DATA NOTES about Postsecondary Enrollment Rates Released June 2019

The Office of State Board of Education (OSBE) receives student enrollment and graduation numbers from two sources: Idaho public postsecondary institutions and the National Student Clearinghouse (NSC). Students who have opted for private records are not included in this report.

Idaho public postsecondary institutions submit data directly to OSBE while the NSC reports on enrollment and graduation records from participating schools throughout the country. The NSC includes data from more than 3,500 colleges and universities, enrolling over 98% of all students in public and private U.S. institutions.

1. Fall enrollment data for the 1 year and 2 year Go On rates for all cohorts included in this report includes enrollment information from Idaho's colleges and universities and data from the National Student Clearinghouse (for students enrolled in private colleges or universities or out of state).

2. Spring 2019 enrollment data for the 1 year Go On rates for the 2018 cohort and the 2 year Go On rates for the 2017 cohort is from the National Student Clearinghouse only, and represents data pulled in February 2019.

- Spring 2019 enrollment data from Idaho's college and universities will be available in July and the Go On report will be updated to include that data by August 15, 2019.
- Based on historical trends, we anticipate the statewide Go On rates will increase by a couple percentage points once data is received directly from the colleges and universities. The impact on individual school districts and charter schools could be larger than that, particularly for small districts. There are several factors that cause this:
 - > The National Student Clearinghouse does not send any data on students who request FERPA exemptions.
 - > The National Student Clearinghouse only uses first name, middle initial, last name, and date of birth to do matching. This results in some enrolled students not being tracked.
 - > Some National Student Clearinghouse data imports lag beyond when we request the data
 - > If a college or university sends data for a student without including the social security number and then sends data on the same student later with a social security number, that student sometimes ends up with two identifies in the National Student Clearinghouse. Unfortunately, we do not get either record in our data requests. This issue has happened with as high as 5% of records in the past.
