Three-Year Plan

Planning and Delivery of Postsecondary Programs

The State Board of Education established in alignment with Board Policy III.Z., a comprehensive process for the planning and delivery of postsecondary education. Consistent with this policy, institutions create an institution plan that describes all current programs and proposed programs to be offered in alignment with each institution's Statewide and Service Region Program Responsibilities. The process requires that institutions provide a level of programmatic information for each current program being offered and for each proposed program as part of the three-year plan development.

Statewide Program Responsibility

In accordance with Board Policy III.Z.1.i, Statewide Program Responsibility shall mean an institution's responsibility to offer and deliver a Statewide Program in all regions of the state. Statewide Program Responsibilities are assigned to a specific institution by the Board, taking into account the degree to which such program is uniquely provided by the institution.

Service Region Program Responsibility

In accordance with Board Policy III.Z.1.g, Service Region Program Responsibility shall mean an institution's responsibility to offer and deliver a Service Region Program to meet regional educational and workforce needs in its primary service region as defined in subsection 2.b.ii.1) and 2) below. Service Region Program Responsibilities are assigned to the Designated Institution in each service region, but may be offered and delivered by Partnering Institutions in accordance with the procedures outlined in this policy.

The Three-Year Plan consists of proposed programs institutions have identified they will pursue over a three-year period. As proposed programs are developed, institutions must follow the program review process and procedures provided in Board Policy III.G, Postsecondary Program Approval and Discontinuance to acquire appropriate approvals prior to implementation of programs. If the program is to be delivered outside the institution's service region, a Memorandum of Understanding must be developed and agreed upon in cooperation with the Board's Chief Academic Officer prior to implementation.

The Plan also consists of a complete program inventory of programs currently being offered by Idaho's public postsecondary institutions. Programs are listed by CIP code and then alphabetically by institution. The list includes programs, options, and degrees offered through various departments and colleges.

Consistent with Board Policy III.Z., the Plan is updated on an annual basis. It is intended that the Three-Year Plan will provide guidance to the State Board of Education in its planning and coordination of educational programs.

Delivery of Programs

Consistent with Board Policy III.Z., “Statewide Program Responsibilities are assigned to a specific institution by the Board, taking into account the degree to which such program is uniquely provided by the institution.” The statewide program list is updated by the Board every two years.

Interdisciplinary Studies	BA	Region V	Regional	2023-2024	The College of Arts and Letters already offers a non-specialist BA degree (University Studies) for students wanting a broad undergraduate degree but wishing to take courses from across the university rather than specializing in a single major program. The University Studies program offers extremely broad choice in terms of curricular variety which meets the needs of certain students. Other students are looking for ways to design a unique combination of two or three programs (e.g., courses from Music and from Psychology because of interest in music therapy). This approach to creating a carefully defined interdisciplinary curricular option not available in a single program is in line with other institutions offering an "Interdisciplinary Studies" degree. While it is technically possible to pursue a carefully designed interdisciplinary curriculum within the current University Studies program, University Studies requirements would limit some students with the University Studies requirements for a certain number of credits to come from the College of Arts and Letters. Also, the label "University Studies" has limited recognition and is not seen as suggesting the same thing that "Interdisciplinary Studies" does. MOD: face-to-face and online/remote. Since this program will have a highly flexible curriculum, it would be possible to complete in other regions, also.	No new resources needed		
Investigative Forensics	BS	Region V	Regional	2023-2024	This program will prepare students for a variety of non-laboratory-based careers, including medicolegal death investigators, forensic evidence recovery technicians, or law enforcement positions specializing in investigation. According to a 2009 report by the National Academy of Sciences, the need for academically trained criminalists and crime scene investigators has increased significantly. This program will respond to the forecasted job outlook for Forensic Science Technicians, which is promising and growing much faster than average (17%) between 2016-26. Graduates will receive training in identifying, collecting, and interpreting forensic evidence with a solid natural science background in addition to training in forensic methods, field and laboratory procedures, and the law. MOD: traditional face-to-face with some portion online/remote.	Reallocation of existing resources and anticipated grant funding to support new facilities needs

Pharmaceutical and Cosmetic Sciences	BS	Region V	Regional	2023-2024	The B.S. in Pharmaceutical and Cosmetic Sciences would focus on pharmacology, physiology and formulation of drugs and cosmetics. This four-year program would prepare students for careers in the pharmaceutical, cosmetics and related industries. This would be a unique program in Idaho. Housed in the ISU College of Pharmacy, the program would support pre-pharmacy students, Pharmaceutical Science Graduate Programs, and small business development in Idaho. The broad scope of the program is expected to expand our ability to recruit students beyond those normally attracted to health and science programs. The program would thus create new student admissions, not simply divert students from other science programs (ex. Chemistry and Biology), to a new program. The combination of pharmacology, pharmaceuticals and cosmetics would be a unique program in the U.S. as well.	Recruitment assistance; Faculty: 3-4 FTE are anticipated (~\$300K-\$400K/year); Research Laboratory space for new faculty; Startup funding for faculty: \$400-600K (for 3-4 faculty); CPI funding for industrial internships (~\$2000/year / internship offered) 3-5 anticipated (\$10K total/year)		
Public Health	DrPH	All regions	Regional	2023-2024	ISU and BSU plan to combine resources and collaborate on the Doctor of Public Health degree. With limited resources at both universities the parties will look to leverage faculty resources to create programmatic foci that complement each institution. This collaboration will also allow for research partnerships that may not have occurred otherwise. MOD: hybrid-online and traditional.	No additional resources needed. If we help these students address recommended competencies from our professional association and requirements for an Idaho license as Speech Language Pathology Assistant, the graduates would be better prepared for jobs at the end of the Bachelor's program.
