INDEPENDENT AUDITOR'S REPORT

Idaho State Board of Education Boise State University Boise, Idaho

We have audited the accompanying financial statements of Boise State University (University) as of and for the years ended June 30, 2007 and 2006, as listed in the table of contents. These financial statements are the responsibility of Boise State University's management. Our responsibility is to express an opinion on these financial statements based on our audit. We did not audit the financial statements of Boise State University's discretely presented component units as described in Note 13. Those financial statements were audited by other auditors whose reports thereon have been furnished to us, and our opinion, insofar as it relates to the amounts included for those component units, is based solely on the report of other auditors.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in Government Auditing Standards, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the University's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinions.

In our opinion, based on our audit and the reports of other auditors, the financial statements referred to above present fairly, in all material respects, the financial position of Boise State University and its discretely presented component units as of June 30, 2007 and 2006, and the changes in its financial position and cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

In accordance with *Government Auditing Standards*, we have also issued our report dated November 15, 2007, on our consideration of Boise State University's internal control over financial reporting and our tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* and should be considered in assessing the results of our audit.

MOSS-ADAMS LLP

CERTIFIED PUBLIC ACCOUNTANTS | BUSINESS CONSULTANTS

www.mossadams.com

The Management's Discussion and Analysis listed in the table of contents is not a required part of the basic financial statements but is supplementary information required by accounting principles generally accepted in the United States of America. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the required supplementary information. However we did not audit the information and express no opinion on it.

Our audit was conducted for the purpose of forming an opinion on the University's basic financial statements taken as a whole. The accompanying schedule of expenditures of federal awards is presented for purposes of additional analysis as required by U.S. Office of Management and Budget Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*, and is not a required part of the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and in our opinion, is fairly stated, in all material respects, in relation to the basic financial statements taken as a whole.

Eugene, Oregon November 15, 2007

Moss adams LLP

MANAGEMENT'S DISCUSSION AND ANALYSIS FOR THE YEAR ENDED JUNE 30, 2007

Management's Discussion **Analysis** and ("MD&A") presents an overview of the financial performance of Boise State University (the "University") based on currently known facts, decisions and conditions and is designed to assist readers in understanding accompanying financial statements. The MD&A discusses financial performance during the current year in comparison to prior years with emphasis on the current year.

Overview of the Financial Statements and Financial Analysis

The financial statements for fiscal years ended June 30, 2007 and June 30, 2006 are prepared in accordance with Governmental Accounting Standards Board ("GASB") principles. There are three financial statements presented: the statement of net assets; the statement of revenues, expenses, and changes in net assets; and the statement of cash flows.

The University discloses, as a component unit, any significant organizations that raise and hold economic resources for the direct benefit of the University. Organizations that are legally separate, tax-exempt entities that satisfy the criteria of GASB Statement No. 39, "Determining Whether Certain Organizations are Component Units, an amendment of GASB Statement No. 14" should be discretely presented as component units. The Boise State University Foundation, Inc. and the Bronco Athletic Association, Inc. are considered component units of the University.

Statement of Net Assets

The statement of net assets presents the assets, liabilities and net assets of the University as of

the current fiscal year-end in comparative format with the prior fiscal year-end. The purpose of the statement of net assets is to present to the readers of the financial statements a point-in-time fiscal snapshot of the University. The statement of net assets presents end-of-year data concerning assets (current and noncurrent), liabilities (current and noncurrent) and net assets (assets minus liabilities). The difference between the current and noncurrent classification is discussed in the footnotes to the financial statements.

From the data presented, readers of the statement of net assets are able to determine the assets available to continue the operations of the University. They are also able to determine how much the University owes vendors, investors and lending institutions. Finally, the statement of net assets provides a picture of the net assets, (assets minus liabilities) and their availability for expenditure by the University.

Net assets are divided into four major categories. The first category, invested in capital assets, net of related debt, provides the University's equity in capital assets. The second net asset category is restricted, nonexpendable net assets. Restricted, nonexpendable net assets are those that are required to be retained in perpetuity. The next net asset category is restricted, expendable net assets. Restricted, expendable net assets are available for expenditure by the University but must be spent for purposes as determined by donors and/or external entities that have placed time or purpose restrictions on the use of the assets. The final category is unrestricted net assets. Unrestricted net assets are available to the University for any lawful purpose of the institution.

Summary Statements of Net Assets											
As of June 30											
(Dollars	in Th	nousands)									
		2007		2006	2005						
ASSETS:											
7.002.0.	•	0.4.405	•	00.074	•	00.700					
Current assets	\$	94,485	\$	68,271	\$	60,760					
Capital assets, net		304,028		260,602		241,693					
Other assets		121,452		60,245		75,444					
Total assets	\$	519,965	\$	389,118	\$	377,897					
LIABILITIES:											
Current liabilities	\$	33,041	\$	29,467	\$	30,004					
Noncurrent liabilities		222,737		137,556		141,153					
Total liabilities		255,778		167,023		171,157					
NET ASSETS:											
Invested in capital assets, net of related debt		160,800		142,498		134,909					
Restricted, expendable		20,246		18,347		16,280					
Restricted, nonexpendable		-		-		-					
Unrestricted		83,141		61,250		55,551					
Total net assets		264,187		222,095		206,740					
Total liabilities and net assets	\$	519,965	\$	389,118	\$	377,897					

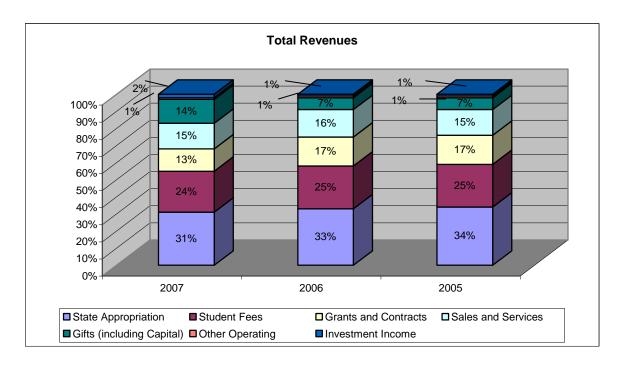

The University's total assets increased during fiscal year 2007 by \$130,846,574 from \$389,118,274 in 2006 to \$519,964,848 in 2007. The University's total liabilities also increased during fiscal year 2007 by \$88,754,831 from \$167,023,037 in 2006 to \$255,777,868 in 2007.

These changes reflect the University's continued emphasis on enhancing facilities infrastructure. As detailed in Capital Asset and Debt Administration on page seven, the University issued debt and continued or started a variety of construction projects during fiscal year 2007.

Statement of Revenues, Expenses, and Changes in Net Assets

Changes in total net assets, as presented on the statement of net assets, are based on the activity presented in the statement of revenues, expenses, and changes in net assets. The purpose of the statement is to present the revenues (operating and nonoperating) received by the University, and its component units, and the expenses (operating and nonoperating) paid by the institution and its component units and any other revenues, expenses, gains and losses received or spent by the University and its component units. The University will always reflect a net operating loss because state general fund appropriations are not reported as operating revenues.

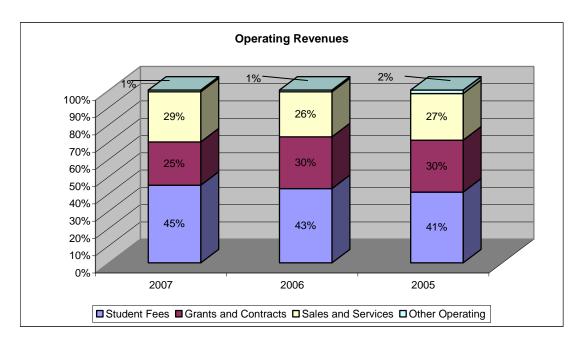

Generally speaking, operating revenues are generated by providing services to the various customers, students and constituencies of the University. Operating expenses are those expenses paid to acquire or produce the services provided in return for operating revenues and to carry out the functions of the Nonoperating revenues are University. revenues received for which services are not provided. For example, state general funds are nonoperating because the Idaho Legislative process provides them to the University without the Legislature directly receiving services for those revenues. GASB Statement No. 34, "Basic Financial Statements and Management's Discussion and Analysis for State and Local Governments" and GASB Statement No. 35. "Basic Financial Statements and Management's Discussion and Analysis for Public Colleges and Universities" defines those revenues to be nonoperating.

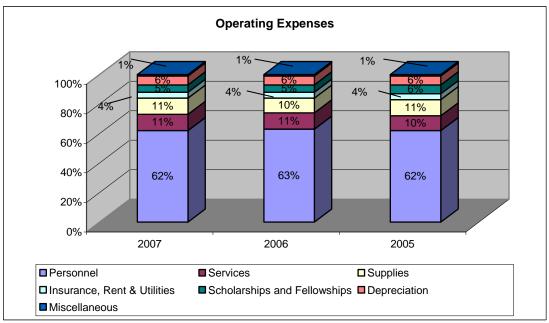

Summary Statements of Revenues, Expenses, and Changes in Net Assets Fiscal Years Ended June 30 (Dollars in Thousands)										
		2007		2006		2005				
Operating revenues	\$	147,956	\$	139,574	\$	129,136				
Operating expenses		230,575		217,897		208,578				
Operating loss		(82,619)		(78,323)		(79,442)				
Non operating revenues and expenses		100,504		87,815		79,644				
Income before other revenues, expenses, gains or losses		17,885		9,492		202				
Other Revenues and Expenses		24,207		5,863		6,782				
Increase in net assets		42,092		15,355		6,984				
Net assets—Beginning of year		222,095		206,740		199,756				
Net assets—End of year	\$	264,187	\$	222,095	\$	206,740				

The statement of revenues, expenses, and changes in net assets reflects an overall increase in net assets during fiscal year 2007. Operating increased by \$8,382,529 revenues from \$139,573,651 in 2006 to \$147,956,180 in 2007. This increase is caused, in part, by increases in student fees. Tuition and fee rates increased by 7.3% and enrollment increased by 1.1%. Ticket sales (for both athletic and non-athletic events) also factored into the increase in operating revenues. In addition, nonoperating and other revenues increased. Gifts related to the expansion of athletic facilities and the gift of

two engineering buildings from the Boise State University Foundation contributed to these increases. Operating expenses increased by \$12,678,972 from \$217,896,554 in 2006 to \$230,575,526 in 2007. Approximately \$7.2 million of this increase relates to personnel costs, as the University continues its focus on salary equity initiatives. Expenditures on computer hardware, services, and supplies also increased in 2007, as the University worked to enhance its information infrastructure technology to accommodate continued growth.

Statement of Cash Flows

The final statement presented by the University is the statement of cash flows. The statement of cash flows presents detailed information about the cash activity of the University during the year. The statement of cash flows is not presented for component units. The statement is divided into five parts. The first part deals with operating cash flows and shows the net cash used by the operating activities of the University. The second section reflects cash flows from noncapital financing activities. This section reflects the cash received and spent for nonoperating, noninvesting and noncapital

financing purposes. The third section deals with cash flows from capital and related financing activities. This section deals with the cash used for the acquisition and construction of capital and related items. The fourth section reflects the cash flows from investing activities and shows the purchases, proceeds and interest received from investing activities. The fifth section reconciles the net cash used in operating activities to operating income or loss reflected on the statement of revenues, expenses, and changes in net assets.

Summary Statements of Cash Flows										
Fiscal Ye	ars Ende	d June 30								
(Dollar	rs in Thoເ	ısands)								
		2007	2005							
Cash provided (used) by:										
Operating activities	\$	(62,748)	\$	(69,444)	\$	(66,630)				
Noncapital financing activities		98,248		92,212		84,672				
Capital and related financing activities		42,072		(36,713)		(17,926)				
Investing activities		(67,273)		11,602		6,132				
Net change in cash		10,299		(2,343)		6,248				
Cash—Beginning of year		29,649		31,992		25,744				
Cash—End of year	\$	39,948	\$	29,649	\$	31,992				

Overall, cash increased by \$10,299,850 during the year compared to a cash decrease of \$2,342,918 last year. Cash provided by capital and related financing activities totaled \$42.1 million in fiscal year 2007 compared to cash used by capital and related financing activities of \$36.7 in fiscal year 2006. This increase is explained by the net increase in proceeds from notes and bonds payable of \$81.7 million in 2007, compared to a net decrease of \$4.4 million in 2006. The University received proceeds from issuance of new notes and bonds

payable of \$130.1 million in 2007, and paid \$48.4 million of principal, while in 2006, no proceeds from issuance of new notes and bonds were received, and \$4.4 million of principal was paid. Cash used by investing activities in 2007 totaled \$67.3 million in 2007 compared to cash provided by investing activities of \$11.6 million in 2007. This reflects the placement of cash from 2007 debt issuance into investments to maximize yield while awaiting disbursement for capital projects.

Capital Asset and Debt Administration

The University's capital assets, prior to depreciation, increased by \$53.8 million from \$396.4 million in 2006 to \$450.2 million in 2007. The University continued to build and acquire property and buildings consistent with the Campus Master Plan. Capital asset additions in 2007 included continued construction on the Interactive Learning Center of \$9.4 million, \$5.5 million expended towards the Bronco Stadium addition, \$8.4 million expended on a third parking structure, and \$1.7 million expended as the University begins the expansion and renovation of the Student Union Building. Additions also include the donation of two Engineering buildings from the Boise State

University Foundation totaling \$12.4 million, and the acquisition of \$8.2 million in land to facilitate the future construction of a new Bronco track facility. Total notes, bonds, and capital leases increased by \$81 million from \$139.2 million in 2006 to \$220.2 million in 2007. The University issued \$96,365,000 of general revenue and refunding bonds in January, 2007, \$28,710,000 of general revenue bonds in March, 2007, and refunded approximately \$45 million of previously issued bonds during the year. Construction proceeds from the 2007 issuances are earmarked for the Bronco Stadium and Student Union projects, as well as a new Student Health, Wellness, Counseling and Nursing building.

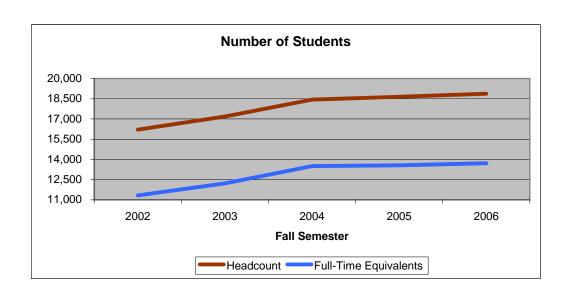

Economic Outlook

The State of Idaho concluded fiscal year 2007 with an approximately \$247 million surplus in the general fund. Revenues exceeded projections by \$106 million, adding to the planned surplus of \$141 million. Due to the strength of the financial performance, higher education in Idaho received, for fiscal year 2008, an 8.4 % increase from fiscal year 2007 levels in appropriated funding. This was distributed across all institutions and is reflected in Boise State University's fiscal year 2008 appropriated budget as an increase of \$5,766,000 or 7.6%.

In addition to increased state funding, Boise State University received permission to increase

student fees for fiscal year 2008 by 6.2%. This increase represents a 3.9% increase in tuition and 2.3% increase in facility and activity fees. Boise State University has experienced record-breaking enrollment in 10 of the last 11 years that have put pressure on infrastructure. As a result, increases in funding are channeled to increasing square footage of facilities available and to faculty salaries to meet current student demand. In Fall of 2003, the University began to raise admission standards, which has helped slow growth to a manageable pace. Information available as of the date of the financial statements indicates that enrollment for Fall of 2007 is 2.8% higher than Fall 2006 levels.

NOTES TO FINANCIAL STATEMENTS FOR THE FISCAL YEARS ENDED JUNE 30, 2007 AND JUNE 30, 2006

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Reporting Entity — The University is part of the public system of higher education in the State of Idaho. The system is considered part of the State of Idaho reporting entity, and is directed by the State Board of Education ("SBOE"), a body that is appointed by the Governor and confirmed by the legislature. The University is part of the primary government of the State of Idaho and is included in the State's Comprehensive Annual Financial Report ("CAFR") within the Business-Type Activities/Enterprise Funds. The University's financial statements are prepared accordance in pronouncements of the Governmental Accounting Standards Board ("GASB") and in Generally accordance with Accepted Accounting Principles ("GAAP").

The Foundation was established for the purpose of soliciting donations and to hold and manage invested donations for the exclusive benefit of the University. Association is a fund raising organization that provides financial assistance and services to University intercollegiate department. Financial statements of the component units may be obtained from the Vice President for Finance and Administration at the University. Component unit's financial statements are prepared in accordance with GASB pronouncements and in accordance with GAAP.

Basis of Accounting — For financial reporting purposes, the University is considered a special-purpose government engaged only in business-type activities. Accordingly, the University's financial statements have been presented using the economic resources measurement focus and the accrual basis of accounting in accordance with GAAP. Under the accrual basis, revenues are recognized when earned, and expenses are recorded when an obligation has been incurred. All significant intra-agency transactions have been eliminated.

The University has the option to apply all

Financial Accounting Standards Board ("FASB") pronouncements issued after November 30, 1989, unless FASB conflicts with GASB. The University has elected to not apply FASB pronouncements issued after the applicable date.

Cash with Treasurer — Balances classified as cash with treasurer are amounts that have been remitted to the State of Idaho as a result of the student fee collection process and, once remitted, these balances are under the control of the State Treasurer. The University is not entitled to any interest earnings on these balances.

Cash and Cash Equivalents — The University considers all liquid investments with a remaining maturity of three months or less at the date of acquisition to be cash equivalents. Cash balances that are restricted and not expected to be expended within the subsequent fiscal year are classified as noncurrent assets.

Inventories — Inventories, consisting primarily of bookstore inventories, are valued at the lower of first-in, first-out ("FIFO") cost or market.

Investments — The University accounts for its investments at fair value in accordance with GASB Statement No. 31, Accounting and Financial Reporting for Certain Investments and for External Investment Pools. Changes in unrealized gains or losses on the carrying value of investments are reported as a component of change in fair value of investments in the statement of revenues, expenses, and changes in net assets. Investments that are externally restricted to make debt service payments, maintain sinking or reserve funds, or to purchase or construct capital or other noncurrent assets as well as investment amounts with maturities that exceed one year, are classified as noncurrent assets in the statement of net assets.

The University deposits funds for investment with the Idaho State Treasury. Funds deposited with the State Treasury can be subject to securities lending transactions initiated by the State Treasury.

Capital Assets, net — Capital assets are stated at cost when purchased or constructed, or if acquired by gift, at the estimated fair value at the date of gift. The University's capitalization policy includes all items with a unit cost of \$5,000 or more, and an estimated useful life of greater than one year. Renovations to buildings and land improvements that significantly increase the value or extend the useful life of the structure capitalized. Routine repairs maintenance are charged to operating expense in the period in which the expense was incurred.

Depreciation is computed using the straight-line method over the estimated useful lives of the assets, generally 40 to 50 years for buildings, 20 to 25 years for land improvements, 10 years for library books, and 5 to 13 years for equipment.

The University has certain collections that it does not capitalize, including the Nell Shipman Film collection and Albertson's Library Special Collections. These collections adhere to the University's policy to (a) maintain them for public exhibition, education or research; (b) protect, keep unencumbered, care for, and preserve them; and (c) require proceeds from their sale to be used to acquire other collection items. Generally accepted accounting principles collections maintained in this manner to be charged to operations at the time purchased rather than capitalized.

Noncurrent Liabilities — Noncurrent liabilities include principal amounts of revenue bonds payable, notes payable, and capital lease obligations with contractual maturities greater than one year, other liabilities that will not be paid within the next fiscal year and other liabilities that, although payable within one year, are to be paid from funds that are classified as noncurrent assets.

Net Assets — The University's net assets are classified as follows:

Invested in Capital Assets, Net of Related Debt — This represents the University's total investment in capital assets, net of outstanding debt obligations related to those capital assets. To the extent debt has been incurred but not yet expended for capital assets, such amounts are not included as a component of invested in capital assets, net of related debt.

Restricted, Expendable — Restricted, expendable net assets include resources in which the University is legally or contractually obligated to spend in accordance with restrictions imposed by external third parties.

Restricted, Nonexpendable — Restricted, nonexpendable net assets consist of endowment and similar type funds in which donors or other outside sources have stipulated, as a condition of the gift instrument, that the principal is to be maintained inviolate and in perpetuity, and invested for the purpose of producing present and future income, which may either be expended or added to principal.

Unrestricted — Unrestricted net assets represent resources derived from student fees, state appropriations, and sales and services of educational departments and auxiliary enterprises. These resources are used for transactions related to the educational and general operations of the University, and may be used to meet current expenses for any lawful purpose, and in accordance with SBOE policy.

When an expense is incurred that can be paid using either restricted or unrestricted resources, the University's policy is to first apply the expense towards restricted resources, and then towards unrestricted resources.

Income and Unrelated Business Income Taxes — The University, as a political subdivision of the State of Idaho, is excluded from federal income taxes under Section 115(1) of the Internal Revenue Code, as amended. The University is liable for tax on its unrelated business income. Defined by the Internal Revenue Code, unrelated business income is income from a trade or business, regularly carried on, that is not substantially related to the performance by the

organization of its exempt purpose or function. The University did not incur unrelated business income tax expense in the fiscal years ended June 30, 2007 or 2006

Classification of Revenues and Expenses — The University classifies its revenues and expenses as operating or nonoperating according to the following criteria. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with the University's principal ongoing operations. Operating revenues include activities that have characteristics of exchange transactions, such as (1) student fees, net of scholarship discounts and

allowances, (2) sales and services of auxiliary enterprises, (3) most federal, state and local grants and contracts that are essentially contracts for services, and (4) interest earned on institutional student loans.

Nonoperating revenues and expenses include activities that have characteristics of nonexchange transactions, such as transactions related to capital financing activities or investing activities as defined by GASB Statement No. 9, Reporting Cash Flows of Proprietary and Nonexpendable Trust Funds and Governmental Entities That Use Proprietary Fund Accounting. Revenues from state general appropriations are classified as nonoperating as defined by GASB Statement No. 34.

Student fee revenues, and certain other revenues from students, are reported net of scholarship discounts and allowances in the statements of revenues, expenses, and changes in net assets. Scholarship discounts and allowances are the difference between the stated charge for goods and services provided by the University, and the amount that is paid by students and/or other third parties making payments on the students' behalf. Certain governmental grants, such as Pell grants, and other federal, state or nongovernmental programs, are recorded as either operating or nonoperating revenues in the University's

financial statements. To the extent that

Scholarship Discounts and Allowances —

revenues from such programs are used to satisfy student fees and related charges, the University has recorded a scholarship discount or allowance.

Use of Accounting Estimates — The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent liabilities at the date of the financial statements, and revenues and expenses during the year. Actual results could differ from those estimates.

Reclassifications — Certain prior year balances have been reclassified to conform to the current year presentation.

New Accounting Standards — In June 2004, the GASB issued Statement No. 45, "Accounting and Financial Reporting by Employers for Postemployment Benefits Other Than Pensions". This Statement generally requires that the University account for and report the cost and obligations related to postemployment healthcare and other nonpension benefits ("OPEB") and include disclosures regarding its OPEB plans. OPEB costs are likely to be based on actuarially determined amounts that, if paid on an ongoing basis, generally would provide sufficient resources to pay benefits as they come due. The provisions of GASB No. 45 may be Statement applied prospectively and do not require the University to fund its OPEB plans. University may establish its OPEB liability at zero as of the beginning of the initial year of implementation; however, the unfunded liability is required to be amortized over future periods. The requirements of this Statement for the University are effective for the fiscal year ending June 30, 2008. The University has not completed the process of evaluating the impact that will result from adopting this Statement and is therefore unable to disclose the impact that adopting the Statement will have on its financial statements.

In November 2006, the GASB issued Statement No. 49, "Accounting and Financial Reporting for Pollution Remediation Obligations". This Statement addresses accounting and financial reporting standards

for pollution (including contamination). remediation obligations, which are obligations to address the current or potential detrimental effects of existing pollution by participating in pollution remediation activities such as site assessments and cleanups. The University has not completed the process of evaluating the impact that will result from adopting this Statement and is therefore unable to disclose the impact that adopting the Statement will have on its GASB No. 49 financial statements. The requirements of this Statement are effective for the fiscal year ending June 30, 2009.

In May 2007, the GASB issued Statement No. 50, "Pension Disclosures", an amendment of GASB Statements No. 25 and No. 27. This Statement more closely aligns financial reporting requirements for pensions with those for other post-employment benefits and provides enhanced disclosures in the notes to financial statements and required supplementary information. Management has not yet determined the impact this standard will have on the State's financial statements. The requirements of this Statement are effective for the fiscal year ending June 30, 2008.

In June 2007, the GASB issued Statement No. 51, "Accounting and Financial Reporting for Intangible Assets". This Statement defines an intangible asset's required characteristics, and generally requires that they be treated as capital assets. Management has not yet determined the impact this standard will have on the State's financial statements. The requirements of this Statement are effective for the fiscal year ending June 30, 2010.

2. CASH WITH TREASURER, CASH AND CASH EQUIVALENTS, OTHER DEPOSITS, AND INVESTMENTS

Deposits — Cash with treasurer is under the control of the State Treasurer and is carried at cost. Cash and cash equivalents are deposited with US Bank and are carried at cost. Custodial risk is the risk that in the event of a financial institution failure, the State's deposits may not be returned. The State's policy for managing custodial risk can be found in the Idaho Code, Section 67-2739.

Management believes the University is in compliance with the policy.

Cash that is restricted in purpose from an external source and is not expected to be utilized within the next fiscal year is reported on the financial statements as restricted cash and as a noncurrent asset.

Basis of Custodial Credit Risk as of June 30		
	2007	2006
Insured	\$ 100,000	\$ 100,000
Uncollateralized	143,516	134,813
Collateralized by Securities held by the pledging financial institution	17,103,768	 14,497,529
Total	\$ 17,347,284	\$ 14,732,342

Investments — Idaho Code, Section 67-1210, limits credit risk by restricting the investment activities of the Local Government Investment Pool ("LGIP") and state agencies. Idaho Code gives the SBOE the authority to establish investment policies for the Colleges and Universities. Section V, Subsection D of the Idaho SBOE Governing Policies and Procedures authorizes investments among some, but not all, of the investment types authorized for the State Treasurer.

Objectives of the University's investment policy are, in order of priority, safety of principal, ensuring necessary liquidity and achieving a maximum return. Covenants of certain bond resolutions also restrict investment of related funds to U.S. Government or government guaranteed securities.

The University invests in external investment pools managed by the State of Idaho. The pools are managed by the State Treasurer's Office in compliance with Idaho Code, Sections 67-1201 through 67-1222. The University had \$68,833,593 and \$22,484,269 with market value invested in these external pools as of June 30, 2007 and 2006, respectively.

Investments Held-in-Trust represent government securities held in the University's name. The entire amount of these investments is restricted by bond indentures or other contractual agreements.

Credit Risk of Debt Securities — The risk that an issuer of debt securities or another counterparty to an investment will not fulfill its obligation is commonly expressed in terms of the credit quality rating issued by a nationally recognized statistical rating organization such as Moody's, Standard and Poor's, and Fitch's.

(Ratings, as of June 30, are presented below using the Moody's scale). The State of Idaho external investment pools were assigned a rating of AAA by Standard and Poor's on May 23, 2007. This AAA rating signifies that the portfolio holdings provide extremely strong protection against losses from credit defaults

Interest Rate Risk — Investments in debt securities that are fixed for longer periods are likely to experience greater variability in their fair values due to future changes in interest rates. Less than 1% of total investments are invested in securities with periods longer than 5 years.

Concentration of Credit Risk—When investments are concentrated in one issuer, this concentration represents heightened risk of potential loss. No specific percentage identifies when concentration of risk is present. The Governmental Accounting Standards Board has adopted a principle that governments should provide note disclosure when five percent of the total government investments are

concentrated in any one issuer. AAA rated securities represented sixty-six percent and ninety-nine percent of the portfolio as of June 30, 2007 and June 30, 2006 respectively, mitigating the risk of concentration. Thirty-three percent of the total portfolio (2007A construction funds) is represented by asset backed securities at a fixed rate of 5.038% interest to mature June 1, 2009.

The University is subject to policies as defined by the State of Idaho with respect to investments. The University has not adopted a formal policy addressing interest rate and concentration of credit risk.

3. ACCOUNTS RECEIVABLE AND UNBILLED CHARGES, NET

Accounts receivable and unbilled charges refer to the portions due to the University, as of June 30, by various customers, students

and constituencies of the University as a result of providing services to said groups.

	 2007	2006
Student fees	\$ 8,067,123	\$ 7,208,37
Auxiliary enterprises and other operating activities	3,184,005	2,798,89
Federal, state, and private grants and contracts	906,687	1,720,70
Unbilled charges	 5,317,726	5,336,85
Accounts receivable and unbilled charges	17,475,541	17,064,82
Less allowance for doubtful accounts	 (3,155,858)	(2,501,77
Accounts receivable and unbilled charges, net	\$ 14,319,683	\$ 14,563,04

4. STUDENT LOANS RECEIVABLE

Student loans made through the Federal Perkins Loan Program (the "Program") comprise substantially all of the loans receivable at June 30, 2007 and 2006. The Program provides for cancellation of a loan at rates of 10% to 30% per year up to maximum of 100% if the participant complies with certain provisions. The Federal Government reimburses the University for amounts cancelled under these provisions.

Loans receivable from students bear interest at rates ranging from 5% to 10% and are generally repayable in installments to the University over a 5 to 10 year period commencing 6 or 9 months after the date of separation from the University. The University out sources the loan servicing to a third party vendor.

As the University determines that loans are uncollectible and not eligible for reimbursement by the Federal Government, the loans are written off and assigned to the U.S. Department of Education. The University has provided an allowance for uncollectible loans, which, in management's opinion, is sufficient to absorb loans that will ultimately be written off. The allowance for uncollectible loans was \$24,450 and \$39,625 for fiscal years ending June 30, 2007 and 2006, respectively.

In the event the University should withdraw from the Program or the Federal Government was to cancel the Program, the University would be required to repay \$8,209,463 as of June 30, 2007.

5. CAPITAL ASSETS, NET

6. UNEARNED REVENUE

Unearned revenues include amounts received for student fees, prepaid ticket sales, and other amounts received prior to the end of the fiscal year that will be earned in subsequent years. Student fees

represent the portion of summer school revenues related to the number of days of instruction in the subsequent fiscal year and prepaid Fall semester fees. Unearned revenue consists of the following at June 30:

	20	007	2006
Student fees	\$ 2,2	281,662 \$	2,718,254
Prepaid ticket sales	4,5	592,935	3,152,420
Other unearned revenue	2,0	16,275	530,639
Unearned revenue	\$ 8,8	\$90,872	6,401,313

7. LONG-TERM LIABILITIES

8. NOTES AND BONDS PAYABLE

The University is required by bonding resolution to establish a Rebate Fund to be held and administered by the University, separate and apart from other funds and accounts of the University. The University shall make deposits into the Rebate Fund of all amounts necessary to make payments of rebatable arbitrage to the United States. There was no arbitrage liability in fiscal years June 30. ending 2007 and Management believes the University is in compliance with all bond covenants as of June 30, 2007 and 2006.

The University issued \$96,365,000 of General Revenue and Refunding Bonds (Series 2007A), \$25,860,000 General Revenue Bonds (Series 2007B), and \$2,850,000 General Revenue Bonds (Series 2007C) during the period ended June 30,

2007. Proceeds of the 2007A Bond in the amount of \$49,665,038 were received by the University for designated projects and costs of issuance and \$46,519,281 was deposited in trust to refund portions of the 1998 Student Fee Refunding and Improvement Revenue Bonds, the 2001 Student Building Fee Revenue Bonds, the 2002 Student Union and System Refunding Housing Improvement Revenue Bonds, and to pay capitalized interest. The aggregate difference in debt service between the refunding debt and refunded debt was \$3,223,089 and the net present value of the savings due to refunding was \$2,505,846. Proceeds of the 2007B and 2007C Bonds in the amount of \$28,280,972 were received by the University for designated projects and costs of issuance. The University deposited \$1,220,899 in trust to pay capitalized interest.

Pledged Revenue — As stated in the bond descriptions below, the University has pledged certain revenues as collateral for debt instruments. The pledged revenue amounts and coverage requirements are as follows for the year ended June 30, 2007:

	Ser	ies

9. CAPITAL LEASE OBLIGATIONS

The University has entered into various capital lease agreements covering buildings and equipment. Assets under capital lease are included in capital assets, net of depreciation. Amortization of assets under

capital lease is included in depreciation expense. These amounts are included in capital assets. The University leases a building from the Foundation.

Future minimum lease obligations under these agreements are as follows for the year ending June 30, 2007:

	Capital Leases 2007								
		Building	Е	quipment		Total			
2008	\$	425,696	\$	441,166	\$	866,862

10. RETIREMENT PLANS AND TERMINATION BENEFITS

Public Employee Retirement System of Idaho— The Public Employee Retirement System of Idaho ("PERSI"), a cost-sharing multiple-employer public retirement system, was created by the Idaho State Legislature. It is a defined benefit plan requiring that both

the member and the employer contribute. The plan provides benefits based on members' years of service, age, and compensation. In addition, benefits are provided for disability, death, and survivors of eligible members or beneficiaries. Designed

as a mandatory system for eligible state and school district employees, the legislation provided for other political subdivisions to participate by contractual agreement with PERSI. The benefits and obligations to contribute to the plan were established and may be amended by the Idaho State Legislature. Financial reports for the plan are available from PERSI upon request.

After 60 months of credited service, members become fully vested in retirement benefits earned to date and receive a lifetime benefit at retirement. Members are eligible for retirement benefits upon attainment of the ages specified for their employment classification. For each month of credited service, the annual service retirement allowance is 2% of the average monthly salary for the highest consecutive 42 months.

Contributions, for the three years ended June 30, are as follows:

PERSI:	2007	2006	2005
University required contribution rate	10.39%	10.39%	10.39%
Percentage of covered payroll for employees	6.23%	6.23%	6.23%
University contributions required and paid	\$ 3,036,069	\$ 3,154,078	\$ 3,052,342

Optional Retirement **Plan** — Effective July 1, 1990, the Idaho State Legislature authorized the SBOE to establish an Optional Retirement Plan ("ORP"), а defined contribution plan, for faculty and exempt employees. The employee contribution requirement for the ORP is based on a percentage of total payroll. Employer contributions are determined by the State of Idaho. The plan provisions were established by and may be amended by the State of Idaho.

New faculty and exempt employees hired July 1, 1990 or thereafter automatically enroll

in the ORP and select their vendor option. Faculty and exempt employees hired before July 1, 1990 had a one-time opportunity to enroll in the ORP. Enrollees in the ORP no longer belong to PERSI. Vendor options include Teachers Insurance and Annuity Association - College Retirement Equities Fund and Variable Annuity Life Insurance Company.

Participants are immediately fully vested in the ORP. Retirement benefits are available either as a lump sum or any portion thereof upon attaining 55 years of age.

Contributions, for the three years ended June 30, are as follows:

ORP:	2007		2006	2005		
University contribution	\$ 5,059,669	\$	4,599,225	\$	4,049,101	
Employee contribution	 4,529,497		4,153,486		3,656,676	
Total contribution	\$ 9,589,166	\$	8,752,711	\$	7,705,777	
University contribution rate	7.72%	72% 7			7.72%	
Employee contribution rate	6.97%		6.97%		6.97%	

As of July 1, 2007 the university contribution rate for the ORP will increase to 9.258%. Although enrollees in the ORP no longer belong to PERSI, the University is required to

contribute to PERSI. The contribution rate for fiscal year 2007 is 3.03% of the annual covered payroll. The contribution rate will change as of July 1, 2007 to 1.49%. These

annual supplemental payments are required through July 1, 2025. During the years ended June 30, 2007, 2006 and 2005, this supplemental funding payment to PERSI was \$1,908,399, \$1,801,480, and \$1,583,547, respectively. This amount is not included in the regular University PERSI contribution discussed previously.

Postretirement Benefits Other Than Pensions — The University also offers a life insurance plan for retired employees. During the years ended June 30, 2007, 2006 and 2005, the University incurred expenditures totaling \$191,357, \$175,207, and \$147,540, respectively, to purchase life insurance for approximately 276 retired employees. All eligible employees are receiving these benefits. The University accounts for this program on a pay-as-you-go basis; however, the GASB has issued a new accounting standard (GASB Statement No. 45. "Accounting and Financial Reporting by Employers for Postemployment Benefits Other Than Pensions") that will, when adopted, require the University to record this obligation on an actuarially determined basis. An actuarially determined valuation of this

obligation would likely be significantly higher than the amount currently accrued.

Termination Benefits — Employees who qualify for retirement under PERSI or ORP are eligible to use 50% of the cash value of their unused sick leave, with limits based on years of service, to continue their medical insurance coverage through the University. This benefit is classified as a termination benefit under GASB Statement No. 16, "Accounting for Compensated Absences". The University partially funds these obligations by depositing 0.65% of employee gross payroll with PERSI, who administers the plan as a cost-sharing, multiple-employer plan. The total contributions for the years ended June 30, 2007, 2006 and 2005 were \$608.815. \$583,791, and \$531.596. respectively.

PERSI issues a publicly available financial report that includes financial statements and required supplementary information. That report may be obtained by writing to Public Employee Retirement System of Idaho, P.O. Box 83720, Boise, ID 83720-0078.

11. RISK MANAGEMENT

The University participates in the State of Idaho risk management and group insurance programs. Payments are made to the risk management fund based on rates determined by a five year trend of experience modification factors, which are determined by a combination of loss experience, exposure, and asset value covered. Payments made to the group insurance fund are based on actuarial estimates of the amounts needed to

pay for negotiated coverage and projected claims experience. Premiums are billed on a calendar year beginning January 1. Premiums are then adjusted as necessary within the first quarter of the subsequent calendar year. The University billed premiums are projected to be \$689,030 for calendar year 2007, and were \$735,044 and \$749,223 for calendar years 2006 and 2005 respectively.

12. COMPONENT UNITS

Boise State University Foundation, Inc— The net assets of the Foundation represent 82% of the combined component unit as presented in the financial statements and, as such, the Foundation has been determined

by management to be a major component unit as defined by GASB Statement No. 39. Condensed financial statement data is as follows:

(a) Cash, Cash Equivalents, and Other Deposits and Investment

The Foundation, through its Board of "Board"), Directors (the appoints investment committee that determines investment guidelines, sets the spending and engages the investment rules. manager(s) and custodian(s). The Board oversees and approves all investment and asset allocation policies proposed by the Investment Committee. Furthermore, the Board and the Investment Committee acknowledge and understand their fiduciary roles and will always seek to act prudently in the best interests of the Foundation.

The Investment Committee is also to monitor and review the actions of the investment manager(s) and custodian(s), make

recommendations on investment policy, and oversee the management of all other assets of the Foundation. The Investment Committee reports regularly to the Board of Directors.

The overall investment policy is to maximize the return on investments within an acceptable range of risks. Appropriate levels of investment risk will be determined by guidelines and influenced by spending rules. The principal of the Endowment should be protected over time with a spending rule set to maintain the purchasing power of returns from the assets. The component units invest in investments that are allowed by State of Idaho law.

Basis of Custodial Credit Risk as of June 30	2007	2006		
Uninsured and uncollateralized	\$ 2,031,006	\$ 3,409,546		

Credit Risk — The risk that an issuer of debt securities or another counterparty to an investment will not fulfill its obligation is commonly expressed in terms of the credit quality rating issued by a nationally recognized statistical rating organization such as Moody's, Standard and Poor's, and Fitch's.

The ratings, as of June 30, 2007, are presented below using the Moody's scale:

	U	S Treasury	Corporate			Bond Mutual	
Rating		Bonds	Bonds			Funds	Fair Value
Aaa	\$	457,849	\$	6,615,599	\$	-	\$ 7,073,448
Aa1		-		-		20,742,898	20,742,898
Aa2		-		-		4,808	4,808
A1		-		1,000,570		-	1,000,570
A3		-		50,000		2,583	52,583
B1		-		50,042		15,359	65,401
B2		-		50,964		-	50,964
Unrated		-		-		128,057	128,057
Total	\$	457,849	\$	7,767,175	\$	20,893,705	\$ 29,118,729

Interest Rate Risk — Investments in debt securities that are fixed for a longer period of time are likely to experience greater variability in their fair values due to future

changes in interest rates. Maturities by investment type, as of June 30, 2007, are as follows:

Investment Type	Fair Value		< 1 yr		1-3 yr		3-10 yr	>10 yr	
Rated Securities:	·								
US Treasury Bonds	\$	457,849	\$ -	\$	-	\$	-	\$	457,849
Corporate Bonds		7,767,175	6,993,324		773,851		-		-
Bond Mutual Funds		20,893,705	-		-		20,893,705		-
Total Rated Securities	\$	29,118,729	\$ 6,993,324	\$	773,851	\$	20,893,705	\$	457,849

Concentration of Credit Risk—When investments are concentrated in one issuer, this concentration represents heightened risk of potential loss. No specific percentage identifies when concentration of risk is present. The Governmental Accounting Standards Board has adopted a principle that governments should provide note disclosure

when five percent of the total government investments are concentrated in any one issuer. Investments in obligations specifically guaranteed by the U.S. government, mutual funds, and other pooled investments are exempt from disclosure. The Foundation has not invested more than five percent of their investments in any one issuer.

(b) Amounts Held in Custody for Others

The Bronco Athletic Association, Inc. (the "Association") transferred assets to the

Foundation for investment and management, which are included in amounts held in

custody for others. Included in amounts held in custody for others on behalf of the Association are \$15,432,832 and \$13,400,630 at June 30, 2007 and 2006, respectively.

(c) Donated Services

The University provided staffing and other general office support to the Foundation totaling \$1,003,524 and \$589,713 in fiscal years ending June 30, 2007 and 2006, respectively. Additionally, volunteers make substantial contributions of time to support

the Foundation for which no value is assigned. The value of volunteer services is not reflected in the accompanying financial statements since they are not susceptible to objective measurement or valuation.

Other Component Unit — Contributions, recorded as gifts, received by the University from the Association totaled \$8,839,685 and \$7,694,178 as of June 30, 2007 and 2006, respectively. Net assets of the Association at June 30, were as follows:

Association									
2007									
\$	9,502,621	\$	8,273,362						
	6,285,370		6,577,761						
	1,536,783		1,583,521						
	68,476		93,427						
\$	17,393,250	\$	16,528,071						
		\$ 9,502,621 6,285,370 1,536,783 68,476	\$ 9,502,621 \$ 6,285,370 1,536,783 68,476

14. CONTINGENCIES AND LEGAL MATTERS

Revenue from federal research and service grants includes amounts for the recovery of overhead and other costs allocated to these projects. The University may be required to make refunds of amounts received for overhead and other costs reimbursed as a result of audits by agencies of the Federal Government. University officials are of the opinion that the effect of these refunds, if any, will not have a significant effect on the

financial position of the University.

The University is a defendant in litigation arising from the normal course of operations. Based on present knowledge, the University's management believes any ultimate liability in these matters will not materially affect the financial position of the University.

REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH GOVERNMENT AUDITING STANDARDS

Idaho State Board of Education Boise State University Boise, Idaho

We have audited the financial statements of Boise State University (University) as of and for the year ended June 30, 2007, and have issued our report thereon dated November 15, 2007. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States.

INTERNAL CONTROL OVER FINANCIAL REPORTING

In planning and performing our audit, we considered the University's internal control over financial reporting as a basis for designing our auditing procedures for the purpose of expressing our opinion on the financial statements, but not for the purposes of expressing an opinion on the effectiveness of the University's internal control over financial reporting. Accordingly, we do not express an opinion on the effectiveness of the University's internal control over financial reporting.

A control deficiency exists when the design or operation of a control does not allow management or employees, in normal course of performing the assigned functions, to prevent or detect misstatement on a timely basis. A significant deficiency is a control deficiency, or combination of control deficiencies, that adversely affects the University's ability to initiate, authorize, record, process, or report financial data reliably in accordance with generally accepted accounting principles such that there is more than a remote likelihood that a misstatement of the University's financial statements that is more than inconsequential will not be prevented or detected by the University's internal control.

A material weakness is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the financial statements will not be prevented or detected by the University's internal control.

Our consideration of the internal control over financial reporting was for the limited purpose described in the first paragraph on this section and would not necessarily identify all deficiencies in internal control that might be significant deficiencies or material weaknesses. We did not identify any deficiencies in internal control over financial reporting that we consider to be material weaknesses, as defined above.

COMPLIANCE AND OTHER MATTERS

As part of obtaining reasonable assurance about whether the University's financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit, and accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

We communicated other matters which were noted during the course of our audit to management of the University and the Idaho State Board of Education.

This report is intended solely for the information and use of the Idaho State Board of Education, management, federal awarding agencies and pass-through entities, and is not intended to be and should not be used by anyone other than these specified parties.

REPORT ON COMPLIANCE WITH REQUIREMENTS APPLICABLE TO EACH MAJOR PROGRAM AND ON INTERNAL CONTROL OVER COMPLIANCE IN ACCORDANCE WITH OMB CIRCULAR A-133

Idaho State Board of Education Boise State University Boise, Idaho

COMPLIANCE

We have audited the compliance of Boise State University (University) with the types of compliance requirements described in the U.S. Office of Management and Budget (OMB) *Circular A-133 Compliance Supplement* that are applicable to each of its major federal programs for the year ended June 30, 2007, except as described in the second paragraph of this report. The University's major federal programs are identified in the summary of auditor's results section of the accompanying schedule of findings and questioned costs. Compliance with the requirements of laws, regulations, contracts, and grants applicable to each of its major federal programs is the responsibility of the University's management. Our responsibility is to express an opinion on the University's compliance based on our audit.

We did not audit the University's compliance with the requirements governing Student Loan Billing and Due Diligence in Collection compliance requirements specified by the Federal Perkins Loan Program and described in the *OMB Circular A-133 Compliance Supplement*. Compliance with these requirements was audited by other auditors whose report thereon has been furnished to us and our opinion expressed, herein, insofar as it relates to the University's compliance with those requirements, is based solely on the report of other auditors.

We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America; the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States; and OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*. Those standards and OMB Circular A-133 require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major federal program occurred. An audit includes examining, on a test basis, evidence about the University's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion. Our audit does not provide a legal determination of the University's compliance with those requirements.

In our opinion, based on our audit and the report of the other auditor, the University complied, in all material respects, with the requirements referred to above that are applicable to each of its major federal programs for the year ended June 30, 2007. However, the results of our auditing procedures disclosed instances of noncompliance with those requirements, which are required to be reported in accordance with OMB Circular A-133 and which are described in the accompanying schedule of findings and questioned costs as item 2007-01.

INTERNAL CONTROL OVER COMPLIANCE

The management of the University is responsible for establishing and maintaining effective internal control over compliance with the requirements of laws, regulations, contracts, and grants applicable to federal programs. In planning and performing our audit, we considered the University's internal control over compliance with the requirements that could have a direct and material effect on a major federal program in order to determine our auditing procedures for the purpose of expressing our opinion on compliance, but not for the purpose of expressing an opinion on the effectiveness of internal control over compliance. Accordingly, we do not express an opinion on the effectiveness of the University's internal control over compliance.

A *control deficiency* in an entity's internal control over compliance exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect noncompliance with a type of compliance requirement of a federal program on a timely basis. A *significant deficiency* is a control deficiency, or combination of control deficiencies, that adversely affects the entity's ability to administer a federal program such that there is more than a remote likelihood that noncompliance with a type of compliance requirement of a federal program that is more than inconsequential will not be prevented or detected by the entity's internal control.

A material weakness is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that material noncompliance with a type of compliance requirement of a federal program will not be prevented or detected by the entity's internal control.

Our consideration of internal control over compliance was for the limited purpose described in the first paragraph of this section and would not necessarily identify all deficiencies in the University's internal control that might be significant deficiencies or material weaknesses. We did not identify deficiencies in internal control over compliance that we consider to be material weaknesses, as defined above.

The University's response to the finding identified in our audit is described in the accompanying schedule of findings and questioned costs. We did not audit the University's response and, accordingly, we express no opinion on it.

This report is intended solely for the information and use of the Idaho State Board of Education, management, and federal awarding agencies and pass-through entities and is not intended to be and should not be used by anyone other than these specified parties.

Eugene, Oregon November 15, 2007

Auditee qualified as low-risk auditee?	X yes no

BOISE STATE UNIVERSITY SCHEDULE OF FINDINGS AND QUESTIONED COSTS, (Continued) FOR THE YEAR ENDED JUNE 30, 2007

Section II - Financial Statement Findings

None.

Section III - Federal Award Findings and Questioned Costs

FINDING 2007-01—Allowable Costs: Personnel Level of Effort Reporting

Federal Program: Research and Development (R&D) Cluster

Federal Agency: National Science Foundation, US Department of Defense, NIH, US Department of Agriculture, HHS, US EPA REGION 10

Award Year. 2006-2007

Criteria-- OMB Circular A-21, Section J.10c(2)., provides guidance on compensation for personnel services for salaries and wages charged to federal grants for institutions that elect to operate on After-the-fact Activity Reporting. Boise State University (BSU) operates on After-the-fact Activity Reporting. A key provision of this requirement is that for professorial and professional staff, reports will be prepared each academic term, but no less frequently than every six months. For other employees, unless alternate arrangements are agreed to, the reports will be prepared no less frequently than monthly and will coincide with one or more pay periods. BSU uses a Payroll Contract and Grant Certification Report to comply with this requirement, with semi-annual completion required, matching the two semester terms to the academic year.

Condition – Our testing revealed 7 out of 14 Payroll Certification Reports for the period January 1, 2007 through June 30, 2007 had not been certified by the employee or supervisor for accuracy.

Questioned Costs- None.

Context – Effective January 1, 2007, BSU initiated an electronic effort reporting system. After completing trial runs using the new software, BSU determined that their confidence level as to the accuracy of the data produced from the system was not sufficient. BSU subsequently decided to resume the prior practice of paper certifications.

Effect—By not completing the Payroll Certification Reports, there is potential that BSU could misallocate payroll charged to the individual grants, especially those where actual effort differs from estimated effort.

Cause - The noncompliance with the Activity Reporting requirement is due to the change in the effort reporting system, which BSU was migrating to a new system. While the explanation appears reasonable, Payroll Certification Reports have yet to be completed for the second half of the 2007 fiscal year.

Recommendation - We recommend BSU complete the Payroll Certification Reports for the period mentioned above. We also recommend BSU review the current reporting procedures to ensure complete and timely compliance with Circular A-21.

University's Response (*Unaudited*) - The University is developing and implementing a revised effort certification process and will be certifying payroll for the period from January 1, 2007 through June 30, 2007. This process is estimated to be completed by January 31, 2008. Payroll adjustments identified from that certification process will be recorded as necessary. Future effort certifications will be performed on a bi-annual basis and will be completed within 90 days of the period end. Additionally, the University is reviewing and improving a number of functions that will improve effort reporting processes. An example includes electronic time and attendance reporting.

NOTES TO SCHEDULE OF EXPENDITURES OF FEDERAL AWARDS YEAR ENDED JUNE 30, 2007

1. BASIS OF PRESENTATION

The accompanying schedule of expenditures of federal awards includes federal grant activity of the University and is presented on the accrual basis of accounting. The information in this schedule is presented in accordance with the requirement of OMB Circular A-133, Audits of States, Local Governments and Non-Profit Organizations. Therefore, some amounts presented on this schedule many differ from amounts presented in, or used in the preparation of, the basic financial statements.

2. UNIVERSITY ADMINISTRED LOAN PROGRAMS

The University administers the following loan programs:

Loan Program	Number	Loan	Balances	
Federal Perkins	84.038	\$ 10,018,673		
Nursing Student		\$	5,433	

Total loan expenditures and disbursements of the Department of Education (Perkins) and the Department of Health and Human Services (Nursing two and four year) student financial assistance programs for the year ended June 30, 2007 are identified below:

Loan Program	Number	Loan Disbursements			
Federal Perkins	84.038	\$ 2,726,259			

The above expenditures for the Federal Perkins Loan Program included loans to students and administrative cost allowances. The expenditures reported in the Schedule of Expenditures of Federal Awards include the administrative cost allowances and the Federal Capital Contribution for the year ended June 30, 2007.

NOTES TO SCHEDULE OF EXPENDITURES OF FEDERAL AWARDS YEAR ENDED JUNE 30, 2007
