The Idaho SBDC has a proven track record of utilizing state and federal funds to deliver solid results for Idaho's economy. (see table below) We have currently optimized our regional offices across the state, and have the opportunity to focus on the rural need and opportunity, which needs additional resources to effectively reach Idaho's rural areas. The initial targeted areas will be Sandpoint, Driggs/Victor, and Lewiston

Idaho SBDC Impact Data	**2018**	**2019**	**2020**
Jobs Created	998	808	586
Clients Served	1,661	1,845	2,179
Businesses Started	100	99	67
Sales Growth	$67M	$61M	$40M
Capital Raised	$50M	$48M	$71M
Training Events	265	312	349

Consulting Hours	19,368	20,436	27,070
Current Percent of Rural Clients Served	24%	26%	27%

2. **If a supplemental, what emergency is being addressed?**
   N/A

3. **Indicate existing base of PC, OE, and/or CO by source:**

Ongoing funding is requested to increase the available hours of one part-time position with the long term goal being to increase the funding beyond the 3.1% cap requested by the Governor ($16,000) to increase hours for three existing positions and travel to best serve rural areas.

Rural outreach is not something that needs one-time or short-term funding. Our staff need to have a sustained footprint within the rural parts of each region to host training, build relationships, increase our awareness and be available for one-on-one consulting in order to most effectively provide the Idaho SBDC services needed to assist rural businesses succeed.

Two SBDC regional offices have tested a distributed staffing model, whereby business consultants are remotely located in rural areas. This approach has allowed the SBDC consultants to be more responsive to needs of local companies, has built stronger community relationships, and delivered quality consulting. The Idaho SBDC is seeking to expand this approach in additional rural parts of Idaho.

4. **What resources are necessary to implement this request?**

One office will receive funding to increase hours of one part-time remote rural consultant position. The long term plan is to increase our statewide rural reach by adding new part-time positions to three of our six regions. However, this request is focused on North Idaho as it our most immediate opportunity.

- Personnel: Three new remotely located part-time positions
  - Region I: Rural SBDC Consultant for north Idaho (Sandpoint)

5. **List positions, pay grades, full/part-time, benefits, terms of service**

Location	*Sandpoint*
FTP	*.5 FTP*
Title	*Rural Service Consultant*

Role Description	*New position dedicated to a rural location*
Personnel	$11,200.00
Fringe	$4,800.00
Travel	$0.00
Total	$16,000.00

6. **Will staff be redirected? If so, describe impact and show changes on org chart**
   N/A
7. **Provide additional detail about the request, including one-time versus ongoing. Include a description of major revenue assumptions, for example, whether there is a new customer base, fee structure changes, or anticipated grant awards.**

$16,000 is being requested to increase .25 FTP to the SBDC network to increase hours of rural consulting in Coeur d'Alene.

The request is for ongoing funding that would be added to the base.

8. **Describe method of calculation**

   This request used market rates based on current consultant salaries.

9. **Provide detail about the revenue assumptions supporting this request**
   Every dollar invested into the SBDC provides a sizable return to the state of Idaho in tax revenue based on new jobs created in the state. Additionally, each State dollar invested into the SBDC network can be leveraged to increase Federal grants that support the economic development of Idaho. Over the past 10 years, the SBDC has averaged a **5:1 return on investment** for Idaho State funds put into the network. We expect this return ratio to continue upon this increase in base funding.

10. **Who is being served by this request and what are the expected impacts of the funding requested? If this request is not funded who and what are impacted?**

The request is designed to primarily serve businesses located in Rural parts of Idaho, which accounts for roughly 23% of the total clients served by the Idaho SBDC. Last year the SBDC helped create 586 jobs in the state of Idaho. Of those jobs created, 217 were located in rural parts of Idaho (37% of jobs created). The SBDC also helped rural businesses retain and additional 55 jobs. Those rural businesses accessed $20.7 million in capital and had sales growth of over $12.3 million. There is opportunity and need to increase assistance and the economic impact to rural Idaho.

If this request is not funded, the Idaho SBDC will continue serving businesses in the more rural parts of the state in a limited capacity. However, without additional funding, we expect to deliver only a fraction of the impact to small businesses we believe possible in the rural communities; thus not realizing the potential for increased growth of Idaho's businesses.

LUMP SUM:					
GRAND TOTAL	$44,000				$100,700

1. What is being requested and why? Specifically, what problem is this request trying to solve and how does this request address that problem?

We are requesting a full-time permanent Software Engineer III to shift development of the Board's student focused web-applications for Apply Idaho, Scholarship Idaho, and Next Steps Idaho from two external vendors to one internal resource. This approach would support development of integrations among and between these applications as well as the State Department of Education's Advanced Opportunities portal.

These integrations will improve access, support, and usability for Idaho student's as they navigate state-supported postsecondary opportunities by:

- Reducing the number of unique logins from four down to one.
- Allowing students easier access to their postsecondary planning tools outside of the classroom.
- Reducing the number of times students must respond to similar questions across the four web-applications.

Additionally, it would provide the Board office complete oversight for development, maintenance, and hosting these applications.

a. If a supplemental request, explain how this request arises to the level of being an emergency for the agency.

N/A

2. Indicate the specific source of authority, whether in statute or rule, that supports this request.

This position would support the following Idaho State Board of Education student focused initiatives: Direct Admissions (included in Apply Idaho), Apply Idaho, Scholarship Idaho, and Next Steps Idaho as well as work with the incumbent Software Engineer III on the State Department of Education's Advanced Opportunity portal.

3. What is the agency staffing level, OE, or CO for this activity currently and how much funding, by source, is in the Base?

Currently development for Apply Idaho, Scholarship Idaho and Next Steps Idaho is completed by outside vendors working under contract for the Board office.

Apply Idaho and Scholarship Idaho

Current State: The first vendor provides development and maintenance services for Apply Idaho and is currently building Scholarship Idaho in four phases with the final phase completed by June 30, 2022. OSBE currently hosts both applications on internal servers.

Future State: Hiring an additional Software Engineer III would allow the Board office to have full control of new development, maintenance and hosting going forward and would lead to less investment in outside vendor costs. We expect current OE expenditures which cover maintenance, enhancements, and project management with our vendor ($26,000 for both applications) would shift to cover PC expenditures for this position as well as cover a one-time training expenditure for the current vendor to provide a knowledge transfer of existing systems and technologies implemented to the new position. In the long term we anticipate cost savings by having one Software Engineer III working on both applications by leveraging code between the two. CO costs would continue as-is.

Next Steps Idaho
Current State: Next Steps Idaho is currently designed and developed by a vendor selected through the state's procurement process (RFP). This same vendor is also responsible for overseeing hosting utilizing Amazon's Web Services (AWS). Additionally, the contract with this vendor includes brand management and creative strategies, market research, media strategy, buying and reporting as well as public relations.

Future State: With this position request we would reduce our investment in an external vendor by $185,500 through assigning development, project management and hosting oversite to our Technology Services unit. We would continue to utilize $124,000 in OE for outside expertise obtained via an RFP for user experience design as well as continued brand management and creative strategies, market research, media strategy, buying and reporting as well as public relations.

We believe we can commit $51,000 of this reduction in investment previously and reallocate it toward the new position:

- PC to cover salary and benefits for the new position,
- OE to cover a one-time knowledge transfer from the current vendor on existing systems and technologies implemented to the new position; on-going training for Technology Services staff on AWS technologies, and cover annual AWS hosting costs.

In the long term we anticipate cost savings by leveraging code developed by one Software Engineer III rather than contracting with multiple vendors. This consolidation of development duties would mean code could be executed across not only Next Steps Idaho but also Apply Idaho, Scholarship Idaho and potentially the Advanced Opportunities portal as well.

4. What resources are necessary to implement this request?

a. List by position: position titles, pay grades, full or part-time status, benefit eligibility, anticipated dates of hire and terms of service.

Position Title: Software Engineer III
Pay Grade: M
Status: Full-time
Benefit Eligibility: Eligible
Anticipated Hire Date: July 2022
Terms of Service: Permanent

b. Note any existing agency human resources that will be redirected to this new effort, how existing operations will be impacted, and anticipated oversight the position would have over other employees. Please indicate any requested personnel on the organizational chart submitted with this budget request.

This position would be a part of the Board Office's Technology Services Application Development and Education Data Systems team. It would have the same reporting structure and oversight as incumbent Software Engineer III positions working on other initiatives.

c. List any additional operating funds and capital items needed and note onetime versus ongoing costs.

Initially this position would need the following capital items: computer, monitors and docking station. These capital items would then be included in OSBE's on-going capital replacement plan. OE funds being requested would include a one-time knowledge transfer from both vendors, as well as annual AWS technologies training.

d. What is the basis for the requested resources? How were PC, OE, or CO needs projected? Was an RFI done to project estimated costs (if so, please attach a copy of the basis for your cost estimates)?

- Requested PC resources were based on parity with incumbent Software Engineer III in the Technology Services Application Development and Education Data System team.
- Requested OE resources are estimated knowledge transfer costs (not based on an RFI since they are vendor specific) from each vendor as well as estimated AWS Training and Certification costs found at:
  https://aws.amazon.com/training/?nc2=sb_tc
- CO resources are based on providing equivalent equipment to that already provided to incumbent Software Engineer III employed at OSBE.

5. Provide additional detail about the request, including one-time versus ongoing. Include a description of major revenue assumptions, for example, whether there is a new customer base, fee structure changes, anticipated grant awards, or anticipated partnerships with other state agencies or other entities.

Our request is for on-going support of this position. The applications this Software Engineer III would be responsible are integral to the success of the Board's key postsecondary inclusion and access initiatives:

- Direct Admissions- a proactive admissions program established to give more young Idahoans the opportunity to obtain a professional certificate or accredited degree, this initiative removes barriers and encourages high school graduates to extend their training before entering the workforce.

- Apply Idaho – is a free common college application available to Idaho high school seniors that can be sent to as many as 10 accredited in-state colleges.
- Scholarship Idaho – a scholarship application system for scholarships administered by the State Board of Education with funding from a variety of sources.
- Next Steps Idaho – sponsored by Board, in partnership with Idaho's employers and the state's Workforce Development Council, this comprehensive clearinghouse of resources and tools pertaining to education, training, and career exploration and development intends to demystify post-high school landscape, helps Idahoans discover resources and purpose and it trusted by parents and prescribed by counselors and career advisors.
- Advanced Opportunities Portal – this application supports Idaho students, their parents, and Idaho schools' input and track funding requests for overload courses, dual credits and exams included as part of the state's Advanced Opportunity program.

6. Who is being served by this request and what are the expected impacts of the funding requested? If this request is not funded who and what are impacted?

The request would have an immediate impact on Idaho students looking to pursuing postsecondary opportunities via our state's Workforce Training Centers, community colleges and four-year institutions. One goal for bringing these applications in-house is to streamline the login process for students. Currently each application requires separate login credentials, but with all applications in-house we could work toward SSO thereby allowing students to utilize only one username and password to access state sponsored education tools. This would also impact educators who would not have to consistently spend valuable class time assisting students in resetting passwords.

A second goal is to be able to integrate these applications as much as possible to reduce the duplicative data entry students are currently required to provide. Integration would allow data to flow between these applications thereby reducing application time for students and provide more consistent data entry which would enhance and speed up the annual scholarship awarding process and provide more consistency in annual reports.

As a by-product of bringing these applications in-house the state would have increased flexibility to respond to stakeholder and partner agency needs. Within the current structure, when a stakeholder or partner organizations makes a request for new content, a change orders must be processed with the vendor(s) and additionally there must be available funding within the vendor contract to pursue the project. With the development in-house we could increase our responsiveness

since it would be a matter of internal reprioritization rather than first looking at available funds and then processing additional paperwork.

If the request for a Software Engineer III is not funded, then we will miss out on the opportunity to make navigating postsecondary opportunities easier for Idaho students as well as continue to experience lags in our ability to respond to stakeholder and partner organization needs.

Description:
Project Coordinator to support strategic planning, administrative rulemaking, and other operational demands related to fulfillment of Board governance responsibilities and advancement of Board priorities.

Questions:
1. What is being requested and why? Specifically, what problem is this request trying to solve and how does this request address that problem?

This position would support the Chief Planning and Policy Officer (CPPO) to help fulfill statutory requirements. The CPPO performs analysis of statewide and Board education policy, including the identification, development and coordination of state education policy through proposed legislation and administrative rules. The CPPO works with our DAG to draft all legislative language and proposed/pending administrative rules. The CPPO

provides interpretations of state education statutes, administrative rules, and Board policy to education stakeholders including school districts, postsecondary institutions, state agencies and state policy makers. The CPPO provides technical assistance to school districts and other education stakeholders on compliance with state laws and Board policy, including, review and feedback on various plans (e.g. school district literacy and continuous improvement plans and postsecondary institution and agency strategic plans) that are required to be submitted to the State Board of Education. The CPPO provides staff support to the Board's Policy, Planning and Government Affairs Committee. The CPPO oversees strategic planning development and coordination for the State Board of Education, the Office of the State Board of Education, and the statewide educational system. For three consecutive years the CPPO provided technical support and subject matter expertise to the legislature's interim committee on the public school funding formula. In 2019 the CPPO provided technical support and subject matter expertise to the Governor's Our Kids, Idaho's Future Task Force. The CPPO has direct supervision of three staff. The CPPO is part of OSBE's senior management team providing strategic leadership to the Board and its executive director.

The current workload for the CPPO is unreasonable and unstainable, which creates bottlenecks in Board business processes. While some tasks are one-time in nature (e.g. interim committees and task forces), history has shown something else will come along that will place equal demands on the CPPO's time and subject matter expertise. The requested Project Coordinator would be a mid-level position with the knowledge, skills and abilities to fulfill certain responsibilities currently performed by the CPPO in order to allow the CPPO to focus on higher level duties and mission fulfillment.

Examples of responsibilities include, but are not limited to: (1) coordination with the postsecondary institutions and agencies under the Board governance and oversight on the submittal of annual strategic plan updates to the Board and submittal of said plans to the Division of Financial Management following Board approval; (2) coordination of requests for policy and administrative rule amendments; (3) coordination and scheduling of public forums around various Board initiatives; and (4) coordination of the annual negotiated rulemaking process.

2. Indicate the specific source of authority, whether in statute or rule, that supports this request.

Strategic Plans: Idaho Code § 67-1901 et seq.
Administrative Rulemaking: Idaho Constitution Art. IX, §2; Idaho Code § 33-105

3. What is the agency staffing level, OE, or CO for this activity currently and how much funding, by source, is in the Base?

1 FTP salary = $53,200 + benefits, General Funds

4. What resources are necessary to implement this request?
a. List by position: position titles, pay grades, full or part-time status, benefit eligibility, anticipated dates of hire and terms of service.

Project Coordinator; pay grade L; full-time; benefit eligible; July 1, 2022 date of hire; non-classified

b. Note any existing agency human resources that will be redirected to this new effort, how existing operations will be impacted, and anticipated oversight the position would have over other employees. Please indicate any requested personnel on the organizational chart submitted with this budget request.

Presently, the CPPO performs all work related to reviewing strategic plans for all 22 agencies, institutions and programs under the aegis of the State Board prior to review and approval by the Board and submission to DFM pursuant to Idaho Code § 67-1903(1). The CPPO is also responsible for overseeing the entire administrative rules and rulemaking process for the State Board of Education, State Department of Education, Division of Career Technical Education and Division of Vocational Rehabilitation. This includes drafting notices for publication in the Administrative Rules Bulletin, drafting the rules, conducting negotiated rulemaking hearings, and working with the Dept. of Administration and DFM rules coordinators. The CPPO also presents all administrative rules promulgated by the Board to the germane committees of the legislature as part of the legislative rules review process. The workload necessary to fulfill these two responsibilities alone is vastly time consuming, yet only represents a fraction of the CPPO's overall role and responsibilities.

The Project Coordinator would assume responsibility for the annual collection, coordination and review of the 22 strategic plans. The position would also fulfill the role of administrative rules coordinator for OSBE, which requires sophisticated oversight, attention to detail and content awareness.

c. List any additional operating funds and capital items needed and note onetime versus ongoing costs. $850 for standard desktop computer and $280 for flat panel monitor (onetime).

d. What is the basis for the requested resources? How were PC, OE, or CO needs projected? Was an RFI done to project estimated costs (if so, please attach a copy of the basis for your cost estimates)?

PC costs based on DHR Job Classification for Project Coordinator
CO costs based on Budget Development Manuel, Budget Estimate Guidelines, Figure 6, page 25.

5. Provide additional detail about the request, including one-time versus ongoing.
Include a description of major revenue assumptions, for example, whether there is a new customer base, fee structure changes, anticipated grant awards, or anticipated partnerships with other state agencies or other entities.

PC is ongoing, CO is one-time.

6. Who is being served by this request and what are the expected impacts of the funding requested? If this request is not funded who and what are impacted?

The Governor's Office, Legislature, State Board of Education, DFM, State Department of Education, Division of Career Technical Education and Division of Vocational Rehabilitation, school districts, students and education stakeholders will all be served by this request. Failure to fund the request will directly impair the ability of the State Board to fulfill certain statutory responsibilities.

GRAND TOTAL	$185,700				$185,700

1. What is being requested and why? Specifically, what problem is this request trying to solve and how does this request address that problem?

The request is to fund a Chief Audit Executive to oversee the direction of the internal audit functions at the four four-year institutions. This position will support the institutions through the standardization of processes, by establishing common standards and practices for consistency in Internal Audit at Boise State University, Idaho State University, Lewis-Clark State College, and The University of Idaho. This position will become a member of the Office of the State Board of Education and will develop a proposal to reduce costs and generate efficiencies by consolidation.

The position currently exists at Boise State University and is on loan to the Office of the State Board of Education until June 30, 2022, at which time, if approved, the position will formally move. The work of the first year will be to develop a consolidated system in conjunction with the Audit Committee of the State Board of Education, which is anticipated to save more than $100,000 in cost savings.

The funding for this position will come from all the four-year universities, and proportionally divided based on general fund appropriation. No new funding request is being made for this position, which will be housed at the Office of the State Board of Education. The Chief Audit Executive will report to the Audit Committee of the State Board of Education.

Next year the FY 2024 budget request for all internal audit functions will be submitted which will also require funding to be transferred to the Office of the State Board of Education.

a. If a supplemental request, explain how this request arises to the level of being an emergency for the agency.
N/A

2. Indicate the specific source of authority, whether in statute or rule, that supports this request.

3. What is the agency staffing level, OE, or CO for this activity currently and how much funding, by source, is in the Base?

There is no current funding in the Board Office but the funds to support this will be appropriated through deductions at the institutions that will support the single Chief Audit Executive and the OE/CO to support the position.

4. What resources are necessary to implement this request?
a. List by position: position titles, pay grades, full or part-time status, benefit eligibility, anticipated dates of hire and terms of service.

One Chief Audit Executive at $130,000, full-time, benefit eligible. If approved, the position would move to the Office of the State Board of Education effective July 1, 2022.

b. Note any existing agency human resources that will be redirected to this new effort, how existing operations will be impacted, and anticipated oversight the position would have over other employees. Please indicate any requested personnel on the organizational chart submitted with this budget request.

The Chief Audit Executive at the Office of the State Board of Education would have an oversight role on process, and policies and will develop audit plans for all of the institutions to seek to gain efficiencies. There will eventually be direct personnel reporting from the institutions to this new position, but the process for that transition will

be part of the work the Chief Audit Executive does while on load to OSBE in this first year.

c. List any additional operating funds and capital items needed and note onetime versus ongoing costs.

One-time costs would include a desk and computer workstation which are one-time funds. Ongoing costs would be travel to the institutions at least once annually.

d. What is the basis for the requested resources? How were PC, OE, or CO needs projected? Was an RFI done to project estimated costs (if so, please attach a copy of the basis for your cost estimates)?

The position was established based on the salaries within the state for internal auditors, and within state systems. OE was based on estimates of travel in the first year, as well as general supplies and annual conferences to keep certifications in order. CO was based on the traditional cost per work station and travel was based on previous estimates of travel to the various institutions.

5. Provide additional detail about the request, including one-time versus ongoing. Include a description of major revenue assumptions, for example, whether there is a new customer base, fee structure changes, anticipated grant awards, or anticipated partnerships with other state agencies or other entities.
No additional funding is being requested for appropriation. We request the transfer of funding from the four four-year higher education institutions. and the authority to add one FTE to the Office of the State Board of Education.
6. Who is being served by this request and what are the expected impacts of the funding requested? If this request is not funded who and what are impacted?
This supports the work of the Higher Education Task Force to find efficiencies. This wil,l however, create greater coordination with the Audit Committee and greater standardization of the audit guidelines for all institutions. This requires no further appropriation but could result in significant savings.

.

LUMP SUM:					
GRAND TOTAL	$153,200				$153,200

1. What is being requested and why? Specifically, what problem is this request trying to solve and how does this request address that problem?

The request is to fund a Systemwide Risk Manager to oversee the direction of risk management at the four four-year institutions. This position will support the institutions through the standardization of policy, through collaborative insurance purchasing, and by establishing common standards and practices for consistency at Boise State University, Idaho State University, Lewis-Clark State College, and The University of Idaho. The funding for this position will come from the three universities, and proportionally divided based on general fund appropriation. No new funding request is being made for this position, which will be housed at the Office of the State Board of Education.

a. If a supplemental request, explain how this request arises to the level of being an emergency for the agency.
N/A

2. Indicate the specific source of authority, whether in statute or rule, that supports this request.

3. What is the agency staffing level, OE, or CO for this activity currently and how much funding, by source, is in the Base?

There is no current funding in the Board Office but the funds to support this will be appropriated through deductions at the institutions that will support the single Systemwide Risk Manager and the OE/CO to support the position.

4. What resources are necessary to implement this request?
a. List by position: position titles, pay grades, full or part-time status, benefit eligibility, anticipated dates of hire and terms of service.

One Systemwide Risk Manager at $105,000, full-time, benefit eligible. If approved, the position would move to the Office of the State Board of Education effective July 1, 2022.

b. Note any existing agency human resources that will be redirected to this new effort, how existing operations will be impacted, and anticipated oversight the position would have over other employees. Please indicate any requested personnel on the organizational chart submitted with this budget request.

The Systemwide Risk Manager at the Office of the State Board of Education would have an oversight role on process, policies and insurance procurement for policies specialized for higher education institutions. There would not be direct personnel reporting from the institutions to this new position.

c. List any additional operating funds and capital items needed and note onetime versus ongoing costs.

One-time costs would include a desk and computer workstation which are one-time funds. Ongoing costs would be travel to the institutions at least once annually.

d. What is the basis for the requested resources? How were PC, OE, or CO needs projected? Was an RFI done to project estimated costs (if so, please attach a copy of the basis for your cost estimates)?

The position was established based on the salaries within the state for risk management positions. CO was based on the traditional cost per work station and travel was based on previous estimates of travel to the various institutions.

5. Provide additional detail about the request, including one-time versus ongoing. Include a description of major revenue assumptions, for example, whether there is a new customer base, fee structure changes, anticipated grant awards, or anticipated partnerships with other state agencies or other entities.

No additional funding is being requested for appropriation. We request the transfer of funding from the three universities and the spending authority to add one FTE to t he Office of the State Board of Education.

6. Who is being served by this request and what are the expected impacts of the funding requested? If this request is not funded who and what are impacted?

This supports the work of the Higher Education Task Force to find efficiencies. In reviewing options, a committee determined that there is likely not going to be an overall savings in PC. However, by working together for training, policy development and insurance policies, there will likely be savings by having the institutions work together.

.

Request Narrative

1. Explain the request and provide justification for the need.

Since SFY 2017, IdahoPTV and its component unit, Friends of Idaho Public Television has seen a steady increase in its membership and sponsorship (Local Production underwriting) revenue. In fact membership revenue has increased by over $930,000 from SFY 2017 to SFY 2021. This is a 34.5% increase. In addition the sponsorship revenue for local production has increased by over $400,000 or 128.9% over the same time period. These increases add up to an overall increase of $1,330,000.

Conversely, the dedicated, ongoing, total appropriation spending authority from SFY 2017 to SFY 2021 only increased by $249,000 or 4.3%.

Because of this discrepancy, IdahoPTV is asking for an increase in its ongoing spending authority of $900,000 for its dedicated/private funds to meet some pressing needs within the station.

IdahoPTV is requesting an allocation of this ongoing spending authority between personnel ($400,000) and operating ($500,000).

There are several reasons for the requested increase of $400,000 in private dollar personnel spending authority:

- *The station does a lot of production work utilizing group or temporary employees. For example in SFY 2021 group employees were heavily involved with the production of "Capitol of Light Turns 100" & "Resilient Idaho: Hope Lives here". The production team enjoys working on these types of projects. Production projects like these help IdahoPTV establish new partners in the community. Group or temporary employees are critical with helping us tell important Idaho stories.*
- *In our SFY 2021 our engineering department saw a substantial increase in the number of seasonal employees needed for Idaho in Session. We expect this need to continue. With the recent passing of one of the stations Chief Regional Engineer and with many of our Regional Engineer approaching retirement age, we anticipate a need for additional regional engineering support.*
- *In SFY 2022, IdahoPTV is going to work with the State Division of Human Resources (DHR) on addressing some compensation concerns within the organization. When compared with other Public Television Stations of similar size, the compensation for some IdahoPTV is below average for several of its positions. We want to address this need within our station so we can retain our talented staff in key areas within the organization.*

Here are the reasons we are requesting an ongoing increase of $500,000 in operating private dollar spending authority:

- *Since SFY 2017, we have seen a significant increase in the cost of securing content for our five over-the-air channels and our **On Demand** content available via computer or other streaming device. In SFY 2017 we paid approximately $1.32 million. In SFY 2022, we are budgeting $1.68 million due to expected increases communicated to us by our content suppliers. (Ongoing increase of $360,000)*
- *We are looking to invest in creative ways to expand our donor base such as purchasing targeted direct mailing lists. (Ongoing increase estimated at $60,000)*
- *We are looking to increase our advertising spend in SFY 2023 and beyond to reach potential donors who have recently moved into the state and/or accessing our content via streaming. In addition, we are looking to increase our advertising spend to educate parents and teachers regarding the educational resources available through IdahoPTV. (Ongoing increase estimated at $80,000)*
- *We are also seeing an increase in our production costs for local programming like: Outdoor Idaho & Idaho Experience.*

2. If a supplemental, what emergency is being addressed?

   This is a line item request.

3. Indicate existing base of PC, OE, and/or CO by source for this request.

   IdahoPTV's ongoing dedicated/private dollar fund in SFY 2022 is the following:

Personnel:	*$3,690,600*
Operating:	*$2,432,900*
Total:	*$6,123,500*

   If this ongoing increase is approved, it will increase these totals to the following:

Personnel:	*$4,090,600*
Operating:	*$2,932,900*
Total:	*$7,023,500*

   While this is a 14.7% increase over IdahoPTV's original SFY 2022 appropriation we have the ongoing funds available to meet this increase and important needs within the organization that we can satisfy with this ongoing increase.

4. What resources are necessary to implement this request?

   We have the current staff to administer the appropriate spending and monitoring of this requested increase in spending authority.

5. List positions, pay grades, full/part-time status, benefits, terms of service.

   While no additional FTP authority is associated with this request, we will utilize group/temporary employees to meet our increased demand in production and engineering.

   In addition, IdahoPTV is going to work (and will continue to work) with DHR on addressing some compensation concerns within the organization. When compared with other Public Television Stations of similar size, the compensation for some IdahoPTV is below average for several of its positions. We want to address this need within our station so we can retain our talented staff in key areas within the organization.

6. Will staff be re-directed? If so, describe impact and show changes on org chart.

   No, staff will not be re-directed.

7. Detail any current one-time or ongoing OE or CO and any other future costs.

If funded, this request will not have any additional impact on one-time or ongoing OE or CO expenditures. We will not obligate the State of Idaho or IdahoPTV to any future costs that we cannot maintain within our legislative appropriation.

8. Describe method of calculation (RFI, market cost, etc.) and contingencies.

   Historical costs and market trends were used for determine amount of additional ongoing spending authority needed to meet IdahoPTV's needs in SFY 2023.

9. Provide detail about the revenue assumptions supporting this request.

   As mentioned above, since SFY 2017, IdahoPTV and its component unit, Friends of Idaho Public Television has seen a steady increase in its membership and sponsorship (Local Production underwriting) revenue. In fact membership revenue has increased by over $930,000 from SFY 2017 to SFY 2021. This is a 34.5% increase. In addition the sponsorship revenue for local production has increased by over $400,000 or 128.9% over the same time period. These increases add up to an overall increase of $1,330,000.

   .

10. Who is being served by this request and what is the impact if not funded?

    The citizens of Idaho, but in particular our donors who generously support IdahoPTV. They want us to invest their money so we can continue to broadcast quality local and national programming.

    If this additional spending authority is not authorized, it will severely hamper IdahoPTV's ability to meet its seasonal staffing needs, its retention of high performing staff, and it will limit our ability to reach potential donors.

AGENCY: Idaho State Council for the Deaf and Hard of Hearing (CDHH) | Agency No.: 523 | FY 2023 Request

FUNCTION: CDHH Administration | Function No.: 01 | Page 1 of 5 Pages

ACTIVITY: CDHH | Activity No.: | Original Submission _X_ or Revision No. ___

A: Decision Unit No: 12.01 Title: **Deaf and HH Program Specialist** Priority Ranking 1 of 2

DESCRIPTION	General	Dedicated	Federal	Other	Total
FULL TIME POSITIONS (FTP)	1.00				1.0
PERSONNEL COSTS:					
1. Salaries Pay Grade M	$60,100				$60,100
2. Benefits	24,700				24,700
3. Group Position Funding					
TOTAL PERSONNEL COSTS:	$84,800				$84,800
OPERATING EXPENDITURES **by summary object:**					
1. Travel	$4,000				$4,000
2. IT Support/Cell phone	1,800				1,800
3.					
TOTAL OPERATING EXPENDITURES:	$5,800				$5,800
CAPITAL OUTLAY **by summary object:**					
1. PC and workstation set-up	$3,000				$3,000
2. Cell phone	400				400
TOTAL CAPITAL OUTLAY:	$3,400				$3,400
T/B PAYMENTS:					
LUMP SUM:					
GRAND TOTAL	$94,000				$94,000

Questions:

1. What is being requested and why? What is the agency staffing level for this activity and how much funding by source is in the base?

   The Council for the Deaf and Hard of Hearing is requesting one (1) additional Full Time Employee (FTE) identified as Deaf and Hard of Hearing Program Specialist. The Council for the Deaf and Hard of Hearing is a unique state agency following its mission of being "*Dedicated to making Idaho a place where persons, of all ages, who are deaf or hard of hearing have an equal opportunity to participate fully as*

active, productive and independent citizens." Using the formula of 13% provided by the Gallaudet Research Institute, an estimated 237,498 people in Idaho have hearing loss:

Total Idaho Population	1,826,913
Total Hearing Loss	237,498 (13%)
Severe Hearing Loss	36,538 (2.2%)
Profound Hearing Loss (deaf)	3,653 (.22%)

Currently, there are only **3.5** FTE's working for the Council, the Executive Director, Administrative Assistant, Communication and Outreach Coordinator, and ASL Interpreter. With the establishment of Idaho Sound Beginnings (newborn hearing screening) children who have hearing loss are being identified earlier, baby-boomers are increasing, and veterans are returning to civilian life. **During the last several years, Idaho saw a huge influx of people moving into the state, including deaf and hard of hearing individuals.** The aforementioned causes the need for an additional staff member to provide specific functions for the Council. The role of the Deaf and Hard of Hearing Program Specialist would be to provide support of the Council's role, services, and programs throughout the state of Idaho. Strategies may include aiding deaf and hard of hearing individuals to access goods and services at all levels of state and local government as well as all facets of life. The specialist will also assist both deaf and hard of hearing consumers in understanding their rights and responsibilities related to equal access, resolving issues of barriers to communication, filing complaint for non-compliant service providers and education on a wide range of topics to improve quality of life.

One-time funds for initial office set up as desk, chair, desktop computers, monitors are also being requested.

Currently there is no agency staffing for this position and no funding by source is in the base.

2. What resources are necessary to implement this request?
   a. List by position: position titles, pay grades, full or part-time status, benefit eligibility, anticipated dates of hire, and terms of service.

The title of this position is: Deaf and Hard of Hearing Program Specialist
Pay Grade: M
Full Time Status
Full Benefits
Anticipated Date of Hire: July 1, 2022
Terms of Service: NA

b. Note any existing human resources that will be redirected to this new effort and how existing operations will be impacted.

Existing Human Resources would be redirected to hire candidate. If this position were approved and funded, it would allow the current staff members to spend 100% of their quality time on their assigned duties.

Currently, more than 75% of the time spent by the agency staff is consumed focusing on systemic issues and relations rather than on customers themselves. The examples of significant percentages of time spent were on outreach, education and collaboration with other agencies and organizations to assist them with understanding their obligations under the Americans with Disabilities Act (ADA) and on how to serve the deaf community, leaving very little time for consumer-based direct services and support.

This position would relieve some of the burdens of the current staff to provide the necessary services as mandated by Idaho Code Chapter 67, Title 73

c. List any additional operating funds and capital items needed.

Capital items: Workstation set up to include desk, chair, computer with monitors, cell phone. Estimated at $3,400

Ongoing operation expenses:

Phone	50.70 x 12	$ 600.00/annually
IT Support	100.00 x 12	$1,200.00/annually
Overnight travel	10 x $130	$1.300.00/annually
Per Diem	20 x $49	$ 980.00/annually
Flights	4 x $400	$1,600.00/annually

Total estimated OE: **$5,680.00**

3. Please break out fund sources with anticipated expenditures in the financial data matrix. (Please separate one-time vs. ongoing requests.) Non-General funds should include a description of major revenue assumption(s) (e.g. anticipated grants, etc.).

Ongoing request	$ 90,600
One Time request	$ 3,400

All funds will be from General Funds. There are no expectations of additional grant monies or federal monies. There are no external funding available that is in line with the objectives, mission and responsibilities/duties of the Council.

If the request is not funded, CDHH will be unable to fully utilize the collaborative relationship with community organizations, local and state governmental entities, and proactively develop a presence for our Council and the programs and services provided.

4. Who is being served by this request and what are the expected impacts of the funding requested? If this request is not funded who and what are impacted?

Local, state agencies, businesses, and primarily the 203,785 deaf and hard of hearing citizens will be served by this request. Idaho's Deaf and Hard of Hearing population has grown exponentially. This request allows for areas and individuals that are not currently served by the limited staff of CDHH to be included in the mission of the Council.

For the past two decade the deaf and hard of hearing population grew and assimilated much more deeply into the society more than ever before which demands more information and resources. The current staff finds it very difficult meeting the growing demands.

If this request is not funded, Idaho's deaf and hard of hearing population will continue to be underserved.

5. If this is a high priority item, list reason why unapproved Line Items from the prior year budget request are not prioritized first.

N/A. No request for FTE was presented on our line item last year.

SUBJECT

FY 2023 Capital Budget Requests

APPLICABLE STATUTE, RULE, OR POLICY

Idaho State Board of Education Governing Policies & Procedures, Section V.B.8. and Section V.K.

BACKGROUND/DISCUSSION

The capital projects request process is separate from the line item budget request process. The Permanent Building Fund Advisory Council (PBFAC), which is supported by the staff of the Division of Public Works (DPW), has three major areas of focus when it considers and develops recommendations on institutional and agency requests for fiscal year construction projects: a) major new construction or remodeling projects, typically costing well over $1M (referred to as "Capital" or "Part A" projects); b) smaller alteration and repair projects (referred to as "A&R" or "Part B" projects); and c) projects to comply with the Americans with Disabilities Act ("ADA" projects). The institutions must provide their detailed requests to DPW by August 1st, accompanied by updates to the institutions' rolling six-year capital project budget ("Part C") plans. The PBFAC will hear agency/institution capital project, A&R, and ADA requests in October. Subsequently, DPW and the PBFAC will review all requests for projects involving Permanent Building Fund (PBF) dollars, and will develop a list of recommended projects for all state entities to fit the projected available PBF dollars for the upcoming legislative cycle. DPW will work with the Division of Financial Management (DFM) and the Legislative Services Office (LSO) to develop, in turn, the Governor's recommendation and the Legislature's appropriation for capital, A&R, and ADA projects. The construction and maintenance needs of the higher education institutions (with deferred maintenance needs estimated in hundreds of millions of dollars) far exceed the PBF dollars available for rationing by the PBFAC, Governor and Legislature.

This agenda item deals with Board approval only for the capital project (Part A) requests and projected six-year capital project plans (Part C) from the four 4-year institutions. Summaries of the community colleges' capital project requests are provided for information only—those requests are vetted by the community colleges' local boards of trustees prior to submission to PBFAC. This agenda item does not deal with A&R and ADA requests. Projects shown have been prioritized by each institution. A number of these projects were also included in the FY 2021 institution request lists previously approved by the Board. The project descriptions provided below were prepared by the institutions.

Review of FY2022 PBF appropriations:
In addition to Alteration and Repair projects, the following capital requests were recommended:

FY2021 Supplemental (H225)

UI Parma Agricultural Research Campus	$3,000,000
CEI Future Tech Facility	$3,000,000

UI Seedling Production Greenhouses	$ 700,000

FY2022 (S1172)

CEI Future Tech Facility	$7,000,000

FY2023 Capital Project Requests:
Boise State University (BSU) has five major capital projects.

Boise State University's (BSU) first priority is for the renewal, remodel and building addition of the Liberal Arts Building. Liberal Arts is approximately 60,000 square feet and was built in 1967. In addition to the remodel and renewal, the site is able to accommodate a three to four story (22,000-30,000 square feet) addition. Total budget is $40M with $18.3M coming from the university and $21.7M from PBF funds. $1.7M was received in Alteration & Repair funds in FY2020 for building renovations and roof replacement.

BSU's second priority is for the remodel and renewal of Riverfront Hall. The facility is approximately 67,000 gross square feet and built in 1971. The primary goal is to consolidate the School of Public Service (SPS) in the renewed building. SPS is one of Boise State's premier programs, but is spread across campus, creating numerous challenges for operations and growth. A co-location at Riverfront Hall would negate the need to build a new standalone facility. Total budget is $22.3M with $5.5M coming from the university and $16.83M from PBF funds. $1.83M was received in Alteration and Repair funds in FY19 for electrical and HVAC upgrades.

BSU's third priority is for the Science Research and Classroom Building. Boise State continues to experience increased demand for facilities that support laboratory-based instruction and research. The new science research building will provide teaching and/or research labs focused on chemistry and biological sciences. With an emphasis on the natural and applied sciences, these laboratories call for highly specific and dedicated environmental controls. Total budget is $90M with $20M coming from the university.

BSU's fourth priority is for the remodel and renewal of the Hemingway Center. The facility is approximately 13,500 gross square feet and was built in 1940. Project funds would support a renewal of the entire building, along with addressing the building entrances to ensure compliance with ADA standards. Total budget is $5.8M with $800,000 coming from the university.

BSU's fifth priority is for a new Health Sciences Building. The project entails a new building to support fast-pace growth in the College of Health Sciences. Boise State's master plan shows a health sciences quadrangle near the NORCO building, and the project represents the second phase of that long-term buildout. Funds will likely support construction of a 60,000 + gross square foot facility, at 4-5 stories tall. Total budget is $36.9M with $16.9M coming from the university.

Idaho State University (ISU) has two major capital projects.

ISU's first priority is for the remodel of Leonard Hall which houses the Doctor of Pharmacy program. The remodel includes a total of 15,700 square feet on the basement and second floor. This will allow for program expansion and research capabilities. The total cost will be $20,200,000 with $3,400,000 coming from PBF funds.

ISU's second priority is for Heat Plant upgrades and replacements. The boilers in the Heat Plant have exceeded their life expectancy, two of the three boilers are 60 plus years old and in poor condition. This will reduce utility and operational costs and enable the Heat Plant and steam tunnels to function into the future. The total cost will be $12,000,000 coming from PBF funds.

University of Idaho (UI) has four major capital projects.

UI's first priority is for the Joint ROTC Facility and Nez Perce Neighborhood Improvements. This project includes renovation of the existing Targhee Hall and the creation of a new parking facility. The total cost will be $7,500,000 with $6,500,000 coming from PBF funds.

UI's second priority is for the McCall Field Campus Improvements. This project will add a new dining lodge and kitchen supporting the residential academic programming and research initiatives. This will add approximately 8,960 square feet using $5,000,000 of PBF funds.

UI's third priority is for the Rinker Rock Creek Ranch Education & Research Facility. This project includes basic facility improvements which will support and enhance the rangeland management and animal science curriculum related to livestock grazing, sage grouse, wildfire, water quality and recreation. This request is for $1,350,000 PBF funds.

UI's fourth priority is for the West Campus Event Parking and Support Facilities located on the west side of the main campus. The parking lot will contain approximately 650 parking stalls with a total PBF budget of $4,000,000.

Lewis-Clark State College (LCSC) has three major capital projects

LCSC's first priority is the Wittman Complex Repurpose/Renovation and Expansion of Diesel Program. With the completion of the new CTE building, the diesel program will have opportunity for growth, on campus, by expanding into the space vacated by the HVAC-R program and remodeling their current shop. Therefore, LCSC requests funding for the expansion and enhancement of the Diesel Technology program. Cost estimate based on Scope-Of-Work, $3,763,200 in PBF funds.

LCSC's second priority is for the Sam Glenn Complex remodel. The Sam Glenn Complex remodel will replace the failing ceiling tile structure, install new carpeting,

and address other minor repairs and needed painting. The ceiling tiles have a flaw in the design with the fixture method and need to be repaired as tiles are currently dislodging and falling at random times. The total cost of the project is estimated at $2,352,000 in PBF funds.

LCSC's third priority is for the Meriwether Lewis Hall Remodel which was built in four phases, with the first constructed in 1970 and remaining phases completed in 1981. As a result, there are two independent HVAC systems that have always competed against each other thus making it difficult to regulate, control and maintain. These systems and the electrical service are considered for energy efficient replacement. Additionally, this facility is due for fire alarm and sprinkler replacement, plumbing upgrades and flooring upgrades. The building has recently received a new roof and LED lighting. The total cost of the project is estimated at $17,640,000 in PBF funds.

The College of Southern Idaho's (CSI) request is for the Evergreen Building, C-Wing Remodel. This project consists of remodeling approximately 10,000 gross square feet in order to provide flexible classrooms, student work space, and remote learning technology. CSI is requesting $2,500,000 from PBF and CSI will match $600,000 (this includes $500,000 towards construction, $100,000 for new furniture, fixtures and equipment (FF&E) and CSI will reuse some existing FF&E).

IMPACT

Only Board-approved major capital projects can be forwarded to the PBFAC. Following Board approval, DPW, PBFAC, DFM, and LSO will be informed of the Board's recommendations. A Board representative will brief the PBFAC on the Board's decision and any comments at the October PBFAC meeting, prior to agency presentations of their FY2021 requests.

Board Policy V.K. requires institutions to bring their six-year capital project plans to the Board for review and approval at its regularly scheduled August meeting. These plans span six fiscal years going forward, starting with the upcoming fiscal year (FY2022). Board approval of a six-year plan constitutes advance notice to the Board that an institution or agency may bring a request at a later date for approval for planning and design for one or more of the projects in the institution plan. The institutions can, and very frequently do, update the years two through six components of their six-year plans, based on the approved funding and outcomes of their year one requests. Board approval of the six-year plans also allows the institutions to solicit and accept gifts in support of the projects listed in the approved plans.

ATTACHMENTS

Attachment 1-FY2023 Major Capital Request Summary
Attachment 2-Boise State University Six-year Plan
Attachment 3-Idaho State University Six-year Plan
Attachment 4-University of Idaho Six-year Plan
Attachment 5-Lewis-Clark State College Six-year Plan

Attachment 6-Capital Project Summaries for agencies & institutions

STAFF COMMENTS AND RECOMMENDATIONS

Although current levels of funding from the PBF and other sources are not sufficient to meet the facility needs of the institutions, it is appropriate for the institutions and the Board to highlight the most urgent infrastructure needs in the system. An effective review and rationing system is in place to allocate available dollars to the highest need projects for the FY2023 budget cycle. The FY2023 capital project requests from the institutions are reasonable, and they reflect continuity with previous capital planning efforts. The longer-term wish lists in the rolling six-year capital plans, while largely hypothetical, are a useful advance planning tool.

The attached six-year capital project plans include new projects as well as updated cost estimates.

Staff recommends approval of the institutions' FY2023 capital project requests and their six-year capital project plans.

BOARD ACTION

I move to approve the capital projects listed in the table in Attachment 1 from Boise State University, Idaho State University, University of Idaho and Lewis-Clark State College, and to submit projects requesting Permanent Building Funds to the Permanent Building Fund Advisory Council for the FY2023 budget cycle.

Moved by _____ Seconded by _____ Carried Yes _____ No _____

AND

I move to approve the Six-Year Capital Improvement Plans for FY2023 through FY2028 for Boise State University, Idaho State University, the University of Idaho, and Lewis-Clark State College, as provided in attachments 2-5.

Moved by _____ Seconded by _____ Carried Yes _____ No _____

State Board of Education

FY23 Major Capital Request Summary

($ in thousands)

	Board Priority	Institution/Agency & Project	Attachment 6 Detail Page	Total Project Cost: Perm. Building Fund	Total Project Cost: Total Funds	FY 2023 Request

FY 2023

Revision **7/13/2021**

Six Year Capital Improvement Budget

Description	FY 2023	FY 2024	FY 2025	FY 2026	FY 2027	FY 2028
Leonard Hall Pharmacy remodel* (Fundraised $16.8M for Phase I & part of II)	$3,400,000					
Life Science Complex	$79,200,000					
ISU Heat Plant Upgrades and Replacements	$12,000,000					
Holt Arena Phase 1: Seating, ADA, Access, Seating Upgrades*	$6,500,000					
Leonard Hall Research Lab Renovation Phase 2 and 3		$7,000,000				
University Place Polytechnic Building		TBD				
ISU Health and Wellness Center (Clinic Consolidation)		$44,000,000				
Campus Deferred Maintenance - Frazier Hall, Etc.		$12,100,000				
Upgrade HVAC, Ceilings, & Lighting, Eli Oboler Library		$13,170,850				
Remodel 1st Floor Entrance & Circulation, Eli Oboler Library*		$6,345,518				
Remodel RFC for KDHS Nursing, PAS, Rad Tech, etc..		$1,452,000				
Greenhouse Addition, Plant Sciences			$2,420,000			
Remodel Basement Space, Eli Oboler Library			$2,860,000			
Phase 2 HVAC Upgrades, Administration			$1,760,000			
Research Lab Renovations, College of Pharmacy, Meridian			$5,940,000			
Meridian Dental Hygiene Expansion			$4,400,000			
Holt Arena Phase 2 and 3: Spine and Basketball Arena			$84,700,000			
Gravely Hall - Upgrade the heating and cooling system				$3,162,500		
Beckley Nursing – Asbestos mitigation, ceiling system and lights				$1,870,000		
Vocarts - Replace, HVAC, Fire Alarm & ADA restrooms					$1,920,426	
Campus Housing Renovations & Remodeling					$11,000,000	
Academic Building						$27,500,000
Six Year Capital Improvement Plan Total $332,701,294	$101,100,000	$84,068,368	$102,080,000	$5,032,500	$12,920,426	$27,500,000

* Agency or Donor Funded

MAJOR CAPITAL BUDGET REQUEST
FY 2023
CAPITAL IMPROVEMENT PROJECT DESCRIPTION

(New Buildings, Additions or Major Renovations)

AGENCY: Boise State University	AGENCY PROJECT PRIORITY: 1 of 5

PROJECT DESCRIPTION/LOCATION:

Liberal Arts Renewal, Remodel and Building Addition

PROJECT JUSTIFICATION:

(A) Concisely describe what the project is.

A number of facilities on Boise State's campus have reached an age of 50 or more years. Certain ones are strong candidates for capital renewal, whereby major systems are upgraded and spaces throughout modernized. This process 'resets the clock' on a building, giving it another 40+ years of use. The Liberal Arts Building is the top priority on Boise State's campus for this process.

Liberal Arts is approximately 60,000 square feet and was built in 1967. In addition to the remodel and renewal, the site is able to accommodate a three to four story (22,000 – 30,000 square feet) addition. Project funds would support the entire scope of building renewal and expansion.

$1.7 million was received in Alteration & Repair Funds in FY20 for building renovations and roof replacement. These funds will support the overall project.

(B) What is the existing program and how will it be improved?

The English Department occupies most of Liberal Arts, while approximately 20,000 square feet has been vacated due to the opening of the Center for Visual Arts. This scenario provides ideal conditions for a building renewal, being that a smaller amount of swing space is needed. The existing building will be modernized and upgraded with new building systems (electrical, plumbing, HVAC). Classrooms will benefit from A/V and active learning improvements. The expansion will be programmed as a flexible mix of offices and general purpose classrooms.

(C) What will be the impact on your operating budget?

For the existing 59,050 square feet, operating costs will likely be reduced due to building system upgrades. This is particularly true for utilities-related expenses and reductions in building repairs. The building addition will increase Boise State's overall operating costs, but the facility will incorporate modern and efficient systems.

(D) What are the consequences if this project is not funded?

Deferred maintenance and the need for an extensive capital renewal at Liberal Arts will be postponed, ultimately increasing the long-term maintenance expense of the facility. If the expansion is not funded, Boise State will have to identify alternate space(s) for campus growth.

ESTIMATED BUDGET:		FUNDING:	
Land	$0	*Prior PBF (A&R)*	*$1,700,000*

MAJOR CAPITAL BUDGET REQUEST
FY 2023
CAPITAL IMPROVEMENT PROJECT DESCRIPTION

(New Buildings, Additions or Major Renovations)

AGENCY: Boise State University AGENCY PROJECT PRIORITY: 2 of 5

PROJECT DESCRIPTION/LOCATION:

Riverfront Hall Remodel and Renewal

PROJECT JUSTIFICATION:

(A) Concisely describe what the project is.

A number of facilities on Boise State's campus have reached an age of 50 or more years. Certain buildings are strong candidates for capital renewal, whereby major systems are upgraded and spaces throughout modernized. This process 'resets the clock' on a building, giving it another 40+ years of programmed use. Riverfront Hall is Boise State's second highest priority for this process.

The facility is approximately 67,000 gross square feet and was built in 1971. Project funds would support the entire scope of the building renewal, with a primary goal of consolidating the School of Public Service (SPS) in the renewed building. SPS is one of Boise State's premier programs, but is spread across campus, creating numerous challenges for operations and growth. Importantly, a co-location at Riverfront Hall would negate the need to build a new standalone facility – a prior capital improvement request from Boise State.

$1.83 million was received in Alteration and Repair funds in FY19 for electrical and HVAC upgrades. These funds will support the overall project.

(B) What is the existing program and how will it be improved?

Riverfront Hall is a mixed-use academic building including lecture halls, general assignment classrooms, lab space, and administrative offices. Primary occupants include the Graduate College, various Office of Information Technology offices, and again, general assignment classrooms.

Combined, these efforts will modernize Riverfront Hall while providing efficiencies for other spaces on campus.

(C) What will be the impact on your operating budget?

By remodeling spaces and updating building systems, the operating budget – particularly for utilities and building repairs – for Riverfront Hall will decrease.

(D) What are the consequences if this project is not funded?

Deferred maintenance and the need for an extensive capital renewal at Riverfront Hall will be postponed, ultimately increasing the long-term expense of the facility. Additionally, Boise State will

have to identify another facility (or construct a new facility) to accomplish the collocation of the School of Public Service.			
ESTIMATED BUDGET		FUNDING:	
Land	$0	*Prior PBF (A&R)*	*$1,830,000*

Date: _____

MAJOR CAPITAL BUDGET REQUEST
FY 2023
CAPITAL IMPROVEMENT PROJECT DESCRIPTION

(New Buildings, Additions or Major Renovations)

AGENCY: Boise State University	AGENCY PROJECT PRIORITY: 3 of 5

PROJECT DESCRIPTION/LOCATION:

Science Research and Classroom Building

PROJECT JUSTIFICATION:

(A) Concisely describe what the project is.

Boise State continues to experience increased demand for facilities that support laboratory-based instruction and research. The requested funds will aid in constructing a new science research building, providing teaching and/or research labs focused on chemistry and biological sciences. With an emphasis on the natural and applied sciences, these laboratories call for highly specific and dedicated environmental controls.

Growth in Boise State's STEM programs is strong. The number of degrees earned is up more than 40% since the 2013-2014 academic year, and new graduate programs, such as Biomolecular Sciences (up 80% since 2015), are witnessing rapid growth. These programs respond to high-demand fields in Idaho and throughout the region.

The anticipated total budget of $90 million reflects the cost of constructing these complex buildings, and at a scale large enough to accommodate growth needs for STEM programming at Boise State. In addition, this facility will include general purpose classrooms that incorporate the latest in active learning design. Active learning classrooms are highly sought after, and the project will reduce demand found from various academic departments.

(B) What is the existing program and how will it be improved?

Programming improvements for STEM-related fields, and additional capacity for general purpose classroom instruction will be realized. This building will also allow Boise State to reflect on older buildings with STEM programs and focus on ways to continue improving facility use.

(C) What will be the impact on your operating budget?

A standalone science research and classroom building will increase Boise State's operating budget. However, the project will likely allow the University to transition out of and improve operating costs – particularly for repairs and utility expense – in older buildings.

(D) What are the consequences if this project is not funded?

Growth within the STEM fields will be constricted and the lack of general assignment classroom space will increase. Smaller options for research space simply do not present enough new space to

address these needs. As a result, program growth may be postponed and/or costly renovations to retrofit non-research space may be needed.

ESTIMATED BUDGET		FUNDING:	
Land	$0	*Prior PBF*	*$0*
A/E fees	$7,000,000	PBF Request FY23	$20,000,000

MAJOR CAPITAL BUDGET REQUEST
FY 2023
CAPITAL IMPROVEMENT PROJECT DESCRIPTION

(New Buildings, Additions or Major Renovations)

AGENCY: Boise State University	AGENCY PROJECT PRIORITY: 4 of 5

PROJECT DESCRIPTION/LOCATION:

Hemingway Center Remodel and Renewal

PROJECT JUSTIFICATION:

(A) Concisely describe what the project is.

A number of facilities on Boise State's campus have reached an age of 50 or more years. Certain buildings are strong candidates for capital renewal, whereby major systems are upgraded and spaces throughout modernized. This process 'resets the clock' on a building, giving it another 40+ years of programmed use. The Hemingway Center is the third highest priority for building renewals at Boise State.

The facility is approximately 13,500 gross square feet and was built in 1940. Project funds would support a renewal of the entire building, along with addressing the building entrances to ensure compliance with ADA standards.

Due to the historic nature of the Hemingway building, the construction costs per square foot will likely be higher than Boise State's other requests for building renewal.

(B) What is the existing program and how will it be improved?

The College of Arts and Sciences (COAS) – primarily the Anthropology Department – currently occupies the Hemingway Center. Anthropology has been identified as a future occupant in the Environmental Research Building (ERB) after the SPS program has been collocated in another location (likely Riverfront Hall). This transition will create temporary vacancy at the Hemingway Center, simplifying the renewal process. Once renewed, Boise State anticipates continued use of the gallery space for COAS and multi-purpose events, with additional space seeing ongoing use by COAS.

(C) What will be the impact on your operating budget?

By remodeling the building and updating building systems, the operating budget for the Hemingway Center will decrease. This is particularly true for utility expenses and for ongoing/routine repairs.

(D) What are the consequences if this project is not funded?

Boise State will likely postpone deferred maintenance and the need for a capital renewal at the Hemingway Center, ultimately increasing the long-term maintenance expense of the facility. Incremental remodels will be necessary for spaces vacated by Anthropology, and alternate funding will be needed for improving the building entrances.

ESTIMATED BUDGET		FUNDING:	
Land	$0	*Prior PBF*	*$0*
A/E fees	$420,000	PBF Request FY23	$5,000,000
Construction	$4,200,000	General Account	$0
5% Contingency	$230,000	Agency Funds	$800,000
FF&E	$400,000	Federal Funds	$0

Total	$5,800,000	Total	$5,800,000

Agency Head Signature: _____

Date: _____

MAJOR CAPITAL BUDGET REQUEST
FY 2023
CAPITAL IMPROVEMENT PROJECT DESCRIPTION

(New Buildings, Additions or Major Renovations)

AGENCY: Boise State University	AGENCY PROJECT PRIORITY: 5 of 5

PROJECT DESCRIPTION/LOCATION:

Health Sciences Building

PROJECT JUSTIFICATION:

(A) Concisely describe what the project is.

The project entails a new building to support fast-pace growth in the College of Health Sciences (COHS). Boise State's campus master plan shows a health sciences quadrangle near the NORCO building, and this project represents the second phase of that long-term buildout. Funds will likely support construction of a 60,000+ GSF facility, at 4-5 stories tall.

Overall enrollment in Health Sciences is up 11% since 2015. Two notable areas include undergraduate studies in Radiological Sciences (up 30% since 2015) and Master of Social Work (up 115% since 2012). When viewing graduate programs alone, enrollment has risen 57% since 2015. Overall, there are nearly 5,100 students enrolled in COHS programs that support in-demand jobs not only in Boise, but also throughout the Treasure Valley and Idaho.

Over the next five years, COHS plans to start a School of Public Health, add seven additional masters programs, five additional doctoral programs, and expand existing undergraduate programming.

(B) What is the existing program and how will it be improved?

As a new building, there is no existing program. However, the new facility will improve COHS programming for various growing programs within the college.

(C) What will be the impact on your operating budget?

As a new facility, overall operating costs at Boise State will increase. However, the facility will incorporate modern and efficient building systems.

(D) What are the consequences if this project is not funded?

Continued lack of space for COHS will constrain their growth and force the college to look at other solutions for space-related challenges. Boise State may have to postpone certain programs or delay them indefinitely. The lack of space will affect cohort sizing and acceptance rates within many programs as well.

ESTIMATED BUDGET		FUNDING:	
Land	$0	*Prior PBF*	*$0*

CAPITAL BUDGET REQUEST
FY 2023
CAPITAL IMPROVEMENT PROJECT DESCRIPTION
(New Buildings, Additions or Major Renovations)

AGENCY: Idaho State University — AGENCY PROJECT PRIORITY: 1

PROJECT DESCRIPTION/LOCATION: Cost estimate overage after fundraising (16.8M) for total cost for project phase 1 and part of phase 2 Leonard Hall Pharmacy #8

CONTACT PERSON: Cheryl Hanson — TELEPHONE: (208) 282-4086

PROJECT JUSTIFICATION:

(A) Concisely describe what the project is.

Master planning efforts were conducted during a study in 2020 which assessed the existing facilities, labs, and offices in the Leonard Hall which houses the Doctor of Pharmacy program. These studies produced schematic designs and cost estimates for fundraising purposes. This information and drawings showed improvements and additions to the facilities to bring them up to code and enhance the program delivery, student classrooms, labs, and offices which support the college's mission in training, leading edge research, service and patient care. Donor project funding was obtained for $14.8M, and an additional $2M from College fundraising added up to the then full project cost of $16.8M.
Covid inflation and volatile market increases have now put the project at $20.2M

(B) What is the existing program and how will it be improved?

The Pharmacy program is a nationally recognized program and our facility is in need of significant upgrades to remain nationally competitive for students and faculty. Remodel includes a total of 15,700 square feet on the basement and on the second floor. This will allow for expansion of program and research capabilities.

(C) What will be the impact on your operating budget?

New efficient facilities, and upgraded building systems will reduce costs to keep the building running, and program delivery will be easier and better aligned with the existing resources. New equipment and furnishings provided for in the FFE budget will be more efficient, and easier to maintain.

(D) What are the consequences if this project is not funded?

ISU requests that the State provide this $3.4M additional support to leverage the $16.8M in private dollars raised thus far to ensure that this significant external financial support can be maximized. Without State support, ISU may lose the $14.8 M of donor committed funds because the scope of the project cannot be realized without an increased budget. If allocations for each agency are set, ISU requests that funds be prioritized for this capital renovation project, over Alteration and Repair projects.

ESTIMATED BUDGET: **$3,400,000**		FUNDING: Agency funding of $16,800,000

CAPITAL BUDGET REQUEST
FY 2023
CAPITAL IMPROVEMENT PROJECT DESCRIPTION
(New Buildings, Additions or Major Renovations)

AGENCY: Idaho State University — AGENCY PROJECT PRIORITY: 3

PROJECT DESCRIPTION/LOCATION: Heat Plant Upgrades and Replacements

CONTACT PERSON: Cheryl Hanson — TELEPHONE: (208) 282-4086

PROJECT JUSTIFICATION:

(A) Concisely describe what the project is.

Master planning efforts were conducted during an engineering study DPW project #20-221 which assessed the existing heat plant building, boilers, longevity, and continued operations. Also, in the study were several options that looked at new delivery methods for heating in our buildings. This information showed that our old boilers were very inefficient and had been maintained for 70 years in good working order, but could not hold up much longer. Most industrial boilers have a life of 20-30 years.

In order to avoid a catastrophic failure, it was important to craft an economical and efficient path forward for our heat plant and to provide alternative “back up” paths in case of a power outage or natural gas disruption.

This study aligns with our steam tunnel study DPW project #17-224 which identified systematic upgrades to the tunnel delivery of steam including piping, valves, and expansion loops. We have been upgrading a section of the tunnel each year to comply with this plan.

(B) What is the existing program and how will it be improved?

The boilers in the Heat plant have exceeded their life expectancy, two of the three boilers are 60 plus years old and in poor condition. The Heat Plant provides steam heat to over 45 buildings on Campus (Equates to 84% of our space in Pocatello). If the boilers go down the campus will be closed in the winter until they are repaired. The Heat plant study is currently 90% complete and is providing options that range in cost from $10 million to $60 million. The cost for the option that best suits the campus for the next 60 years will be selected once the Heat plant study has been completed.

Currently we are looking at a $10-12M project but the study has not yet been finalized.

The next step would be to design and construct new boilers, and remove the old ones which are heavily lined with asbestos. There are remediation costs, demolition, and seismic bracing of the existing building structure to be considered prior to installing a new boiler which will take us down the road another 20-30 years without major repairs.

(C) What will be the impact on your operating budget?

New efficient boilers, and upgraded building systems will reduce utility and operational costs and enable the heat plant and steam tunnels to function into the future.

(D) What are the consequences if this project is not funded?

The possibility of catastrophic failure during the winter when nothing could be easily done to maintain heat in the majority of our buildings.

PROJECT SUMMARY

Project Title: 01 Joint ROTC Facility and Nez Perce Neighborhood Improvements

Institution/Agency: University of Idaho

Brief Description:

With this project request, The University of Idaho desires to address multiple long-identified academic and campus planning issues and concerns in a strategic and integrated manner.

This project seeks to create a Joint Reserve Officer Training Corps (ROTC) facility to better serve the needs and requirements of the existing ROTC detachments of the various branches of the U.S. Armed Forces which are currently hosted at the University of Idaho. Such a joint Reserve Officer Training Corps facility will provide opportunities for academic, educational, and training synergy and will raise the profile of the university's ROTC programs.

In addition, this project seeks to build upon the new Joint Reserve Officer Training Corps facility to leverage the investment by making additional improvements in the Nez Perce neighborhood, increasing functionality, improving aesthetics and the environment of the neighborhood, increasing the vitality of the neighborhood, and providing greater connections to the academic heart of the campus.

This project request seeks to work in a coordinated and integrated manner with additional project requests within the Alterations and Repair Category to improve the overall environment of the neighborhood in alignment with the residential campus, transportation, and academic core goals of the university's Long Range Campus Development Plan (LRCDP)

This project aligns with the goals and objectives of the FY2022-2027 State Board of Education Strategic Plan by creating a new facility and a campus environment which will support educational programs which will prepare students to gain skills which will prepare them for future success.

Project Scope:

Renovation of the existing Targhee Hall to develop a Joint ROTC Facility	**GSF**
Building size:	13,500
Renovations and improvements Building Systems replacement and improvements, Site and utility Infrastructure as required, Fixtures and equipment All project fees and related expenses, complete, to include the potential of minor additions as needed by programmatic requirements	(existing)
Creation of new Parking Facility	**Stalls**
Lot size:	180 to 200
Creation of new, fully developed and landscaped paved parking facility To include all requisite and necessary Access pathways, walks and stairs, Safety and security lighting, Landscape islands and buffers, Court sports opportunities, Drill field for ROTC functions, Signage, and all necessary appurtenances for Safe and functional operation. All project fees, and related expenses for a complete and functional installation.	(target)

Estimated Total Cost:
Source of Project Funds (by fund source and amount):

Total Project Cost

Fund Source	Amount
Permanent Building Fund	$ 6,500,000
Federal Funds	$ 0
Bond Funds	$ 0
Other (UI)	
University Funds	$ 1,000,000
Total:	$ 7,500,000

University Funds	$ 1,000,000
Total:	$ 1,000,000

Budget Year Request (FY2023)

Fund Source	Amount
Permanent Building Fund	$ 3,250,000

It is the intent of the university to request a second iteration of $3,250,000 in FY2024, thus making the cumulative total request of the Permanent Building Fund $6,500,000, spread equally over two years.

Date Approved by State Board of Education:

Inclusion on the University of Idaho 6 Year Plan, FY2023, submitted July 1, 2021.

FY2023 represents the first year of request to the Permanent Building Fund for this project effort.

1. PROJECT DESCRIPTION AND JUSTIFICATION

There are several drivers behind this project request as the university seeks to address multiple long-identified academic and campus planning issues and concerns in a strategic and integrated manner.

First, the university seeks to combine and integrate the existing Reserve Officer Training Corps (ROTC) detachments of the various branches of the U.S. Armed Forces which currently exist at the University of Idaho. The university currently hosts detachments of the U.S. Army, U.S. Air Force, and U.S. Navy/Marines. These Reserve Officer Training Corps programs trains students to become commissioned officers in the United States Armed Forces. Classroom instruction, physical fitness and practical exercises are used to develop college students into leaders, capable of leading their fellow Americans efficiently and effectively. College students enrolled in ROTC programs learn leadership, resource management and communication skills which prepare them for success in any competitive environment. These programs carry on a long-standing legacy and history of support of the U.S. military services at the University of Idaho.

However, these ROTC programs are scattered in three different facilities across campus, and opportunities for academic and program synergy are potentially lost. The university desires to co-locate some, or all, of these functions in a single facility which will provide for opportunity, synergy, and greater visibility and potentially enhance recruitment and retention.

Second, the university seeks to develop this new joint ROTC facility in such a manner that it better anchors the southeast corner of the Nez Perce neighborhood and better ties this neighborhood to the academic core of campus. In terms of straight-line distance, the Nez Perce neighborhood is immediately adjacent to the Administration Lawn, the Heart of the Moscow Campus of the University of Idaho. Yet in terms of perceptions, it feels more remote. The intent of this project effort is to invest in this neighborhood and in a manner which results in increased student activities and general education use, providing life and energy in the neighborhood.

Third, the university seeks to upgrade and improve the aesthetics and environment within the greater Nez Perce neighborhood by investing in improved landscape and grounds, creating better connections to campus in general, providing improved parking opportunities, providing recreational and court sport opportunities, and improving service functions.

2. PROJECT COMPONENTS

The project request consists of two main components:

Component 1: Renovation of Targhee Hall to create a Joint Reserve Officer Training Corps Facility

Targhee Hall was constructed in 1958 as a residential facility. It is of concrete frame construction with infill of concrete masonry unit (CMU) partitions. It consists of a two story residential wing with a single story space which served as dining hall and commons space. There is a full height basement under approximately half of the residential wing.

University Residences left the building in the late-2000's and it has largely remained unoccupied since. Most recently, Targhee hall was pressed into as an isolation facility as part of the university's response to the Covid Pandemic.

The facility is structurally sound and the university's campus master plan, the LRCDP, identifies it as a facility to be kept and one worthy of investment. However, many of its building systems are in needs of repair or replacement. Because of the structural concrete frame, the structure support removing some of the CMU partitions to allow for the creation of more open spaces as required.

Targhee Hall is approximately 13,500 gsf, and approximately 11,000 nsf.

The project anticipates the necessary improvements and upgrades to Targhee Hall necessary to allow it to function as a Joint Reserve Officer Training Corps facility. The intent and desire is to bring components of the university's Army, Navy, and Air Force ROTC detachments together in a single facility which will allow for greater opportunities for academic , program and training synergies, and which will raise the profile and visibility of these detachments on campus. Currently, these ROTC detachments are scattered across campus in various facilities. Such a new, renovated, combined, and more desirable and aesthetic facility will both anchor the university's investment in the Nez Perce neighborhood, but will also provide opportunities for ROTC program expansion, and enhance recruitment and retention efforts.

The exact mix of programmatic elements to be housed in the new facility is yet to be determined. While the desire is to create a facility of the greatest synergy possible, certain programmatic elements, such as the Army's Combat Arms Training Range currently located in the basement of the memorial Gymnasium is of a character and nature which cannot be supported in Targhee Hall. It is anticipated that an early architectural programming activity will need to be prerequisite to the design phase to seek out and determine the proper mix of services, classrooms, offices, administrative suites, cadet areas support areas and supply functions are best supported at Targhee Hall, either fully within the existing footprint or with a small scope addition.

Component 2: Creation of a new Parking Facility with Court Sport and Recreational Opportunities

Currently located behind Targhee Hall and below the Greek residences of the university's Nez Perce Greek residential neighborhood is a largely unused field resource formerly known as the "Band Field" due the use of it by the University of Idaho Marching Band for practice activities. With the completion of the Student Activity Fields in 2004/05, marching band practice has shifted to that new facility, leaving the "Band Field" largely unused.

The University of Idaho campus master plan, the LRCDP, anticipates the opportunity to convert this field to serve as a fully developed and landscaped parking resource to better support and serve parking needs in this neighborhood, reduce on-street parking on Nez Perce Drive, and provide a way to better facilitate and support the service requirements of the Greek residences in the neighborhood. Specifically, this parking facility will allow for the creation of screened dumpster locations below the Greek residences, removing the unsightly dumpsters from the front yard on Nez Perce Drive.

In addition, the planning for this parking resource anticipates the creation of court sport opportunities and an opportunity to create a mid-sized turf field which can support both pick-up recreation and the drill activities of the ROTC detachments in Targhee Hall.

This element of the project works in partnership with improvements to Nez Perce Drive and the creation of the Joint ROTC facility to vastly improve the functionality, aesthetics, and environment of the greater Nez Perce neighborhood.

Lastly, the creation of this parking resource anticipates the ability to create opportunities for three new Greek residences – 1 at the site of a former residence which was demolished in 2014/15, and two new sites on Blake Avenue, between Farmhouse residence and the new Joint ROTC facility in the improved Targhee Hall.

3. ALTERNATIVES

Four alternatives have been studied to date.

Alternative 1: No Action

This alternative provides for no investment in either the ROTC facilities or the greater Nez Perce neighborhood. The ROTC detachments would remain in their existing facilities, scattered across campus. These facilities are in need of repair and investment, and they are currently filled to maximum capacity, allowing no potential for expansion.

Additionally, there would be no investment in the environment of the Nez Perce neighborhood. The Nez Perce neighborhood currently suffers in perception as compared to the Elm Street Greek neighborhood, and this investment is required to improve the

desirability of the Nez Perce neighborhood. Not making an investment in the Nez Perce neighborhood limits the opportunity for recruitment of new Greek organizations.

For these reasons, the university rejected this alternative.

Alternative 2: Renovations of the Existing ROTC Facilities

This alternative consists of an attempt to design and construct meaningful renovations of the existing spaces currently occupied by the ROTC detachments. While this is technically feasible, it likely leads to increased costs as the entirety of the existing facilities would require renovations, not just the spaces occupied by the ROTC unit, lest a disparity of condition of spaces within these facilities be the result.

Further, all opportunity for synergy amongst and between the service detachments would be lost, and the overall profile of the combined ROTC program would not be raised.

For these reasons, the university rejected this alternative.

Alternative 3: Construction of a new Joint ROTC facility

While the construction of a completely new, purpose-built Joint Reserve Officer Training Corps facility might be attractive, it would certainly be much more costly than renovation of the existing Targhee Hall. The opportunity to take advantage of the existing structure, and the existing investment in that structure would be lost. Additionally, demolition costs of Targhee Hall would need to be factored into the project costs.

For these reasons, the university rejected this alternative.

Alternative 4: Renovation and Conversion of the existing Targhee Hall and Construction of the Proposed new Parking facility.

This option would entail renovating Targhee Hall to serves as the joint Reserve Officer Training Corps facility and constructing a fully developed and landscaped Parking facility as described herein.

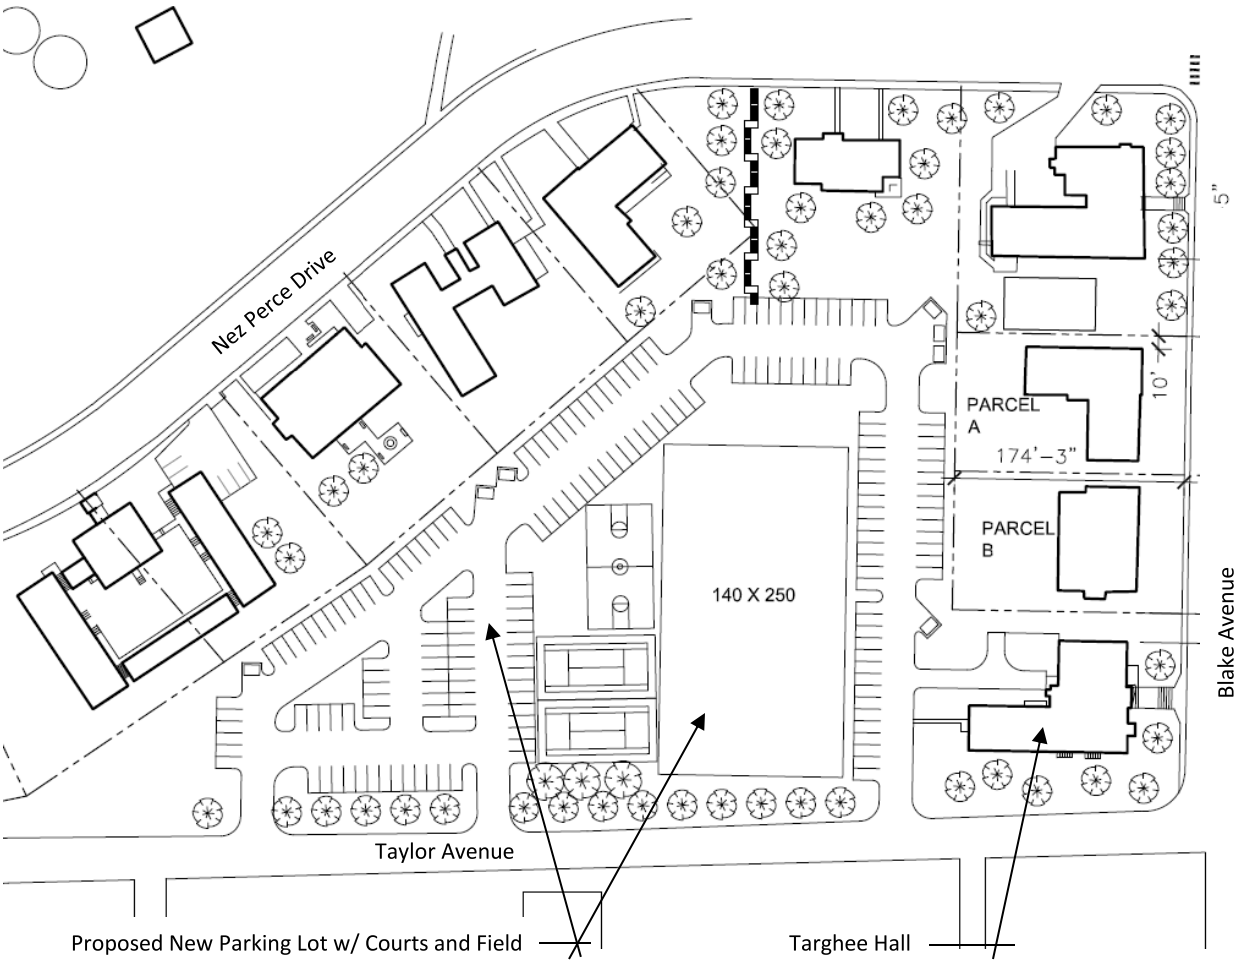
The overall project expenses are expected to be less under this approach and the expectation is that it will result in an integrated, coordinated set of improvements which will support the needs and functions of the ROTC detachments, vastly improve the character and nature of the Nez Perce neighborhood, conforms with the goals and objectives of the Long Range campus Development Plan, and supports the improved recruitment and retention efforts of the university.

For these reasons, this is the university's preferred alternative.

4. VACATED SPACE

Depending upon the programmatic mix of units selected to be housed within the proposed Joint ROTC Facility in the current Targhee Hall building, there is the potential of creation of vacated spaces in various facilities across campus. These spaces tend to be office spaces and suites within older facilities which might be suitably repurposed for use by other campus units.

As noted herein, Air Force ROTC currently occupies approximately 1,200 nsf in Shoup Hall and Navy ROTC currently occupies approximately 6,000 nsf in Hays Hall. The office, classroom, supply, and other general education functions of Army ROTC currently occupies approximately 4,300 nsf over and above the Combat Arms Training Range within Memorial Gymnasium.



Specific uses and potential tenants for these spaces have yet to be identified.

PROJECT SUMMARY

Project Title: 02 McCall Field Campus Improvements
Dining Lodge and Kitchen

Institution/Agency: University of Idaho

Brief Description:

In 2014, the University of Idaho completed a Master Plan for the future of the McCall Field Campus on the shore of Payette Lake in McCall, Idaho. The McCall Field Campus is a residential education and conference facility owned and operated by the University of Idaho College of Natural Resources (CNR). The campus is 14-acres, features 600 feet of lakefront beach and borders Ponderosa State Park. CNR provides a variety of academic programming and research initiatives at the McCall Field campus. One of the main programmatic offerings is the McCall Outdoor Science School (MOSS), a 1 week residential curriculum offered to 6th grade elementary school children from across Idaho aimed at providing an engaging introduction to STEM education and experiences.

University of Idaho McCall Field Campus, McCall, Idaho

Since completing the 2014 Master Plan, the University of Idaho and CNR have completed initial project efforts cited in the plan, chief among them is the completion of a new restroom and shower house facility.

The intent of this project request is to build on those efforts and provide a new Dining Lodge and Kitchen which will support the residential academic programming and research initiatives.

This project aligns with the goals and objectives of the FY2022-2027 State Board of Education Strategic Plan by creating a new facilities and environments which support engaging educational programs aimed at preparing students and promoting further interest in STEM education and academic careers.

Project Scope:

Construction of a New Dining Lodge And Kitchen Facility	**GSF**
Building size:	8,960
New Dining Lodge and Kitchen facility, Indoor and outdoor dining areas, Food preparation kitchen and storage, Site and utility Infrastructure as required, Fixtures and equipment All project fees and related expenses, For a complete and functional facility as needed by programmatic requirements

Budget Year Request (FY2023)

Fund Source	Amount
Permanent Building Fund	$ 5,000,000

Date Approved by State Board of Education:

FY2023 represents the first year of request to the Permanent Building Fund for this project effort.

Inclusion on the University of Idaho 6 Year Plan, FY2023, submitted July 1, 2021.

1. PROJECT DESCRIPTION AND JUSTIFICATION

The existing Dining facility on the campus of the McCall Field campus predates the acquisition of the site by the University of Idaho. The existing Dining facility was constructed by during the Civilian Conservation Corps (CCC) era of the development of the McCall Field Station. While the structure is a part of the memories of the McCall Field Campus for many, the reality is that it is aged, beyond service life, is too small and can no longer meet the demands of existing programming requiring program participants to eat in shifts, and it is in need of replacement. The 2014 Master Plan effort began with an assumption that saving, renovating, and restoring the existing Dining facility was a viable option. However, the study concluded that replacement is more efficient and better value for the investment. This is especially true for the Kitchen facilities.

The intent of this project then is to replace the existing Dining facility and replace with a new, state-of the art Dining Lodge and Kitchen. The vision, and the proposal, is of 8,900 square foot Dining Lodge designed to unite people with one another—and with the iconic surroundings of this special place in Idaho. More than simply a place to eat, this new gathering area will be a hub for students, faculty, and staff to come together for intentional and impromptu learning opportunities. The new Dining Lodge will eliminate current dining capacity issues as well as the safety considerations inherent in older structures. Inside and outside dining areas reflect the theme of nature-based learning and recognize the importance of place in education and experience.

Given the affinity for the existing facility in the memory of so many who have attended programs at the McCall Field Campus over the years, the vision is that The existing Dining facility which was constructed by during the Civilian Conservation Corps (CCC) era of the development of the McCall Field Station will be preserved and repurposed as a small classroom facility by a future project.

2. PROJECT COMPONENTS

The new Dining Lodge and Kitchen Facility will consist of the following components:

- Kitchen and Kitchen Support (storage, coolers, freezers, food preparation area, washroom).
- Dining
    - Indoor, Main Dining area
    - Outdoor Dining area / Patio
    - Private and Guest Dining area

- Building Support spaces (mechanical room, electrical room, restrooms)

The new facility is envisioned to reflect the natural surroundings of the McCall Field Campus and make use of Idaho Forest products, to include the possible use of mass timber structural elements.

Main Indoor Dining Area, University of Idaho McCall Field Campus, McCall, Idaho

3. ALTERNATIVES

Three alternatives have been studied to date.

Alternative 1: No Action

This alternative provides for no further investment beyond remedial maintenance activities to the facilities at the McCall Field campus. However, these facilities are in dire need of repair and investment, they are old and beyond the point where maintenance of the

existing elements and systems is sufficient. The current state of the facilities is impacting the ability of the College of Natural Resources to over meaningful academic programming in a safe environment.

For these reasons, the university rejected this alternative.

Alternative 2: Renovations of the Existing Dining Facilities

As noted above, renovation and restoration of the existing Dining facility was the assumed final, best outcome when the 2014 Master Plan effort was initiated. However, the study concluded that replacement is more efficient and better value for the investment. This is especially true for the Kitchen facilities which are becoming increasingly more difficult to maintain to current Health Code standards. Additionally, as the academic and research programming has expanded at the McCall Field Campus, the capacities of the existing Dining and Kitchen facilities are proving to be a limiting factor in the ability to serve increasing numbers of guests and program participants.

For these reasons, the university rejected this alternative.

Alternative 3: Construction of a new Dining Lodge and Kitchen facility

The construction of a new, modern, Dining Lodge and Kitchen facility emerged from the work of the 2014 Master Plan as the preferred alternative.

The planning, design and construction of a new Dining Lodge and Kitchen facility will best allow the University of Idaho and the College of Natural resources to develop a clean, useful, safe, efficient, code-compliant facility tailored to the programmatic needs of the McCall Field Campus and the academic and research initiatives offered there. Such a new facility will be tailored to reflect the natural surroundings of the McCall Field Campus, and the analysis indicates that this is the most economical investment to be made in the campus.

For these reasons, this is the university's preferred alternative.

4. VACATED SPACE

Given the historical nature of the current dining facility, which was built during the CCC building period, the main portion of this existing building is slated to be repurposed as a small classroom and meeting space by a future project effort. The kitchen portion of the facility will be removed.

5. IMAGES

OFFICE OF THE STATE BOARD OF EDUCATION

SET A

PROJECT SUMMARY

Project Title: 03 Rinker Rock Creek Ranch
Education and Research Support Facilities

Institution/Agency: University of Idaho

Brief Description:

With this request The University of Idaho is seeking $1,350,000 to implement and construct basic facilities improvements at the university's Rinker Rock Creek Ranch Research and Education Field Station in central Idaho. These facilities improvements will support and enhance the university's efforts to enhance rangeland management and animal science curricula related to livestock grazing, sage grouse, wildfire, water quality and recreation.

This project aligns with the goals and objectives of the FY2022-2027 State Board of Education Strategic Plan by creating a new facilities and environments which support engaging educational programs aimed at preparing students and promoting further interest in STEM education and academic careers. In addition, the Research Initiatives conducted at the Rinker Rock Creek Ranch site will greatly enhance workforce training and learning through demonstration of best practices for integrating working rangelands with conservation interests in Idaho and the western United States.

Project Scope:	**GSF**
Building size:	N/A
Restore and prepare an existing barn structure for indoor classroom instruction, Provide solar power to a remote location, Provide back-up power generation, Provide vault toilet facilities, All project fees, and related expenses for a complete and functional installation.	

Estimated Total Cost:
Source of Project Funds (by fund source and amount):

Total Project Cost

Fund Source		Amount

Budget Year Request (FY2023)

Fund Source	Amount
Permanent Building Fund	$ 1,350,000

Date Approved by State Board of Education:

Inclusion on the University of Idaho 6 Year Plan, FY2023, submitted July 1, 2021.

FY2023 represents the first year of request to the Permanent Building Fund for this facility.

---

1. PROJECT DESCRIPTION AND JUSTIFICATION

Project Planning Background:

Rinker Rock Creek Ranch is located in the Wood River Valley of central Idaho. The ranch encompasses about 20,000 acres in the Rock Creek watershed, including 10,400 acres of deeded meadows and rangeland surrounded by Bureau of Land Management and state grazing allotments. The property has supported ranching families who have lived and worked on Idaho's rangelands for over a hundred years. It is home to an abundance of

wildlife such as: greater sage-grouse, pygmy rabbits, songbirds, golden eagles and other raptors, pronghorn, badger, beaver, elk, and moose.

In 2014, the ranch was sold to the Wood River Land Trust (WRLT) and The Nature Conservancy (TNC) at a generous price to support conservation. WRLT and TNC worked with the Natural Resources Conservation Service to secure long-term protections of the ranch's grasslands and wildlife habitat.

The University of Idaho later joined as a third partner to expand research, education, and public outreach. In 2019, U of I acquired Rinker Rock Creek Ranch. It is jointly managed by the College of Natural Resources, the College of Agricultural and Life Sciences, and reports to an advisory committee that ensures a collaborative approach to landscape-scale conservation and sustainable ranching practices.

Project Description:

The project will support related curriculum development and demonstration that would allow for grazing, sage grouse, wildlife, and other public uses such as recreation to co-exist. The current "either/or" approach to rangeland management leads to extensive conflict, litigation, reduced return on investment from federal lands and unwise use of taxpayer dollars that could be put to more productive uses. Few resources have been invested in comprehensive efforts supporting education and public demonstration at the nexus of working rangelands and conservation. Undertaking these efforts on lands adjacent to and managed in conjunction with USDI Bureau of Land Management grazing leases provides a particularly useful laboratory for learning, which at the University of Idaho spans K-12 education, postsecondary training, and adult public education through formal Extension activities.

Current instruction and research at Rinker Rock Creek Ranch is significantly limited by poor connectivity, no internet access, unpredictable and harsh weather, and inadequate classrooms to accommodate learning groups having a range of physical and learning abilities. The intent of this project is to provide investment in facilities and infrastructure aimed at solving these issues. The investment will better support and accommodate hands-on learning in a field setting for learners of all ages.

The project is consistent with the strategic education, research and extension and outreach goals and objectives of UI.

This project, and the resultant facility, is fully consistent with the principles, goals, and objectives related to outreach and extension within the University of Idaho's Long Range Campus Development Plan (LRCDP.

2. PROJECT COMPONENTS

The specific scope elements of the project are to:

- Restore and provide structural reinforcement to resist snow loads for an existing barn structure.
- Improvements and upgrades to the exiting barn structure to facilitate indoor academic learning, classrooms, and dry lab space for research demonstrations.
- Provide a solar power electrical generation system capable of satisfaction of the remote site's electrical needs to include support of classroom technology for satellite internet to facilitate Hyflex and online instruction with on-site data sharing.
- Provide suitable back up power generation.
- Provide and install vault restroom facilities at the site.

3. ALTERNATIVES

Two alternatives have been studied to date.

Alternative 1: No Action

This alternative provides for no further investment beyond remedial maintenance activities to the facilities at the Rinker Rock Creek Ranch Field Station. This will have the net result of severely limiting the ability of the Field Station to support the educational, research and outreach goals and objectives of the University of Idaho. This represents a tremendous lost opportunity cost to the university and its stakeholders.

For these reasons, the university rejected this alternative.

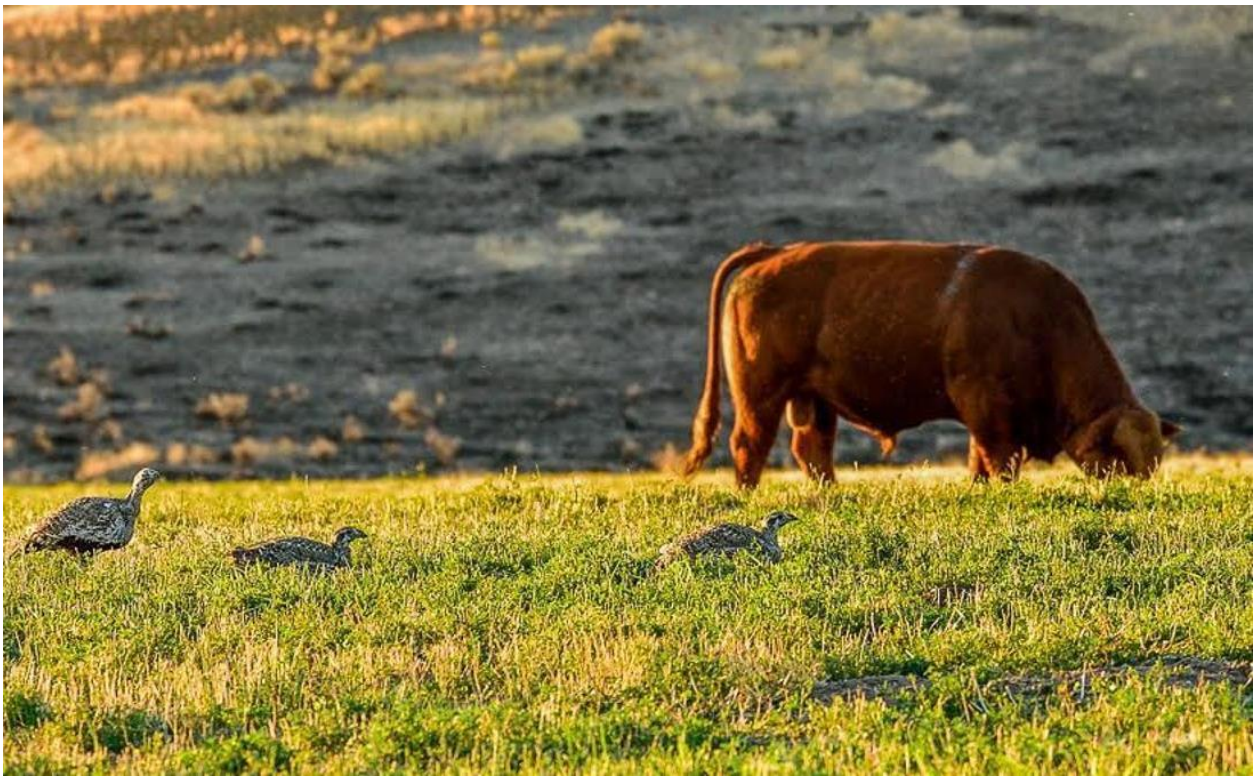
Alternative 2: Provide the Support Facilities as Described Herein

This alternative consists of a capital construction project to design and construct the project as described in this request. This will result in a more responsive and flexible set of facilities better suited to support the current needs and anticipated demands of the College of Natural Resources, the College of Agricultural and Life Sciences and the University of Idaho.

This approach is very well supported by the university's partners and stakeholders within the State of Idaho. The food animal industry is an important sector to Idaho's economy, which is aided by grazing on public lands. Funding for these desired facility improvements will result in enhanced training of the next generation of agency employees and practitioners on contemporary range management and animal science techniques on public lands. The skills acquired will enhance understanding of complex and litigious western rangeland issues, and support demonstration of techniques to accommodate livestock grazing, mining and recreation while sustaining healthy populations of sage grouse and other desirable wildlife in a landscape with potential for wildfire. The benefit to the State of Idaho is a more highly trained workforce capable of effectively balancing

competing uses, which may result in reduced conflict and litigation, improved financial return from federal grazing lands, and informed public dialogue on the benefits and challenges of western public lands

For these reasons, this is the university's preferred alternative.



4. VACATED SPACE

There are no vacated spaces created as a result of this project to report.

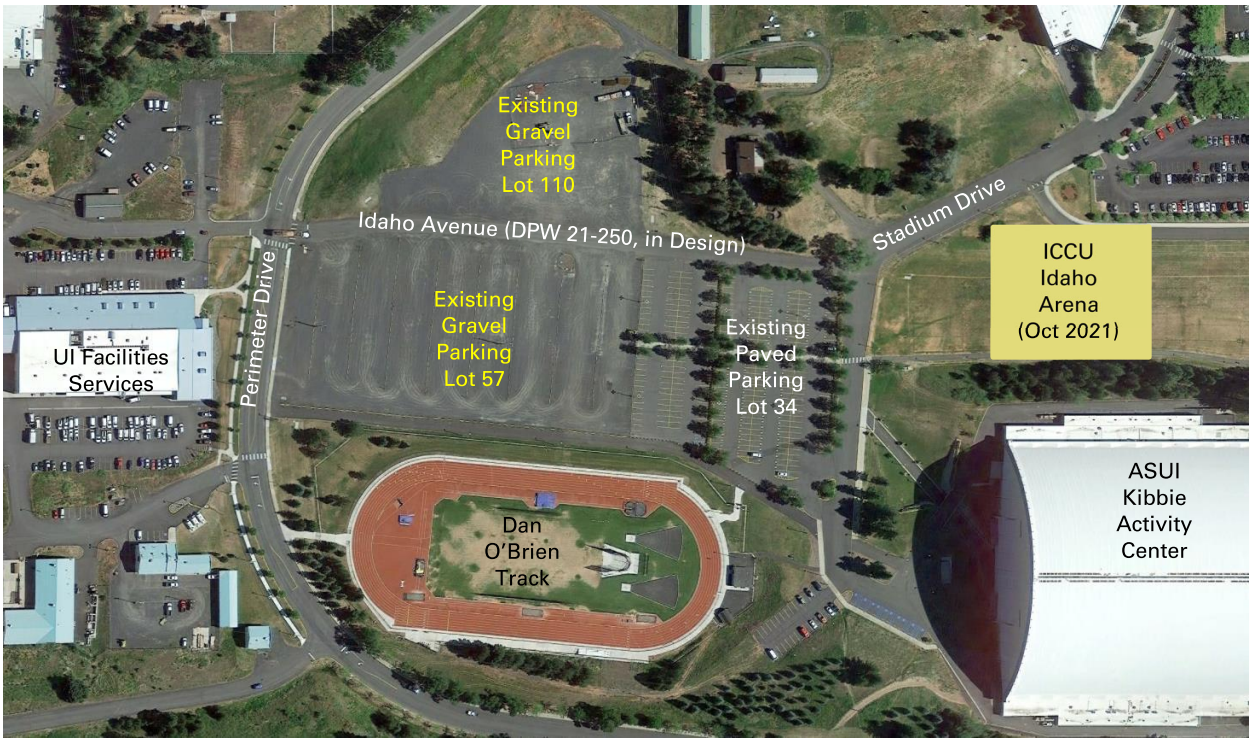
OFFICE OF THE STATE BOARD OF EDUCATION

SET A



PROJECT SUMMARY

Project Title: 04 West Campus Event Parking and Support Facilities

Institution/Agency: University of Idaho

Brief Description:

This project request seeks to design and construct a fully developed, landscaped, paved parking facility to be located on the west side of the main campus of the University of Idaho. This parking facility is to be located west of the current ASUI Kibbie Activity Center and west of the newly constructed ICCU Idaho Arena. The purpose and intent of the proposed new parking facility is to provide for regular, daily commuter parking as well as to provide support for academic, university and community events to be held at these two facilities.

Existing Conditions, West Campus Parking Facilities

The desire for such a developed parking facility is long-standing and appears as a component of campus planning studies, illustrative plans and master plans dating back to the 1970's.

This project request seeks to work in a coordinated and integrated manner with a current Permanent Building Fund project to improve Idaho Avenue between Perimeter Drive and Stadium Drive. DPW project 21-250 was funded in FY2021 via the Alterations and Repair Category, is currently in the design phase and will be bid in spring 2022. These projects will work together to improve the overall environment of the west campus neighborhood in alignment with the residential campus, transportation, and overall goals of the university's Long Range Campus Development Plan (LRCDP).

This project aligns with the goals and objectives of the FY2022-2027 State Board of Education Strategic Plan by creating and developing a campus environment which will support the overall goals of the university to provide educational and outreach programs which will prepare students to gain skills and experiences supportive of their future success.

Project Scope:

New Parking and Event Support Facility	**Stalls**
Lot size:	approx. 650 +/-
Creation of new, fully developed and Landscaped, paved parking facility, Includes all requisite and necessary Access pathways, walks and ramps, Safety and security lighting, Landscape islands and buffers, Signage, and all necessary appurtenances for safe and functional operation. In addition, provision for power distribution and data distribution throughout the lot to strategic locations for event support. All project fees, and related expenses for a complete and functional installation.	(target, Lots 57 and 110 combined)

Estimated Total Cost:
Source of Project Funds (by fund source and amount):

Budget Year Request (FY2023)

Fund Source		Amount
Permanent Building Fund	$	2,000,000

It is the intent of the university to request a second iteration of $2,000,000 in FY2024, thus making the cumulative total request of the Permanent Building Fund $4,000,000, spread equally over two years.

Date Approved by State Board of Education:

Inclusion on the University of Idaho 6 Year Plan, FY2023, submitted July 1, 2021.

FY2023 represents the first year of request to the Permanent Building Fund for this facility.

1. PROJECT DESCRIPTION AND JUSTIFICATION

Project Planning Background:

With this project request the university seeks to upgrade and improve the aesthetics and environment and improve the daily commuter and event support parking experiences within the west campus neighborhood by investing in improved landscape and grounds, creating better connections to campus in general, providing improved parking opportunities, and improving the support and facilitation of university and community events.

The creation of a significant, fully developed, and landscaped parking facility on the west side of the main campus of the University of Idaho is a long-term campus master planning goal of the university. The 1971 illustrative plan indicates a major parking resource to the west of the then proposed ASUI Kibbie Activity Center, and a fully developed and landscaped parking facility between the ASUI Kibbie Activity Center and Perimeter Drive is a key component of the current Long Range Campus Development Plan (LRCDP). Such a parking facility plays a key role in supporting the residential campus, pedestrian-centric core of campus, and transportation goals of the LRCDP.

Upon completion of the ASUI Kibbie Activity Center, a gravel surface parking resource west of the Kibbie Dome was created, currently known as Lot 57. Subsequently, the existing gravel parking resource was expanded to the north in 2001, creating Lot 110. While this gravel parking resource has been expanded over the years, it retains to a large extent an "ad hoc" character and feel to this day. Portions of the lots are not lighted, and those that are lit are done so with surplus cobra head fixtures on temporary wood poles. The lot is open, barren and wholly unsuitable in its role as a first impression of the university for many communities and first-time visitors to the university.

Existing Conditions and Arrival Experience, West Campus Parking Facilities, Approach from Perimeter Drive

In 1989, the easternmost portion of this lot was developed and paved. This effort created Lot 34 and provided 290 parking stalls, landscape islands with trees, safety and security lighting, and a central walkway spine to gather patrons and facilitate their movement east/west through the lot. As part of the development of Lot 34, a paved east/west access way leading to and from Perimeter Drive on the west was provided.

In 2000, the university funded an initial conceptual study of the development of the gravel surface Lot 57 to the west of Lot 34, but that effort stalled and never developed into a fully funded design and construction effort.

Concept Study, West Campus Parking Facilities, April 2000

Currently, the university is working with the Division of Public Works (DPW) on a project effort to design and construct a new east/west roadway in the alignment of the accessway provided by the 1989 project. This project was funded by the Permanent Building Fund (PBF) in FY2021. DPW 21-250 is currently in the design phase and will be bid in spring of 2022, with construction slated to begin in summer 2022. This project will create a fully developed street complete with curb, gutters, sidewalks, lighting, and street trees, and it will define access drives into Lot 57 to the south and Lot 110 to the north. In addition, the project scope includes a gateway to Idaho Avenue at the intersection with Perimeter Drive. (See the Plans in Section 5, Images)

Overall, the current PBF and DPW project regarding Idaho Avenue, the improvements being completed by the ICCU Idaho project, and this project request will all work in integrated, coordinated fashion to provide the developed, landscaped commuter and event parking facility envisioned by the university's Long Range Campus Development Plan.

Project Description:

Both the ASUI Kibbie Activity Center and the new ICCU Idaho Arena facilitate and support general academic uses and events such as academic coursework, Convocation and Commencement ceremonies, academic lectures, seminars, etc. in addition to hosting university and community events and cultural activities. The scope of this project is to provide the facilities and resources to support both daily commuter parking and these events and activities.

The project consists of two fully developed and landscaped surface parking facilities west of the ASUI Kibbie Activity Center, The ICCU Idaho Arena and Lot 34. These new parking facilities will be located at the site of the existing gravel surface lots, Lot 57 and Lot 110. Lot 57, south of the new Idaho Avenue, is anticipated to be approximately 450 parking stalls. Lot 110, north of the new Idaho Avenue, is anticipated to be approximately 175 parking stalls. Lot 110 should also be designed with consideration for accommodation of Recreational Vehicles.

The vision is that the new lots should be designed to integrate with existing Lot 34 and existing Idaho Avenue. This includes the possible extension of the east/west pedestrian pathway and spine which currently exists in Lot 34, and/or some other suitable measures, walkways and pathways to accommodate safe and efficient pedestrian circulation. The lots should be fully developed with landscape islands and peninsulas sufficient to accommodate suitable street trees and other softscape materials, lighting, and signage. The design of the new lots should also include distribution of power and data infrastructure throughout both lots to strategic locations, complete with appropriate panels and pedestals, for the support of a variety of event set-ups and needs.

The project is consistent with the strategic goals and objectives of UI. The project is fully consistent with UI's strategic plan, specifically:

- This project provides a resource for commuter parking on the edge of campus, removing such commuter parking from the campus core in a manner consistent with the residential campus, pedestrian priority campus core and transportation goals of the LRCDP
- This project carries specific intent to support events and cultural activities which engage with the university's stakeholders, students, staff, alumni, and the greater community of the state of Idaho. The ASUI Kibbie Activity Center and the ICCU Idaho Arena host and support a variety of academic and cultural outreach events which enrich the collegiate experiences and careers of the students of the University of Idaho.
- These anticipated education, outreach, extension, and cultural activities have the power to engage the community and transform the lives of students and community members alike, and they have the potential to cultivate relationships and improve communication and collaboration between the university and the greater community.

This project, and the resultant facility, is fully consistent with the principles, goals, and objectives related to outreach and extension within the University of Idaho's Long Range Campus Development Plan (LRCDP.

2. PROJECT COMPONENTS

Specific scope elements of this project include, but are not limited to:

- Two fully developed and landscaped surface parking facilities west of the ASUI Kibbie Activity Center, The ICCU Idaho Arena and Lot 34. These new parking facilities will be located at the site of the existing gravel surface lots, Lot 57 and Lot 110.
    - Lot 57 south of the new Idaho Avenue, approximately 450 parking stalls (+/-).
    - Lot 110 north of the new Idaho Avenue, approximately 175 parking stalls (+/-). This lot should also be designed with consideration for accommodation of Recreational Vehicles.
- The new lots should be designed to integrate with existing Lot 34 and existing Idaho Avenue. This includes the possible extension of the east/west pedestrian pathway and spine which currently exists in Lot 34, and/or other suitable measures, walkways, and pathways to accommodate safe and efficient pedestrian circulation.
- Landscape Islands and peninsulas sufficient to accommodate suitable street trees and other softscape materials.
- Landscaped street frontage on Perimeter Drive.
- Irrigation systems as required to support the landscape materials.
- Safety and security lighting meeting University of Idaho design and construction standards.
- Regulatory, wayfinding, identification, and directional signage meeting University of Idaho design and construction standards.
- Distribution of power and data infrastructure throughout both lots to strategic locations, complete with appropriate panels and pedestals, for the support of a variety of event set-ups and needs.
- Repairs and improvements to Lot 34 as identified and as necessary to successfully integrate and tie these two, new lots in with existing Lot 34.
- All other necessary appurtenances and miscellaneous items necessary for safe and efficient operations.

3. ALTERNATIVES

Two alternatives have been studied to date.

Alternative 1: No Action

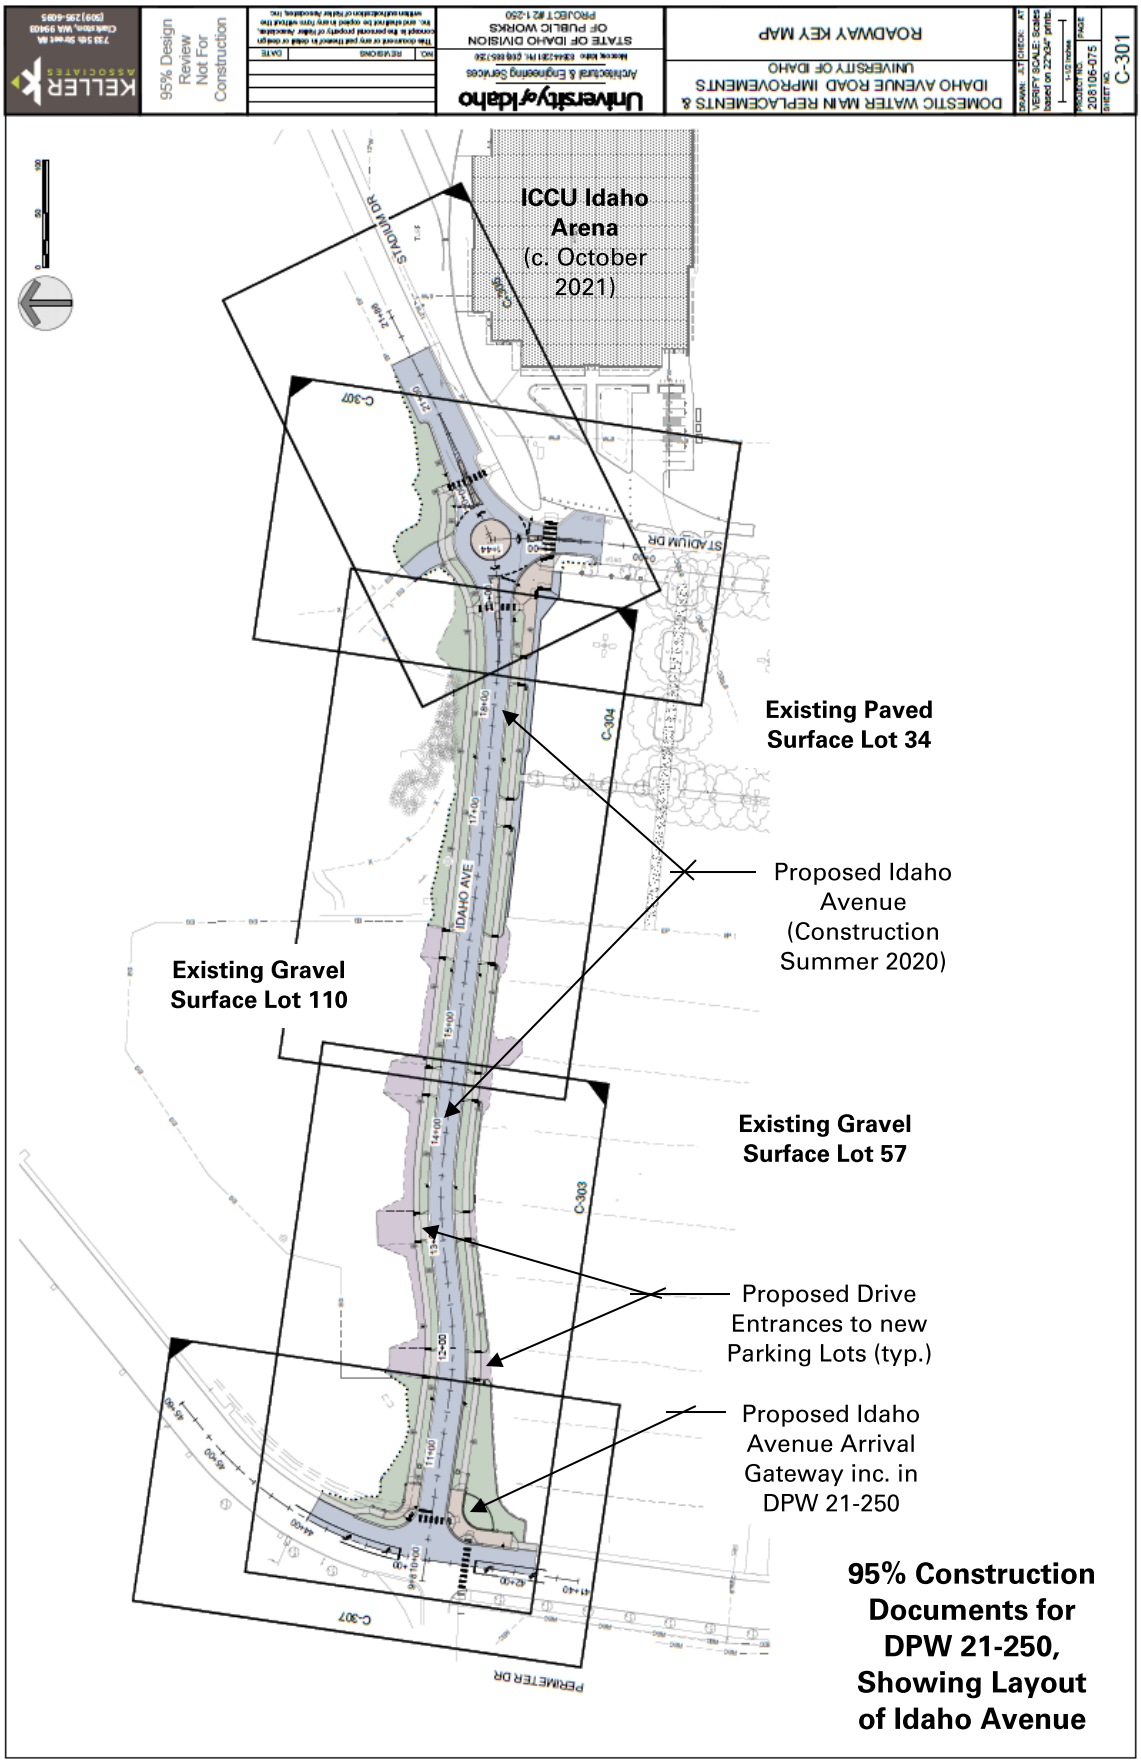
This alternative provides for no further investment beyond remedial maintenance activities to the existing gravel surface parking facilities west campus neighborhood. This will continue to present a poor image to the visitors and campus stakeholders of the university, negatively impacting recruitment and retention activities. This represents a tremendous lost opportunity cost to the university and its stakeholders.

For these reasons, the university rejected this alternative.

Alternative 2: Provide the Support Facilities as Described Herein

This alternative consists of a capital construction project to design and construct the project as described in this request. This will result in better support of the university's commuter students , faculty, and staff. It will provide for more efficient and flexible support of a variety of university academic, outreach, extension, and cultural events and activities. Importantly, it will provide an enhanced first impression of the university, its grounds and its environment which will reflect a high degree of intention and care in providing for a rich academic student experience. Such first impressions are vital to the university's recruitment efforts.

For these reasons, this is the university's preferred alternative.



4. VACATED SPACE

There are no vacated spaces created as a result of this project to report.

TAB 2 Page 50

CAPITAL BUDGET REQUEST
FY 2023
CAPITAL IMPROVEMENT PROJECT DESCRIPTION

(New Buildings, Additions or Major Renovations)

AGENCY: Lewis-Clark State College AGENCY PROJECT PRIORITY:1

PROJECT DESCRIPTION/LOCATION: Wittman Complex/Mechanical Technical Building System Updates

CONTACT PERSON: Julie Crea TELEPHONE: (208) 792-2240

PROJECT JUSTIFICATION:

(A) Concisely describe what the project is.
Existing projects are upgrading restrooms for ADA accessibility, addressing facility programmatic needs, and fixing scuppers in the Wittman Complex. Another project is addressing fire sprinkler system replacement and minor program needs such as carpet and ADA accessibility in the Mechanical Technical Building (MTB). This request is to finish the necessary updates to these facilities; bringing them up to acceptable safety standards (particularly important given the programs housed – diesel, welding, collision repair, etc.).

- The HVAC systems for both buildings have been identified as end-of-life by an independent deferred maintenance study.
- Both buildings have dated fire alarms systems, and panels and devices are due for replacement.
- Wittman Complex is due to have its fire sprinkler system upgraded including main lines and sprinkler heads replacement (other parts as needed).

(B) What is the existing program and how will it be improved?
These two facilities house Career and Technical Education and Academic programs. The facilities are used heavily for classroom/lab instruction. These system upgrades will assure continuity in operations and instruction.

(C) What will be the impact on your operating budget?
This project will positively impact the institution's operating budget by increasing energy efficiency and lowering costs.

(D) What are the consequences if this project is not funded?
Lost energy efficiencies, ongoing cost escalation and gap in ability to move the overall campus deferred maintenance plan forward to improve capital asset/building efficiencies and lifespan. Continuity in operations may be a

challenge if there are HVAC system failures and life safety could be compromised with failures in alarm and fire safety systems.

PLEASE INCLUDE ANY ANTICIPATED ASBESTOS COSTS IN THE OVERALL BUDGET.

ESTIMATED BUDGET:		FUNDING:	
Land		PBF	$ 3,763,200
A/E fees	$ 384,000	General Account	
Construction	3,200,000	Agency Funds	
5% Contingency	179,200	Federal Funds	
F F & E		Other	
Total	$ 3,763,200		
		Total	$ 3,763,200

AGENCY: Lewis-Clark State College AGENCY PROJECT PRIORITY: 2

PROJECT DESCRIPTION/LOCATION: Sam Glenn Complex Remodel

CONTACT PERSON: Julie Crea TELEPHONE: (208) 792-2240

PROJECT JUSTIFICATION:

(A) Concisely describe what the project is.
The Sam Glenn Complex remodel will replace the failing ceiling tile structure, install new carpeting, and address other minor repairs and needed painting. The ceiling tiles have a flaw in the design with the fixture method and need to be repaired as tiles are currently dislodging and falling at random times.

(B) What is the existing program and how will it be improved?

The Sam Glenn Complex is primarily an instructional facility for Career and Technical Education programs and houses important student support services such as a CTE tutoring center, Student Health, Student Counseling, and e-Learning Services (online learning management system). The updates will provide a safer environment. This facility has not had major non-system/ structural updates since 1996.

(C) What will be the impact on your operating budget?

There is no anticipated impact on the operating budget.

(D) What are the consequences if this project is not funded?

There are potential safety issues with a faulty ceiling structure and ceiling tiles falling.

PLEASE INCLUDE ANY ANTICIPATED ASBESTOS COSTS IN THE OVERALL BUDGET.

ESTIMATED BUDGET:			FUNDING:		
Land			PBF	$	2,352,000
A/E fees	$	240,000	General Account		
Construction		2,000,000	Agency Funds		
5% Contingency		112,000	Federal Funds		
F F & E			Other		
Other					
Total	$	2,352,000	Total	$	2,352,000

AGENCY: Lewis-Clark State College	AGENCY PROJECT PRIORITY: 3

PROJECT DESCRIPTION/LOCATION: Meriwether Lewis Hall Remodel

CONTACT PERSON: Julie Crea	TELEPHONE: (208) 792-2240

PROJECT JUSTIFICATION:

(A) Concisely describe what the project is.
Meriwether Lewis Hall (MLH) was built in four phases, with the first constructed in 1970 and remaining phases completed in 1981. As a result, there are two independent HVAC systems that have always competed against each other thus making it difficult to regulate, control and maintain—issues especially relevant for science classes and labs both of which are conducted in this building. These systems have also been categorized as "end-of-life" and should be considered for energy efficient replacement. The electrical service was also identified as a high priority system that is past life expectancy and strongly recommended to be replace by the deferred maintenance study. Additionally, MLH is due for fire alarm and sprinkler replacement, plumbing upgrades (failures are becoming more prevalent) and flooring upgrades. The building has recently received a new roof and LED lighting.

(B) What is the existing program and how will it be improved?
MLH is primarily an instructional building and houses classrooms and labs. Updating these systems will assure continuity in instructional operations.

(C) What will be the impact on your operating budget?
This project will positively impact the institution's operating budget by increasing energy efficiency and lowering costs.

(D) What are the consequences if this project is not funded?
Lost energy efficiencies, ongoing cost escalation and gap in ability to move the overall campus deferred maintenance plan forward to improve capital asset/building efficiencies and lifespan.

PLEASE INCLUDE ANY ANTICIPATED ASBESTOS COSTS IN THE OVERALL BUDGET.

ESTIMATED BUDGET:		FUNDING:	
Land		PBF	$ 17,640,000
A/E fees	$ 1,800,000	General Account	
Construction	15,000,000	Agency Funds	
5% Contingency	840,000	Federal Funds	
F F & E		Other	
Other (certification)

CAPITAL BUDGET REQUEST
FY 2023
CAPITAL IMPROVEMENT PROJECT DESCRIPTION

(New Buildings, Additions or Major Renovations)

AGENCY: College of Southern Idaho AGENCY PROJECT PRIORITY: 1

PROJECT DESCRIPTION/LOCATION: Evergreen Building C-wing Remodel

CONTACT PERSON: Jeffrey Harmon TELEPHONE: 208-732-6210

PROJECT JUSTIFICATION:

(A) This project consists of remodeling approximately 10,000sf. The project will provide flexible classrooms, student work space, and remote learning technology while also providing an oportunity to replace aging electrical and mechanical infrastructure.

Project includes: interior demolition; reframing walls; all new electrical, HVAC, and DDC controls; new ceiling, wall, and floor finishes; and new I.T. infrastructure. No structural or exterior envelope work is anticipated. Hazardous abatement is not expected.

The College is requesting PBF funding with an agency match. CSI is requesting $3,000,000 from PBF and CSI will match $600,000 (this includes $500,000 towards construction, $100,000 for new FF&E and CSI will reuse some existing FF&E).

(B) This area previously housed small business and economic development offices. These were moved off campus so the area can be repurposed as student and academic space. Remodeling this space will benefit multiple academic departments including Physical Sciences, Agriculture, Art, and other academic programs. Two examples of desired spaces are 1) a STEM study lab and 2) classroom space that better supports a blend of face-to-face, hybrid, and remote online instruction.

(C) There will be no increase to CSI's operating budget. There is potential to realize deferred maintenance savings. Energy efficiency and long term durability will be central design considerations.

(D) Failure to fund this project will hinder CSI's ability to make the most efficient use of existing space and to adapt to evolving instructional methods and technology. Future deferred maintenance costs may increase if the project is not completed now.

PLEASE INCLUDE ANY ANTICIPATED ASBESTOS COSTS IN THE OVERALL BUDGET.

BOISE STATE UNIVERSITY, IDAHO STATE UNIVERSITY, LEWIS-CLARK STATE COLLEGE and UNIVERSITY OF IDAHO

SUBJECT

Report on National Collegiate Athletic Association (NCAA) Academic Progress Rate (APR) Scores for Boise State University, Idaho State University and University of Idaho and National Association of Intercollegiate Athletics (NAIA) Return on Athletics (ROA) Report for Lewis-Clark State College

BACKGROUND/DISCUSSION

APR Report (Boise State University, Idaho State University, University of Idaho)

NCAA instituted the APR tracking system in 2004 in response to public concerns over academic performance and graduation rates among student athletes. The APR is determined by using eligibility and retention data for each student-athlete on scholarship during an academic year. Student-athletes are awarded points for each semester they are enrolled and for each semester they are eligible for intercollegiate competition. The single and multi-year APR is determined as a percentage of points earned divided by total points possible for that cohort, with the resulting number multiplied by 1,000. The highest possible score for a team is 1,000 (as calculated by the process described in the paragraph below). The NCAA calculates the APR rate as a four-year rolling average. Currently, the benchmark minimum score for each sport is 930, which the NCAA equates with a 50% graduation rate. Teams that fall below the 930 minimum are subject to sanctions which may include loss of scholarships. APR averages which fall below 900 over time may also include restrictions on practice time, loss of post-season competition eligibility, and other penalties.

Calculation of the APR. A team's APR cohort for a given year is composed of student-athletes who receive financial aid based on athletic ability; if a team does not offer financial aid, then the cohort consists of those student-athletes who are listed on the varsity roster on the first day of competition. Each student-athlete in the APR cohort has the ability to earn two points for each regular academic term of full-time enrollment. One point is awarded if the student-athlete is academically eligible to compete in the following regular academic term. The other point is awarded if the student-athlete is retained by the institution (i.e., returns to school as a full-time student) in the next regular academic term. Student-athletes who graduate are given both the eligibility and retention points for the term. Squads can also earn a delayed graduation point if a student-athlete who left the institution without graduating returns to the institution and graduates. At the start of each academic year, each Division I team's APR is calculated by adding all points earned by student-athletes in the team's cohorts in each of the previous four years, dividing that total by the number of possible points the student-athletes could have earned and multiplying by 1,000. Thus, an APR of 950 means that the student-

athletes in the cohort earned 95 percent of the eligibility and retention points that they could have earned.

Eligibility and Retention Rates. A squad's eligibility rate is calculated by taking all of the eligibility points earned during the previous four years, dividing that total by the number of eligibility points that could have been earned during that time and multiplying by 1,000. A squad's retention rate is calculated similarly using retention points earned and retention points possible.

Return on Athletics (ROA) Report (Lewis-Clark State College)

In 2019-20, the National Association of Intercollegiate Athletics (NAIA) implemented ROA to report on the sports and athletes at the colleges and universities which are members of NAIA. ROA is the NAIA's proprietary approach to the management of collegiate athletics. This approach is aimed at demonstrating how athletics have a positive impact on institutions' ability to identify opportunities to drive enrollment, improve student success, and grow net return on athletics.

The return on athletics information is reported in three areas:

- Institutional data which includes annual enrollment by gender, resident (in-state) tuition, non-resident (out-state, out of area) tuition, and other tuition rates that are specific to individual institutions such as LC State's Asotin County resident tuition. Other information collected includes the cost of room, board, and books for student attending an institution
- Data by sport includes revenues and expenses associated with the offering of each sport at the reporting institution
- Student data reports on athlete demographics including gender, race/ethnicity, first generation student status, tuition classification (resident, non-resident, other tuition), living on or off campus, academic exemption, athlete retention and graduation, and the different kinds of financial aid received by the athlete.

The NAIA uses academic exemptions to reward high achieving student-athletes throughout the year by not counting half of the financial aid toward the institution's allowable countable aid limits for those achieving 3.30-3.59 cumulative GPA, and reducing in whole the financial aid amount for those who achieving 3.60-4.00 cumulative GPA on the institutions limits on financial aid. The NAIA, like the NCAA, has limits on institutional aid that can be awarded to student-athletes who participate in an institution's sport program. Unlike the NCAA, the NAIA uses academic exemptions to allow institutions to expand rosters, thus allowing more students to participate and additional aid to be awarded to more students.

IMPACT

APR reports from the three NCAA member institutions are provided. All three institutions report that they are meeting the 930 APR benchmark.

Each institution usually has provided two formats for the APR reports. Both reports show the single and multi-year APR scores. The first report by Subgroup shows the percentile rank within the sport, all sports, Division I, public institutions, Football Bowl Subdivision, Football Championship Subdivision, and finally Division I (non-football). The second report includes the Multi-year Rate Upper Confidence Boundary and the multiyear and single year APR scores for Eligibility/Graduation and for Retention.

The APR report by Subgroups was not made available for 2019-20 by the NCAA.

Multiyear Rate Upper Confidence Boundary. A squad-size adjustment is a statistical margin of error, or confidence interval, applied by the NCAA when limited data are available to estimate a team's APR with appropriate confidence. The adjustment helps ensure that small squads are not penalized unfairly based on a small set of observations. Confidence intervals, commonly used in statistics, roughly represent a range of scores within which the true APR likely resides. The upper confidence boundary of a team's APR has to be below 925 for that team to be subject to APR penalties. The squad-size adjustment currently only applies to squads with three or fewer years of data or four-year cohorts of fewer than 30 student-athletes.

STAFF COMMENTS AND RECOMMENDATIONS

The APR system is a useful element in institutions' toolkits to track and encourage academic success for student athletes. When coupled with additional measures, such as grade point averages and graduation/degree completion results, the APR can provide performance metrics to support data-informed decisions and effective engagement by athletic departments and senior university leadership in support of the Board's academic goals.

Lewis-Clark State College has added its information this year. Although it does not fall under the same reporting requirements as the three universities, this report demonstrates LC State's desire to support the Board's academic goals in a comparable manner to the other three institutions.

BOARD ACTION

This item is for informational purposes only.

Boise State University
Spring 2021 NCAA Academic Progress Rate (APR) Report Summary

Boise State Athletics set department records for single-year and multi-year all-department Academic Progress Rate (APR) scores in the NCAA's most recent figures. Bronco student-athletes combined for a 993 single-year score and a 992 multi-year score, each improving upon records set the previous year. The most recent scores saw 12 Bronco programs post perfect single-year APR scores of 1,000 for the 2019-20 academic year. Nine Boise State teams set program records for multi-year APR scores, which is calculated using a four-year rolling average through the 2019-20 academic year.

The NCAA is taking a two-year hiatus from publicly announcing APR scores and the accompanying NCAA Public Recognition Awards for programs with multi-year APR scores ranking in the top 10 percent of their respective sports nationwide. However, five Boise State teams posted perfect multi-year APR scores of 1,000.

Women's golf has eight consecutive multi-year scores of 1,000, while men's golf has five and gymnastics and beach volleyball each have four. Beach volleyball has earned every available APR point in the program's existence.

Men’s basketball has recorded a perfect single-year APR score on three of the last four reports, leading to a program record 995 multi-year APR score.

NCAA Division I 2019 - 2020 Academic Progress Rate Institutional Report

Institution: Boise State University

Date of Report: 07/01/2021

This report is based on NCAA Division I Academic Progress Rate (APR) data submitted by the institution for the 2016-17, 2017 -18, 2018-19 and 2019-20 academic years. Institutions are encouraged to forward this report to appropriate institutional personnel on campus.

[Note: All information contained in this report is for four academic years. Some squads may still have small sample sizes within certain sport groups. In accordance with the Family Educational Rights and Privacy Act's (FERPA's) interpretation of federal privacy regulations, institutions should not disclose statistical data contained in this report for cells made up of three or fewer students without student consent.]

Sport	APR			Eligibility/Graduation		Retention	
	Multiyear Rate (N)	Multiyear Rate Upper Confidence Boundary	2019 - 2020 (N)	Multiyear Rate	2019 - 2020	Multiyear Rate	2019 - 2020

* Denotes data representing three or fewer student-athletes. In accordance with FERPA's interpretation of federal privacy regulations, institutions should not disclose statistical data contained in this report in cells made up of three or fewer students without student consent.
N/A = No APR or not applicable.
N = Number of student-athletes represented.

[1] Denotes APR that does not subject the team to ineligibility for postseason competition based on institutional, athletics and student resources and the team's Graduation Success Rate.

[2] Denotes APR that does not subject the team to ineligibility for postseason competition due to the team's demonstrated academic improvement.

[3] Denotes APR that does not subject the team to ineligibility for postseason competition due to the squad-size adjustment. The "upper confidence boundary" of a team's APR must be below 930 for that team to be subject to ineligibility for postseason competition. Squad-size adjustment does not apply to teams with four years of APR data and a multiyear cohort of 30 or more student-athletes.

[4] Denotes APR that does not subject the team to penalties due to the team's demonstrated academic improvement.

[5] Denotes APR that does not subject the team to penalties due to the squad-size adjustment. The "upper confidence boundary" of a team's APR must be below 930 for that team to be subject to penalties. The squad-size adjustment does not apply to teams with four years of APR data and a multiyear cohort of 30 or more student-athletes.

[6] Denotes APR based on a one year cohort, not subject to ineligibility for postseason competition and/or any penalties.

[7] Denotes APR based on a two year cohort, not subject to ineligibility for postseason competition and/or any penalties.

[8] Denotes that team is not subject to ineligibility for postseason competition and/or penalties based on institutional resources.

[9] Denotes APR that requires an APP Improvement Plan be created for this sport.

Idaho State University
Spring 2021 APR Summary Report

The 2019-20 **one-year score** for the Idaho State Department of Athletics was 959. The one-year Eligibility Score for the department was 957, and the one-year Retention Score was 961.

- 3 of ISU's 13 teams scored a perfect 1,000
  - Women's Golf had a single year score of 1,000.
  - Women's Softball had a single year score of 1,000.
  - Women's Volleyball had a single year score of 1,000.
- The Men's Basketball one-year score has remained the same for the second year in a row (958, 980, 981 & 981).
- The following teams saw an increase to their 2019-20 one-year score:
  - Women's Cross Country
  - Women's Golf
  - Women's Softball
  - Women's Tennis
  - Women's Track

The 2019-20 **multiyear score** for the whole department was 967. The multiyear Eligibility Score was 965 and multiyear Retention Score was 969.

- The Men's Basketball multiyear score increased for the second consecutive year (950, 949, 955, 975)
- Of all 13 teams, Women's Softball saw the greatest improvement in their multiyear score—18.19 AY: 940 to 19.20 AY: 951
- Of all 13 teams, Women's Soccer had the greatest decline in their multiyear score—18.19 AY: 987 to 19.20 AY: 964

Summary

- Five team's single year scores improved from the year before (Women's Cross Country, Women's Golf, Women's Softball, Women's Tennis and Women's Track)
  - The Women's Volleyball team had the same single year score, a perfect 1000, as they did in the 2018-19 school year.
- Six teams saw a decrease in their single year scores (Men's Cross Country, Football, Men's Tennis, Men's Track, Women's Basketball, Women's Soccer)
- Five teams improved their multiyear score from the previous year. (Men's Basketball, Women's Cross Country, Women's Golf, Women's Softball, & Women's Track)
- Eight team's multiyear scores decreased from the previous year (Men's Cross Country, Football, Men's Tennis, Men's Track, Women's Basketball, Women's Soccer, Women's Tennis & Women's Volleyball)

University Of Idaho
2019-2020 Academic Progress Rate (APR) Report Summary

Division I Academic Progress Rate (APR) was implemented in 2003 as part of an ambitious academic reform effort in Division I Athletics, the Academic Progress Rate (APR) holds institutions accountable for the academic progress of their student-athletes through a team-based metric that accounts for the eligibility and retention of each student-athlete receiving athletic aid for each academic term. Teams must earn a four-year average APR of 930 to compete in championships.

The University of Idaho sponsors sixteen NCAA sports. Academic Progress rate is calculated in fourteen sports due to Men's Indoor and Outdoor Track being counted as one APR score along with Women's Indoor and Outdoor Track being counted together as well. Currently, 13 of 14 teams maintain a 4-year average of at least 956 or higher. In the 2019-20 academic year, eleven out of fourteen sports posted a perfect 1,000 single year score. However, due to the impact of COVID, APR data from the 2019-2020 academic year will not be made public and no public recognition will take place as well.

Overall, the multiyear APR scores have once again reached an all-time high for the entire department just like the single year APR scores. Idaho's average multiyear APR score, by sport, is 986.2, an increase of 1.7 points from the prior year's average of 984.5. Idaho's average single year APR score is 993.4, which is an increase of 4.7 points.

Even with the continued APR improvement scores, both single year and multi-year, men's basketball program fell below the required 930 multiyear rate. In a "normal year" the penalty assessed would render the program ineligible for post-season competition. Due to the impact of COVID19, no APR penalties will be enforced for any sport. An improvement plan for men's basketball was required to be submitted, and was done so accordingly, to demonstrate to the NCAA the changes that are being implemented to improve the team's APR. With said changes in place, the men's basketball program is on track to raise its multi-year score above the required 930 mark. The implemented improvement plan has already demonstrated success as the men's basketball program is on track in 2020-2021 to have the highest single year APR score in 5 years. This projected score, combined with the steady increase over the last few years, should bring the program to sustainable level over 930 moving forward.

APR Public Recognition Awards

The NCAA annually honors teams earning multiyear Academic Progress Rates in the top 10 percent of all squads in each sport. As previously mentioned, due to COVID, no public recognition will take place, however during the 2019-20 APR cycle, the following teams earned perfect APR scores:

Men's Cross Country	University of Idaho	ID	2019-2020
Women's Cross Country	University of Idaho	ID	2019-2020
Men's Golf	University of Idaho	ID	2019-2020
Women's Golf	University of Idaho	ID	2019-2020
Men's Track and Field	University of Idaho	ID	2019-2020
Women's Track and Field	University of Idaho	ID	2019-2020
Men's Tennis	University of Idaho	ID	2019-2020
Women's Tennis	University of Idaho	ID	2019-2020

Women’s Basketball	University of Idaho	ID	2019-2020
Women’s Swimming and Diving	University of Idaho	ID	2019-2020
Women’s Volleyball	University of Idaho	ID	2019-2020

NCAA Division I 2019 - 2020 Academic Progress Rate Institutional Report

Institution: University of Idaho

Date of Report: 07/26/2021

This report is based on NCAA Division I Academic Progress Rate (APR) data submitted by the institution for the 2016-17, 2017 -18, 2018-19 and 2019-20 academic years. Institutions are encouraged to forward this report to appropriate institutional personnel on campus.

[Note: All information contained in this report is for four academic years. Some squads may still have small sample sizes within certain sport groups. In accordance with the Family Educational Rights and Privacy Act's (FERPA's) interpretation of federal privacy regulations, institutions should not disclose statistical data contained in this report for cells made up of three or fewer students without student consent.]

Sport	APR			Eligibility/Graduation		Retention	
	Multiyear Rate (N)	Multiyear Rate Upper Confidence Boundary	2019 - 2020 (N)	Multiyear Rate	2019 - 2020	Multiyear Rate	2019 - 2020

Lewis-Clark State College

2019-2020 NAIA Return on Athletics (ROA) Report Summary

Overall, the teams and athletes at LC State were quite successful during 2019-20 regarding their academic success, as 61% of student-athletes were awarded either half or full academic exemptions. For the 2019-20 reporting year, 69% of student-athletes were retained at the institution while 18% graduated for a combined 87% of athletes being retained or graduated from LC State. Because 2019-20 is the first year of the ROA, no data are available for comparison with previous years.

For the 2019-20 academic year, LC State was publicly recognized as having earned a Champions of Character Five-Star Award with gold distinction which is the highest level of achievement in the NAIA. The five-star tiers are gold, silver, and bronze which are determined by the final scoring of the Champions of Character scorecard. Gold level is composed of institutions scoring 90-100 points on the scorecard, silver level are institutions scoring 75-89 points on the scorecard, and bronze level are institutions scoring 60-74 points on the scorecard.

In other recognitions of academic performance, the NAIA evaluates and names Scholar Teams each year for their excellence in the classroom. Teams must have a minimum 3.0 GPA to receive this award. For the academic year 2019-20, LC State had eleven of its twelve teams named as NAIA Scholars Teams:

Men's Sports recognized as Scholars Teams	Women's Sports recognized as Scholars Teams
Basketball	Basketball
Cross Country	Cross Country
Golf	Golf
Tennis	Tennis
Track & Field	Track & Field
	Volleyball

*Duplicated - students in more than one sport are counted once in each sport.

Full Aid Exemptions: Students who have a cumulative GPA of 3.6 or higher are exempt from having their aid counted towards the NAIA's scholarship limits.
1/2 Aid Exemptions: Students with a 3.3-3.59 cumulative GPA will have only one half of their aid counted towards the NAIA's scholarship limits

IDAHO PUBLIC TELEVISION

SUBJECT

General Manager Appointment

APPLICABLE STATUTE, RULE, OR POLICY

Idaho State Board of Education Governing Policies & Procedures, Section I.E.2.c.

BACKGROUND/DISCUSSION

Ron Pisaneschi retired as general manager of Idaho Public Television (IPTV) effective July 31, 2021. On July 26, 2021, the executive director of the State Board of Education (Board) appointed Jeff Tucker, IPTV Director of Content, as the Interim General Manager effective August 1, 2021 until such time the Board appoints a permanent general manager.

Board policy provides that the Board's executive director shall have authority to identify candidates and make recommendations for the appointment of agency heads, which must be approved and appointed by the Board. The executive director formed a Search Committee composed of the following individuals:

Dr. Dave Hill, Vice President, Idaho State Board of Education
Doug Balfour, President, Friends of Idaho Public Television Board of Directors
Judy Meyer, Friends of Idaho Public Television Board of Directors
Peter Morrill, General Manager (ret.), Idaho Public Television
Matt Freeman, Executive Director, Idaho State Board of Education

The committee developed and approved a job announcement for general manager position. A national search was conducted via industry trade websites. The committee reviewed and discussed applicants, and identified and interviewed finalists.

IMPACT

This appointment will ensure continuity of operations at IPTV.

ATTACHMENTS

Attachment 1 – Cover letter, resume and letters of recommendation – Jeff Tucker

STAFF COMMENTS AND RECOMMENDATIONS

The committee unanimously recommends to the State Board of Education the appointment of Jeff Tucker as General Manager.

BOARD ACTION

I move to appoint Jeff Tucker as General Manager of Idaho Public Television at the rate of $62.50/hour effective August 26, 2021.

Moved by _____ Seconded by _____ Carried Yes _____ No _____

JEFF TUCKER

June 9, 2021

Mr. Matt Freeman
Executive Director
Idaho State Board of Education
650 W. State St. 3rd Floor
Boise, Idaho 83702

Dear Mr. Freeman and Members of the State Board of Education,

With an abundance of humility and enthusiasm, I am pleased to submit my application to become General Manager of Idaho Public Television.

When FCC Chairman Newton Minow proclaimed that television was a “vast wasteland” in his famous 1961 speech, he could not have foreseen how the television landscape would change 60 years into the future. I am not sure what Minow would say about today’s commercial- and corporate-owned media, but I do believe he would point to IdahoPTV as a beacon for what television can do -- harness the power of public media to encourage lifelong learning, connect our communities and enrich the lives of all Idahoans. I am proud of the role I have played in the past to help make IdahoPTV a national leader in public television. And now I’m excited to take IdahoPTV into the future.

As General Manager (GM) of IdahoPTV, I will work tirelessly to build upon the incredible foundation of our success including the trust we have earned among our many constituencies and the demonstrated high quality of our locally produced programs, education content and diversity of viewing platforms. I will continuously calibrate what Idahoans want from their public television. I will lead our talented team with authenticity and fairness. I will fortify the positive relationships in state government I’ve established over the past 21 years and build new ones to successfully guide us through our state funding appropriation. Equally as important is our private fundraising efforts. I am excited to learn and do more with our wonderful team at IdahoPTV.

As the new GM, I will also initiate new endeavors to strengthen IdahoPTV. I want to build on our promise to provide lifelong learning by engaging viewers with media and civil literacy education. When we educate viewers on the important topics of our time we bolster our collective knowledge base and understanding of our society and each other. To ensure continuity and quality of this valued resource, we must also address proper succession planning and leadership training.

As I reflect on my career, I realize I’ve been preparing for this moment from the beginning. It was always one step at a time without this being the end goal. I began at IdahoPTV as a volunteer for KAID in 1983 while in high school and then into college on the campus of University of Idaho at KUID. My first full-time position at IdahoPTV was as lead director, videographer and editor for the largest single series ever for our agency. I learned so much from my colleagues during those early years. They led by example. They taught, corrected and pushed me and helped

JEFF TUCKER

4922 W. Outlook Ave.
Boise, ID 83703

O. 208 373 7371
M. 208 867 5748

unleash my creative potential. The staff at IdahoPTV became and continues to be my extended family. After a decade at IdahoPTV, I realized I needed other world experience. In 1993, I established a full-service video production company working locally, nationally and internationally for large corporate clients and national media outlets. I was responsible for all aspects of the business. Tucker Productions taught me many things that I needed to be successful in any position. But work for most commercial clients did not fulfill my need to work with organizations with high journalistic standards. After 8 years of commercial video success, I returned to IdahoPTV to become a part of something bigger.

In 2001, I accepted a management role within the production department at IdahoPTV where I honed critical skills -- budgeting, scheduling, prioritizing and strategizing -- that led to improved efficiencies and communication. I worked hard to build better interdepartmental relationships and implement editing and networking improvements leading our production team into the world of high definition long-form documentary and studio production. After the launch of *Idaho In Session*, our gavel-to-gavel coverage of the legislature, I worked hard to make the service a success. Since 2002, I have managed and grown this service which is now a key in our standing with the legislature and the public.

In 2013, when Ron Pisanechi accepted the GM position, I was appointed Director of Content Services, overseeing four departments, up to 11 direct reports (33 full-time and 13 part-time) and a $4 million budget. I was entrusted to resolve sensitive personnel issues; fundraise; build an education department; refine our communications processes; vastly improve our brand identity across all platforms; leverage our presence in social media; stake our claim in the digital realm and create and hire a new director-level position. In 2019, as Director of Content, I continued to lead the launch of IdahoPTV's newest original production, *Idaho Experience*. I helped secure and manage national grant projects such as American Graduate and led a four-state partnership grant request for a forthcoming series called Coming Home.

IdahoPTV has a myriad of funding sources. Each one is vitally important to our success.

I have played a key role in securing private funding for our work and I regularly meet with private donors, present to groups throughout the state and participate in or lead grant requests.

As Director Freeman and the Board Members know, state support for IdahoPTV, which constitutes a smaller but significant portion of our overall budget, is precarious. During the 2021 legislative session, state funding was approved by the narrowest of margins in the House of Representatives. I understand completely how the state system functions and the various roles of the Governor's office, Division of Financial Management, individual legislators and the Legislative Budget Office. As GM, I look forward to guiding IdahoPTV through the state budgeting process by continuing to build trusted relationships, listening and quietly but confidently standing up for what our agency needs to survive and thrive.

JEFF TUCKER

4922 W. Outlook Ave.
Boise, ID 83703

O. 208 373 7371
M. 208 867 5748

I understand the policies that govern the relationship between IdahoPTV and the Idaho State Board of Education, our Friends of Idaho Public Television Board, its endowment and the surrounding legal principles. I know what it means to be a non-commercial broadcaster as defined by the Federal Communications Commission and the tremendous opportunities for grants and support that the Corporation for Public Broadcasting offers.

Public and private partnerships are also vitally important to IdahoPTV. I recently worked to create a new public partnership with the Idaho Workforce Development Council to build video content to highlight pathways to high-skilled, in-demand careers for Idaho's students and a private partnership with St. Luke's Health System to improve public awareness of adverse childhood experiences. I will continue to steward the important relationship with Idaho's universities where our studios, KISU and KUID, are located.

I have worked very hard for IdahoPTV for almost 30 of its +56 year history. But there is more critical work to be done. We must produce and distribute more trusted local educational resources and productions; build a better alignment with our organization and Friends Board; re-engage our administrative group by updating our strategic plan and train our future leaders to, one day, take the reins of the organization.

I am energized by this opportunity and anxious to lead our talented and hardworking staff forward. I believe I have earned their trust. In the spirit of life-long learning, I enrolled in and graduated from the state Certified Public Manager program where I invested more than 400 hours over 22 months to improve and strengthen my leadership capabilities.

IdahoPTV is one of our state's most cherished resources. It expands our horizons, keeps us connected and helps us understand our world and place within it. I believe I am the right person to steward this precious resource.

Included in this package is my resume and letters of reference. I have also included an addendum that outlines in more detail my qualifications to meet the duties and specific functions as outlined by the position posting.

Respectfully,

Jeff Tucker

National Educational Telecommunications Association
Past Production and Management Chair

PROFESSIONAL EXPERIENCE

DIRECTOR OF CONTENT

Idaho Public Television | Jan 2019 - present

Manage departments and people in critical areas:

- Content and Programming - Oversee five direct reports in department of 29 employees; oversee programming, sharing production duties with executive producer; oversee technical, production and strategy of all ongoing local and independent productions including: *Idaho Experience, Idaho Reports, Idaho in Session, Dialogue, The 180, Science Trek,* and other special programs such as *American Graduate* and *Resilient Idaho;* oversee digital content initiatives and external partnerships
- Education - Oversee one direct report in department of six employees; oversee strategy to have a broad reach in communities with special focus on families and teachers and to forge strong statewide and national partnerships; was a leader with PBS Teacher Community Program and PBS Parent Engagement in Schools grant; serve as project manager for Preschool Development strategy grant gathering partners and lead organizing of deliverables; created budget and helped coordinate improved delivery of critical local education through projects such as *Classroom Idaho*

Play a key role on the management team including personnel and finance:

- Serve as acting General Manager when GM is absent
- Help guide employee matters including sensitive personnel issues and staff transitions; organize and oversee the implementation of COVID-response policies and protocols for production ensuring the uninterrupted delivery of high quality live and broadcast programming and services including *Idaho in Session*
- Align production, education programming and communication department personnel responsibilities based on abilities and strategic needs and mission; serve as lead on hiring committees for key production and education staff
- Key participant in budget setting for agency and oversee combined department budget in excess of $3.6 million. Work and communicate directly with Idaho Division of Financial Management and Legislative Budget Office
- Participate in full agency budget development of more than $9 million and revenue setting for state fiscal year 2020 and 2021
- Key on-air and in-person fundraiser; make presentations to the public and meet with major donors
- Project manager for long term grants from Corporation for Public Broadcasting (CPB), secured grants from Idaho Workforce Development Council, oversaw all work on rural initiative production grant to CPB for $980,000

Demonstrated knowledge of technology and operational management:

- Key player in conversion to high definition studio, edit and field production
- Deep understanding of technical infrastructure needed for statewide operations
- Oversaw purchase and implementation of video archive system

Initiate projects that expand and improve programming:

- Manage *Idaho in Session;* expanded service from a streaming webcam to fiber connected, multi-camera coverage of the Idaho Legislature and Supreme Court; defined capital replacement plan for critical equipment
- Provide video support to Governor's office and Idaho Legislative Services
- Serve as executive producer of *Idaho Experience*
- Implemented viewer surveys to guide content strategy for productions
- Form external partnerships, acquired funding and led production of programs on adverse childhood experiences, education and rural issues

Build relationships with key constituents:

- Liaison to legislators, the Governor and other statewide officers and state agency leaders for *Idaho in Session*
- Forge partnerships between IdahoPTV and state and national organizations
- Serve on numerous state and national panels and advisory groups

DUTIES AND SPECIFIC FUNCTIONS

1 Administering the system in all matters relating to the finance, personnel, programming, and operational management

Finance: For two decades, I have played key roles in IdahoPTV's budget and strategic planning. As Director of Content, I oversee multiple department budgets. For state fiscal years 2020 and 2021, I helped determine the budget and revenue setting for all departments. I understand our budget well and will work with our strong fiscal team to stay efficient and effective while true to our mission and goals.

Personnel: Aligning personnel with departmental needs and projects in order to achieve our mission is critical for the stability and happiness of our talented staff and the continued success of IdahoPTV. In addition to my experience of hiring, evaluating and leading the personnel in the departments I oversee, I have also led the development of several new and large scale initiatives that require realigning staffing and procedures. I've created and filled a new management-level position, which transitioned to a director-level position, and have worked very hard to strengthen interdepartmental connections.

Programming: Private funding allows us to produce our own high quality programs and showcase outstanding content from PBS. State funding allows us to get the programming out to the entire state. Occasionally this symbiotic relationship experiences friction, especially when a very small but very vocal subset of viewers tell their legislators that they are unhappy with certain content on national programs. Navigating this friction is challenging: we must defend our content AND listen to our viewers. I will work hard to create partnerships and listen to and understand our viewers and funders in order to build consensus and continue our important work.

Operational Management: I have a clear understanding of IdahoPTV's internal and external operations. Internally, I have worked very closely with the staff in technology (the people who maintain the delivery of our 5 channels of programming, 24/7) and development (those who secure funding from private donors, foundations and businesses). I have great confidence in and respect for these teams and their leaders. I will continue to work to find out what each person needs to excel in their functions and, as always, will listen, weigh the pros and cons and make decisions based on what is best for the entire organization.

Externally, I also am keenly aware of operational management guidelines outside of the agency, including the Governing Policies and Procedures relating to our role as a state agency governed by the Idaho State Board of Education, the Guiding documents that help to determine how the Endowment and Friends group interacts with the state agency and the operating agreement between the Friends of IdahoPTV and IdahoPTV.

2 Developing long-range planning and objectives for the system and its personnel

I have been involved in the ongoing long-range planning and objectives for IdahoPTV and its personnel for decades. I've also initiated the creation of new programs and services with our long term sustainability in mind.

As GM, the most pressing and important challenge for the long-range health of our organization is our relationship with the legislature. The most pressing need is a contingency plan in the event of the loss of state funding. The 2022 legislative session will be a critical period for our agency.

Moreover, our long term planning must include: succession planning; training to become a more resilient organization; audience surveys; viewership strategy; trusted and localized Idaho education resources; review and update of our strategic plan; and the creation of internal working groups to train new managers and tackle operating issues collaboratively.

JEFF TUCKER

4922 W. Outlook Ave.
Boise, ID 83703

O. 208 373 7371
M. 208 867 5748

DUTIES AND SPECIFIC FUNCTIONS

3 Formulating and preparing budget requests for approval by the State Board of Education and the Idaho Legislature

IdahoPTV is a small but relatively complex state agency with an annual budget of more than $9 million. Although I have played a key role in the budget development process as it relates to the State Board, Division of Financial Management, Legislative Budget Office I will continue to learn more.

We have a strong fiscal team that works well with all of the key players and I have enjoyed an effective working relationship with all of our analysts over the years.

In the past, our finances have been misunderstood by many legislators. As GM, I look forward to the opportunity to discuss and educate legislators about the fiscal operations of IdahoPTV.

4 Developing and establishing policies relating to public broadcasting for approval by the State Board of Education. These policies will be developed in consultation with constituent groups and individuals

I have a thorough knowledge of the history of IdahoPTV and the significance of policy changes over the years. As GM, I will be extremely proactive about working with the groups and individuals who impact our policies. In doing so, I will mitigate the risk of controversy and the adverse effects of reacting too quickly in the face of challenges.

IdahoPTV operates under the State Board of Education's Governing Policies and Procedures, which provides guidelines for: operations; choosing and scheduling programs (that may be subject to the State Board's prior approval); principles of programming and content; and the need to follow written procedures. Monthly programming reports are required to include viewer comments, upcoming programming and content overviews. Another key policy describes the relationship between IdahoPTV's 501-(c)(3) non-profit fundraising group and IdahoPTV, an entity of the State Board of Education. A 2007 overview of the legal principles impacting IdahoPTV and its foundation and friends groups was written to provide guidance on this relationship.

I will regularly review our governing policy descriptions and legal reviews to make sure they are still relevant and to keep IdahoPTV, our Friends Board and our license holder - the State Board of Education - in sync.

5 Preparing and submitting reports to the Federal Communications Commission, the Board of Education, Public Broadcasting Service, Corporation for Public Broadcasting, and other state and national organizations as needed

IdahoPTV is a non-commercial, educational broadcasting entity that is required by the FCC to submit certain reports focusing on a myriad of information. It includes but is not limited to donor lists, issues/programs, investigations and complaints, EEO, children's programming, retransmission agreements and more. As GM, I will be responsible for the accuracy of all information in these reports.

The CPB also requires reports for all grants given to a station. This includes a yearly report for our service grants. It also requires a Local Content and Service Report that outlines our work for the community. I thoroughly understand and have been a regular contributor to these reports.

I am also involved in the IdahoPTV Strategic Plans and Performance Measures that are submitted to the State Board and DFM that outline our five year goals and objectives.

JEFF TUCKER

4922 W. Outlook Ave.
Boise, ID 83703

O. 208 373 7371
M. 208 867 5748

DUTIES AND SPECIFIC FUNCTIONS

6 Evaluating the effectiveness of the IdahoPTV system, including collecting the necessary information on viewership and use. Implementing improvements based on that data.

In the last two years, I have worked with staff to establish metrics on viewership (broadcast, online and social media) in order to establish key performance indicators. We have begun to make decisions based on data -- a process I strongly feel we should continue. In addition to standard Nielsen rating information, our audience measurements now include online and streaming viewership information.

An issue brought to me by the Governor's staff illustrates my approach to using data to improve our work. During the 2019 session, our Idaho Reports team filed numerous Freedom of Information requests, a process with which some legislators took exception. I tackled this conflict using a proactive and transparent approach. We administered an attitudinal random survey of Idahoans, performed a content audit and, based on the findings, designed a communications plan. The result was an increase in our viewership and trust. The survey also gave us invaluable audience data that we can reference and compare in the future.

7 Consulting with the Friends of Idaho Public Television on all matters of major policy pertaining to system activity

The community leaders who make up our Friends Board have provided invaluable guidance and fundraising for IdahoPTVs success. As the new GM, I would continue to leverage their influence to help build political and community support.

I have been the liaison on the Friends of IdahoPTV Recruitment Committee and have helped various recruitment chairs find and bring forth many board candidates. I thought it was important to build a strong and diverse board and worked to recruit young parents, participants from different areas of the state and Idaho-focused industries.

Because of my understanding of the legislative process, how budgets are set, the key players and how all of this relates to the larger debate on public education, I also play an essential role on our Friends of IdahoPTV's Advocacy Committee.

8 Advocating for and promoting IdahoPTV activities, mission and goals

What IdahoPTV does and how we do it is easy to promote in our community. We strive to serve our diverse, statewide audience. Whether I am on-air fundraising during live pledge events, speaking to an individual at their kitchen table or a group in an auditorium, I am proud to promote our organization with excitement, humor and a little fun. I have communicated effectively with many of our partners and major donors and look forward to interacting with more of them.

It is worth noting that our Friends of IdahoPTV board members are also key to promoting our activities, mission and goals. If we continue to attract, retain and educate good board members, we will have strong voices for IdahoPTV in communities across the state. They represent a great opportunity in promoting our work in their communities.

Working with legislators would also be a major part of my advocacy work as GM. I will endeavor to meet with as many legislators as possible before the start of the 2022 legislative session. As my reference letters will attest, my standing as a life-long Idahoan with broad experience at the statehouse and as a consensus builder with a friendly personality will help me to continue to build trusted relationships, friendships and alliances.

JEFF TUCKER

Boise, ID 83703

O. 208 373 7371
M. 208 867 5748

9 Consulting with the state's colleges and universities in matters relating to higher education services or activities provided by IdahoPTV

IdahoPTV has a mutually beneficial relationship with our state's colleges and universities.

I've led programs that highlight college and career opportunities for junior high and high school students and for Idaho's tribal communities through the Journey to Education series of projects and I managed the CPB's American Graduate grant. I also connect regularly with educators at universities connected to KUID and KISU to expand opportunities for students in mass media and journalism. I have promoted internship opportunities at IdahoPTV, which provides strong on-the-job experience.

I also initiated a partnership between IdahoPTV, the University of Idaho's McClure Center for Public Policy Research and Boise State University's School for Public Service to produce and air Idaho Debates.

10 Managing and improving a highly efficient operating model of programming, production and revenue generation

The success of IdahoPTV rests on the management and improvement of our programming, production and revenue generation. One can't succeed without the other. We must always look forward.

Viewers watch because of high quality programming from PBS. They also see our acquired content as educational and enjoyable. Our local content is what we are known for. People are so many times reminded by our local productions of what it means to be an Idahoan, We can instill a sense of pride in our viewership. We also educate and inform through programs like Science Trek and Idaho Reports. Bringing all of these programs to our viewers costs money.

As GM, I will provide training for staff, not only to function in their jobs, but to build the next generation of leaders within the organization. We will seek out and evaluate new platforms and distribution channels to bring our content and educational services to as many citizens of this incredible state as possible. Our fundraising team will look for new ways and new places for private and grant funded opportunities. I look forward to playing a deeper and more connected role with our fundraising department. We will work to ensure IdahoPTV remains relevant and essential to a new generation of viewers. And with a combination of robust content strategies and continuous evaluation of each program, we will align our offerings with viewers' needs and desires.

I have been involved with the design, implementation and management of large and small grants at IdahoPTV. Using these opportunities effectively is important in order to keep within our mission and provide quality content and services to Idahoans.

JEFF TUCKER

4922 W. Outlook Ave.
Boise, ID 83703

O. 208 373 7371
M. 208 867 5748

DUTIES AND SPECIFIC FUNCTIONS

11 Performing other miscellaneous and special duties as assigned

"Special duties as assigned" is something with which I am extremely familiar and comfortable. Although my current position as Director of Content has specific duties, my work is full of unanticipated changes and new projects.

The media landscape is changing at a rapid pace and I am comfortable with leading a team through change. I can quickly pivot when needed without losing sight of our mission and goals. Our political landscape is also changing at a rapid pace. This is a place I will need to focus an inordinate amount of time as GM. I can move between political needs and the agency's best interest.

Forging partnerships has also fallen into my job description. Strategic partnerships are important to IdahoPTV in many ways. It connects us with other partners, both private and non-profit, and identifies important topics for our audience. These partnerships are important for fundraising, programming and our connection to the wider community.

Re: Recommendation for Jeff Tucker

Matt Freeman, Executive Director
Idaho State Board of Education
P.O. Box 83720
Boise, ID 83720-0037

Dear Mr. Freeman and Board Members:

As you search for the right person to serve as the new General Manager of IdahoPTV at Ron Pisaneschi's retirement, I recommend that you strongly consider Jeff Tucker. I have known Jeff ever since I began my 19-year tenure in the Idaho Legislature. I was first impressed with his technical skills as I saw him confidently tackle the challenges facing Idaho in Session over the years. During the renovation of the Capitol building, he made the move to the old Ada County Courthouse ("Capitol Annex") and back again to the statehouse appear stress-free, although I know it was an extremely challenging task to transition from one facility to another. But, regardless of the technical and logistical challenges IdahoPTV faced over the years, we in the Legislature never had to worry about the job getting done. Jeff approached each undertaking cheerfully, confidently, and with complete transparency.

As I became even better acquainted with Jeff, I learned that he also possessed extraordinary people skills that made him an effective manager and valuable leader. He worked closely with legislative leadership and the Legislative Services Office to determine operating budgets and to advance the objectives and coverage of Idaho in Session. Through the process, he developed an extraordinary working relationship with us, earning our respect for his dedication to the legislative process and his commitment to IdahoPTV's mission. He always viewed IdahoPTV as a strong connector for Idaho citizens. Even beyond keeping people abreast of legislative issues and events, Jeff understands the how much good IdahoPTV can do to provide quality educational and informational content. The media, news and public affairs industry is changing rapidly and we need effective, dedicated leadership to make IdahoPTV an even greater asset to our state. Jeff's friendly personality, management skills, strong character, and broad experience help qualify him to provide the leadership we need. I have watched him attack problems directly and honestly, using wisdom and moral courage. His temperament and leadership style inspire others in the organization to follow his example of hard work and dedication.

I strongly endorse Jeff Tucker for the IdahoPTV General Manager position.

Sincerely,

Brent Hill

Mr. Matt Freeman
Executive Director
Idaho State Board of Education
650 W. State St., 3rd Floor
Boise, ID 83702

Dear ~~Mr. Freeman~~ Matt,

It is my pleasure to recommend Jeff Tucker as General Manager of Idaho Public Television.

I have worked with Jeff for a number of years through his work with Idaho in Session and all manner of events where the Legislature has used IPTV services. Throughout these many instances, I have seen Jeff's effective leadership firsthand. He is consistently helpful and inventive in tackling and solving the myriad issues that arise in broadcasting legislative proceedings.

Jeff would be a good fit for this position for a number of reasons, but let me briefly discuss three. First, he has a passion for taking leadership on difficult issues and is typically the point man for IPTV in addressing and resolving IPTV/legislative-related matters. Time and again, I have worked with him or watched him work with my staff to tackle challenging issues.

Second, he is skilled in what is a highly charged political environment. Jeff walks a political minefield flawlessly, with a thoughtful, deliberative, and respectful approach, yet he is resolute in reaching solutions to difficult problems. Jeff embraces the challenge and works with others to build consensus and find resolution, even if the result may not be his first choice.

Finally, Jeff is dedicated to service. His dedication is apparent in his actions on a regular basis. He puts in the effort necessary to complete his work regardless of the time required. He will represent IPTV very, very well.

In short, I cannot recommend Jeff highly enough for the position of IPTV General Manager. He is a natural fit.

Please do not hesitate to contact me directly concerning this recommendation.

Sincerely,

Eric

Re: Recommendation for Jeff Tucker

May 28, 2021

Dear Mr. Freeman,

It gives me much privilege to write this letter of support on behalf of Jeff Tucker. A lucky person gets to encounter the occasional exemplary leader with a passion for their profession and a desire to use their talents to make the world a better place. I have been fortunate to encounter that in Jeff.

As a three-year fellow with the Robert Wood Johnson Foundation, I participated in a program with cross-sector leaders from across the country using their influence to advance a culture of health where everyone living in America has a fair opportunity to live their healthiest life. Tasked with developing a strategic initiative that would advance a culture of health in Idaho, I chose to address adverse childhood experiences (ACEs), and resilience as an antidote.

With little understanding of the intricacies, time, and resources required to produce a documentary, I took a chance and placed a call to Jeff. His belief that increasing awareness about the importance of childhood trauma prevention and intervention sparked a project that continues to be shown across Idaho, but he has also worked with partners to air the documentary nationally this fall.

Jeff adeptly navigated the ethical requirements of public television while allowing the critical storytelling to elevate other voices. Jeff's inclusive leadership style invites partnerships and innovation. He masterfully convened community partners to engage key stakeholders, and his leadership and commitment made, and will continue to make, a profound and lasting impact across the state.

When I think of those poised to step into the general manager position for Idaho Public Television, I can't think of a better fit than Jeff Tucker. He is a skilled leader, innovative thinker, bold truth teller and a community champion; all vital skills that the next leader most possess.

Sincerely,

Jean Mutchie

Matt Freeman, Executive Director
Idaho State Board of Education
P.O. Box 83720
Boise, ID 83720-0037

Dear Mr. Freeman and Board Members:

I have had the pleasure of serving 3 terms, and currently, am an ex-officio member on the IPTV Advisory Board, with full voting power. I am very honored to write this letter on behalf of Jeff Tucker.

In the last 8 + years, Jeff has worked side by side with our current General Manager. He has had experience in all aspects of IPTV management: contents & programing, education, production, budget setting, fund raising, technology, and communicating with legislators, the Governor, and other statewide leaders.

When our current General Manager is absent, Jeff assumes this role. He has clearly earned the trust and respect of Station Personnel , the Board, donors, foundations and assorted leaders.

I have always found Jeff ready to listen and answer all my questions, regardless of how absurd they might be. He responds immediately and is ready to tackle all the ideas I may suggest…always with a smile !!

I am very honored to support Jeff Tucker in the role of General Manager of IPTV !!!

RE: Recommendation for Jeff Tucker

Dear Mr. Freeman and Search Committee Members:

I am pleased to write in support of Jeff Tucker's application as the next General Manager of Idaho Public Television. His experience, skills, and talents make him an ideal candidate for this important position.

I have been fortunate to get to know Jeff while serving on the Friends of Idaho Public Television Board for nearly 25 years. I have watched the station grow with the changing times and changing technology, and Jeff has been a big part of that continual drive to better serve the citizens of Idaho.

Nothing speaks more highly for an organization than having someone who is part of the team be ready and extraordinarily capable to seamlessly carry on the work when there is a change in leadership. Jeff is that person. I immediately thought of him when I learned that Ron would be retiring.

Not only does Jeff possess the technical skills for the position, his warm, caring personality will be a very valuable asset. Jeff already has relationships with key constituencies and as the face of IDPTV, I believe those relationships will be strengthened.

Jeff is seen as a leader by both the Friend's Board and within the station. He has extensive experience with all the critical areas under the General Manager – people, budgets, programming, technology, and above all he knows Idaho.

I believe Jeff has earned the strongest consideration possible for the General Manager position at IDPTV. I recommend him without reservation and with enthusiasm.

Please do not hesitate to contact me if I can supply additional information as you make this important decision.

Sincerely,

Joy Fisher

Executive Director

5/24/2021

Idaho Public Television 2021 General Manager Search Committee
Office of the State Board of Education
650 West State Street, 3rd Floor
Boise, ID 83702

Dear Search Committee,

I've had the opportunity to work with some forward-thinking, caring General Managers in my 37 years at Idaho Public Television. Both Peter Morrill and Ron Pisaneschi put an emphasis on locally grown productions, like *Outdoor Idaho*, *Idaho Reports*, *Dialogue*, *Science Trek* and more recently, *Idaho Experience* and even *Idaho in Session*.

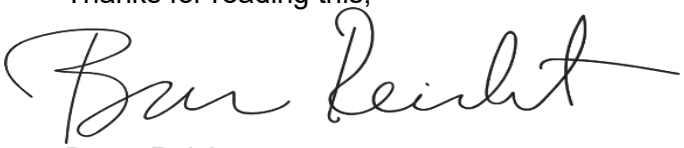
It would have been easy to eliminate them when the financial or political pressure got tough. Instead, Peter and Ron worked harder to find the money, and to brave the negative winds of the moment. And as someone who has toiled in the production part of the operation for more than three decades, I appreciate that immensely. I also believe their judgment has benefitted our state as a whole.

I've certainly had plenty of conversations with Jeff Tucker over the past several months. I'm convinced he feels the same way about the importance of local productions. What I think Jeff will bring to the table is a more personal connection with viewers and with opinion leaders across Idaho.

Jeff knows key players in government. It's something he's learned from his days producing television programs, from his involvement on boards like the James & Louise McClure Center for Public Policy Research, and his efforts helping to create the live streaming service for the Legislature, Executive branch and Supreme Court.

He's earned their trust, in part by working through a myriad of issues in a collaborative manner. He has become a respected colleague who knows how to get a job done on time and under budget.

I've also watched as Jeff has immersed himself in our agency's budget and some of the more arcane aspects of the job. IdahoPTV is neither fish nor fowl, being both a state agency and a not-for-profit entity. That makes IdahoPTV an easy target for critics who question why taxpayer dollars are being spent on TV. Jeff can clearly make a case for why this public-private partnership is a good and necessary institution for our rural state.



His easy-going temperament will benefit him as General Manager. I've been privy to some of the letters and comments from people of all political stripes. Knowing when to let things roll off one's back and knowing when to stand up for the agency – that's a talent that comes easy to him. I suspect anyone unfamiliar with Idaho could have a really hard time pulling that off successfully. This is a politically complicated state; Jeff is home-grown, and that will hold him in good stead.

For all these reasons – and, believe me, there are more! – I am excited that Jeff is willing to pick up the mantle and serve as General Manager. It's not going to be a bed of roses in this political climate. But I think Jeff has the smarts and the personality to make it work for the agency, better than anyone I can imagine. I know he will be well-received by his peers at the station.

And besides all that, Jeff has maintained a close working relationship with the PBS folks back east. Ron really perfected the art of being a valued PBS member, and the grants came rolling in. Both Ron and Jeff have impressed upon PBS and the Corporation for Public Broadcasting that CPB hasn't been exactly brilliant in how they've reached out to Western states like ours. They will find a colleague -- as well as a friendly critic -- in Jeff.

I hope this note helps in your decision-making. Personally, I think Idaho Public Television is lucky to have such a natural choice as Jeff Tucker for General Manager.

Thanks for reading this,

Bruce Reichert
Executive Producer
Idaho Public Television

May 17, 2021

Re: Recommendation for Jeff Tucker

Matt Freeman and Board Members:
Idaho State Board of Education
P.O. Box 83720
Boise, ID 83720-0037

Dear Mr. Freeman and Board Members:

As Ron Pisaneschi retires and you search for a new General Manager for IPTV, I want to strongly recommend Jeff Tucker. I worked at IPTV for 25 years. The last 15 years of my career I was a member of the Executive team serving as the Director of Marketing and Development Director. Over those years, I worked with Jeff from the time he was a high school intern through to his position of IPTV Production Manager when I retired. In between those years, Jeff got his degree in Broadcast Telecommunications from the University of Idaho and owned and operated a full service video company. My association with Jeff has continued after my retirement so I have watched him continue to grow in his technical expertise and develop strong management and people skills. Along with his multiple technical talents, he is an amazing people person, who others fully trust and choose to work with and for. I can unequivocally say that he is one of the most honest, positive, hardworking and engaging people that I have ever met.

Jeff is an example of someone who understands each facet of the IPTV organization. He knows how the departments work individually and how to bring them together to work as an effective whole. Because of this understanding, Jeff is able to be a visionary with a grasp on the ever-changing context of the organization. Jeff is a decision maker that declares his views, engages others' ideas, analyzes data, weighs alternatives and owns the final call. Because he can make and communicate a clear decision, he inspires confidence and creates a team approach to achieving goals.

I will end by saying that I feel you have an incredible opportunity to select a multi-talented leader with impeccable character as the next IPTV General Manager. Jeff will hit the ground running. He understands how to navigate the current landscape and he knows how to lead one of Idaho's most treasured institutions forward.

Jeff has my strong endorsement for the IPTV General Manager position.

Sincerely,

Nancy Viano

June 6, 2021

Matt Freeman and Board Members
Idaho State Board of Education
P.O. Box 83720
Boise, ID 83720-0037

Dear Mr. Freeman and Board Members:

It is with pleasure that I share my recommendation of Jeff Tucker for the position of General Manger, Idaho Public Television.

I have worked with Jeff directly over many years on two high profile initiatives for public media, made possible with funding support from the Corporation for Public Broadcasting—the *American Graduate* initiative and the *Coming Home: Connecting to Communiyt* rural collaboration.

The *American Graduate* initiative is public media's long-term commitment to help young people succeed in school, career, and life. Public media, with its unique position as a trusted resource and important partner in local communities, provides a critical platform to shine a light on pathways to graduation and the talent needs for the nation's future workforce. Idaho Public Television was part of a 19 station co-hort working together and with local partners to increase awareness in young adults and the people who influence them (parents, caregivers, guidance counselors, educators) of the education and training pathways to high-demand skilled careers.

Coming Home: Connecting to Community is a public media collaboration that celebrates the people, culture, and stories of rural America through authentic local voices and talent. This multi-faceted collaborative is showcasing local stories about the diversity, traditions and richness of small towns and rural life. Idaho Public Television was not only one of the lead stations to help design this effort but also received a planning grant to collaborate with other stations for a national production.

Both projects were part of an extremely competitive grant programs managed by CPB. Idaho Public Televisions' proposals, developed by Jeff as lead, consistently delivered a comprehensive approach to strategy, content development, staffing, and target audience, with a reasonable and detailed budget request, and clear objectives and measurement. In addition, funding proposals were integrated into the overall organization's goals and operations to ensure efficiencies and effectiveness of the work. Further, the execution has been well managed and reported. In fact, Idaho Public Television's content, partnerships, and local impact is often held up as a creative, successful examples within the public media system.

Idaho Public Television has not only been a grant recipient as part of these projects but also served as leader in advancing excellence locally and nationally as part of a much larger network of community organizations – including business, local government, schools and universities,

and community non-profits – and other local public media stations from around the country. Jeff is regularly sought out in the system as an expert and counsel in content development, community engagement, and station management needs. I have also witnessed Jeff's commitment as a leader at the station in his current role, actively participating in activities and events at public media conferences and with local station stakeholders, donors, and other funders, to advance the value and role of Idaho Public Television and public media overall.

Every interaction with Jeff is enthusiastic, smart, and open-minded. As public media adapts rapidly to take full advantage of technologies, deepen relationships with communities, respond to local needs and national challenges, and understand a changing population, Jeff is well positioned to take the lead at the station and in the community.

Please do not hesitate to reach out to me if you have any questions.

Sincerely,

Stephanie Aaronson
Senior Vice President, Engagement
Corporation for Public Broadcasting
(202) 738-7308

SUBJECT

System Optimization Update—Falcon High Performance Computer

REFERENCE

September 29, 2017	The Idaho State Board of Education (Board) adopted the Higher Education Task Force recommendations, including recommendations to increase a systemwide approach, internally called Systemness
December 20, 2018	Huron Consulting Group presented its final report to the Board
January 18, 2019	The Board accepted the Huron report and appointed a subcommittee (comprised of Board members) to continue the work on Systemness
August 29, 2019	The Board established a Systemness Program Committee comprised of Board members, the Board executive director, the chief financial officer in the Office of the State Board of Education, the presidents of the four-year institutions, and the institutions' financial vice presidents
October 21, 2020	The Board approved consolidation of the institutions' Internal Audit and Risk Management under the direction of the Office of the State Board, and established a System Optimization Project Manager to help coordinate other collaborative efforts among the institutions
April 21, 2021	The Board approved a joint purchasing agreement for the four-year institutions in support of collaborative procurement operations.
June 16, 2021	The Board received an update on system integration projects in the areas of Risk Management, Internal Audit, Procurement, and Information Technology.

June 28, 2021	The Board authorized signature by the University of Idaho, on behalf of the four-year institutions, of a multi-year contract for the JAGGAER e-procurement software solution

APPLICABLE STATUTE, RULE, OR POLICY

Idaho State Board of Education Governing Policies & Procedures, Section V.I.

BACKGROUND/DISCUSSION

Ongoing system integration efforts have focused on Internal Audit, Risk Management, Purchasing, and Information Technology (IT) collaboration. Joint projects within IT operations include, among other things, the following initiatives:

- Analysis of Enterprise Resource Planning (ERP) convergence options
- Joint purchases of IT-related hardware, software, and services
- Implementation of system-common learning management system (LMS) software and e-procurement software
- Cybersecurity operations
- Data sharing and emergency backups
- Research computing—acquisition of Falcon supercomputer/high performance computer.

This information item provides an update on collaborative efforts on the last bullet above—transfer of operation and management of the Falcon High Performance Computer (HPC) from the Idaho National Laboratory (INL) to the three research universities, via a loan agreement between INL and the Board.

The Falcon HPC initiative builds upon ongoing collaborative efforts among the INL, the Board, and the institutions, which are reflected in the Center for Advanced Energy Studies (CAES), the establishment of the Collaborative Computing Center (C3) and Cybercore facilities, and the ongoing support of university research operations on INL high performance computers.

INL periodically acquires upgraded supercomputers to support its operations, which created the opportunity for the still highly-capable Falcon system to be dedicated to the use of the Idaho research universities. Acquisition of the Falcon system would place Idaho higher education among the top echelon of U.S. universities and university systems in terms of supercomputing power. It would provide a four- to six-fold increase in the currently-available combined computing capacity of the three research universities. The project also establishes a model for subsequent transfers of supercomputers to the Board/institutions when INL retires upgraded systems in future years.

This collaborative effort is aligned with ongoing agreements among INL and the three universities and has the support of the Presidents Leadership Council. Transfer of Falcon management and operations would be carried out through an annually-renewed property loan agreement between the INL and the Board. Board

staff, INL staff, and university representatives are engaged in the planning effort. A Falcon management/operations team, under rotational leadership (University of Idaho has agreed to take initial lead) is at work to develop plans and procedures related to the operation.

The project team intends to present a concept of operations to the Board for approval at the October 2021 Board meeting. A final property loan agreement will be presented to the Board for review/approval in December 2021, to facilitate hand-off of the Falcon HPC on or about January 2022.

A fact sheet on the Falcon HPC system is presented at Attachment 1. Additional information on this system optimization project will be provided during a tour of the Falcon facility at the INL Collaborative Computing Center (C3) in Idaho Falls for new Board members.

IMPACT

The Falcon HPC project epitomizes the benefits to the higher education system—and Idaho's economy and people—of collaboration among the higher education institutions and INL. It will markedly increase the system's research computing capabilities, which are needed to build Idaho's critical infrastructure, at a fraction of the cost that would be needed if the institutions attempted to obtain this capability individually.

ATTACHMENTS

Attachment 1 – Falcon HPC Fact Sheet

STAFF COMMENTS AND RECOMMENDATIONS

Staff assesses that enhancements to Idaho's research computing capabilities, such as the Falcon HPC, are needed to maintain academic and economic competitiveness with other states. The Falcon HPC project should help the universities obtain research grants and recruit high-caliber faculty, while providing exceptional value for the investment. It is anticipated that sufficient computing capacity will be available to support other Idaho educational institutions and state agencies, as well as out-of-state research institutions on a cooperative, case-by-case basis. Costs of operations will be reduced by leaving the system in place in its current facility, and by INL's continued provision of electricity and cooling (and technical expertise) for the system. Joint operations at the control center by the three universities will also minimize expenses, enable mutual support with other existing research computing systems, and ensure continuous access to the system by all players.

BOARD ACTION

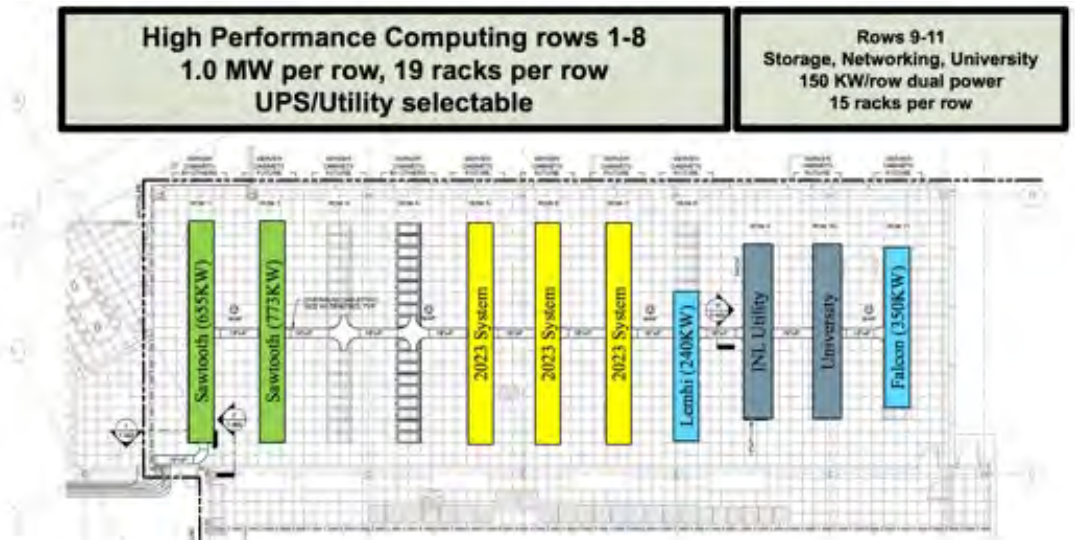
This agenda item is for informational purposes only.

FALCON PROJECT FACT SHEET

OVERVIEW

The Idaho National Laboratory (INL) has offered to transfer (via a property loan agreement) its Falcon high performance computer to the State Board of Education for use by the Idaho public research universities to support research and education throughout the state and improve the lives and economic well-being of Idaho's citizens.

WHY?



High Performance Computing (HPC) is a foundational part of modern science. Idaho university students and faculty are active users of both institutional-specific computing resources as well as INL-shared resources. Over the past twelve months, more than 60 users at UI, BSU, and ISU utilized INL HPC resources totaling ~40 million core-hours. The INL Falcon supercomputer is one of the systems heavily utilized by Idaho university researchers.

INL is continually refreshing high performance computing hardware and wishes to transition Falcon to management and exclusive use by the Idaho higher education ecosystem. This is a tremendous opportunity to:

1. Generate an order-of-magnitude increase in the computing capacity for university researchers at relatively low cost.
2. Make available additional compute cycles (245 million annual core-hours) to Idaho universities that they would otherwise be unable to utilize.
3. Strengthen collaborations among UI, ISU, and BSU and create connections with other state and national institutions.

WHAT IS FALCON?

The Falcon supercomputer represents a ~$10 million investment by INL that began in 2014. Falcon consists of 34,992 CPU cores (all upgraded to new Intel Broadwell processors in 2017) across 14 water-cooled computer racks in the Idaho Falls Collaborative Computing Center (C3) facility. The compute nodes are connected via an 8-dimensional enhanced hypercube InfiniBand network topology. It physically resides across from "University Row" in the C3 facility (see diagram on next page).

WHAT INVESTMENTS WOULD BE REQUIRED?

Storage investments for local directories and high-performance scratch space will be required. Estimated one-time cost is approximately $200,000.

This system requires specialized software tools for power on/off, InfiniBand network setup, and system control and monitoring. These tools, including operating system patches and support, are currently provided via an annual maintenance agreement with Hewlett Packard Enterprise (HPE). The most recent university pricing estimate from the vendor is $75,000 for a three-year license (approximately $25,000 per year). This license will help ensure successful operation of the system. To re-image the machine with CentOS from blank hard disks would likely require a HPE consultant engagement for approximately one week—estimated one-time cost of $20,000.

Additional system administration and user support staff will likely be required statewide. One new funded FTE position from each university has been proposed. Total cost for 3 FTE: TBD

WHERE?

Falcon resides in the C3 facility and would not be moved. Moving the system and installing the required infrastructure would likely cost ~$100,000-$400,000 (depending on data center capabilities) for transportation, assembly, power, and cooling, with considerable ongoing power costs. If kept at C3, INL intends to provide power and cooling at no cost to the universities.

WHO?

The transition will require collaboration between the universities and INL at multiple administrative levels. Resources will be required to support the system. In addition, coordination between the State Board of Education, universities, and INL will be needed to establish the administrative structure, credentialing, and access parameters. A project team consisting of representatives from SBOE, INL, and the three research universities has been formed to develop plans for the transfer and operation of the Falcon HPC.

WHEN?

SBOE approval of a property loan agreement with INL is anticipated in October 2021, with transfer of Falcon operations on/about January 2022.

COLLEGE AND UNIVERSITIES

SUBJECT

Student Fee Opt-Out

REFERENCE

April 2020	Board approves tuition and fees each year at the April Board meeting.
April 2021	Board approved second reading for V.R. Policies regarding in-service teacher fees, clarifying online program fees, and adding Independent Study in Idaho fee
June 2021	Board discussed optional and mandatory fees and tasked the institutions with coming back with recommendations concerning making fees optional.

APPLICABLE STATUTE, RULE, OR POLICY

Idaho State Board of Education Governing Policies & Procedures, Sections V.R.
Idaho Code § 33-3717A

BACKGROUND/DISCUSSION

Board Policy V.R. defines fees and the process to change fees and establishes the approval level required for the various student fees (Chief Executive Officer or the Board). Board Policy V.R now provides that:

1. Administrative local fees are student fees that are approved by the State Board of Education and deposited into local institutional accounts; and

2. Such fees shall be approved by the Board at its annual meeting for setting tuition and fees and will be clearly communicated to students prior to their enrollment.

    i. Consolidated Mandatory Fee
    This fee is inclusive of all facilities, activity, and technology fees. The State Board of Education will approve the Consolidated Mandatory Fee which may then be allocated by institutions. This fee includes capital improvement and building projects and debt service required by these projects, the fee charged for such activities as intercollegiate athletics, student health center, student union operations, the associated student body, financial aid, intramural and recreation, and other activities which directly benefit and involve students and campus technology enhancements and operations directly related to services for student use and benefit (e.g., internet, network, and web access, general computer facilities, electronic or online testing, and online media).

> A full-time and part-time rate shall be established. Institutions shall provide an annual accounting to the Board of the way the Consolidated Mandatory fee is utilized by each institution.

The purpose for such language was to try to create a greater simplification for students through the implementation of one mandatory fee as opposed to a long list of fees, many of which were not optional.

Three main fees had been assessed prior to this revision in policy. Facilities Fees (were used to support the building and renovation of campus facilities, many of which were not eligible for support from the Permanent Building Fund, and to pay debt service on facilities financed in whole or in part with student revenue bonds); Activity Fees (were fees related to student activities recommended and approved by the student body); and Technology Fees (supported the ever-growing technology needs on our campuses and expanding online/virtual access).

As part of the College and Universities' Appropriation for FY 2022, the intent language below was included. This agenda item is to update the Board on the work being done by the institutions on this topic

SECTION 7. STUDENT FEE REPORT. As soon as practicable, the State Board of Education shall: (1) make easily accessible a break-out of student activity fees on the institutions' websites; (2) develop a common naming convention for similar activity fees across the institutions; and (3) evaluate the current lists of activity fees assessed to students and determine how and which fees supporting student activities, clubs, and organizations focused on individual beliefs and values can be structured to address the need for access, affordability, and choice. The State Board of Education shall report results of this work to the Joint Finance-Appropriations Committee and the House and Senate Education Committees no later than January 14, 2022.

BOARD STAFF COMMENTS AND RECOMMENDATIONS

At the April and June Board Meetings, the Board directed the institutions to consider how to consider which fees would be characterized as optional and which fees would be considered mandatory, categorize them as such and work to develop a common naming convention to provide greater transparency.

A working group comprised of representatives from the four-year institutions has been working to address the three requirements of the intent language within the College and Universities' Appropriation and will report on the progress made to the Board.

Regarding the first requirement, the institutions have committed to creating a webpage at each institution that is convenient for students to find and provide a link to be placed on the State Board of Education website. These webpages will be developed and implemented once the final fee structure is completed.

Regarding the second requirement, this working group has developed the following four overarching categories into which all student fees would be placed. They are:

- Institutional Operations, Services, and Support
- Student Recruitment, Success, and Engagement
- Student Clubs and Organizations
- Student Health and Wellness

Each four-year institution is in the process of aligning their student fees with these categories to provide simplicity for students. As that process is completed, that will allow a more thorough discussion of what fees can then be structured to "address the need for access, affordability, and choice." The working group has scheduled a half day work session in September and will provide a final report at the October meeting.

Board staff have kept the legislator who pushed for student fee opt-out apprised of this work to ensure it is consistent with their expectations as set forth in the legislative intent language.

IDAHO STATE UNIVERSITY

SUBJECT
Holt Arena Renovation Bidding and Construction Approval

REFERENCE
June 2018	The Idaho State Board of Education (Board) approved the ISU 6-Year Capital Project and planning and design for the Holt Arena renovation project

APPLICABLE STATUTE, RULE, OR POLICY
Idaho State Board of Education Governing Policies & Procedures, Section V.K.2.

BACKGROUND/DISCUSSION
Idaho State University (ISU) seeks approval from the Board to proceed with bidding and construction for the Holt Arena renovation project. This project will replace the 11,700 seats, provide essential ADA upgrades, and add hospitality suites. Holt Arena opened in 1970. Because of its age, the current fiberglass seats break at a rate of roughly 150 annually. The Holt Arena also needs a number of improvements to address ADA accessibility. Finally, this project will add in six Loge boxes for 28 people, a president's box for 44 people, and a club space for 80 people. These hospitality suites will increase ISU's revenue potential from athletic and community events.

This project is funded solely through a single generous gift from Idaho Central Credit Union. Given the construction market, a conservative contingency is included in the total project cost. The project cost will not exceed $1 million of institutional funds in excess of the amount fundraised for the project

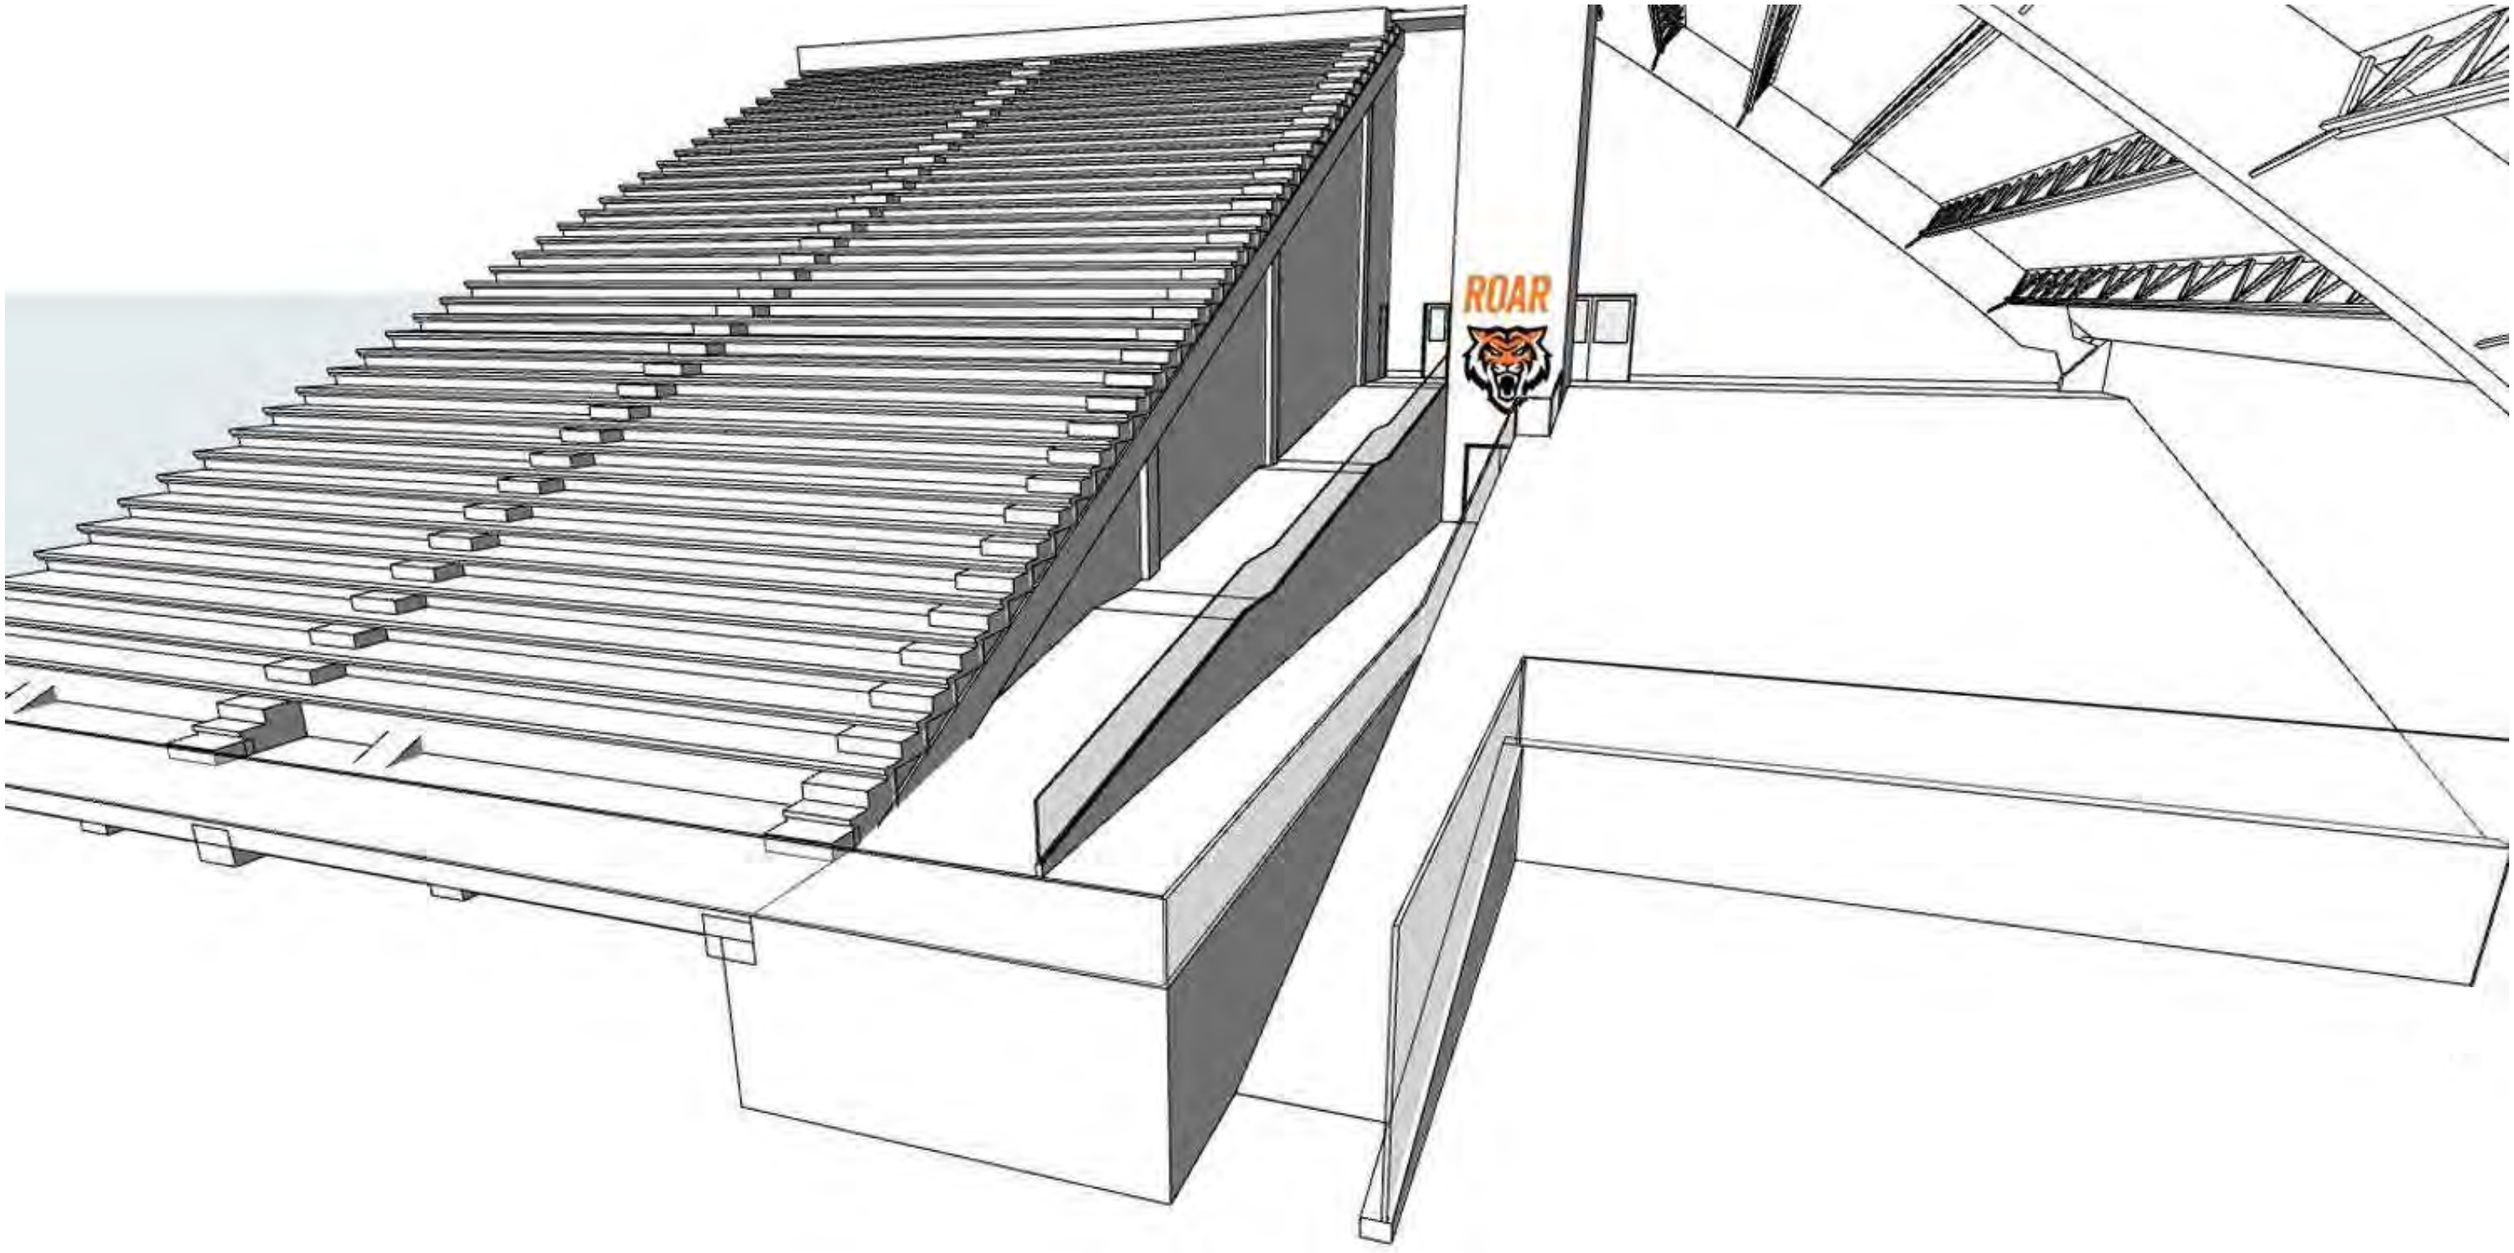
IMPACT
As ISU continues to focus aggressively on enrollment growth, fundraising, branding, image building, and athletics success, upgrading the patron and spectator experience in Holt Arena is an important part of that plan. Enhanced and new seating will also impact student and student-athlete recruiting, and the ability to attract additional and more diverse events. This will help generate much needed revenue, and will certainly assist in making events more comfortable and enjoyable to those attending. This upgrade will also help enrich donor and business relationships with interest groups, both within and outside of the State of Idaho.

ATTACHMENTS
Attachment 1 – Holt Arena

STAFF COMMENTS AND RECOMMENDATIONS
Enhancements to Holt Arena, particularly in the area of addressing accessibility for students and guests, is imperative to developing deeper relationships with the

varied constituencies that support the work of Idaho State University. This 51 year-old facility is in need of ADA upgrades. The proposed project would provide a needed facelift and some additional fundraising opportunities with new space intended to better engage donors.

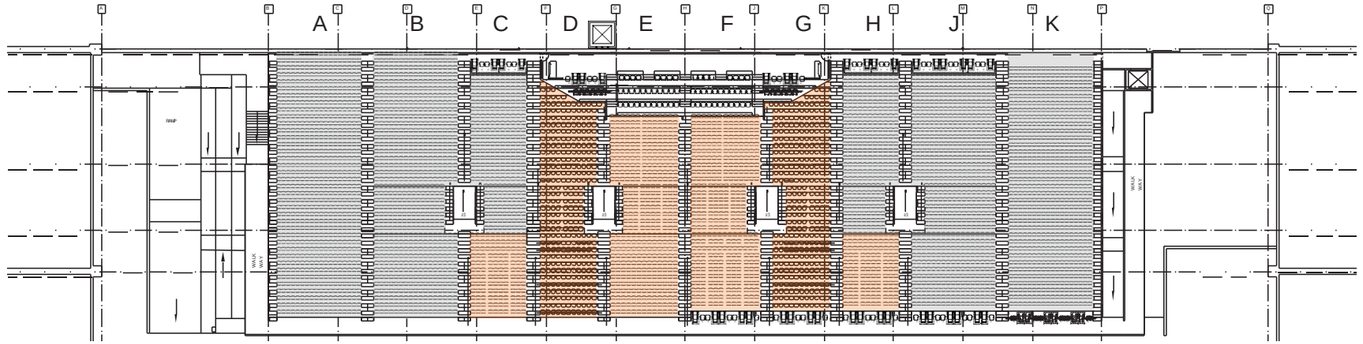
To demonstrate continues fiscal responsibility, ISU has engaged in the necessary fundraising to move to the construction phase and the majority of the funds needed for the project are provided by a very generous donor. To demonstrate prudence in this challenging construction environment, ISU has also built in a $1 million contingency from institutional reserves if project costs exceed estimates. ISU is not intending to incur debt to complete the project.



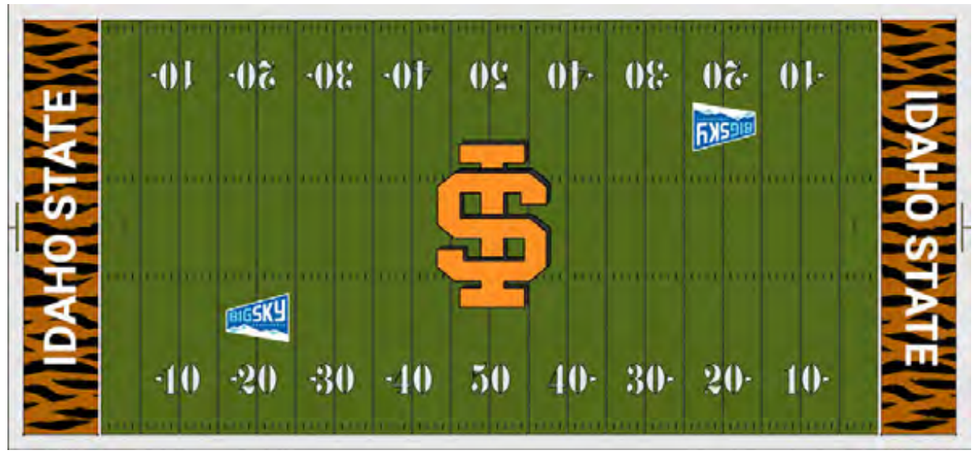
Staff recommends approval.

BOARD ACTION

I move to approve the request by Idaho State University to proceed with bidding and construction of the Holt Arena Renovation, and to expend up to $1 million above the amount fundraised for the project.



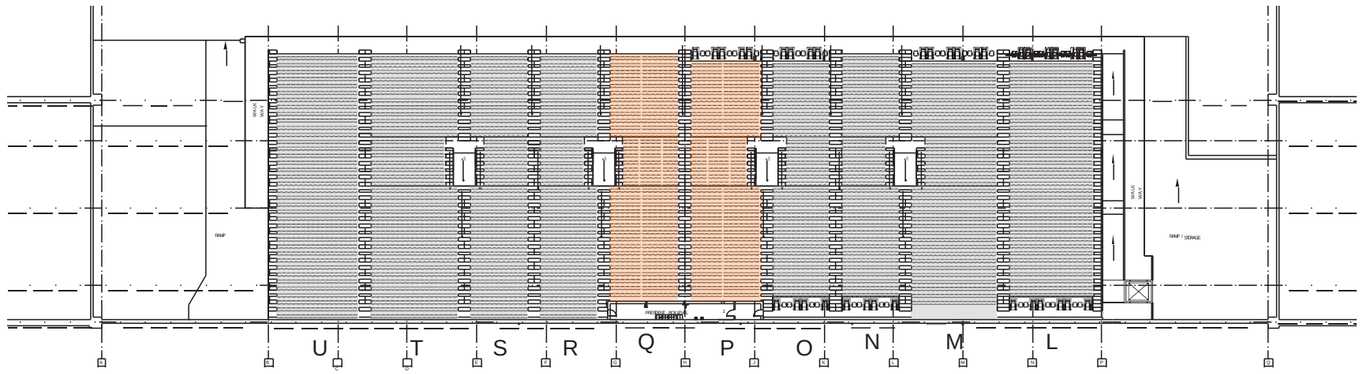
Moved by _____ Seconded by _____ Carried Yes _____ No _____



NEW RAMP & ELEVATOR

PLAN LAYOUT

PHASE 1 B WILL ESTABLISH A NEW VISION TO THE PRESIDENTS BOX, CREATING MORE PREMIUM SEATING CONDITIONS, ADA SEATING OPPORTUNITIES AND A SPACE FOR THE PRESIDENT TO ENTERTAIN WITH PERSPECTIVE DONORS, ALLUMNI'S ETC. IT WILL ALSO BE AN INITIAL PHASE TO START LEADING TOWARDS THE OVERALL VISION OF CONNECTING TO THE NEW BASKETBALL VENUE.

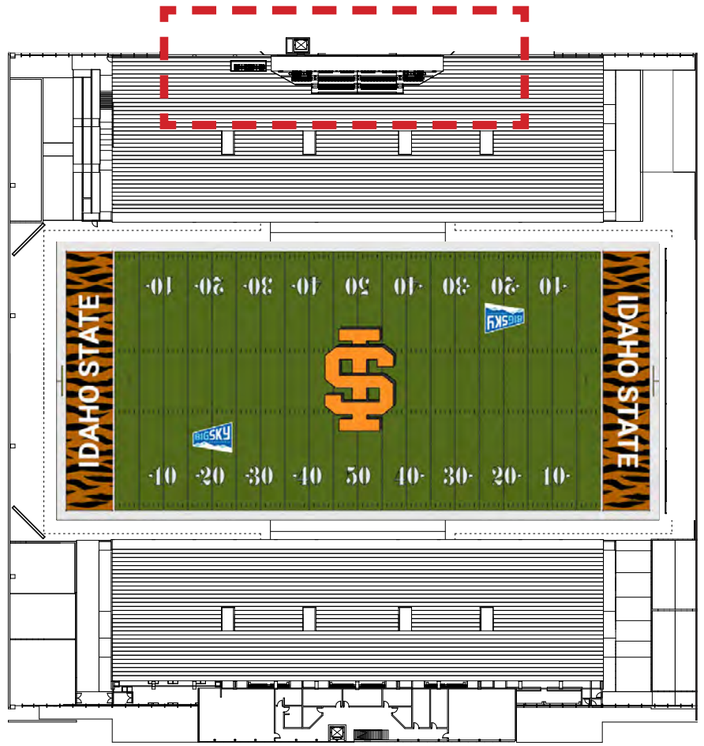


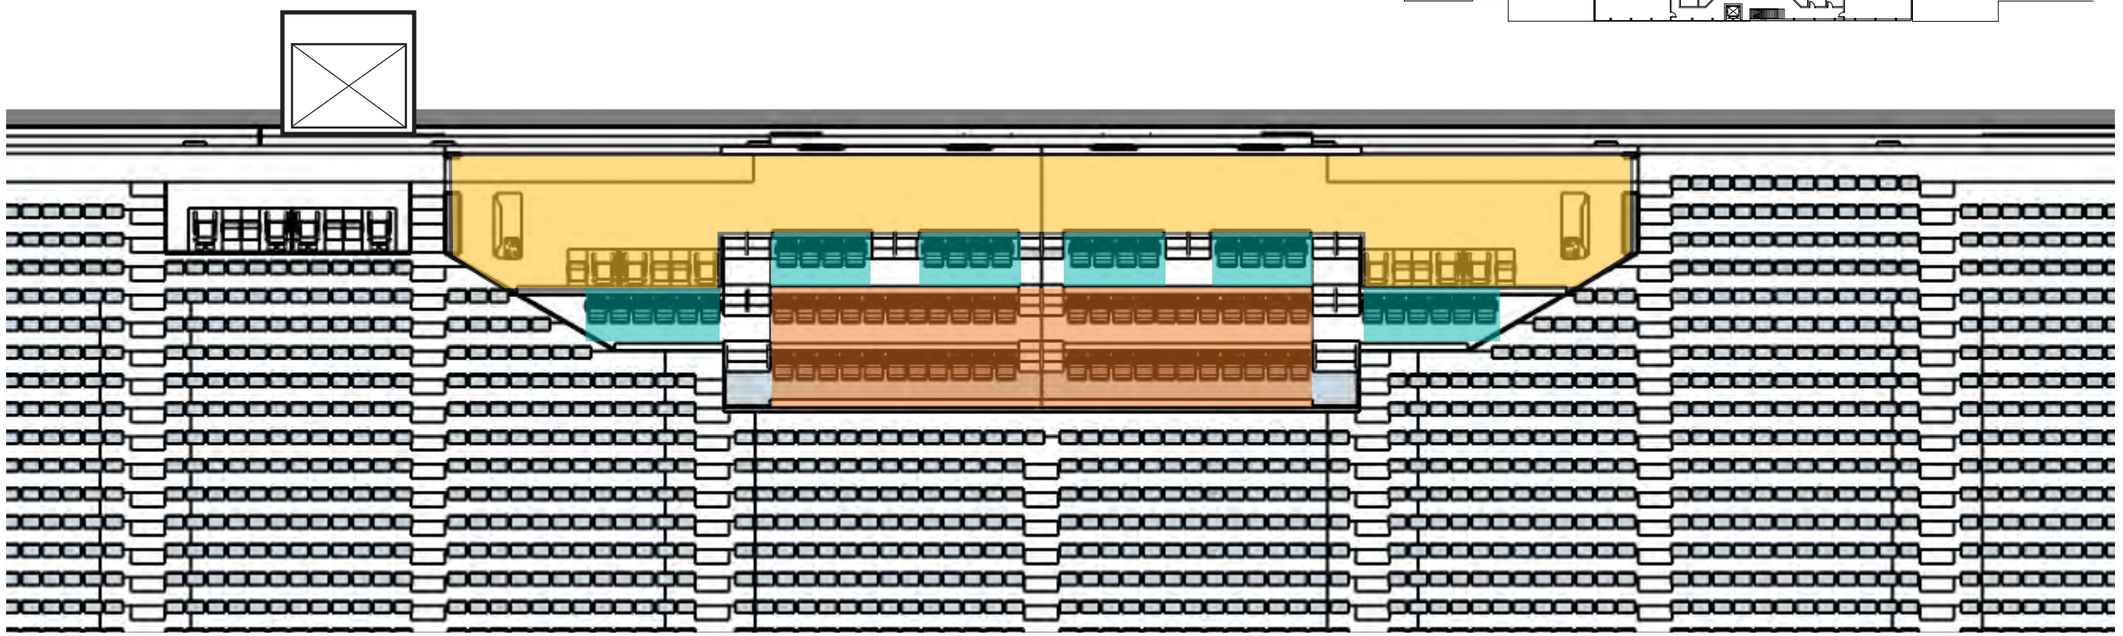
SCHEME 1B

NEW SEATING COUNTS

20" GEN. ADM. SEATS NORTH SIDE	=3036
20" GEN. ADM. SEATS SOUTH SIDE	=4192
	7228 TOTAL 20" SEATS
22" PREMIUM SEATS NORTH SIDE	=1586
22" PREMIUM SEATS SOUTH SIDE	= 860
	2446 TOTAL 22" SEATS
PRESIDENT BOX (QUATTRO) 22" PREMIUM PLUS SEATS	=78
TOTAL NEW SEATS	9752
ADA WHEELCHAIR POSITIONS	
45 NORTH SIDE	
35 SOUTH SIDE	80 TOTAL (72 REQ'D)
	9832 TOTAL CAPACITY

NOTE: PREMIUM SEATING SHOWN IN ORANGE COLOR



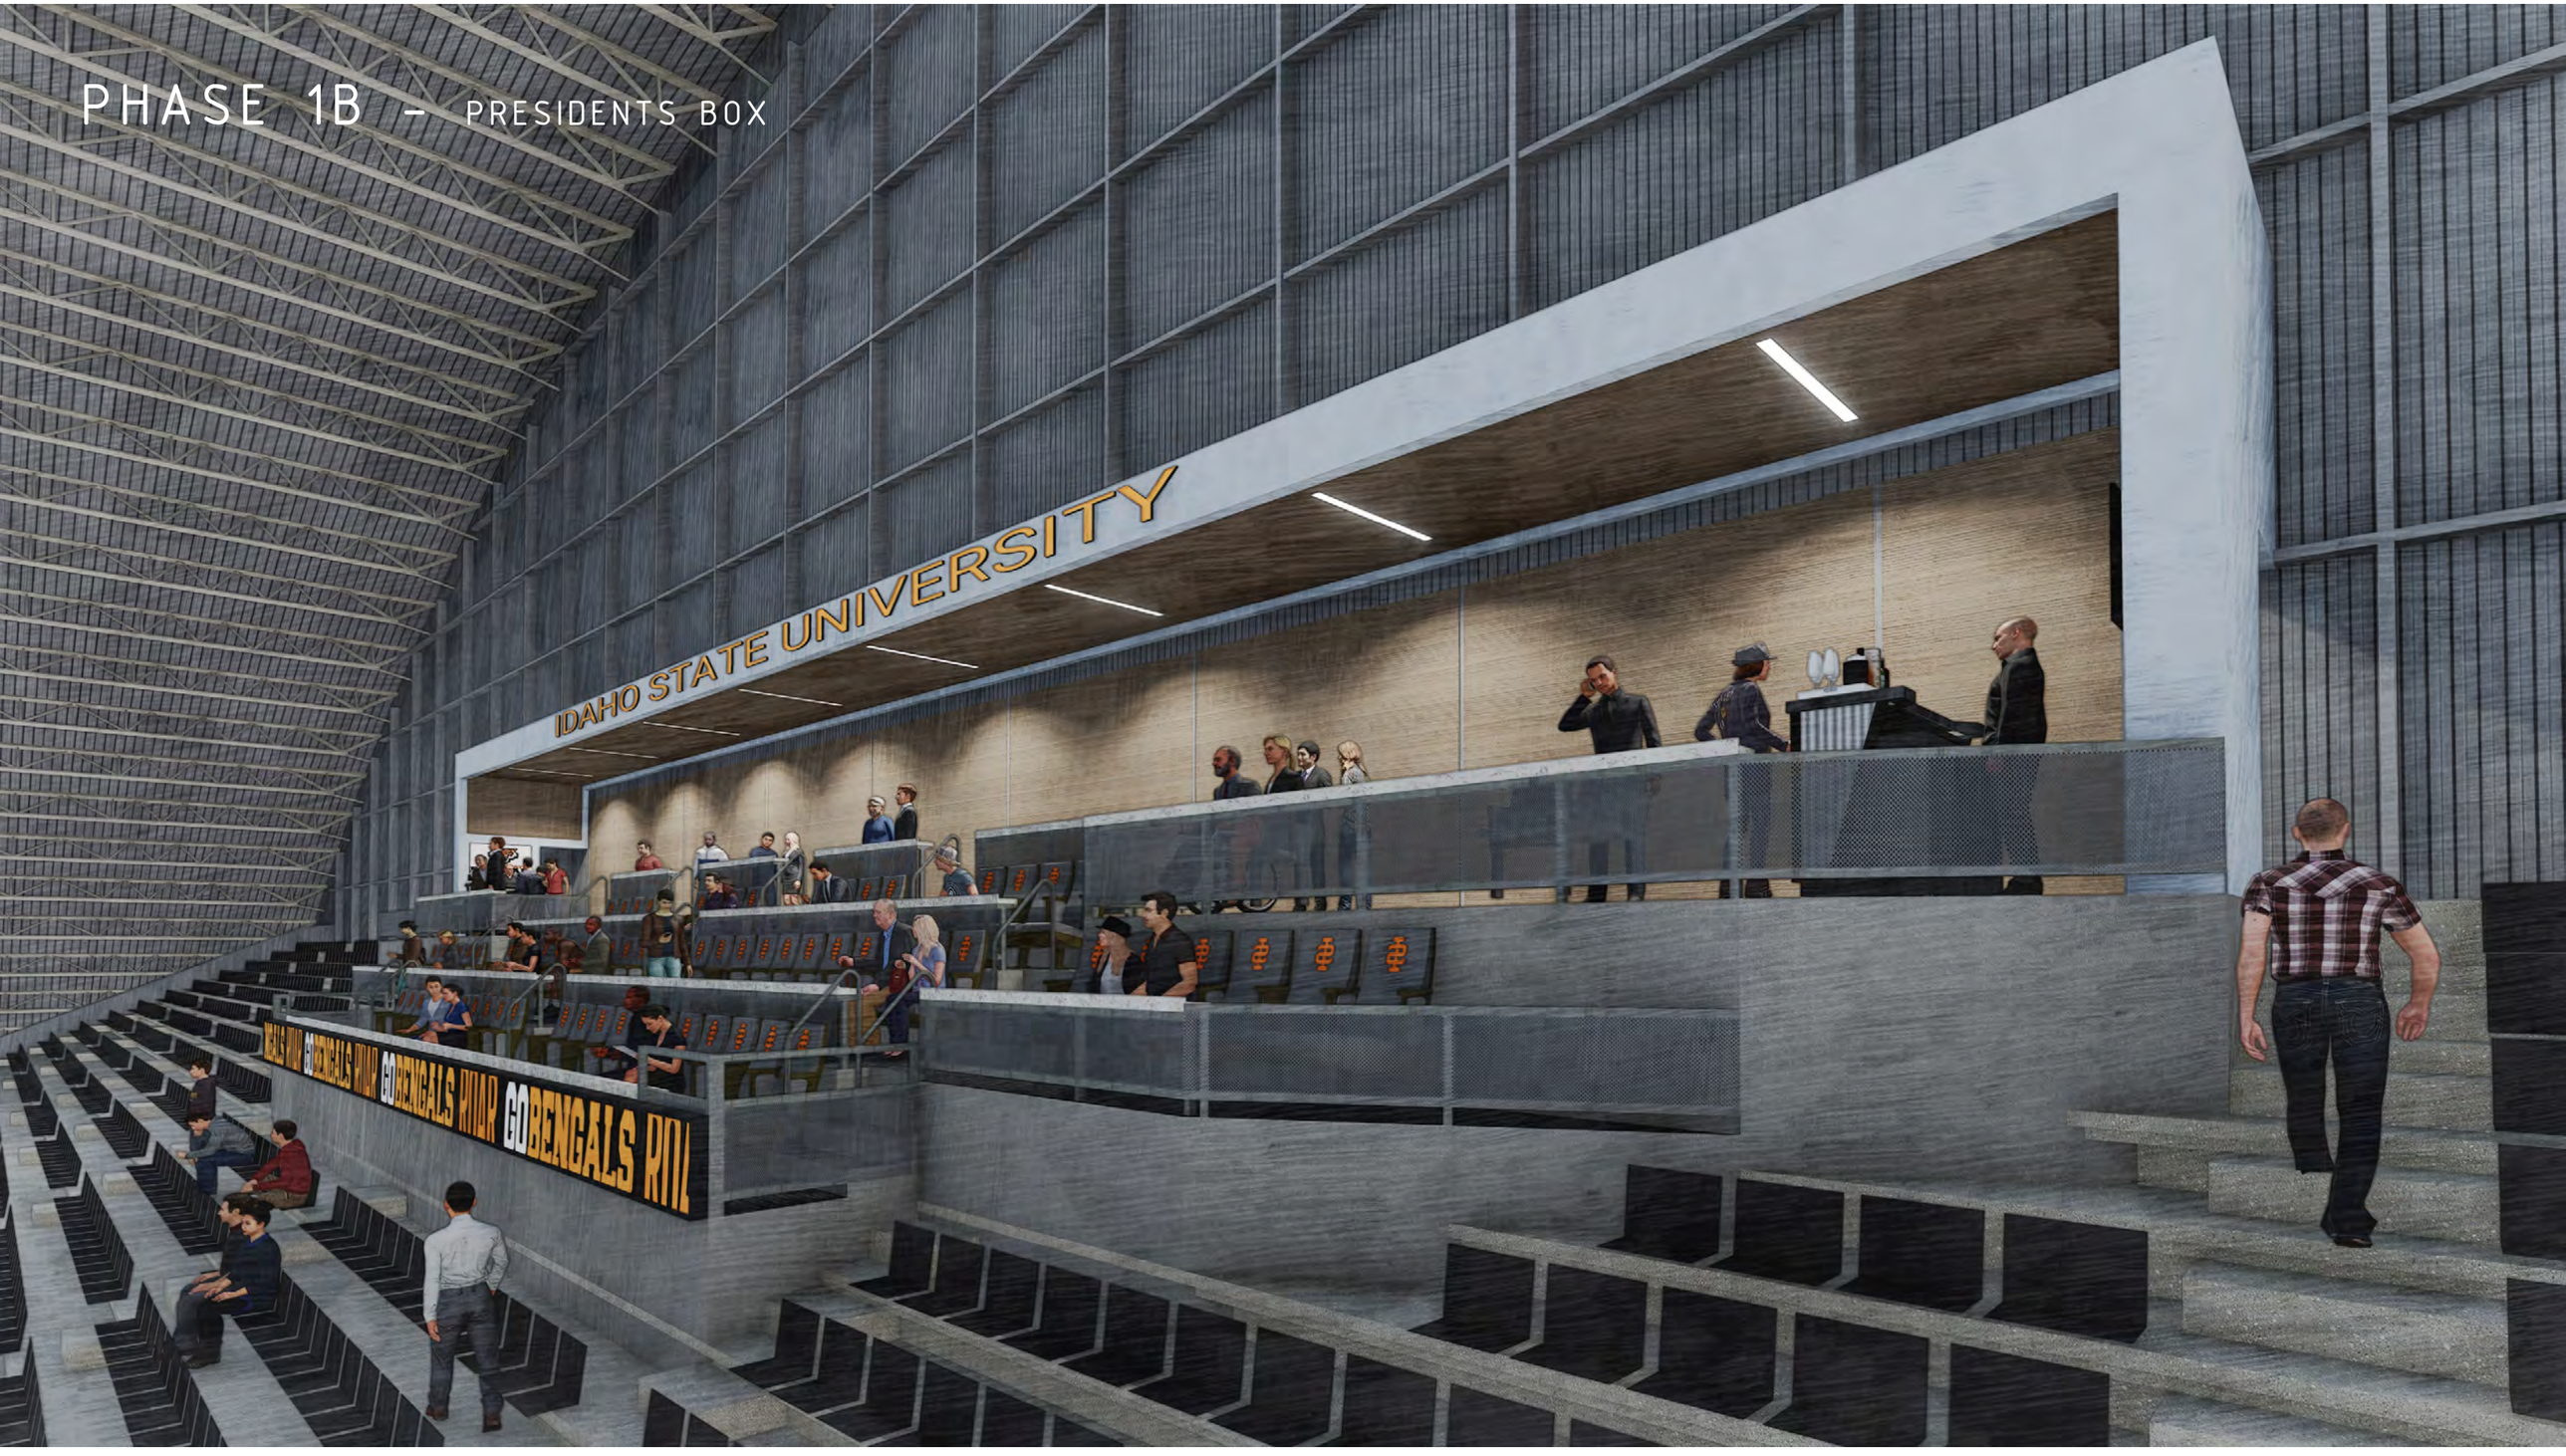


PHASE 1

1 - B

Phase 1B

With the newly upgraded seating bowl this next phase is to focus on the premium aspect for both the president and the hospitality options for the arena. In place of the existing presidents box will be a new overbuild seating section to accommodate loge boxes, ledge seating conditions, necessary ADA and also a "club" space for pre game social events and also allowing the opportunity for events to be held outside of football games. It will have direct access from the existing seating bowl and a new elevator which will be utilized not only for this phase but all future phases.



LOGE BOXES - 6 TOTAL (28 PEOPLE)

PRESIDENTS BOX - 44 TOTAL (WITH DRINKRAIL)

CLUB SPACE - 950SF - 80 PEOPLE @ 12SF PP

PHASE 1B – PRESIDENTS BOX

IDAHO STATE UNIVERSITY

SUBJECT

Marketing and advertising master services agreement with Mitchell + Palmer LLC

REFERENCE

October 2018	Idaho State University (ISU) received Executive Director approval to enter into a marketing and advertising services agreement with Mitchell Palmer LLC (M+P) for a total amount not to exceed $975,000.
August 2019	Idaho State University received Executive Director approval to enter into a marketing and advertising services agreement with M+P for a total amount not to exceed $775,000.
September 2020	Idaho State University entered into a marketing and advertising services agreement with M+P for a total amount of $164,000.
October 2020	Idaho State University received Idaho State Board of Education (Board) approval to enter into a marketing and advertising agreement with M+P for an amount not to exceed $410,500.

APPLICABLE STATUTE, RULE, OR POLICY

Idaho State Board of Education Governing Policies & Procedures, Section V.I.3.a
Idaho Code § 67-9225.

BACKGROUND/DISCUSSION

In 2018, ISU launched a state-wide marketing and brand image campaign to recruit students. Informal proposals were sought from three Idaho-based marketing agencies and analyzed to determine overall consistency with ISU's brand and outreach strategy, and to determine best value to ISU. Because of its past experience working with higher education institutions and the Idaho Lottery, M+P was selected from the three proposals to provide creative strategy, marketing, advertising, and the other innovative services needed for a statewide campaign. ISU received Executive Director approval for a one-year contract. In 2019, ISU decided to continue with a new phase of the campaign on a slightly smaller scale and determined that M+P was still the preferred marketing firm to execute the next phase of the campaign. As such, an additional one-year service agreement was negotiated. In 2020, ISU continued with a further phase of the campaign and selected M+P for phase three.

M+P has demonstrated exceptional services over several years and is actively involved in long term planning for ISU's marketing needs. Therefore, ISU requests Board approval to enter into a 3-year master services agreement for advertising and marketing efforts including the ongoing statewide brand-image campaign, recruiting efforts, fundraising campaigns, and any other marketing and advertising services needed by ISU. The ISU Purchasing Department has approved this contract as a valid sole-source under its purchasing policies adopted pursuant to Idaho Code § 67-9225 and approved by the Board in 2016. In accordance with ISU's purchasing policy, the university Purchasing Department evaluated the business need for this contract, the type of services required, and whether the services are sufficiently unique to justify forgoing a competitive bidding process. In this case, because M+P created all new branding and brand-use guidelines for ISU two years ago and ISU has already entered four previous agreements with M+P for advertising services, changing vendors would inevitably alter the look, design, and functionality of the University's marketing campaign. M+P is more directly connected to the existing University marketing philosophy and direction than any other vendor. For these and other reasons documented in the sole source request, the purchasing department determined a sole source contract is justified and, as is standard practice, has posted an online notice of the sole source contract for other vendors to review.

The master agreement will provide one overarching contract that will govern all work performed by M+P for ISU, which will allow for more efficient processing of separate statements of work from various departments, including for admissions and university advancement. Additionally, a multi-year contract will allow for continuity of operations through the summer months when ISU is actively preparing for additional rounds of marketing to prospective students.

IMPACT

The ISU brand image campaign has been very successful. New student admissions were up significantly prior to the COVID-19 pandemic. In fact, despite budget reduction efforts, ISU leadership supported almost unanimously to continue investment in this area. Approval of the proposed master marketing and advertising contract for services will ensure that Idaho State University can continue to recruit prospective students and maintain a statewide marketing presence.

ISU is undertaking the next phase of its enrollment strategy and requires a longer-term investment in marketing and advertising. The University has identified specific enrollment target markets, competitive advantages, and recruitment strategies that will be deployed through the implementation of a comprehensive marketing campaign. This next phase of the statewide campaign is designed to increase ongoing outreach efforts, especially with traditional students, and coordinate all marketing and promotional efforts across the University. Success will be measured by an increase in prospective student inquiries, campus visits, applications submitted, and, ultimately, student enrollment at the institution. In addition to

meeting enrollment goals, the statewide marketing efforts are also focused on increasing general awareness about the University and its positive impact on the State of Idaho.

2021-2024 Proposed Agreement Value - Not to exceed $1.5M per year for a three-year total not to exceed of $4.5M. It should be noted that approximately 70% of all fees rendered to M+P go directly to media buys and advertising placement.

ATTACHMENTS

Attachment 1 – Proposed Master Marketing and Advertising Services Agreement

BOARD STAFF COMMENTS AND RECOMMENDATIONS

Idaho State University's brand image campaign has shown initial signs of success and help provide visibility to the work being done under the current administration. Student enrollment continues to be a national conversation as higher education institutions evaluate the impact of changing demographics on their ability to recruit new students.

ISU is undertaking the next phase of its strategy which requires a longer-term investment in marketing and advertising. This phase is designed to advance the current enrollment philosophy and will coordinate multiple efforts. Staff recommends approval.

BOARD ACTION

I move to approve the request by Idaho State University to enter into a master marketing and advertising contract with Mitchell + Palmer LLC for an amount not to exceed $1.5 million per year for a three-year total not to exceed of $4.5 million.

Moved by _____ Seconded by _____ Carried Yes _____ No _____

MASTER SERVICES AGREEMENT

This MASTER SERVICES AGREEMENT ("AGREEMENT") is entered into as of _____ ("COMMENCEMENT DATE") and is by and between Mitchell Palmer LLC, an Idaho Company, having offices at **1150 W State Street, Suite 200, Boise, ID 83702** ("AGENCY") and Idaho State University ("CLIENT") having its corporate office at **921 S 8th Avenue, Pocatello, ID 83029** for and on behalf of CLIENT.

RECITALS

AGENCY is a full-service advertising, communications and media agency. CLIENT desires to engage AGENCY, and AGENCY wishes to accept such engagement, to perform certain services and provide certain deliverables in accordance with the terms of this Agreement.

TERMS AND CONDITIONS

1) **ENGAGEMENT.** CLIENT hereby engages AGENCY on an "exclusive basis" ("exclusive basis" shall mean that AGENCY is CLIENT's only full-service advertising agency; and AGENCY shall direct, and retain creative control of, all CLIENT branding and media activities on CLIENT's behalf), and AGENCY hereby accepts such exclusive engagement, for AGENCY (a) to provide the creative, production and media services ("Services") within the territory of the United States of America (the "Territory"); and (b) to prepare and deliver to CLIENT those deliverables, designs, plans, schemes, written ideas or concepts, data, methods, know-how, information, notes, memoranda, research and development results, processes, formulae, reports, improvements, drawings, writings, intellectual property, and/or any other deliverable ("Works") identified under this Agreement or under a Statement of Work (SOW) hereunder. All such "Statement of Work (SOW)" documents shall: (i) be signed by an authorized representative of CLIENT and also be signed by AGENCY; ii) list Works to be prepared and delivered by AGENCY to CLIENT; and iii) contain the total price to be paid by CLIENT for all Works described in each SOW. SOW's may originate from any of several different departments of the CLIENT. ADDENDUM 1: Services + Deliverables Guidelines describes possible AGENCY services and deliverables that may be included in any SOW, and provides a CLIENT fiscal year spending limit which all possible SOW's, taken together and approved in any one fiscal year, must remain within. ADDENDUM 2: Agency Billing Policy describes how the AGENCY shall invoice the CLIENT for each type of Work and the expected payment terms. In the event of any conflict between this Agreement and any ADDENDUM, this Agreement shall control. Both ADDENDUMS shall be attached to this Agreement and made a part hereof.

2) **APPROVAL/QUALITY CONTROL.** AGENCY will provide all Works, and all versions, demonstrations, prototypes and completed proposals of Works, to CLIENT for its review and approval. No Work will be deemed final or completed until it is approved by an authorized representative of CLIENT, which for the purposes of this Section 2 only shall include Stuart Summers or any others that CLIENT authorizes on any SOW. The Works shall be of first-class commercial quality meeting prevailing standards for the advertising industry. All Services and Works will be performed in accordance with this Agreement, the applicable SOW, Schedule of Services and Personnel and any written specifications as may be hereinafter provided by CLIENT and mutually agreed to by AGENCY in writing. AGENCY will comply with all applicable laws and government regulations within the Territory in its performance of Services and preparation of the Works (other than those laws pertaining to the production, exploitation and maintenance of advertising and marketing materials and programs, which shall instead be subject to the division of responsibility reflected in the indemnification provision below and other more specific provisions of this Agreement; it being understood that although both parties undertake to comply with laws, the parties understand that there is a division of responsibility in creating and using advertising and marketing materials and programs and a balancing of risks in any Agreement, and, accordingly, each party takes responsibility for compliance with certain laws and regulations within the Territory and not others). Subject to Section 7(d) below, in connection with the performance of the Services and the Works, AGENCY shall be responsible for obtaining all permits, approvals, rights, licenses, authority, consents and releases that may be reasonably necessary for the use within the Territory of any stock photos, illustrations, props, music, other copyrighted materials, trademarks (other than those trademarks approved by CLIENT pursuant to Section 7 (e) below), locations, performers and other people included in any materials produced by AGENCY in finished and final form for public distribution ("Final Materials") in order to allow CLIENT to use such Final Materials within the Territory in the manner contemplated by CLIENT and AGENCY at the time such permits, approvals, rights, licenses, authority, consents and releases are obtained. AGENCY shall not use any Works, for any purpose or in any manner, except as expressly permitted under this Agreement.

3) **OBLIGATIONS OF CLIENT.** Subject to AGENCY's obligations as expressly set forth hereunder, CLIENT will ensure that the products or services advertised or promoted in any Work are in compliance with all applicable laws and regulations within the Territory and that the claims or representations made in any Work comply with all applicable laws and regulations within the Territory, subject to Section 7(d). CLIENT will provide AGENCY, at no charge to AGENCY, complete product units as may be reasonably requested by AGENCY for use solely in connection with AGENCY's performance of its obligations hereunder. CLIENT understands that time is of the essence in providing its approvals or reasons for refusing approval of any element of the Services or Works when presented. CLIENT shall grant its approval (or explain the basis of its disapproval) within **ten (10)** business days after receipt of such any such element from AGENCY, including but not limited to formal AGENCY summaries of meetings and discussions with CLIENT (defined as "Contact Reports"); provided however, that CLIENT's failure to provide approval of, or explain the basis of its disapproval of Contact Reports or any other element within such time frame shall be deemed approval by the AGENCY to proceed with the Services or Works in question. Furthermore, should CLIENT fail to provide guidance or approvals for any WORKS after a period of sixty (60) days such that AGENCY is unable to move forward, AGENCY shall a) reserve the right to automatically cancel the WORKS in question; b) assess a kill-fee based on the cost for actual hours incurred by AGENCY up to the point of date of cancellation; and c) additionally charge CLIENT for all third-party charges incurred including any cancellation-related charges assessed by third parties - (see also article 6 a)).

4) COMPENSATION AND PAYMENT.

a) AGENCY shall be compensated generally according to ADDENDUM 2: Agency Billing Policy and more specifically, according to the cost and detailed billing advisements of each approved SOW..

b) The parties shall conduct a full two-way evaluation and review of the relationship during the 4th Quarter each CLIENT fiscal year. Any resulting changes agreed to any SOW or ADDENDUM;; the Territory; or any other aspect of this Agreement shall be agreed in writing, failing which the arrangements in place at the time of the evaluation, for instance as to AGENCY compensation, shall continue to apply.

c) The parties agree total compensation across all terms of, and approved SOWs attached to, this Agreement shall not exceed a combined total of $4,500,000 USD.

5) **DETAIL OF EXPENSES**. CLIENT agrees to reimburse AGENCY's incurred expenses in accordance with this Section 5.

a) Type. The expenses contemplated by the parties to be reimbursed or paid by CLIENT include the following without limitation, provided that all such expenses are approved by CLIENT in writing in advance: (A) direct out-of-pocket expenses of Third Party vendors incurred by AGENCY in the course of providing Services; (B) out-of-pocket traveling expenses (e.g. transportation, meals, hotels, cell phone, etc.) of AGENCY personnel performing regular duties on behalf of CLIENT; (C) expenses and costs for research and development, creative concept development, presentation, production, performance testing and rollout of Works and performance of Services; (D) all legal costs incurred in clearing rights to Works, Third Party Components or CLIENT Components; and (E) Gross Media expenses for insertions, airings, sponsorships, etc..

b) T&E. AGENCY shall be reimbursed for all travel to and from CLIENT's local offices; reasonable meals working late, e.g., resulting from CLIENT's last-minute changes; CLIENT-requested attendance at educational forums, conferences and other events. CLIENT may be billed for specified entertainment expenses, providing they have been pre-approved in writing by CLIENT. AGENCY personnel will strive to observe CLIENT's communicated internal T&E guidelines wherever possible.

c) Fluctuations in Foreign Currency Valuations. If foreign suppliers are selected, AGENCY will endeavor to contract with such suppliers in US Dollar; if not possible, exchange rate differences incurred shall be credited or debited to CLIENT's invoicing where applicable.

d) Idaho Sales Tax. As the CLIENT is located in the State of Idaho, the AGENCY is required to charge 6% sales tax to CLIENT for all Works which qualify as sales-taxable, unless the CLIENT is sales-tax exempt, in which case CLIENT must provide the ST-101 tax exemption certificate to AGENCY. AGENCY shall include sales tax on production estimates and charge the tax on invoices to CLIENT when applicable. Media costs across the board currently are not liable for sales tax.

e) Additional Expenses. Any Third Party expenses and/or AGENCY costs resulting from CLIENT's request for services and/or deliverables beyond the agreed Works and Services set forth in each applicable SOW, or for use outside of the Territory, shall be negotiated separately and additionally compensated to AGENCY by CLIENT according to ADDENDUM 2, failing any other specified advisements agreed in writing by the parties..

6) TERM AND TERMINATION.

a) Term. This Agreement is effective as of the Commencement Date and shall continue for three years ending June 30, 2024 or until such date on which the parties agree in writing to terminate this Agreement (the "Term") by giving ninety **(90)** days prior written notice to the other party. Either party shall have the right to terminate this Agreement or any SOW in the event of a material breach thereof, which breach is not cured within **thirty (30)** days of written notice thereof, (the "Effective Date of Termination") including CLIENT not making a timely payment to AGENCY when due. AGENCY shall be fairly compensated by CLIENT for all services performed, and expenses incurred in accordance with this Agreement or the applicable SOW prior to the Effective Date of Termination; expenses incurred directly as the result of termination, e.g., third-party production and media cancellation fees; and the retainer fees due during each of the three (3) months, or 90-day notice period for AGENCY to complete and transition the Works. Also see Section 3 as regards individual WORKS cancellations.

b) Effect of Termination. Upon the Effective Date of Termination of this Agreement, provided CLIENT has no outstanding indebtedness to AGENCY, (1) AGENCY shall transfer to CLIENT all property and materials previously provided by CLIENT, and all contracts for talent and other promotional adjuncts entered into by AGENCY on behalf of CLIENT; (2) CLIENT will assume responsibility for any non-cancelable commitments properly entered into by AGENCY on behalf of CLIENT; and (3) CLIENT will pay to AGENCY all amounts outstanding hereunder upon the Effective Date of the Termination. Following termination of this Agreement, Sections 4, 5, 6, 8, 9(b), 11, 13, 14 and 15 will survive for a period of **three (3)** years after the date of this Agreement and Section 7 will survive in perpetuity.

7) WORK MADE FOR HIRE/EXCLUSIVELY OWNED BY CLIENT OR ITS DESIGNEES.

a) Work Made for Hire. As between AGENCY and CLIENT, each of the Works (other than Agency Materials as defined below) that (1) are accepted in writing by CLIENT at any time during the Term of this Agreement; and (2) for which CLIENT pays all fees provided under this Agreement, and all costs incurred by AGENCY in creating such materials in accordance with this Agreement ("Results and Proceeds") will be owned exclusively by CLIENT. All Results and Proceeds shall be deemed "works-made-for-hire" for CLIENT within the meaning of the United States copyright law, with CLIENT being the sole author and owner of all rights thereof, including, but not limited to, all copyrights and all extensions and renewals of copyrights. AGENCY acknowledges that this Agreement represents a complete buy-out worldwide by CLIENT from AGENCY of Results and Proceeds. CLIENT and its designees will have the sole and exclusive right worldwide to register the copyright(s) in all such Results and Proceeds in its name as the owner and author and will have the exclusive rights conveyed under 17 U.S.C. §§ 106 and 106A including, but not limited to, the right to make all uses of the Results and Proceeds in which attribution or integrity rights may be implicated. CLIENT and its designees will also have the sole and exclusive right to use and register with any government authority worldwide the right to use as a mark, trade name, domain name, or logo all or any of the elements of the Results and Proceeds. AGENCY will promptly deliver to CLIENT any and all Results and Proceeds at any time upon reasonable request.

Notwithstanding anything in this Agreement to the contrary, CLIENT acknowledges that AGENCY may own certain non-digital materials created by AGENCY prior to or separate from AGENCY's services for CLIENT ("Pre-Existing Agency Materials") and that all such Pre-Existing Agency Materials shall remain AGENCY's sole and exclusive property; provided, however, that (i) AGENCY shall specifically list in the Statement of Work(s) any and all Pre-Existing Agency Materials that will be used in the Work, and (ii) to the extent the Pre-Existing Agency Materials are included in any Final Materials, unless otherwise agreed by CLIENT and AGENCY, CLIENT shall have a non-exclusive, royalty-free license in perpetuity to use the Pre-Existing Agency Materials in the manner agreed upon by CLIENT and AGENCY, solely in and as incorporated in the Final Materials furnished by AGENCY.

CLIENT also acknowledges that AGENCY may use in connection with its services for CLIENT (i) certain computer software ("Software"), (ii) certain "Digital Tools" (which shall be defined as certain knowledge, techniques, procedures, algorithms, protocols, routines and methods used in the creation of computer software (both object code and source) and certain functionality thereof), which are and have been developed by AGENCY in the course of AGENCY's business and that AGENCY uses or may use for multiple CLIENTs or projects, and (iii) certain "Non-Digital Tools" (which shall be defined as concepts, strategies, ideas, business methods and processes which may be presented, or incorporated in materials (including Works and Results and Proceeds) that are presented, by AGENCY to CLIENT, which have applicability beyond the projects for CLIENT, and which AGENCY uses or may use in the course of its business). All such Software, Digital Tools and Non-Digital Tools, including those developed by AGENCY in the course of AGENCY's services for CLIENT, shall, as between AGENCY and CLIENT, be and remain AGENCY's property. However, unless otherwise agreed by CLIENT and AGENCY, to the extent the Software, Digital Tools and Non-Digital Tools are included in any Final Materials produced by AGENCY on CLIENT's behalf, insofar as AGENCY's rights are concerned, CLIENT shall have a non-exclusive, royalty-free license in perpetuity to use the Software and Tools in the manner agreed upon by CLIENT and AGENCY, in and as incorporated in the Final Materials furnished by AGENCY. Pre-Existing AGENCY Materials, Software, Digital Tools and Non-Digital Tools shall be collectively referred to in this Agreement as "Agency Materials."

b) Assignment. Without in any way limiting the foregoing, AGENCY hereby assigns, transfers, and conveys to CLIENT, or CLIENT's designee, and their respective successors, heirs and assigns, any and all right, title or interest worldwide that AGENCY may now have, or may acquire in the future, in or to the Results and Proceeds including, but not limited to, all ownership, patent, trade secret, trademark, service mark, copyright, moral, attribution and/or integrity rights. AGENCY hereby expressly and forever waives any and all rights that AGENCY may have worldwide arising under 17 U.S.C. § 106A, and any rights arising under any federal or state laws within the Territory that convey rights which are similar in nature to those conveyed under 17 U.S.C. § 106A, or any other type of moral right or droit moral. AGENCY agrees that CLIENT and its designees may, and is entitled to use any of the Results and Proceeds without additional consideration to AGENCY, for any purpose whatsoever worldwide. AGENCY will not license to others the use of Results and Proceeds, Trademarks or other proprietary materials of CLIENT without CLIENT's prior written approval.

c) Third Party Components. CLIENT agrees that AGENCY may obtain from third parties materials of every kind and nature for use in connection with Final Materials with CLIENT's prior written approval ("Third Party Components"). In such cases, AGENCY will obtain for CLIENT the rights, licenses and authority worldwide to include Third Party Components in the applicable campaign, having terms approved by CLIENT in writing. Notwithstanding, CLIENT agrees that CLIENT is solely responsible for the payment of third-party invoices for subcontractor services or Third-Party Components, and that no such payment by AGENCY shall make AGENCY liable for any future payments. (See also Section 11 b)).

d) CLIENT Components. Each of the parties acknowledges and agrees that CLIENT may develop or obtain and supply materials of every kind and nature for use with the Works including without limitation copyrightable material, including without limitation clips, recordings, images, use of on-camera talent, logos, location clearance, trademarks and other intellectual property (collectively, "Client Components"). In such cases, CLIENT covenants that it will obtain all necessary rights, licenses and authority to include Client Components with Works. AGENCY shall have no obligation to obtain permission or authorization to use, or obtain other rights with respect to Client Components, unless otherwise specifically agreed to the contrary in the SOW, and if the parties agree otherwise in writing in a particular Statement of Work, AGENCY may obtain such rights, licenses or authority within the Territory at CLIENT's sole cost and expense.

For purposes hereof, Client Components shall also include (i) materials created or supplied by CLIENT, (ii) any elements of any materials produced by AGENCY, or any particular usage of such elements, for which CLIENT undertakes to (or informs AGENCY that CLIENT or a third party will) obtain permission or clearance, (iii) talent supplied by CLIENT or with which CLIENT, or another entity on CLIENT's behalf, has entered into an agreement, (iv) agreements entered into (or that a third party alleges were entered into) by CLIENT independent of AGENCY (such as, without limitation, sponsorship agreements, joint promotion agreements, CLIENT license agreements, etc.) and (v) trademarks that CLIENT has either supplied to AGENCY or has authorized AGENCY to use in accordance with the terms of Section 7(e) below. To be clear, materials supplied by CLIENT include, without limitation, commercials and materials produced by CLIENT's prior advertising agencies, by CLIENT, by consumers or other third parties without AGENCY's involvement, which CLIENT instructs AGENCY to use, incorporate or accept in AGENCY produced materials, websites or data systems.

e) Trademarks. Unless otherwise agreed by CLIENT and AGENCY, AGENCY shall be responsible for the performance of preliminary trademark searches within the Territory with respect to potential trademarks created by AGENCY to be incorporated in materials produced by AGENCY on CLIENT's behalf, and AGENCY will bring to CLIENT's attention any significant trademark concerns that AGENCY may have. CLIENT agrees to pay in full for all such preliminary trademark searches and agrees further that CLIENT will be responsible for conducting any additional searches that CLIENT deems appropriate, including full trademark searches and any other searches CLIENT deems necessary, with respect to such potential trademarks. CLIENT shall make the final decision to use or proceed with any trademark based on CLIENT's independent investigation of the potential trademark and CLIENT's evaluation of the results of such independent investigation. CLIENT will notify AGENCY of CLIENT's decision with respect to the trademark. CLIENT also will be responsible for deciding whether to file for, and actually filing for, any registrations with respect to such trademark

f) Further Assurances. AGENCY hereby agrees to execute, acknowledge and deliver from time to time any and all documents and take such other action as CLIENT and its designees, in their sole discretion, believes necessary to: (i) protect, assure, register, confirm and/or otherwise vest CLIENT's and its designees' right, title and interest within the Territory in, to and under the Results and Proceeds; (ii) make a record with any and all government agencies, authorities, courts, tribunals, or third parties within the Territory of the fact that CLIENT owns all right, title and interest in, to and under the Results and Proceeds within the Territory, and any and all goodwill associated therewith; (iii) cooperate with CLIENT's and CLIENT's designees' defense of or litigation of any infringement, conversion or other similar litigation within the Territory related to the Results and Proceeds or a derivative thereof; and (iv) that AGENCY has no right, title or interest, of any kind or nature, in or to the Results and Proceeds.

Limited License to Results and Proceeds for Portfolio. CLIENT grants to AGENCY a limited, nonexclusive, worldwide fully-paid license to use Results and Proceeds for use in AGENCY's website, new business presentations, resume, curriculum vitae, and portfolio of work.

8) AGENCY'S REPRESENTATIONS AND INDEMNITY.

a) AGENCY represents and warrants that, to AGENCY's knowledge: the Results and Proceeds created and/or delivered by it under this Agreement are authentic, were and/or will be made solely by AGENCY without the contribution or assistance of any other persons or entities other than those employed by AGENCY or those subcontractors engaged by AGENCY with CLIENT's written consent, and AGENCY has and will have the sole, exclusive, and legal right within the Territory to assign, transfer, and convey all right, title and interest in and to the Results and Proceeds to CLIENT. AGENCY further represents and warrants that, except for Third Party Components and CLIENT Components, to AGENCY's knowledge: (i) no third party has any rights in, to, or arising out of Results and Proceeds contained in any unaltered Final Materials when used in the Territory; (ii) there has not been any claim of infringement of any patent, copyright, trademark, or misappropriation of any trade secret of any third party as a result of the execution, delivery and performance of this Agreement; (iii) CLIENT's or its designee's use in the Territory of unaltered Final Materials will not infringe upon any copyright, trademark, or trade secret or otherwise constitute a libel or violation of the rights of publicity of any person, entity or firm; and (iv) the execution, delivery and performance of this Agreement by AGENCY does not constitute a violation within the Territory of any term of any agreement, contract, understanding or duty by which AGENCY is bound.

b) Regarding Digital Patent claims, AGENCY shall provide no indemnification to CLIENT for any claims whatsoever relating to pre-existing digital products and digital assets (including but not limited to websites) developed by the CLIENT or any other party, in use prior to such time as the AGENCY may commence Services or produce any Works involving such digital products or assets. To avoid any dispute between the parties, AGENCY shall conduct an audit of pre-existing digital features and functionality (the "Digital Audit") prior to starting any work on behalf of CLIENT where such pre-existing digital products or assets are assigned to the AGENCY. The Digital Audit shall be conducted according to the published guidance of the 4A's (American Association of Advertising Agencies/New York) and may include such activities as collecting and archiving screen shots, client records, public records and other information sources which pertain to CLIENT's pre-existing digital footprint. Documentation areas required may include: i) technology – original, contracted and commercial and open source code libraries, etc.; ii) functionality – designs, specifications, interaction flowcharts, etc.; and iii) other software partner agreements that were in place prior to the start of AGENCY work. CLIENT agrees to cooperate fully with AGENCY in the performance of the Digital Audit prior to authorizing AGENCY to perform any work relating to any pre-existing digital assets or products.

9) MATERIAL FROM THIRD PARTIES.

a) Instructions to Third Parties. CLIENT specifically grants to AGENCY the limited right to act on CLIENT's behalf as its agent (solely within the scope of this Agreement) to give reasonably necessary instructions on behalf of CLIENT to any person or entity involved in AGENCY assignments who create or deliver Third Party Components provided CLIENT provides its prior written approval of such instructions.

Third Party Contracts. AGENCY shall use commercially reasonable efforts to ensure that all contracts for Third Party Components with third parties that are not signed as agent for CLIENT shall be, by their express terms, freely assignable to CLIENT and its designees. AGENCY shall furnish CLIENT, promptly upon request, proof of payment to third parties with respect to work and services for CLIENT's account and, upon CLIENT's request, obtain all necessary and reasonably obtainable lien waivers in connection with such work and services, provided CLIENT shall pay for all actions taken by AGENCY to obtain such waivers in connection therewith.

10) CONFIDENTIALITY.

a) Confidential Information. Each party (the "Receiving Party") agrees to retain in strict confidence all Confidential Information disclosed by the other party (the "Disclosing Party"). For purposes hereof, "Confidential Information" includes: (a) tangible disclosures marked as "Confidential," "Proprietary" or that bear any other appropriate notice indicating the confidential nature of such information; (b) information that is not susceptible to being marked (for example, orally or visually disclosed information), but that under the circumstances surrounding disclosure ought to be treated as confidential by the Receiving Party; and (c) nonpublic information that the Disclosing Party designates as being confidential or which, under the circumstances surrounding disclosure ought to be treated as confidential by the Receiving Party, including, without limitation, information in tangible or intangible form relating to and/or including released or unreleased software or hardware products, the marketing or promotion of any product, business policies or practices, product information, reports, studies, notes, analyses, summaries, business, market and development plans, procurement and sales activities and procedures, promotion, pricing, information received from others that the Disclosing Party is obligated to treat as confidential and all information that derives actual or potential independent economic value from not being generally known to, and not being readily ascertainable by proper means by, other persons who can obtain economic value from its disclosure or use and is the subject of efforts that are reasonable under the circumstances to maintain its secrecy.

b) Exclusions. Confidential Information will not include information that: (a) is or becomes generally known or available by publication, commercial use or otherwise through no fault of the Receiving Party; (b) the Receiving Party can demonstrate to have had rightfully in its possession and without restriction, prior to disclosure hereunder; (c) is independently developed by the Receiving Party without use of the Disclosing Party's Confidential Information; (d) is lawfully obtained from a third party who has the right to make such disclosure; or (e) is released for publication by the Disclosing Party in writing. A Receiving Party also may disclose Confidential Information to the extent required by a court or other governmental authority or legal process, provided that the Receiving Party promptly notifies the Disclosing Party of the disclosure requirement and cooperates with the Disclosing Party (at the latter's expense and at its request) to resist or limit the disclosure. The parties recognize Agency is an agency of the State of Idaho subject to the Idaho Public Records Act. Nothing herein shall be construed as a waiver of Agency's obligations to comply with the Act.

c) Protection of Confidential Information. Each party agrees to protect the other's Confidential Information to the same extent that it protects its own confidential information of a similar nature and will take all reasonable precautions to prevent any unauthorized disclosure of Confidential Information to third parties. If either party provides Confidential Information of the other party to any third-party contractor to perform its obligations under the Agreement, then it will ensure that such third party has entered into a written confidentiality agreement protecting such Confidential Information from unauthorized disclosure or improper use. Each party's obligation not to disclose Confidential Information will terminate **two (2)** years from the initial date of receipt of the Confidential Information or **one (1)** year from the expiration or the Effective Date of Termination of this Agreement, whichever is later.

d) No Effect on Other Agreements. The provisions of this Section 10 will not limit or replace the restrictions and requirements of any other (existing or future) confidential information agreement between the parties or their affiliates.

11) INDEPENDENT RELATIONSHIP / SEQUENTIAL LIABILITY.

a) No employer/employee relationship. The parties expressly agree that there shall be no agency relationship (except as expressly provided and limited in Section 9(a) of this Agreement) and no employer-employee relationship between AGENCY and CLIENT. AGENCY is retained by CLIENT only for the purposes of, and to the extent set forth in, this Agreement, and the relationship of AGENCY with CLIENT under this Agreement during the term of this Agreement shall be that of an independent contractor. AGENCY agrees to devote sufficient time, effort, resources, ability, skill and attention as may be necessary for AGENCY to perform the services required to be provided to CLIENT under this Agreement, but AGENCY shall have the full authority to select the means, manner, and method of performing such services.

b) Sequential Liability. The AGENCY shall be solely liable for payment of all third-party charges (e.g., media and production vendor charges, costs of assets and rights purchases made by AGENCY on CLIENT's behalf) only after the AGENCY has been paid for those costs in full by CLIENT. Prior to payment in full to the AGENCY, the CLIENT shall remain solely liable for sums owing third parties not yet paid to the AGENCY.

12) INDEMNIFICATION BY AGENCY / LIMITATION OF AGENCY LIABILITY. AGENCY shall defend, indemnify and hold harmless CLIENT, its parent and subsidiaries, and each of its and their officers, directors, employees, agents, successors and assigns, from and against any and all claims, losses, liability, costs and expenses (including reasonable attorneys' fees) arising out of or in connection with AGENCY's (a) breach of any of its representations and warranties in this Agreement; (b) property damage, or personal injury or death resulting from any act or omission to act by AGENCY or any of its employees, agents, representatives or contractors constituting negligence; and (c) any claim within the Territory pertaining to libel, slander, defamation, false or deceptive advertising, disparagement, copyright or trademark infringement, invasion of privacy, piracy, and/or plagiarism under U.S. law arising from CLIENT's use in the Territory, consistent with releases and agreements with third parties, of any Final Materials that AGENCY creates or supplies to CLIENT that have not been altered by CLIENT, except to the extent that such claim arises from CLIENT Components or from CLIENT's performance or failure of performance of its obligations under Section 3. CLIENT will provide written notice to AGENCY of any claim or lawsuit arising from this Agreement. This Section 12 shall survive the expiration or termination of this Agreement for a period of **two (2)** years. Notwithstanding the foregoing, AGENCY's liability under this Agreement will be limited to the total amount of insurance payments received under the insurance policies maintained by AGENCY**.** For purposes of this Agreement, use in the Territory (the United States) includes use on Websites or in digital materials that are primarily directed to consumers in the United States. Notwithstanding the above, CLIENT agrees to the exception found in Section 8. b).

13) CLIENT LIABILITY. CLIENT shall be responsible and assume liable for its own wrongful or negligent acts or omissions, or those of its officers, agents, or employees to the full extent required by law, including for any and all claims, losses, liability, costs and expenses (including reasonable attorneys' fees) ("Claims and Losses") arising out of or in connection with (a) violation of any applicable federal, state or local law, rule or regulation; (b) breach of any of its representations and warranties in this Agreement; (c) property damage, or personal injury or death resulting from any act or omission to act by CLIENT or any of its employees, agents, representatives or contractors constituting negligence; or (d) any claim of defamation, false or deceptive advertising, disparagement, copyright or trademark infringement, invasion of privacy or plagiarism under U.S. law, or violation of any other intellectual property right of any person or entity within the Territory, to the extent based upon CLIENT Components or based upon CLIENT's performance or failure to perform its obligations under Section 3, (e) the use by CLIENT of any Final Materials in a manner that is inconsistent with any agreements or releases with third parties (except to the extent that AGENCY has failed to advise CLIENT of the material terms of such agreements or releases and such failure to advise CLIENT results in such Claims and Losses); or the use of any preliminary, raw, or altered materials produced by AGENCY; or (f) any risks of which AGENCY has apprised CLIENT (provided that AGENCY proceeds in accordance with CLIENT's direction with respect to such risks). AGENCY will provide written notice to CLIENT of any claim or lawsuit arising from this Agreement. This Section 13 shall survive the expiration or termination of this Agreement for a period of **two (2)** years.

14) INSURANCE. Throughout the Term hereof, AGENCY shall maintain with reputable insurers such policy or policies of insurance as may be necessary to cover the AGENCY's obligations and liabilities under this Agreement, including but not limited to general liability, professional liability, and transmission and production insurance against transmission and production risks for all Advertising undertaken for television, broadcast and video. Such policies shall have limits of no less than $1,000,00 per occurrence. When required, the premiums for transmission and production insurance shall be included in the AGENCY's production charges to the CLIENT. CLIENT and the State of Idaho shall be named as additional insured's in all policies as requested

15) DAMAGES. In addition to any other damages that either party may be entitled to at law or in equity, should either party breach this Agreement, the non-breaching party may, in accordance with applicable law, be entitled to recover reasonable attorney's fees, costs, and expenses incurred in enforcing the terms of this Agreement.

16) CERTIFICATION CONCERNING BOYCOTT OF ISRAEL: Pursuant to Idaho Code section 67-2346 (effective July 1, 2021), if payments under the Contract exceed one hundred thousand dollars ($100,000) and Contractor employs ten (10) or more persons, Contractor certifies that it is not currently engaged in, and will not for the duration of the Contract engage in, a boycott of goods or services from Israel or territories under its control. The terms in this section defined in Idaho Code section 67-2346 shall have the meaning defined therein.

16) MISCELLANEOUS. The following additional provisions shall apply:

a) Governing Law; Submission to Jurisdiction. This Agreement and any claim or dispute arising out of or related to this Agreement or the transactions contemplated hereby, whether in contract, tort or otherwise, shall be governed by and construed in accordance with the laws of the State of Idaho, without giving effect to its conflicts of law principles. Any legal actions, suits or proceedings arising out of this Agreement (whether for breach of contract, tortious conduct or otherwise) shall be brought exclusively in the state courts located in Bannock County, Idaho and the parties to this Agreement hereby accept and submit to the personal jurisdiction of these Idaho courts with respect to any legal actions, suits or proceedings arising out of this Agreement.

b) No Assignment. This is a personal services agreement and may not be assigned by AGENCY without first securing the written consent of CLIENT.

c) Third Parties. AGENCY will use commercially reasonable efforts to guard against any loss to CLIENT caused by the failure of media, suppliers or others to perform in accordance with their commitments, but AGENCY will not be responsible for any such loss or failure on their part, or any destruction or unauthorized use by others of CLIENT's property.

d) Cancellation. CLIENT has the right at any time to direct AGENCY to cancel any plans, schedules, or work in progress, but CLIENT agrees to reimburse AGENCY for any loss, cost, or liability AGENCY may sustain as a result of such action. AGENCY will be entitled to its fees, and payments for services performed prior to CLIENT's instructions to cancel, and for advertising and materials placed or delivered thereafter if AGENCY is unable to halt such placement or delivery. Under no circumstances will AGENCY be obliged to breach any lawful contractual commitment to others. (See also Section 3).

e) Further Assurances. Each of the parties agree to take such further action to execute and deliver such additional documents as may be required to them to effectuate the purpose and intent of this Agreement.

f) Entire Agreement. This instrument contains the entire Agreement between the parties hereto with respect to the transaction contemplated herein, and may not be amended or modified except in writing signed by each of the parties.

g) Notices. All notices, requests, consents and other communications under this Agreement will be in writing, addressed to the receiving party's address appearing on the banner page to this Agreement or to another address as that party may designate in a written notice, and will be either (i) delivered by hand; (ii) made by email; (iii) sent by overnight courier; or (iv) sent by registered mail, return receipt requested, postage prepaid. All notices, requests, consents and other communications under this Agreement will be deemed to have been given (a) if by hand, at the time of the delivery thereof to the receiving party; (b) if made by email, at the time that receipt thereof has been personally acknowledged in writing by the receiving party; (c) if sent by overnight courier, on the next business day following the day such notice is delivered to the courier service; or (d) if sent by registered mail, on the fifth business day following the day such mailing is made.

h) Counterparts. This Agreement shall be executed in two counterparts, each of which shall for all purposes be deemed an original.

MASTER SERVICES AGREEMENT

MASTER SERVICES AGREEMENT

ADDENDUM 1: SERVICES + DELIVERABLES GUIDELINES

The following are a list of services and deliverables that Mitchell Palmer LLC ("Agency") could provide during the duration of the agreement with Idaho State University with an ongoing goal of increasing awareness of Idaho State University within the State of Idaho as well as increasing applicants and enrollment at the University. The primary departments Agency will work with to accomplish these are the University Marketing and Communications team in the Office of the President as well as the Admissions Department. Work for other teams and departments, such as the Scholarships + Financial Aid or individual colleges, to be done upon request.

Specific work and deliverables for any projects will be agreed upon through a separate Statement of Work (SOW) to be approved by the manager of the requesting department; each SOW shall be governed by this MSA and its annual spending cap. Costs for all work and production provided by Agency shall not exceed $1.5 Million per fiscal year for the duration of the MSA.

Agency shall provide the following services:

- Account and Project Management
- Brand and Marketing Strategy
- Media Planning and Placement
- Creative Strategy and Development
- Design and Copywriting
- Production

To create the following deliverables:

Media Planning and Placement

- Development of a media plan that aligns with ISU's marketing goals and initiatives.
- Placement and monthly reconciliation of media based on approved media plan including outdoor billboards, streaming video and audio, online display and social media ads.

Creative Strategy, Development, Design and Copywriting

- Campaign concepting
- Outdoor billboards
- Online display banner ads
- Social media assets
- TV and video scripts

- Radio scripts

Production

- Television Spots
- Social Media Videos
- Enrollment and Recruitment Videos
- Branding Videos
- Radio Ads
- Photo Shoots
- HTML5 Banner Ad
- Outdoor Billboard Printing
- Printing of Direct Mail, Flyers, Brochures, etc.

ADDENDUM 2: AGENCY BILLING POLICY

AGENCY shall issue invoices to CLIENT according to the 3 standard agency budget areas: retainer; production; media.

The retainer invoice for each month of service shall be issued to CLIENT around the 15th of the month prior. Payment for retainers is due from CLIENT by the 1st day of the Retainer month of service, or within fifteen (15) calendar days of receipt of the invoice by CLIENT.

Production project invoices are normally issued in 2 tranches: the first 50% of approved estimate shall be invoiced to CLIENT immediately following CLIENT's estimate approval; the second 50% of estimate shall be invoiced to CLIENT as soon as AGENCY's costs exceed the ½-way mark. Payment from CLIENT for the first 50% invoice is due at AGENCY within thirty (30) calendar days of receipt by CLIENT; payment from CLIENT for the 2nd 50% invoice is due at AGENCY within thirty (30) calendar days of receipt by CLIENT and CLIENT shall make reasonable efforts to ensure earlier payment. A final reconciliation invoice (or credit) shall be issued to CLIENT to close the project when material variances in 3rd-party production costs may have occurred; payment from CLIENT for final invoice reconciliation production invoices, and all other non-production costs (e.g. travel, miscellaneous client requests, etc.) is due at AGENCY within thirty (30) calendar days of receipt by CLIENT.

Where production requirements dictate, AGENCY may agree with CLIENT to bill other % of estimate amounts during the life of a project, e.g., 75% and 25%. AGENCY shall not self-finance any productions without CLIENT funds and production may be halted should funds not be in AGENCY's bank account on-time.

All urgent production, including but not limited to broadcast/spot TV, large radio, large print, major research and any other 'RUSH' production requiring up-front payments by AGENCY to Third Party vendors shall require payment from CLIENT within five (5) business days to facilitate advance payments required to Third Party vendors for filming, directing, shooting photography, leading focus groups, etc. AGENCY shall advise CLIENT when a production invoice is of 'RUSH' nature. AGENCY shall not self-finance any productions without CLIENT funds and production may be halted should funds not be in AGENCY's bank account on-time.

Media invoices shall be issued to CLIENT by the 5th day of the month of insertion/airing for all media categories except for Digital, which shall be billed the month following placement. All invoicing shall be according to CLIENT's signed approval on media estimates/authorizations. Payment from CLIENT shall be due to AGENCY within thirty (30) calendar days of receipt of invoice.

IDAHO STATE UNIVERSITY

SUBJECT

EAMES Phase III Project - Financing Approval

REFERENCE

February 2017	Idaho State Board of Education (Board) approved engineering and cost estimating to move College of Technology Academic Programs to the RISE Building.
August 2017	ISU FY19 Six-Year Capital Project Plan approved.
December 2018	Board approved Idaho State University's request, pending JFAC approval, to reallocate the $10M dollars of funding from Gale Life Science to the EAMES Project, to allow Idaho State University to begin construction of Phase I of EAMES Building remodel for moving College of Technology Programs at a total project cost estimated at $13.3M.
January 2018	JFAC approved and the Governor's office signed the approval to reallocate $10M dollars of funding from Gale Life Science to the EAMES Project.
February 2019	Legislature passed and the Governor signed House Bill 20 to reallocate $10M dollars of funding from Gale Life Science to the EAMES Project.
April 2019	Board approved Idaho State University's request to bid Phase I, with Phase II as an add alternate contingent upon collection of donated funds, for a total construction amount not to exceed $18,952,000
February 2020	Board approved bidding and construction for EAMES Phase III for an amount not to exceed $3,600,000

APPLICABLE STATUTE, RULE, OR POLICY

Idaho State Board of Education Governing Policies & Procedures, Section V.K.2.

BACKGROUND/DISCUSSION

Idaho State University (ISU) seeks approval from the Board to increase the maximum total cost for EAMES Phase III to $4,639,335. Due to the rapidly inflating construction market, the lowest project bid came in higher than anticipated, bringing the total project cost to $4,639,335, which is $1,039,335 more than approved by the Board in February 2020.

ISU and the ISU Foundation have developed a strategy to cover the project cost escalation. The College of Technology will contribute $510,000 generated through local fund operations and other revenue-generating activities, which were not expended from the COVID-19 pandemic. Additionally, $529,335 will be generated from philanthropic support from donors that have already committed funds to the project. These commitments will come in over-time to cover the cost differential. ISU will commit institutional reserves and as the donor funds are made available, those reserves will be reimbursed.

Previous Project Cost	
U.S. Economic Development Administration Grant	$2,271,953
Previously Committed Philanthropic Support	$1,328,047
Project Over-Run	
Future Philanthropic Commitments	$ 529,335
College of Technology Carry Forward	$ 510,000
Total	$ 4,639,335

IMPACT

The EAMES Phase III project completes the multi-phased effort to collocate a number of key programs in the College of Technology to one facility alleviating deferred maintenance issues and expanding career technical and research possibilities.

STAFF COMMENTS AND RECOMMENDATIONS

The bidding climate has produced challenges for institutions to assure that pricing is accurate prior to bid. With construction costs escalating, and with the support of the Division of Public Works, the bid on the EAMES Phase III project exceeded the previous approval of the Board by $1,039,335.

Board Policy V.K.5 states, “If a project budget increases above the total Board-authorized amount by the lesser of 5% or $500,000, then the institution or agency shall be required to seek further authorization.” ISU is bringing this request forward to the Board in compliance with that policy for authorization to increase the budget in alignment with the lowest project bid. Staff recommends approval.

BOARD ACTION

I move to approve the request by Idaho State University to proceed with the construction of EAMES Phase III for a total cost not to exceed $4,639,335

Moved by _____ Seconded by _____ Carried Yes _____ No _____

UNIVERSITY OF IDAHO

SUBJECT

Huron Consulting Group Contract – E-Procurement Software Implementation

REFERENCE

September 29, 2017	Board adopted the Higher Education Task Force recommendations, including the recommendation to increase systemness.
December 20, 2018	The Huron Consulting Group, Inc., presented its final report on Administrative Review and Consolidation Assessment to the Board.
January 18, 2019	Board accepted the final Huron report and authorized the Board president to appoint a subcommittee of Board members to identify a timeline and decision points for future Board consideration.
April 21, 2021	The Board approved the institutions entering into a Joint Purchasing Agreement.
June 28, 2021	Board approved the Jaggaer contract for an e-procurement software solution.

APPLICABLE STATUTE, RULE, OR POLICY

Idaho State Board of Education Governing Policies & Procedures, Section V.I.3

BACKGROUND/DISCUSSION

Boise State University, Idaho State University, Lewis-Clark State College, and the University of Idaho, with the approval of the Idaho State Board of Education, formed a higher education joint purchasing group, now known as the Idaho Higher Education Procurement Federation (IHEPF), in order to help implement a recommendation from the 2019 Huron report for the institutions to more fully cooperate on shared purchasing efforts and contracts in order to increase efficiency and effectiveness. Further, the four institutions entered into a Joint Purchasing Agreement to allow for the consolidation of purchasing efforts among the institutions.

Part of the Huron report (Operational System Integration) recommended the acquisition of an E-Procurement software system to be utilized by the four institutions. The execution of the Joint Purchasing Agreement allows the institutions to more easily implement this recommendation. IHEPF evaluated E-Procurement systems, and selected the Jaggaer E-procurement system. In June, the UI was granted authorization to procure the Jaggaer E-procurement software system. Given the complexity of the system, having the assistance of a firm experienced in the implementation of the software will greatly assist the institutions in the implementation and utilization of the software. Huron Consulting is the primary implementation firm for Jaggaer, and this contract was proposed within the

guidelines of the State of Idaho contract with the Division of Purchasing. Pursuant to the Joint Purchasing Agreement, the University of Idaho is the lead institution for this proposed contract and will be the contracting institution.

IMPACT

The acquisition of the E-Procurement software system will allow Boise State University, Idaho State University, Lewis-Clark State College, and the University of Idaho to utilize Jaggaer's E-Procurement system, along with Jaggaer's contract management software, and other systems. The contract with Huron Consulting Group will allow the institutions to more efficiently implement the system between the institutions. This will involve such work as implementation planning, facilitation of functionality, design of system interfaces, training materials, development of training curriculum, and development of change management and communication strategies. The total cost of the contract with Huron Consulting is $1,481,430. Most of the cost of this contract and a separate proposed contract with Jaggaer for the E-procurement software (which has been presented in a separate agenda item) will be covered by a $2.5 million appropriation from the Legislature to the State Controller's Office for the Building Idaho's Future initiative. The remaining costs will be divided among the institutions, with Idaho State University, Boise State University and University of Idaho paying 30% each, and Lewis-Clark State College paying 10%.

The Jaggaer E-Procurement system will be implemented at the four, four-year institutions with expandability to the two-year institutions.

ATTACHMENTS

Attachment 1 – University of Idaho Contract for Services
Attachment 2 – Huron Consulting Group Statement of Work

BOARD STAFF COMMENTS AND RECOMMENDATIONS

In response to the Board's initiative on system optimization, the four-year institutions entered into a Joint Purchasing Agreement in April of 2021 and have worked together to complete the work recommended by the Huron Consulting Group. The Legislature appropriated $2.5 million to fund this project beginning in FY 2022; and the institutions, led by the University of Idaho, have determined that a systemwide software will serve the E-Procurement needs of the institutions. This request is to enter into a contract with Huron for implementation of the Jaggaer software.

Board Policy V.I.3.a. states, "Purchases exceeding one million dollars ($1,000,000) require prior Board approval." The University of Idaho requests Board approval to enter into the contract and requests the funding be released from the State Controller's Office (SCO). Board staff will develop a Memorandum of Understanding with SCO for the transfer of the funds. The Jaggaer contract, which was approved in June, will provide the software. This contract with Huron

will fund services needed to implement the Jaggaer software. Staff recommends approval.

BOARD ACTION

I move to approve the request by the University of Idaho to execute the attached contract with Huron Consulting Group and to authorize the University of Idaho Vice-President for Finance and Administration, or designee, to execute the necessary contractual documents in substantial conformity to the documents attached to this motion.

Moved by _____ Seconded by _____ Carried Yes _____ No _____

UNIVERSITY OF IDAHO
CONTRACT FOR SERVICES

This Agreement is made between the Regents of the University of Idaho, a public corporation and state educational institution, and body politic and corporate organized and existing under the Constitution and laws of the state of Idaho ("Institution"), and Huron Consulting Group, a corporation with its principal place of business in Chicago, Illinois and with authority to do business in the State of Idaho ("Contractor"), collectively the Parties.

RECITALS

A. Institution desires to obtain the services of Contractor; and

B. Contractor claims to have expertise and experience to provide the services described herein for the benefit of the Institution.

TERMS

The Parties in recognition of the good and valuable consideration as further described herein agree as follows:

1.0 Scope of Services

1.1 Contractor agrees to perform such professional services as are set forth in this Agreement with the standard of professional care and skill customarily provided in the performance of such services, and Institution agrees to pay Contractor such amounts as are specified in this agreement, all upon the following terms and conditions:

1.2 Contractor agrees to provide the deliverables set forth in Option 2 in the Huron Statement of Work for Idaho Higher Education Procurement Federaion, Exhibit A, attached hereto and incorporated herein. Provided that if there are any conflicting terms between this Agreement and Exhibit A, the terms in this Agreement shall control.

1.3 Contractor shall provide such services as are necessary to provide the deliverables set forth in Exhibit A.

1.4 Contractor agrees to perform as set forth in sections 1.2 and 1.3 to the satisfaction of Institution.

1.5 Institution's liaison overseeing the services provided under this Agreement is Julia McIlroy, Director, Contracts and Purchasing Services, who is located at University of Idaho, Moscow, ID 83844-; Voice: (208) 885-6123.

1.6 The parties may from time-to-time extend the scope of services and deliverables or omit services and deliverables previously ordered, and the provisions of this Agreement shall apply to all such additions and omissions. All such additions and omissions must be in a writing executed by both parties in order to be effective.

2.0 Fees and Expenses.

2.1 Institution agrees to pay a maximum fee of one million four hundred eighty one thousand four hundred thirty and 00/100 dollars ($1,481,430) for services, out-of-pocket expenses and deliverables rendered by Contractor hereunder, including all amounts already paid.

2.2 The total fee, and any reimbursement for incidental out-of-pocket expenses identified in section 2.4, shall be payable upon completion of the work on a monthly basis. An application for payment of fees and expenses, accompanied by proper documentation, including receipts, shall be submitted by Contractor to Institution upon completion of the work, said application to cover and include all fees earned and expenses incurred. Contractor shall be deemed to have waived its right to payment for any fees earned or expenses incurred if not included on the application. Institution reserves the right to require reasonable additional supporting documentation from Contractor. All applications for payment shall be on forms acceptable to or approved by Institution.

2.3 Contractor agrees that Contractor is solely responsible for payment of income, social security, and other employment taxes due to the proper taxing authorities, and that Institution will not deduct such taxes from any payments to Contractor hereunder. Contractor agrees to indemnify, defend, and hold harmless the state of Idaho and Institution and its governing board, officers, employees, and agents from and against any and all costs, losses, damages, liabilities, expenses, demands, and judgments, including court costs and attorney's fees, relating to the payment of income, social security, and other employment taxes for itself and subcontractor(s) of any tier.

2.4 Institution shall, at its discretion, reimburse or directly pay the following designated out-of-pocket expenses, provided the request for travel reimbursement is made to Institution in advance of travel and Contractor receives written approval prior the initiating the travel. Absent a specific statement from Institution that it will directly pay for a designated expense, a designated expense will be reimbursed. In all cases, whether direct pay, or reimbursement, the rates for the following costs shall be consistent with the University's current travel policy and rates:

(1) Airplane travel for [TBD] person(s) not to exceed coach rate for dates of travel.
(2) One rental car in an amount not to exceed economy rates for dates of travel, unless an upgrade is justified and authorized by Institution.
(3) Lodging for [TBD] person(s) for [TBD] night(s) not to exceed standard single rates, unless otherwise justified and authorized by Institution.
(4) Meals for [TBD] person (s) for [TBD] day(s) not to exceed Institution per diem for such location, per day.
(5) Other as follows: none without prior written approval

2.5 Fees for services not within the scope of this Agreement shall be at an hourly rate to be negotiated in writing by the parties.

3.0 Term.

The services to be rendered by Contractor under this Agreement shall commence not later than September 1, 2021, and be completed by December 31, 2022. Time is of the essence for this Agreement. This term may be extended beyond such completion date if Institution agrees to the extension in writing.

4.0 Contractor's Capacity and Responsibilities.

4.1 It is expressly understood that Contractor is an independent contractor and not the agent, partner, or employee of Institution. Contractor and Contractor's workers are not employees of Institution and are not entitled to tax withholding, Workers' Compensation, unemployment compensation, or any employee benefits, statutory or otherwise.

4.2 Contractor shall not have the authority to enter into any contract or agreement to bind Institution and shall not represent to anyone that Contractor has such authority.

4.3 Contractor represents and warrants to Institution that in performing the services called for hereunder Contractor will not be in breach of any agreement with a third party.

4.4 In the event that Contractor subcontracts for the services to be provided herein, Contract shall remain liable for all obligations and commitments under this Agreement and shall ensure that any necessary obligations and commitments flow through to the subcontractor(s) of any tier.

5.0 Confidentiality of Information.

5.1 Contractor agrees to keep confidential and not to disclose to third parties any information provided by Institution pursuant to or learned by Contractor during the course of this Agreement unless Contractor has received the prior written consent of Institution to make such disclosure. This obligation of confidentiality does not extend to any information that:

5.1.1 Was in the possession of Contractor at the time of disclosure by Institution, directly or indirectly;

5.1.2 Is or shall become, through no fault of Contractor, available to the general public, or

5.1.3 Is independently developed and hereafter supplied to Contractor by a third party without restriction or disclosure.

5.2 This provision shall survive expiration and termination of this Agreement.

6.0 Property Rights and Reports.

6.1 Contractor agrees that any intellectual property including but not limited to computer programs, software, documentation, copyrightable work, discoveries, inventions, or improvements developed by Contractor solely, or with others, resulting from the performance of services pursuant

to this Agreement is the property of Institution, and Contractor herby agrees to assign all rights therein to institution. Contractor further agrees to provide Institution with any assistance which Institution may require to obtain patents or copyright registrations, including the execution of any documents submitted by Institution.

6.2 Intentionally Left blank.

6.3 Non-Use of Names and Trademarks. No party to this Agreement shall, without express written consent, use any name, trade name, trademark, or other designation of any other party hereto (including contraction, abbreviation or simulation) in advertising, publicity, promotional, or any other activities or context

6.4 This provision shall survive expiration and termination of this Agreement.

7.0 Suspension or Termination of Contract.

Institution reserves the right to suspend indefinitely or terminate the contract and the services to be rendered by Contractor for any reason upon seven (7) days' prior written notice. In the event of termination prior to completion of all work described in Section 1.0, the amount of the total fee to be paid Contractor shall be determined by Institution on the basis of the portion of the total work actually completed up to the time of such termination.

8.0 Indemnification and Hold Harmless.

8.1 Contractor agrees that any personal injury to Contractor or third parties or any property damage incurred in the course of performance of the Consulting Services shall be the responsibility of Contractor.

8.2 Contractor agrees to indemnify, defend, and hold harmless the state of Idaho and Institution and its governing board, officers, employees, and agents, Boise State University, Idaho State University, and Lewis-Clark State University from and against any and all costs, losses, damages, liabilities, expenses, demands, and judgments, including court costs and attorney's fees, which may arise out of Contractor's performance of the Consulting Services, including performance of subcontractor(s) of any tier, except to the extent such are caused by the negligence of Institution.

8.3 This provision shall survive the termination of this agreement.

9.0 Insurance

9.1 General Requirements

9.1.1 Contractor and its subcontractor(s) of any tier are required to carry the types and limits of insurance shown in this insurance clause, section 9.0, and to provide Institution with a Certificate of Insurance (“certificate”). All certificates shall be coordinated by the Contractor and provided to the Institution within seven (7) days of the signing of the contract by the Contractor. Certificates shall be executed by a duly authorized representative of each insurer, showing compliance with the insurance requirements set

forth below. All certificates shall provide for thirty (30) days' written notice to Institution prior to cancellation, non-renewal, or other material change of any insurance referred to therein as evidenced by return receipt of United States certified mail. Said certificates shall evidence compliance with all provisions of this section 9.0. Exhibit B, the Request for Certificate of Insurance, provides a list of instructions for the insurance agent or broker of the Contractor and its subcontractor(s) of any tier.

9.1.2 Additionally and at its option, Institution may request certified copies of required policies and endorsements. Such copies shall be provided within (10) ten days of the Institution's request.

9.1.3 All insurance required hereunder shall be maintained in full force and effect with insurers with Best's rating of AV or better and be licensed and admitted in Idaho. All policies required shall be written as primary policies and not contributing to nor in excess of any coverage Institution may choose to maintain. Failure to maintain the required insurance may result in termination of this Agreement at Institution's option.

9.1.4 All policies shall name Institution as Additional Insured. On the certificate, the Institution shall be stated as: "State of Idaho and The Regents of the University of Idaho". Certificates shall be mailed to: University of Idaho, Risk Management, 875 Perimeter Drive MS2433, Moscow, ID 83844-2433.

9.1.5 Failure of Institution to demand such certificate or other evidence of full compliance with these insurance requirements or failure of Institution to identify a deficiency from evidence that is provided shall not be construed as a waiver of the obligation of Contractor and its subcontractor(s) of any tier to maintain such insurance.

9.1.6 No Representation of Coverage Adequacy. By requiring insurance herein, Institution does not represent that coverage and limits will necessarily be adequate to protect Contractor and its subcontractor(s) of any tier, and such coverage and limits shall not be deemed as a limitation on the liability of the Contractor and its subcontractor(s) of any tier under the indemnities granted to Institution in this Lease.

9.1.7 Contractor is responsible for coordinating the reporting of claims and for the following: (a) notifying the Institution in writing as soon as practicable after notice of an injury or a claim is received; (b) cooperating completely with Institution in the defense of such injury or claim; and (c) taking no steps (such as admission of liability) which will prejudice the defense or otherwise prevent the Institution from protecting its interests.

9.2 Required Insurance Coverage.

Contractor and its subcontractor(s) of any tier shall at its own expense obtain and maintain:

9.2.1 Commercial General and Umbrella / Excess Liability Insurance. Contractor and its subcontractor(s) of any tier shall maintain Commercial General Liability ("CGL") written on an occurrence basis and with a limit of not less than $1,000,000 each occurrence and in the aggregate. If such CGL insurance contains a general aggregate limit, it shall apply separately by location and shall not be less than $1,000,000. CGL insurance shall be written on standard ISO occurrence form (or a substitute form providing equivalent coverage) and shall cover liability arising from premises, operations, independent contractors, products-completed operations, personal injury and advertising injury, and liability assumed under a contract including the tort liability of another assumed in a business contract. Waiver of subrogation language shall be included. If necessary to provide the required limits, the Commercial General Liability policy's limits may be layered with a Commercial Umbrella or Excess Liability policy.

9.2.2 Commercial Auto Insurance. If applicable, Contractor and its subcontractor(s) of any tier shall maintain a Commercial Auto policy with a Combined Single Limit of not less than $1,000,000; Underinsured and Uninsured Motorists limit of not less than $1,000,000; Comprehensive; Collision; and a Medical Payments limit of not less than $10,000. Coverage shall include Non-Owned and Hired Car coverage. Waiver of subrogation language shall be included.

9.2.3 Personal property. If applicable, Contractor and its subcontractor(s) of any tier shall purchase insurance to cover personal property of Contractor and its subcontractor(s) of any tier. In no event shall Institution be liable for any damage to or loss of personal property sustained by Contractor, even if such loss is caused by the negligence of Institution, its employees, officers or agents. Waiver of subrogation language shall be included.

9.2.4 Workers' Compensation. Contractor and its subcontractor(s) of any tier shall maintain all coverage statutorily required of the Contractor and its subcontractor(s) of any tier, and coverage shall be in accordance with the laws of Idaho. Contractor and its subcontractor(s) of any tier shall maintain Employer's Liability with limits of not less than $100,000 / $500,000 / $100,000.

9.2.5 Professional Liability. If available generally to members of the professions of Contractor and its subcontractor(s) of any tier, Contractor and its subcontractor(s) of any tier shall maintain Professional Liability (Errors & Omissions) insurance on a claims made basis, covering claims made during the policy period and reported within three years of the date of occurrence. Limits of liability shall be not less than one million dollars ($1,000,000).

10.0 Attorneys' Fees

In the event of any controversy, claim or action being filed or instituted between the parties to this Agreement to enforce the terms and conditions of this Agreement or arising from the breach of any provision hereof, the prevailing party will be entitled to receive from the other party all costs, damages, and expenses, including reasonable attorneys' fees, incurred by the prevailing party, whether or not such controversy or claim is litigated or prosecuted to judgment. The prevailing party will be that party who was

awarded judgment as a result of trial or arbitration, or who receives a payment of money from the other party in settlement of claims asserted by that party.

11.0 Notice.

Any notice under this Agreement shall be in writing and be delivered in person or by public or private courier service (including U.S. Postal Service Express Mail) or certified mail with return receipt requested or by facsimile. All notices shall be addressed to the parties at the following addresses or at such other addresses as the parties may from time to time direct in writing:

the Institution:
Contracts and Purchasing Services
University of Idaho
875 Perimeter Drive MS 2006
Moscow, ID 83844-2006
Phone: (208) 885-6116
Fax: (208) 885-6060

With a copy to (University contact):

Julia McIlroy
University of Idaho
875 Perimeter Drive MS 2006
Moscow, ID 83843
Phone: (208) 885-6123
Email: juliam@uidaho.edu

the Contractor:
Jens Brown, Managing Director

Phone: 602-463-1555
Email: jensbrown@hcg.com

Any notice shall be deemed to have been given on the earlier of: (a) actual delivery or refusal to accept delivery, (b) the date of mailing by certified mail, or (c) the day facsimile delivery is verified. Actual notice, however and from whomever received, shall always be effective.

12.0 Entire Agreement; Modification.

This Agreement (and its attachments, if any) constitutes the entire understanding between the parties with respect to the subject matter hereof and may not be amended except by an agreement signed by Contractor and an authorized representative of Institution.

13.0 Severability.

The terms of this Agreement are severable such that if any term or provision is declared by a court of competent jurisdiction to be illegal, void, or unenforceable, the remainder of the provisions shall continue to be valid and enforceable.

14.0 Governing Law; Forum.

Any legal proceeding instituted between the parties shall be in the courts of the County of Latah, state of Idaho, and each of the parties agrees to submit to the jurisdiction of such courts. It is further agreed that this Agreement shall be governed by the laws of the State of Idaho as an agreement to be performed within the State of Idaho.

15.0 Paragraph Headings.

The paragraph headings in this Agreement are inserted for convenience only and shall not be construed to limit or modify the scope of any provision of this Agreement.

16.0 Non-Waiver.

The delay or failure of either party to exercise any of its rights under this Agreement for a breach thereof shall not be deemed to be a waiver of such rights, nor shall the same be deemed to be a waiver of any subsequent breach, either of the same provision or otherwise.

17.0 Assignment.

Contractor may not assign the rights or delegate the obligations under this Agreement without Institution's prior written consent.

18.0 Accounting; Audit.

For a period of three (3) years following completion of the services called for hereunder, Institution or its authorized representatives shall be afforded access at reasonable times to Contractor's accounting records relating to the services set forth herein in order to audit all charges for the services.

19.0 Nondiscrimination and Affirmative Action.

19.1 Contractor shall not discriminate against any employee or applicant for employment in the performance of this Agreement, with respect to tenure, terms, conditions or privileges of employment, or any matter directly or indirectly related to employment, because of race, sex, color, religion, age, status as Disabled or a veteran, or physical or mental handicaps, national origin or ancestry. Breach of this covenant is a material breach of this agreement. The Contractor certifies that it does not, and will not maintain segregated facilities or accommodations on the basis of race, color, religion or national origin. Regarding any position for which an employee or an applicant is

qualified, the Contractor agrees to take affirmative action to employ, train, advance in employment, and retain individuals in accordance with applicable laws and regulations including:

19.1.1 For nondiscrimination based on race, color, religion, sex or national origin this includes, but is not limited to, the U.S. Constitution, and Parts II and IV of Executive Order 11246, September 24, 1965 (30 FR 12319). Contractor disputes related to compliance with its obligations shall be handled according to the rules, regulations, and relevant orders of the Secretary of Labor (See 41 CFR 60-1.1).

19.1.2 For nondiscrimination based on Disabled or Vietnam Veterans this includes, but is not limited to, the Vietnam Era Veterans Readjustment Assistance Act of 1972, as amended (38 U.S.C. 4012)(the Act); Executive Order 11701, January 24, 1973 (38 CFR 2675, January 29, 1973); and the regulations of the Secretary of Labor (41 CFR Part 60-250).

19.1.3 For nondiscrimination based on the Handicapped this includes, but is not limited to, Section 503 of the Rehabilitation Act of 1973, as amended (29 U.S.C. 793)(the Act); Executive Order°11758, January 15, 1974; and the regulations of the Secretary of Labor (41 FR Part 60- 741).

19.1.4 For nondiscrimination based on Age this includes, but is not limited to, Executive Order 11141, February 12, 1964 (29 CFR 2477).

19.2 The Contractor shall include the terms of this clause in every subcontract or purchase order exceeding $50,000 and shall act as specified by the Department of Labor to enforce the terms and implement remedies.

20.0 Representations and Warranties.

Contractor represents and warrants the following: (a) that it is financially solvent, able to pay its debts as they mature, and possessed of sufficient working capital to provide the equipment and goods, complete the services, and perform its obligations hereunder; (b) that it is able to furnish any of the plant, tools, materials, supplies, equipment, and labor required to complete the services required hereunder and perform all of its obligations hereunder and has sufficient experience and competence to do so; (c) that it is authorized to do business in Idaho, properly licensed by all necessary governmental and public and quasi-public authorities having jurisdiction over it and the services, equipment, and goods required hereunder, and has or will obtain all licenses and permits required by law; and (d) that it has familiarized itself with the local conditions under which this agreement is to be performed.

21.0 Compliance with Rules, Regulations, and Instructions.

Contractor shall follow and comply with all rules and regulations of the Institution and the reasonable instructions of Institution personnel. The Institution reserves the right to require the removal of any worker it deems unsatisfactory for any reason. The duties and responsibilities required under this

agreement shall be performed in accordance with all local, state and federal law. Failure to perform these obligations in conformity with controlling law may be construed as breach.

Some provisions of this Agreement may not be applicable, and those sections do not need to be completed by the parties. Please see attached Exhibit C for a list of provisions that are specifically excluded from this Agreement and, therefore, have no legal force or effect on the parties signing this Agreement.

IN WITNESS WHEREOF, the authorized representatives of the parties have executed this Agreement:

Exhibit A
Scope of Work

Exhibit B

Request for Certificate of Insurance to be sent to University of Idaho
RETURN A COPY OF THESE INSTRUCTIONS WITH YOUR CERTIFICATE.
CERTIFICATE RECEIVED WITHOUT THIS SHEET WILL NOT BE APPROVED.

Contractor (Insured) is required to carry the types and limits of insurance shown in this Request, and to provide the University of Idaho with a Certificate of Insurance within 7 days of the signing of the contract.

- Certificate Holder shall read:
  State of Idaho and the Regents of the University of Idaho
  Attn: Risk Management
  875 Perimeter Drive MS 2433
  Moscow, ID 83844-2433

- Description area of certificate shall read: "Contracting Agreement with [Insert Named Insured]"
- All certificates shall provide for thirty (30) days' written notice to University prior to cancellation or material change of any insurance referred to therein.
- All insurers shall have a Best's rating of AV or better and be licensed and admitted in Idaho.
- All policies required shall be written as primary policies and not contributing to nor in excess of any coverage University may choose to maintain.
- All policies (except Workers Compensation and Professional Liability) shall name the following as an Additional Insured: The Regents of the University of Idaho, a public corporation, state educational institution, and a body politic and corporate organized and existing under the Constitution and laws of the state of Idaho.
- Failure of the University to demand a certificate or other evidence of full compliance with these insurance requirements or failure of Institution to identify a deficiency from evidence that is provided shall not be construed as a waiver of Contractor's obligation to maintain such insurance.
- Failure to maintain the required insurance may result in termination of this grant or contract at the Institution's option.
- By requiring this insurance, University does not represent that coverage and limits will necessarily be adequate to protect Contractor, and such coverage and limits shall not be deemed as a limitation on Contractor's liability under the terms of the grant or contract.
- A copy of this certificate request must be sent with the Certificate.

Required Insurance Coverage. Contractor shall obtain insurance of the types and in the amounts described below.

- Commercial General and Umbrella / Excess Liability Insurance. Contractor shall maintain Commercial General Liability ("CGL") written on an occurrence basis and with a limit of not less than $1,000,000 each occurrence and in the aggregate. If such CGL insurance contains a general aggregate limit, it shall apply separately by location and shall not be less than $1,000,000. CGL insurance shall be written on standard ISO occurrence form (or a substitute form providing equivalent coverage) and shall cover liability arising from premises, operations, independent contractors, products-completed operations, personal injury and advertising injury, and liability assumed under an Contractor contract including the tort liability of another assumed in a business contract. Waiver of subrogation language shall be included. If necessary to provide the required limits, the Commercial General Liability policy's limits may be layered with a Commercial Umbrella or Excess Liability policy.
- Commercial Auto Insurance. If applicable, Contractor shall maintain a Commercial Auto policy with a Combined Single Limit of not less than $1,000,000; Underinsured and Uninsured Motorists limit of not less than $1,000,000; Comprehensive; Collision; and a Medical Payments limit of not less than $10,000. Coverage shall include Non-Owned and Hired Car coverage. Waiver of subrogation language shall be included.
- Personal property. If applicable, Contractor shall purchase insurance to cover Contractor's personal property. In no event shall Institution be liable for any damage to or loss of personal property sustained by Contractor, even if such loss is caused by the negligence of University, its employees, officers or agents. Waiver of subrogation language shall be included.
- Workers' Compensation. Contractor shall maintain all coverage statutorily required of the Contractor, and coverage shall be in accordance with the laws of Idaho. Contractor shall maintain Employer's Liability with limits of not less than $100,000 / $500,000 / $100,000.
- Professional Liability. If available generally to members of the Contractor's profession, Contractor shall maintain Professional Liability (Errors & Omissions) insurance on a claims made basis, covering claims made during the policy period and reported within three years of the date of occurrence. Limits of liability shall be not less than one million dollars

($1,000,000).

HURON

July 23, 2021

Julia McIlroy
Director, Contracts & Purchasing Services
University of Idaho
Lead entity for the 'Idaho Higher Education Procurement Federation'

Dear Julia**:**

We are pleased to confirm, on behalf of Huron Consulting Services LLC ("Huron" or "we"), our engagement to provide University of Idaho ("Client", "you" or "University") with services related to the implementation of JAGGAER solutions for Contract Lifecycle Management, eProcurement and Accounts Payable automation. Huron understands that the University of Idaho is taking a lead role in representing the '*Idaho Higher Education Procurement Federation*' ("IHEPF" or "the Federation") and is coordinating with Boise State University, Idaho State University and Lewis & Clark State College for this substantial initiative that will **drive transformational** change.

Huron is fortunate to have meaningful experience with the Idaho State Board of Education, and a variety of projects with signature Higher Education institutions across Idaho over the past few years spanning operational improvement, sponsored research finances and technology initiatives. As **procurement practitioners and eprocurement innovators**, we understand the importance of your vision to invest in the best platform that delivers a unified procurement lifecycle, including contract management, requisition to payment, and data analytics. Using a single platform that is easy-to-use, flexible, and comprehensive will make procurement processes easier, guide better alignment with institutional nuances and provide a single suite that empowers your future goals to operate in a more 'system-oriented' fashion. **Simply put our goal is to ensure you have the capabilities you need today and the flexibility and innovation to embrace tomorrow.**

Huron as your **trusted advisor and solution implementer** will help steer, advise, design, and deliver the JAGGAER solution. Our approach to implementation emphasizes collaboration, agility, and speed to help you realize the full value from JAGGAER, inspire user adoption and maximize procurement transformation. Huron brings unmatched practical experience **implementing JAGGAER with over 75 complex organizations** and the precise implementation services to ensure a successful implementation. Huron is uniquely positioned to provide a proven methodology in support of your JAGGAER implementation. We believe the Federation and related Higher Education entities will benefit from our methodology and expertise, to include the following:

> ***Accelerated implementation.*** Our approach incorporates our existing templates to provide a "head start" when defining new business processes, solution design and advisory services to maximize value.
>
> ***Flexible.*** While our approach combines standard tools, templates, and activities to help streamline the project progress, it is designed to be customized to fit the unique situations and distinctive environments of the Federation and various universities and colleges.
>
> ***Improve compliance***. Huron's methodology helps you utilize JAGGAER Contract, Procurement and Accounts Payable tools for governance and process compliance. By giving users a better online invoice processing experience, adoption is encouraged, and invoices are driven to contracts and other compliance steps, ultimately realizing cost savings.
>
> ***Reduce risk.*** Huron's approach helps manage project risk by identifying the critical tasks along with the associated skill requirements at the initiation of a project, applying appropriate governance and controls to guide the project, and identifying and establishing risk mitigation plans throughout the lifecycle of the project.

As your partner, we are honored to help with your transformation efforts. If you have questions related to any aspect of this engagement, please contact me.

Sincerely,

Jens Brown
Managing Director, Huron Consulting Group

Objectives and Scope

Our Understanding of Your Needs

We understand that the University of Idaho, as the lead entity for Idaho Higher Education Foundation, desires a statement of work for professional services to implement JAGGAER for contract lifecycle management, eprocurement and accounts payable automation. The scope and pricing information provided herein should be understood to be directionally correct and is subject to refinement as additional information and scope areas are identified. We understand some of the immediate goals for this project include:

- Define an overall project governance structure and high-level project timeline for the Procurement technology implementation based on IHEPF's current state and future objectives.
- Improve compliance to policies and controls while also enabling efficiencies through automation.
- Enable the sharing of contract agreements across entities and potentially with other state Higher Education entities.
- Identify cost savings through process improvements and transparency of spend.
- Improve the user experience for procurement and accounts payable related activities.
- Ensure industry leading practices are used to expedite the implementation and provide the anticipated value for the eProcurement and Contracts+ solutions.
- Facilitate consistent contract workflow, process transparency and e-signature.
- Improve university requisition and invoice processing with a unified, self-service solution covering all procurement and payment types.

Some Phase 1 Implementation Planning activities are addressed and initiated in the Phase 1 Implementation Services statement of work, the scope of this SOW is the remaining Phase 1 items and Phase 2 through 4 activities.

Huron Scope and Role

Huron is flexible in our potential role supporting this engagement. The role of your resources and ours should be further defined as part of scoping out this project, however we can recommend two flavors of implementation services 'Option 1: Planning, Project Advisory, Solution Configuration' and 'Option 2: Full-Service Implementation'. In summary:

Option 1: Planning, Project Advisory, Solution Configuration
▪ This option relies upon a heavy initial effort by Huron for planning, but transitions to a **Client-led project management mode**l and depends on the client to drive the process forward. During implementation **Huron provides part-time** project advisory services to the client Project Manager including regular status reports, performs the solution configuration, develops the JAGGAER interfaces with your ERP, and helps to prepare and support testing, and other activities to support readiness for go-live. After go-live Huron supports your ongoing deployment, for four months in a part-time fashion. ▪ In this model the client has a heavy responsibility to drive the project forward, confirm business decisions, and otherwise be the key project manager. ▪ Client is responsible for complete ERP technical integration development responsibilities. Huron perform the JAGGAER-side of all ERP integrations.

© 2021 Huron Consulting Group Inc. and affiliates. All Rights Reserved.

Option 2: Full-Service Implementation (This SOW)
▪ This option is a more classical approach whereas **Huron is the overall project manager throughout**, liaising with the **client in a more shared governance** fashion. Huron drives the project forward and directs the assignment of project tasks to client staff and stakeholders, performs the solution configuration, provide technical interfaces design advisory, leads, and performs testing and post-production support. ▪ This has the benefit of removing a heavy PM load from the client and relies less upon client staff for day-in-the-life project tasks and preparedness for key workstreams like testing, training, and production readiness. ▪ In this model, the Huron PM is a near full-time resource for the duration of the 16-month project, with increased level of support for key Huron roles including the Solution Consultant and Technical Consultant. Additionally, a near full-time Change Management, Training and Testing Readiness resources are provided, further augmenting the overall team, and reducing the resources needed from the client team to accomplish these tasks. ▪ After go-live Huron supports your ongoing deployment, for four months in a part-time fashion. ▪ Client is responsible for complete ERP technical integration development responsibilities. Huron perform the JAGGAER-side of all ERP integrations.

Project Approach

Huron will serve in part time leadership role for the initial planning activities, followed by advisory and subject matter expert roles during implementation, performing the configuration of JAGGAER and providing guidance and support to the client business and technical teams and campus stakeholders. To accomplish the goals of this workstream, Huron recommends the following staged approach for the JAGGAER Implementation:

PHASE 1: IMPLEMENTATION PLANNING

The aim of Huron's Implementation planning services is to develop and define key business process and identify pertinent decision points to inform the solution design changes, re-configuration and system-wide deployment. Areas of focus will include tying the project activities to your overall project governance structure, creating, and validating the actionable project plan, developing relevant business process designs, as well as understanding and identifying the approach for configuration, integration, testing, organization readiness and preparation for deployment. Huron's role is to start the process in making

© 2021 Huron Consulting Group Inc. and affiliates. All Rights Reserved.

this a transformational effort, in terms of re-thinking your business processes to get the most value from the JAGGAER solution.

Huron will facilitate implementation planning sessions in month one, prior to starting implementation activities. The focus of activities will be to discuss, distinguish and document the configuration of Jaggaer to support existing and common practices, and align business requirements and change management considerations. A summary of roles and responsibilities for planning are noted below – the details of Lead, Advise and Support will be developed further during the planning process for this and subsequent activities:

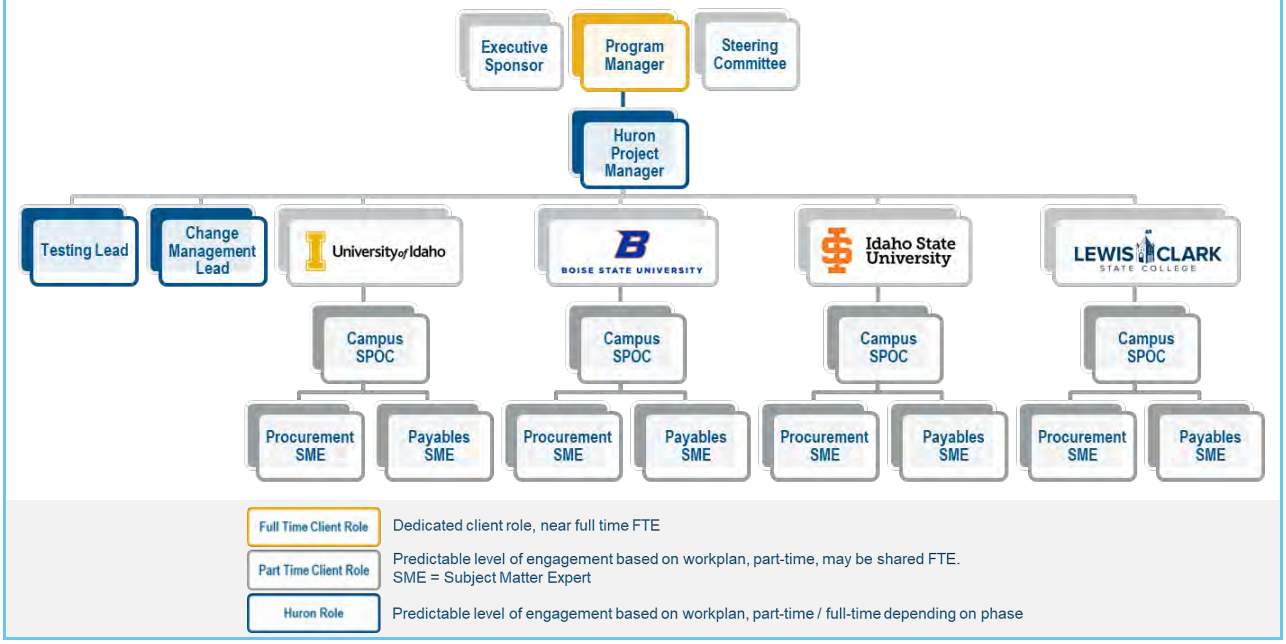
Activities, Roles and Responsibilities	Client	Huron
Establish program governance structure with Procurement, Finance, General Counsel, IT, Sponsored Research and other stakeholders	Lead	Support
Conduct project kickoff planning session with team members to review project schedule and management ("Project Kickoff Meeting").	Support	Lead
Review and Demonstrate JAGGAER functionality	Support	Lead
Facilitate question and answer sessions regarding JAGGAER capabilities.	Support	Advise
Provide (i) Gantt chart of project showing detailed timeline and activities ("Project Plan") and (ii) and an implementation workbook to document your business processes and decisions, including a listing of the overall deployment tasks such as change management, training, testing needs and deployment activities.	Support	Lead
Develop and define the governance model between the State Board, IHEPF and the respective campus, with the goal of defining an overall Project Manager, and Campus SPOCs to drive the tasks for each institution's involvement.	Advise	Lead
Create and maintain configuration design document. Provisions and commentary to be included to highlight potential impact areas for future phase initiatives.	Support	Lead
Conduct configuration checkpoint after design is finalized.	Support	Lead
Finalize and socialize the project plan with Client leadership and campus stakeholders	Advise	Lead

Project Governance Structure [Part of Phase 1 SOW]

Huron will assist with determining the overall project governance, with clear responsibilities outlined for business decisions and issue resolution. One of the goals will be to secure executive, key stakeholder, and Information Technology services support. We will also work with you to finalize the agreement on and development of necessary project management tools that will be used in support of the initiative. Huron will play an active role in executive steering committee meetings, with the monthly steering committee meetings intended to provide a status update on project timeline, recent activities, key decisions, and an opportunity to reflect on mitigating project risks with project sponsors. Huron also envisions specific monthly meetings to provide a gate-check with executive leadership as an approval to proceed to the next phase of the project.

Develop High-Level Project Plan [Part of Phase 1 SOW]

Huron will develop an initial, high level project plan for the Implementation and Deployment phase of the JAGGAER solutions. This will be comprehensive listing of the overall deployment tasks such as change management, training, conversion strategy, testing needs and deployment activities. At the conclusion of this activity, Huron will partner with the designated client Project Manager and entity Workstream leads to execute against plan.



© 2021 Huron Consulting Group Inc. and affiliates. All Rights Reserved.

Develop Resource Plan [Part of Phase 1 SOW]

As part of the initial planning effort Huron will further refine the expectations for your resources required for the implementation team, including the estimated effort and duration for Campus Single Points of Contact and business and technical subject matter experts that may be needed for the project. In addition, the resource plan will provide an estimate of the time commitment required to fulfill each role in both the short and long term.

A representative view of the functional project structure is included below – this is based on the principle of a core Huron Project Manager reporting to your Program Manager, Executive Sponsor and Steering Committee. Likewise, each University / State College will have a designated Campus Single Point of Contact (herein 'SPOC') who is responsible for ensuring business decisions and risk are adequately managed and will take the local lead on ensuring implementation success for their institution. Each SPOC is supported by Subject Matter Experts ("SMEs") for Procurement, Payables and Contracting. A separate project structure reflecting technical work is included in Appendix B: Representative Project, page 25.

Functional Project Structure - Representative

To ensure robust solution ownership, Huron will also develop a detailed Responsibility Assignment Matrix (e.g., RACI model) for all project team members and those who will be designated to administer the system going forward. This deliverable is an example of our focus to ensure your staff have role clarity and establish an accountable process to support effective program governance.

Business Process Discussions / Workshops

Huron will facilitate business process workshops during the planning phase to assist with initial decisions regarding future state business processes and to identify concerns or barriers with respect to those open decisions. Huron will perform a review of topic areas throughout the planning process with the dual purpose of (1) identifying risks associated with the project prior to implementation and (2) surfacing key business decisions that the organization will need to make throughout the implementation process and in advance of the design and configuration efforts.

© 2021 Huron Consulting Group Inc. and affiliates. All Rights Reserved.

Business Process Examples	
▪ Security and Application Management	▪ Supplier Management
▪ Purchase Requisitions (PR)	▪ Complex Services, Contract and Capex Ordering
▪ Approval Workflow	▪ Contract Requests
▪ Shopping w/ Forms (Non-catalog Items & Services)	▪ Contract Creation and Authoring and Compliance
▪ Shopping w/ Forms Internal Requests	▪ Contract Obligation and Performance Management
▪ Shopping from Hosted and Punchout Catalogs	▪ PO Invoice Creation
▪ Custom Fields / Accounting Information	▪ Non-PO / External Invoices
▪ Budget Check / FOAP / PR Validation	▪ AP Processing / Invoice Entry / Invoice flow
▪ PO Dispatch	▪ Imaging
▪ Change Orders	▪ Invoice Workflow / Match Exceptions
▪ Non-PO Payment Requests	▪ Credit Memos
▪ Receiving	▪ Payment Status

Data & ERP Readiness Examples	
▪ Shipping Addresses / Billing Addresses	▪ Vendors (i.e. types, records, structure)
▪ Units of Measure	▪ User profiles (i.e. format, workflow implications)
▪ Commodity Codes (i.e. standards, mapping)	▪ Integration methodology / standards
▪ ERP Application Changes	▪ Statewide ERP System Considerations

Change Management and Communication Plan

The purpose of this component is to provide the major elements of change necessary to be managed as part of the implementation of the JAGGAER solution. Recommendations of effective ways to increase awareness of the solution and buy-in of solution users will be provided to identify the optimal methods of providing improvement updates and general awareness. The change management plan will also include recommendations for effective training approaches that are reflective of other successful JAGGAER deployments at organizations of similar size and complexity. In addition, Huron will lead regularly scheduled (often every six weeks) User Group review meetings to facilitate stakeholder buy-in of the implementation effort.

Phase 1 Planning Deliverable

Huron will present the final Phase 1 Planning documents to the Project Manager upon the conclusion of this phase of the engagement, comprised of an *Implementation Planning* document, which includes the following components:

- High level implementation plan, including a resource plan, project team organizational chart and designated roles
- Business process discovery matrix
- High level integration approach
- High level change management and communication plan
- Buying and paying classification matrix (template)

© 2021 Huron Consulting Group Inc. and affiliates. All Rights Reserved.

- Key Business Processes and Workflow
- Supplier Strategy and Enablement Plan

As informed by the Phase 1 Planning effort, if this is deemed unlikely, adjustments to timeline will be identified in Phase 1 and maybe subject to change in scope of services.

PHASE 2: DESIGN AND CONFIGURATION

Project Advisory Services

For the entirety of Phase 2 and Phase 3, Huron will provide an experienced Project Manager in a near full-time capacity throughout the JAGGAER solution implementation along with best practices guidance. Designated Client individuals are expected to be the overall Program Manager, Executive Sponsor(s), and Campus Single Points of Contact (SPOCs) respectively.

This option is a more classical approach whereas Huron is the overall project manager throughout, liaising with your leadership in a shared governance fashion. Huron drives the project forward and directs the assignment of project tasks to client staff and stakeholders, performs the solution configuration, provide technical interfaces design advisory, leads, and performs testing and post-production support.

The benefit of this approach is mitigating a heavy Project Management load from the client and rely less upon client staff for day-in-the-life project tasks and preparedness for key workstreams like testing, training, and production readiness.

Huron will specifically provide project management and advisory services, including:

- Providing remote advisory services throughout the entire project, including best practices advisory on all configurations based on Huron's extensive experience implementing JAGGAER modules across numerous clients.
- Contribute to solution design, configuration, and integration work sessions.
- Identifying opportunities to normalize business processes organizational units (if applicable).
- Working with client Program Manager to create a deployment planning, outreach and communication with Contract Management, General Counsel, Finance & Administration, and other key departments and organization stakeholders.
- Working with the client team members to craft a communication strategy to disseminate information about the initiative to the departments and draft PowerPoint presentations and communications.
- Engaging with the Client Program Manager to create weekly the JAGGAER Solution project status report including the following attributes / data:
    - Original planned date and current planned date for all major deliverables and milestones
    - Financial update: Budget, dollars spent, estimate to complete, estimate at completion.
    - Identified risks / issues / decisions made/required.
- Playing an active role in executive committee meetings, user group reviews, status reporting, scope management, and issue escalation.
- Outline critical path project action items to support deployment planning and execution.

© 2021 Huron Consulting Group Inc. and affiliates. All Rights Reserved.

Business Process Design

Huron will facilitate functional and technical discussions with planned cadence to identify key decisions, define application field and page changes, master data sources, workflow needs, user roles and responsibilities, project settings, business processes requirements and other solution configuration options. Huron will document all finalized configuration decisions in a configuration tracker. Huron will work with your leadership and identified stakeholders as needed to jointly finalize all configuration design decisions.

We understand the operating principle from the Board and 'Idaho Higher Education Procurement Federation' is to build the solution to focus on areas of 'systemness' and commonality. Accordingly, in all cases the Board, Federation and each University / College will actively seek to align to a common design and business processes for requisition workflow, contract request workflow, sponsored research review / approval activities, PO and Non-PO business processes, receiving and invoice matching rules.

A summary of roles and responsibilities for design and configuration are noted below:

Activities, Roles and Responsibilities	Client	Huron
Design		
Using Huron best practices and input as a starting point, develop plan for how replace your existing business processes.	Support	Lead
Using Huron best practices and input as a starting point, develop plan for how the JAGGAER Applications will be rolled out to your users and Individuals	Lead	Advise
Provide Initial Configuration based on institution feedback regarding business processes	Support	Lead
Configuration		
Review existing configuration with your team, review best practices configuration options and obtain Client feedback on its business process and how the Initial Configuration should be adjusted to best match your business processes ("Configuration Workshop"). Huron intends to be tightly aligned your designated Jaggaer System Administrator for most configuration activities.	Support	Lead
Provide a best practices validation test plan and testing guide, which Client may supplement with additional test scenarios, based on additional feedback and support from Huron.	Support	Lead
Conduct series of iterative working sessions to: (1) continue to adjust configurations to best meet your business processes need and (2) train your System Administrator(s) on how to configure the JAGGAER Applications, so that Client may continue to adjust configurations as needed based on its organizational and users' needs ("Configuration Sessions"). Conduct remotely via Huron Zoom meeting, twice a week for two (2) hours, for maximum of fourteen (14) weeks.	Support	Lead
Configure JAGGAER Application in test environment, based on Configuration Workshop and Configuration Sessions. To support collaboration and knowledge transfer, Huron will work jointing with the Jaggaer System Administrator to recap the revised configuration.	Support	Lead
Load sample of your data into the JAGGAER Applications in the test environment.	Support	Lead
Provide your team detailed walk through of newly configured JAGGAER Applications.	Support	Lead
Revise and Finalize configuration design document which you may continue to rely on as guide during both implementation and production to understand configuration decisions.	Support	Lead

© 2021 Huron Consulting Group Inc. and affiliates. All Rights Reserved.

Supplier Enablement

Huron will collaborate with you to assess the existing supplier base and how goods and services are procured. The outcome is a strategy for enabling your key suppliers within the JAGGAER eProcurement solution and supplier community. The enablement strategy will include the optimal way to procure goods and services from suppliers, such as punch-out versus hosted catalog, and inform the optimal mix of suppliers within the marketplace as well as the settlement approaches most beneficial to the institutions.

Huron will assist with the enablement of suppliers targeted for inclusion in the JAGGAER marketplace. Areas of focus include:

Activities, Roles and Responsibilities	Client	Huron
Supplier Enablement		
Work with JAGGAER representatives to schedule and conduct enablement calls with target suppliers	Support	Lead
If desired, act as your representative on initial supplier enablement calls and communicate business requirements to representatives of the supplier's team	Lead	Support
Develop a comprehensive plan for supplier enablement testing	Support	Lead
Execute supplier enablement test scenarios	Support	Lead
Work with the supplier's enablement teams to remediate identified issues	Support	Lead
Track and report testing progress	Support	Lead

Policy Recommendations

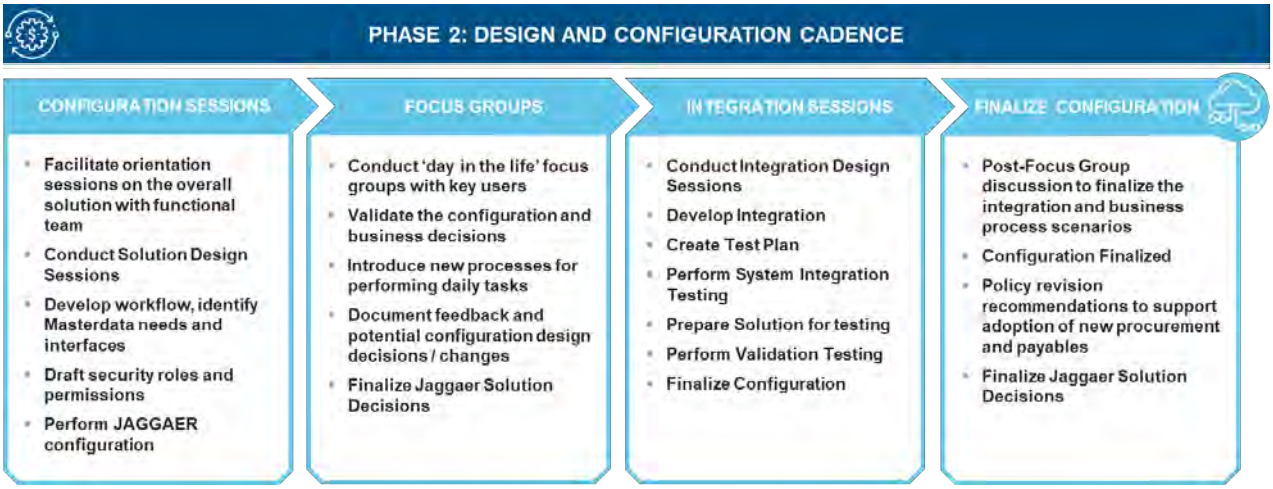
Huron will provide recommendations on policy revisions needed to support the adoption of procure-to-pay best practices as well as the decisions made during the design of the JAGGAER eProcurement system.

Develop Contracts Conversion Strategy

Realizing that you may have existing contracts that must be migrated to the new solution, Huron will develop a detailed conversion strategy to manage the build of the new Contracts+ solution. During our Design Phase, Huron will validate our initial plan with your Contract stakeholders to secure alignment on project scope, migration, rollout, and change management.

Huron will provide your Contract stakeholders with detailed contract data collection materials that cover the specific contract Masterdata collection (an excel template) and the convention that digital version of contracts must adhere. The respective entities are responsible for conducting the collection, formatting, and validation of this data prior to conversion into JAGGAER Contracts+.

Once you are ready for go-live we propose a slow controlled phased by converting existing agreements first, the expanding to core groups including OGC, Procurement and other areas as identified. This will ensure that changes are applied correctly and change management process are in place to properly train users on the reimplementation.



Prepare Draft Deployment Plan

Huron will work with the Program Manager, campus Workstream Leads and the project team to assist in developing a comprehensive plan for deployment. The plan will be based on several factors, such as the departments included in the rollout, other current initiatives, or activities, and/or the benefits of a pilot release.

© 2021 Huron Consulting Group Inc. and affiliates. All Rights Reserved.

Perform Functional Build and Configuration Scope

Huron will provide subject matter advisory to your resources leading the functional and technical development of the solution. Based on Huron experience with similar implementations, tasks for this work include execution of solution configuration of end-to-end contract lifecycle management and Eprocurement solutions, design and configuration of contracts and policy workflow, development of data synchronization and interfaces, and configuration of security roles and permissions. This has been a proven model for driving collaboration and accountability for the overall implementation effort and the cadence of design and configuration is reflected below:

Configuration Scope

This configuration aspect of this project is estimated for a duration of up to twelve (12) months from the mutually agreed upon start date of the Project (the "Project Kickoff Date") to the Transition to JAGGAER Customer Support. Phase 2 includes implementation of the following JAGGAER products: eProcurement, Invoicing, and Contracts+.

Services for the following JAGGAER Applications and business processes are included in this Project:

- JAGGAER eProcurement: shopping, forms, approvals, and PO distribution, eProcurement contract compliance
- Supplier enablement activities will be coordinated and led by the JAGGAER Enablement team (not Huron) with key client staff being involved for vetting and approval of designated suppliers and desired catalog / punchout content.
- JAGGAER eInvoicing: receiving, invoicing, and workflow.
- JAGGAER Contracts+: request, request workflow, contract authoring, repository, and reporting

JAGGAER eProcurement Configuration Scope Details

Overall User Management	
Users	Perform a one-time load of users in Client's Production site and a subset in Client's Test site.
User Roles	Configure up to twenty-five (25) new roles related to eProcurement, content management, and eInvoicing (Accounts Payable) activities envisioned. Informed by other implementations, below are the planned roles. System Administrators for each instance will the ability to setup additional roles over time to meet additional business needs. The following are potential roles give the modules and processes envisioned for by the Client:

© 2021 Huron Consulting Group Inc. and affiliates. All Rights Reserved.

Overall User Management	
	1. Shopper 2. Requisitioner 3. Approver 4. Buyer / Professional Purchasing 5. Contract Admin 6. Contract Manager 7. Catalog Admin 8. Catalog Manager 9. Invoice Entry 10. Invoice Exception Processor 11. Invoice Approver 12. AP Manager 13. Payment Specialist 14. System Admin 15. ePro Administrator 16. AP Administrator

Shopping	
Shopping	Configure the solution to enable shopping for goods (catalog, punchout, non-catalog items) and services (via forms) including configuration of the Purchasing Showcase dashboard.
Branding	Configure initial site branding including color theme, client logo, site name, Login URL, and organization message.
General Settings	Configure general application and shopping settings.
Procurement Forms	Configure up to eight (8) custom forms and educate Client on process, options, and permissions needed to create additional forms. Forms will be developed to be as common as possible across instances – insofar as each University / State College will work towards a common set of information for forms.

Requisition Approvals	
Approvals	Configure the solution to enable purchase requisition and purchase order approval and notification processing through workflow.
Workflow	Configure up to fifteen (15) workflow steps associated with requisition approvals and educate customer how to manage approval updates. The workflow steps can have subordinated settings that trigger intervention / approval / notification steps based on 'several 'dimensions'.
Purchasing Documents	Configure the solutions Purchase Requisition document (e.g. the fields and general layout of the user entry pages) to support Client requirements.

Order Delivery	
Approvals	Configure the solution to enable purchase requisition and purchase order approval and notification processing through workflow.
Workflow	Configure up to fifteen (15) workflow steps associated with requisition approvals and educate customer how to manage approval updates. The workflow steps can have subordinated settings that trigger intervention / approval / notification steps based on 'several 'dimensions'.
Purchasing Documents	Configure the solutions Purchase Requisition document (e.g. the fields and general layout of the user entry pages) to support Client requirements.

Order Delivery	
Approvals	Configure the solution to enable purchase requisition and purchase order approval and notification processing through workflow.
Workflow	Configure up to fifteen (15) workflow steps associated with requisition approvals and educate customer how to manage approval updates. The workflow steps can have subordinated settings that trigger intervention / approval / notification steps based on 'several 'dimensions'.

© 2021 Huron Consulting Group Inc. and affiliates. All Rights Reserved.

Order Delivery	
Purchasing Documents	Configure the solutions Purchase Requisition document (e.g. the fields and general layout of the user entry pages) to support Client requirements.

Master Data Load	
Suppliers	Perform a one-time load of suppliers in the Jaggaer spreadsheet import format into Client's Production site and a subset in Client's Test site. This task will be performed in conjunction with the decision of the Supplier Management project.
Account Codes	Perform a one-time load of account codes in Client's Production site and a subset in Client's Test site.
Commodity Codes	Hosted and punchout catalogs are based on UNSPSC code set and as part of setting up the commodity codes there will be a 'mapping exercise' to roll-up the granular UNSPSC codes to more meaningful Commodity Codes. This will result in performing a one-time load up to 1,500 commodity codes in Client's Production site and a subset in Client's Test site.
Contracts	Provide the data load format and Contract header data template will be provided by Huron to the Client for completion. Perform a one-time load up to 1,500 contracts in Client's Production site and a subset in Client's Test site.

JAGGAER Contracts+ Configuration Scope Details

Activities, Roles and Responsibilities	
CONTRACT REQUEST	
Contract Request	HURON to configure up to two (2) contract request template and a reasonable number of contract request workflow notification/approval steps to satisfy common and exception scenarios.
Request Workflow	HURON to configure up to ten (10) notification/approval steps, using Advanced Dynamic Workflow if applicable.
REPOSITORY	
Contract Entities	HURON to configure up to ten (10) contract types and fifteen (15) work groups.
Users	HURON will perform a one-time load of users in Client's Production site and a subset in Client's Test site.
Legacy Contracts	HURON will perform an iterative load of up to 5,000 contracts in Clients' Production site and a subset in Client's Test site. Client will collaborate with HURON to resolve load errors. Client is solely responsible for populating the Contracts load template and denoting any Attachments.
Attachments	HURON will perform a one-time load up to 5,000 contract attachments (e.g., original contract document, PDF) in Client's Production site and a subset in Client's Test site. Client is solely responsible for preparing contract Attachments prior to load.
AUTHORING	
Clause Libraries	HURON to configure one (1) clause library with up to fifteen (15) clauses.
Alternative Clause Language	HURON will configure in English and will configure up to twenty (20) custom / alternative clauses.
Templates	HURON to configure up to ten (10) simple (static) templates up to twenty (20) pages in length each. Configuration to include creating the template header record, uploading the MS Word document and inserting document placeholders.

© 2021 Huron Consulting Group Inc. and affiliates. All Rights Reserved.

Activities, Roles and Responsibilities	
Contract Workflow	HURON to configure up to ten (10) notification/approval steps, using Advanced Dynamic Workflow if applicable.

Contract Compliance Tracker	
Contract Compliance	Configure the solution to enable contract compliance functionality.
General Settings	Work with Client to configure contract shopping settings.
Contract Item Import	Configure the solution and user roles to enable item import and item attributes.

JAGGAER Accounts Payable Configuration Scope Details

For the application and applicable add-on(s) referenced in the JAGGAER order form, Huron will perform configurations and provide guidance to Client on best practice configurations per the scope detailed below.

Master Data Load	
Suppliers	Perform a one-time load of suppliers in the Jaggaer spreadsheet import format into Client's Production site and a subset in Client's Test site.
Account Codes	Perform a one-time load of account codes in Client's Production site and a subset in Client's Test site.

Invoice Creation	
Invoicing	Configure the Solution to enable non-PO invoice creation (if applicable), both manually and electronically via the Supplier Portal.
General Settings	Configure general invoicing settings to support Client requirements
Custom Fields	Configure up to five (5) custom fields on Invoice document.
Invoice document layout	Configure the solutions invoice document (e.g., the fields and general layout of the user entry pages).
Credit Memo document layout	Configure credit memo document (e.g., the fields and general layout of the user entry pages).

Invoice Matching and Approvals	
General Settings	Configure general invoice approvals and general matching settings to support Client requirements.
Matching and Tolerances	Configure Advanced Dynamic Matching (ADM) for up to five (5) matching rules and educate Client on managing and updating ADM settings/rules. There are parameters used to set matching tolerances such as receipt quantity over/under PO, Receipt cost over/under PO, Invoice Quantity over/under PO/receipt Qty, Invoice Unit Price over/under, Invoice extended price over/under, etc. This is configurable within the tolerance parameters. Some examples of matching rules include: ▪ 2 Way Matching ▪ 2 Way Matching Over $50 ▪ 3 way for Cost Receiving Only orders ▪ 3 way over $XXX within $XX or XX% ▪ Exact Match for Enabled Vendors over $XX ▪ Non-PO Invoice
Invoice Workflow	Configure up to fifteen (15) workflow/review steps associated with invoice workflow. Educate customer on workflow configuration is used to manage approval updates.

© 2021 Huron Consulting Group Inc. and affiliates. All Rights Reserved.

Invoice Approvals	
General Settings	Configure general invoice approvals and general matching settings to support Client requirements.
Invoice Workflow	Configure up to five (5) workflow/review steps associated with invoice workflow. Educate customer on workflow configuration is used to manage approval updates.

Non-PO Invoice Process and Approvals	
Updates to Invoice document layout	Configure invoice document to support Client non-po invoice requirements.
Updates to Credit Memo document layout	Configure credit memo document to support Client non-po credit memo requirements.

Jaggaer Environments

Huron will deliver and configure a test (UIT) environment to test the configurations and integrations selected by the University and train users and a production (PROD) environment for the University to conduct production transactions. Huron will also enable all integrations in both the test and production environments. The environments will be configured uniformly, and the integration messages and formats will be identical. These environments shall be available for your use including development, system integration testing, configuration testing and training. You will continue to have access to the test and production environments after completion of the Services and during the term of your agreement with JAGGAER.

PHASE 3: INTEGRATION & VALIDATION

Integration

Integration Design Support

Huron will work with the IT organization at each campus, in a collective fashion, to understand the integration requirements of your financial solution including:

- Facilitate discussions on Banner IFEP, Oracle Cloud and Colleague integration points and approach to support procurement, payables, reporting and related transactions.
- Support design of user import and accounting chart field data
- Support design and provide configuration advisory for the Jaggaer Solution integrations with Banner IFEP, Oracle Cloud and Colleague, including suppliers, user sync/import, budget validation, and purchase order and invoice transactions.

JAGGAER Integrations

Huron will collaborate with your resources on the design of interfaces with an expectation that you have appropriate integration resources assigned. JAGGAER will be integrated with your ERP systems in a variety of methods depending on the ERP.

This includes outlining the integration specifications required based on the requisite system interfaces. Your ERP configuration team will continue with those activities and Huron resources would provide advisory based on our experience with institutions implementing the same model. We also recognize that the State is implementing a system for state agencies called LUMA which may be fed information from the four institutional ERP systems, however we understand no integration between JAGGAER and LUMA is planned at this time.

© 2021 Huron Consulting Group Inc. and affiliates. All Rights Reserved.

Activities, Roles and Responsibilities	Client	Huron
JAGGAER Integration		
Integration design activities including optimal integrations and real time interfaces	Advise	Lead
Partner with HURON technical consultant to accomplish integration	Lead	Support

Jaggaer Integrations

- Single Sign-on (SSO) via LDAP, Active Directory, Login XML, SAML etc.
- 'Jaggaer Standard Integrations' for Supplier Import, Custom field import, invoice export, and invoice status import integration point.
- Ellucian Banner IFEP eProcurement and eInvoice interfaces

Planned Integration Points and Methods

Integration	*Banner IFEP* [1]	*Oracle Cloud* [2]	*Colleague* [3]
Single Sign-on (SSO)	CAS, SAML, LDAP, LoginXML	CAS, SAML, LDAP, LoginXML	CAS, SAML, LDAP, LoginXML
User Import	XML, Flat File (CSV)	XML, Flat File (CSV)	XML, Flat File (CSV)
Account Codes / Custom Field Import	IFEP Included	JAGGAER Standard XML	JAGGAER Standard XML
Supplier Import	IFEP Included	JAGGAER Standard XML	JAGGAER Standard XML
PR Validation	IFEP Included	JAGGAER Standard XML	JAGGAER Standard XML
PO Export	IFEP Included	JAGGAER Standard XML	JAGGAER Standard XML
Invoice Export	eInvoice Adapter	JAGGAER Standard XML	JAGGAER Standard XML
Payment Status	JAGGAER Standard XML	JAGGAER Standard XML	JAGGAER Standard XML

Planned Integration Points and Methods / Assumptions

- Banner will require separate IFEP license to accomplish integration for eProcurement.
- Integration Services may be used to translate into client formats, or the Client can review the files as posted/messaged and process via local integration methods.

[1] **Banner** integration is using Banner IFEP and Banner eInvoice adapter (not Banner ETHOS), along with Banner integration tools for User Import and Payment Status.

[2] **Oracle Cloud** integration is based on OC configured to consume/produce standard XML messages.

[3] **Colleague** integration is based on use of Colleague integration tools + standard Jaggaer XML messages.

Testing

Testing Approach and Workplan

Huron will support the development of a comprehensive test plan that addresses all three phases of testing – supplier enablement testing, system testing (i.e. validation testing), and user testing. Huron will support the organization in coordinating system test efforts including establishing a testing workplan to outline testing and user acceptance resources and participation commitments.

Testing Support

Based on the business process inventory, Huron will develop test scenarios based on Client business needs, exception scenarios, and other test needs leveraging Huron's templates and comprehensive test

© 2021 Huron Consulting Group Inc. and affiliates. All Rights Reserved.

scenarios from other implementation examples. Huron will conduct a hand-off meeting with the Campus Workstream leads and the Project Manager testing stakeholders to vet and hand-off test scenarios for continued ownership by you.

Once the design has been finalized, Huron will assist part-time with providing advisory services to support the client development of a test plan and approach. Huron will also assist in testing prioritization and troubleshooting identified issues.

Test Execution

Huron will develop test scenarios based on identified business needs, exception scenarios, and other test needs leveraging Huron's templates and comprehensive test scenarios from other implementations. You are responsible for organizing and performing all tests, reporting on results and capturing testing issues.

Huron will conduct a hand-off meeting with key client testing stakeholders to vet and hand-off test scenarios ownership. Huron will manage / coordinate lead testing efforts.

A summary of roles and responsibilities to provide solution testing and validation are noted below:

Activities, Roles and Responsibilities	Client	Huron
Testing and Solution Validation		
Define the test plan and approach	Advise	Lead
Document end to end Contracts+ test scenarios	Support	Lead
Kick-off testing and solution validation	Support	Lead
Weekly execution of test plan	Support	Lead
Prioritize and troubleshoot issues	Support	Lead
Communicate issues to Huron for resolution	Lead	Support
Solution validation checkpoint after testing is completed and all critical issues addressed	Lead	Support
Validation Phase		
Kick off CLIENT's user validation testing of the configurations chosen by Client to best match your business processes ("Validation Testing")	Support	Lead
Finalize the Validation Testing plan with the specific workflows and integrations from the Configuration Design Document, so that Client may fully validate that the configurations best match Client's business processes	Support	Lead
Execution of Validation Testing	Support	Lead
Align JAGGAER Applications migration action items (test to production) with Client migration methodology	Support	Lead
Finalize plan to roll out JAGGAER Applications to Client's users	Support	Lead
Migrate the JAGGAER Applications configured for Client into a production environment	Support	Lead

Change Management and Communication

The purpose of this component is to define the appropriate frequency, methods, content, and style of messages to the internal/external constituents at each institution. An analysis of effective ways to penetrate the awareness of Campus users will be conducted to identify the optimal methods of providing project and solution introduction and updates.

Curriculum Development and Training

Huron will work with your team to confirm the deployment training approach and finalize the scope. Huron will validate the training modality and materials and will then develop materials based on your approved material inventory list. The institutions and Huron will undertake a review process of developed materials and perform content revisions. In preparation for go-live, Huron will deliver pilot training and then support your training staff. A summary of roles and responsibilities for this stage are noted below:

Curriculum Development and Training (Optional)	Client	Huron
Scope Audience(s), Roles and Volume		
Confirm the audience(s) for training	Support	Lead
Validate Modality and Materials		
Develop a list of all materials (curriculum inventory) and specify the methods for content delivery	Support	Lead
Instructional Design / Develop Materials		
Prioritize materials needed for 'day one' business use, including Develop JAGGAER tutorials, reference guides, JAGGAER Adopt, and other support material required to assist end users in their transition to the JAGGAER solution.	Support	Lead / Perform
Develop materials and give your resources time to review materials and likewise Huron enough turnaround time for content revisions	Support	Lead
Support Campus change leads as they drive adoption of JAGGAER within their organizations	Lead	Support
Establish a schedule for materials development, review, approval, and finalization to drive clarity and accountability. Materials developed will follow a pre-defined outline reviewed by Client stakeholders with up to 2 (two) rounds of review within 5 (five) business days of the drafts being received by CI.	Support	Lead
Deliver Pilot Training		
Huron delivers mock training to de-bug curriculum materials and validate test site	Support	Lead
Huron delivers course in classroom to your Trainer	Support	Lead
Client is responsible for classroom scheduling / logistics	Lead	Support
Client delivers course shadowed a few times by Huron to participate / co-deliver	Lead	Support

PHASE 4: DEPLOYMENT

Once the design has been finalized and testing completed, Huron will provide advisory and post-production support services for the deployment of the solution.

Production Migration, Activation and Live Testing

These testing activities represent the final stage of the project. It is important to communicate the solution rollout to all groups and individuals impacted by the project. Depending on the solution being rolled out, Live Testing can include sending out live orders, completing contract negotiations and workflow, etc.

Following the completion of testing, the JAGGAER solution will be activated into production. Typically, this involves migrating all desired configuration options into the production environment and confirming integration.

When the solution is first activated in production, the campus' conduct live order testing which includes sending out live orders, completing contract negotiations and workflow, etc. Live testing is a controlled event that is monitored for success. Once validated, the solution is ready for go-live.

Services following go-live include four months of deployment post-production support and incremental training services and coaching to improve utilization.

A summary of roles and responsibilities for deployment activities are noted below:

Activities, Roles and Responsibilities	Client	Huron
Deployment		
Identify user population, key groups/departments, deployment groups	Lead	Support
Plan, author and communicate based on the communication / org readiness plan	Lead	Support
Develop Post-Production Support Strategy and Plan	Support	Lead
Provide support during go-live and first month	Start Up	Lead
Go-Live Phase		
Deploy JAGGAER Applications to a control group selected by Client	Lead	Support
Transition Client to JAGGAER Customer Support; set up Customer Support Portal for Client	Support	Lead

Project Timeline

We estimate that the scope of this engagement will be accomplished in 16 months, commencing September 2021. The timeline below illustrates the estimated duration and sequence of the phases. We envision the involvement of a broad group of stakeholders from the Board, Federation, Universities, and the State College throughout the project with a particular emphasis on getting cross functional involvement from day 1.

To ensure solution adoption and success, thorough system and business process testing followed by training will result in a pilot go-live in month 12, followed by four months of deployment to support initial go-live activities, followed by utilization reinforcement with campus Workstream leads and other stakeholders.

Figure 1 - Overall Staged Timeline

Proposed Resource Model

HURON ENGAGEMENT TEAM

The Huron engagement team will consist of the following roles. Team members are subject to change based on project timing.

Role	Description	Est. Hours
Huron Program Executive and Quality Assurance	Jens Brown, a Managing Director within Huron's Spend Management practice will serve as the overall lead and will provide subject matter expertise on a part time basis over the 8-month project and will provide guidance and have overall quality assurance and delivery responsibility for Huron's engagement.	168
Huron Program Director	A Senior Manager or Director, this individual will provide part-time, project delivery oversight and contribute to best practices.	288
Planning Lead, Advisor and Project Mgmt. Support	A Manager will serve as the overall lead and advisor for Huron activities regarding the implementation of JAGGAER eProcurement, Contracts+ and Accounts Payable and lead the implementation planning portion of the project. Provides ongoing near full-time project management support to the client Program Manager.	2368

© 2021 Huron Consulting Group Inc. and affiliates. All Rights Reserved.

Role	Description	Est. Hours
Technical Consultant	David Joyner, a Manager, will be the Technical Consultant engaged to perform the JAGGAER portion of system integrations.	1068
Solution Consultant	An Associate with extensive JAGGAER experience, will perform the JAGGAER solution configuration and functional meeting facilitation for the JAGGAER solution in a part-time capacity.	1376
Change Management / Testing Readiness Lead	An Associate with extensive change management and testing experience, will support overall change management activities, including key pieces of curriculum development, instructional design, and organization / coordination of testing activities.	832

The Huron team members listed above will deliver our services – each have significant functional area expertise, deep multi-industry credentials and JAGGAER solution expertise. In addition to the core team members, we may leverage other subject matter expertise from our team to best accomplish the objectives of the engagement. Huron reserves the right shift hours among resources to best accomplish projects objectives.

Huron resources will perform most services in an off-site fashion. We will determine additional meaningful onsite activities in advance (e.g., monthly meetings, steering committee, etc.).

While we will attempt to comply with your requests for specific individuals, we retain the right to assign and reassign our personnel, as appropriate, to perform the services.

Pricing

PROFESSIONAL FEES

The estimated fees for the engagement will be **$1,414,930** based on the terms of the Master Services Agreement and staffing plan provided in this Statement of Work.[1]

Huron is equipped to deliver these services in a remote fashion, any planned travel expenses are estimated at approximately 18% of the total professional fees delivered onsite at various locations in the State of Idaho.

BILLING

Huron will invoice the University of Idaho on a monthly basis for fees and expenses incurred in the prior month. Payments may be made via ACH to:

Harris Bank Chicago, Illinois
Routing No. 071000288
Account Title: Huron Consulting Services, LLC
Account Number: 262-463-3

Comments: (Include Invoice Number to ensure proper credit)

CHANGES IN SCOPE

[1] The estimated fees of $1,414,930 are a 5% discount if the 'Phase 1 Implementation Services' SOW dated 6/30/2021 is signed by 7/9/2021, and this SOW is signed by 8/30/2021. Otherwise, the non-discounted amount of $1,489,400 will apply to this SOW.

© 2021 Huron Consulting Group Inc. and affiliates. All Rights Reserved.

Any change in project scope or duration resulting in additional fees will be mutually agreed upon between the University and Huron Consulting Group and documented in an amendment to this letter of engagement prior to work beginning on additional scope of work.

OPTIONAL SERVICES

As an **optional service**, to support the transition of contract information from offline sources, you could anticipate the automated scrubbing, indexing, and OCR of legacy contracts (e.g., those in offline digital sources) to be accomplished via our intelligent automation service. Approximate fees for conducting this service range from $12 to $16 per contract.

Assumptions and Client Responsibilities

In connection with our provision of services, you will perform the tasks, furnish the personnel, provide the resources, and undertake the responsibilities specified below.

- You will designate an employee or employees within your senior management who will make or obtain all management decisions and/or provide proper guidance with respect to this engagement on a timely basis. You also agree to ensure that all assumptions set forth below are accurate and to provide us with such further information we may need and which we can rely on to be accurate and complete. You also agree to cause all levels of your employees and contractors to cooperate fully and timely with us. We will be entitled to rely on all of your decisions and approvals, and we will not be obligated to evaluate, advise on, confirm, or reject such decisions and approvals.
- To help maximize the value of our work to you and to keep the project moving on schedule, you agree to comply with all of our reasonable requests and to provide us timely access to all information and locations reasonably necessary to our performance of the services.
- The successful delivery of our services, and the fees charged, are dependent on (i) your timely and effective completion of your responsibilities, (ii) the accuracy and completeness of any assumptions, and (iii) timely decisions and approvals by your management. You will be responsible for any delays, additional costs, or other liabilities caused by any deficiencies in the assumptions or in carrying out your responsibilities.
- There will be a recurring project status meeting to address open issues and make key decisions. The format of the status meeting will be mutually agreed upon between Client and Huron at the start of the project.
- Documentation / deliverables will be delivered in electronic format, unless otherwise expressly agreed to by Client and Huron.
- Client will work to the agreed upon timeline and Huron will not be responsible for delays in the project timeline due to elongated decision-making processes, inability to provide required resources, information, or requirements, and delays in the execution of any aspect of the project. Any delays may have time and/ or cost impact.
- Huron will have reasonable access to required Client staff during this engagement as any delays in the implementation by either party will be highlighted during the standing status reports.
- Unless otherwise specified herein, your ERP / IT development resources are responsible for the development of any interfaces between files / messages provided by Jaggaer to your ERP system, and vice versa, if applicable.

UNIVERSITY OF IDAHO

SUBJECT

Ellucian renewal agreement – ERP software

REFERENCE

June 30, 1993	The University of Idaho executed an ERP agreement with SCT Software & Resource Management Corporation (now Ellucian).
Various	The University of Idaho has presented various Ellucian contracts and maintenance agreements to the Board of Regents and the Executive Director for the SBOE for approval on several occasions since the 1993 initial contract in order to ensure continuous use, service, support, and appropriate expansion of the various Ellucian software products used by the U of I.

APPLICABLE STATUTE, RULE, OR POLICY

Idaho State Board of Education Governing Policies & Procedures, Section V.I.3.

BACKGROUND/DISCUSSION

Since 1993, the University of Idaho (UI) has relied on Ellucian products (previously SCT Software & Resource Management Corporation) for enterprise resource planning (ERP) and other software solutions, including Banner (ERP), CRM Advance, and ChromeRiver (Travel Management) after a successful RFP process. Successful implementation and years of improvement and application integration have yielded positive results. The University's use of the products has included numerous licenses and maintenance agreements with Ellucian. The additions of CRM Advance and ChromeRiver have further streamlined business and finance operations through integration with Banner.

IMPACT

The University of Idaho requests a contract renewal for a term of five years for Banner and three years for CRM Advance and ChromeRiver; for costs of $2,371,197 for the Banner software license; $30,523 for professional services related to implementation, training, and management services for the Banner products; $3,446 for support services; and $619,829 for the ChromeRiver and CRM Advance Cloud-based software. The University of Idaho issued Requests for Proposals, and Banner (1993), CRM Advance (2016) and ChromeRiver (2018) were awarded the contracts, respectively. These contracts are renewals of those agreements. The total cost of these contracts is $3,024,995. By combining the three products, UI will receive a reduced price, equating to an average annual savings of $50,000. Additionally, UI will receive access to Premium Ellucian Experience and the mobile app. As part of the contract to receive the newer

products, the U of I will be surrendering a perpetual license to use some of the products granted under the original 1993 agreement and its subsequent amendments.

This agreement aligns with the timing and term length of similar agreements signed between BSU, ISU, LCSC, and their respective ERP providers. This furthers the Board of Regents' mission of improving purchasing coordination and centralization among the four-year institutions, in addition to creating the opportunity for ERP alignment among the institutions in the future.

ATTACHMENTS

Attachment 1 – License Exchange and Enhancement Order Form (Ellucian Renewal for Banner, among other products)
Attachment 2 – Order Form for Renewal of Cloud Software
Attachment 3 – Original 1993 SCT Software (now Ellucian) Banner Contract
Attachment 4 – Original 2016 Cloud Software Order Form for ChromeRiver and CRM Advance

BOARD STAFF COMMENTS AND RECOMMENDATIONS

In the last year, both Boise State University and Lewis-Clark State College have entered into five-year agreements, consistent with the Board's desire for a plan for ERP convergence to be in process by 2026. The University of Idaho has been mindful of the guidance from BAHR members that there be a planned convergence of ERP systems while simultaneously demonstrating responsible stewardship in the interim. The contract includes software that provides a platform for Canvas, the portal for the Online Idaho project, and provides for a cloud-based software that will position the University for a shared ERP convergence in 2026.

Staff recommends approval.

BOARD ACTION

I move to approve the request by the University of Idaho to execute the attached contracts with Ellucian and to authorize the University of Idaho Vice-President for Finance and Administration, or designee, to execute the necessary contractual documents in substantial conformity to Attachments 1 and 2.

Moved by _____ Seconded by _____ Carried Yes _____ No _____

LICENSE EXCHANGE AND ENHANCEMENT ORDER FORM

This Order Form is between **ELLUCIAN COMPANY L.P.** ("Ellucian") and **UNIVERSITY OF IDAHO** (the "Client"). This Order Form amends the Software License & Services Agreement dated June 30, 1993 between the parties (the "Agreement"). Capitalized terms in this Order Form shall have the same meaning given to such terms within the Agreement unless redefined herein.

Under the Agreement, Ellucian granted Client a perpetual right of use for certain systems of software. Subject to the terms and conditions of the Agreement as modified by this Order Form, Client and Ellucian hereby terminate Client's license for the "**Terminated Perpetual Software**" identified in Exhibit 1 hereto in consideration for a license to use certain software, as identified in the **Subscription Software Table** below, on a term-of-years basis ("**Subscription Software**") and/or certain other software, as identified in the **Cloud Software Table** below, on a term-of-years, Ellucian cloud-provided basis ("**Cloud Software**"). Client is retaining its perpetual license to use certain other Continuing Perpetual Software (as that term is defined below), all subject to the terms and conditions of the Agreement as modified by this Order Form. Accordingly, Ellucian and Client, intending to be legally bound, agree as follows:

Software Term. For purposes of both the Subscription Software and the Cloud Software licensed under this Order Form, the "Software Term" consists of the period of time from the last day of the month of execution of this Order Form (the "Beginning Date") until July 31, 2026 (the "Expiration Date"). At the end of the Software Term (unless otherwise specified in the Documentation or this Order Form), Client's license to access and use the Subscription Software and the Cloud Software will automatically renew for consecutive Contract Years on a year-to-year basis extending the Expiration Date and the Software Term by a year each time, unless either party notifies the other in writing of its intent not to effect such renewal at least ninety (90) days prior to the then-current Expiration Date; automatic renewal beyond the Software Term will be subject to an increase of up to seven percent (7%) annually, for each such renewal Contract Year, in addition to applicable third party fee increase (if any), unless and until the parties execute a written amendment or subsequent order form for a committed renewal term.

Information Security. Ellucian will adhere to the terms governing information security set forth in Exhibit 3 to this Order Form during the Cloud Software Term.

Security Breach. With respect to Client Data, as defined in Section 1 of the Cloud Software Order Form signed by the parties on November 20, 2016, in the event of a "Security Breach" as defined by applicable state or federal law, to the extent caused by or resulting from Ellucian's negligence or willful misconduct or Ellucian's failure to adhere to the terms governing information security set forth in Exhibit 3, Ellucian shall be responsible to pay for, or reimburse Client for, the following, to the extent applicable up to the limit stated in the last sentence of this paragraph: (1) reasonable attorneys' fees incurred by Client in furtherance of Client's obligations with respect to the Security Breach; (2) the cost of notifying appropriate law enforcement agencies, government regulatory authorities and affected customers/students; (3) two (2) years of credit monitoring services for Client's affected customers/students/faculty members/employees, provided by a reputable credit monitoring services provider; and (4) any other expenses or damages imposed by law upon Client to respond to or remedy the security breach. The limitations provided in Section 16 of the Ellucian Cloud Software Standards (see Exhibit 5 and see www.ellucian.com/contracts-and-documentation) shall not apply to costs that Ellucian has agreed to pay for a Security Breach as described within this Section (entitled "Security Breach") which costs are instead limited so as not to exceed $500,000.

Security Audit. No more than once per calendar year, Client may request and Ellucian will provide: (i) subject to Client executing a non-disclosure agreement, a copy of the most recent independent security attestation report applicable to the activities under the Order Form, and (ii) a copy of Ellucian's then-current information security policies and standards that relate to security controls applicable to the services Ellucian provides to Client.

FERPA. To the extent that Ellucian will have access to, store or receive student education records, Ellucian agrees to abide by the limitations on use and re-disclosure of such records set forth in the Family Educational Rights and Privacy Act (FERPA), 20 U.S.C. § 1232g, and 34 CFR Part 99, as applicable. Ellucian agrees to hold student record information in strict confidence and shall not use or disclose such information except as authorized in writing by the Client or as required by law. Ellucian agrees not to use the information for any purpose other than the purpose for which the disclosure was made. Upon termination of the Agreement, Ellucian shall return all student education record information as provided in the Agreement without keeping a copy for itself.

Termination of License for Terminated Perpetual Software. Client's license to use the Terminated Perpetual Software is terminated thirty (30) days following the Beginning Date.

Grant of Licenses Pursuant to This Order Form. Licenses granted pursuant to this Order Form are for Client's internal use only and are subject to all use restrictions and limitations set forth in the Agreement and this Order Form, including referenced attachments. Ellucian grants Client a non-exclusive, non-transferable license to use the Subscription Software and Cloud Software, for Client's internal use, only during the Software Term specified herein, for the fees specified herein. Third party owners of Software licensed or provided for use by Ellucian are third party beneficiaries of this Order Form with regard to each such owner's respective products. Client acknowledges that Subscription Software that replaces the Terminated Perpetual Software has been delivered. Ellucian will provide the necessary process and procedure for Client's access to the Cloud Software within thirty (30) days of the Beginning Date.

Continuing Perpetual Software. Notwithstanding the termination of Client's license to use the Terminated Perpetual Software as provided for in this Order Form, Client has an ongoing license for use of certain other systems of software as more particularly identified in Exhibit 2 hereto (the "**Continuing Perpetual Software**"), as previously licensed between the parties. In order to align Software Support Services for the Continuing Perpetual Software to the Software Term applicable to Subscription Software and Cloud Software licensed under this Order Form, the parties hereby amend, renew, and extend Software Support Services for the Continuing Perpetual Software (only) for a term commencing on the Beginning Date through the Expiration Date ("Extended Maintenance Term").

SUBSCRIPTION SOFTWARE TABLE [1,2,3]

TOTAL PROFESSIONAL SERVICES FEES:			**$30,523**

Notes to Tables:

1 For a description of the product details and the terms of service, see Exhibit 5 and see www.ellucian.com/contracts-and-documentation.

2 Pricing in this Order Form allows for up to a tier threshold of 10,999 (the "Contracted FTE"). The annual fees shown in the Cloud Software Table do not include implementation/setup services.

3 Subscription Software includes Software Support Services at the Advantage Plus Maintenance Level without additional charge.

4 Cloud Software includes Software Support Services for such Cloud Software at the Subscription Advantage Maintenance Level without additional charge.

5 Client is granted a right to access and use the Ellucian-proprietary self-paced, web-based training programs ("Web-Based Training Programs") that Ellucian makes available during the applicable Software Term. Within thirty (30) days of the Beginning Date and upon receipt of user account information from Client, Ellucian will make available to Client the most current version of the Web-Based Training Programs for the Baseline version of Ellucian Software. Further, provided that Client pays Ellucian the applicable subscription fees specified in this Order Form, Ellucian will, during the applicable Software Term, make available to Client each new version of the Web-Based Training Programs will be made available via the website as soon as reasonably practicable after the same become generally available to Ellucian licensees in each instance. Client will only have the right to use the Web-Based Training Programs in connection with its license to use the corresponding Software, and Client's right to use the Web-Based Training Programs will be subject to and limited by the licensing terms of the Agreement. All Web-Based Training Programs are owned by and constitute copyrighted and confidential information of Ellucian. Client is expressly prohibited from placing on or otherwise making any Web-Based Training Programs, in whole or in part, available from any website, including any website maintained, operated, or authorized by Client.

6 For a description of the services identified in this Order Form, see the Statement of Work attached as Exhibit 4.

7 Hourly rates specified in this table will be held in place for this project for a period beginning on the Execution Date and ending eighteen (18) months later.

[8] Client is advised that Ellucian personnel rendering services bill for travel time, preparation time, and follow-up time, as applicable.

[9] Where a number of hours is specified in the table with an associated hourly rate, the "Fee" is a good faith estimate based on the information available to Ellucian at the time of execution of this Order Form. The total amount that Client will pay for these services will vary based on the actual number of hours of services required to complete the services and the rate that is applicable when the services are rendered. If it is determined that additional services are needed beyond what is listed in this contract, Ellucian will secure written approval from Client by executing a separate work order prior to delivering those services.

[10] Fixed Fee services fees will remain valid for a period of one (1) year following the Execution Date; Client must schedule delivery of Fixed Fee services within the one (1) year period or additional charges may apply.

Invoicing. Fees for Software Support Services, Subscription Software, and Cloud Software are payable on the basis of a "Contract Year" (consisting of twelve (12) consecutive months beginning August 1) during the Software Term unless otherwise provided herein or in the Exhibits hereto. As applicable based upon the specific products identified in this Order Form, Ellucian will invoice Client:

- on an annual basis, in advance of each applicable Contract Year for Subscription Software and Cloud Software (fees for the initial Contract Year will be invoiced on the Execution Date and may be prorated, if applicable, for a partial initial Contract Year depending upon the Execution Date)
- on an annual basis, in advance of each applicable Contract Year for Software Support Services fees applicable to the Continuing Perpetual Software (fees for the initial Contract Year will be invoiced on the Execution Date and may be prorated, if applicable, for a partial initial Contract Year depending upon the Execution Date);
- on the Execution Date for all Professional Services to be performed on a fixed fee basis;
- monthly on an as-incurred basis in arrears for all Professional Services to be performed on a time and materials basis as well as for reimbursable travel and living expenses and other applicable charges in accordance with the terms of the Agreement if Ellucian's performance of any Professional Services involves onsite delivery (unless the service rate(s) identified in the Professional Services Table indicate that travel and living expenses are included). All services are anticipated to be delivered remotely under this Order Form. However, if it is determined that services will need to be delivered onsite, Client will reimburse Ellucian for pre-approved actual and reasonable travel and living expenses that Ellucian incurs in providing Client with Professional Services. Such travel and living expenses will be invoiced on a monthly basis in arrears and are due within thirty (30) days from the date of invoice. Ellucian will use reasonable efforts to limit travel and living expenses by using coach air fare, booked in advance when available, staying at hotels identified in advance by Client as offering Client's contractors a discounted rate, and sharing rental cars. Reimbursement is subject to any statutory reimbursement limitations imposed on Client contractors, and Client will provide Ellucian with a copy of such limitations before Ellucian incurs expenses.

Payment Terms. Unless a different payment obligation is specified in the Agreement, Client's payments under this Order Form are due within thirty (30) days of the date(s) of invoice(s).

By the execution below, each party represents and warrants that it is bound by the signature of its respective signatory for this non-cancelable Order Form. Except as expressly amended by this Order Form, the terms of the Agreement remain unchanged and in full force and effect; any fees due under this Order Form are in addition to and not in lieu of fees already due or scheduled to come due under the Agreement. Client has not relied on the availability of either any future version of any software or any future software product or service.

CONTINUING PERPETUAL SOFTWARE- TABLE A (paid in advance): [1,3]

Description	Maintenance Level	Base Year Fee (for Contract Year ending July 31, 2022)
Banner International Tax Navigator Interface	Advantage	Included
TOTAL BASE YEAR SOFTWARE SUPPORT SERVICES FEE:		**$2,106**

CONTINUING PERPETUAL SOFTWARE -TABLE B (paid in arrears): [2,3]

Description	Maintenance Level	Base Year Fee (for Contract Year ending July 31, 2022)
Electronic Data Interchange EDISmart	Advantage	Included
TOTAL BASE YEAR SOFTWARE SUPPORT SERVICES FEE:		**$1,340**

Notes to Continuing Perpetual Software Table:

[1] Ongoing Software Support Services Table A (paid in advance). Client will continue to pay Ellucian Software Support Services fees for the Continuing Perpetual Software as provided in the parties' existing underlying Maintenance Agreement through the Beginning Date. During the Extended Maintenance Term, Ellucian will continue to provide Software Support Services (including Maintenance) on the Continuing Perpetual Software in accordance with the terms and conditions of the Maintenance Agreement and Client will pay the fees specified in the Continuing Perpetual Software Table annually, in advance, on the basis of a Contract Year; (ii) for each Contract Year throughout the Extended Maintenance Term, Software Support Services fees may increase by not more than five percent (5%) over the amount payable for Software Support Services for the immediately preceding Contract Year and will be specified by Ellucian in an annual invoice issued at least thirty (30) days before the start of the applicable Contract Year for which such Software Support Services fees are being remitted, with payment due within thirty (30) days of the date of each such invoice; and (iii) absent any further amendment or extension with respect to continuing Software Support Services beyond the Extended Maintenance Term, Software Support Services fees for each subsequent Contract Year after the Extended Maintenance Term will be specified by Ellucian in an annual invoice and will increase over the immediately preceding Contract Year's fee by not more than seven percent (7%).

[2] Ongoing Software Support Services Table B (paid in arrears). Client will continue to pay Ellucian Software Support Services fees for the Continuing Perpetual Software as provided in the parties' existing underlying Maintenance Agreement through the Beginning Date. During the Extended Maintenance Term, Ellucian will continue to provide Software Support Services (including Maintenance) on the Continuing Perpetual Software in accordance with the terms and conditions of the Maintenance Agreement and Client will pay the fees specified in the Continuing Perpetual Software Table annually, in arrears, on the basis of a Contract Year; (ii) for each Contract Year throughout the Extended Maintenance Term, Software Support Services fees may increase by not more than five percent (5%) over the amount payable for Software Support Services for the immediately preceding Contract Year and will be specified by Ellucian in an annual invoice issued at least thirty (30) days before the end of the applicable Contract Year for which such Software Support Services fees are being remitted, with payment due within thirty (30) days of the date of each such invoice; and (iii) absent any further amendment or extension with respect to continuing Software Support Services beyond the Extended Maintenance Term, Software Support Services fees for each subsequent Contract Year after the Extended Maintenance Term will be specified by Ellucian in an annual invoice and will increase over the immediately preceding Contract Year's fee by not more than seven percent (7%).

[2] For a description of the product details and the terms of service, see Exhibit 5 and see www.ellucian.com/contracts-and-documentation.

EXHIBIT 3

INFORMATION SECURITY ADDENDUM

This Exhibit 3 contains terms governing information security to which Ellucian will adhere during the Cloud Software Term. Ellucian may modify specific security protections from time to time but will continue to provide at least the same level of security as on the date this Exhibit became part of the Cloud Software Order Form.

1. Information Security Program

Ellucian will maintain a global Information Security Program aligned with ISO 27001 that will plan, implement, and manage processes on an ongoing basis to meet information security objectives and requirements applicable to the Cloud Software delivered worldwide. The Information Security Program will include demonstrable oversight and commitment from Ellucian senior management. The Information Security Program will also include performing information security risk assessments and implementing treatment plans at appropriate intervals, such as when significant changes to the Cloud Software occur.

2. Information Security Compliance

Ellucian will design and maintain a control environment for the Cloud Software aligned with global information security practices and standards such as ISO 27001 and third party attestation frameworks such as SSAE 18 / SOC 1 and SOC 2.

3. Information Security Policy

Ellucian will maintain an Information Security Policy that is approved by senior management and communicated to employees and applicable third parties. The Information Security Policy will identify roles and responsibilities as well as governing principles and control objectives for information security across Ellucian's global business operations. The Information Security Policy and will be reviewed annually and supporting standards, guidelines and procedures will be adjusted as appropriate.

4. Information Security Awareness Program

Ellucian will maintain an employee awareness program to allow employees to understand and fulfill their responsibilities for information security, including requirements for personal data privacy, confidentiality, and non-disclosure of information.

5. Personnel Security

Employees will be screened in accordance with relevant laws and such screening will be proportional to employee roles and responsibilities. Employees and applicable third parties will agree to requirements for confidentiality and non-disclosure of information prior to employment or prior to providing services to Ellucian.

6. Physical Security

Ellucian currently uses Amazon Web Services (AWS) who is responsible for protecting the global infrastructure upon which the Cloud Software is delivered. AWS will maintain controls to manage and monitor physical access at both the data center perimeter and building ingress points using security staff, or electronic access control validation.

7. Access Control

Ellucian will authorize access to the Cloud Software only for employees and third parties with a legitimate business need. Controls and mechanisms to authenticate access and monitor and prevent unauthorized access to the Cloud Software and Client Data will also be in place. Ellucian will also maintain appropriate onboarding and termination processes to manage revocation of access to the Cloud Software.

8. Data Security

Ellucian will maintain security controls to safeguard the Cloud Software from unauthorized access, modification, disclosure, or destruction, or becoming inaccessible to authorized users. Data protection methods will include restricting and monitoring access to information systems, encrypting data in transit and while at rest when necessary

or required, maintaining backups of Client Data, and securely returning data to the Client, or disposing or destroying data in a secure manner using techniques consistent with NIST 800-88 ("Guidelines for Media Sanitization").

9. Cloud Software Security

Ellucian will protect the confidentiality, integrity, and availability of the Cloud Software. Ellucian will maintain safeguards for the security of electronic communications networks. Ellucian will also maintain a change management process to control planned and unplanned changes and the installation of software, manage mechanisms to detect threats such as malware, and recording and monitoring security events to identify anomalous or unauthorized activity.

10. Technical Vulnerability Management

Ellucian will maintain a process and supporting tools to evaluate and resolve technical vulnerabilities within the Cloud Software within reasonable timeframes to address the risk of potential exploitation, or system or data compromise.

11. Third Party Security

Ellucian will maintain a process to identify risks to the Cloud Software that are accessible to third parties. The process will ensure that relevant information security requirements are incorporated into business agreements with third parties and that relevant third party risks are addressed within reasonable timeframes.

12. Information Security Incident Management

Ellucian will maintain an information security incident management program to respond to security incidents within the Cloud Software. Ellucian will provide timely notification to the Client in the event that the Cloud Software or Client Data is known to have suffered an Information Security Breach. Timely notification is defined as providing notice to the Client as soon as reasonably practicable and without undue delay after Ellucian became aware of the Information Security Breach. An "Information Security Breach" is defined as an event(s) that is known to have resulted in unauthorized access to a Client's Cloud Software or use or disclosure of Client Data. Ellucian will further maintain a process to capture and apply knowledge gained from such events to address the likelihood of reoccurrence.

13. Business Continuity Management

Ellucian will implement controls designed to maintain the continued availability of the Cloud Software. Controls will include maintaining a defined business continuity management plan relevant to the Cloud Software that, if interrupted, may result in significant downtime or data loss.

EXHIBIT 4

ELLUCIAN EXPERIENCE – SINGLE SIGN-ON – DESCRIPTION OF SERVICES

Overview
Ellucian will provide consulting to configure Single Sign-on with Client Single Sign-on provider.

High-level Tasks and Deliverables for Ellucian Experience – Single Sign-on

Engagement	High Level Tasks	Deliverables
Ethos Integration Validation	Ellucian will validate Ethos Integration and functional mappings in 1 non-production and 1 production environment.	
Single Sign-on (SSO) and Technical Configuration	Ellucian will: • Configure SAML SSO (via ADFS, Shibboleth or Ethos Identity); • Gather Details on which SAML Assertions will define the roles to be used in Ellucian Experience; and • Set up Ellucian Experience Application in Ethos Integration.	• Configuration Worksheet • 1 provisioned production • 1 provisioned non-production Ellucian Experience site

Service Assumptions for Ellucian Experience – Single Sign-on
- Ethos Integration with Ellucian Banner has been completed and the Person data model has been fully mapped.

Client Responsibilities for Ellucian Experience – Single Sign-on
- Configure Identity Provider for Single Sign-on (SSO); and
- Perform ongoing content changes and updates.

Out of Scope for Ellucian Experience – Single Sign-on
Includes but is not limited to:
- Configuring SSO with any provider besides ADFS, Shibboleth or Ethos Identity;
- Configuration or setup of additional integrated licensed products;
- Data Access loading or troubleshooting;
- Shared Technology Platform (STP);
- Customizations which may be required to provide parity with current portal-like systems;
- Performing content management and intranet functions including document storage and collaboration; and
- Performing content migration from existing portal system to Ellucian Experience.

ELLUCIAN EXPERIENCE – TRAINING AND PLANNING - DESCRIPTION OF SERVICES

Overview
Ellucian will provide consulting to assist the Client implementing Ellucian Experience.

High-level Tasks and Deliverables for Ellucian Experience - Training and Planning

Engagement	High Level Tasks	Deliverables
Project Kickoff	Ellucian will: • Provide a demo of Ellucian Experience; • Provide Client recommendations;	

Engagement	High Level Tasks	Deliverables
	• Review schedule; and • Review requirements.	
Admin User Training	Ellucian will train the administrative users to: • Configure client logo and colors; • Configure main menu; • Configure and test delivered and template cards; and • Administer Ellucian Experience.	
Functional User Training and Content Planning	Ellucian will: • Provide an overview of delivered and template cards; and • Discuss content scenarios and identify methods to accommodate content.	• Decision Workbook
Go-live Planning and Testing	Ellucian will discuss adoption, marketing, and rollout of Ellucian Experience.	• Go-live Plan • Test Plan
Training and Handoff	Ellucian will: • Provide training on how to change, test and maintain site content.	• Decision Workbook Checklist • Sign-Off

Service Assumptions for Ellucian Experience - Training and Planning

- Ellucian Experience has been configured for Single Sign-on use and SAML Assertions defined; and
- Ethos Integration is complete and configured for Ellucian Experience.

Client Responsibilities for Ellucian Experience – Training and Planning

- Perform ongoing content changes and updates.

Out of Scope for Ellucian Experience – Training and Planning

Includes but is not limited to:

- Configuration or setup of additional integrated licensed products;
- Data Access loading or troubleshooting;
- Shared Technology Platform (STP);
- Customizations which may be required to provide parity with current portal-like systems;
- Performing content management and intranet functions including document storage and collaboration; and
- Performing content migration from existing portal system to Ellucian Experience.

EXPERIENCE TOOLKIT WORKSHOP - DESCRIPTION OF SERVICES

Overview

Ellucian will deliver a hands-on Workshop to help the Client understand the Ellucian Experience Dashboard and the effort involved in building Experience cards and pages with the Experience setup. The Workshop will use the Client's Ethos Integration environment and Experience Dashboard. All hands-on activities performed during the Workshop are conducted in a familiar environment and any updates made to the environment are available after the Workshop ends.

High-level Tasks and Descriptions for Experience Toolkit Workshop

Engagement	High Level Tasks	Deliverables
Planning	Ellucian will: • Conduct project initiation meeting, Workshop service preparation, and preparation for Workshop; • Verify necessary components for Ethos Integration and Ellucian Experience are installed and functioning; and • Verify the Client team participating in the Workshop will have access to their non-production environment.	• Workshop Agenda • Service Preparation Document (SPD)
Hands-on Workshop	Ellucian will instruct Client to: • Understand the Ellucian Experience architecture and platform; • Understand how to obtain reference information for Ellucian Experience; • Verify the components necessary for Ellucian Experience are installed and functioning properly; • Conduct hands-on tests with Postman to validate APIs are functional; • Troubleshoot common error scenarios with Ellucian Experience; • Understand recommended practices for Ellucian Experience card and page development; • Publish Ellucian Experience card and page with a simple custom JavaScript application using Visual Studio Code and Ellucian Experience Setup in the Client's Ellucian Experience environment; and • Discuss implementation needs that could potentially be used for Ellucian Experience.	• Training material • Experience card and page examples

Service Assumptions for Experience Toolkit Workshop

- The Workshop will only use baseline Ethos Data Models and APIs. A discussion around how custom data models can be leveraged will be a part of this Workshop;
- The development of custom cards, pages and integrations for the Client is the responsibility of the Client technical staff. Ellucian can develop custom cards, pages, and integrations for the Client via a separate work order;
- The Workshop is expected to be a working session on non-production Banner and Ethos Integration and Ellucian Experience component instances;
- The Client participants will have the required access to the Ethos Integration and Ellucian Experience components;
- The Workshop will use the Client's Ethos Integration and Ellucian Experience environment for all hands-on activities;
- End-to-end, bidirectional communication between the Banner and Ethos Integration is setup, configured and fully functional. Ellucian can provide services to setup Ethos Integration, Ellucian Experience, and its associated components via a separate work order;
- The code components delivered as a part of this Workshop are meant for instructional purposes only. They are not production ready;
- The Workshop will use a previously-agreed-upon selection of Ethos Data Models for the Workshop; and
- Workshop participants should have a basic understanding of JavaScript and GraphQL.

Client Responsibilities for Experience Toolkit Workshop

- Circulate Ellucian materials in advance of the service;
- Work with Ellucian to determine service expectations and timeline;

- Ensure required Ethos Integration and Ellucian Experience components are installed, configured and ready for use;
- Ensure that the Workshop participants have access to the non-production Ethos Integration tenant, Ellucian Experience, the Banner instance and have the required software (as specified in the Service Preparation Document) installed on their computers; and
- Provide Client point of contact who can ensure required Ethos Integration and Ellucian Experience components are installed and ready for use.

Out of Scope for Experience Toolkit Workshop
Includes but not limited to:

- Activities that fall within the boundaries of the scope statement are considered "in scope" and are accounted for in the schedule and budget. If an activity falls outside the boundaries, it is considered "out of scope" and is not planned for and not included in the Description of Service.

ETHOS INTEGRATION ESSENTIALS – DESCRIPTION OF SERVICES

Overview
Ellucian will integrate Ethos with the Ellucian Banner

High-Level Tasks and Deliverables for Ethos Integration Essentials

Engagement	High Level Tasks	Deliverables
Planning and Turnover	Ellucian will: • Guide the technical kickoff; • Conduct service preparation call; • Confirm pre-requisites for service readiness; and • Knowledge sharing on Ethos Integration and Ellucian ERP Middleware component deployment.	• Service Preparation Document (SPD) • Training Materials
Ethos Integration – Functional Integration	Ellucian will: • Configure the Ellucian ERP in preparation for the Ethos Integration implementation; and • Configure Ellucian Ethos Data Model mappings in both non-production and production.	• Decision Workbook • Configured Mappings
Ethos Integration - Technical Integration	Ellucian will: • Deploy or upgrade the Ellucian Messaging Adapter to the latest supported version; • Configure the Ellucian ERP for the integration required for the Ethos Integration implementation; and • Configure the Client Ethos Integration Tenant to the authoritative source (Ellucian ERP) in both non-production and production.	• Deployed or Upgraded Ellucian Messaging Adapater • Configured Ellucian ERP for Ethos Integration
Ethos Integration – Technical Validation	Ellucian will: • Review Ethos Integration message flow validation from Ethos Integration to the Ellucian ERP; and • Review Ellucian ERP to Ethos Integration in both non-production and production.	• Validate non-production and production environment • Installation Report

Service Assumptions for Ethos Integration Essentials

- Per the high level tasks and deliverables defined within this Description of Service.

Client Responsibilities for Ethos Integration Essentials

- Provide a designated non-production environment representative of the intended production environment for deployment of the integration;
- Provide the appropriate resource(s) to assist with deployment of integration components and execute the test plan in the same designated non-production environment, and provide timely system support as needed to maintain operation and availability of the designated non-production environment;
- Develop and deliver test plan;
- Provide test data in the designated non-production environment per the test plan;
- Provide access to ellucian.okta.com with Ethos Integration icon with data access if client has Ellucian Analytics or Ellucian Workflow; and;
- Client must meet the requirements for Ellucian Ethos Integration.
- Upgrading and validating that all Banner pre-requisites for both the Banner Common DB Upgrade and the Ethos API DB upgrade are met;
- Applying all the ODS pre-processor steps and ensuring ODS is properly staged if applicable;
- Install and/or upgrade the Banner Student API and Ethos Integration API unless specified within scope;
- Run the GUID generation process via the GJAPCTL screen in Banner INB or Banner 9 Admin Pages;
- Install and validate that the Banner DB Upgrade and Ethos DB Upgrade are installed in the Banner environments of which the API's will be integrated with unless specified within scope. The installation must be complete for all licensed Banner modules;
- Install the webserver (Tomcat or WebLogic) with an SSL certificated from a well-known certificate authority unless specified within scope for the API's to be hosted on.

Out of Scope for Ethos Integration Essentials

Includes but is not limited to:

- Services not clearly defined within this Description of Service.

INTELLIGENT LEARNING PLATFORM IMPLEMENTATION – DESCRIPTION OF SERVICES

Overview

Ellucian will conduct functional workshops designed to review and configure Intelligent Learning Platform ("ILP") settings using Ethos to support the Client's integration requirements between a single LMS and Banner.

High-level Tasks and Deliverables for Intelligent Learning Platform 5 Implementation

Engagement	High Level Tasks	Deliverables
Ethos Integration Validation	Ellucian will validate Ethos Integration and functional mappings in 1 non-production and 1 production environment.	
ILP Consulting	Ellucian will: • Conduct a functional overview of ILP and its features; • Connect ILP to Ethos Integration; • Connect ILP to 1 non-prod and 1 production supported Learning Management System; • Configure and test bulk and real-time provisioning course, user, and enrollment updates against 1 non-production and 1 production environment; • Configure and test Grade sync setup against 1 non-production and 1 production environment; • Set up integration with Ellucian Mobile; and • Assist with ILP go-live planning.	• Reference guide • Decision workbook

Service Assumptions for Intelligent Learning Platform 5 Implementation

- Blackboard Learn Learning Management System (LMS) minimum release requirements are met prior to the ILP implementation.
- Blackboard SaaS Learning Management System (LMS) minimum release requirements are met prior to the ILP implementation.
- Ethos Integration has been completed and tested.

Client Responsibilities for Intelligent Learning Platform 5 Implementation

- Configure the Ethos integration tenant to the authoritative source where Ellucian Ethos Data Model mappings are complete.
- Complete all technical and ERP pre-requisite requirements in their entirety prior to the ILP implementation otherwise specifically stated.
- Upgrade the Ellucian software components to the minimum required versions prior to the ILP implementation.
- Provide a dedicated non-production environment and a production environment of the LMS, at the minimum release or higher, to configure ILP against.

Out of Scope for Intelligent Learning Platform 5 Implementation

Includes but is not limited to:

- Integration with an LMS other than the LMS identified above;
- Updates to the Client's ERP;
- Installation, upgrade or migration of Ellucian Portal;
- Installation, configuration or federation of Learning Management System for authentication;
- Installation or configuration of load balancers;
- Configuration of the Client's Network (including DNS or Firewall); and
- Language localizations.

PROJECT MANAGEMENT – DESCRIPTION OF SERVICES

Overview

Ellucian will provide Project Management services to Client using the Ellucian Edge Project Management Methodology.

High-level Tasks and Deliverables for Project Management

Engagement	High Level Tasks	Deliverables
Initiation	Ellucian will: • Set up a My Projects site; • Introduce Project Leadership team; • Hold Ellucian-internal Sales to Delivery touchpoint; • Compile Project Roster of Client and Ellucian staff; and • Acclimate Client to project site.	• Project site for Project Collaboration • Initial site Project Roster • Meeting summaries
Planning	Ellucian will: • Conduct Project Kickoff and Planning call; • Create project site Project Scope; • Create project site Integrated Project Schedule; • Create Project Budget Baseline; • Document initial risks, issues and decisions in project site; and • Complete Client Survey for Initiation & Planning.	• Project site Project Scope Statement • Project Schedule for project site • Project Budget Reconciliation for project site • Project site Risk, Issues and Decision registers

Engagement	High Level Tasks	Deliverables
		• Project site Change Request register • Meeting summaries • Client Survey
Execute	Ellucian will: • Conduct weekly Project Status Update meeting; • Manage project tasks; • Manage risks, issues, and decisions; and • Manage Scope.	• Updates to site Project Status • Updates to the site Integrated Project Schedule • Updates to the project site Risk, Issues and Decision registers • Updates to the project site Change Request register • Meeting summaries
Transition & Close	Ellucian will: • Conduct Project Transition Planning Meeting; and • Complete Client Survey for Project Completion.	• Project Transition Plan • Meeting summaries • Client Survey

Service Assumptions for Project Management

- The Ellucian Edge Project Management Methodology is delivered via five components: Initiation, Planning, Execution, Transition & Close and Monitor & Control.
- The Monitor & Control phase overlaps the first four phases to provide Project Governance.
- Ellucian and Client will use an Ellucian-provided My Projects web site that is the home page for the project described by this Scope of Services. This site is the only source of project status for Ellucian and Client project staff, project managers, and executive stakeholders. It provides the following information and deliverables.
    - Project status dashboard. The status dashboard presents the status through:
        - Project Status at a glance
        - Project Health
        - Project Progress
        - Milestone Status
        - Upcoming Tasks
        - Upcoming Events
    - Registers for:
        - Change Requests
        - Risks
        - Issues
        - Decisions
    - Project Schedule
    - Project Calendar
    - Project Roster
    - Communications Plan
    - Licensed Products
    - Project Documents
    - Project Management Assignment Plan (PMP)

Client Responsibilities for Project Management

- Provide information to the Ellucian project team per the agreed project schedule that will contribute to project activities and development of project documents as described in this Scope of Services.
- Provide acceptance approval for project tasks and Change Requests (CR).

  - When Ellucian staff complete a task within the project site Task list, which may include preparing information that resides in the site or in separate documents and setting the task status to Completed, the Client will approve the task as having been completed (including all related information and documents) by changing the task's status to Verified.
  - Task completion will be determined per agreed sign-off criteria and Client acceptance period for approval.
  - Change Requests will be described in Change Request documents and will require signatures by approved Client and Ellucian individuals.
- Attend and participate in project status update meetings and project stakeholder meetings.
- Support and otherwise cooperate with Ellucian throughout all project activities, development of documents, and project outcomes.
- Provide timeline approval of project change requests prior to the start of the project change.

Out of Scope for Project Management
Includes but is not limited to:

- All activities related to Organizational Change Management except for knowledge sharing services described in this Scope of Work; and
- Meeting summaries for any meetings that Ellucian does not lead or organize.

CANCELLATION OF SCHEDULED PROFESSIONAL SERVICES. The parties agree that once Client and Ellucian have scheduled a specific time during which Ellucian will provide Professional Services, Ellucian will be obligated to perform and Client will be obligated to obtain and pay Ellucian for such scheduled Professional Services, in accordance with the agreed upon schedule. If Client desires to cancel or postpone scheduled Professional Services, Client must provide Ellucian with notice of such cancellation or postponement (a "Services Cancellation Notice"). For the purposes of this Section, Services Cancellation Notices must be provided by sending an email to: services@ellucian.com. When cancelling scheduled Professional Services, Client will be subject to the following cancellation fees as liquidated damages and not as penalties:

(a) If Ellucian receives the Services Cancellation Notice more than thirty (30) calendar days prior to the date on which Professional Services are scheduled to commence, Client will not be assessed a services cancellation fee;

(b) If Ellucian receives the Services Cancellation Notice less than thirty-one (31) calendar days, but more than fourteen (14) calendar days, prior to the date on which Professional Services are scheduled to commence, Client will be assessed a services cancellation fee in an amount equal to fifty percent (50%) of the total anticipated fee for the scheduled Professional Services; and

(c) If Ellucian receives the Services Cancellation Notice less than fifteen (15) calendar days prior to the date on which Professional Services are scheduled to commence, Client will be assessed a services cancellation fee in an amount equal to one hundred percent (100%) of the total anticipated fee for the scheduled Professional Services.

In addition to cancellation fees due under this Section, Client will be assessed the full amount of any airline- or hotel-imposed cancellation charges associated with previously purchased non-refundable fares or reservations (as applicable) incurred by Ellucian as a result of the cancellation.

Ellucian Cloud Software Standards

© 2020 Ellucian. All Rights Reserved - Confidential & Proprietary

Overview

These Ellucian Cloud Software Standards ("Cloud Standards") set forth the Ellucian Cloud Software ordered by Client as defined by the Order Form.

Ellucian Cloud Software is provided pursuant to the Documentation applicable to the services and the Order Form. Ellucian's delivery of the Cloud Software is conditioned on Client's and its users' compliance with the Client's obligations and responsibilities outlined in the documents and standards. Ellucian may change these Cloud Standards and referenced documents at its discretion, provided the changes will not result in a material reduction in the performance, functionality, security or availability of the Cloud Software during the term of the Order Form.

Cloud Software is deployed at data centers or third party infrastructure service providers retained by Ellucian, with the exception of certain Cloud Software that are deployed at Client's data center or a third party data center retained by Client. Certain Cloud Software require Ellucian to deliver hardware components, including gateway equipment, to Client that enable Ellucian to provide these services. Client must provide space, power and cooling to deploy the Ellucian equipment, and ensure adequate network connectivity for Ellucian to support the services.

The Cloud Standards are comprised of two sections below. Section A applies to all Cloud Software, whether Software as a Service ("SaaS") or applications hosted in the Ellucian Cloud ("Managed Cloud"). Section B contains additional terms that only apply to Managed Cloud applications.

SECTION A: TERMS THAT APPLY TO ALL CLOUD SOFTWARE

1. **Additional Definitions.** Each term defined below has the meaning given to that term below whenever the term is used in the Order Form. Capitalized terms that are not otherwise defined in these Cloud Standards will have the meaning given to them in the Order Form and the underlying agreement, as applicable. Other capitalized terms may be defined below.

   "*Client Data*" means all electronic data or information submitted by Client to the Cloud Software.

   "*Cloud Software*" means the Software or Component System identified in the Order Form as SaaS or Managed Cloud.

   "*Defect*" means a material deviation between the Cloud Software and its Documentation for which Client has provided Ellucian with reasonably detailed information such that Ellucian can replicate the deviation.

   "*Documentation*" means the on-line and hard copy specifications that Ellucian provides for the Cloud Software and that describe the support, functional and technical capabilities of the Cloud Software.

   United States option: *"Full Time Equivalent" or "FTE"* is determined based on the U.S. Department of Education Institute of Education Sciences National Center for Education Statistics Integrated Postsecondary Education Data System ("IPEDS") client-reported Fall Total Full-time and Part-time Student Enrollment headcounts. The calculation of FTE students uses a fall student headcount model defined by IPEDS to derive a single value.

© 2020 Ellucian. All Rights Reserved - Confidential & Proprietary

Canada option: *"Full Time Equivalent" or "FTE"* is determined based on the client-reported Fall Total Full-time and Part-time Student headcounts for Undergraduate and Graduate enrollments to derive a single value.

"Maintenance" means providing Client with avoidance procedures or corrections for Defects. The details and procedures relating to the provision of Maintenance for the Cloud Software (collectively, the "Maintenance Standards") are specified in the Order Form.

"New Releases" means new editions (*i.e.*, major and minor releases) of the Cloud Software.

"*Software Supplement*" means additional terms and conditions applying to particular Cloud Software, as specified in the Documentation.

"*Software Support Services*" means, collectively, Maintenance and New Releases.

"*Third Party Component Providers*" means third parties utilized by Ellucian to provide components of the Cloud Software.

2. **License to Access and Use Cloud Software.** For the Cloud Software identified the Order Form, and only during the Cloud Software term, Ellucian grants Client a non-exclusive, non-transferable license to access and use the Cloud Software for Client's internal use only. This license is further subject to the usage parameters identified in each instance in the Order Form.

3. **Client Responsibilities and Prohibitions.**

- Client's authorized users will be provided with passwords, and Client must hold the passwords in strict confidence and not transfer, exchange, misuse or abuse the passwords in any way or attempt in any way to disable, deactivate, or render ineffective the password protection of the Cloud Software.
- Client will be responsible for its users' compliance with this Order Form.
- Client will be responsible for the accuracy, completeness, quality, and legality of Client Data and of the means by which it acquired Client Data.
- Client will use commercially reasonable efforts to prevent unauthorized access to or use of the Cloud Software and will notify Ellucian promptly of any such unauthorized access or use.
- Client will use the Cloud Software only in accordance with this Order Form, the Documentation, and applicable laws.
- Client will not make the Cloud Software available to anyone other than its authorized users.
- Client will not sell, resell, rent, or lease the Cloud Software.
- Client will not create any derivative works based on the Cloud Software.
- Client will not use the Cloud Software to store or transmit any viruses, worms, time bombs, Trojan horses and other harmful or malicious code, files, scripts, agents, or programs.
- Client will not attempt to gain unauthorized access to the Cloud Software or related systems or network.
- Client will not use the Cloud Software to communicate, by way of electronic communication or otherwise, any message, data or material that: (i) is libelous, harmful to minors, obscene or constitutes pornography; (ii) infringes the copyrights, patents, trade secrets, trademarks, trade names or other proprietary or privacy rights of a third party or is otherwise unlawful; or (iii) would otherwise give rise to civil liability, or that constitutes or encourages conduct that could constitute a criminal offense, under any applicable law or regulation.

© 2020 Ellucian. All Rights Reserved - Confidential & Proprietary

- Certain Cloud Software is subject to additional terms and restrictions as set forth in Software Supplements. Further, Ellucian may utilize certain Third Party Component Providers. With respect to the use of the Third Party Component Providers' services, Client agrees to comply with any third party contractual provisions outlined in the Software Supplements. In all cases, if any terms of a Software Supplement conflict with any other terms of the Order Form, the terms of the Software Supplement will control.

4. **Service Level Agreement.** Ellucian will provide the Cloud Software consistent with the Service Level Agreement (the "SLA") specified in the Cloud Software Documentation.

5. **Software Support Services.** During the Cloud Software term, as part of the subscription fees set forth in the Order Form, Ellucian will provide Software Support Services for the Cloud Software in accordance with the Maintenance Standards. The application of Software Support Services by Ellucian may result in changes in the form, timing, or other features of the Cloud Software. Ellucian will apply the Software Support Services to the Cloud Software to include Maintenance and New Releases.

6. **Backups.** Ellucian will conduct regular backup of Client Data. Backups will adhere to Ellucian's internal backup controls. Ellucian will not be responsible for the accuracy of Client Data but will only be responsible for appropriately backing up the Client Data contained in the Cloud Software. Client may request copies of database backups for archival purposes. Upon such request, Ellucian will make a copy of the database available to Client for secure download monthly. Each database backup made available in this manner will replace the previously available file. It will be the Client's responsibility to retrieve those files in a timely manner.

7. **Disaster Recovery.** Ellucian will maintain a disaster recovery plan for the Cloud Software. If the Cloud Software production environment is damaged in whole or in part preventing Ellucian from securely delivering the Cloud Software, Ellucian will failover the primary Cloud Software environment to Ellucian's disaster recovery environment. Ellucian's recovery time objective (RTO) is twenty-four (24) hours, measured from the time the Cloud Software is declared to have become unavailable until such services become available and operational in accordance with applicable service levels, as measured by Ellucian. Ellucian's recovery point objective (RPO) is two (2) hours, measured from the time the first transaction is lost or from the time the Cloud Software became unavailable. Ellucian will test its disaster recovery plan annually and will, upon Client's written request, provide Client with a summary of the most recent results. Note: Any Cloud Software downtime in excess of the aforementioned objectives will contribute towards the calculation of the SLA as defined herein.

8. **Personal Data**. To affect the purposes of an Order Form, Client may from time to time provide Ellucian with certain personal data (Client representing that it has the right to do so in each such instance) of Client's students, prospective students, parents of students, alumni, faculty members and employees that is regulated by various laws and regulations ("Client Personal Data"). Ellucian confirms that for so long as it processes Client Personal Data in respect of the relevant Order Form, Ellucian will adhere to the provisions for the protection of Client Personal Data set forth in the Data Protection Agreement.

9. **Third Party Components.** Ellucian's obligation to provide Client with access to and use of Cloud Software that includes third party services or software ("Third Party Component(s)") is limited to providing Client with the Third Party Component portion of the Cloud Software to the extent the applicable third party owner provides it to Ellucian. If an agreement authorizing Ellucian to resell or

© 2020 Ellucian. All Rights Reserved - Confidential & Proprietary

sublicense a Third Party Component, prior to the Expiration Date set forth in the applicable Order Form or prior to the expiration of any renewal, is terminated or expires, or if the terms of the relevant agreement are substantially modified so as to prevent Ellucian from providing the Third Party Component(s) of the Cloud Software in a commercially reasonable manner under the existing terms, then Ellucian's obligation to provide Client with access to and use of and Client's obligation to pay Ellucian for the applicable Cloud Software will, as applicable, automatically terminate upon the effective date of the termination, expiration, or material modification.

10. Fee Adjustments.

10.1 *FTE* – The fee for certain Cloud Software allows Client to use such Cloud Software for not more than the "Contracted FTE" number where specified in the Order Form. Ellucian reserves the right to perform an annual review of Client's then-current FTE. If Client's actual FTE exceeds the then-current Contracted FTE, Ellucian will have the right to charge additional fees associated with the increase or variation for the time that such increase or variation was in effect, based on Ellucian's then-current standard fees in effect at the time of such increase. Upon the payment by Client of such fee, Client's Contracted FTE will be increased to equal the then-current next tier for Contracted FTE. For avoidance of doubt, Client will in no event be due a credit, refund or fee reduction in the event that Client's actual FTE decreases below the Contracted FTE at any time during the Software term. Client agrees to provide Ellucian with reasonable access to its personnel, facilities, and documentation during normal business hours and with reasonable, prior notice, for purposes of ascertaining Client's then-current FTE.

10.2 *3rd Party* Escalators – Additional fees charged by 3rd party providers due to changes in the fee calculator applied to Cloud Software will be added to the annual fees payable hereunder. By way of example, if a 3rd party database license fee calculator is changed during the Software term resulting in increased fees for the applicable configuration for Cloud Software, then such fee increase(s) will be added to the annual fees payable hereunder.

10.3 Extraordinary *Resource Requirements* – Cloud Software is provisioned to maintain reasonable application performance levels under normal usage. Application performance may be impacted if Client does not disclose relevant information during the discovery process or if Client does not implement practices recommended by Ellucian. Ellucian is not responsible for application performance issues caused by Client's failure to provide proper discovery or Client's failure to implement recommended practices. Additional resources will not be provided under this Amendment to remedy such application performance issues without the execution of a subsequent amendment by duly authorized representatives of each party and the payment by Client of the applicable associated fees.

11. Suspension of Cloud Software. If Client fails to pay to Ellucian within thirty (30) days after Ellucian makes written demand for subscription fees due for Cloud Software, and payment of the amount in question is not the subject of a *bona fide* dispute, then, in addition to preserving its rights to collect payment of the past-due amount and all accompanying late fees, and all other rights and remedies that Ellucian may have at law or in equity, Ellucian may, in its sole discretion and without further notice to Client, suspend its performance of the Cloud Software.

12. Delivery. Ellucian will, as soon as reasonably practical following the Execution Date, provide the necessary process and procedure for Client's access to the Cloud Software in accordance with the

© 2020 Ellucian. All Rights Reserved - Confidential & Proprietary

Order Form (the date on which Client is provided with this access is the "Delivery Date" for the purposes of the Cloud Software). In providing the Cloud Software under the Order Form, Ellucian may use a combination of remote services, centralized services, and onsite services, using personnel worldwide.

13. **Post Termination Actions.** Upon termination or expiration of the Cloud Software term, Client access and use of the Cloud Software will immediately cease, and Client will have no further access to or use of the Cloud Software. Provided that Client has provided Ellucian with a written request at least five (5) days after the end of the Cloud Software term, Ellucian will, at no additional charge to Client, promptly provide Client with a copy of all Client Data then in Ellucian's possession, in a commercially reasonable format. Such Client Data will then be securely deleted by Ellucian in accordance with Ellucian's then-current data security, retention, and disposal policies.

14. **Use of Client Data.** Ellucian shall have the right to (a) use and otherwise process, and to allow subcontractors/agents to use and otherwise process, Client Data solely for the purposes of performing Ellucian's obligations under the Order Form and complying with applicable law; (b) to use and otherwise process Client Data for Ellucian's internal business purposes, including development, analysis and corrective purposes in connection with the Cloud Software, and for otherwise improving and enhancing the Cloud Software or Ellucian's business; and (c) to use or otherwise process Aggregated Data for Ellucian's business purposes, including composing its public statements and marketing materials describing and/or promoting Ellucian and/or the Software and Services. "Aggregated Data" means data derived from Client Data and data that has been combined into databases which may include third party data, which in all instances (i) does not identify any individual and (ii) is not attributed or attributable to a specific customer.

15. **Limited Warranty; Exclusive Remedy.** Except as otherwise expressly provided for in any Software Supplement, Ellucian warrants that, during the Cloud Software term, the Cloud Software will operate without Defects. For each Defect, Ellucian, as soon as reasonably practicable and at its own expense, will provide Client with an avoidance procedure or a correction of the Defect (in accordance with the Software Support Services provisions and the associated Maintenance Standards). If, despite its reasonable efforts, Ellucian is unable to provide Client with an avoidance procedure for or a correction of a Defect, then, subject to the limitations set forth in the Limitation of Liability, Client may pursue its remedy at law to recover direct damages resulting from the breach of this limited warranty. These remedies are exclusive and are in lieu of all other remedies, and Ellucian's sole obligation for breach of this limited warranty is contained in this Section. ELLUCIAN MAKES NO OTHER WARRANTIES WHATSOEVER, EXPRESS OR IMPLIED, AND ELLUCIAN EXPLICITLY DISCLAIMS ALL WARRANTIES OF MERCHANTABILITY, NON-INFRINGEMENT, AND FITNESS FOR A PARTICULAR PURPOSE. ELLUCIAN EXPRESSLY DOES NOT WARRANT THAT THE CLOUD SOFTWARE, IN WHOLE OR IN PART, WILL BE ERROR FREE OR WILL OPERATE WITHOUT INTERRUPTION.

16. **LIMITATION OF LIABILITY FOR CLOUD SOFTWARE.** ELLUCIAN'S CUMULATIVE LIABILITY WILL NOT EXCEED THE SUBSCRIPTION FEES THAT CLIENT ACTUALLY PAID TO ELLUCIAN UNDER THE ORDER FORM FOR THE CLOUD SOFTWARE GIVING RISE TO THE LIABILITY FOR THE SIX (6) MONTH PERIOD PRECEDING THE DATE ON WHICH SUCH LIABILITY FIRST AROSE. IN NO EVENT WILL ELLUCIAN BE LIABLE TO CLIENT FOR ANY PUNITIVE, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, OR ANY LOST BUSINESS OR LOST PROFITS, WHETHER BASED ON BREACH OF CONTRACT, TORT (INCLUDING NEGLIGENCE), PRODUCT LIABILITY, OR OTHERWISE, AND WHETHER OR NOT ELLUCIAN HAS BEEN

© 2020 Ellucian. All Rights Reserved - Confidential & Proprietary

ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. THE LIMITATIONS AND EXCLUSIONS IN THIS LIMITATION OF LIABILITY WILL ALSO SPECIFICALLY SURVIVE A FAILURE OF ESSENTIAL PURPOSE OF ANY REMEDIES THAT MAY BE PROVIDED IN THIS ORDER FORM OR THE AGREEMENT.

SECTION B: ADDITIONAL TERMS APPLICABLE TO MANAGED CLOUD

1. **Standard External Interfaces for Integrations.** Installation and operation of supported applications may require installation of third-party applications, which may require connectivity to environments external to Ellucian or Client networks. Only the following defined integration paths, integrations and interfaces will be installed and supported under the Order Form: (i) those defined baseline integration paths, integrations and interfaces listed below (the "Baseline Integrations"); and (ii) any additional integrations and interfaces specifically listed in the Order Form.

   As it relates to any external interfaces/defined third party integration services as described herein, Ellucian will:

   a. Open appropriate access to the Cloud Environment based on the requirements provided by Client. Access is provided via:
      i. *Public Internet Access* – Used for applications such as Portal and Self-Service.
      ii. *Site-to-Site VPN* – A pair of VPN routers is configured, monitored, and maintained by Ellucian to provide encrypted access for administrative Application interfaces; as a network path for integrations to on-campus services; or for direct access to Database instances for Client programmers. The Site-to-Site VPN will be configured with industry standard encryption protocols.
   b. Support administrative connectivity to the Cloud Environment from defined IP addresses or IP network subnets with the following protocols as appropriate: HTTP (for non-sensitive/non-protected data only); HTTPS; FTPS; SSH.
   c. Maintain at least 1Gb/sec bi-directional datacenter connectivity to the Public Internet with diverse providers and physical entrances.
   d. Maintain Internet firewalls to protect the applications from unwanted and inappropriate access. Firewalls shall be configured with a default deny rule for inbound traffic.

   As it relates to any external interfaces/defined third party integration services as described herein, Client will:

   a. Submit any new interface or connectivity requirement requests to Ellucian in writing at least fourteen (14) days in advance.
   b. Provide Ellucian with a point-of-contact for communication of activities, planning and requests/requirements.

2. **Delivery Environment**.

   2.1 Ellucian will deliver the Managed Cloud services from a cloud environment satisfying the requirements of the applications hosted under the Order Form.

   2.2 Ellucian will be responsible for its own costs related to Ellucian's use of the cloud environment.

   2.3 Ellucian will be responsible for supplying licenses and functionality for the following items in the cloud environment:

   a. Backup
   b. Disaster Recovery
   c. Internet connectivity
   d. Load balancing
   e. Monitoring

© 2020 Ellucian. All Rights Reserved - Confidential & Proprietary

f. Operating Systems
g. Security Scanning

3. **Managed Cloud Services Functional Requirements**.

3.1 Ellucian will host all production and non-production environments identified in the Order Form and all associated applications.

3.2 Ellucian will provide Client storage for all applications and associated databases.

3.3 Ellucian will provide a secure method for the Client to upload and download files necessary for the primary function of the applications.

3.4 Ellucian uses a global delivery model in performing the Managed Cloud services, meaning that Ellucian personnel worldwide may be involved in delivery.

4. **Transition Services**. Ellucian will establish a team (the "Transition Team") to be led by a Transition Manager. The Transition Team will plan, direct and coordinate the migration of IT knowledge, systems, processes, data and capabilities from the Client and/or third parties to Ellucian for the delivery of the applications. The timeframe for any transition services will be based on the project scope/requirements and will be finalized and agreed upon by the parties during or promptly following the initial meeting between Ellucian and Client.

The Transition Manager will be Ellucian's primary Cloud point of contact during performance of the transition services as described herein. The Transition Manager will be responsible for:

a. Managing transition deliverables, including the charter, schedule, and Client Care/portal site.
b. Overseeing communications and delivering according to a plan jointly developed and agreed upon by the parties.
c. Confirming all resources involved in the transition services have a common understanding of the needs of both businesses as well as the project deliverables.
d. Managing scope and delivery timetables to be consistent and complementary with the objectives of the transition services.
e. Monitoring progress and reporting the status of the transition services to all stakeholders.

5. **Ellucian Communications with Client**. During the Cloud Software term, Ellucian will regularly communicate with Client regarding product adoption, upgrades and other projects pertaining to the cloud environment, change management, and problem resolution. In addition, Ellucian will identify a primary point of contact who will act as the point of escalation for any Managed Cloud services-related activities.

6. **Operating System Administration Services**. Ellucian will provide Operating System ("OS") Administration for the OS environments in the cloud environment. In this regard, Ellucian will be responsible for:

a. Installations and configurations of the OS environments for application environments.
b. Maintaining access to and control of special user accounts used for OS administration (i.e. "ROOT" or "Administrator").
c. Installation of patches and updates from the applicable vendor(s) for OS environments.
d. Troubleshooting and resolving OS incidents.

7. **Database and Application Administration Services**. Ellucian will provide Database Administration ("DBA") services and application administration services for the databases, application homes and application environments as defined in the Order Form.

© 2020 Ellucian. All Rights Reserved - Confidential & Proprietary

7.1 Ellucian will:

a. Install, configure, and update applications as defined in Schedule A, and database environments for vendor-specific systems.
b. Configure, as defined in the Order Form, baseline application Home environments for vendor-specific systems.
c. Perform database system level security administration for the database environments.
d. Perform database and application home clones, system refreshes or replications, for the cloud environment as agreed by the parties up to two (2) requests per month.
e. Exercise exclusive access and control of DBA privileged or super-user level passwords, to include those application accounts requiring such access, to databases, database instances and applications.
f. Provide troubleshooting and diagnostic support for the databases, database instances and database homes.
g. Provide troubleshooting and diagnostic support for the applications, application configurations and application homes.
h. Provide reasonable assistance with application maintenance issues requiring database and application administration knowledge and experience for designated applications.
i. Perform tuning and adjusting of database and database instance, and application parameters and configurations based on the specific vendor's recommendations, input from users, and response time sampling based on Ellucian's standard practices for designated applications.
j. Communicate with third party vendors or other Ellucian business units to resolve escalated issues as they arise for designated applications.

7.2 Client will:

a. Appoint or provide a user liaison to coordinate and perform the application security administration functions and duties as requested by the Client for the applications.
b. Appoint or provide user liaison(s) to coordinate and perform the application configuration administration functions and duties as requested by the Client for the applications.
c. Appoint or provide a single named user liaison to coordinate ERP activities of patches and upgrades for the applications.
d. Provide for programmers, analysts and user liaisons to research or review custom code, data level problems or data integrity issues for the applications, and to develop and/or correct Client-developed customizations to applications.
e. Maintain active software support contracts with Ellucian and third party vendors for all applications such that the appropriate vendor will provide personnel to develop and/or correct code in the applications as needed.
f. Provide functional, technical programming and user liaisons to provide troubleshooting of application issues and to communicate with the applicable software vendor, including opening support contacts with the applicable software vendor.
g. Perform the function of the job and job stream management role, if applicable; and be responsible for creating, maintaining, and troubleshooting application jobs and job streams submitted either through the application or in a supported scheduling system.
h. Provide support for all user functions, management and other applications not defined in this Order Form.
i. Communicate any applicable database or application software standards and procedures for access to designated systems to participating students, faculty, staff and alumni.
j. Provide all end-user workstation and mobile device desktop and peripherals support for the applications.

© 2020 Ellucian. All Rights Reserved - Confidential & Proprietary

k. Provide support for all user reporting for applications (including those applications defined in the Order Form), including other ancillary third party systems.

8. **Systems Monitoring**. Ellucian will monitor the cloud environment on a 24x7x365 basis.

8.1 Ellucian will monitor the application components and the cloud environment for availability.

8.2 Client will allow Ellucian-based remote services monitoring and security tools reasonable access to the applications.

9. **Managing Service Requests**. Ellucian will deploy an Information Technology Service Management ("ITSM") tool capable of providing for service incident management, service request fulfillment, change management and knowledge management. Ellucian will adhere to internal change and incident management controls.

9.1 Ellucian will:

a. Deploy a self-service web portal for the reporting of service incidents, service requests and change requests.

b. Provide necessary training to Client's IT staff on the utilization and documentation of requests via the ITSM Self-Service Module.

c. Provide a service desk with a U.S.-based toll-free phone number monitored on a 24x7x365 basis (including site holidays). Please note that the service desk does not provide end-user support for the applications supported in the Order Form.

d. Escalate unresolved service incidents or service requests as designated in Ellucian's incident management process.

9.2 Client will provide Ellucian with current and updated contact information.

10. **Conditions to offer Managed Cloud Services**. In order for Ellucian to provide the Managed Cloud services, Client will be responsible for the following:

a. Licensing all applications listed in the Order Form to permit the applications (and other necessary components as reasonably determined by Ellucian and agreed to and approved by Client in writing) to be installed and used on the cloud environment.

b. Permitting and scheduling required downtime within reasonable timeframes for the applications and underlying systems for upgrades and maintenance. Client shall not require Ellucian to perform systems maintenance to the production systems while end users, staff, faculty or other users are using such systems. Certain non-production maintenance activities require terminating user access to the applications.

c. Consulting with Ellucian for projects to establish requisite lead times, and Ellucian shall not be responsible for delays or failure to meet Client's expectations if adequate lead time is not provided.

d. Bearing the cost of all Client-maintained customizations and customized code enhancements required to operate within the cloud environment to the extent not expressly provided through the Order Form.

e. Not, without the express written consent of Ellucian (such consent not to be unreasonably withheld or delayed), (i) installing additional software on, (ii) requiring additional software to be installed on, or (iii) modifying applications or any other software or systems installed on or within, the cloud environment.

ellucian.

Ellucian Cloud Service Level Agreement

1. Coverage and Terminology.

This Service Level Agreement (the "SLA") applies to the production Cloud Software instance supported under the Order Form.

Availability: "Availability" means the percentage of a particular month (based on 24-hour days for the number of days in the subject month) that the production Cloud Software is available for remote access by Client as measured by Ellucian pursuant to the Service Level Objectives defined in the Service Level Objective section below.

Measurement: Availability is measured as the ratio of actual Availability to expected Availability resulting in an "Achieved Availability" percentage. Achieved Availability is determined by calculating the aggregate minutes, during the periods the production Cloud Software instance is scheduled to be available ("Scheduled Uptime"), that the production Cloud Software instance is unavailable for use by Client ("Unscheduled Outage"), divided by the total aggregate minutes of scheduled Availability for the month which is Scheduled Uptime minus the time the production Cloud Software is scheduled to be unavailable with Client agreement ("Scheduled Downtime"), and rounded to the nearest 10^{th} (tenth) unless otherwise indicated in the specific SLA definition. The "Achieved Availability" calculation is expressed as:

Achieved Availability = 1 – (Unscheduled Outage / (Scheduled Uptime - Scheduled Downtime))

For the avoidance of doubt, the unavailability of the production Cloud Software instance as a result of scheduled maintenance and emergency maintenance windows will not be considered a service outage and will not give rise to Service Level Credits.

2. Service Level Objective.

Ellucian aims to achieve one hundred percent (100%) Availability for the production Cloud Software instance. Subject to the terms in this SLA, Ellucian will provide ninety-nine and one half percent (99.5%) Availability for the production Cloud Software instance.

A monthly Availability report will be made available within ten (10) business days following Client's written request.

3. Service Level Credits.

Except under the conditions mentioned in the Conditions section below, if the Availability of the production Cloud Software instance is less than ninety-nine and one-half percent (99.5%), Ellucian will issue a credit (a "Service Level Credit") to Client according to the following tables.

Production Cloud Software	
Availability	**Service Level Credit Issued by Ellucian ***
>= 99.50%	None
99.00% - 99.49%	5% of applicable monthly fee
97.00% - 98.99%	10% of applicable monthly fee
95.00% - 96.99%	15% of applicable monthly fee
92.00% - 94.99%	20% of applicable monthly fee

© 2020 Ellucian. All Rights Reserved - Confidential & Proprietary

ellucian.

Production Cloud Software	
Availability	**Service Level Credit Issued by Ellucian ***
<92%	25% of applicable monthly fee; plus 7% for each additional 3.3% of total downtime in the applicable calendar month, up to a maximum of 100% of the applicable monthly fee

* For the avoidance of doubt, and without limitation, Service Level Credits are subject to the terms and conditions provided for in Section 6 ("Service Level Credit Request, Payment Procedures") of this SLA.

4. Maintenance Procedure.

4.1 Ellucian will schedule maintenance windows to perform upgrades to new releases of Cloud Software. Clients will receive notification at least two weeks in advance for any maintenance windows requiring production environments to be unavailable.

4.2 Ellucian reserves the right to perform emergency maintenance (for example, to restore Cloud Software or remediate security vulnerabilities) without any prior notification, should it be deemed necessary to protect and maintain the security, availability or integrity of the Cloud Software.

5. Conditions.

5.1 Client will not receive any Service Level Credits under this SLA in connection with any failure or deficiency caused by or associated with any of the following:

- Outages, delays, or latency elsewhere on the Internet (including but not limited to upstream internet service providers (ISPs)) that hinder access to the Cloud Software;
- Scheduled maintenance, to the extent provided herein, and emergency maintenance and upgrades;
- Domain Name Server (DNS) issues and DNS propagation outside the direct control of Ellucian;
- Browser or DNS caching that may make the production Cloud Software appear inaccessible when others can still access it;
- False SLA breaches reported as a result of outages or errors of any Ellucian measurement system;
- File transfer, email or webmail delivery and transmission;
- Circumstances beyond Ellucian's reasonable control;
- Any issues caused by the action of third party software, contractors, or vendors (other than third parties authorized by Ellucian); or
- Functional Cloud Software setup, configuration, or functionality outside the scope of the Order Form.

5.2 Ellucian is not responsible for localized incidents affecting a subset of the population. Further, Ellucian is not responsible for intermittent availability issues such as those that cannot be documented, measured or repeated.

© 2020 Ellucian. All Rights Reserved - Confidential & Proprietary

ellucian.

6. Service Level Credit Request, Payment Procedures.

6.1 As part of Ellucian's obligation to provide the Cloud Software, Ellucian will provide oversight for monitoring this SLA utilizing the availability metrics information provided through the use of an industry standard monitoring tool (such tool will be the authoritative system for service level measurement under this SLA). Utilizing this output, and in order to receive a Service Level Credit, Client must make all Service Level Credit requests via email or Ellucian's ticketing system. Each Service Level Credit request in connection with this SLA must include Client's account name and the dates and times of the unavailability of the production Cloud Software and must be received by Ellucian within thirty (30) days after such production Cloud Software was not available as defined herein. If Ellucian can confirm the unavailability, and after Ellucian performs a root cause analysis which identifies that the production Cloud Software was the cause of the unavailability, then Service Level Credits will be applied within two (2) months after Ellucian's receipt of Client's Service Level Credit request.

6.2 The Service Level Credit percentage will be based on the amount of the Cloud Software fee paid by Client for Cloud Software for the month being measured. Notwithstanding anything to the contrary herein, the total amount credited to Client in a particular month under this SLA will in no event exceed the total Cloud Software fee paid by Client for such month. Service Level Credits are exclusive of any applicable taxes charged to Client or collected by Ellucian. Such Service Level Credits are Client's sole and exclusive remedy with respect to any failure or deficiency in the production Cloud Software. No Service Level Credits will be issued for non-production environments.

6.3 Note: Service Level Credits are not refundable and can be used only towards future billing charges for the Cloud Software. Provided, however, if a Service Level Credit is due in the last billing cycle of the Cloud Software Term, then the Service Level Credit will be applied against the fees due in the last billing cycle of the Cloud Software Term or refunded, as the case may be.

ellucian.

Ellucian Data Protection Agreement

"Data Protection Law" means all laws and regulations relating to the processing of Client Personal Data by Ellucian, each as and when applicable, including but not limited to regulation (EU) 2016-679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data and repealing Directive 95/46/EC (General Data Protection Regulation) ("GDPR") and any applicable national implementing law as amended from time to time.

In order to adduce adequate safeguards with respect to the protection of Client Personal Data, the parties agree to the following clauses:

Data Protection

1. Ellucian confirms that for so long as it processes Client Personal Data in performing its obligations under an Order Form, it will:

(a) maintain appropriate technical and organizational data security measures, including a written information security policy to protect the Client Personal Data consistent with applicable laws and regulations;

(b) maintain the confidentiality of Client Personal Data in accordance with the Master Terms and the relevant Order Form;

(c) process the Client Personal Data only in accordance with the Client's instructions. The parties agree that the relevant Order Form contains instructions from Client to Ellucian to process Client Personal Data as reasonably required to perform the obligations described therein. Client hereby authorises Ellucian to take such steps in the processing of Client Personal Data on behalf of Client as are reasonably necessary for the performance of Ellucian's obligations under the applicable Order Form. Additional instructions outside of the scope of the applicable Order Form, including instructions regarding assisting Client with its requirements under Articles 32 to 36 of GDPR or other Data Protection Law, will be agreed by the parties in writing, including any additional fees payable by Client to Ellucian for carrying out instructions that require Ellucian to change or supplement its existing business process and technical and organisational data security measures;

(d) limit access to the Client Personal Data to Ellucian's employees, agents and subcontractors (including Ellucian group companies) who have a need to access such Client Personal Data to perform Ellucian's obligations under the relevant Order Form. Client agrees that Ellucian may use subcontractors to fulfill its obligations under the applicable Order Form so long as Ellucian's relationship with such subcontractors complies with clause (e) below;

(e) require that its employees, agents and subcontractors who have access to the Client Personal Data agree to abide by substantially similar restrictions and conditions that apply to Ellucian with regard to such Client Personal Data;

(f) implement appropriate administrative, technical and physical safeguards designed to ensure the security or integrity of the Client Personal Data and protect against unauthorized access to or use of such Client Personal Data that could result in substantial harm or inconvenience to the Client;

(g) notify Client of a Information Security Breach as soon as reasonably practicable and without undue delay after Ellucian becomes aware, and take reasonable steps to mitigate the effects of the Information Security Breach. An "Information Security Breach" is an event that is known to have resulted in unauthorized access to, or unauthorized use or disclosure of, Client Personal Data;

(h) make available to Client such information as is strictly necessary for the Client to demonstrate its compliance with applicable data protection law at no cost to Ellucian. Any costs arising in connection with Ellucian's obligations under this clause shall be promptly reimbursed to Ellucian by the Client upon reasonable request. Ellucian uses independent third party auditors to verify the adequacy of its security measures for Cloud Software and Cloud Cervices. No more than once per calendar year, Client may request and Ellucian will provide: (i) subject to Client executing a non-disclosure agreement, a copy of the most recent independent security attestation report associated with the provision of Cloud Software or Cloud Services as

Revision Date: January 4, 2021
© 2020 Ellucian. All Rights Reserved - Confidential & Proprietary

applicable, and (ii) a copy of Ellucian's then-current information security policies and standards that relate to security controls associated with the Cloud Software or Cloud Services as applicable; and

(i) not transfer the Client Personal Data from within the European Economic Area ("EEA") to locations outside the EEA unless it takes such measures as are necessary to ensure the transfer is in compliance with applicable data protection law. Such measures may include (without limitation) transferring the Client Personal Data to a recipient in a country that the European Commission has decided provides adequate protection for personal data, to a recipient that has achieved binding corporate rules authorization in accordance with applicable data protection law, or to a recipient that has executed standard contractual clauses adopted or approved by the European Commission.

2. As applicable, the parties may agree to specify in individual Order Forms the subject-matter and duration of processing of Client Personal Data, the nature and purpose of the processing, the type of personal data and categories of data subjects, the obligations and rights of the Client as controller and any specific processing instructions.

3. The parties agree that on the termination or completion of the provision of the relevant Software or services the subject of an Order Form, Ellucian and its subcontractors shall, at the Client's request, return all the Client Personal Data in their possession (if any) and the copies thereof to the Client or shall destroy all the Client Personal Data and certify to the Client that it has done so, unless legal obligations imposed upon Ellucian prevent it from returning or destroying all or part of the Client Personal Data transferred. In the latter case, Ellucian warrants that it will maintain the confidentiality of the Client Personal Data transferred and will not actively process (except for storage and deletion) such Client Personal Data.

ellucian

Maintenance Standards – Advantage Plus Level

I. Defined Terms:

"Notification" means a communication to Ellucian's Action Line by means of: (i) Ellucian's Customer Support Center; (ii) the placement of a telephone call; or (iii) the sending of an e-mail, in each case, in accordance with Ellucian's then-current policies and procedures for submitting such communications.

"Priority One Call" means a Notification that Client believes that a Defect has caused: (i) a full failure (i.e., "crash") of its computer system; (ii) a full failure of the Licensed Software; or (iii) a failure of its computer system or the Licensed Software which, in either case, prevents Client from performing data processing which is critical to Client's operations on the day on which the alleged Defect is reported.

"Priority Two Call" means a Notification that Client believes that a Defect has caused a partial failure of Client's computer system or the Licensed Software which significantly hinders its ability to perform data processing which is critical to Client's operations on the day on which the alleged Defect is reported.

"Priority Three Call" means a Notification that Client believes that a Defect has caused an intermittent failure of, or problem with, its computer system or the Licensed Software that causes a significant delay in Client's ability to perform data processing on the day on which the alleged Defect is reported, but where the processing is not critical to Client's operations.

"Priority Four Call" means a Notification that Client believes that a Defect has caused a problem with its computer system or the Licensed Software that does not significantly affect critical processing.

II. Hours During Which Ellucian's "Action Line" Telephone Support Will be Available to Client in Connection with the Provision of Maintenance: Seven (7) days per week, 24 hours per day.

Note: Ellucian's Action Line uses an automated answering system to receive and record telephone calls from clients, as well as to receive reports via Ellucian's Customer Support Center and e-mail. This system allows Ellucian's Action Line staff to classify, prioritize, record basic details, conduct certain research, and assign a consultant to respond to a client's telephone call.

III. Targeted Response Times: With respect to Ellucian's Maintenance obligations, Ellucian will use diligent, commercially reasonable efforts to respond to Notifications from Client relating to the Baseline Software identified in an Order Form in accordance with the following guidelines:

Priority One Calls – one (1) hours or less.
Priority Two Calls – four (4) hours or less.
Priority Three Calls – twenty-four (24) hours or less.
Priority Four Calls – seventy-two (72) hours or less.

Notes:
(1) For purposes of these targets, a "response" will mean as an initial contact from an Ellucian representative to Client to begin evaluation of the problem reported under one of the categories of calls identified above.
(2) As a prerequisite to Ellucian's obligation to respond to Client, Client must follow the policies and procedures of Ellucian's Action Line (such as the dialing of a particular phone number, the categorization of a particular problem, etc.) when submitting its Notification.

IV. Renewal Terms: Maintenance will renew automatically on a year-to-year basis, subject to no more than a seven percent (7%) annual increase, unless Client shall have notified Ellucian in writing of Client's intent not to renew Maintenance following the Expiration Date specified in an Order Form. In order to be of any force or effect, Client's notice must be delivered to Ellucian at least ninety (90) days before such Expiration Date.

Revision Date: June 2020

ellucian

Maintenance Standards - Subscription Advantage Level

1. Ellucian's Action Line will be available to Client for Defect reporting five (5) days per week, Monday through Friday (excluding national holidays and Ellucian-observed holidays), from 8:00 AM to 8:00 PM (Eastern U.S. Time). However, production outages will be supported 24x7x365 as long as Client contacts Ellucian's Action Line via the telephone number provided to Client.

2. The priority of an active incident is indicated at the time the incident is first reported to Ellucian. Client must report the priority of the incident using the definitions below. Ellucian will review and validate the priority for open incidents and may adjust the priority to better align with these definitions.

   Ellucian uses reasonable commercial efforts to respond to Client's Notifications in accordance with the following guidelines:

Priority Levels	Definition	Target Response Times
Priority 1 - Critical	A Notification that the production Cloud Software instance is not available for remote access by Client or that Client believes that a Defect has caused: (i) a full failure (i.e., "crash") of its computer system; (ii) a full failure of the Cloud Software; or (iii) a failure of its computer system or the Cloud Software which, in either case, prevents Client from performing data processing which is critical to Client's operations on the day on which the alleged Defect is reported.	1 hour or less
Priority 2 - High	A Notification that Client believes that a Defect has caused a partial failure of the Cloud Software or a failure that significantly hinders Client's ability to perform data processing which is critical to Client's operations on the day on which the alleged Defect is reported	4 hours or less
Priority 3 - Medium	A Notification that Client believes that a Defect has caused an intermittent failure of, or problem with, the Cloud Software, or that causes a significant delay in Client's ability to perform data processing on the day on which the alleged Defect is reported, but where the processing is not critical to Client's operations	1 business day or less
Priority 4 - Low	A Notification that Clients believes that a Defect exists, but it does not significantly affect critical processing	3 business days or less

   For purposes of these targets, a "response" will mean an initial contact from an Ellucian representative to Client to begin evaluation of the problem reported under one of the categories of calls identified above. As a prerequisite to Ellucian's obligation to respond to Client's Notification(s), Client must follow Ellucian's policies and procedures (such as the dialing of a particular phone number, the categorization of a particular problem, etc.) when submitting a Notification.

   A "Notification" means a communication to Ellucian by means of: (i) Ellucian's Action Line; (ii) the placement of a telephone call; or (iii) the sending of an e-mail, in each case, in accordance with Ellucian's then-current policies and procedures for submitting such communications.

3. Response times listed in this Exhibit reflect targets and should not be construed as contractual obligations. Response time commitments do not promise a complete resolution within the stated time frames. Rather, the time commitment is intended to indicate the estimated target time interval in which Ellucian will contact Client after triaging and routing. Ellucian will begin working the request to seek a resolution of the issue once communication with Client has been established to verify the request and depending on the priority level as described above.

Degree Works™ Operational Environment

- Ellucian supports Degree Works™ operating in a particular hardware environment, with certain third-party software applications as noted below. Operating in a different hardware environment or substituting software applications for those on this list may result in errors and is not supported by Ellucian.
- Client must obtain licenses to these products from the applicable third-party owner and/or from the owner's authorized vendors.
- This list is subject to change without notice and will be updated from time to time as new releases of the product are introduced. Moving to a new release constitutes acceptance of the new Operational Environment terms.

Hardware

- Intel-based x86 Linux server running either
  - Red Hat Enterprise Linux 6.x or 7.x (64-bit) or
  - Oracle Linux Server 6.x or 7.x (64-bit)

Software

- GCC 4.x (GNU Compiler Collection) with sharutils and ncurses-devel package;
- Oracle 12c Release 1, Oracle 12c Release 2 or Oracle 19c database license
  - Must include the Pro*C pre-compiler;
- Java 1.8 with JDK 1.8.0_172+
  - Must include the ojdbc8.jar driver;
- RabbitMQ;
- UUENCODE and UUDECODE;
- Perl 5.8+;
- OpenSSL 1.0.1 (Linux 6.x only) or 1.0.2;
- Apache Tomcat 9.0.22;
- Apache FOP 1.1;
- If Client uses the Colleague UniData environment, DataOrchestrator is required.

Transition Scenario†

If Client acquired an on-premise, perpetual license to one of the following Ellucian Advancement software modules: Advance Web, Banner Advancement, or Colleague Advancement (the particular Ellucian Advancement software module for which Client acquired the license, and, additionally, any other associated software modules that are functionally dependent on such licensed Ellucian Advancement software module, will collectively be referred to as the "Previously-Licensed Advancement Software"), as well as associated Software Support Services, and only if identified in an Order Form, then Client will transition from its use of the Previously-Licensed Advancement Software to the use of the subscription-based Ellucian CRM Advance Cloud Software as further described in this note. Commencing on the Beginning Date of the Ellucian CRM Advance Cloud Software as identified in an Order Form: (i) all Software Support Services associated with the Previously-Licensed Advancement Software will terminate, and will be replaced by "Transition Maintenance Services" (as defined below) for such software; and (ii) fees for Transition Maintenance Services will be due and payable by Client in an amount equal to sixty percent (60%) of the fee that Client was obligated to pay for Software Support Services on the Previously-Licensed Advancement Software immediately preceding the Beginning Date. Client will acquire such Transition Maintenance Services during the period of Client's transition from the Previously-Licensed Advancement Software to Client's live, production use of the CRM Advance Cloud Software (the "Transition Period"). In this regard, Client will provide Ellucian with at least thirty (30) days prior written notice of its intent to use the CRM Advance Could Software in a live, production environment, signifying the end of the Transition Period. As used herein, "Transition Maintenance Services" are limited to telephone support, regulatory releases and defect corrections only. Specifically, and without limitation, Client will not be entitled to use any new product updates, enhancements or new releases that may become available during the Transition Period for the Previously-Licensed Advancement Software. If Client has prepaid Software Support Services fees for the Previously-Licensed Advancement Software for period(s) from and after the Beginning Date, Client will receive a forty percent (40%) credit against the amount of such prepaid Software Support Services fee, prorated for those periods following the Beginning Date; such credits will be applied toward the subscription fees payable for the Ellucian CRM Advance Cloud Software.

Notes

1 *Ellucian currently utilizes Amazon Web Services for the provision of hosting services associated with this Cloud Software. In this regard, Client shall ensure that all Client authorized users comply with the Acceptable Use Policy and other applicable services terms currently available at http://aws.amazon.com/legal.*

2 *In order to use bulk email marketing within Ellucian CRM Advance, Client must acquire a license from Ellucian or a third-party vendor for the use of a compatible bulk email software product.*

3 *Ellucian CRM Advance includes the provisioning of a CRM Advance data migration instance as a staging environment, accessed by Ellucian personnel only, for a period of fourteen (14) months from the execution of an Order Form.*

4 *Ethos Essentials implementation services are required unless Ethos Essentials has already been implemented.*

5 *For descriptions of Ellucian CRM Named User types, please refer to Ellucian CRM User Roles.*

6 *If Client should exceed the 250,000 bulk email sends during any Contract Year of the Cloud Software Term, Client must purchase additional block(s) of 250,000 of bulk email sends under separate written agreement at Ellucian's then-current rates. For the avoidance of doubt, if Client does not use all of the bulk email sends contracted for in a given Cloud Contract Year, Client will not be entitled to a reduction of or credit against the Annual Subscription Fee paid for that Cloud Contract Year and the unused bulk email sends will not carry over into subsequent Cloud Contract Year(s).*

7 *Client is responsible for its users' compliance with the messaging policy available at www.sparkpost.com/policies/messaging.*

MICROSOFT SOFTWARE SUPPLEMENT

These terms apply to any Microsoft products (the "Microsoft Products") that are made available, displayed, run, accessed or which otherwise interact, directly or indirectly with the applicable Cloud Software. Microsoft Corporation or one of its affiliates (collectively, "Microsoft") has licensed the software to Ellucian.

By using the Cloud Software (which is connected as described above to Microsoft Products) Client accepts these terms.

1. Client may not remove, modify, or obscure any copyright, trademark or other proprietary rights notice that is contained in or on the Microsoft Products.
2. Client may not reverse engineer, decompile, or disassemble the Microsoft Products, except to the extent that such activity is expressly permitted by applicable law.
3. NO WARRANTIES BY MICROSOFT. CLIENT AGREES THAT IF CLIENT HAS RECEIVED ANY WARRANTIES WITH REGARD TO THE MICROSOFT PRODUCTS OR THE CLOUD SOFTWARE, THEN THOSE WARRANTIES ARE PROVIDED SOLELY BY ELLUCIAN AND DO NOT ORIGINATE FROM, AND ARE NOT BINDING ON, MICROSOFT.
4. NO LIABILITY OF MICROSOFT FOR CERTAIN DAMAGES. TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, MICROSOFT SHALL HAVE NO LIABILITY FOR ANY INDIRECT, SPECIAL, CONSEQUENTIAL, OR INCIDENTAL DAMAGES ARISING FROM OR IN CONNECTION WITH THE USE OR PERFORMANCE OF THE MICROSOFT PRODUCTS OR THE CLOUD SOFTWARE, INCLUDING WITHOUT LIMITATION, PENALTIES IMPOSED BY GOVERNMENT. THIS LIMITATION WILL APPLY EVEN IF ANY REMEDY FAILS OF ITS ESSENTIAL PURPOSE.
5. This Order Form only gives Client limited rights to use the Microsoft Products in connection with the Cloud Software. Ellucian and Microsoft reserve all other rights.
6. Client agrees that Ellucian may disclose Client's information to Microsoft as reasonably necessary to verify compliance with this Order Form.
7. The Microsoft Products are not fault-tolerant and are not guaranteed to be error free or to operate uninterrupted. Client may not use the Microsoft Products in any application or situation where the Microsoft Products' failure could lead to death or serious bodily injury of any person, or to sever physical or environmental damage ("High Risk Use"). High Risk Use does not include utilization of the Microsoft Products for administrative purposes, to store configuration data, engineering and/or configuration tools, or other non-control applications, the failure of which would not result in death, personal injury, or severe physical or environmental damage. These non-controlling applications may communicate with the applications that perform the control, but must not be directly or indirectly responsible for the control function. Client will be responsible for any third-party claim arising out of Client's use of the Microsoft Products in connection with any High Risk Use.
8. Microsoft is an intended third party beneficiary of this Order Form with the right to enforce provisions of this Order Form and to verify Client's compliance.

Ellucian CRM
User Roles and Capabilities

Recruit

Advise

Advance

ellucian.

Overview

This document is intended to define the differences between Ellucian CRM Premium Users, Standard Users, and Light Users and to provide insight into the capabilities of each of these user types to facilitate institutional decisions about which type of user licenses are required to meet the institution's needs. Ellucian CRM Users are not specific to the individual Recruit, Advise, or Advance applications. This document may be used to support decision making for any combination of the Ellucian CRM applications that the institution will use.

Premium Users, Standard Users, and Light Users can utilize all applications for which the institution is licensed. For example, if an institution owns Recruit and is licensed for 100 users and then also licenses Advise, those same 100 named users may be added to Advise.

As a rule of thumb: Premium Users have full capabilities within each Ellucian CRM application, can configure the system, and are able to deal with records in bulk. Standard Users have more limited capabilities, cannot configure the system, and generally can deal with records individually or in small numbers. Both Premium and Standard licenses support:

- MS Office and Email Integration
- Access using MS Dynamics CRM Desktop and Mobile applications
- Creation and updates to Activities
- Creation of Advanced Finds and views

Light users are those who need to view and react to the information presented to them either in the console or in a constituent experience site (cx).

Ultimately an understanding of the functional capabilities required is needed to determine the type of user license that would be appropriate for any particular person or role. The tables in the Appendix of this document describe the granular capabilities that are supported for Premium Users, Standard Users, and Light Users for the Ellucian CRM applications. The following sections provide guidelines based upon Ellucian's experience for what type of users are appropriate for each of the three CRM solutions.

© 2020 Ellucian. All Rights Reserved - Confidential & Proprietary |

ellucian.

Understanding User Licenses

Ellucian CRM Recruit

For a full list of access rights, please review the Appendix to determine specific access rights required for User licenses.

Guidelines for Selecting Premium Users

The Premium User includes the configuration of Dynamics CRM functionality, import functions, full visibility within system and solution, bulk communications, and full access into student prospect recruiting and admissions for the institution.

Examples of functions that this role can support within Recruit include but are not limited to the import of student search names, prospecting, marketing communications including campaign setup and execution, list management, and mass/bulk communications, funnel management, reporting, application management, recruiting territories, setting up workflows and any other function that exists within Recruit. Premium Users can configure reports and dashboards and views for themselves and for others to share.

Examples of roles typically requiring Premium Users include:

- System Administrator
- Recruit Power User
- Admissions Operations Lead
- Communication Specialist (responsible for setting up of communication plans and bulk email)
- Director or Assistant Director of Admissions
- IT Staff

Guidelines for Selecting Standard Users

A majority of Recruit users would leverage a Standard User license. The most common type of Recruit users for whom a Standard User license is suitable is recruiting and admissions staff members.

A Standard User may not manage or send mass communications or email campaigns. A Standard User may not configure workflows or run imports.

Example roles typically requiring Standard Users include:

- Admissions Counselors and Recruiters
- Vice President of Enrollment
- Admissions Liaisons
- Event Coordinator
- Application Processors
- Application Reviewers

Guidelines for Selecting Light Users

Light Users may use the Agent Portal (cx) to manage applications and data on behalf of prospective students. The most common type of Recruit users for whom a Light User is suitable is a 3rd party agent acting on behalf of the institution, staff that reviews applications, and call center staff such as student workers. Light users have limited create/edit access to the CRM Recruit console. They may perform

© 2020 Ellucian. All Rights Reserved - Confidential & Proprietary |

Application Reviews, add notes to records, view dashboards, view opportunities, and create activities. Light users may not edit or create opportunities, create or run communications plans, perform word merge, create or share configuration within the system.

Examples of roles typically requiring Light Users include:

- Recruiting Agents
- Application Reviewers
- Student-workers

Guidelines CRM Recruit Community Edition users

Recruit Community Edition reduces licensing types and simplifies with Team and Sales named user licenses.

Example roles typically requiring Sales licenses include:

- System Administrator
- Recruit Power User
- Admissions Operations Lead
- Communication Specialist (responsible for setting up of communication plans and bulk email)
- Director or Assistant Director of Admissions
- Admissions Counselors and Recruiters
- IT Staff

Example roles typically requiring Team licenses include:

- Vice President of Enrollment
- Admissions Liaisons
- Event Coordinator
- Application Processors
- Application Reviewers
- Recruiting Agents
- API users

© 2020 Ellucian. All Rights Reserved - Confidential & Proprietary |

ellucian.

Ellucian CRM Advise

For a full list of access rights, please review the Appendix to determine specific access rights required for User licenses.

Guidelines for Selecting Premium Users

Administrators of the Advise CRM application require Premium User licenses. Examples of roles that are suited for a Premium User license include:

- **System Administrator(s)** who will be responsible for managing CRM and Advise settings, importing data into the CRM or managing integrations with other enterprise applications, maintaining user accounts, managing security roles, and assisting the Student Success Administrator in configuration as needed.
- **Communication Manager(s)** are responsible for setting up the Communication Plans and Communication Lists that will be used by the institution. This person will also manage bulk email communications.
- **Event Manager(s)** responsible for setting up and managing institutional events.
- **IT Staff**

Examples of other administrative functions that may only be performed by Premium Users include, but are not limited to:

- Extending the CRM data model
- Creating and customizing system dashboards, forms, views, reports, and workflows
- Creating and managing institution-specific online documentation and help
- Creating and managing communication templates (Email, Email Service, Message, and Mobile Notification) that are used by system users
- Create Subjects and Routing Rules for Cases

Premium Users have full visibility and access to the Student Success Intervention Strategies configured for the institution.

Guidelines for Selecting Standard Users

Standard Users, like Light Users, will generally need to interact with the data displayed in the system via role-based dashboards. The critical difference between Standard and Light users is that Standard users also create some of the components that can be used by other in the institution, such as Communication Lists or Email Templates. They may also use functionality that requires business process flows and routing to control record processing, such as Case Management. Standard Users can also view reports.

Examples of roles that are suited for a Standard User license include:

- **Advisors** and **Faculty Advisors** who create Communication Lists
- **Case Managers**
- **Student Success Managers** who are responsible for overseeing advising at their institution**.**

A Standard User may not manage or use Communication Plans to send mass communications, nor can they send mass communications via a 3rd party integration.

© 2020 Ellucian. All Rights Reserved - Confidential & Proprietary |

Guidelines for Selecting Light Users

Light Users may need to view data displayed in the system via role-based dashboards in the console (Advisors and Faculty Advisors) or the Advise Faculty Constituent Experience (Faculty Members). Light users with console access may also send direct communications to a student or list of students via email, text messages, or mobile notifications. They can share Notes and Private Notes with other users. They can also use Advanced Find to search for students and student related data they have access to.

Light users with Faculty Constituent Experience access can view students in their section and raise alerts on those students.

- **Advisors, Faculty Advisors,** and **Counselors** who do not work with Cases or create Communication Lists but will primarily view and interact with student data in the Advise console
- **Faculty Members** who will use the Faculty Constituent Experience site to raise alerts on students in their active sections
- **Faculty Advisors** may need to utilize both the Advise Console and Faculty Constituent Experience.

A Light User may not create Communication Lists or work with Case Management.

Ellucian CRM Advance

For a full list of access rights, please review the Appendix to determine specific access rights required for User licenses.

Guidelines for Selecting Premium Users

Administrators of the Advance CRM application require Premium User licenses. Examples of roles that are suited for a Premium User license include:

- All IT/DB/System Administrators
- Advance Services staff
- Report Writers
- Business Analysts
- Power users that require access to manage, oversee, and administer development programs and operations.

Examples of administrative functions include but are not limited to, managing CRM and advancement settings, managing security roles, creating workflows, dialogs, business rules, dashboards, and reports.

A Premium User license is required to:

- Extend the CRM data model
- Customize forms and views
- Create and manage institution-specific online documentation and help
- Create and manage marketing communications and lists
- Setting and maintaining goals for campaigns, solicitations, and staff
- Import data or manage integration with other applications

Guidelines for Selecting Standard Users

The majority of advancement staff using the Advance CRM solution may only require a Standard User license. A Standard User has full read, write, edit, and delete capabilities based on the role-based access controls that each institution decides to enforce. The most common role where a Standard User is suitable will be by staff that consumes and maintain advancement data.

Examples of roles that are suited for a Standard User license include:

- Executive Management
- Development Officers
- Records Management staff
- Inquiry-only consumers of advancement data.

A Standard User can communicate with persons, organizations, prospects, or other contacts in Advance CRM on an individual basis. For example, a Standard User may email a prospect or group of prospects directly through the Ellucian CRM to schedule a call, visit, etc. A Standard User may manage their personal dashboards and views.

A Standard User may not manage or send mass communications or email campaigns using Dynamics CRM Marketing Campaign functionality or 3rd party email marketing solutions. A Standard User may not configure workflows, dialogs, dashboards, views, or reports. A Standard User may not manage campaigns, solicitation, staff goals but may use goals to evaluate progress towards the goal.

ORDER FORM FOR RENEWAL OF CLOUD SOFTWARE

This Order Form for Renewal of Cloud Software (the "Order Form") is between **ELLUCIAN COMPANY L.P.** ("Ellucian") and **UNIVERSITY OF IDAHO** (the "Client"). This Order Form amends the most recent underlying agreement related to the licensing of subscription services ("Cloud Software Agreement") between the parties, as previously amended, and is subject to all terms in the amendments, including, but not limited to that certain License Exchange and Enhancement Order Form of even date herewith (including the Terms and Conditions and Product Specifications contained in Exhibit 5 thereto), and, collectively, the Cloud Software Agreement and this Order Form constitute the entire understanding of the parties regarding the subject matter of this Order Form. The terms and conditions of the Cloud Software Agreement are incorporated herein by this reference; if any terms of this Order Form conflict with any other terms of the Cloud Software Agreement, the terms of this Order Form will control. The transaction provided for in this Order Form is non-cancelable, and the amounts paid under this Order Form are nonrefundable, except as provided in this Order Form. The fees due pursuant to this Order Form are in addition to and not in substitution for fees otherwise due from Client under the Cloud Software Agreement and/or any separate agreement between the parties.

Capitalized terms in this Order Form shall have the same meaning given to such terms within the Cloud Software Agreement unless redefined herein.

"*Cloud Contract Year*" under this Order Form, means each period of twelve (12) consecutive months beginning on August 1 and ending on June 30 during the Cloud Software Term.

Fee Adjustments for Technology Capacity Increases.

3rd Party Escalators – Additional fees charged by 3rd party providers due to changes in the fee calculator applied to Cloud Software will be added to the annual fees payable hereunder. By way of example, if a 3rd party database license fee calculator is changed during the Software Term resulting in increased fees for the applicable configuration for Cloud Software, then such fee increase(s) will be added to the annual fees payable hereunder.

Extraordinary Resource Requirements – Cloud Software is provisioned to maintain reasonable application performance levels under normal usage. Application performance may be impacted if Client does not disclose relevant information during the discovery process or if Client does not implement practices recommended by Ellucian. Ellucian is not responsible for application performance issues caused by Client's failure to provide proper discovery or Client's failure to implement recommended practices. Additional resources will not be provided under this Amendment to remedy such application performance issues without the execution of a subsequent amendment by duly authorized representatives of each party and the payment by Client of the applicable associated fees.

Cloud Software Term. The period commencing on the Beginning Date and continuing until the Expiration Date is the "Initial Cloud Software Term." Following the Initial Cloud Software Term, Client's license to access and use the Cloud Software will automatically renew for consecutive Cloud Contract Years on a year-to-year basis (each a "Renewal Cloud Contract Year"), unless either party notifies the other in writing of its intent not to effect such a renewal at least ninety (90) days prior to the Expiration Date, or, with respect to any Renewal Cloud Contract Year, at least ninety (90) days prior to the expiration of the then-current Renewal Cloud Contract Year. The Initial Cloud Software Term combined with any Renewal Cloud Contract Year(s) is referred to herein as the "Cloud Software Term."

Use of Client Data. Unless prohibited by terms contained in the Cloud Software Order Form signed by both parties on November 20, 2016, or prohibited by that certain License Exchange and Enhancement Order Form of even date herewith, Ellucian shall have the right to (a) use and otherwise process, and to allow subcontractors/agents to use

and otherwise process, Client Data solely for the purposes of performing Ellucian's obligations under this Order Form and complying with applicable law; (b) to use and otherwise process Client Data for Ellucian's internal business purposes, including development, analysis and corrective purposes in connection with the Software and Services, and for otherwise improving and enhancing the Software and Services or Ellucian's business; and (c) to use or otherwise process Aggregated Data for Ellucian's business purposes, including composing its public statements and marketing materials describing and/or promoting Ellucian and/or the Software and Services. "Aggregated Data" means data derived from Client Data and data that has been combined into databases which may include third party data, which in all instances (i) does not identify any individual and (ii) is not attributed or attributable to a specific customer. For sake of clarity, nothing in this paragraph shall be deemed to change or override any potentially conflicting terms regarding use of Client Data found in in the Cloud Software Order Form signed by both parties on November 20, 2016, or that certain License Exchange and Enhancement Order Form of even date herewith, and the terms in those two named documents shall prevail should there be a conflict.

Third Party Components. Ellucian's obligation to provide Client with access to and use of Cloud Software that includes third party services or software ("Third Party Component(s)") is limited to providing Client with the Third Party Component portion of the Cloud Software to the extent the applicable third party owner provides it to Ellucian. If an agreement authorizing Ellucian to resell or sublicense a Third Party Component, prior to the Expiration Date set forth in the applicable Order Form or prior to the expiration of any renewal, is terminated or expires, or if the terms of the relevant agreement are substantially modified so as to prevent Ellucian from providing the Third Party Component(s) of the Cloud Software in a commercially reasonable manner under the existing terms, then Ellucian's obligation to provide Client with access to and use of and Client's obligation to pay Ellucian for the applicable Cloud Software will, as applicable, automatically terminate upon the effective date of the termination, expiration, or material modification.

For the renewal of the Cloud Software identified below, and only during the Cloud Software Term, Ellucian grants Client a non-exclusive, non-transferable license to use the Cloud Software on Client's Equipment residing within the United States for Client's internal use only, on the terms and conditions of the Cloud Software Agreement. This license with respect to the renewal of the Cloud Software will begin on the Beginning Date and will continue until the Expiration Date (as those terms are specified below) subject to the terms of the Cloud Software Agreement.

CLOUD SOFTWARE TABLE:

Cloud Software	Beginning Date	Expiration Date	Software Supplement [1]	Annual Subscription Fee
ELLUCIAN CRM ADVANCE ENTERPRISE [2,3] *Includes:* • Two Ellucian CRM Advance environments (one production and one non-production) • Daily Database Backup Support for Ellucian CRM Advance (Reporting Mechanism)	The first day of the next month following the Execution Date	July 31, 2024	Microsoft Software Supplement	**$109,109**
ELLUCIAN CRM NAMED USERS [2,3] • 90 Ellucian CRM Standard Named Users • 30 Ellucian CRM Premium Named Users	The first day of the next month following the Execution Date	July 31, 2024	Microsoft Software Supplement	**Included**

ELLUCIAN TRAVEL AND EXPENSE MANAGEMENT POWERED BY CHROME RIVER [4,5] *Includes:* • Unlimited Expense reports per year • Unlimited Invoice reports per year • Unlimited Folio reports per year	The first day of the next month following the Execution Date	July 31, 2024	None	**$89,250**
TOTAL ANNUAL SUBSCRIPTION FEE FOR THE PERIOD FROM THE BEGINNING DATE THROUGH JULY 31, 2022 (to be prorated):				**$198,359**
TOTAL ANNUAL SUBSCRIPTION FEE FOR THE PERIOD AUGUST 1, 2022 THROUGH JULY 31, 2023:				**$206,492**
TOTAL ANNUAL SUBSCRIPTION FEE FOR THE PERIOD AUGUST 1, 2023 THROUGH JULY 31, 2024:				**$214,978**

Notes:

1 The software supplements identified herein were attached to the Cloud Software Agreement and are incorporated herein by reference.

2 Ellucian and Client are parties to a Cloud Software Order Form dated November 20, 2016 (the "CRM Advance Order Form") pursuant to which Client obtained a subscription license to the Cloud Software known as Ellucian CRM Advance with related Ellucian CRM Named Users (collectively, "CRM Advance"). Pursuant to this Order Form, the parties desire to realign payment terms with respect to CRM Advance such that Client shall hereafter pay license fees for CRM Advance (including CRM Named Users in the quantities specified herein), as identified in the Cloud Software Table above, on the basis of a Cloud Contract Year from August 1 to July 31 and to extend Client's subscription for CRM Advance for a Cloud Software Term consisting of the period of time from the Beginning Date until the Expiration Date as such dates are identified in the Cloud Software Table above.

3 Prior to the Execution Date, Client has paid Ellucian fees for CRM Advance under the CRM Advance Order Form on the basis of a Cloud Contract Year from December 1 to November 30. Client's obligation to pay Ellucian annual subscription fees and Client's access to CRM Advance under the CRM Advance Order Form are terminated as of the Beginning Date identified herein. In the event that Client prepaid Subscription Fees for CRM Advance under the CRM Advance Order Form for any period beyond the Beginning Date identified herein, Ellucian will credit such prepaid fees against the fees payable under this Order Form. The terms of the CRM Advance Order Form shall remain in full force and effect except that Client shall, effective as of the Beginning Date identified in the Cloud Software Table above and conditioned upon payment of the fees provided herein, be entitled to use and access CRM Advance during a Cloud Software Term ending on the Expiration Date identified in the Cloud Software Table above.

4 Ellucian and Client are parties to an Order Form for Additional Cloud Software dated August 14, 2018 (the "TEM Order Form") pursuant to which Client obtained a subscription license to the Cloud Software known as Ellucian Travel and Expense Management Powered by Chrome River ("TEM") which allows up to 27,500 travel and expense reports per Cloud Contract Year (as defined in the TEM Order Form). Pursuant to this Order Form, the parties desire to: (1) upgrade Client's subscription license for TEM to a license that allows for unlimited reports per Cloud Contract Year; (2) upgrade Client's subscription license for TEM to include unlimited Invoice reports and unlimited Folio reports per Cloud Contract Year; (3) realign payment terms with respect to TEM such that Client shall hereafter pay license fees for TEM on the basis of a Cloud Contract Year from August 1 to July 31; and (4) extend Client's subscription for TEM for a Cloud Software Term consisting of the period of time from the Beginning Date until the Expiration Date as such dates are identified in the Cloud Software Table above. The terms of the TEM Order Form shall remain in full force and effect except that Client shall, effective as of the Beginning Date identified in the Cloud Software Table above and conditioned upon payment of the fees provided herein, be entitled to unlimited Travel and Expense reports, unlimited Invoice reports, and unlimited Folio reports during a Cloud Software Term ending on the Expiration Date identified in the Cloud Software Table above.

5 Prior to the Execution Date, Client has paid Ellucian fees for a volume-based subscription for TEM under the TEM Order Form. Client's obligation to pay Ellucian annual subscription fees and Client's access to TEM under the TEM Order Form are terminated as of the Beginning Date identified herein. In the event that Client prepaid Subscription Fees for TEM under the TEM Order Form for any period beyond the Beginning Date identified herein, Ellucian will credit such prepaid fees against the fees payable under this Order Form.

Payment Terms - Annual Subscription Fee: For the renewal of Cloud Software licensed pursuant to this Order Form, subscription fees for each Cloud Contract Year will be specified by Ellucian in an annual invoice issued in advance of each such Cloud Contract Year (except that the invoice for the initial Cloud Contract Year will be issued on or after the Execution Date of this Order Form). Client's payments will be due and payable within thirty (30) days from the date of invoice(s). The "Total Annual Subscription Fee" represents the additional fees payable for each full Cloud Contract Year during the Initial Cloud Software Term and will not increase except as set forth herein or in the Cloud Software Agreement. Payment of the annual subscription fees specified herein is in addition to any subscription fees due under the Cloud Software Agreement or any other software or subscription agreement(s) between the parties

Annual Subscription Fee Increases. The Total Annual Subscription Fee represents the subscription fee for each Cloud Contract Year during the Initial Cloud Software Term and will not increase during the Initial Cloud Software Term except as expressly set forth herein. For any Renewal Cloud Contract Year following the Initial Cloud Software Term, annual subscription fees will not increase by more than seven percent (7%) over the annual subscription fee payable for Cloud Software for the immediately preceding Cloud Contract Year.

EXHIBIT A

MAINTENANCE STANDARDS (SUBSCRIPTION ADVANTAGE LEVEL)

1. Ellucian's Action Line will be available to Client for Defect reporting five (5) days per week, Monday through Friday (excluding national holidays and Ellucian-observed holidays), from 8:00 AM to 8:00 PM (Eastern U.S. Time). However, Production outages will be supported 24x7x365 as long as Client contacts Ellucian's Action Line via the telephone number provided to Client.

2. The priority of an active incident is indicated at the time the incident is first reported to Ellucian. Client must report the priority of the incident using the definitions below. Ellucian will review and validate the priority for open incidents, and may adjust the priority to better align with these definitions.

   Ellucian uses reasonable commercial efforts to respond to Client's Notifications in accordance with the following guidelines:

Priority Levels	Definition	Target Response Times
Priority 1 - Critical	A Notification that the production Subscription Services instance is not available for remote access by Client	1 hour or less
Priority 2 - High	A Notification that Client believes that a Defect has caused a partial failure of the Subscription Services or a failure that significantly hinders Client's ability to perform data processing which is critical to Client's operations on the day on which the alleged Defect is reported	4 hours or less
Priority 3 - Medium	A Notification that Client believes that a Defect has caused an intermittent failure of, or problem with, the Subscription Services, or that causes a significant delay in Client's ability to perform data processing on the day on which the alleged Defect is reported, but where the processing is not critical to Client's operations	1 business day or less
Priority 4 - Low	A Notification that Clients believes that a Defect exists, but it does not significantly affect critical processing	3 business days or less

   For purposes of these targets, a "response" will mean an initial contact from an Ellucian representative to Client to begin evaluation of the problem reported under one of the categories of calls identified above. As a prerequisite to Ellucian's obligation to respond to Client's Notification(s), Client must follow Ellucian's policies and procedures (such as the dialing of a particular phone number, the categorization of a particular problem, etc.) when submitting a Notification.

   A "Notification" means a communication to Ellucian by means of: (i) Ellucian's Action Line; (ii) the placement of a telephone call; or (iii) the sending of an e-mail, in each case, in accordance with Ellucian's then-current policies and procedures for submitting such communications.

3. Response times listed in this Exhibit reflect targets and should not be construed as contractual obligations. Response time commitments do not promise a complete resolution within the stated time frames. Rather, the time commitment is intended to indicate the estimated target time interval in which Ellucian will contact Client after triaging and routing. Ellucian will begin working the request to seek a resolution of the issue once communication with Client has been established to verify the request and depending on the priority level as described above.

SOFTWARE LICENSE AND SERVICES AGREEMENT
BETWEEN
SCT SOFTWARE & RESOURCE MANAGEMENT CORPORATION
AND
UNIVERSITY OF IDAHO

This Agreement is entered into by and between SCT Software & Resource Management Corporation, a Delaware corporation ("SCT"), and the University of Idaho ("Licensee") as of the Effective Date.

The parties to this Agreement agree as follows:

1. Certain Definitions.

(a) "Equipment" means one (1) SEQUENT S 2000/750 using the DYNIX/PTX operating system, at the Location.

(b) "Intellectual Property Rights" means all patents, patent rights, copyrights, copyright registrations, trade secrets, trademarks, service marks, trademark and service mark registrations, goodwill pertaining to trademarks and service marks, and confidential information.

(c) "Location" means Licensee's administrative computing facility located in the State of Idaho.

(d) "Object Code" means computer programs assembled, compiled, or converted to magnetic or electronic binary form on software media, which are readable and usable by computer equipment, but not generally readable by humans without reverse assembly, reverse compiling, reverse conversion, or reverse engineering.

(e) "Source Code" means computer programs written in higher-level programming languages, sometimes accompanied by English language comments and other programmer documentation. Source Code is readable by humans and may be translated into Object Code for execution on computer equipment through the process of compiling or assembling or may be executed through the process of interpretation at the time of execution.

(f) "SCT Software" means the Source Code and Object Code for the computer programs and computer coded instructions for the following SCT-proprietary Major Systems: BANNER Student System, BANNER Financial Aid System, BANNER Finance System (including without limitation the BANNER Finance System Investment Management Module), BANNER Human Resources System, and BANNER Alumni System, including all related specifications, documentation, technical information, and all corrections, modifications, additions, improvements and enhancements to any of the foregoing provided to Licensee by SCT.

(g) "Major System" means any one of the systems of the SCT Software.

(h) "Database Software" means the SCT then-supported version of the Object Code for the following computer programs developed by Oracle Corporation (the "Database Licensor"): RDBMS (including ORACLE*Loader and ORACLE*Report), ORACLE*Forms, SQL*Plus, PRO*COBOL, PRO*C and the transaction processing option database software, including all related specifications, documentation, technical information and all corrections, modifications, additions, improvements and enhancements to any of the foregoing provided to Licensee by SCT or the Database Licensor.

(i) "INAS Software" means the SCT then-supported version of the Institutional Need Analysis System developed by the College Entrance Examination Board.

(j) "Documentation" means: (i) SCT's then-current, machine generated and hard copy documentation for the SCT Software; and (ii) to the extent that the same is applicable to each of the Major Systems of the SCT Software, Section 3.0 of that certain document entitled A Response to the University of Idaho: Request for Proposal (No. 93-08) For An Administrative Computing Software Package dated June 3, 1993 ("Proposal Section"). In the event that any provision of the Proposal Section conflicts with any other provision of the Documentation, such other provision of the Documentation shall conclusively be deemed superseding and controlling. Notwithstanding the foregoing, however, and without limitation thereon, in no event shall SCT reduce the functionality of the Licensed Software, as such functionality existed as of the Effective Date, by changing the Documentation therefor for the sole and exclusive purpose of reducing such SCT Software functionality.

(k) "Effective Date" means the date identified as such on the signature page of this Agreement.

2. Ownership. SCT owns the SCT Software, all copies of the SCT Software, and all Intellectual Property Rights for and in the SCT Software.

3. **License.** In consideration of Licensee's full payment of the fees set forth in Section 6 below, SCT hereby grants to Licensee a perpetual, non-exclusive, non-transferable license to use the SCT Software subject to the terms and conditions contained in this Agreement. Any rights not expressly granted in this Agreement are expressly prohibited.

(a) Source Code. Licensee shall have the non-exclusive right to copy and use, subject to the provisions of this Agreement, including without limitation Section 3(d) below, the Source Code for the SCT Software on the Equipment at the Location to compile, modify, improve and enhance the SCT Software for Licensee's own in-house computing operations.

(b) Object Code. Licensee shall have the non-exclusive right to copy and use, subject to the provisions of this Agreement, the SCT Software in Object Code form on the Equipment at the Location for Licensee's in-house computing operations. Licensee may also use the SCT Software in Object Code form temporarily on a configuration comparable to the Equipment, either at the Location or at a site other than the Location, upon prompt written notice to SCT, for disaster recovery of Licensee's computer operations if the Equipment is inoperative. Notwithstanding the foregoing, however, and without limitation thereon, Licensee shall have the right to use the SCT Software by remote access from Licensee campuses in the State of Idaho at addresses other than the Location.

(c) Restrictions on Use of the SCT Software. Unless SCT gives its prior written consent, Licensee may not assign, license, or otherwise transfer, voluntarily, by operation of law or otherwise, its right to use the SCT Software. Licensee may not make the SCT Software available in any commercial time-sharing, commercial networking, or rental arrangements. Both before and after termination of this Agreement for any reason, Licensee will not permit (i) any person or entity, other than Licensee's employees with a need to know, directly or indirectly to use, have access to or use of all or any part of the SCT Software, or (ii) all or part of the SCT Software to be exported outside the United States of America, in any manner or by any means, without in each instance first obtaining SCT's prior written consent and, if required, a validated license from the Office of Export Administration within the United States Department of Commerce and other appropriate governmental authorities of the United States.

(d) Restrictions on Use of Source Code. Licensee will not disclose all or any part of the Source Code to any person except its employees as reasonably necessary to permit such employees to use the Source Code for the purposes explicitly permitted in this Agreement. Licensee may permit its employees to have access to the Source Code only on a need-to-know basis and only if prior to granting such access, each such employee has executed a non-disclosure agreement providing reasonable protection of SCT's trade secrets and other proprietary interests contained in the Source Code, and has been informed in writing of the non-disclosure obligations of Licensee and the employee under this Agreement.

(e) Software Necessary to Use the SCT Software. Licensee acknowledges and understands that in order to use any of the Major Systems, Licensee must maintain and have installed on the Equipment the Database Software. Licensee shall obtain a license to use the Database Software pursuant to the terms and conditions contained in the Database Licensor's then-current agreement(s). Licensee must also obtain the right to use and must maintain and have installed on the Equipment a COBOL Compiler compatible with the Equipment and the Database Software; specifically, if available for the Equipment, MicroFocus COBOL, either licensed directly from MicroFocus or from the Equipment vendor under a different product name. Licensee must also obtain the right to use and must maintain and have installed on the Equipment a "C" Compiler that is both compatible with the Equipment and the Database Software and has been approved in writing by SCT. Licensee shall identify the "C" compiler in a writing provided to SCT as soon as reasonably practicable for SCT's approval or disapproval. Licensee further acknowledges and understands that in order to use the BANNER Financial Aid Major System, Licensee must also maintain and have installed on the Equipment the INAS Software in order to perform need analysis calculations when using the BANNER Financial Aid Major System. Licensee shall obtain a license to use the INAS Software pursuant to the terms and conditions contained in the College Entrance Examination Board's then-current license agreement therefor.

(f) Intellectual Property Rights Notices. Licensee agrees to include the Intellectual Property Rights notice(s) provided by SCT in the code, or written on labels or containers of the SCT Software, or on the cover or title page of documentation, in any copy or part thereof made by Licensee. Licensee shall not modify or remove, in any manner, the Intellectual Property rights notice(s) provided by SCT in connection with the SCT Software.

4. **Services.**

(a) Implementation/Support. SCT agrees to perform the Implementation/Support services specified in Exhibit IS, which is attached to and incorporated in this Agreement by reference, on the terms and conditions contained in this Agreement, for the applicable fees set forth in Exhibit P. Licensee shall have the right to audiotape and/or videotape Implementation/Support training sessions, for Licensee's exclusive use in accordance with the terms and conditions of this Agreement. The parties shall jointly develop an SCT Software Implementation Plan, which shall include, inter alia, a timetable for implementation of the SCT Software, and SCT shall provide Licensee with Implementation/Support Services in accordance with such jointly developed Implementation Plan. The parties shall use their best efforts to adhere to the timetable established in the Implementation Plan, and, except as otherwise provided for in this Agreement or as may then

otherwise be agreed to by the parties, a party's failure to meet the timeframe commitments agreed to by such party as part of the Implementation Plan shall only be excused by the failure of the other party to perform a condition precedent to such first party's obligation of performance. The timetable set forth in the Implementation Plan shall thereupon be automatically extended by the length of time of the other party's delay in performance of such condition precedent.

(b) Consulting and Modification Services. Subject to the availability of SCT personnel to provide such services, at Licensee's written request, SCT agrees to provide to Licensee, at Licensee's written request, the services described in Exhibit CS, which is attached to and incorporated in this Agreement by reference, for the fees set forth in Exhibit CS and on the terms and conditions contained in this Agreement.

(c) Personnel Providing Services. SCT represents that the SCT personnel who provide services for Licensee pursuant to this Section 4 shall possess workmanlike skills in keeping with industry standards. Licensee shall have the right disapprove any SCT personnel designated to provide such services in the event that Licensee reasonably determines that any such SCT personnel do not possess workmanlike skills in keeping with industry standards and has so advised SCT in a writing which details such deficiency. Thereupon SCT shall promptly replace such SCT personnel with other SCT personnel so possessing such workmanlike skills in keeping with industry standards, and shall, at its sole expense, repeat the relevant training or implementation component that was not provided in accordance with the requirements of this Section 4(c).

5. **Delivery.** SCT will use its best efforts to deliver the SCT Software to Licensee at the Location within thirty (30) days of the Effective Date. Two (2) copies of the SCT Software (including without limitation two [2] sets of documentation therefor) shall be delivered to Licensee. Subject to all terms and conditions of this Agreement (including without limitation the obligation to reproduce any proprietary or restrictive legends contained therein or marked thereon), Licensee shall have the right to make a reasonable number of copies of such documentation for Licensee's use pursuant to this Agreement. The date on which a Major System is first received by Licensee at the Location shall be the Delivery Date for that system.

6. **Payment and Taxes.**

(a) Payment. For the license of the SCT Software and the performance of the services described in Section 4(a), Licensee will pay SCT in accordance with Exhibit P, which is attached to and incorporated in this Agreement by reference. Reasonable travel, living, freight, and overnight delivery expenses actually incurred by SCT shall be in addition to the amounts set forth in Exhibit P and any other exhibit of this Agreement, and shall be billed as incurred. SCT shall use its best efforts to limit such expenses. By way of example and not limitation, SCT personnel will travel by coach fare and will book airfare fifteen (15) days in advance of whenever reasonably practical; will use Licensee-provided automobiles if available and if not, will share rental cars whenever reasonably practical; will stay in will stay in Licensee-provided housing whenever reasonably practical; and, to the extent that such a requirement does not present an unreasonable hardship to the SCT personnel providing such services, will arrange for SCT personnel to remain onsite for prescheduled Saturday implementation sessions SCT shall in any instance provide Licensee with a detailed statement of such expenses with reasonable promptness after receipt of Licensee's written request therefor. Licensee shall pay each invoice under this Agreement by not later than thirty (30) days from the date of Licensee's receipt thereof. Any amounts not paid when due shall bear interest at a rate of interest per annum equal to the lesser of the prime rate established from time to time by Mellon Bank plus three (3%) percent or the highest rate permitted by law.

(b) Taxes. Licensee represents that it is a tax-exempt entity. Notwithstanding the foregoing, however, taxes, other than taxes based on SCT's net income or capital stock, imposed by any taxing authority and based upon or in any way relating to this Agreement, the SCT Software, the services provided or payments made under this Agreement shall be the responsibility of Licensee and shall be payable in addition to other fees and charges under this Agreement. Licensee may provide SCT, in lieu of paying any such tax required to be paid by Licensee, with a certificate of exemption in form and substance reasonably satisfactory to SCT; and Licensee may, if permitted by law, contest any such tax required to be paid by it under this Agreement, provided that Licensee has made prior arrangements reasonably satisfactory to SCT so that SCT will suffer no damage or injury as a result of such contest. Licensee, upon request by SCT, shall provide SCT with proof of payment, or exemption from payment, of any tax that Licensee would otherwise be required to pay under or in connection with this Agreement.

7. **Warranty and Disclaimer of Warranty.**

(a) Limited Warranty by SCT. SCT warrants to Licensee for a period of twenty-four (24) months after the Delivery Date of a Major System, that the then current unmodified Major System, as used by Licensee on the Equipment at the Location for its in-house computing operations, will operate in all material respects in accordance with the then-current Documentation for the Major System.

(b) Licensee's Remedy for Breach of Warranty. In the event of any breach of the foregoing warranty, SCT, at its own expense, will provide an avoidance procedure for or a correction of each such material defect that is documented by Licensee, as soon as is reasonably practicable. A defect is "documented" if Licensee has provided sufficient information for SCT to reproduce the defect on the then current unmodified Major System operating on a computer configuration which is identical to or compatible with the Equipment and which is in SCT's possession and under SCT's control. If, despite reasonable efforts, SCT is unable to provide an avoidance procedure for or a correction of a documented defect, Licensee may pursue its remedy at law to recover direct damages resulting from the breach of warranty, subject to the terms and conditions contained in this Agreement. These remedies are exclusive and are in lieu of all other remedies, and SCT's sole obligations in the event of any breach of warranty will be as stated above.

(c) Disclaimer of Warranty. Licensee agrees and understands that the warranty set forth above is made to Licensee exclusively and is in lieu of all other warranties, and that **SCT MAKES NO OTHER WARRANTIES WHATSOEVER, EXPRESS OR IMPLIED, WITH REGARD TO THE SCT SOFTWARE OR ANY PARTS THEREOF, AND THAT SCT EXPLICITLY DISCLAIMS ALL WARRANTIES OF MERCHANTABILITY AND OF FITNESS FOR A PARTICULAR PURPOSE. FURTHER, SCT EXPRESSLY DOES NOT WARRANT THAT THE SCT SOFTWARE OR ANY PARTS THEREOF, WILL BE ERROR FREE, WILL OPERATE WITHOUT INTERRUPTION OR WILL BE COMPATIBLE WITH ANY HARDWARE OR SOFTWARE (OTHER THAN THE LICENSEE ENVIRONMENT IDENTIFIED IN EXHIBIT IS) POSSESSED OR TO BE POSSESSED BY LICENSEE.**

(d) Abrogation of Warranty. The warranty set forth above will be null and void if (i) notwithstanding any other provision of this Agreement, any person (including Licensee) attempts to correct or modify any of the SCT Software as delivered to Licensee, or (ii) Licensee refuses to implement modifications to the SCT Software that SCT may provide for the purpose of correction or improvement, whether or not required to be provided by SCT.

8. Confidential Information. The party receiving ("Recipient") any confidential information under this Agreement from the other party ("Owner") agrees: (i) to treat the Owner's confidential information as proprietary to the Owner; and (ii) that it will not knowingly disclose to any person or entity not a party to this Agreement, or use for its own or any such person's or entity's benefit, any confidential information of the Owner. In no event will the Recipient use less care to maintain the confidentiality of the Owner's confidential information than the Recipient uses to maintain the confidentiality of its own information of equal importance. The obligations set forth in this Section 8 are subject to the following definitions, terms and conditions:

(a) Definitions. Confidential information of Licensee includes non-public information and data regarding Licensee's administrative methods, administrative plans and data processing. Confidential information of SCT includes the SCT Software, algorithms, methods, techniques and processes revealed by the Source Code of the SCT Software, non-public information concerning SCT's business and the terms and provisions of this Agreement.

(b) Exceptions. Confidential information, whether or not described above, does not include information that: (i) is or becomes known to the public without fault or breach of the Recipient; (ii) the Owner regularly discloses to third parties without restriction on disclosure; or (iii) the Recipient receives from a third party without restriction on disclosure and without breach of a non-disclosure obligation.

(c) Survival of Obligations. Notwithstanding the termination of this Agreement, the non-disclosure and non-use obligations set forth above will remain in full force with respect to each item of confidential information for a period of ten (10) years after the first receipt of that item by the Recipient.

9. Indemnities.

(a) Indemnity by Licensee. Licensee agrees to indemnify SCT and hold it harmless against and from any claim, demand, action, proceeding, loss, liability, cost and expense (including without limitation court costs and reasonable fees of attorneys, accountants and other professionals) incurred or suffered by SCT as a result of any violation by Licensee of the obligations, restrictions or limitations in this Agreement.

(b) Indemnity by SCT. SCT will defend or settle, at its own expense, any action brought against Licensee to the extent that it is based on a claim that use of the SCT Software provided by SCT pursuant to this Agreement infringes any United States copyright of others, and SCT will pay any costs, damages and attorneys' fees finally awarded against Licensee in any such action attributable to any such claim; but such defense, settlements and payments are expressly conditioned on the following: (i) that SCT is notified promptly in writing by Licensee of any such claim; (ii) that SCT is granted in writing sole control of the defense of any such claim and of all negotiations for its settlement or compromise; (iii) that Licensee cooperates with SCT in a reasonable way to facilitate the settlement or defense of the claim; (iv) that the claim does not arise from modifications not authorized in writing by SCT or from the use or combination of products provided by SCT with items provided by Licensee or others; and (v) that should the SCT Software become, or in SCT's opinion be likely

to become, the subject of such a claim of infringement, then Licensee will permit SCT, at SCT's option and expense, (A) to procure for Licensee the right to continue using the same under the terms of this Agreement, or (B) to replace or modify the same so that it becomes non-infringing and substantially equivalent in function, or (C) to refund to Licensee the license fee paid to SCT by Licensee under this Agreement for the Major System giving rise to the liability, less a charge for use by Licensee based on straight line depreciation assuming a useful life of five (5) years. **THE FOREGOING IS SCT'S EXCLUSIVE OBLIGATION WITH RESPECT TO INFRINGEMENT OF INTELLECTUAL PROPERTY RIGHTS.**

10. Term and Termination. This Agreement will continue in full force and effect except as follows:

(a) Termination by SCT For Cause. SCT will have the right to terminate this Agreement for cause if: (i) Licensee fails to honor the restrictions on disclosure and use of SCT's confidential information provided under this Agreement; (ii) Licensee infringes or participates in infringement of SCT's Intellectual Property Rights; (iii) Licensee fails to honor the limitations and restrictions on use of the SCT Software, or any part thereof, as provided in this Agreement; (iv) Licensee files a voluntary petition in bankruptcy or remains an involuntary petitioner in bankruptcy for a period exceeding ninety (90) days; or (v) Licensee breaches or fails to perform any other material term or condition of this Agreement.

(b) Termination by Licensee For Cause. Licensee will have the right to terminate this Agreement for cause if: (i) SCT fails to honor the restrictions on disclosure and use of Licensee's confidential information provided under this Agreement; or (ii) SCT breaches or fails to perform any other material term or condition of this Agreement.

(c) Procedure for Termination For Cause. Either party may terminate this Agreement for cause at any time while the event or condition giving rise to the right of termination for cause exists, by giving the other written notice describing that event or condition in reasonable detail. Upon receipt of that notice, the other party will have a period of thirty (30) days in which to cause that event or condition to be corrected or cured to the reasonable satisfaction of the party desiring termination. If the event or condition giving rise to the right of termination is not so corrected or cured within that period, this Agreement will terminate as of the end of that period automatically, without further act by any party. Notwithstanding the foregoing, however, in the event that Licensee files a voluntary petition in bankruptcy or remains an involuntary petitioner in bankruptcy for a period exceeding ninety (90) days, SCT shall have the right to terminate this Agreement immediately, without further action or delay, by providing Licensee with written notice of such termination.

(d) Termination For Cause Without Prejudice to Other Rights and Remedies. Termination of this Agreement for cause by either SCT or Licensee in accordance with the terms of this Agreement will be without prejudice to the terminating party's other rights and remedies under or in connection with this Agreement, both at law and in equity.

(e) Termination Upon Non-Appropriation of Funds. Licensee believes that sufficient funds can be obtained to pay all amounts due SCT under this Agreement and will use its best efforts to obtain, maintain and properly request and pursue funds from which payments under this Agreement may be made, including making provisions for such payments to the extent necessary in each budget submitted for the purpose of obtaining funding and using its best efforts to have such portion of the budget approved. It is Licensee's intent to make all payments due under this Agreement if funds are legally available therefor and in that regard Licensee represents and warrants to SCT that the SCT Software licensed under this Agreement is important to its proper, efficient and economic operation. In the event sufficient funds are not appropriated and budgeted or are otherwise legally unavailable to make payments to SCT for the SCT Software, then Licensee will promptly notify SCT of such fact by providing SCT with written notice thereof at SCT's corporate headquarters in Malvern, Pennsylvania. Thereupon, Licensee's license to use the SCT Software and SCT's obligations in connection therewith shall be deemed terminated, without further action by either party. Any such premature expiration effected pursuant to this Section 10(e) shall be subject to the provisions of Section 10(f) below. Nothing in this Section 10(e) will be construed so as to permit Licensee to terminate its obligations in connection with the SCT Software in order to acquire any other software or to allocate funds directly or indirectly to perform essentially the same application for which the software is being provided, including the development of similar software by Licensee itself. Upon Licensee's full compliance with the provisions of this Section 10(e), all amounts paid by Licensee to SCT as license fees for the SCT Software shall be retained by SCT as liquidated damages and not as a penalty.

(f) Effect of Termination. If this Agreement is properly terminated by either party, Licensee promptly will return to SCT or (at SCT's request) destroy all copies of the SCT Software, and will certify to SCT in writing, over the signature of a duly authorized representative of Licensee, that it has done so.

(g) Survival of Obligations. All obligations relating to non-use and non-disclosure of confidential information, indemnity, and the obligations of Licensee to respect SCT's Intellectual Property Rights will survive termination of this Agreement for any reason.

11. Notices. All notices and other communications required or permitted under this Agreement will be in writing and, except as otherwise provided in this Agreement, will be deemed given when delivered personally, sent by United States

registered or certified mail, return receipt requested, or sent by overnight courier to the address shown on the signature page hereof, or to such other place as the parties hereto from time to time may direct. A copy of all notices to SCT shall also be sent to the attention of SCT's General Counsel at SCT's address set forth on the signature page.

12. Force Majeure. Neither party to this Agreement will be liable to the other for any failure or delay in performance under this Agreement due to circumstances beyond its reasonable control including, without limitation, Acts of God, accident, labor disruption, acts, omissions and defaults of third parties, and official, governmental and judicial action not the fault of the party failing or delaying in performance.

13. Assignment. The benefits and burdens of each party under this Agreement will not be assignable without the prior written consent of the other party to this Agreement, and any attempt to assign them without that consent will be void. Notwithstanding the foregoing, SCT may assign this Agreement to its successor by merger or consolidation or to any person or entity that acquires all or substantially all of its capital stock or assets; and SCT may assign this Agreement in whole or in part to any person or entity to which it transfers any exclusive rights in the SCT Software.

14. No Waiver. No failure of either party to this Agreement to prosecute its rights with respect to any single or continuing breach of this Agreement will act as a waiver of the right of that party to later exercise any right or enforce any remedy granted under this Agreement with respect to that same or any other breach of this Agreement by the other party to this Agreement.

15. Choice of Law; Severability. This Agreement will be governed by and construed in accordance with the laws of the State of Idaho. If any provision of this Agreement is found invalid or unenforceable, it will be enforced to the maximum extent permissible, and the legality and enforceability of the other provisions of this Agreement will not be affected.

(REMAINDER OF PAGE INTENTIONALLY LEFT BLANK)

16. LIMITATIONS OF LIABILITY. SCT AND LICENSEE ACKNOWLEDGE AND AGREE THAT IN NO EVENT WILL SCT'S LIABILITY IN CONNECTION WITH THE SCT SOFTWARE, THE SERVICES PROVIDED UNDER THIS AGREEMENT, THIS LICENSE, OR ANY OTHER MATTER RELATING TO THIS AGREEMENT EXCEED THE AMOUNT ACTUALLY PAID TO SCT BY LICENSEE UNDER THIS AGREEMENT FOR THE LICENSE FEE FOR THE MAJOR SYSTEM GIVING RISE TO THE LIABILITY AND SCT WILL NOT BE LIABLE FOR ANY SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, INCLUDING WITHOUT LIMITATION LOSS OF PROFITS, LOSS OF DATA, AND LOSS OF REVENUES, EVEN IF INFORMED OF THE POSSIBILITY THEREOF IN ADVANCE. THESE LIMITATIONS APPLY TO ALL CAUSES OF ACTION IN THE AGGREGATE, INCLUDING WITHOUT LIMITATION BREACH OF CONTRACT, BREACH OF WARRANTY, SCT'S NEGLIGENCE, STRICT LIABILITY, MISREPRESENTATION, AND OTHER CAUSES OF ACTION BASED ON SIMILAR LEGAL THEORIES. SCT AND LICENSEE FURTHER ACKNOWLEDGE AND AGREE THAT THEY ARE ENTERING INTO THIS AGREEMENT ON THE UNDERSTANDING THAT THE FEES FOR THE SCT SOFTWARE AND THE SERVICES TO BE PROVIDED UNDER THIS AGREEMENT HAVE BEEN SET TO REFLECT THE FACT THAT LICENSEE'S REMEDIES, AND SCT'S LIABILITY, SHALL BE LIMITED AS EXPRESSLY SET FORTH IN THIS AGREEMENT, AND IF NOT SO LIMITED, THE FEES FOR THE SAME WOULD HAVE BEEN SUBSTANTIALLY HIGHER.

17. Entire Agreement. This Agreement sets forth the entire agreement between the parties with respect to the subject matter hereof, and all prior discussions, representations, proposals, offers and oral or written communications of any nature are entirely superseded hereby and extinguished by the execution of this Agreement. Any purchase order or similar document which may be issued by Licensee in connection with the SCT Software, the license thereof, the services provided, or any other matter relating to this agreement shall be for Licensee's internal purposes only and any terms and conditions which may be included in such purchase order or other document shall not modify in any manner any of the terms and conditions of this Agreement and shall not bind SCT in any manner and shall be completely ineffective and unenforceable against SCT, even if it is initialed, signed, or acknowledged by a representative of SCT. No modification hereof or waiver of any right under this Agreement will be effective unless it is evidenced in a writing executed by an authorized representative of each party to this Agreement.

IN WITNESS WHEREOF, the parties hereto have executed this Agreement, through the signatures of their duly authorized representatives.

EXHIBIT P

Payment Schedule

Licensee's cost for the license of the SCT Software and the services rendered pursuant to this Agreement is as follows:

Deliverable	Cost
BANNER Student License Fee	$142,275
BANNER Alumni License Fee	93,495
BANNER Financial Aid License Fee	105,655
BANNER Finance License Fee	121,950
BANNER Human Resources License Fee	101,625
Implementation/Support Services	
BANNER Student System Twelve (12) person-weeks, at a rate of $5,000 per person-week	$60,000
BANNER Alumni System Five (5) person-weeks, at a rate of $5,000 per person-week	$25,000
BANNER Financial Aid System Eight (8) person-weeks, at a rate of $5,000 per person-week	$40,000
BANNER Finance System Ten (10) person-weeks, at a rate of $5,000 per person-week	$50,000
BANNER Human Resources System Ten (10) person-weeks, at a rate of $5,000 per person-week	$50,000

Payment of the license fee for each Major System shall be made by Licensee to SCT as follows: Thirty (30%) percent by not later than thirty (30) days after the Delivery Date of the applicable Major System; an additional twenty (20%) percent by not later than September 30, 1993; an additional twenty (20%) percent by not later than December 31, 1993; an additional twenty (20%) percent by not later than March 31, 1994; and the remaining ten (10%) percent by not later than June 30, 1994.

Implementation/Support Services (Exhibit IS) and Consulting Services (Exhibit CS) shall be invoiced monthly, as such services are rendered, together with expenses as otherwise provided for in the Agreement, and shall be paid by Licensee to SCT by not later than thirty (30) days from the date of Licensee's receipt of the invoice therefor.

EXHIBIT CS

Consulting Services

I. Generation of Specifications for Modifications to SCT Software

A. Interview Licensee personnel to determine changes desired to be made to SCT Software as delivered by SCT.

B. Generate revised functional and technical specifications in a System Modification Requirements ("SMR") document, which will also contain cost and schedule estimates for SCT to implement such changes.

II. Modifications

SCT will modify and test the SCT Software to the extent proposed in any SMR document generated pursuant to the provisions of this Exhibit CS.

III. Rate - The following rates shall apply until September 30, 1994, after which time SCT may increase such rates upon thirty (30) days prior notice by not greater than ten percent (10%) per year:

Consulting, Implementation and Training Services	$125/hr
Engagement Management Services	$150/hr

EXHIBIT IS
Implementation/Support

I. Implementation/Support Services

SCT agrees, subject to the provisions of this Agreement and Licensee's timely performance of its obligations under this Agreement, to provide to Licensee the Implementation/Support services hereinafter described (the "Implementation Services").

A. Project Plan. SCT and Licensee shall develop a project plan which identifies SCT's and Licensee's responsibilities. Each Major System will be delivered in Source Code at the Location.

B. SCT Responsibilities. SCT shall provide Licensee with the number of person-weeks set forth in Exhibit P of user consulting and technical training in connection with the SCT Software. Additional time may be secured at SCT's then current rates therefor.

C. Licensee Responsibilities. Licensee is responsible for establishing overall project direction including assignment and direction of Licensee personnel involved in the project, providing a productive technical environment, and providing operational support to the implemented Major Systems at the completion of SCT's services.

Licensee will assign an overall project manager during the term of the project. Responsibilities of Licensee's project management personnel include daily access by SCT for project coordination, establishment and daily management of Licensee implementation plans, review of all SCT delivered documentation, coordination of project activities, support of resource requirements with Licensee's data processing department, management of production preparation activities in both technical and user areas, and coordination of the resolution of any changes in Licensee's policies or operating procedures.

Licensee will also designate at least one senior technical person for each Major System from its data processing staff to become knowledgeable and competent in supporting the SCT Software. SCT expects these individuals to participate in production preparation activities and SCT provided training. Licensee will also designate in each functional department a primary systems coordinator who is responsible for committing resources and for follow-up on outstanding issues.

II. Conditions

As a condition to SCT's obligation to provide the Implementation Services, Licensee agrees to provide the following hardware, software, and access to Licensee's facilities.

A. Software and Hardware. Licensee agrees to provide at the Location, at no cost to SCT, on or before the earliest Delivery Date, the software and hardware listed below (the "Licensee Environment"):

-Equipment

-Database Software

-COBOL and "C" compilers as provided for in the Agreement

-INAS Software

Licensee will maintain current with the SCT-designated release of the systems software listed above. Dependent tailoring parameters between multiple vendor products will be specified by SCT.

B. Access to Licensee Environment and Licensee's Facilities. Licensee will provide such additional assistance to SCT as SCT may reasonably request for the purpose of rendering the Implementation Services. Without limitation of the foregoing, Licensee will provide SCT, as reasonably necessary for SCT to perform its obligations under this Agreement, with all of the following without charge: (i) the Licensee Environment, provided and maintained at Licensee's expense in good working order and in actual operation at all times at which SCT reasonably requests operation for the purpose of rendering the Implementation Services; (ii) the right for SCT to use the Licensee Environment (including all related software), either on Licensee's premises or remotely by telecommunication, at SCT's request; (iii) teleprocessing capabilities; (iv) other computer systems of Licensee; (v) full and free access to the Licensee Environment and to Licensee's offices; (vi) office equipment and services such as desks, chairs, word processors, telephone, copying and other equipment and services appropriate to accommodate SCT personnel; and (vii) a reasonable amount of space on Licensee's premises, including parking space, for SCT personnel.

III. Additional Support.

Licensee will provide, at its sole expense, electronic access to the Licensee Environment from any of SCT's facilities.

Until the Delivery Date and the completion of all modification work, if any, in addition to the Licensee Environment, Licensee will provide SCT reasonable dedicated address space in which to execute an on-line test environment. Licensee will also provide SCT with a reasonable amount of disk storage space. SCT will exercise reasonable care to minimize the use of machine time and disk space.

Remote access will be provided on a twenty-four-hour-per-day, seven-day-per-week basis if the computer and communications facilities are scheduled for operation and SCT usage does not degrade the normal production use of the computer in any material respect. All disk storage allocated to SCT will be on-line during these hours.

Licensee will reimburse SCT for telephone charges incurred in connection with accessing the Licensee Environment unless such charges are incurred by SCT in connection with SCT's warranty obligations under this Agreement.

SCT SOFTWARE TECHNICAL CURRENCY AGREEMENT

This Agreement is entered into by and between SCT Software & Resource Management Corporation ("SCT") and the University of Idaho ("Licensee") on June 30, 1993.

Background

SCT and Licensee have entered into a Software License and Services Agreement for the SCT Software (the "License Agreement"), and desire that SCT provide Maintenance and Enhancements for the SCT Software on the terms and conditions contained in this Agreement.

Accordingly, the parties agree as follows:

1. Certain Definitions.

(a) Definitions Contained in the License Agreement. The capitalized terms of this Agreement will have the same meanings ascribed to them in the License Agreement, except as such terms are otherwise defined in this Agreement.

(b) Additional Definitions. The following definitions shall also apply:

(i) "Maintenance" means using reasonable efforts to correct documented defects, as that term is defined in the License Agreement, in the SCT Software, provided that such defects are not the result of any changes made to the SCT Software (other than Improvements provided by SCT under this Agreement) or the Database Software.

(ii) "Enhancements" means changes to the SCT Software which increase the functionality of the SCT Software.

(iii) "SCT Software" means SCT's then current unmodified (other than Improvements provided by SCT under this Agreement) BANNER Student, BANNER Finance System (including without limitation the BANNER Finance System Investment Management Module), BANNER Alumni, BANNER Human Resources and Financial Aid Major Systems licensed by SCT to Licensee under the License Agreement.

(iv) "Major System" means any one of the systems of the SCT Software.

(v) "New Releases" means new editions of the SCT Software which represent changes from the previous releases of the SCT Software.

(vi) "Improvements" means, collectively, Maintenance, Enhancements and New Releases provided under this Agreement.

(vii) "Initial Term" means that period beginning on the date first set forth above and ending July 31, 1996, inclusive.

(c) Inconsistencies. If there are any inconsistencies between the definitions contained in this Agreement and the definitions contained in the License Agreement, the definitions contained in this Agreement shall apply.

2. Services.

(a) Types of Services. In consideration of Licensee's full payment to SCT of the amounts set forth in Section 3 below, and subject to the terms and conditions set forth in this Agreement, SCT, during the term of this Agreement, agrees to provide to Licensee Maintenance for, Enhancements of, and New Releases of, each Major System. Subject to the availability of SCT personnel, at Licensee's written request, SCT shall perform any installation, implementation, or other services in connection with the Maintenance, Enhancements, and New Releases provided by SCT under this Agreement, at SCT's then-current hourly rates. Without limiting the foregoing, however, prior to the expiration of the Initial Term, SCT shall provide Licensee with Grants and Contracts functionality as an Improvement to the BANNER Finance System, and electronic approval capability for salary and personnel actions as an Improvement to the BANNER Human Resources System, at no additional fee therefor (collectively, "Committed Functionality"). SCT reserves the unilateral right to define the scope of and the specifications for the Committed Functionality.

(b) Limitations. SCT's obligations under this Agreement will be limited to the then current release and the immediately preceding release of each Major System. All Improvements will be part of the Major System and subject to all of the terms and conditions of the License Agreement and this Agreement. SCT's obligations under this Agreement are further conditioned upon Licensee providing SCT, as reasonably necessary for SCT to perform its obligations under this

Agreement, with all of the following without charge: (i) the Licensee Environment provided and maintained at Licensee's expense, in good working order and in actual operation at all times at which SCT reasonably requests access thereto for the purpose of rendering the services under this Agreement; (ii) the right for SCT to use the Licensee Environment (including all related software); (iii) remote electronic capabilities, if available from Licensee; (iv) access to other computer systems of Licensee; (v) access to Licensee's offices and personnel; and (vi) a reasonable amount of space on Licensee's premises, including parking space, for SCT personnel.

(c) Modifications Maintenance. Subject to the availability of SCT personnel, at Licensee's written request, SCT shall provide Maintenance in connection with any modifications made by SCT to the SCT Software (other than Improvements provided under this Agreement) at SCT's then-current hourly rates.

3. Payment and Taxes.

(a) Technical Currency Fees. For the Improvements provided by SCT under this Agreement, Licensee will pay SCT, on July 1, 1994, a fee equal to $104,250, and on each July 1 thereafter during the term of this Agreement, a fee specified by SCT which will not be more than one hundred ten (110%) percent of the fee due under this Agreement on the immediately preceding July 1.

(b) Additional Costs. If SCT, in its reasonable judgment, determines that a suspected defect is attributable to a cause other than a documented defect, as that term is defined in the License Agreement, in the SCT Software, then Licensee shall pay SCT an additional amount for its work performed in connection therewith on a per-hour basis, at SCT's then-current hourly rates. Licensee will also reimburse SCT for all reasonable travel, living, freight, and overnight delivery expenses actually incurred by SCT. Such expenses shall be billed as incurred. SCT shall use its best efforts to limit such expenses. By way of example and not limitation, SCT personnel will travel by coach fare and will book airfare fifteen (15) days in advance of whenever reasonably practical; will use Licensee-provided automobiles if available and if not, will share rental cars whenever reasonably practical; will stay in will stay in Licensee-provided housing whenever reasonably practical; and, to the extent that such a requirement does not present an unreasonable hardship to the SCT personnel providing such services, will arrange for SCT personnel to remain onsite for prescheduled Saturday implementation sessions. SCT shall in any instance provide Licensee with a detailed statement of such expenses with reasonable promptness after receipt of Licensee's written request therefor. Licensee shall pay each invoice under this Agreement by not later than thirty (30) days from the date of Licensee's receipt thereof.

(c) Taxes. Licensee represents that it is a tax-exempt entity. Notwithstanding the foregoing, however, taxes, other than taxes based on SCT's net income or capital stock, imposed by any taxing authority and based upon or in any way relating to this Agreement, the Improvements or services provided, or payments made under this Agreement shall be the responsibility of Licensee and shall be payable in addition to other fees and charges under this Agreement. Licensee may provide SCT, in lieu of paying any such tax required to be paid by Licensee, with a certificate of exemption in form and substance reasonably satisfactory to SCT; and Licensee may, if permitted by law, contest any such tax required to be paid by it under this Agreement, provided that Licensee has made prior arrangements reasonably satisfactory to SCT so that SCT will suffer no damage or injury as a result of such contest. Licensee, upon request by SCT, shall provide SCT with proof of payment, or exemption from payment, of any tax that Licensee would otherwise be required to pay under or in connection with this Agreement.

(d) Late Charges. All amounts not paid when due shall bear interest at a rate of interest per annum equal to the lesser of the prime rate established from time to time by Mellon Bank, N. A., Philadelphia, Pennsylvania plus three (3%) percent or the highest rate permitted by law.

4. Term. The Initial Term of this agreement is for the period commencing on the date set forth on the first page of this Agreement and continuing until July 31, 1996. This Agreement shall thereafter be automatically extended for consecutive one (1) year periods unless either party notifies the other in writing of its intent not to continue this Agreement at least one year prior to the expiration of the then current term.

5. Disclaimer of Warranties. Licensee agrees and understands that except as expressly set forth in this Agreement **SCT MAKES NO WARRANTIES WHATSOEVER, EXPRESSED OR IMPLIED, WITH REGARD TO ANY IMPROVEMENTS, AND THAT SCT EXPLICITLY DISCLAIMS ALL WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. FURTHER, SCT EXPRESSLY DOES NOT WARRANT THAT THE SCT SOFTWARE OR ANY IMPROVEMENTS WILL BE USABLE BY LICENSEE IF THE SCT SOFTWARE HAS BEEN MODIFIED BY ANYONE OTHER THAN SCT, OR WILL BE ERROR-FREE, WILL OPERATE WITHOUT INTERRUPTION OR WILL BE COMPATIBLE WITH ANY HARDWARE OR SOFTWARE (OTHER THAN THE LICENSEE ENVIRONMENT) POSSESSED OR TO BE POSSESSED BY LICENSEE.**

6. Termination. Either party will have the right to terminate this Agreement if the other party breaches or fails to perform any material term or condition of this Agreement. Either party, if it has a right of termination as provided above, may terminate this Agreement at any time while the event or condition giving rise to that right of termination exists, by giving the other written notice of that event or condition and describing that event or condition in reasonable detail. Upon receipt of that notice, the other party will have a period of thirty (30) days in which to cause that event or condition to be corrected or cured to the reasonable satisfaction of the party desiring termination. If the event or condition giving rise to the right of termination is not so corrected or cured within that period, this Agreement will terminate as of the end of that period automatically, without further act by any party. Notwithstanding the foregoing, however, in the event that Licensee files a voluntary petition in bankruptcy or remains an involuntary petitioner in bankruptcy for a period exceeding ninety (90) days, SCT shall have the right to terminate this Agreement immediately, without further action or delay, by providing Licensee with written notice of such termination. Termination of this Agreement by either party in strict accordance with the terms and conditions of this Agreement will be without prejudice to the terminating party's other rights and remedies under this Agreement, both at law in equity.

7. Non-Appropriation of Funds. Licensee believes that sufficient funds can be obtained to pay all amounts due SCT under this Agreement and will use its best efforts to obtain, maintain and properly request and pursue funds from which payments under this Agreement may be made, including making provisions for such payments to the extent necessary in each budget submitted for the purpose of obtaining funding and using its best efforts to have such portion of the budget approved. It is Licensee's intent to make all payments due under this Agreement if funds are legally available therefor and in that regard Licensee represents and warrants to SCT that the Improvements are important to its proper, efficient and economic operation. In the event sufficient funds are not appropriated and budgeted or are otherwise legally unavailable to make payments to SCT for the Improvements, then Licensee will promptly notify SCT of such fact by providing SCT with written notice thereof at SCT's corporate headquarters in Malvern, Pennsylvania, and shall remit to SCT payment in full, prorated on a daily basis up to the effective date of termination, for the Improvements. Thereupon, SCT's obligations in connection with this Agreement shall be deemed terminated, without further action by either party. Nothing in this Section 7 will be construed so as to permit Licensee to terminate its obligations in connection with the Improvements in order to acquire any other software or services or to allocate funds directly or indirectly to perform essentially the same application for which the Improvements are being provided, including the provision of similar services by Licensee itself.

8. Notices. All notices and other communications required or permitted under this Agreement will be in writing and, except as otherwise provided in this Agreement, will be deemed given when delivered personally, sent by United States registered or certified mail, return receipt requested, or sent by overnight courier to the address shown on the signature page hereof, or to such other place as the parties hereto from time to time may direct. A copy of all notices to SCT shall also be sent to the attention of SCT's General Counsel at SCT's address set forth on the signature page.

9. Force Majeure. Neither party to this Agreement will be liable to the other for any failure or delay in performance under this Agreement due to circumstances beyond its reasonable control including, without limitation, Acts of God, accident, labor disruption, acts, omissions and defaults of third parties, and official, governmental and judicial action not the fault of the party failing or delaying in performance.

10. Assignment. The benefits and burdens of each party under this Agreement will not be assignable without the prior written consent of the other party to this Agreement, and any attempt to assign them without that consent will be void. Notwithstanding the foregoing, SCT may assign this Agreement to its successor by merger or consolidation or to any person or entity that acquires all or substantially all of its capital stock or assets; and SCT may assign this Agreement in whole or in part to any person or entity to which it transfers any exclusive rights in the SCT Software.

11. No Waiver. No failure of either party to this Agreement to prosecute its rights with respect to any single or continuing breach of this Agreement will act as a waiver of the right of that party to exercise later any right or enforce any remedy granted under this Agreement with respect to that same or any other breach of this Agreement by the other party to this Agreement.

12. Choice of Law; Severability. This Agreement will be governed by and construed in accordance with the laws of the Idaho If any provision of this Agreement is found invalid or unenforceable, it will be enforced to the maximum extent permissible, and the legality and enforceability of the other provisions of this Agreement will not be affected.

[Remainder of page intentionally left blank]

13. LIMITATIONS OF LIABILITY. SCT AND LICENSEE ACKNOWLEDGE AND AGREE THAT IN NO EVENT WILL SCT'S LIABILITY IN CONNECTION WITH THE IMPROVEMENTS OR SERVICES PROVIDED UNDER THIS AGREEMENT, OR ANY OTHER MATTER RELATING TO THIS AGREEMENT, EXCEED THE AMOUNT ACTUALLY PAID TO SCT BY LICENSEE UNDER THIS AGREEMENT FOR THE IMPROVEMENTS FOR THE MAJOR SYSTEM GIVING RISE TO THE LIABILITY IN THE YEAR THAT SUCH LIABILITY ACTUALLY ARISES, AND SCT WILL NOT BE LIABLE FOR ANY SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, INCLUDING WITHOUT LIMITATION LOSS OF PROFITS, LOSS OF DATA, AND LOSS OF REVENUES, EVEN IF INFORMED OF THE POSSIBILITY THEREOF IN ADVANCE. THESE LIMITATIONS APPLY TO ALL CAUSES OF ACTION IN THE AGGREGATE, INCLUDING WITHOUT LIMITATION BREACH OF CONTRACT, BREACH OF WARRANTY, SCT'S NEGLIGENCE, STRICT LIABILITY, MISREPRESENTATION, AND OTHER CAUSES OF ACTION BASED ON SIMILAR LEGAL THEORIES. SCT AND LICENSEE FURTHER ACKNOWLEDGE AND AGREE THAT THEY ARE ENTERING INTO THIS AGREEMENT ON THE UNDERSTANDING THAT THE FEES FOR THE IMPROVEMENTS AND SERVICES TO BE PROVIDED UNDER THIS AGREEMENT HAVE BEEN SET TO REFLECT THE FACT THAT LICENSEE'S REMEDIES, AND SCT'S LIABILITY, SHALL BE LIMITED AS EXPRESSLY SET FORTH IN THIS AGREEMENT, AND IF NOT SO LIMITED, THE FEES FOR THE SAME WOULD HAVE BEEN SUBSTANTIALLY HIGHER.

14. Entire Agreement. This Agreement sets forth the entire agreement between the parties with respect to the subject matter hereof, and all prior discussions, representations, proposals, offers and oral or written communications of any nature are entirely superseded hereby and extinguished by the execution of this Agreement. Any purchase order or similar document which may be issued by Licensee in connection with the Improvements or the services provided under, or any other matter relating to, this agreement shall be for Licensee's internal purposes only and any terms and conditions which may be included in such purchase order or other document shall not modify in any manner any of the terms and conditions of this agreement and shall not bind SCT in any manner and shall be completely ineffective and unenforceable against SCT, even if it is initialed, signed, or acknowledged by a representative of SCT. No modification of, or waiver of any right under, this Agreement will be effective unless it is evidenced in a writing executed by an authorized representative of each party to this Agreement.

IN WITNESS WHEREOF, the parties to this Agreement have executed this Agreement through the signatures of their duly authorized representatives.

CLOUD SOFTWARE ORDER FORM

This Cloud Software Order Form (the "Order Form") is between **ELLUCIAN COMPANY L.P.** ("Ellucian") and **UNIVERSITY OF IDAHO** (the "Client"). This Order Form amends the Software License & Services Agreement dated June 30, 1993 between the parties (the "Agreement") and, collectively, the Agreement and this Order Form constitute the entire understanding of the parties regarding the subject matter of this Order Form. If any terms of this Order Form conflict with any other terms of the Agreement, the terms of this Order Form will control. The transaction provided for in this Order Form is non-cancelable, and the amounts paid under this Order Form are nonrefundable, except as provided in this Order Form.

By the execution of this Order Form below, each party represents and warrants that it is bound by the signature of its respective signatory. Client has not relied on the availability of either any future version of any Cloud Software or any future Software product or service.

City, State, Zip: Moscow, Idaho 83844-4244

1. **Additional Definitions.** Each term defined below has the meaning given to that term below whenever the term is used in this Order Form. Other capitalized terms are defined elsewhere in this Order Form.

   "*Client Data*" means all electronic data or information submitted by Client to the Cloud Software, including without limitation any "*Client PII*" (meaning, personally identifiable information of Client's students, faculty and employees that is regulated by various state and federal laws and regulations).

   "*Cloud Contract Year*" means each period of twelve (12) consecutive months beginning on the Beginning Date or any anniversary thereof during the Cloud Software Term.

   "*Cloud Software*" means the Software or Component System identified in Exhibit A as "Cloud Software."

   "*Defect*" means a material deviation between the Cloud Software and its Documentation for which Client has provided Ellucian with reasonably detailed information such that Ellucian can replicate the deviation.

   "*Documentation*" means the on-line and hard copy functional and technical specifications that Ellucian provides for the Cloud Software, and that describe the functional and technical capabilities of the Cloud Software.

   "*Maintenance*" means providing Client with avoidance procedures or corrections for Defects. The details and procedures relating to the provision of Maintenance for the Cloud Software (collectively, the "Maintenance Standards") are specified in Exhibit B.

   "*New Releases*" means new editions (*i.e.*, major and minor releases) of the Cloud Software.

   "*Software Supplement*" means additional terms and conditions applying to particular Cloud Software, as specified in Exhibit A.

   "*Software Support Services*" means, collectively, Maintenance and New Releases.

   "*Third Party Component Providers*" means third parties utilized by Ellucian to provide components of the Cloud Software.

2. **License to Access and Use Cloud Software; Cloud Software Term.**

   2.1 Cloud Software. For the Cloud Software identified in Exhibit A, and only during the Cloud Software Term (as defined below), Ellucian grants Client a non-exclusive, non-transferable license to access and use the Cloud Software for Client's internal use only. This license is further subject to the usage parameters identified in each instance in Exhibit A.

   2.2 Cloud Software Term. The period commencing on the Beginning Date and continuing until the Expiration Date (each as specified in Exhibit A) is the "Initial Cloud Software Term." Following the Initial Cloud Software Term, Client's license to access and use the Cloud Software as provided in Section 2.1 will automatically renew for consecutive Cloud Contract Years on a year-to-year basis (each a "Renewal Cloud Contract Year"), unless either party notifies the other in writing of its intent not to effect such a renewal at least ninety (90) days prior to the Expiration Date, or, for any Cloud Contract Year subsequent to the Expiration Date, at least ninety (90) days prior to the expiration of the then-current Cloud Contract Year. The Initial Cloud Software Term combined with any Renewal Cloud Contract Year(s) is referred to herein as the "Cloud Software Term."

3. **Client Responsibilities and Prohibitions.**

- Client's authorized users will be provided with passwords, and Client must hold the passwords in strict confidence and not transfer, exchange, misuse or abuse the passwords in any way or attempt in any way to disable, deactivate or render ineffective the password protection of the Cloud Software.
- Client will be responsible for its users' compliance with this Order Form.
- Client will be responsible for the accuracy, completeness, quality and legality of Client Data and of the means by which it acquired Client Data.
- Client will use commercially reasonable efforts to prevent unauthorized access to or use of the Cloud Software and will notify Ellucian promptly of any such unauthorized access or use.
- Client will use the Cloud Software only in accordance with this Order Form, the Documentation and applicable laws.
- Client will not make the Cloud Software available to anyone other than its authorized users.
- Client will not sell, resell, rent or lease the Cloud Software.
- This Order Form is expressly made subject to United States government and other applicable laws, regulations, orders or other restrictions regarding export from the United States or another country, and import into any country, of computer hardware, software, technical data or other items, or derivatives of such hardware, software, technical data or other items. Client will not allow the Cloud Software, in whole or in part, to be exported outside of the United States, in any manner or by any means, without in each instance obtaining Ellucian's prior written consent and, if required, a validated export license from the Office of Export Administration within the United States Department of Commerce and such other appropriate United States governmental authorities. Client is prohibited from directly or indirectly exporting (or re-exporting) or providing access to the Cloud Software: (i) to any country to which the United States has embargoed goods (including, for these purposes, any national or resident of any such country); or (ii) to anyone on the United States Treasury Department's List of Specially Designated Nationals, List of Specially Designated Terrorists or List of Specially Designated Narcotics Traffickers, or the United States Commerce Department's Denied Persons List.
- Client will not create any derivative works based on the Cloud Software.
- Client will not use the Cloud Software to store or transmit any viruses, worms, time bombs, Trojan horses and other harmful or malicious code, files, scripts, agents or programs.
- Client will not attempt to gain unauthorized access to the Cloud Software or related systems or network.
- Client will not use the Cloud Software to communicate, by way of electronic communication or otherwise, any message, data or material that: (1) is libelous, harmful to minors, obscene or constitutes pornography, (2) infringes the copyrights, patents, trade secrets, trademarks, trade names or other proprietary or privacy rights of a third party or is otherwise unlawful, or (3) would otherwise give rise to civil liability, or that constitutes or encourages conduct that could constitute a criminal offense, under any applicable law or regulation.
- Certain Cloud Software is subject to additional terms and restrictions as set forth in Software Supplements attached to Exhibit A. Further, Ellucian may utilize certain Third Party Component Providers. With respect to the use of the Third Party Component Providers' services, Client agrees to comply with any third party contractual provisions outlined in the Software Supplements. In all cases, if any terms of a Software Supplement conflict with any other terms of this Order Form, the terms of the Software Supplement will control.

4. **Software Support Services for Cloud Software.** During the Cloud Software Term, as part of the annual subscription fees set forth in Exhibit A, Ellucian will provide Software Support Services for the Cloud Software. The application of Software Support Services by Ellucian may result in changes in the form, timing or other features of the Cloud Software. Ellucian will apply the Software Support Services to the Cloud Software to include Maintenance and New Releases.

5. **Cloud Software – Service Level Agreement.** Except as otherwise expressly provided for in any Software Supplement, Ellucian will provide the Cloud Software consistent with the Service Level Agreement (the "SLA") in the attached Exhibit C.

6. **Personally Identifiable Information.** To effect the purposes of this Order Form, Client may from time to time provide Ellucian with Client PII (Client representing that it has the right to do so in each such instance). Ellucian represents that it maintains appropriate data security measures, including a written information security policy, to protect Client PII consistent with applicable United States laws and regulations. Further, to protect the privacy of Client PII, Ellucian will, for so long as it retains Client PII: (i) maintain the confidentiality of Client PII, as provided in the applicable section(s) of the Agreement regarding Client's confidential information generally; (ii) limit access to Client PII to Ellucian's employees, agents and subcontractors who have a need to access Client PII to fulfill Ellucian's obligations under this Order Form; (iii) require that its agents and subcontractors who have access to Client PII agree to abide by substantially similar (and no less restrictive) restrictions and conditions that apply to Ellucian with regard to such Client PII; and (iv) implement appropriate administrative, technical and physical safeguards designed to ensure the security or integrity of such Client PII and protect against unauthorized access to or use of such Client PII that could result in substantial harm or inconvenience to Client.

7. **Payment Terms; Suspension of Cloud Software; Delivery.**

   7.1 Payment Terms. Subscription fees for each Cloud Contract Year will be specified by Ellucian in an invoice issued in advance of each such Cloud Contract Year and will be due and payable within thirty (30) days from the date of invoice (but not earlier than the first day of the applicable Cloud Contract Year for which such subscription fees are being remitted).

   7.2 Annual Subscription Fee Increases. The annual subscription fee shown in Exhibit A represents the subscription fee for each Cloud Contract Year during the Initial Cloud Software Term and will not increase during the Initial Cloud Software Term.

   For any Renewal Cloud Contract Year following the Initial Cloud Software Term, annual subscription fees will not increase by more than seven percent (7%) over the annual subscription fee payable for Cloud Software for the immediately preceding Cloud Contract Year.

   7.3 Suspension of Cloud Software. If Client fails to pay to Ellucian within thirty (30) days after Ellucian makes written demand for subscription fees due for Cloud Software, and payment of the amount in question is not the subject of a *bona fide* dispute, then, in addition to preserving its rights to collect payment of the past-due amount and all accompanying late fees, and all other rights and remedies that Ellucian may have at law or in equity, Ellucian may, in its sole discretion and without further notice to Client, suspend its performance of the Cloud Software.

   7.4 Delivery. Ellucian will, as soon as reasonably practical following the Execution Date, provide the necessary process and procedure for Client's access to the Cloud Software in accordance with this Order Form (the date on which Client is provided with this access is the "Delivery Date" for the purposes of the Cloud Software).

8. **Post Termination Actions.** Upon termination or expiration of the Cloud Software Term, Client access and use of the Cloud Software will immediately cease, and Client will have no further access to or use of the Cloud Software. Provided that Client has provided Ellucian with a written request at least thirty (30) days prior to the end of the Cloud Software Term, Ellucian will, at no additional charge to Client, promptly provide Client with a copy of all Client Data then in Ellucian's possession, in a commercially reasonable format. Such Client Data will then be securely deleted by Ellucian in accordance with Ellucian's then-current data security, retention and disposal policies. Upon termination or expiration of the Cloud Software Term, each party will promptly return

DocuSign Envelope ID: 25874781-F22B-4480-A971-8B0D359D69C8

to the other party any Confidential Information of the other party that is in their possession, or certify in writing to its destruction.

9. **Limited Warranty; Exclusive Remedy.** Except as otherwise expressly provided for in any Software Supplement, Ellucian warrants that, during the Cloud Software Term, the Cloud Software will operate without Defects. For each Defect, Ellucian, as soon as reasonably practicable and at its own expense, will provide Client with an avoidance procedure or a correction of the Defect (in accordance with the Software Support Services provisions of this Order Form and the associated Maintenance Standards attached hereto as Exhibit B). If, despite its reasonable efforts, Ellucian is unable to provide Client with an avoidance procedure for or a correction of a Defect, then, subject to the limitations set forth in Section 10 below, Client may pursue its remedy at law to recover direct damages resulting from the breach of this limited warranty. These remedies are exclusive and are in lieu of all other remedies, and Ellucian's sole obligation for breach of this limited warranty is contained in this Section 9. ELLUCIAN MAKES NO OTHER WARRANTIES WHATSOEVER, EXPRESS OR IMPLIED, AND ELLUCIAN EXPLICITLY DISCLAIMS ALL WARRANTIES OF MERCHANTABILITY, NON-INFRINGEMENT AND FITNESS FOR A PARTICULAR PURPOSE. ELLUCIAN EXPRESSLY DOES NOT WARRANT THAT THE CLOUD SOFTWARE, IN WHOLE OR IN PART, WILL BE ERROR FREE OR WILL OPERATE WITHOUT INTERRUPTION.

10. **LIMITATION OF LIABILITY.** FOR THE CLOUD SOFTWARE LICENSED PURSUANT TO THIS ORDER FORM, ELLUCIAN'S CUMULATIVE LIABILITY WILL NOT EXCEED THE SUBSCRIPTION FEES THAT CLIENT ACTUALLY PAID TO ELLUCIAN FOR THE CLOUD SOFTWARE GIVING RISE TO THE LIABILITY FOR THE SIX (6) MONTH PERIOD PRECEDING THE DATE ON WHICH SUCH LIABILITY FIRST AROSE. IN NO EVENT WILL ELLUCIAN BE LIABLE TO CLIENT FOR ANY PUNITIVE, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, OR ANY LOST BUSINESS OR LOST PROFITS, WHETHER BASED ON BREACH OF CONTRACT, TORT (INCLUDING NEGLIGENCE), PRODUCT LIABILITY, OR OTHERWISE, AND WHETHER OR NOT ELLUCIAN HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. THE LIMITATIONS AND EXCLUSIONS IN THIS SECTION 10 WILL ALSO SPECIFICALLY SURVIVE A FAILURE OF ESSENTIAL PURPOSE OF ANY REMEDIES THAT MAY BE PROVIDED IN THIS ORDER FORM OR THE AGREEMENT.

EXHIBIT A TO THE CLOUD SOFTWARE ORDER FORM

Ellucian Cloud Software

Cloud Software	Beginning Date	Expiration Date	Software Supplement	Annual Subscription Fee [1]
ELLUCIAN CRM ADVANCE [2,3]				
Ellucian CRM Advance *Includes:* • 10 Ellucian CRM Premium Named Users • 90 Ellucian CRM Standard Named Users • Two Ellucian CRM Advance instances: One (1) Production; One (1) non-Production (QA, Test, Development)	The first day of the next month following the Execution Date	The last day of the sixtieth (60th) month after the Beginning Date	Microsoft Software Supplement	$93,921
Additional Hosting Services	**Beginning Date**	**Expiration Date**	**Software Supplement**	**Monthly Subscription Fee [3]**
Additional Hosting Services to Assist with Data Migration [4]	The first day of the next month following the Execution Date	Until terminated by either party, with at least sixty (60) days' advance written notice; but, in any event, not longer than until the last day of the sixtieth (60th) month after the Beginning Date	N/A	$750 per month (beginning on the first anniversary of the Beginning Date)

Notes:

1 The pricing contained in this Order Form is valid only if the Execution Date occurs on or before November 30, 2016.

2 Ellucian currently utilizes Amazon Web Services ("AWS") for the provision of hosting services associated with this Cloud Software. In this regard, Client shall ensure that all Client authorized users comply with the Acceptable Use Policy and other applicable services terms currently available at http://aws.amazon.com/legal.

3 For the purposes of this Cloud Software, the following definitions will apply: "Premium Named Users" means individuals who have full access to the CRM capabilities within any Ellucian CRM application and are authorized by Client to use the Cloud Software, for whom subscriptions to the Cloud Software have been ordered, and who have been supplied user identifications and passwords by Client (or by Ellucian at the request of Client). "Standard Named Users" means individuals who have read, write, edit and delete capabilities (based on the role-based access controls that Client decides to enforce) and who are authorized by Client to use the Cloud Software, for whom subscriptions to the Cloud Software have been ordered, and who have been supplied user identifications and passwords by Client (or by Ellucian at the request of Client). Standard Named Users may *not* make data structure changes, manage security roles, manage data through bulk import operations, or configure communication campaigns, goals, workflows, dialogs, system dashboards, system views, or reports. Standard Named Users can use workflows, dialogs, goals and create their personal dashboards and views. Standard Named Users may *not* manage or send mass communications or email campaigns using Dynamics CRM Marketing Campaign functionality or third party email marketing solutions. Premium/Standard Named User licenses are for Client's designated users – including 3rd party agents - only and cannot be shared or used by more than one individual; provided, however, that Premium/Standard Named User licenses can be reassigned by Client to individuals replacing former Premium/Standard Named Users who no longer require ongoing use of the Cloud Software.

4 Ellucian currently utilizes AWS for the provision of these hosting services. Client shall ensure that all Client

authorized users comply with the Acceptable Use Policy and other applicable services terms currently available at http://aws.amazon.com/legal.

Termination of On-Premises Maintenance Services. Client has a continuing license to use the Banner Advancement on-premises software, in accordance with the terms and conditions contained in the Agreement, and Ellucian will continue to provide limited maintenance support for a period of twelve (12) months (the "Transition Period") from the first day of the month following the Execution Date. During the Transition Period, Client's Maintenance fees for the Banner Advancement on-premises software (and only that software) will be discounted by 50% (for the avoidance of doubt, all other payment obligations in the Agreement remain in full force and effect, including timing and method of payment). Client acknowledges and agrees that Ellucian's obligations to provide Maintenance (sometimes referred to elsewhere as Software Support Services and/or Improvements) during the Transition Period will be limited to telephone support, regulatory releases and defect corrections only. Specifically, Client will not be entitled to use any new product enhancements that may become available during the Transition Period (including, without limitation, provision of updates, telephone support, and error corrections) for the Banner Advancement on-premises software, as provided-for under the Agreement. Credits for any prepaid Maintenance fees or payments for the Banner Advancement on-premises software that are applicable to any period of time from and after the Beginning Date, if any, are hereby credited toward the subscription fees payable hereunder.

Software Supplement Attached to Exhibit A

MICROSOFT SOFTWARE SUPPLEMENT

These terms apply to any Microsoft products (the "Microsoft Products") that are made available, displayed, run, accessed or which otherwise interact, directly or indirectly with the applicable Cloud Software. Microsoft Corporation or one of its affiliates (collectively, "Microsoft") has licensed the software to Ellucian.

By using the Cloud Software (which is connected as described above to Microsoft Products) Client accepts these terms.

1. Client may not remove, modify, or obscure any copyright, trademark or other proprietary rights notice that is contained in or on the Microsoft Products.
2. Client may not reverse engineer, decompile, or disassemble the Microsoft Products, except to the extent that such activity is expressly permitted by applicable law.
3. NO WARRANTIES BY MICROSOFT. CLIENT AGREES THAT IF CLIENT HAS RECEIVED ANY WARRANTIES WITH REGARD TO THE MICROSOFT PRODUCTS OR THE CLOUD SOFTWARE, THEN THOSE WARRANTIES ARE PROVIDED SOLELY BY ELLUCIAN AND DO NOT ORIGINATE FROM, AND ARE NOT BINDING ON, MICROSOFT.
4. NO LIABILITY OF MICROSOFT FOR CERTAIN DAMAGES. TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, MICROSOFT SHALL HAVE NO LIABILITY FOR ANY INDIRECT, SPECIAL, CONSEQUENTIAL OR INCIDENTAL DAMAGES ARISING FROM OR IN CONNECTION WITH THE USE OR PERFORMANCE OF THE MICROSOFT PRODUCTS OR THE CLOUD SOFTWARE, INCLUDING WITHOUT LIMITATION, PENALTIES IMPOSED BY GOVERNMENT. THIS LIMITATION WILL APPLY EVEN IF ANY REMEDY FAILS OF ITS ESSENTIAL PURPOSE.
5. This Order Form only gives Client limited rights to use the Microsoft Products in connection with the Cloud Software. Ellucian and Microsoft reserve all other rights.
6. Client agrees that Ellucian may disclose Client's information to Microsoft as reasonably necessary to verify compliance with this Order Form.
7. The Microsoft Products are not fault-tolerant and are not guaranteed to be error free or to operate uninterrupted. Client may not use the Microsoft Products in any application or situation where the Microsoft Products' failure could lead to death or serious bodily injury of any person, or to sever physical or environmental damage ("High Risk Use"). High Risk Use does not include utilization of the Microsoft Products for administrative purposes, to store configuration data, engineering and/or configuration tools, or other non-control applications, the failure of which would not result in death, personal injury, or severe physical or environmental damage. These non-controlling applications may communicate with the applications that perform the control, but must not be directly or indirectly responsible for the control function. Client will be responsible for any third-party claim arising out of Client's use of the Microsoft Products in connection with any High Risk Use.
8. Microsoft is an intended third party beneficiary of this Order Form with the right to enforce provisions of this Order Form and to verify Client's compliance.

EXHIBIT B TO THE CLOUD SOFTWARE ORDER FORM

Maintenance Standards

1. Ellucian's Action Line will be available to Client for Defect reporting five (5) days per week, Monday through Friday (excluding national holidays and Ellucian-observed holidays), from 8:00 AM to 8:00 PM (Eastern U.S. Time). However, Production outages will be supported 24x7x365 as long as Client contacts Ellucian's Action Line via the 800 telephone number provided to Client.

2. Ellucian uses reasonable commercial efforts to respond to Client's Notifications in accordance with the following guidelines, with the time period to be measured beginning with the first Ellucian business hour occurring after Ellucian receives Client's Notification:

Priority Levels	Definition	Target Response Times
Priority One	A Notification that Client believes that a Defect has caused a full failure of the Cloud Software; or a failure that prevents Client from performing data processing which is critical to Client's operations on the day on which the alleged Defect is reported	1 hour or less
Priority Two	A Notification that Client believes that a Defect has caused a partial failure of the Cloud Software or a failure that significantly hinders Client's ability to perform data processing which is critical to Client's operations on the day on which the alleged Defect is reported	4 hours or less
Priority Three	A Notification that Client believes that a Defect has caused an intermittent failure of, or problem with, the Cloud Software, or that causes a significant delay in Client's ability to perform data processing on the day on which the alleged Defect is reported, but where the processing is not critical to Client's operations	24 hours or less
Priority Four	A Notification that Clients believes that a Defect exists, but it does not significantly affect critical processing	72 hours or less

For purposes of these targets, a "response" will mean an initial contact from an Ellucian representative to Client to begin evaluation of the problem reported under one of the categories of calls identified above. As a prerequisite to Ellucian's obligation to respond to Client's Notification(s), Client must follow Ellucian's policies and procedures (such as the dialing of a particular phone number, the categorization of a particular problem, etc.) when submitting a Notification.

A "Notification" means a communication to Ellucian by means of: (i) Ellucian's Action Line; (ii) the placement of a telephone call; or (iii) the sending of an e-mail, in each case, in accordance with Ellucian's then-current policies and procedures for submitting such communications.

3. Response times listed in this Exhibit reflect targets and should not be construed as contractual obligations. Response time commitments do not promise a complete resolution within the stated time frames. Rather, the time commitment is intended to indicate the estimated target time interval in which Ellucian will contact Client after triaging and routing. Ellucian will begin working the request to seek a resolution of the issue once communication with Client has been established to verify the request and depending on the priority level as described above.

EXHIBIT C TO THE CLOUD SOFTWARE ORDER FORM

Service Level Agreement

1. **Service Levels; General and Definitions.**

   - Availability: "Availability" means the percentage of a particular month (based on 24-hour days for the number of days in the subject month) that the Cloud Software production instance is available for remote access by Client and able to receive, queue and execute real-time requests, all as measured by Ellucian.

   - Measurement: Availability is measured as the ratio of actual Availability to expected Availability resulting in an "Achieved Availability" percentage. Achieved Availability is determined by calculating the aggregated 5 minute periods, during the periods the Cloud Software is scheduled to be available, ("Scheduled Uptime") excluding without limitation scheduled downtime or emergency maintenance, that the Cloud Software is unavailable for use by Client ("Unscheduled Outage"), divided by the total aggregate minutes of scheduled Availability for the month which is Scheduled Uptime minus the time the Cloud Software is scheduled to be unavailable with Client's agreement ("Scheduled Downtime"), and rounded to the nearest tenth (10^{th}) unless otherwise indicated in the specific service level definition. Availability will be measured by Ellucian monitoring tools.

     The Achieved Availability calculation is expressed as:

     1 – (Unscheduled Outage / (Scheduled Uptime - Scheduled Downtime))

2. **Service Level Objectives.**

   Ellucian's objective is to achieve 99.50% Availability for the Cloud Software.

3. **Production Service Level Credits.**

Availability	Service Credit
>= 99.50%	None
98.00% to 99.49%	5%
97.00% to 97.99%,	10%
95.00% to 96.99%,	15%
92.00% to 94.99%,	20%
<92.00%	25%

The Service Credit percentage will be applied to the subscription fee paid by Client for the affected Cloud Software for the month being measured (*i.e.*, an amount equal to 1/12 of the applicable annual subscription fee associated with the Cloud Software).

In order to receive any of the Service Credits described above, Client must notify Ellucian within thirty (30) days of an incident occurring that they intend on collecting Service Credits. Failure to comply with this requirement will forfeit Client's right to receive a Service Credit.

If Ellucian can confirm the unavailability, and after Ellucian performs a root cause analysis which identifies that the Cloud Software was the cause of the unavailability, then Service Credits will be applied and aggregated in an "Annual Credit Account." Promptly following the end of each Cloud Contract Year during the Cloud Software Term, the Annual Credit Account for the prior Cloud Contract Year will be applied as a credit against the subscription fees due for the then-current Cloud Contract Year. Service Credits are not refundable and can be used only towards future billing charges for the Cloud Software, as provided above in this paragraph. For

credit balances in Annual Credit Accounts applicable to the final Cloud Contract Year of the Cloud Services Term, Ellucian will, promptly following the end of the Cloud Software Term, issue Client a payment in the amount of the Annual Credit Account balance. Notwithstanding the above, the total amount credited to Client in a particular month will in no event exceed an amount equal to twenty-five percent (25%) of the subscription fee paid by Client for such month (*i e*, an amount equal to 1/12 of the applicable annual subscription fee associated with the Cloud Software) for the affected Cloud Software. Service Credits are exclusive of any applicable taxes charged to Client or collected by Ellucian. Such Service Credits are Client's sole and exclusive remedy with respect to any failure or deficiency in the Cloud Software.

4. **Cloud Software Environment Maintenance Procedures**

Ellucian reserves the right to perform emergency maintenance without any prior notification to Client, if Ellucian determines that it is necessary to protect and maintain the security and/or integrity of the Cloud Software.

Ellucian's standard maintenance windows are as described below (NOTE: The below windows are maximums and will only be utilized if required). Ellucian will use diligent efforts to announce scheduled maintenance as defined by these maintenance windows.

Application Specific Services Infrastructure – Maintenance Windows				
Window	**Duration**	**Days**	**Anticipated service disruption**	**Notification**
Daily	2 hours	Weekdays, outside of normal U.S. Ellucian business hours	Low	None
Weekly	4 hours	Weekend	Low	48 hours
Monthly	8 hours	Weekend	Likely	1 week

The "Application Specific Services Infrastructure" is controlled by Ellucian and encompasses, but is not limited to, the following: database software, application software, refreshes, system configuration changes, and programming-related activities. The specific timings for the above windows are published by Ellucian and can be changed at Ellucian's sole discretion.

Emergency changes required to restore disrupted Cloud Software will follow documented change processes and may not occur during a defined window.

For Client's having the specific right to access a test/non-production environment, maintenance on the test/non-production environment will be performed during business hours with at least one (1) months' notice. No Service Credits will be issued for the test/non-production environment.

5. **Exclusions.**

This Service Level Agreement (including any associated Service Credits provided form herein) will not apply in the event of any performance issue or failures caused by:

- Circumstances beyond Ellucian's reasonable control, including, without limitation, acts of any governmental body, war, insurrection, sabotage, armed conflict, embargo, fire, flood, strike or other labor disturbance, interruption of or delay in transportation, unavailability of or interruption or delay in telecommunications or third-party services, virus attacks or hackers, failure of third-party software (including, without limitation, e-commerce software, payment gateways, chat, statistics or free scripts) or inability to obtain raw materials, supplies, or power used in or equipment needed for performance under this SLA;

- Failure of access circuits to the Ellucian network or its upstream providers, unless such failure is caused solely by Ellucian;
- Scheduled maintenance, to the extent provided herein, and emergency maintenance and upgrades;
- Domain Name Server ("DNS") issues outside the direct control of Ellucian;
- Issues with FTP, POP, IMAP, or SMTP customer access;
- False failures reported as a result of outages or errors of any Ellucian measurement system;
- Client's acts or omissions (or acts or omissions of others engaged or authorized by Client) that interfere with or disrupt the integrity or performance of the Cloud Software, including, without limitation, custom scripting or coding (e.g., CGI, Perl, HTML, ASP, SQL, etc.), any negligence, willful misconduct, or misuse of the Cloud Software;
- e-mail or webmail delivery and transmission;
- DNS Propagation; or
- Outages, delays, or latency elsewhere on the Internet that hinder access to the Cloud Software.

Ellucian is not responsible for browser or DNS caching that may make the Cloud Software appear inaccessible when others can still access it.

Ellucian will guarantee only those areas considered under the reasonable control of Elluclan.

Ellucian may change, discontinue or add to this Service Level Agreement from time to time, but will provide sixty (60) days advance notice to Client before materially reducing the benefits offered to Client under this Service Level Agreement.

ellucian®

PROFESSIONAL SERVICES ORDER FORM

This Professional Services Order Form (the "Order Form") is between **Ellucian Company L.P.** ("Ellucian") and **University of Idaho** (the "Client"). This Order Form amends the Software License and Services Agreement dated June 30, 1994 between the parties (the "Agreement") and, collectively, the Agreement and this Order Form constitute the entire understanding of the parties regarding the subject matter of this Order Form. If any terms of this Order Form conflict with any other terms of the Agreement, the terms of this Order Form will control. The transaction provided for in this Order Form is non-cancelable, and the amounts paid under this Order Form are nonrefundable, except as provided in this Order Form.

Services (Time and Materials): Ellucian will provide Client with the additional time and materials services identified in the table below, during the period specified in the table. For the avoidance of doubt, these are not "fixed fee" or "not to exceed" services, but rather time and materials services for which Client will pay Ellucian for services rendered at the hourly rate provided for in the table below.

Description [1]	Service Amount	Rate [2]	Fee [3]
Ellucian CRM Advance Implementation	1,378 person-hours	$213 per person-hour	$293,514
Data Conversion Development	240 person-hours	$90 per person-hours	$21,600
Project Management	218 person-hours	$187 per person-hour	$40,766
TOTAL SERVICES FEE: [4]			**$355,880**

Notes:

1 See Attachment 1 to this Order Form for a description of the services.

2 Hourly rates specified in this table will be held in place for services rendered on this implementation project for a period beginning on the Execution Date and ending one (1) year later. Hourly rates applicable to services rendered on this implementation project during the second year following the Execution Date will increase by five percent (5%) over the hourly rates applicable during the first year. Thereafter, services will be provided on a time and materials basis at hourly rates equal to Ellucian's then-current list price rates for the services at issue.

3 Travel and living expenses are additional and will be billed monthly as Ellucian renders the services. Client is advised that, without limitation, Ellucian personnel rendering services bill for preparation time and follow-up time. Where a number of hours is specified in the table with an associated hourly rate, the "Fee" is a good faith estimate based on the information available to Ellucian as of the Execution Date. The total amount that Client will pay for these services (i.e., the "TOTAL SERVICES FEE") will vary based on the actual number of hours of services required to complete the services and the rate that is applicable during that year in which the services are rendered.

4 The pricing contained in this Order Form is valid only if the Execution Date occurs on or before November 30, 2016.

Payment Terms – Time and Materials Services: Ellucian will invoice Client for all time and materials services on a monthly basis in arrears and payments will be due within thirty (30) days from the date of the invoice.

Payment Terms – Expenses and Other Charges: Ellucian will invoice Client for reimbursable expenses and other applicable charges on a monthly basis in arrears and payments will be due within thirty (30) days from the date of the invoice.

Ellucian CRM Advance - Scope of Service

Service Description

Engagement	Engagement Description	Estimated Ellucian Hours
Project Management Support/Team Lead (Remote)	• Provide general project support including assistance in scheduling, coordination of Ellucian resources and activities, overall project status to ensure on-time, on-budget implementation.	218
Ellucian CRM Advance: Core Facilitations (Remote)	• Lead client through facilitated sessions on best practice use of core modules (Biographic, Contributions, Prospect, Membership, Events, Security, Reporting, and Integration). • Determine efficient business flow for key processes based on institutional policies/requirements.	126
Ellucian CRM Advance: Business Requirements Setup (Remote)	• Incorporate decisions made in facilitations (Biographic, Contributions, Prospect, Membership, Events and Security) and setup CRM Advance based on institution requirements.	56
Ellucian CRM Advance: Functional Consulting Support (Remote)	• Guide client on legacy data cleanup. • Provide general support on institution's use of CRM features/functions.	80
Ellucian CRM Advance: Technical Consulting Support (Remote)	• Assist client with setup of delivered integration points for Banner ERP using delivered API's. • Provide general technical support on CRM features/functions.	80
Ellucian CRM Advance: Functional Migration Support Services (Remote)	• Provide functional support to lead client data migration efforts using delivered ETL/Migration toolkit. Areas of assistance may include: ○ Lead data mapping for lookup crosswalks. ○ Triage of transformation, load and data validation issues identified during execution of ETL steps (three runs; initial, correction and production go-live). ○ Assist with planning for data validation efforts including refinement of test plans. ○ Identify and document client specific data transformations needed. ○ Act as liaison between client and Ellucian technical data migration resources.	576
Ellucian CRM Advance: Technical Migration Support Services (Remote)	• Provide technical support to lead client data migration efforts using delivered ETL/Migration toolkit. Areas of assistance may include: ○ Install ETL tool in conversion environment. ○ Execute ETL process up to three times (initial run, correction run, production go-live run) and triage import, transformation, load and data validation issues identified.	300
Ellucian CRM Advance: Data Conversion Development (Remote)	• Develop up to six client specific data transformations. *Note: This delivery could potentially be off-shored.*	240

Ellucian CRM Advance: Production Readiness Support (Remote)	• Work with client to verify status of go-live readiness activities. • Assist client with triaging go-live activities.	160
	TOTAL	**1,836**

Project Assumptions:

- Services listed in scope will be delivered remote unless noted as onsite or otherwise negotiated with client as onsite.
- Implementation activities are based on SaaS deployment.
- On-premise federation service setup has been completed.
- Legacy system database readiness activities have been completed and client is on an approved version/ platform of an Ellucian solution.
- The Integration Facilitation will focus on Ellucian ERP and other third party integrations with CRM via the Ellucian Ethos Platform using delivered API's.

Client Responsibilities:

- Provide a primary contact for staff to work with.
- Identify the necessary participants for work sessions.
- Participate in work sessions/discussions as needed.
- Client will cooperate with and assist Ellucian as necessary to enable services to be delivered.
- Client will lead all data validation efforts and submit issues for triage.

Out of Scope:

- Items not noted in description above are considered out of scope unless agreed upon by client/Ellucian. Client may request a services estimate for additional assistance.

APPLICABLE STATUTE, RULE, OR POLICY

Idaho State Board of Education Governing Policies & Procedures, Section III.C.

BACKGROUND/DISCUSSION

Graduate Medical Education (GME) represents the time period of professional medical training after medical school (students) in which a physician (residents) learns to be an independent, competent, safe and skilled clinician who will become licensed and certified in their particular specialty. This training period typically lasts from 3-7 years of training after medical school. Medical students are recruited from medical schools nationally and globally to Idaho GME residency programs. Completion of the residency program also marks completion of the necessary physician training for medical students to become future skilled and caring physicians. In order to become a practicing physician, licensure depends on completing a residency.

Idaho currently ranks 45th in the United States for physicians per capita and 47th in the U.S. for number of GME "residency" positions per capita. Since 50-75% of residency program graduates live within 100 miles of where they graduate, there is a direct correlation between the number of GME residency programs, the number of GME residents in training and the retention rate of the physician workforce in a state. GME therefore becomes the essential ingredient to focus on to help build Idaho's current and future healthcare workforce.

IMPACT

A Ten Year GME Strategic Plan was created in 2017 to increase the number of GME programs in Idaho from nine to twenty-one over the course of a decade. Additionally, there will be an expansion from four fellowships to nine during this timeframe. Fellowships consist of extended GME training for medical students

after they have completed residency in a specialized area. This will increase the number of residents and fellows in training from 141 (2017) to 356 in 2028. This will result in the number of graduates each year from Idaho's GME programs going from 52 per year (2017) to 124 per year in 2028.

The impact of the Ten Year GME plan will be to produce an additional 1,440 physicians over what would have been produced without this Ten Year Plan. The State of Idaho will only contribute one-third of the expense to train a physician and will eventually pay approximately $14 million/year when the plan is fully built out. At least 50% of these physicians will be retained in the State of Idaho. Since each physician will generate approximately $1.9M per year in economic impact and 12 jobs per physician, the economic impact to Idaho will be approximately $1.9 billion and 12,000 new jobs. This will represent a 15.9 to 1 return on investment to Idaho while at the same time ensuring more accessible and affordable care that is of high quality and at a lower cost to the citizens of Idaho.

The last two years have created challenges in advancing the objective of the Ten Year Plan. Governor Little has been very supporting of the GME work, but limited funding has created challenges in the ability to meet the current timeline. The Graduate Medical Education Committee's executive team will review the progress on the Ten Year plan throughout this year to assure that programs continue to advance.

The GME Committee will coordinate implementation of the Ten Year Plan, including assessment and evaluation of the plan toward meeting desired outcomes associated with expanding the delivery of medical care across the state.

ATTACHMENTS

Attachment 1 – Graduate Medical Education Committee Annual Report
Attachment 2 – Roster of GME Members
Attachment 3 – FY 2023 Budget Request with 3.1% Cap
Attachment 4 – GME Programs and Resident and Fellow Locations in Idaho
Attachment 5 – Programs with Current and Proposed Residents and Fellows
Attachment 6 – GME Dashboard
Attachment 7 – University of Utah School of Medicine Annual Report

BOARD STAFF COMMENTS AND RECOMMENDATIONS

The Graduate Medical Education Committee has made adjustments in the last year due to the limitations of resources that occurred with the COVID-19 pandemic. While the Governor allowed GME some reprieve from the 5% holdback, the Ten Year Plan did experience some slowing in the ability to meet the milestones set forth in the plan. Attachment 1 describes the work that the Graduate Medical Committee has done.

The FY 2023 budget guidance requires a 3.1% cap in requests, resulting in some further slowing in addressing the objectives of the Plan. The committee has been grateful for the support of the Governor's Office and has submitted a budget in alignment with the directives of the Division of Financial Management. That proposed budget is contained in Attachment 3 and will be part of the budget approval process brought to the Board through the Business Affairs and Human Resources (BAHR) Committee.

BOARD ACTION

This item is for informational purposes only.

July 19, 2021

The Idaho 2021 Graduate Medical Education Committee Annual Report to the State Board of Education

Ted Epperly, M.D., GME Coordinator
Moe Hagman, M.D., Chairman
Mary Barinaga, M.D. Vice Chair
Todd Kilburn, CFO, (OSBE)

EXECUTIVE SUMMARY:

As the Idaho Ten Year Graduate Medical Education (GME) Strategic Plan enters its fourth year, it has been very successful in meeting its purpose and vision. In just these three years, the plan has grown new GME (residency) programs from nine to twelve (33.3% increase) and has also expanded the number of residents and fellows in training from 134 to 217 (61% increase). [1]

With this growth, Idaho has moved from 49th in the United States for the number of primary care physicians per 100,000 people to 45th. Additionally, Idaho has moved from 49th for the number of GME resident physician positions per 100,000 to 47th this is significant progress! [1] With the support of the Idaho State Board of Education, Governor Little, and the Idaho Legislature, the FY 2023 Budget Plan will fund 14 new residents and fellows in existing programs and will develop two new residency/fellowship programs in the next year.

ATTACHMENT 1

The Idaho Graduate Medical Education Committee (GMEC) provides oversight of the Ten Year GME Strategic Plan and oversees the metric dashboard that holds all programs accountable for meeting our desired outcomes. All programs are meeting the goals of accreditation, which includes 100% resident position fill rates, as well as having over 50% of their graduates staying in Idaho. Additionally, almost all programs have 30% or more of their graduates staying in rural and urban underserved communities in Idaho, and all programs are of excellent quality with high Board Certification pass rates. Ultimately these programs provide increased access to care for many Idahoans and will for decades to come. Additionally, these programs provide economic benefits to their communities and to the state.

The Ten Year Idaho GME Plan has successfully met its commitment to help grow and enhance the physician workforce in Idaho and to provide improved health and healthcare to many Idahoans. The Idaho GMEC would like to thank the Idaho State Board of Education and staff, Governors Little and Otter, the Division of Financial Management, the Joint Finance and Appropriation Committee and members of the Idaho House and Senate for their steadfast support.

1. **Current Status:**

July 1, 2021 marked the beginning of the fourth year of the Idaho Ten Year Graduate Medical Education Strategic Plan. Our Ten Year GME strategic plan has been innovative and garnered national attention as a way to help states increase their physician workforce. This is particularly true in rural and frontier states like Idaho. The Ten Year GME plan was approved by the Idaho State Board of Education on December

5, 2017 and has stimulated the growth of GME (residency) programs in the state of Idaho from nine to twelve during this period. The plan has also seen the expansion of the number of GME residents and fellows in training from 134 to 217 in our state. These twelve programs can be seen on Attachment Four and consist of eight Family Medicine residency programs, two Internal Medicine residency programs and two Psychiatry programs. Additionally, we have six fellowships in Sports Medicine, Obstetrics, Geriatrics, HIV Medicine, and two new fellowships in Addiction Medicine.

The Ten Year GME Plan calls for the build out to 21 GME residency programs with 347 residents and fellows in training each year in Idaho over the next decade.[2] When the Idaho GME plan was developed, Idaho ranked 49th in the nation for the number of primary care physicians per one hundred thousand and 49th for the number of GME resident positions per 100,000. According to the most recent data from the American Association of Medical Colleges (AAMC), Idaho has now advanced from 49th to 45th for the number of primary care physicians per capita and from 49th to 47th for the number of GME residents per capita. [1]

2. Fiscal Year 2022 Funding

The fiscal year 2022 budget that was requested by Governor Little and approved by the Joint Finance and Appropriations Committee and ultimately by the Idaho State Legislature, was a $900,000 budget that will fund 15 new resident positions. Eight of these 15 new positions will be in Family Medicine and seven are in Psychiatry. These

new resident positions will be in the communities of Rexburg, Idaho Falls, Pocatello, and Boise.

The initial request to the Governor's office and to the State Board of Education was for $1.95 million dollars, but this was voluntarily pared down by the Idaho Graduate Medical Education Committee when we were notified that the state of Idaho would be asking all agencies to cut funding. The Idaho GMEC paired the budget from $1.95 million to $900,000 dollars to be in line with the Governor's request and to be accountable, responsible, and respectful. It was appreciated by the Idaho GMEC that Idaho was still in the grip of the Covid-19 Pandemic.

3. **Next Year's Budget Request (Fiscal Year 2023)**

The state of Idaho will be entering into the fifth year of Idaho's Ten Year GME Plan with the contemplation of the fiscal year 2023 GME budget request. The Executive Committee of the Idaho GMEC prepared a $2.07 million dollar request for fiscal year 2023 which the Idaho GMEC approved at its April 2021 quarterly meeting. This initial request would fund 24 new residents and fellows in training across the 12 existing programs and six fellowship sites. The new programs that will be developed with this funding are (1) a new Psychiatry residency at Eastern Idaho Regional Medical Center, with four residents per class; (2) a new Addiction Medicine fellowship in Boise (FMRI) with one fellow per year; (3) a new Addiction Medicine fellowship in Boise (Boise Internal Medicine) with two fellows in training per year; (4) one Clinical Pharmacy resident in Boise at the FMRI; (5) a Behavioral Health and Rural Health fellowship for

Family Physicians in Coeur d'Alene and, (6) a new Psychology internship in Boise at the FMRI.

Additionally there will be expansion growth of one Internal Medicine physician at the Boise Internal Medicine Residency; one new Family Medicine resident at the FMRI in Boise; one new Family Medicine resident in Coeur d'Alene; six Family Medicine residents for the next and final class in Idaho Falls; the next class of three new eastern Idaho ISU Psychiatry residents in Pocatello; two new Family Medicine residents in Pocatello; and an expansion of one new Family Medicine residents at the Rural Training Track (RTT) program in Rexburg. Please see Attachment Five for a table that shows these residency and fellowship programs and their current and new physician trainees. These new positions for fiscal year 2023 will join the 217 residents and fellows already in training. This will help meet the ongoing needs of an expanding population and a physician workforce in a rural state where the COVID-19 pandemic demonstrated the critical need to expand access to primary care and mental health professionals.

In early June of 2021 the Governor's office through the Division of Financial Management released its FY 2023 Budget Preparation Guidance. This guidance limits agency budget submission caps to 3.1% of their FY 2022 General Fund appropriation. Therefore, the cap on GME growth for FY 2023 would be $729,033. A question was raised about there being any kind of exemption from this funding cap for GME, but we were told there would not be.

The Idaho GMEC Executive Committee then reconfigured the FY 2023 budget to meet this budget cap. This reconfigured budget can be seen in Attachment Three. Because of this budget cap all growth of existing residents and fellows to attempt to get them to $60K/resident/year were removed and additional funding for the pharmacy resident and psychology intern in column three was removed. Additionally, the four psychiatry R-1's at Eastern Idaho Regional Medical Center were removed as this program may not be ready to start on July 1, 2022. The Boise Internal Medicine Addiction Medicine Fellowship filled two of its three positions so will be reduced from 3 to 2/year this time. Because of the budgeting cap the Boise Internal Medicine Addiction Medicine Fellowship has graciously decided to take no funding for its one resident and two fellow expansion this year. This brings the number of new GME positions in the FY 2023 budget to fourteen. This changes the FY 2023 per resident funding request from the initial $60K to $52,070 per resident as noted in Attachment Three.

4. Current Location of Idaho GME Programs and Idaho's Resident Physicians

Please refer to Attachments Four and Five to see where the current Idaho GME programs, residents and fellows are located. Please note colors in green represent the 217 current residents and fellows in place as of the fiscal year 2022 budget and those in red represent the fourteen new residents and fellows anticipated in FY 2023. This will bring the total to 231 by June 30, 2022, as noted in red. This growth places us well on our way to the anticipated goal of 347 physicians in training by the end of the Ten Year GME plan.

5. New GME programs on the Near Horizon

There are three known programs that are under serious consideration for the near future. The first of these is a Psychiatry residency with four residents per class in Idaho Falls. If all goes well with accreditation, this program should start July 1, 2023 (FY 2024). The second of these will be a Pediatrics residency sponsored by the Family Medicine Residency of Idaho (FMRI) in conjunction with St. Luke's Regional Children's Hospital in Boise. This program had its accreditation site visit by the Accreditation Council on Graduate Medical Education on July 7, 2021. It's anticipated start with four new residents per class will be July 1, 2023 (FY 2024). The third is the growth of a new rural training track program or rural program sponsored by the Family Medicine Residency of Idaho (FMRI) out of the Nampa Family Medicine Residency. Discussions are now ongoing around the location of this new rural program. Further on the horizon are the considerations for a General Surgery residency and an Emergency Medicine residency, as well as several new fellowships.

6. Graduate Medical Education Outcomes - Metrics and Dashboard

Please see Attachment Six, which represents the dashboard of the Idaho Graduate Medical Education Committee. This demonstrates the agreed upon metrics to move the Idaho Ten Year GME Strategic Plan forward with outcomes that are meaningful and relevant to the state of Idaho. As demonstrated on the dashboard, all programs have 100% fill rates from thousands of applicants that want to come to these programs. Additionally, all programs are ACGME accredited. Almost all programs exceed the rolling five-year average of the percent of physicians being retained in Idaho at greater

than 50%. Also, almost all programs have done an excellent job in having greater than 30% of the graduates serve in rural Idaho or in urban underserved Idaho. Some of the programs are brand new and will take several years to achieve their five-year rolling averages. Finally, as noted on the dashboard, all programs are of high quality and all exceed the threshold for success in board certification pass rates as measured by a rolling five-year average.

7. **Summary:**

The state of Idaho's Ten Year Graduate Medical Education Strategic Plan has been a success. Despite shifting funding priorities and a global pandemic, the Plan has continued to grow new GME residency and fellowship programs and train new GME residents and fellows in these programs for the state of Idaho. The Ten Year Idaho GME Strategic Plan has grown from nine core residency programs, and with the approval of the fiscal year 2023 budget, will have twelve core programs and six Fellowships in place. The number of GME residents in training has gone from 134 in 2017 to 217 in 2021 and will grow by 14 more with the approval of the fiscal year 2023 budget request to 231. New programs are in the pipeline. These include Pediatrics, Psychiatry, and Family Medicine, three specialties that are still much needed in our state. By all metrics, the Ten Year GME Strategic Plan has demonstrated improvements in the outcomes of primary care physicians per capita in Idaho, the number of GME resident physicians per capita in Idaho, retention rates of graduates that exceed 50% for the state of Idaho and high-quality residents being trained. As a direct consequence of these programs there has been increased access to timely care

for many years and will continue to do so for decades to come. Additionally, these programs have provided many jobs and economic benefit to their communities and the state of Idaho.

We would all like to thank the Idaho State Board of Education for its steadfast support and vision to help create a stable and growing physician workforce for the state of Idaho. Without that support and encouragement of the Board of Education members as well as from the Office of the State Board of Education (OSBE) this plan may have never seen the light of day. We also want to thank both Governor Little and Governor Otter, the Division of Financial Management, the Joint Finance and Appropriations Committee (JFAC) and the Idaho Legislature for their steadfast support and encouragement of moving the Idaho Ten Year GME plan forward for the benefit of the people of Idaho.

ATTACHMENT 6

*Definition of Rural Idaho – According to the Idaho Department of Commerce, rural counties in Idaho are defined as those with <20,000 population. 35 of 44 counties in Idaho are rural by this definition. Non-rural counties are: Ada, Bannock, Bonneville, Canyon, Kootenai, Latah, Madison, Nez Perce, and Twin Falls.

#Definitions of Underserved Idaho

1. Primary Care Underserved - 97% of all of Idaho qualifies as a Health Professional Shortage Area (HPSA) for primary care. The only areas without a primary care HPSA designation are Ada County, half of Blaine County (Sun Valley area), and half of Bonneville County (Idaho Falls area).

ATTACHMENT 6

2. Mental Health Care - 100% of Idaho (all counties and areas) are mental health HPSA's.
3. All FQHCs and Community Health Centers serve underserved Idaho.

University of Utah School of Medicine Mission & Vision

SCHOOL OF MEDICINE
UNIVERSITY OF UTAH

Mission of the School of Medicine

The University of Utah School of Medicine serves the people of Utah and beyond by continually improving individual and community health and quality of life. This is achieved through excellence in patient care, education, and research. Each is vital to our mission and each makes the others stronger.

- We provide compassionate care without compromise.
- We educate scientists and health care professionals for the future.
- We engage in research to advance knowledge and well-being.

Vision of the University of Utah

The "One U" vision of the University of Utah is to work together to solve big problems in society and to optimize our campus resources to create an exceptional educational experience for our learners here.

Vision of the School of Medicine

To create an exceptional learning experience for our students to promote their development into competent and caring professionals. To achieve our vision of exceptional learning, we value:

- Relationships built on trust and mutual respect;
- Talents and ability of each member of the learning community to contribute according to his or her talents
- Responsibility of each member of the community to one another;
- Accountability towards professional standards of attitudes and behavior
- Respect for diversity of perspectives and the inclusive spirit of teamwork

Idaho Affairs Mission Statement

To serve the students, people, and communities of Idaho by providing excellent learning experiences, community engagement opportunities, and collaborative partnerships, thus creating Idaho physicians who provide high quality health care to the state of Idaho and the Intermountain West.

Idaho Affairs Team

SCHOOL OF MEDICINE
UNIVERSITY OF UTAH

Benjamin Chan, MD, MBA, M.Ed.
Director of RUUTE; Associate Dean, Admissions; Idaho Affairs

Dr. Chan currently serves as the Associate Dean of Admissions, Associate Dean of Idaho Affairs, and Director of our Rural & Underserved Utah Training Experience (RUUTE) Program. He is enthusiastic and passionate about creating innovative experiences and activities for medical students in the states of Utah, Idaho and beyond. He feels fortunate to work with a wonderful team who shares the vision and goal to improve medical education opportunities, health care access, and long term socio-economic benefit for rural and underserved communities throughout our region.

He also teaches in the medical school as a small group leader for Clinical Method Curriculum (CMC) and treats youth as an inpatient child and adolescent psychiatrist at the Huntsman Mental Health Institute (HMHI).

Kylie Christensen, MPH, Associate Director of RUUTE & Regional Affairs

Kylie has been with the RUUTE and Regional Affairs programs since its inception in 2018. Kylie is from St. George Utah and completed her Bachelors and Masters of Public Health at the University of Utah. As the Associate Director, she oversees efforts in Utah, Idaho, and the Intermountain West. She enjoys meeting with rural/underserved hospital leadership, recruiting and recognizing community providers, and growing programs and opportunities that will benefit rural/underserved communities of Utah, Idaho, and the Intermountain West.

Idaho Affairs Team

SCHOOL OF MEDICINE
UNIVERSITY OF UTAH

Lucy Hansen, MD, Assistant Director of RUUTE & Regional Affairs

Dr. Hansen has been working with the RUUTE and Regional Affairs team since Spring 2020. She is originally from Virginia and graduated with degrees in Biology and Environmental Science from The College of William and Mary. She received her medical degree from the Medical College of Virginia and completed her Pediatric residency at Primary Children's Medical Center through the University of Utah. Dr. Hansen focuses on engaging medical students and enhancing their rural connections, especially during the first and second years. She is also working on expanding rural clerkship opportunities, especially in southwestern Utah and northern Idaho and oversees efforts in northern Idaho. Through RUUTE, Dr. Hansen teaches an elective for the School of Medicine called *Sustainability, Medicine, and Health* that focuses on the relationship between climate and health. She is also a core faculty member and teaches clinical curriculum in the School of Medicine.

Elizabeth Botts, MD, Assistant Training Director, Psychiatry Idaho Rural Track

Dr. Elizabeth (Beth) Botts is a native of Oklahoma earned her medical degree at the University of Oklahoma Health Sciences Center in Oklahoma City, Oklahoma. She then completed a residency at the University of Utah and a child and adolescent psychiatry fellowship at Vanderbilt University while serving as the Chief Resident during her fellowship training. At the University of Utah and Vanderbilt, Dr. Botts has participated in numerous teaching opportunities, program improvement projects, and committee involvement including establishing autism and eating disorder "tracks" on the child/adolescent inpatient units. She is first and foremost a patient advocate and educator with a drive for improving access to mental healthcare. Dr. Botts is very passionate about the Idaho Track and it's success and has lead in its development.

Idaho Affairs Team

SCHOOL OF MEDICINE
UNIVERSITY OF UTAH

Sarah Franklin, Ph.D., Assistant Director of RUUTE & Regional Affairs
Dr. Franklin joined the RUUTE and Regional Affairs team in spring 2020. She's originally from Price, Utah, and received her Ph.D. in Biochemistry from Brigham Young University. She manages a research lab that is focused on investigating the epigenetic regulation of gene expression during the development of heart disease. Dr. Franklin oversees the RUUTE summer research experiences for under graduate and medical students, teaches the Research & Innovation Course over the summer, and oversees efforts in southeastern Idaho. Dr. Franklin is passionate about exposing young individuals to new career paths in medicine and science, creating meaningful educational opportunities for students, and mentoring them along their academic journey.

Laura Herring, RUUTE & Regional Affairs Program Coordinator
Laura joined the RUUTE team in November 2020 as the Regional Affairs Coordinator. Laura completed a Bachelor of Business Administration and a Bachlor of Arts in Foreign Languages (Spanish) at Mississippi State University. Working with students and motivating them to particpate in community engagement is her passion, and she enjoys getting to know the RUUTE & Regional Affairs students. Laura focuses on expanding efforts in Montana, Idaho, and Wyoming by coordinating rural outreach programs, developing preceptors in these states, and connecting regional students with RUUTE & Regional Affairs programs.

Additional members of the RUUTE (Rural & Underserved Utah Training Experience) & Regional Affairs team include Stephanie Lyden, MD, Kerry Whittemore, MD, Madelyn Carter, and Megan McKay. The RUUTE & Regional Affairs team focuses efforts on rural & underserved students, and we are proud to frequently collaborate to serve the students and communities of Idaho.

Idaho Affairs Update

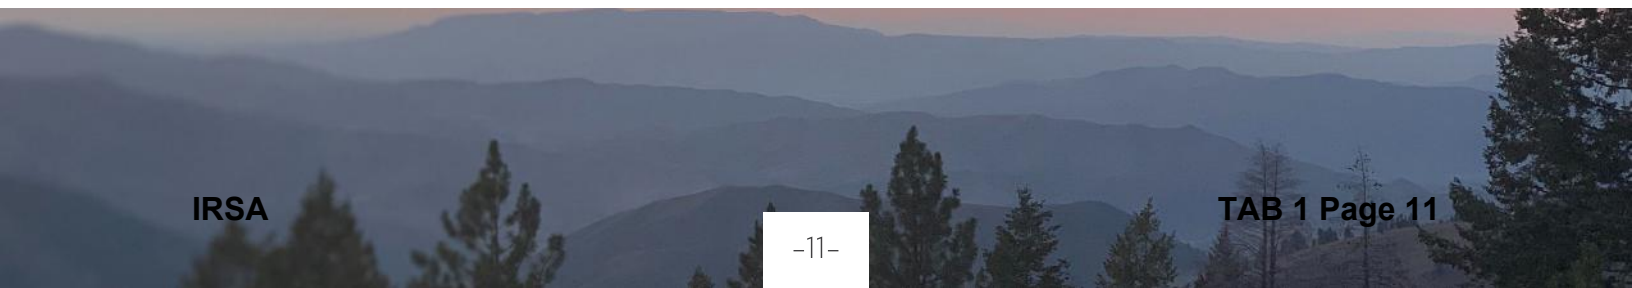
SCHOOL OF MEDICINE
UNIVERSITY OF UTAH

The 2020-2021 Academic Year was one of growth for the Idaho Affairs program at the University of Utah school of medicine. Below is a snapshot of the year in review.

Personnel

Laura Herring joined the team as the Regional Affairs coordinator in November of 2020. She thoroughly enjoys working with the Idaho students, and she is excited to develop opportunities for them. Dr. Lucy Hansen and Dr. Sarah Franklin both recently joined the team, and they assist with overseeing efforts in Idaho. Jessica M. Hurtado, MPA serves as the new Associate Director of Admissions, she joined the team in June 2020 and has prior experience working with rural and historically underrepresented medical students at the University of New Mexico School of Medicine.

Announcements



The University of Utah has received a landmark gift for the School of Medicine from the George S. and Dolores Doré Eccles Foundation and the Nora Eccles Treadwell Foundation. Our medical school will carry a new name—the Spencer Fox Eccles School of Medicine at the University of Utah—in recognition of our appreciation for all that Spencer Eccles, the Eccles family and the Eccles foundations have done to champion medical education and world-class health care at the University of Utah and in our state.

Admissions & Outreach

The Office of Admissions has participated in a number of virtual fairs hosted by colleges, universities and student organizations across the state of Idaho throughout the 2020-2021 year. Virtual events provided additional opportunities to support Idaho students and pre-medical advisors, further strengthening our relationship with the state of Idaho.

Shadowing

During the 2020-2021 academic year, the Idaho Affairs program offered shadowing scholarships for Idaho medical students. Throughout May, June, and July 2021, four Idaho medical students were sent to shadow physicians across the state of Idaho.

Idaho Affairs Update

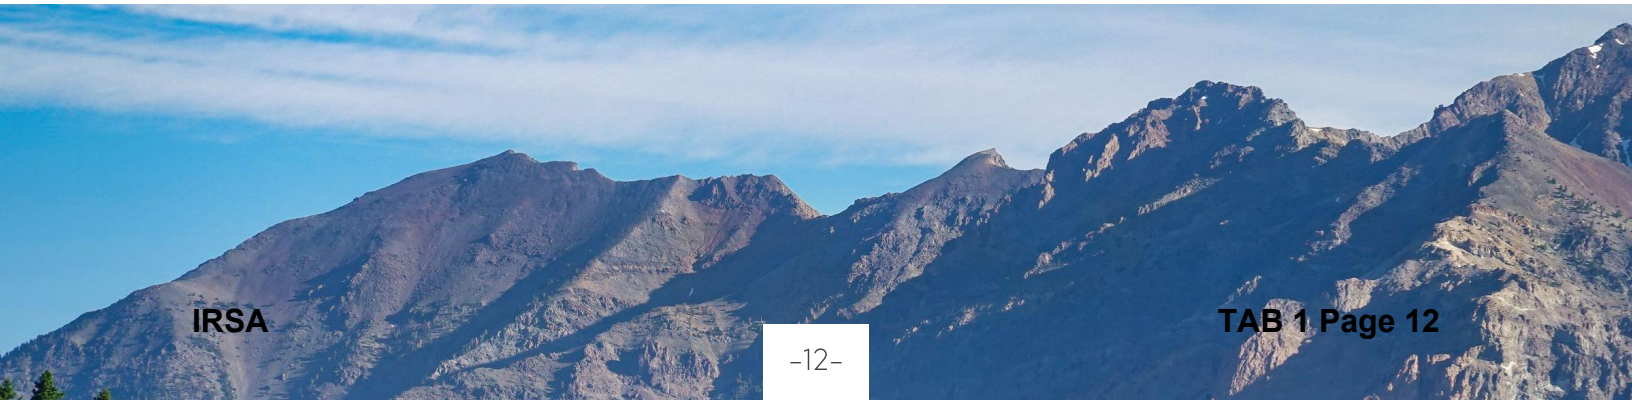
SCHOOL OF MEDICINE
UNIVERSITY OF UTAH

The 2020-2021 Academic Year was one of growth for the Idaho Affairs program at the University of Utah School of Medicine. Below is a snapshot of the year in review.

Clerkships

All ten third-year Idaho medical students successfully completed Family Medicine clerkships across the state of Idaho, from Boise to Coeur d'Alene. For the upcoming academic year, the Idaho Affairs program will also support more Utah students who have strong ties to Idaho to complete their Family Medicine clerkship in Idaho.

Student Engagement



Students actively participated in the Idaho Affairs programs during the 2020-2021 academic year, including through the Idaho Rural Outreach Program (IROP), the development of the URISE-Idaho (Underserved and Rural Interested Student Experience) student group, and through volunteer opportunities. Additionally, Luke Brandenburger (Class of 2021) successfully completed a two year term with the Idaho Medical Association as the UUSOM Student Representative.

Graduate Medical Education

Graduate Medical Education (GME) is the next step after medical school where resident physicians continue their training in hospitals and clinics. A medical residency is required for physicians to become fully licensed in different fields and specialties.

Continuing Medical Education (CME)

During the 2020-2021 academic year, RUUTE (Rural & Underserved Utah Training Experience) & Regional Affairs launched a podcast: *M.ED: Medical Education for the Practicing Clinician*, one of few podcasts that deliver Continuing Medical Education (CME) credits in episodes that are 30 minutes or less. Interview topics with experts in the field range from telemedicine, medical student wellness, adult learning, clinician as the educator, and more.

Student Spotlight

SCHOOL OF MEDICINE
UNIVERSITY OF UTAH

Nicolette Jessen

Class of 2022
Hometown: Sandpoint, ID
Idaho State Representative for URISE

URISE (Underserved and Rural Interested Student Experience) has developed a Idaho branch specifically intended to be a space where UUSOM Idaho students can network, learn, and get to know one another. Nicolette Jessen (MS4) and Joe Lovelace (MS3) were selected as the student leaders during the 2021 academic year.

What have you enjoyed most about being in medical school?

Hearing the stories patients have to tell, laughing about the failures of third year, and the friends I have made along the way.

Where is your favorite place in Idaho?

Sandpoint, ID

What is your medical speciality of interest?

Ob/GYN

What is your favorite experience with RUUTE & Regional Affairs?

IROP, rural family medicine rotation, and rural clinical shadowing experience.

What did you enjoy most about your clerkship in Idaho?

I was able to take care of community members that I grew up with and many of who are a reason why I am where I am today.

Why are you excited to be the URISE Idaho representative?

I want to in increase the opportunities students have to go back to Idaho for clinical experiences besides Family Medicine.

Student Spotlight

SCHOOL OF MEDICINE
UNIVERSITY OF UTAH

Joe Lovelace

Class of 2023
Hometown: Boise, ID
Idaho State Representative for URISE

URISE (Underserved and Rural Interested Student Experience) has developed a Idaho branch specifically intended to be a space where UUSOM Idaho students can network, learn, and get to know one another. Nicolette Jessen (MS4) and Joe Lovelace (MS3) were selected as the student leaders during the 2021 academic year.

What have you enjoyed most about being in medical school?

The friends that I have made within my class. I have an enormous crew of folks that are eager to get outside in any of the dozens of ways available in the Wasatch at every opportunity for breaks that we get!

Where is your favorite place in Idaho?

The Pahsimeroi Valley

What is your medical speciality of interest?

Emergency Medicine

What is your favorite experience with RUUTE & Regional Affairs?

I'm excited to start clerkships soon!

Why are you excited to be the URISE Idaho representative?

It can be daunting for students to leave Idaho and enter medical school with potentially 100% strangers. I only knew the names of two fellow students from my class when I arrived, but some of the first friends I made were fellow Idahoans. It was so reassuring to have older students and fellow students that I could lean on to help me transition to life in medical school and Utah alike.

Admissions

SCHOOL OF MEDICINE
UNIVERSITY OF UTAH

The 2020-2021 Academic Year brought new updates to the UUSOM Office of Admissions, including a new name for the medical school—the Spencer Fox Eccles School of Medicine at the University of Utah, and opportunities to recruit, accept, and matriculate Idaho students through virtual events.

Outreach

UUSOM Admissions has participated in 11 events with students, staff, and faculty across the state of Idaho during the 2020-2021 academic year. These events featured direct Q&A with the students about applying to medical school and interviews, UUSOM requirements and recommendations, the benefits of applying to Utah as an Idaho resident, and how to build a strong application.

11
Total UUSOM Admissions events targeted to Idaho

4
Regional/national events featuring Idaho residents and beyond

7
School-specific fairs and informational sessions

We communicate regularly with the pre-medical advisement teams at Boise State University, Brigham Young University-Idaho, College of Idaho, College of Southern Idaho, Idaho State University, Northwest Nazarene University, and University of Idaho. Our pre-medical advisement colleagues are an extension of our team and we value their insight and support as we continue to develop our pipeline programming and outreach efforts in the state of Idaho.

We host feedback sessions for applicants from Idaho who were waitlisted or declined admission immediately following final admissions notifications. We encourage these students to reapply to our program and offer guidance to intentionally strengthen their overall application.

Collaborations & Partnerships

- State Certification: Idaho applicants to the UUSOM are certified as Idaho residents by Idaho State University (ISU) according to policies and statute set forth by the Idaho legislature.
- Rural Physician Incentive Program (RPIP): Idaho students are assessed RPIP fees as determined by Idaho statute. The UUSOM also participates in the Rural Health Care Access Program (RHCAP).
- Idaho Graduate Medical Education: The UUSOM supports the Idaho Graduate Medical Education (GME) 10 year strategic plan to increase residency positions for our students, and to help treat and take care of Idahoans.

Admissions

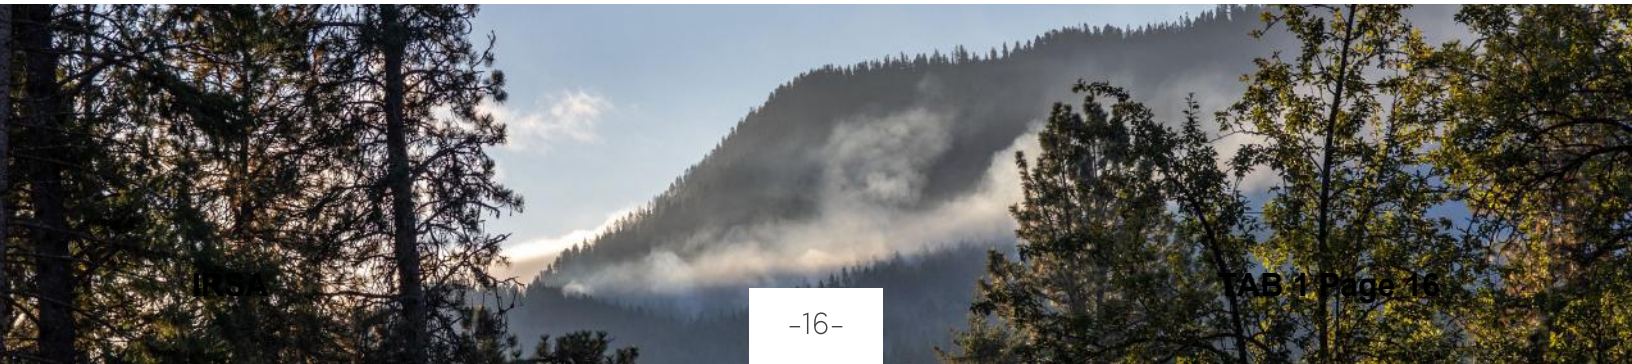
SCHOOL OF MEDICINE
UNIVERSITY OF UTAH

The 2020-2021 Academic Year brought new updates to the UUSOM Office of Admissions, including a new name for the medical school—the Spencer Fox Eccles School of Medicine at the University of Utah, and opportunities to recruit, accept, and matriculate Idaho students through virtual events.

Admissions

The University of Utah School of Medicine combines innovative learning experiences with excellence in research and clinical care to not only serve our state and its diverse patient populations, but to provide top-rated care to the intermountain community and beyond. Medical education at the UUSOM strives to emphasize community, relationships, and professionalism in the learning culture through the Exceptional Learning Experience (ELE). The ELE creates a self-motivated, system-thinking, patient-centered, evidence-based foundation for students to support lifelong, continued learning in the medical field.

Mission Statement



The University of Utah School of Medicine Office of Admissions serves the State of Utah, our medical school and the healthcare profession by admitting well qualified and prepared medical students. Through a holistic culture based on valuing teamwork, professionalism, compassion, and communication, we strive to select a diverse and innovative class who exemplifies dedication, service to their community and patients, leadership, research skill, and academic excellence.

Vision Statement

The University of Utah School of Medicine Office of Admission will inspire and transform the application process through quality, education, and innovation to serve the state of Utah and beyond.

Holistic Review

The UUSOM employs a holistic review process, meaning all aspects of the application are considered, not just grades and test scores. We encourage applicants to not only meet our requirements, but to participate in a variety of activities that showcase their interests, passion for medicine, and goals of becoming a physician.

Admissions

SCHOOL OF MEDICINE
UNIVERSITY OF UTAH

The 2020-2021 Academic Year brought new and exciting updates to the UUSOM Office of Admissions, including a new name for the medical school—the Spencer Fox Eccles School of Medicine, and opportunities to recruit Idaho students through virtual events.

UUSOM Application Requirements

Bachelor's Degree

- An applicant's bachelor's degree must be completed at a regionally accredited institution in the United States or Canada prior to matriculation to the University of Utah School of Medicine.
- If an applicant does not have a bachelor's degree but has earned a doctoral-level (terminal degree) from a regionally accredited U.S. or Canadian institution that did not require a bachelor's degree for entrance, they may apply if they will earn or have earned the doctoral degree by July 1 of the year they will begin medical school.
- No specific or recommended undergraduate major required
- The degree may be in the discipline of the applicant's choice, as long as required premedical coursework has been completed. The University of Utah School of Medicine recommends that students choose a major field for which they have enthusiasm and interest.

GPA

- Minimum 3.00 or higher in all sections (science, non-science, and overall)

MCAT score

- Total overall score of 500 or higher; only an applicant's highest total score will be considered

Letters of Recommendation

- 3 required letters, up to 4 accepted

Required Coursework

- Chemistry, Physics, Biology, Writing/Speech, Social Sciences, Humanities
- All premedical coursework must be completed for credit and a passing grade at a regionally accredited institution in the United States or Canada

Activity Requirements

- Clinical Experience: Shadowing, direct patient care, experience in a clinical setting – scribe, CNA, EMT
- Community Engagement: Leadership, volunteer experience, community service
- Intellectual Curiosity: Demonstrated experiences showing intellectual growth and curiosity – research, capstone projects, thesis, poster presentations, awards & recognitions

Admissions

SCHOOL OF MEDICINE
UNIVERSITY OF UTAH

The incoming Idaho Class of 2025 consists of 10 highly motivated students who were competitively selected from an applicant pool of over 3800 total applicants to the UUSOM.

Medical Education at the UUSOM

SCHOOL OF MEDICINE
UNIVERSITY OF UTAH

UUSOM students participate in intensive classroom learning during years 1 & 2 and complete community and hospital-based clerkships and electives in years 3 & 4.

YEAR 1

Foundations of Medicine: This 17-week phase includes the medical science, medical arts and clinical skills that students will require before beginning in clinics and future units.

Clinical Experience, CMC 1: The 2-year Clinical Method Curriculum (CMC) partners groups of students and core clinical faculty for the longitudinal development of clinical skills in a mentored learning community.

Molecules, Cells, and Cancer: This 8-week unit integrates molecular and cell biology with genetics, hematology, cancer biology and basic oncology.

Host and Defense: This 9-week unit introduces infectious disease, the biology of the immune system, the body's response to pathogens, and antimicrobial therapy.

End of Year 1 Assessment: A comprehensive knowledge exam, covering the entire first year curriculum.

Clinical Experience: CMC 2: CMC II focuses on expanding history-taking skills, advanced physical examination in specific areas, professional communication skills, introduction of lab and imaging selection and interpretation, and beginning skills in diagnostic reasoning.

YEAR 2

Metabolism and Reproduction: This 9-week unit begins with the pathophysiology of the gastrointestinal tract and the digestion/absorption of nutrients.

Circulation, Respiration and Regulation: This 11-week unit is designed to help students develop the clinical medicine skills and medical science knowledge to be able to propose rational differential diagnoses and diagnostic and treatment strategies for clinical problems affecting the circulatory, respiratory, and renal organ systems.

Brain and Behavior: This 9-week unit integrates basic neuroanatomy and neurophysiology with the clinical disciplines of neurology, psychiatry, pathology and pharmacology.

Skin, Muscle, Bone, and Joint: Upon completion of this 6-week unit, students will be able to name, recognize and describe common dermatologic and musculoskeletal diseases, including the basic science foundations of each condition. In addition, they will describe diseases, clinical presentation and pathophysiology and define terms used on physical, microscopic and radiologic examinations.

Clinical Experience: CMC 3-4: CMC III-IV focuses on advanced history-taking skills, advanced physical examination skills to help elicit abnormal findings, professional communication skills, further development of lab and imaging selection and interpretation, and more advanced skills in diagnostic reasoning.

Medical Arts and Humanities: Layers of Medicine 1 - 4: The Layers of Medicine course is a longitudinal, 2-year course in the pre-clerkship curriculum. The overarching goals of the Layers of Medicine courses are to provide students with the knowledge, skills and attitudes necessary to provide care to all.

Medical Education at the UUSOM

SCHOOL OF MEDICINE
UNIVERSITY OF UTAH

UUSOM students participate in intensive classroom learning during years 1 & 2 and complete community and hospital-based clerkships and electives in years 3 & 4.

YEAR 3

Transition to Clerkship: This course is designed to provide students with the resources and skills necessary to thrive in the clinical curriculum and to succeed as medical professionals and lifelong learners.

Family Medicine Clinical Clerkship: Six weeks with a community based of faculty family medicine preceptor. Idaho students are required to complete this clerkship in Idaho.

Internal Medicine Clinical Clerkship: Eight week rotation that consists of inpatient responsibilities, ambulatory clinic, case work and rounds on wards of the University of Utah Medical Center, LDS Hospital, or the VA Medical Center.

Neurology Clinical Clerkship: Four weeks divided into two weeks inpatient and two weeks outpatient experiences.

Obstetrics and Gynecology Clinical Clerkship: Six weeks of inpatient and outpatient experience at the University of Utah Medical Center and LDS Hospital. Time is also spent in lectures, seminars, and review of gynecological pathology.

Pediatrics Clinical Clerkship: Six weeks spent on the inpatient wards at Primary Children's Hospital (PCH), a pediatric subspecialty service, and service at the General Pediatric Clinic at the university of Utah Medical Center, and the newborn nursery at the University of Utah Medical Center.

Psychiatry Clinical Clerkship: Six weeks emphasizing inpatient care at the University of Utah Medical Center, VA Medical Center, Primary Children's Hospital, and the University of Utah Neuropsychiatric Institute.

Surgery Clinical Clerkship: Eight weeks of ward work, operating room experience, lectures, case presentations, and rounds at the University Medical Center, LDS Hospital and VA Medical Center.

YEAR 4

The University of Utah School Of Medicine utilizes a learning community model to deliver medical education and career mentoring necessary to prepare fourth year medical students for their internship (12 months). Students develop advanced skills through sub-internship, critical care, advanced internal medicine and elective courses. They prepare for entry into residency by selecting curriculum specific to their career specialty interests.

All students graduating from the University of Utah School of Medicine must complete a sub-internship rotation, a critical care clerkship, and 4-weeks of advanced internal medicine. Students have ample elective time to explore additional clinical interests, research and seminar based courses. Additionally all students must participate in the Transition to Internship Course (TIC).

Shadowing

SCHOOL OF MEDICINE
UNIVERSITY OF UTAH

During the 2020-2021 academic year, the Idaho Affairs program offered shadowing scholarships for Idaho Medical students. Throughout May, June, and July 2021, four Idaho medical students were sent to shadow physicians across the state of Idaho.

Catherine Bautista
Catherine Bautista is a first-year medical student from Boise, Idaho. During June 2021, Catherine spent three days shadowing Dr. Boerner and Dr. Jackson at Idaho Eyelid and Facial Plastic Surgery in Boise, Idaho.

Andrew Jones
Andrew Jones is a first-year medical student from Boise, Idaho. During May 2021, Andrew spent two days shadowing Dr. Matheau Eysser at Madison Memorial Orthopedics in Rexburg, Idaho.

Kristin Nesbitt
Kristin Nesbitt is a first-year medical student from Moscow, Idaho. During June 2021, Kristin spent three days shadowing Dr. Katie Gentry at OGA Women's Health in Nampa, Idaho.

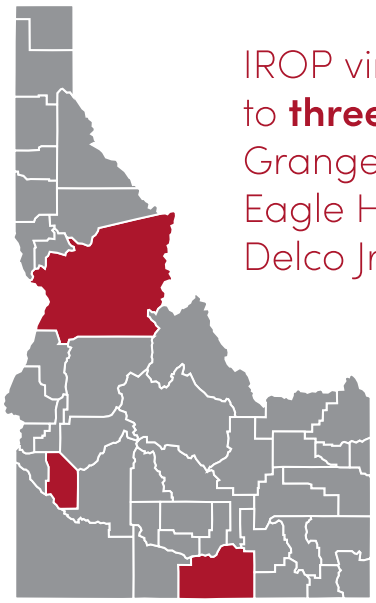
Sierra Starley
Sierra Starley is a first-year medical student from Twin Falls, Idaho. During May 2021, Sierra spent two days shadowing Dr. David Christensen at Intermountain Spine and Orthopedics in Twin Falls, Idaho.

*Red counties represent shadowing locations

"One of the most impactful things was seeing how connected Dr. Eysser is with his patients. This shadowing experience was definitely affirming to me that rural and underserved medicine a passion of mine and something I want to pursue in my career. It also confirmed that I would like a more community based practice."

-Andrew Jones

"I really love Idaho, so I wanted to shadow a physician who works there to see what their day to day is like. Shadowing Dr. Christensen in Twin Falls really solidified my desire to practice rural medicine."



-Sierra Starley

Idaho Rural Outreach Program (IROP)

SCHOOL OF MEDICINE
UNIVERSITY OF UTAH

During the 2020-2021 academic year, four first-year medical students were selected as the new IROP students leaders. In March 2021, they led presentations at schools across the state of Idaho.

IROP is a student led group that facilitates trips for UUSOM Idaho students to return to their hometowns and present to local K-12 schools on healthcare careers, the journey to medical school, and health sciences. Due to COVID-19, the 2020-2021 IROP presentations occurred virtually over Zoom. This allowed IROP to reach more students and use fewer resources.

IROP virtually presented to **three** schools: Grangeville High School, Eagle High School, and Delco Jr. High

111

Number of K-12 students reached through IROP presentations during the 2020-2021 academic year

420

Minutes spent presenting health science information to K-12 students

Student Engagement

SCHOOL OF MEDICINE
UNIVERSITY OF UTAH

The Idaho Affairs program strives to provide continuous opportunities for Idaho student engagement. The visit from Idaho State University's TRIO program was a highlight of the 2020-2021 academic year.

In June 2021, the UUSOM's Idaho Affairs program and Office for Health Equity, Diversity, & Inclusion collaborated to host **45** high school students and **6** advisors from Idaho State University's TRIO program.

Above: Five Idaho Medical students volunteered to help with the event by assisting high school students with a cow eye dissection, and participating in a Q&A panel along with the Office of Undergraduate Admissions and the Office of Admissions for the UUSOM.

Clinical Medical Education at the UUSOM

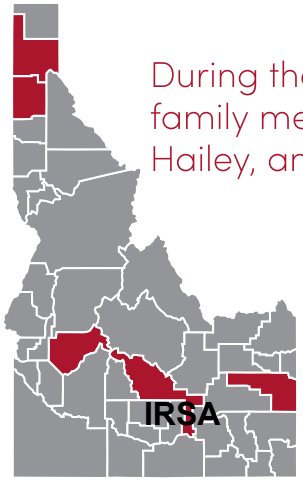
SCHOOL OF MEDICINE
UNIVERSITY OF UTAH

All ten third-year Idaho medical students successfully completed Family Medicine clerkships across the state of Idaho, from Boise to Coeur d'Alene. For the upcoming academic year, the Idaho Affairs program will also support more Utah students who have strong ties to Idaho to complete their Family Medicine clerkship in Idaho.

Family Medicine Clerkship Overview

During the clerkship, all students develop competencies in patient care, systems-based practice, lifelong-learning, and professionalism. Students assess and manage acute, chronic, and preventive medical issues in the outpatient family medicine setting. Students also engage in reflective and interactive activities throughout the month, designed to develop awareness and hone skills for physician-patient relationships. These relationships are an essential and powerful tool for good care of patients.

Family Medicine Clerkship Goals



1. Students will be able to integrate their clinical reasoning skills with their scientific background through broad-spectrum hands-on patient care in the primary care setting.
2. Students will be able to see patients collaboratively with their preceptor, managing the full spectrum of acute, chronic, and preventive care needs that are addressed in the primary care setting.
3. Students will be able to develop therapeutic relationships with patients, families and communities.
4. Students will be able to understand how the principles of Family Medicine can help create a more efficient and effective health care system.
5. Students will be able to be more prepared to serve their community, by taking an active learning role in patient care, navigation of complex health systems, lifelong learning, and professional commitment.

Family Medicine Clerkship Timeline

The clerkship is six weeks in duration. Students are expected to be active in clinical duties for the majority of the days, however there are required weekly or bi-weekly didactic sessions (online) as well as dedicated time for students to prepare for exams and to complete the various assignment

Preceptor/Site Requirements

The preceptor(s) must be board-certified in Family Medicine, and hold a University of Utah Volunteer Clinical Faculty appointment with the Department of Family and Preventive Medicine. The clinical site must also have a current affiliation agreement with the University of Utah School of Medicine

During the 2020-2021 academic year, 10 third-year Idaho medical students completed family medicine clerkships in the following locations: Boise, Idaho Falls, Coeur d'Alene, Hailey, and Sandpoint

40

Weeks Idaho medical students spent on Family Medicine clerkships in Idaho during 2020-2021

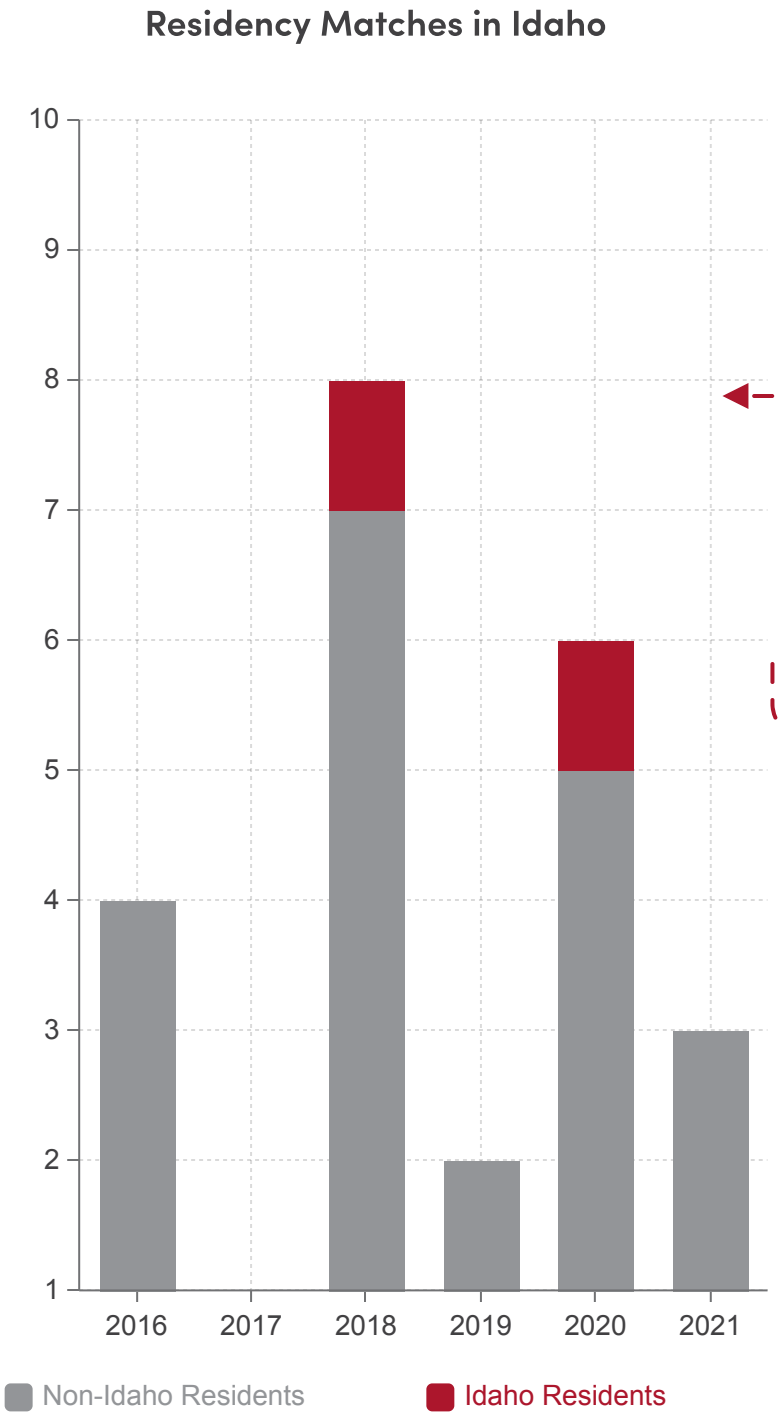
Financial Report 2020-2021

SCHOOL OF MEDICINE
UNIVERSITY OF UTAH

The Idaho State Board of Education subsidizes ten seats at the University of Utah so that Idaho students are able to pay in-state tuition. For academic year 2020-21, Idaho students paid $41,783.64 in tuition and fees. Idaho students also paid a surcharge of $1,772.00 which was returned to Idaho (to the Idaho Rural Physician Incentive Program). The State of Idaho paid $43,871.50/per student.



A portion of the subsidy that the University of Utah receives from the ISBOE went towards direct student support, program support, preceptor payments, and salaries. This amount totals to $119,944.21 for academic year 2020-21. Due to the COVID-19 pandemic, fewer funds were spent on travel than in previous years, however, the Idaho Affairs program was still able to reach students through virtual events and methods.

Graduate Report

SCHOOL OF MEDICINE
UNIVERSITY OF UTAH

Below is a culmination of data regarding Idaho Medical students.

Since 2008, **35** UUSOM graduates have matched into Idaho GME Programs. The graph to the left displays UUSOM residency matches, broken into Idaho residents and non-residents.

The UUSOM has successfully graduated **204** Idaho students since 1995. Below is a graduation report of sponsored and non-sponsored students.

Idaho Psychiatry

SCHOOL OF MEDICINE UNIVERSITY OF UTAH

HUNTSMAN MENTAL HEALTH INSTITUTE UNIVERSITY OF UTAH

Idaho State University

During the 2020-2021 academic year, 100 students applied to the program and 3 students were selected to begin in July 2021. This represents a **150% increase** in applications since the 2019-2020 academic year.

Program Updates

"In November 2019, the University of Utah announced a generous financial commitment from the Huntsman Foundation to establish the Huntsman Mental Health Institute. Some of the work supported by the Foundation includes student mental health, increased access to mental health services in rural communities, and expansion of research initiatives, including research on the genetic basis of mental health conditions."[1] The Idaho Affairs program is thankful for the robust developments that this funding will provide for the University of Utah and the University of Utah Department of Psychiatry.

Rural Track (Idaho) Overview

The Idaho Rural Track in Pocatello has a mission to train community centered psychiatrists who will play an integral role in the development of mental health programs and practices in rural or high need communities.

Residents spend the majority of the first two years of the program in Salt Lake City, Utah working alongside fellow residents in the Adult Psychiatry program focusing on mastering skills in general medicine as well as completing required inpatient and some subspecialty psychiatric rotations. Some rotations will be completed in Pocatello, including general medicine and inpatient psychiatry.

During program years three and four, residents will transition to Pocatello, Idaho. During year three, they will primarily focus on outpatient training and during year four they will focus on their specific interests, passions and individualized goals. Residents will leave the program well-prepared to serve patients in both inpatient and outpatient settings. The Idaho Psychiatry Track plans to continue to recruit three residents per year for the track. The first three residents began their training in the summer of 2020 and the next cohort begins in July 2021.

Year 1 & 2

The majority of training occurs in Salt Lake City, with the exception of one month in Portneuf IM during year 1 and one month Portneuf IP psych during year 2.

Year 3 & 4

Year 3 & 3 are based in Pocatello/ SE Idaho, with the first cohort of residents starting in July 2022 as R3s.

1. Stowe, Jerilyn. "A New Era in Mental Health Care: University of Utah Dedicates Huntsman Mental Health Institute." *University of Utah Health*. 2021.

Idaho Psychiatry

SCHOOL OF MEDICINE UNIVERSITY OF UTAH

HUNTSMAN MENTAL HEALTH INSTITUTE UNIVERSITY OF UTAH

Idaho State University

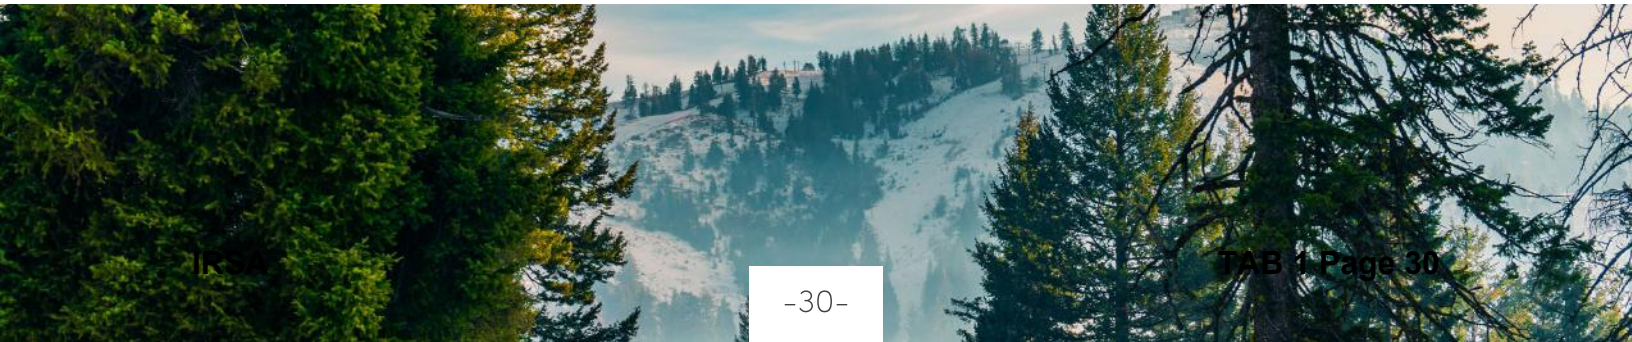
During the 2020-2021 academic year, 100 students applied to the program and 3 students were selected to begin in July 2021. This represents a **150% increase** in applications since the 2019-2020 academic year.

Rural Track (Idaho) Finances

On average, it costs about $180,000 to train a resident each year. The money given to the University of Utah from the state goes directly to the cost of residents' salaries. Monies to Idaho State University pays for administrative costs and some facilities charges related to the Utah/Idaho psychiatry program. The program must rely on other sources, such as the VA and grants, to fund the remaining cost.

Inaugural Class

These students matched into the program in 2020 and are now in their second year:



Daisha Orchard, MD
University of Utah

Matthew Torbenson, MD
Medical College of Wisconsin

Christian Schmutz, MD
University of Utah

Idaho Psychiatry

SCHOOL OF MEDICINE UNIVERSITY OF UTAH

HUNTSMAN MENTAL HEALTH INSTITUTE UNIVERSITY OF UTAH

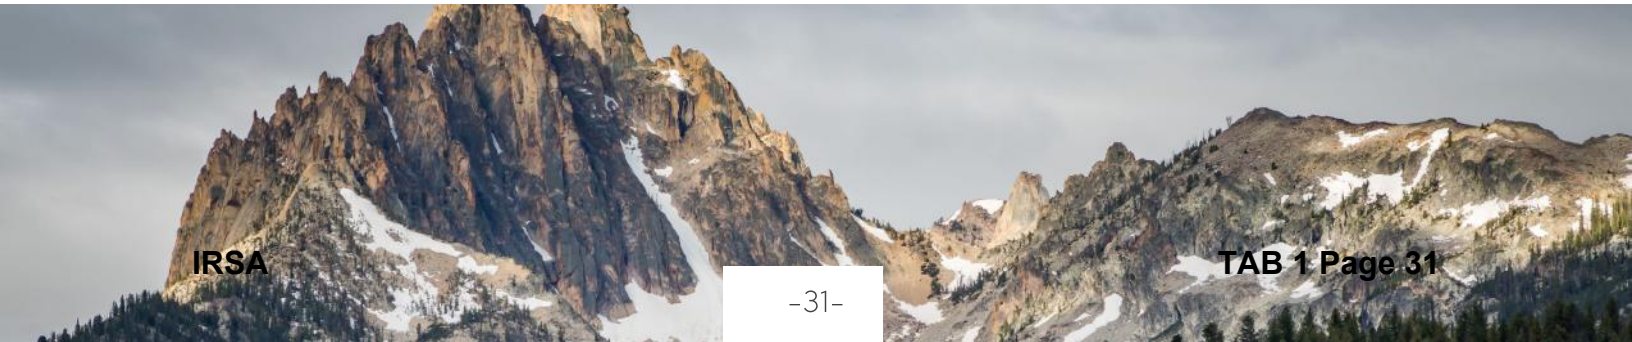
During the 2020-2021 academic year, 100 students applied to the program and 3 students were selected to begin in July 2021. This represents a **150% increase** in applications since the 2019-2020 academic year.

2021 Match Results

These students are scheduled to begin the program in July 2021:

Chaston Ellis, DO
Touro University



Leah Fortson, MD
Tufts University

Ryan Kelly, MD
University of Iowa

Future Vision

- Recruitment/Retention of psychiatry graduates to Southeastern Idaho
- Improve patient access to psychiatric care
- Mental Health Integration of primary care with psychiatry working with Idaho State University
- Development of Consultation and Telepsychiatry services
- Efficiency of psychiatric care in the Emergency Department
- Enhanced relationship between Idaho State University, Southeast Idaho Hospitals and Clinics, & the U Health system

Thank You & Acknowledgement

SCHOOL OF MEDICINE
UNIVERSITY OF UTAH

Idaho Students at the UUSOM would like to express their gratitude for the opportunity to study medicine at the UUSOM.

I have loved studying medicine at the University of Utah, especially now that I am spending time in the hospital working with patients. Medical school tuition is nothing to sneeze at, and it is such a relief that Idaho has helped pay part of my tuition. Thank you so much. I'm excited to someday return and practice medicine in the home state I love!

-Jarom Gropp, Class of 2023

Thank you so much for the incredible opportunity to study in Utah! I was so impressed by the quality of my education, the incredible catchment area, and the world class outdoors that I couldn't leave and decided to stay here for residency. I'm beyond grateful for the gift of my new home.

-Ellie Gilbertson, Class of 2021

I want to extend my utmost and sincere gratitude to everyone who has worked so hard to facilitate this wonderful opportunity for me to able to study medicine at such a prestigious institution like the University of Utah. It brings me joy every time my training comes in handy when I work with an Idaho-based patient at the clinics, and I hope to continue this service moving forward!

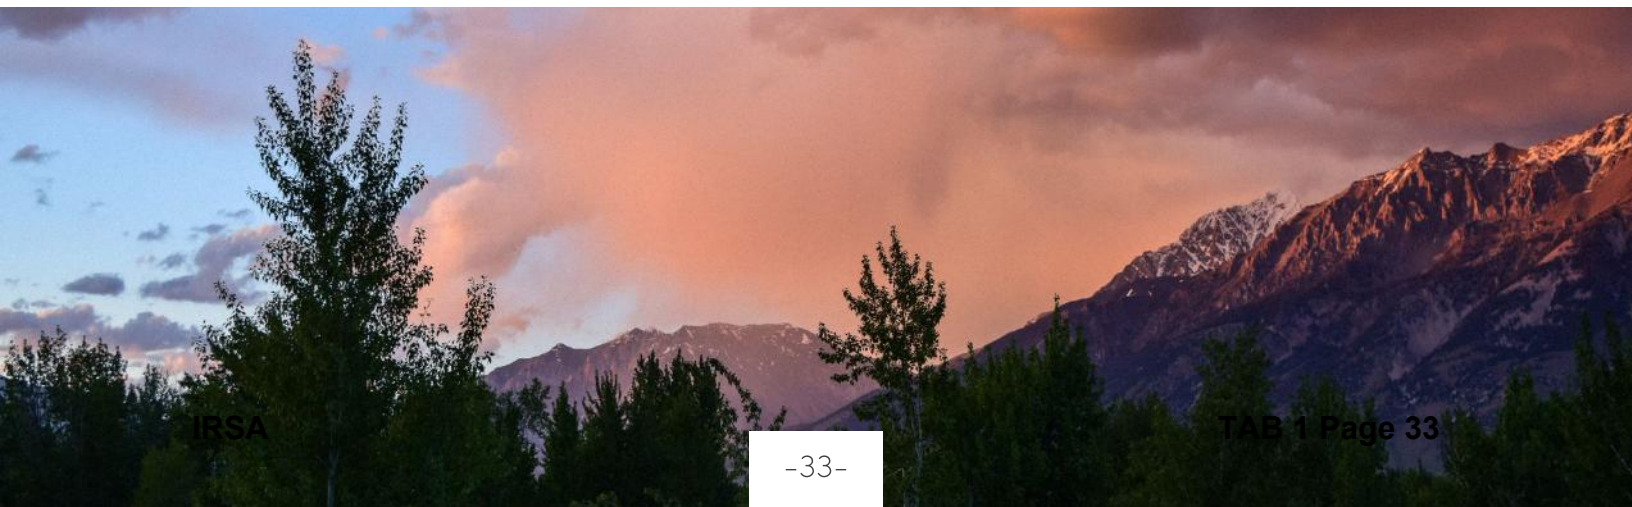
-Anurag Tripathy, Class of 2023

Thank you for supporting me in my medical education at UUSOM. It's been terrific being able to complete my training so close to home. I'm looking forward to returning to Idaho for my family medicine clerkship next year!

-John Tolke, Class of 2024

Thank You & Acknowledgement

SCHOOL OF MEDICINE
UNIVERSITY OF UTAH



Idaho Students at the UUSOM would like to express their gratitude for the opportunity to study medicine at the UUSOM.

As an Idaho student, I feel proud to represent my state. This opportunity to represent Idaho at UUSOM has left me with an overwhelming sense of gratitude to my state and for this incredible education. I hope one day to give back to Idaho what it has given me with this education

-Jake Lewis, Class of 2024

Thank you Idaho Board of Education! Without your help, I would not be here at UUSOM about to start my second year of medical school. There are many reasons to love Idaho, but having your support as I work to become a physician is at the top of my list. Thank you and I can't wait to return to the best state!

-Catherine Bautista, Class of 2024

SUBJECT

Semi-Annual Report of Approved Program Requests

REFERENCE

August 2020	Board accepted semi-annual report.
February 2021	Board accepted semi-annual report.

APPLICABLE STATUTE, RULE, OR POLICY

Idaho State Board of Education Governing Policies and Procedures, Section III.G.8.a.

BACKGROUND/DISCUSSION

In accordance with Board Policy III.G.3.c.i.2. and 4.b.i.2., prior to implementation, the Board's executive director may approve any new, modification, and/or discontinuation of academic or career technical education programs with a financial impact of less than $250,000 per fiscal year.

Consistent with Board Policy III.G.8.a., the Board office is providing a semi-annual report of academic and career technical program requests from Idaho's public postsecondary institutions that were approved by the executive director between January 1, 2021 and June 30, 2021. A report of program change requests approved by the full Board for the same time period is also included for informational and contextual purposes.

ATTACHMENTS

Attachment 1 – Semi-Annual Report of Approved Program Requests

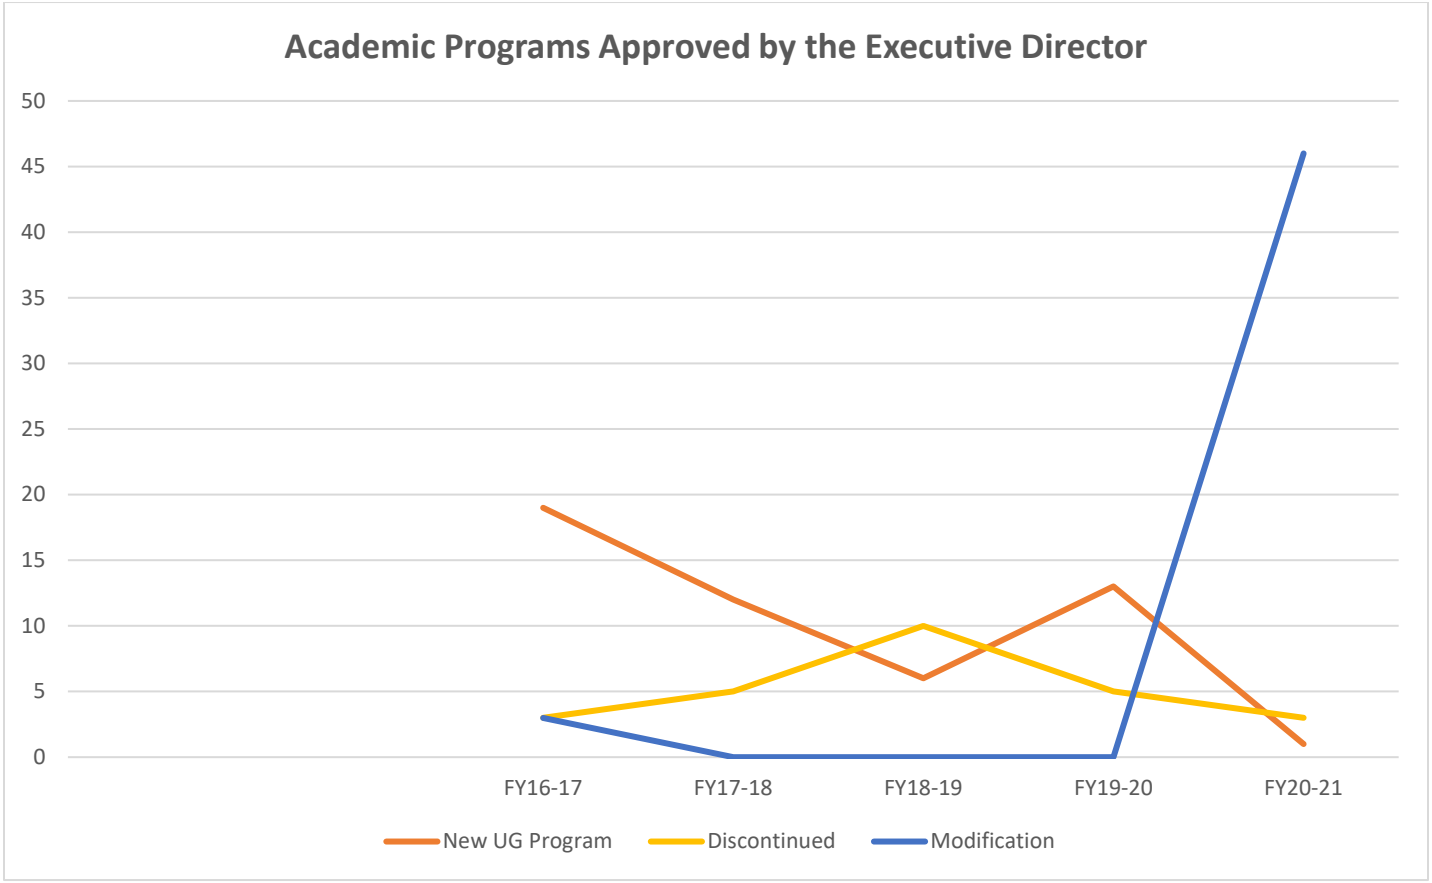
BOARD STAFF COMMENTS AND RECOMMENDATIONS

Staff provided an overview of new academic or career technical programs and certificates approved by the executive director consistent with Board Policy III.G. This included other instructional activity such as modifications to existing programs. Other non-substantial changes that require notification to the Board office were also included in the report.

Staff noted several trends in program requests over the past five fiscal years:

- A significant spike in program modification requests in FY20-21 resulting from institutions adding online options to existing programs, likely in response to the pandemic.
- A steep drop in new undergraduate program requests over the past five years – 1 request in FY20-21 down from 13 requests in FY19-20 and 19 requests in FY16-17.
- A significant spike of new academic undergraduate certificates – 34 in FY19-20, but dropping to more historical levels (10 new certificates) in FY20-21.
- Fairly consistent numbers of new graduate certificate requests over the past five years.

- A significant uptick in the number of new career technical certificates, AAS degrees, discontinued certificates, and discontinued degrees in FY19-20.



BOARD ACTION

I move to accept the Semi-Annual Report of Approved Program Requests, as presented in Attachment 1.

Moved by _____ Seconded by _____ Carried Yes_____ No_____

SUBJECT

Three-Year Program Plan

REFERENCE

August 2017	The Board approved the Five-Year Program Plan update to Board Policy III.Z.
February 2018	The Board approved Policy III.Z. amendments that changed the planning period from five years to three years.
August 2018	The Board approved the first iteration of the Three-Year Program Plan.
August 2019	The Board approved the Three-Year Program Plan update.
June 2020	The Board approved a waiver of Board Policy III.Z.2.a.i., which required the Board review and approve the three-year plan at the August 2020 Board meeting.

APPLICABLE STATUTE, RULE, OR POLICY

Idaho State Board of Education Governing Policies and Procedures, Section III.Z. Planning and Delivery of Postsecondary Programs and Courses
Section 33-113, Idaho Code

BACKGROUND/DISCUSSION

Section 33-113, Idaho Code, requires the Board, in the interest of efficiency, to define the limits of instruction at all publicly funded institutions, and to limit wasteful duplication to the extent practicable. Board Policy III.Z. sets the method by which the Board limits duplication or evaluates the need for duplication as well as assigns responsibility for assessing the educational and workforce needs around the state.

Consistent with Board Policy III.Z.2.a.ii, institutions created program plans in alignment with their Statewide and Service Region Program responsibilities that describe proposed programs to be offered over a three-year period, including an inventory of programs currently offered. Board staff reviews institution plans for alignment with policy requirements, program responsibilities, and identification of any duplication of programs across institutions.

IMPACT

The Three-Year Plans provide a comprehensive, system-wide picture of anticipated institutional academic program and career technical program development. The plan is intended to serve as the foundation for guiding the Board in its efforts to coordinate the efficient delivery of educational programs throughout the state and provides the Board with a systemwide look at all the programs that are delivered or plan to be delivered in the next three years. Approval of the three-year plan will provide the institutions with the option to

proceed with the development of program proposals that will be considered by the Board, as applicable to the level of program impact, for approval and implementation over the next three years.

ATTACHMENTS

Attachment 1 – Three-Year Program Plan

BOARD STAFF COMMENTS AND RECOMMENDATIONS

In June 2020, the Board approved a waiver of Board Policy III.Z.2.a.i., which waived the requirement of the Board to review and approve the three-year plan at the August Board meeting annually. The waiver was in response to the COVID-19 pandemic and impacts to institution budgets. This waiver provided institutions with opportunities to reevaluate program plans and align those with budget realities. Additionally, many institutions were conducting regular program reviews and/or program prioritization processes. For those reasons, the Board will observe that some institution plans consist of projected programs for a one- or two-year period instead of three.

With that said, each institution submitted an institution plan representing proposed programs for Academic Year 2022-2023, 2023-2024, and/or 2024-2025. Consistent with the planning process, institutions met on June 10, 2021 to review institution plans. The following projected programs and changes have been identified by institutions that will necessitate ongoing discussion.

- **Bachelor of Business Administration in Accountancy**
  Boise State University (BSU) discontinued traditional offering of the Bachelor of Business Administration in Accountancy in Region IV-Twin Falls and transitioned the program to an online offering. Currently, under Board Policy III.Z, BSU serves undergraduate and graduate business program needs in Region IV. Idaho State University (ISU) indicated they would like to continue discussion with BSU regarding business degree offerings in Region IV.

- **Master of Social Work**
  BSU transitioned their Master of Social Work (MSW) to an online offering. This program was originally offered face-to-face in Lewiston and was discontinued in 2018 and is currently offered in Region I-Coeur d'Alene and Region IV-Twin Falls. Due to the COVID-19 pandemic, BSU moved MSW course offerings in Region I and IV to online in AY 2020-2021 and is currently working on a proposal to discontinue the face-to-face offering in Region IV, which will be replaced with BSU's online MSW program. At this time, BSU will retain the face-to-face offering in Coeur d'Alene and will evaluate whether or not to discontinue the face-to-face option in the future. ISU expressed interest in continuing conversations with BSU for potential collaboration and increased offerings, including exploring how to address the MSW needs in Regions I and IV given the discontinuation of the traditional offering in those regions.

- **Registered Nursing**
  CSI, NIC, and CWI have identified a need for BSN programs within their respective service regions. The RN to BSN completion program to be offered online was projected by CWI in Region III. BSU currently offers a traditional BSN offering and RN to BSN online program in Region III. BSU has indicated their existing RN to BSN program is flexible and fully scalable. ISU offers an RN to BSN (Hybrid) and LCSC offers an RN to BSN online. Ongoing discussion regarding potential duplication and competition for students and nursing faculty needs to occur, including impacts to existing partnerships between institutions.

The following represents various applied baccalaureate programs identified by Idaho's community colleges. While there were no specific concerns raised, there was interest in obtaining additional information for the applied baccalaureate programs and interest in having discussion regarding curriculum alignment for the associate's programs:

- CEI – Bachelor of Applied Technologies
- CEI – Registered Nursing, AS
- CEI – Pharmacy Tech, AAS
- CSI – Industrial Technology, BAS
- NIC – Medical Laboratory Technician, AAS
- NIC – Construction Management, BAS
- NIC – Diesel Technology, BAS
- NIC – Digital Media, BAT

Institutional three-year plans were reviewed by the Council on Academic Affairs and Programs in June 2021. The Instruction, Research and Student Affairs (IRSA) committee reviewed the Three-Year Plan on August 13, 2021. IRSA observed that University of Idaho has projections for three new Associate of Applied Science (AAS) degree programs in the area of natural resources. The Idaho Division of Career Technical Education notes that the AAS component of the University of Idaho's plan is not allowed under current Board policy III.Z.

Staff recommends approval, conditioned on the areas requiring further discussion.

BOARD ACTION

I move to approve the Three-Year Program Plan as submitted in Attachment 1.

Three-Year Plan
Planning and Delivery of Postsecondary Programs

The State Board of Education established in alignment with Board Policy III.Z., a comprehensive process for the planning and delivery of postsecondary education. Consistent with this policy, institutions create an institution plan that describes all current programs and proposed programs to be offered in alignment with each institution's Statewide and Service Region Program Responsibilities. The process requires that institutions provide a level of programmatic information for each current program being offered and for each proposed program as part of the three-year plan development.

Statewide Program Responsibility
In accordance with Board Policy III.Z.1.i, Statewide Program Responsibility shall mean an institution's responsibility to offer and deliver a Statewide Program in all regions of the state. Statewide Program Responsibilities are assigned to a specific institution by the Board, taking into account the degree to which such program is uniquely provided by the institution.

Service Region Program Responsibility
In accordance with Board Policy III.Z.1.g, Service Region Program Responsibility shall mean an institution's responsibility to offer and deliver a Service Region Program to meet regional educational and workforce needs in its primary service region as defined in subsection 2.b.ii.1) and 2) below. Service Region Program Responsibilities are assigned to the Designated Institution in each service region, but may be offered and delivered by Partnering Institutions in accordance with the procedures outlined in this policy.

The Three-Year Plan consists of proposed programs institutions have identified they will pursue over a three-year period. As proposed programs are developed, institutions must follow the program review process and procedures provided in Board Policy III.G, Postsecondary Program Approval and Discontinuance to acquire appropriate approvals prior to implementation of programs. If the program is to be delivered outside the institution's service region, a Memorandum of Understanding must be developed and agreed upon in cooperation with the Board's Chief Academic Officer prior to implementation.

The Plan also consists of a complete program inventory of programs currently being offered by Idaho's public postsecondary institutions. Programs are listed by CIP code and then alphabetically by institution. The list includes programs, options, and degrees offered through various departments and colleges.

Consistent with Board Policy III.Z., the Plan is updated on an annual basis. It is intended that the Three-Year Plan will provide guidance to the State Board of Education in its planning and coordination of educational programs.

Delivery of Programs

Consistent with Board Policy III.Z., "Statewide Program Responsibilities are assigned to a specific institution by the Board, taking into account the degree to which such program is uniquely provided by the institution." The statewide program list is updated by the Board every two years.

Boise State University
Boise State University must assess the need for and, when determined necessary by the assessment, ensure the statewide delivery of all educational programs in the following degree program areas:

Program Name	Degrees
Public Policy and Administration	M.S., Ph.D.
Community & Regional Planning	M.C.R.P., Ph.D.
Social Work (Region V-VI —shared with ISU)	M.S.W.
Social Work	Ph.D.

Board approved December 2016

Idaho State University
Idaho State University must assess the need for and, when determined necessary by the assessment, ensure the statewide delivery of all educational programs in the following degree program areas:

Program Name	Degrees
Audiology	Au.D., Ph.D.
Physical Therapy	D.P.T., Ph.D.
Occupational Therapy	M.O.T.
Pharmaceutical Science	M.S., Ph.D.
Pharmacy Practice	Pharm.D.
Nursing (Region III shared w/ BSU)	M.S., D.N.P.
Nursing	Ph.D.
Physician Assistant	M.P.A.S.
Speech Pathology	M.S.
Deaf Education	M.S.
Sign Language Interpreting	B.S.
Health Education	M.H.E.
Public Health	M.P.H.
Health Physics	B.S., M.S., Ph.D.
Dental Hygiene	B.S., M.S.
Medical Lab Science	B.S., M.S.
Clinical Psychology	Ph.D.

Board approved December 2016

University of Idaho

University of Idaho must assess the need for and, when determined necessary by the assessment, ensure the statewide delivery of all educational programs in the following degree program areas:

Program Name	Degrees
Law	J.D.
Architecture	B.S. Arch., M. Arch.
Integrated Architecture & Design	M.S.
Landscape Architecture	B.S.L.A., M.L.A.
Interior Design	B.I.D., M.S.
Animal & Veterinary Science	B.S.A.V.S.
Animal Science	M.S.
Veterinary Science	D.V.M.
Plant Science	M.S., Ph.D.
Agricultural Economics	B.S.Ag.Econ
Applied Economics (Agricultural)	M.S.
Food Science	B.S.F.S., M.S., Ph.D.
Forestry	B.S.Forestry
Renewable Materials	B.S.Renew.Mat..
Wildlife Resources	B.S.Wildl.Res.
Fishery Resources	B.S.Fish.Res.
Natural Resource Conservation	B.S.Nat.Resc.Consv.
Rangeland Ecology & Management	B.S.Rangeland.Ecol.Mgmt.
Fire Ecology & Management	B.S.Fire.Ecol.Mgt.
Natural Resource concentrations in: • Forestry • Renewable Materials • Wildlife Resources • Fishery Resources • Natural Resource Conservation • Rangeland Ecology & Management • Fire Ecology & Management	M.S., M.N.R., Ph.D.

Board approved December 2016

THIS PAGE LEFT INTENTIONALLY BLANK

THREE-YEAR PLAN

Proposed Regional and Statewide Programs

Institution Name: University of Idaho

Program Title	Degree Level/ Certificate	Region	Regional/Statewide Program Responsibility	Anticipated Delivery Date	Program Description	Anticipated Resources	Memorandum of Understanding or Contract	Other
Global Disease Ecology	B.S.	Region II	Regional	Summer 2021	Provide an undergraduate students with broad educational science background in Global Vector Biology along with research experience. This program will provide students with a transdisciplinary background in diseases across human, plant and animals. **(Hybrid)**	College/dept. reallocation		Approved
Program offerings commencing 2022-2023								
				Note: The University of Idaho has an ambitious schedule for new programs, as such, some of these proposed programs may be delayed to the Summer of 2024 as needed due to procedural timing or approval issues.			
Apparel, Textiles & Design	M.S.	Region II	Regional	Summer 2022	The purpose of creating a M.S. degree in Apparel, Textiles, and Design is to specifically delineate a specialization in apparel and textiles as a graduate degree, while maintaining the rigor of the current program the M.S. in Family and Consumer Sciences (FCS). **(Hybrid)**	College / Department Reallocation		
Architecture	M.S.	Region II	Statewide	Summer 2022	36-credit Master's degree to provide opportunities for focused research (based on faculty expertise). Will be connected to the architecture program, as well as other programs around the university through required and elective coursework. Emphases are Digital Fabrication, High-Performance Buildings, Architect as Developer, Urban Design and History/Theory. **(Hybrid)**	Program reallocation		
Business Administration	B.B.A.	Region II	Regional	Summer 2022	Program offered fully online only. General business management degree that will provide broad business education to non-traditional students, adult learners, or place-bound students that are not able to complete a degree on campus. **(Online)**	Institutional or college reallocation.		We plan on creating MOUs with North Idaho College, College of Western Idaho. College of Southern Idaho, and College of Eastern Idaho.

Institution Name: University of Idaho

Program Title	Degree Level/ Certificate	Region	Regional/Statewide Program Responsibility	Anticipated Delivery Date	Program Description	Anticipated Resources	Memorandum of Understanding or Contract	Other
Child Development	M.S.	Region II	Regional	Summer 2022	Program focused on early childhood development; historical and contemporary family structures and dynamics; adolescent and young adult behaviors, acute and chronic health and wellbeing; the impact of poverty on individuals, families, and communities (particularly those living in Idaho); and interdisciplinary approaches to enhancing health-promoting behaviors within the context of families and social networks. **(Hybrid)**	College/department reallocation		
Cybersecurity	M.S.	Region I, II, IV	Regional	Summer 2022	Provide Masters students with a broad, practical education in advanced Cybersecurity and an introduction to research in Cybersecurity. **(Hybrid)**	College/department reallocation.		
Cybersecurity	Ph.D.	Region I, II, IV	Regional	Summer 2022	Provide PhD students with a broad education in Cybersecurity and the opportunity to engage in research that expands the field of Cybersecurity. **(Face to Face)**	College/department reallocation.		
Data Science	M.S.	Region II	Regional	Summer 2022	This request is for a new interdisciplinary masters in Data Science administered by the Department of Computer Science in the College of Engineering with course contributions from other colleges. Data Science is the strategic, managerial, and operational processes and systems for gathering, processing, storing, organizing, analyzing, distributing, and using data and their associated technologies. **(Hybrid)**	College/department/ University reallocation		
Ecology and Ecological Systems	B.S.	Region II	Regional	Summer 2022	Traditional modality. Focus on ecology of terrestrial systems through coursework, laboratories, and field work. Graduates will be positioned to pursue careers in science education, ecosystem restoration, resource management, environmental consulting, environmental law, and graduate school. **(Face to Face)**	College/department reallocation		

Institution Name: University of Idaho

Program Title	Degree Level/ Certificate	Region	Regional/Statewide Program Responsibility	Anticipated Delivery Date	Program Description	Anticipated Resources	Memorandum of Understanding or Contract	Other
Forest Harvesting Technologies & Operations	A.A.S. or A.S.	Region II	Regional	Summer 2022	Students pursuing this degree will develop their knowledge and skill set in timber harvesting technology and forest operations (e.g., forest road layout and construction, supply chain management). Students will be exposed to hands-on training using forest harvesting equipment and technology to meet industry workforce needs on the University of Idaho's Experimental Forest near Moscow. The program is expected to partner with industry (e.g., harvesting simulators from Caterpillar, John Deere, Komatsu, Tigercat for classroom use) so that students are trained in the operation of newest harvesting technologies commercially available. The college will also leverage its strength in offering the nationally acclaimed Idaho's Logger Education and Advance Professionalism program and relationship with groups such as the Association of Logging Contractors of Idaho to develop allied courses focused on working more effectively with forestry companies and family forest owners. **(Hybrid)**	College / Department Reallocation		
Groundwater Hydrogeology	M.S.	Region II	Regional	Summer 2022	In response to unmet workforce needs in Idaho, we propose a non-thesis M.S. in Groundwater Hydrogeology, to be delivered at the UI Moscow campus. It will cover theory and practice of groundwater study and modeling. With proper planning, students could potentially complete this degree as a 4+1 option. **(Face to Face)**	This program would leverage existing resources (e.g. all classes are already regularly offered at UI) and would have no new costs associated with it.		

Institution Name: University of Idaho

Program Title	Degree Level/ Certificate	Region	Regional/Statewide Program Responsibility	Anticipated Delivery Date	Program Description	Anticipated Resources	Memorandum of Understanding or Contract	Other
Industrial Technology (INDT)	B.S.Tech.	Region I	Regional	Summer 2022	Traditional modality & Distance via Engineering Outreach: Industrial Technology provides students the ability to lead industry operations that are becoming more technical in nature and supervise direct labor. This degree bridges the gap between engineering degrees and technology degrees. There have been numerous requests to extend the program to CdA center campus.	College/dept. reallocation		
Medical Science	M.S.	Region II	Regional	Summer 2022	Matriculation through medical school requires completion of the board Step exams and rigorous clinical training. Some students are not able to complete these for a variety of health and other reasons and leave a modest number of students with two years of extensive medical education but lacking a degree. The M.A. in Science will build on this foundation to provide these students a degree option, drawing on students from the 5 state WWAMI region. **(Hybrid)**	College/department reallocation followed by revenue generation through tuition		A MOU will be established with UWSOM WWAMI affiliated schools to provide this option to their students
Natural Resources Enterprise Management	B.S.	Region II	Regional	Summer 2022	Graduates of the B.S. in Natural Resources Enterprise Management will be sought to manage and operate client-focused, natural resources-based, for profit businesses such as outfitters, guide services, hunting and fishing resorts, ranches, among others. It is also expected that many graduates will use the knowledge obtained from earning their degree to establish new natural resource-based enterprises in Idaho and throughout the United States. Students in the degree program will complete a cross-disciplinary set of courses in the College of Natural Resources and the College of Business of Economics to gain the necessary knowledge and skill set required by this industry and to position them for a multitude of career opportunities. **(Hybrid)**	College / Department Reallocation		

Institution Name: University of Idaho

Program Title	Degree Level/ Certificate	Region	Regional/Statewide Program Responsibility	Anticipated Delivery Date	Program Description	Anticipated Resources	Memorandum of Understanding or Contract	Other
Nursery Technology & Operations	A.A.S. or A.S.	Region II	Regional	Summer 2022	This degree will deliver an experiential commercial forest nursery program focused on practices, technology, and operations unique to the North American nursery industry. Students will focus on the propagation and production of trees, shrubs, and native plants using advanced technologies at the environmentally controlled modern greenhouses located at the University of Idaho's Pitkin Forest Nursery in Moscow. Students will also engage in both business-related coursework and applied practices so as to gain the skills necessary to manage a commercial nursery. There is potential to engage with both private enterprises and public nurseries to fill a workforce need throughout North America. **(Hybrid)**	College / Department Reallocation		
Nutritional Sciences	M.S.	Region II	Regional	Summer 2022	Program incorporating science-based interdisciplinary studies and research regarding micronutrient and macronutrient digestion, absorption, and metabolism; changing nutrient requirements across the human lifespan; impact of nutrient intake on human health; "functional foods," health, and wellbeing; sports nutrition; and physiology and behaviors related to dietary choices and health. **(Face to Face)**	College/department reallocation		
Precision Agriculture	B.S.	Region II	Regional	Summer 2022	Provide undergraduate students with the educational background to lead agricultural businesses in cutting-edge technology in precision agriculture. Students will learn how to use new technologies and research to respond to some of the greatest challenges facing agriculture today. **(Hybrid)**	College/department reallocation		

Institution Name: University of Idaho

Program Title	Degree Level/ Certificate	Region	Regional/Statewide Program Responsibility	Anticipated Delivery Date	Program Description	Anticipated Resources	Memorandum of Understanding or Contract	Other
Wildland Fire Technology & Operations	A.A.S. or A.S.	Region II	Regional	Summer 2022	This degree will be designed for online delivery and targeted to current and former wildland firefighters actively engaged in wildland fire technology and operations. The A.A.S. degree will leverage the College of Natural Resources' current instructional efforts with the National Wildfire Coordination Group (NWCG) and other related organizations to develop new online content for fire professionals so as to deliver a much-needed pathway for professionals seeking to complete the Office of Personnel Management Federal Series certification. **(Online)**	College / Department Reallocation		
Program offerings commencing 2023-2024								
Anatomy	Ph.D.	Region II	Regional	Summer 2023	The PhD in Anatomy will address a critical need for trained anatomists in medical education programs and offer a continuing education option for Science instructors. The Program will be a hybrid online/onsite program to maximize flexibility while leveraging local resources. **(Hybrid)**	College/department/ University reallocation followed by revenue generation through tuition		
Biomedical Engineering	M.S.	Region II	Regional	Summer 2023	Provide masters students with the knowledge of engineering principles combined with design and research methods to solve problems in the medical field to advance health care diagnosis and treatment. **(Face to Face)**	College/department reallocation		
Emerging Digital Media	M.A./M.S.	Region II	Regional	Summer 2023	Online master's degree that will prepare graduates to plan, implement and assess emerging media for the purposes of branding, marketing and engaging audiences. Combination of online coursework, hands-on learning and workplace practicum. **(Online)**	College/department reallocation		

Institution Name: University of Idaho

Program Title	Degree Level/ Certificate	Region	Regional/Statewide Program Responsibility	Anticipated Delivery Date	Program Description	Anticipated Resources	Memorandum of Understanding or Contract	Other
Hospitality	Certificate	Region II	Regional	Summer 2023	An interdisciplinary certificate designed to accompany a general degree as an opportunity for students and professionals to focus on the application of skills well-suited to the hospitality industry. Courses will include selections in Communication, Organizational Science, Social Sciences, Humanities, Marketing and Accounting. The certificate would be available both **online and face to face**.	College / Department Reallocation		
Nutritional Sciences	Ph.D.	Region II	Regional	Summer 2023	This will be an interdisciplinary degree in cooperation with Dept. Animal Sciences and others (as appropriate) and will prepare students for careers in nutrition research, industry, nongovernmental, and government jobs related to animal and human nutrition. **(Face to Face)**	College/department reallocation		
Plant Pathology	Ph.D.	Region II	Regional	Summer 2023	These degrees existed previously in CALS prior to the consolidation of Plant Pathology and Entomology into Plant, Soil and Entomological Sciences (PSES) in 1982. Traditionally in PSES, the graduate students working with Plant Pathology faculty received M.S. and Ph. D. degrees in Plant Sciences. Since faculty who complete Plant Pathology research will now be members of EPPN department (summer 2017) and will continue to train graduate students, their students will require a M. S. and Ph. D. Degree program that reflects their department and the discipline which they study. **(Face to Face)**	College/dept. reallocation		

THIS PAGE INTENTIONALLY LEFT BLANK

THREE-YEAR PLAN

Proposed Regional and Statewide Programs

Institution Name: **Idaho State University**

Program Title	Degree Level/ Certificate	Region	Regional/Statewide Program Responsibility	Anticipated Delivery Date	Program Description	Anticipated Resources	Memorandum of Understanding or Contract	Other
Program offerings commencing 2022-2023								
Barbering	Specialized Certificate	Region V	Regional	2022-2023	This program will train barbers in haircutting and styling skills, shaving, waxing, facial massage and men's hair replacement. It will also cover theory for business, infection control, anatomy and physiology, chemistry, electricity, skin, and properties of the hair and scalp related to the barbering field. Graduates will be prepared to pass a State Board Exam for Barbers, which includes both a practical and a theory exam. **MOD: face-to-face**	Reallocation of resources.		
Cloud Computing	BTC	Region V	Regional	2022-2023	The Cloud Computing Basic Technical Certificate is a compilation of courses aligned with the Amazon Web Services (AWS) Academy curriculum, designed to prepare students for formal certification in various cloud computing fields. Online program fees will be implemented to help support the program. **MOD: online**	Adjunct Faculty		
Computer Engineering	BS	Regions V, VI	Regional	2022-2023	A major in computer engineering will focus on the hardware, firmware, and software designs and implementations of modern and future electronic computing machines, as well as methods and tools needed to achieve this. Students will graduate with digital and analog skills that prepare them for employment as computer engineers. The degree also serves as an optional double major for students in science and engineering. ABET accreditation is typically needed. **MOD: Face-to-face**	No additional resources needed. The current EE faculty has sufficient capacity to deliver this BS degree program		
Digital Media	BFA	Regions V, VI	Regional	2022-2023	This interdisciplinary program combines courses from two departments: Art and Communication, Media & Persuasion. The program prepares students for employment in the growing fields of digital art, multimedia art and graphic design. The program includes study in 2D and 3D design, graphic design, art, brand management, art and design history, advertising design, photography, web design, computer graphics, animation, and digital video production. **MOD: face-to-face, some portion online, hybrid**	Primarily a combination of existing courses in the two departments. Reallocation of existing resources will occur, if needed.		

Institution Name: **Idaho State University**

Program Title	Degree Level/ Certificate	Region	Regional/Statewide Program Responsibility	Anticipated Delivery Date	Program Description	Anticipated Resources	Memorandum of Understanding or Contract	Other
Electrical and Computer Engineering	MS	Regions V, VI	Regional	2022-2023	Industry and INL have expressed demand for this degree program for many years. This degree program is essential to support the growing needs of Southeast Idaho industry, especially in the areas of semiconductor, power and energy systems. Industry is willing to send employees to obtain degree for development and career advancement. **MOD: Face-to-face**	Reallocation of resources between POC and IF; Polytechnic faculty engaged in research and teaching		
Energy Systems Industrial Mechanic	BTC	Region V	Regional	2022-2023	The BTC is designed for persons who work with mechanical and rotating equipment used in the generation of electrical power and within industrial plants such as compressors, pumps, hydraulic equipment, and steam boilers. These certificates will develop and upgrade skills of technicians to fill the gap between the tasks performed by engineers, technologists, and scientists and those performed by craftsmen. These certificates include topics in coupling alignment, hydraulics, valve maintenance and repair, pump maintenance and repair, troubleshooting of equipment failure, valve types and uses, pump types and uses, turbine types and uses, heat exchanger types and uses, thermal hydraulics, materials, basic electricity. **MOD: Face-to-Face**	Short term (6 month) adjunct faculty		
Family Nurse Practitioner (FNP) Certificate	Specialized Certificate	Online	Regional	2022-2023	Delivered fully on-line; the program will allow current licensed Nurse Practitioners in other specialties to complete FNP requirements for taking the FNP national board certification exam which is required for licensure. **MOD: Online.**	Adjunct Clinical faculty (no online program fee)		
Homeland Security and Emergency Management	MS	Online	Regional	2022-2023	An MS in Homeland Security & Emergency Management (HSEM) integrates security studies with the systematic approach necessary to effectively prevent and deter intentional acts of violence, and build strong capabilities to respond and recover from all hazards that threaten the United States. This multidisciplinary security and emergency management-based graduate program is designed to enhance students' abilities to assess risk, implement emergency protocols and lead in a complex environment with partners from the whole community and all layers of society. Resiliency requires professionals who recognize the threats, and who can lead private, public and nonprofit organizations to withstand small and large stressors and shocks that could disrupt vital systems. Students will explore topics such as cybersecurity, disaster management, intelligence, counterterrorism, and risk management and critical emerging issues. **MOD: Online**	Funding for Adjunct Instructors and program expenses	no	

Institution Name: **Idaho State University**

Program Title	Degree Level/ Certificate	Region	Regional/Statewide Program Responsibility	Anticipated Delivery Date	Program Description	Anticipated Resources	Memorandum of Understanding or Contract	Other
Licensed Operator & Nuclear Facility Technician Tracks	Adding two tracks to an existing AAS degree in Energy Systems Nuclear Operations Technology	Region V	Regional	2022-2023	**Licensed Operator Track:** The Energy Systems Nuclear Operations Technology program offers students the opportunity to learn the skills required to work in nuclear power plants. Students learn about electronics, instrumentation, power generation, reactor plant operation, radiation detection and protection, the nuclear industry, and safety protocols. In the second year the reactor program of emphasis focuses on operating nuclear reactors. **Nuclear Facility Technician Track:** The Energy Systems Industrial Mechanic Intermediate Technical Certificate is designed for persons who work with mechanical and rotating equipment used in the generation of electrical power and within industrial plants such as compressors, pumps, hydraulic equipment, and steam boilers. These certificates will develop and upgrade skills of technicians to fill the gap between the tasks performed by engineers, technologists, and scientists and those performed by craftsmen. These specialized certificates include topics in coupling alignment, hydraulics. valve maintenance and repair, pump maintenance and repair, troubleshooting of equipment failure, valve types and uses, pump types and uses, turbine types and uses, heat exchanger types and uses, thermal hydraulics, materials, basic electricity. **MOD: Face-to-Face**	1 FTE		
Listening & Spoken Language Certificate Program	Graduate Certificate	Online	Regional	2022-2023	Program would offer courses to support individuals involved in the education of children who are Deaf/Hard-of-Hearing that use Listening and Spoken Language. Program would include a combination of Speech-Language Pathology, Audiology and Special Education coursework/resources. This would be cross-walked to meet state licensure requirements; out of state to begin with (specifically MN, where the demand is originating from) but anticipate serving needs in additional states. **MOD: Online.**	Online program fee model combined with some existing resources	Talks have been initiated with state/licensure board in MN and with other interested groups	

Institution Name: **Idaho State University**

Program Title	Degree Level/ Certificate	Region	Regional/Statewide Program Responsibility	Anticipated Delivery Date	Program Description	Anticipated Resources	Memorandum of Understanding or Contract	Other
Nuclear Welding	Specialized Certificate	Region V	Regional	2022-2023	The Nuclear Welding specialized certificate will prepare students to use state of the art GTAW welding processes to produce high quality nuclear grade stainless steel pipe welds using both automated and manual methods. Both hot and cold wire GTAW processes will be used to prepare students for shop fabrication and field applications. Other subject matter will include non-destructive testing, stainless steel metallurgy, quality control/assurance, and using/programming welding procedure specifications for nuclear grade pipe welding. **MOD: Face-to-Face**	Increase in one faculty member's contract from 9-month to 10-month.		
Paralegal Studies	Microcertificate	Online	Regional	2022-2023	These microcertificates are for non-degreed legal professionals and degreed paralegals who are interested in qualifying to work as licensed paralegal practitioners, a trend seen regionally. Core curriculum will include topics such as Ethics, Debt Collection, and Landlord/Tenant law. Students will take specialty classes to increase their capabilities in specific areas of the market. **MOD: online.**	No additional resources needed. Online program fees will be implemented to help support the program.		
Respiratory Therapy	BS	Online	Regional	2022-2023	This bachelor's degree is built on, and a career ladder step up from, the associate degree at ISU. The two major factors that have precipitated the need for this expansion are: 1) changes in national accreditation standards, and 2) enhancing opportunities for AS prepared respiratory therapists to advance into management positions. This program provides instructionfor respiratory therapy students to administer respiratory care and life support to patients with deficiencies and abnormalities of the cardiopulmonary system. Graduates of the program will have the ability to accurately assess patients, determine appropriate methods of therapies, set up and operate respiratory equipment, monitor patient response to various treatment modalities, perform pulmonary function testing, and assist patients with breathing maneuvers. **MOD: online**	Reallocation New budget request for 1 FTE Online program fees will be implemented to help support the program.		
Theatre	MA	Regions V, VI	Regional	2022-2023	The proposed BFA in Musical Theatre is expected to be a much larger draw for students than the existing MA, which has suffered from low enrollments. Eliminating the only graduate program in theatre will allow some reallocation of teaching responsibilities for the proposed BFA. Teach out of existing graduate courses will take one more year.			DISCONTINUE

Institution Name: **Idaho State University**

Program Title	Degree Level/ Certificate	Region	Regional/Statewide Program Responsibility	Anticipated Delivery Date	Program Description	Anticipated Resources	Memorandum of Understanding or Contract	Other
Program offerings commencing 2023-2024								
Avionics	BTC	Region V	Regional	2023-2024	This certificate will be an add-on for students completing the airframe curriculum. It includes one full semester of higher level electronics for employment in the avionics area in modern aircraft maintenance. **MOD: face-to-face**	New CTE budget requested for 1 FTE.		
Biomedical Technician	BTC	Region V	Regional	2023-2024	The program will provide an overview of biomedical equipment and healthcare technology management. Students study hardware, software, and troubleshooting for medical devices. Training includes medical terminology, anatomy & physiology, basic electronics, schematics, pneumatics, hydraulics, customer service skills, data management systems, and general biomedical equipment troubleshooting. Students acquire the ability to perform medical equipment maintenance services characterized by repair, maintenance checks/services, calibration and electrical safety tests. **MOD: Face-to-Face**	1.0 FTE, assorted medical equipment		
Clinical Lab Assistant	BTC, ITC	Region V	Regional	2023-2024	Clinical Lab Assistants (CLA) gather information, explain procedures, and perform routine medical laboratory tests for the diagnosis, treatment, and prevention of disease under the supervision of a Medical Technologist. This program will provide students with the necessary knowledge and skills to competently perform the duties of an entry level Medical Laboratory Assistant, Clinical Lab Assistant, or Lab Assistant I. An articulation agreement with the Medical Laboratory Science program would allow graduates from this program to pursue additional higher education including BS/MS degrees. **MOD: Face-to-Face**	New CTE budget requested for 2 FTE, facilities, and equipment. Vocation-specific class fees will be assessed for appropriate expenses. Potential reallocation of resources from discontinued programs.		
Cybersecurity	BS	Regions V, VI	Regional	2023-2024	Statewide discussion pending.	Existing faculty in CoSE and Polytechnic will contribute.		
Cybersecurity	MS	Regions V, VI	Regional	2023-2024	Statewide discussions pending.	Existing faculty in CoSE and Polytechnic will contribute.		
Doctor of Nursing Practice (DNP)/Doctor of Philosophy (PhD) in a Nursing dual degree	DNP / PHD	Online	Statewide	2023-2024	The dual degree of DNP/Ph.D. will encompass an integrated curriculum of existing DNP and Ph.D. programs for an advanced clinical and research program of study. The graduate will be prepared as an expert and leader in primary care practice, and to contribute to the development of scientific knowledge for advancing the discipline. The dual degree program will be **delivered online**; students could enroll from across the U.S (KN 05-22-15).	No additional resources requested. Professional fees would be assessed as currently established for graduate programs each semester the student is enrolled.		

Institution Name: **Idaho State University**

Program Title	Degree Level/ Certificate	Region	Regional/Statewide Program Responsibility	Anticipated Delivery Date	Program Description	Anticipated Resources	Memorandum of Understanding or Contract	Other
Dual MSAT/MPAS degree	Masters	Region III and V	Regional/ Statewide	2023-2024	Physician Assistants who also have a background in Athletic training are highly sought after for the field of Orthopedics and Sports Medicine. Typically, an AT-C will return to the university to earn a second Master's degree as a physician assistant. This dual degree would eliminate one year of graduate school by having applicants apply to both programs simultaneously and successful candidates would matriculate into the first year of AT training and then their second and third years of graduate school would be with the Department of PAS. Redundancies would be eliminated to streamline the educational processes. Both CAATE and ARC-PA would need to approve the change in dual degree process.	New 1.0 FTE who is both an ATC and PA-C. Students will need to pay graduate tuition and fees. No additional facilities required		
Dual UG/MSAT/MPAS 3-1-2	BS in Exercise science and dual MSAT/MPAS	Region III and V	Regional/ Statewide	2023-2024	This would take the already existing 3-2 Exercise Science undergraduate degree/MSAT degree and build upon it to include a dual degree option. Successful applicants would earn a BS and two master's degrees in 6 years.	As long as new 1.0 FTE for dual MSAT/MPAS is approved, no new resources		
Health Informatics	BS	Online	Regional	2023-2024	This program will prepare individuals to enter a career in Health Informatics with the skills and competencies necessary to manage and operationalize the acquisition, processing, storage, distribution and use of healthcare data using appropriate technologies. Students will be introduced to key healthcare and information technology concepts to support the various aspects of the healthcare delivery and operations. **MOD: Online**	Reallocation of existing resources. New budget for Adjunct pool Online Program Fee' financial model.		Replaces state approved BBA-HI discontinued by COB. The program was recently moved from the College of Business to the College of Health Professions.
Health Information Management	BAS	Online	Regional	2023-2024	Information technology has become essential in managing hospital records and patient data and it is key to the effective and efficient delivery of modern healthcare. There is a high demand for qualified professionals to take managerial positions, and the current trends in the industry indicate that people will need to have a bachelor's degree to stay competitive. This program will continue to build on the skills obtained in our AAS degree program by adding more emphasis in leadership, business management, system analysis, and interdisciplinary professional relationships. **MOD: fully online**	Additional budget requested for 1 FTE, nation-wide travel for practicum supervision budget, and software/ equipment for online delivery.		

Institution Name: **Idaho State University**

Program Title	Degree Level/ Certificate	Region	Regional/Statewide Program Responsibility	Anticipated Delivery Date	Program Description	Anticipated Resources	Memorandum of Understanding or Contract	Other
Interdisciplinary Studies	BA	Region V	Regional	2023-2024	The College of Arts and Letters already offers a non-specialist BA degree (University Studies) for students wanting a broad undergraduate degree but wishing to take courses from across the university rather than specializing in a single major program. The University Studies program offers extremely broad choice in terms of curricular variety which meets the needs of certain students. Other students are looking for ways to design a unique combination of two or three programs (e.g., courses from Music and from Psychology because of interest in music therapy). This approach to creating a carefully defined interdisciplinary curricular option not available in a single program is in line with other institutions offering an "Interdisciplinary Studies" degree. While it is technically possible to pursue a carefully designed interdisciplinary curriculum within the current University Studies program, University Studies requirements would limit some students with the University Studies requirements for a certain number of credits to come from the College of Arts and Letters. Also, the label "University Studies" has limited recognition and is not seen as suggesting the same thing that "Interdisciplinary Studies" does. **MOD: face-to-face and online/remote.** Since this program will have a highly flexible curriculum, it would be possible to complete in other regions, also.	No new resources needed		
Investigative Forensics	BS	Region V	Regional	2023-2024	This program will prepare students for a variety of non-laboratory-based careers, including medicolegal death investigators, forensic evidence recovery technicians, or law enforcement positions specializing in investigation. According to a 2009 report by the National Academy of Sciences, the need for academically trained criminalists and crime scene investigators has increased significantly. This program will respond to the forecasted job outlook for Forensic Science Technicians, which is promising and growing much faster than average (17%) between 2016-26. Graduates will receive training in identifying, collecting, and interpreting forensic evidence with a solid natural science background in addition to training in forensic methods, field and laboratory procedures, and the law. **MOD: traditional face-to-face with some portion online/remote.**	Reallocation of existing resources and anticipated grant funding to support new facilities needs		

Institution Name: **Idaho State University**

Program Title	Degree Level/ Certificate	Region	Regional/Statewide Program Responsibility	Anticipated Delivery Date	Program Description	Anticipated Resources	Memorandum of Understanding or Contract	Other
Musical Theatre	BFA	Regions V, VI	Regional	2023-2024	This interdisciplinary program combines courses from theatre, dance, and music. The program prepares students for employment in the most popular field in theatre, which is musical theatre. **MOD: traditional face-to-face with some portion online/remote.**	Primarily a combination of existing courses in these three areas. Reallocation of existing resources will occur, as needed.		
Play Therapy Certificate Post-grad program	post grad certificate	Regions V, VI	Regional	2023-2024	Play therapy is an advanced counseling modality in working w/ children and adolescents. We frequently get calls for workshops in this area. We would create a sequence of courses to offer a certificate program in this area. **MOD: face-to-face with some portion online/remote.**	Faculty would develop curriculum and doctoral students would deliver the material.	-	
Pharmaceutical and Cosmetic Sciences	BS	Region V	Regional	2023-2024	The B.S. in Pharmaceutical and Cosmetic Sciences would focus on pharmacology, physiology and formulation of drugs and cosmetics. This four-year program would prepare students for careers in the pharmaceutical, cosmetics and related industries. This would be a unique program in Idaho. Housed in the ISU College of Pharmacy, the program would support pre-pharmacy students, Pharmaceutical Science Graduate Programs, and small business development in Idaho. The broad scope of the program is expected to expand our ability to recruit students beyond those normally attracted to health and science programs. The program would thus create new student admissions, not simply divert students from other science programs (ex. Chemistry and Biology), to a new program. The combination of pharmacology, pharmaceutics and cosmetics would be a unique program in the U.S. as well.	Recruitment assistance; Faculty: 3-4 FTE are anticipated (~$300K-$400K/year); Research Laboratory space for new faculty; Startup funding for faculty: $400-600K (for 3-4 faculty); CPI funding for industrial internships (~$2000/year / internship offered) 3-5 anticipated ($10K total/year)		
Public Health	DrPH	All regions	Regional	2023-2024	ISU and BSU plan to combine resources and collaborate on the Doctor of Public Health degree. With limited resources at both universities the parties will look to leverage faculty resources to create programmatic foci that complement each institution. This collaboration will also allow for research partnerships that may not have occurred otherwise. **MOD: hybrid-online and traditional.**	No additional resources needed.	Talks have been initiated with BSU.	While not currently a statewide responsibility, we will request that it become a statewide responsibility, due to the MPH statewide responsibility.

Institution Name: **Idaho State University**

Program Title	Degree Level/ Certificate	Region	Regional/Statewide Program Responsibility	Anticipated Delivery Date	Program Description	Anticipated Resources	Memorandum of Understanding or Contract	Other
School Psychology	Ph.D	Online	Regional	2023-2024	Idaho State University houses the only school psychology program in Idaho. There is currently a critical shortage of school psychologists. The proposed program will build upon the existing School Psych. program & faculty expertise to focus on training school psychologists for rural settings. Idaho's school psychology program will be the only PhD school psychology program in the state and one of the few in the Mountain West area. Recent research study has identified a critical need for more school psychology programs within the Mountain West area. **MOD: Online/remote.**	One clinical route faculty when the program reaches a max enrollment of four Ph.D. students per cohort.		
Speech Language Pathology Assistant Program	Undergraduate Certificate	Region V	Regional	2023-2024	Program would be in close cooperation with our existing Bachelor's degree in Communication Sciences and Disorders, Pre-SLP track. The program would address those students earning a BS who do not have immediate plans to enter a Master's program. If we help these students address recommended competencies from our professional association and requirements for an Idaho license as Speech Language Pathology Assistant, the graduates would be better prepared for jobs at the end of the Bachelor's program. This may be an add-on certificate to our existing program, or a separate track for the BS, or a new degree offering, as yet to be determined. **MOD: face-to-face with some portion online/remote.**	Reallocation of existing resources with some additional professional program fees.		
Student Affairs	MSA	Region V	Regional	2023-2024	Through a comprehensive curriculum with an emphasis on experiential learning, the Masters of Student Affairs program seeks to prepare practitioners to empower the holistic development of students at higher educational institutions. Core values of the program: competency based curriculum; personal and professional ownership; campus partnership; inclusive education. **MOD: face-to-face and online/remote.**	One new tenure track faculty line would be ideal, but could be taught with adjuncts and current faculty particularly at the start. In the case of adjuncts, budget allocation for them would be needed.	NA	NA
Surgical Technology	AAS	Region V	Regional	2023-2024	Surgical Technologists are the only members of the healthcare team who are specifically trained to prepare and maintain the sterile field, equipment, and specimens during surgical interventions. This program will prepare students to take and pass the national certification exam required for the Certified Surgical Technologist credential. These students will be prepared to pursue a career in this high-demand healthcare field right after graduation, or they may wish to further their education through a BSHS, OLP,	New CTE budget requested for 3.5 FTE, facilities, and equipment. Vocation-specific class fees will be assessed for appropriate expenses. Potential reallocation of		

Institution Name: **Idaho State University**

Program Title	Degree Level/ Certificate	Region	Regional/Statewide Program Responsibility	Anticipated Delivery Date	Program Description	Anticipated Resources	Memorandum of Understanding or Contract	Other
					or similar degree. Graduation from a CAAHEP Accredited institution will pave the way for students to earn additional specialized certifications and credentials in the industry. **MOD: face to face.**	resources from discontinued programs.		
Program offerings commencing 2024-2025								
Advanced Dental Hygiene Education	PhD	Online	Regional	2024-2025	The PhD program in dental hygiene is designed to create a cadre of dental hygiene researchers, scholars and educators, to provide advanced education for those oral health professionals who seek careers in research and academia, and to expand the body of knowledge in the dental hygiene discipline. This doctoral level program will be delivered online and open to the international community of dental hygienists. This program meets the vision of the department to be the premier global dental hygiene center of education, practice, leadership, and scholarship. **MOD: online**	Student Professional Fees		
Audiology Assistant Certificate Program	Undergraduate Certificate	Region V	Regional	2024-2025	Certificate will prepare students to be employed in hearing aid dispensing practices, assisting Audiologists in client care. This will be a hybrid program of online and onsite classes with supervised clinical observations and experiences in local hearing aid practices. **MOD: Hybrid**	Use existing resources.		
Dental Hygiene (expansion)	BS/MS [Option to be added to MS only, per dept.]	Region III	Statewide	2024-2025	An expansion of the baccalaureate program to include an additional option for an advanced dental hygiene practitioner in Dental Therapy. (ADT) The dental therapist who provides direct access to oral healthcare will address the needs of rural and frontier communities with minimal or no access to oral care. Idaho has significant unmet oral health needs, and this program will help meet that demand. ADT is being discussed in the State of Idaho and across the U.S. ISU could be the leader in offering the first ADT option in Idaho. **MOD: DL and classroom**			
Nutrition	MS	Online	Regional	2024-2025	Offering an online MS in Nutrition with preference for dietitians faces the challenge of all students being required to have a graduate degree for eligibility to take the RDN exam effective 1.1.2024. Our MS in Nutrition-Dietetic Internship meets the needs of our profession and is the better avenue to focus our resources toward.	None.		DISCONTINUE

Occupational Therapy	OTD, professional entry level doctorate	Regions III and V	Regional	2024-2025	Proposal will be to upgrade the current Master of Occupational Therapy to a Doctor of Occupational Therapy. There will be a transition period where students enrolled in the Master's program will have the choice to complete the Masters or to apply credits to the Doctoral program. The Master's program would eventually be discontinued, although the timing of that discontinuation is not clear. We will consider current student needs, market demand, and the accreditor's response to the upgrade to the doctoral program before closing the Master's program. The new Doctoral Program will continue the same entry level criteria, with added requirements as specified by the accreditor and as need based on ongoing program evaluation. We anticipate an increase of about 16 to 20 credits and one semester (i.e., small increase in credits for the current 8 semester program plus an additional summer semester.) **MOD: traditional face-to-face and synchronous online.**	Combination of new funds, grants, and student professional fees will support the program updgrade. Students will continute to pay Graduate tuition and fees plue program Professional Fee. Upgrade from Masters to Doctorate will require tuition and professional fees for one extra semester.		3 FTE faculty positions will be requested. Estimated enrollment of 40 students per year, starting in summer 2025. ACOTE is accrediting body for the profession. ACOTE has a stated intention of seeing all programs convert to clinical doctorate as the entry level degree.
Pharmacy Technology	AAS	Region V	Regional	2024-2025	This program currently offers a BTC and an ITC. Working in collaboration with the College of Pharmacy, an AAS will be added to the Pharmacy Technology career ladder that may serve two purposes: 1) allow Pharmacy Technology students to be eligible to obtain a BSHS and thus prepare for management level responsibilities in a pharmacy or work for a pharmaceutical company, or 2) prepare students to be in a stronger position to apply to the Doctor of Pharmacy program or other graduate degrees in the pharmaceutical sciences. **MOD: hybrid**	New budget request for 1 FTE and facilities		
Software Design	MS	Region V,	Regional	2024-2025	This program will enable students from different computing areas to focus upon designing application for business solutions. This is a continuing of a redesign of our department of informatics. **MOD: face-to-face and online/remote.**	two new faculty members, already in beginning stages of planning

Proposed Regional Programs

Institution Name: Boise State University

Program Title	Degree Level/ Certificate	Region	Regional/Statewide Program Responsibility	Anticipated Delivery Date	Program Description	Anticipated Resources	Memorandum of Understanding or Contract	Other
Program offerings commencing 2021-2022								
Digital Design and Innovation	BA	Boise/Region III	Regional	Fall 2021	Will enable students to earn certificates with an emphasis on managing and using new and emerging technologies so that they can adapt and thrive in the evolving digital workplace. With our society moving towards being more automated and more connected, this degree will produce graduates that can manage and lead in the workplace by applying new and emerging technologies in innovative and useful ways for the connected world. **MOD: Will use online fee model.**	Will use online fee model.		
Program offerings commencing 2022-2023								
Accountancy	BBA	Twin Falls/ Region IV	Regional	Fall 2022	The BBA in Accountancy is an online degree completion program that will allow students in Twin Falls to continue to benefit from the ability to obtain an Accountancy degree. The BBA in Accountancy will provide students with the necessary knowledge and skills required for entry-level positions in the accounting profession. **MOD: Online**	Likely will use online fee model		
Applied Technology/Sciences	BAT/BAS	Boise/Region III	Regional	Fall 2022	The BAT/BAS will serve students transferring from Idaho's community colleges who are interested in pursuing a degree in Cyber Operations and Resilience. **MOD: Online**	Likely will use online fee model.		
Bilingual Education	M Ed	Boise/Region III	Regional	Fall 2022	Possible discontinuation			Possible Discontinuation
Environmental Management	MS	Boise/Region III	Regional	Fall 2022	The MS in Environmental Management provides students with a foundation in human and environmental systems. **MOD: Face-to-face or Hybrid.**	No additional cost to offer the program.		

Institution Name: Boise State University

Program Title	Degree Level/ Certificate	Region	Regional/Statewide Program Responsibility	Anticipated Delivery Date	Program Description	Anticipated Resources	Memorandum of Understanding or Contract	Other
Environmental Humanities	BA	Boise/Region III	Regional	Fall 2022	The BA in Environmental Humanities will provide students with an interdisciplinary approach to environmental challenges both contemporary and historical. Students will have the option to learn about the interplay of culture, communication, politics, philosophy, and other areas in how our society can address the major environmental challenges facing our society. **MOD: Face-to-face.**	Reallocation if resources are necessary.		
Interventional Radiology	BS	Boise/Region III	Regional	Fall 2022	Interventional Radiology is defined as a medical subspecialty that performs various minimally-invasive procedures using imaging. Employers typically require a minimum of an associate's degree, 2+ years of related work experience, and specific professional certifications (e.g., American Registry of Radiologic Technologists - ARRT) or prefer a bachelor's degree along with the professional certification. The program would address a significant shortage and prepare students to work in cardiovascular centers in local and regional hospitals. The proposed program will include Vascular-Interventional and Cardiac-Interventional tracks. Students will complete didactic courses online as well as complete local clinical hours to learn the art and science of image guided procedures. The program may be completed as 2 semester Certificate (21 credits) or 3 semester Bachelor's degree. The BS degree will likely be structured as a degree completion program. While the degree is 120 total credits, it's intended two emphasis areas will be designed to be 61 credits each, including up to 25 credits for PLA. **MOD: Online**	Likely will use online fee model.		

Institution Name: Boise State University

Program Title	Degree Level/ Certificate	Region	Regional/Statewide Program Responsibility	Anticipated Delivery Date	Program Description	Anticipated Resources	Memorandum of Understanding or Contract	Other
Master of Nursing	MS	Boise/Region III	Regional	Fall 2022	The Master's in Nursing will respond to the national need for master's level nurses to teach in undergraduate associate degrees and in higher education clinical tracks as well as the need to provide advanced training that will allow nurses to move into leadership positions in the healthcare field. Boise State University is part of the Rural Public Academic Nursing Network consortium (9 Universities) who are working to model and combine resources to provide an online MN. **Online Method of Delivery**	Likely will use online fee model.		
Outdoor Recreation and Hospitality	BBA	Boise/Region III	Regional	Fall 2022	At the request of the outdoor recreation industry Boise State University proposes creation of a world-class program designed to provide employers with a key workforce and to prepare Idahoans for careers as leaders and entrepreneurs in this industry. This program will be interdisciplinary, combining expertise and coursework from business (the College of Business and Economics), kinesiology and outdoor recreation (the College of Health Sciences), and environmental studies (the College of Arts and Sciences). To start this program, a fully online curriculum will first be developed followed by a combination of on-campus for lower-division courses, and on-line instruction for upper-division courses. Will likely use an online fee. **Mode: Online and Hybrid**			
Radiological Sciences	MS	Boise/Region III	Regional	Fall 2022	The program will provide students with a deeper understanding of the theory and application of a variety of imaging techniques that are currently in use or under development for use in clinical practice. Graduates will likely pursue positions in the healthcare industry and/or may go on to PhD programs in any variety of fields, including biomolecular research and biomedical engineering such as are offered here at Boise State University. **MOD: Face-to-Face**	Reallocation if resources are necessary.		
Rhetoric and Composition	MA	Boise/Region III	Regional	Fall 2022	The program is exploring the merging with the MA in Technical Communication	Discontinuation		
Social Work	MSW	Twin Falls/ Region IV	Regional	Fall 2022	Possible discontinuation of MSW in Twin Falls	Discontinuation.		Discontinue site.

Institution Name: Boise State University

Program Title	Degree Level/ Certificate	Region	Regional/Statewide Program Responsibility	Anticipated Delivery Date	Program Description	Anticipated Resources	Memorandum of Understanding or Contract	Other
STEM Education	MS	Boise/Region III	Regional	Fall 2022	Possible discontinuation			
TESOL	M Ed	Boise/Region III	Regional	Fall 2022	Possible discontinuation	Discontinuation.		Discontinue site.
Program offerings commencing 2023-2024								
Biochemistry	MS	Boise/Region III	Regional	Fall 2023	The MS in Biochemistry is the application of chemistry to the study of biological processes at the cellular and molecular level. **MOD: Face-to-Face**	Reallocation if resources are necessary.		
Biomolecular Sciences	BS	Boise/Region III	Regional	Fall 2023	The BS in Biomolecular Sciences will prepare students to understand the properties of macromolecules and celluar activities, as well as the relationship between cellular activities and biological responses. **MOD: Face-to-Face**	Reallocation if resources are necessary		
Computational Science and Engineering	MS	Boise/Region III	Regional	Fall 2023	The Computational Science and Engineering program focuses on construction of mathematical models and quantitative analysis techniques and use of computers to analyze and solve scientific and engineering problems. **Traditional Method of Delivery.**	Reallocation if resources are necessary.		
Data Science	MS	Boise/Region III	Regional	Fall 2023	A program that focuses on the application of statistical modeling, data warehousing, data mining, programming, forecasting and operations research techniques to the analysis of problems of business organization and performance. Includes instruction in optimization theory and mathematical techniques, data mining, data warehousing, stochastic and dynamic modeling, operations analysis, and the design and testing of prototype systems and evaluation models. **Traditional Method of Delivery**	Reallocation if resources are necessary		
Education	PhD	Boise/Region III	Regional	Fall 2023	This PhD program would serve students conducting dissertation level research and studies at the level of PhD while also allowing candidates pursuing more practical applications of their research to stay in the EdD program. **MOD: Face-to-face or Hybrid.**	No additional cost to offer the program		

Institution Name: Boise State University

Program Title	Degree Level/ Certificate	Region	Regional/Statewide Program Responsibility	Anticipated Delivery Date	Program Description	Anticipated Resources	Memorandum of Understanding or Contract	Other
Educational Technology	PhD	Boise/Region III	Regional	Fall 2023	This PhD would serve students conducting dissertation level research and studies at the level of PhD program while also allowing candidates pursuing more practical applications of their research to stay in the EdD program. **MOD: Online**	No additional cost to offer the program		
Environmental Science	BS	Boise/Region III	Regional	Fall 2023	The BS in Environmental Science provides students with a strong foundation of knowledge and understanding of the complex interface between society and the natural environment. Students are engaged in an innovative education that encompasses the fields of biology, anthropology, geosciences, and public policy. **Traditional Method of Delivery.**	Reallocation if resources are necessary		
History	MA	Boise/Region III	Regional	Fall 2023	The online MA in History will serve teachers, especially in rural Idaho. Boise State currently offers an MA in History. **MOD: Online.**	Likely will use online fee model.		
Interdisciplinary Studies/3D	BA/BS	Boise/Region III	Regional	Fall 2023	The 3D/Interdisciplinary Studies lets students design a plan of study with themes that suit a student's individual interests and needs. **MOD: Online**	Likely will use online fee model		
Leadership	Graduate Certificate	Boise/Region III	Regional	Fall 2023	The Graduate Certificate in Leadership will serve working professionals and active community members by providing them an advanced foundation in which to work effectively with others and solve problems. **MOD: Online**	Likely will use online fee		
Musical Theatre	BFA	Boise/Region III	Regional	Fall 2023	This program will focus on the principles and techniques for integrating theatre, music, and dance into a unified production. Includes instruction in acting, dance, voice, technical theater, musical genres, piano, and history of musical theater. **Traditional Method of Delivery**	Reallocation if resources are necessary.		

Institution Name: Boise State University

Program Title	Degree Level/ Certificate	Region	Regional/Statewide Program Responsibility	Anticipated Delivery Date	Program Description	Anticipated Resources	Memorandum of Understanding or Contract	Other
Planning	Certificate	Boise/Region III	Regional	Fall 2023	The Planning undergraduate certificate is based on community demand for specialized planning coursework. The certificate would be appropriate for majors within the School of Public Service and beyond. **MOD: Online**	Likely will use online fee model.		
Sociology	MA	Boise/Region III	Regional	Fall 2023	The program will provide training in the application of sociological theory and methodology to community research in the public interest. Students will complete the program prepared for careers in research, education and administration for the private, public and nonprofit sectors. This program may move forward named MA in Sociology. **MOD: Traditional or possible Online.**	Reallocation if resources are necessary.		
Social Work	BSW	Nampa/Region III	Regional	Fall 2023	The BSW in Social Work will prepare students to work with individuals, families, households, groups, organizations, and communities to address issues of coping and emotional support and also deal with broader challenges such as violence and social inequality that effect people. **Traditional Method of Delivery.**	Reallocation if resources are necessary.		
Social Work	PhD/DSW	Boise/Regional III	Regional	Fall 2023	The PhD or DSW in Social Work is designed for experienced master's degree candidates who are interested in conducting research and/or may be interested in becoming faculty. Students will be prepared to enter a variety of roles in the field of social work or social work policy. **MOD: Online**	Likely use online fee model.		
Systems	PhD	Boise/Regional III	Regional	Fall 2023	A transdisciplinary program that will support our industrial partners and bridge departmental boundaries across campus. Students will learn how to lead and design complex projects. As technological advancements accelerate a systems approach is necessary to address these increasingly complex challenges. Students will utilize a variety of tools across disciplines and fields. **Traditional Method of Delivery.**	Reallocation if resources are necessary.		

Institution Name: Boise State University

Program Title	Degree Level/ Certificate	Region	Regional/Statewide Program Responsibility	Anticipated Delivery Date	Program Description	Anticipated Resources	Memorandum of Understanding or Contract	Other
Program offerings commencing 2024-2025								
Health Sciences	PhD	Boise/Region III	Regional	Fall 2024	The PhD in Health Sciences will operate as a traditional PhD program wherein students will study with a mentor who may be from any discipline represented in the College of Health Sciences. These students will be prepared for careers as researchers and will likely be employed in academia, federal or state health agencies, research institutes or hospitals, or private industries that serve the health professions. The PhD program is also designed to bolster the institution's infrastructure that is necessary to support the research and development needs of the state and region. **MOD: Face-to-face or Hybrid.**	Reallocation of resources		
Public Health	PhD	Boise/Regional III	Regional	Fall 2024	This will be a career-oriented degree that emphasizes leadership in public health and medical organizations; dissertations tend to focus on the practical application of theory in public health practice. **MOD: Hybrid with possible fully online option.**	To be determined	MOU with ISU

Proposed Regional Programs

Institution Name: Lewis-Clark State College

Program Title	Degree Level/ Certificate	Region	Regional/Statewide Program Responsibility	Anticipated Delivery Date	Program Description	Anticipated Resources	Memorandum of Understanding or Contract	Other
Program offerings commencing 2021-2022								
General Studies: Education, Early Childhood Education	BA/BS New emphasis area only	Region I and II	Regional	Fall 2021				
Hospitality Management: New options in Culinary Arts, Hotel/ Resort Management, and Casino floor management	AAS option areas	Region II	Regional	Fall 2021	There are no culinary arts, hotel/resort management or casino floor management program in the Lewis-Clark Valley. While Lewiston and Clarkston have many fine eateries, there is a shortage of trained chefs and head/ line cooks, and those trained in resort and casino floor management. MOD: Face-to-Face and online.		N/A	N/A
Program offerings commencing 2022-2023								
B.A.S. degrees: Administrative Assistant, Administrative Medical Assistant, Applied Accounting, Applied Technology, Auto Mechanics Technology, Business Management & Marketing, CNC Machining, Collision Repair, Diesel Technology, Early Childhood Development, Engineering Technology, Fire Service Technology, Graphic Communications, HVACR Technology, Hospitality Management, Industrial Electronics Technology, Industrial Maintenance Millwright Technology, Legal Administrative Assistant, Medical Assistant, Paramedic, Web Design and Development	BAS			Fall 2022 or later				Discontinue all

Institution Name: Lewis-Clark State College

Program Title	Degree Level/ Certificate	Region	Regional/Statewide Program Responsibility	Anticipated Delivery Date	Program Description	Anticipated Resources	Memorandum of Understanding or Contract	Other
Business Informatics BA/BS	BA/BS	Region I and II; online	Regional	FA2022	This degree melds software engineering and business and will give our graduates the skills they need to succeed in today's business and computer science environments. Students will take core Business and Computer Science classes and will graduate with up-to-date, cutting-edge skills that employers need and look for in college graduates. **MOD: Face-to-Face and online.**	Business Informatics will use courses that currently exist. No additional courses or capacity will be needed for implementation. Program growth may dictate additional course offerings in the future.	none anticipated	
Cyber Management	BS	Region I and II	Regional	Fall 2022	LCSC's Business & Computer Science Division and the Industrial Technical Division are proposing a buildable degree. This degree would take the AAS Information Technology and expand on it with additional Computer Science and Business courses. This degree program will utilize existing courses from each division including core business, cyber security and computer science courses. **MOD: Face-to-Face and Online.**	This program makes use entirely of existing courses, faculty, campus recourses and local facilities. There would be a small, ongoing increase in funds/vouchers provided to sites that host clinical internships.	Part of statewide cyber initiative	
Early Childhood Education and Early Childhood Special Education	BA/BS	Region I and II	Regional	FA2022	The Blended Early Childhood Education and Early Childhood Special Education program will qualify completers for Idaho teaching certification with an endorsement in Blended Early Childhood Education and Early Childhood Special Education (Birth-Grade 3). **MOD: Face-to-Face and online**	This program makes use of existing facilities and resources.	none anticipated	
Electronics Engineering Technology	BTC	Region II	Regional	Fall 2022	This program is set to launch when the new Lewiston high school and the new LCSC CTE Center open in fall 2020, potentially allow students at the high school to earn a basic technical certificate during the last year of high school. **MOD: Face-to-Face**	No new resources	N/A	N/A

Institution Name: Lewis-Clark State College

Program Title	Degree Level/ Certificate	Region	Regional/Statewide Program Responsibility	Anticipated Delivery Date	Program Description	Anticipated Resources	Memorandum of Understanding or Contract	Other
Fire Service Technology	ITC	Region II	Regional	Fall 2022	This option will allow students in the Fire Service program to receive a certificate at an earlier point in their training than the complete AAS degree, and is supported by local fire chiefs. **MOD: Face-to-Face**	No new resources	None anticipated	
Interpretive Outdoor Recreation	BS	Region II	Regional	Fall 2022	An undergraduate degree in Interpretive Outdoor Recreation will provide graduates with the educational background necessary to pursue interpretive recreational specialist careers with public and private agencies such as the U.S. Forest Service, Idaho Dept. of Lands, municipal Parks and Rec. departments, and the Nature Conservancy that provide natural science education outreach and outdoor recreational opportunities to the public. The curriculum for this degree will combine coursework in natural science and kinesiology. **MOD: Face-to-Face**	Adjunct coverage for 6 credits	N/A	N/A
Medical Assistant	ITC	Region II	Regional	Fall 2022	This program will allow students to obtain a certificate and get them directly to work, sometimes while still working on the AAS degree. This certificate would be useful for employers in the region. **MOD: Face-to-Face.**	No new resources		
Program offerings commencing 2023-2024								
Information Technology, Paralegal, Engineering Technology, Diesel Technology	Advanced AAS	Region II	Regional	Fall 2023	Awaiting clarification of Board Policy			
Medical Diagnostic Imaging: Ultrasound	BA/BS	Region II	Regional	Fall 2023	The Bachelor of Arts/Science in Medical Diagnostic Imaging (MDI): Ultrasound is designed for individuals who have completed an A.S. degree in Radiographic Science and aspire to develop additional skills required to demonstrate an advanced understanding in Ultrasonography. **MOD: Face-to-Face/hybrid**	1.0 FTE Faculty Member; Portable Ultrasound equipment and supplies	N/A	N/A

Institution Name: Lewis-Clark State College

Program Title	Degree Level/ Certificate	Region	Regional/Statewide Program Responsibility	Anticipated Delivery Date	Program Description	Anticipated Resources	Memorandum of Understanding or Contract	Other
Winery Technology/ Operations	ITC/ ATC/ or AAS	Region II	Regional	Fall 2023	This program would prepare students for work in the wine industry and would include training in the science of wine, diesel engines, welding, and business. The LC Valley wine alliance support this program and is helping design the integrated curriculum. **MOD: Face-to-Face.**	TBD	Links with WWCC and possibly other Idaho schools	
Program offerings commencing 2024-2025								
No proposed programs at this time								

THREE-YEAR PLAN
Proposed Regional Programs

Institution Name: College of Eastern Idaho

Program Title	Degree Level/ Certificate	Region	Regional/Statewide Program Responsibility	Anticipated Delivery Date	Program Description	Anticipated Resources	Memorandum of Understanding or Contract	Other
Program offerings commencing 2022-2023								
Addiction Studies	AAS	Region VI	Regional	Fall 2022	This program would provide preparatory coursework required to become a licensed additions counselor. It would prepare students to receive the CADC license and open a pathway to further education. **MOD: Face-to-Face**	This program would require line item funding for one FTE position.		Because of the close relationship to other behavioral health degrees and the added upward mobility in the job market, we would like to work with other four-year institutions to create a pathway into bachelor's or master's degrees leading to ACADC licensing.
Bookkeeping	BTC	Region VI	Regional	Fall 2022	The program would build on existing business curriculum with one new class to address a need in the region identified in the CNLA. Classes will be **Face-to-Face and online.**	The curriculum can be handled with existing faculty	N/A	
Certified Nursing Assistant (CNA) Program	BTC	Region VI	Regional	Fall 2022	This program will provide an introduction to the health care field to students interested in working in skilled nursing facilities. It will prepare students to sit for the Idaho Nurse Aide Exam. This program will be offered **face to face and online format**.	No additional funding required.	This program is proposed in response to direct requests from local high school districts.	

Institution Name: College of Eastern Idaho

Program Title	Degree Level/ Certificate	Region	Regional/Statewide Program Responsibility	Anticipated Delivery Date	Program Description	Anticipated Resources	Memorandum of Understanding or Contract	Other
Criminal Justice	AAS, ITC	Region VI	Regional	Fall 2022	This program will prepare students for entry into a field of criminal justice by combining both academic and technical concepts. **MOD: Face-to-Face**	This program would rely heavily on adjunct support with a potential need for line item funding for one FTE position.		
Energy Systems Electrical Engineering Technology year 2	AAS	Region VI	Regional	Fall 2022	Energy Systems Electrical Engineering Technology prepares students to pursue a career in the installation, operation, adjustment, routine maintenance, inspection, test and repair of power generation equipment. This will add year two which will focus on Cyber Security and PLAs. Graduates work in all fields of electrical generation with companies who design, build, operate, and maintain electrical generation systems. **The delivery will be lecture and laboratory**.	This program will require reallocation funds of $78,000.00 or a line-item request.		Closure of existing programs will be assessed on a yearly basis to determine funds available
Entrepreneurship	ITC	Region VI	Regional	Fall 2022	The program would build on existing business curriculum with one new class to address a need in the region identified in the CNLA. Courses will be taught **Face-to-Face and online.**	The curriculum can be handled with existing faculty	N/A	
Health Physics	AAS	Region VI	Regional	Fall 2022	This program would be an expansion of CEI's Radiation Safety ITC. It would seek to prepare students with a more broad skillset for employability across a wider range of facilities. **MOD: Face-to-Face**	This program would initially be supported through the use of adjunct support. Additional line item funding for faculty may be required based upon demand.		
Program offerings commencing 2023-2024								
Agribusiness Technologies	AAS, ITC	Region VI	Regional	Fall 2023	Program will teach entry level skills in a broad range of subjects related to Agribusiness. This will include both plant and animal science, an introduction to GPS, and the art of selling agricultural products. Agricultural management will also be included. **Delivery will be Face-to-Face with online possible in the future.**	This program will be possible by seeking new funding from a line item request.		

Institution Name: College of Eastern Idaho

Program Title	Degree Level/ Certificate	Region	Regional/Statewide Program Responsibility	Anticipated Delivery Date	Program Description	Anticipated Resources	Memorandum of Understanding or Contract	Other
Engineering Technology (Mechatronics)	ITC or AAS	Region VI	Regional	Fall 2023	The program would utilize courses from the Energy Systems, Welding and Machine Tool programs to meet growing regional needs in the manufacturing sector. Instruction will be **MOD: Face-to-Face**.	This program would require line item funding for one FTE position.	N/A	
Health Administrative Services	AAS, ITC	Region VI	Regional	Fall 2023	This program would provide students with the skills to provide excellent service to patients during the various levels of patient flow within a medical office. Students would have the option to specialize through earning a specific ITC in claims service, information coding, or reception. **MOD: Face-to-Face**	This program would require line item funding for one FTE position. It would also be support through the use of adjuncts in various fields.		
Human Resources	AAS	Region VI	Regional	Fall 2023	This program would introduce students to core business administration techniques, ethics, and employment law. Human relation aspects related to recruitment, management, and training would also be included. **MOD: Face-to-Face**	This program would require line item funding for one FTE position.		
Medical Laboratory Technician	AAS	Region VI	Regional	Fall 2023	The medical technician program will prepare students to work in the area of medical technician in a lab or doctor's office environment. They will perform diagnostic work on lab samples and help identify growth cultures. The will also be able to identify classifications of microbes and families they belong to. They will also be able to identify medications that can control growth of these organisms. **This will be a lecture/laboratory program with some online instruction.**	Funding for this program will be from new funds from a line item request.		
Pharm Tech	AAS	Region VI	Regional	Fall 2023	The Pharm Tech Program will prepare students to be registered with the Board of Pharmacy and to work with a licensed pharmacist. They will perform all functions required such as preparing, compounding and distributing/dispensing of medications. **The delivery will be a hybrid between face to face lecture/lab and online.**	This program will be possible by seeking new funding from a line item request.		

Institution Name: College of Eastern Idaho

Program Title	Degree Level/ Certificate	Region	Regional/Statewide Program Responsibility	Anticipated Delivery Date	Program Description	Anticipated Resources	Memorandum of Understanding or Contract	Other
Program offerings commencing 2024-2025								
Bachelor of Applied Technologies	BAT Degree	Region VI	Regional	Fall 2024	This degree is in direct response to employers located in CEI's service area that are seeking to provide mid-career technicians with greater upward career mobility. It is designed to take credit for prior learning from a variety of technical fields. **Delivery will be face-to-face and online.**	Line item funding will be required		
Computer Software Programing	AAS	Region VI	Regional	Fall 2024	The Computer Software Programing Program will prepare students for entry-level positions in computer software analysis and design. Students will gain an understanding of computer technology, computer programing, program analysis and design. **The delivery method will be lecture and lab.**	This program will be funded by reallocated funds or with a sector grant from the Department of Labor.		
Dental Hygiene	AAS	Region VI	Regional	Fall 2024	Combining academic study with supervised clinical experience designed to prepare graduates to take the appropriate national, regional, and/or state examinations. Accreditation from the Commission on Dental Accreditation would be sought as well as articulation with bachelor level degrees in the discipline. **MOD: Face-to-Face**	One time fund for equipment would be needed. Programmatic funding would be provided through the phase out of low enrolled CTE programs.	N/A	
Informatics	AAS or AS (TBD)	Region VI	Regional	Fall 2024	This degree track is designed to integrate "hard" and "soft skills" through "micro-certifications" in industry-specific areas--and articulate with four-year degrees in a variety of STEM-related fields. These certifications are designed to prepare graduates to manage information systems, and specialize in the interactions between humans and machines, through the collection of data and the development of programs that organize information. When studying informatics, a student may specialize in applications that involve health care, manufacturing, data centers, development of websites, social media networks or online security. **Course delivery will be Face-to-Face initially and then Hyflex or Online**	Line item funding will be required		

Institution Name: College of Eastern Idaho

Program Title	Degree Level/ Certificate	Region	Regional/Statewide Program Responsibility	Anticipated Delivery Date	Program Description	Anticipated Resources	Memorandum of Understanding or Contract	Other
Nuclear Technician	AAS	Region VI	Regional	Fall 2024	Nuclear technicians assist physicists, engineers, and other professionals in nuclear research and nuclear energy production. This program would share some resources with the current radiation safety and proposed radiography programs and fill the needs of the INL as well as the healthcare industry in the area with an AAS degree. **Instruction will be Face-to-Face.**	This program will be possible by seeking new funding from a line item request and a one-time fund for equipment not available through the other programs.	NA	
Physical Therapy Asst.	AAS	Region VI	Regional	Fall 2024	College of Eastern Idaho would seek to join the Idaho Consortium for Physical Therapist Assistant Education. **MOD: Face-to-Face/online**			
RN	AS	Region VI	Regional	Fall 2024	Curriculum prepares students for patient-centered care in a variety of healthcare settings--applying and integrating clinical reasoning, critical thinking, and assessment skills that ensure quality and accountability for the practice of Nursing. **MOD: Face-to-Face**	Line item request (funding for this transition will be from new funds of line item request)	Seeking accreditation status.	This program is transitioning from an AAS to AS
Radiography	AAS	Region VI	Regional	Fall 2024	The radiography program would offer students the knowledge and skills for utilizing radiation in the diagnosis of disease under the direction of a physician. Accreditation would be sought from Joint Review Committee on Education in Radiological Technology. **MOD: Face-to-Face**	One time fund for equipment would be needed. Programmatic funding would be provided through the phase out of low enrolled CTE programs.	NA

THREE-YEAR PLAN
Proposed Regional Programs

Institution Name: College of Southern Idaho

Program Title	Degree Level/ Certificate	Region	Regional/Statewide Program Responsibility	Anticipated Delivery Date	Program Description	Anticipated Resources	Memorandum of Understanding or Contract	Other
Dance	AA	Region IV	Regional	Beginning Fall 2021 teach out	College of Southern Idaho Dance Program provides challenging opportunities for students to grow as artists, performers, teachers, and choreographers. Surrounded by an intimate community of dancers and engaged faculty, students are encouraged to think creatively and take risks in their work all while developing their own personal voice. We offer a rigorous two-year program that prepares students to transition into four year university programs to complete a BA or BFA in dance or other disciplines.		N/A	PLANNING TO DISCONTINUE
Program offerings commencing 2022-2023								
Apprenticeship Programs - various	AS, AAS, BTC	Region IV	Regional	Ongoing	CSI will craft various pathways of apprenticeship to credit to certificate and/or degree programs depending on the specific needs of the region. In particular, building trades apprenticeships will be addressed (HVAC, electrical, plumbing) followed by various federal registered apprenticeship programs and industry sector-specific apprenticeships. **Traditional with some portion available online.**	Reallocation of existing funds and/or request for new funding where appropriate	Potential work-based learning (internship) sites in Region IV	
Chemical Lab Technician	AAS	Region IV	Regional	Fall 2022	Chemical Lab Technicians develop an understanding of chemical theory, and application in the laboratory. Chemical Lab Technicians gain the skills and education to become employable with an AAS degree in various lab environments. **Traditional with some portion available online.**	Possible creation of a new course.	N/A	

Institution Name: College of Southern Idaho

Program Title	Degree Level/ Certificate	Region	Regional/Statewide Program Responsibility	Anticipated Delivery Date	Program Description	Anticipated Resources	Memorandum of Understanding or Contract	Other
Community Emergency Medical Service	AAS	Region IV	Regional	Fall 2022	EMS (EMT and Paramedic) may be trained to provide community health services. Community Health EMS work as part of a health care team to extend care to patient households. Community Health EMS coordinate the patient's primary care to provide transitional care, vaccinations, medication inventories, resource coordination, basic medical therapeutics, etc. **Traditional with some portion available online.**	New Funds		
Engineering Technology	AAS	Region IV	Regional	Fall 2022	Engineering Technicians work in a team environment to design, build, and innovate. Engineering technicians gain the skills and education to become employable with an AAS degree. **Traditional with some portion available online.**	Possible creation of a few new courses.	N/A	
Industrial Technology	BAS	Region IV	Regional	Fall 2022	Provides avenue for graduates of trade and industrial and apprenticeship programs to pursue a baccalaureate degree. **Traditional with some portion available online.**	Idaho Statute 33-2107A provides details regarding the funding of the program and separation of operations, while sharing facilities. The program will commence as a self-support operation.	N/A	
Medical Lab Technician	AAS	Region IV	Regional	Fall 2022	CSI will enter into a consortium program with NIC and CEI to expand medical lab technician training in Idaho. Didactic components of the program will be delivered online by NIC. Laboratory, clinical, and supportive classwork (e.g. microbiology, chemistry) will be provided by each individual institution. **Traditional with some portion available online.**	New funds	Consortium members will enter an MOU outlining responsibilities and commitments of each institution. Each institution may enter MOU's with local health care providers for access to clinical experiences.	

Institution Name: College of Southern Idaho

Program Title	Degree Level/ Certificate	Region	Regional/Statewide Program Responsibility	Anticipated Delivery Date	Program Description	Anticipated Resources	Memorandum of Understanding or Contract	Other
Registered Nursing	BSN	Region IV	Regional	Fall 2022	The B.S.N program will train registered nurses to provide health care in a variety of settings. **Traditional with some portion available online.**	Idaho Statute 33-2107A provides details regarding the funding of the program and separation of operations, while sharing facilities. The program will commence as a self-support operation.	Clinical sites may require MOU	

***Employing NTTEP Non-traditional Teacher Education Program to provide alternative credentialing across the region and in support of Idaho CTE. Also creating agreements with LCSC and others for 3+1 delivery.**

THREE-YEAR PLAN

Proposed Regional Programs

Institution Name: College of Western Idaho

Program Title	Degree Level/ Certificate	Region	Regional/Statewide Program Responsibility	Anticipated Delivery Date	Program Description	Anticipated Resources	Memorandum of Understanding or Contract	Other
Program offerings commencing 2022-2023								
Network and Systems Administration	Specialized Certificate	Region III	Regional	Fall 2022	This is an expansion of the existing program in response to industry needs for advanced administrators. 300 level coursework in discipline. **Hybrid delivery.**	Internal reallocation		Provost approval received on May 7; Approved
Program offerings commencing 2023-2024								
RN to BSN	BSN	Region III	Regional	Fall 2023	Data has shown a need for Bachelors of Science in Nursing to meet industry requirements. It is intended to offer licensed Associate degree Nurse's affordable option to earn BSN. This will be delivered **online**.	State allocation and Institutional resources		Will need a proposal form
Wildland Fire	AS	Region III	Regional	Fall 2023	Degree currently exists as an AAS but was inactive to do research and revision. Working with local agencies to create AS degree that will allow for some PLA opportunities for wildland firefighters with transfer agreement to UofI Natural Resources bachelor's degree. Industry requires 24 upper division credits for employment advancement thus providing an ideal opportunity. This will mostly be delivered **face to face**.	Reallocation of institutional resources	U of I	Will need a proposal form
Program offerings commencing 2024-2025								
Digital Photography	AAS	Region III	Regional	Fall 2024	Digital photography and digital photo editing, Adobe Lightroom and Photoshop software. This will align with local high school CTE programs in digital photography. **face to face**	New CTE funding is being requested		Will need a proposal form
Data Analytics	BTC	Region III	Regional	Fall 2024	The analysis of data through inspecting, cleansing, and modeling data with the goal of discovering useful information conclusions that support business decision-making. **face to face**	New CTE funding will likely be requested (or internal reallocation)		Will need a proposal form

THREE-YEAR PLAN

Proposed Regional Programs

Institution Name: North Idaho College

Program Title	Degree Level/ Certificate	Region	Regional/Statewide Program Responsibility	Anticipated Delivery Date	Program Description	Anticipated Resources	Memorandum of Understanding or Contract	Other
Program offerings commencing 2022-2023								
Advanced Manufacturing	Intermediate Technical Certificate Advanced Technical Certificate Associate of Applied Science	Coeur d'Alene/Region I	Regional	Fall 2022	Advanced Manufacturing is a multifaceted field that utilizes many areas of studying including electrical, automation, computers, Computer Aided Design, Materials, basic machining concepts, basic welding, composites, blueprint reading, fabrication, quality assurance, and mechanical systems. The Advanced Manufacturing program is designed to prepare students for employment as entry-level technicians, and emphasizes extensive practical experience in both theory and laboratory setting using mock-up equipment and assemblies similar to those found in industry. **Method of Delivery: Hybrid**	No additional resources		
Data Science	Academic Certificate	Coeur d'Alene/Region I	Regional	Fall 2022	This certificate will develop student's abilities to analyze data in a variety of fields, particularly in interdisciplinary inquiry and problem solving. Drawing on the intersection of mathematics, statistics, business, computer science, social science, health professions, and other fields, students who complete this certificate will be equipped to consume, assess, and use data in ways that advance their pursuit of a wide range of educational programs and in diverse careers. It may be taken as a stand-alone program for those already in a career, or to compliment an existing program of study.	None, the program will draw on existing faculty and resources.		

Institution Name: North Idaho College

Program Title	Degree Level/ Certificate	Region	Regional/Statewide Program Responsibility	Anticipated Delivery Date	Program Description	Anticipated Resources	Memorandum of Understanding or Contract	Other
Digital Media	Academic Certificate	Coeur d'Alene/Region I	Regional	Fall 2022	This certificate will develop student's abilities to employ digital tools in a variety of careers, including the use of photography, modern reporting techniques using media, such as podcasting, and emerging tools for communication to be current with evolving technology and methods used in various fields. It may be taken as a stand-alone program, helpful for those already in a career, or as a certificate to compliment an existing student's educational plan. **Method of Delivery: Hybrid**	None, the program will draw on existing faculty and resources.		NIC will engage in discussion around this certificate as Graphic/Web cert planned as well for a BAT
Medical Laboratory Technology	Associate of Science	Coeur d'Alene/Region 1; LCSC/Region II, CWI/Region III, CSI/Region IV, ISU/Region V, EITC/Region VI	Regional	Fall 2022	Many opportunities await those choosing careers in medicine and science. One of the most rewarding is medical laboratory technology. As members of the medical team, technicians work side by side with medical technologists and pathologists and have relatively less contact with patients. Medical laboratory technicians (MLTs) perform a great variety of scientific laboratory procedures, utilizing automated computerized instrumentation, all of which aid in the detection, diagnosis and treatment of disease. **Method of delivery: hybrid.**	No additional resources	MOUs developed as/if requested by institutions	

Institution Name: North Idaho College

Program Title	Degree Level/ Certificate	Region	Regional/Statewide Program Responsibility	Anticipated Delivery Date	Program Description	Anticipated Resources	Memorandum of Understanding or Contract	Other
Radiography Technology: CT	Certificate	Coeur d'Alene/Region I	Regional	Fall 2022	The Computed Tomography (CT) technical certificate program provides educational opportunities to the post-graduate registered Radiologic Technologist, registered Radiation Therapist, and registered Nuclear Medicine Technologist in good standing. It provides students with the knowledge needed to perform CT exams and to sit for the Post-Primary Computed Tomography Certification Examination. The academic component is designed to meet competency requirements of the American Registry of Radiologic Technologists (ARRT) exam in Computed Tomography. **Method of Delivery: Face-to-Face**	Use of additional adjuncts		
Surgical First Assist	Certificate	Coeur d'Alene/Region I	Regional	Summer 2022	Advanced training for students who are already Certified Surgical Technologists to achieve a higher level of performance in the operating room. The role of the first assistant is to assist surgeon by performing advanced technical skills during surgical procedures. **Method of Delivery: Hybrid**	Use of additional adjuncts		
Program offerings commencing 2023-2024								
Aviation Maintenance, Powerplant	Intermediate Technical Certificate (CC1)	Coeur d'Alene/Region I	Regional	Fall 2023	The Federal Aviation Administration (FAA) rating for "Powerplant" authorizes licensed mechanics to work on the engine and drive systems of aircraft and is a requirement of most aircraft mechanic positions. Adding "Powerplant" to NIC's existing Aviation Maintenance Training School certification FAA 4NIT612K. **Method of Delivery: Face-to-Face**	Seek grant support to initiate		

Institution Name: North Idaho College

Program Title	Degree Level/ Certificate	Region	Regional/Statewide Program Responsibility	Anticipated Delivery Date	Program Description	Anticipated Resources	Memorandum of Understanding or Contract	Other
Construction Management	Intermediate Technical Certificate Associate of Applied Science	Coeur d'Alene/ Region I	Regional	Fall 2023	The Construction Management program is designed to prepare students for entry-level employment in the residential and commercial construction trades as well as offer the opportunity to transfer to a 4 year institution or progress to the proposed 4 year degree that NIC will offer in 2021. The program will emphasize extensive practical experience in both theory and laboratory settings as well as cooperative education opportunities. **Method of delivery: Face-to-Face theory and lab**	None, the program will draw on existing faculty and resources.		ITC and AAS is in place; waiting on articulation agreement from BSU
Digital Media	Bachelor of Applied Technology	Coeur d'Alene/Region I	Regional	Fall 2023	Students will express their creativity and gain the competitive advantage in the multi-faceted graphic, web/social media design, and visual communication industry. Graduates will be ready to add their talents to this rapidly growing field with a Bachelor of Applied Technology Degree in Digital Media from NIC. **Method of Delivery: Hybrid**			
Mobile Food Truck Management	Intermediate Technical Certificate (CC1)	Coeur d'Alene/Region 1	Regional	Fall 2023	The Mobile Food Truck Management certificate provides specific training required to prepare students to assume positions in catering and food trucks. Students will learn the fundamentals of kitchen equipment, tools, basic cooking, menu prep, teamwork, sanitation and safety, to meet the growing demand for trained professionals in the food truck industry. This program will help guide one through the steps of planning, starting and maintaining a food truck or food cart. Graduates should qualify for ownership of a food truck. **Method of Delivery: Hybrid**	May seek state funding for 1 FTE faculty member		

Institution Name: North Idaho College

Program Title	Degree Level/ Certificate	Region	Regional/Statewide Program Responsibility	Anticipated Delivery Date	Program Description	Anticipated Resources	Memorandum of Understanding or Contract	Other
Program offerings commencing 2024-2025								
Diesel Technology	Bachelor of Applied Science	Coeur d'Alene/Region I	Regional	Fall 2024	The BAS degree in Diesel Technology program is designed to prepare students for employment in a variety of diesel and equipment related career fields including road/bridge construction, transportation, mining, manufacturing, railroad, marine, federal/state/local government agencies, dealerships, and power generation. This degree provides students with the opportunity to acquire a deep technical foundation in all aspects of the diesel related fields. Students will learn how to plan, implement, administer, and support appropriate related technologies and systems to help an organization achieve its goals and objectives. **Method of Delivery: Hybrid**	May seek state funding		
Registered Nursing	Bachelor of Science in Nursing	Coeur d'Alene/Region I	Regional	Fall 2024	At the recent Idaho Nursing Workforce Summit in Boise, a call to action was presented to each school of nursing to increase graduate #s by 30 between now and 2025. Even at this, Idaho will have 1000 vacancies in 2025. Moreover, of significance to NIC, the need for bachelor prepared nurses is paramount. With NIC's commitment to excellence in nursing education by developing distinguished graduate nurses who are prepared to meet the health care needs of the community and seek to advance the profession, partners are requesting NIC seek approval for a BSN. **Method of Delivery: Hybrid**	N/A

SUBJECT

Board Policy III.N., Statewide General Education – First Reading

REFERENCE

June 1996	The Board adopted a common course listing for general education core.
December 2016	The Board approved the first reading of Board Policy III.N. clarifying oral communication competencies.
February 2017	The Board approved the second reading of Board Policy III.N.
August 2017	The Board approved the first reading of Board Policy III.N. amending the makeup of the committee and setting a timeline for competency review.
October 2017	The Board approved the second reading of Board Policy III.N.
August 2018	The Board approved the first reading of proposed amendments to Board Policy III.N. establishing a common course indexing system within the General Education Matriculation (GEM) framework to assist with transfer.
October 2018	The Board approved the second reading of proposed amendments to Board Policy III.N.
August 2019	The Board approved the first reading of proposed amendments to Board Policy III.N. clarifying process for changes to common course index.
October 2019	The Board approved the second reading of proposed amendments to Board Policy III.N.
October 2020	The Board approved the first reading of proposed amendments to Board Policy III.N. designating the Executive Director or designee as chair of the GEM Committee.
December 2020	The Board approved the second reading of proposed amendments to Board Policy III.N.

APPLICABLE STATUTE, RULE OR POLICY

Idaho State Board of Education Governing Policies & Procedures, Section III.N. and III.V.
Section 33-3729, Idaho Code

BACKGROUND/DISCUSSION

Board Policy III.N., General Education outlines the statewide General Education Framework, which provides guidance to Idaho's public institutions in identifying courses that meet the General Education Matriculation (GEM) competencies for the facilitation of seamless credit transfer for students. In addition to Board Policy III.V. Articulation and Transfer, which governs the articulation of students and transfer of credits between Idaho's public postsecondary institutions, Section 33-

3729, Idaho Code, states students who "completed the general education framework as defined by the state board of education, without an associate of arts or associate of science degree, and transfers from a postsecondary institution in Idaho accredited by a regional accrediting body recognized by the state board of education will not be required to complete additional general education requirements at the receiving Idaho public postsecondary institution." This would be inclusive of any institutionally designated general education courses. Board policy III.N. defines that general education framework.

Consistent with Board Policy III.N., faculty discipline groups representing all institutions shall meet at least annually or as directed by the Board, to ensure consistency and relevance of general education competencies and courses approved for their respective GEM competency areas. At the October 2020 General Education Summit, the GEM Committee and Board staff facilitated a process with faculty discipline groups to conduct a thorough review and revision of the six GEM competencies.

Proposed amendments primarily clarify and streamline competency language in policy and shared rubrics for all GEM areas. Scientific Ways of Knowing amendments include updating lab course requirements. Throughout the pandemic, delivery of lab classes proved challenging under physical distancing requirements and other restrictions. As a result, this discipline group recommended updating the language to maintain quality delivery and ensure that students meet learning outcomes. Amendments were also made to Social and Behavioral Ways of Knowing, which updates the number of required competencies from four to five.

Other amendments include expanding the membership of the General Education Committee to include members representing digital learning, dual credit, and open education.

IMPACT

Approval of the proposed amendments will conclude the inaugural three-year review cycle for the Idaho GEM framework and improve alignment between institution, state, and national outcomes for discipline areas.

ATTACHMENTS

Attachment 1 - Board Policy III.N., Statewide General Education – First Reading

BOARD STAFF COMMENTS AND RECOMMENDATIONS

The GEM Committee divided into work groups for each GEM competency area and facilitated several work sessions ahead of the annual general education summit. The main purpose of the work session was to review and update, if necessary, GEM competencies as part of a formal three-year review cycle. This process provided more opportunities for faculty to engage in discussion and validation of competencies than in previous years. The resulting changes will streamline and clarify GEM competency requirements and intended outcomes for

students.

Amendments were presented to the GEM Committee on January 22, 2021 and March 17, 2021; to the Council on Academic Affairs and Programs on February 4, 2021; and to the Board's Instruction, Research and Student Affairs Committee at their August 13, 2021 meeting.

Board staff recommends approval.

BOARD ACTION

I move to approve the first reading of proposed amendments to Board Policy III.N., Statewide General Education, as submitted in Attachment 1.

Moved by _____ Seconded by _____ Carried Yes _____ No _____

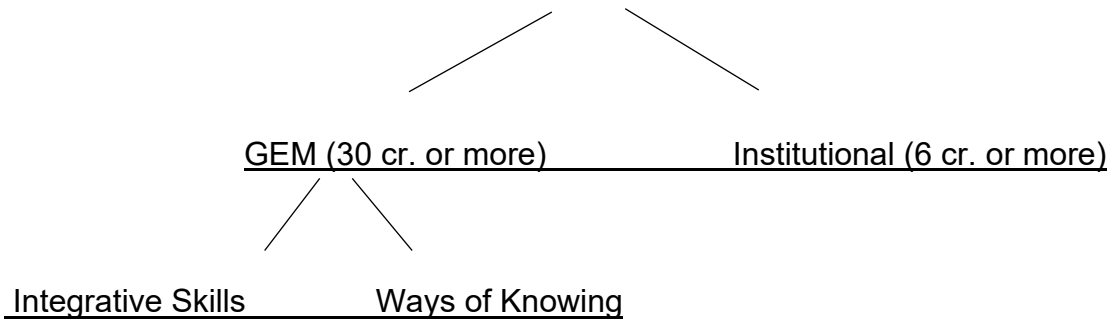
Idaho State Board of Education

GOVERNING POLICIES AND PROCEDURES

SECTION: III. POSTSECONDARY AFFAIRS

SUBSECTION: N. Statewide General Education ~~December 2020~~October 2021



In our rapidly-changing world, students need to understand how knowledge is generated and created. They need to adapt to new opportunities as they arise as well as effectively communicate and collaborate with increasingly diverse communities and ways of knowing. In combination with major coursework, general education curriculum prepares students to use multiple strategies in an integrative manner to explore, critically analyze, and creatively address real-world issues and challenges. General education coursework provides students with an understanding of self, the physical world, and human society—its cultural and artistic endeavors as well as an understanding of the methodologies, value systems, and thought processes employed in human inquiries. General education helps instill students with the personal and civic responsibilities of good citizenship, and prepares them to be adaptive, life-long learners.

This policy shall apply to the University of Idaho, Boise State University, Idaho State University, Lewis-Clark State College, College of Eastern Idaho, College of Southern Idaho, College of Western Idaho, and North Idaho College (hereinafter "institutions").

1. The state of Idaho's general education framework for Associate of Arts, Associate of Science, and Baccalaureate degrees, outlined below in Figure 1, shall be:

   a. Thirty (30) credits or more of the general education curricula must fit within the general education Matriculation (GEM) competency areas defined in subsection 4 of this policy, and
   b. Six (6) or more credits of the general education curricula, which are reserved for institutions to address the specific mission and goals of the institution. For this purpose, institutions may create new competency areas or they may choose to count additional credits from GEM competencies. Regardless, these institutionally designated credits must have learning outcomes linked to Association of American Colleges and Universities (AAC&U) Essential Learning Outcomes.

Fig. 1: General education framework reflecting AAC&U Essential Learning Outcomes

2. The intent of the general education framework is to:

    a. Establish statewide competencies that guide institutions' determination of courses that will be designated as GEM courses
    b. Establish shared rubrics that guide course/general education program assessment; and
    c. Create a transparent and seamless transfer experience for undergraduate students.

3. There are six (6) GEM competency areas. The first two (2) emphasize integrative skills intended to inform the learning process throughout general education and major. The final four (4) represent ways of knowing and are intended to expose students to ideas and engage them in a broad range of active learning experiences. The GEM competency areas are as listed:

    a. Written Communication
    b. Oral Communication
    c. Mathematical Ways of Knowing
    d. Scientific Ways of Knowing
    e. Humanistic and Artistic Ways of Knowing
    f. Social and Behavioral Ways of Knowing

4. GEM courses in each area shall include the following competencies:

    a. Written Communication
    Upon completion of a course in this category, students are able to demonstrate the following competencies:

        i. Use flexible writing process strategies to generate, develop, revise, ~~edit, and~~ proofread, and edit texts.
        ii. Adopt strategies and genre appropriate to the rhetorical situation.
        iii. Use inquiry-based strategies to conduct research that explores multiple and diverse ideas and perspectives, appropriate to the rhetorical context.
        iv. Use rhetorically appropriate strategies to evaluate, represent, and respond to the ideas and research of others.
        v. Address readers' biases and assumptions with well-developed evidence-based reasoning.
        vi. Use appropriate conventions for integrating, citing, and documenting source material ~~as well as for surface-level language and style~~.
        vii. Read, interpret, and communicate key concepts in writing and rhetoric.

    b. Oral Communication
    Upon completion of a course in this category, students are able to demonstrate the following competencies:

i. Research, discover, and develop information resources and structure spoken messages to increase knowledge and understanding.
ii. Research, discover, and develop evidence-based reasoning and persuasive appeals for ethically influencing attitudes, values, beliefs, or behaviors.
iii. Adapt spoken messages to the diverse personal, ideological, and emotional needs of individuals, groups, or contexts.
iv. Employ effective spoken and nonverbal behaviors that support communication goals and illustrate self-efficacy.
v. Listen in order to effectively and critically evaluate the reasoning, evidence, and communication strategies of self and others.
vi. ~~Understand~~ Demonstrate knowledge of key theories, perspectives, principles, and concepts in the Communication discipline, as applied to oral communication.

c. Mathematical Ways of Knowing
Upon completion of a course in this category, a student is able to demonstrate the following competencies:

i. ~~Read, i~~Interpret~~, and communicate~~ mathematical concepts.
ii. Represent ~~and interpret~~ information/data.
iii. ~~Select, execute and explain~~ Use appropriate strategies/procedures when solving mathematical problems.
iv. ~~Apply quantitative reasoning to d~~Draw reasonable conclusions based on quantitative information~~and support appropriate conclusions~~.

d. Scientific Ways of Knowing
Upon completion of a non-lab course in this category, a student is able to demonstrate ~~at least four (4) of the following~~ competencies i-iv~~:~~. A student is able to demonstrate all five competencies, i-v, upon completion of a lab course.

i. Apply foundational knowledge and models of a discipline in the ~~natural or~~ physical or natural sciences to analyze and/or predict phenomena.
ii. ~~Understand the scientific method and a~~Apply scientific reasoning to critically evaluate~~ arguments~~ assertions.
iii. Interpret and communicate scientific information via written, spoken and/or visual representations.
iv. Describe the relevance of specific scientific principles to the human experience.
v. ~~Form and t~~Test a hypothesis in the laboratory or field using discipline-specific tools and techniques for observation, data collection and~~/or~~ analysis to form a defensible conclusion.

e. Humanistic and Artistic Ways of Knowing
Upon completion of a course in this category, students are able to demonstrate at least five (5) of the following competencies:

i. Recognize and describe humanistic, historical, or artistic works within problems and patterns of the human experience.
ii. Distinguish and apply ~~terminologies,~~ methodologies, approaches, or traditions~~processes, epistemologies, and traditions~~ specific to the discipline~~(s)~~.
iii. ~~Perceive and understand~~ Differentiate formal, conceptual, and technical elements specific to the discipline.
iv. Analyze, evaluate, and interpret texts, objects, events, or ideas in their cultural, intellectual or historical contexts.
v. Interpret artistic ~~and/~~or humanistic works through the creation of art, language, or performance.
vi. Develop critical perspectives or arguments about the subject matter, grounded in evidence-based analysis.
vii. Demonstrate self-reflection, ~~intellectual elasticity,~~ widened perspective, and respect for diverse viewpoints.

f. Social and Behavioral Ways of Knowing
Upon completion of a course in this category, students are able to demonstrate ~~at least four (4)~~ all five (5) of the following competencies.

i. Demonstrate knowledge of the theoretical and conceptual frameworks of a particular Social Science discipline.
ii. ~~Develop an understanding of~~ Describe self and the world by examining the dynamic interaction of individuals, groups, and societies as they shape and are shaped by history, culture, institutions, and ideas.
iii. Utilize Social Science approaches, such as research methods, inquiry, or problem-solving, to examine the variety of perspectives about human experiences.
iv. Evaluate how reasoning, history, or culture informs and guides individual, civic, or global decisions.
v. ~~Understand and appreciate~~ Identify the impact of the similarities and differences among and between individuals, cultures, or societies across space and time.

5. General Education Requirements

a. This subsection applies to Associate of Arts, Associate of Science, and Baccalaureate degrees. For the purpose of this policy, disciplines are indicated by course prefixes.

General education curricula must reflect the following credit distribution:

Competency Area	Minimum Credits
Written Communication	6
Oral Communication	2
Mathematical Ways of Knowing	3

Scientific Ways of Knowing	7 (from two different disciplines with at least one laboratory or field experience)
Humanistic and Artistic Ways of Knowing	6 (from two different disciplines)
Social and Behavioral Ways of Knowing	6 (from two different disciplines)
Institutionally-Designated Credits	6

i. GEM courses are designed to be broadly accessible to students regardless of major, thus college-level and non-GEM pre-requisites to GEM courses should be avoided unless deemed necessary by the institution.

ii. Additional GEM courses, beyond the general education curricula, may be required within the major for degree completion.

b. This subsection pertains to Associate of Applied Science (AAS) degrees.

The general education curricula for the AAS degree must contain a minimum of fifteen (15) credits, so distributed in the following areas:

Competency Area	**Minimum Credits**
Written Communication	3
Oral Communication	3
Mathematical Ways of Knowing	3
Social and Behavioral Ways of Knowing	3
Any general education course including institutionally designated courses	3

c. GEM courses and institutionally designated courses shall transfer as meeting an associated general education competency requirement at any institution pursuant to Board policy Section III.V.

6. Governance of the General Education Program and Review of Courses

a. GEM courses are developed by faculty and approved via the curriculum approval process of the institution delivering the courses. Faculty discipline groups representing all institutions shall meet at least annually or as directed by the Board, to ensure consistency and relevance of general education competencies and courses approved for their respective GEM competency areas.

b. Common Course Indexing is developed for courses offered within the GEM framework to provide greater transparency and seamlessness within transfer processes at Idaho's postsecondary institutions. Common-indexed courses are accepted as direct equivalents across institutions for transfer purposes. Common course indexing shall include common course prefix, common course number, common course title, and common GEM discipline area designation. The common

course number shall be three digits in sequence, but can be preceded by a single digit if four numbers are utilized by the institution (x###).

The common course list shall be approved by the Board on an annual basis and shall be maintained by the Board office. Changes to the list may be proposed by faculty discipline groups to the General Education Matriculation Committee. Proposed additions or removal of courses on the common course list must be reviewed by the General Education Matriculation Committee prior to Board approval. The request to remove a common-indexed course from an institution's academic catalog must be approved by the Board. The request to discontinue a course must be submitted in writing by the institution to the Board office. The request shall be submitted no less than a year in advance and provide rationale for the inability to offer the course.

c. The General Education Matriculation (GEM) Committee shall consist of a Board-appointed representative from each of the institutions; a representative from the Division of Career Technical Education; a representative from the Idaho Registrars Council, ~~as an ex-officio member~~; a representative from the digital learning community; a representative from the dual credit community, a representative from open education community; and the Executive Director of the Board, or designee, who shall serve as the chair of the committee. To ensure alignment with AAC&U Essential Learning Outcomes and subsection 1, the Committee shall meet at least annually to review the competencies and rubrics of the general education framework. The Committee shall make recommendations to the Board regarding the general education framework and the common course list. The Committee shall review and make recommendations on the general education competencies as necessary. GEM Committee duties are prescribed by the Board, including those that may involve addressing issues related to competency areas and course offerings. The GEM Committee reports to the Council on Academic Affairs and Programs.

d. The institutions shall identify all general education courses in their curricula and identify them in a manner that is easily accessible by the public via their respective websites, as well as relevant web resources maintained by the Board office.

SUBJECT

Board Policy III.G., Postsecondary Program Approval and Discontinuance and Board Policy III.H. Program Review – Second Reading

REFERENCE

February 14, 2019	The Board approved the first reading of proposed amendments to include review and approval procedures for applied baccalaureate degrees and microcertifications.
April 18, 2019	The Board approved the second reading of proposed amendments to Board Policy III.G.
August 29, 2019	The Board was presented with a first reading of proposed amendments to Board Policy III.G. Policy, which was referred back to Instruction, Research, and Student Affairs (IRSA) for additional discussion.
October 17, 2019	The Board approved the first reading of proposed amendments, which adds baccalaureate degree programs to the list of programs reviewed by the Board and changes requirements for new academic program proposals that consist of new state appropriations.
December 2019	The Board approved the second reading of proposed amendments to Board Policy III.G.
June 10, 2020	The Board approved a one year, partial waiver of the requirement for full proposals in Board Policy III.G.3.d and 4.d for modifications to academic programs, career technical programs and instructional and administrative units.
June 16, 2021	The Board approved an extension of the partial waiver of the requirement for full proposals in Board Policy III.G.3.d. and 4.d for modifications to academic programs, career technical programs and instructional and administrative units.
June 16, 2021	The Board approved the first reading of proposed amendments to Board Policy III.G, which reorganizes and streamlines proposal requirements and provides flexibility to the Executive Director to delegate authority to designees for the approval of academic and career technical program changes.

APPLICABLE STATUTE, RULE OR POLICY

Idaho State Board of Education Governing Policies & Procedures, Section III.G. and III.H.
Section 33-2107A, Idaho Code

BACKGROUND/DISCUSSION

Proposed amendments reorganize the structure of Board Policy III.G and streamline the proposal requirements into three main routes for review and/or approval. This includes a full proposal process, short proposal process, and notification letter process. The most notable change provides flexibility to the Executive Director to delegate authority to designees for the approval of academic and career technical program changes. Amendments were shared with the Technical College Leadership Council on August 12, 2021, which resulted in modifications for the submission of non-substantial changes.

The amendments to Board Policy III.G renders Board Policy III.H duplicative and unnecessary. Due to the reorganization of Board Policy III.G. and number of amendments the existing policy is being replaced in its entirety by the version provided in Attachment 1.

IMPACT

Approval of proposed amendments will create efficiencies and streamline review and approval requirements for staff at institutions and at the Board office. These new efficiencies will enable institutions to notify accrediting bodies in a timelier manner and meet their respective catalog timelines. Board action will also repeal Board Policy III.H.

ATTACHMENTS

Attachment 1 – Board Policy III.G. Postsecondary Program Approval and Discontinuance – Second Reading
Attachment 2 – Board Policy III.G. Postsecondary Program Approval and Discontinuance – Current Version
Attachment 3 – Board Policy III.H. Program Review – Second Reading

BOARD STAFF COMMENTS AND RECOMMENDATIONS

Proposed amendments will create efficiencies and improve procedures related to the review and approval of postsecondary programs. The following changes were made between the first and second reading of these policy amendments:

- Removal of microcertification requests from the Career Technical Short Proposal subsection (4.b).
- Creation of a new subsection (4.d) requiring requests for microcertifications to be submitted via a template developed by the Division of Career Technical Education
- Addition of “State” to the title of “Administrator” throughout the policy and clarification that the Executive Director or designee, in addition to the State Administrator, shall approve requests related to career technical programs.
- Addition of modifications to academic instructional or administrative units to the Short Proposal section.
- Removal of the deviation from program credit definitions from the Career Technical Short Proposal subsection (4.b.)

- Removal of three actions related to online format and delivery from the Career Technical Letter of Notification subsection (4.c.) to the Career Technical Short Proposal subsection (4.b.)
- One or two minor technical corrections.

Staff recommends approval.

BOARD ACTION

I move to approve the second reading of proposed amendments to Board Policy III.G, Program Approval and Discontinuance, as submitted in Attachment 1.

Moved by _____ Seconded by _____ Carried Yes _____ No _____

AND

I move approve the second reading of Board Policy III.H. Program Review, repealing the policy in its entirety, as submitted in Attachment 3.

Moved by _____ Seconded by _____ Carried Yes _____ No _____

ATTACHMENT 1

Idaho State Board of Education
GOVERNING POLICIES AND PROCEDURES
SECTION: III. POSTSECONDARY AFFAIRS
SUBSECTION: G. Postsecondary Program Review Approval **August 2021**

This subsection shall apply to the University of Idaho, Idaho State University, Boise State University, Lewis-Clark State College, North Idaho College, College of Eastern Idaho, College of Southern Idaho, and College of Western Idaho.

1. Classifications and Definitions

   a. Academic Program shall mean a postsecondary educational program offered by an institution of higher education that leads to an academic or professional degree, certificate, or other recognized educational credential as defined in Board Policy Section III.E.

   b. Academic Program Components shall include options, minors, emphases, tracks, concentrations, specializations, and cognates as defined by each institution. For the purposes of this policy, a certificate is not an academic program component.

   c. Administrative Unit shall mean offices, centers, bureaus, or institutes that are responsible for carrying out administrative functions, research, or public service as their primary purpose, and are not responsible for academic or career technical programs.

   d. Career Technical Program shall mean a sequence or aggregation of competencies that are derived from industry-endorsed outcome standards and directly related to preparation for employment in occupations requiring a career technical certificate or degree as defined in Board Policy Section III.E. These programs must include competency-based applied learning that contributes to an individual's technical skills, academic knowledge, higher-order reasoning, and problem-solving skills.

   e. Career Technical Program Component shall mean instructional paths to fields of specialized employment, consisting of more than one specialized course.

   f. Financial Impact shall mean the total financial resources, regardless of funding source, needed to support personnel costs, operating expenditures, capital outlay, capital facilities construction or major renovation, and indirect costs that are incurred as a direct result of establishing, modifying, or discontinuing a new instructional program, instructional unit, or administrative unit. This includes the impact of moving resources from existing programs to proposed programs.

   g. Full Proposal shall mean a document submitted to the Board Office that contains details about substantive changes to academic or career technical education programming or administration that require review and approval by the full Board or the Executive Director of the Board or designee, as specified in this policy. The

Full Proposal template is developed and maintained by the Executive Director or designee.

h. Instructional Unit shall mean departments, institutes, centers, divisions, schools, colleges, campuses, branch campuses, and research units (e.g. extension centers) that are responsible for academic programs or career technical programs.

i. Letter of Notification shall mean a letter from the institution to the Executive Director or designee, notifying the Board Office of changes to academic or career technical education programming or administration that do not require advanced approval by the Board or the Executive Director or designee, as specified in this policy.

j. Major shall mean a principal field of academic specialization that usually accounts for 25 to 50 percent of the total degree requirements. The concentration of coursework in a subject matter major serves to distinguish one program from others leading to the same or a similar degree.

k. Short Proposal shall mean a document submitted to the Board Office that contains details about non-substantive changes to academic or career technical education programming or administration that require review and approval by the Executive Director or designee, as specified in this policy. The Short Proposal template is developed and maintained by the Executive Director or designee.

2. Roles and Responsibilities

Program planning, review, and approval shall be a collaborative process which includes the Board, Board staff, the institutions, faculty, external advisory groups, regional and specialized accreditation bodies, and other stakeholders pursuant to Board Policy III.Z.

a. Each institution shall establish and maintain policies and procedures for evaluating existing programs and developing new program proposals. This evaluation process should be an integral component of the institution's academic and career technical education planning and budgeting processes.

b. New program proposals and discontinuation requests shall be reviewed by the Council on Academic Affairs and Programs (CAAP). CAAP shall make recommendations to the Instruction, Research, and Student Affairs (IRSA) committee on instructional programmatic matters and related policy issues.

c. The Idaho Division of Career Technical Education shall review and make recommendations as appropriate to the IRSA Committee and/or the Board on instructional programmatic matters and policy issues related to their roles and responsibilities. The State Administrator of the Idaho Division of Career Technical

Education is authorized to approve academic microcertifications developed by the institutions in addition to career technical microcertifications.

d. The Professional Standards Commission shall review and make recommendations as appropriate to the Board on educator preparation programs for educator certification purposes. Educator preparation program approval for state certification purposes is governed by Administrative Code through a separate process. The processes for earning approval for certification should be conducted concurrently with the program approval process when practicable.

3. Academic Programming and Administration Proposal Submission and Approval

a. Actions Requiring a Full Proposal

Subsequent to institutional review and consistent with institutional policies, but prior to implementation, actions related to academic programs or units identified in this subsection require approval by the Board or the Executive Director or designee as indicated, and shall be submitted by the institution ~~to the Executive Director or designee~~ as a Full Proposal.

i. The following actions require approval by the Board:

1) Establishment of a new branch campus or change in location geographically apart from the main campus, regardless of financial impact. A location of an institution that is geographically apart and independent of the main campus is permanent in nature; offers at least 50% of the courses of an educational program leading to a degree, certificate, or other educational credential; has its own faculty and administrative organization; and has its own budgetary and hiring authority as defined by 34 CFR 600.2. Subsection 3.a.i.1 excluding the community colleges.

2) Establishment of any new academic undergraduate or graduate program with a financial impact of $250,000 or more per fiscal year.

a) All doctoral program proposals shall require an external peer review, regardless of financial impact. The external peer-review panel shall consist of at least two (2) members and will be selected by the Executive Director or designee and the requesting institution's Chief Academic Officer. Board staff shall notify the institution in writing whether it may proceed with the external peer-review process. External reviewers shall not be affiliated with a public Idaho institution. The review shall consist of a paper and on-site peer review, followed by the issuance of a report and recommendations by the panel. Each institution shall provide the panel with a template developed by the

Executive Director or designee. The peer reviewer report and recommendations shall be a significant factor in the Board's evaluation of the program.

b) New educator preparation programs require concurrent submission of a Full Proposal to the Executive Director or designee and the Professional Standards Commission (PSC), regardless of financial impact. The PSC ensures programs meet the Idaho standards for educator certification. The Executive Director or designee ensures the program proposal is consistent with the program approval process and meets the standards approved by the Board and established by rule in Administrative Code. The PSC makes recommendations to the Board for approval of programs as vehicles for meeting the state certification requirements.

3) Establishment by a community college of any new applied baccalaureate program, pursuant to Section 33-2107A Idaho Code.
4) Establishment of any new program with academic program fees as defined in Board Policy Section V.R.
5) Adding program fees to existing programs requires full Board approval consistent with Board Policy Section V.R; however, such changes do not require submission of a Full Proposal.

ii. The following actions require approval by the Executive Director or designee:

1) Establishment of any new academic undergraduate or graduate program with a financial impact of less than $250,000 per fiscal year.
2) Discontinuation of an academic undergraduate or graduate program or instructional or administrative unit.
3) Establishment of any new instructional or administrative unit.
4) Establishment of any new academic undergraduate and graduate certificates consisting of more than 30 credits and with a financial impact of $250,000 or more per fiscal year.
5) Expansion of an existing program outside an institution's Designated Service Region as defined in Board Policy III.Z.
6) Conversion of a program option into a stand-alone program with a financial impact of $250,000 or more per fiscal year.
7) Consolidation of two or more undergraduate programs into one undergraduate program with a financial impact of $250,000 or more per fiscal year.
8) Consolidation of two or more graduate programs into one program.
9) Splitting of a graduate program into two or more programs.
10) Addition of existing certificates or degrees to existing programs with a financial impact of $250,000 or more per fiscal year.

Each Full Proposal shall be reviewed by the Council on Academic and Affairs and Programs within 30 days of receipt. At the sole discretion of the Executive Director or designee, any Full Proposal may be referred to the full Board for review and approval. Requests requiring new state appropriations shall be submitted to the Board for review prior to or concurrently with submission of an institution's annual budget request.

b. Actions Requiring a Short Proposal

Subsequent to institutional review and consistent with institutional policies, but prior to implementation, the following actions related to academic programs or units require approval by the Executive Director or designee and shall be submitted by the institution ~~to the Executive Director or designee~~ as a Short Proposal:

i. Establishment of a new academic undergraduate or graduate certificate consisting of more than 30 credits with a financial impact of less than $250,000 per fiscal year.
ii. Addition of a certificate or degree to an existing program with a financial impact of less than $250,000 per fiscal year.
iii. Splitting of an undergraduate program into two or more undergraduate programs.
iv. Consolidation of two or more undergraduate programs into one undergraduate program with a financial impact of less than $250,000 per fiscal year.
v. Conversion of one program option into a stand-alone program with a financial impact of less than $250,000 per fiscal year.
vi. Conversion or transition of a degree type (e.g. Bachelor of Arts to Bachelor of Science).
vii. Conversion or transition of a certificate type (e.g. Technical Certificate of Completion to Basic Technical Certificate).
viii. Deviation from program credit definitions.
ix. Changes to program names or degree titles related to Statewide Program Responsibilities as defined in Policy III.Z (requires full board approval).
x. Establishment of new programs consisting of multiple certificates with similar coursework.
xi. Establishment of a dual degree from existing programs with a financial impact of less than $250,000 per fiscal year.
~~xi.~~xii. Modification to existing academic instructional or administrative units

At the sole discretion of the Executive Director or designee, institutions may be required to submit a Full Proposal for any action identified in this subsection.

c. Actions Requiring a Letter of Notification

Subsequent to institutional review and consistent with institutional policies, and within 30 days after implementation, institutions shall notify the Executive Director

or designee of the following actions related to academic programs or units via a Letter of Notification:

i. Establishment of a new, modification to, or discontinuation of an academic program component.
ii. Establishment of a new academic undergraduate or graduate certificate consisting of fewer than thirty (30) credits.
iii. Program expansion within an institution's Service Region as defined in Board Policy III.Z.
iv. Establishment of a dual degree from existing undergraduate or graduate programs with a financial impact of less than $250,000 per fiscal year.
v. A change from clock hours to credit hours for an academic program.
vi. Addition of an online option to an existing academic program.
vii. Transition of an academic program with less than fifty percent (50%) of courses offered online exclusively to fifty percent (50%) or more of courses offered online exclusively.
viii. Transition of an academic program to an exclusively online format.
ix. Addition or removal of courses that represent a significant departure from existing academic program offerings or method of delivery.
x. A change in name or title of any academic program or instructional or administrative unit.
xi. A change of Classification of Instructional Program (CIP) code for any academic program.
xii. A credit change to an existing academic program.

At the sole discretion of the Executive Director or designee, institutions may be required to submit a Short Proposal or Full Proposal for any action identified in this subsection.

d. Minor changes to curriculum, descriptions of individual courses, or catalog listings do not require notification to or approval by the Board or the Executive Director or designee.

4. Career Technical Program Proposal Submission and Approval

a. Actions Requiring a Full Proposal

Subsequent to institutional review and consistent with institutional policies, but prior to implementation, requests for changes to career technical programs or units identified in this subsection require approval by the State Administrator ~~of the Idaho Division of Career Technical Education or designee (unless otherwise indicated)~~ and the Executive Director or designee and shall be submitted by the institution ~~to the Administrator or designee~~ as a Full Proposal.

i. Establishment of a new career technical education program or certificate. New career technical programs or certificates with a financial impact of $250,000 or more per fiscal year require approval by the full Board.
ii. Discontinuation of career technical programs and components.
iii. Establishment of new career technical administrative or instructional units.
iv. Expansion of a career technical program outside an institution's Designated Service Region as defined in Board Policy III.Z.
v. Consolidation of two or more career technical programs into one career technical program with a financial impact of $250,000 or more per fiscal year.
vi. Conversion of one career technical program option into a stand-alone career technical program with a financial impact of $250,000 or more per fiscal year.
vii. Addition of career technical certificates or degrees to existing career technical programs with a financial impact of $250,000 or more per fiscal year.

For new or modified career technical programs or certificates, a Program Profile Attachment B is required. Each Full Proposal shall be reviewed by the Council on Academic and Affairs and Programs within 30 days of receipt. At the sole discretion of the Executive Director or designee, any Full Proposal may be referred to the Board for review and approval.

b. Actions Requiring a Short Proposal

Subsequent to institutional review and consistent with institutional policies, but prior to implementation, requests for changes in career technical programs or units identified in this subsection require approval by the State Administrator ~~or designee~~ and Executive Director or designee and shall be submitted by the institution ~~to the Administrator or designee~~ as a Short Proposal.

i. Splitting of a career technical program into two or more career technical programs.
ii. Consolidation of two or more career technical programs into one career technical program with a financial impact of less than $250,000 per fiscal year.
iii. Conversion of one career technical program option into a stand-alone career technical program with a financial impact of less than $250,000 per fiscal year.
iv. Addition of career technical certificates or degrees to existing career technical programs with a financial impact of less than $250,000 per fiscal year.
v. Inactivation of a career technical program. Inactivation allows program re-evaluation and assessment in response to rapid changes in industry for up to three years. If industry demand for the program does not resume within three years following approved inactivation, the program shall be discontinued pursuant to paragraph 7~~8~~ of this policy.
~~vi. Establishment of a new, modification to, or discontinuation of a microcertification, as defined in Board Policy III.E.~~
~~vii.~~vi. Addition or removal of courses that represent a significant departure from existing career technical program offerings or method of delivery.

~~viii.~~vii. Modification to existing career technical instructional or administrative units.
viii. Conversion or transition of one career technical program degree or certificate level to another degree or certificate level.
ix. Transition of a career technical program to an exclusively online format.
x. Addition of an online option to an existing career technical program.
xi. Transition of a career technical program with less than fifty percent (50%) of courses offered online exclusively to fifty percent (50%) or more of courses offered online exclusively.
~~ix. Deviation from program credit definitions.~~
~~x.~~xii. ~~Minor changes to career technical courses. Requires a program profile Attachment B and letter.~~

For the addition or modification of career technical programs or certificates, a Program Profile Attachment B is required. ~~At the sole discretion~~ Upon the recommendation of the State Administrator and at the discretion of the Executive Director or designee, institutions may be required to submit a Full Proposal for any action identified in this subsection.

c. Actions Requiring a Letter of Notification

Subsequent to institutional review and consistent with institutional policies, and within 30 days after implementation, institutions shall notify the State Administrator and the Executive Director or designee of the following changes to career technical programs or units via a Letter of Notification:

i. Establishment of a new, modification to, or discontinuation of a career technical program component.
ii. Career technical program expansion within an institution's Designated Service Region as defined in Board policy III.Z.
iii. A change from clock hours to credit hours for a career technical program.
~~iv. Addition of an online option to an existing career technical program.~~
~~v.~~iv. ~~Transition of an academica career techincal program with less than fifty percent (50%) of courses offered online exclusively to fifty percent (50%) or more of courses offered online exclusively.~~
~~vi. Transition of a career technical program to an exclusively online format.~~
~~vii.~~v. A change in the name or title of any career technical program or instructional or administrative unit.
~~viii.~~vi. A change of Classification of Instructional Program (CIP) code for any career technical program.
vii. A credit change to an existing career technical program.
~~ix.~~viii. Minor changes to career technical courses. Requires a program profile Attachment B and letter.

~~At the sole discretion~~ Upon the recommendation of the State Administrator ~~or~~ and at the discretion of the Executive Director or designee, institutions may be required

to submit a Short Proposal or Full Proposal for any action identified in this subsection.

d. Requests to establish, modify, or discontinue a microcertification, as defined in Board Policy III.E, require approval by the State Administrator and shall be submitted by the institution in accordance with a template developed by the Division of Career Technical Education.

e. Requests requiring new state appropriations shall be included in the annual budget request of the Idaho Division of Career Technical Education for Board approval.

5. Sunset Clause for Academic and Career Technical Program Approval

Academic and career technical programs approved by the Board or Executive Director ~~or Division Administrator or designee~~ must be implemented within five years. A program not implemented within five years from the approval date requires submission for approval of an updated proposal. Institutions shall notify the Executive Director or designee in writing when an approved program has not been officially implemented within the sunset timeframe. Institutions may request a change in the sunset timeframe indicated in the program proposal if a program's implementation is delayed.

6. Academic and Career Technical Program Proposal Denial Procedures

a. The Executive Director or designee shall act on any Full Proposal or Short Proposal within thirty (30) days.

b. If the Executive Director or designee denies a proposal, he/she shall provide specific reasons in writing to the institution. The institution shall have thirty (30) days in which to address the issue(s) for denial of the proposal. The Executive Director or designee shall have ten (10) working days after the receipt of the institution's response to re-consider the denial. If the Executive Director or designee denies the request after re-consideration, the institution may send its request and the supporting documents related to the denial to the Board for final reconsideration.

7. Program Discontinuance

The primary considerations for program discontinuance are whether the program is an effective use of the institution's resources, no longer serves student or industry needs, or when programs no longer have sufficient students to warrant allocation of resources. This policy does not apply to programs that are discontinued as a result of financial exigency as defined in Board Policy Section II.N.

a. Institutions shall develop policies, in accordance with the Northwest Commission on Colleges and Universities Accreditation Handbook, which requires institutions

to make appropriate arrangements for enrolled students to complete affected programs in a timely manner with minimum interruptions.

b. Any faculty or staff members whose employment the institution seeks to terminate due to the discontinuance of a program based upon Board Policy Section III.G. shall be entitled to the following procedures:

i. Non-classified contract employees, including non-tenured faculty, may be dismissed or have their contracts terminated or non-renewed in accordance with Board and institutional policies.

ii. State of Idaho classified employees shall be subject to layoff as provided in the rules of the Division of Human Resources. Classified employees of the University of Idaho shall be subject to layoff as provided in the policies of the University of Idaho.

iii. Tenured faculty will be notified in writing that the institution intends to dismiss them as a result of program discontinuance. This notice shall be given at least twelve (12) months prior to the effective date of termination.

iv. An employee who receives a notice of termination as a result of program discontinuance is entitled to use the internal grievance procedures of the institution. The sole basis to contest a dismissal following a program closure is in compliance with these policies.

8. Career Technical Program Reduction or Termination

For the reduction or termination of career technical programs, institutions shall adhere to criteria set forth by Idaho Division of Career Technical Education.

a. Conditions for Reduction or Termination

A program is subject to reduction or termination when one or more of the following conditions exist. Standards for the metrics listed below will be predetermined at the local level according to the institution's program health metrics for each category.

i. Inadequate Job Opportunities
ii. Inadequate Student Enrollment
iii. Inadequate Positive Placement
iv. Inadequate Completion Rate
v. Inadequate Finances

b. Notice to Employees

The institution must give notice in writing to employees who are affected by a program reduction or termination in accordance with Board and institutional policies.

9. Reporting

a. The Executive Director ~~and Division Administrator~~ or designee shall report semi-annually to the Board regarding all program proposals approved by the Executive Director or designee.

b. All baccalaureate and graduate level programs approved by the Board require a report on the program's progress in accordance with a timeframe and template developed by the Executive Director or designee.

ATTACHMENT 2

Idaho State Board of Education
GOVERNING POLICIES AND PROCEDURES
SECTION: III. POSTSECONDARY AFFAIRS **December 2019**
SUBSECTION: G. Postsecondary Program Approval and Discontinuance

The Board is responsible for the establishment, maintenance, and general supervision of policies and procedures governing the academic and program affairs of the institutions. This subsection shall apply to the University of Idaho, Idaho State University, Boise State University, Lewis-Clark State College, North Idaho College, College of Eastern Idaho, College of Southern Idaho, and College of Western Idaho.

Program planning shall be a collaborative process which includes the Board, Board staff, the institutions, faculty, external advisory groups, regional and specialized accreditation bodies, and other stakeholders pursuant to Board Policy Section III.Z.

1. Classifications and Definitions

   a. Instructional Unit(s) shall mean departments, institutes, centers, divisions, schools, colleges, campuses, branch campuses, and research units (e.g. extension centers) that are responsible for academic programs or career technical programs.

   b. Administrative Unit(s) shall mean offices, centers, bureaus, or institutes that are responsible for carrying out administrative functions, research, or public service as their primary purpose, and are not responsible for academic or career technical programs.

   c. Academic Program(s) shall mean a systematic, usually sequential, grouping of courses forming a considerable part, or all, of the requirements (i.e., curricula) that provides the student with the knowledge and competencies required in a specialized field (i.e., major) for an academic certificate, an associate's, baccalaureate, master's, specialist, or doctoral degree as defined in Board Policy Section III.E.

   d. Major(s) shall mean a principal field of academic specialization that usually accounts for 25 to 50 percent of the total degree requirements. The concentration of coursework in a subject-matter major serves to distinguish one program from others leading to the same or a similar degree.

   e. Academic Program Components shall include options, minors, emphases, tracks, concentrations, specializations, and cognates as defined by each institution.

   f. Career Technical Program(s) shall mean a sequence or aggregation of competencies that are derived from industry-endorsed outcome standards and directly related to preparation for employment in occupations requiring career technical certificates, microcertifications, or an associate of applied science degree as defined in Board Policy Section III.E. These programs must include competency-based applied learning that contributes to an individual's technical skills, academic knowledge, higher-order reasoning, and problem-solving skills. A

course or series of courses leading to a technical certificate of completion is not considered a program for approval purposes.

g. Career Technical Program Components including microcertifications shall mean instructional paths to fields of specialized employment, consisting of more than one specialized course, and may have a separate advisory committee.

h. Financial Impact shall mean the total financial resources, regardless of funding source, needed to support personnel costs, operating expenditures, capital outlay, capital facilities construction or major renovation, and indirect costs that are incurred as a direct result of the new instructional program or modification to an existing program. This includes instructional and administrative units.

2. Roles and Responsibilities

a. Institutions shall establish internal program review processes and procedures. Institutions shall follow their internal review processes and procedures pursuant to Board Policy Section III.H. prior to forwarding proposals to the Board.

b. Program proposals shall be reviewed by the Council on Academic Affairs and Programs (CAAP). CAAP shall make recommendations to the Instruction, Research, and Student Affairs (IRSA) committee on instructional programmatic matters and related policy issues.

c. The Idaho Division of Career Technical Education shall review and make recommendations as appropriate to the IRSA Committee and/or the Board on instructional programmatic matters and policy issues related to their roles and responsibilities. The State Administrator is authorized by the Board to approve academic and career technical microcertifications developed by institutions pursuant to the fiscal impact limits established in subsection 4.b in this policy.

d. The Professional Standards Commission shall review and make recommendations as appropriate to the Board on educator preparation programs.

3. Academic Program Proposal Submission and Approval Procedures

Subsequent to institutional review and consistent with institutional policies, all requests requiring Board or Executive Director approval will be submitted by the institution to Board staff as a proposal in accordance with a template developed by the Board's Chief Academic Officer. Each proposal shall be reviewed by CAAP within 30 days from receipt of said proposal.

a. Branch Campuses - The establishment of a new branch campus or change in location geographically apart from the main campus where the institution offers at least 50% of an education program shall require Board approval regardless of fiscal impact. This subsection of policy excludes community colleges.

b. Learning Outcomes - All postsecondary program approvals will include identifiable learning outcomes and competency measurements for graduates of their programs as defined in Board Policy III.X.

c. Academic Programs
   i. All new, modification of, and/or discontinuation of academic program majors shall require completion of the program proposal prior to implementation. This includes certificates of 30 credits or more; associates, bachelors, masters, specialist, and doctoral degrees; instructional and administrative units. Proposals requiring new state appropriations shall be submitted to the Board for review prior to or concurrently with submission of an institution's annual budget request.

      1) Any program leading to a master's, specialist, or doctoral degree must be approved by the Board prior to implementation. The Instruction, Research and Student Affairs Committee will be notified of baccalaureate degree proposals prior to implementation and may refer them to the Board for review and approval for those it determines appropriate.
      2) Prior to implementation, an institution shall obtain Board approval of any new, modification of and/or discontinuation of academic or career technical programs, including instructional and administrative units with a financial impact of $250,000 or more per fiscal year.
      3) Prior to implementation, an institution shall obtain Executive Director approval of the modification of and/or discontinuation of any academic program; new, modification of, and/or discontinuation of any career technical program; and instructional and administrative units with a financial impact of less than $250,000 per fiscal year.
      3) Pursuant to Section 33-2107A Idaho Code, community colleges shall obtain Board approval of any new applied baccalaureate program regardless of fiscal impact.
      4) Prior to implementation, an institution shall obtain Board approval of any modification and/or discontinuation of all graduate programs leading to a master's, specialist, or doctoral degree regardless of fiscal impact.
      5) The Executive Director may refer any proposal to the Board or subcommittee of the Board for review and action.

ii. Modifications to existing programs shall include, but not limed to, the following:

1) Expanding an existing program outside a designated service region.
2) Converting one program option into a stand-alone program.
3) Consolidating an existing program to create one or more new programs.
4) Adding a degree program not already approved by the Board.
5) Adding courses that represent a significant departure from existing program offerings or method of delivery from those already evaluated and approved by the Board.
6) Transitioning of existing programs to an online format.
7) Changes from clock hours to credit hours or vice-versa, or substantial increase or decrease in the length of a program or number of clock or credit hours awarded for successful completion of program.

ii. Microcertification requests requiring approval will be submitted by the institution to the Division of Career Technical Education (Division) through an approval process in accordance with a template developed by the Division staff. Each request shall be reviewed within 30 days from receipt of request. Academic microcertifications shall be reviewed by Division and Board staff.

1) Prior to implementation, an institution shall obtain State Administrator approval of any new, modification, or discontinuation of a microcertification as defined in Board Policy III.E.
2) Within a microcertification, specific information shall be contained where the microcredential was earned, the detailed criteria required to earn it, the name of the student and the program to ensure the microcredential is specific to the individual who earns it.

iv. All doctoral program proposals shall require an external peer review. The external peer-review panel shall consist of at least two (2) members and will be selected by the Board's Chief Academic Officer and the requesting institution’s Provost. Board staff will notify the institution in writing whether it may proceed with the external peer-review process. External reviewers shall not be affiliated with a public Idaho institution. The review shall consist of a paper and on-site peer review, followed by the issuance of a report and recommendations by the panel. Each institution shall provide the panel with a template developed by the Board’s Chief Academic Officer. The peer reviewer's report and recommendations will be a significant factor of the Board’s evaluation of the program.

v. New educator preparation programs require concurrent submission of the program proposal to the Board office and the Professional Standards Commission (PSC) prior to implementation. The PSC ensures programs meet the Idaho standards for certification. The Board office ensures the program proposal is consistent with the program approval process and meets the standards approved by the Board and established in rule. The PSC makes recommendations to the Board for approval of programs as vehicles for meeting the state certification requirements.

d. Academic Program Components, Program Changes, and Procedures

New, modification, and/or discontinuation of academic program components, and academic undergraduate and graduate certificates of less than thirty (30) credits may require a proposal. For academic program components or certificates requiring a proposal, subsection 3.c.i. of this policy applies.

i. New, modification, and/or discontinuation of academic program components; academic undergraduate and graduate certificates of less than thirty (30) credits and credit changes to existing programs require a formal letter notifying the Office of the State Board of Education prior to implementation of such changes. New academic certificates that require the creation of any new course(s) or resources must provide information in the letter of notification explaining how personnel and fiscal resources will be allocated or reallocated to support the delivery of the new course(s). All letters of notification for new academic certificates must provide the certificate's cost to students, and evidence of the certificate's value to students and workforce needs.

ii. Program name or title changes to degrees, departments, divisions, colleges, or centers; or changes to Classification of Instructional Programs (CIP) codes require a formal letter notifying the Office of the State Board of Education prior to implementation of such changes. Name changes for non-functional purposes are approved pursuant to Board Policy I.K. Naming/Memorializing Building and Facilities.

iii. If the change is judged to be consistent with academic program components and program changes as provided in this section, Board staff will notify the institution in writing that they may proceed with said changes. If the change is determined to be inconsistent with academic program components or the CIP code change represents a significant departure from existing offerings, Board staff will notify the institution in writing and they will be required to complete a program proposal.

iv. Changes to program names or degree titles related to Statewide Program Responsibilities as provided in Board Policy III.Z., must be requested in writing and submitted to Board staff for review and approval by the Board.
v. Minor curriculum changes in a program; descriptions of individual courses; and other routine catalog changes do not require notification or approval.

4. Career Technical Program Proposal Submission and Approval Procedures

All career technical program requests requiring Board or Executive Director approval will be submitted by the institution to the Division of Career Technical Education as a proposal in accordance with a template developed by Board staff. Each proposal shall be reviewed within 30 days from receipt of said proposal. Requests requiring new state appropriations shall be included in the annual budget request of the State Division of Career Technical Education for Board approval.

a. Learning Outcomes
All postsecondary program approvals will include identifiable learning outcomes and competency measurements for graduates of their programs as defined in Board Policy Section III.X.

b. Career Technical Programs and Components

i. All new, modification, and/or discontinuation of career technical programs and components, shall require completion of the program proposal prior to implementation. This includes instructional and administrative units. Career technical program proposals shall be forwarded to the State Administrator of the Division of Career Technical Education for review and recommendation. The State Administrator shall forward the request to CAAP for its review and recommendation. Once CAAP and/or State Administrator recommends approval, the proposal shall be forwarded, along with recommendations, to the Board for action.

1) Prior to implementation, an institution shall obtain Board approval of any new, modification, and/or discontinuation of career technical programs and components with a financial impact of $250,000 or more per fiscal year.
2) Prior to implementation, an institution shall obtain Executive Director approval of any new, modification, and/or discontinuation of career technical programs and components with a financial impact of less than $250,000 per fiscal year.

3) The Executive Director may refer any proposal to the Board for review and action.

ii. Modifications to existing programs shall include, but not be limited to, the following:
1) Expanding an existing program outside a designated service region.
2) Converting one program option into a stand-alone program.
3) Consolidating an existing program to create one or more new programs.
4) Adding a certificate or degree program not already approved by the Board.
5) Adding courses that represent a significant departure from existing program offerings or method of delivery from those already evaluated and approved by the Board.
6) Transitioning of existing programs to an online format.
7) Changes from clock hours to credit hours or vice-versa, or substantial increase or decrease in the length of a program or number of clock or credit hours awarded for successful completion of program.

iii. Microcertification requests requiring approval will be submitted by the institution to the Division of Career Technical Education through an approval process in accordance with a template developed by Division of Career Technical Education staff. Each request shall be reviewed within 30 days from receipt of request.

1) Prior to implementation, an institution shall obtain State Administrator approval of any new, modification , or discontinuation of a microcertification as defined in Board Policy III.E regardless of fiscal impact.
2) Within a microcertification, specific information shall be contained where the microcredential was earned, the detailed criteria required to earn it, the name of the student and the program to ensure the microcredential is specific to the individual who earns it.

c. Career Technical Program Notification Procedures

Program changes to existing career technical programs may require a proposal. For career technical programs requiring a proposal, subsection 4.b.i. of this policy applies.

i. Program name or title changes to degrees, departments, divisions, colleges, or centers; changes to CIP Codes; or credit changes to existing programs

require a formal letter notifying the State Administrator prior to implementation of such changes.

ii. If the change is judged to be consistent with program changes as provided in this section, the State Administrator will notify the institution in writing that they may proceed with said changes. If the change is determined to be inconsistent with definition of program components, the State Administrator will notify the institution in writing and they will be required to complete the program proposal.

iii. Minor changes to courses within a current program (e.g., course number, title, description, addition, deletion, and/or credit hours) must be submitted to the State Division of Career Technical Education.

d. Career Technical Program Inactivation

i. The purpose of a career technical program inactivation is to respond to rapid changes in industry demand, allowing time for program assessment and inactivation. If industry demand for the program does not resume within three years following the inactivation, the program shall be discontinued.

ii. Program inactivation requires a formal letter notifying the State Administrator requesting inactivation. The letter will include:

1) Description and rationale for the modification
2) Implementation date
3) Arrangement for enrolled students to complete the program in a timely manner
4) Impact of accreditation, if any
5) Impact to current employees of the program
6) Impact on current budget

iii. The State Administrator will make a recommendation in writing to the Board office. The Board office will send notification to the institution.

iv. Program re-activation requires a formal letter notifying the State Administrator requesting re-activation.

5. Sunset Clause for Program Approval

Academic and career technical education programs approved by the Board or Executive Director must be implemented within five years. A program not implemented within five years from the approval date requires submission for approval of an updated proposal. Institutions shall notify the Board office in writing when an approved program has not been officially implemented. Institutions may request a change in the sunset timeframe indicated in the program proposal if a program's implementation is delayed for any reason.

6. Academic and Career Technical Program Proposal Denial Procedures

   a. The Executive Director shall act on any request within thirty (30) days.

   b. If the Executive Director denies the proposal he/she shall provide specific reasons in writing. The institution shall have thirty (30) days in which to address the issue(s) for denial of the proposal. The Executive Director has ten (10) working days after the receipt of the institution's response to re-consider the denial. If the Executive Director denies the request after re-consideration, the institution may send its request and the supporting documents related to the denial to the Board for final reconsideration.

7. Program Discontinuance

   The primary considerations for instructional program discontinuance are whether the instructional program is an effective use of the institution's resources, no longer serves student or industry needs, or when programs no longer have sufficient students to warrant its allocation. This policy does not apply to instructional programs that are discontinued as a result of financial exigency as defined in Board Policy Section II.N.

   For career technical program discontinuance, institutions shall adhere to criteria and procedures as provided in IDAPA 55.01.02.

   a. Students - Institutions shall develop policies, in accordance with the Northwest Commission on Colleges and Universities Accreditation Handbook, which requires institutions to make appropriate arrangements for enrolled students to complete affected programs in a timely manner with minimum interruptions.

   b. Employees - Any faculty or staff members whose employment the institution seeks to terminate due to the discontinuance of a program based upon Board Policy Section III.G. shall be entitled to the following procedures:

i. Non-classified contract employees, including non-tenured faculty, may be dismissed or have their contracts terminated or non-renewed in accordance with Board and institutional policies.

ii. State of Idaho classified employees shall be subject to layoff as provided in the rules of the Division of Human Resources. Classified employees of the University of Idaho shall be subject to layoff as provided in the policies of the University of Idaho.

iii. Tenured faculty will be notified in writing that the institution intends to dismiss them as a result of program discontinuance. This notice shall be given at least twelve (12) months prior to the effective date of termination.

iv. An employee who receives a notice of termination as a result of program discontinuance is entitled to use the internal grievance procedures of the institution. The sole basis to contest a dismissal following a program closure is in compliance with these policies.

8. Reporting

a. The Office of the State Board of Education shall report biannually to the State Board of Education all program approvals and discontinuations approved by the Executive Director.

b. All baccalaureate and graduate level programs approved by the State Board of Education require a report on the program's progress in accordance with a timeframe and template developed by the Board's Chief Academic Officer.

ATTACHMENT 3

Idaho State Board of Education
GOVERNING POLICIES AND PROCEDURES
SECTION: III. POSTSECONDARY AFFAIRS
SUBSECTION: H. Program Review ~~August 2007~~August 2021

~~1. Coverage~~

~~Academic and career technical programs, administrative units, research centers/institutes, and public service components at University of Idaho, Boise State University, Idaho State University, Lewis-Clark State College, College of Eastern Idaho, College of Southern Idaho, College of Western Idaho, and North Idaho College are included in this subsection.~~

~~2. Program Review~~

~~Program review is the method by which the Board and the institutions evaluate proposed and existing postsecondary programs. The goals of program review are: (a) maintenance and enhancement of the quality of instruction, research, and public service efforts, (b) assurance of the postsecondary education system's responsiveness to changing societal and state needs, (c) promotion of effective and efficient management of the state's resources, and (d) assist the institutions in defining how effective their programs are.~~

~~In the context of program review for and by the Board, a program is a curriculum or course of study in a discipline specialty that leads to a certificate or degree. It is often but not always the same as a "major." Administrative units of research and public service are those that are: (a) essential to student training, (b) an integral part of an academic/ career technical program, (c) related to institutional role and mission, or (d) serve the consumer/state interests.~~

~~3. Purposes~~

~~Categories of academic and career technical programs reviewed at the institutional and state levels as directed by the Board include:~~

~~a. State-Level Review~~

~~1) New, expanded, and cooperative programs. (*See also* "Instructional Program Approval," Section III, Subsection G.)~~

~~2) Programs proposed for consolidation, relocation, or discontinuance.~~

~~3) Administrative units of research and public service.~~

ATTACHMENT 3

Idaho State Board of Education
GOVERNING POLICIES AND PROCEDURES
SECTION: III. POSTSECONDARY AFFAIRS
SUBSECTION: H. Program Review ~~August 2007~~August 2021

~~4) Existing programs by audit procedures and special topic reviews.~~

~~5) Distance learning/technology program delivery.~~

~~The Board will establish procedures and criteria for each audit and special topics review, which are germane to each audit and special topics review.~~

~~b. Institutional Review~~

~~The institutional reviews include all categories identified above for state-level review with the exception that the review of existing programs and administrative units of research and public service is carried out as part of the systematic evaluation of all programs within a period of time established by the Board.~~

~~4. Institutional Policies and Procedures~~

~~Each institution will establish and maintain policies and procedures, following the guidelines of the Board and subject to Board approval, for evaluating existing programs and new program proposals, as well as programs proposed for (a) expansion, (b) delivery at an off-campus site by various distance learning methods or in cooperation with another institution, a business, or an industry; (c) consolidation, (d) relocation, or (e) discontinuance. The evaluation process should be an integral component of the institution's academic and vocational education planning and budgeting processes.~~

~~5. Statewide Policies and Procedures~~

~~State-level review of new and existing programs will be integrated with the state-level academic and career technical planning and budgetary processes and where possible in concert with accreditation self-study and on site review by the accrediting body.~~

~~6. Official Vehicle for the Approval of Teacher Education Programs~~

~~The official vehicle for the approval of teacher education programs will be the National Council for Accreditation of Teacher Education (NCATE) approved Idaho Standards for the Initial Certification of Professional School Personnel. The Teacher Certification Office will provide each institution with any revisions to the Idaho Standards for the Initial Certification of Professional School Personnel. Teacher education programs must ensure their pre-service teachers meet the components~~

~~(knowledge, disposition, and performance) of the Core Teacher Education Standards and the standards of the level and/or content area(s) in which they plan to be endorsed. *(Effective Sept. 1, 2001.)*~~

BOISE STATE UNIVERSITY

SUBJECT

Institute for Advancing American Values

APPLICABLE STATUTE, RULE, OR POLICY

Idaho State Board of Education Governing Policies & Procedures, Section III.G.

BACKGROUND/DISCUSSION

Boise State University proposes the creation of a new Institute for Advancing American Values. The Institute will encourage conversation between opposing viewpoints to spur engagement, understanding, and human connection. Institute activities will include: public events to encourage dialogue about central issues facing Idaho and the nation, research and projects that approach complex and contested issues through the prism of American values and evidenced-based research, and education programming supporting the development of new courses across the disciplines that chart how the values of freedom and opportunity have shaped the triumphs and challenges of American life and history. Through these commitments, the Institute will inspire people to talk and listen to each other respectfully about the issues and values that have shaped America and Americans from all walks of life.

Specifically, The Institute for Advancing American Values will provide three levels of programming and output:

Dialogue: Public lectures, panel discussions, and storytelling aimed at the free expression of a variety of ideas and orientations toward the world.

- Idaho Listens and Community Fellows: signature events each year featuring nothing more and nothing less than uninterrupted listening to the stories of people who live the realities of today's central economic, political, racial, and cultural issues.
- Distinguished Lecture Series: the premier Boise State lecture series, which has brought speakers representing various perspectives and ideas.
- Annual Summit: gathers the Institute's fellows, grantees, alumni, and keynote speakers to present research and perspective on the best of conservative, libertarian, and liberal perspectives and thought on issues of political, economic, and social importance.
- Conviction and Conversation Series: this presidential initiative features forums where challenging issues can be discussed and where differing viewpoints are welcome.

Research: supports scholars and projects that approach complex and contested issues through the prism of American values and evidenced-based research.

- Anchors this work by supporting Boise State faculty whose work is steeped in enduring political, economic, and social ideas and their relevance for contemporary life.
- Post-Doctoral Fellows program brings newly graduated scholars for two-year appointments to energize the institute with fresh, cutting-edge research likewise steeped in enduring values and their relevance for contemporary life.
- Grants: Supports Boise State, national, and international scholars with mini-grants to support projects advancing the mission of the institute.
- Undergraduate Fellows (3-6): mentored by institute scholars, these undergraduate students participate in institute activities and seminars and undertake a thesis or project tied to the institute's mission.

Education:

- Boise State University curriculum initiative: supports courses in history, political science, economics, and others that chart how different schools of thought and the values of freedom and opportunity have impacted American life.
- Collaborations with local and national foundations representing conservative, libertarian, and liberal thought and programming.
- Summer high school programming: to create a summer study experience for high school students to engage an intensive curriculum focused on classical American political philosophy.

IMPACT

Owing to the division of our contemporary moment, there are growing calls both internally and externally for universities to renew their commitment to balanced, fair learning environments that respect different viewpoints. This inflection point calls for urgent action to bring Americans together through honoring difference, encouraging dialogue, and promoting mutual understanding even if disagreement continues. Boise State has heard those calls from its students, faculty, alumni, donors, and from leaders in the state and thus wishes to launch the new institute to address these issues in a fair and balanced way.

The financial impact is $228,550 - $773,709 over a four-year period. Initial funding for launching the Institute will come from university funds in the amount of $130,000 (this amount includes $50,000 new university investment and $80,000 of dedicated funds for the ongoing support of the Distinguished Lecture Series). The Idaho Listens initiative within the Institute is intended to be funded by an annual $100,000 gift for up to ten years. President Tromp and University Advancement have identified this as a top fundraising goal for the university.

The Institute will be led by an executive director and eventually supported by an administrative assistant. The budget also scales over time to include course buyouts for Boise State faculty fellows, funds for post-doctoral appointments, and

eventually support for two joint faculty appointments. Initially, the executive director position will report to both the president and provost of Boise State University.

ATTACHMENTS

Attachment 1 – Institute for Advancing American Values Proposal

BOARD STAFF COMMENTS AND RECOMMENDATIONS

As provided in the program proposal, the proposed institute aims to support and encourage conversation between opposing viewpoints and honor differences and promote mutual understanding. The new institute will be under the Office of the President and report to the president and the provost of Boise State University. While the institute is not intending to offer degree programs or courses, it is intended to serve as a resource and support for the development of new courses across disciplines. The institute plans to establish an external advisory council that will focus on university-community relations and an internal faculty-staff advisory council to support its research and curriculum development programs.

Per Boise State's proposal, there are no plans for a stand-alone facility at this time. The institute will gradually scale operations in the first two-years to provide time for fundraising. Should those not materialize, Boise State indicates that the $100,000 annual gift provides sufficient funding to maintain the Institute's work as a university initiative focused on the Idaho Listens project. The university also indicates there are plans to scale the institute in the future; however, those will be contingent upon successful fundraising initiatives.

The proposal was presented to the Council on Academic Affairs and Programs on June 10, 2021 and to the Instruction, Research, and Student Affairs committee on August 13, 2021. Staff notes that the fiscal impact for the proposed institute surpasses the threshold for executive director approval and is being forwarded to the Board for its consideration consistent with Board Policy III.G.

Board staff recommends approval.

BOARD ACTION

I move to approve the request by Boise State University to create an Institute for Advancing American Values.

Moved by _____ Seconded by _____ Carried Yes _____ No _____

President	Date	SBOE/Executive Director Approval	Date

1. What are the goals and objectives for the new unit?

   The Institute for the Advancement of American Values encourages conversation between opposing viewpoints to spur engagement, understanding, and human connection. Institute activities will include: public events to encourage **dialogue** about central issues facing Idaho and the nation, **research** and projects that approach complex and contested issues through the prism of American values and evidenced-based research, and **education** programming supporting the development of new courses across the disciplines that chart how the values of freedom and opportunity have shaped the triumphs and challenges of American life and history. Through these commitments, the Institute inspires us to talk and listen to each other respectfully about the issues and values that have shaped America and Americans from all walks of life.

   At the outset, the Institute will be focused on the "dialogue" portion of its mission through a signature, privately funded program called "Idaho Listens" and by leveraging the existing Distinguished Lecture Series at Boise State. Idaho Listens aims to bring to together speakers representing different values and perspectives for uninterrupted speaking to a university and community audiences. Its objective, in short, is to talk openly about differences of viewpoint. It provides dedicated "airtime" to the balanced and fair exploration of the variety of political, economic, and social ideas that shape American life. The Distinguished Lecture Series, a longtime public service to the Treasure Valley, will be redeployed through the Institute. It will continue its tradition of bringing eminent speakers to campus to address a range of issues from different perspectives.

2. What is the relationship of the unit to the university's mission and priorities? Is the unit involved in instruction and if so, to what extent?

   The Institute's mission drives to the heart of Boise State's mission to educate students and serve the community through thoughtful, balanced instruction and research dedicated to improving the critical thinking skills and breadth of knowledge of our students. It also supports Boise State's next strategic plan, including the goal "Foster Thriving Community." The Institute is not a degree-granting entity and consequently courses will not be taught through the institute. Rather the institute may sponsor course development for faculty who nevertheless teach courses in their home departments.

3. What is the demand for the unit's services? What population will the unit serve?

   Owing to the division of our contemporary moment, there are growing calls both internally and externally for universities to renew their commitment to balanced, fair learning environments that respect different viewpoints. This inflection point calls for urgent action to bring Americans together through honoring difference, encouraging dialogue, and promoting mutual understanding even if disagreement continues. Boise State has heard those calls from its students, faculty, alumni, donors, and from leaders in the state. In fact, a donor has pledged $100,000 per year funding (up to ten years) to launch a cornerstone program of the Institute called "Idaho Listens," a project to encourage listening across different viewpoints. The Institute will serve each of those constituencies through the activities outlined in question #1—dialogue, research, and education.

4. Describe the proposed unit's organizational structure.

The Institute will be led by an Executive Director and eventually supported by an administrative assistant. The budget also scales over time to include course buyouts for Boise State faculty fellows, funds for post-doctoral appointments, and eventually support for two joint faculty appointments. Initially, the Executive Director position will report to both the president and provost of Boise State University.

5. What targets have been set to assess the proposed unit's success in achieving objectives?

   To ensure success, the institute will form both an external advisory council focused on university-community relations and an internal faculty-staff advisory council to support its research and curriculum development programs.

   Targets:
   - Course enrollment and student satisfaction in institute-sponsored classes
   - Attendance and participant satisfaction at public events
   - Number of institute-sponsored faculty presentations and publications
   - Partnerships with external agencies that promote balanced discussion and activities of enduring ideas and their relevance to contemporary life
   - Recognized as a leader within the Treasure Valley and the state for listening respectfully to voices from a cross-section of Idaho.

6. Briefly describe the processes that will demonstrate the quality of the unit.

   Quality measures are indicated in question #5. The quality of the institute will be a function of the clarity of its mission and the transparency of its interest in cultivating communities dedicated to the balanced discussion of values both on and off campus. That cultural quality will depend on the excellence of the people—their integrity, convictions, and openness—it gathers for its advisory committees. At this writing, there has been a groundswell of interest from business, political, and community leaders alongside the interest of faculty and staff. We are thus confident in our ability to form this institute with support from people of good will who want to honor differences, listening, and a balanced "marketplace of ideas."

7. Indicate the number of students, businesses, industries, and/or other clients to be served by this unit. Include a description of faculty participation and student involvement in the unit if applicable.

   The Institute would engage any number of students, community members, and possible business sponsors. At minimum, the institute would serve hundreds of students through its public events and curriculum development—not curriculum delivery—efforts. Public lectures and dialogues would reach hundreds from the Treasure Valley, especially through the existing Distinguished Lecture Speaker series, which will be folded into the Institute. Faculty fellows and research grants would support research and projects designed to reach both a public and scholarly audience.

   Specifically, The Institute for the Advancement of American Values provides three levels of programming and output:

1) **Dialogue**: Public lectures, panel discussions, and storytelling aimed at the free expression of a variety of ideas and orientations toward the world.
   - Idaho Listens and Community Fellows: signature events each year featuring nothing more and nothing less than uninterrupted listening to the stories of people who live the realities of today's central economic, political, racial, and cultural issues. The events

will gather speakers of good will from a cross-section of occupations, experiences, and perspectives who offer a chance for humane listening to very human stories.
- Distinguished Lecture Series: the premier Boise State lecture series, which has brought speakers representing various perspectives and ideas.
- Annual summit: gathers the Institute's fellows, grantees, alumni, and keynote speakers to present research and perspective on the best of conservative, libertarian, and liberal perspectives and thought on issues of political, economic, and social importance.
- Conviction and Conversation Series: this presidential initiative features forums where challenging issues can be discussed and where differing viewpoints are welcome.

2) **Research**: supports scholars and projects that approach complex and contested issues through the prism of American values and evidenced-based research.
   - Anchors this work by supporting Boise State faculty whose work is steeped in enduring political, economic, and social ideas and their relevance for contemporary life.
   - Post-Doctoral Fellows program brings newly graduated scholars for two-year appointments to energize the institute with fresh, cutting-edge research likewise steeped in enduring values and their relevance for contemporary life.
   - Grants: Supports Boise State, national, and international scholars with mini-grants to support projects advancing the mission of the institute.
   - Idaho Policy Institute (IPI) Partnership: leverages the expertise of IPI to co-sponsor non-partisan research in service of state and local government leaders.
   - Undergraduate Fellows (3-6): mentored by institute scholars, these undergraduate students participate in institute activities and seminars and undertake a thesis or project tied to the institute's mission.

3) **Education**:
   - Boise State University curriculum initiative: supports courses in history, political science, economics, and others that chart how different schools of thought and the values of freedom and opportunity have impacted American life.
   - Collaborations with local and national foundations representing conservative, libertarian, and liberal thought and programming.
   - Summer high school programming: to create a summer study experience for high school students to engage an intensive curriculum focused on classical American political philosophy.

8. Fiscal Impact: Using the budget template, provide a narrative budget summarizing the needs and requirements for implementing the new unit.

   Initial funding for launching the Institute will come from university funds in the amount of $130,000 (this amount includes $50,000 new university investment and $80,000 of dedicated funds for the ongoing support of the Distinguished Lecture Series). The Idaho Listens initiative within the Institute is intended to be funded by an annual $100,000 gift for up to ten years. President Tromp and University Advancement have identified this as a top fundraising goal for the university.

   That initial funding will successfully launch the Institute owing to the fact that it will incur few costs. In the first two years, the Institute will have the benefit of utilizing an internal inaugural executive director focused on the Idaho Listens initiative while also leveraging existing administrative and professional staff support, which will keep salary and benefits costs low. Initial programming costs will be covered by the Idaho Listens grant of $1 million over ten years and the new and existing institutional funding of at least $130,000 per year. There are no plans for a stand-alone facility. In sum, the Institute slowly scales operations in the first two-years to ensure time to raise funds for its more mature expression and programming. Should those funds not materialize, the annual gift of

$100,000 provides sufficient funding to maintain the Institute's work as a university initiative focused on the Idaho Listens project.

Still, there are plans to scale the Institute, but they are contingent upon successful fundraising initiatives. For example, on April 23, 2021, university officials met with the leadership of the Micron Foundation, and there is interest for continuing that conversation.

I. PLANNED STUDENT ENROLLMENT

II.2	Includes $80,000 per year of funds for the Distinguished Lecture Series
II.A.6	Gifts of at least $100,000 per year (for 10 years) is already committed and more will be sought.
III.A.2	Two faculty lines added year four
III.A.4	One GA line in year one
III.A.5	One post-doc year two, two post-docs subsequent years
III.A.6	Faculty fellows provided $5k course buyout each semester; student fellows and community fellows provided stipend each year
III.B.8	Faculty fellows provided research funds

SUBJECT

Program Prioritization Five-Year Reports

REFERENCE

May 2013	The Board directed institutions to institute a prioritization of programs process consistent with Robert Dickeson's prioritization principles[1].
June 2013	The Board approved the program prioritization proposals for Idaho State University (ISU), Boise State University (BSU) and University of Idaho (UI) as presented.
August 2013	The Board approved the program prioritization proposal for Lewis-Clark State College as presented.
October 2013	The Board was presented with an update on program prioritization.
August 2014	The Board was presented with the results of program prioritization and reminded institutions that program prioritization needed to be integrated into their budgeting and planning practices.
June 2015	The Board was presented with an update on the implementation of program prioritization.
August 2016	The Board was presented with an update on the implementation of program prioritization.
December 2018	The Board was presented with an update on the implementation of program prioritization.
October 2019	The Board approved a second reading of a new policy, Board Policy III.F., governing the Program Prioritization process.
October 2020	Board received an update on LCSC's Program Prioritization efforts as part of the LCSC's annual report.
December 2020	The Board approved the first reading of Board Policy III.F., Program Prioritization, removing requirement for non-instructional programs to be placed in quintiles.
February 2021	The Board approved a second reading of amendments to Board Policy III.F. Program Prioritization clarifying that only instructional programs must be included in the quintile prioritization approach.
April 2021	Board received an update on UI's Program Prioritization efforts as part of the UI's annual report

APPLICABLE STATUTES, RULE OR POLICY

Idaho State Board of Education Governing Policies & Procedures, Section III.F.

[1] *Prioritizing Academic Programs and Services: Reallocating Resources to Achieve Strategic Balance* (Jossey-Bass, 2nd ed; 2010).

Program Prioritization

BACKGROUND/DISCUSSION

At the Board's May 2013 retreat Dr. Robert Dickeson, author of *Prioritizing Academic Programs and Services: Reallocating Resources to Achieve Strategic Balance*, facilitated a discussion on setting priorities for the Idaho higher education system. Dr. Dickeson walked the Board through the process of planning and structuring a program prioritization effort. As a result, the Board directed institutions to institute a prioritization of programs process consistent with Dickeson's prioritization principles.

The Board, with input from several institution presidents and provosts, agreed to a framework for initiating program prioritization on each of the campuses to include proposed outcomes and targets for each outcome. Institutions subsequently developed proposed criteria to be used to evaluate programs and the weighting for their criteria. Institutions presented their proposals for initiating a program prioritization process to the Board in June and August of 2013.

Board Policy III.F., adopted in 2019, requires institutions to conduct Program Prioritization every five years and present final results of these evaluations to the Board. The Policy also requires institutions to provide annual program prioritization updates describing progress achieved toward implementing findings and recommendations.

IMPACT

Program prioritization requires the institutions to conduct an evaluation of programs and services with specific and tangible objectives, and with a focus on specific evaluation criteria rather than generalized across-the-board cuts. Implementation of program prioritization based on Dickeson's framework provides the Board with assurances of consistency and presents the institutions with a unique opportunity to evaluate old paradigms that may no longer make sense, with a specific focus on their Mission, Core Themes and Strategic Plans.

Attachment 2 – Idaho State University 2021 Program Prioritization Report
Attachment 3 – Lewis-Clark State College 2021 Program Prioritization Report
Attachment 4 – University of Idaho 2021 Program Prioritization Report

BOARD STAFF COMMENTS AND RECOMMENDATIONS

Following initial submission of Program Prioritization reports in 2014, the institutions provided updates to the Board at regular intervals. Institutions conducted their second Program Prioritization evaluations during Academic Year 2020-2021 and submitted final written reports to the Board ahead of the August 2021 Board meeting. Each president will provide an oral report of their institution's Program Prioritization reports during their respective annual reports to the Board

in August (ISU), October (LCSC), February (BSU), and April (UI).

Executive Summary:

Between July 2020 and June 2021, under the direction and guidance of Idaho State Board of Education Policy III.F: Program Prioritization, Boise State University engaged in a program prioritization using methodology modified from that of the primary proponent of the process, Robert Dickeson, and following steps similar to the 2013-14 Program Prioritization process conducted at Boise State University. The primary goal of Program Prioritization, as outlined by Dickeson, is to increase alignment of resources with institutional priorities. In addition,the University and the Board Policy established the additional goal of campus-wide program improvement, and plan to incorporate the prioritization activities into a sustainable continuous improvement process on campus.

With Program Prioritization, all programs were evaluated at the same time. We identified a total of 604 programs at the university: 204 degree and graduate certificate programs, 236 minors, emphases (also known as options or subplans) and undergraduate certificates, and 164 administrative and support programs. Nine degree programs and 19 minors or emphases in secondary education areas were excluded from evaluation. Unlike the 2013-14 Program Prioritization process, we did not exclude the new instructional programs from the analysis. Of the 440 total number of instructional programs evaluated, 74 (19%) were placed in the fifth quintile and 79 (20%) were placed in the fourth quintile. All fourth and fifth quintile programs that are not new were required to submit an action plan and to describe substantive changes they plan to make.

Our process was open and participatory. However, it is important to note that our process was situated in the context of the global pandemic, with concerns about health and safety at the forefront, during a year that was active in planning and nimbleness, and without compromising quality of learning or the centrality of students and their experiences. A Coordinating Committee facilitated the process and communicated regularly with academic and divisional leaders. Each division oversaw and carried out the process in the programs within that division, under the guidance of the principles and framework established by the Coordinating Committee. Academic departments, academic leaders, and the faculty senate were involved in the development and determination of metrics used to evaluate instructional programs. Numerous presentations were made to keep the campus community informed during the process; a Google drive with all program prioritization related communication and materials was maintained for the use of academic leaders.

Our process was logical and sensible. When evaluating and making decisions about programs, we paid attention to the context of the university. We incorporated initiatives already underway to ensure alignment of those initiatives with any new actions. We utilized the same criteria established in 2013-14 Program Prioritization for continuity and consistency. The criteria — relevance, quality, productivity, efficiency, and opportunity analysis — guided the evaluation of programs in a relatively simple and straightforward way, and provided substantial utility in their application. The metrics under each criterion were updated and changed as appropriate, based on feedback received. We were careful in our interpretation and the

application to decision-making of the metrics used in the process. Finally, although programs assigned to the lowest two quintiles are required to make substantial changes, it was often the programs themselves that had the responsibility to determine the best way to meet outcomes.

Our process was comprehensive. Every effort was made to ensure that all university programs were evaluated.

Our process was rigorous and impactful. Underlying that rigor was the understanding that without it, the process would have little external or internal credibility.

Our process is sustainable. We are integrating Program Prioritization with our new strategic plan, *Blueprint for Success*, and with regional accreditation, which requires that we create an ongoing, systematic structure for measurement of institutional and unit-level effectiveness.

Results of the 2020-21 Program Prioritization pertaining to instructional programs and academic departments can be summarized as follows:

- Of the 440 evaluated instructional programs, 153 received assignments in the fourth or fifth quintile (79 in the fourth and 74 in the fifth quintile). Forty-four instructional programs were not assigned to a quintile because of missing or insufficient data; all of these programs are new.
- Placement in the fourth or fifth quintile triggered a requirement for the program to submit an action plan, for those programs that are not new. Ninety-four of the 153 instructional programs in the fourth and fifth quintiles are not new and, thus, were required to submit the Action Plan report.
- Among the criteria responsible for an *instructional degree program* being assigned to the fifth or fourth quintile, the most common deficiency was productivity, typically resulting from a low number of graduates.
- Twenty of the programs assigned to the fifth quintile are degree programs and graduate certificates; these programs must make substantial changes to increase their productivity, relevance, quality and/or efficiency or be considered for discontinuation. All such programs, if they are not new, were required to submit an action plan.
- Fifty-four of the programs assigned to the fifth quintile are undergraduate minors, emphases, and certificates; these programs must make substantial changes to increase their productivity, relevance, quality and/or efficiency or be considered for discontinuation. All such programs, if they are not new, were required to submit an action plan.
- By June 1, 2021, 22 instructional programs were either discontinued in academic year 2020-21 or are identified for discontinuation in fall 2021.

The following is a selection of notable outcomes from the evaluation of administrative and support programs:

- There has been significant structural and organizational changes in the University since the 2013-14 Program Prioritization process. Notable examples include:

- creation of a new Division, initially known as Division of Compliance, Legal, Public Health and Audit, which became the Division of University Affairs in March 2021.
- Campus Operations, which previously was a standalone division, was merged with the Division of Finance and Administration to simplify structure, better align functional priorities, and create greater synergy among operations, facilities, finance and administrative teams. As part of this change, the Office of Public Safety, including Campus Security, Transportation and Parking, Emergency Management and Integrated Security Technology, moved to the newly named Division of University Affairs.
- The Office of the President and programs that report to it were substantially revised and reconfigured since the last program prioritization. These changes include:
  - Moving Morrison Center and Extra Mile Arena to the Division of Finance and Administration.
  - Moving Boise State Public Radio to Extended Studies.
  - Transfer of university policy management from the President's Office to the General Counsel's office to create synergy with functions already assigned to the General Counsel's office related to policy interpretation and compliance.
- Restructure and redesign the Office of Communications and Marketing to enhance the quality and productivity.
- Moved University Health Services from the Division of Student Affairs and Enrollment Management to the College of Health Sciences, in order to align with the college's academic programs and create teaching and research opportunities.
- Added Advancement Services Department to provide strategic leadership for University Advancement and the Boise State University Foundation's infrastructure.
- Creation of the Office of Academic Leadership and Faculty Development in the Provost's Office to support Department Chairs and other academic leaders.

- Many programs have strong interdependence with programs in other divisions/colleges/departments. Cross-college or cross-divisional initiatives and processes are challenging and require substantial collaboration among individuals that do not share reporting lines.
- A number of very strong cross-dependencies exist between programs in the Division of Student Affairs and Enrollment Management and those in the Division of Academic Affairs. In a number of cases, effectiveness of programs will depend on the strength of collaborative relationships.
- The most critical improvements needed in retention are with our Idaho, underrepresented, first-generation commuter students. Restructuring and expanding a first-year experience program will accomplish part of this.
- The most critical improvements needed related to post-graduate outcomes include

stronger data support infrastructure, coordinated and aligned experiential education opportunities, and embedded career education into the classroom. All these areas are included in and aligned with the new university strategic plan.

- Continued focus on modernizing systems and process improvements is needed.

Introduction

Objectives of the Process

At the onset of Program Prioritization, we established these objectives to guide our work. These objectives largely follow those objectives that were established during the 2013-14 Program Prioritization process, and were rethought/revised/updated in 20-21 based on the discussions with academic leaders and the work of the Program Prioritization Coordinating Committee.

Objective #1: Engage in a process of sufficient rigor and impact to help academic leaders make informed decisions and create meaningful changes at the University. The University does not want Program Prioritization to be a flurry of activity with no measurable impact. Instead, it is important that we achieve meaningful changes that include: (i) reallocation of resources to better align them with institutional priorities; (ii) substantial improvements and continuous improvement processes / plans in academic and administrative/support programs; and (iii) satisfy the requirements of Idaho State Board of Education Policy III.F Program Prioritization.

Objective #2: Use a process that is consistent, fair, open and well-communicated. It is important that the process involves the campus community, be applied in a fair and consistent manner, and be well-understood / transparent to stakeholders.

Objective #3: Pay attention to the context of the university. Boise State is a relatively young institution that provides the bulk of university programming to a growing metropolitan area. Several mission-central and high-demand programs are in start-up or early-growth mode. The University has recently adopted a new strategic plan, and program prioritization objectives need to align well with the goals of the new strategic plan.

Objective #4: Look beyond changes to individual programs. Program Prioritization is by its nature focused on individual "programs" and not on the University as a whole. That said, we were fully aware that evaluation of individual programs would lead to a number of broad-scale changes that impact multiple programs and require changes to organizational structure. As we continue our analysis and planning on a university-wide scale, we will make use of our newly acquired knowledge of individual programs as a foundation for future change.

Objective #5: Pay attention to initiatives already underway. Initiatives from the new strategic plan and other major initiatives that are already underway, such as the HCM Project and the shift to Canvas from Blackboard as the new Learning Management System, have major impacts on campus community, and are making substantial changes to system infrastructure. Any actions resulting from Program Prioritization must be aligned with such initiatives.

Objective #6: Sustain the value of Program Prioritization. To gain the most value from Program Prioritization it is important that the process is integrated into several ongoing planning and continuous improvement activities as well as the new strategic planning reporting and budget request processes. The process will: (i) provide an opportunity to refine, and in some cases newly identify, enduring metrics that meaningfully evaluate unit-level effectiveness; (ii) strengthen already-existing improvement processes and identify where new processes are

necessary; (iii) align and be incorporated into our strategic plan's new initiatives and reporting processes; and (iv) mesh well with regional accreditation, NWCCU, 2020 standards.

Administration of and Participation in the Process

The Executive Team provided oversight to the process. They convened a central committee, Program Prioritization Coordinating Committee, with representatives from most divisions to provide coordination and alignment of processes across the university. Two resultant subcommittees coordinated the processes for prioritization of academic programs and administrative and support programs. In both cases, existing structures were leveraged as much as possible to ensure widespread participation.

For academic program prioritization, regular discussions and dissemination of information occurred at weekly Dean's Council meetings and biweekly meetings of academic leaders (department chairs, program directors, deans). Additional presentations and discussions were held with the executive committee, at college-level meetings, with faculty governance, and by request. The subcommittee also hosted regular office hours that were open to academic leaders and faculty.

The subcommittee for administrative and support programs developed an overarching structure and standardized materials that were used across the divisions. Each division, however, was responsible for identifying programs and determining division-specific implementation.

Both subcommittees drew from and improved upon the processes used for the 2013-14 program prioritization. The Methodology section that follows provides additional details about both facets of the process.

Methodology

Delineation of "Programs"

"Programs" to be evaluated were first delineated within each division, excluding any that had been already discontinued or suspended. A total of **604 programs** were identified.

Academic programs were delineated at two levels: (a) minors, emphases (also known as options or subplans), and undergraduate certificates and (b) instructional degree programs, including graduate certificate programs. To define degree programs, we applied the core principle that a program is defined by the existence of a distinct curriculum. Academic programs that share 85% or more of the same curriculum were rolled together for analysis; most of these are programs that offer more than one type of degree (e.g., BA and BS, MA and MS, etc.) of the same core program or that have an associated pre-professional program. Programs offered both face-to-face and online were treated as separate programs. Table I summarizes the numbers of various types of instructional programs.

Table I. Instructional Programs	Minors, emphases, and undergraduate certificates	236 programs
	Instructional degree programs (bachelor's and above, including graduate certificate programs)	204 programs

Administrative and Support Programs consist of all programs at the university that are not instructional programs. Delineation was done within each division and typically involved substantial discussion to achieve the appropriate scale of analysis for each program. The Program Prioritization Coordinating Committee provided the following principle to each Division: "Programs" within administrative and support areas need to be defined minimally at the level of a department or unit. Divisions could further divide large or complex administrative units into functional subunits at the level of granularity that is most useful to the Vice President of the respective division. Table II summarizes the numbers of programs in each division.

Table II. Administrative and Support Programs	Division of Academic Affairs	24 programs
	- Centers/Institutes/College-based Administrative & Support	33 programs
	Division of Finance and Administration	31 programs
	Division of Research and Economic Development	7 programs
	Division of Student Affairs and Enrollment Management	28 programs
	Division of University Advancement	10 programs
	Division of University Affairs	16 programs
	President's Office	15 programs

Exclusions from the Process

The following programs were either excluded from Program Prioritization or were evaluated using a modified process.

- Nine degree programs and 19 minors or emphases in secondary education areas were excluded from the analysis. These programs generally do not require separately dedicated resources and will be evaluated jointly by the subject area departments and the College of Education. Evaluation of these programs will be completed and action plans developed by May 15, 2022.
- Associates degree programs were not evaluated because their discontinuance would have no effect on resources.
- Unlike the 2013-14 prioritization, new instructional programs were not excluded from the review process so the data could be reviewed concurrently with all other programs. New programs that fell into lower quintiles were, however, excluded from the action plan requirement because they will be subject to the five-year review on the appropriate cycle.
- We used a "combination approach" to evaluate Centers and Institutes: Centers and Institutes are evaluated within the academic colleges with which they are associated during the 2020-21 Program Prioritization process, and through the regular, three-year cycle review as required by the University Policy 5000, Centers and Institutes. The Council of University Centers and Institutes reviewed the existing Centers and Institutes at Boise State University and submitted a report in January 2020. "New" Centers and Institutes (those that were created during 2019- 21) were excluded from the process since they did not yet have the necessary data to be evaluated at this time.

Criteria Used to Guide Evaluation of Programs

Consistent with our 2013-14 program prioritization process, we used five criteria (distilled from the ten presented in Dickeson's model) to guide a robust evaluation of academic and administrative and support programs. These criteria -- relevance, quality, productivity, efficiency, and opportunity analysis -- were applied using quantitative and qualitative data as described in the subsequent sections.

- **Relevance**: Alignment with university mission and strategic plan; essentiality to core functions of the university; demand for program or service; alignment of service with needs.
- **Quality**: Evidence of success in achieving goals; evidence of assessment and improvement; distinctiveness and reputational impact.
- **Productivity**: Output or production per investment of time or resources.
- **Efficiency**: The operational effectiveness of the program. For example, a key component of efficiency for an instructional program is the ability of students to progress toward a degree in a timely manner.

- **Opportunity Analysis**: A description of enhancements that can be made to address unmet needs and/or advance the goals and mission as articulated in University's new strategic plan.

Data, Metrics, and Evaluation of Academic (Instructional) Programs

Minors, emphases, and undergraduate certificates

Minors, emphases, and undergraduate certificates were evaluated based primarily on the criterion of productivity and secondarily on relevance since metrics at these subplan levels were mostly limited to these two criteria. Data on the numbers of graduates were provided centrally, additional information was collected from the individual programs through an intake survey, and overall percentiles were determined from a productivity metric calculated from a combination of data from the two. Each of these is described below.

Metric. The three-year average of distinct graduates was calculated first, and programs with low numbers of graduates were ***flagged*** if they did not meet established thresholds. The thresholds were three for graduate level emphases and five for undergraduate minors, emphases, and certificates. (These were consistent with the 2013-14 methodology.) Flagged programs were required to respond to additional questions in the intake survey described below.

Intake Survey. The Intake Survey for minors, emphases, and undergraduate certificates was used to gather the following information.

- Specific curricular requirements that fall outside required courses for the major(s) in the department.
- Additional resources requirements from the department: additional sections of required courses, additional or specialized advising, additional faculty/instructional resources, or other resources or costs (e.g., administrative resources, staff time or stipends, materials, etc.).
- Context or description of any additional curricular or resource requirements.
- Information about program relevance in meeting the needs of students, the community, industry, discipline, etc. (required if additional resources were stipulated).
- Recommended next steps for New or Flagged programs (discontinue/phase out; restructure, reinvent, or revise significantly; keep as is or make minor changes) along with the rationale for the recommendation.
- Comments or additional information about the program (optional response).

Information from the Intake Survey was provided to the responsible dean and the provost to inform their decision making efforts regarding final quintile placement.

Calculating Quintiles. A resources score was calculated based on information from the intake survey. The score ranged from 0 to 7 points and was based on the number of courses required that fall outside of regular course offerings (0 to 3) plus one point for every additional required resource (0 to 4 points). A score of zero means that no additional resources are

required (i.e., the program exists as a subset of existing offerings) whereas a score of 7 indicates that substantial resources outside of normal activities are required to offer the program Finally, a ratio of graduates to resources was calculated by dividing the average number of graduates by the resource score, and this score was used to calculate percentiles across all minors, emphases, options, and undergraduate certificates.

Instructional Degree and Graduate Certificate Programs

Instructional degree programs were also evaluated using a combination of quantitative data provided centrally and qualitative data gathered through an intake survey. Descriptions of the metrics, quintile calculations, and intake survey are provided below.

***Metrics*.** A majority of the metrics used are routinely tracked and reported on, such that substantial revision to the 2013-14 program prioritization metrics was not needed. However, a few updates to the metrics were made based on improvements to underlying data or methodology and input from academic leaders received during the process. The set of metrics used to evaluate degree programs and graduate certificates is summarized in Table III and detailed descriptions are provided in the Appendix.

Table III. Metrics for Instructional Degree Programs (degrees and graduate certificates)

Criterion	Metric
Relevance	3-year average junior-senior headcount enrollment (for undergraduate programs)[a]
	3-year average graduate headcount enrollment (for graduate programs)[a]
	Graduating Student Survey - preparation for work[b]
	3-year average student credit hours (by subject) per total instructional FTE[b,c]
Quality	Program Learning Outcomes and Actions Taken/Planned (programmatic, curricular, pedagogical) rubric scores[a]
	Graduating Student Survey – perceptions of faculty[b]
	Graduating Student Survey - satisfaction with major[b]
Productivity	3-year average number of graduates[a]
	Flagged # of graduates[a] (not used in the calculations but provided as an indicator)
	Graduates per occupied benefitted instructional FTE (for undergraduate programs)[c,d]
	Graduates per tenured or tenure track faculty FTE (for graduate programs)[a]
	Weighted degree graduates per $100k instructional cost[b]
Efficiency	3-year average baccalaureate graduates per junior-senior FTE[a]
	3-year average graduate degree or certificate completers per graduate FTE[a]
	3-year average credits at graduation (baccalaureate non-transfer students only)[a]
	3-year average graduate student success rate[c,d]
	Direct instructional cost per student credit hour (SCH) as a % of peers (using Delaware Cost Study peer data; see description below)[b]

[a]Program-level measure; [b]Department-level measure;[c] New measure for '20-21; [d]Combination program/department-level

Quantitative and student survey data for instructional programs was analyzed and provided centrally by the University's Office of Institutional Research. Direct instructional cost per student credit hour was benchmarked through The Cost Study at the University of Delaware using a data-informed approach to discipline peer analysis, the description for which can be found in the detailed definitions in the Appendix. While a majority of the metrics were calculated at the level of the individual program, some of them (e.g., survey data, Cost Study data) were calculated at the department level. In those instances, all programs within a department and within a given level where available received the same score for those metrics.

Additionally, instructional degree programs were flagged if their three-year average number of graduates was below a specified threshold: fewer than 10 for baccalaureate degrees; fewer than five for master's degrees, graduate certificates, and education specialist programs; and fewer than two for doctoral programs.

Calculating Quintiles. Using the data for each metric, percentiles were calculated within the degree program level (e.g., bachelor's against bachelor's, master's against other master's program, etc.). For metrics at the department level, the percentiles were calculated against all other departments at the university.

Percentiles for each metric within each criterion were averaged to obtain the average criterion score. The four criterion scores were then used to compute a single weighted average score with the following weights applied: relevance 25%; quality 20%; productivity 27.5%; and efficiency 27.5%. The weighted average score was used to calculate first-pass percentiles and quintiles within each of the colleges; which provided a rough-cut of quintiles for consideration by the dean, with the lowest 20% being in the lowest (or 5th) quintile, the next 20% being in the fourth quintile, and so on.

Intake Survey. The Intake Survey for instructional degree programs was used to gather the following information.

- Programmatic context: recent changes that may impact outcomes but not yet have measurable results.
- Contributions to the goals and mission as articulated in the University's new strategic plan.
- Changes that could be made to increase the impact of the program (optional response).

Information from the Intake Survey was provided to the dean and provost to inform their decision-making efforts regarding final quintile placement.

Establishing Final Prioritization / Quintiles

In addition to the initial categorization (quintiles) of programs within the two categories of academic programs (minors, emphases, and undergraduate certificates and instructional degree programs), a combined (or full) results percentile was calculated using the raw scores across programs of all types. A "full results" percentile was calculated for the programs within each college. Deans and the provost were then provided with the results of the three analyses

— within instructional program; within minors, emphases, and undergraduate certificates; and across all program types (i.e., "full results").

Further, the following guidelines and principles were applied across all colleges in determining final prioritization / quintiles.

- Deans were asked to start with the "first-pass" quintiles; they had the latitude to use either 'within program' or 'across program' data as their primary starting point.
- Deans could consider the above information as well as qualitative information gleaned from the intake surveys and other relevant data (such as trends as presented in the biannual Department Analytics Report).
- Programs could be moved to the adjacent quintile only (e.g., a 5th quintile program could be moved to 4th quintile only, and similarly a 3rd quintile program could be moved to either the 2nd or 4th quintile).
- Balance across the quintiles was required (i.e., if a program was moved from the 5th quintile to the 4th quintile, another program in the 4th quintile needed to be moved to the 5th quintile). This did not require that a certain percentage of a particular type of program needed to fall into any given quintile.
- Deans were required to articulate the global rationale / approach used to determine their final quintile recommendations (i.e., how various information was considered).

Upon final recommendation from the dean and with approval from the provost, final quintile assignments were made and communicated within each of the colleges. Programs placed in either the 4th or 5th quintiles (lowest 40%) were required to complete an Action Plan report; new programs were exempted from this requirement.

In the Action Plan, programs are asked to: (a) analyze and identify specific challenges based on the criteria and/or metrics of program prioritization; (b) identify and outline specifics of the action plan, and (c) consider external support that may be needed or helpful from the college or university. A copy of the Action Plan template can be found in the Appendix.

Evaluation of Administrative and Support Programs

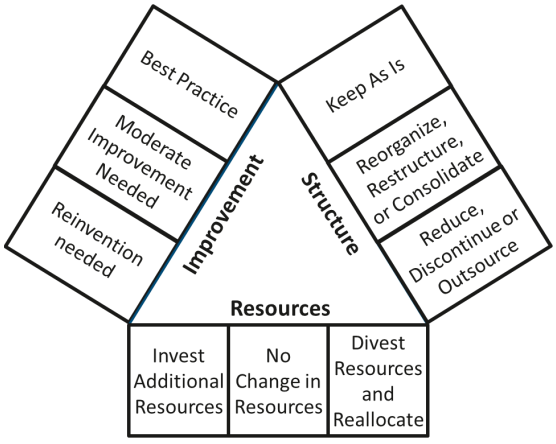
For Administrative and Support programs, each program developed a written report (intake form) in response to the question prompts listed in the second column of Table V. These responses were reviewed by division leadership to ensure that they would provide adequate information for the identified program prioritization criteria. Additionally, and as appropriate and available, programs provided data and information on national benchmark data, for example, comparing resources or performance of the program with national averages, as evidence to demonstrate the volume, quality and productivity of work performed.

Table V. Questionnaire (Intake Form) Used for Evaluation of Administrative and Support Programs	
Criterion	**Aspects evaluated and reviewed based on written responses**

Relevance	**Mission:** What is the mission or purpose of your program?
Relevance	**Major functions:** What are the major functions of your program and total staff FTE?
Quality	**Ongoing assessment / evaluation:** How do you assess progress or achievement on your mission, goals or performance (quality, effectiveness, impact)? Briefly describe the measures used, the process, and frequency.
Quality	**Findings:** Given your ongoing assessment / evaluation**,** on the whole, what have you found about your program's quality, effectiveness, and impact? What's working well? What could be improved? OR, Please list your program's goals and progress you made towards meeting those goals.
Quality and Opportunity Analysis	**Improvement:** How have or will the findings be used by the unit/program to make changes? May include (1) actions already taken, and/or (2) actions planned for the future.
Productivity and Efficiency	**Resources:** How are you able to meet your service needs with the current staffing level? Are there areas of your operation in which you would recommend investment or divestment?
Relevance and Opportunity Analysis	**Strategic connection:** Describe the ways in which this program ***may*** contribute to the newly drafted strategic planning goals and University mission (Strategic Planning - University Strategic Plan). (Optional, as applicable)

The report for each program was then reviewed, typically by a divisional leadership committee. After reviewing and evaluating all programs' submitted intake forms, the vice president of each division, working with their leadership group, summarized the significant findings in a 2-page executive summary. In each executive summary, the following information was highlighted at the divisional level:

- Organization and context: The mission statement of the Division and an organizational chart.
- Major accomplishments in the past 1 - 2 years focusing on high-level information and division-wide themes.
- Forward focus / opportunity analysis: Based on program prioritization, each division was asked to provide 3 to 5 examples of improvements and actions that will likely contribute to advancement in quality, productivity, efficiency, and/or focus in their division. Divisions were encouraged to include examples of areas for improvement from: improvements to organizational structure and function; collaboration within or among



divisions and restructuring; cross-training and sharing skill-sets / resources; technological improvements; process improvements to streamline operations; etc.

- Discussion of resource implications (e.g. investment, reallocations, consolidations, discontinuations, etc.).

Divisional leadership teams reviewed intake forms from all programs, and discussed main findings, in particular focusing on opportunities and areas of improvement that were found through the program prioritization process as well as program context and potential actions. As per the revised SBOE Policy III.F, administrative and support units were not quintiled. Instead, the focus of the analysis was on continuous improvement of programs based on identified criteria and resource implications (e.g. investment, reallocations, consolidations, program discontinations etc.) as appropriate and relevant.

Each proposed improvement / action can be categorized into one of three dimensions, as illustrated in the adjacent figure:

- Changes to organizational structure
- Improvement to processes and procedures
- Investment or divestment of resources

Each vice president then prepared a summary report discussing the results of the Program Prioritization for their division and highlighted important actions. These results are described in some detail in the following section, including proposed changes to organizational structure, proposed improvements and associated resource implications. These summary reports will next be reviewed by the President. Once reviewed / revised (as needed) and approved, each vice president will be overseeing the implementation of actions identified during Program Prioritization.

Key Milestones and Dates

Table VI. Academic Instructional Programs

November 10, 2020	Data on Minors, Emphases, and Undergraduate Certificates distributed
December 1, 2020	Deadline for Minors, Emphases, and Undergraduate Certificates Intake Survey
December 18, 2020	Data from Intake Survey (minors, emphases, etc.) sent to deans
December 23, 2020	Data and metrics for Instructional degree programs delivered to deans
January 5, 2021	First-pass prioritization sent to deans
January 10, 2021	Deadline for Instructional Degree Program Intake Survey
January 12, 2021	Data from Intake Survey (degree programs) delivered to the deans
January 31, 2021	Deadline for reports from the deans
Early February	Deans distribute master data file and results of quintile placement to chairs/directors in their colleges
May 31, 2021	Deadline for draft Action Plans to be submitted to deans
Summer 2021	Deans review Action Plans and clarify with department leaders as needed
August 31, 2021	Deans sign off on final Action Plans

Table VII. Administrative and Support Programs

January 19, 2021	Templates and instructions distributed to the Divisions
February 1, 2021	Divisional leadership submit the list of programs to be evaluated
March 31, 2021	Divisions determine specific timelines for internal deadlines and customize an instruction document for each of their programs. Programs complete intake forms by March 31st.

April 30, 2021	Executive Summary report from each division plus a compendium of all final individual program intake forms are completed.

Results and Discussion for Academic (Instructional) Programs

Minors, Emphases, and Undergraduate Certificates

For minors, emphases, and undergraduate certificates, 236 programs were evaluated. Of these, 94 (or 40%) were identified as new since the fall of 2017. Table VIII provides an overview of the programs evaluated by type and their initial evaluation based on the three-year average number of students graduating with that minor, emphasis, or undergraduate certificate.

Table VIII. Results of Evaluation of Minors, Emphases, and Undergraduate Certificates

		Above the threshold number of graduates?		
Type of Program	Total # programs evaluated	# Above threshold	# Without graduates data yet	# Below threshold
Minors	94	37 (39%)	7 (7%)	50 (53%)
New	28	0	7 (25%)	21 (75%)
Not New	66	37 (56%)	0	29 (44%)
Emphases	67	24 (36%)	11 (16%)	32 (48%)
New	20	2 (10%)	11 (55%)	7 (35%)
Not New	47	22 (47%)	0	25 (53%)
Undergrad Certificates	75	20 (27%)	27 (36%)	28 (37%)
New	46	9 (50%)	27 (59%)	10 (22%)
Not New	29	11 (38%)	0	18 (62%)
Totals	**236 (100%)**	**81 (34%)**	**45 (19%)**	**110 (47%)**
New	94 (100%)	11 (12%)	45 (48%)	38 (40%)
Not New	142 (100%)	70 (49%)	0	72 (51%)

* Thresholds: undergraduate minors, emphases, or certificates <5; graduate level emphases<3

Eighty-one programs met the threshold for the annual number of graduates, and 45 were too new to have graduates data. The remaining 110 programs (or 47%) were flagged for not having met the threshold for annual number of graduates, 38 of which were new programs since the fall 2017. Notably, of the 72 programs that were flagged as below the threshold and were not new, 78% of them require minimal or no additional resources, meaning that they are able to provide opportunities for students without adding direct or indirect resource costs to the home departments or programs. The remaining 22% of not-new programs that were below the threshold formulated initial action steps to revise and enhance the programs, including new or revised recruitment efforts, changes to curricular offerings, and programmatic changes.

Instructional Degree Programs

A total of 204 instructional degree programs were evaluated; these included all bachelor's degree programs and above plus graduate certificate programs. Of these, 51 (or 25%) were identified as new since fall 2017. Table IX provides an overview of the programs evaluated by award level and their initial evaluation based on the three-year average number of students graduating with those degree awards.

Table IX. Results of Evaluation of Instructional Degree Programs				
		Above the threshold number of graduates?		
Type of Program	Total # programs evaluated	# Above threshold	# Without graduates data yet	# Below threshold
Bachelor's	87	59 (68%)	3 (3%)	25 (29%)
New	15	4 (27%	3 (20%)	8 (53%)
Not New	72	55 (76%)	0	17 (24%)
Graduate Cert.	40	12 (30%)	19 (48%)	9 (23%)
New	23	1 (4%)	19 (83%)	3 (13%)
Not New	17	11 (65%)	0	6 (35%)
Master's	62	41 (66%)	6 (10%)	15 (24%)
New	9	2 (22%)	6 (67%)	1 (11%)
Not New	53	39 (74%)	0	14 (26%)
Education Specialist	2	2 (100%)	0	0
New	0	0	0	0
Not New	2	2 (100%)	0	0
Doctorate	13	10 (77%)	2 (15%)	1 (8%)
New	4	1 (25%)	2 (50%)	1 (25%)
Not New	9	9 (100%)	0	0
Totals	**204 (100%)**	**124 (61%)**	**30 (15%)**	**50 (25%)**
New	51 (100%)	8 (16%)	30 (59%)	13 (25%)
Not New	153 (100%)	116 (76%)	0	37 (24%)

*Thresholds: bachelor's <10; master's, graduate certificates, and education specialist degrees <5; doctorate <2

One hundred twenty-four (or 61%) of the programs met the threshold for the annual number of graduates for the given award level. An additional 30 were too new to have graduates data. The remaining 50 programs (or 25%) were flagged for not having met the threshold for annual number of graduates at their respective award level, however 13 of them were new since '17-18.

Combined Results

Table X depicts the assignment of all programs by program type to quintiles, based on the entire aforementioned analyses.

Table X. Quintile Assignments Across All Programs							
	Total Programs	Quintile assignments					
Program Type	Evaluated	First	Second	Third	Fourth	Fifth	NQ*
Minors	94	15	11	18	15	28	7
Emphases	67	17	10	13	6	10	11
Undergraduate Cert.	75	8	11	8	6	16	26
Bachelor's	87	22	22	17	22	4	0
Graduate Cert.	40	4	7	8	11	10	0
Master's	62	10	16	12	18	6	0
Education Specialist	2	1	0	0	1	0	0
Doctorate	13	5	2	6	0	0	0
Totals	440	82	79	82	79	74	44

% of total per quintile	100%	20.7%	19.9%	20.7%	19.9%	18.7%	

*NQ denotes no quintile assignment was made due to missing or insufficient data. The NQ programs were excluded from the calculation of the total percentages for each quintile.

Of the 440 evaluated programs, 153 received assignments in the fourth or fifth quintile. Forty-four programs were not assigned to a quintile because of missing or insufficient data; all 44 of these were new. Table XI depicts the distribution of programs across all quintiles for programs that were new and not new.

Table XI. Quintile Assignments Across All Programs Based on New Status

Program Type	Total Programs Evaluated	Quintile assignments					
		First	Second	Third	Fourth	Fifth	NQ
Not New	294	77	58	65	58	36	0
New	146	5	21	17	21	38	44
Total.	440	82	79	82	79	74	44

Placement in the fourth or fifth quintile triggered a requirement for the program to submit an action plan; however, this applied only to programs that are not new. As shown in Table XI, 94 of the 153 programs in the fourth and fifth quintiles were not new and, thus, these programs were required to submit the Action Plan report.

Table XII summarizes the primary criteria responsible for an *instructional degree program* being assigned to the fifth or fourth quintiles. The most common deficiency was productivity, typically resulting from a low number of graduates. This is somewhat expected, since the analysis included new instructional degree programs, which are still scaling up and may not have many graduates. The second most common deficiency was quality for the fifth-quintile programs and was relevance for the fourth-quintile programs. Low scores for quality were caused by low student satisfaction with quality and/or a poor program assessment report, and low scores for relevance were caused by low enrollment (an indicator of demand), and low relative student satisfaction with their degree program. Finally, low scores for efficiency were caused by relatively difficult progression through the degree. Notably, all but three of the fifth-quintile instructional degree programs had at least two deficient criteria, and six fifth-quintile instructional degree programs had deficiencies in all four criteria. Approximately 25 percent of the fourth-quintile programs had deficiencies in three or more of the criteria.

Table XII. Causes of Placement into the Fifth Quintile

	Criterion			
	Relevance	Quality	Productivity	Efficiency
Number of ***Fifth-Quintile*** Instructional Degree Programs with relatively low scores in Criterion (out of 20 programs)	11	17	20	12
Number of ***Fourth-Quintile*** Instructional Degree Programs with relatively low scores in Criterion (out of 52 programs)	29	24	30	24

All fifth- and fourth-quintile programs that are *not new* submitted action plans to their deans on May 31, 2021. College deans are in the process of reviewing action plans, will request revisions (if needed), and approve final action plans by August 31, 2021. All programs in the fourth and fifth quintile will be re-evaluated by fall 2022. Examples of actions that may be planned to remedy the challenges identified by Program Prioritization include but not limited to: program discontinuations (and reallocation of resources to other programs); improvement of their assessment of learning outcomes in order to evaluate and ensure quality; restructuring by, for example, adding an emphasis to attract more students or by consolidating programs, in order to streamline the options for students; revitalization of their curriculum to make it more efficient for students to progress through the program; or focusing on recruitment in order to increase enrollments and production of graduates, with specific targets established.

Table XIII depicts the program types that were flagged for not meeting the determined thresholds for numbers of graduates. The two columns on the right show that 160 programs did not meet the thresholds for numbers of graduates; a strong majority of these programs were placed in the fourth or fifth quintiles. Of the 56 that did not meet the threshold for graduates and were not placed in the fourth or fifth quintiles, 14 (or 25%) of them were new.

Table XIII. Programs Flagged for Low Number of Graduates

Program Type	Total programs evaluated	Programs meeting graduates threshold	Programs without available data	Programs not meeting graduates threshold	
				In fourth or fifth quintile	Not in fourth or fifth quintile
Minors	94	37	7	38	12
Emphases	67	24	11	14	18
Undergrad Certificate	75	20	27	17	11
Bachelor's	87	59	3	16	9
Graduate Certificate	40	12	19	7	2
Master's	62	41	6	12	3
Education Specialist	2	2	0	0	0
Doctorate	13	10	2	0	1
Totals	440	205	75	104	56
Percent of Total	100%	46.6%	17.0%	23.6%	12.7%

Initial Changes in Academic Programs

Although the Action Plans will become final at the end of summer 2021, several initial changes have already been made:

- The transition of the Department of Community and Environmental Health to the Department of Public Health and Population Science in the College of Health Sciences.
- The move of the LEAD program from the College of Innovation and Design to the School of Public Service.

- The separation of the current Department of Communication and Media into two separate entities, the Department of Communication and the Department of Media.
- **Eight** instructional programs were discontinued by May 2021 as a result of program prioritization. These include two bachelor's degree programs, two master's degree programs, one graduate certificate, one undergraduate certificate, and two emphases.
- Planned discontinuations of **14** additional programs will be initiated during the fall semester of 2021. These include one bachelor's degree program, two graduate certificates, two master's degree programs, five minors, and four emphases.

Results and Discussion by Division

Administrative and Support Programs

Administrative and support programs provide services that support the academic mission and carrying out the operations of the University. These programs are distributed across all Divisions of the University.

As discussed under the Methodology section above, programs within each Division completed their self-assessment using a uniform intake form, and leadership within each Division then reviewed to identify major accomplishments, areas for improvement, recommendations, and resource needs / re-allocations. Highlights of these Division-level reviews are discussed and summarized in Executive Summary reports from each Division. Below, we describe the results and analysis of the program prioritization process completed in all Administrative and Support programs on campus.

In addition to and as part of the program prioritization efforts and following recommendations of an outside consultant, important organizational and structural changes were announced by President Marlene Tromp in her March 12, 2021 email to campus. Several areas / units were touched by these organizational changes, including Campus Operations, Public Safety and Transportation, Finance and Administration, and University Affairs. These changes became effective immediately after the announcement and are reflected in the division-level discussions below.

Division of Finance and Administration

Programs within the Division of Finance and Administration are organized as depicted in the following table. This table reflects the organizational changes in the University that were announced in March 2021. This major organizational change was partially the result of the program prioritization efforts and was effective immediately. In particular, campus operations, which previously was a standalone division, was merged with finance and administration to simplify structure, better align functional priorities, and create greater synergy among operations, facilities, finance and administrative teams. This change was an important result of the commitment to operating efficiently and maximizing university resources, particularly in financially challenging times. As part of this change, the Office of Public Safety, including Campus Security, Transportation and Parking, Emergency Management and Integrated Security Technology, moved to the newly named Division of University Affairs (previously named the Division of Compliance, Legal, Public Health, and Audit).

Division of Finance and Administration						
Office of Budget and Planning (1 program)	University Financial Services (5 programs)	Morrison Center (1 program)	Extra Mile Arena (1 program)	Human Resource Services (1 program)	Office of Information Technology (11 programs)	Campus Operations (11 programs)

Major accomplishments

- The Sustainability Governance Council was created as a presidential initiative, with oversight provided through Campus Operations.
- Completed construction and opened the Micron Center for Materials Research - a $50 million, multi-year project.
- The Division pivoted to providing significant support as well as new services during COVID-19, including technology enhancements to 201 classrooms and creating 21 "new" classrooms, federal stimulus grant administration, and financial services and student refund management. Actions undertaken include reconfiguring Extra Mile Arena to host large classrooms, the Morrison Center offering performing arts experiences online to engage the community, and IT upgrading capabilities for online instruction and testing as well as improving infrastructure to enable faculty and staff to work from home. The Division also provided software app development and data to support contact tracing, classroom attendance and seating location tracking.
- Campus Operations personnel were integral to the opening of campus to best serve students and staff during this challenging year. There was no evidence of viral spread in campus buildings. In addition, taking advantage of reduced people on campus, completed a variety of preventative maintenance projects - significant painting, lighting, flooring, plumbing and landscape projects across campus.

- Human Resources reinvented the onboarding process to better acclimate new employees to Boise State and initiate employee engagement in order to improve performance and increase the likelihood of long-term employee retention.
- Boise State University's Research Computing Department, which is a part of OIT, rolled out the Borah computer cluster. Located at the Idaho National Laboratory's Collaborative Computing Center and built through a partnership between Boise State, the Idaho National Laboratory and Idaho Power, Borah is four times as powerful as Boise State's previous high performance computing (HPC) architecture and will support the growing compute-intensive research and education mission at the university.
- University Financial Services focused on innovation in 2020. The unit combined accounts payable and purchasing into a single procure-to-pay unit, redesigning all services to focus on the customers needs throughout the lifecycle of the activity. In addition, nearly 100 process improvement projects were completed along with implementing four patch bundles, and managing production support for Bronco Hub and Student Financials.
- The Office of Budget and Planning focused on providing better information for decision-making. Two key initiatives to support this effort include completion of an administrative benchmarking study with ABC Insights and acquiring and initiating implementation of a new budget and planning system.

Overarching themes

Following major themes emerged from the analysis of divisional programs within Finance and Administration:

- Presently, the business operations offices in the division are decentralized; substantial opportunity exists for increased coordination, consistency, and efficiency. Taking a cross-divisional view of business processes and administrative systems will likely produce improvements and efficiencies of a magnitude not otherwise attainable.
- Program Prioritization identified a number of opportunities for cross-divisional consolidation of operations, such as moving Campus Operations under the Division of Finance and Administration.
- Maintaining up-to-date facilities and equipment is a costly challenge for several programs.
- Compliance with federal and state regulations remains an area of growing focus and necessary investment at institutions of higher education. Note that many of the divisional compliance functions share responsibilities with the Office of Institutional Compliance and General Counsel in the Division of University Affairs.

Forward Focus / Opportunity Analysis

Based on program prioritization, following examples of improvements and actions are identified as contributing to advancement in quality, productivity, efficiency, and/or focus in the division.

- Program prioritization reaffirmed the need to combine the space management policy/process with the capital needs policy/process to make it more user friendly and efficient.
- Campus wide Space Study was initiated. Once the report is received, we will work to implement recommendations for more efficient and effective space usage across campus and especially in the interest of supporting our new strategic plan goals and objectives and to take advantage of potential adjustments to increased remote work.
- Work is underway with the Office of the State Board of Education to develop an enterprise risk management system for higher education. Boise State will contribute to this effort and share an employee for the first year to get the program underway.
- Work is underway on a Smartsheet database tool for project management, which will streamline project tracking and set the stage for tracking project data to assist with decision-making and program assessment into the future.
- Work is underway to create a dedicated floor crew, which will greatly improve the overall appearance and preventative maintenance of our facilities. Developing a specialized crew eliminates the inconsistency of 70 different staff doing floor work inconsistently or poorly. This move will also free up custodians to concentrate on more cleaning specific tasks, which will improve the cleanliness of classrooms, common areas and restrooms.
- Implementation of a shared services procure-to-pay model across campus in order improve business operations and reduce the staffing levels required for these activities freeing up resources to be dedicated to other activities.
- Implementing Salesforce campus-wide with a focus on streamlining communications and marketing efforts from the University to the campus community as well as providing a data-driven 360-degree student view, personalized multi-channel engagement at scale, and a modern, unified and holistic advising experience.
- The Canvas LMS implementation project to replace BlackBoard is on track for the Fall semester. This is an enterprise transformational project that will impact students, faculty, and staff.
- Executing people strategies to reduce employee attrition and improve institutional effectiveness. There are multiple strategies in the people plan including market-based employee compensation, upgrading the university's HR system, and expanding opportunities for employee development.

Challenges Identified and Resource Implications

- The completion of the AASHE STARs report provides the data and information needed to focus goals and objectives in a campus Sustainability Plan. Additional university investment in infrastructure, staffing and especially student positions to support this effort will be integral to our success.
- A new process to identify, vet, and prioritize renovations projects is now fully implemented. While providing better information and campus review for decision-making, the number of projects submitted and approved is not decreasing.

- We are currently meeting minimum environmental compliance requirements, but opportunities to collaborate with local government, better address environmental issues and education as well as add to our sustainability goals necessitate likely investment in this area.
- Lab safety compliance rates differ greatly between colleges. It is clear that having dedicated staff assigned by college to this task makes a tremendous difference in compliance and safety measures. A possibility is to consider a model where F&A increases are shared with Campus Operations as their work increases as research activity increases.
- To use university resources most efficiently, it is important that we invest in software to manage and measure university utilities. Currently, high-level staff are putting in many hours to manage utility data.
- Additional resources will be necessary to effectively implement many of the Division's long-term strategies. In particular, the people strategy will require a significant investment of resources. In addition, implementation of shared services will require the reallocation of resources from campus units to shared service centers.

Examples of Completed Actions

The following are examples of actions that were identified as a result of the Program Prioritization in 2013-14 and were successfully implemented:

- The business operations of Facilities, Operations, and Maintenance (FOAM) were integrated into a single business operations unit at the division level, producing substantial increases in effectiveness and efficiency. The new divisional unit provides coordination among business operations across the division.
- An Office of Public Safety was created to lower the University's overall safety risk by consolidating University Security, Transportation and Parking Services, and Environmental Health, Safety and Sustainability (EHSS).
- Extra Mile Arena (previously Taco Bell Arena), the Morrison Center, and Athletics outsourced ticketing and now manage their own operations and customer service activities.
- Research Computing centralized services for support of cyber infrastructure for research to maximize support to researchers. A central model of support was identified as an emerging trend in higher education research-intensive institutions.

Office of the President

The programs reporting to the Office of the President are organized as depicted in the following table.

Office of the President		
Athletics (6 programs)	Communications, Marketing & Creative Strategy (5 programs)	College of Innovation & Design* (7 total programs: 3 instructional and 4 administrative & support programs)

*Note: The following administrative and support programs from the College of Innovation and Design are evaluated and reviewed in this section: eSports, Venture College, and the Onramp program. Boise State X (BSX), a program designed to build partnerships that enable non-traditional students facing roadblocks to graduate was disbanded in Fall 2020 since other / better solutions were found to support this group of students, and was not included in the program prioritization review.

Major accomplishments

- Hired a new Athletic Director, Head Football coach and currently hiring Head Women's Golf Coach and Head Softball Coach.
- Prior to the pandemic, we finished as the top Group of Five athletic program in the country in the Learfield Cup Standings, and in the top five each of the previous five seasons.
- Concluded the 2021 spring semester with an all-sport cumulative GPA of 3.37, a department record, and 140 student-athletes were named to their respective college's Dean's List. The all-department GPA has been at or above 3.0 for 28-consecutive semesters, and at or above 3.30 for nine-straight semesters.
- Boasted the Mountain West Athlete of the Year in 2016-17, 2017-18 and 2018-19. Boasted the Mountain West Scholar-Athlete of the Year in 2017-18, 2018-19 and 2019-20.
- Launched the Lyle Smith Society, a philanthropic giving option, in December of 2020, which has since generated more than $6 million over the course of the next five years.
- In the past three years, the Office of Communication and Marketing led efforts to bring university units to a single web design and content marketing system.
- The Office of Communication and Marketing is in the process of launching the Boise State brand platform and enterprise-level campaign: **This is Blue Turf Thinking**.
- The Office of Communication and Marketing is in the process of launching our first ever enterprise-level communications and marketing plan.
- The Office of Communication and Marketing is leading the Salesforce implementation for the University with Salesforce Marketing Cloud.
- ESports has been able to spotlight individuals and the Boise State community through multiple contributions to national and local news pieces, keynote and invited speaking opportunities, and numerous awards, including 5 Collegiate eSports All-Americans, Broadcast Team of the Year, Overwatch Coach of the Year, and numerous other nominations to our students and staff.
- ESports served our Boise State community and partners by organizing and broadcasting more

than 10 events in 2020 including the State High School Esports Championships, The Idaho Entrepreneur Challenge, On-Ramp Showcase, Free summer camp for Idaho teens, Missouri High School Esports season and state championships, and many more.

- ESports demonstrated that we can Inspire the collegiate and scholastic community with excellence in broadcast production, tournament, and competitive play. With more than 10M minutes watched and 2M unique viewers in the first semester, Boise State esports and program are considered the high mark for production. Regularly, Boise State is mentioned as a Top 5 collegiate esports Program. This inspiration can be measured by the esteem in the program garnering both the Collegiate Esports Coach of the Year (NAECAD) and Director of the Year (NACE) in 2020.
- The Onramp Program works with schools in need (60%+ Free/Reduced Lunch eligibility) to provide educators the tools, training, and resources to create coding experiences for K-12 students. The number of districts, schools, and educators engaged has increased in year two, including twice as many educators in our current cohort and we are on track to engage more than 1000 students in coding experiences, a ~20% increase over year one.
- Venture College is currently exceeding the goals for the program, serving more than 4,000 students in 2020 and generating more than $12 million in revenue since 2013. Our program has reached students across BSU's campus and across Idaho, with room to still grow.

Overarching Themes

The following theme emerged from the analysis of programs that report to the Office of the President:

- The majority of programs in this umbrella have strong customer service functions and ties to the brand and image of the University. Therefore, reallocations, investments, and structural realignments will help increase the quality in several areas.

Forward Focus / Opportunity Analysis

- With new leadership, Bronco Athletics is currently conducting a department-wide SWOT analysis. The goal is to create a sustainable revenue model with an emphasis on becoming an outbound department. The department has begun building out its external units to help with improving revenue generation, branding, and storytelling.
- Currently in the process of hiring a senior associate director of athletics for external, in addition to creating an internal outbound ticket sales team with the hiring of an associate athletic director for ticket sales and operations.
- Conducting a facility assessment to prioritize future projects as we prepare to launch an athletics capital campaign.
- Working on elevating our support for BroncoBOLD, which focuses on mental health, as well as BroncoLife, which focuses on the whole person and emphasizes the transition to college, personal development, and career planning.

- For the first time at the university, the Office of Communication and Marketing will be implementing an annual communications and marketing plan, as well as the segmented communications model. This university/enterprise-level approach will bring more visibility and alignment to our communications and marketing efforts, which aims to strengthen the brand, as well as identify opportunities to improve productivity and efficiency. The plan's framework is structured around the strategic plan goals. Every division and college is represented in the plan.
- The Office of Communication and Marketing will collaborate with working groups across the university to build a content strategy around each segment and build an annual content strategy.
- ESports is now coordinating with residence halls to build out experiences.
- ESports is now in the process of development of co-curricular offerings.
- Venture College is in the planning stages of a 'go-to-market' workshop that would be focused on assisting faculty and graduate students. This program would give faculty researchers a process and understanding of how to successfully commercialize their work.
- Venture College is planning on launching new programs focused on engaging students who may not have their own idea for a venture but want to gain the experience of the entrepreneurial process through our 'Hacking for X' framework. This will expand to new industries in an effort to reach students of different disciplines.

Challenges Identified and Resource Implications

- Current challenges in Athletics primarily revolve around financial resources. In FY20 we ranked 5th in the Mountain West in operating budget and spent $9M less than San Diego State. Although we are at the top end of our conference and group of 5 peers with regard to fundraising, we are at the lower end when it comes to operational funding from the institution and state. Through a zero-based budget analysis, we identified several key areas where additional resources are necessary in order to remain competitive at a very high level and to meet the expectations of campus and our community. Additional investments in these areas will not only have a positive impact on our athletic competitiveness and academic successes, but the University as a whole.
- Office of the Marketing and Communication: investment has been requested to fund the enterprise-level campaign: **This is Blue Turf Thinking**. This campaign is built upon the updated brand platform and personas of our stakeholders. Analysis following the first year rollout will be needed to identify any staffing reorganization considerations.
- Esports: investment in staff to pursue and secure sponsorship and partnership is an important area of need. Additional space for a broadcast studio would open additional revenue streams.

Examples of Completed Actions

The following are examples of actions that were identified as a result of the Program Prioritization in 2013-14 and were successfully implemented:

- The Office of the President and programs that report to it were substantially revised and reconfigured since the last program prioritization. These changes include:
    - Moving Morrison Center and Extra Mile Arena to the Division of Finance and Administration.
    - New initiatives and programs under the College of Innovation and Design, which was created as part of the 2013-14 Program Prioritization.
    - Moving Boise State Public Radio to Extended Studies.
    - Transfer of university policy management from the President's Office to the General Counsel's office to create synergy with functions already assigned to the General Counsel's office related to policy interpretation and compliance.
    - Transfer of two programs – the sign shop and the print shop – to the division of Communications and Marketing to enhance their ability to manage and service the brand expectations of the university and needs of divisions across campus.
- The associate director for government relations position was redefined to serve more critical needs in community relations.
- Restructure and redesign the Office of Communications and Marketing to enhance the quality and productivity.

Division of Research and Economic Development

The programs of the Division of Research and Economic Development are organized as depicted in the following table.

Division of Research and Economic Development				
Office of Technology Transfer (1 program)	Office of Sponsored Programs (4 programs)	Office of Research Compliance (1 program)	Office of Research Development (1 program)	Institutes and Centers* (4** programs)

*Note: *Institutes and Centers are reviewed every three years using the program prioritization criteria of relevance, quality, productivity, and efficiency under University Policy 5500. This review was completed in 2019, and during this cycle of program prioritization co-operated institutes and centers are reviewed and evaluated within academic colleges. The CAES Energy Efficiency Research Initiative and the CAES Technical Assistance Program were assessed in 2019 and not included in the 20-21 program prioritization. The Energy Policy Institute is reviewed as part of the evaluation of Centers and Institutes by the academic colleges. The Institute for Pervasive Cybersecurity is too new to have sufficient data to provide a robust evaluation. ** This number does not include many other institutes and centers run in collaboration with academic colleges.*

Major accomplishments

The Division has continued to foster and grow research at Boise State University at an astonishing rate of 86% since 2013, and a 10% growth since 2019. This growth is fueling our graduate programs, bringing more talented students and faculty to Boise State University and to Idaho. In addition, there are more opportunities for our undergraduate students to experience research firsthand and to understand creative activity at its core, and to become highly valued employees in today's competitive workplace. Specifically:

- The VPRED Office has focused on building Grand Challenges, reviewing all policies, building federal initiatives, and restructuring the Division to better support both strategically and operationally the continued rapid growth in research year after year.
- The Research Development unit has developed tools and templates for proposals, and fostered connections among faculty across campus, with external universities, laboratories, and federal/state agencies.
- The Office of Sponsored Programs has modernized systems within the constraints of the larger system adoptions on campus (Oracle Financials and now HCM) as there was insufficient funding to fully adapt the system to support research.
- The Office of Technology Transfer has reorganized with an additional staff member to put forth a concerted effort to focus on increased visibility and marketing of IP to grow licensing activity. In addition, we simplified our forms and processes to make interactions with our office more efficient and transparent.
- The Office of Research Compliance is in the midst of implementing electronic protocol management modules to drastically improve each committee's forms, streamline review processes, and improve communication around committee reviews.

Overarching Themes

Following themes emerged from the analysis of divisional programs in Research and Economic Development:

- Each office in the division is understaffed in comparison to peer institutions. The mission and the new strategic plan of the University emphasizes continued growth in research. Our continued success in that realm (as evidenced by data shown above) will require new resources as well as a more efficient use of existing resources. High workloads of current staff and turnover of staff is a major challenge.
- Continued focus on interoffice coordination and communication to increase divisional effectiveness and efficiency.
- Continued focus on modernizing systems and process improvements is needed.

Forward Focus / Opportunity Analysis

Based on program prioritization, following examples of improvements and actions are identified as contributing to advancement in quality, productivity, efficiency, and/or focus in the division.

- Reorganization has occurred across the Division to improve our productivity and use resources most efficiently. This has resulted in new processes and also, in some cases, strong cross campus collaborations.
- Working on slowly modernizing systems, including Info-Ed, and have added staff in Research Development, Technology Transfer and Sponsored Programs to meet growing needs and increase satisfaction. Results from program prioritization efforts are used to modify processes whenever appropriate as a true continuous improvement process.
- The major focus for the Division is to complete the development of the Grand Challenges, in concert with strategic planning, and to attempt to keep pace with our growth.

Challenges Identified and Resource Implications

- With the massive growth of research and reductions in appropriated funding it is difficult to keep pace. Through benchmarking we know that our staff do far more work than colleagues in similar positions throughout the country. Turnover resulting from high workloads is an ongoing concern.
- By eliminating the AVP for Research we were able to make some additions in key areas, but that had a significant impact in the workload for both the division Vice President and the AVP for Sponsored Programs. In the Office of Research Compliance, position responsibilities were shifted and an administrative position was eliminated to support programs. All of these changes provided better support to programs but at a cost to overall workload. This will not be sustainable as research continues to grow.

Examples of Completed Actions

The following are examples of actions that were identified as a result of the Program Prioritization in 2013-14 and were successfully implemented:

- Reorganization has occurred across the Division to improve productivity and use resources most efficiently.
- The Office of Technology Transfer has improved efficiencies, enabling reallocation of one FTE to serve as a project coordinator in research development and grant writing.

Division of Student Affairs and Enrollment Management

The administrative and support programs of the Division of Student Affairs are organized as depicted in the following table.

Division of Student Affairs and Enrollment Management								
Dean of Students (5 prog.)	Campus Recreation (3 prog.)	New Student Programs (1 prog.)	Career Services (1 prog.)	Campus Services (5 prog.)	Enrollment Services (4 prog.)	Housing & Residence Life (4 prog.)	Student Equity (1 prog.)	Student Involvement & Leadership (4 prog.)

Major accomplishments

- Recruitment: With improved reporting, new software platforms, finding efficiencies in processing, constant innovation within recruitment strategies, and a focus on personalized service, Admissions has been able to absorb an 44% increase in applications and 38% increase in admits over the past 3 years while maintaining a high level of service. Enrollment goals have been met or exceeded in the past 5 years for the overall freshman class.
- Retention: The following details accomplishments in student success and retention.
    - Designed and implemented a targeted mentoring program for first year students with a focus on those not being retained from first to second year.
    - Updated and Implemented Academic Policy changes to better serve students.
    - Continued to advance programs, processes and services via technology-converted paper forms to Perceptive Content, implemented Kuali curriculum and catalog management system.
    - Created parameters and delivered $5.4 million in additional aid to students.
    - Offered numerous in-person, hybrid and online student engagement and programming opportunities for students - from clubs and organizations to stress relief activities to community service and alternative breaks.
- Career Readiness, Employability, and Post-graduate Outcomes: Over the past year, Career Services supported 1,694 students in individual coaching appointments and provided career information via classroom presentation and workshops to an additional 1,750+ students. About 1,200 students participated in experiential learning opportunities including internships, Work U, and the summer Hometown Challenge.

Overarching themes

Following major themes emerged from the analysis of divisional programs within Student Affairs and Enrollment Management:

- Many of the units in the division have direct interactions with students and, consequently, have substantial influence on how students perceive the university. Therefore, it is important that units of the division pay particular attention to the quality of service provided to students.
- A number of very strong cross-dependencies exist between programs in the division and those in the Division of Academic Affairs. In a number of cases, effectiveness of programs will depend on the strength of collaborative relationships.
- Many of the programs in the division have a strong history in assessing program effectiveness. Program Prioritization provided the opportunity to build on that foundation and to develop assessment structures where they did not yet exist.

Forward Focus / Opportunity Analysis

Based on program prioritization, following examples of improvements and actions are identified as contributing to advancement in quality, productivity, efficiency, and/or focus in the division.

- The most critical improvements needed in recruitment are with the Idaho resident population (both freshmen and transfers).
- The most critical improvements needed in retention are with our Idaho, underrepresented, first-generation commuter students. Restructuring and expanding a first-year experience program will accomplish part of this.
- The most critical improvements needed related to post-graduate outcomes include stronger data support infrastructure, coordinated and aligned experiential education opportunities, and embedded career education into the classroom. All these areas are included in and aligned with the new university strategic plan.
- We are in need of at least 550 additional beds to accommodate the rising student demand for on-campus housing.

Challenges Identified and Resource Implications

- Recruitment - the division is under-resourced in both the communication and recruitment team infrastructure.
- Retention - the division is under-resourced in multiple areas. Priorities include:
    - Student success coach positions that address student retention gaps
    - Financial aid counselors and customer service staff
    - Technology advances including housing assignment and data systems, campus wifi infrastructure, and cross-departmental systems.
    - Student auxiliary funding model restructuring
    - Expanding orientation to a first-year experience
- Career Readiness, Employability, and Post graduate outcomes - areas of resource attention include college embedded career coaches, a Data Specialist, and a significant investment in experiential education (to increase access to opportunities such as WorkU).

Examples of Completed Actions

The following are examples of actions that were identified as a result of the Program Prioritization in 2013-14 and were successfully implemented:

- Moved University Health Services from the Division of Student Affairs and Enrollment Management to the College of Health Sciences, in order to align with the college's academic programs and create teaching and research clinic opportunities. This restructuring enabled students to gain additional exposure to real world instructional situations, and faculty members to augment their instruction and research through actual practice within their professions.
- Reorganized and repurposed the IT support unit previously entitled "Campus Community" by moving PeopleSoft support functions to the Office of Information Technology and data support and analysis to the Office of Enrollment Services.
- Strategically assigned and located facilities and office space to co-locate student service units as much as possible, e.g., Disability Resource Center with Veteran's Service, in order to increase administrative efficiencies, improve access, and enhance opportunities for training to meet the changing needs of students.

Division of University Advancement

The programs of the Division of University Advancement are organized as depicted in the following table. Note that the University Foundation and the Division of University Advancement are connected via a Memorandum of Agreement and a shared mission, but not by formal reporting lines.

Division of University Advancement						
Communications (1 program)	Alumni Relations (1 program)	Development (3 programs)	Advancement Services (2 programs)	Operations (1 program)	Corporate & Fondation Relations (1 program)	*University Foundation (1 program)

Major Accomplishments

- Our fundraising efforts have exceeded expectations, and the endowment portfolio is holding strong, despite market upsets and challenges posed by COVID.
- People/Restructure - University Advancement and the Boise State University Foundation are undergoing substantial restructuring to better position the division and improve the way we serve our alumni, donors, and campus partners. This has increased efficiencies, improved the team culture and made progress towards building an integrated, university-wide, advancement structure.
- Organization - we are viewed as a better campus partner, and our Foundation Board leadership is becoming more engaged.
- Campaign - we are shifting our lens to campaign readiness and preparing the campus to successfully launch the university's next comprehensive fundraising campaign.

Overarching themes

Following major themes emerged from the analysis of divisional programs within the Division of University of Advancement:

- Benchmarking against national studies consistently shows that fundraising and related donor and alumni functions at Boise State are under-budgeted, under-staffed, and have a higher return on investment than similar universities.
- University Advancement and the Boise State University Foundation are undergoing substantial restructuring to better position the division and improve the way we serve our alumni, donors, and campus partners.
- The results of Program Prioritization and the ongoing SWOT analysis results will inform the proposed philanthropy growth plan.

Forward Focus / Opportunity Analysis

- Adding Advancement Services Department to provide strategic leadership for University Advancement and the Boise State University Foundation's infrastructure, utilize data-driven analytics to drive fundraising success and to strategically design, develop and implement operational functions that support Advancement goals in fundraising and constituent engagement. Prospect Management and Research and Donor Relations units / programs moved under the Advancement Services Department and an AVP for Advancement Services has been hired to start in summer 2021.
- Undergoing a SWOT analysis in summer 2021 to better inform a new growth plan.
- Working with the Foundation to improve data processing and reporting so that we can benchmark our efforts with industry standards and continue to improve fundraising efforts.
- Leveraging tools, technologies, and partnerships to accurately measure progress against metrics, as well as gaging preparedness for the campaign. (Examples: DXO program with Evertrue, FPM via Blackbaud, and a campaign readiness tool of the "Dove Preparedness Index" to name a few.)
- Working on appropriate hiring. For example, a full-time Director of Development for COAS and a Senior Director of Development for COBE will bring our college-based fundraising team to an optimal level for the current state. We also need three fully-trained and productive Development Directors for Athletics to meet performance standards and productivity.
- Continue leveraging Board engagement, utilizing an integrated model with more interaction between the Foundation, Alumni, and BAA boards.

Challenges Identified and Resource Implications

- University Advancement is an extremely lean division for a university of our size and fundraising expectations. The outcome of the SWOT analysis will inform the growth plan (budget and staffing) required to complete the university's next comprehensive campaign.

Division of University Affairs

The programs of the Division of University Affairs are organized as depicted in the following table. Note that the Division of University Affairs is a newly-renamed division: prior to March 2021, it was the Division of Compliance, Legal, Public Health and Audit. In March 2021, President Tromp announced a major organizational change to the University structures, including the renaming of this Division. In addition, the Department of Public Safety, including Campus Security, Transportation and Parking, Emergency Management and Integrated Security Technology moved to the Division of University Affairs. This Division did not exist during the 2013-14 Program Prioritization process, and various departments and programs under it previously reported directly either to the Office of the President or to Campus Operations.

Division of University Affairs						
Department of Public Safety (10 programs)	Office of the General Counsel (1 program)	Institutional Compliance (1 program)	Internal Audit (1 program)	Title IX (1 program)	University Policies (1 program)	Office of Public Health (1 program)

Major Accomplishments

- In the last 1-2 years, University Affairs programs led the campus response to the pandemic while gaining improved efficiencies in continued service delivery from business process improvements and intentional alignment of staff.
- During this time, Emergency Management maintained an active, daily virtual Emergency Operations Center and weekly Incident Command Team meetings / situation reports, as well as developed the campus All-Hazards Mitigation Plan.
- In 2020, the Public Health Office (PHO) was created to develop and guide the university's safe and timely response to the COVID-19 pandemic. PHO developed a robust contact tracing program; isolation housing and nursing care programs; sample collection center and on-campus, CLIA-certified PCR COVID testing lab; and vaccination clinic serving campus and the community. These efforts impacted all university departments and allowed campus to safely resume limited, in-person operations and remain open during the 2020-2021 academic year.
- In response to unprecedented levels of pandemic-related event and service contract cancellations, the Office of General Counsel provided increased consultation and contract support to university departments.
- Also during this time, Institutional Compliance and Ethics increased the number of investigators assigned per Title IX case from one to two individuals, thereby increasing efficiencies in interviews and report writing, and ensuring timely closure of cases. Additionally, the Title IX Coordinator role, which previously supported additional institutional duties, was reimagined to focus solely on Title IX compliance.

Overarching themes

Following major themes emerged from the analysis of divisional programs within the Division of University of Affairs:

- Partially informed by Program Prioritization, the Division of University Affairs recently underwent a substantial restructuring to position the division to better serve campus partners and increase divisional efficiencies. Focusing on efficiencies and better alignment of services, the Department of Public Safety has begun operating under the Division of University Affairs.
- University Affairs programs led the campus response to the pandemic, including maintaining an active, daily virtual Emergency Operations Center and weekly Incident Command Team meetings / situation reports, and creating the Public Health office to develop and guide the university's safe and timely response to the COVID-19 pandemic.

Forward Focus / Opportunity Analysis

- In the next 1-2 years, University Affairs, as an expanded and newly-renamed division (since March 2021), will focus on improving departmental and intra divisional business processes, partnerships, and intentional alignment of human and financial resources.
- To ensure intra divisional efficiencies, University Affairs will engage administrative and business operations staff in review of critical divisional business processes. This review will lead to identification and implementation of best practices, reduction of redundancies, and identification of opportunities for cross-training and intra divisional support.
- The Department of Public Safety will conduct a focused staffing and financial analysis, and will review opportunities to right size and realign staffing and reporting lines, resulting in phased and/or long-term strategies for employee recruitment, compensation and retention. It will also look to new and improved partnerships following negotiation with the Office of General Counsel of a new university law enforcement services contract, with the expectation to create a joint campus safety advisory group between the university and contractor.
- Among other programs, both the Policy Office and the Office of General Counsel will leverage university partnerships alongside improved business processes. The Policy Office will implement a rotating review process for all university department policies, prioritizing faculty-related policies in conjunction with the Office of the Provost and Faculty Senate. In a more direct approach, the Office of General Counsel will designate and train subsidiary contract officers within the academic colleges, ensuring accurate and detailed preparation of contracts prior to first review and thereby increasing efficiency and collaboration with those colleges engaged in frequent contract generation.

Challenges Identified and Resource Implications

- Review of University Affairs business processes will require investment of time and energy from divisional staff for meetings and coordination. This may lead to discontinuation of redundant processes, and reallocation of staff and/or responsibilities to best meet divisional needs.

- A new law enforcement services contract may require increased financial university investment to meet negotiated contract terms and conditions, as well as time and energy from those university community members participating in the joint advisory group. Likewise, changes to the Department of Public Safety staffing model and organizational structure may lead to increased financial investment to ensure equitable recruitment and retention practices.
- The Policy Office and Office of General Counsel process changes will require mutual investments of time and energy from university stakeholders charged with timely, coordinated review of departmental policies and preliminary preparation of contracts in cooperation with these programs.
- The Public Health Office's employee, program, and service resources may be reallocated or discontinued in the coming year depending upon university needs and the availability of funds.

Division of Academic Affairs

Instructional (Academic) Programs

The instructional programs of the Division of Academic Affairs that were evaluated during Program Prioritization are organized as depicted in the following table. The evaluation of these programs are discussed in detail in earlier sections of this report.

Division of Academic Affairs (Instructional Programs)						
College of Arts and Sciences (202 programs)	College of Business and Economics (43 programs)	College of Education (47 programs)	College of Engineering (65 programs)	College of Innovation and Design (3 programs)	College of Health Sciences (56 programs)	School of Public Service (34 programs)

*Note: Co-owned programs are counted under each college, hence, the total number of instructional programs in this table are more than what was reported in sections above (there we reported unduplicated numbers).

Major Accomplishments

- First-year retention rate increased from 67% to 78% from 2009 to 2019.
- Six-year graduation rate increased from 28% to 54% from 2004 (2010 graduating class) to 2014 (2020 graduating class).
- Four-year graduation rate increased from 7% to 38% from 2006 (2010 graduating class) to 2016 (2020 graduating class).
- College of Education marked the highest one-year number of doctoral graduates (21) in 2020-2021 in its 28 years of granting doctoral degrees.
- College of Engineering secured SBOE approval of BS and MS Cybersecurity Operations and Resilience (CORe) degrees, and students are signing up for both programs.
- College of Health Sciences expanded the undergraduate nursing prelicensure program by 33% (from 60 to 80 cohorts size) to meet Idaho's nursing shortages.
- The College of Innovation and Design graduated its first program since its founding five years ago: the Leadership Certificate will transfer to the School of Public Service.
- The College of Engineering opened the Micron Center for Materials Research Building.
- The new 2021 U.S. News and World Report rankings placed Boise State Online's bachelor degree programs in the near top 10% of online bachelor's degree programs in the country — **#39 out of 337 higher education institutions**. Boise State also ranked at **#26 for best online bachelor's programs for veterans**.
- Boise State University's College of Education is among the top 40 public universities in the U.S. News & World Report 2021 Best Education Schools list out of nearly 400 graduate schools that were eligible to be ranked; and regionally, it is in the top 3 in Intermountain West and Northwest.

- The new 2021 U.S. News and World Report rankings placed the Boise State Master of Science in Accountancy (MSA) program #43 in the nation out of 164 higher education institutions surveyed — up 44 spots from lasts years' #87 ranking.

- Boise State University's undergraduate computer science offerings debuted at No. 171 out of 481 national universities — the highest in Idaho — in the U.S. News and World Report's new ranking of computer science programs that offer doctoral degrees. This ranking highlights Boise State's capacity to advance the governor's new commitment to cybersecurity in the state. Boise State also was ranked No. 132 on the Best Undergraduate Engineering Programs list — also top in the state.

Overarching themes

Following theme emerged from the analysis of divisional programs:

- Many programs have strong interdependence with programs in other divisions/colleges/departments. Cross-college or cross-divisional initiatives and processes are challenging and require substantial collaboration among individuals that do not share reporting lines.

Forward Focus / Opportunity Analysis

- Academic colleges have demonstrated their ability to develop and deliver complex, multi-college transdisciplinary programs, at both the undergraduate and graduate level; these capabilities can be leveraged to bring greater value to the state and region.
- Colleges have begun building stackable certificates as stand-alone credentials and building blocks for degree programs; expanding such offerings will serve the needs of students and employers efficiently.
- Colleges are exploring a variety of restructuring opportunities such as schools to enhance quality, productivity, and efficiency.

Examples of Completed Actions

The following are examples of actions that were identified as a result of the Program Prioritization in 2013-14 and were successfully implemented:

- Creation of the School of Public service with four founding departments from the former College of Social Sciences and Public Affairs (SSPA).
- Expansion of the College of Arts and Sciences from 11 to 16 departments with the dissolution of SSPA.
- Build-out of eCampus Center in Extended Studies, which has facilitated the creation of 59 new fully online academic programs and certificates.
- Build-out of the College of Innovation and Design as home to high-demand programs and incubator for campus-wide innovations.

- Implementation of Bronco Budget 2.0, a responsibility-centered management (RCM) style budgeting model that institutionalizes the productivity metrics used in Program Prioritization.

Division of Academic Affairs

Administrative and Support Programs

The administrative and support programs of the Division of Academic Affairs that were evaluated during Program Prioritization are organized as depicted in the following table. Programs listed in this table do not include instructional programs or Centers and Institutes and college-based support units (e.g., college advising programs). Those programs are discussed in the next section.

Division of Academic Affairs (Administrative and Support Programs only)								
Undergrad Studies (6 prog.)	Academic Planning (2 prog.)	Academic Leadership & Faculty Development (1 program)	Center for Global Education (1 prog.)	Honors College (1 prog.)	Graduate College (1 prog.)	Extended Studies (9 prog.)	University Libraries (2 prog.)	IFITS (1 prog.)

Major Accomplishments

- The Academic Planning Office facilitated the development of the university's strategic plan framework and will continue to facilitate its build-out and implementation
- The Academic Leadership and Faculty Affairs Office within the Office of the Provost was created with the mission to foster an inclusive environment that supports the ongoing career development of faculty and the growth of effective academic leaders. This office works with partners across the university to provide leadership development programs and to establish best practices, policies, procedures, and development programs that help faculty members of all ranks reach their full potential as teachers, scholars and university leaders.
- Extended Studies played a key role in US News and World Report's ranking of Boise State's online bachelor degree programs in the top 12% nationally, ranked 39 out of 337 institutions.
- Honors College received $500,000 in new scholarship monies, including a $300,000 addition to an existing endowment, and exceeded its $500k-$1M fundraising goal by securing ~$1.25M, including a $1M planned gift. From fall '16 to fall '19, Honors College raised more than $2.5 million in pledges and gifts toward scholarships.
- Honors College graduated 192 students in 2020-2021, the highest number in the history of the Honors College and a 20% increase from last year's total of 160 graduates. From fall '16 to fall '19, Honors College grew enrollment by 62% (from 654 to 1063). First-year retention rate for 2020-2021 is 94%, whereas, the first-year retention rate five years ago was 89%. From fall '16 to fall '19, we increased overall student satisfaction by 10%.
- True to its mission of extending access, Extended Studies positively impacts a growing number of people each year, annually serving over 4,000 fully online students, 7,000 concurrent enrollment students, 15,000 campus-based students taking at least one online course, and 2,000 Osher members. Over the course of the 2020 academic year, Extended Studies facilitated

enrollments of 31,803 credit and noncredit students, a 26% increase over 2015. Utilizing entrepreneurial funding models, Extended Studies has been able to add staff to scale with the size of its growing programs. This model and the activity it supports is a major contributor to the University's enrollment growth over the past 5 years.

- The Institute for Inclusive and Transformative Scholarship (IFITS) was established to accomplish its mission of creating and nurturing a vibrant, inclusive research community. IFITS serves as the home of the Office of Undergraduate Research at Boise State; facilitates the Aligning Stakeholders and Structures to Enable Research Transformation (ASSERT) faculty cohort program offering tailored support to established and developing scholars; and acting as a change agent to ensure that the university's structures, policies, and practices enable and facilitate inclusive transformative scholarship that can lead to impact in the state, region, and beyond.
- Graduate education at Boise State has grown rapidly over the past decade, and exponentially over the past five years (the number of doctoral degrees granted tripled between 2015 and 2020). In particular, Graduate College drove a 6% year-to-year growth in PhD program enrollments in AY19-20, with a strong focus on multi-college, transdisciplinary programs. Because of this growth, the Graduate College has needed to develop processes and support structures, such as a new application tool. Many initiatives, for example, the Graduate Student Success Center, GradWell, and Mentoring/Advising are aimed at retaining graduate students, and helping them to complete their degrees.
- The University Foundations program established an active General Education Committee to increase faculty participation and oversight of course review, assessment, and faculty development. In last few years, the program has redesigned keystone freshman course, UF 100, by decreasing class size and increasing disciplinary content and number of experienced faculty participating from across campus; transitioned over 50 Communication in the Discipline courses to Foundations of Oral Communication courses in line with the State Board of Education GEM requirement; established a Finishing Foundations Subcommittee that created an integrated career readiness assignment across capstone courses for every degree; and completed the re-design of UF assessment process, the first cycle of which began in Fall of 2020.
- Enhancement of academic program assessment within the Office of Institutional Research's development of the Program Assessment Report and associated process.
- Robust faculty development support in summer 2020 preparing for remote learning; nearly 700 faculty invested approximately 16,000 person-hours in course design institutes and workshops.

Overarching themes

Following themes emerged from the analysis of divisional programs:

- Many programs have strong interdependence with programs in other divisions. Cross-divisional or cross-college / cross-department initiatives and processes are challenging and require substantial collaboration among individuals that do not share reporting lines.
- Several programs have a strong connection to students, and will therefore influence student perceptions of the university and affect student success. Several such programs seem to be substantially under-resourced compared to peer institutions.

Forward Focus / Opportunity Analysis

- Extended Studies is working with the Provost's Office, Deans, and departments to develop guidelines regarding quality, strategy, and logistics in connection with stackable credential degrees.
- Extended Studies has demonstrated its virtually unlimited capacity to facilitate the development of online programming and to assist in scaling; as an in-house asset, this group can advance the online success of Boise State.
- Honors College has demonstrated its value as a recruitment tool for high-performing students and as a vehicle for national and international scholarship awards (Boren, Fulbright, Goldwater, Rodes, Truman, etc.); Honors can bring greater visibility and prestige to the university.
- Honors College will be collaborating with the Idaho Listens initiative and other partnership opportunities with the Carr Foundation.
- Programs such as Bronco Gap Year and Community Impact Program are reaching students who might otherwise not pursue a college degree.
- The Center for Teaching and Learning (CTL) recently completed a reorganization that integrated the IDEA Shop staff into the CTL, in an effort to better 1) integrate support for technology across the CTL and 2) distribute workload across the staff. Fully transitioning to the new organizational structure (and supporting staff in new roles) is ongoing.
- The Center for Global Education (CGE) is currently going through an internal audit and has already taken several measures for improvement. For example, CGE expanded the definition of internationalization to include "at home" activities in the form of the "Global Collaboration Projects" and microcredentials. To this end, funding models were revised to ensure these activities remain sustainable even post pandemic.
- College of Business and Economics Advising is in progress of creating a COBE Process Manual, which will culminate in an annual meeting with the Associate Dean and department chairs. The COBE Process Manual will include processes that impact the entire college, such as permission numbers, academic adjustments, COBE Admission, second week enrollment, to name a few. The goal of the process manual is to help the advising team and the entire College of Business and Economics to be consistent in processes that affect students. A plan is in motion for COBE Advising to survey certain groups of students, such as First-Generation, to find out how the advising team can better serve those populations.

Challenges Identified and Resource Implications

- Extended Studies expects 30 new students in Community Impact Programs this fall, funded through reallocating resources; continuation and scaling of the program will require the University to make a strategic investment.
- It is critical the university continue investing in our infrastructure to sustain/continue growth in

online education at Boise State. The eCampus Center cannot be as effective unless the university provides: a robust LMS ecosystem, and data warehouse connection with data visualization tools and reporting functionality.

- The Institutional Research (IR) Office manages and completes an extraordinarily high volume of work, responding to the needs of leadership (e.g., developing and administering COVID-19 surveys for students, faculty, and staff), priorities of the University (e.g., strategic planning and program prioritization), and requests from the Office of the State Board of Education. The University's investment in the growth and development of meaningful analytics, improvement of fundamental data structures, and support and infrastructure for strategic planning and ongoing continuous improvement efforts would be very helpful to the work of the IR Office.
- The Library has reached the point of diminishing returns where reductions (or lack of increases) in staffing, budget, and space are negatively impacting efficiency. In particular, demand is increasing for Special Collections and Archives (SCA) and the MakerLab and both areas are critically in need of space; loss of positions and high turnover negatively impacts efficiency as workloads shift to accommodate vacancies; our library materials spending per student is lower than Peers by $20 (FTE) and $44.50 (headcount); inflation on e-journal packages is an ongoing concern, having outpaced increases in the Library's materials budget annually since FY14, requiring reductions in journals annually; and reductions in the Library's ability to purchase books coincides with increased faculty concerns about book availability for research and teaching.
- Because the demand for the Writing Center's services extend beyond our current resources, we are seeking auxiliary funding to support a range of partnerships. Most recently, the Writing Center extended its services through a donor-funded partnership with the College of Business and Economics (COBE). The Writing Center at the Thompson Family Writing Lab serves COBE faculty and students through coordinated Writing Center visits and individualized faculty professional development to support the teaching of writing. This new partnership (as of Fall 20) is /will be reviewed yearly with contingent funding for up to 4 years and has enabled the hiring of an assistant director.

Examples of Completed Actions

The following are examples of actions that were identified as a result of the Program Prioritization in 2013-14 and were successfully implemented:

- The last time Extended Studies went through Program Prioritization, it was determined that the Leadership and Support area needed to provide more robust centralized support to Extended Studies' programs for 1) marketing and enrollment services, and 2) financial management. Four years ago the Enrollment and Student Success unit was created to address the need for marketing and enrollment services. The unit has been essential to the Division's enrollment growth. This past year several staff from throughout Extended Studies were centralized to create the Business and HR unit, providing stronger financial support and oversight across all of the Division's programming. Given the importance of revenue generation in how the Division is funded, and given the dynamic growth of programs, the development of the Business and HR unit has been very timely.

- Creation of the Office of Academic Leadership and Faculty Development in the Provost's Office to support Department Chairs and other academic leaders.
- Enhancement of academic program assessment within the Office of Institutional Research's development of the Program Assessment Report and associated process.
- Robust faculty development support in summer 2020 preparing for remote learning; nearly 700 faculty invested approximately 16,000 person-hours in course design institutes and workshops.

Examples of Completed Actions

The following are examples of actions that were identified as a result of the Program Prioritization in 2013-14 and were successfully implemented:

- The Office of Academic Technologies is now restructured as: (i) a Learning Technologies Solutions unit within the Office of Information Technology that focus on providing leading-edge technological infrastructure to support learning; and (ii) a unit (IDEA Shop, operated during 2015-20) within the Center for Teaching and Learning (CTL), which is now incorporated broadly within the CTL, focusing on design of courses with the intentional incorporation of technology.
- Resources were reallocated from relatively low-demand regional sites at Gowen Field and Mountain Home to Extended Studies to staff degree completion programs and other programs aimed to better serve non-traditional students.
- The Graduate College was substantially restructured and reorganized.
- Our recent framework and process for assessment of Program Learning Outcomes (PLOs), Program Assessment Review (PAR), was implemented in 2016-17 as a free-standing process utilizing a rigorous peer-review protocol in which academic units receive feedback on their assessments of learning from faculty outside of their program. The university completed its first three-year cycle of assessing all 151 programs in 2018-19, and has been very successful for three primary reasons:
    1. The process is formative in nature and the focus is on continuous improvement. Faculty members participating in the assessment reflect on their progress in assessing learning outcomes and the success of their students in achieving them.
    2. Programs use PAR to improve their curricula, pedagogy, and assessment processes. Faculty involvement in the assessment process has had a positive impact because faculty understand and appreciate its value.
    3. We added professional development and support, including individualized consultation and the facilitation of meetings among faculty members as well as a four-part assessment workshop series offered each semester.

Centers and Institutes and Other College-based Programs
(Divisions of Academic Affairs and Research & Economic Development)

Divisions of Academic Affairs and Research and Economic Development collaboratively operate Centers and Institutes at Boise State University. The following table shows Centers and Institutes deemed to be "true" centers or institutes as defined by BSU Policy 5000 as well as those entities, for example, service centers, and instructional support units within academic colleges that were evaluated during the 2020-21 Program Prioritization.

Division of Academic Affairs (Centers/Institutes and Other College-based Programs)					
College of Arts and Sciences (5 programs)	College of Business and Economics (4 programs)	College of Education (5 programs)	College of Engineering (4 programs)	College of Health Sciences (10 programs)	School of Public Service (5 programs)

We used a "combination approach" to evaluate Centers and Institutes: Centers and Institutes are evaluated within the academic colleges with which they are associated during the 2020-21 Program Prioritization process and through the regular, 3-yr cycle review as required by the University Policy 5000, Centers and Institutes. The Council of University Centers and Institutes reviewed the existing Centers and Institutes at Boise State University for 2019, and submitted a report in January 2020. Council members evaluated 19 Centers and Institutes using criteria directly related to the four requirements in Policy 5000. These criteria are:

- The Center is consistent with the role and mission statement and University strategy;
- The Center facilitates increased productivity in instruction, research, service and/or outreach;
- The Center enhances an academic program in associated college(s);
- The Center provides associated program(s), department(s), or college(s) with greater visibility; and
- The Center provides increased extramural funding or potential for extramural funding

Out of 19 Centers and Institutes evaluated under University Policy 5000, 14 received a rating of good or excellent, four were acceptable, and only one was deficient. The deficient Center was directed to provide the Dean and the Council with a new focused strategy and a supporting business plan within one year of receiving the report (January 2022).

Major Accomplishments

- BroncoFit is often the front door to Health Services for our community. The team is tasked with outreach on campus and connecting students and employees to resources that will meet their needs (medical, counseling, and other campus departments.) There were over 230 events in

FY20. BroncoFit is visible on campus. In FY20, BroncoFit reached 9,000 campus community members through programming. BroncoFit adapts with change, creating online programming options once the campus went virtual, rapidly increasing our social media engagement (100k reached just from March-June 2020), and finding innovative ways to reach students when the team is not able to hold events (podcasts, text program, etc.).

- Biomolecular Research Center (BRC) has provided resources to faculty and students needed to increase biomedical research related external funding on campus since 2004. Faculty and student mentorship programs have been a great success, supporting more than 450 students. Over 150 publications have cited the Center, contributing significant scientific advancements to publicly accessible peer-review journals addressing a myriad of public health related issues including: Alzheimer's, Parkinson's, drug development, soft tissue repair, bone remodeling, rare diseases, cancer and more. Contributors to these publications include the extraordinary number of student authors in peer-reviewed journals with their faculty mentors. The BRC is designed to encourage transdisciplinary science and we have been able to facilitate networking / research related activity positively impacting faculty and students of the Departments of Biological Science, Chemistry and Biochemistry, Physics, Computer Science, Micron School of Materials Science and Engineering, Mechanical and Biomedical Engineering, and Community and Environmental Health.
- Frank Church Institute received a $500K gift to build a Model United Nations program for high school students and to host the annual competition, beginning in summer 2022.
- College of Arts and Sciences is partnering with Louisiana Tech to launch and research Bronco Gap Year model on their campus with Gear Up grant funding.
- Bronco Corps, a College of Business and Economics funded internship program providing assistance to nonprofits and small businesses struggling with the effects of the COVID 19 pandemic, has supported small businesses with 18 completed internships, and more than 30 internships that are underway.
- The College of Engineering has completed its organizational restructure with new Associate Deans and planning growth for marketing, industrial relations, and development. Analysis of the responsibility distribution at COEN's administration resulted in development of a new structure in which there will be a Dean of Academic Affairs who will be focused on the entire educational process for a better interplay in the undergraduate and graduate curricula, as well as seamless connection between the two levels of education. This Associate Dean will be in contact with the Associate Dean for Research for an effective distribution of the graduate students' infrastructure and scholarship support.
- The College of Business and Economics Advising Office has reached 95%+ hold removal each semester over the past 5 semesters since implementing required advising. Graduation data for COBE students who have received advising and graduated in 4.9 years less or less: during 2014-15 is 59% and during 2019-20 is 74%; and graduation data for COBE students who have received advising and graduated in 6.9 years less or less: during 2014-15 is 77% and during 2019-2020 is 90%.

Overarching Themes

- Evaluation of Centers and Institutes is well-established and was well underway before Program Prioritization was initiated. The revised process includes the Program Prioritization criteria.
- A number of Centers and Institutes operate on very small budgets and could have considerably greater impact with additional investment in infrastructural support. Program Prioritization has provided information that will help the university to prioritize such investments.

Sustaining the Process, Lessons Learned, and Next Steps

Although the University has not undertaken a substantial, campus-wide program prioritization effort since the required 2013-14 Program Prioritization process, Boise State University utilizes a variety of processes for ongoing evaluation and continuous improvement in academic and admin/support programs, including the RCM-style budget model (Bronco Budget 2.0) employed for funding the academic colleges. Many programs undergo regular and rigorous evaluation. Programs are discontinued if they are undersubscribed and new programs are created to serve identified needs in the community. Programs and departments are reorganized as needed to improve operations and implement efficiencies.

That said, we used this second round of campus-wide Program Prioritization process as another opportunity to scrutinize all operations, structures, and programs together in a systematic fashion to identify / refine ways to improve them and realign resources. Now that the year-long process has come to a close, we are in the process of identifying ways to sustain the benefits of systematic program evaulationsand to better incorporate aspects of program prioritization into our strategic planning and budgeting processes.

Aspects of the process especially relevant to its long-term sustainability:

- All programs were evaluated at the same time, using consistent and standardized processes. This model of evaluation enabled us to make comparisons among programs and require substantial changes from a significant proportion of them. In particular, as required by Board Policy III.F, all academic programs were evaluated using the same criteria and placed into quintiles.
- We have developed a clear and standardized intake form for reporting across administrative and support programs. This process enables campus leaders to evaluate and identify improvements to their programs and processes. The next step is to develop and establish a sustainable process, a regular and cyclical reporting cycle, and the resources necessary to ensure continuous improvement.
- We refined metrics for instructional programs and used them as a basis for action planning. The next step is to further refine the metrics and focus on those that are the most meaningful and robust. These refined metrics then can be incorporated into reporting structures, such as the Department Analytics Reports that are distributed bi-annually to academic leaders (department chairs, directors, and deans / associate deans).
- Although Program Prioritization focused on individual programs, the process brought to light opportunities that involve multiple programs.
    - We have made and need to continue to make significant changes to organizational structure, in many cases involving cross-divisional or cross-college (within Academic Affairs) shifts of programs and/or responsibilities. The next step is to institutionalize the process for periodically examining organizational structure for the purpose of maximizing the effectiveness and efficiency of the University.

- There are a number of strong interdependencies among programs that reside within different reporting structures, highlighting the need to ensure collaboration among those programs.

In the sections that follow we describe four areas in which we must focus our activity, in order to ensure the long-term sustainability of the benefits gained from Program Prioritization.

1. Integration of Program Prioritization with Strategic Planning and Budget Planning

Because the Program Prioritization process focused on individual programs, it was not explicitly tied to campus-wide initiatives such as those developed during our recent strategic planning process. We will continue with implementation of our new strategic plan with a focus on the goals and strategies that will address large-scale campus efforts. Next, we will work on integrating our periodic program prioritization process with strategic planning and budget planning. Goal is to create a sustainable process for continuous improvement that aligns with and supports the strategic plan goals and initiatives, and incorporates resource allocation, investment and divestment decisions into this comprehensive process. This will also allow us to be more effective in future Program Prioritization efforts, and will require university divisions to collaborate in integrated planning and execution processes.

As part of integration of program prioritization with strategic planning and budget planning, we will undertake the following:

- Develop a periodic reporting framework tied to the Annual Planning and Budget Process.
  - Each unit at the university will report on its performance and improvements made during the past year.
  - Each division will provide an evaluation of the performance and improvements reported by each unit in that division.
  - Each unit will report progress on their strategic initiatives.
- Develop a sustainable and resourced periodic review cycle, which will provide each unit with the opportunity to take an in-depth look at its operations and performance. The review will focus on alignment with the university's mission, contribution to the strategic plan goals and initiatives, unit effectiveness and efficiency, and improvements made.

Another focus will be on cross-unit and cross-divisional business processes, functions, and operations. There are two common challenges: (i) too often cross-unit processes affect and have tasks divided among the units, but no one unit owns and is ultimately responsible for ensuring the effectiveness and efficiency of the entire process (ii) there is often insufficient bandwidth in existing units to engage in all that is required for process improvement. This is described in more detail in part 4) Enhance Organizational Structures to Support Future Academic Programming below.

2. Follow-up on Implementation of Program Prioritization Action Plans (Academic Programs)

All fifth- and fourth-quintile academic programs that are *not new* submitted action plans to their deans on May 31, 2021. College deans are in the process of reviewing action plans, will request revisions (if needed), and approve final action plans by August 31, 2021.

All programs in the fourth and fifth quintile will be re-evaluated by fall 2022. Examples of actions that may be planned to remedy the challenges identified by Program Prioritization include but not limited to: program discontinuations (and reallocation of resources to other programs); improvement of their assessment of learning outcomes in order to evaluate and ensure quality; restructuring by, for example, adding an emphasis to attract more students or by consolidating programs, in order to streamline the options for students; revitalization of their curriculum to make it more efficient for students to progress through the program; or focusing on recruitment in order to increase enrollments and production of graduates, with specific targets established.

As a way of tracking implementation of the actions outlined in action plan reports by academic programs that are placed in the fourth and the fifth quintiles, the Office of Academic Planning, working with colleges and departments, will create a checklist of key actions proposed for each program. Each action will have a time-frame associated with it. The Office of the Provost will evaluate progress on implementation working with colleges and departments at periodic intervals, with the first evaluation planned for fall 22. Checklists will ensure that actions are taken and provide a mechanism to communicate to the campus community the changes brought about by Program Prioritization.

3. Refine and Align Metrics

We expect that the Program Prioritization process will inform several aspects of our capability to analyze and use data on unit and organizational performance.

First, we are gathering feedback through focus groups and a survey to help us to refine and finalize the metrics and process to be used going forward. We already utilize many useful metrics in our Department Analytics Report, however, program prioritization provides us with an opportunity to refine our measures. One planned activity is to expand our use of the peer benchmarking data that is available through the Delaware Cost Study. In our refinement of metrics, we will pay attention to not using a metric merely because it is convenient and easily measured, rather it must effectively measure the targeted criterion.

We are in the process of developing metrics and targets to assess our progress in meeting the goals of our brand new strategic plan, *Blueprint for Success 2021-26*, as well as our Strategic Enrollment and Retention plan, which is currently being revised. As required by NWCCU accreditation, we also use metrics and key performance indicators (KPIs) to assess university wide performance. As a next step, we will ensure that all sets of metrics and targets (key performance indicators - KPIs) we utilize are consistent where it makes sense. More importantly, we will carefully evaluate the KPIs to ensure they are effective indicators of success.

As important as ensuring easy access to accurate data is ensuring that the data is used wisely. Thus, we will focus on building knowledge from data, increasing understanding of the meaning of data,

drawing appropriate conclusions, and advancing a culture of data-informed decision making.

4. Enhance Organizational Structures to Support Future Academic Programming

This has been a year of planning at Boise State with both the University Strategic Plan being developed / implemented and a five-year program prioritization being carried out. In addition, we are participating in NWCCU fellowship with a project titled "Modernizing Data and Coordinating Organizing Structures for Multi- and Transdisciplinary Academic Programming." A key challenge and opportunity identified in these processes / projects is the need to modernize university systems and processes, including data and governance structures with a focus on the development of inter-/transdisciplinary collaborations, which will need better support structures to facilitate these new ways of working. These organizational support structures may include a wide range of items from how we define programs to better track data to governance of the programs including faculty workload and policies. This need to modernize university systems, structures, processes and other infrastructure is particularly important for innovation and collaboration in academic programming.

Boise State has been successful in adopting numerous innovative inter-/multidisciplinary academic programs and has plans to continue stretching traditional academic boundaries by establishing more multi-college and transdisciplinary programming, however, cumbersome, outdated and misaligned systems likely inhibit innovation and collaboration across departments. As heard in campus discussions "our spirit to serve, innovate, collaborate is strong, but our systems and processes are outdated and holding us back."

We have taken a number of steps as part of the Program Prioritization that will be helpful in the next steps. These include:

- Program prioritization revealed some inconsistencies in the set-up of plans and plan types in our data system. For example, differences in secondary education plans, CIPs, and endorsements. The next step is to work with the College of Education and other relevant programs / departments on campus on a review process to commence sometime in the next fiscal year as the college has interim leadership in certain key roles.
- We started an inventory of miscellaneous organizational and data issues with the Office of Institutional Research staff. The next step is to consider these issues as part of the program prioritization post-mortem review to determine which are localized analytical issues vs. University system issues.
- As part of the program prioritization process, we developed and/or refined several master crosswalks (org-plan level for student-related measures, CIP level and expenditures-related for analysis relating to the Delaware Cost Study). The next step is to determine what the ongoing maintenance and use of the crosswalks are and how to increase the transparency of their use.
- We identified a number of questions and concerns regarding financial data classifications. These data are essential for cost comparisons and our University participation in the Delaware Cost Study. We initiated a meeting with leaders in the Division of Finance and Administration

and will work out a process to relay questions/ concerns/ issues and connect the colleges / departments in which these issues have been identified.

- We started a summary of academic planning information from peer institutions so that we can begin drafting the table of contents for our eventual academic planning manual.
- We will work within the University Strategic Planning Council as new initiatives emerge, especially those that involve multiple colleges and divisions and are multi- or trans-disciplinary programming, around the structural aspects necessary to support planning and evaluation of these efforts. The focus is how best to define governance, data and budget structures that will allow us to grow and support interdisciplinary academic programming in a sustainable fashion.

EXECUTIVE SUMMARY, 2021

Idaho State University's program prioritization process supports its strategic initiatives and institutional mission through appropriation of resources based on realistic and efficient program management and the needs of students, with the goal of supporting growth and ensuring programs demonstrate the need for new, increased, or reallocated resources. The process was initiated three years ago with the formation of a committee that included broad campus representation to design a model for prioritizing its programs. The resulting Program Health Model led to a number of innovative ideas from programs that will ultimately enhance our students' experience by increasing retention and supporting student success.

Programs in the first and second quintiles of prioritization developed proposed action plans that include:

- 9 program discontinuations
- 6 new program proposals
- 40 improvement plans
- 16 investment or reallocation of resources
- 6 restructurings of programs
- 18 other innovations

These programs are currently under review by the University's Administrative Council.

Our programs are exploring multiple ways to grow and thrive, to serve our state and our students in delivering quality educational experiences. Several themes emerged across the institution that will lead to increased quality, efficiency, and focus of its academic programs:

- Creating streamlined pathways for students to move from undergraduate to graduate programs.
- Developing support for students to increase retention.
- Expanding course delivery options for students to better fit their educational needs.
- Expanding alignment of programs with workforce needs.
- Expanding use of Open Educational Resources to provide affordable options for students.
- Working collaboratively with other academic units to increase efficient use of resources.

Cost savings extend to students in the form of streamlined pathways to degree completion and the expansion of open educational resources, in addition to reduced costs to the institution itself.

In the spirit of continuous improvement and recognizing that making efficient use of resources is an ongoing process, the institution created a working group to further refine the Program Health Model and processes.

ACADEMIC PROGRAM PRIORITIZATION PROCESS NARRATIVE

GOAL:

Support strategic initiatives, institutional mission, strategic plan and core themes by appropriating resources based on program prioritization and student needs.

PROCESS:

Idaho State Board of Education Policy V.B.11 requires institutions to incorporate program prioritization into the annual budgeting and program review process, and to provide annual updates to the Board. In 2014, Idaho State University (ISU) transitioned its Program Prioritization Process into a Program Assessment/Program Health Process with the goals of supporting growth and ensuring that the direction of new, increased, or reallocated resources to any program is based on demonstrated need.

Previous experience with program prioritization revealed that the budget model of ISU was a challenge in addressing program growth. Consequently, Academic Affairs determined that ISU needed a more comprehensive Program Health and Sustainability model that had broad campus support and was built in collaboration with Faculty Senate.

A committee of representatives from each college, the Faculty Senate co-chairs, staff from Academic Affairs, Institutional Research and the Office of Finance and Business Affairs began the process of developing a new model with the following charge:

A Program Health and Sustainability assessment model should be aligned with the institutional mission, while evaluating student demand and providing indicators of quality. It should include measures for efficiency and effectiveness and ensure sufficient resources. Finally, it should be flexible and change as necessary over time.

The Committee was led by Vice Provost Selena Grace initially, and later by Faculty Senate co-chairs Laura Ahola-Young and Rick Wagoner. Members included Joanne Tokle, Academic Affairs; Cody Fitch, Academic Affairs; Vince Miller, Institutional Research; Brad Batiuk, Finance and Administration; Hossein Mousavinezhad, Faculty Senate; Laura Ahola-Young, Faculty Senate; Shannon Lynch, College of Arts and Letters; Bob Houghton, College of Business; Rick Wagoner, College of Education; Benjamin Crosby, College of Science and Engineering; David Blakeman, College of Technology; James Lai, College of Pharmacy; and Ellen Rogo, Kasiska Division of Health Sciences.

The committee met monthly during Fall 2018 to refine the definition/charge of what a Program Health and Sustainability model should encompass and to identify proposed metrics and data sources. In Spring 2020, the committee sent a proposal to the Faculty Senate (see Appendix A) that was approved at the April 27, 2020 meeting. The model was presented to Leadership Council on June 3, 2020.

All programs were evaluated and quintiled in 2020. In 2021, only programs that are below minimum thresholds for number of graduates will be flagged and required to conduct a Program Health assessment.

An ad hoc Summer Program Health committee met during Summer 2020 to develop the tools and processes needed to implement the Program Health Model, with a goal of having all of the components in place and ready for use in Fall 2020. Members of the ad hoc Summer Program Health committee included Joanne Tokle (chair), Academic Affairs; Mark Neill, College of Education; Brian Hickenlooper, Finance and Business Affairs; Rick Wagoner, College of Education; Darren Blagburn, Academic Affairs; Vince Miller, Institutional Research; and Chris Cessna, Institutional Research.

The ad hoc Summer Program Health committee worked with the academic units to define programs for the upcoming program health process and recruited several programs to conduct “beta tests” of the model. Marketing, Art (bachelor’s and master’s), and the PharmD programs participated in the beta test. The beta test identified several issues and items in the process that needed clarification or streamlining in the process.

The summer committee also worked with Associate Deans, Department Chairs, and Program Directors to define programs. In some cases, degrees and certificates using the same faculty and resources were combined into single programs for assessment purposes. Examples of these combined programs include the BFA and BA in Art; the MA and PhD in English; and the undergraduate certificate and BA in Philosophy. In the College of Technology each program consisted of an AAS degrees and any embedded basic, intermediate, or advanced technical certificates that lead to that degree.

Institutional Research produced the quantitative information for the model, and a questionnaire was used to collect the qualitative information. A rubric and score sheet (see Appendix B) were developed for evaluators to rate the programs based on the quantitative and qualitative information. Academic Affairs reviewed the results of the beta test and made recommendations to the Faculty Senate and Leadership Council in August, 2020. Full implementation of the process began after final approval of the Faculty Senate and Leadership Council.

The Program Health self-evaluation was launched on September 8, 2020. Programs had approximately sixteen weeks to complete the process which used both the Program Health questionnaire and IR data. The instructions they were given are attached in Appendix C. Academic Affairs met with departments and programs to provide guidance in collecting and processing information to use in the Program Health analysis. Final narratives, score sheets, and quintiled lists were submitted to Academic Affairs on January 15, 2021. The narrative template is attached in Appendix D.

Academic Affairs assembled a master document of the colleges’ quintiled programs and narratives that was reviewed by the Faculty Senate, Council of Deans, and Administrative Council. The Council of Deans and Administrative Council reviewed the bottom 40% of programs

and provided feedback to help them craft their action plans. Academic Affairs received their feedback by February 26, 2021, and distributed it back to the colleges by March 1. The Faculty Senate collected feedback on faculty involvement in the process, due to potential inconsistencies across all colleges.

Programs submitted engagement plans (see Appendix E) to Academic Affairs that described when and how faculty would be involved in crafting the proposed action plans. Engagement plans were due to Academic Affairs by February 26, 2021.

Faculty, chairs, and deans developed action plans using a standardized template (see Appendix F) and the feedback. Action plans that impact the 2022 budget were completed by March 5, 2021. Action plans that impact subsequent budgets were completed by May 1, 2021.

Faculty had a final review of the proposed action plans from May 10-14. Administrative Council now has all of the proposed action plans under review. Administrative Council will approve the proposed plans, ask for more details, request plan revision, reject plans, or take other such actions when the Fall term begins.

Actions and recommendations are attached in Appendix G. A checklist of impacts is attached in Appendix H.

NON-INSTRUCTIONAL UNITS:

Also reviewed in Fall 2020 were several non-instructional units that are part of Academic Affairs. SBOE Policy III.F. does not require these units to be quintiled, so they were not assessed with the Program Health Model. Instead, these units were evaluated based on alignment with institutional core themes, mission, and strategic plan; performance outcomes specific to each unit; qualifications of professional and support staff; program resources; program strengths and weaknesses; external constraints and challenges; and opportunities for improvement.

The units evaluated included Institutional Effectiveness; Office of Assessment; Institutional Research; Program for Instructional Effectiveness; Educational Technology Services; University Honors Program; Bengal Bridge; University Tutoring; Early College; Intensive English Institute; High School Equivalency Program; and the outreach centers at Idaho Falls and Twin Falls. A review conducted in spring 2021 for Finance and Business Affairs is also included in this report's appendices.

The review of these units confirmed alignment of their mission statements with the missions of Academic Affairs and the University; strengths in COVID-19 operational planning and execution; strong relationships of the units with Academic Affairs; and well-formed assessment plans in most of the units. Weaknesses included issues with project charters; need for additional funding in specific units; challenges with long-term planning; and the urgent need for a data warehouse.

Details of the review of non-instructional units are in Appendix I.

NEXT STEPS:

The Program Health Model was used for the first time in 2020-2021 and was conceptualized and implemented as a continuous improvement model. The original proposal stated that the model should be "flexible and change as necessary over time." The baseline assessment, described in this report, was completed in 2020-2021. In subsequent years, programs may be triggered for evaluation based on five-year rolling averages of degree/certificate production using the following standards:

- ≤5 at the associate and certificate level;
- ≤10 at the bachelor's level;
- ≤5 at the master's level;
- ≤3 at the doctoral level.

The proposal (see Appendix A) allows for alternative measures for the triggering mechanism should a program wish to choose a different metric.

Moving forward, and in line with the goal of continuous improvement, the process will adhere to the following steps to ensure successful implementation, assessment, and further decision-making for programs in the bottom two quintiles and those that are triggered for evaluation:

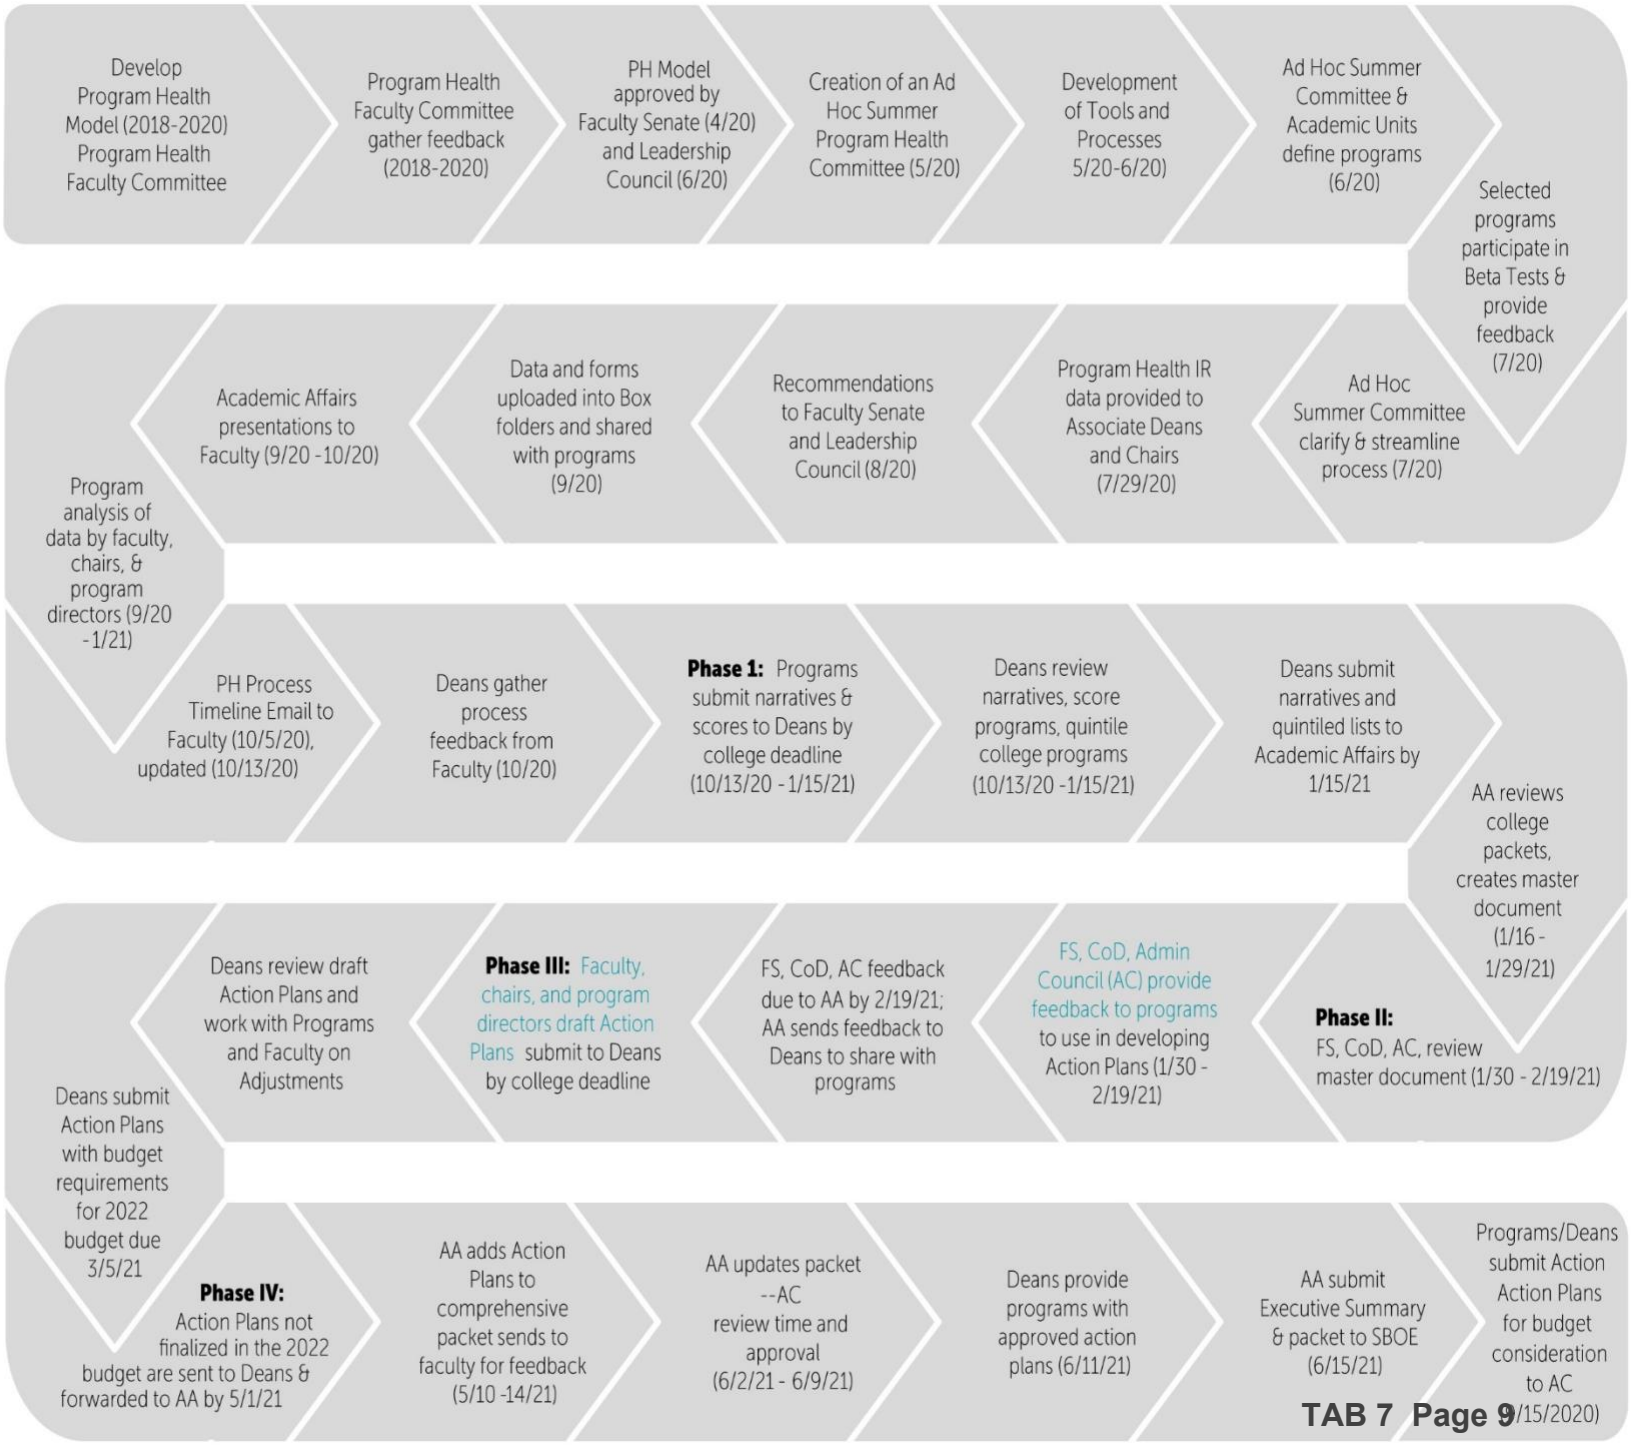
1. ISU's Administrative Council will review program action plans and provide suggestions for improvement;
2. Academic Affairs will work with college and departmental leadership to ensure clear and direct communication with regard to action plan expectations;
3. Programs will submit a mid-term report on action plan progress for review by Academic Affairs and Administrative Council;
4. Programs will submit a year-end report on action plan progress including key outcomes for review by Academic Affairs and Administrative Council;
5. As required by Policy III.F., Program Prioritization, annual program prioritization updates will be provided to SBOE.
6. This process will be completed annually for all programs in the bottom two quintiles until the next Program Prioritization Report submission in July of 2026.

PRELIMINARY RECOMMENDATIONS:

THE MODEL:

- Develop a standing committee to refine the model and look for ways to streamline the process and avoid duplication with the current program review process. The committee would include faculty representatives from each college and representatives from Academic Affairs and from Finance and Business Affairs.
- Revise the "Resources" category of the model to emphasize effectiveness of resource use rather than extent of resources available.

- Create new measures of student demand and efficiency. The current measures didn't work as well as expected in capturing health (e.g., the role of math in engineering).
- Develop a longer time series of program retention data.
- Remove some data items that can't be consistently collected, like alumni satisfaction.
- Compare programs to similar programs at peer institutions rather than other programs within ISU in order to create more meaningful comparisons.



THE PROCESS:

- Increase faculty involvement at early stages of the process.
- Reach agreement on how deans adjust scores.
- Provide model narratives as examples.
- Provide programs that end up in lower quintiles with the option of not submitting an action plan.
- Set guidelines for possible exclusion of new programs or programs already slated for discontinuation. For example, a program that was implemented in the last two years could be exempted from the process, giving it time to grow before being evaluated.
- Require programs to provide brief updates of progress annually. The University Assessment Review Committee has revised the program review annual report in order to collect all of this information at the same time.
- Make program data readily available for faculty on an ongoing basis.

OTHER RECOMMENDATIONS:

- New program proposals should support the Institution's Strategic Plan.
- Colleges are encouraged to develop meta majors.

Program Health 2020-2021

Idaho State University
IRSA

SCHEDULE OF PROGRAM HEALTH PRESENTATIONS AND MEETINGS: 2020-21

Date	Group	Purpose
April 27, 2020	Faculty Senate	Approval of PH model
June 3	Leadership Council	Charter progress and approval
August 31	Faculty Senate	Launch project
September 1	COE Leadership Team	Explain project
September 2	Leadership Council	Update
September 11	CSD faculty	Explain process
September 15	Biology faculty	Explain process
September 17	COSE chairs	Explain process
September 18	Nursing leadership	Explain process
September 22	COT faculty	Explain process

Appendix A Original Proposal with Matrix

Idaho State UNIVERSITY

Background/History:
The Idaho State Board of Education Governing Policies and Procedures, Section V.B.11 and Section III.F.[1] requires institutions to incorporate program prioritization into the annual budgeting and program review process, and to provide annual updates to the Board. In 2014, Idaho State University (ISU) transitioned its Program Prioritization Process into a Program Assessment/Program Health Process with the goal of supporting growth and ensuring programs demonstrate the need for new, increased, or reallocated resources. Academic Affairs has used that model to evaluate full degree programs and certificates based on a five-year average number of graduates as follows:

> Programs are flagged and must prepare an appropriate plan to address low enrollment if they have a five-year average number of graduates
>
> - ≤5 at the associate and certificate level
> - ≤10 at the undergraduate level
> - ≤5 at the master's level
> - ≤3 at the doctoral level

The outcomes of this model focused primarily on degree production, as well as projecting future hiring (Three-Year Hiring Plan) and program planning (Three-Year Program Plan).

In Spring 2018, Academic Affairs received reports from each of the colleges and requested updates on any programs that fell within the 5th quintile from the 2012-13 Program Prioritization Process, and which are still being flagged as not producing the number of degrees. However, it became clear that the budget model of ISU was one of the challenges in addressing program growth. With the arrival of a new president, and knowing changes were on the horizon, in Summer 2018 Academic Affairs determined that ISU needed a more comprehensive Program Health and Sustainability model that had broad campus support and was built in collaboration with Faculty Senate. A committee of representatives from each college, the Faculty Senate Co-

[1] https://boardofed.idaho.gov/wp-content/uploads/2018/02/VB-Budget-Policies-0218.pdf

https://boardofed.idaho.gov/wp-content/uploads/2019/11/IIIF-Program-Prioritization-1019.pdf

chairs, staff from Academic Affairs, Institutional Research, and the Budget office was formed. They had the following charge:

> A Program Health & Sustainability assessment model should be aligned with the institutional mission, while evaluating student demand and providing indicators of quality. It should include measures for efficiency and effectiveness and ensure sufficient resources. Finally, it should be flexible and change as necessary over time.

The goal was to have a revised comprehensive self-assessment model ready to use by Spring of 2019 that supports the health and sustainability of all programs at ISU. This goal was a soft deadline dependent upon the progress of the committee and originally based on the ability of colleges to use these data as part of the budget process.

Progress:
The committee met monthly during Summer and Fall 2018 as well as Spring 2019 for 2-3-hour meetings. The committee refined the definition/charge of what a Program Health and Sustainability model should encompass and identified proposed metrics and from where the sources of data may be obtained. After a revision of the Idaho State Board of Education Governing Policies and Procedures: Section III, subsection F Program Prioritization, the committee began planning final meetings in Spring of 2020 to complete the draft model presented below.

Proposal:
Program Health and Sustainability should be a deliberately iterative process at ISU. As such, the Assessment Criteria Matrix presented below represents the first, certainly not the final, iteration of the model. Before presenting the proposed assessment matrix, it is important to offer further context. This model needs to be considered within two timeframes. While these frames are related, there are distinct differences. The first frame is during the next 12 months. During this time all programs will use the proposed assessment matrix to complete a full evaluation. These evaluations will serve multiple purposes: to define "programs," to determine a baseline for each program, and to discover data inconsistencies related to current Institutional Research reporting. Idaho SBOE policy does not specifically define what should constitute a program; through its work, the Program Health Committee has decided that what constitutes a program would be best determined at the local level. For example, there are departments that might reasonably be designated as a single program, while others might contain multiple programs. The committee believes the local academic units are much better situated to make these recommendations as their faculty are the experts in the intricacies of their organizations and disciplines. Once local units have determined their programs, the proposed Assessment Criteria Matrix will be used to conduct a complete evaluation to determine the baseline of the program. The committee understands in completing this baseline, inaccuracies in data reporting will be discovered. No program will be liable for the implications of these inaccuracies. On the contrary, the intention in the first iteration of assessment is to discover them and devise a plan to correct data reporting for future assessment.

After the baseline assessments are established, the revised Assessment Criteria Matrix will be employed for one of two reasons: if a program has fallen below triggering benchmarks, or at the end of five years as a part of regular assessment required by State Board policy. The committee has concluded that one of three options should be chosen by programs as their triggering benchmark. Again, the local experience and expertise of program faculty is best suited to making this determination. These three options include (1) degree/certificate production, (2) student credit hour generation, or (3) a combination of the two. The committee supports using the current standard of degree/certificate production of a five-year rolling average based on the level of award as follows:

- $\leq$5 at the associate and certificate level
- $\leq$10 at the undergraduate level
- $\leq$5 at the master's level
- $\leq$3 at the doctoral level

If a program determines that credit hour production is a better indicator of its most significant contribution to the institutional mission, it can choose to use that as its triggering mechanism. The committee suggests that two possible measures would be useful in this case: a credit hour decline $\geq$ 5% within the last academic year, or $\geq$10% within the last three years. For those programs that determine that both degree/certificate production and credit hour generation best reveal their contribution to the university mission, they may choose to establish a mechanism based on both. Again, only programs that fall below their established triggering criteria would be required to conduct a full assessment based upon the proposed Assessment Criteria Matrix before the required five-year SBOE requirement. The specific intention of these reviews would be to establish a plan, including relevant support, to improve the outcomes of the program moving forward.

Based upon initial feedback, the committee believes several issues need to be addressed in this proposal. First, some have suggested that the committee should have developed specific, absolute metrics to be equally applied to all programs. In its initial meetings, the committee sought to determine such measures and was unable to suggest any, as any such measure would be unlikely to accurately represent the unique contributions of the broad variety of programs at ISU. In a similar vein, some have suggested that the committee should have offered specific standards against which all programs should be compared. No such standards are defined or required by SBOE policy and as with the absolute metrics discussed above, the committee determined such standards applied across all programs would yield inaccurate results. The committee also believes that work on such absolute metrics and standards could be explored in the future based upon the data collected following its initial use.

Another issue the committee has grappled with and which has been repeated through feedback is the nature and definition of the terms quality, efficiency, and effectiveness. Once again while these criteria are required by SBOE policy, they are not defined, and, again, the committee believes unit faculty can best operationalize these terms based on their experience and expertise at the program level. The constant value and belief that guided this faculty committee is that

faculty expertise at the local level is best suited to determine specifics related to assessing the health of its academic program. We present this intentionally flexible Assessment Criteria Matrix to allow them to begin that work, while having incorporated all required elements from SBOE policy. The committee has never interpreted SBOE policy as requiring competition among programs for survival or legitimacy. Instead the committee endorses this model intended to allow programs the ability to evaluate their health through comparison within their own context and discipline.

Finally, recognizing that program health and sustainability is, and should be, an ongoing process and that it should have meaning and legitimacy, the committee calls for continuing faculty representation on any group related to these assessments moving forward. At a minimum there should be one faculty member from each academic unit and one representative from Faculty Senate on any such body.

Program Health & Sustainability Assessment Criteria Matrix

Definition/Charge:

A Program Health & Sustainability assessment model should be aligned with the institutional mission, while evaluating student demand and providing indicators of quality. It should include measures for efficiency and effectiveness and ensure sufficient resources. Finally, it should be flexible and change as necessary over time.

Assessment Criteria Matrix:

Student Demand: 30%	Quality: 20%	Efficiency: 20%	Effectiveness: 20%	Resources: 10%
- Number of student credit hours generated*	*Academic* (e.g.): - Recognition of specialized accreditation or specialized external review * - Assessment metrics - Teaching awards* - Student awards**	- Student credit hours by faculty FTE, including program characteristics and norms*	- Mission alignment	*Human* - Faculty/staff support*** - Availability of faculty/adjuncts**
- Number of degrees awarded*	*Research* (e.g.) - Research Awards* - Fellowships (faculty)* - Creative and scholarly activity - Grant funding	- Course enrollment (number of students in the courses, including program characteristics and norms)*	- Student retention**	*Facilities*** - Adequate space to meet program needs - Rooms running at capacity - Technology/Distance Ed (conflict schedule) - Laboratory equipment
- Number of qualified applicants vs available seats**	- Alumni preparation/outcomes (work/life preparation; success)**	- Faculty teaching in multiple programs (cross-listed or satisfies multiple program requirements)***	- Licensure rates* - Job placement/ employability** - % accepted into graduate school**	*Financial* - Competitive Salaries*** - Benefits*** - Operating budgets***
- Only program offered in the State of Idaho	- Faculty professional leadership and service	- Curricular efficiency, e.g. Duplication of courses, review of outdated courses ***	- Alumni satisfaction (experience)**	

* Data available from Institutional Research Office using current reports

** Data may be available at the departmental or program level

***Data may be able to be generated by Institutional Research Office with special report

Appendix B Score Sheet

PROGRAM HEALTH RUBRIC

Component	Minimal/Limited	Moderate/Satisfactory	Exceptional
Score	1-3	4-6	7-9
Student Demand (30%)	Few degrees are awarded and department produces a limited amount of SCHs, even though program is not limited by number of available seats	A moderate number of degrees is awarded or the department produces a large amount of SCHs.	A large number of degrees is awarded and the department produces a large amount of SCHs, or the program demonstrates excess demand for seats.
Quality (20%)	Program has limited evidence of quality in student, faculty, and alumni outcomes.	Students, faculty, and alumni demonstrate a satisfactory level of quality.	Students, faculty, and alumni demonstrate excellence and external recognition.
Efficiency (20%)	Relatively low SCH/FTE; relatively low course enrollments given pedagogical restrictions; evidence of duplication of courses with other programs and failure to remove outdated courses	Moderate SCH/FTE and course enrollments. Program has made some effort to avoid duplication and update curriculum.	Relatively high SCH/FTE and course enrollments. Program collaborates with other programs to avoid duplication of courses when possible and keeps curriculum up to date.
Effectiveness (20%)	Relatively low student retention; lack of mission alignment; lack of evidence of student achievement and/or satisfaction after graduation	The program has some alignment with university's mission; moderate levels of student retention; some evidence of student achievement post-graduation	The program is well aligned with the university's mission; strong level of student retention; strong evidence of student achievement post-graduation
Resources (10%)	Inadequate facilities; non-competitive salaries; lack of support for faculty/staff; operating budget has shrunk over recent budget cycles	Facilities adequate to meet current program needs; average salaries for disciplines; adequate support for faculty/staff; adequate operating budget	Facilities are up to date and may accommodate program expansion; salaries are above average for discipline; strong support for faculty/staff; operating budget has grown over recent budget cycles

Appendix C Program Health Instructions

PROGRAM HEALTH INSTRUCTIONS

1. **Files**: all materials are located in a Box folder that has been shared with your college. These materials include:

File or link name	Description
Matrix – annotated 9-2-20.docx	Program Health Model (matrix) annotated with data locations in red font.
Program Health Model Questionnaire.boxnote	Google Form questionnaire to collect qualitative information
Program Health Narrative for Scoring.boxnote	Google Form to collect narrative information that accompanies scoring.
Program Health Data (On-campus or VPN to access).boxnote	Link to a website that contains SCH (student credit hours) and Degrees Awarded. **You must access this data on campus or use a VPN.**
PH additional data 9-2-20.xlsx	Average SCH; retention; average degrees; FTE; course headcount
PH RUBRIC.pdf	Rubric for scoring.
Faculty 4-Digit Multi-Discipline Report 2019-20 ISU peers.pdf	Salary information for ISU peer institutions.
Faculty 4-Digit Multi-Discipline Report 2019-20 Carnegie comparison.pdf	Salary information for Carnegie institutions.

Within your departmental subfolder are additional materials, including:

- **(Program name).xlsx** contains personnel and operating budget data
- **Program Health Score sheet College of (college name).xlsx** (for scoring)
- Questionnaire summaries, which will be placed in the subfolders after submission

If your folders are missing information, please contact Joanne Tokle (tokljoan@isu.edu) or Stefanie Shadduck (shadstef@isu.edu).

2. **Steps:**

A. Complete **Program Health Model Questionnaire.boxnote** first.

- Please click submit when you have completed the questionnaire so you don't lose your data.
- Instructions for locating information are embedded within the questionnaire.
- A copy of your responses will be sent to your email after the questionnaire has been submitted and your answers will be returned to your Box subfolder in a summary sheet.

- If you want to run reports in Activity Insight (Digital Measures) and need assistance, please contact the Office of Assessment at assessment@isu.edu.
- Please note that in the Quality category, do not list the names of recipients of teaching awards, student awards, etc., just enter a summary of how many awards at the university level, how many at the national level, etc. Likewise, please do not input a list of faculty publications; summarize the publications (or creative/scholarly work) with an explanation of quality.

B. Use **Matrix – annotated 9-2-20.docx** to identify which items to use for each category and where to find the information.
C. Use **PH RUBRIC.pdf** to arrive at scores for each of the Program Health Model categories: Student Demand; Quality; Effectiveness; Efficiency; and Resources. Rate each category on a scale from 1-9, where
   - 1-3 is minimal/limited
   - 4-6 is moderate/satisfactory
   - 7-9 is exceptional.

PH Additional Data.xlsx, in the tabs labeled AVG SCH and AVG DEGREES, has college and university averages for "student credit hours" and "degrees awarded" which are provided for comparison.

Some programs do not have complete data sets. For example, alumni satisfaction is a component of Effectiveness, but not every program has alumni satisfaction surveys to use. Do not score your program "0" if you don't have that information; use other components (mission alignment, student retention) to arrive at a score.

D. Enter scores in the file **Program Health Score sheet College of (college name).xlsx** in the rows indicated for your program, in the tab designated for your role (Program Director or Department Chair, Dean, or Provost). Save the file using your program name and upload it into your subfolder in Box.

A total score will be calculated for you, using the proportions from the matrix (30% for Student Demand, etc.).

E. Use **Program Health Narrative for Scoring.boxnote** to discuss information that may not have been captured in the scoring exercise. Remember to click submit when you are finished.
F. Deans will place programs into quintiles, per SBOE Policy III.F.4. Programs in the two lowest quintiles will need an action plan prior to the beginning of the budget process.

ALL PROGRAM HEALTH SUBMISSIONS ARE DUE BY NOVEMBER 2, 2020.

Appendix D Narrative Template

NARRATIVE TO ACCOMPANY PROGRAM HEALTH SCORES

1.) Explain/summarize the main factors that impacted this program's overall scoring.
2.) Please include information about this program that could not be adequately captured in the metrics. For example, is it a new program?
3.) Provide any additional information that may impact this program's health and sustainability.
4.) Explain/summarize the factors that contribute to the success of high scoring programs.

Appendix E Engagement Plan Template

Program Health Engagement Plan

Some programs are required to submit plans for communication and stakeholder feedback to the Provost by February 26, 2021. Please send plans directly to Stefanie Shadduck at shadstef@isu.edu.

Resources:

- Program Health Timeline
- Program Health Action Plan Template
- Academic Affairs: for questions, information or meeting requests, etc. contact Joanne Tokle at tokljoan@isu.edu or x2934

Suggested Guiding Framework*

College/Division: **Date: February 26, 2021**

Topic	Stakeholders (ex: chairs, faculty, staff)	Identify Engagement Method (ex: chair's meeting, email, forum)	Identify Date(s)
Timeline and process for program action plan development	Chairs and Faculty		
Phase III discussion of program action plans that impact FY22 budget	Chairs and Faculty		Specify date; plans due to AA March 5, 2021
Phase III discussion of program action plans that impact later budgets	Chairs and Faculty		Specify date; plans due to AA May 1, 2021
Phase IV communication with faculty on final budget plans	Chairs and Faculty		May 10-14, 2021

Appendix G Program Health Actions and Recommendations

PROGRAM HEALTH ACTIONS AND RECOMMENDATIONS: COLLEGE OF ARTS AND LETTERS

- All Quintile 1 and 2 programs in the College of Arts and Letters should submit progress reports on their action plans by November 1, 2021, via the Program Review/Program Health Annual Report.
- Programs should work with Academic Advising and Enrollment Management to develop successful retention plans.
- Programs are encouraged to seek workforce alignment were appropriate, like the newly added Commercial Music option for the BFA in Music and the proposed BFA in Digital Media.
- Programs are encouraged to build collaborative efforts with other departments, such as the BFA in Digital Media between Art and CMP, and with other academic units, to support students and realize efficiencies.
- Programs are encouraged to continue their expansion of course delivery methods.
- Programs are encouraged to develop or adopt Open Educational Resources were appropriate, especially for General Education courses.
- Summary of actions: 3 program eliminations (and one more likely elimination); 1 new program; 13 improvement plans; 3 investment/reallocation of resources; 1 other innovation.

Program	Issues & concerns	Actions	Plan Highlights	Deadlines	Other	Budget impact	Student impact
BA Anthropology	Low enrollment	Improvement plan	Revise curriculum; develop marketing plan; improve assessment	UCC deadline 9/20/21; submit action plan progress report by 11/1/21		Expected positive impact from enrollment growth	Improve opportunity and access
BFA Art	Retention	Improvement plan, new program	Work with Academic Advising to improve retention; develop BFA Digital Media; hire studio technician; develop alumni database	Retention--Spring 2022; BFA Digital Media--in process	New BFA in Digital Media better aligns with workforce needs	Will require more resources, but expected positive impact from enrollment growth and improved retention	Improve access and opportunity
MFA Art	Low enrollment	Improvement plan, investment - reallocation of resources	Reconsider viability of program in one year; reassign GTA teaching duties; hire studio technician;	Evaluate feasibility of program in 2022	Have suspended admissions over next year	Will require more resources	Reduced access and opportunity over next year

			develop alumni database				
MA CMP	Low enrollment, resources	Improvement plan	Increased advertising; develop fully online option; develop 4+1 option	UCC deadline 9/20/21; Graduate Council 11/3/2021		Expected positive impact from enrollment growth	Improve access and affordability
UG certificate French	Low enrollment	Potential elimination	Program is on hold while exploring improvement plans; use OER materials to make courses affordable	UCC 9/20/2021; SBOE 6/2022		Reduced cost of adjuncts if program is eliminated	Limited impact
UG certificate German	Low enrollment	Elimination	Proceed with discontinuation	UCC 9/20/2021; SBOE 6/2022		Reduced costs	Limited impact
UG certificate Japanese	Low enrollment	Improvement plan	Take action to increase enrollment and make courses more affordable	Submit action plan progress report 11/1/2021	Program has $195,000 endowment to support student research and study abroad	Neutral	Improve affordability
UG certificate Spanish	Low enrollment	Improvement plan, other innovations	Improve marketing; increase outreach to other ISU programs; increase outreach to high schools	Submit action plan progress report by 11/1/21		Expected positive impact from enrollment growth	Improve access and opportunity
AA Russian	Low enrollment	Elimination	Proceed with discontinuation	UCC 9/20/2021; SBOE 6/2022		Reduced costs	Limited impact
AA Shoshoni	Low enrollment	Improvement plan	Targeted marketing campaign; additional dual enrollment courses; develop certificate in Indigenous Language Teaching	For certificate, UCC 9/20/2021; SBOE 6/2022; submit action plan progress report 11/1/2021		Expected positive impact from enrollment growth	Improve access and opportunity

MA Interdisciplinary Studies	Low enrollment	None			Program has no resources of its own		
BA/BFA Music	Low enrollment, retention, resources	Improvement plan, investment - reallocation of resources, new program component	Program will begin offering a commercial music option; potential restructure of administrative duties; increased recruiting; renewed focus on advising; development of scholarship resources	Submit action plan progress report by 11/1/21	Commercial music option aligns with workforce needs	Expected positive impact from enrollment growth and increased retention	Improve access and opportunity
M.Ed. Music	Low enrollment, resources	Improvement plan	May adjust sequencing of courses	Submit action plan progress report by 11/1/21	This program for music teachers is offered during the summer, with one summer online, and is offered on a cohort basis subject to student demand	Neutral	
Graduate certificate Philosophy	Low enrollment	Improvement plan	Increase awareness of certificate in Biomedical Ethics to local healthcare practitioners and healthcare programs at ISU; use online delivery	Submit action plan progress report by 11/1/21	Relatively new program that needs time to grow	Expected positive impact from enrollment growth	Improve access and opportunity
BA, UG certificate Philosophy	Low enrollment	Improvement plan	Increase use of online delivery; increase awareness of Biomedical Ethics undergraduate certificate	Submit action plan progress report by 11/1/21	Certificate is relatively new and needs time to grow; department	Expected positive impact from enrollment	Improve access and opportunity

					supports general education		
BA Theatre	Low enrollment, retention, resources	Improvement plan	Increased collaborations with other ISU programs, e.g. health professions; increased recruiting and outreach activities; increased interprofessional education activities	Submit action plan progress report by 11/1/21	Program accreditation restricts class size; program is essential for community outreach and engagement	Expected positive impact from enrollment growth	Improve opportunity and access
MA Theatre	Low enrollment	Elimination	Proceed with discontinuation	In process		Reduced costs	Limited impact

PROGRAM HEALTH ACTIONS AND RECOMMENDATIONS: COLLEGE OF BUSINESS

- All Quintile 1, 2 and 3 programs in the College of Business should submit progress reports on their action plans by November 1, 2021, via the Program Review/Program Health Annual Report.
- Programs should work with Academic Advising and Enrollment Management to develop successful retention and recruitment plans.
- Programs are encouraged to work collaboratively with other departments and colleges to support students and realize efficiencies.
- Programs slated for discontinuance should initiate the required SBOE and Graduate Council paperwork.
- Summary of actions: 2 program eliminations, 1 restructure, 3 other innovations.
-

Program	Issues/Concerns	Action	Plan Highlights	Deadlines	Other	Budget impact	Student impact
AS Business	Low enrollment	Other innovations	Cease promotional spending	Submit action plan progress report by 11/1/21	Program has no additional cost as all courses are offered for other programs	Limited	Limited
BBA General Business	Low enrollment	Other innovations	Cease promotional spending	Submit action plan progress report by 11/1/21	Program has no additional cost as all courses are offered for other programs	Limited	Limited
BS/BBA Economics	Low enrollment	Restructure, improvement plan	Improve retention	Submit action plan progress report by 11/1/21	Program has started growing since recent elimination of BA and addition of BBA	Expected positive as enrollment grows	Improve opportunity and access
Graduate Certificate Business	Low enrollment	Elimination	Proceed with program discontinuance	Graduate Council 11/3/21; SBOE 6/2022		Neutral	Limited
BBA Informatics	Low enrollment	Other innovations	Change degree name as it is confusing; explore	Planned for 2022, after upcoming		Neutral	Improve workforce alignment

			feasibility of BBA in Data Analytics	accreditation. Submit action plan progress report by 11/1/21			
MTax	Low enrollment	Elimination	Proceed with program discontinuance	Graduate Council 11/3/21; SBOE 6/2022	Program will be replaced by adding a tax emphasis to the MAcc	Reduce costs	Limited

PROGRAM HEALTH ACTIONS AND RECOMMENDATIONS: COLLEGE OF EDUCATION

- All Quintile 1 and 2 programs in the College of Education should submit progress reports on their action plans by November 1, 2021, via the Program Review/Program Health Annual Report.
- Programs should work with Academic Advising and Enrollment Management to develop successful retention plans.
- Programs slated for discontinuance should initiate the required SBOE paperwork.
- The College of Education should work with the Kasiska Division of Health Sciences to reallocate the MS in Athletic Training to health sciences to align with accreditation standards.
- The College of Education should hire appropriate personnel to support the MS in Deaf Education.
- Action summary: 1 program elimination; 6 improvement plans; 4 investment or reallocation of resources; 2 other innovations.

Program	Issues & concerns	Actions	Plan Highlights	Deadlines	Other	Budget impact	Student impact
BA Early Childhood Education	Low enrollment	Improvement plan	Develop ties with CSI and COT to attract AA students; increase recruiting	Submit action plan progress report by 11/1/2021		Expected positive with enrollment growth	Improve access and opportunity
MA Early Childhood	Low enrollment	Elimination	Proceed with program discontinuation	Graduate Council 11/3/2021; SBOE 6/2022	No students currently enrolled	Limited	Limited impact
M.Ed. Educational Leadership	Program needs to refocus	Other innovations, consolidation	Curriculum revision and outreach; provide direct path for M.Ed. Students into Ed.D. Program	Graduate Council 11/3/2021; solicit student feedback on changes, 2023		Expected positive with enrollment growth	Improve access and opportunity
Ed.D. Instructional Design and Technology	Low enrollment	Improvement plan	Increase marketing and recruitment, offer related professional development opportunity	Submit action plan progress report by 11/1/2021		Expected positive with enrollment growth	Improve access and opportunity
M.Ed. Instructional	Low enrollment	Improvement plan	Increase marketing and recruitment, offer related	Submit action plan progress		Expected positive with	Improve access and opportunity

Design and Technology			professional development opportunity	report by 11/1/2021		enrollment growth	
MA Literacy	Low enrollment	Improvement plan, investment - reallocation of resources	Revise curriculum and realign to current standards; convert to online delivery; market program	Graduate Council 11/3/2021	Program is currently suspended but plans to restart in 2-3 years	Neutral, for now	Improve access and opportunity
MS Deaf Education	Low enrollment	Investment-reallocation of resources	Need to hire faculty member to staff program	Submit action plan progress report by 11/1/2021	No other deaf education programs in state	Increase cost with new hire	Improve access and opportunity
MS Athletic Training	Low enrollment	Investment-reallocation of resources, other innovations	Address accreditation requirements, including staffing, facilities, and move to KDHS	Notification to SBOE by 6/2022; new faculty member by 2022	Program is moving to KDHS	Increase cost with new hire and facility update	Improve access and opportunity
BA Special Education	Low enrollment	Improvement plan	Meet QM standards for online classes; support undergraduate behavioral certification in collaboration with Clinical Psychology	Submit action plan progress report by 11/1/2021		Decreased cost with efficiencies from collaboration	Improve access and opportunity
MA Special Education	Low enrollment	Improvement plan	Streamline curriculum; offer graduate behavioral certification; communication and advising plans; purchase simulation lab	Submit action plan progress report by 11/1/2021	Program is currently suspended but plans to restart	Increased cost of simulation lab	Improve access and opportunity

PROGRAM HEALTH ACTIONS AND RECOMMENDATIONS: COLLEGE OF SCIENCE AND ENGINEERING

- All Quintile 1 and 2 programs in the College of Science and Engineering should submit progress reports on their action plans by November 1, 2021, via the Program Review/Program Health Annual Report.
- Programs should work with Academic Advising and Enrollment Management to develop successful retention plans.
- Programs are encouraged to seek workforce alignment were appropriate, like the proposed restructure of the graduate programs in Mathematics.
- Selected graduate programs should develop "4+1" accelerated programs that provide streamlined pathways from undergraduate programs into graduate programs, increasing access and affordability for students.
- Programs are encouraged to develop or adopt Open Educational Resources were appropriate, especially for General Education courses.
- Programs are encouraged to identify alternative methods of course delivery to broaden student recruitment.
- Programs slated for discontinuance should initiate the required SBOE paperwork.
- Additional GTA (graduate teaching assistants) allocations will be based on application numbers, program capacity, time to degree completion, and program alignment with the strategic priorities and objectives of the college.
- Action summary: 2 program eliminations; 2 new programs; 5 improvement plans; 4 investment/reallocation of resources; 5 other innovations.

Program	Issues & concerns	Actions	Plan highlights	Deadline	Other	Budget impact	Student impact
BS Health Physics	Low enrollment and graduation rates	Improvement	Expand distance learning capabilities; enlist help from other departments to deliver coursework, as Health Physics has one faculty member	By Spring 2022, program will develop plan for sustainability	Enrollment is expected to grow as new nuclear technologies expand in Idaho such as the Small Modular Reactors	Neutral	Improve access and opportunity
AS Health Physics	Low graduation rates	None	Currently inactive, leave on books in case INL needs			None	None
MS Environmental Science and Management	Low enrollment	Investments/ reallocation; other innovations	Develop 4+1 program to streamline pathway for students into graduate program; increase recruiting; request more GTAs	Curriculum: UCC 9/20/21; Graduate Council 11/3/21	Multi-disciplinary program with multiple feeder programs	Expected positive impact as enrollment grows	Improve opportunity, access and affordability

MS Mechanical Engineering & MS Measurement & Control Engr	Low enrollment; lack of resources	Investments/ reallocation; other innovations	Develop 4+1 programs; rebuild recent faculty losses; pursue grant funding; secure permanent ongoing funding for MCERC (Measurement and Control Engineering Research Center)	Curriculum: UCC 9/20/21; Graduate Council 11/3/21		Expected positive impact as enrollment grows	Improve opportunity, access and affordability
MS Environmental Engineering	Low enrollment	Investments/ reallocation; other innovations	Develop 4+1 program to streamline pathway for students into graduate program; increase recruiting; request more GTAs; encourage students to become licensed to increase their employment opportunities	Curriculum: UCC 9/20/21; Graduate Council 11/3/21	Only graduate Environmental Engineering program in Idaho; shares courses with other programs	Expected positive impact as enrollment grows	Improve opportunity, access and affordability
PhD Engineering and Applied Science	Low enrollment	Investment/ reallocation; other innovations	Add focus area to diploma; request GTAs; increase recruiting		Discussions beginning with BSU for Civil Engineering track	Positive if grant funding increases	
MS and PhD Physics	Low enrollment and other issues	Improvement plan	Must develop strategic plan for moving forward; status of graduate programs contingent on success of plan	Department strategic vision plan due 1/2022		Unknown	
AS Physics	Low enrollment	Improvement plan	Student recruitment			Neutral	
AS Math	No enrollment	Elimination	Proceed with discontinuation	File program discontinuance with SBOE by 6/2022	No teach out needed; no students currently enrolled	None	None
MS and DA Math	Low enrollment	Improvement plan	Extensive plan for refocusing the department and aligning to current workforce needs; potential for substantial change in direction and focus of graduate programs	Program will be reevaluated in 2023		Expected positive impact as enrollment grows	Improve workforce alignment

MS Civil Engineering	Low enrollment	Other innovations	Develop 4+1 program; working with community colleges on articulation agreements to increase the number of BS graduates to feed into the MS program; increase recruiting; request more GTAs	Curriculum: UCC 9/20/21; Graduate Council 11/3/21	Accrediting agency has been promoting MS degree for graduates to practice as licensed professional engineers	Expected positive impact as enrollment grows	Improve opportunity, access and affordability
BS Electrical Engineering	Declining enrollments	Improvement plan and new program	Develop BS in Electrical & Computer Engineering to refocus on more relevant workforce needs statewide and nationally	New program scheduled for review at SBOE in August	Evaluating need for MS in Electrical and Computer Engineering	Unknown	Improve access and opportunity and alignment with workforce needs
Graduate certificate Nuclear Engineering	No enrollment	Elimination	Proceed with discontinuance	File program discontinuance with SBOE by 6/2022	No teach out needed; no students currently enrolled	None	None

PROGRAM HEALTH ACTIONS AND RECOMMENDATIONS: COLLEGE OF TECHNOLOGY

- All Quintile 1 and 2 programs in the College of Technology should submit progress reports on their action plans by November 1, 2021, via the Program Review/Program Health Annual Report.
- Programs should work with Academic Advising and Enrollment Management to develop successful retention plans.
- Programs are encouraged to work collaboratively with other departments and colleges to support students and realize efficiencies.
- Programs are encouraged to capitalize on Dual Enrollment, high school networking, and Online Idaho.
- Action summary: 11 improvement plans; 2 restructures; 2 investment/reallocation of resources; 4 other innovations; 2 new programs

Program	Issues & concerns	Actions	Plan highlights	Deadlines	Other	Budget Impact	Student Impact
Advanced Manufacturing	Low enrollment, industry alignment	Improvement plan, restructure, other innovations	Improve outreach communications; identify more industry partners; create certificates for specific skills	Submit action plan progress report by 11/1/2021; COT internal deadlines in 2022; UCC 9/20/22; SBOE 6/2023		Expected positive from increased enrollment	Improve access and opportunity, workforce alignment
Apprenticeship	Low enrollment in AAS	Improvement plan	Increase use of PLA credit	Submit action plan progress report by 11/1/2021		Expected positive from increased enrollment	Improve opportunity, access and affordability
BAS	Low enrollment	Improvement plan	Increased outreach to AAS graduates	Submit action plan progress report by 11/1/2022		Expected positive from increased enrollment	Improve opportunity and access
BS Health Science	Low enrollment	Improvement plan	Streamline and update curriculum; purchase Digital Cadaver Lab table; greater collaboration with Health Occupations program	UCC deadline 9/20/2021		Expected positive from increased enrollment	Improve access and opportunity

Business Technology	Low enrollment and employment outlook	Investment - reallocation of resources, other innovations, new programs	Greater collaboration with College of Business; add specialized certificate in Cloud Computing	Submit action plan progress report by 11/1/2021; specialized certificate is already in process		Initial cost for Cloud Computing but expected positive impact with enrollment growth	Improve opportunity and access
Civil Engineering Technology	Low enrollment, retention, licensure rates	Improvement plan	Program is already seeing gains from actions taken over the last year, including 2+2 pathway with Surveying and Geomatics Engineering Technology	Submit action plan progress report by 11/1/201		Expected positive from increased enrollment	Improve opportunity and access
Machining	Low enrollment and retention	Improvement plan	Develop strategies to increase retention; work with industry partners on recruitment and marketing	Submit action plan progress report by 11/1/2021		Expected positive from increased enrollment	Improve opportunity and access
Early Childhood Care and Education	Low wage industry upon graduation	Other innovations	Program weakness is outside of institution's control; no action warranted		Enrollment is strong but program scored low due to post-graduation wages of graduates	Expected positive from increased enrollment	Provide opportunity
ESTEC Mechanical Engineering Technology	Low enrollment, industry alignment, program recognition	Improvement plan, restructure, other innovations	Increase recruiting and outreach to improve recognition; create certificates for specific skills and specialized certificate for industrial mechanic	UCC 9/20/2021, SBOE 6/2022		Expected positive from increased enrollment	Improve opportunity, access, affordability, workforce alignment
Law enforcement	Low enrollment of degree-	Other innovations	Increase use of PLA credit to encourage non-degree seeking students to enroll in program	Submit action plan progress report by 11/1/2021	Program is a mix of non-credit (workforce	Expected positive from increased enrollment	Improve opportunity, access, and affordability

	seeking students				training) and degree-seeking students		
Paralegal Studies	Low enrollment	Improvement plan, new program	Continue marketing and recruitment of dual-credit high school students; create online micro-certifications	SBOE proposal in process		Expected positive from increased enrollment	Improve opportunity, access, and affordability
Pharmacy Technology	Low enrollment	Improvement plan	Increase dual enrollment opportunities for high school students; collaborate with HIT program	UCC 9/20/2021	Program already collaborates with College of Pharmacy	Expected positive from increased enrollment	Improve opportunity, access, and affordability
BS Respiratory Therapy	Low enrollment, licensure pass rate, resources	Improvement plan	Initiate networking with high schools; develop BS completion degree; improve course sequencing; update equipment	SBOE proposal in process	Licensure pass rates have improved	Additional cost of resources, but enrollment is expected to grow	Improve opportunity and access
Unmanned Aerial Systems	Low enrollment, retention	Improvement plan	Work on job placement of graduates; increase enrollment and retention; upcoming program review will provide more guidance	Submit action plan progress report by 11/1/2021		Expected positive from increased enrollment	Improve opportunity and access

PROGRAM HEALTH ACTIONS AND RECOMMENDATIONS: KASISKA DIVISION OF HEALTH SCIENCES

- All Quintile 1 and 2 programs in the Kasiska Division of Health Sciences should submit progress reports on their action plans by November 1, 2021, via the Program Review/Program Health Annual Report.
- Programs are encouraged to develop alternative methods of course delivery to broaden student recruitment, where appropriate.
- Programs should restructure programs based on market analysis.
- Programs slated for discontinuance should initiate the required SBOE paperwork.
- The Kasiska Division of Health Sciences should work with the College of Education to reallocate the MS in Athletic Training to health sciences to align with accreditation standards.
- Action summary: 1 program elimination; 1 new program; 5 improvement plans; 3 restructures; 3 investment/reallocation of resources; 5 other innovations.

Program	Issues and concerns	Actions	Plan highlights	Deadlines	Other	Budget Impact	Student Impact
Pharmacy programs	Program capacity, enrollment, recruitment, facilities	Improvement plan	Improve international recruitment efforts; expand online course offerings in MS program; increase student funding on grants; renovate Pocatello lab, expand Meridian lab	Most actions completed by 2022, with some going into 2023		Will require more financial resources	Improve access and opportunity
UG certificate Pre-Speech-Language Pathology/ Audiology	Low enrollment	Improvement plan, restructure, other innovations	Conduct market analysis; may restructure current program	UCC deadline 9/20/2021		Expected positive from increased enrollment	Improve access and opportunity
MS Nutrition with internship	Ensure success of new program moving forward	Progress plan	Faculty workload and compensation is an issue	Submit action plan progress report by 11/1/2022	New program; at capacity for available seats	May require more resources	Improve access and opportunity
MS Nutrition	Low enrollment	Elimination	Teach out current students and suspend admissions	Discontinuance on three-year	New program	Neutral	Limited impact

				plan, expected in 2024			
AS and BS Fire Services Administration	Low enrollment, retention	Improvement plan	Converted to online fee model at competitive rate; improve recruiting and retention; use QM for online courses; professional development program for adjunct faculty; encourage PLA	Submit action plan progress report by 11/1/2021; online fee already approved		Expected positive impact from increased enrollment within 2 years	Improve opportunity, affordability and access
Certificates Geriatrics	Low enrollment	Other innovations	Align certificates with other KDHS programs	UCC deadline 9/20/2021; Graduate Council 11/3/2021		Expected positive with increased enrollment	Improve opportunity and access
MS Health Informatics	Low enrollment	Investment, restructure	Program has been substantially revised to better place it for success. In addition, will increase marketing; explore dual degree options; accelerated degree completion opportunities; opportunities with external partners; new degree tracks; new faculty position; collaborations with healthcare organizations	Submit action plan progress report by 11/1/21	Program converted to online and is seeking accreditation; is better positioned for success	Expected positive impact from increased enrollment, greater cost if new faculty member is added	Improve opportunity and access
PhD Rehabilitation and	New program	Improvement plan	Apply for WRGP; develop interprofessional learning opportunities	Graduate Council deadline 11/3/2021	New program	Expected positive from increased enrollment	Improve access and opportunity

Communication Sciences			in collaboration with Graduate School and College of Health; improve assessment process				
Certificate Radiographic Science	New program	Other innovations	Increase marketing	Submit action plan progress report by 11/1/2021	Program is new and enrollments are increasing	Expected positive from increased enrollment	Improve opportunity and access
BS Sign Language Interpreting	Low enrollment	Investment - reallocation of resources, other innovations	Increase recruiting; outreach to alumni; request professional fees	Submit action plan progress report by 11/1/2021		Expected positive from increased enrollment	Improve opportunity and access
AS Sign Language Studies	Low enrollment	Investment - reallocation of resources, other innovations	Increase recruiting, including dual enrollment option for high school students	Submit action plan progress report by 11/1/2021		Expected positive from increased enrollment	Improve opportunity, access, and affordability
AS and BS Emergency Management	Low enrollment	Improvement plan	Add homeland security; convert to asynchronous delivery of courses; develop master's program; increase retention	Submit action plan progress report by 11/1/2021; addition of MS degree is underway		Expected positive from increased enrollment	Improve opportunity and access

Appendix I Non-Instructional Unit Review

Academic Affairs and Office of the Provost Non-Academic Assessment (Fall 2020)

I. Executive Summary

Idaho State University's (ISU) Division of Academic Affairs (AA) and Office of the Provost is composed of five non-academic units, the Kasiska Division of Health Sciences, and five colleges (see Organization Chart). Academic Affairs is led by the university's Executive Vice President and Provost, Laura Woodworth-Ney, Ph.D. Supporting Dr. Woodworth-Ney are three vice provosts, an associate vice president, and staff (Staff and Contacts).

The Division's purpose is to support the academic mission of the institution, to represent the academic mission at the Administrative Council level, and to support and execute the development and implementation of the overall ISU plan. It aligns itself with the University's mission and core themes through its current operational plan. Guiding the Division's employees is its mission, vision, and values.

Mission:

We serve ISU by framing a dynamic academic enterprise that develops graduates who enrich the world.

Vision:

To empower students, faculty, and staff in the pursuit of scholarly excellence.

Values:

- Leadership-*Cultivate collaboration, service, and excellence*
- Passion-*Champion education to transform lives and communities*
- Learning-*Nurture intellectual curiosity and creative engagement*
- Adaptability-*Responsive and flexible in a dynamic higher education environment*
- Strategic-*Proactive in shaping the future of the Academy*
- Inclusivity-*Embrace diversity and respect open inquiry and dialogue*

As a whole, the Division is always striving to achieve its mission and vision. Academic Affairs actively supports student and faculty achievements; meets the State Board of Education and Northwest Commission on Colleges and Universities' requirements; is planning and implementing President Satterlee's organizational priorities; and is always focused on achieving a thriving, favorable work environment for its employees.

The Division has experienced a great deal of change in the last five years. The Division transformed its organizational structure twice, first under President Vailas, ISU's previous president, and again under President Satterlee. Both times it shifted the dynamics and responsibilities of the Division as a whole. The first shift occurred in 2016 after President Vailas promoted Dr. Woodworth-Ney to

Executive Vice President and temporarily reorganized the Finance and Administration, Research and Student Affairs Divisions under her leadership. In 2018, upon his arrival, President Satterlee restructured the vice president roles and additionally moved the Enrollment Management units to Student Affairs. These shifts in structure and responsibility both benefited and negatively impacted the Division.

An advantage of the 2016 reorganization was that the University's academic mission could be prioritized across all units and implemented. A negative impact was that managing an organization with such a diverse set of missions and a sizable organizational footprint gave the leadership very little time to focus on long-range planning. The reorganization in 2018 once again allowed the Academic Affairs leadership to refocus its efforts strictly on academic support requirements and the colleges. However, this new structure requires Academic Affairs to work harder at cross-communication between it and the other divisions and establish consensus on conflicting priorities.

As the Division moved into 2020, other challenges put significant demands on the leadership and staff. The operational response to COVID-19 required the Division to be flexible and nimble in its efforts to support the Colleges' ability to provide quality educational opportunities for students while keeping students, faculty, and staff safe. While the responsibilities associated with responding to the operational challenges of COVID-19 have taken priority, the everyday requirements of conducting university business have continued to move the institution forward. Administrators, faculty, and staff alike have been challenged when managing their workload, but the outcomes have demonstrated the organization's capability, adaptability, experience and talent.

II. Analysis

A. Unit Participation in the Reporting Process and Mission Alignment

1) Units within AA were responsible for submitting a non-academic assessment using the Office of Assessment outline. In some cases, if a unit recently completed a five-year program assessment or was responsible for a project charter that is proposing a program reorganization, they were allowed to use that document as their assessment. The units were given 30-days to complete their unit assessments and turn them into AA's Director of Operations and Planning. Reports were received from all of the units. Upon submission, the Director reviewed the assessments' completeness and used that review's results to complete this product.

2) In every case, the subordinate units' mission statements align with the missions of AA and the University. Institutional Effectiveness was the only AA unit without a mission statement, but as explained in its assessment, it aligns its activities to the AA mission statement. In addition, the units also demonstrated how they align their mission statements to the university's Core Themes. Aligning mission statements can be challenging to accomplish due to the complexity and variety of requirements each unit accomplishes. To that point, not every mission statement directly aligns with each of the Core Themes, but alignment to individual or multiple Core Themes is apparent.

University Mission/Core Theme Alignment

Units	Mission	CT 1	CT 2	CT 3	CT 4
Academic Affairs	X	X			X
IE (AA mission)	X	X			X
Assessment	X	X			
IR	X	X	X	X	X
PIE	X	X			
ETS	X	X	X		
IF	X	X	X	X	X
TF	X	X	X	X	X
IEI	X	X	X		
HEP	X	X	X		
Early College	X	X	X		X
UHP	X	X	X	X	
UT	X	X	X		
BB	X	X	X	X	X

B. Important Insights

1) One of the most significant insights identified throughout all of the assessments was the level of support AA provides to the non-academic and academic units as well as to ISU's students. AA provides valued services to support others' success, whether supporting faculty with professional development classes and one-on-one assessment assistance or teaching students to learn deductive reasoning, study and communication skills. Academic Affairs non-academic organizations clearly identified their customers and stakeholders, and those lists were wide-reaching and all-encompassing.

2) The majority of subordinate units had comprehensive assessments to determine their programs' level of effectiveness. The objectives were well crafted and achievable while the measures were concentrated, and the data sources were dependable. The analysis of those assessments was shaped by years of data collection and focused on their operational and action plans.

C. Strengths

1) COVID-19 Operational Planning and Execution

Academic Affairs has created an environment that supports a teamwork approach to problem-solving. When a problem arises within AA that cannot be easily resolved, the AA staff work together both internally and with external organizations to find a solution. While this would not normally be a highlight, but an expectation, a single event has contributed to the Division's successes and a greater than ever sense of teamwork; the COVID-19 response.

On March 13, 2020, ISU's Meridian Campus became the epicenter for the State's first case of COVID-19. While emergency management templates were in place to support a response to a pandemic, the details fell very short of reality. The initial response according to the plan was simply to exit the buildings. It didn't take into account what to do next. This quickly became apparent and the AA staff not only had to respond to its own operational challenges but ensure the faculty and staff were safe as well. More unexpectedly at the time, the call was made to transition over 5,000 sections from face-to-face courses to an online format in less than two weeks.

Dr. Laura Woodworth-Ney, Executive Vice President and Provost, had just lost a key vice provost, her right-hand person, who would have helped her lead this charge. This loss required her to rally her other division and college leadership and rely on them to coordinate the response and transition. Not only did the transition occur smoothly, but planning immediately began for the Summer Semester, the Fall Semester, and the requirements to support all of the other operational expectations of AA.

Seven months later, the AA's leadership team and staff, in close coordination with the deans and other Roaring Back Rebound Committees, are still planning and executing operational requirements on a daily basis. Deans Council, AA Executive and Core Team meetings, and the Roaring Back: Academic Affairs Committee meet on a regular schedule to discuss, coordinate, and produce plans and communicate those updates with the colleges and faculty. Additionally, AA coordinates with units across the campus to create a safe and effective learning environment for every faculty member and student who is attending classes. Not everything goes exactly as planned, but the wins significantly outweigh the losses.

The Division continues to support the execution and implementation of new technology in hundreds of classrooms. Over the summer, ITRC purchased almost 300 OWL cameras, 400 Chromebooks for student checkout, and 100 Dell laptops for faculty to support the online/hyflex transition.

2) Strong Relationships

Strong relationship building starts at the top of the organizational chart and is essential to every AA member. It is a trait that keeps Academic Affairs able to accomplish its mission and move toward achieving its vision. While not every faculty or staff member may agree with decisions that come forward, AA has worked diligently to create positive, mutually supportive relationships across campus. Below are only a few of the examples of how those relationships affect the University.

Institutional Effectiveness (IE), Office of Assessment, and Institutional Research (IR) have reputations for going above and beyond when meeting the colleges, departments, and

programs' needs. Since exporting strategic and operational planning to units in 2017, IE has worked with faculty, staff, students, and community stakeholders to create 34 plans. The Director of Assessment has built up trust with the faculty and department chairs and now provides one-on-one assessment planning with units who had never assessed student learning in the past. Institutional Research has established a reputation as a caring organization with non-academic and academic units that quickly provide data analysis and take the timely step of writing code to achieve specialized requests even when burdened with a heavy workload.

The student-centered organizations also have a positive reputation and, as a result, a positive impact at the University. While the leadership in those units see building relationships as an endless opportunity for improvement, the faculty and staff have already established themselves as partners with the academic units. They work closely with other faculty members to ensure students have the skills necessary to succeed throughout their academic careers.

Relationships are the key to success on the Idaho Falls (IF) and Twin Falls (TF) outreach campuses. Idaho Falls leadership and staff have an excellent reputation with its stakeholders like the Idaho National Laboratory and the Idaho Falls community, but it is focused on creating another strong partnership; this one with the College of Eastern Idaho. Since CEI's inception, IF staff and faculty have collaborated to create opportunities for students to continue their education. Another success story is the TF campus located at the College of Southern Idaho (CSI). The Twin Falls staff are a small but mighty contingent. Their mission statement contains the perfect example of linking CSI's mission and ISU's. They have successfully established a relationship with CSI that allows them to share facilities as a tenant and have focused on expanding their course offerings and degrees by using CSI faculty to teach ISU courses.

The ETS and PIE successes are built on relationships. Both organizations are at the front lines of faculty support. They have sought out and created opportunities that continuously improve their relationships with the academic community. Whether it is the focus on technical support, training, or instructional professional development, both units have proven themselves as the go-to units for their respective skills. Their strong relationships is how that level of trust was built.

3) Assessing Programs and Units

A normal weakness of non-academic units is not having an established assessment program and identifying the shortfalls to create and implement action plans. This is not the case in AA. All of the subordinate units have a functioning assessment plan in place, with the exception of Institutional Effectiveness. Institutional Effectiveness tied its assessment to the performance measures in the AA operational plan's Goal #3 (Foster Partnerships and Relationships)-- *although it has never completed an evaluation*.

The remainder of the units have successfully used their assessments to identify methods to create positive change. Some units like PIE, the Polytechnic Initiative, Idaho Falls Outreach Center, and Twin Falls Outreach Center all have performance measures closely tied to their strategic plans. Even those units who identified assessment as a weakness are using an innovative approach to assessment. The units within the Academic Success and

Advancement Programs have created an internal assessment committee dedicated to supporting their units with revising their assessment plans.

Using their well thought out and data-driven assessments, staff are generating outcomes and action plans that move the needle toward positive changes within their units. This type of work is being done throughout the Division. Whether it is Institutional Research or the University Tutoring Unit, assessment is a key component of their organizational framework.

D. Weaknesses

1) Assessing Charters Outcomes

Academic Affairs has an operational plan in place, but has focused its efforts on completing and implementing the 11 project charters currently assigned by the President to the Division. The current charters are tracked by AA and the President's Office, and as progress is made toward completion, it is reported. The completion of project charters represents a significant commitment by their sponsors and the personnel supporting them.

Semi-annually, the President reviews the charters. Over time, he has suspended multiple charters or put them on hold as a result of changing priorities. Additionally, as the President reviews them, he has also tended to expand their scopes and require the completion of additional objectives. AA has only completed one charter since starting this process in 2018.

One shortcoming of the charter process that affects its implementation is the inclusion of a step for measuring its effectiveness relative to achieving the University's overall goal. For example, the Momentum Pathways charter that was completed does not have indicators to measure its direct effects on first-year student retention. Changes toward achieving the goal could be a result of the Momentum Pathways charter or another charter designed to increase retention.

2) Additional Funding is Needed for Specific Units

In fiscal year 2021, AA cut four percent from its budget. That cut has and will continue to negatively affect funding levels for many of the AA student-centered and non-academic programs, challenging their ability to accomplish their mission and their customers' support.

The hardest-hit within AA was the Office of Assessment, the Tutoring Program, Idaho Falls Outreach Center, ETS, IR, and PIE. Multiple organizations in AA have personnel and operating funding shortfalls and require a financial solution to continue operating at previous expectations.

An example of this occurred in Fiscal Year (FY) 2020, when the Director of Assessment lost her summer stipend to support programs in their assessment efforts. In FY2021, her time will be further reduced to a part-time faculty position in AA. These changes directly affect ISU's overall assessment program, which could negatively impact ISU's Year 7 accreditation. Assessment has received "recommendations" on ISU's Year 7 findings consecutively since 2004. While significant efforts over the last five years have been made to establish a university-wide assessment program, this cut in funding may eliminate that progress and once again result in another ISU accreditation finding.

Also tied to the Office of Assessment and PIE is the need for permanent operational budgets to fund faculty stipends. The units haven't been able to predict from year-to-year if their requirements will be met, which makes it hard to fund stipends that entice faculty to take on additional workload. In the past, stipends have compensated faculty performing additional duties such as serving in a college assessment coordinator position and their attendance at professional development courses and workshops. The increased faculty workload will not be supported, especially in a COVID environment, without compensation.

Finally, various AA units have taken permanent personnel cuts having to lay off staff, not replace those that retire, or reduce positions to part-time. While some units may absorb these cuts, other units already have workload issues that will challenge their remaining staff. Recognizing that there are other options for seeking funding, multiple units identified as a weakness, their lack of understanding writing grants. They see grants as a possible way to augment their personnel or operating budgets and serve as a temporary fix to their budget shortfalls.

3) Long-Term Academic Planning

Long-term planning is always challenging for any organization, but right now, AA is even more challenged. Academic Affairs serves as an operational arm for much of the university. While AA annually creates for the State Board of Education a three-year academic year plan, it is challenging to plan further out without knowing the direction of the university's new strategic vision.

This guidance would have been forthcoming shortly, but the COVID-19 response has dominated university resources and the planning process. The response resulted in the strategic planning process being put on hold until Fall 2021. The current strategic plan is still valid until June 2022, but it does not have President Satterlee's vision nested within it to help AA shape a long-term academic emphasis and plan.

Without an overarching direction, Deans are left to their own visions regarding their colleges' direction and academic offerings. After the new strategic plan is developed, the direction they have been moving toward may not align the new plan's vision. As a result of the unaligned vision, it may result in inefficient use of valuable resources or contradictions regarding their direction.

The university's emphasis is on operational planning using project charters to shape actions and outcomes. The project charters focus on the essential long-term tasks that support ISU's mission and core themes, but without an understanding of what's beyond the "now" cannot be defined or developed. That lack of understanding may cause the project charters to move in directions that may or may not align ISU's future vision and potentially confuse the university's stakeholders.

While action plans cannot directly alleviate this weakness, at least not until the new strategic plan is created, two courses of action are available. The first is to keep scanning the environment to identify and incorporate changes into the plan resulting from COVID. The second is to communicate with those leaders making decisions tied to project charters so that they understand the possibility that changes could occur once the new strategic plan is implemented.

4) Data Warehouse

Institutional Research is one of those units whose mission has transitioned from its original intent to provide external agencies and organizations with university data to supply internal and external customers with specialized data. As the need for data to support grants, planning, and reporting continues to increase, IR has become overwhelmed with requests. The team is continually writing new code to support internal and external requests, which takes a great deal of time.

Since 2009, the Director and Associate Director have built IR basically from scratch because of the limited resources of the university. As a result, the unit is people dependent rather than systems dependent. The unit also gave up a research analyst position in FY21. The University is working toward creating a Data Warehouse housed in Information Technology Services, but that project charter is still in its infancy. EAB also provides reporting on students and programs but it is in the early stages of implementation. EAB and a Data Warehouse could take considerable time to become active.

5) AA Action Plans

1) Each project charter will develop performance measures as the last requirement prior to completion and implementation. Timeline: Prior to the completion of each project charter

2) AA subordinate organizations will establish personnel and operational budgets prioritizing critical needs that are required to support their units and anticipated outcomes if the funding is attained. Timeline: January 2021

3) Hire a full-time, non-classified employee to take on the role of Assessment Coordinator or buy-out a faculty member's time to serve as a part-time coordinator. Timeline: March 2021

4) Develop and implement new assessment plans for those units that require updates or adjustments. Timeline: Summer 2021

5) Include as part of units' assessment plans, a performance measure that sets goals for establishing new, mutually beneficial relationships. Timeline: Spring 2021

6) Support the development of a data warehouse to alleviate IR from the burden of supporting internal requirements for data. Timeline: Spring 2022

7) The use of SA's EAB enterprise software will transition the need for IR to generate data for internal reporting requirements. Timeline: Fall 2021

The unit's individual reviews used for this overall evaluation of AA are located in this Google Drive folder.

Unit	Description	Key Services	Customers	Personnel	Mission	Key Insights	Strengths	Opportunities for improvement	Action plan
Program for Instructional Effectiveness (PIE)	University-wide program to promote effective teaching practices by supporting faculty professional development.	Great Ideas in Teaching Lecture Series; PIE Faculty Workshops; Teaching Innovation Grant Seminar; Talking about Teaching Faculty Reading Circle.	Faculty	Part-time faculty coordinator	Newly developed strategic plan with mission & vision statement. Aligned with Core Theme 1.	The main challenge is to ensure that this new program is seen as collaborative but distinct, and viewed as an effective resources for the faculty.	Supported by university leadership; focus on quality events aligned with stated faculty needs; effective working relationships with other units on campus; broadly supports teaching needs across the academic curriculum.	Need to establish a realistic, permanent operating budget; consistent evaluation metric for events; consistently query faculty to ensure program offerings align with faculty needs; establish permanent leadership.	Launch faculty perception survey; finalize event evaluations and create assessment plan; launch faculty mentoring program; create realistic budget.
Educational Technology Services (ETS)	Consists of eISU; Instructional Technology Resource Center (ITRC); Interative Video Conference Classrooms (IVCC); and Classroom Technology Support	Support quality in online courses and programs; support learning management system; provide and maintain distance learning classroom technology; provide regulatory support	Faculty, staff, students	35 professional and support staff in Pocatello, Idaho Falls, Twin Falls, and Meridian	Aligned with Core Theme 1 by supporting technology-enhanced learning opportunities.	The demand for online courses was steadily increasing prior to the pandemic; the pandemic will have lasting impacts on student choice of course modality, which will make the role ETS even more crucial to ISU.	Strong customer service for faculty; wide range of educational technology services; staff is knowledgeable and experienced	Need to improve communication; adopt a transformative service model; improve service agreements and vendor accountability in conjunction with purchasing; add eISU online student coaches	
Idaho Falls outreach center	Idaho Falls campus	Classes and student services	Students, faculty, staff	10 non-classified and 35 full-time classified staff, and students employees	Aligned with all four Core Themes	Strengths include ability to serve place-bound students; communication with main campus, scheduling, and limited research/lab spaces are issues. Competition with other institutions is a challenge, but CEI transfer students provide an opportunity for growth.	Location near INL allows for close partnership, along with proximity to new Cybercore buildings; provides access and opportunity to place-bound students	Better communication with community about availability of academic programs; build more program articulation agreements with CEI; offer more programs that can be completed entirely in Idaho Falls	Work with enrollment management on recruiting; work with MarComm to increase community awareness; work with Student Affairs to ensure same support services to IF students; work with departments to make schedule more student-centric, and to increase course and program offerings; identify resource needs to provide equivalent experience for students.
Twin Falls outreach center	Twin Falls academic programs (located on campus of CSI)	Classes and student services	Students	3 staff	Aligned with Core Theme 1	Need more online and diverse programs to meet educational needs of South Central Idaho.	Strong customer service; strong relationship with CSI	Online elementary education will help ease teacher shortage in South Central Idaho; more online and diverse programs to increase educational opportunities.	ISU BS Elementary Education just became completely online; Student Services will establish partnerships to expand community impact and identify programs that support local workforce needs.
Institutional Effectiveness	Unit supports entire institution and has staff in Pocatello and Meridian.	Primary focuses are accreditation; strategic planning; mission fulfillment; assessment; program health	Administration, faculty	5 staff (two of whom lead Institutional Research and Office of Assessment)	Supports institution's and Academic Affairs mission and vision; aligns planning throughout the institution	Need to anticipate and plan for changes in personnel.	Well-rounded, knowledgeable team that is sought out by academic and non-academic units for assistance.	Increase communication with department chairs and provide more training to support their success; establish a data warehouse; hire replacement Assessment Coordinator to ensure continuity	Work with Finance and Business Affairs to establish data warehouse; decentralize knowledge of staff to ensure future personnel turnover does not affect organizational performance; solicit input on IE responsibilities from chairs and directors; update job description and identify budget for Office of Assessment
Institutional Research	Unit supports entire institution; reports to Institutional Effectiveness	Data analysis and reporting	Administration, faculty	5 staff	IR supports the institution's strategic plan by generating, providing, and analyzing enrollment and retention data; aligns with all four Core Themes	While the experience and technical expertise of the IR team is exceptional, IR is too dependent on the IR Director and Associate Director to support, maintain, and expand the data system.	Experience and technical expertise of staff.	Build a data warehouse and reporting team	Begin discussions with CIO on buildinga robust data warehouse within four years; start data management group on campus to address updates and changes to modules in the Ellucian Banner ERP system.
Office of Assessment	Unit supports entire institution; reports to Institutional Effectiveness	Assessment training, oversight, and support	Faculty, staff	1 director	Primarily aligns with Core Theme 1, Learning and Discovery, but also support non-instructional units	While the assessment office has experienced initial success, the institution is still in the early stages of establishing a robust assessment system with dedicated funding.	Collaborative relationships with faculty and faculty councils; developing methods to report both assessment activities and faculty efforts	Need to establish the organizational structure, funding model, and vision, as the Office of Assessment is so new	Recognize and measure faculty assessment; determine structure, funding, and responsibilities of office; formalize relationship with GERC; improve institutional understanding and inclusion of assessment

Intensive English Institute (IEI)	Provides English language instruction for international students	Intensive English coursework; ESOL tutoring and cultural support services; other resources and services	Students	1 director	Aligns with Core Themes 1 and 2 and the strategic plan	Student learning outcomes are well established but program performance outcomes need development. Course and other support service planning can be difficult due to fluctuating enrollments that are influenced by larger, external constraints.	Collaborative relationships with other academic support programs; supports international student success	Build stronger relationships with the wider university community; need to offer online coursework; work toward more grant funding	Establish a more useful set of performance outcomes; revise IEI assessment plan; educate the ISU community; develop online programming; seek addition grant funding
High School Equivalency Program (HEP)	Academic preparation and support program funded by USDE and OME grant.	Provide GED-oriented instruction and support services and oversee transition of student into postsecondary education, military enlistment, or upgraded employment	Students	4 staff	Aligns with Core Themes 1 and 2 and the strategic plan	While performance outcomes are fixed by the granting agency, opportunities for complementary programs and partnerships could be pursued.	Funding, staff expertise and commitment, positioning within Academic Success and Advancement Programs and Academic Affairs	Flexibility in service delivery; create new recruitment paths through other grants; develop in-depth partnerships with other ISU programs and local employers	Explore innovative outreach activities using new technologies and skills; explore complementary programming, including other grant-funded projects; choose one local STEM employer with whom to pursue an in-depth partnership
Early College Program			Students						
University Honors Program	Honors program	Provide honors coursework and related programming	Students	Part-time director, one full-time and one part-time instructor/coordinator	Aligns with all four Core Themes and the strategic plan	Program has made significant progress in goals established by its last review.	Program has grown over the last 10 years; students are retained and graduate at high rates; course offerings and programming which emphasizes undergraduate research and civic engagement have grown.	Very lean staffing for number of students served; need to continue developing assessment measures	Continue developing culture of assessment; working toward full-time director position; expanding partnerships with departments; increase scholarship opportunities
University Tutoring Program	Academic support for students in need of tutoring	Writing Center; Math Center; Content Area Tutoring; ESOL; Online Tutoring	Students	2-Coordinator and Math Center oversight staff member	Aligns with Core Themes 1 and 2 and the strategic plan	Uncompetitive wages for tutors make recruiting difficult; service delivery was significantly impacted by the pandemic	Program has collaborative relationships with other academic support programs; multiple locations and modalities; tutor training program	Build relationships with faculty and departments; refocus on assessment; seek grant funding	Hire coordinator; revise assessment plan; expand workshop offerings to include academic skills; build stronger relationships across the institution; seek grant funding for special projects; improve service delivery for historically underserved populations.
Bengal Bridge	Academic transitional program for recent high school graduates from underserved and underrepresented populations	Seven-week summer term that includes general education and transition/success courses; supplmental instruction and tutoring; mentoring and advising; recruitment; college preparedness events	Students	6 staff, including coordinator	Aligns with all four Core Themes and the strategic plan	This successful program provides access and opportunity for an increasingly diverse student population; has identified several realistic and attainable actions for improvement	Cohort model is effective in providng holistic support to students; fosters a growth mindset to encourage hard work, resilience, and dedication to achieve goals.	Establish and strengthen partnerships with non-profits and governmental agencies; expand awareness of programming; seek to secure grants for innovative, integrated projects	Establish online recruitment plan; develop more appropriate measures for performance outcomes; update web presence; streamline communication process; address areas for improvement

Idaho State University

FINANCE & BUSINESS AFFAIRS PROGRAM REVIEW

Spring 2021

Review Team: Glen Nelson, Renae Scott, Brian Sagendorf, Jennifer Parrot, Angie Dobbins, Jennifer Steele, Lewis Eakins, Cheryl Hanson

Finance & Business Affairs Units

- Information Technology Services 4
- Human Resources 31
- Environmental Health & Safety 44
- Controller's Office/Office of Budget, Planning, and Analysis 51
- Public Safety 63
- Facilities Services 70

I. Executive Summary

This was the first Non-Academic Program Review (NAUR) exercise for Finance & Business Affairs (F&BA). Units commenced their review process in fall 2020 and completed unit-level reviews in March 2021.

F&BA is comprised of a broad array of programs and services in support of Idaho State University's mission. Individual NAUR documents presented here reflect the unique characteristics and operational mindset of each F&BA unit.

Time and capacity were the biggest challenges faced by units going through the process; these challenges were exacerbated by ongoing COVID-19 response efforts and staffing shortages. As a result, some units have presented certain program review elements as action items to be completed in the future. Examples include establishing and developing longitudinal data collection and reporting mechanisms for performance outcomes and conducting formal program evaluations.

Non-Academic Program Review has been a valuable exercise for Finance & Business Affairs. It has created a foundation for planning, assessment, and continuous improvement throughout the division.

II. Analysis

A. Mission Alignment

> ***Finance & Business Affairs Mission***
> We create opportunities and positive outcomes by partnering with the University community to optimize its collective resources.

Each unit within F&BA is a service organization in support of the F&BA mission and, ultimately, ISU's mission of advancing scholarly and creative endeavors. F&BA units collaborate with academic, student affairs, and administrative units across the University to optimize information technology, safety, personnel, financial, and facilities resources. Our units operate with a distinct service mindset and explicitly uphold ISU's values of trust, compassion, stability, and hope.

F&BA units serve the entire University across all campus locations, with many providing 24-7 services. We are passionate about the role we play in serving ISU's mission.

B. Key Insights

This inaugural NAUR process highlighted the opportunity to align NAUR, project charters, external accreditation, and University strategic plans and priorities in a structured planning and institutional effectiveness program for Finance & Business Affairs. A structured planning framework will improve outcomes through regular reporting and assessment, foster greater synergy amongst F&BA units, reduce planning and reporting redundancies, and better communicate the work and impact of F&BA in support of ISU's mission.

In assessing staffing and workload levels in relationship to peer institutions and industry benchmarks, several F&BA units (Human Resources, Controller's Office/Office of Budget, Planning, and Analysis, Facilities Services) are significantly understaffed. Employee retention is another challenge (Information Technology, Facilities Services), driven primarily by ISU's relatively low compensation for some positions.

C. Strengths

- F&BA units are staffed by highly qualified, experienced employees with a rich diversity of skills, backgrounds and perspectives.
- We foster strong, collegial, and productive internal and external relationships.
- We provide excellent service to our constituents and stakeholders.
- We are committed to transparent and inclusive structures, processes, and systems, with a focus on continuous process improvement.

D. Opportunities for Improvement

- Develop sustainable staffing, workload, and organizational structures.
- Shift from reactive to proactive operations and mindsets.
- Continue to address inefficient systems and processes.
- Develop systematic planning, reporting, and assessment structures.

E. Action Plan

Following is a summary of priority actions that have been identified through this program review process.

University Project Charters

- Chargeback Philosophy (Facilities Services)
- Facilities Branding Spaces (Facilities Services)
- F&A Rates (Controller's Office)
- Emergency Management Process and Communication (Public Safety)
- Budget Model (Office of Budget, Planning, & Analysis)
- Decentralize Budget Control (Office of Budget, Planning, & Analysis)
- Data and Analytics Plan and Process (Information Technology Services)
- Employee Engagement, Morale and Culture (Human Resources)
- Employee Relations and Progressive Discipline (Human Resources)
- Mass Email Communication (Information Technology Services)
- Google Drive (Information Technology Services)
- Orientation for New Employees (Human Resources)
- New Email Naming Convention (Information Technology Services)
- Incoming Calls (Information Technology Services)
- Employee Engagement Task Force (Human Resources)

Additional Actions and Strategic Priorities

- Outreach, Marketing, Campus Engagement and Awareness (Information Technology Services, Environmental Health & Safety, Public Safety)
- Process Documentation and Improvement (all units)
- Staffing and Workload Review and Optimization (all units)
- Develop F&BA Planning & Institutional Effectiveness Program (all units)

*Click here to access individual unit reports

Program Performance Report, June 2021

In 2014, LC State engaged in program prioritization where instructional and non-instructional programs were considered and quintiled together. For the next five years, the prioritization results were used to refine institutional processes, merge programs, reconfigure campus units, and reassign vacant staff and faculty positions.

In academic year 2016-2017, the process at LC State was renamed *Program Performance* (PP), instructional and non-instructional programs were separated from one another, and teams with campus-wide representation were tasked to develop separate prioritization processes. Each group created criteria and indicators upon which quintiles could be built. These criteria were included in the annual unit/ program assessment processes.

Instructional Programs

Process

The Instructional Programs PP work group identified three (3) criteria and eight (8) indicators, with the option for programs to add a unique indicator. In spring 2020, three (3) years of data for each indicator were reviewed to determine which reliably could be used to determine quintiles. At the same time, LC State faced serious budget reductions, in part due to the COVID-19 pandemic, which necessitated a focus on program costs. In alignment with State Board of Education policy (III.F, Program Prioritization), the following criteria/ indicators, extracted from the work group's recommendations, were used to prioritize instructional programs and place them into quintiles: Program Costs, Program Completions, and Program Enrollments.

Outcomes

Quintiles. The 43 CTE and academic programs were quintiled as follows:

Quintile 1: 9 programs

Quintile 2: 8 programs

Quintile 3: 9 programs

Quintile 4: 8 programs

Quintile 5: 9 programs

Required Action/ Work Plan Components.

Each instructional program wrote a Work Plan in AY20-21, in lieu of completing a Unit Assessment Report (UAR). Division reports and work plans were reviewed by Division Chairs, Deans and the Provost.

Quintile 1. Sustainable [aligns with the college's role and mission; through efficient and effective use of resources has potential for growth and/ or to consistently maintain capacity].

- Develop stretch enrollment targets for next three (3) years
- Develop action steps to maintain or increase enrollments to meet stretch targets
- Continuously monitor effectiveness of program through annual UAR

Quintile 2. Sustainable with minor modifications [aligns with the college's role and mission; minor modifications required for sustainability and growth].

- Develop stretch enrollment targets for next three (3) years
- Develop action steps to maintain or increase enrollments to meet stretch targets
- Identify resources needed to implement action steps to meet enrollment targets
- Continuously monitor efficiency and effectiveness of program

Quintile 3. Sustainable with modifications [aligns with the college's role and mission; imbalance between enrollments, completions and overall program costs limits sustainability and growth].

- Develop sustainability enrollment targets for next three (3) years
- Develop aggressive action steps to increase enrollment to meet sustainability targets
- Identify internal and external resources needed to implement action steps to meet enrollment targets
- Identify mechanisms to increase program efficiency

Quintile 4. Sustainable with major modifications [aligns with the college's role and mission; imbalance between enrollments, completions, and overall program costs threatens sustainability].

- Develop sustainability enrollment targets for next three (3) years
- Develop immediate and aggressive action steps to increase enrollment to meet sustainability targets
- Identify internal resources that can be reallocated to implement action steps and meet enrollment targets
- Identify steps to immediately increase program efficiency

Quintile 5. Not sustainable [may not be aligned with the college's role and mission; imbalance between enrollments, completions, and overall program costs requires reconfiguration, consolidation, or elimination].

- Conduct a full program review at all credential levels, including an examination of local and regional industry need, of similar programs offered in the region, of past recruitment practices, reasons students leave the program, employment status and work field/ location of graduates, opportunities to merge with other LC State programs (CTE and/ or Academic), course scheduling opportunities to support increased enrollments, and other critical elements determined by faculty, Division Chair and instructional Dean.
- Based on program review:
    - develop immediate and aggressive action steps to increase enrollment to meet sustainability targets
    - consider program merger or phasing out, when appropriate
- Identify opportunities for resource allocation to increase program sustainability.

Sustainability definition: Ratio of enrollments, completion rates, and Student Credit Hour (SCH) costs indicate that the program is successful with current resource allocations.

Action Plan Summary

Each instructional program in Quintiles 1-4 developed a broad plan of action for the next three years, as guided by the criteria for quintilization. Plans were written through collaboration of program faculty and the Division Chair, and were reviewed and refined through meetings with the Dean and Provost. Faculty whose programs were assigned Quintile 5 conducted a more thorough program review which was vetted by the Division Chair, and by the Dean and Provost. In late spring, summer and early fall 2021, all programs are more carefully detailing their plans, with specific action steps, timelines, and assignment of responsibility. Programs will provide updates to their respective Chairs and Deans as part of the ongoing institutional program assessment process and timelines.

Immediate Impacts per SBOE Policy III.F: Program Prioritization

5.a. Programs that will be improved through advancements in efficiency, quality, productivity, and focus.

As noted in the quintile and action plan descriptions, all quintile 4 and 5 programs are charged to focus on increased program efficiency through actions that positively impact enrollment and to identify internal resources that may be reallocated in support of enrollment efforts, or otherwise affect program productivity (e.g., additional lab or shop work stations to allow for increased enrollments).

5.b. Opportunities for improvements to organizational structure and function.

Following the instructional programs performance work in Spring 2020, the provost and instructional deans, working with Division Chairs, faculty leadership, and program faculty and staff from across campus, engaged in a reorganization of academic affairs. One instructional Division was eliminated (Movement & Sport Sciences), instructional programs were realigned under remaining Divisions, and some Divisions were renamed. As part of this initiative, one Division Chair position was eliminated, and support staff was redistributed to assure each instructional unit has at least one administrative support person. Details of the reorganization were submitted to OSBE; the proposed changes were approved this month (June 2021).

5.c. Programs considered for consolidation or discontinuation as based on cost of delivery and degree of relevance and impact.

Two instructional programs have been discontinued as a result of the program performance work:

1) Administrative Management Assistant (CTE) and associated degrees/ certificates was approved by the SBOE for discontinuance in December 2020. The faculty member associated with this program has been laid off.

2) A.S. Engineering has been approved internally and is in process of consideration with the SBOE. The faculty member associated with this program has transferred to the School of Career & Technical Education in support of LC State's Engineering Technology programs, replacing a retiring professor.

A third program has been proposed for discontinuance and remains under review by college administration.

A number of programs have or are in process of consolidating and streamlining program offerings, including emphases and options. Examples include the Kinesiology program (reviewing and validating that all options and emphases are needed) and Collision Repair (CTE), which is exploring internship and directed study options for the second year of the A.A.S. program, yielding personnel cost savings.

5.d. Estimated institutional savings and efficiencies created through implementation of recommendations.

Immediate estimated institutional savings from the actions described above are $270,000. Additional savings may occur as approved action plans are implemented.

- Elimination of Division Chair position (salary + fringe): $105,457 (general education)
    - Efficiencies will come from more evenly sized instructional Divisions.
- Elimination of one academic faculty position (salary + fringe): $98,737 (general education)
- Elimination of one CTE faculty position (salary + fringe): 65,361 (CTE)
- One CTE position reallocated to a growing program (Hospitality Management).

Non-instructional Programs

In fall 2020, in preparation for the next iteration of Non-Instructional PP, the report / scoring format was updated to focus on resources/ efficiency & effectiveness, where programs evaluated themselves against mandatory/ compliance driven services, necessary and essential services, and value-added activities. In each area the program explored the question, 'can the activity be eliminated?', and for each required/ essential activity, the program addressed opportunities for increased efficiency.

The reports were scored by the vice president/ president, and assigned to one of three groups, modeled after the instructional programs' quintiles.

Outcomes

Groupings. The 34 non-instructional programs were grouped as follows:

Group 1: 18 programs

Group 2: 16 programs

Group 3: 0 programs

Required Action/ Work Plan Components.

Each program developed a broad plan of action for the next one to three years, as guided by the established criteria. The format of plans was determined by the vice president/ president.

Group 1

- Sustainable/ Sustainable with minor modifications: aligns with the college's role and mission; through efficient and effective use of resources and/ or minor modifications, is sustainable or postured for growth/ enhanced operation.
- Required Action/ Work Plan (written plan):

- stretch targets to be accomplished over next three years.
- identify ways program operations may be streamlined or refined for enhanced efficiency and effectiveness.
- identify resources needed to support enhanced efficiency and effectiveness.

Group 2

- Sustainable with modifications: aligns with the college's role and mission; imbalance between available resources and program effectiveness.
- Required Action/ Work Plan (written plan):
  - targets to be accomplished over next three years.
  - identify ways program operations may be streamlined or refined for enhanced efficiency and effectiveness.
  - identify resources needed to support enhanced efficiency and effectiveness.

Group 3

- Not sustainable in current operational mode: aligns/ may align with the college's role and mission and/ or is a required/ compliance function; imbalance between available resources and program effectiveness, which may require reconfiguration, consolidation or elimination.
- Required Action/ Work Plan (written plan):
  - Conduct a full review or program operations, including an examination of other institutional models (peer institutions).
  - Develop immediate and aggressive action steps to increase program sustainability, efficiency and effectiveness, based on established targets or benchmarks, including reconfiguration, consolidation or elimination.

Action Plan Summary

In the coming year, non-instructional programs will continue to act upon actions identified in approved plans, and will report progress to the vice president / president in December.

Immediate Impacts per SBOE Policy III.F: Program Prioritization

5.a. Programs that will be improved through advancements in efficiency, quality, productivity, and focus.

The initial focus of the non-instructional programs' performance process focused on identifying efficiencies in systems and processes. Examples include grouping non-instructional units into coherent *programs*, establishing baselines/ stretch goals, and identifying additional data points to inform the work of programs. All programs are also critically evaluating any value-add services they provide to determine ways to maximize these efforts for increased program effectiveness or revenue generation, or to consider reduction or elimination of these efforts, given limitations of personnel and resources. Specific examples include:

- The bookstore selling and advertising NAIA World Series gifts and apparel.
- Reallocation of internal resources to upgrade KinderCollege space.

- Physical Plant using outcomes of deferred maintenance study to alleviate high maintenance areas.
- Increased academic advising by Early College staff to increase go-on-to-LC-State rate of dual credit students.
- The Math & Science Tutoring Center is increasing use of virtual tutoring, and augmenting its communication with students, to increase Center use.
- The Testing Center has increased its offering of tests from outside vendors, modestly increasing Center revenue.
- Athletics is maximizing team roster sizes.
- Enrollment Services Program will review and revise key performance indicators used to measure the college's enrollment. This will include a strategic partnership with Institutional Research and Effectiveness to devise a predictive analytical model and data dashboards.
- Student Engagement and Success Program will begin returning to in-person student programming.

5.b. Opportunities for improvements to organizational structure and function.

- The Student Safety and Well-being Program is comprised of representatives from both Student Affairs and Finance/Administration, eliminating administrative barriers in developing key campus policies centered on campus safety, and serves to establish more comprehensive responses to student behavioral issues.
- Institutional Research & Effectiveness continues to centralize data management to increase efficiencies across the institution.
- Office of Grants & Contracts continues to cultivate a grants' culture.

5.c. Programs considered for consolidation or discontinuation as based on cost of delivery and degree of relevance and impact.

- One immediate outcome of the non-instructional program performance effort is focusing the resources of various campus units into more coherent, macro-level *programs*. For example, in the Student Affairs area, 18 administrative units were combined to support three (3) superordinate programs. This increases program coherency by focusing on larger institutional goals rather than smaller departmental processes. Opportunities for similar approaches to measuring institutional program performance will be assessed. Additional program consolidations and/ or realignments may be forthcoming.
- The Library has critically evaluated its services, offerings, and staffing levels. There is a focused move toward reliance on e-Resources, elimination/ discontinuance of under-utilized electronic and paper resources, and a reduction in Library hours. Increased cross-training of employees is in process as well.

5.d. Estimated institutional savings and efficiencies created through implementation of recommendations.

As the initial focus of the Spring 2021 non-instructional programs' performance process focused on identifying efficiencies in systems and processes, and budget reduction reorganizations and downsizing had already impacted staff units extensively, there are no additional salary or other savings to report as a direct result of the PP process. As programs work through action plans, program re-organization (consolidation or expansion), impacts to program personnel (increase/ decrease), or costs (savings or investments) may occur.

Summary

LC State has successfully completed its second round of program performance (prioritization) for instructional and non-instructional programs, in accordance with SBOE Policy III.F. In addition to the immediate impacts noted above, instructional and non-instructional programs will continue to take actions based on approved plans, with regular reporting and review by the designated administrator. Additional impacts will be described / delineated in future reports to SBOE / OSBE.

Five-Year Report on Program Prioritization
Prepared for the Idaho State Board of Education
June 30, 2021

GENERAL REPORT

The University of Idaho has implemented two major Program Prioritization (PP) processes during the last five years. Evaluations concluded in academic years 2016-17 and 2019-20. Results were used to reallocate resources for institutional priorities and to meet budget reduction targets to balance the university budget.

Background: Program Prioritization prior to July 2016

Prior to 2013, UI conducted at least two PP processes that identified programs for both closure and investment. The State Board of Education required a PP effort in 2013-2015 which resulted in UI's "Focus for the Future" initiative to highlight the need for a renewed approach, given the Board's interest in an ongoing process. The process eventually led to six moved/restructured degrees, five program consolidations, one name change, and 19 discontinued programs.

A new provost worked with faculty senate in 2015-16 to recommend improvements to the previous PP process for implementation the following year.

See Attachment 1

2016-17

Data collection and PP evaluation took place during the 2016-17 academic year for both academic and non-academic programs. The criteria and procedure for ranking programs were refined by two separate work groups consisting of faculty and staff.

In this revised system, the Institutional Planning and Effectiveness Committee (IPEC) oversees the PP process. IPEC set out to develop a sustainable model of program prioritization that would enable UI to

meet State Board requirements while also helping to achieve the university goals that were framed within the Strategic Plan and determined by the University Budget and Finance Committee.

Though IPEC had initially planned for PP to operate by means of "position control" (only refilling certain high-priority faculty and staff lines), in the end, it was determined that this process would be detrimental to the well-being of the university, and instead recommended budget reallocations among academic and non-academic units.

See Attachments 2-7

2017-18

Further PP efforts took place in Fall 2017. Results were used to fund two institutional priorities: market-based compensation for employees and competitive compensation for teaching assistantships. The total cost was $4M ($1.7M and $2.3M respectively). Half of the funds ($2M) came from reallocation targets identified in PP. Throughout the PP process, programs received a relative ranking that was translated into a normalized score which determined reallocation amounts. The other half ($2M) came from other sources including tuition revenue and strategic reallocation of centrally managed funds.

See Attachments 8-15

2018-19

Baseline budgets for 2018-19 were adjusted for reallocations determined in the previous year according to PP. The university conducted a search for a new president during this time. No additional PP process was implemented.

2019-20

President Scott Green joined the University of Idaho in summer 2019 and charged IPEC to refresh our PP process, asking them to focus on academic units first. Non-academic programs would be evaluated later. Recommendations for improvements came from a cross-campus task force that evaluated the previous PP process. A revised process was carried out under the guidance of the Provost, IPEC, and the Academic Program Prioritization Subcommittee of IPEC.

The university implemented a two-step evaluation process of academic programs. The first step focused on quantifying sources of revenue and comparing revenue with expenditures, summarized by a metric referred to as "Return on Budget Allocated" or RBA. For programs with substantial negative RBA, additional analysis was conducted in a second step that included an opportunity for deans to self-identify programs for closure or those needing significant change in curriculum or structure. In addition, some recently established programs (without the degree conferrals vital to the calculation of RBA) were

removed from further review.

The process culminated in a final report (see Attachment 18) that outlines background information, relevant policy, evaluation criteria, process summary, and final recommendations. President Green approved these recommendations which resulted in the ongoing monitoring of 39 programs, restructuring three programs, merging eight academic units into four, and closing 10 programs. Total cost savings expected from PP decisions are expected to be $1,591,000 realized over time as the changes are implemented. The deans used the PP results as a tool to meet a $15.74 million budget reduction target in Academic Affairs, representing the majority of our university-wide budget reduction goal of $22 million for FY21. This approach demonstrates the commitment and resiliency of our community to make tough choices in hard times.

See Attachments 16-21

2020-21

The budget reduction decisions of Spring 2020 brought significant change. Our PP efforts during 2020-21 focused on implementation of those decisions. Curricular changes were developed to comply with PP recommendations or because of other program eliminations. Department reorganizations took place and the teach-out of eliminated programs commenced. The university's response to COVID-19 was a major focus for the institution during this year so the PP process for non-academic units was deferred until after the pandemic.

During this time, the university also developed a new budget model to work in tandem with our PP process. It is an incentive-based model in which budget metrics align with PP metrics. This model will be used annually to determine budgets for the following fiscal year.

Looking Forward: 2021-22 and Beyond

We are collecting data during 2021-22 for use in the new budget model that will determine 2022-23 budgets. These metrics are in general alignment with our PP metrics; therefore, our budget process and PP process will be congruent.

In addition, because academic programs went through PP in 2019-20, we plan to refine the process for non-academic programs during 2021-22 to align with the new budget model. That evaluation will be implemented in late 2021-22 or possibly 2022-23.

Conclusion

The University of Idaho continues to develop and refine its program prioritization process to align closely with budget allocation, programming decisions and strategic planning. UI completed two successful cycles of PP during the last five years that guided positive and significant institutional change.

SUBJECT: Update on Program Prioritization

As many of you know, a few years ago, the Idaho State Board of Education mandated each higher education institution develop and implement a program prioritization process. The board is now looking for the process to be embedded into the budget, strategic planning and program review processes in the state's four-year institutions. Our goal is to embed the prioritization process into these other processes in such a way that it is manageable and sustainable.

UI's response to the board's mandate was a program prioritization process we called Focus for the Future, or FFF. At the request of Faculty Senate leadership, I provided an overview of the FFF process from my perspective as a relative newcomer to the University of Idaho at the most recent Faculty Senate meeting. The PowerPoint slides from that presentation are available here. I took the liberty of suggesting improvements to the process as well as summarized current board and legislative expectations.

In summary, we have more work to do, but we also have learned quite a bit from the FFF process. I want to express thanks to Interim President Don Burnett and Interim Provost/EVP Katherine Aiken for envisioning the process and successfully completing a difficult task in a short time frame while faced with significant uncertainty.

The subsequent conversation within Faculty Senate about FFF was direct and productive, and, in general, Faculty Senate was in agreement that we have learned a great deal from the process, which will inform and improve the next version of program prioritization. The members were appreciative of the transparency of the overview and are willing to move toward an improved methodology.

Having secured the general agreement of Faculty Senate, I will constitute a committee in the near future that will seek to improve the program prioritization process and embed the process in our budget, strategic planning and program review processes. I look forward to attaining the best of ourselves and of our great University of Idaho.

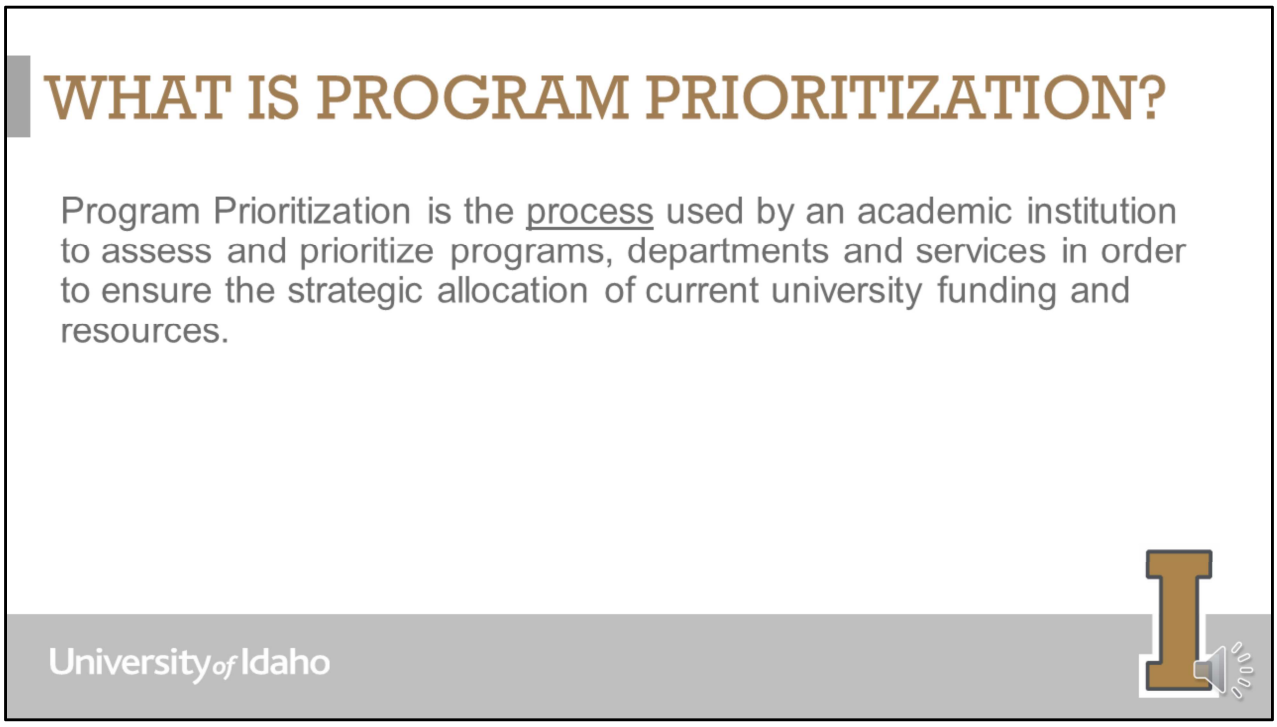
SUBJECT:	Appointments to the Institutional Planning and Effectiveness Committee

---

I am grateful to UI Faculty Senate, Staff Council and ASUI for nominating a group of Vandals to serve on the Institutional Planning and Effectiveness committee (IPEC). The IPEC will be comprised of:

- Cruz Botello, President, ASUI (or designee as needed)
- Elizabeth Brandt, Faculty Senate Chair and Professor of Law (interim appointment)
- Dan Ewart, Vice President for Infrastructure
- Brian Foisy, Vice President for Finance
- Mary Kay McFadden, Vice President for Advancement
- Janet Nelson, Vice President for Research and Economic Development
- Jodie Nicotra, Associate Chair, Associate Professor, English Department
- Janice Todish, Administration and Fiscal Operations Director, CLASS
- John Wiencek, Provost and Executive Vice President (Chair)

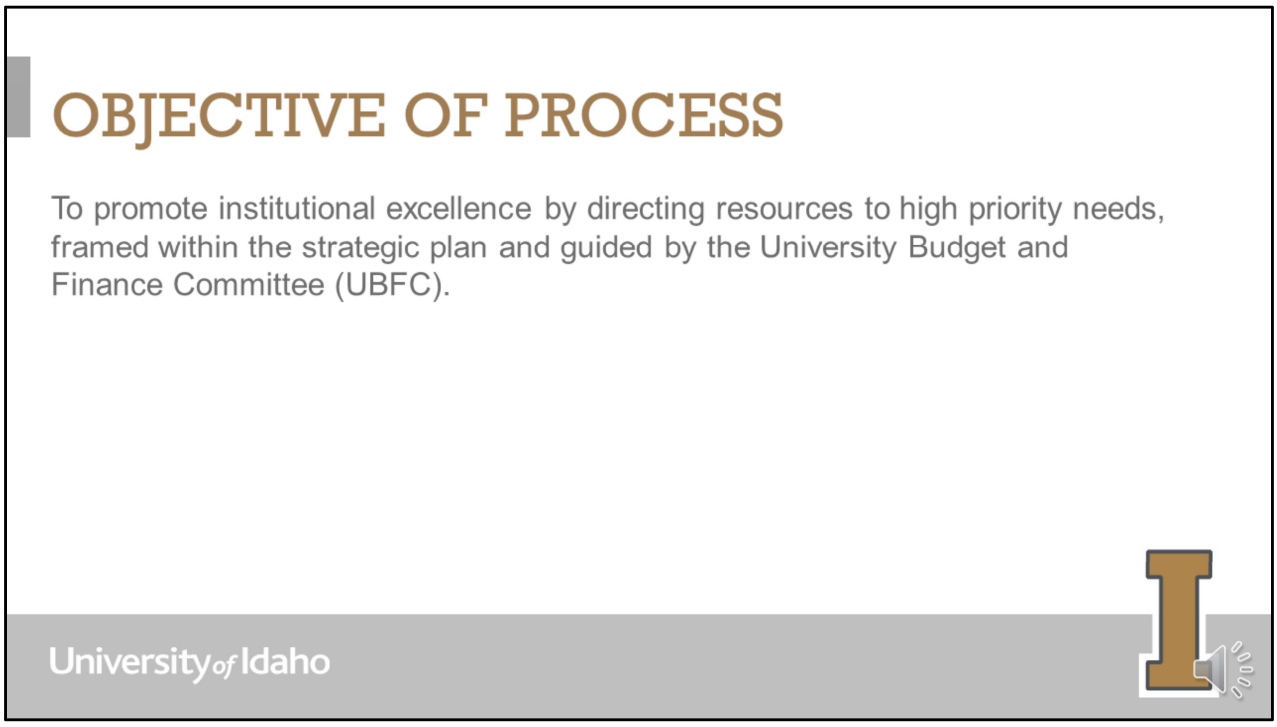


The IPEC will begin its work immediately and will likely establish subcommittees or working groups to help accomplish the tasks before the committee which include the following:

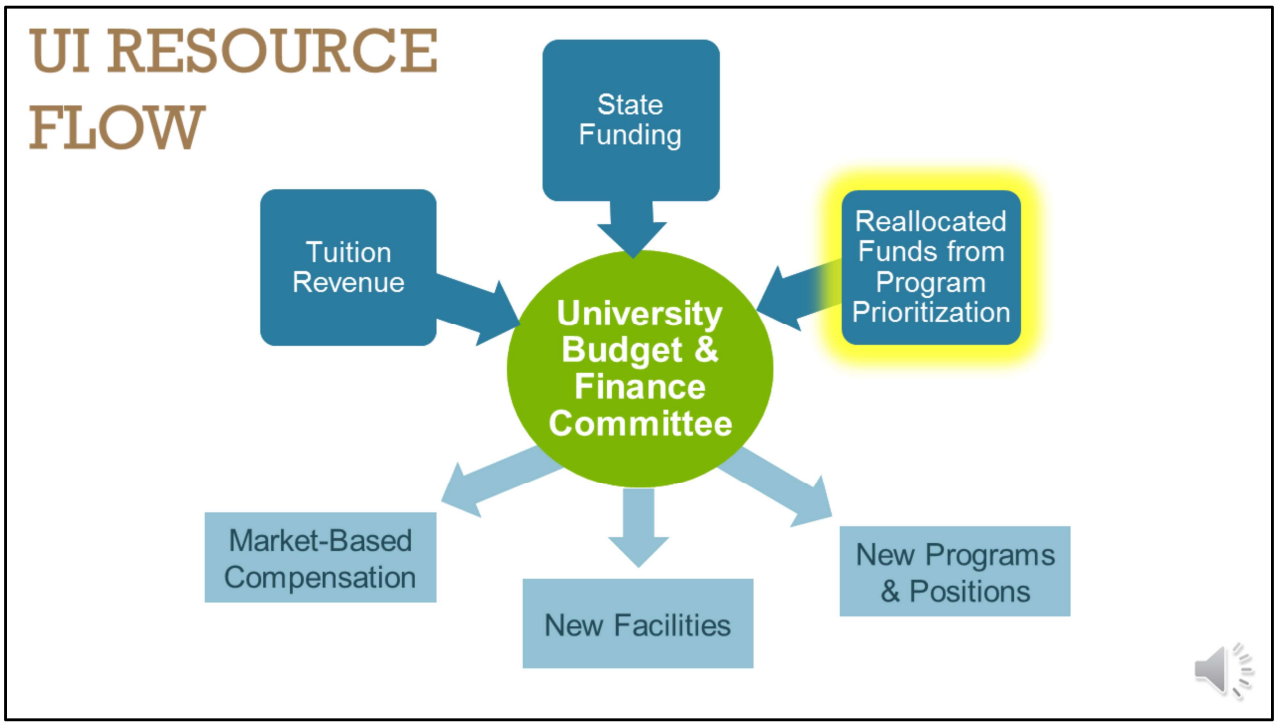
1. By February 2017, provide recommendations to incentivize enrollment growth.
2. Identify opportunities to gain efficiencies and effectiveness by consolidating key UI services such as information technology, development, finance, human resources, student advising, communications and marketing, research support (pre-award and post-award) and some facilities management functions by February 2017.
3. Successfully launch the new strategic plan by coordinating and aligning unit/college Cascaded Plans.
4. Advise and consult with the University Budget and Finance Committee (UBFC) to ensure the UBFC's recommendations are consistent with the strategic plan.
5. Implement a refreshed program prioritization process that is consistent with the State Board of Education's new policy.
6. Continue to explore opportunities to include a portion of unexpended year-end funds in the UBFC process.

Please join me in offering support, advice and constructive feedback to this committee as they begin their important work.

Hi, I'm John Wiencek, the Provost and the Executive Vice President of The University of Idaho. On behalf of the Institutional Planning and Effectiveness Committee (often called IPEC in this presentation), I want to use this opportunity to give the university community an overview of the what's, why's, and how's of The University of Idaho's program prioritization process. I also hope to solicit your feedback and advice on certain aspects of the process. At the end of the presentation, I'll tell you how to submit this feedback.

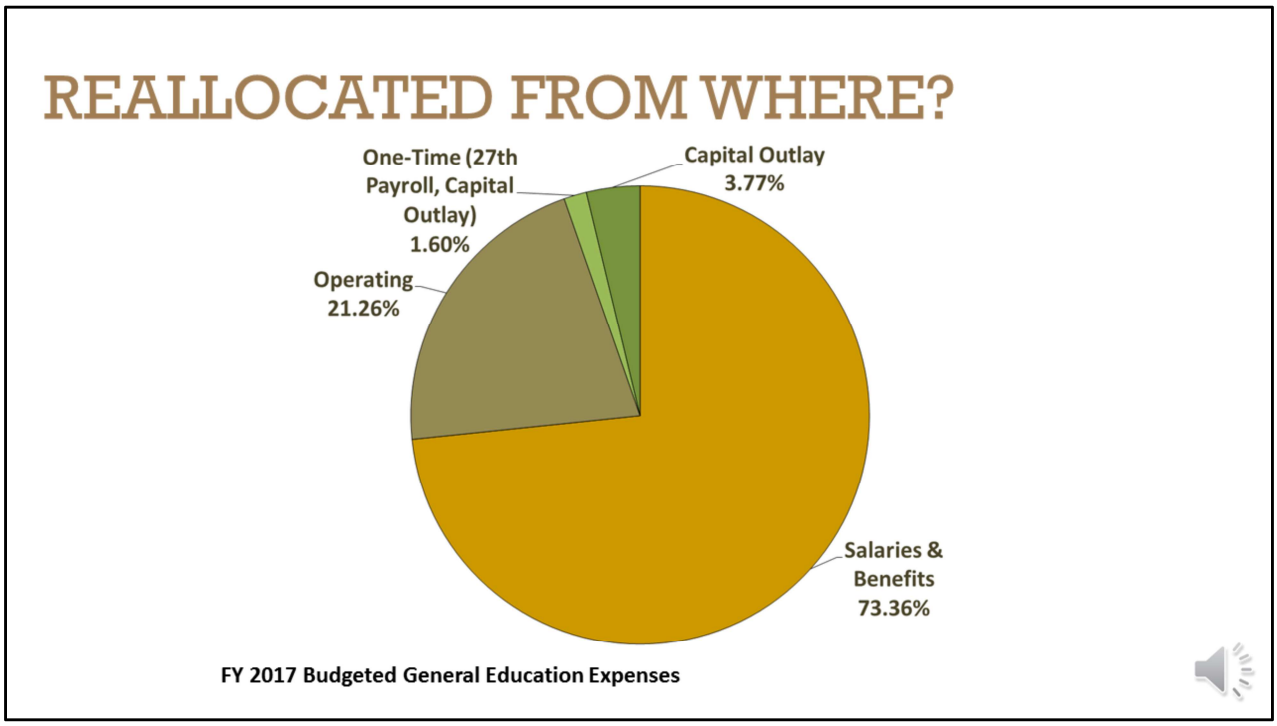


First, what is program prioritization? Basically, program prioritization is a process by which academic institutions assess and prioritize programs, departments and services in order to ensure that they're making the best use of their resources.

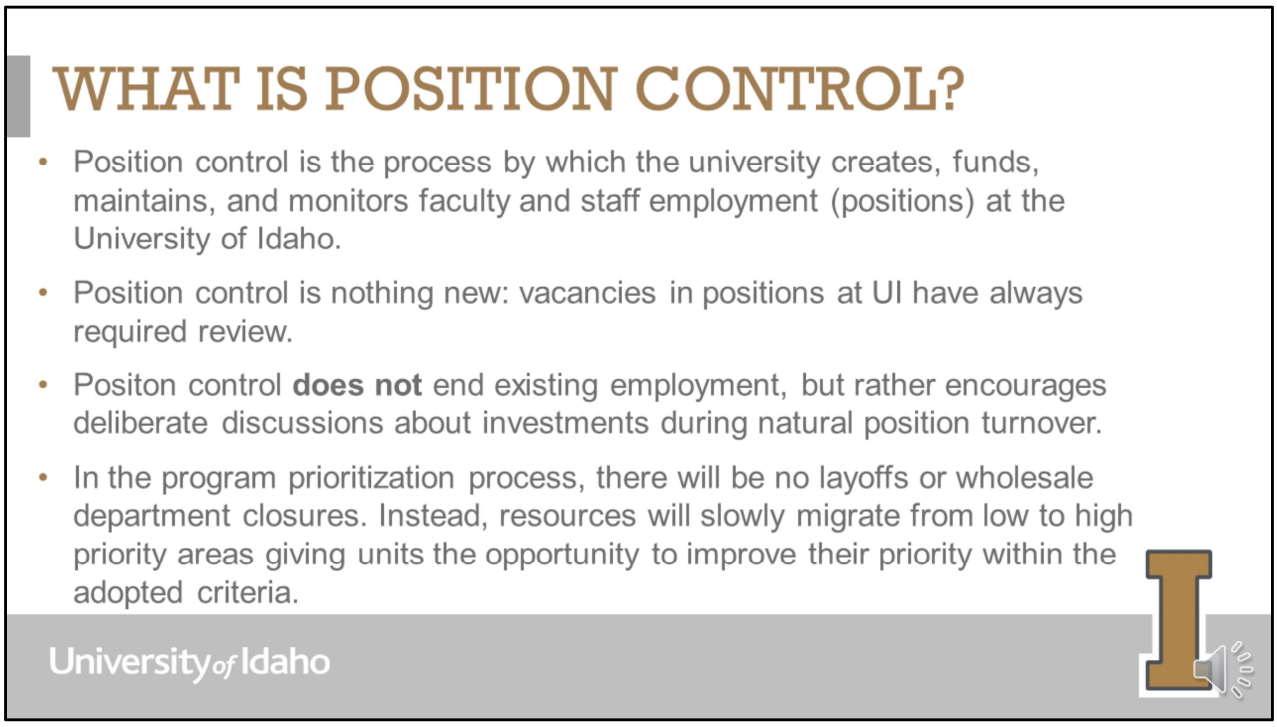


Why are we doing this, or how does program prioritization fit into the bigger picture of the university?

Well, there are two reasons. The first is quite simply because we have to: the Idaho State Board of Education has mandated that all state universities in Idaho report yearly on the program prioritization process. Because the State Board now requires program prioritization as part of the annual budget process, the university needs to develop a sustainable model.



However, the second reason for program prioritization is to better use our resources to achieve the goals of the University's Strategic Plan, which aims to grow the university and make it evolve.



Our objective for program prioritization is to promote institutional excellence by directing resources to high priority needs, as framed within the strategic plan and guided by the University Budget and Finance Committee (also known as UBFC).

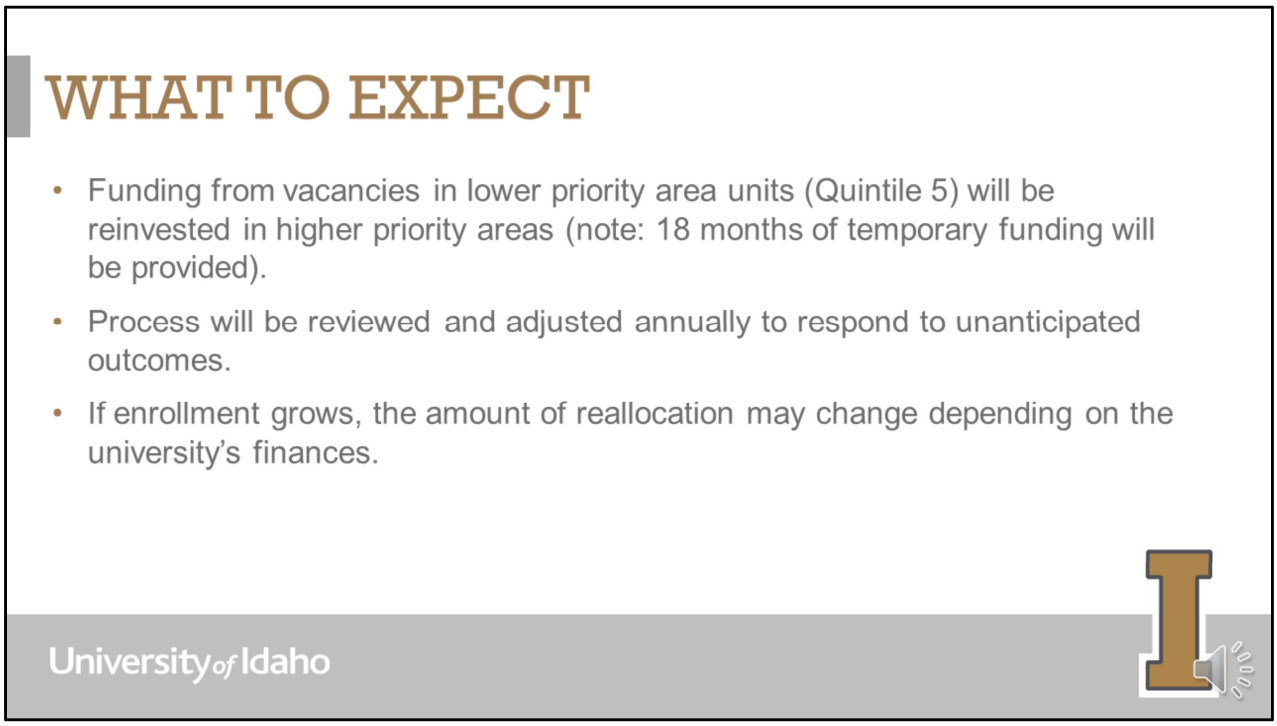
The UBFC is a shared governance committee - it's a subcommittee of Faculty Senate that includes both faculty and staff members, and is representative of the overall university constituents. As this graphic shows, the UBFC plays a central role in reallocating resources to help achieve the goals outlined in the strategic plan. These include things like increasing faculty and staff salaries through our market-based compensation plan, new facilities, and new programs and positions, among other initiatives, like those included in the cascaded plans submitted by the academic departments and support units.

So where will the resources to fund these initiatives come from? Some may come from increased tuition revenue from enrollment growth, and other sources of revenue, like gifts. But some of the revenue must come from within the university itself - and since we can't move large swaths of money around, we'll take marginal incremental amounts and move it to higher priorities. As this pie chart shows, since almost three quarters of university resources are tied up in salaries, a process called position control becomes the natural mechanism by which we can move money around without serious disruptions to university operations.

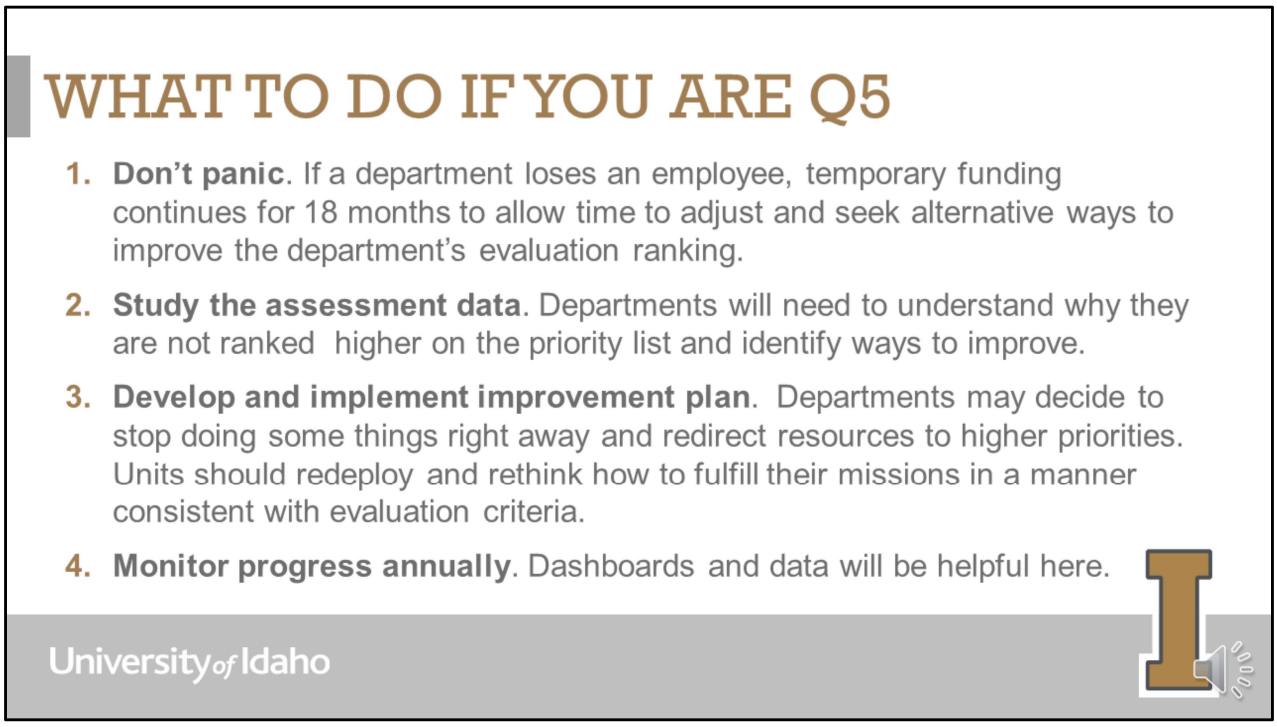
What is position control? Position control is the process by which the university creates, funds, maintains, and monitors faculty and staff employment (positions) at the University of Idaho.

Position control is nothing new: already, any time a vacancy naturally occurs in a department, whether it's because someone has retired or left for another job, it has always required approval to refill. The program prioritization process simply formalizes this.

In the program prioritization process, each academic department and support department will be ranked based on a set of criteria, and placed in one of five quintiles: Quintile 1 departments will be those that score in the top 20% based on the established criteria whereas Quintile 5 departments will be those that score in the bottom 20% of departments. The quintile will determine how resources from vacant positions in that academic department or support department will be reinvested.

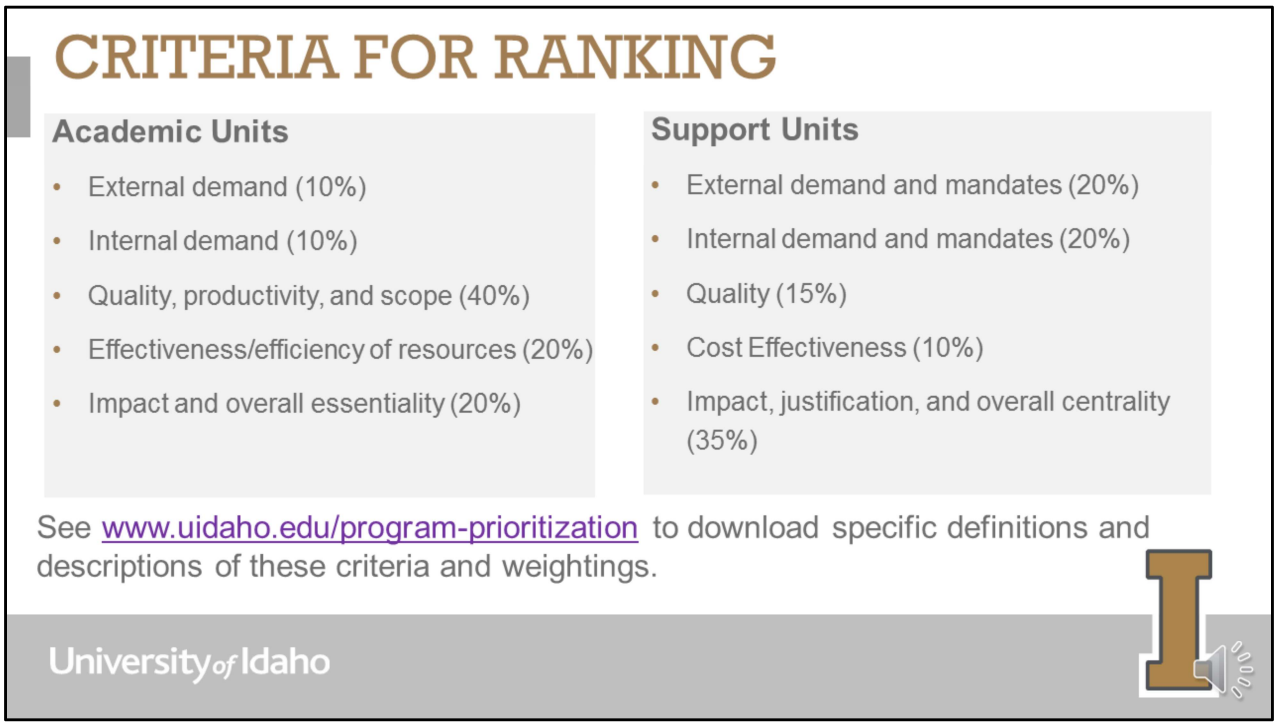


In the program prioritization process, there will be no layoffs or wholesale department closures. Instead, resources will slowly migrate from low to high priority areas as positions naturally turn over. This gradual reallocation will allow time for units to improve or transform their operations so as to improve their performance and ranking.

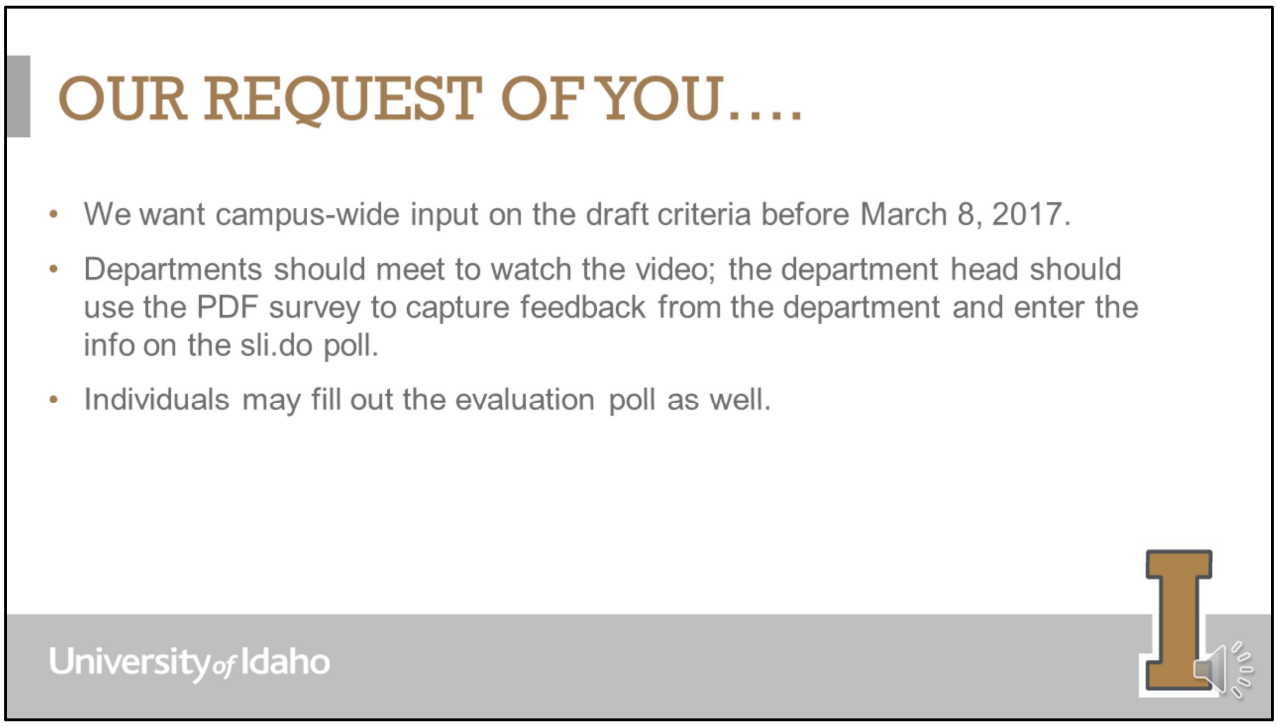


All employees at The University of Idaho are assigned to positions defined in Banner, the university's financial software system. These positions are paid from Banner-defined departments. Thus, a department head in the context of this presentation is anyone who is a supervisor of a group of people in a Banner-defined department. Even the President's Office is coded as a department within Banner and the president's team will be subject to this same departmental based position control process. Depending on where a given Banner-defined department is ranked via the program prioritization process, that department will have varying levels of authority to refill positions that have been vacated due to retirements, resignations, etc. Some or all of the money from vacated positions in departments in the lower quintiles will return to the University Budget and Finance Committee, where it will be reinvested to support the University's highest priorities.

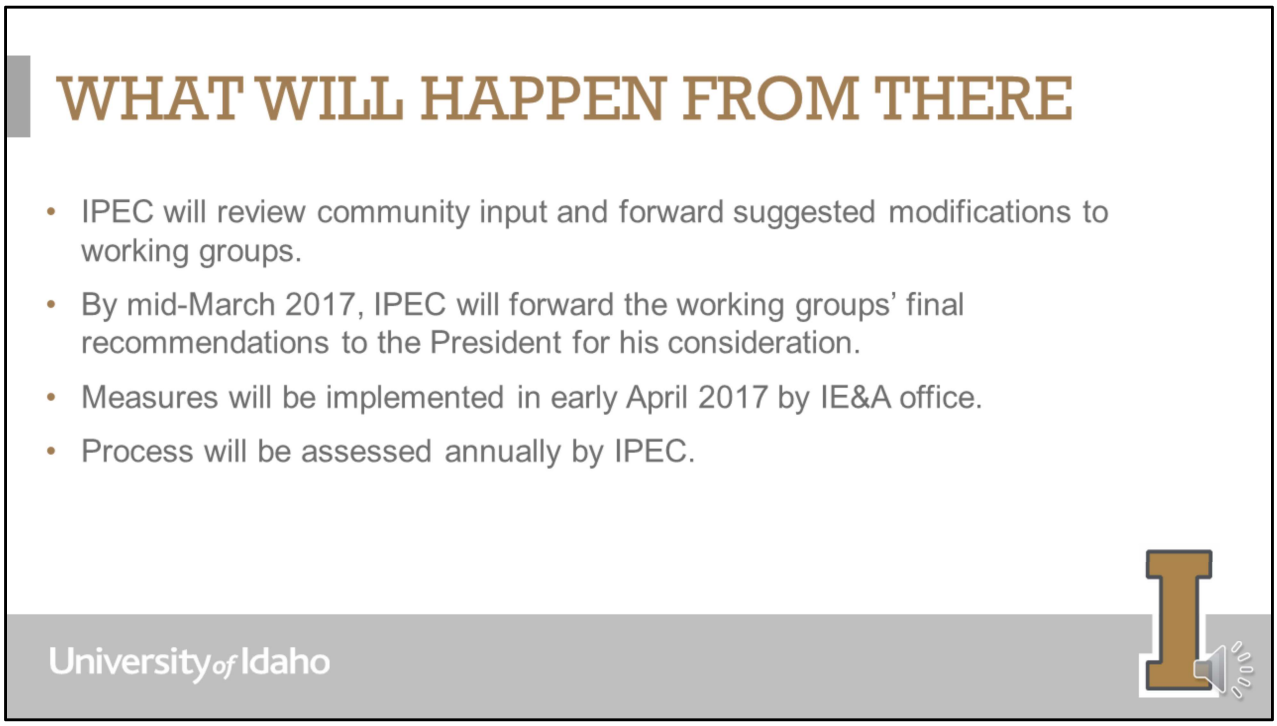
As an example, let's look at how position control will work for academic departments funded by General Education funds. In Quintile 1, the unit will be able to retain the funds and refill the position with available funds. In Quintile 2, we're trying to encourage discussions within departments and between the dean and departments about the effectiveness of current operations. In Quintiles 3 and 4, the additional discussions will also include the provost or vice president. For Quintile 4, half of the funds from vacated positions will be directed to UBFC for reinvestment. And in Quintile 5, all base funding for those positions will be rolled back to the UBFC to fund other university priorities.



So what should you expect as we roll this out? Well, if your department is in Quintile 5 and a vacancy occurs, you will not be approved to refill the position. This funding will be reinvested in higher priorities, and those higher priorities will be determined by the University Budget and Finance Committee, guided by the goals of the Strategic Plan. Quintile 4 departments may be permitted to refill the position but this is not assured. This process will be reviewed annually and adjusted as necessary. And if enrollment grows, this may allow us to scale back on the amount of position reallocation conducted in a given year.



What would you do if you were in Quintile 5? First of all, don't panic. If your department loses an employee, you'll have 18 months of temporary funding. This will be the time to have discussions with department and university leadership about how to adjust. Second, I would encourage everyone to study their assessment data. All departments need to understand where they are, and how to improve their ranking. You might develop and implement an improvement plan, maybe having conversations about discontinuing some activities or programs that are damaging your overall operation and quintile ranking. Ideally, if this process works well, people will be proactive about internally reallocating resources. And finally, I would encourage you to monitor your progress annually.



Two separate work groups developed a draft of the criteria, weights, and measures for ranking departments. Both of these workgroups were jointly appointed by Staff Council and Faculty Senate. The Academic Unit Prioritization Workgroup consisted of 15 faculty and 5 staff, and the Support Unit Prioritization Workgroup consisted of 15 staff and 5 faculty. Both workgroups received training and guidance from a nationally recognized expert and have developed a draft set of criteria and weights. To reiterate, we consider these criteria to be in draft format: we are now seeking your input on these criteria, weights, and measures. This is the key aspect of the program prioritization process for which we need your ideas and feedback. The final objective is to rank the Banner-defined departments and place them into quintiles. For academic departments, this outcome will be achieved by evaluating academic degree programs on appropriate metrics individually and then averaging those results to yield an overall quintile for the department.

The workgroups completed their work in late January and forwarded their draft criteria and measures to IPEC at that time. The draft criteria for academic and non-academic, or support, units are summarized here. For definitions and more specific weightings, please go to the link listed here and download the criteria in PDF form. Both workgroups have recommended the use of quantitative as well as qualitative data. For academic departments, the workgroup proposes quantifiable data for most of the criteria, and these metrics are consistent with our strategic plan institutional metrics. For non-academic or support departments, the workgroup proposes mainly qualitative assessments on the other hand. We will be asking you specific questions about these criteria in the feedback portion of the process.

Our request of you is simple. Watch this video and give us feedback. Since each department will be placed into quintiles as a whole, we are asking the department head to call a meeting for the entire department to watch this video. We have a survey instrument which will be used to capture the department's feedback on the proposed criteria. The department head can use the printed version of the poll to take notes during the department meeting. After the department has concluded its discussion, the department head will log on to SLI.DO and enter the data for use by the Institutional Planning and Effectiveness Committee as well as the faculty/staff workgroups. Individuals will also be able to fill out the same survey instrument which will be monitored and assessed by Faculty Senate and Staff Council and eventually forwarded to the IPE committee in summary form.

The deadline of March 8 will allow IPEC to summarize the feedback and provide recommended modifications to the working groups. The working groups will meet in mid March with the goal of finalizing their recommendations for the President. IPEC will work closely with the working groups and also be in communication with the President as needed or requested. The goal is the have the criteria finalized and approved by President Staben by the beginning of April. After the criteria are finalized, Institutional Effectiveness and Accreditation office will develop necessary data and survey instruments and conduct the prioritization process. Formalized position control would start with the beginning of the new fiscal year on July 1, 2017. The overall process will be assessed annually and adjusted to assure that the process is helping the university to thrive and excel.

All of the materials regarding program prioritization and the draft criteria may be found at this URL. In closing, the Institutional Planning and Effectiveness Committee would like to thank you for taking the time to be part of this very important decision. We are eager to hear your thoughts, your questions and feedback so that we can make this process better together.

SUBJECT:	Feedback on Draft Program Prioritization Evaluation Criteria

---

As many of you are aware, a few years ago the Idaho State Board of Education required all four-year colleges and universities in the state to develop and implement a program prioritization process. Last year, the board implemented a new policy that requires all four-year colleges and universities to embed program prioritization into the annual budgeting and program review processes, and to provide annual progress reports. For this reason, the university is developing a refreshed program prioritization process in order to:

1. Fulfill the board's mandate in a manageable and sustainable way, and
2. Better use our resources to achieve the goals of the university's strategic plan, which aims to grow and evolve the university further toward the next level of excellence.

To ensure this critical work is done effectively, UI Faculty Senate, Staff Council and ASUI nominated a group of Vandals to serve on the Institutional Planning and Effectiveness Committee (IPEC), which is charged with many tasks, including implementing a refreshed program prioritization process consistent with the State Board of Education's policy. IPEC and two working groups of frontline faculty and staff — one for academic units, one for support units — have developed draft criteria we will use to evaluate and rank academic and support units.

We Need Your Input

In order to help our university community understand program prioritization and provide feedback on the draft evaluation criteria, we created an informational video presentation and support materials which are available at www.uidaho.edu/program-prioritization. Please watch the video, review the support materials and provide feedback by Wednesday, March 8.

How to Provide Input

IPEC asks each department head to call an all-department meeting and watch the video together as a team. After each department has watched the video, the department should discuss the draft criteria and offer feedback and suggestions for modification. Using notes taken at that department meeting, the department head will provide feedback using the survey created for this purpose (there are support materials available on the website to help guide these discussions). The survey results will be used to improve and revise the criteria if necessary. Individuals may fill out the same survey instrument if they would like.

Once the feedback is collected, IPEC will review it and forward any suggested modifications to the working groups. The working groups will meet in mid-March to finalize their recommendations for the president. The goal is to have final criteria approved by President Staben by early April. At that point, the Institutional Effectiveness and Accreditation Office will develop data and survey instruments and conduct the program prioritization process. The new process will be implemented on July 1, 2017.

We will assess and adjust the program prioritization process annually to ensure it is effectively helping the university thrive and excel.

Thank you for taking the time to participate in this important process and for providing your input. This is an important initiative — one that will help us to promote institutional excellence by directing resources to high priority needs, framed within the strategic plan — and we need your partnership to ensure it is effective.

SUBJECT:	Revisions to Program Prioritization Evaluation Process and Criteria

---

Thank you for providing input on the initial program prioritization draft evaluation criteria. Your feedback is very important to the process and we are making significant changes to the criteria based on that feedback. I want to thank the workgroups for their hard work in producing the initial criteria and their continued investment in doing this process well. A spreadsheet including all the feedback we received on the criteria is available on the Provost's Office website. A brief synopsis of the feedback and a reminder of next steps is below.

108 departments, 121 individual faculty and 54 individual staff completed the feedback tool. In addition, our office directly received several longer narrative emails and feedback. The detailed position control guidelines were not posted in a timely way on the provost's website, so there were many questions asked that are addressed in that document. Nonetheless, it is clear that some substantial changes in the approach and the criteria are recommended by our community.

Based on these comments and suggestions, revisions to the program prioritization process and outcomes should be adopted to ensure that the result will:

1. Align well with the strategic plan, using the same language and metrics. There was particular concern that research productivity was not properly measured or weighted in the initial draft criteria.
2. Allow more refinement so experts in a given area do the evaluation (especially for the non-academic units).
3. Account for or mitigate bias related to unit size.

4. Allow more nuanced evaluation that involves human wisdom and judgement. Avoid metrics and measures that treat units as "one size fits all."
5. Have a balanced mix of quantitative and qualitative measures and make sure that mix is consistent across all units (i.e. do not have many quantitative metrics for academics and none for other units).

The Institutional Planning and Effectiveness Committee (IPEC) will discuss ideas to address these concerns in the coming days. As discussed in earlier communications, IPEC will forward feedback to the workgroups with suggested changes. Given the feedback, it is clear the proposed changes will be substantial.

Based on typical employee turnover and the proposed position control policy, we estimate 3-4 percent of general education funds will be redirected to the University Budget and Finance Committee (UBFC) for use in funding high priorities. With those funds, we will make substantial headway on important institutional priorities, such as market-based compensation and in-state tuition waivers for teaching assistants. In addition, if we grow enrollment by 500 full-time undergraduate students, we will be able to adjust the position control policy so that less money is subject to reallocation. If we get an additional 1,000 undergraduate students (1,500 total above current enrollment), we will have the latitude to stop all mandatory reallocation based on quintiles if we so choose. For now, these reallocated funds will be our means to feed innovation and growth at the University of Idaho as we launch our strategic plan. Once enrollment picks up, we will be able to adjust the policy as we reap more revenue from new enrollments.

In closing, let me say again that we do not have the option of refusing to conduct program prioritization. This is a State Board of Education policy requirement that must be implemented in a sustainable and systemic way by the end of this fiscal year. We have complete latitude to design and adjust the process in ways that work best for our great institution, which is what we are doing now. We will have a process in place this summer and it will launch on July 1, 2017. It may not be perfect, but we can adjust the process each year based on our experience and understanding of the impact on the institution.

Thank you again for your participation in this important process. More information will be provided as we move through the next steps.

DATE: April 10, 2017

SUBJECT: Revised Program Prioritization Framework

The Institutional Planning and Effectiveness Committee (IPEC) and the two Program Prioritization workgroups are recommending a revised evaluation framework in response to input provided by University of Idaho faculty and staff through a recent feedback survey. The revised evaluation framework has three key elements, which will be used to evaluate all Banner departments. This revised approach also aligns our Program Prioritization and strategic planning efforts. The three elements are:

1. Impact and essentiality to the University of Idaho's mission
2. Contribution to the University of Idaho strategic plan
3. Institutional investment

The first element, impact and essentiality to the University of Idaho's mission, was included in both workgroups' evaluation criteria. To ensure more consistency across all department types, this particular assessment tool will be jointly developed by the two workgroups and applied uniformly to all Banner departments at the university.

The second element, contribution to the strategic plan, will be assessed using focused tools specific to each of four key functional areas of the university:

1. Academic Banner departments
2. Student/Faculty service Banner departments
3. Research centers/Extension/Community engagement Banner departments
4. Centrally provided service Banner departments

These tools are being developed by the two workgroups and will incorporate specific feedback received from the recent survey. Given the expanded scope of work, the workgroups will augment current committee members as needed to ensure we have sufficient depth of knowledge in each of these key functional areas represented. Workgroups plan to complete their work by the end of April. This refined toolset will allow for more customized and relevant evaluation as suggested by the UI community feedback we received.

The third element, institutional investment, will measure the relative resources available to a Banner department so the contribution to the strategic plan element is appropriately scaled to the level of resources available to the Banner department. In this element, the highest ranked programs will have minimal or no institutional investment (i.e. General Education funding) thus mitigating any bias based on size. This element will be weighted appropriately to prevent bias against either small or large Banner departments as measured by their General Education funding levels. As in element one above, this element will be applied uniformly to all Banner departments at the university.

In closing, IPEC and the workgroups have addressed most of the concerns raised by our community in the revised framework. We have more details to iron out and some concerns may remain, but we are confident that we have made significant and meaningful improvements based on your feedback. Once again, thank you for participating in the feedback process.

I am extremely grateful to the workgroups for their continued hard work and investment in this process. We anticipate finalizing the assessment tools by the end of April and forwarding them to President Chuck Staben for approval in early May. Once finalized, I will provide another update to the university community.

SUBJECT:	Update on Program Prioritization Evaluation Progress

---

I am glad to report we are making good progress toward completing the evaluation component of our Program Prioritization initiative. After incorporating UI-wide feedback, we have collectively agreed to use three criteria to evaluate departments:

1. Essentiality to the University of Idaho's mission
2. Contribution to the University of Idaho's strategic plan
3. Institutional financial investment in Banner departments

In my last update, I shared the tools developed by the Institutional Planning Effectiveness Committee (IPEC) and the workgroups to assess Banner departments on criteria #1 and #3. At that time, the workgroups and IPEC were still working on tools and measurement weights for criterion #2. I want to thank the workgroups and IPEC for completing these remaining tasks last week.

The criterion #2 evaluation tools for each Banner department

subgroup (Academic, Student/Faculty Services, Research Centers/Extension/Community Outreach, Centrally Provided Services) can be found here. Each of these tools will require you to provide a narrative description of your contribution to the strategic plan and your Banner department will receive a request to provide this narrative description soon.

Initial weights for the three evaluation criteria will be assigned to eliminate any bias related to unit size. The workgroups have agreed to the methodology that will be used to set these weights, which will be documented in a final process development report expected in late summer.

IPEC and the workgroups acknowledge this process has extended beyond the spring semester, contrary to our planned goal and timeline. However, gathering university community feedback and making the necessary and substantial revisions was more important than being on schedule. We acknowledge the process unfolded piecemeal and may have caused some confusion about what was needed in the criterion #1 contextual statements. We will consider some last minute revisions to the contextual statements recently provided for criterion #1 if absolutely necessary, provided you contact us immediately. We plan to launch this evaluation tool on June 1, so we need any requested changes done in the next few days. If you have questions about whether you should make such changes, feel free to contact Lodi Price (lodi@uidaho.edu) or Peggy Lynd (plynd@uidaho.edu).

Please remember this process will be monitored annually. We will adjust for unintended or unanticipated outcomes. Thank you again for your support and participation in this critical process. We will become stronger and better together!

SUBJECT: Program Prioritization Update

When classes ended last spring, there were several big projects pending or in motion, including State Board of Education required program prioritization. Program prioritization is a process that helps us to efficiently reallocate funds to high priority projects in support of our strategic goals.

The university has many priorities, but the most critical are funding for market-based compensation adjustments for staff and faculty and competitive compensation including tuition/fee waivers for teaching assistants. Funds identified by the program prioritization process will be reallocated to fund these two priorities.

The UI community provided input into the program prioritization process, which helped inform how we would evaluate and score every UI Banner department. Departments were evaluated using a mixture of quantitative data, financial data and surveys. The data have been analyzed and we will share the department scores in early September. We are planning open forums shortly thereafter to share information and help you understand the results and next steps.

The Institutional Planning and Effectiveness Committee, the vice presidents, the deans and I have reviewed the department scores and other data. We are now evaluating options for linking these scores to reallocations. Reallocation is not easy; but we know reallocated funds will return to units in the form of increased wages and support for teaching assistants, our highest priorities.

Each of us has a distinct leadership role at the University of Idaho and together our partnership will help UI rise to even higher levels of excellence. Thank you for working with us as we continue to improve our university. Additional information about program prioritization and the funding of our priorities will be shared in the coming weeks.

I thank Provost Wiencek, the Institutional Planning and Effectiveness Committee and all who participated in this important process.

SUBJECT:	Program Prioritization Town Hall Sessions Sept. 11

As noted in a communication from President Chuck Staben on August 22, detailed information about program prioritization will be distributed later this week. In anticipation of that release, the Institutional Planning and Effectiveness Committee (IPEC) has scheduled two town hall meetings for Monday, September 11, to respond to questions and provide clarification about the process and next steps.

The first session will focus on academic departments; the second will focus on non-academic programs, including student and faculty support; centrally provided services; and research, outreach and Extension units. All employees are welcome to attend either session. The sessions will be live-streamed to our statewide centers.

- **Session 1 (academic departments):** 8:30-10 a.m. Pacific time, Monday, Sept. 11, Vandal Ballroom, Pitman Center
- **Session 2 (non-academic departments)**: 10:30 a.m. to noon Pacific time, Monday, Sept. 11, Vandal Ballroom, Pitman Center

Streaming locations:

- **Boise Water Center:** Room 248 (Session 1) and Room 162 (Session 2)
- **Boise Law and Justice Center:** Room 307
- **Coeur d'Alene:** Room 213
- **Idaho Falls:** Room TAB 320

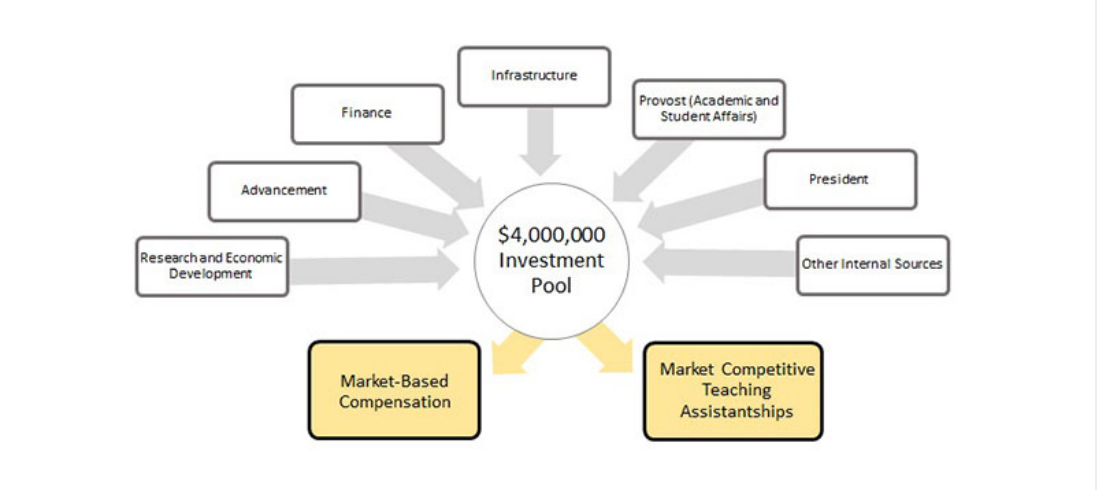
SUBJECT: Results of the Program Prioritization Process

On behalf of the Institutional Planning and Effectiveness Committee (IPEC), I am writing to confirm our university goals as shaped by our strategic plan, and to explain how the result of the program prioritization process is helping to propel these goals into action.

As you may recall, the University Budget and Finance Committee (UBFC) recommended two highest priority projects for this fiscal year:



. Market-based compensation for faculty and staff, and

1. Fully-funded, competitive teaching assistantships (TAs).

These two priorities reflect the priorities of strategic plan Waypoint One (Goals 3 and 4); namely, growing student enrollment via retention and improving the workplace environment. With the help of the program prioritization process, we have identified $4 million, which will allow us to make significant headway toward funding these two priorities.

The graphic below shows the sources of these investment funds. Half of the funds ($2 million) will come from reallocation targets identified through the program prioritization process. The other half of the funds will come from other sources, including tuition revenue and strategic reallocation of centrally managed funds. The total $4

million of investment funds will fully fund the TA request and partially address the market-based compensation request.

To make progress toward market-based compensation for UI employees, this year we will implement mid-year raises. And to fund the TA compensation priority, College of Graduate Studies Dean Jerry McMurtry will work with the academic deans and the Graduate Council to address our funding of TA appointments so that we remain nationally competitive. Teaching assistants are an important component of meeting our enrollment and research goals stated in the strategic plan and, much like faculty and staff, their compensation has fallen out of step with the market.

As you may remember, through the program prioritization process, each program received a relative ranking that was translated into a normalized score. You can find the program prioritization results on the provost's webpage. IPEC has decided not to place programs into quintiles as originally planned. Instead, we recommended, and President Staben approved, modification of the reallocation methodology. Rather than a rigid position control methodology to recover salary dollars via position control, each vice president and the President's Office (which also includes University Communications and Marketing, Athletics, the Office of Equity and Diversity, etc.) will contribute funds, or reallocate funds, as illustrated in the chart above. The reallocation targets are directly linked to the normalized scores of Banner departments in a given executive's area. Executive-level officers will work with their respective teams to develop a reallocation plan, which will be approved by President Staben. Approved reallocation plans will be effective in FY19 (starting on July

1, 2018) so units have a year to plan for changes.

The current estimated impact for each executive area of responsibility (including both budget reductions and budget increases) is shown below. Please note that the estimated reallocation and market-based compensation amounts have been rounded, and may change to reflect additional data and input.

Executive Level	Total Gen Ed Salary Budget	Sources	Market-Based Compensation (Mid-Year)	Competitive TA Compensation	Net Resource Flow
President	$6,762,717	$(222,000)	$76,000	$ -	$(146,000)
Provost (Academic & Student Affairs)	$68,393,631	$(1,268,000)	$1,027,000	$2,300,000	$2,059,000
VP Advancement	$1,542,883	$(41,000)	$41,000	$ -	$ -
VP Research & Economic Dev.	$1,049,507	$(6,000)	$63,000	$ -	$57,000
VP Finance	$3,548,321	$(88,000)	$97,000	$ -	$9,000
VP Infrastructure	$11,827,637	$(375,000)	$396,000	$ -	$21,000
Other Internal Sources	$ -	$(2,000,000)	$ -	$ -	$(2,000,000)
Total	**$93,124,696**	**$(4,000,000)**	**$1,700,000**	**$2,300,000**	**$ -**

The current base salary budget is in the first column and the reallocation amount is in the second column (parenthesis represent budget reductions). New resources added back to each executive area of responsibility are in the third and fourth columns. The last column shows the difference between resources added and resources subtracted via reallocation.

As we finalize this process, IPEC will host two open forums to present and summarize the program prioritization process and answer questions. These open forums will be held on Monday, September 11, 2017, in the Vandal Ballroom, with connections statewide. See the statewide viewing locations here. The first forum will be held from 8:30-10 a.m. and the second forum will be held 10:30 a.m. to noon.

Thanks to all of you for your hard work and effort — both in your

daily contributions as well as in this important process. Though the process has been arduous, we are excited to be able to achieve our university community's strategic goals.

SUBJECT: Thank You for Participating in Program Prioritization Process

---

Thank you for participating in the Program Prioritization process and for attending the open forums regarding Program Prioritization last week. As I listened to each concern and comment, I was grateful for the open environment we have at UI and the transparent nature of the process - led by more than 50 staff and faculty members and engaging hundreds. Although our process was not perfect, it has provided useful information. We will use the rankings to identify reallocations we must make for progress.

One difficulty with rankings is that such a process can leave people feeling undervalued. Although the ranking process caused us to order programs in some fashion, each

member of the Vandal family is valued and appreciated. Program prioritization, particularly in the absence of new net revenue, is necessary to position ourselves to meet the lofty goals of our strategic plan – a plan developed by all of us to serve all of us. We are investing in UI to make it an even better place to work for our faculty and staff while we continue to serve Idaho as its higher education leader.

Rankings are never easy. With the rankings done, we quantified reallocations and we are now moving together to fund our two highest budget priorities: market-based compensation and teaching assistantships. All of you deserve to be paid equitably for the hard work you do every day for our university. The executive leadership team and I are committed to making this a reality.

I have asked each vice president to submit a reallocation plan for my consideration by December 1, 2017. This will allow sufficient time to finalize the plans by January 1, 2018. The reallocations will inform the budget setting process and fiscal year 2018-19 baseline budgets.

I encourage you to continue engaging in the process and to feel ownership in it as we strive to make the University of Idaho the best institution possible.

Go Vandals!

SUBJECT:	Input Requested for Student and Academic Affairs Budget Reallocations

---

Dear Colleagues,

Consistent with the president's memo of yesterday, we must develop a plan to reallocate $1.268 million from the academic, strategic enrollment management and student affairs area by December 1, 2017. In several areas, we have put a hold on search processes until there is more clarity on the sources of these reallocated funds; thus, it would serve our interest to have our first draft to the president much sooner. This would allow for more certainty and the ability to get most of these searches underway. Our funds, combined with other VP area reallocations and newly identified internal sources, will underwrite the top University Budget and Finance Committee (UBFC) recommended initiatives. As part of those initiatives, our areas will see an additional $1.027 million for salary adjustments and $2.3 million for competitive teaching assistant compensation.

I want to assure everyone that this amount of money is not going to disrupt the normal course of work and service in academic and student affairs. This amounts to a 1.49% reallocation of the total $85.3 million base budget in our areas. The Budget Office estimates that there is more than $3 million of long-term vacant positions (vacant in excess of one year) and unallocated base

funds within the academic and student affairs areas. Thus, it is my intention to put some reasonable focus on using such funding as part of this reallocation process.

Within academic and student affairs, we will develop a set of guiding principles that will help us formulate a reallocation plan. I will be transparent in the process, as is my common practice, but I also will be nuanced in the implementation. Fundamentally, these decisions are fraught with high levels of impact both within any given department but also across the entire university. Thus, I will not be bound by formulas or monolithic criteria in recommending a final reallocation plan that can work for everyone in academic and student affairs.

I look forward to hearing from you on what our guiding principles for this reallocation should include. Let me start this conversation with some ideas. First, contribution toward the strategic plan remains very high on my list and, more specifically, contribution toward enrollment growth and student success. Thus, any reallocation must be designed to maintain and serve our current enrollment, as well as acknowledge and reward trends in enrollment. Second, the fiscal capacity of any given college or area to contribute to a reallocation should be part of our decision-making process. Finally, centrality to mission and scholarly excellence are important considerations as well; although, we have struggled to come to agreement on how best to measure such matters.

I would like to invite all of you to submit or to vote on other key guiding principles that should be considered in the reallocation process. Votes and feedback should be submitted through a tool called Sli.do, available at https://app.sli.do/event/7r0wijzh/ask. Although limited in the amount of characters (300) to state your idea, this tool allows for voting – both up and down — on these ideas as well as providing a feedback to perhaps improve or adjust an idea. Please take a few minutes to share your ideas under the "Questions" tab and to vote on ideas being suggested by others. We will accept this input through September 29, 2017. If you have questions about how to use Sli.do, please call Peggy Lynd or Lodi Price and they will be happy to assist you.

I will start the reallocation plan development with the deans, vice provosts and other direct reports within the next week. We will focus on narrowing the guiding principles and airing ideas and/or concerns. After getting input from the Sli.do poll, my staff will prepare related data and implications for additional discussion among the deans, vice provosts and other direct reports. After these two rounds of discussion, I will work with the team to finalize specific targets for each college, vice provost and student affairs area. I believe we can finish this work by mid-October.

Once we finalize reallocation plans across the entire university, the Institutional Planning and Effectiveness Committee (IPEC) will turn its attention toward continued improvement in the evaluation process supporting program prioritization. My sense of IPEC discussions to date indicate that the primary issue is criterion two — contribution toward strategic plan. A recurring question from many of you is, “how do I improve; what do I focus on?” given that the evaluation process needs improving. I am confident that if you focus on achieving the goals and targets spelled out in your cascaded plans, then you will fare well on criteria two during the next round of evaluations, scheduled for roughly two years from now. Specific modifications to criterion two will be the subject of additional university discussion this year, but my sense is that the evaluation of the contribution to the strategic plan is likely to flow from the cascaded plans that are already in place.

In closing, I truly believe we are at a pivotal moment for the University of Idaho. We are choosing to shape our own future by setting priorities, developing plans together and executing on those plans even when it is difficult to do so. These are all trademarks of excellence. I hope you can join me in taking pride in giving well-deserved salary and compensation adjustments to our faculty, staff and teaching assistants in the coming months.

Best wishes,
John

SUBJECT:	Update on Academic and Student Affairs Budget Reallocations

---

Dear Faculty and Staff Colleagues,

I am following up on my earlier memo about the reallocation plan for Academic and Student Affairs. I have reviewed your suggestions posted on SLI.DO, and I appreciate the time many of you took to share your perspectives. In addition, I met with my direct reports, including the deans of the colleges, the vice provosts and the dean of students on September 25. Their feedback and your SLI.DO comments have resulted in the recommendations below.

Based on the conversations and SLI.DO postings, the guiding principles for our reallocation plan will include the following:

1. The program prioritization evaluations will remain an important factor in determining reallocation

targets. Some members of the team felt that there was significant effort expended to get to this point; therefore, the results need to be honored, given the community-based process that was utilized. Others recognized that the evaluation process has some room for improvement. In particular, the evaluation did not sufficiently recognize a few high enrollment programs, sending an inconsistent message about our strategic goals.

2. Consistent with the last statement, both SLI.DO responses and the leadership team recommend additional weight and scrutiny be placed on enrollment metrics such as majors (including pro-rated double majors), student credit hours delivered and enrollment growth. This is consistent with the strategic plan's waypoint one emphasis on enrollment.
3. Appropriate care will be taken to normalize any measurements by total teaching FTE (including only those positions funded by general education funds). Normalization will account for the relative productivity of units based on resources available to them.

I will continue to work with the leadership team to look at data (see points 1-3 above) and arrive at final reallocation targets and plans for each area. The goal is to finalize our plans no later than November 1. I will continue to update you at each step of the process.

Best wishes

John

DATE:	October 5, 2017
SUBJECT:	Reallocation Targets for Each College and Mid-Level in Academic & Student Affairs

---

Dear Faculty and Staff Colleagues,

As promised, I am following up with the final recommendations for reallocation from units reporting to the provost. Consistent with next steps outlined in my last update, the original program prioritization reallocation targets have been assessed against enrollment measures such as student credit hours delivered per faculty, enrollment (majors) per general education budget, and enrollment trends (increase or decrease per year, over the last three years) per general education budget.

The enrollment picture and evaluation is complex and does not provide a simple correction to the current reallocation targets identified by program prioritization. Some metrics would suggest that those with higher teaching loads are also seeing higher reallocation targets. On the other hand, the enrollment trends (most colleges are losing enrollment) are consistent with the college reallocation targets suggested by program prioritization. In summary, the enrollment data do not support modifying the budget reallocation targets set by the program prioritization process. The reallocation targets are summarized in the table below.

The reallocations range from 1 to 2.5 percent nominally, with everyone contributing to the final reallocation plan. My direct reports (deans, vice provosts, etc.) will develop a reallocation plan, in consultation with their respective teams, and submit it to me by October 23. I will then finalize the overall plan and forward to President Staben for his consideration on November 1.

It is hard to make such difficult decisions, and we have spent hours deliberating on this matter. I appreciate all of your hard work and understanding as we seek to find ways to move our strategic goals forward together. These reallocated funds will come back to us in the form of increased faculty and staff compensation, as well as nationally competitive teaching assistant support. Our No. 1 goal for this year is to substantially grow tuition revenue via enrollment and, thus, minimize the amount of reallocation required in future years.

In closing, I want to reiterate my thanks to everyone who has participated in this process, a process that has taken over two years to complete. I am surrounded by loyal and dedicated faculty, staff and students and grateful that you are helping move us to higher levels of excellence.

Best wishes

John

Update on Program Prioritization at the University of Idaho

August 2019

Board Policy V.B.11: Program Prioritization

a. Program Prioritization is a process adopted by the Board in setting priorities and allocating resources among programs and services with a specific focus on Mission, Core Themes and Strategic Plans.
b. Program Prioritization shall be incorporated in the colleges and universities' annual budgeting and program review process.
c. Annual Program Prioritization updates are to be submitted to the Board by the colleges and universities on the date and in a format established by the Executive Director.

Recent History of Program Prioritization at the University of Idaho

In 2013, the State Board of Education (SBOE) mandated that all universities engage in program prioritization as a way to address the Governor's zero-based budgeting requirement. Their intent was for institutions to critically review their academic programs and non-academic support functions, building a culture of continuous improvement and internal reallocation to meet institutions highest goals and objectives instead of reliance on new monies from the State of Idaho.

The University of Idaho conducted program prioritization several times between 2000 and 2013. Prior to 2013, there were at least two program prioritization processes that identified programs for closure and investment. The Board mandated 2013-2015 effort by interim leadership was branded "Focus for the Future" to highlight the need for a renewed approach, given the Board's interest in an ongoing process. The process initially resulted in a prioritization that the SBOE found not compliant with their guidelines. These results were adjusted to meet the Board's requirements and led to six moved/restructured degrees, five program consolidations, one name change and nineteen discontinued programs. For example the closure of the Office for Community Partnerships released over $460,000 that was invested in faculty positions in international studies and natural resources as well as additional base funding for the Library.

New leadership worked with faculty senate in 2015-16 at the behest of the SBOE to continue to improve the program prioritization process at the UI. A subsequent string of communication and committee work ensued and a new transparent and collaborative program prioritization process developed. Updates regarding this new program prioritization were provided to the SBOE in August 2015 and August 2016. At the August 2016 meeting, the Board commended the institutions for their work on implementing program prioritization processes that were viable and sustainable.

The University of Idaho is now moving into a third improvement cycle of our program prioritization process. This process is embedded in our annual budgeting cycle and has yielded significant resources that have been dedicated toward university priorities.

The University of Idaho Program Prioritization Process

The University of Idaho assesses overall program priority by evaluation against three criteria:

1. Essentiality to the University of Idaho's mission (20% weighting)
2. Contribution to the University of Idaho's strategic plan (50% weighting)
3. Institutional financial investment in Banner departments (30% weighting)

This approach reflects the university community's desire to align our program prioritization and strategic planning efforts. These criteria were separately assessed using focused tools specific to each of four key functional areas of the university:

Academic departments
Student/Faculty service departments
Research centers/Extension/Community engagement departments
Centrally provided service departments

Banner is our Enterprise Resource Planning (ERP) tool and a department is a specific budgetary unit within the Banner ERP. Thus, the departments above encapsulate ALL units at the University of Idaho that have access to monetary resources.

The results of the assessment are all numeric and range in value from 0 (lowest performance/priority) to 1 (highest performance/priority) within each functional area above, and are available as an ordinal ranking or, per Board guidelines, as quintiles. Budget reductions have been defined for each Vice Presidential area based on the relative scores and current general education budget of each department.

University Budget and Finance Committee (UBFC) – Funding Priorities

Each year, the university community is invited to submit ideas requiring new sources of funding. The proposal process is managed by a committee of Faculty Senate (which includes Staff Council and student representatives). The committee evaluates and ranks all proposals, then sends them to the President's leadership team for further evaluation. Based on the amount of reallocated and new revenue, the President makes the final funding decisions. Recurring, base general education budget is considered during the program prioritization process, as are other new revenue sources such as net tuition revenue, state appropriations or increased overhead from Federal research grants. Additional one-time investments are typically funded through a separate mechanism of collecting unspent general education budget within units across all functional areas at the University of Idaho. Final funding decisions and amounts are shared broadly with the campus community.

Recent Results and Reallocations

The entire campus was encouraged to participate in developing the program prioritization process. However, there was significant consternation expressed by those that were not highly ranked in the process, a reaction which is to be expected in a process that places units in competition with each other. The results have been utilized twice to meet high priority financial needs since Fall 2017.

In Fall 2017, the two highest priorities identified by the UBFC were competitive Teaching Assistant (TA) packages and investment in faculty and staff salaries to improve market competitiveness. Program prioritization identified $2 million. This funding was coupled with an additional $2 million in anticipated new tuition revenue and centrally reallocated funds, to meet the required $4 million target for increased compensation. The funding of our TA packages to competitive levels resulted in a significant increase in new graduate student enrollment in the subsequent Fall. The salary increases for faculty and staff addressed longstanding equity issues across many dimensions of our demographics. In addition, we applied a 1.86% flat rate contribution from prior year unspent general education budgets to yield $500,000 of one-time funds for updated Zoom videoconferencing and to address emerging needs in University Communications, the library and Staff Council.

The same program prioritization process identified another $5 million in permanent base general education funding reductions in Fall 2018. Given the significant base reductions required in academic programs, the Provost instituted a position control mechanism where faculty position turnover is managed at the University level rather than at the College or department level. Of the $5 million in reallocated base funding, $3 million was utilized to address ongoing tuition revenue shortfalls and the remainder was invested in UBFC priorities as well as allowing for a small strategic reserve for the new president. One-time unspent general education budget accumulations contributed at a rate of 6.87% to yield $1.5 million for investment in faculty start up, University Communications, the Graduate College recruiting efforts, and the College of Art and Architecture technology upgrades.

The Third Evolution of Program Prioritization

This fiscal year, the University of Idaho will undergo its third evolution of the program prioritization process since the Board's initial charge in 2013. Several areas for improvement have been identified by the university community. First, the process in place relies heavily on surveys of university community members for relative centrality to mission of each unit. In such surveys, vital functions (e.g. utilities operations, Title IV investigation office, the Office of the President) were not "popular" uses of institutional funds and, thus, have taken a disproportionate cut during the last two cycles of program prioritization. It is time to reassess and adjust the approach and its impact on critical function units.

The Institutional Planning and Effectiveness Committee (IPEC) recommends that we modify criterion two of the current program prioritization process to minimize or eliminate narrative-based assessments. A subcommittee to IPEC has made specific recommendations on the use of dashboards and standard measures of productivity for academic units. In addition, there is widespread agreement the our Cascaded Planning process could be a proxy for assessing criteria for all units on campus and would likely be the best tool for non-academic departments.

Finally, we have utilized the program prioritization process primarily as a reallocation methodology and secondarily as a means of assessing the viability of academic programs. The new approach will more directly measure viability of academic programs and will likely yield more actionable data and information.

OFFICE OF THE PRESIDENT
875 Perimeter Drive MS 3151

uidaho.edu/president

MEMORANDUM

Date: November 22, 2019

To: John Wiencek, Provost and Executive Vice President
Chair, Institutional Planning and Effectiveness Committee

From: C. Scott Green, President

Subject: 2019-20 IPEC Committee Charge

Provost Wiencek please share the information below with the members of the Institutional Planning and Effectiveness Committee (IPEC):

Thank you for serving in this important role to help guide our planning processes on campus. This year we will have a few activities requiring your guidance. As an advisory committee to me, please provide recommendations for action that I can consider. In particular, we are in need of a refresh to our program prioritization process. Please work quickly to refresh the academic program evaluation portion of the program prioritization process within the coming weeks so that we can consider academic programs that may no longer be viable. I also would appreciate it if all non-academic areas refresh and rerun the program prioritization process by the end of this academic year. Beyond program prioritization, we will need your assistance with some adjustments to our definition of mission fulfillment and strategic goals as required for the new NWCCU accreditation standards.

We have a white paper that describes our recent efforts on program prioritization, I am attaching it for your review and to also consider the work of the REAPP (Re-Envisioning Another Program Prioritization) committee, comprised by IPEC with faculty and staff, to suggest revisions to the process. The key revisions will be to criteria one and two. With respect to measures of productivity and contribution to strategic goals, metrics should reward enrollment, graduation and tangible measures of research productivity (e.g. program majors, student credit hours taught, research expenditures, F&A generation, degree production, etc.). I would anticipate that these measures will inform the work of our Sustainable Finance Budget workgroup. I also encourage a triage approach to allow a strict quantitative assessment that provides an initial binning into relative priorities followed by a focused process on those programs on the lower end of the evaluation scale for qualitative measures (quality, national reputation, potential for redirection, and future growth). A final step would be an appeal process to myself before any programs are recommended for closure.

For non-academic units, I encourage an approach that builds off of the program review process developed within the Provost's office for non-academic units. This process may need a few years to provide sufficient longitudinal data but should commence this year and be integrated into our larger accreditation process of continuous improvement.

In closing, I thank you for agreeing to serve on IPEC and look forward to hearing about your progress in the coming weeks. Provost Wiencek can answer any questions regarding deliverables and timelines. Again, I am grateful for your service.

Attachment: Update on Program Prioritization at the University of Idaho Final

To enrich education through diversity, the University of Idaho is an equal opportunity/affirmative action employer.

Update on Program Prioritization at the University of Idaho
April 2020

I. Introduction

A. Board Policy V.B.11: Program Prioritization

1. The State Board of Education mandates that all universities in Idaho engage in a Program Prioritization process. Results of that process are to be used by each institution as it sets priorities and allocates resources among programs and services. Program Prioritization is intended to direct resources to enable each institution to achieve its Mission, Core Themes and Strategic Plans.
2. Program Prioritization shall be incorporated in the colleges and universities' annual budgeting and program review process.
3. Annual Program Prioritization updates are to be submitted to the Board by the colleges and universities on the date and in a format established by the Executive Director.

B. Board Policy III.F. Program Prioritization

The University of Idaho, Boise State University, Idaho State University and Lewis-Clark State College shall integrate program prioritization into their respective strategic planning, programming (academic and nonacademic) and budgeting processes. As part of the program prioritization process, the institutions shall conduct an evaluation of programs and services with specific and tangible objectives, and with a focus on specific evaluation criteria.

1. All academic programs shall be evaluated with an emphasis on:

a. External demand
b. Quality of outcomes
c. Costs and other expenses.

2. Additional criteria may be considered by institutions to evaluate programs. These criteria can be weighted within the evaluation process as the institution determines appropriate. Criteria may include:

a. History, development and expectations of the program
b. External demand
c. Internal demand
d. Quality of inputs and processes
e. Quality of outcomes
f. Size, scope and productivity
g. Revenue and other resources generated
h. Costs and other expenses
i. Impact, justification and overall essentiality
j. Opportunity analysis

3. Criteria for evaluation of non-academic programs may include:

a. Key objectives and how they are measured
b. Services provided and to which customers
c. Position-by-position analysis
d. Unmet needs and demands
e. Opportunities for collaboration and restructuring

f. Opportunities to share skill sets and resources
g. Opportunities for cross-training
h. Technological improvements that are cost effective
i. Process improvements to streamline operations
j. Outsourcing exploration to improve service and cut costs

These criteria may be weighted as each institution determines appropriate.

4. Academic and non-academic programs shall be evaluated and grouped into quintiles based on relative cost efficiency and effectiveness.

All program reviews shall include an indicator of which quintile the program falls into. Annual program prioritization updates shall provide a description of the progress achieved toward implementing findings and recommendations. These are to be submitted annually to the board by the institutions in a format and timeline established by the Executive Director.

5. Institutions shall conduct program prioritization at least once every five years. Final reports must include:

a. Programs that will be improved through advancements in efficiency, quality, productivity, and focus.
b. Opportunities for improvements to organizational structure and function
c. Programs considered for consolidation or discontinuation as based on cost of delivery and degree of relevance and impact.
d. Estimated institutional savings and efficiencies created through implementation of recommendations.

6. As part of program planning processes pursuant Board Policy III.Z. and postsecondary program approval and discontinuance processes pursuant to Board Policy III.G. institutions must provide the board with information on how planned and proposed program action addresses needs identified from program prioritization.

7. Program prioritization processes must involve a diverse range of stakeholder representation at each institution. Methodology will be reported to the Board and must be transparent to institution communities while meeting the outcomes defined in this section of Board Policy.

C. Rationale to Conduct Academic Program Prioritization: The University of Idaho's current budget circumstances and cost reduction efforts engage all areas of the university's operations. The majority of university expenditures are committed to the academic areas of the institution. To ensure that careful, data informed decisions are made when considering those efforts in the academic areas a task force comprised of faculty and staff led the effort to conduct and complete a program prioritization process during FY20. Information gathered during that process formed the basis of analysis for the committee in formulating recommendations regarding program closures, consolidations and potentially other actions such as investment in high performing programs.

II. Background

In 2013, the State Board of Education (SBOE) mandated that all universities engage in program prioritization as a way to address the Governor's zero-based budgeting requirement. Their intent was for

institutions to critically review their academic programs and non-academic support functions, building a culture of continuous improvement and internal reallocation to meet each institutions' highest goals and objectives instead of reliance on new monies from the State of Idaho. This approach is based on Robert Dickeson's framework for clarifying institutional purpose and setting academic priorities, described in his book *Prioritizing Academic Program and Services: Reallocating Resources to Achieve Strategic Balance*.

Program Prioritization 2013-2015: The SBOE-mandated 2013-2015 effort by interim leadership was branded "Focus for the Future" to highlight the need for a renewed approach, given the SBOE's interest in an ongoing process. The process initially resulted in a prioritization that the SBOE found to be not compliant with their guidelines. Results and analysis were revised to meet the Board's requirements and led to six moved/restructured degrees, five program consolidations, one name change and nineteen discontinued programs. For example, the closure of the Office for Community Partnerships released over $460,000 that was invested in faculty positions in international studies, the College of Natural Resources, and additional base funding for the Library. The process was heavily criticized by the UI community for being accomplished in closed door meetings among the interim provost and deans, and for inaccurate and incomplete data used to evaluate interdisciplinary programs (programs whose metrics are not captured in Banner or F&A distribution). Interdisciplinary programs were moved into colleges without measures to ensure existing students did not suffer in the transition, and without mechanisms to continue and to measure participation by faculty outside the college of program residence.

Program Prioritization 2015-2017: New leadership worked with faculty senate in 2015-16 at the behest of the SBOE to continue to improve the program prioritization process at the UI. Updates regarding this new program prioritization were provided to the SBOE in August 2015 and August 2016. UI moved into its next improvement cycle of our program prioritization process in 2017. This process is embedded in our annual budgeting cycle and has yielded significant resources that have been dedicated toward university priorities. UI assessed overall program priority by evaluation against three criteria:

1. Essentiality to the University of Idaho's mission (20% weighting)
2. Contribution to the University of Idaho's strategic plan (50% weighting)
3. Institutional financial investment in Banner departments (30% weighting)

This approach reflected the university community's desire to align our program prioritization and strategic planning efforts.

In Fall 2017, the two highest priorities identified by the University Budget and Finance Committee (UBFC) were competitive Teaching Assistant (TA) support packages and investment in faculty and staff salaries to improve market competitiveness. Program prioritization identified $2 million in funding to commit to those efforts. This funding was coupled with an additional $2 million in anticipated new tuition revenue and centrally reallocated funds, to meet the required $4 million target for increased compensation. The funding of our TA packages to competitive levels resulted in a significant increase in new graduate student enrollment in the subsequent Fall. The salary increases for faculty and staff addressed longstanding equity issues across many dimensions of our demographics. In addition, we applied a 1.86% flat rate contribution from prior year unspent general education budgets to yield $500,000 of one-time funds for updated Zoom videoconferencing resources and to address emerging needs in University Communications, the library and Staff Council.

The results of the program prioritization process informed another $5 million in permanent base general education funding reductions in Fall 2018. Given the significant base reductions required in academic programs, the Provost instituted a position control mechanism where faculty position turnover is managed at the University level rather than at the College or department level. Of the $5 million in reallocated base funding, $3 million was utilized to address ongoing tuition revenue shortfalls and the remainder was

invested in UBFC priorities, while providing a small strategic reserve for the new president. One-time unspent general education budget accumulations contributed at a rate of 6.87% to yield $1.5 million for investment in faculty start up, University Communications, the Graduate College recruiting efforts, and the College of Art and Architecture technology upgrades.

The 2015-2017 Program Prioritization Process was highly successful in generating and applying funds to priority areas. It was heavily criticized by the UI community for the lack of a supporting basis for the choice of weighting factors. Thus, the next process sought improvement in determining initial metrics.

III. Taskforce Selection and Meetings:

a. Committee Members:

Member Name (16 w/ JW & MS)	Employee Type/Work Unit	Email
Rachel Halverson, Chair	Faculty (CLASS)	rhalverson@uidaho.edu
Peter Allen	Faculty (COS)	pballen@uidaho.edu
Jim Alves-Foss	Faculty (COE)	jimaf@uidaho.edu
Linda Chen	Faculty (CBE)	lindachen@uidaho.edu
Louise-Marie Dandurand	Faculty (CALS)	lmd@uidaho.edu
Ryan Long	Faculty (CNR)	ralong@uidaho.edu
Phillip Scruggs	Faculty (CEHHS)	pwscruggs@uidaho.edu
Barb Cosens	Faculty (LAW)	bcosens@uidaho.edu
Randall Teal	Faculty (CAA)	rteal@uidaho.edu
Cindy Ball	Staff (Chemistry)	bogar@uidaho.edu
Christian Elsberry	Staff (Advancement Services)	celsberry@uidaho.edu
Kris Freitag	Staff (OSP)	kfreitag@uidaho.edu
Ginger Carney	Dean (COS)	gingercarney@uidaho.edu
Marc Chopin	Dean (CBE)	mchopin@uidaho.edu

b. **Staffing:** Terry Grieb (Chair, Faculty Senate) and Chad Neilson (Chair, Staff Council) selected committee members. They strove to ensure representation of all colleges, faculty ranks, and staff. Eight members of the committee had been assigned to serve on the UBFC.

c. **Role of Consultants:** Given their disciplinary expertise, David Yopp and Rob Ely were invited to consult with the task force to ensure the assessment methods adopted by the task force were valid statistically. Professor Yopp wasalso a member of Re-Envisioning Another Program. Prioritization (REAPP) task force which made recommendations about how to improve the program prioritization process following the efforts of 2017-18. Rob Ely attended the taskforce meeting on January 10, 2020. David Yopp and Rob Ely also met separately with the Provost to discuss possible evaluation methods for the committee to employ when evaluating program presentations.

d. **Role of the Provost:** Given the accelerated timeline for completion of the taskforce's work, the Provost was present at each meeting of the task force up until the point that selected programs were asked to make presentations to the task force, and guided the taskforce's articulation of the program prioritization process, collected and analyzed data as instructed and supplied the taskforce with

documents for review and keeping the taskforce moving forward with endorsement and/or amendment of the program prioritization process.

e. Number of Meetings/Topics Addressed:

There were six meetings preceding program presentations to the task force: December 13, 2019; January 7, 2020; January 10, 2020; February 7, 2020; February 24, 2020; and March 5, 2020.

December 13, 2019 (3 hours):

- Review of Academic Prioritization Process done in 2017, including recommendations from REAPP (re-envisioning another program prioritization) that the first stage of the process use quantitative measures and the second stage of the process use qualitative measures.
- Discussion of formation of a small committee to review programs' mission centrality. The taskforce agreed on the following composition: President, Provost, Dean, Department Chair/Head, Faculty member and Staff member. Ben Hunter will chair the committee.
- Discussion of RBA formula and populating quintiles, including not ranking individual programs within quintiles.

January 7, 2020 (3 hours):

- Review of 2017 program prioritization process: 20% mission essentiality, 50% contribution to strategic plan, 30% institutional E&G financial support.
- Review of president's charge for 2020 and REAPP recommendations. Discussion of revenue attribution based on 50% conferrals and 50% student credit hours.
- RBA Formula:

$$RBA = \frac{(Tuition + F\&A + G\&A - GenEd\ Budget)}{GenEd\ Budget} * 100\%$$

- Further discussion of weighting of conferrals and student credit hours.
- Overview of Current Process Steps Identified:
  1. Quantitative (RBA)
  2. Small Committee Determination of Mission Centrality
  3. APP (Academic Program Prioritization) formulates recommendations and identifies programs for closure.
  4. Provost shares results with IPEC and the deans.
  5. Recommendation to the President
  6. Appeal Process with the President

January 10, 2020 (3 hours):

- Rob Ely attended this meeting as a guest consultant.
- There was extensive discussion of whether the 50/50 mix of tuition and SCH is appropriate. The committee came to an agreement that the exact weighting will be set after some sensitivity testing. For the testing process, program names will be removed, consistently giving an alpha description. A sensitivity analysis will determine the weights where rankings are most stable. This will drive the discussion at the next meeting on February 7, 2020.
- The committee continued its discussion of the appeal process. It was decided that the programs identified for elimination give a presentation to the committee consisting of no more than five slides, one point per slide. The committee would work with David and Rob to develop a rubric to evaluate the presentations. Its recommendations to the president would be based on their evaluation of the presentations. These presentations also could be recorded for the president to review as he is making the final decision.

- Presentation protocols will be discussed at the next meeting.

February 7, 2020 (2 hours):

- Jodi Walker, Director of Communications, attended this meeting as a guest.
- The committee reviewed the results of the sensitivity analysis and agreed to use 54% for SCH and 46% for conferrals. This weighting appeared to produce rankings that are close to the average rank for any given program and minimized the maximum deviations from the average ranking. This weighting scheme was used to assign tuition revenue and calculate the Return on Budget Allocated (RBA). In the final analysis step, an overall ranking was determined using a weighted scoring of 80% RBA and 20% Mission Essentiality.
- The presentation process for selected programs was revisited and defined further:
  1. Maximum of 5 PPT.
  2. 10-minutes presentation; 20 minutes for Q&A.
  3. Considerations such as job placement, grad school placement, alumni giving, and philanthropy may be included in the presentation.
- The committee chose to attempt to identify $2.5 million in savings.
- It was reinforced that the information discussed by the committee is confidential.
- Next Steps:
  1. Data will be disseminated to the deans for their review. The Provost will work with them to clarify the number of programs in the fifth quintile slated for elimination.
  2. At the committee's next meeting, members will review the data: RBA, rank by RBA, rank by mission essentiality, 80/20 RBA/mission score.

February 24, 2020 (1.5 hours):

- Discussion of reports and recommendations from deans.
- The committee identified the programs in the fifth quintile that would be invited to give a presentation to the committee: Geography, Geology, Interdisciplinary Studies, Materials Science, and Music.

March 5, 2020 (2 hours):

- Jodi Walker attended this meeting as a guest.
- Current efforts on the part of the Registrar and Cher Hendricks to review the catalog and reduce the number of options and emphases were shared with the taskforce.
- Taskforce chair updated the members on the e-mails sent to Geography, Geology, Interdisciplinary Studies, Materials Science, and Music to provide additional information.
- The provost shared the decision not to ask Geology and Interdisciplinary Studies to provide additional documentation.
- The taskforce agreed to review the additional documentation provided by Geography, Materials Science and Music and to complete a poll to indicate whether they felt the program needed to present to the taskforce. Polling results determine which programs present to the taskforce.
- The taskforce finalized the presentation format:
  1. Pre-Presentation Taskforce Discussion (30 Minutes)
  2. Program Presentation (10-minute presentation; 20 minutes for questions from the taskforce)
  3. Post-presentation Discussion to Articulate Recommendation (30 Minutes)

Presentation Schedule:
Geography –Wednesday, April 1, 2020
Materials Science – Friday, April 3, 2020
Music – Monday, April 6, 2020

IV. Resulting Recommendations:

Programs closed in recent past but still on inventory (clean up and standard processes)

J.D. Law-Litigtn & Alt Disp Res Emph

LL.M. Law

M.S. School Counseling

M.Ed. School Counseling

Grad Academic Certificate Adv Materials Technology

P.S.M. Nat Res & Envr Science

B.S. Music-History & Lit Emph

Emphasis Areas to be removed or merged

B.S. Physics-Applied Physics Emph

B.A. Organizational Sciences

Programs to be Discontinued Voluntarily (did not request appeal to Taskforce)

M.A. Philosophy

Grad Academic Certificate Analog Integrated Circuit Dsgn

Grad Academic Certificate Organizational Dynamics

Grad Academic Certificate Bioregional Plng & Commun Design

Grad Academic Certificate Urban Design

M.S. Bioregional Plng & Commun Design

M.S. Rehab Couns & Human Services (1 Tenured Faculty separation – found new position as part of transition of the program to ISU)

Program recommended for merger/restructuring by Academic Program Prioritization Taskforce

B.S. Geography – will be merged with Geology

Ph.D. Geography – will be merged with Geology

Geography

1. Ballot Results:[1]
    a. Materials submitted were adequate to take action: 12 voted “yes”; 1 voted “no.”
    b. Recommendation: 0 voted to “Close the program”; 13 voted to “Adjust the program for success.”

[1] Please note that one APP Taskforce member abstained due to conflict of interest.

2. The APP Taskforce supports Geography's plan to merge with the Department of Geology, rebrand its major, and intensify its recruitment efforts. This produces a cost savings of circa $70,000 (Administrative Coordinator; Chair's stipend).
3. The taskforce recommends that Geography explore additional steps to increase its RBA. Suggestions include, but are not limited to (note that to improve RBA in the short term, a and b would need to result in reductions in number of faculty):
    a. Increasing teaching loads;
    b. Increasing class size;
    c. Reducing general education expenses;
    d. Increasing grant funding.

4. Annual review of the program should be undertaken to ensure that the changes implemented are producing the desired cost efficiencies and program effectiveness.

Note: Geography and Geology will merge to form a new academic department which will realize some cost savings for administrative costs and offer opportunity to build on shared research interests. The Geography faculty will be reduced via non-renewals of probationary tenure track faculty and non-tenured faculty.

Program recommended for closure by Academic Program Prioritization Taskforce

B.S.M.S.E. Materials Science & Engr (6 Tenured/Tenure Track Faculty will be issued nonrenewal pending SBOE approval)

Materials Science

1. Ballot Results:
    a. Materials submitted were adequate to take action: 13 voted "yes"; 1 voted "no."
    b. Recommendation: 9 voted to "Close the program"; 5 voted to "Adjust the program for success." These are the only two choices on the ballot. The next bullet indicates that the committee was in agreement with recommending the College's plan.
2. With the understanding that a graduate program in Materials Science and Engineering in Idaho Falls will not require general education funds, the APP Taskforce is unanimous in its support of the College of Engineering's plan to eliminate the B.S. Materials Science and Engineering on the Moscow campus and to move the Ph.D. Materials Science and Engineering to Idaho Falls.
3. The APP Taskforce recommends annual review of the graduate program in Idaho Falls by the taskforce, the dean, and the department chair to assess its viability.

Progam recommended for adjustment for success by the Academic Program Prioritization Taskforce

Music

1. Ballot Results:
    a. Materials submitted were adequate to take action: 8 voted "yes"; 6 voted "no."
    b. Recommendation: 4 voted to "Close the program"; 10 voted to "Adjust the program for success."
2. The potential for improved fiscal performance was unclear from the information presented by the Director of LHSOM in response to the taskforce's questions. The Task Force recommends that the LHSOM and CLASS leadership work to clarify the expected outcomes from the proposed adjustments and to explore additional measures beyond efforts to increase enrollment to improve

the RBA. More information, for example, is necessary to determine whether eliminating B. Mus. Music Business Arts and Administration, Entrepreneurship emphasis, and General emphasis would produce a cost savings.

3. The APP Taskforce would like to emphasize that steps need to be taken to increase RBA and ensure the financial viability of the program. Short-term measures to improve RBA cannot rely on possible future increases in enrollment. Steps need to be taken to decrease costs and to increase revenue to ensure the financial viability of the program. The APP Taskforce recommends annual review of the LHSOM to assure budgets are reduced and revenues monitored appropriately.

V. Recommendations for Improving Academic Program Prioritization

The APP Taskforce offers the following recommendations for future APP processes:

1. We recommend that the APP Taskforce be convened annually to ensure that the process is continually updated and refined to produce consistent and useful information to improve the delivery and cost efficiency of academic programs. To provide continuity we recommend that the APP Taskforce members be appointed for 3 years, and to stagger appointments so that 1/3 of the Taskforce rotates onto and off the taskforce each year. Managing taskforce membership and appointments in this way will ensure at any given time institutional memory is embedded within the taskforce, while enabling a diverse and evolving contingent of faculty and staff to be engaged in the program prioritization process.

2. Quantitative and qualitative data considered during the last three program prioritization efforts have changed markedly. We recommend that university leadership work with faculty leadership and representatives of college level leadership to identify criteria that may be relied upon for more than one program prioritization cycle to inform decisions and recommendations related to program closure, investment, and related decisions. In particular, we recommend a reexamination of the use of the weighting of various factors. Despite criticism of the use of weighting in the 2015-2017 process, the 2020 process continued to do weighting (albeit at a reduced level). If weighting is used, we recommend establishing a basis for the weight of each metric that can be clearly articulated and transparent when explained to a general audience. An arbitrary weighting should not be considered sufficient.

3. We recommend an effort to acknowledge and count the interdisciplinary work that occurs outside or across programs and departments. The 2015, 2017, and this 2019/20 process have all shown that the University does not collect metrics for interdisciplinary work. Banner does not track this work and F&A is not tracked beyond the lead PI. If financial metrics are to be used for evaluation and if the University seeks to continue to hold out interdisciplinarity educational opportunities and research to be among its strengths, we must have a reliable and easily accessed means of determining:
    a. grant collaboration outside or across programs;
    b. graduate advising outside or across programs;
    c. degree/certificate/emphasis participation outside programs;
    d. and creative and scholarly activity that raises UI's reputation in areas with limited funding

4. We recommend that the next APP Taskforce reflect on whether program with concentration is the appropriate level of review and suggest that the taskforce solicit input from the deans as to which level is most appropriate to avoid arbitrary assignment of costs and benefits. The current process

looked at certificates, degree emphasis/concentrations, and all individually named degrees offered at the University. The committee recognizes that University funding models do not naturally align with degree programs, especially when those degrees are interdisciplinary in nature.

5. We recommend that future program prioritization processes provide more time for review of programs and documents, and have times set aside to meet with only members of the taskforce present early in the process. In addition, the timeline forced parallel rather than sequential processes between APP and the efforts of Colleges to meet budget reductions. This resulted in use of data prepared for APP, but not yet vetted or finalized by APP, by some deans as they considered their budget reduction strategies. We recommend future prioritization processes provide timelines that allow for deliberative, sequential processes and that provide more transparency in the data (i.e. provides a full data set) and spreadsheets. Specifically, the academic program prioritization process should be completed before budget reallocation processes take place. It is important for a future APP committee to review the data sets and models used so that they can further refine the metrics and ensure that we are collecting data that accurately informs a program prioritization process that best aligns with the university mission.

APPENDIX I

President's Charge to the Academic Program Prioritization Taskforce: Develop a two-step process:

1. Use quantitative metrics (program majors, Student Credit Hours (SCH) taught, research expenditures, F&A (Facilities and Administrative revenue associated with grants) generation, degree production, etc.) to do initial identification of programs upon which to focus additional analysis and potential closure.
2. Use additional qualitative metrics (program quality, national reputation, potential future growth, etc.) to recommend potential closures to IPEC.

Subject: Recommendations regarding Academic Program Prioritization
Attachments: APP Taskforce Report 2020.docx; Appendix APP Final Report.pdf

Dear President Green,

The Institutional Planning and Effectiveness Committee (IPEC) as well as the Academic Program Prioritization (APP) Taskforce submit to you the final report (attached) written by the APP Taskforce for your consideration.

IPEC met on April 13, 2020 to consider the recommendations of the report. IPEC was strongly in favor of accepting the recommendations of the APP Taskforce while offering its own additional recommendations. The vote was as follows: 9 in favor and 1 against (explained later). The additional recommendations follow:

1. The report focuses on roughly 20 programs out of 66 total programs in the Fifth Quintile (Q5). The other 45 programs were not named in this report because the APP Taskforce wanted to limit the exposure of these other programs as part of the process since they were deemed deserving of exemption or additional time to improve. One member of IPEC was reluctant to agree with the report, especially the rationale for excluding many of the Q5 programs from Step Two and closure consideration. It was recommended to give a summative table as an addendum to the report that articulates the disposition categories for Q5 programs and the numbers in each category. This table is below which will be included via this memo as an additional appendix to the report:

Q5 Disposition Category	Number of Programs in Category
Closure	10 (8 voluntary and 2 Material Sci programs)
Merger	7 (2 Geography, 5 in progress already)
Recently Discontinued	7
Newly Formed Program	15
Built Solely on Pre-existing Courses	8
Emphasis – Remove or Merge	2
Other Rationale for More Time	17

2. The merger of Geography and Geology opens up some intriguing possibilities even beyond the College of Science. IPEC recommends that a Presidential workgroup explore broader possibilities for such a merger.

3. Given the many Music related programs in Q5 and the lack of a plan coming from the School of Music, IPEC encourages you to engage with the Dean of CLASS to formulate an action plan to address the low RBA of the School of Music holistically.

There are numerous recommendations for continued improvements to the APP process within this report and the Taskforce recommends turning this activity into a standing committee. In addition, a parallel process needs to be run for non-academic programs consistent with the SBOE expectations. Given the unanticipated efforts that were directed towards COVID-19, IPEC recommends picking up these matters during the next Fiscal Year.

At this point, it is important that you communicate to the three academic areas that met with the APP Taskforce about your disposition in each of these cases. The programs should be offered a chance to meet with you after you relay your decision to them, so that they can make a case for reconsideration if they desire. Although the Taskforce only recommends closure of one of these programs, it certainly understands that its role is advisory and that you may opt to close other programs or to not close any program.

We hope this report meets your expectations. If you require any additional work, please reach out.

Sincerely

IPEC

University of Idaho

TO: University of Idaho Faculty and Staff

FROM: Scott Green, President

DATE: April 30, 2020

SUBJECT: Program Prioritization Recommendations Approved

The University of Idaho's mission is to deliver education, outreach and research that benefits the people of Idaho. From our deep and unwavering commitment to agriculture to our recent focus on cybersecurity, we have continued to evolve and adapt to meet the changing needs of Idaho throughout our history. It is our responsibility to ensure that everything we do is relevant, cost-effective and impactful. That requires regular review and assessment of our offerings.

Thank you to outgoing Provost John Wiencek for leading the complex process of evaluating 338 academic programs these past few months. I especially appreciate the work of the Program Prioritization Task Force. Led by Rachel Halverson, department chair of Modern Languages and Cultures, the task force conducted a detailed assessment of designated programs and provided a thoughtful slate of recommendations for me to consider.

In general, the recommendations include:

- Ongoing monitoring of 39 programs;

- Restructuring three programs;
- Merging eight academic units into four, making the programs financially stronger and more efficient; and
- Closing 10 programs, eight of which were submitted voluntarily by the dean of the respective college.

The Impact

While cost savings is not the main reason for engaging in this process, it is an outcome that is especially helpful in the current environment. Total cost savings expected from Program Prioritization changes are expected to be $1,591,000 realized over time as the changes are implemented and courses are taught out.

The deans used the Program Prioritization results as a tool to meet their $15.74 million in budget reduction goals, representing the majority of our overall campus budget reduction goal of $22 million for FY21. This approach demonstrates the commitment and resiliency of our community to make tough choices in hard times.

The Process

The task force of nine faculty, three staff and two deans began meeting in late 2019 to refresh the Program Prioritization process.

The task force implemented a two-step evaluation process. The first step focused on quantifying sources of revenue and contrasting revenue with expenditures, summarized by a metric referred to as “Return on Budget Allocated” or RBA. For programs with substantial negative RBA, additional analysis was conducted in a second step.

Step two included an opportunity for deans to self-identify programs for closure or significant change in curriculum or

structure. In addition, some recently established programs without the degree conferrals vital to the calculation of RBA were removed from further review.

Representatives from three program areas were invited to meet with the task force to discuss qualitative issues, contribution to the University of Idaho's mission and other mitigating factors. Following those discussions, the task force forwarded clear recommendations for all three programs to the Institutional Planning and Effectiveness Committee (IPEC). IPEC supported those recommendations and forwarded them to me. I approved the following actions based on those reports:

- Materials Science: All programs and degrees within this discipline will be closed, with appropriate approvals from the Idaho State Board of Education. Students in Material Sciences will be taught out to degree completion with care and attention to their individual needs.
- Music: Individual programs or emphases within this large program will be reviewed and a consolidation plan implemented. Consolidated programs will continue to improve degree completion and incorporate additional budget reductions.
- Geography and Geology: These two departments will be merged, and faculty will work on programmatic integration and improvements for the future.

As a final step in this process, I offered to meet with each program to discuss this decision. I appreciated that some faculty and program leadership shared their views on the recommendations.

The top priority now is to implement these changes with our students and their continued success as the focus. In addition,

improvement in the programs identified for restructuring is vital not only to the future sustainability of those individual programs, but also to the future of the university.

We value every program at U of I and those who work within them, which makes these decisions even more difficult. Despite our best attempts at mitigation, though, they will have a real impact on our students and the careers of our colleagues. And yet, the value of continuous program assessment and improvement is also real, not only in times of scarce resources but also as a spark for innovation and collaboration. We have been evolving as an institution for more than 130 years; embracing the possibilities of regular assessment and adaptation will ensure we not only survive, but thrive, as a prosperity engine for Idaho and beyond for the next 130.
