, at Snake River Elementary School in Nampa, Idaho, for purposes of gathering public comment on the proposed boundary amendment. Approximately 42 people attended the hearing, and 27 people in attendance offered comment. Of the 27 individuals who testified, 21 testified in support of approving the petition, and six (6) spoke in opposition. In addition, the hearing officer received one (1) written comment via email in opposition to the petition.

The hearing officer concluded that the proposed boundary change would be in the best interest of the children residing in the area proposed to be annexed to Vallivue. The officer's recommendation is that "the Petition...be granted if the State Department of Education confirms the excision would not leave either school district with a bonded debt in excess of the limit prescribed by law."

In response to the hearing officer's recommendation, Mr. Randy Dewey, Director of Finance for the Nampa School District, provided a letter on June 5, 2017, to

**STATE DEPARTMENT OF EDUCATION**  
**AUGUST 10, 2017**

---

Department staff confirming that Nampa School District's bonded debt would not exceed the limit prescribed by law if the proposed area is excised.

**IMPACT**

Approval of this petition will allow the proposal to go to a vote before the school district electors residing in the area described in the petition.

**ATTACHMENTS**

Attachment 1 – Petition	Page 5
Attachment 2 – Vallivue School Board Recommendation	Page 100
Attachment 3 – Nampa School Board Recommendation	Page 106
Attachment 4 – Notice of Hearing	Page 112
Attachment 5 – Findings of Fact, Conclusions of Law and Recommendations from Hearing Officer	Page 114
Attachment 6 – Letter from Randy Dewey, Nampa School District	Page 122
Attachment 7 – Market value analysis from Canyon County	Page 123

**STAFF COMMENTS AND RECOMMENDATIONS**

Requests for excisions and annexations of property between school districts are submitted to the Department of Education. The Department of Education verifies the petition meets all of the requirements set forth in Section 33-308, Idaho Code, and assigns a hearing officer. Following receipt of the hearing officer's finding and verification of the bonded debt requirements, the Department prepares and submits the requests to the State Board of Education for consideration.

Approval of the request by the Board will allow the proposal to be submitted to the school district electors residing in the area described in the petition. Pursuant to Section 33-308, Idaho Code, the Board of Education shall approve proposals for excision and annexation if the proposal is in the best interest of the children residing in the area described in the petition and the excision of the area would not leave a school district with a bonded debt in excess of the limit prescribed by law. If either condition is not met, the Board of Education must disapprove the proposal. The hearing officer has included in the findings of fact that the school district boundary change would be in the best interest of the children residing in the area impacted.

Section 33-1103, Idaho Code sets out the limitations on the amount of debt that is authorized a percent of the assessed market value of the property within the school district. If the property value within the area being excised were to leave the school district with a bonded debt greater than the prescribed limits the petition would have to be denied. Pursuant to Section 33-1103, Idaho Code subsection (3) the bonded debt limit for Nampa School District is 5%. According to the letter provided by the Nampa School District, their bonded debt would not exceed 5%.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

---

**BOARD ACTION**

I move to accept the recommendation of the hearing officer and to approve the excision and annexation of property from Nampa School District No. 131 to Vallivue School District No. 139.

RECEIVED NOV 28 2016

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

11/23/2016

Dear Vallivue School District 139 and Nampa School District 131,

The community of interest is encompassed within the one square mile located between the roads - Cherry Ln. north to Ustick Rd. and Northside Blvd. east to Franklin Blvd.. Vallivue School District #139 boundaries follow 3 of the 4 roads that encompass this area. The area described has three subdivisions; Colter Bay, Astoria Park and North Pointe which contain 455 houses as well as approximately 65 outlining houses for an estimated total of 520 family homes. Using the 2010 US Census statistics for the city of Nampa, we estimate there are approximately 136 children under the age of 5 and 449 children under the age of 18 in the proposed annexation area.

Nampa population, census, April 1, 2010	81,557
Nampa housing units, April 1, 2010	30,507
Nampa persons per housing unit April 1, 2010	2.67
Nampa population under 5 years, percent, April 1, 2010	9.80%
Nampa population under 5 years, April 1, 2010	7,993
Nampa Children under age 5 per housing unit Housing units, April 1, 2010	0.26
Nampa population under age 18, percent April 1, 2010	32.30%
Nampa population under age 18, April 1, 2010	26,343
Nampa Children under age 18 per housing unit	0.86
Approximate Housing units that reside in the 1 square mile as described: Cherry LN north to Ustick RD and Northside Blvd. East to Franklin Blvd.	520
Estimated children under 5 years	136
Estimated children under 18 years	449

Currently this neighborhood is within the boundary of Nampa School District #131. The children living in this area travel between 3-4 miles to attend Snake River Elementary, 8-9 miles to attend East Valley Middle High and 6-7 miles to attend Columbia High School. The routes to these schools include crossing over a freeway, passing through multiple stop lights/signs and for the middle and high schools - the entire city of Nampa. Nampa School District #131 currently busses our children long distances away from their homes when there are Vallivue schools right behind our homes and in some cases, within walking and bicycling distance. These Vallivue schools currently include:

- o Birch Elementary
- o East Canyon Elementary
- o Desert Springs Elementary

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

- o Sage Valley Middle School
- o Ridgevue High School

We would like to see our community annexed into Vallivue School District #139 while simultaneously excised from Nampa School District #131. We believe this would be in the best interest of the children residing in this area. Not only because the time spent in the classroom but for the availability to grow as an individual by way of more accessible extra curricular activities. Our children's current situation does not easily allow for students to participate in these school sanctioned activities due to the lack of transportation or burden placed on parents due to the distance needed to travel to participate.

Respectfully,

Home owners in the  
Colter Bay, Astoria Park, North Pointe subdivisions  
& the surrounding properties

## Idaho Statutes

### TITLE 33 EDUCATION

#### CHAPTER 3 SCHOOL DISTRICTS

33-308. EXCISION AND ANNEXATION OF TERRITORY. (1) A board of trustees of any school district including a specially chartered school district, or one-fourth (1/4) or more of the school district electors, residing in an area of not more than fifty (50) square miles within which there is no schoolhouse or facility necessary for the operation of a school district, may petition in writing proposing the annexation of the area to another and contiguous school district.

(2) Such petition shall be in duplicate, one (1) copy of which shall be presented to the board of trustees of the district from which the area is proposed to be excised, and the other to the board of trustees of the district to which the area is proposed to be annexed. The petition shall contain:

- (a) The names and addresses of the petitioners;
- (b) A legal description of the area proposed to be excised from one (1) district and annexed to another contiguous district. Such legal description shall be prepared by a licensed attorney, licensed professional land surveyor or licensed professional engineer professionally trained and experienced in legal descriptions of real property;
- (c) Maps showing the boundaries of the districts as they presently appear and as they would appear should the excision and annexation be approved;
- (d) The names of the school districts from and to which the area is proposed to be excised and annexed;
- (e) A description of reasons for which the petition is being submitted; and
- (f) An estimate of the number of children residing in the area described in the petition.

(3) The board of trustees of each school district, no later than ten (10) days after its first regular meeting held subsequent to receipt of the petition, shall transmit the petition, with recommendations, to the state department of education.

- (4) The state board of education shall approve the proposal provided:
- (a) The excision and annexation is in the best interests of the children residing in the area described in the petition; and
  - (b) The excision of the territory, as proposed, would not leave a school district with a bonded debt in excess of the limit then prescribed by law.

If either condition is not met, the state board shall disapprove the proposal. The approval or disapproval shall be expressed in writing to the board of trustees of each school district named in the petition.

(5) If the state board of education shall approve the proposal, it shall be submitted to the school district electors residing in the area

STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017

11/23/2016

Statutes

described in the petition, at an election held in the manner provided in chapter 14, title 34, Idaho Code. Such election shall be held on the date authorized in section 34-106, Idaho Code, which is nearest to sixty (60) days after the state board approves the proposal.

(6) At the election there shall be submitted to the electors having the qualifications of electors in a school district bond election and residing in the area proposed to be annexed:

(a) The question of whether the area described in the petition shall be excised from school district no. ( ) and annexed to contiguous school district no. ( ); and

(b) The question of assumption of the appropriate proportion of any bonded debt, and the interest thereon, of the proposed annexing school district.

(7) If a majority of the school district electors in the area described in the petition, voting in the election, shall vote in favor of the proposal to excise and annex the said area, and if in the area the electors voting on the question of the assumption of bonded debt and interest have approved such assumption by the proportion of votes cast as is required by section 3, article VIII, of the constitution of the state of Idaho, the proposal shall carry and be approved. Otherwise, it shall fail.

(8) If the proposal shall be approved by the electors in the manner prescribed, the board of canvassers shall thereupon promptly notify the state department of education and the affected school districts of such results. The superintendent of public instruction shall make an appropriate order for the boundaries of the affected school districts to be altered, and the legal descriptions of the school districts shall be altered, as prescribed in section 33-307, Idaho Code.

**Subject:** Re: Canyon County Records Request

Good morning,

Please let me know if you are still on schedule to give me the results of the petition on or before November 18th (15 business days past October 27th).

I do also need you to give me a count on the number of Nampa School District electors in this area described. Last I figured, it was about 685 but I know that number most likely had changed since September with the Presidential election going on etc...

I need the number of total electors in this area and the number of signatures on the petition that qualify. I need to ensure I have at least 25% of registered electors. I handed in 251 signatures.

Thanks!

On Thu, Oct 27, 2016 at 1:39 PM, Jason Culbertson <jculbertson@canyonco.org> wrote:

Thank you, Mr. Valadez. I will start working on this as soon as I can and will contact you within 15 business days with the results.

STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017

Dear neighbor,

We came to ask for your support by signing a petition that, in part, would help the Idaho State Department of Education see and understand the school district we currently reside in needs to change. These subdivisions, Colter Bay, Astoria Park, North Pointe and the surrounding houses that are located within the one square mile of Cherry LN. north to Ustick and Northside Blvd. east to Franklin Blvd. currently reside within the Nampa School District boundary although the Vallivue School District's Elementary, Mid-High and High schools are closer to our homes. If you have children currently going to Nampa school(s), you can still attend the Nampa School District by way of the open enrollment program the Nampa School District offers for out of district students who want to attend Nampa schools. Vallivue currently does not offer such a program for out of district students.

If you would like to sign this petition, help with in this effort or have any questions, please call or text me, Robert @ 208-863-4498 or my wife, Kim @ 208-861-3641. We need 25% of the registered voters to to sign in order for this petition to be reviewed by the Idaho State Department of Education.

We live @ 17344 N. Chouteau Ave. Nampa ID. 83687 if you would like to come by to sign. Please call or text first.

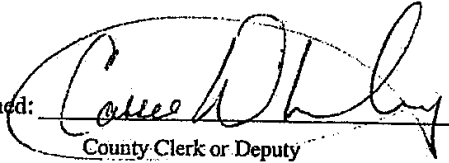

Thanks,  
Robert and Kim Valadez

To who it may concern,

As a homeowner in Colter Bay Subdivision we are genuinely writing our testimonial about how inconvenient it is currently having our children attend school in district #131. We have a very strong interest in annexing our community to the school district #139 for Fall 2017.

Our current school district #131 tends to make things harder for the children who live in Colter Bay, as well as for parents. Children spend so much time in transportation in order to go to school while Vallivue schools are so close from us. (the new Vallivue High school is only couple minutes away from us). As a result our children are losing bedtime since they have to wake up so early in order to take a bus to go to school. They also are limited on extra curricular activities before and after school due to the distance and time lost. For instance, we are driving her back and forth to school, morning and evening, for peace of mind.

Belonging to Nampa school district is very inconvenient from different aspects.

Sincerely,

Virginie & Sebastien Parmantier

Hello Mr. Valadez,  
I am wondering if you've sent in your report for the boundary change yet. If not, I will write up a letter for you to include this evening.

Thanks,  
Amber Christensen  
Colter Bay

Hello Amber,  
Yes I am. I would appreciate a letter. I just received confirmation from the Canyon County Electors office and we have enough 'verified' signatures to submit this report to State Department of Education. So I want to submit it by the December 1st.

Thanks!

Thank you Robert, here is my letter!

Dear School Board,

Thank you for taking the time to review the district lines surrounding our neighborhood. This is something we have talked to our Congressman about and have felt very strongly about for years. I currently drive my kids to a school that is 15-20 minutes away, depending on the day. In the winter, it can take over an hour to drop them off and get back home. This has proven to be most detrimental in terms of extracurricular activities and other after school programs. My kids are in 5th,

<https://mail.google.com/mail/u/0/?ui=2&ik=6e011f1ed5&view=pt&q=ambermeister625%40yahoo.com&q&qs=true&search=query&th=1586a1ea0a873106&siml=1586...> 1/2

Interstate Mail - Are you still accepting letters for the boundary change?

3rd, and 1st grade. Many of the after school programs are for 3rd grade and up. I cannot feasibly pick up my 1st grader and take him all the way home, just to turn right back around and pick up the other two when they are that far away. As such, my two older kids have had to forego those programs. More importantly, 5th grade offers math tutoring after school, but we run into the same problem.

Socially, this situation has also been challenging. Some of my kids' friends live as far from the school as we do, but in the opposite direction. Meeting to work together on homework or to play with their friends is a very rare occasion. This seems so unnecessary, as there are two Vallivue District elementary schools within 5 minutes of our house.

Despite all this, we have done the best we can. However, next year when my oldest son goes to middle school our options become very limited. I cannot get my oldest son to the middle school in the corner of South Nampa as well as get my elementary students to their school in Caldwell on time. Yes, there is a bus to the middle school. But I am not at all comfortable putting my 11 year old on the same bus as high school seniors, which is the way the busing situation is set up. Some of the things 18-year-olds talk about are not things 11-year-olds are old enough to even know about, let alone be mature enough to understand.

Finally, Ridgevue High School is close enough to our house that my kids could ride their bikes, or even walk, if necessary. Busing them out to Columbia seems to be a waste of resources, from buses to gas to time. I am hopeful this situation will be approached with the best interest of the children and families involved in mind.

Thank you again for your consideration,

Amber Christensen

To whom it may concern;

When we were searching to buy our home, we looked high and low. We only had a few restrictions but they were important to us. We wanted to live close to the freeway and we wanted to be in Vallivue School District. Unfortunately, when our realtor showed us our dream home, he either lied to us that this house was in Vallivue school district or didn't bother to look closely at the district lines. We have lived here going on 6 years, and everyone we have spoke to in our neighborhood about our experience had the very exact same thing happen to them.

Our kids have gone to Nampa schools for almost 6 years now. The elementary school was close enough, although it was over the freeway when there was another school (Vallivue district) a few blocks from our house. Now my son goes to the middle school, and I cannot express my frustration with this enough. We live off franklin & cherry, and his school is off Greenhurst and happy valley. More than 20 minutes away! There is NO way we can drive him to school every day, which is what we would prefer. When he wanted to do sports, we had to seriously consider it (and enlist help!) because we would have to pick him up- which is completely out of our way. We have two other school aged children and having to make that drive every day is ridiculous. What happens if my child has an emergency, or is sick? I hope that day doesnt come, because I would be so very upset with how far away they are to us/home. They high school is a little closer, but only by one street. There is a middle and high school less than a mile from us.

I know it's awhile down the road, but when my children get to high school and learn to drive, I can't say that I would be comfortable with them driving that far. I can't imagine how upset my children would be if that is the case.

Because of the situation, I applied for open enrollment in other districts where family was involved. My daughter now goes to a charter school, away from all of her neighborhood friends that my husband and I dreamed of her growing up with.

I beg you to consider the district lines.

thank you for the consideration,

Kayla Gross

STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017

In closing, I would like for you to consider this story when forwarding this report onto the Idaho State Department of Education with your comments/request(s)/recommendations:

I, Roberto Valadez, grew up in Marsing - a small town just west of Nampa and the Vallivue School District. I grew up under the guidance of my Mother of which was a single parent for most of my adolescence. She held down a steady job but this job required her to work many long hours and sometimes late at night and thus could have eliminated the adult supervision during this time but... Forward

Now that I am nearing my 40's, I look back to where I grew up and realize that the friendships I made, the leadership of my teachers, the focus of my sport coaches, the support from my friend's parents and the community as a whole helped me to become the person I am today. Without that sense of community which surrounded the schools I attended, I believe my life would been less fulfilling than the one I am fortunate to have today. I am still close to the Marsing community and have life long friends because I was able to attend a school that was within walking distance of my home. It is much easier to catch a ride home from after school activities or to attend ball games if living 1-2 miles away than it is 8-9 miles away.

I understand this experience of mine was from a small town but I would like for you to consider this situation and relate it to this proposal. The world in which we live in for a child / adolescent has changed from our time. Some for the better. Some not. One thing for certain though is, the more influence a child can be provided by school faculty, community, sports or any school based activities- the better. This is true for the student and the school alike.

Please take into consideration the opportunity this would give to our children and thus the future if they were given the ability to attend schools which are close to their homes and surrounding communities.

Thank you for your time.

Sincerely,

Roberto Valadez  
Kimberly Valadez

And the 251 resident petitioners of Colter Bay, Astoria Park, North Pointe and surrounding properties.

STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017

VALLIVUE SCHOOL DISTRICT 139  
BOARD MEETING  
December 13, 2016 - 6:00 p.m. Page 1 of 6

**PRESENT:**

Jeff Forsberg, Chair	Joey Palmer
Toni Brinegar, Vice-Chair	Chad Coles
Jeff Hon, Trustee	Dick Brulotte
Reid Stephan, Trustee	Julie Yamamoto
Jennifer Cox, Trustee	Mark Layne
Pat Charlton, Superintendent	Cindy Dodd
Gary Johnston, Asst. Superintendent	Sara Ward
Sue Muchow, Board Clerk	Scott Johnstone
Kristy Baumchen, Deputy Clerk	Mark Layne
Cindy Johnstone	Bill Hamlin
Shane Schamber	Bryce Parker
Letha Blick	

**Executive Session**

An Executive Session was called by Chair Jeff Forsberg at 5:08 p.m. Jeff Hon made a motion, Toni Brinegar seconded, to adjourn to Executive Session to discuss and interview interested candidates for the Interim Zone 2 trustee position as per Idaho Code 74-201 to -208; motion carried by roll call vote. Present were Jeff Forsberg, Jeff Hon, Toni Brinegar, Reid Stephan, Jennifer Cox, Pat Charlton, Gary Johnston, and Sue Muchow. The board returned to open session at 6:02 p.m.

**Call to Order of Regular Board Meeting**

Board Chair Jeff Forsberg called to order the regular December Board Meeting at 6:05 pm. Vallivue Middle School Principal Brian Lee led the Pledge of Allegiance.

**Appointing New Board Member**

A motion to accept Ms. Jennifer Cox as Zone 2 Trustee was made by Reid Stephan and seconded by Toni Brinegar. Motion carried 4-0. Jennifer Cox was sworn in as Board Trustee for Zone 2.

Success stories were then shared with the board, which included: Carolyn Hamann, retired board chair, was honored with an IHSSA lifetime pass to Idaho sporting events, as well as a Vallivue jacket.

Mr. John Neddo from Idaho Power presented the board with an incentive check for \$193,125.60 awarded because of energy-efficiency programs adopted by the district.

Assistant Superintendent Gary Johnston then introduced the AVID staff who presented on the recent university campus visit taken by a group of students. Support for the program comes partially from Republic Services, represented by Jeff Fisher, General Manager, who was present. The AVID teachers were introduced who then introduced several students. Mr. Fisher was thanked by the board and then listened to the students share their experiences of the school tour and watched a slide presentation of the field trip.

VALLIVUE SCHOOL DISTRICT 139  
BOARD MEETING  
December 13, 2016 - 6:00 p.m. Page 2 of 6

**Consent Agenda**

1. 1. Approval of Agenda
2. Approval of Minutes: Nov 8, 2016
3. Approval of Special Minutes: Nov 22, 2016; VMS Board Tour Dec 9, 2016
4. Approval of Bills: Nov 25; Dec 13; add-on; and a summary in the amount of \$5,122,284.17.
5. Approval of budget reports
6. Resignations/Retirements: (see last page)
7. New Hires : (see last page)
8. Change of Job Status Extra-Curricular: (see last page)
9. Student Teachers: (see last page)
10. Renewing teacher to new certificate: (none)
11. Second reading of policies:
  - 290 Discriminating Prohibited
  - 410 Non-Discrimination in Employment
  - 512 School Climate
  - 543 Student Suspension
  - 830 Gifts, Grants, Bequests
  - 839 Intellectual Property
  - 1010 Community Involvement
  - 1026 Fundraising
  - 1044 Advertising in the Schools
  - Administrative Procedures for Disciplinary Action
12. Third reading and acceptance of policies:
  - 305 Superintendent Evaluations
  - 310 Principal Evaluations
  - 443 Certificated Evaluations
  - 444 Certificated Contracts

The board reviewed the agenda after which a motion was made by Jeff Hon and seconded to approve by Reid Stephan. The agenda was approved 4-0.

**Construction update**

Bryce Parker from Beniton Construction and Bill Hamlin of Design West gave an update on Skyway Elementary and other district projects. It was reported that everything is on track and moving smoothly.

**VHS Baseball Hitting Facility**

Parent Brad Carpenter updated the board on the construction process of the hitting facility at VHS. Conduit for electrical and gas line have been brought to the building. A donation was made to purchase the turf for the building. Donations continue to help offset fees of the project.

VALLIVUE SCHOOL DISTRICT 139  
BOARD MEETING  
December 13, 2016 - 6:00 p.m. Page 3 of 6

**Maintenance/Facilities Report**

Maintenance Director Chad Coles updated the board on various projects. The baseball facility is moving smoothly. Snow watch for the district has kept the crew engaged. Ridgevue maintenance facility is wrapping up with just two inspections needed before the final.

**Business Report**

Director Sue Muchow reviewed the 2017 election schedule which was submitted to the county. Trustee elections and two levies will be run: plant facility in March, trustee elections (zones 1 and 2) in May, and supplemental levy in November.

**Investment Options**

Superintendent Charlton reported that the district was approached with an option to invest in a local bank, Sunwest Bank, which used to be Syringa Bank. Funds are currently invested in the state investment pool. \$4.5 million could be invested in this alternate site. Jeff Forsberg suggested reducing the amount to \$2.5. Reid Stephan stated that it seems it may be an unnecessary risk. Competition for better rates between banks is acceptable if Sunwest can offer a higher earnings rate. The board was asked to approve this option to invest up to \$4.5 million in a money market account with Sunwest Bank, as long as rate we are currently receiving would be met or exceeded. As there was no second to the motion, the motion died without action.

**Federal Programs/Community Relations/Safety**

Assistant Superintendent Gary Johnston updated the board with the newest edition of the Vallivue Review. The district communications plan is being finalized with the community relations committee, reflecting four key messages.

**Curriculum and Testing Update**

Director Cindy Johnstone reported on the following:

- The inter-valley direct writing assessment in which the district was involved. All 5<sup>th</sup> grade students participated. Of the 86 scorers of the essays, 7 were from Vallivue. Results are not yet finalized.
- Ready Math curriculum training for middle school teachers has taken place. Midyear implementation is ready to begin with the new materials.
- Department chairs and administrators have discussed keeping the high schools similar in curriculum goals and timelines in social studies, math, ELA, and science.

**Travel Request**

VHS Principal Dick Brulotte said the Vallivue Speech and Debate would like to go to Gonzaga University, Spokane, WA from January 1-5, 2017. 3-8 students with chaperones will participate. The board was asked to approve the travel request as submitted assuming all rules and regulations will be followed. With a motion by Toni Brinegar, seconded by Jeff Hon, the motion carried.

VALLIVUE SCHOOL DISTRICT 139  
BOARD MEETING  
December 13, 2016 - 6:00 p.m. Page 4 of 6

**Travel Request**

Dick Brulotte said the VHS wrestling team would like to go to Sierra Nevada Classic Wrestling Tournament in Reno, NV, on December 28-29, 2016. Approximately 35 students plus chaperones will participate. The board was asked to approve the travel request as submitted assuming all rules and regulations will be followed. Reid Stephan motioned and Jeff Hon seconded. Motion carried.

**Travel Request**

Principals Julie Yamamoto and Dick Brulotte requested that the RHS/VHS Music Trip (choir, orchestra, actor's ensemble), travel to New York City during March 22-28, to participate in the Heritage Festival. Approximately 54 VHS and 85 RHS students, plus chaperones, will participate. The board was asked to approve the travel request as submitted assuming all rules and regulations will be followed. A motion by Toni Brinegar was seconded by Reid Stephan. Motion carried.

**Teacher Evaluation Process**

Pat Charlton said that a recent article criticized the Idaho education system because it reported that 99% of districts didn't meet evaluation standards in the model identified. Pat reported that the data was misrepresented. Teacher evaluation is taken seriously and the principals do a very good job in Vallivue. Toni commented that the Danielson Model, the one identified in the article, is an unrealistic model in which to hold the teachers. To apply every component was not originally the intent of the model. The board was appreciative of the information.

**Annexation of Territory Procedure Update**

Pat Charlton shared with the board the proceedings for the annexation/excision process. Mr. Forsberg stated that there are as many cons as pros to the process. Reid Stephan, representative of that zone, had heard that the boundaries drawn are unfair to those in the area. Jeff Forsberg stated that staying neutral is the best position to take in the process. Toni Brinegar stated that with the board maintaining a neutral position, it puts the decision on the people living in the area impacted.

The board was asked, as per Idaho Code 33-308, to make a formal recommendation to the Idaho State Department of Education regarding the annexation and excision of the square mile containing the subdivisions of Colter Bay, Astoria Park, North Pointe and surrounding properties. The board's formal recommendation to the State Dept of Education is of a neutral position, through a motion by Jeff Hon, seconded by Reid Stephan. The motion carried.

**First reading of policies**

Assistant Superintendent Gary Johnston gave an overview of December policies:

- 228 Board Member Conflict of Interest
- 244 Trustee Election
- 407.50 Sick Leave
- 418 Conflict of Interest
- 457 Supplemental Contracts

Superintendent of Public Instruction  
Sherri Ybarra  
Idaho State Department of Education  
650 West State Street  
Boise, ID 83702

**Re: Patron request for boundary change Nampa School District 131**

Superintendent Ybarra,

The Board of Trustees for the Nampa School District 131 at its Tuesday, December 13, 2016 regular meeting considered a request from residents in the northern most portion of the Nampa School District to adjust the boundaries between our district and the Vallivue School District. Please see enclosed documentation.

At the meeting, the trustees authorized me to report to you that the Board neither opposes or supports this request. The Board also authorized me to convey a request that the following be considered in the process:

- Should an election be held, that it be scheduled either on May 2017 or November 2017; and
- Should the election be scheduled and is successful in approval the boundary change, that the effective date of the change the August 2018.

The Board and I believe these considerations are essential to allow our district to plan to "right size" our staffing, budget, and in-district boundaries to adjust to the change in students should the election be successful.

Thank you for your attention to this matter.

Sincerely,

Superintendent, Nampa School District

Cc: Matt Freeman, Executive Director  
Office of the State Board of Education

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

**NAMPA SCHOOL DISTRICT  
BOARD OF TRUSTEES  
REGULAR BOARD MEETING MINUTES**

**Tuesday, December 13, 2016**

Trustees Present: Bob Otten, Mandy Simpson, Mike Fuller and Janelle Stauffer. Trustee Brian McGourty was absent.

**WORK SESSION**

**A. Holiday Dinner Prepared by Culinary Arts Students**

The trustees and guests were served a holiday dinner prepared by the students in the culinary arts program.

**I. CALL TO ORDER**

**A. Chairman Fuller called the meeting to order with the Pledge of Allegiance at approximately 7:30 p.m.**

**B. Chairman Fuller asked Trustee Simpson to lead the Board in reciting the District Mission and Vision Statements**

**C. Welcoming of Guests**

**D. Approval of Agenda**

There were no revisions requested to the agenda.

**E. Public Comments**

There were no public comments.

**F. Trustee Reports**

Trustee Simpson shared insights from the Idaho School Boards Association (ISBA) conference in November. They discussed the benefits of trustees breaking bread together to get to know each other better and work better together. She also mentioned that other districts use online digital collaboration tools.

Trustee Otten also attended the conference, he was pleased to see that the district is already doing many of the items discussed at the conference.

Trustee Stauffer reported that she attended the presentation regarding trauma informed education. She feels this is very relevant work for our schools.

Chairman Fuller reported that he discussed the use of Policy Governance with the key note speaker at the ISBA conference in November.

**G. Superintendent Update**

**1. Pathways in Education**

Superintendent Peterson introduced Tommy Jo the Chief Operating Officer of Pathways in education. He introduced his team members Jill Wells Director of Charter Development, Cheri Shannon Senior Director of Charter Development and their Director of Implementation.

A motion was made by Trustee Otten and seconded by Trustee Stauffer to authorize the Pathways in Education Charter School. There was discussion on the motion. The motion was put to a vote and carried 4-0.

**2. Treasure Valley Leadership Academy Innovation Agreement**

Board Meeting Minutes December 13, 2016

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

Superintendent Peterson asked the trustees to approve the innovation agreement with Treasure Valley Leadership Academy. Principal Emmett Wemp discussed the work that has begun with the planning team and the students that they are looking to recruit for the new school.

A motion was made by Trustee Stauffer and seconded by Trustee Otten to approve the Treasure Valley Leadership Academy Innovation School Agreement. There was discussion on the motion. The motion was put to a vote and carried 3-1.

**3. Supplemental Levy Update**

Superintendent Peterson updated the Board on the distribution of the current supplemental levy funds. He also shared that at this time the plan is to ask to renew the supplemental levy in November 2017.

**4. Homeowner Petitions to Cede Property to Vallivue School District**

A group of homeowners have submitted a petition to the State Board of Education and the State Department of Education requesting that they cede from the Nampa School District boundary to the Vallivue School District boundary. Superintendent Peterson recommended that the Board take no position on the petition but ask officials to grant ample time to plan for the change if it is approved. The district would like to see the change begin no sooner than fall of 2018.

A motion was made by Trustee Simpson and seconded by Trustee Otten to authorize the Superintendent to prepare and send a response to the State Department of Education regarding the alteration of school district boundaries to include, but not be limited to:

1. The Nampa School District neither supports nor opposes the alteration of district boundaries;
2. If the voters approve the alteration, the Nampa School District has questions and concerns that will be articulated during the hearing process, including but not limited to:
  - a. We request that the election be held on either the May or the November election dates.
  - b. We request adequate time to adjust school boundaries and district budgets and staffing. If the boundary adjustment is approved by the voters in 2017, we request an effective date of the boundary change to be for the 2018-19 school year.
3. Additional information as we might discover.

There was no discussion on the motion. The motion was put to a vote and carried 4-0.

**5. Monthly Budget Status Report**

Director of Finance Randy Dewey shared that the impact in decreased enrollment has been mitigated. Superintendent Peterson shared that he does not anticipate needing to use contingency funds for expenses this school year.

**6. Other**

**H. Consent Agenda**

1. Approval of Minutes: Regular Board Meeting – November 8, 2016
2. Approval of Minutes: Special Board Meeting – November 8, 2016
3. Approval of Monthly Personnel Report
4. Approval of Accounts Payable & Student Activity Funds Reports
5. Canyon County Statement of Receipts – October 31, 2016

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

6. Acceptance of Appraisal Report for Georgia Avenue Property
7. Acceptance of November 1, 2016 Enrollment Report
8. Acceptance of December 1, 2016 Enrollment Report
9. Acknowledge Receipt of Monitoring Report SL-2F Asset Protection
10. Acknowledge Receipt of Monitoring Report SL-2G Compensation and Benefits
11. Approval of Food Products Bid Award Second Semester 2016-2017 School Year
12. First Reading Revised Policy #4420 Sex Offenders
13. First Reading Policy #2570 Use of Commercially Produced Video Recordings

A motion was made by Trustee Otten and seconded by Trustee Stauffer to approve the consent agenda as presented. There was discussion on the motion. The motion was put to a vote and carried 4-0.

**II. BOARD DEVELOPMENT AND LINKAGE**

- A. Board Development Book Study: Implementing Policy Governance and Staying on Track  
The Trustees discussed their thoughts and what they learned from the book.

**III. ASSURANCE OF ORGANIZATIONAL PERFORMANCE**

- A. Board Response to Monitoring Report, Policy SL-2D Budget Execution  
A motion was made by Trustee Simpson and seconded by Trustee Otten to find that the superintendent has complied with Policy SL-2D. There was no discussion on the motion. The motion was put to a vote and carried 4-0.

There were no additional comments made by the Trustees regarding this report.

- B. Board Response to Monitoring Report, Policy SL-2E Organizational Development and Executive Succession  
A motion was made by Trustee Simpson and seconded by Trustee Stauffer to find that the superintendent has complied with Policy SL-2E. There was no discussion on the motion. The motion was put to a vote and carried 4-0.

There were no additional comments made regarding this report. There was a proposed language revision included in the survey response changing the words harm or erode in the policy to fail to increase. The Board will discuss this proposed revision at a later date.

- C. Board Response to Monitoring Report, Policy SL-2L Student Conduct and Discipline  
A motion was made by Trustee Stauffer and seconded by Trustee Simpson to find that the superintendent has complied with Policy SL-2L Student Conduct and Discipline. There was no discussion on the motion. The motion was put to a vote and carried 4-0.

There were no additional comments made by the Trustees regarding this report.

- D. Superintendent Evaluation Process  
Superintendent Peterson shared that there is an execution session set aside for the trustees to begin this work. He asked that when the process is complete the report be given during regular session.

**IV. POLICY REVIEW**

- A. Discussion of Travel and Reimbursement, Board and Superintendent  
This item will be discussed at a later date.

)

This matter is before the Hearing Officer based upon the Petition filed by Roberto Valadez and other residents of the Colter Bay, Astoria Park and North Pointe subdivisions and adjoining properties. A hearing on the Petition was conducted May 15, 2017, at 7:00 o'clock p.m., at the Snake River Elementary School. The hearing was taped and a copy of the tape is attached as Exhibit 1.

**FINDINGS OF FACT**

The Petition indicates the Colter Bay, Astoria Park and North Pointe subdivisions are located between Cherry Lane, Ustick Road, Northside Boulevard and Franklin Boulevard. The Petition proposes to remove an approximately one (1) square mile area from

**FINDINGS OF FACT, CONCLUSIONS OF LAW AND RECOMMENDED ORDER - 1**

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

the Nampa School District and have that property annexed into the Vallivue School District.

A review of the map attached to the Petition indicates that the area in question is already bounded by the Vallivue School District on three sides.

The Petition was signed by 196 school district electors within the affected area as certified by the Canyon County Clerk. The Canyon County Clerk also certified there were 725 school district electors in the affected area. Consequently, 27% of the school district electors in the area signed the Petition.

Pursuant to Idaho Code Section 33-308(2) the Petition was submitted to the Board of Trustees of both the Nampa and Vallivue School Districts. At a meeting on December 13, 2016, the Vallivue School District Board of Trustees voted to take a neutral position on the Petition. On December 14, 2016, the Nampa School District sent a letter to the Superintendent of Public Instruction, Sherri Ybarra, noting that the Nampa School District neither opposed or supported the Petition. The Nampa School District did request that, if the Petition is granted, the election should be scheduled for either May or November 2016 and that any boundary change should not be effective until August 2018.

The Petition did not include information regarding the market value, for tax purposes, of the two districts prior to the requested transfer and of the area to be transferred as required by IDAPA 08.02.01.050.04. The Petition also did not include

**FINDINGS OF FACT, CONCLUSIONS OF LAW AND RECOMMENDED ORDER - 2**

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

information on whether the alteration as proposed would leave a school district with a bonded debt in excess of the limit proscribed by law as required by Idaho Code Section 33-308(4)(b) and IDAPA 08.02.01.050.03.a.

Forty-two (42) individuals signed in on the sign in sheet at the hearing. A copy of the sign in sheet is attached as Exhibit 2. Of those in attendance, twenty-seven (27) individuals testified. A tape of the hearing is attached as Exhibit 3.

Twenty-one (21) individuals testified in support of approving the Petition, including Matt Andrew; Jeff Wixom; David Thurgood; Eric Schwarze; Shellie Gruber; Byron Luksus; Maricio Steffen; Lyric Smith; Chad Collins; Amber Christensen; Brett Haustveit; Nancy Smith; Roberto Valadez; Lindsay Mullen; Kim Valadez; Michael Parrish; Amy Jergensen; Nick Christenson; Doug Thompson; and Amy Martinez.

The individuals testifying in support of the Petition noted that their children now have to be bussed significant distances to get to the Nampa schools in the Nampa School District. In contrast, the Vallivue schools their children would attend if the Petition is approved are much closer. Because of the distances to the Nampa schools, it adversely impacts the ability of their children to participate in school activities and develop social relationships with their school friends. It was also mentioned that, because of the distances of the Nampa schools relative to the Vallivue schools, their children are at increased risk for accidents while being transported to school. Others pointed out

**FINDINGS OF FACT, CONCLUSIONS OF LAW AND RECOMMENDED ORDER - 3**

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

that it would create a more natural boundary to move the area to the Vallivue School District since this area is currently a "bulge" in the boundaries of the two districts. Some argued it would be a better allocation of resources to reduce the distances children needed to be bussed to school. Some were told they were in the Vallivue School District when they bought their homes and later found out they were in the Nampa School District.

Six (6) individuals spoke in opposition to the Petition, including Robert Willingham; Laura Simpson; Jennifer Tolman; Betty Reynolds; Judy Smolden; and Debbie LaFord. The individuals opposed testified their children were already established in the Nampa schools and they did not want their children to lose the continuity and friends they had already established in the Nampa schools. They indicated people knew their homes were in the Nampa School District when they bought their homes. Even though Nampa apparently allows open enrollment, that is only possible if there is space available. Others were concerned about the impact of adding more children to the Vallivue School District. One individual testified there are better programs and opportunities in the Nampa School District.

Pat Charlton, the Superintendent of the Vallivue School District, testified that the Vallivue School District was neutral on the Petition.

After the hearing, the Hearing Officer received an email from Jennifer Young, which is attached hereto as Exhibit 3. Ms. Young expressed her opposition. She stated she specifically

**FINDINGS OF FACT, CONCLUSIONS OF LAW AND RECOMMENDED ORDER - 4**

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

chose to buy a house in the Nampa School District and it would be unfair to change the district now. Her children are established in the Nampa schools and it would be disservice to her children to move them now. She further stated it would result in an undue burden on the Nampa School District to move the boundary lines.

**CONCLUSIONS OF LAW**

Idaho Code §33-308 establishes the procedure for requesting excision and annexation of school district territory. Subsection (1) allows one-fourth or more of the school district electors, residing in an area of not more than 50 square miles, to petition for annexation of an area from one school district to another contiguous school district. In this case, the Petition was signed by 27% of the school district electors.

Idaho Code §33-308(4) provides that the State Board of Education shall approve the proposal if two conditions are met. First, the excision and annexation must be in the best interest of the children residing in the area described and second, excision must not leave a school district with a bonded debt in excess of the limit prescribed by law. If a proposal is approved, the matter is then submitted to the school district electors residing in the area described.

No testimony or evidence was presented on whether the proposed annexation would have any effect on the bonded indebtedness of either district.

The administrative rules of the State Board of Education

**FINDINGS OF FACT, CONCLUSIONS OF LAW AND RECOMMENDED ORDER - 5**

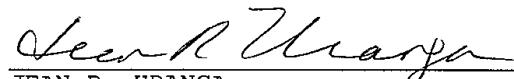

STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017

boundary change would be in the best interests of the children residing in the area.

**RECOMMENDED ORDER**

Based upon the foregoing, it is recommended that the Petition for Excision from the Nampa School District and Annexation to the Vallivue School District be GRANTED if the State Department of Education confirms the excision would not leave either school district with a bonded debt in excess of the limit prescribed by law.

DATED This 5th day of June, 2017.

Re: Annexation petition property value

Helen,

This letter is to respond to the annexation petition from the Nampa School District to Vallivue School District. The Nampa School District would lose approximately \$70,745,000 in taxable property value associated with the proposed annexation area. This would be 1.669% of our current taxable property base. This reduction would not create our District bond debt to exceed the 5% of current market value as allowed by Idaho Code 33-1103.

Please feel free to contact me if you have any additional questions.

Best wishes,

Randy Dewey  
Director of Finance

STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017

Hi Helen,

Here is the detail for the Nampa and Vallivue School districts regarding the possible altering of boundaries.

Tax Year 2016 market value for tax purposes:

Nampa School District: \$4,249,078,362

Vallivue School District: \$2,084,652,465

Tax Year 2016 market value for tax purposes of proposed boundary alteration - one square mile between Cherry Ln. north to Ustick Rd and Northside Blvd east to Franklin Blvd (Sec. 03, T. 3 N, R. 2 W): \$63,901,355.

Reported outstanding bonded debt as of September 30, 2016:

Nampa School District: \$87,265,000

Vallivue School District: \$112,065,000

Please let me know if you have any additional questions.

Thanks,

**PROFESSIONAL STANDARDS COMMISSION**

**SUBJECT**

Appointment to the Professional Standards Commission

**REFERENCE**

August 2015	Board approved one (1) appointment to the Professional Standards Commission.
April 2016	Board requested changes to the recommendation for appointments to the Professional Standards Commission to reflect a more diverse geographical representation of the state.
June 2016	Board approved six (6) appointments and two (2) re-appointments to the Professional Standards Commission.
August 2016	Board approved one (1) appointment to the Professional Standards Commission.
April 2017	Board approved one (1) appointment and three (3) reappointments to the Professional Standards Commission.

**APPLICABLE STATUTE, RULE, OR POLICY**

Section 33-1252, Idaho Code

**BACKGROUND/DISCUSSION**

Idaho Statute Section 33-1252, Idaho Code, sets forth criteria for membership on the Professional Standards Commission.

The Professional Standards Commission consists of eighteen (18) members, one (1) from the State Department of Education and one (1) from the Division of Career Technical Education. The remaining members shall be representative of the teaching profession of the state of Idaho, and not less than seven (7) members shall be certificated classroom teachers in the public school system and shall include at least one (1) teacher of exceptional children and at least one (1) teacher in pupil personnel services. The Idaho Association of School Superintendents, the Idaho Association of Secondary School Principals, the Idaho Association of Elementary School Principals, the Idaho School Boards Association, the Idaho Association of Special Education Administrators, the education departments of private colleges, and the colleges of letters and sciences of the institutions of higher education may submit nominees for one (1) position each. The community colleges and the education departments of the public institutions of higher education may submit nominees for two (2) positions.

A position is currently available for an elementary classroom teacher. Nominations were sought for the position from the Idaho Education Association, Northwest

Attachment 6 – Resumé for Betty Turner	Page 30
Attachment 7 – Resumé for Kristopher "Topher" Wallaer	Page 34

**STAFF COMMENTS AND RECOMMENDATIONS**

At the June 2016 Board meeting the Board discussed the importance of representation on various state level committees by representatives of Idaho's underserved populations. It was determined at that time that the Department would amend its practices for seeking nominations for positions on the Professional Standards Commission. The new practice would include reaching out not only to the identified stakeholder groups, but to also other education community groups to allow individuals who are not connected to the standard chains of communications the opportunity to apply or submit nominations for positions that may be opening up, whether they were due to terms expiring or from member resignations. The Board's Indian Education Committee expressed an interest in nominating individual educators to the Commission if notified of openings. The Indian Education Committee was notified of the vacancy and provided one nomination, Lori Ravét. The current opening is for an elementary classroom teacher. The Professional Standards Commission is putting forward Kristopher "Topher" Wallaert for consideration.

Pursuant to Section 33-1252, Idaho Code, "(3) The state board of education shall appoint or reappoint members of the commission for terms of three (3) years." This language does not allow the Board to appoint individuals for less than a three year term. Past practice of the Commission has been to request appointments be made for the remainder of an unfilled term when the vacancy is due to a resignation in mid-term, however, the statute does not allow for this flexibility.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

---

**BOARD ACTION**

I move to appoint Kristopher "Topher" Wallaert as a member of the Professional Standards Commission for the remainder of the three-year term which began July 1, 2015, and will end June 30, 2018, representing Elementary Classroom Teachers.

Moved by \_\_\_\_\_ Seconded by \_\_\_\_\_ Carried: Yes \_\_\_\_ No \_\_\_\_

Re: Professional Standards Commission

Dear Ms. Cyr,

I am interested in filling the Elementary Classroom Teacher position on the Professional Standards Commission. I have been an elementary teacher for seven years, but more importantly, advocating for children for over 25 years.

I find the Professional Standards Commission to be a vital aspect to the learning community in all areas. I want our children to continue to move forward and this is another way to be a part of this movement. I enjoy being a part of the changes and moving forward to help our children, not standing on the sidelines waiting for others to do the work.

My commitment to the profession is to always be striving to be better at enhancing our children and our profession. Our children are our future and I strive daily for growth for each and every one of us.

Thank you for considering me for this position. I look forward to hearing from you.

Sincerely,

Jennifer Gates

My Commitment to the Education Profession

---

I am an educator, a teacher. And as such, I hold the firm belief that teaching is the most important and rewarding profession one can aspire to.

Our society depends on an educated population to ensure the safety and continuation of our democratic way of life. Even in elementary school, students acquire knowledge and skills they will need to lead fulfilling lives and to become informed, productive citizens.

Teachers are educated professionals. All potential teachers need to be educated in child development and skilled in using classroom management techniques. They need opportunities to observe classrooms and participate in student teaching programs with master teachers. Like other professionals, teachers need opportunities to participate in professional development to keep content fresh and to stay up-to-date on best practices.

Teachers are role models for students in and out of the classroom. Expected behaviors must be modeled daily for students to build a community that operates on the principles of caring and respect. Teachers show the importance of and promote lifelong learning with their students.

Educators work as members of a team and know that collaborating with peers, administration, and parents help students reach their highest potential. Working in partnership with all the stakeholders in a child's life creates a safe environment that is fostered by respect between home and school.

## Elementary School Teacher

*Dedicated To the Education of Young Children*

### Summary of Qualifications:

I am a dynamic, resourceful teaching professional helping every student become intrinsically motivated to learn and create while supporting colleagues, parents, and administration in fostering an atmosphere of mutual respect and open communication. I am a self-driven leader with excellent communication and interpersonal skills who effectively collaborates with all staff members and establishes quality relationships with students.

### Teaching Experience:

#### Classroom Teacher

Franklin D. Roosevelt Elementary  
Nampa School District 131  
1901 W. Roosevelt Avenue 468-4620  
August 2008 to Present

- Hired as a ½ time kindergarten teacher and moved to full time 5<sup>th</sup> grade the day before school started and didn't miss a beat.
- Taught in 5<sup>th</sup> grade for 3 years and then moved to 2<sup>nd</sup> grade where I currently teach.
- Served on BAT (Building Administration Team) for 2 years
- Currently serving on our school's leadership team in charge of collaborating PLC development
- Hosted and mentored 4 Student Teachers my first five years as a 2<sup>nd</sup> grade teacher
- Serving as our school's Student Teacher Liaison coordinating and leading PLC's for our school's Student Teachers and their mentor teachers. I also coordinate their evaluations with our Principal and their university professors.
- Collaborate with my colleagues and recruit teammates and parents to help serve on our school's PTA

#### After School Teacher

Boys and Girls Club of Nampa, Idaho  
316 Stampede Dr Nampa, ID 83687 461-7203  
January 2003 to May 2003

- Spearheaded volunteer program to fulfill the need for students requiring additional academic assistance outside the classroom.
- Successfully recruited more than thirty students for after school tutoring.
- Created fun learning methods that helped the students increase their test scores in all core subjects as well as assist students in completing missing assignments.
- Planned, controlled and directed the overall activities for this program which included management of staff and volunteers, team-building, shared decision making and creating a safe, respectful, learning environment.

#### Homebound Tutor

Nampa School District, Idaho

Elaine Keogh

September 2002 to June 2003

- Acted as a liaison between the school, including teachers and counselors, and the students.
- Collaborated with in-school teachers and counselors to identify student's individualism and adapted curriculum to accommodate different learning styles, maximizing student comprehension.
- Established comfortable, student-focused, two-way communication that empowered students to enjoy the learning process.
- Involved parents in the homebound program and established good communication with them.

## After School Adventures

Head Teacher – Jefferson Elementary Site

Sharon Williams (208) 233-9770

250 N 5th Ave Pocatello, ID 83201-6278

September 1993 to June 1996

- Commended and promoted as the first and only non-certified Head Teacher hired by After School Adventures.
- Responsible for executing weekly curriculum goals and tutoring to a class of twenty-five students grades K-6<sup>th</sup>.
- Maintained productive learning environment by stating classroom rules, holding students accountable for their decisions, and implementing consistent and fair consequences.
- Supervised two assistant teachers in their duties.

## Summer Explorer's Day Camp

Pocatello, Idaho - June 1993 to August 1998

Owner, Operator, Program Developer and Lead Teacher

Professional Reference to corroborate: Sharon Williams (208) 233-9770

- Recognized the need for an appropriate summer educational-based day camp in the community.
- Designed and created "Summer Explorer's Day Camp" for the community of Pocatello.
- Coordinated community field trips, physical education activities, curriculum for summer learning, arts and crafts, nutritional snacks, as well as summer tutoring.
- Planned numerous activities, including theater, interactive museum sessions, safety programs with the fire and police departments, tours of local historical and geographical sites, and coordinated transportation for all of these activities for 20-30 students.

## Education and Certification

B.A. in Elementary Education, Idaho State University – 1996

Endorsement in Reading for grades K-12, Idaho State University

I also received a science component as part of my undergraduate studies.

## Professional Development And References

As my transcripts will show, I have continued to seek professional development in a variety of relevant areas, including early childhood conferences, reading comprehension, and environmental education.

In addition to professional pursuits, I have remained involved with the education of children in a variety of community volunteer positions including serving as a youth teacher of children ages 18 months to 12 years old in my church for 10 years. Later I served as a president of our children's Sunday school curriculum where I oversaw the placement and filling of over 50 positions within the organization.

I have served as president, counselor, or secretary to the president of this organization for over 12 years. I have also had the privilege of being a Den leader in Pack 226 over the Wolves for 6 months as well as serving as a community representative on the Bigfoot Council of the Boy Scouts of America for over a year.

I volunteered for 7 years while my children attended Roosevelt Elementary in many capacities. I helped where needed in my sons' classrooms and I taught a simple art history lesson in my son's 1<sup>st</sup> grade classroom.

I organized and taught in a preschool co-op in my neighborhood which ran for the four years my sons needed preschool. I researched and coordinated the curriculum, the teaching schedule, and the field trips for all families involved.

I love teaching. I love teaching all ages of students and feel my strengths include inspiring children to love learning, and helping children realize their potential as learners.

I served as the President of our PTA for over 7 years. In that capacity, I helped organize our school carnivals, open houses, coordinated volunteers, worked with the staff and parents to spearhead fundraisers and awards assemblies. I still serve on the PTA as a liaison between the teachers and the community parents and help with volunteer efforts, fundraisers, and parent involvement events every year.

**Standard Certified Narrative**

1)

A visitor to my classroom would be able to observe me teaching my students in a variety of ways. I would employ group teaching to large and small groups throughout the day in order to best assess learning, and check comprehension of the subjects. Some subjects would require more individualized instruction and others would allow larger groups or even peer tutoring. Each student is unique and would require me to be flexible in my methodology.

2)

I understand well that a structured classroom and clear routine allow a student to feel comfortable and safe in my classroom. This is why I would follow a predictable routine for each subject each day as well as providing consistent ways for students to communicate their needs to me as their teacher. The physical arrangement of the classroom also needs to be neat and tidy and be easily understood by all students. When children are welcomed into a classroom with these characteristics, a majority of discipline problems can be avoided and greater learning can take place.

3)

Diverse learners in my classroom will appreciate my approach to teaching. I employ a variety of teaching methods such as, peer tutoring, large and small group instruction, as well as, when a new concept is introduced, it is introduced in a variety of methods to engage a learner's kinesthetic, auditory, tactile, and visual style. For all subjects, a wide range of methods are employed.

4)

As a new teacher, the teaching practices I would develop for high student achievement would include ways to incorporate music and poems for subject transitions, hands on methods for as many lessons as possible, kindness, politeness, and warm communication to develop mutual respect between my students and myself, as well as each other.

Pupil Personnel Narrative

1)

My present professional duties include the care and nurturing of my Husband and three sons. It also includes many volunteer hours at my children's school (Roosevelt Elementary), and our church. If I were observed in my present professional duties, the observer might indicate that there is a level of structure and organization, that I love what I do, and I find ways to make my more unpleasant tasks more enjoyable for myself and my "co-workers." Someone might observe that although the many responsibilities sometimes seem overwhelming and can take their toll, I have learned to prioritize and I strive to find joy and satisfaction in everything I do. I love my current position, and have found my professional training as teacher is applicable in an infinite number of ways.

2)

I believe the single most important issue facing school age children today is a lack of a stable home environment. Although many students come to school with their physical and emotional needs met, far too many arrive to school without feeling that they **belong** anywhere. In my experience, I've seen too many parents who are not aware of their children's need to come first in their life. When children are the priority and their learning is supported from home, they are able to see why school is important and they can be more driven to contribute to their classroom in a positive way. As teachers, we are often required to supplement this feeling of priority in order to meet the individual needs of a child who is no one's priority. Teachers can develop relationships with students that will help them reach their potential, and inspire them to achieve, if the teacher is willing to be in tune with and appreciate the individual needs and circumstances of each student.

3)

The climate in my current work setting as "Domestic Engineer" is vastly different each day, similar to that of a teacher's classroom. Depending upon the season and the mood of my "clientele," I am required to remain positive and inspiring under diverse circumstances. Some days, happiness and fulfillment find me, and life is great; some days, I must seek diligently after that same happiness and fulfillment. It is on these days that interestingly enough, there is an even greater sense of accomplishment and satisfaction. I can't imagine that the classroom environment with its many variables would be much different.

4)

I believe that one of the most important roles I fill in an elementary classroom is that of a Learning Mentor to my students. As a Learning Mentor, I pattern enthusiasm for learning, that learning is lifelong, exciting, and achievable. Everyone who wants to exercise the muscle that is the brain can, and will, learn. Children who understand that they can change their brain by working hard, and working efficiently, will arrive at the conclusion that each one of us is "smart."

Another equally important roll that I fill as a teacher is to model kindness and respect. Children who have a daily model of kind, respectful language and behavior are able to function more comfortably in the classroom and in society. It is not difficult to speak to students with an even, kind tone, and say those polite phrases of please, and thank you.

To Whom It May Concern:

Enclosed is my application for employment to the Nampa School District.

I am specifically applying for the position of half time Kindergarten Teacher at Roosevelt Elementary.

My school transcripts have either already arrived in your hands, or on their way. You should receive them from Idaho State University, Northwest Nazarene University, and Brigham Young University. My Student Teaching File is also on its way from ISU.

Thank you for your time and consideration,

Jeanette A. Mayes

Page 2

- ♦ Successfully manages a class with 32 students
- ♦ Successfully coordinate and manage a monthly Movie Night which included the students and their families from my classroom
- ♦ Team lead for Common Core State Standards
- ♦ Coached JV Volleyball and JV Softball (2012-2015)
- ♦ Designed and implemented a Community Service Project during the 2013/2014 school year
- ♦ Member of the MHEA bargaining team

**4<sup>th</sup> and 5<sup>th</sup> Grade Combo Teacher**

*Meadows Valley School, New Meadows, Idaho*

2011-2012

- ♦ Affectively taught 4<sup>th</sup> and 5<sup>th</sup> grade upholding to state standards
- ♦ Responsible for all instructional activities which included:
  - Planning and teaching lessons according to state standards
  - Grading student work
  - Tracking student's level of academics
  - Designing and administering assessments for all classes
  - Differentiating lessons for students
- ♦ Successfully coordinated and managed a Homework Club for both grades
- ♦ Successfully managed a class with 23 students
- ♦ Coached JV Volleyball

**Volunteer Firefighter**

*Mountain Home, Idaho*

2012-Current

- ♦ Completed 140+ hours of training
- ♦ Certified as Fire Fighter 1
- ♦ Attends business meetings and trainings 3 times a month
- ♦ Work with 32 other fellow firefighters

**Youth Leader / Teacher**

*Mountain Home Church of the Nazarene, Mountain Home ID*

2014-Current

- ♦ Prepare lessons, teach every week, maintain classroom control

**OTHER SKILLS**

**Computer and Technology**

- ♦ Windows and MAC OS, as well as Apple and Microsoft Office Applications
- ♦ Smartboard Technology

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

To the Idaho Education Association Board of Directors:

---

C. S. Lewis once said, "The task of the modern educator is not to cut down jungles, but to irrigate deserts." Students are valuable, and without proper help, guidance, and care, a thriving student can become an empty desert. As an educator, my job is to ensure the continual growth of flourishing students, but also cultivate the students that have lost their passion and desire to learn. Students are valuable and are an important, significant piece to our world. Without love and guidance, a valuable piece of our world will be lost.

My passion as a teacher doesn't come from lesson planning, summer break, or a paycheck. My passion comes from the 32+ students that fill my classroom. I want my students to make mistakes, learn from them, and better themselves every day. I want my students to be academically, emotionally, and socially secure. I want them to be okay with being "themselves." I want my students to learn hard work, responsibility, respect, accountability, and integrity. I want my students to learn that their actions dictate their character, and that their character is determined by their choices. I want them to see the value that they have in this world, and that every one of them have something to offer. I want them to embrace diversity, and accept others for their differences. I want to see my students rise above hardship and choose to succeed in every situation. I want them to know that they are loved and cherished.

Every classroom should be driven by the success of the student. One way this must take place is through the professionalism within the educational community. Teachers and administrators need to be held accountable for their actions and choices inside and outside of the learning community. This is not always an easy task, and many times can be difficult to adhere to. However, it is the students that we need to protect. Without safe, encouraging, and proper educators in the classroom, students will never be able to reach their full potential in the classroom. Respectful educators are the guiding force behind a rewarding education. Because of this, educators need to be help to proper standards and accountability.

Our character is determined by our actions, and our actions are driven by our choices. Accountability and responsibility need to be the driving force behind every professional educator. I would like the opportunity to serve on the Professional Standards Commission in order to ensure that students are receiving a safe and rewarding education. The classroom needs to be the environment in which students are encouraged to explore, research, navigate, and inquire about the world around them. How can we best take care of the lush gardens, but also cultivate the dry deserts if we don't have educators who are not held accountable for the choices they make?

Sincerely,

Kristopher Wallaert

**SUBJECT**

Every Student Succeeds Act Consolidated State Plan

**REFERENCE**

December 2015	The Board was updated on the status of the Every Student Succeeds Act and the process the Department will conduct in bringing forward to the Board a new Federal Consolidated State Plan.
February 2016	The Board received an overview of the Every Student Succeeds Act by Title and the Board's responsibilities as the State Educational Agency.
August 2016	Board received recommendations from the Accountability Oversight Committee on a new state accountability system. The Board approved the proposed rule setting out the new accountability framework that will be used for both state and federal accountability.
November 2016	Board approved pending rule creating the new statewide accountability system based on the Governor's K-12 Task Force recommendations, Accountability Oversight Committee Recommendations and public input gathered by staff through public forums held around the state.
April 2016	Board received an update on the work of the Board's Teacher Pipeline Workgroup and preliminary recommendation for developing and supporting effective teachers in Idaho.
June 2017	Board received an update on Idaho's Consolidated State Plan and provided input and feedback.

**APPLICABLE STATUTE, RULE, OR POLICY**

Idaho State Board of Education Governing Policies & Procedures, Section III.AA.  
Accountability Oversight Committee  
Section 33-110, Idaho Code – Agency to Negotiate, and Accept, Federal Assistance  
IDAPA 08.02.03 – Section 111, Assessment in the Public Schools; IDAPA 08.02.03 – Section 112, Accountability

**BACKGROUND/DISCUSSION**

On December 10, 2015, the Every Student Succeeds Act (ESSA) was signed into law, reauthorizing the Elementary and Secondary Education Act (ESEA) for the first time since 2001. This reauthorization replaces the system of ESEA Waivers that states had been submitting to the US Department of Education (USDOE) since No Child Left Behind (NCLB) expired in 2014.

**STATE DEPARTMENT OF EDUCATION**  
**AUGUST 10, 2017**

---

ESSA requires each state to submit a consolidated plan to the USDOE to reapply to federal education funds and explain to the USDOE how the state will be in compliance with ESSA. The first deadline for plan submission was April 2017, and the second deadline is September 2017. The USDOE will inform states whether their plan is approved 120 days after submission. Idaho will submit its consolidated plan for the September deadline.

The required components of Idaho's consolidated plan have gone through several changes as Obama-era regulatory guidance were finalized and then pulled back by the Trump administration, which has also released new guidance to states.

The State Department of Education brought the draft consolidated plan to the State Board of Education for preliminary discussion in June. In July, the department continued to seek public input through a final public comment period. During this time, the Department continued to receive feedback from the U.S. Department of Education and monitored how plans submitted by other states were assessed by federal peer reviewers and U.S. Department of Education (USDOE) staff. These discussions led to several substantive changes in Idaho's final plan.

**IMPACT**

Idaho's consolidated plan must be approved by USDOE in order for Idaho to receive approximately \$82 million from the federal government to support public K-12 education.

**ATTACHMENTS**

Attachment 1 - Every Student Succeeds Act Consolidated State Plan      Page 1

**STAFF COMMENTS AND RECOMMENDATIONS**

Section 33-110, Idaho Code designates the State Board of Education as the State Educational Agency (SEA) and authorizes the Board to negotiate with the federal government, and to accept financial or other assistance to further the cause of education. The Elementary Secondary Education Act as reauthorized by the Every Student Succeeds Act (ESSA) of 2015 requires each state's SEA to submit plans outlining how they will meet the requirements of ESSA to be eligible for the federal funding attached to the requirements. States may submit individual plans for each Title contained in the law or they may submit a single consolidated plan. Idaho, like most states, have chosen a single consolidated plan.

Provisions in ESSA (34 C.F.R. § 299.13(b) and 299.15(a) – Consultation and Stakeholder Engagement, 34 C.F.R. § 299.13(b) – Public Notice and Outreach and Input, ESSA § 8540 Governor's Consultation) require much broader stakeholder engagement than was previously required. While the most recent consolidated state plan template provide by the US Department of Education

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

---

removes the section that required states explain how stakeholders were worked with to develop the plan, the requirements in federal law remain the same. The language in the act itself still requires consultation and stakeholder engage. In response to feedback received from stakeholders just prior to the June 2017 Board meeting, the Planning, Policy and Governmental Affairs Committee convened two stakeholder meetings to go through each section of the plan. Department of Education staff fully participated in the meetings and were provided with input for changes to the plan from the group. At the time of agenda production Board staff have not had the opportunity to review the final consolidated state plan submitted for consideration.

**BOARD ACTION**

I move to approve Idaho's Every Student Succeeds Act Consolidated State Plan and to authorize the State Superintendent of Public Instruction to submit the plan to the U.S. Department of Education on behalf of the State Board of Education.

**Idaho Consolidated State Plan**  
The Elementary and Secondary Education Act of 1965, as  
amended by the Every Student Succeeds Act

July 24, 2017

Final Draft

**STATE DEPARTMENT OF EDUCATION**  
**AUGUST 10, 2017**

---

## **Introduction**

Section 8302 of the Elementary and Secondary Education Act of 1965 (ESEA), as amended by the Every Student Succeeds Act (ESSA),<sup>1</sup> requires the Secretary to establish procedures and criteria under which, after consultation with the Governor, a State educational agency (SEA) may submit a consolidated State plan designed to simplify the application requirements and reduce burden for SEAs. ESEA section 8302 also requires the Secretary to establish the descriptions, information, assurances, and other material required to be included in a consolidated State plan. Even though an SEA submits only the required information in its consolidated State plan, an SEA must still meet all ESEA requirements for each included program. In its consolidated State plan, each SEA may, but is not required to, include supplemental information such as its overall vision for improving outcomes for all students and its efforts to consult with and engage stakeholders when developing its consolidated State plan.

## **Completing and Submitting a Consolidated State Plan**

Each SEA must address all of the requirements identified below for the programs that it chooses to include in its consolidated State plan. An SEA must use this template or a format that includes the required elements and that the State has developed working with the Council of Chief State School Officers (CCSSO).

Each SEA must submit to the U.S. Department of Education (Department) its consolidated State plan by one of the following two deadlines of the SEA's choice:

- **April 3, 2017;** or
- **September 18, 2017.**

Any plan that is received after April 3, but on or before September 18, 2017, will be considered to be submitted on September 18, 2017.

## **Alternative Template**

If an SEA does not use this template, it must:

- 1) Include the information on the Cover Sheet;
- 2) Include a table of contents or guide that clearly indicates where the SEA has addressed each requirement in its consolidated State plan;
- 3) Indicate that the SEA worked through CCSSO in developing its own template; and
- 4) Include the required information regarding equitable access to, and participation in, the programs included in its consolidated State plan as required by section 427 of the General Education Provisions Act. See Appendix C.

## **Individual Program State Plan**

An SEA may submit an individual program State plan that meets all applicable statutory and regulatory requirements for any program that it chooses not to include in a consolidated State plan. If an SEA intends to submit an individual program plan for any program, the SEA must submit the individual program plan by one of the dates above, in concert with its consolidated State plan, if applicable.

## **Consultation**

Under ESEA section 8540, each SEA must consult in a timely and meaningful manner with the Governor or appropriate officials from the Governor's office, including during the development and prior to submission of its consolidated State plan to the Department. A Governor shall have 30 days prior to the SEA submitting the consolidated State plan to the Secretary to sign the consolidated State plan. If the

---

<sup>1</sup> Unless otherwise indicated, citations to the ESEA refer to the ESEA, as amended by the ESSA.

**STATE DEPARTMENT OF EDUCATION**  
**AUGUST 10, 2017**

---

Governor has not signed the plan within 30 days of delivery by the SEA, the SEA shall submit the plan to the Department without such signature.

**Assurances**

In order to receive fiscal year (FY) 2017 ESEA funds on July 1, 2017, for the programs that may be included in a consolidated State plan, and consistent with ESEA section 8302, each SEA must also submit a comprehensive set of assurances to the Department at a date and time established by the Secretary. In the near future, the Department will publish an information collection request that details these assurances.

For Further Information: If you have any questions, please contact your Program Officer at OSS.[State]@ed.gov (e.g., [OSS.Alabama@ed.gov](mailto:OSS.Alabama@ed.gov)).

**Programs Included in the Consolidated State Plan**

*Instructions:* Indicate below by checking the appropriate box(es) which programs the SEA included in its consolidated State plan. If an SEA elected not to include one or more of the programs below in its consolidated State plan, but is eligible and wishes to receive funds under the program(s), it must submit individual program plans for those programs that meet all statutory and regulatory requirements with its consolidated State plan in a single submission.

Check this box if the SEA has included all of the following programs in its consolidated State plan.

**or**

If all programs are not included, check each program listed below that the SEA includes in its consolidated State plan:

- Title I, Part A: Improving Basic Programs Operated by Local Educational Agencies
- Title I, Part C: Education of Migratory Children
- Title I, Part D: Prevention and Intervention Programs for Children and Youth Who Are Neglected, Delinquent, or At-Risk
- Title II, Part A: Supporting Effective Instruction
- Title III, Part A: English Language Acquisition, Language Enhancement, and Academic Achievement
- Title IV, Part A: Student Support and Academic Enrichment Grants
- Title IV, Part B: 21st Century Community Learning Centers
- Title V, Part B, Subpart 2: Rural and Low-Income School Program
- Title VII, Subpart B of the McKinney-Vento Homeless Assistance Act: Education for Homeless Children and Youth Program (McKinney-Vento Act)

**Instructions**

*Each SEA must provide descriptions and other information that address each requirement listed below for the programs included in its consolidated State plan. Consistent with ESEA section 8302, the Secretary has determined that the following requirements are absolutely necessary for consideration of a consolidated State plan. An SEA may add descriptions or other information, but may not omit any of the required descriptions or information for each included program.*

**STATE DEPARTMENT OF EDUCATION**  
**AUGUST 10, 2017**

---

**A. Title I, Part A: Improving Basic Programs Operated by Local Educational Agencies (LEAs)**

1. Challenging State Academic Standards and Assessments (*ESEA section 1111(b)(1) and (2) and 34 CFR §§ 200.1–200.8.*)<sup>2</sup>
2. Eighth Grade Math Exception (*ESEA section 1111(b)(2)(C) and 34 CFR § 200.5(b)(4)*):
  - i. Does the State administer an end-of-course mathematics assessment to meet the requirements under section 1111(b)(2)(B)(v)(I)(bb) of the ESEA?  
 Yes  
 No
  - ii. If a State responds “yes” to question 2(i), does the State wish to exempt an eighth-grade student who takes the high school mathematics course associated with the end-of-course assessment from the mathematics assessment typically administered in eighth grade under section 1111(b)(2)(B)(v)(I)(aa) of the ESEA and ensure that:
    - a. The student instead takes the end-of-course mathematics assessment the State administers to high school students under section 1111(b)(2)(B)(v)(I)(bb) of the ESEA;
    - b. The student’s performance on the high school assessment is used in the year in which the student takes the assessment for purposes of measuring academic achievement under section 1111(c)(4)(B)(i) of the ESEA and participation in assessments under section 1111(c)(4)(E) of the ESEA;
    - c. In high school:
      1. The student takes a State-administered end-of-course assessment or nationally recognized high school academic assessment as defined in 34 CFR § 200.3(d) in mathematics that is more advanced than the assessment the State administers under section 1111(b)(2)(B)(v)(I)(bb) of the ESEA;
      2. The State provides for appropriate accommodations consistent with 34 CFR § 200.6(b) and (f); and
      3. The student’s performance on the more advanced mathematics assessment is used for purposes of measuring academic achievement under section 1111(c)(4)(B)(i) of the ESEA and participation in assessments under section 1111(c)(4)(E) of the ESEA. Yes  
 No
  - iii. If a State responds “yes” to question 2(ii), consistent with 34 CFR § 200.5(b)(4), describe, with regard to this exception, its strategies to provide all students in the State the opportunity to be prepared for and to take advanced mathematics coursework in middle school.  
  
Not applicable.
3. Native Language Assessments (*ESEA section 1111(b)(2)(F) and 34 CFR § 200.6(f)(2)(ii)*):
  - i. Provide its definition for “languages other than English that are present to a significant extent in the participating student population,” and identify the specific languages that meet that definition.

---

<sup>2</sup> The Secretary anticipates collecting relevant information consistent with the assessment peer review process in 34 CFR § 200.2(d). An SEA need not submit any information regarding challenging State academic standards and assessments at this time.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

---

Idaho’s definition for languages other than English that are present to a significant extent in the participating student population, is a language spoken by 5% or more of all students, or 20% or more of English Learners.

Over 150 different language and dialects are native to Idaho students. To identify specific languages other than English that are present to a significant extent, we referenced our data from the SY1516 Consolidated State Performance Report, which captures the top five (5) commonly spoken languages shown in Table 1 below.

**Table 1: Idaho’s English Learner populations**

Language	# of EL Students
Spanish	11,124
Arabic	389
Swahili	196
Somali	148
Chinese	133

Spanish is the most predominant language, representing nearly 80% of our English Language learners, and just under 7% of our students in tested grade levels.

- ii. Identify any existing assessments in languages other than English, and specify for which grades and content areas those assessments are available.

Currently the Idaho Standards Achievement Test (ISAT) in Science is offered in both English and Spanish. The statewide mathematics assessment, developed by Smarter Balanced, is offered in a Spanish/English stacked translation format. Neither the ISAT English Language Arts by Smarter Balanced or the English Language Proficiency Assessment developed by WIDA, are offered in translated versions because English language is a critical component of the measured constructs of these two required statewide assessments.

- iii. Indicate the languages identified in question 3(i) for which yearly student academic assessments are not available and are needed.

At this time, there are no other languages of origin for students that constitute a large enough percentage of the statewide student population to require additional translated versions of any Idaho Statewide assessment.

- iv. Describe how it will make every effort to develop assessments, at a minimum, in languages other than English that are present to a significant extent in the participating student population including by providing
  - a. The State’s plan and timeline for developing such assessments, including a description of how it met the requirements of 34 CFR § 200.6(f)(4);
  - b. A description of the process the State used to gather meaningful input on the need for assessments in languages other than English, collect and respond to public comment, and consult with educators; parents and families of English learners; students, as appropriate; and other stakeholders; and
  - c. As applicable, an explanation of the reasons the State has not been able to complete the development of such assessments despite making every effort.

Not applicable.

**STATE DEPARTMENT OF EDUCATION**  
**AUGUST 10, 2017**

---

4. Statewide Accountability System and School Support and Improvement Activities (ESEA section 1111(c) and (d)):

i. Subgroups (ESEA section 1111(c)(2)):

- a. List each major racial and ethnic group the State includes as a subgroup of students, consistent with ESEA section 1111(c)(2)(B).

Within Idaho's accountability system, all required historically underperforming subgroups are included in both federal reporting, as well as comprehensive and targeted school identifications.

- Economically disadvantaged are students with a free or reduced-price lunch status.
- English learners are those who have not yet tested as English proficient.
- Minority students include American Indian or Alaskan Native, Asian, Black or African American, Native Hawaiian or Pacific Islander, White, Hispanic or Latino.
- Students with disabilities are students that meet eligibility criteria as outlined in the Idaho Special Education Manual according to the Individuals with Disabilities Education Act (IDEA).

- b. If applicable, describe any additional subgroups of students other than the statutorily required subgroups (*i.e.*, economically disadvantaged students, students from major racial and ethnic groups, students with disabilities, and English learners) used in the Statewide accountability system.

Not applicable.

- c. Does the State intend to include in the English learner subgroup the results of students previously identified as English learners on the State assessments required under ESEA section 1111(b)(2)(B)(v)(I) for purposes of State accountability (ESEA section 1111(b)(3)(B))? Note that a student's results may be included in the English learner subgroup for not more than four years after the student ceases to be identified as an English learner.

Yes

No

- d. If applicable, choose one of the following options for recently arrived English learners in the State:

Applying the exception under ESEA section 1111(b)(3)(A)(i); or

Applying the exception under ESEA section 1111(b)(3)(A)(ii); or

Applying the exception under ESEA section 1111(b)(3)(A)(i) or under ESEA section 1111(b)(3)(A)(ii). If this option is selected, describe how the State will choose which exception applies to a recently arrived English learner.

ii. Minimum N-Size (ESEA section 1111(c)(3)(A)):

- a. Provide the minimum number of students that the State determines are necessary to be included to carry out the requirements of any provisions under Title I, Part A of the ESEA that require disaggregation of information by each subgroup of students for accountability purposes.

The minimum number of students required for the all-students group to be included for accountability is  $N \geq 20$ . Previously, Idaho used  $N \geq 25$ , however after Idaho's Data Management Council (DMC) changed its policy to reduce the minimum number of students for reporting purposes from 10 to 5, the ISDE will reduce the minimum number of students for accountability purposes by a commensurate 5 students.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

---

The minimum number of students in each student group listed in section A(4)(i)(a) of this plan required to be included for accountability is  $N \geq 10$ . Idaho has many small rural or remote school districts with small student populations. Including student groups with 10 students or more for accountability purposes will allow Idaho to capture results for more student groups in the calculations for targeted support and improvement designation, which will benefit students in Idaho who are members of historically disadvantaged populations.

The minimum number of students required for graduation rate to be included for accountability is  $N \geq 10$ . Initially, ISDE proposed using the same  $N$ -size for graduation rate as is used for the all-students group. However, feedback from stakeholders indicated concern that  $N \geq 20$  or 25 would leave too many high schools out of Idaho’s school identification calculations for graduation rate. Further analysis revealed that moving from  $N \geq 20$  to  $N \geq 10$  included 27 additional high schools and 7 additional alternative high schools in Idaho’s school improvement calculations for graduation rate. Including these additional schools will ensure that Idaho is able to support as many high schools with low graduation rates as possible. Because graduation rate addresses just one cohort of students and not multiple grade spans as achievement result do, ISDE believes it is appropriate to use  $N \geq 10$  for graduation rate accountability.

Idaho rule IDAPA 08.02.03.112(5)(d)(i), describes the number of days students must be enrolled in school for accountability purposes: “A student who is enrolled continuously in the same public school from the end of the first eight (8) weeks or fifty-six (56) calendar days of the school year through the state approved spring testing administration period, not including the make-up portion of the test window, will be included in the calculation to determine if the school achieved progress in any statewide assessment used for determining proficiency. A student is continuously enrolled if the student has not transferred or dropped-out of the public school. Students who are serving suspensions are still considered to be enrolled students.”

- b. Describe how the minimum number of students is statistically sound.

ISDE’s analysis showed that the difference in the number of K-8 and high schools captured in Idaho’s school identification system changed very little between  $N \geq 25$ ,  $N \geq 20$ , and  $N \geq 15$ . However, as shown in Table 2 below, reducing Idaho’s  $N$  from  $N \geq 25$  to  $N \geq 20$ , commensurate with the DMC’s reduction in minimum number of students required for reporting, results in more schools for which the all-students group met the  $N$  for all indicators in Idaho’s school identification system (and can therefore be used for comprehensive support and improvement designation).

**Table 2: Number of Title I schools included in identification system**

	Schools meeting all students $N$ in at least one indicator		Schools meeting all students $N$ for all indicators	
	$N \geq 25$	$N \geq 20$	$N \geq 25$	$N \geq 20$
K-8 (351 total)	330	333	135	150
High schools (67 total)	61	64	5	7
Alternative high schools (19 total)	13	14	0	2

Using as many data points as possible for school identification increases the robustness of the methodology, and therefore creates a more statistically sound identification system.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

---

For student groups, using  $N \geq 10$  is necessary because Idaho has many small schools with relatively few students in these groups. Moving from all students  $N \geq 20$  to  $N \geq 10$  does not result in a significant increase in the number of schools included in comprehensive support and improvement calculations (8 additional K-8 schools, 1 additional high school), yet greatly increases the variability in Idaho’s school identification results. However, moving to  $N \geq 10$  for student groups (aside from the all-students group) does allow the state to include many more of these populations, especially students with disabilities and English learners, for identification of targeted support and improvement schools as shown in Table 3 below.

**Table 3: Number of Title I schools included in identification system**

	Schools meeting student group $N$ in at least one indicator			
	Students with Disabilities		English Learners	
	$N \geq 20$	$N \geq 10$	$N \geq 20$	$N \geq 10$
K-8 (351 total)	216	297	88	150
High schools (67 total)	17	41	1	7
Alternative high schools (19 total)	0	3	0	0

Using  $N \geq 20$  does not enable Idaho to ensure that schools are accountable for results among these student groups, and therefore  $N \geq 10$  is appropriate.

Similarly, Idaho’s graduating students should themselves be considered a student group for accountability purposes because graduating cohorts are much smaller than the combination of all tested grades. For this reason, using a small  $N$ -size is warranted but should not impact the statistical propriety of Idaho’s accountability results. Using  $N \geq 10$  will require a high school fail to graduate 4 of 10 high school students in order to be identified for comprehensive support.

- c. Describe how the minimum number of students was determined by the State, including how the State collaborated with teachers, principals, other school leaders, parents, and other stakeholders when determining such minimum number.

Idaho solicited feedback on the state’s minimum  $N$ -size for accountability purposes through our online feedback opportunities as well as our in-person feedback forums, which were attended by education stakeholders of all types. Minimum  $N$ -size was brought up specifically to understand whether stakeholders had concerns about continuing to use the  $N$ -size as determined under the waiver.

Initially, the feedback that the ISDE received indicated that the existing  $N \geq 25$  size was satisfactory. However, recent feedback from Idaho’s legislators has emphasized the importance for ensuring that Idaho maximizes small schools’ opportunities to receive support under the state’s school identification system. In order to include more schools and student groups for accountability and therefore include those schools in ISDE’s system for school support, ISDE reevaluated the state’s  $N$ -size methodology. Meanwhile, Idaho’s DMC implemented a policy change, reducing the minimum number of students required for reporting purposes from 10 to 5. Based on this change, ISDE made a commensurate change in the minimum number of students for accountability. Nevertheless, there was still concern that an  $N \geq 20$  did not capture enough small student groups and therefore data points

**STATE DEPARTMENT OF EDUCATION**  
**AUGUST 10, 2017**

---

would be removed from the state's school identification system. For this reason, the state will use  $N \geq 10$  for student groups aside from the all-students group.

- d. Describe how the State ensures that the minimum number is sufficient to not reveal any personally identifiable information.<sup>3</sup>

The State of Idaho places a high value on preserving the privacy of students and safeguarding their personally identifiable information (PII). To ensure that student data is treated with the utmost security, Idaho has enacted statutory protections found in Idaho Code § 33-133.

As part of this protection, the statute permits the release of student data in aggregate. It requires that "the minimum number of students shall be determined by the state board of education."

To provide oversight and guidance over the collection, retention, and security of student data, the State Board of Education created the Data Management Council (DMC). This controlling body has set rules on minimum numbers reported in aggregate. These minimums supersede any other minimums that may be defined elsewhere unless expressly permitted by the DMC.

- e. If the State's minimum number of students for purposes of reporting is lower than the minimum number of students for accountability purposes, provide the State's minimum number of students for purposes of reporting.

DMC policy page 5 states:

*Any release of data that would result in the ability to identify the personally identifiable information (PII) of an individual must be approved by the Data Management Council, aggregated to a minimum cell size of 5, or masked/blurred. This includes situations where a calculation can be done to arrive at a single count of less than 5 students that would risk exposure of PII. Instances where 100% or 0% of students fall within one category and would risk the exposure of PII must also be approved by the Data Management Council or masked/blurred since doing so discloses information on either all or no students and thereby violates the minimum cell size policy.*

Performance of student groups that are too small to be included in school identification will still be reported on the state website and on the state report card so long as the cell size includes 5 or more students. Enrollment numbers and percentages will be displayed so long as there is at least one student within the subgroup.

- iii. Establishment of Long-Term Goals (ESEA section 1111(c)(4)(A)):

- a. Academic Achievement. (ESEA section 1111(c)(4)(A)(i)(I)(aa))

1. Describe the long-term goals for improved academic achievement, as measured by proficiency on the annual statewide reading/language arts and mathematics assessments, for all students and for each subgroup of students, including: (1) the timeline for meeting the long-term goals, for which the term

---

<sup>3</sup> Consistent with ESEA section 1111(i), information collected or disseminated under ESEA section 1111 shall be collected and disseminated in a manner that protects the privacy of individuals consistent with section 444 of the General Education Provisions Act (20 U.S.C. 1232g, commonly known as the "Family Educational Rights and Privacy Act of 1974"). When selecting a minimum n-size for reporting, States should consult the Institute for Education Sciences report "[Best Practices for Determining Subgroup Size in Accountability Systems While Protecting Personally Identifiable Student Information](#)" to identify appropriate statistical disclosure limitation strategies for protecting student privacy.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

must be the same multi-year length of time for all students and for each subgroup of students in the State, and (2) how the long-term goals are ambitious.

Idaho’s long-term goal for English/Language Art and Mathematics will be to reduce the percentage of non-proficient students by 33% over six years. “Proficient” means that a student has met or exceeded grade level standards in a specific subject as determined by performance on the associated assessment. Robust stakeholder feedback took place to set long-term goals for the state that achieve a balance of both ambitious and achievable. While several options were considered, the below long-term goals were agreed upon by all stakeholders due to the following:

- The goals result in closing achievement gaps, especially for student groups that currently show the lowest achievement.
- The target year – 6 years from 2017 – encompasses half of a student’s K-12 career and therefore achieving the goal would impact students that are currently in the K-12 education system.

Historical data analysis indicates that, had these goals been set in the 2015 school year, a substantial number of schools would have achieved their school-level goal in 2016.

Calculation:

**Long-term goal** = 33% x (100-previous year % proficient/advanced)

**Interim progress goal** = Difference between the long-term goal and the baseline / 6

**Table 4: Mathematics baseline, long-term goals and interim targets**

Mathematics	Baseline	Interim progress					Long-term goal
	2016	2017	2018	2019	2020	2021	2022
All Students	41.6%	44.8%	48.0%	51.2%	54.4%	57.6%	60.8%
Economically Disadvantaged Students	30.3%	33.8%	37.3%	40.8%	44.3%	47.8%	51.3%
Students with Disabilities	15.2%	19.8%	24.4%	29.0%	33.6%	38.2%	42.8%
English Learners	7.1%	12.2%	17.3%	22.4%	27.5%	32.6%	37.7%
Minority Students*	25.8%	29.8%	33.8%	37.8%	41.8%	45.8%	49.8%

**Table 5: English Language Arts/Literacy baseline, long-term goals and interim targets**

ELA/Literacy	Baseline	Interim progress					Long-term goal
	2016	2017	2018	2019	2020	2021	2022
All Students	53.0%	55.6%	58.2%	60.8%	63.4%	66.0%	68.6%
Economically Disadvantaged Students	40.6%	43.9%	47.2%	50.5%	53.8%	57.1%	60.4%
Students with Disabilities	15.0%	19.7%	24.4%	29.1%	33.8%	38.5%	43.2%
English Learners	6.9%	12.0%	17.1%	22.2%	27.3%	32.4%	37.5%
Minority Students*	37.4%	40.9%	45.4%	45.4%	49.9%	54.4%	58.9%

\* Data for the minority subgroup will be further disaggregated for the purpose of reporting for American Indian or Alaskan Native, Asian, Black or African American, Native Hawaiian or Pacific Islander, White, and Hispanic or Latino.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

---

2. Provide the measurements of interim progress toward meeting the long-term goals for academic achievement in Appendix A.

Tables 4 and 5 above provides the interim progress goals towards meeting the state’s long-term goals for academic achievement in English Language Arts/Literacy and Mathematics.

3. Describe how the long-term goals and measurements of interim progress toward the long-term goals for academic achievement take into account the improvement necessary to make significant progress in closing statewide proficiency gaps.

By reducing the percentage of non-proficient students by one-third over the next six years, the students in subgroups whose baseline is farther behind the all-students group have a more ambitious long term goal, and interim measures to reach that goal, which will close achievement gaps for all student subgroups, using attainable targets.

b. Graduation Rate. (*ESEA section 1111(c)(4)(A)(i)(I)(bb)*)

1. Describe the long-term goals for the four-year adjusted cohort graduation rate for all students and for each subgroup of students, including: (1) the timeline for meeting the long-term goals, for which the term must be the same multi-year length of time for all students and for each subgroup of students in the State, and (2) how the long-term goals are ambitious.

The Idaho State Board of Education has established a goal that Idaho’s 4-year cohort graduation rate will be 95% by 2023. In seeking to align the long-term goal to this established goal, the state will reduce non-graduates by 75% over six years.

The long-term goals are set for the state, districts, and schools and are based on graduation rates from the previous school year.

Calculation:

**Long-term goal** = 75% x (100 – previous year % proficient/advanced) + previous year % graduating

**Interim progress goal** = Difference between the long-term goal and the baseline / 6

**Table 6: Graduation rate baseline, long-term goals and interim targets**

Graduation rate	Baseline	Interim progress					Long-term goal
	2016	2017	2018	2019	2020	2021	2022
All Students	78.9%	81.2%	83.4%	85.7%	87.9%	90.2%	92.5%
Economically Disadvantaged Students	72.0%	75.0%	78.0%	81.0%	84.0%	87.0%	90.0%
Students with Disabilities	58.4%	62.9%	67.3%	71.8%	76.2%	80.7%	85.1%
English Learners	72.3%	75.3%	78.2%	81.2%	84.2%	87.1%	90.1%
Minority Students*	72.3%	75.3%	78.2%	81.2%	84.2%	87.1%	90.1%

\* Data for the minority subgroup will be further disaggregated for the purpose of reporting for American Indian or Alaskan Native, Asian, Black or African American, Native Hawaiian or Pacific Islander, White, and Hispanic or Latino.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

---

2. If applicable, describe the long-term goals for each extended-year adjusted cohort graduation rate, including (1) the timeline for meeting the long-term goals, for which the term must be the same multi-year length of time for all students and for each subgroup of students in the State; (2) how the long-term goals are ambitious; and (3) how the long-term goals are more rigorous than the long-term goal set for the four-year adjusted cohort graduation rate.

The long-term goals for the extended graduation rate will be developed and reported for all high schools after Idaho establishes the reporting necessary to calculate extended cohort graduation rate.

3. Provide the measurements of interim progress toward the long-term goals for the four-year adjusted cohort graduation rate and any extended-year adjusted cohort graduation rate.  
Interim progress goals in Appendix A.

Table 6 above provides the interim progress goals towards meeting the state’s long-term goals for graduation rate.

4. Describe how the long-term goals and measurements of interim progress for the four-year adjusted cohort graduation rate and any extended-year adjusted cohort graduation rate take into account the improvement necessary to make significant progress in closing statewide graduation rate gaps.

As with goals for reading/language arts and mathematics assessments, by reducing the number of non-graduating students by 75% over six years, student groups with lower rates of graduating students will be required to increase the number of graduates at a faster rate in order to meet the state’s goals.

c. English Language Proficiency. (ESEA section 1111(c)(4)(A)(ii))

Idaho establishes a student’s English language proficiency level using WIDA’s ACCESS Placement Test (W-APT). The student’s results on this screener determine the level of English language proficiency. The date of the screener provides a baseline to track this information over time..

1. Describe the long-term goals for English learners for increases in the percentage of such students making progress in achieving English language proficiency, as measured by the statewide English language proficiency assessment, including: (1) the State-determined timeline for such students to achieve English language proficiency and (2) how the long-term goals are ambitious.

Idaho will reduce the number of English learners who are not making expected progress, as defined below, toward English proficiency by 33% in five years. This five-year long-term goal, ending in 2022, aligns with the long-term goals in academic achievement and graduation rate, with 2017 serving as the baseline. Because this goal is based on just one available year of historical data, it may be revised once additional data are available.

**Table 7: English proficiency baseline, long-term goals and interim targets**

Baseline	Interim progress				Long-term goal
2017	2018	2019	2020	2021	2022
33.2%	36.9%	40.6%	44.3%	48.1%	51.8%

Idaho’s measure of expected progress is an increase of one performance level per year, up to Level 5. A student who starts at Level 1 is expected to reach Level 2 in his or her 2nd year, Level 3 in his or her 3rd year, and so on. Once a student reaches Level 5, he or she is considered proficient for the

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

---

purposes of this calculation (*which is not the state's exit criteria*). Expected progress for a student at Level 5 or 6 is to maintain that level.

**Table 8: Expect progress for English learners**

Entry year performance	Year 2 performance	Year 3 performance	Year 4 performance	Year 5 performance
1	2	3	4	Proficient
2	3	4	Proficient	--
3	4	Proficient	--	--
4	Proficient	--	--	--
5 (Proficient)	--	--	--	--
6 (Proficient)	--	--	--	--

2. Provide the measurements of interim progress toward the long-term goal for increases in the percentage of English learners making progress in achieving English language proficiency in Appendix A.

Table 7 above provides the interim progress goals towards meeting the state's long-term goals for English Language proficiency.

iv. Indicators (ESEA section 1111(c)(4)(B))

Idaho's Accountability Framework (shown in Appendix B) was approved by the Legislature in 2017 and includes the full range of Idaho's structure for ensuring students are college and career ready. Idaho believes defining success requires going beyond statewide test scores and should illustrate multiple measures reflecting the many facets of our students. All indicators in the Accountability Framework, which will all be publicly reported, reflect Idaho's state values and will further empower educators and families to make good decisions about their children.

School district, charter school district and public charter school accountability will be based on the multiple measures in the Accountability Framework aimed at providing meaningful data showing progress toward interim and long-term goals set by the State Board of Education for student achievement and school improvement. The state Accountability Framework will be used to meet both state and federal school accountability requirements and will be broken up by school category and include measures of student academic achievement and school quality as determined by the State Board of Education.

All measures within the Accountability Framework (Appendix B) will be publicly reported annually in Idaho's school report card to meaningfully differentiate schools as described in section A(4)(v) of this plan. The measures within the Accountability Framework that will be used as indicators for identifying Idaho's lowest performing schools for improvement as outlined in section A(4)(vi) of this plan are described in this section of the plan and are shown below.

**School Category**

- Kindergarten through grade eight (K-8): Schools in this category include elementary and middle schools as defined in Subsection 112.05.f.
- High Schools, not designated as alternative high schools, as defined in Subsection 112.05.f.
- Alternative High Schools

**Academic Measures by School Category**

**K-8:**

**STATE DEPARTMENT OF EDUCATION**  
**AUGUST 10, 2017**

---

- Idaho Standards Achievement Tests (ISAT) Proficiency and Growth.
- English Learners achieving English language proficiency.

**High School:**

- ISAT proficiency.
- English Learners achieving English language proficiency.
- Four (4) year cohort graduation rate, including students who complete graduation requirements prior to the start of the school district or charter schools next fall term.

**Alternative High School:**

- ISAT proficiency.
- English learners achieving English language proficiency.
- Four (4) year cohort graduation rate, including students who complete graduation requirements prior to the start of the school district or charter schools next fall term.

**School Quality Measures by School Category**

**K-8:**

- Satisfaction and Engagement survey administered to students in grades K-8.

**High School:**

- College and Career Readiness indicators, determined through a combination of students participating in advanced opportunities, earning industry recognized certification and/or participation in recognized high school apprenticeship programs.

**Alternative High School:**

- College and Career Readiness indicators, determined through a combination of students participating in advanced opportunities, earning industry recognized certification and/or participation in recognized high school apprenticeship programs.

- a. Academic Achievement Indicator. Describe the Academic Achievement indicator, including a description of how the indicator (i) is based on the long-term goals; (ii) is measured by proficiency on the annual Statewide reading/language arts and mathematics assessments; (iii) annually measures academic achievement for all students and separately for each subgroup of students; and (iv) at the State's discretion, for each public high school in the State, includes a measure of student growth, as measured by the annual Statewide reading/language arts and mathematics assessments.

Idaho's Academic Achievement Indicator is achievement on the statewide tests in Mathematics and English Language Arts/Literacy as defined in Table 7 below and meets the criteria for academic indicators as described in section A(4)(iv)(a) of this plan.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

**Table 9: Academic achievement indicators**

<b>Indicator</b>	<b>Measure</b>	<b>Description</b>
Academic Achievement	Idaho Student Achievement Test (ISAT) 3–8 Mathematics	These measures represent the proficiency on statewide mathematics and ELA/Literacy tests. In the school identification system, academic achievement is the actual, non- averaged achievement in that school year. Schools are identified for comprehensive support every three years.
	ISAT 3–8 English Language arts (ELA)/Literacy	
	ISAT High School Mathematics	
	ISAT High School ELA/Literacy	

*Used for all schools in state:* Both academic indicators in this section are used for all schools in the state according to the school categories as outlined in Idaho’s Accountability Framework.

*Same calculation for all schools:* The same calculation is used for all schools in the state for both academic indicators. This is further described in the process of annual meaningful differentiation methods later in this section.

*Validity and reliability:* Both academic indicators are calculated using statewide test scores in Mathematics and English Language Arts. The ISAT has met validity and reliability criteria as outlined in the Federal Assessment Peer Review.

*Based on long-term goals:* Both academic indicators are aligned directly to Idaho’s long-term goals.

*Proficiency on statewide reading/language arts and mathematics assessments:* Both academic indicators are based on the percentage of proficient students on these tests. Results from both tests will be weighted equally. Please see annual meaningful differentiation of schools methodology for further explanation.

*Disaggregation:* Each academic indicator can be disaggregated for each student group.

*95% participation:* Both academic indicators measure the performance of at least 95% of all students and 95% of all students in each student group, unless an LEA fails to meet the 95% required participation rate as described in section A(4)(vii) of this plan.

- b. Indicator for Public Elementary and Secondary Schools that are Not High Schools (Other Academic Indicator). Describe the Other Academic Indicator, including how it annually measures the performance for all students and separately for each subgroup of students. If the Other Academic Indicator is not a measure of student growth, the description must include a demonstration that the indicator is a valid and reliable statewide academic indicator that allows for meaningful differentiation in school performance.

Idaho’s Other Academic Indicator is Academic Growth as defined in Table 8 below and meets the criteria for academic indicators as described in section A(4)(iv)(a) of this plan. Separate growth measurements are also a component of the indicators discussed in sections c, d, and e. These measures are discussed in more detail in their individual sections and in our summary of the school identification process.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

**Table 10: Other academic indicator**

<b>Indicator</b>	<b>Measure</b>	<b>Description</b>
Academic Growth	Idaho Student Achievement Test (ISAT) 3–8 Mathematics	Academic growth on the ISAT will be measured by the difference in percentage of student scoring proficient or above in the current year of testing and either the percent proficient in the prior year (for schools with only two years of data), or the percent proficient two years in the past (for schools with three years of data or more).
	ISAT 3–8 English Language arts (ELA)/Literacy	
	ISAT High School Mathematics	
	ISAT High School ELA/Literacy	

*Disaggregation:* The other academic indicator can be disaggregated for each student group.

*Validity and reliability:* Idaho’s analyses have shown the other academic indicator to be valid and reliable.

*95% participation:* The growth rate indicator measures the performance of at least 95% of all students and 95% of all students in each student group, unless an LEA fails to meet the 95% required participation rate as described in section A(4)(vii) of this plan.

- c. Graduation Rate. Describe the Graduation Rate indicator, including a description of (i) how the indicator is based on the long-term goals; (ii) how the indicator annually measures graduation rate for all students and separately for each subgroup of students; (iii) how the indicator is based on the four-year adjusted cohort graduation rate; (iv) if the State, at its discretion, also includes one or more extended-year adjusted cohort graduation rates, how the four-year adjusted cohort graduation rate is combined with that rate or rates within the indicator; and (v) if applicable, how the State includes in its four-year adjusted cohort graduation rate and any extended-year adjusted cohort graduation rates students with the most significant cognitive disabilities assessed using an alternate assessment aligned to alternate academic achievement standards under ESEA section 1111(b)(2)(D) and awarded a State-defined alternate diploma under ESEA section 8101(23) and (25).

Table 9 below describes Idaho’s graduation rate indicators. Idaho uses the four-year adjusted cohort graduation rate for the graduation rate indicator, which follows federal guidelines. See section A(4)(v) for how the graduation rate indicator will be used for meaningful differentiation of schools. Idaho does not award a state-defined alternate diploma. Based on stakeholder feedback, Idaho is developing a five-year cohort graduation rate calculation.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

**Table 11: Graduation rate indicators**

<b>Indicator</b>	<b>Measure</b>	<b>Description</b>
Graduation Rate	The four-year cohort graduation rate	The percent of students graduating using the four-year graduation cohort rate calculation within a school reported <sup>4</sup> in the current school year. In the school identification system, graduation rate is the actual, non-averaged of the graduation rate in that school year. Schools are identified for comprehensive support every three years.
Graduation Rate Growth	The four-year cohort graduation rate	The difference between the percent of students reported graduating in the current year and the prior year (for schools with only two years of data), or the percent reporting graduating two years in the past (for schools with three years of data or more).

*Used for all high schools in state:* The graduation rate indicator is used for all high schools in the state.

*Same calculation for all high schools:* The same calculation is used for all schools in the state for the graduation rate indicator.

*Based on long-term goals:* The graduation rate indicator is aligned directly to Idaho’s long-term goals.

*Disaggregation:* The graduation rate indicator can be disaggregated for each student group.

*Validity and reliability:* The federally-required four-year cohort graduation rate has been shown to be valid and reliable.

*95% participation:* The graduation rate indicator measures the performance of at least 95% of all students and 95% of all students in each student group, unless an LEA fails to meet the 95% required participation rate as described in section A(4)(vii) of this plan.

- d. Progress in Achieving English Language Proficiency (ELP) Indicator. Describe the Progress in Achieving ELP indicator, including the State’s definition of ELP, as measured by the State ELP assessment.

The state has defined the English Language Proficiency as 5.0 composite proficiency level with 4.0 or higher on listening, speaking, reading, and writing. Idaho will use data from the 2017 Access 2.0 administration to define the progress for achieving English Language Proficiency.

- e. School Quality or Student Success Indicator(s). Describe each School Quality or Student Success Indicator, including, for each such indicator: (i) how it allows for meaningful differentiation in school performance; (ii) that it is valid, reliable, comparable, and statewide (for the grade span(s) to which it applies); and (iii) of how each such indicator annually measures performance for all students and separately for each subgroup of students. For any school quality or indicator that does not apply to all grade spans, the description must include the grade spans to which it does apply.

<sup>4</sup> Graduation rate lags by one school year.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

**Table 12: School quality indicators**

Indicator	School Category	Measure
School quality	K-8	Satisfaction and Engagement survey administered to students in grades K-8.
	High School	College and Career Readiness indicators, determined through a combination of students participating in advanced opportunities, earning industry recognized certification and/or participation in recognized high school apprenticeship programs.
	Alternative High School	College and Career Readiness indicators, determined through a combination of students participating in advanced opportunities, earning industry recognized certification and/or participation in recognized high school apprenticeship programs.
School Quality Growth	K-8	Difference in results from satisfaction and engagement survey administered to students in grades K-8 in comparative years of the school identification cycle.
	High School	Difference between percent of College and Career Ready students, determined through a combination of students participating in advanced opportunities, earning industry recognized certification and/or participation in recognized high school apprenticeship programs, in comparative years of the school identification cycle.
	Alternative High School	Difference between percent of College and Career Ready students, determined through a combination of students participating in advanced opportunities, earning industry recognized certification and/or participation in recognized high school apprenticeship programs, in comparative years of the school identification cycle.

*Disaggregation:* Each school quality indicator can be disaggregated for each student group.

*95% participation:* Because the school climate survey will be delivered through Idaho’s assessment vendor during the statewide assessment, we expect at least 95% participation unless an LEA fails to meet the 95% required participation rate as described in section A(4)(vii) of this plan. All graduating students will be counted in the denominator for the college and career readiness indicator, meaning all students will be included in the results.

*Validity and reliability:* Administering the school climate survey through Idaho’s assessment vendor will enable the collection of valid and reliable data. The college and career readiness indicator will be calculated for every student using data collected by the ISDE, State Board of Education, or the Idaho Division of Career and Technical Education (ICTE).

- v. Annual Meaningful Differentiation (ESEA section 1111(c)(4)(C))
  - a. Describe the State’s system of annual meaningful differentiation of all public schools in the State, consistent with the requirements of section 1111(c)(4)(C) of the ESEA, including a description of (i) how the system is based on all indicators in the State’s accountability system, (ii) for all students and

**STATE DEPARTMENT OF EDUCATION**  
**AUGUST 10, 2017**

---

for each subgroup of students. Note that each state must comply with the requirements in 1111(c)(5) of the ESEA with respect to accountability for charter schools.

Idaho will meaningfully differentiate all schools annually using the state's report card, which will show school progress on all indicators in the Accountability Framework (Appendix B) for which data are available.

A subset of these indicators will then be used every three years to determine schools for comprehensive support and improvement, and each year to determine schools for targeted support and improvement, as required by law, as described in section A(4)(vi) of this plan. The indicators that will be used for school identification are indicated in section A(4)(iv) of this plan.

Idaho's philosophy is to create a system of annual meaningful differentiation that allows ISDE to identify schools for improvement only if they are both the lowest performing in the state and not improving. To lay the foundation for this approach, the system for annual meaningful differentiation will allow schools to be recognized for either achievement, growth in achievement, or both. Using the methodology in this plan, ISDE avoids two common challenges associated with school accountability:

*Growth Ceiling Issue:* Using Idaho's previous rating system, it was possible for very high-performing schools to receive low ratings due to lack of growth, despite there being little room available for progress.

*Low Baseline Issue:* Previously, even if schools were growing at a fast rate, they could receive poor ratings due to low baseline performance.

This system will incorporate achievement and growth for the five federally required indicators, all of which included in Idaho's Accountability Framework:

- Mathematics (statewide test)
- English Language Arts/Literacy (statewide test)
- Graduation Rate
- English Language Proficiency
- School Quality

ISDE will group schools by K-8, high school, and alternative high schools.

In Idaho rule, alternative high schools are defined as, "Alternative secondary programs are those that provide special instructional courses and offer special services to eligible at-risk youth to enable them to earn a high school diploma. Designated differences must be established between the alternative high school programs and the regular secondary school programs. Alternative secondary school programs will include course offerings, teacher/pupil ratios and evidence of teaching strategies that are clearly designed to serve at-risk youth as defined in this section. Alternative high school programs conducted during the regular school year will be located on a separate site from the regular high school facility or be scheduled at a time different from the regular school hours."

Stakeholder feedback on school category approach has been positive. Representatives from alternative high schools felt strongly that alternative high schools and high schools should be treated the same in Idaho's accountability system – that the indicators used for school identification for high schools and alternative should be identical. Feedback also included a proposal to group schools using concentration of low-income students; however, ISDE will use the K-8, high school, and alternative

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

---

high school groupings because Title I school identification itself applies only to schools with a high concentration of low-income students.

The steps below describe how hypothetical School X's performance results in annual meaningful differentiation in Idaho's school report card. The report card will note whether a school has been identified for improvement or not identified.

**Step 1:** For the first indicator, identify *Achievement* and *Growth* for School X.

**School X math performance**

<b>Prior year(s) Proficient/Advanced</b>	<b>Current year Proficient/Advanced</b>
55%	75%

*Achievement* is the percentage of students proficient or advanced.

School X's math *achievement* is 75.

*Growth* is the difference between the percent proficient or above in either the prior year (for schools with only two years of data) or two years in the past (for schools with three years of data or more). School X's math *Growth* is 75 minus 55, or 20.

**Step 2:** Determine rank of *Achievement* and *Growth* relative to all other public schools in the state.

	<b>Achievement</b>	<b>Rank</b>
School P	99	1
School F	98	2
School AA	96	3
School S	94	4
	●	●
	●	●
<b>School X</b>	<b>75</b>	<b>197</b>
	●	●
	●	●
School G	32	378

School X's math *Achievement* was about in the middle relative to other schools in the state, ranking 197 of 378 schools.

There are 181 schools with lower *Achievement* than School X and 196 that have higher *Achievement* than School X.

	<b>Growth</b>	<b>Rank</b>
School T	22	1
<b>School X</b>	<b>20</b>	<b>2</b>
School C	12	3
School L	11	4
	●	●
	●	●
	●	●
School P	0	378

School X's math *Growth* was higher than all schools but one in the state, ranking second in *Growth*.

There are 376 schools with lower *Growth* than School X.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

---

**Step 3:** Calculate percentile for *Achievement* and *Growth*.

The percentile is a simple calculation: divide the number of schools below School X by the total number of public schools in the state. This number is then multiplied by 100. This calculation reveals the percent of schools in the state that fall below School X in *Achievement* and *Growth*.

---

**Achievement percentile**

$$\frac{\text{Number of schools below School X (181)}}{\text{Total number of schools (378)}} * 100 = \mathbf{48}$$

---

48 percent of schools in the state fall below School X in *Achievement*.

---

**Growth percentile**

$$\frac{\text{Number of schools below School X (376)}}{\text{Total number of schools (378)}} * 100 = \mathbf{99}$$

---

99 percent of schools in the state fall below School X in *Growth*.

This calculation will be repeated for all indicators and for all student subgroups. The results of these percentile calculations will be displayed in the school report card, allowing viewers to see both achievement and growth for each indicator at each school.

- b. Describe the weighting of each indicator in the State’s system of annual meaningful differentiation, including how the Academic Achievement, Other Academic, Graduation Rate, and Progress in ELP indicators each receive substantial weight individually and, in the aggregate, much greater weight than the School Quality or Student Success indicator(s), in the aggregate.

For the purposes of annual meaningful differentiation on the school report card, each indicator will be reported on its own and without weighting or combining to allow for maximum transparency.

When identifying comprehensive and targeted support and improvement schools as described below, ISDE will apply equal weights the indicators used, with the exception of the school quality indicator. The school quality indicator will be weighted at 10% for all schools, with the remaining indicators weighted evenly across the remaining 90%. See Table 11 below for an outline of indicator weights for Idaho’s most common school configurations. Stakeholder feedback indicated a desire to avoid assigning artificial weights to each indicator because the weights may appear arbitrary. However, because the school quality indicators are new to Idaho, ISDE has determined that weighting this indicator at 10% is appropriate during the first years of implementation.

**Table 13: Indicator weights for Idaho’s most common Title I school configurations (percent)**

School type (Title 1 Schools)	Math	English/ Language Arts	English language proficiency	Graduation rate	School quality
K-8 (190)	30	30	30		10
K-8 (no ELs) (161)	45	45			10
High school (19)	22.5	22.5	22.5	22.5	10
High school (no ELs) (48)	30	30		30	10
Alternative high school (7)	22.5	22.5	22.5	22.5	10
Alternative high school (no ELs) (12)	30	30		30	10

**STATE DEPARTMENT OF EDUCATION**  
**AUGUST 10, 2017**

---

- c. If the State uses a different methodology for annual meaningful differentiation than the one described in section 4(v)(a). above for schools for which an accountability determination cannot be made (*e.g.*, P-2 schools), describe the different methodology, indicating the type(s) of schools to which it applies.

Not applicable.

vi. Identification of Schools (*ESEA section 1111(c)(4)(D)*)

- a. Comprehensive Support and Improvement Schools. Describe the State's methodology for identifying not less than the lowest-performing five percent of all schools receiving Title I, Part A funds in the State for comprehensive support and improvement.

Idaho will identify schools in 2018-19, using data from 2015-16, 2016-17, and 2017-18. Idaho will then identify schools every three years thereafter, using the same review of three prior years' data. Feedback from stakeholders strongly emphasized a three-year identification cycle in order to build a system that supports the development of sustainable school improvement strategies. School leaders will be able to dedicate time to planning and early implementation in the first year of identification and will have an additional two full years to implement their school improvement strategies, with the intent of generating sustainable change at the school.

ISDE will review identification data annually to determine whether schools would be identified during an off-cycle year. If schools are found that are not currently identified but would have been identified if the current year were on-cycle will be notified and offered support and thought partnership from staff. Those schools will be added to a watch list and this will be noted on the school report card.

Using the percentile calculations described in section A(4)(v)(a) of this plan as the foundation, ISDE will use additional, simple calculations to identify the lowest-performing 5% of Title I schools for comprehensive support and improvement.

Academic achievement is the actual, non-averaged achievement in that school year. Schools are identified for comprehensive support every three years.

Non-Title I schools will be designated as comprehensive schools if the results of their calculation fall within the performance range of the 5% of designated Title I schools.

The following steps pick up from the sequence left off at the conclusion of the previous section of this plan. They show how the state's system of annual meaningful differentiation will build to school identification.

**Step 4:** Take the higher of *Achievement* or *Growth* for each indicator.

In the example in section A(4)(v)(a), because 99 is higher than 48, 99 will represent the score for School X's math indicator. Forty-eight will *not* be used to determine whether the school will receive comprehensive support.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

*Step 5:* Repeat for all indicators, and take the average.

**School X's indicator results**

Math	English Language Arts	Graduation Rate	EL Proficiency	School Quality (always 10% weight)	Average
99	Higher of either <i>Growth</i> or <i>Achievement</i> percentile	Higher of either <i>Growth</i> or <i>Achievement</i> percentile	Higher of either <i>Growth</i> or <i>Achievement</i> percentile	Higher of either <i>Growth</i> or <i>Achievement</i> in school climate survey absenteeism (K-8) or college and career readiness (high school)	<b>Average of all indicator scores other than school quality (always 10%)</b>

*Step 6:* Repeat for all Title I schools in the state and rank schools from highest to lowest.

*Step 7:* Choose the bottom 5% as comprehensive schools within the K-8, high school, and alternative high school categories.

*Step 8:* Idaho will celebrate schools for their work to meet the needs of their students by recognizing:

- Schools that meet or exceed the interim progress goals for each indicator.
- Schools that fall into the 90<sup>th</sup> percentile rank or above using the school identification methodology for each of the indicators in the framework.

- b. Comprehensive Support and Improvement Schools. Describe the State's methodology for identifying all public high schools in the State failing to graduate one third or more of their students for comprehensive support and improvement.

Beginning in 2018, Idaho will identify all public high schools in the state with a four-year cohort graduation rate less than 67% as averaged over three years for comprehensive support and improvement. Graduation rates will be reported annually.

- c. Comprehensive Support and Improvement Schools. Describe the methodology by which the State identifies public schools in the State receiving Title I, Part A funds that have received additional targeted support under ESEA section 1111(d)(2)(C) (based on identification as a school in which any subgroup of students, on its own, would lead to identification under ESEA section 1111(c)(4)(D)(i)(I) using the State's methodology under ESEA section 1111(c)(4)(D)) and that have not satisfied the statewide exit criteria for such schools within a State-determined number of years.

If a Title 1 school is identified for Additional Targeted Support under section A(4)(vi)(f) of this plan for three consecutive years, that school will be identified as a comprehensive support and improvement school.

- d. Year of Identification. Provide, for each type of schools identified for comprehensive support and improvement, the year in which the State will first identify such schools and the frequency with which the State will, thereafter, identify such schools. Note that these schools must be identified at least once every three years.

Idaho will begin identifying comprehensive support and improvement schools for the 2018-19 school year and every three years thereafter.

**STATE DEPARTMENT OF EDUCATION**  
**AUGUST 10, 2017**

---

- e. Targeted Support and Improvement. Describe the State’s methodology for annually identifying any school with one or more “consistently underperforming” subgroups of students, based on all indicators in the statewide system of annual meaningful differentiation, including the definition used by the State to determine consistent underperformance. (*ESEA section 1111(c)(4)(C)(iii)*)

Idaho will identify targeted support and improvement schools based on student group gaps to their non-group peers. A consistently underperforming student group in Idaho is any student group that has a gap of 35 percentage points or more averaged over three years in any of the indicators. A school with a consistently underperforming student group will be identified for targeted support and improvement.

Targeted support and improvement schools will first be identified in the 2018-19 school year and each year thereafter.

The definition of the historically underperforming student groups used to determine targeted support and improvement schools are:

1. Economically disadvantaged are students with a free or reduced-price lunch status.
2. English learners are those who have not yet tested as English proficient.
3. Minority students include American Indian or Alaskan Native, Asian, Black or African American, Native Hawaiian or Pacific Islander, White, Hispanic or Latino.
4. Students with disabilities are students that meet eligibility criteria as outlined in the Idaho Special Education Manual according to the Individuals with Disabilities Education Act (IDEA).

Each targeted support and improvement school will be required to develop and implement an improvement plan that is aligned to the long-term goals for the state, approved by the LEA.

- f. Additional Targeted Support. Describe the State’s methodology for identifying schools in which any subgroup of students, on its own, would lead to identification under ESEA section 1111(c)(4)(D)(i)(I) using the State’s methodology under ESEA section 1111(c)(4)(D), including the year in which the State will first identify such schools and the frequency with which the State will, thereafter, identify such schools. (*ESEA section 1111(d)(2)(C)-(D)*)

The methodology for identifying comprehensive support and improvement schools will be applied to student subgroups, in comparison to the all-students group of comprehensive schools. If a school’s student subgroup performance is lower than the highest performing all-students group amongst CSI schools, that school would be identified for additional targeted support. In other words, if results for any student group, on its own, would have resulted in the school being identified for comprehensive support, that school will be identified for Additional Targeted Support. This calculation will be run every three years, beginning with the 2018-19 school year, to mirror comprehensive support and improvement identification as described in section A(4)(vi)(a) of this plan.

- g. Additional Statewide Categories of Schools. If the State chooses, at its discretion, to include additional statewide categories of schools, describe those categories.

The state does not identify additional statewide categories of schools.

- vii. Annual Measurement of Achievement (*ESEA section 1111(c)(4)(E)(iii)*): Describe how the State factors the requirement for 95% student participation in statewide mathematics and reading/language arts assessments into the statewide accountability system.

**STATE DEPARTMENT OF EDUCATION**  
**AUGUST 10, 2017**

---

Idaho understands that in order to provide a fair and accurate picture of school success, and to help parents, teachers, school leaders, and state officials understand where students are struggling and how to support them, the state must ensure high participation in statewide assessments.

According to current Idaho Administrative Code (IDAPA 08.02.03.112(e)), “failure to include ninety-five percent (95%) of all students and ninety-five percent (95%) of students in designated subgroups automatically identifies the school as not having achieved measurable progress in ISAT proficiency.” For the purposes of this plan, “measurable progress on ISAT proficiency” is defined as not having met the school’s interim progress measure toward its long-term goals in any group where 95% participation is not attained.

Additionally, “If a school district does not meet the ninety-five percent (95%) participation target for the current year, the participation rate can be calculated by the most current three (3) year average of participation.”

Should a school or LEA not meet the 95% participation minimum standard, the local school board will be notified by the State Board of Education that the school or district has failed to meet the minimum standard of reporting and that this will be reflected on the state report card. The ISDE will support the school or LEA to write a parent outreach plan that addresses how it will engage parents and community members in order to meet the 95% participation minimum standard. In addition, ISDE will develop policies requiring the LEA to use a portion of its funds pursuant to 33-320, Idaho Code (Continuous Improvement Plans) for local school board and superintendent training on data-driven decision-making and assessment literacy.

If a school has at least 95% participation in any year, the school will not be required to submit a parent outreach plan for the following year.

viii. Continued Support for School and LEA Improvement (*ESEA section 1111(d)(3)(A)*)

- a. Exit Criteria for Comprehensive Support and Improvement Schools. Describe the statewide exit criteria, established by the State, for schools identified for comprehensive support and improvement, including the number of years (not to exceed four) over which schools are expected to meet such criteria.

**Lowest performing 5% of schools:**

To exit comprehensive support and improvement a school identified in the lowest performing 5% of schools must:

- The school no longer meets the eligibility criteria for comprehensive support and improvement (is no longer in the lowest 5%), and
- The school has shown a consistent growth trajectory compared with the data in the year during which the school was identified, and
- The school has articulated in writing a plan for sustaining improved student achievement. The plan will be submitted to and approved by the State Technical Assistance Team (STAT). This plan will articulate measurable goals, aligned strategies, and a robust monitoring plan. This sustainability plan must explain how the school will maintain a strong rate of growth and change for students while addressing how the school intends to ensure sustainability without additional improvement funds.

In addition, if a school meets its second-year interim goals after the second year of identification (i.e., is on track to hit its three-year goals), the school may elect to exit comprehensive support and

**STATE DEPARTMENT OF EDUCATION**  
**AUGUST 10, 2017**

---

improvement status and forfeit any school improvement funds available in the final year in the improvement cycle.

**Schools with graduation rate below 67%:**

Schools identified for comprehensive support and improvement by failing to graduate two-thirds of its graduating cohort in any year may exit from comprehensive status if:

- The school's average graduation rate over the previous 3 years exceeds 67%, or
- The school's graduation rate for two consecutive years exceeds 67%.

- b. Exit Criteria for Schools Receiving Additional Targeted Support. Describe the statewide exit criteria, established by the State, for schools receiving additional targeted support under ESEA section 1111(d)(2)(C), including the number of years over which schools are expected to meet such criteria.

Schools identified for additional targeted support will be assigned school improvement goals with a three-year timeline for the student group for which the school was identified for additional targeted support. These goals will be aligned with a long-term goal for that student group to reduce the gap to 100% proficiency in each indicator by half over 6 years with 2016 as the baseline year. To exit, a school must:

- The school no longer meets the eligibility criteria for additional targeted support, and
- The school has shown a consistent growth trajectory compared with the data in the year during which the school was identified for the student group for which it was identified.

In addition, if a school meets its second-year interim goals for each student group for which it was identified after the second year of identification (i.e., is on track to hit its three-year goals), the school may elect to exit additional support and improvement status.

- c. More Rigorous Interventions. Describe the more rigorous interventions required for schools identified for comprehensive support and improvement that fail to meet the State's exit criteria within a State-determined number of years consistent with section 1111(d)(3)(A)(i)(I) of the ESEA.

More rigorous interventions in a school failing to meet Idaho's exit criteria after three years will be led by the State Technical Assistance Team (or STAT, see section A(4)(viii)(e) for a complete description), who will facilitate the completion of a Comprehensive and Integrated Field Review (CIFR) that will lead to next steps for the school. Below is a description of the steps the STAT will complete to determine more rigorous interventions.

**Notification of insufficient progress from the Superintendent of Public Instruction will go to:**

- The Idaho State Board of Education
- The local school board
- The superintendent of the LEA with the building principal copied
- The public via the School Accountability Report Card

**Next steps include:**

- The ISDE conducts a Comprehensive and Integrated Field Review (CIFR) during the fall following the third year of identification (see below for membership and protocol).
- The State Board of Education may direct the use of some of the LEA's continuous improvement funds pursuant to 33-320, Idaho Code for local school board training in school improvement.
- A leadership coach may be assigned to the local school board and LEA leader to inform school improvement at the local level.

**STATE DEPARTMENT OF EDUCATION**  
**AUGUST 10, 2017**

---

**Membership of the Comprehensive and Integrated Field Review Team may include:**

- ISDE representatives
- LEA/school administrators and teachers from the region with similar demographics
- Persons nominated by Idaho School Boards Association, Idaho Association of School Administrators, Idaho Association of Special Education Directors, Idaho Education Association
- Administration/faculty applicants from high achieving schools chosen by the State Department of Education

**Comprehensive and Integrated Field Review protocol:**

- Observe a stratified sample of faculty including teachers of special populations, using a standard protocol. The protocol will include a subset of the indicators that align with the state's current teacher evaluation system.
  - Interview focus groups with teachers, parents, students, and noncertified staff (e.g. food service, custodians and paraprofessional).
  - Interview LEA and school administrators.
  - Collect and interpret data.
  - Recommend additional school interventions to school, LEA, and state leadership.
  - School, LEA, and state leaders agree upon and implement new interventions for the school.
- d. Resource Allocation Review. Describe how the State will periodically review resource allocation to support school improvement in each LEA in the State serving a significant number or percentage of schools identified for comprehensive or targeted support and improvement.

Idaho will identify all LEAs with 50% or more of comprehensive and targeted support and improvement schools every year.

For LEAs with 50% or more comprehensive and targeted support and improvement schools the state will annually review ESSA Federal program resource allocations from the LEA to the school through the Consolidated Federal and State Grant Application (CFSGA). Budget and expenditure information, supports and resources, and student performance will be analyzed to determine the effectiveness of those supports.

ISDE has access to a wide variety of resources, including funding, expertise, math and ELA coaches, leadership training, and assessment development. The allocation of these resources will first be applied to those comprehensive and targeted schools, especially the LEAs that have more than 50% of schools identified for comprehensive or targeted support.

- e. Technical Assistance. Describe the technical assistance the State will provide to each LEA in the State serving a significant number or percentage of schools identified for comprehensive or targeted support and improvement.

Idaho is committed to a robust statewide system of support. Our system of support is designed to pair local issues with local solutions and draws from a variety of resources and programs to build the capacity of schools and LEAs for continuous and sustainable improvement. The statewide system of support is managed and coordinated by the State Technical Assistance Team (STAT). This team is responsible for overseeing all school improvement grants for comprehensive and targeted schools. The STAT works with LEAs to ensure that improvement plans are evidence-based and managed for high performance.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

---

The STAT will provide a network approach to improving instruction and achievement for each school identified as comprehensive support and improvement. The STAT will include members of the executive team, federal programs director, associate deputy of federal programs, director of special education, director of Title III, director of curriculum and instruction, director of assessment, school improvement coordinator, a Career and Technical Education (CTE) representative, a state board of education representative, and members of the local LEA and school leadership teams. Depending upon the needs of the schools identified for comprehensive or targeted assistance, other specialists will be asked to provide input.

Plan implementation and management support may be provided by the STAT if specifically requested by the LEA or school. The assistance may be in the form of conducting a comprehensive needs assessment, drafting a comprehensive plan, defining evidenced-based interventions, defining key indicators to measure and monitor, conducting periodic data collection, evaluating the data, and making necessary corrections in the interventions.

As shown in Table 12 below, the statewide system of support includes strategies and activities that LEAs and schools can select based on need. Schools identified for comprehensive support and improvement will likely need to draw on multiple strategies, whereas schools identified for targeted support and improvement may apply focused resources on meeting the needs of particular groups of students. This could include drawing on the English Learner Program to support EL students or providing extended learning time to help accelerate learning for specific groups of students. All funded activities and programs are evaluated regularly for evidence of effective implementation and to assess the degree to which services and activities are evidence-based. Programs draw on guidance from the U.S. Department of Education’s What Works Clearinghouse and expertise from the Northwest Comprehensive Center and Regional Education Lab Northwest.

The STAT will ensure that school improvement plans meet evidence-based requirements under ESSA, and that the state interventions being applied to schools are evaluated to ensure that they are high quality and resulting in improved outcomes for students.

State-led school improvement activities are funded through the state administrative set-aside for 1003(a) funds. Services are provided directly to schools identified for improvement, when requested by the LEA as an optional part of the 1003(a) funding formula.

**Table 14: Strategies used in the Idaho statewide system of support**

Strategy	Activity	Provider/program	Funding source
Creating/implementing comprehensive and targeted school improvement	Diagnostic evaluation/needs assessment to determine key challenges and root causes	ISDE or approved provider	Title I-A School Improvement funds
	Comprehensive school improvement and leadership coaching	Idaho Capacity Builders	
Improving leadership effectiveness	Training/Mentoring for School Board Members	ISDE, Idaho School Boards Association, Idaho Building Capacity Project	School Improvement funds

<b>Strategy</b>	<b>Activity</b>	<b>Provider/program</b>	<b>Funding source</b>
	Leadership coaching	Idaho Building Capacity Project	School improvement funds
	Mentoring and support for principals	Idaho Principals Network Idaho Principal Mentoring Project	School improvement funds Title II-A
	Mentoring and support for superintendents	Idaho Superintendents Network	School improvement grant
	School improvement training for local school boards and superintendents	ISDE or contract vendor	State funds pursuant to 33-320, Idaho Code
	Mentoring, training, and support for emerging CTE leaders and prospective CTE administrators	Leadership Institute	State funds (CTE)
Aligning curriculum and improving instruction	Professional development and technical assistance in curriculum and standards development and alignment and research-based instructional improvement	Approved providers; state regional mathematics or ELA specialists	School improvement funds and state funds
	Idaho Content Standards/Literacy coaching	Idaho Coaching Network, ELA/Literacy	State funds
	Training on the Idaho Content Standards and technical assistance with how to align curriculum, instruction, and assessment practices	Idaho Coaching Network/ELA/Literacy Coaches, Idaho Math Centers	State funds
	Educator evaluation training and coaching	ISDE and SBOE Educator Effectiveness Coordinators	State funds
	Opportunities to implement STEM curriculum	STEM Action Center	State funds
	Training on Assessment and Data Literacy	ISDE	State and federal funds
	Training on the Idaho Career Technical Content Standards and technical assistance with how to align programs and assessments.	ICTE Reach Professional Development Conference; Program Quality Managers	State funds (CTE)

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

<b>Strategy</b>	<b>Activity</b>	<b>Provider/program</b>	<b>Funding source</b>
	Mastery education training	Idaho Mastery Education Network	State funds
Supporting English learners	Technical assistance with EL program design	Idaho English Learner Program	State and federal funds
	Training on WIDA standards and technical assistance on aligning WIDA standards with Response to Intervention (RTI) practices	Idaho English Learner Program	State and federal funds
Supporting Special Education students	Multi-tiered instructional training and coaching	SESTA team of Special Education	State funds, special education funds
	Training on intensive interventions, assessments and strategies related to special education	Idaho Center on Disabilities and Human Development	Special education funds
Extended learning time	Technical assistance on how to redesign the school day using extended learning and/or other opportunities (e.g., 21 <sup>st</sup> Century Community Learning Centers)	ISDE and/or Idaho Universities	Title IV
Family and community engagement	Technical assistance in the inclusion of families and the community in the school improvement planning and implementation process	ISDE-Family Engagement Coordinator	State funds
	Access to and support with the Family Engagement Tool (FET)		
	Career and Technical Student Organizations (CTSOs) provide student leadership opportunities and community engagement	ICTE	State funds (CTE)
	Career and Technical Program Advisory Committees provide community partnerships and industry input for CTE programs	ICTE	State funds (CTE)

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

Strategy	Activity	Provider/program	Funding source
Fiscal management	Technical assistance on the alignment of state funds (e.g., technology funds, advanced opportunities) and the policies necessary to ensure their success	ISDE	State funds
	Technical assistance and oversight on the use of state funds (e.g., added-cost funds, Idaho Quality Program Standard funds, career technical school funds) and federal funds (e.g., Perkins) for career technical programs	ICTE	State funds (CTE)

The following describes each of these strategies and activities in greater detail:

**Management of Comprehensive and Targeted School Improvement**

LEAs and schools need guidance and support in conducting needs assessments, prioritizing goals and needs, and developing improvement plans that are actionable and effective. ISDE partners with local and regional organizations to provide this assistance.

***Comprehensive needs assessment and action plan:*** As part of the state’s support, all comprehensive support and improvement schools will conduct a comprehensive needs assessment. The needs assessment may include an examination of four key components of each school: climate and culture, student engagement, leadership, and stakeholder perspectives and experiences. Data will be collected and analyzed using key performance and improvement indicators for school quality and learner outcomes. Areas of improvement will include a root-cause analysis to determine appropriate solutions. Improvement areas will be prioritized, and this information will help guide LEAs in writing their comprehensive support and improvement plans and will help the STAT provide ongoing support assistance. If the LEA would like assistance from ISDE in either conducting the diagnostic evaluation or recommending an external provider, the school improvement coordinator will provide the information and resources.

Action plans from the diagnostic evaluation will address the why, who, what, when, and resource allocation for making improvement changes. A vision for the school will be developed and the school’s strategic direction—setting short-term (one year) and long-term (three to five years) goals—will be identified. An important component of the plan will include external stakeholder involvement in the development process and during the implementation of the plan. External stakeholders will include, at a minimum, the principal and other school leaders, teachers, and parents. The LEA will address in the plan how it will monitor and oversee the plan’s implementation, as well as how the effectiveness of the plan will be evaluated. Title I-A school improvement funds may be used to fund a comprehensive needs assessment if the LEA chooses to use an external provider. Additionally, grant funds will be available for all Title I schools identified as comprehensive support and improvement for the purpose of implementing system changes, strategies, and interventions as identified in the school’s improvement plan based on the results of the comprehensive needs assessment.

**STATE DEPARTMENT OF EDUCATION**  
**AUGUST 10, 2017**

---

The STAT will meet regularly either in person or via web conference (depending on where team members are located). The state school improvement coordinator will develop the agenda with input from STAT member stakeholders and will facilitate the meetings. One of the key responsibilities of this group will be to review data to inform strategies for improvement. Data from each of the stakeholders will be provided to the STAT members ahead of the meeting time. The purpose of the meeting will be to review progress from the last meeting and identify action plan supports and next steps for the following meeting. All stakeholder members are mutually responsible for the improvement of the school.

Given that the STAT will have members who are part of ISDE's executive team, ISDE will have an internal system of control with regular feedback provided to the superintendent and cabinet. The STAT members will also be responsible for continuing to convene regular meetings of a core team, which will include representatives from ISDE, CTE, and OSBE leadership. ISDE, the STAT, and the core team will have access to technical assistance from external providers and will reach out to staff from other state education agencies to brainstorm challenges.

The STAT will use the LEA and school improvement plans as a component of analysis of school progress. This team will work with LEAs to examine school data in an iterative process that includes an initial benchmark of student achievement levels, delivery of the prescribed intervention, a second assessment of progress, continued intervention, and a third assessment of progress.

If the monitoring of data demonstrates *no improvement in student progress* toward desired outcome(s) after two cycles within one year of the initial grant, the STAT, in collaboration with the LEA, should determine modification to the intervention(s) or a redefinition of the intervention. The new or modified intervention should be implemented and the monitoring process should begin again.

If the school no longer falls in the category of comprehensive support due to the *significant increase in achievement and/or growth* or it is the conclusion of the STAT that the school's processes and procedures will result in higher levels of student outcomes, ISDE and the LEA will discuss termination of designation and a plan for interim measures of progress, student data, and scaffolded support. The school will be considered exited, but the additional funding allocated for support will no longer be distributed.

***Idaho Building Capacity Project:*** Central to the strategy of providing assistance with the management of school improvement is the Idaho Building Capacity (IBC) Project. The project began in 2008 and is now a cornerstone of ISDE's statewide system of support and its approach to school improvement. Idaho Capacity Builders are experienced educators who have in-depth knowledge of school improvement processes and demonstrated experience implementing change processes. All schools identified for comprehensive or targeted support will receive support from a Capacity Builder. Capacity Builders coach leaders and leadership teams through the tasks of improvement with monthly training and assist in promoting alignment among the various parts within the school or LEA system. Capacity Builders are provided with a toolkit of evidence-based school improvement resources and, in partnership with school and LEA leaders, help create and implement a customized school improvement plan. The Capacity Builders are managed by regional school improvement coordinators at Boise State University, Idaho State University, and University of Idaho.

### **Improving Leadership Effectiveness**

The statewide system of support includes several activities to increase the effectiveness of LEA and school leadership. The following activities draw on the strengths and assets of Idaho's educators

**STATE DEPARTMENT OF EDUCATION**  
**AUGUST 10, 2017**

---

while providing focused support to leaders of schools identified for comprehensive or targeted support and improvement.

***Idaho Principals' Network (IPN):*** The IPN brings school principals together in a professional learning community that is singularly focused on improving outcomes for all students by improving the quality of instruction in all schools. Through the IPN, principals participate in a balance of content, professional conversation, and collegial instructional rounds related directly to instructional leadership, managing change, and improving the overall effectiveness of the instructional core. For example, the network has worked on improving classroom observations, building turnaround leadership competencies, and instructional rounds. For schools identified for comprehensive support and improvement, the IPN is required and provides coaching and support unique to the leadership needs of each principal. Data collected in July 2017 indicated that IPN participants overwhelmingly indicated satisfaction with the program. Over 95% of participants would either recommend or strongly recommend the program and indicated that the workshops are useful and directly impact their work.

***Idaho Superintendents' Network (ISN):*** The ISN was developed by ISDE in partnership with Boise State University's Center for School Improvement and Policy Studies. The purpose of this project is to support the work of LEA leaders in improving outcomes for all students by focusing on the quality of instruction. The network comprises committed superintendents who work together to develop a cohesive and dedicated leadership community focused on teaching and learning. The superintendents support each other as they bring about change and collectively brainstorm obstacles that may prevent improvement in the quality of the instruction in their LEAs. ISDE acts as a resource and provides the necessary research, experts, and planning to bring superintendents from across the state together to discuss self-identified issues. The ISN is a key resource for superintendents in LEAs with schools that are in comprehensive and targeted designation in order to support and build their capacity in specific aspects of leadership. Areas of support provided by the ISN include transforming district central offices for learning improvements, using data to improve teacher effectiveness and instruction, and creating strong stakeholder relationships. The ISN is required for district superintendents with one or more schools identified for comprehensive support and improvement.

***The Idaho Principal Mentoring Project (IPMP):*** The IPMP is designed for early career principals in Idaho. This project is voluntary and will provide new to position principals multiple levels of support. The program hires highly distinguished principals and/or superintendents trained by the state to mentor school leaders. Principal mentors are assigned to principal mentees based on need and experience. Mentors coach leaders through the tasks of improvement with regular high-performance phone calls. Principal mentors are provided with a toolkit of mentoring resources and work with mentees to create a customized mentoring plan that focuses on developing the skills and dispositions in four critical areas of school level leadership: interpersonal and facilitation skills, teacher observation and feedback, effective school-level practices and classroom-level practices, and using data to improve instruction. Data collected in July 2017 showed that 100% of IPMP participants indicated satisfaction with the program and that it directly impacts their work. Moving forward, IPMP participation will be required for new principals serving in schools identified for comprehensive support and improvement.

***Idaho Career & Technical Education (CTE) Leadership Institute:*** Leadership Institute was developed to foster professional development and provide leadership training and opportunities for Idaho professionals in career and technical education. The goal is to train individuals to become local, district, or state-level administrators of career and technical programs. CTE programs in Idaho exist at the middle, secondary, and postsecondary levels, and workforce training exists in noncredit settings such as community colleges and correctional facilities. Each year applicants for Leadership Institute

**STATE DEPARTMENT OF EDUCATION**  
**AUGUST 10, 2017**

---

are nominated by a peer, supervisor, or other CTE administrator who recognize the leadership potential of the nominee. New selected members are placed into a cohort to join other cohorts in a rolling 27-month professional development journey that includes training on state and national policy, CTE funding and governance, administration of CTE programs and schools, introduction to national CTE professional associations and advocacy, and personal leadership discovery and growth. Professional staff at ICTE lead the cohorts and act as mentors for the Leadership Institute participants throughout their time in the cohort and beyond.

**Aligning Curriculum and Improving Instruction**

***Professional development and technical assistance from state content specialists:*** Idaho has a network of local teacher leaders and content specialists who provide high-quality professional development across the state. The Idaho Regional Mathematics Centers are housed within the colleges of education at each of Idaho’s four-year institutions of higher education: Boise State University, Lewis Clark State College, Idaho State University and University of Idaho. The staff of each Regional Mathematics Center provides both regional, district and school-specific support in mathematics education. Each center has developed and utilizes a systematic method to gauge regional, district or school needs and readiness in order to provide equal opportunity to services. To ensure a lasting change in Idaho educators’ instructional practice, center programs are of sufficient quality, duration and frequency.

The Idaho Content Literacy Coaches are a group of more than 600 teacher leaders who provide professional development on the Idaho Content Standards, along with lessons, units, and assessments aligned to the Idaho Content Standards. For schools identified as in need of comprehensive or targeted support and improvement, regional mathematics and literacy specialists provide job-embedded coaching.

For schools that are implementing mastery education, expertise from the Idaho Mastery Education Network will be a critical resource for implementing this important but challenging shift in how students learn and are assessed.

***Educator effectiveness coordinator:*** Educator effectiveness is a program that provides LEAs with standards, tools, resources, and support to increase teacher and principal effectiveness and consequently increase student achievement. ISDE’s and OSBE’s educator effectiveness coordinators integrate educator effectiveness policies and resources within Idaho’s statewide system of support. Schools identified for comprehensive or targeted support and improvement may utilize the educator effectiveness program for the following: integrating observation and evaluation into continuous school and LEA improvement; technical assistance and professional development on effective instructional strategies and interventions; and creating school and LEA improvement plans that integrate educator observation and evaluation practices with resources, strategies, assessments, and evaluation procedures that will adequately address the needs of all learners.

**Supporting English Learner Students**

Schools identified for comprehensive or targeted support and improvement may serve disproportionately high percentages of EL students compared with other schools in the state. ISDE is part of the WIDA Consortium and provides the following supports:

***Technical assistance with EL program design and implementation:*** The Idaho English Learner Program assists school districts with federal and state requirements of ELs. Program staff works with LEAs to create, implement, and maintain language development programs that provide equitable

**STATE DEPARTMENT OF EDUCATION**  
**AUGUST 10, 2017**

---

learning opportunities for ELs. The Idaho EL and Title III Program also provides support for all Idaho educators of EL students through professional learning opportunities that are intentionally designed based on evidence about student and teacher needs.

***Training on WIDA standards and technical assistance on aligning WIDA standards with RTI practices:*** The Idaho State EL and Title III Program partners with the WIDA consortium to provide training and technical assistance in implementing the WIDA standards and assessments for English language development and in using data to design and manage instruction and support for EL students.

### **Extended Learning Time**

Adjusting the frequency and intensity of interventions can be facilitated by the provision of extended learning time for students and educators. The state encourages LEAs to review school schedules for efficient use of available time and to ensure that available time is effectively used for instruction and academic intervention. LEAs are encouraged to determine how—within existing frameworks and resources—schools can provide interventions and supports beyond scheduled instructional time and how they might use school improvement funds to extend learning time beyond the school day. Additionally, LEAs are encouraged to evaluate and determine how extended professional learning time can be made available for educators within schools identified for comprehensive improvement.

### **Family and Community Engagement**

ISDE provides resources to support LEAs and schools in taking an evidence-based approach to involving families and the community in improving student outcomes.

***Family and community engagement coordinator:*** ISDE has built a system to engage parents within the improvement process. The family and community engagement coordinator identifies, plans, and implements methods that would support LEA leaders and their schools in engaging families and the community at large in the discussion of continuous school improvement.

***Family engagement tool:*** Idaho has collaborated with the Academic Development Institute, the parent organization for the Center on Innovation and Improvement, to provide the Family Engagement Tool (FET) as a resource to all Idaho schools. The FET guides school leaders through an assessment of indicators related to family engagement policies and practices. The resulting outcome is a set of recommendations that can be embedded in the school's improvement plan. As described on the FET website ([www.families-schools.org/FETindex.htm](http://www.families-schools.org/FETindex.htm)), the tool provides: a structured process for school teams working to strengthen family engagement through the school improvement plan; rubrics for improving LEA and school family engagement policies, the home-school compact, and other policies connected to family engagement; documentation of the school's work for the LEA and state; and a reservoir of family engagement resource for use by the school.

***Career & Technical Student Organizations (CTSOs):*** CTOS are an integral, co-curricular part of all CTE programs. They provide opportunities for students to learn and practice leadership skills in the classroom, the school, the community, and within their organization. CTOS members perform community service projects. They may also engage with business and industry community leaders during board meetings, fundraising, and CTOS conferences where the community leaders attend to act as judges for competitive events. CTOS are, in effect, the part of CTE programs that is visible to the community.

**STATE DEPARTMENT OF EDUCATION**  
**AUGUST 10, 2017**

---

**Technical Advisory Committees (TACs):** TACs support CTE programs by providing input on curriculum and projects, collaborating on and/or securing equipment and other program needs, and supporting the educators and schools where CTE programs are housed, as practical and appropriate. TAC members become involved not only for CTE programs but also the school and the community to advocate for program improvement and student success.

**Fiscal Management**

Idaho's Public School Finance Department provides technical support to LEAs. Finance department staff also prepares reports about revenues, expenditures, budgets, attendance and enrollment, staffing, and school property taxes with information provided by LEAs. For LEAs seeking support on fiscal management and budgetary issues, the State Assistance Team will help coordinate support from the finance department.

ICTE provides technical assistance and oversight to administrators, managers, and teachers regarding the funding distributed through its office. This funding includes, but is not limited to, CTE added-cost funds, career technical school funds, and Idaho Quality Program Standard grants for secondary programs, postsecondary program funding, and Perkins funding for middle, secondary, and postsecondary programs.

- f. Additional Optional Action. If applicable, describe the action the State will take to initiate additional improvement in any LEA with a significant number or percentage of schools that are consistently identified by the State for comprehensive support and improvement and are not meeting exit criteria established by the State or in any LEA with a significant number or percentage of schools implementing targeted support and improvement plans.

Not applicable.

5. Disproportionate Rates of Access to Educators (ESEA section 1111(g)(1)(B)): Describe how low-income and minority children enrolled in schools assisted under Title I, Part A are not served at disproportionate rates by ineffective, out-of-field, or inexperienced teachers, and the measures the SEA agency will use to evaluate and publicly report the progress of the State educational agency with respect to such description.<sup>5</sup>

ISDE created a cross-agency workgroup in 2015 to study the equitable distribution of educators across the state. ISDE worked to analyze educator experience, credentials, and need. The data analysis did not point to disparities in terms of the distribution of personnel who are working with low-income or minority students. The data analysis did identify a shortage of personnel and a higher than desired amount of inexperienced teachers across all areas. The findings became part of Idaho's Equity Plan submitted to the U.S. Department of Education on June 1, 2015, and sparked a statewide effort to study recruitment and retention.

As illustrated in the approved Equity Plan, Idaho has found that there is little to no correlation between student group and educator quality in the state. Instead, Idaho is working to address a general challenge with teacher recruitment and retention statewide, especially in Idaho's rural and remote school districts. Recruitment and retention of effective educators is a cornerstone focus in both school improvement (using state funds, supplemented by Title I-A school improvement funds) and Effective

---

<sup>5</sup> Consistent with ESEA section 1111(g)(1)(B), this description should not be construed as requiring a State to develop or implement a teacher, principal or other school leader evaluation system.

**STATE DEPARTMENT OF EDUCATION**  
**AUGUST 10, 2017**

---

Educators (Title II-A state activities and set-aside funds). The goal is to support educators at every level of the system.

In addition, the State Board of Education convened an educator pipeline workgroup in 2016, which is working to release recommendations for addressing Idaho's teacher recruitment and retention challenge this year (2017). This workgroup has representation from diverse stakeholder groups, including ISDE, teachers, school administrators, school board members, parents, and the business community.

For the purpose of regularly analyzing the rates at which low-income and minority students are taught by ineffective, out-of-field, and/or inexperienced teachers, the following definitions are used:

- Ineffective teacher:
  - Majority (50% +1 student) of his/her students have NOT met their measurable student achievement targets (pursuant to 33-1001, Idaho Code), or
  - Has a summative evaluation rating of unsatisfactory.
- Out-of-field teacher: not appropriately certificated or endorsed for the area in which he/she is teaching
- Inexperienced teacher: in his/her first year of practice
- Low-income student: from economically disadvantaged families
- Minority student: identified as a member of a minority race or ethnicity

Note that Idaho's ineffective teacher definition is in alignment with the requirements in the state's salary apportionment law (Career Ladder) found in 33-1001, Idaho Code for educators to advance on the compensation table.

Beginning with the 2017-2018 school year, ISDE will annually run data to analyze these rates and to assess whether or not low income and minority students are taught at a higher rate by teachers deemed to be ineffective, out-of-field, or inexperienced. If gaps arise or are identified, the ISDE will provide specific support and assistance to the building, LEA, and/or region where the disparity exists. Each LEA will identify and address any disparities that result in low-income students and minority students being taught at higher rates than other students by ineffective, out-of-field, or inexperienced teachers. Progress will be evaluated annually, as described in Idaho's Educator Equity Plan.

Information on rates at which low-income and minority students are taught by ineffective, out-of-field, and/or inexperienced teachers will be published annually on the ISDE website at:

<http://www.sde.idaho.gov/topics/ed-equity/index.html>.

6. School Conditions (*ESEA section 1111(g)(1)(C)*): Describe how the SEA will support LEAs receiving assistance under Title I, Part A to improve school conditions for student learning, including through reducing: (i) incidences of bullying and harassment; (ii) the overuse of discipline practices that remove students from the classroom; and (iii) the use of aversive behavioral interventions that compromise student health and safety.

Existing state supports will be leveraged to increase the impact of Title IV-A funds. After multiple years of stakeholder organizing and working with the Idaho Legislature, a law was passed during the 2015 session that increased the requirements of LEAs to address bullying and harassment including: ongoing professional development for all staff at the school building level, the expectation that all staff intervene when bullying/harassment occurs, the implementation of a graduated series of consequence for policy violators, and annual reporting of bullying incidents to ISDE.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

---

The Idaho Legislature has also appropriated \$4 million ongoing in formula funds to establish safe and drug free schools. These funds can be leveraged to establish optimal conditions for learning, improve school climate, implement special programs, and explore alternatives to suspension and expulsion. In an effort to maximize these resources and assist LEAs in implementing best practices, ISDE hosts an annual conference focused on the prevention of risk behaviors, out of school time programs, and family/community engagement called the *Idaho Prevention and Support Conference*. Approximately 700 school counselors, teachers, administrators (including charter and alternative), school resource officers, juvenile probation officers, judiciary representatives, school psychologists, and other stakeholders attend every year. Recent conference themes include addressing bullying/harassment and Adverse Childhood Experiences (ACEs). ISDE has focused heavily on ACEs as this research makes a strong case for trauma-informed disciplinary policy and practice.

Additionally, ISDE won a Garret Lee Smith grant focused on youth suicide prevention from the Substance Abuse and Mental Health Services Administration and implemented Sources of Strength (an evidence-based youth suicide prevention program) in select schools from 2014 through 2016. One outcome of this work was the Idaho Legislature’s establishment of the state’s first Office of Suicide Prevention in the Department of Health and Welfare with an appropriation of \$1 million and four new full-time staff positions to continue implementing the Sources of Strength program in schools. This program has demonstrated efficacy not only in preventing suicide but also a wide range of risk behaviors, as it focuses on developing internal strengths such as grit, resilience, hope, and connectedness.

These supports will be used to increase the impact of Title IV-A funds appropriated for LEA and ISDE efforts to address bullying and harassment. The strategies in Table 13 below already have a presence and existing supports in Idaho, and ISDE will encourage LEAs to use Title IV-A funds for these purposes if local data merits the need.

**Table 15: Strategies for addressing behavior, discipline, and bullying/harassment**

Strategy	Timeline	Funding sources
Idaho Prevention and Support Conference	Spring annually	Title IV-A
Support LEAs with existing initiatives: <ul style="list-style-type: none"> <li>• Positive Behavior Interventions and Supports (schoolwide, systemic approach to improved culture and supports based on data)</li> <li>• Restorative justice practices</li> <li>• Mentoring programs such as Big Brothers, Big Sisters</li> <li>• Alternatives to suspension/expulsion (special programs)</li> <li>• Sources of Strength (secondary level)</li> <li>• Good Behavior Game (primary level)</li> <li>• Suicide Prevention Gatekeeper Training</li> <li>• Youth Mental Health First Aid (mental health awareness)</li> <li>• Mental Health assessment and referral</li> <li>• Crisis response/de-escalation training for school staff</li> <li>• School nurse position with accompanying student health room</li> <li>• Wellness programs (Coordinated School Health)</li> <li>• Multi-tiered systems of support</li> </ul>	Ongoing	Title IV-A

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

Strategy	Timeline	Funding sources
<ul style="list-style-type: none"> <li>• Development of risk/threat assessment protocols and policies</li> <li>• Parenting programs such as Nurturing Parenting</li> <li>• Child sexual abuse prevention initiatives such as Stewards of Children</li> </ul>		

The ISDE will also access—and encourage LEAs to access—the expertise of the regional Equity Assistance Center funded by the U.S. Department of Education to promote greater understanding of equity and to ensure equal access to educational opportunities for all students, regardless of race, ethnicity, gender, or national origin.

7. School Transitions (*ESEA section 1111(g)(1)(D)*): Describe how the State will support LEAs receiving assistance under Title I, Part A in meeting the needs of students at all levels of schooling (particularly students in the middle grades and high school), including how the State will work with such LEAs to provide effective transitions of students to middle grades and high school to decrease the risk of students dropping out.

The ISDE was deliberate in including a wide range of stakeholders in informing this Consolidated State Plan, in particular, the Title IV part A section includes feedback from representatives focused on suicide prevention, foster youth, homeless youth, families living in poverty, drop-out prevention, children of military families, rights of disabled students, Native American advocacy, neglected youth, migratory families and English learners.

**Increasing Opportunities and Outcomes for College and Career:** Idaho has a single State Board of Education that oversees its entire P–20 education system. This structure promotes consistency and allows for strategic planning across the entire P–20 education continuum, from kindergarten through college or career attainment. The SBOE sets benchmarks for the percentage of Idaho students graduating from high school, attending postsecondary institutions, and completing college and/or being ready to assume careers. Examples of the implementation of these goals include the support for advanced opportunities (with specific goals for the percentages of students completing advanced opportunities), Next Steps Idaho, which provides web-based guidance through the admissions process and funding streams, as well as efforts at the high school level, such as Idaho College Application Week.

Several committees and taskforces in Idaho are also working to create a seamless transition from high school to college and career. The Governor’s Higher Education Taskforce and Workforce Development Taskforce, convened by the SBOE, which include representatives from diverse stakeholder groups, are working to generate recommendations to further improve Idaho’s effort. The SBOE also adopted a statewide definition of college and career readiness in June 2017, which will be operationalized with college and career readiness standards for high school students that are now in development.

**Transition to School:** Idaho does not currently offer state-sponsored prekindergarten, although some LEAs use their Title I and local funds to support this effort. Transitions from prekindergarten to kindergarten are clearly articulated in the State Special Education Manual for students with disabilities. This guidance also addresses student progress through the grade continuum.

Idaho assesses all K–3 students on foundational literacy skills at least twice per year. Any student who is identified as “at risk” must receive a minimum of 30 hours (if slightly below grade level) or 60 hours (if below grade level) of additional intervention. The intervention must meet the evidence-

**STATE DEPARTMENT OF EDUCATION**  
**AUGUST 10, 2017**

---

based standard, and LEAs must write plans and identify progress annually to the state. During the 2016 session of the Idaho Legislature, funding for the intervention was increased from approximately \$2 million to \$9.3 million. During the 2017 legislative session, funding was increased again to \$11.4 million.

**Middle Level:** Idaho recognizes that decisions about college and career are often made prior to high school. To this end, the Middle-Level Credit System was instituted in May 2007 with the purpose of improving rigor, relevance, and relationships in the middle grades; identifying pockets of success throughout Idaho to develop best practices for all middle schools; and ensuring every Idaho student is prepared to be successful in high school and beyond. The Middle-Level Credit System focuses on five key areas: student accountability, middle-level curriculum, academic intervention, leadership among staff at the middle level, and student transitions between the middle and high school grades. This system provides the flexibility for LEAs to meet the unique needs of their students while maintaining quality and rigor.

In addition, 8<sup>th</sup> graders are required to complete learning plans for high school and beyond before transitioning to 9<sup>th</sup> grade. The state has developed a career information system for middle school and high school students that enables a student to learn about the skills and dispositions required in a wide range of jobs and professional fields. Eighth grade students also have access to college and career advisors, in which Idaho has invested heavily in recent years.

**High School:** ISDE supervises K–12 education and has identified priorities that are aligned with the vision of SBOE. The first goal of ISDE’s plan is ensure that all Idaho students persevere in life and are ready for college and careers. Every high school student is required to take a set of required courses, and every junior has the opportunity to take a nationally recognized college admission assessment, currently the Scholastic Aptitude Test, which is paid for by the state.

The legislature has appropriated state funds for students to offset costs associated with college entrance exams, dual credit, Advanced Placement, International Baccalaureate, and overload courses. Each student is eligible for \$4,125.00 to use beginning in 8<sup>th</sup> grade. Idaho’s dual credit participation has increased dramatically in recent years, with more students entering a two- or four-year university with transferable credits toward major or general education requirements. Thirty-two percent of high school students participated in Advanced Opportunities during the 2015-16 school year, which grew to 47% of high school students in 2016-17.

**Career Technical School (CTS):** ICTE oversees special CTE schools, referred to Career Technical Schools. These schools are designed to provide high-end, state-of-the-art technical programs and also meet certain other requirements in addition to the requirements of CTE programs in comprehensive high schools, such as field experiences and enrollment from multiple high schools. Career Technical Schools must also provide postsecondary alignment for all of their programs, giving students the opportunity to earn technical competency credits at Idaho postsecondary institutions with similar CTE programs.

**Alternative Schools:** Idaho’s alternative schools help students find success through a personalized approach. The supports and flexibility provided to alternative schools emphasize the specific needs of at-risk students. The alternative schools specifically work with students in grades 6-12 who are transitioning from elementary to middle/junior high and middle/junior high to high school in order to help them be successful at the next level.

Students enrolled in alternative schools in Idaho receive additional support not always found in traditional secondary schools. This may include assigning fewer classes per day and tailoring

**STATE DEPARTMENT OF EDUCATION**  
**AUGUST 10, 2017**

---

instruction to students' individual needs. Students are provided the opportunity to attend summer school in order to make up credits or to get a head start on the coming school year. In addition to the academic requirements, alternative schools are required to provide services based on student needs, including daycare centers for students who are parents and direct social services such as social workers and specialized counselors and psychologists.

ISDE provides specific support for alternative schools, in addition to what is provided to traditional secondary schools. In order to provide specialized instruction and additional supports, alternative schools are provided more funding per student than a traditional secondary school. Alternative schools are also reimbursed for the cost of providing summer school. Alternative schools are invited to participate in the Idaho Prevention and Support Conference and are encouraged to participate in a strand of workshops specifically focused on alternative school best practices and needs. They have also been specifically targeted to participate in programs that provide innovative instructional practices, such as the Idaho Mastery Education Network.

**English Learners:** ISDE supports the efforts of LEAs to help English learner students (ELs) gain English proficiency while simultaneously meeting challenging state academic content and student academic achievement standards. The Idaho English Learner Program assists LEAs with federal and state requirements related to ELs. The program helps LEAs create, implement, and maintain language development programs that provide equal learning opportunities for ELs. The goal is to develop curricula and teaching strategies that embrace each learner's unique identity to help break down barriers that prevent ELs from succeeding in school.

The Idaho State EL and Title III Program provides support for all Idaho educators of ELs through professional learning opportunities that are intentionally designed based on the timely needs of EL educators. We recognize that as the number of ELs grows, all educators must be mutually responsible for the language development and academic success of ELs and, therefore, all teachers are language teachers. Partnerships with Idaho's institutes of higher education are essential for incorporating components of EL education into preservice teacher education in an effort to prepare teachers with appropriate instructional strategies for the ELs in their classrooms.

**Students with Disabilities:** The ISDE Special Education Department works collaboratively with LEAs, agencies, and parents to ensure students with disabilities receive quality, meaningful, and needed services. The department has program coordinators for dispute resolution, funding, program monitoring, results-driven accountability, special populations, secondary transition, and data management. The department also works collaboratively with the Special Education Support and Technical Assistance (SESTA) project through Boise State University. SESTA provides statewide professional development, training, and support to LEA leaders, teachers, and paraprofessionals who support students with disabilities.

**Next Steps:** Despite the significant steps taken to create purposeful alignment from preschool to college, the state recognizes the need for additional supports at critical transitions, such as elementary to middle school and middle school to high school. During the 2017–18 school year a task force comprising LEA leaders with transition plans in place, SBOE staff, and ISDE program coordinators will be convened to provide guidance to all LEAs, schools, and families on creating systems of support for students.

The State Board of Education has set a goal that 60% of Idahoans ages 25-34 will have some sort postsecondary degree or certificate. While there is much work to be done to meet or exceed this goal, the state is committed to providing high quality educational opportunities and outcomes for all Idahoans.

## **B. Title I, Part C: Education of Migratory Children**

1. Supporting Needs of Migratory Children (*ESEA section 1304(b)(1)*): Describe how, in planning, implementing, and evaluating programs and projects assisted under Title I, Part C, the State and its local operating agencies will ensure that the unique educational needs of migratory children, including preschool migratory children and migratory children who have dropped out of school, are identified and addressed through:

### **Planning**

***State Comprehensive Needs Assessment Process:*** As part of the continuous improvement cycle, Idaho completed a new Comprehensive Needs Assessment (CNA) spring 2016, based on the Office of Migrant Education Comprehensive Needs Assessment Toolkit. This process included stakeholders, appropriate ISDE and LEA staff, and parents. Results of the needs assessment surveys for staff, parents, and secondary students provided a snapshot of perceived needs from the stakeholders most directly involved in the education of migrant children and from the children themselves. Intensive analysis of student performance data also informed the process. Finally, Parent Advisory Council (PAC) feedback throughout the process provided ongoing parent insight into student and family needs, especially those of preschool students and out-of-school youth. The CNA is the foundation of the Service Delivery Plan (SDP) and its measurable program outcomes and objectives.

***LEA Comprehensive Needs Assessment Process and Toolkit:*** ISDE provides tools to the LEAs for performing local needs assessments. The Idaho needs assessment surveys, suggestions for conducting a local CNA, and strategies for collecting and reporting needs data are found in the Idaho LEA Migrant Education Program (MEP) Comprehensive Needs Assessment Toolkit. The toolkit can be found on the Migrant webpage under Resource File in Migrant Services <http://www.sde.idaho.gov/el-migrant/migrant/index.html>. LEAs are provided with technical assistance in performing the CNA process and are monitored to ensure that local needs assessments are taking place.

***State Service Delivery Plan:*** Idaho completed a new Service Delivery Plan in the spring of 2017 based on concerns raised in the Comprehensive Needs Assessment that included migrant stakeholders. All migrant funded LEAs have received new Measurable Program Objectives (MPOs) and have provided assurances to the Idaho MEP through the consolidated grant application process that they will work to implement the strategies and evaluate the results as measured by the MPOs. Data is collected at the end of the performance period from every project LEA, showing their self-evaluation of their progress at meeting the MPOs. The Idaho MEP will aggregate this data to evaluate the progress of the Idaho MEP at serving the unique needs of migrant students.

### **Implementation**

The State Department of Education implements the Service Delivery Plan through the Consolidated Federal and State Grant Application completed by LEAs each year, which includes the MPOs from the state Service Delivery Plan. In Idaho, one-third of LEAs have small migrant programs and receive minimal funding, therefore MPOs that are more appropriate to larger programs are optional for smaller programs. LEAs select which of the optional MPOs they will implement for the coming year. Required MPOs are pre-selected for all LEAs. LEAs then briefly describe their plan for implementing each MPO selected in the grant application.

**STATE DEPARTMENT OF EDUCATION**  
**AUGUST 10, 2017**

---

**Evaluation**

Idaho has a Migrant Student Information System, created by in-house developers. In this system, each LEA reports whether or not it has achieved the selected MPO from the submitted consolidated plan. They also report supporting information for each MPO. LEAs are required to submit this information in the fall so services delivered in the summer may be included. ISDE uses this data to evaluate the overall program success at meeting MPOs and for analyzing the Service Delivery Plan and data collection methods for needed revisions.

In addition, Idaho has a three-year cycle of monitoring that includes a site visit, interviews with parents, secondary students, teachers, the family liaison, administrators, the local migrant director and business manager. Monitoring occurs as a consolidated process with all federal programs represented. The migrant program also conducts informal monitoring of migrant summer school programs through site visits. Each LEA that offers a summer program is visited at least once every three years.

- i. The full range of services that are available for migratory children from appropriate local, State, and Federal educational programs;

It is critical that migrant students in Idaho have equal access to all appropriate local State, and Federal programs in addition to supplemental MEP services designed to meet the Measurable Program Outcomes (MPOs) identified in the Service Delivery Plan (SDP).

In order to ensure that this takes place, the Idaho MEP has a two-pronged approach. First, ISDE MEP staff has provided, and continues to provide, intensive training and technical assistance to LEAs to ensure that they do not use migrant funds to provide services to migrant students that they would normally be eligible to receive, regardless of migrant status (supplanting). By ensuring that LEAs understand that migrant funds must be used after other programs provide services, we ensure that migrant students receive every service that they are entitled to under other programs, in addition to migrant services.

Second, collaboration by migrant and other program staff at both a state and local level is a clear expectation shared with local migrant directors in training and is part of the ISDE monitoring process. State monitoring includes an indicator that requires proof that LEA migrant staff are in collaboration with other local, State and Federal educational programs, including Title I-A, III-A, McKinney-Vento and others. Indeed, many Idaho LEA migrant programs are small enough that the family liaison is the only migrant staff person. He or she often provides services through advocacy (support services) both within the school and in the community, ensuring that the children receive the services they need from school, health and other social services in the community (referred services). This collaboration ensures that migrant students' needs are addressed in schools by multiple programs.

Services provided to preschool-aged students are included in three MPOs in the category of School Readiness. Since Idaho does not have state-funded preschool, LEAs generally do not serve these students through local, State and other Federal programs. In Idaho, Migrant funds may be used to pay fees for migrant students to attend developmental preschool programs as peer models, who would not otherwise be able to attend. Some LEAs with larger migrant populations provide preschool as a site-based migrant preschool. Other LEAs offer programs including home visits with materials and training provided to parents. Many LEAs offer preschool services through summer programming.

Idaho uses materials developed by the Office of Migrant Education's Consortium Incentive

**STATE DEPARTMENT OF EDUCATION**  
**AUGUST 10, 2017**

---

Grant (CIG) “Solutions for Out of School Youth” (SOSY), including the OSY Profile adapted for Idaho. LEAs fill out this profile gathering data on the needs of the out of school youth and dropouts and provide referrals to other agencies, such as the High School Equivalency Program (HEP), agencies that can provide training opportunities, and social and health services to these youth. These profiles are submitted to the ISDE. In addition, the state provides MP3 players with intensive English curriculum for LEAs to use with out of school youth and dropouts who need help with learning English.

- ii. Joint planning among local, State, and Federal educational programs serving migratory children, including language instruction educational programs under Title III, Part A;

The state models collaboration with joint planning of Title I-C and Title III. Title III, Title I-C, and State EL are part of one department at the ISDE. Starting fall of 2017-2018 the working group that collaborated on the recent Comprehensive Needs Assessment and Service Delivery Plan will continue as an advisory panel to the Idaho MEP. This group will be combined with the EL advisory panel as many of the members of each group work with overlapping populations. We will establish a method of rotating members over time and will include State and LEA federal programs staff, family liaisons, K-12 teachers, migrant preschool teachers, parents, and representatives from other agencies who work with migrant families, including the High School Equivalency program (HEP), College Assistance Migrant Program (CAMP) and Migrant Seasonal Head Start (MSHS). Other possible members include representatives from the Idaho Commission on Hispanic Affairs, Institutes of Higher Education, and the State Board of Education. This collaborative group will address concerns and provide advice to continue program development.

LEAs are trained to coordinate Title I-C with Title III in parent outreach, parent advisory councils (PACs), and afterschool programming. For example, LEAs are trained to include migrant program staff in planning and implementing of non-migrant programs to ensure that migrant students are a priority and that those programs meet migrant students’ needs. Since many migrant families also use a language other than English in the home and have children who are designated as English learners, these families provide planning, implementing and evaluative feedback to LEAs for both programs.

- iii. The integration of services available under Title I, Part C with services provided by those other programs; and

After identifying the needs of migrant students, migrant staff also assesses the availability of non-migrant programming to meet those needs and use migrant funds to provide supplemental programs that meet unmet needs. For example, Idaho does not provide state-funded preschool, so migrant LEAs have implemented a variety of preschool programs, including summer programs, to meet the school readiness needs of our migrant children. In cases where other programs offer services, the migrant programs in LEAs support migrant families by enhancing home school communication and by advocating for migrant students and families to participate in all other programs.

- iv. Measurable program objectives and outcomes.

This section outlines how Idaho’s Measurable Program Outcomes (MPOs) will produce statewide results through specific educational or educationally-related services. The MPOs will allow the Migrant Education Program (MEP) to determine whether, and to what degree, the program has met the unique educational needs of migrant children and youth as identified through the Comprehensive Needs Assessment (CNA). It should be noted that some MPOs are required of all project LEAs, while others are optional. This determination is made by the ISDE staff in order to

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

accommodate funded LEAs that serve very few students through mainly providing non-instructional support and referred services.

<b>School Readiness</b>		
Measurable Program Outcomes (MPOs)	Key Strategies	LEA Options
1.1) By the end of program year 2017-2018, 80% of migrant parents attending parent involvement activities will report on a pre/post survey that they have an increased ability to support school readiness activities in the home.	1.1) Provide migrant parents with ideas, activities, and materials for use at home with their children to promote first language development and school readiness through site-based or home-based family literacy opportunities (e.g., language acquisition, packets with school supplies, books, and activities).	Required
1.2) By the end of program year 2017-2018, 90% of students attending at least 40 hours of migrant preschool will show a gain on a pre/post-test of school readiness skills.	1.2) Provide migrant funded site-based preschool services to migrant children ages 3- 5 (e.g., during the regular school day, as an evening program, or as part of a summer school program).	Optional
1.3) By the end of program year 2017-2018, 30% of all identified migrant-eligible preschool-aged children will be served.	1.3) Participate in the activities of the Preschool Initiative Consortium Incentive Grants (CIG) and share materials, strategies, and resources with migrant families.	Optional

<b>English Language Arts Achievement</b>		
Measurable Program Outcomes (MPOs)	Key Strategies	LEA Options
2.1) By the end of program year 2017-2018, 80% of migrant K-2 students will receive resources to promote early literacy as measured by resource distribution logs.	2.1) Provide resources through migrant funds to promote early literacy (e.g., extended day kindergarten, backpacks and school supplies, family literacy nights and opportunities, individual libraries, migrant summer school expeditionary opportunities, tutoring, after school programs).	Optional
2.2a) By the end of program year 2017-2018, 80% of migrant students who participate in an extended school service taught by qualified migrant staff will show gains of at least 20% or grade level proficiency on a pre/post assessment of grade-level ELA skills for students in grades 3-12.	2.2 Use qualified staff to provide supplemental ELA extended school services aligned with state standards and proficiencies (e.g., summer school for ELA, IDLA-advancement, Plato, dual enrollment, community colleges, academies offered by Institutes of Higher Education (IHEs), Portable	Optional

community healthcare providers and public health agencies will be established to provide health services to migrant families.	the regional health district) and public health agencies to provide health services to migrant families, such as Memoranda of Understanding.	
5.4) By the end of program year 2017-2018, 80% of migrant parents participating in parent involvement activities will report on a pre/post survey that they have an increased understanding of how to access community health services.	5.4) Provide information on, and referrals to, individualized health advocacy services to benefit migrant families needing health services (e.g., glasses, dental, immunizations).	Required

2. Promote Coordination of Services (*ESEA section 1304(b)(3)*): Describe how the State will use Title I, Part C funds received under this part to promote interstate and intrastate coordination of services for migratory children, including how the State will provide for educational continuity through the timely transfer of pertinent school records, including information on health, when children move from one school to another, whether or not such move occurs during the regular school year.

ISDE continues to participate in the Migrant Student Information Exchange (MSIX) Data Quality Initiative. Idaho ensures that accurate and complete records are being uploaded to MSIX in order to give liaisons access to up-to-date information on students' academic risk and progress. Further, training has been provided and will continue to be provided in using MSIX information to better serve migrant students. LEAs also receive training in accessing data from Idaho's Migrant Student Information System (MSIS), which provides extensive information on Idaho migrant students, facilitating intrastate transfer of records.

**Table 16: Migrant Student Information Exchange agreements**

Intrastate Coordination and Records Transfer	Interstate Coordination and Records Transfer
<ul style="list-style-type: none"> <li>• Idaho's MSIS includes individual immunization records with dates and health alerts</li> <li>• MSIS includes historical information on all Idaho assessments including the Idaho Reading Indicator, Idaho Standards Achievement Tests of English language arts and math and English language proficiency assessment (ACCESS)</li> <li>• MSIX Consolidated Records includes course history</li> </ul>	<ul style="list-style-type: none"> <li>• MSIX Consolidated Records report for assessments, course history, and move history</li> <li>• MSIX for Move Notifications</li> <li>• MSIX for Data Requests</li> </ul>

As part of its consolidated plan, each LEA must complete the following question: "Describe the LEA's coordination efforts with other agencies, including the timely transfer of student records." As part of this question, LEAs must describe "How does the LEA ensure that students who move are served right away in their new LEA (i.e., MSIX, phone calls)?" Acceptable responses must

**STATE DEPARTMENT OF EDUCATION**  
**AUGUST 10, 2017**

---

include both MSIX notifications and direct communications with receiving LEAs.

In the event that an MSIX Data Request is received at a time of year when the family liaison and regional ID&R coordinator are not available (school breaks), the request will escalate to the Idaho MEP and data will be provided directly to the requestor by state migrant staff.

Idaho's MEP promotes intrastate and interstate coordination by participating in the following:

- ISDE collaborates with the Community Council of Idaho, Idaho's Migrant Seasonal Head Start provider to create a Memorandum of Understanding completed by LEAs with the local Head Start every two years to promote recruiting and services provided to preschool students.
- ISDE MEP staff and many LEA staff participate in the National Association of State Directors of Migrant Education (NASDME) conference annually.
- ISDE MEP Director attends NASDME General Membership meetings to collaborate with other State MEP Directors.
- ISDE MEP Director and staff attend Migrant Annual Director's Meeting (ADM) to learn and collaborate from Office of Migrant Education (OME) and other State MEP Directors.
- The state provides statewide Parent Advisory Council (PAC) meetings six times per year in the fall and spring in three locations across the state.
- Idaho's MEP director is the northwest regional representative to the Collaboration Work Group (CWG) with the Office of Migrant Education. Although new to this role, she will share information from the CWG with MEP Directors in the northwest region and serve as an advocate for the needs of these states.
- The Idaho MEP provides training/collaboration meetings to migrant directors across the state three times per year.
- The ISDE organizes a biannual Federal Programs Conference that provides information, training, and opportunities for collaboration among LEA and ISDE staff regarding all federal programs and special education.
- The state participates in the Bi-National program and contracts with an experienced person to administer the program. LEAs use the Mexican Transfer Document to ensure that students leaving the United States to Mexico will be able to register their students in school.

1. Use of Funds (ESEA section 1304(b)(4)): Describe the State's priorities for the use of Title I, Part C funds, and how such priorities relate to the State's assessment of needs for services in the State.

Title I, Part C Funds are used to implement the strategies identified in our service delivery plan in order to meet the Measureable Performance Outcomes. Funding is also used to support parent advisory councils and other parent involvement activities at both the state and local level. Finally, funds are used for statewide efforts in identification and recruitment of migrant children and youth. The State's Comprehensive Needs Assessment completed in 2016-2017 defines concerns and proposed solutions. The Service Delivery Plan responded to the concerns and incorporated proposed solutions to create appropriate strategies and Measurable Performance Outcomes.

### **C. Title I, Part D: Prevention and Intervention Programs for Children and Youth who are Neglected, Delinquent, or At-Risk**

1. Transitions Between Correctional Facilities and Local Programs (ESEA section 1414(a)(1)(B)): Provide a plan for assisting in the transition of children and youth between correctional facilities and locally operated programs.

Procedures based on the needs of the student, including the transfer of credits that such student earns during placement; and opportunities for such students to participate in credit-bearing coursework while in secondary school, postsecondary education, or career and technical education programming for each of the two types of programs Title I-D Subpart 1 and 2 are outlined below. The state will place a priority for such children to attain a regular high school diploma, to the extent feasible. The ISDE has established the following procedures to ensure the timely re-enrollment of each student who has been placed in the juvenile justice system in secondary school or in a re-entry program

Idaho has two state agency programs under Title I, Part D Subpart 1. The Idaho Adult Correctional Program and the Idaho Juvenile Correctional Program and both are required to annually identify in Idaho's yearly application (Consolidated Federal and State Grant Application, or CFSGA) transition activities that take place at their respective programs and meet the 15 to 30 percent reservation of funds for re-entry or transition services as required by law. Both programs are required to provide a detailed explanation on how the facility will coordinate with counselors, school districts, and/or postsecondary educational institutions or vocational/technical training programs in assisting students' transition.

Under Title I, Part D Subpart 2 Idaho has twenty-four local programs, serving either neglected or delinquent students. Subpart 2 programs are required to provide transitional services (although no specific funding percentage like is described in Subpart 1 programs is required since it is not outlined in the law) to assist students in returning to locally operated schools and to promote positive academic and vocational outcomes for youth who are neglected and/or delinquent. These Subpart 2 programs are also required to annually identify in Idaho's CFSGA their transition services.

In the fall of 2017, ISDE will add information on best practices and tools on the state web site for youth returning from correctional facilities or institutions for neglected or delinquent children and youth. The tools and professional development for facilities to implement a support system to ensure their continued education and the involvement of their families and communities will be conducted and completed by April 2018.

Upon a student's entry into the Neglected, Delinquent or At-Risk facility, the staff will work with the youth's family members and the local educational agency that most recently provided services to the student (if applicable). This process will include ensuring that the relevant and appropriate academic records and plans regarding the continuation of educational services for such child or youth are shared jointly between the facility and LEA in order to facilitate the transition of such children and youth between the LEA and the correctional facility. The facility will consult with the LEA for a period jointly determined necessary by the facility and LEA upon discharge from that facility, to coordinate educational services so as to minimize disruption to the child's or youth's achievement.

2. Program Objectives and Outcomes (ESEA section 1414(a)(2)(A)): Describe the program objectives and outcomes established by the State that will be used to assess the effectiveness of the Title I, Part D program in improving the academic, career, and technical skills of children in the program.

**STATE DEPARTMENT OF EDUCATION**  
**AUGUST 10, 2017**

---

**Objective 1:** Title I, Part D programs will provide for individualization of instructional experience beginning with an intake process that includes an identification of each student's academic strengths and weaknesses in reading and math. Outcome: Each Title I, Part D program will provide educational services for children and youth who are neglected or delinquent to ensure that they have the opportunity to meet challenging State academic content and achievement standards.

**Objective 2:** Title I, Part D programs will ensure that all neglected and delinquent students accrue school credits that meet state requirements for grade promotion and secondary school graduation. Outcome: Each Title I, Part D program will pre and post-test each student using a standards-based test to determine academic growth during the student's placement in the academic program.

**Objective 3:** Title I, Part D programs will ensure that all neglected and delinquent students have the opportunity to transition to a regular community school or other education program operated by an LEA, complete secondary school (or secondary school equivalency requirements), and/or obtain employment after leaving the facility. Outcome: Title I, Part D programs will annually report on the types of transitional services and the number of students that have transitioned from the facilities to the regular community schools or other education programs, completed secondary school (or secondary school equivalency requirements), and/or obtained employment after leaving the facility.

**Objective 4:** Title I, Part D programs will ensure (when applicable) that neglected and delinquent students have the opportunity to participate in postsecondary education and job training programs. Outcome: Title I, Part D programs will annually report on the number of neglected and delinquent students who were given the opportunity to participate in postsecondary education and job training programs.

## **D. Title II, Part A: Supporting Effective Instruction**

1. Use of Funds (*ESEA section 2101(d)(2)(A) and (D)*): Describe how the State educational agency will use Title II, Part A funds received under Title II, Part A for State-level activities described in section 2101(c), including how the activities are expected to improve student achievement.

### **State Level Activities – Administrators and Libraries**

***Idaho Principal Mentoring Project:*** According to the 2012 Rand Corporation (Burkauser, et. al, 2012) study on first year principals, “improving the principal placement process to ensure that individuals are truly ready for and supported in their new roles could have important implications for student achievement—particularly in low-performing schools.” The Idaho Principal Mentoring Project seeks to provide this support with the ultimate goal of principal retention and increased student achievement.

Title II-A funds are used to implement the Idaho Principal Mentoring Project ( ), which was a new program in 2016-2017 and designed for early career principals. See section A(4)(viii)(e) of the plan for a complete description of the IMPM. The project provides another level of support to those entering a leadership position. While participation has been voluntary, new principals serving in schools identified for comprehensive support and improvement will be required to take advantage of the program. In 2016-17, 20 principals participated, and approximately 30 principals will participate in 2017-18.

Whereas the Idaho Building Capacity (IBC) project (see section A(4)(viii)(e) of this plan) is designed to build local capacity at a systems level, IPMP is designed to provide one-on-one mentoring to new leaders. The mentors are highly distinguished principals or superintendents, selected and trained by the state to mentor new school leaders. A needs assessment administered to mentees and principal mentors determines the assignment of principal mentors to mentees based on need and experience. Mentors coach new leaders through the tasks of improvement with regular structured virtual or in-person check-ins. Each mentor/mentee team creates a customized mentoring plan that focuses on developing the skills and dispositions in four critical areas of school level leadership: interpersonal and facilitation techniques, teacher observation and feedback, effective school-level and classroom-level practices, and the use of data to improve instruction. The program has two main objectives: to increase the rate of effectiveness of new administrators and to decrease turnover among rural and struggling schools.

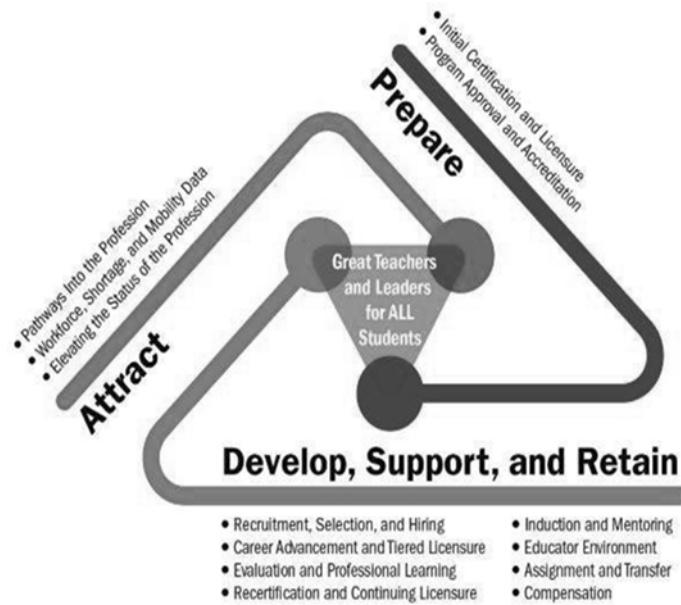

***Support for School Libraries:*** Title II-A funds are used to partner with the Idaho Commission for Libraries to expand the annual Idaho School Libraries professional development. In schools where full-time school librarians are properly trained and supported, students achieve at significantly higher levels than students in schools with no full-time librarian (see: School Libraries Work! A Compendium of Research Supporting the Effectiveness of School Libraries). Title II-A funds will ensure more librarians are able to benefit from this valuable training, and more students will have access to a trained school librarian.

### **State Level Activities – Educators**

The Idaho State Board of Education established an Educator Pipeline Work Group in 2016 to explore teacher pipeline issues across the state. Some of the early recommendations are aligned to allowable Title II-A projects. The Talent Development Systems graphic below, produced by American Institutes for Research (AIR), illustrates a three-pronged approach to addressing teacher shortages that guides Idaho’s work.

STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017

---

In order to address teacher retention the Work Group first recommends increased professional development opportunities and support for teachers across the continuum, including induction programs, evaluation feedback for the purpose of professional growth and learning, and teacher leadership pathways. The following state level activities are aligned with these goals:

***Continued Support for the Idaho Instructional Framework:*** Title II-A funds are used to support training and deepen understanding of Idaho’s Instructional Framework through in-person workshops delivered around the state. A new approach under the flexibility of ESSA will be to deliver more of this training directly to LEAs in rural parts of the state. Workshops may include but not be limited to the following:

- Advanced Instructional Coaching Using the Framework for Teaching
- Calibration and Collaborative Self-Assessment of Observation Skills
- Data Literacy Using Assessment in Instruction
- Designing a Quality Teacher Evaluation Model
- Engagement for Student Learning
- Exploring Domains 1 and 4 of the Framework for Teaching
- Introduction to the Framework for Teaching and Deeper Understanding
- Instructional Coaching Using the Framework for Teaching
- Instructional Rounds
- Learning-Focused Conversations
- Mentoring Using the Framework for Teaching
- Observation Skills Using the Framework for Teaching
- Special Education: Introduction to the Framework for Teaching
- Special Education: Observation Skills Using the Framework for Teaching
- State of Idaho Framework Facilitators, Level 1
- Talk About Teaching: Clustering the Components

Facilitated conversations around the state’s instructional framework – dialogue among teachers, instructional coaches, mentors, peer coaches, consulting teachers, preservice teachers, cooperating teachers, administrators, higher education faculty, teacher leaders, superintendents, and other district

**STATE DEPARTMENT OF EDUCATION**  
**AUGUST 10, 2017**

---

leaders – creates opportunities for deeper collaboration in and across the education system, impacting teacher growth and ultimately student achievement.

***Mentoring and Coaching:*** In 2013 the Governor’s Task Force for Improving Education made 21 Recommendations creating a strategic plan for education systems across the state. One of these recommendations was that each district develop a mentoring and induction program for the support of new teachers based on the Idaho Mentor Program Standards. Recommendations put forth in 2017 from the Educator Pipeline Work Group echoed the call, and outlined an even greater need since moving to a certification system in which new teachers have three years to move from Residency to Professional status.

Comprehensive induction and mentoring programs have been associated with first-year teachers showing student performance gains equivalent to those of fourth-year teachers who did not have this support (Strong, 2006). Though Title II-A funds alone will not be sufficient to establish robust mentoring and induction programs statewide, ISDE and the State Board of Education will investigate how we may use Title II-A funds to support and expand upon the foundation that is in place with the goal of increased student learning. See Appendix D for additional research supporting a focus on educator mentoring.

An AIR policy brief published in May 2014 (Potemski & Matlach, 2014) noted that effective state induction policies include program standards to establish consistent expectations for mentoring and induction activities across the state. In 2009 the State Board of Education, in conjunction with ISDE, established and published such standards. Using these standards to provide a vision and guidelines for local planners to use in the design and implementation of a high-quality mentoring program for beginning teachers, the state hopes to increase the number of effective induction programs in every region of Idaho. Partnering with higher education institutions, Title II-A funds would allow university partners to facilitate induction support for new teachers in high need LEAs across the state of Idaho. Faculty from higher education institutions in Idaho (public and private, four-year and two-year) are interested in the performance of their graduates in their early years of teaching. Investigating new teacher performance serves two main goals: continuous improvement for educator preparation programs and the identification of key supports for new teachers in terms of induction communities, practice, strategies, and outcomes. This project would study how the structures of one induction program in identified high need LEAs influences teacher performance and PK-12 student learning to inform future programs.

Additionally, the state strongly encourages and supports LEAs using Title II-A funds to recruit and train mentors within those LEAs identified for comprehensive and targeted support.

**LEA Optional Use of Funds Aligned with State Level Activities**

The uses of funds described below are not required of LEAs but are encouraged as we work to attract and certify more teachers for Idaho’s classrooms. The Educator Pipeline Work Group has supported the development of alternative paths to certification that will not sacrificing rigor.

***Grow Your Own:*** Idaho is experiencing teacher shortages in various content areas and geographic areas, and especially in rural parts of the state. To ensure that LEAs with schools identified for comprehensive and targeted support are fully staffed by effective educators, ISDE encourages LEAs use of Title II-A funds to embrace Grow Your Own programs. LEAs can actively recruit current classified staff (paraprofessionals) into the teaching profession, using Title II-A funds to support them in their attainment of full certification. In addition, the state recognizes the need for more teachers and leaders of color, and is committed to increasing the number of American Indian and Hispanic/Latino

**STATE DEPARTMENT OF EDUCATION**  
**AUGUST 10, 2017**

---

teachers and recommends that LEAs support the full certification of teachers of color through available routes.

Idaho currently provides financial support for concurrent high school and college credit but, at present, no courses are offered that fulfill requirements for an education degree. While Idaho explores increasing the opportunities for high school students in this area, ISDE is investigating scholarship opportunities for high school students who commit to teaching in high-need areas for a designated amount of time.

### **Partnership Supports**

Idaho Division of Career and Technical Education (ICTE) offers a program to recruit and retain career and technical education (CTE) teachers who have qualified for endorsements in a CTE area based on their professional work experience. These occupational teaching certifications begin as a Limited Occupational Specialist (LOS), then after completion of coursework and/or teacher training, advance to a Standard Occupational Specialist, and finally to an Advanced Occupational Specialist. The LOS certification is a three-year interim certificate, and during that time, ICTE provides statewide and regional training for the LOS teachers through the Inspire Cohort. The goal of the Inspire Cohort program is to not only recruit and train new occupationally endorsed teachers but also to assimilate them into the teaching profession with connections to other LOS colleagues and a fully supported first-year experience and beyond. Inspire faculty, personal mentors, and state-level program managers provide the foundation for these new teachers at no out-of-pocket expense to the teacher. Oversight of the Inspire Cohort is maintained by ICTE, thus ensuring consistent training and mentoring, with a goal to produce a greater impact on student achievement sooner in their teaching careers. The Inspire Cohort is open to all LOS teachers employed in a CTE program and is funded with state funds for the purpose of encouraging completion of the program.

2. Use of Funds to Improve Equitable Access to Teachers in Title I, Part A Schools (ESEA section 2101(d)(2)(E)): If an SEA plans to use Title II, Part A funds to improve equitable access to effective teachers, consistent with ESEA section 1111(g)(1)(B), describe how such funds will be used for this purpose.

Idaho does plan to use some Title II-A funds to improve equitable access to effective teachers, as described above. Idaho will target Title II-A funds to schools in comprehensive support and improvement through the IPMP, in addition to the Title I-A funds used for the Idaho Superintendents Network and Idaho Principals Network (as described in section A(4)(viii)(e) of this plan). Title II-A funds will also be used to train teachers in Idaho's instructional framework and address educator mentoring. These strategies will help to ensure that all students have access to effective teachers.

ISDE created a cross-agency workgroup in 2015 to study the equitable distribution of educators across the state. ISDE worked with REL Northwest to analyze educator preparedness (inexperienced), content knowledge (teaching outside of field), and need (grade spans or content area). While the data analysis did not point to disparities in terms of the distribution of personnel who are working with low-income or minority students, it did identify a shortage of personnel across all areas, including areas not previously identified. The findings became part of Idaho's Equity Plan submitted to the U.S. Department of Education on June 1, 2015, and they sparked a statewide effort to study recruitment and retention.

ISDE again partnered with REL Northwest to conduct surveys and interviews of a sampling of Idaho LEAs. The process was completed in June 2016. The salient challenge reported by the superintendents interviewed was recruitment and retention of staff. Many of the superintendents are

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

---

taking short-term measures (e.g., Teach for America, Idaho Digital Learning Academy for secondary coursework, multi-grade classrooms) to meet their needs but expressed concern that the issue was larger than any one LEA could tackle. One superintendent remarked, “*We are one teacher away from losing several programs.*” LEAs expressed concern that the issue was not limited to teachers, but also affected administrative personnel.

**Table 17: Proposed programs for supporting educators**

Strategy	Timeline	Funding sources
Idaho Building Capacity Network	July 2017 to September 2022	Title I: School improvement
Idaho Superintendents Network		Title I: School improvement
Idaho Principals Network		Title I: School improvement
Idaho Principal Mentoring Project		Title II-A
Mentoring and Coaching		Title II-A
School Libraries		Title II-A
Instructional Framework		Title II-A

3. System of Certification and Licensing (ESEA section 2101(d)(2)(B)): Describe the State’s system of certification and licensing of teachers, principals, or other school leaders.

Educator certification in the state of Idaho is clearly defined within Idaho Administrative Code (IDAPA). This code puts forth rigorous expectations for teachers, pupil personnel, principals, directors of special education, and superintendents who are prepared by both Idaho and out-of-state institutions of higher education. IDAPA ensures that educators are prepared not only with the necessary knowledge gained through course work, but through clinical field experiences as well. Alternative routes to certification are also clearly defined and available to those who wish to enter the education profession through non-traditional means. IDAPA specifically outlines alternative routes to ensure all educators within Idaho, regardless of certification route, are prepared to the fullest extent. In addition, twenty percent (20%) of Standards for Initial Certification of Professional School Personnel are reviewed annually by the Idaho Professional Standards Commission in an effort to continuously maintain rigor and improve upon current practice. Specifics within IDAPA detailing specific requirements for educator certification are described in the following paragraphs:

**A Standard Instructional Certificate** requires: A minimum of 20 semester credit hours, or 30 quarter credit hours, in the philosophical, psychological, and methodological foundations, instructional technology, and in the professional subject matter which shall include at least three semester credit hours or four quarter credit hours in reading and its application to the content area. [IDAPA [08.02.02.015.01.a.i](#)] The certificate must include an endorsement area as well. Some endorsement requirements are as follows:

**An All Subjects Endorsement** requires: Twenty (20) semester credit hours, or 30 quarter credit hours, in the philosophical, psychological, and methodological foundations, instructional technology, and professional subject matter must be in elementary education including at least 6 semester credit hours, or 9 quarter credit hours, in developmental reading. This endorsement must be accompanied by at a minimum of one additional subject area endorsement allowing teaching of that subject through grade nine or kindergarten through grade 12. [IDAPA [08.02.02.022.03](#)]

**A Blended Early Childhood/Early Childhood Special Education Endorsement** requires: A minimum of 30 semester credit hours, or 45 quarter credit hours, in the philosophical, psychological, and methodological foundations, in instructional technology, and in the professional subject matter of early childhood and early childhood-special education. The professional subject matter shall include course work specific to the child from birth through

**STATE DEPARTMENT OF EDUCATION**  
**AUGUST 10, 2017**

---

grade three in the areas of child development and learning; curriculum development and implementation; family and community relationships; assessment and evaluation; professionalism; and application of technologies. [IDAPA [08.02.02.022.07](#)]

**An Exceptional Child Generalist Endorsement** requires: Thirty (30) semester credit hours in special education, or closely related areas, as part of an approved special education program. [IDAPA [08.02.02.023.07](#)]

**A Secondary Content Area Endorsement** requires: Preparation in at least two fields of teaching. One of the teaching fields must consist of at least 30 semester credit hours, or 45 quarter credit hours and a second field of teaching consisting of at least 20 semester credit hours, or 30 quarter credit hours. Preparation of not less than 45 semester credit hours, or 67 quarter credit hours, in a single subject area may be used in lieu of the two teaching field requirements. [IDAPA [08.02.02.015.01.c](#)]

**Clinical Requirements** Idaho Administrative Code articulates clinical requirements for teacher candidates. There are no specific state requirements with regard to preservice teaching experience in diverse settings or with special student populations. For the Standard Instructional Certificate, which includes all instructional endorsements, at least six semester credit hours, or nine quarter credit hours, of student teaching in the grade range and subject areas as applicable to the endorsement are required. [IDAPA [08.02.02.015.01.a.ii](#)]

**Administrator Certification** requires at least 30 semester credit hours, or 45 quarter credit hours of graduate study in school administration based on the specific administrator area (school principal, director of special education, or superintendent). The program must include the competencies of the Idaho Foundation Standards for School Administrators. [IDAPA [08.02.02.015.03](#)]

**Alternative Routes to Certification** When a professional position cannot be filled by an LEA with someone who has the correct endorsement/certification, the LEA may request an alternative authorization for certification. An alternative authorization is valid for one year, and may be renewed for two additional years. Prior to application, a candidate must hold a Bachelor's degree. The LEA must provide supportive information attesting to the ability of the candidate to fill the position. [IDAPA [08.02.02.042](#)]

**Alternative Authorization – Teacher to New Certification/Endorsement** Candidates will work toward completion of the alternative route preparation program in conjunction with the employing LEA and the participating educator preparation program (college/university or non-traditional route). Candidates must complete a minimum of nine semester credits annually or make adequate progress to be eligible for extension of up to a total of three years. The participating educator preparation program shall provide procedures to assess and credit equivalent knowledge, dispositions, and relevant life/work experiences. Additionally, the alternative authorization allows teachers to use the National Board Certification process to gain an endorsement in a corresponding subject area or by obtaining a graduate degree in a content specific area.

Two pathways are also available to some teachers, depending upon endorsement(s) already held.

- Pathway 1 - Endorsements may be added through state-approved testing and a mentoring component. The appropriate test must be successfully completed within the first year of certification in an area closely compatible with an endorsement for which the candidate already qualifies and is experienced. This pathway requires the successful completion of a one-year state-approved mentoring component.

**STATE DEPARTMENT OF EDUCATION**  
**AUGUST 10, 2017**

---

- Pathway 2 – Endorsements may be added through state-approved testing in an area less closely compatible with an endorsement for which the candidate already qualifies and is experienced. The appropriate test must be successfully completed within the first year of the certification along with the successful completion of a robust one-year state-approved mentoring component. [IDAPA [08.02.02.042.01](#)]

**Alternative Authorization – Content Specialist** The purpose of this alternative authorization is to offer an expedited route to certification for individuals who are highly and uniquely qualified in a subject area to teach in an LEA with an identified need for teachers in that area. Alternative authorization in this area is valid for one year and renewable for up to two additional years. Prior to application, a candidate must hold a bachelor's degree. The candidate shall meet enrollment qualifications of the alternative route preparation program. A consortium comprised of a designee from the educator preparation program, a representative from the LEA, and the candidate shall determine preparation needed to meet the Idaho Standards for Initial Certification of Professional School Personnel. This preparation must include mentoring and a minimum of one classroom observation per month until certified. [IDAPA [08.02.02.042.02](#)]

**Alternative Authorization – CTE Occupational Specialist** The purpose of the occupational specialist certification is to permit individuals with several years of experience and often industry certification in a CTE-related occupation to teach secondary and postsecondary CTE students. These occupational teaching certifications begin as a Limited Occupational Specialist (LOS) for individuals with 6,000 to 16,000 hours of full-time, recent, successful, and gainful employment. After completion of coursework and/or teacher training at each level, teachers advance to a Standard Occupational Specialist, and finally to an Advanced Occupational Specialist. All occupationally certified teachers must meet the Idaho Standards for Initial Certification of Professional School Personnel. [IDAPA 08.02.036]

**Content Knowledge, Pedagogy, and Performance** As per [IDAPA 08.02.02.018](#), all certification and endorsement areas require the candidate to demonstrate content knowledge, pedagogy, and performance. The state approved assessment for demonstration of content knowledge is the Praxis II assessment. Candidates must have a passing score on the Praxis II assessment for the content area they are seeking certification and endorsement.

**Teacher Standards** All Idaho teacher preparation programs are guided by the *Idaho Core Teacher Standards* (see Table 16 below). These standards provide guidelines for what all Idaho teachers must know and be able to do.

**Foundation and Enhancement Standards** Foundation and Enhancement Standards refer to additional knowledge and performances a teacher must know in order to teach a certain content area. The Foundation and Enhancement Standards, therefore, further "enhance" the standard. In this way, the Idaho Core Teacher Standards, Foundation Standards and Enhancement Standards are "layered" to describe what a teacher in the content area must know and be able to do in order to be recommended to the state for initial certification.

**Pupil Personnel and Administrator Certification Standards** There are several certification standards for pupil personnel professionals and school administrators that are also addressed through the Idaho teacher certification processes. These include School Administrators, School Counselors, School Nurses, School Psychologists, School Social Workers: Because of the unique role of these professionals, their standards are independent of the Idaho Core Teaching Standards but are still written in the same performance-based format: Knowledge and Performances.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

**Table 18: Idaho Content Teaching Standards**

<b>Standard category</b>	<b>Standard number and title</b>	<b>Standard description</b>
<b>The Learner and Learning</b>	Standard 1: Learner Development.	The teacher understands how learners grow and develop, recognizing that patterns of learning and development vary individually within and across the cognitive, linguistic, social, emotional, and physical areas, and designs and implements developmentally appropriate and challenging learning experiences.
	Standard 2: Learning Differences.	The teacher uses understanding of individual differences and diverse cultures and communities to ensure inclusive learning environments that enable each learner to meet high standards.
	Standard 3: Learning Environments.	The teacher works with others to create environments that support individual and collaborative learning, and that encourage positive social interaction, active engagement in learning, and self-motivation.
<b>Content Knowledge</b>	Standard 4: Content Knowledge.	The teacher understands the central concepts, tools of inquiry, and structures of the discipline(s) he or she teaches and creates learning experiences that make the discipline accessible and meaningful for learners to assure mastery of the content.
	Standard 5: Application of Content	The teacher understands how to connect concepts and use differing perspectives to engage learners in critical thinking, creativity, and collaborative problem solving related to authentic local and global issues.
<b>Instructional Practice</b>	Standard 6: Assessment.	The teacher understands and uses multiple methods of assessment to engage learners in their own growth, to monitor learner progress, and to guide the teacher's and learner's decision making.
	Standard 7: Planning for Instruction	The teacher plans instruction that supports every student in meeting rigorous learning goals by drawing upon knowledge of content areas, curriculum, cross-disciplinary skills, and pedagogy, as well as knowledge of learners and the community context.
	Standard 8: Instructional Strategies.	The teacher understands and uses a variety of instructional strategies to encourage learners to develop deep understanding of content areas and their connections, and to build skills to apply knowledge in meaningful ways.
<b>Professional Responsibility</b>	Standard 9: Professional Learning and Ethical Practice.	The teacher engages in ongoing professional learning and uses evidence to continually evaluate his/her practice, particularly the effects of his/her choices and actions on others (learners, families, other professionals, and the community), and adapts practice to meet the needs of each learner.
	Standard 10: Leadership and Collaboration.	The teacher seeks appropriate leadership roles and opportunities to take responsibility for student learning, to collaborate with learners, families, colleagues, other school professionals, and community members to ensure learner growth, and to advance the profession.

**Current Work Regarding Certification of Educators**

The Professional Standards Commission (PSC) annually reviews 20 percent of the preparation standards to align with national standards and best practices. This process allows Idaho to keep up to

**STATE DEPARTMENT OF EDUCATION**  
**AUGUST 10, 2017**

---

date with standards and best practices. In addition, the Office of the State Board of Education has convened a Teacher Certification Workgroup to look at the current certification requirements. The purpose of the workgroup is to maintain high standards to assure that all students have access to highly effective, learner-ready teachers and other LEA staff to ensure academic achievement for all students. The identified areas of focus for the workgroup are:

- Bring current certification practices in alignment with Idaho statute and administrative code.
- In those areas where current practice is best practice, amend administrative code to align with practice.
- Areas where current practice is not aligned with state law:
  - Individuals teaching outside of grade ranges authorized by certificate (certificate limits the grade level range individuals can teach, regardless of the endorsement)
  - Active certificates with attached endorsements that are not authorized in IDAPA
  - Positions reported as pupil service staff for which no corresponding endorsement exists
- Review alternate routes to certification to determine whether Idaho's existing routes offer adequate flexibility for aspiring educators while also assuring qualified individuals capable of advancing student learning are in the classroom.
- Review the mechanism for individuals with specialized skills, or from industry, to teach one or two classes.

In addition, the State Board of Education's Teacher Pipeline Workgroup will make recommendations which may include rule or statute changes to remove barriers for effective teachers to enter and stay in Idaho's classrooms.

4. Improving Skills of Educators (*ESEA section 2101(d)(2)(J)*): Describe how the SEA will improve the skills of teachers, principals, or other school leaders in order to enable them to identify students with specific learning needs, particularly students with disabilities, English learners, students who are gifted and talented, and students with low literacy levels, and provide instruction based on the needs of such students.

Title II-A is focused on the needs of educators in high-poverty and high-minority schools. LEAs are required to assure that they are coordinating professional development to ensure that their teachers, principals, and other school leaders have skills to identify students with specific learning needs, particularly students with disabilities, English learners, gifted and talented students, and students with low literacy levels, and provide instruction based on the needs of such students.

5. Data and Consultation (*ESEA section 2101(d)(2)(K)*): Describe how the State will use data and ongoing consultation as described in ESEA section 2102(d)(3) to continually update and improve the activities supported under Title II, Part A.

Data are collected on all state-led professional development activities to assess the quality and efficacy of those experiences. For example, the IPMP and IPN components of section A(4)(viii)(e) of this plan include survey data collected from participants of these programs in 2017.

Meaningful consultation was conducted with teachers, principals, other school leaders, paraprofessionals, specialized instructional support personnel, charter school leaders, parents, community partners, and other organizations or partners with relevant and demonstrated expertise in the development of this program plan. ISDE will seek advice, based on statewide data review, and consult with stakeholders regularly on how to best improve the activities to meet the purpose of this program. As evident in the plan, activities under this part are coordinated with other related strategies, programs, and activities being conducted by ISDE.

**STATE DEPARTMENT OF EDUCATION**  
**AUGUST 10, 2017**

---

6. Teacher Preparation (*ESEA section 2101(d)(2)(M)*): Describe the actions the State may take to improve preparation programs and strengthen support for teachers, principals, or other school leaders based on the needs of the State, as identified by the SEA.

Idaho is currently focusing its Title II-A funds toward supporting educators in rural, high-poverty, and high-minority schools. However, as stated above in section D(1), ISDE and the State Board of Education will investigate how we may use Title II-A funds to support teacher preparation and mentoring.

## **E. Title III, Part A, Subpart 1: English Language Acquisition and Language Enhancement**

1. Entrance and Exit Procedures (*ESEA section 3113(b)(2)*): Describe how the SEA will establish and implement, with timely and meaningful consultation with LEAs representing the geographic diversity of the State, standardized, statewide entrance and exit procedures, including an assurance that all students who may be English learners are assessed for such status within 30 days of enrollment in a school in the State.

Idaho State Department of Education (ISDE) has always implemented standardized procedures for identifying and exiting English (EL) students. However, ESSA provided the ISDE with an opportunity to revise the state's procedures for entrance and exiting students from EL services to comply with revisions to the law with the support and assistance of the ESSA EL Workgroup. The workgroup was comprised of district EL coordinators, principals, teachers, EL coaches, paraprofessionals, and higher education faculty from all educational regions in the state. LEAs with high to low incidence EL populations were also targeted for this work. The EL Workgroup began this work on September 16, 2016 with a face-to-face meeting and continued to meet during the 2016-2017 school year for a total of 6 meetings to establish standardized entrance and exit procedures that were appropriate and implementable by all districts and charter schools in Idaho. The Workgroup created a statewide Home Language Survey (HLS) and a "Decision to Assess" Matrix as well as guidance documents to assist all LEAs with this process. These documents can be accessed via the EL Department webpage: <http://www.sde.idaho.gov/el-migrant/el/index.html> under Resources Files, Program Information.

In addition, the LEA must sign an annual assurance with their consolidated application for federal funds stating that they will identify and assess potential English Learners within 30 days as outlined in the statewide standardized procedures. In addition, LEAs must also describe how they will serve identified English Learners.

In spring 2017 the ISDE Title III staff traveled to 15 locations around the state to provide training to all LEAs on the newly revised statewide entrance and exiting procedures. This major undertaking was necessary to ensure a successful statewide implementation beginning in August 2017. ISDE also updated Title III monitoring protocols to ensure LEAs are implementing the statewide entrance and exiting procedures.

All of this work has been well received by Idaho's LEAs, motivating the ESSA EL Workgroup members to continue serving as an EL advisory panel to the State EL/Title III department at the ISDE. This panel will collaborate with the Migrant Advisory Panel and will consist of some of the same members.

**Entrance Procedures:** Idaho's ESSA EL Workgroup has established the following EL Program Entrance Procedures and Criteria:

Step 1: All LEAs administer the Statewide Home Language Survey (HLS) to all newly enrolling students in the district/charter. They then use the "Decision to Assess" Matrix to determine whether the student is a potential EL. Original HLSs are filed in students' cumulative files.

Statewide Home Language Survey Questions:

1. What language(s) are spoken in the home?
2. What language(s) does your student speak most often?

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

---

3. What language(s) did your student first learn?
4. Which language does your child speak with you?
5. Which language do you use when speaking with your child?
6. Which language do you want phone calls and letters?
7. What is your relationship to the child?
8. Is there any additional information you would like the school to know about your child?

The Home Language Survey is currently available in Spanish and is being translated in additional languages represented in the state. English and translated HLS forms are available on the Idaho State EL and Title III Programs website for all LEAs to download.

Step 2: If a student is identified as a potential EL, LEAs use additional resources and data to determine whether the student has already been identified as an EL in another LEA. If the following resources indicate that the student either has screened out of EL eligibility or has previously exited from EL programming, then the student does not qualify for EL program placement.

- Idaho’s English Learner Management System (ELMS)
- Cumulative file review for WIDA assessments
- Cumulative file review for English Learner Plans
- Cumulative file review for EL exit forms
- Communication with previous district (if necessary)

Step 3: LEAs proceed with English Language Proficiency (ELP) Screener Assessment, either WIDA Kindergarten W-APT or WIDA Screener, depending on the student’s grade level and time of year of enrollment. They use the following Statewide EL Entrance Criteria to determine whether a student qualifies for EL or whether they screen out of EL eligibility.

**Table 19: Idaho’s Statewide EL Entrance Criteria**

Grade	First semester	Second semester
Kindergarten	Kindergarten W-APT Listening/Speaking must = 29 or 30 points “Exceptional” Reading must be 6+ points Writing must be 5+ points	Kindergarten W-APT Listening/Speaking must = 29 or 30 points “Exceptional” Reading must be 11+ points Writing must be 14+ points
1 <sup>st</sup> Grade	<u>Kindergarten W-APT</u> Listening/Speaking must = 29 or 30 points “Exceptional” Reading must be 14+ points Writing must be 17+ points	(Same as 2 <sup>nd</sup> -12 <sup>th</sup> grade)
2 <sup>nd</sup> – 12 <sup>th</sup> Grade	<u>ACCESS Screener Assessment</u> 5.0 Composite Proficiency Level + at least 4.0 in each domain of listening speaking, reading, and writing.	

Screener assessment and program placement must occur within 30 days of the student’s enrollment in the LEA. In order to ensure that potential ELs with special needs are correctly identified, the EL advisory panel will collaborate with special education stakeholders to establish alternate entrance criteria and processes for identifying ELs with special needs.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

---

The ESSA EL Workgroup created a statewide process for identifying students whose parents may have indicated “English Only” on their Home Language Survey but who have exhibited characteristics of second language learners necessitating a need to amend the original HLS. In addition, the workgroup developed a statewide process to remove the EL designation from a student who was erroneously identified. Lastly, the workgroup has assisted the ISDE with revising the parental notification form including an option to waive ELD services.

**Exit Procedures:** Idaho’s ESSA EL Workgroup has established the following EL Program Exit Procedures and Criteria:

Step 1: LEAs review annual EL proficiency assessment data to determine which students have met Idaho’s EL Exit Criteria. Idaho administers the WIDA ACCESS 2.0 or Alternate ACCESS to annually assess for EL proficiency.

<b>ACCESS 2.0 exit criteria</b>
5.0 Composite Proficiency Level + at least a 4.0 in each domain of listening, speaking, reading, and writing.

Step 2: When students meet the exit criteria on the English language proficiency assessment, LEA staff members redesignate students to “exited year 1 monitoring” status in their school information systems. LEAs are required to complete the exiting process for eligible students before the end of the school year in which the student met the exit criteria. In other words, LEAs must use the results from the spring ACCESS 2.0 and Alternate ACCESS assessment to update students’ EL status in their school information system and inform parents by the end of the school year.

Step 3: LEAs will use a statewide exit form that is shared and explained to parents/families in a language they can understand to inform them of their child’s program exit. In addition LEAs inform parents/families of the child’s transition into a monitoring status for two years.

In order to ensure that ELs with special needs are correctly exited, the EL advisory panel will collaborate with special education stakeholders to establish criteria and processes for exiting ELs with special needs as well as Alternate ACCESS exit criteria.

2. SEA Support for English Learner Progress (*ESEA section 3113(b)(6)*): Describe how the SEA will assist eligible entities in meeting:
  - i. The State-designed long-term goals established under ESEA section 1111(c)(4)(A)(ii), including measurements of interim progress towards meeting such goals, based on the State’s English language proficiency assessments under ESEA section 1111(b)(2)(G); and
  - ii. The challenging State academic standards.

**Assistance to LEAs for Long-Term Language Proficiency and Academic Goals**

The State EL/Title III Department exists to assist LEAs with creating, implementing, and improving language instruction educational programs that provide equal learning opportunities for ELs. In order to achieve this, the State EL/Title III Department will analyze the long-term goals and interim progress for English language proficiency and academic standards established under ESEA section 1111(c)(4)(A)(ii). This ongoing and annual analysis will assist the department in determining statewide and individualized support needed for LEAs.

**STATE DEPARTMENT OF EDUCATION**  
**AUGUST 10, 2017**

---

Moreover, with EL accountability now housed under Title I, the State EL/Title III Department staff are critical members on the previously mentioned State Technical Assistant Team (STAT). This group will be responsible for tracking progress, discussing data, and identifying needs and resources.

Additionally, the department will continue to review and monitor LEAs' annual EL plan within the Consolidated Federal and State Grants Application (CFSGA). LEAs must describe their Language Instruction Educational Program(s) (LIEP) to serve their ELs. These plans also include an opportunity for the LEA to describe linguistic and academic goal(s) for their English learners. Furthermore, LEAs describe within their State EL Plans their methods for meeting these linguistic and academic goals by describing coordination of services with other supporting programs, method for incorporating WIDA English Language Development Standards within instruction, and professional learning opportunities provided to all staff in the LEA on best practices in teaching English learners. The State EL/Title III Department will review the LEAs linguistic and academic goals for alignment to the long-term goals and interim progress for English language proficiency and academic standards established under ESEA section 1111(c)(4)(A)(ii). Additionally, the department uses this information to support LEAs in their individualized efforts. For example, if neighboring LEAs have similar goals, ISDE can target support regionally.

Currently, the ISDE has the following supports in place for schools and LEAs that can be tailored to address the specific linguistic and academic needs of their ELs:

**Cross Collaboration**

The EL/Title III Department engages in state-level collaboration with other ISDE programs such as Special Education, Migrant, Title I, and others to address the needs of English Learners. Examples of state-level collaboration include professional learning opportunities for administrators, teachers, and paraprofessionals of English Learners as well as a consolidated grant application and program monitoring for LEAs. The STAT team is another example of cross collaboration.

**Ongoing Technical Assistance**

Ongoing technical assistance for all LEAs is provided in a variety of ways listed below. However, individualized technical assistance can be requested by an LEA at any time and may be delivered through a variety of methods:

1. Phone, email, and individual site visits
2. The EL Department webpage <http://sde.idaho.gov/el-migrant/el/index.html>
3. Quarterly webinars
4. Biweekly newsletters
5. Regional trainings

**Idaho Legislature**

The Idaho Legislature provides funding to LEAs for ELs. House Bill 287 appropriates \$450,000 for three-year grants to assist LEAs with meeting the academic needs of English Learners. House Bill 289 provides over 1 million dollars for research-based programs for ELs.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

---

**State Title III Consortium**

State Title III Consortium employs two (2) EL coaches who travel to LEAs around the state to support them and provide onsite technical assistance personalized to their needs.

**EL Advisory Panel**

The EL advisory panel assists the ISDE with state-wide planning and support on EL-related topics such as creating state-wide identification and exiting criteria for all LEAs.

**Professional Development/Training**

The Idaho State EL/Title III Department provides support for all Idaho educators of ELs through professional learning opportunities that are intentionally designed based on the timely needs of EL educators. ISDE recognizes that as the number of ELs grows, all educators must be mutually responsible for the language development and academic success of ELs and, therefore, all teachers are language teachers. In fall 2017 the ISDE EL/Title III Department will provide regional intensive professional learning workshops on classroom instructional strategies for classroom teachers K-12 to support language development through content instruction.

**State and National Partnerships**

The State/Title III Department staff participates in and collaborates with multiple national partners and other state agencies for support in trending EL topics: Teaching English to Speakers of Other Languages (TESOL), Center for Applied Linguistics (CAL), WIDA, Wisconsin Center for Educational Research (W-CER), Regional Educational Laboratory (REL), Chief Counsel of State School Officers (CCSSO), EL State Collaborative on Assessment Student Standards (SCASS), Title I National Organization, and National Association of State Title III Directors. Lastly, additional partnerships with Idaho's institutes of higher education provide components of EL education in preservice teacher education in an effort to prepare teachers with appropriate instructional strategies for the ELs in their classrooms.

The ISDE will continue to adapt, create, and implement additional supports for ELs in Idaho's schools based on need as identified through data.

3. Monitoring and Technical Assistance (ESEA section 3113(b)(8)): Describe:
  - i. How the SEA will monitor the progress of each eligible entity receiving a Title III, Part A subgrant in helping English learners achieve English proficiency; and
  - ii. The steps the SEA will take to further assist eligible entities if the strategies funded under Title III, Part A are not effective, such as providing technical assistance and modifying such strategies.

Monitoring the implementation of Federal programs and the use of funds is a requirement of each of the Federal programs and an essential function of the ISDE. The ISDE monitors all LEAs thoroughly and in a variety of ways to ensure that all children have a fair, equitable, and significant opportunity to obtain a high-quality education. Moreover, the ISDE provides leadership and guidance to LEAs through technical assistance for the purpose of assisting LEAs with implementing highly effective educational programs to increase student achievement in Idaho. ISDE implements the following processes for monitoring federal programs including Title III-A:

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

---

**Consolidated Federal and State Grant Application (CFSGA)**

The Idaho Consolidated Federal & State Grant Application serves as an LEA's application for federal program funds. A consolidated approach, instead of separate applications for each of the individual programs, allows the programs to be cooperatively planned and implemented, and also helps to reduce the administrative burden. In addition, the CFSGA allows the EL/Title III Coordinator to monitor/review annual applications for Title III compliance, linguistic and academic goals, and use of funds. If an LEA's plan does not meet the criteria for approval, she coaches the LEA until the plan meets all the requirements. This approach is proactive in that it provides assistance before the LEA receives funding.

**Selection Process for Onsite and Desk Monitoring of LEAs**

In determining the list of LEAs to be monitored for the upcoming school year, the ISDE reviews several considerations:

1. The list of LEAs considered for monitoring in the upcoming year are derived from the ISDE's Ongoing LEA Master List, which identifies the year each LEA was last monitored.
2. Each federal program identifies risk factors for the LEAs identified for potential monitoring. Risk factors may be determined using data including the following:
  - State assessment performance data
  - Date/Year the LEA was previously monitored
  - Number and type of findings from the previous monitoring visit (such as programmatic, fiscal, policy, repeat findings)
  - Results of previous findings
  - Personnel turnover – new or inexperienced federal programs director or new superintendent
  - Audit Findings (such as incomplete audits or type of audit findings)
  - Significant carryover balances
  - Non-participation in state offered trainings
  - Other "high-risk" factors identified by ISDE program coordinators (such as sudden and/or significant increase in English Learners, formal compliance complaint filed with the ISDE, SBOE, and/or U.S. Department of Education - Office for Civil Rights)
3. Approximately 25 LEAs are identified for monitoring annually. Monitoring is conducted by ISDE program staff either through on-site or desk monitoring.

**Monitoring Process for Title III –A**

During the monitoring visit, the EL/Title III Coordinator conducts classroom observations, interviews with staff, principals, students, and parents to determine if the LEA is addressing the linguistic and academic needs of their ELs. Additionally, the coordinator seeks evidence of support for the linguistic and academic goals described in the CFSGA.

**Consolidated State Performance Report (CSPR)**

Annual CSPR data submitted by the LEA for federal reporting is another opportunity for monitoring and possible technical assistance. LEA data is reviewed for accuracy as well as for state and local level trends.

**STATE DEPARTMENT OF EDUCATION**  
**AUGUST 10, 2017**

---

**Participation in STAT Team**

As mentioned before, the State EL/Title III department will work with the STAT team to monitor the progress of LEAs and provide technical assistance based on the recommendations of this team.

The above mentioned activities and processes will assist the ISDE in identifying LEAs that may need more specific and individualized support in identifying effective strategies for their ELs. If an LEA continues to struggle with implementing effective strategies for EL English proficiency, the ISDE will convene with the STAT team to determine additional resources needed to provide intensive support. Resources could include, but not limited to, in-depth professional development, recommendations for Title III program revisions and opportunities for peer observations with successful Title III districts.

## **F. Title IV, Part A: Student Support and Academic Enrichment Grants**

1. Use of Funds (*ESEA section 4103(c)(2)(A)*): Describe how the SEA will use funds received under Title IV, Part A, Subpart 1 for State-level activities.

### **State Level Activities**

Four percent of Idaho's Title IV-A allocation targeted for state activities total \$77,600, of that, approximately \$20,000 will be directed toward required activities including training LEAs on applying for Title IV-A funds through the ISDE's Consolidated State and Federal Grant Application and compliance monitoring. The remaining \$57,600 will be prioritized to expand professional development surrounding STEM in concert with the STEM Action Center.

### **LEA Optional Use of Funds Aligned with State Level Activities**

ISDE will leverage and expand the resources and support of the Governor's STEM Action Center by assuring LEAs are aware of the Center and the training and tools it offers to engage more students in STEM related coursework and activities. The primary function of the STEM Action Center is to support a well-rounded STEM education for all Idahoans, K – career. This is accomplished by creating partnerships with other state agencies, out of school entities, non-profits, educators, administrators, communities, businesses, and industries to support the development of Idaho's STEM talent pipeline, ensuring continued growth of Idaho's STEM-based economy. The STEM Action Center will continue to focus on opportunities for educators, students, and communities by supporting professional development for educators, grants for resources and communities, STEM awareness events, and opportunities for students to participate in STEM competitions, camps, internships, mentorships, and apprenticeships. Targeted support, leveraging both federal and state funding, will help to ensure equitable access to and awareness of STEM for all students throughout Idaho.

The ISDE and STEM Action Center will work collaboratively to inform districts and to provide guidance in implementation regarding the wide range of activities that are permissible under Title IV-A to improve STEM instruction and learning. Examples of how state funds will be used to increase STEM activity in LEAs include:

- Expansion of high-quality STEM courses.
- Increased access to STEM for underserved and at-risk student populations.
- Support for student participation in nonprofit STEM competitions.
- Increased opportunities for hands-on learning in STEM.
- Integration of other academic subjects, including the arts, into STEM subject programs.
- Creation or enhancement of STEM specialty schools.
- Integration of classroom-based, afterschool, and informal STEM instruction.

Idahoans understand that a well-rounded, community-oriented, student-focused education provides the knowledge and skills to live, learn, work, create, and contribute to society. STEM experiences enhance 21st century workforce skills such as collaboration, innovation, problem-solving, critical and creative thinking, and teamwork. These experiences should be integrated across disciplines and should focus on project-based learning, inquiry, and discovery. All students should have the opportunity to learn these critical 21st century workforce skills. Therefore, the Idaho STEM Action Center will work collaboratively with Idaho state educational agencies to transform how Idaho educates our children in order to enhance their life prospects, empower their communities, and build an inclusive, sustainable, innovation-based economy where our citizens can thrive.

Title IV-A state funds will also support ISDE staff in providing technical assistance for LEAs in the

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

---

creation of local Title IV-A plans and applying for funding as well as monitoring for compliance with federal rules and regulations. While compliance monitoring visits focus on adherence to the rules and regulations, the ISDE aims to use these visits as opportunities to provide technical assistance in addressing deficiencies and offering best practices in supporting students.

The ISDE will support LEAs in directing their Title IVA allocations to provide equitable access to a well-rounded education and rigorous coursework in subjects in which female students, minority students, English learners, students with disabilities, or low-income students are underrepresented. Such subjects could include English, reading/language arts, writing, science, technology, engineering, mathematics, world languages, civics and government, economics, arts, history, geography, computer science, music, career and technical education, health, or physical education.

Existing state supports will be leveraged to increase the impact of LEA Title IV-A funds around strengthening the instructional core and increasing access to a broad range of educational opportunities. Idaho currently has robust supports in place focused on a well-rounded education that includes professional development for teachers, instructional coaches and mastery education funded by state dollars.

Additionally, the ISDE plans on leveraging state and local resources to imbed music, the arts, foreign languages, environmental education and civics to expand offerings for students. Partners include the Idaho Commission for Libraries, the Idaho Commission on the Arts, and the Wassmuth Center for Human Rights. Resources from these entities will be compiled and provided to LEAs seeking to expand their course offerings and supplemental materials.

Regarding supporting safe and healthy students, LEA Title IV-A funds may increase existing efforts to equip LEA personnel with best practices around crisis intervention, school violence prevention, suicide prevention and alternatives to suspensions and expulsions through existing statewide trainings and resources.

**Table 20: Title IV-A use of funds**

<b>Strategy</b>	<b>Timeline</b>	<b>Funding sources</b>
Provide specialized STEM professional development to LEAs.	Ongoing and on demand	Federal Title IVA funds

2. Awarding Subgrants (*ESEA section 4103(c)(2)(B)*): Describe how the SEA will ensure that awards made to LEAs under Title IV, Part A, Subpart 1 are in amounts that are consistent with ESEA section 4105(a)(2).

The ISDE established an estimate for each LEA based on the prior year Title I-A allocation and a hold harmless amount of \$10,000. As such, the calculations for LEA awards are a combination of \$10,000 and a proportional amount based on Title I-A.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

---

**G. Title IV, Part B: 21<sup>st</sup> Century Community Learning Centers**

1. Use of Funds (*ESEA section 4203(a)(2)*): Describe how the SEA will use funds received under the 21st Century Community Learning Centers program, including funds reserved for State-level activities.

ISDE reserves 2 percent of the appropriated amount for administration (approx. \$110,000), which supports 1.08 FTE: partial salaries for a director, state coordinator, program specialist, and administrative assistant. The administration funds for Title IV-B are used to support eligible LEAs, Community-Based Organizations, Indian tribes or tribal organizations, and other public/private entities. Each year the ISDE provides regional trainings for interested organizations in applying for Title IV-B grant funds. The ISDE also use administrative funds for costs associated with the peer review process and required USED meetings.

ISDE reserves 3 percent of the appropriated amount for state activity (approx. \$270,000), which supports 0.9 FTE: partial salaries for a director, state coordinator, program specialist, and administrative assistant. The state activity funds for Title IV-B are used to support current grantees in providing monitoring and technical assistance. The ISDE partners with the Idaho Afterschool Network and Idaho STARS in developing and implementing school age quality standards, which state activity funds support regional coordinators to provide all areas of Idaho in-depth coaching and technical assistance. The ISDE also uses state activity funds to perform a statewide evaluation to assess the program’s effectiveness in meeting performance measures.

**Table 21: Title IV-B use of funds**

Strategy	Timeline	Funding sources
New Grantee Training	Summer 2017	Title IV-B State Administrative Funds
21 <sup>st</sup> CCLC Directors Meeting	Fall 2017	Title IV-B State Activity Funds
Regional Bidder’s Workshops	Fall 2017	Title IV-B State Administrative Funds
Peer Review Process Meeting	Spring 2018	Title IV-B State Administrative Funds
21 <sup>st</sup> CCLC Directors Meeting	Spring 2018	Title IV-B State Activity Funds
21 <sup>st</sup> CCLC Summer Institute	Summer 2018	Title IV-B State Administrative Funds
Grantee Monitoring & Technical Assistance	Ongoing	Title IV-B State Activity Funds

2. Awarding Subgrants (*ESEA section 4203(a)(4)*): Describe the procedures and criteria the SEA will use for reviewing applications and awarding 21st Century Community Learning Centers funds to eligible entities on a competitive basis, which shall include procedures and criteria that take into consideration the likelihood that a proposed community learning center will help participating students meet the challenging State academic standards and any local academic standards.

ISDE reserves not less than 93 percent of the appropriated amount for LEA subgrants (approx. \$5.2 million). Each year the ISDE hosts a grant competition (as unallocated funds allow) to applicants according to ESEA Sec. 4201(b)(3). The ISDE awards 5-year grants with a minimum of \$50,000 per award. Award amounts are based on the applicants needs and services provided to students; however, the ISDE provides guidance to applicants on typical award amounts based on per-pupil expenditures.

The ISDE awards subgrants through a competitive process based on the merit of an applicant’s grant application: needs assessment for before and afterschool programs, project design, measures of effectiveness, budget, and other assurances as outlined in ESEA Sec. 4204. The ISDE awards additional points for entities that target students: (1) attending schools that are implementing comprehensive support and improvement activities or targeted support and improvement activities

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

---

under ESEA Sec. 1111(d); and (2) who may be at risk for academic failure, dropping out of school, involvement in criminal or delinquent activities, or who lack strong positive role models.

The ISDE provides technical assistance and facilitates the grant application process; however, does not participate in the decision making of the awards to applicants. The ISDE recruits a variety of peer reviewers (via email, newsletter, website, press release), which consists of individuals with diverse expertise, organization representation, geographic location, gender, racial and ethnic representation. The ISDE trains all reviewers and hosts a 1-day in-person meeting to discuss submitted applications. Ultimately, the peer reviewers make the decision of awarded applications based on the applicant's grant application and established scoring rubric.

**Table 22: Title IV-B awarding subgrants timeline**

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

---

**H. Title V, Part B, Subpart 2: Rural and Low-Income School Program**

1. Outcomes and Objectives (*ESEA section 5223(b)(1)*): Provide information on program objectives and outcomes for activities under Title V, Part B, Subpart 2, including how the SEA will use funds to help all students meet the challenging State academic standards.

74% (113 of 153) of Idaho’s LEAs and schools meet the state’s definition of rural. The goal for students in rural schools is the same for all students—to achieve at the same level of proficiency and have access to higher education resources to be successful after high school. In order to achieve equity for rural students, the state has designated staff to support rural and low-income school programs and has created a working state plan for these programs <http://www.sde.idaho.gov/federal-programs/rural/index.html>. The plan was created in consultation with LEAs. The process for grant applications includes the Consolidated Federal and State Grant Application (CFSGA) online reporting system for LEAs to submit an application that includes budget, selected activates for use of funds, and measurable goals. The state also has an electronic evaluation report that is due in June each year.

**Table 23: Title I-B objectives and outcomes**

<b>Objective</b>	<b>Outcome</b>
Objective 1: Rural school students achieve at the same level of proficiency as all other students, and have access to higher education resources to be successful after high school.	Outcomes: Each Rural Low Income School (RLIS) grantee program will provide educational services for children and youth as described in the CFSGA to ensure that they have the opportunity to meet challenging State academic content and achievement standards.
Objective 2: ISDE has a method and annual timeline for providing annual technical assistance to RLIS eligible LEAs.	Outcomes: All RLIS LEA Federal Program directors and business managers attend training on RLIS requirements and eligibly at annual regional meeting.

2. Technical Assistance (*ESEA section 5223(b)(3)*): Describe how the SEA will provide technical assistance to eligible LEAs to help such agencies implement the activities described in ESEA section 5222.

The state coordinator collaborates with Title I, Title II, Title III, and family and community coordinators; the charter school coordinator; and 21st Century Learning Center division to ensure program alignment and access to resources as well as in-person training at least twice per year with LEA technical assistance as needed. In addition, Idaho rural LEAs have the opportunity to be part of Northwest Rural Innovation and Student Engagement (NW RISE), a multi-state project that creates learning communities among schools in the rural northwest. Educators from Alaska, Idaho, Oregon, and Washington participate in NW RISE.

The project is part of the Northwest Comprehensive Center and includes two face-to-face meetings per year as well as monthly opportunities for members to collaborate through video conference and a dedicated social media account through Schoology. In addition, consultation and technical assistance is provided through the state’s system of support which includes both on-site support through projects like Idaho Building Capacity, Math Centers, Idaho Content ELA Coaches, and opportunities to network with peers through the Idaho Superintendents Network and Idaho Principals Network.

**STATE DEPARTMENT OF EDUCATION**  
**AUGUST 10, 2017**

---

**I. Education for Homeless Children and Youth program, McKinney-Vento Homeless Assistance Act, Title IX, Subtitle B**

1. Student Identification (722(g)(1)(B) of the McKinney-Vento Act): Describe the procedures the SEA will use to identify homeless children and youth in the State and to assess their needs.

All LEAs are required to have a local board-approved homeless policy that describes how the LEA will implement the following: definitions, identification, school selection, enrollment, transportation, services, disputes, free meals, eligibility for Title I services, training, coordination, and preschool. To assist in the identification of children and youth without housing, public notice of the education rights of homeless children and youth are to be disseminated and posted where such children and youth receive services. ISDE provides free brochures and posters. The state coordinator and Local Liaison contact information is listed on each poster to provide technical assistance regarding enrollment, identification, and other issues affecting students in homeless situations. Liaisons are also provided from the National Center for Homeless Education toll-free help line. ISDE requires a Student Residency Questionnaire in which the nighttime living status of every student is assessed by enrollment documentation. This living status form is disseminated twice per year. Each LEA has an identified liaison responsible for conducting the assessment and verification of homeless children and youth. Once the liaison verifies eligibility of the child or youth they are reported in the LEA student management system that uploads to the Idaho System for Educational Excellence (ISEE) K–12 longitudinal data management system. Samples are available at <http://www.sde.idaho.gov/federal-programs/homeless/index.html>

2. Dispute Resolution (722(g)(1)(C) of the McKinney-Vento Act): Describe procedures for the prompt resolution of disputes regarding the educational placement of homeless children and youth.

All LEA liaisons are familiar with the ISDE dispute resolution policy posted on the ISDE website ([www.sde.idaho.gov/federal-programs/homeless/index.html](http://www.sde.idaho.gov/federal-programs/homeless/index.html)). All LEAs must have a dispute resolution policy that aligns with the state policy. This requirement is checked during federal program monitoring visits, and LEAs submit assurances when they submit their CFSGA. All LEAs must have a written notice of decision, also part of our monitoring process. Sample letters are provided on the ISDE website. Homeless children and youth are provided all services during the dispute resolution process.

3. Support for School Personnel (722(g)(1)(D) of the McKinney-Vento Act): Describe programs for school personnel (including the LEA liaisons for homeless children and youth, principals and other school leaders, attendance officers, teachers, enrollment personnel, and specialized instructional support personnel) to heighten the awareness of such school personnel of the specific needs of homeless children and youth, including runaway and homeless children and youth.

ISDE provides staff development to Homeless Liaisons, including: provisions of the McKinney-Vento Education for Homeless Children and Youth program; related state laws; the special needs of students experiencing homelessness; resource materials; and strategies for training teachers, counselors, support staff, administrators, homeless service providers, advocates, and others. All liaisons are required to attend an annual face to face meeting for up-to-date training on McKinney-Vento and Homeless Education. Webinars and trainings are offered by the state and the National Center for Homeless Education throughout the year. Local designated liaisons are required to have annual training for all staff including transportation, nutrition, custodial, and secretarial on their role and specific needs of homeless children and youth. Idaho is beginning a partnership with Edify who has developed an online training and professional development model for the credentialing of Homeless Education Liaisons. The model consists of Beginning, Intermediate and Advanced levels of

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

---

specific topics, units, and lessons. Liaisons who pass assessments for each level's lessons receive a certificate of achievement. This technology will allow the State Coordinator to assess Liaison learning outcomes in real time to target technical assistance and resources.

4. Access to Services (722(g)(1)(F) of the McKinney-Vento Act): Describe procedures that ensure that:
  - i. Homeless children have access to public preschool programs, administered by the SEA or LEA, as provided to other children in the State;
  - ii. Homeless youth and youth separated from public schools are identified and accorded equal access to appropriate secondary education and support services, including by identifying and removing barriers that prevent youth described in this clause from receiving appropriate credit for full or partial coursework satisfactorily completed while attending a prior school, in accordance with State, local, and school policies; and
  - iii. Homeless children and youth who meet the relevant eligibility criteria do not face barriers to accessing academic and extracurricular activities, including magnet school, summer school, career and technical education, advanced placement, online learning, and charter school programs, if such programs are available at the State and local levels.
  
1. Public preschool programs: ISDE's Student Residency Questionnaire (nighttime living status of every student) includes questions about siblings in the family and assists with students eligible for secondary education who may not be currently identified. LEA liaisons collaborate with various agencies and service providers who work with homeless youth and youth separated from the public schools, such as the Idaho Department of Health & Welfare, Salvation Army, area shelters, and Community Action Partnership Association of Idaho to make them aware of protections available to homeless, unaccompanied youth. LEA liaisons collaborate with service providers to advocate on behalf of these children and youth to ensure that the students have the opportunity to return to school and participate in these programs. ISDE has established collaboration with Head Start, and the ISDE state coordinator has been appointed to the Idaho Infant and Toddler Council.
  
2. Equal Access to Appropriate Secondary Education and Support Services: The state coordinator provides training with LEA liaisons pertaining to the critical element of identification of youth who are separated from public schools with equal access, without barriers to full or partial credit. Training and resources are being developed for school counselors at the secondary level to make sure homeless youth are receiving appropriate credit for full or partial coursework satisfactorily completed while attending a prior school, in accordance with state, local, and school policies. Partnerships with Title I-A and other federal programs are used when available to access online courses, summer school, and tutoring for credit recovery.
  
3. Eligible Children and Youth Do Not Face Barriers: Every effort is made by all Homeless Liaisons and the state coordinator to include students in all academic and extracurricular activities. LEAs have policies to ensure homeless children and youths who meet the relevant eligibility criteria do not face barriers to accessing academic and extracurricular activities. Outreach is made by the liaison as needed to local support groups to assist with needs students might have to participate in extracurricular activities. ISDE is actively coordinating and collaborating with state athletic associations to ensure access and opportunity for students.
  
5. Strategies to Address Other Problems (722(g)(1)(H) of the McKinney-Vento Act): Provide strategies to address other problems with respect to the education of homeless children and youth, including problems resulting from enrollment delays that are caused by—
  - i. requirements of immunization and other required health records;
  - ii. residency requirements;
  - iii. lack of birth certificates, school records, or other documentation;

**STATE DEPARTMENT OF EDUCATION**  
**AUGUST 10, 2017**

---

- iv. guardianship issues; or
- v. uniform or dress code requirements.

Idaho state and local policies prohibit LEAs from denying a child enrollment for lack of records and include short timelines for obtaining needed records, certifications, and other documents. LEAs are required to set aside a minimum 0.25 percent of the Title I allocation for homeless students. This can be used for all the above, as needed. For all subgrants and beginning in 2016–2017, a needs assessment must be completed for the set-aside. ISDE and LEAs use the results of surveys, focus groups, and training evaluations to identify additional barriers caused by enrollment delays. ISDE disseminates information and provides technical assistance about how to remove barriers to school access throughout the state in its resource documents, trainings, and articles for publication. ISDE encourages LEAs to seek aid from local service or charitable organizations to help provide assistance that helps meet these needs. The State Coordinator is working in partnership with the Idaho Volunteer Lawyers Program to assist liaisons and youth across the state with issues and barriers that cannot be resolved at the local level. LEA's requiring uniforms must provide these items to enrolled homeless or foster youth. In addition, MV Homeless Education Grant funds and homeless set aside funds can be used to provide necessary clothing for school dress codes or school activities.

6. Policies to Remove Barriers (722(g)(1)(I) of the McKinney-Vento Act): Demonstrate that the SEA and LEAs in the State have developed, and shall review and revise, policies to remove barriers to the identification of homeless children and youth, and the enrollment and retention of homeless children and youth in schools in the State, including barriers to enrollment and retention due to outstanding fees or fines, or absences.

The state coordinator provides training and technical assistance to LEA Liaisons and staff on all provisions of the law including those related to fees, fines, and absences. The ISDE and all LEAs must have a current homeless education policy that removes barriers including those due to enrollment and retention due to outstanding fees or fines, or absences. This is monitored at the LEA level through the federal program monitoring process.

7. Assistance from Counselors (722(g)(1)(K)): A description of how youths described in section 725(2) will receive assistance from counselors to advise such youths, and prepare and improve the readiness of such youths for college.

The state coordinator works with LEA liaisons and school counselors at the secondary level to make sure homeless youth are receiving appropriate credit for full or partial coursework satisfactorily completed while attending a prior school, in accordance with state, local, and school policies. A new indicator has been added to the 17-18 monitoring tool to address how youth will receive assistance from counselors to prepare and improve the readiness for college. It is a requirement and an expectation from the ISDE that counselors/liaisons will inform unaccompanied homeless youth of their status as independent students under section 480 of the Higher Education Act of 1965, and that they may obtain assistance from the liaison to receive verification of such status for the purposes of the Free Application for Federal Student Aid. ISDE training will be offered to counselors as well as training in collaboration with Higher Education program staff.

**STATE DEPARTMENT OF EDUCATION  
AUGUST 10, 2017**

**Appendix A: Measurements of interim progress**

*Instructions: Each SEA must include the measurements of interim progress toward meeting the long-term goals for academic achievement, graduation rates, and English language proficiency, set forth in the State's response to Title I, Part A question 4.iii, for all students and separately for each subgroup of students, including those listed in response to question 4.i.a. of this document. For academic achievement and graduation rates, the State's measurements of interim progress must take into account the improvement necessary on such measures to make significant progress in closing statewide proficiency and graduation rate gaps.*

**A. Academic Achievement**

**Mathematics baseline, long-term goals and interim targets**

Mathematics	Baseline	Interim progress					Long-term goal
	2016	2017	2018	2019	2020	2021	2022
All Students	41.6%	44.8%	48.0%	51.2%	54.4%	57.6%	60.8%
Economically Disadvantaged Students	30.3%	33.8%	37.3%	40.8%	44.3%	47.8%	51.3%

AUGUST 10, 2017**

---

**C. Progress in Achieving English Language Proficiency**  
**English proficiency baseline, long-term goals and interim targets**

<b>Baseline</b>	<b>Interim progress</b>				<b>Long-term goal</b>
<b>2017</b>	<b>2018</b>	<b>2019</b>	<b>2020</b>	<b>2021</b>	<b>2022</b>
33.2%	36.9%	40.6%	44.3%	48.1%	51.8%

## **Appendix B: Idaho's Accountability Framework**

### **01. School Category.**

- a.** Kindergarten through grade eight (K-8): Schools in this category include elementary and middle schools as defined in Subsection 112.05.f.
- b.** High Schools, not designated as alternative high schools, as defined in Subsection 112.05.f.
- c.** Alternative High Schools

### **02. Academic Measures by School Category.**

- a.** K-8:
  - i.** Idaho Standards Achievement Tests (ISAT) Proficiency.
  - ii.** ISAT growth toward proficiency based on a trajectory model approved by the State Board of Education.
  - iii.** ISAT proficiency gap closure.
  - iv.** Idaho statewide reading assessment proficiency.
  - v.** English Learners achieving English language proficiency.
  - vi.** English Learners achieving English language growth toward proficiency.
- b.** High School:
  - i.** ISAT proficiency.
  - ii.** ISAT proficiency gap closure.
  - iii.** English Learners achieving English language proficiency.
  - iv.** English Learners achieving English language growth toward proficiency.
  - v.** Four (4) year cohort graduation rate, including students who complete graduation requirements prior to the start of the school district or charter schools next fall term.
  - vi.** Five (5) year cohort graduation rate, including students who complete graduation requirements prior to the start of the school district or charter schools next fall term.
- c.** Alternative High School:
  - i.** ISAT proficiency.
  - ii.** English learners achieving English language proficiency.
  - iii.** English learners achieving English language growth towards proficiency.
  - iv.** Four (4) year cohort graduation rate, including students who complete graduation requirements prior to the start of the school district or charter schools next fall term.
  - v.** Five (5) year cohort graduation rate, including students who complete graduation requirements prior to the start of the school district or charter schools next fall term.

### **03. School Quality Measures by School Category.**

- a.** K-8:
  - i.** Students in grade 8 enrolled in pre-algebra or higher.
  - ii.** State satisfaction and engagement survey administered to parents, students, and teachers (effective starting in the 2018-2019 school year).
  - iii.** Communication with parents on student achievement (effective starting in the 2018-2019 school year).
- b.** High School:
  - i.** College and career readiness determined through a combination of students participating in advanced opportunities, earning industry recognized certification, and/or participation in recognized high school apprenticeship programs.

## **Appendix C: GEPA 427 Statement**

### Information Regarding Equitable Access to and Participation in the Programs included in the Idaho Consolidated State Plan

The Idaho State Department of Education (ISDE) adheres to Section 427 of the General Education Provisions Act (GEPA). In carrying out its educational mission, the Idaho State Department of Education will ensure to the fullest extent possible equitable access to, participation in, and appropriate educational opportunities for individuals served. Federally funded activities, programs, and services will be accessible to all teachers, students and program beneficiaries. The ISDE ensures equal access and participation to all persons regardless of their race, color, ethnicity, religion, national origin, age, citizenship status, disability, gender or sexual orientation in its education programs, services, and/or activities.

For state-level activities as well as all other activities supported by federal assistance through our electronic grant application, ISDE will fully enforce all federal and state laws and regulations designed to ensure equitable access to all program beneficiaries and to overcome barriers to equitable participation.

The ISDE will hold LEAs accountable for ensuring equal access and providing reasonable and appropriate accommodations to meet the needs of a diverse group of students, staff, community members and other participants.

Steps taken to ensure equitable access may include, but are not limited to the following; developing and administering a pre-participation survey to all potential participants in order to identify special accommodation needs (i.e., wheelchair access, assistive technology, transportation assistance); holding program related sessions/activities in Americans with Disabilities Act (ADA) accessible and compliant facilities; printing materials in multiple languages, when appropriate; offering multi-lingual services for participants and others as needed and appropriate; responsiveness to cultural differences; fostering a positive school climate through restorative practices; conducting outreach efforts and target marketing to those not likely to participate; making program materials available in braille or via audiotapes, when appropriate; providing assistive technology devices to translate/make accessible grant and program materials for participants requiring such accommodations; using technologies to convey content of program materials; using materials that include strategies for addressing the needs of all participants; pre-program gender and cultural awareness training for participants; development and/or acquisition and dissemination of culturally relevant and sensitive curriculum and informational materials; use of transportation services that include handicapped accommodations; transportation vouchers or other forms of assistance, on an as needed basis, to members (including teachers, students, and families) who must use public transportation to attend program activities.
